OLDEST AND LEADING NEWSPAPER IN CIRCULATION IN THE COUNTY OF LINCOLN, NEW MEXIC

VOLUME 23 CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, FEB. 2, 1923 NUMBER

Legislative Doings

(Special Correspondence)

Santa Fe, N. M.—The finance and appropriations committee has started its work.

With the beginning of this committee's work on the budget submitted by state officials, the most important legislation of the present administration begins to take shape. The appropriations bill, when it reaches the house, will contain the administration's program of economy.

Hearings were scheduled to start before the committee Monday morning. It is expected that at least a week will be consumed in hearing the claims for appropriations. However, it was stated that many of the requests put into the budget were there merely on a chance that they might go through. Some of these requests from institutions are said to be unnecessary.

Representative Smalling, of McKinley county, is chairman of the committee. Associated with him are Representatives Bent, Dennis Chavez, Ramon C. Chavez, Howard, Puryear, Sanchez and Winston.

Representative Finley, Lincoln county, introduced a measure of importance in his bill to abolish the game commission. The duties now performed by this body would be transferred to the governor and the game warden under Mr Finley's measure. The bill likely will be reported out of committee within a few days and passed.

Ignoring the senate's effort to check or provide for a whitewashing investigation of state institutions and officials, the house majority adopted a resolution calling for probe of the prison.

The committee to investigate conditions in the penitentiary for the last six years is composed of Floor Leader Howard, chairman; Representative Hughes, Luna county, and Representative Rivera, Rio Arriba county. Mr. Rivera is the minority leader in the house.

The Republican minority in the house fought hard to prevent the adoption of the resolution calling for a probe of the prison. The debate brought forth a declaration from Mr. Howard:

"At the close of the McDonald administration, the penitentiary was thoroughly investigated by the Republicans and was found to be in better condition than it ever was, more economically operated, and the books were clean, with not a trace of fire about them.

"We gave the Republicans in the senate a chance to join in this investigation, but they will not investigate, because they never have where they have been involved.

"I do not know if convicts were murdered. The public thinks one was. I do not know if convicts were fired upon like dogs. The public thinks yes. The public also thinks a convict was struck on the head with a baseball bat. I do not know if these things are true. We have not investigated—yet.

"I do not know if eggs bought for the penitentiary were sold to the convicts. The public thinks they were, and the public pays the bill and freight. I do not know if a truck load of produce found upset on the road to the warden's ranch belonged to the state.

"But, gentlemen, we will know when the committee is through."

The minority raised a question that it was not given the same representation on the committee as held by the Democrats. Floor Leader Howard then read the personel of senate committees. In the Republican controlled senate, committees have seven Republicans and three Democrats, while the Democrats are not permitted a voice in the powerful senate committee on committees.

Representative Frenger told the house that an investigation of the conduct of the prison was demanded by all citizens of the state, not just by the Democrats alone.

The principal regret expressed at Secretary Fall's resignation is that it was not accompanied by the resignation of Attorney General Daugherty.

Arranged Geographically

(New York World)

When the President surrendered to the farm bloc and renounced his purpose to reappoint former Governor Harding to the Federal Reserve Board he prepared more trouble for himself than he dreamed of. He is now reaping his reward for having yielded to intimidation.

As an amiable peace maker the President's plans were carefully laid. Three appointments were made, which newspapers friendly to Mr. Harding described as in the nature of a "geographical deal whereby the dirt farmers both in the South and north were to have been honored." The Comptroller of Currency was honored beyond his deserts by being promoted to the Federal Reserve Board, and Milo D. Campbell of Michigan was selected because of his nominal qualifications as a dirt farmer. Then from somewhere out in New Mexico James G. McNary, banker, stock-grower and ranch owner, was fished up, at the personal instance of Secretary Fall, to take Mr. Crissinger's place as Comptroller of the Currency and serve on the Federal Reserve Board. What more could the farm bloc possibly want?

But as it turns out the Senate Committee on Banking and Currency has gone behind Secretary Fall's indorsement of Mr. McNary and refuses to accept him on any terms. So once more, thanks to his trustworthy Secretary of the Interior, who is to quit the Cabinet in six weeks, the President is in a pretty predicament. The whole "geographical deal" calculated to conciliate the dirt farmers has gone to smash, and Republican Senators are considering whether it might not suit the President's convenience to recall all three nominations.

Once the Crissinger, Campbell, McNary appointments are recalled, the way will be open for another "geographical deal" to please the farm bloc. It appears to be settled that that is the way the Federal Reserve Board, with its highly important functions, is to be organized, since with the President's consent it is now definitely in politics

Parsons News Letter

Frequent snow storms and continued cold weather has been the program in the hills for the past week.

Elgie Givens, who was the proud possessor of a regulation Boy Scout rifle, met with a very serious accident last week when he attempted to use it. Instead of it going off, for some unknown reason the cartridge exploded and blew the gun to pieces. Elgie was cut in several places, but the most serious injury seemed to be to his eyes. His father took him to Dr. Johnson in Carrizozo, and upon his advice to Dr. Swearingen in Roswell. At first it was thought Elgie would lose the sight of one eye and possibly both, but the latest report from Dr. Swearingen is that he thinks he can save the sight of both eyes.

Miss Dorothy Weeks, who has been visiting here, left Monday for her home in Chicago.

Miss Helen Ries is visiting Mrs [illegible] in Carrizozo this [illegible]

[illegible] a week [illegible]

Gloves Cost More

Officials of a New York association of retail dry goods dealers inform their customers that the new Fordney-McCumber profiteers' tariff law is responsible for the big rise in the price of gloves, as it is also for the higher cost of other commodities. The retailers' association is circulating a letter "written by one of the largest manufacturers and importers of gloves in New York City."

"According to the last ruling of the glove appraiser at the Port of New York, the advance in tariff on our lines of imported gloves is considerably in excess of what we expected," says the letter.

Some of the increases cited in the duty on gloves are as follows: Florine, 2-clasp, kid, overseam, $2 a dozen pairs under the Democratic law; now $6 20: Seville, 1-pearl clasp, kid, pique, $2 25 under Democratic law; now $7: Elsinoro, 2-pearl clasps, kid, pique, $2 25 under Democratic law; now $8: Fielder, 4-button, semi-mousquetaire, kid, formerly $2 25; now $9 20. In the case of certain long gloves the duty imposed by the Democratic tariff act has been doubled and trebled by the profiteers' law. For example, the Underwood-Simmons law put a duty of $3.75 a dozen on 12-button Seville, mousquetaire pique gloves. These are taxed at $12 20 a dozen under the new Republican law. The tariff on 20-button, mousquetaire, overseam gloves was $5.50 a dozen under the Democratic tariff. The rate is now $22 a dozen.

These increases of 200 and 300 per cent in the rates are made to cover gloves that are not in competition with those of American make, since none of the sort are manufactured here.

The importer has made plain his intention to collect the increases from the dealers, who in turn will include the tariff in the prices their customers will be expected to pay.

Attempted Burglary

An attempt was made to enter the City Market, of which Roy G. Skinner is proprietor, Tuesday night of this week. Marshal Vega was notified of the attempt by parties who heard the burglars at work at the rear window, and immediately hastened to the scene. As the marshal neared the building, he saw a man dart around the corner of the building and vanish in the dark. Thinking the burglars were in the building, the marshal secured assistance to guard both the front and rear of the store, and notified the owner. As soon as Mr. Skinner arrived, he discovered that, while a rear window had been broken and the sash partially removed, the inner shutter of wood remained intact and he knew the store had not been entered. Three sacks found near the scene indicated the intention of the burglars to be for the purpose of loading up on groceries, which they were prevented from doing by the alarm given and the prompt arrival of the marshal. Whether the near-burglary was the effort of local parties or by passers-through the town has not been determined.

Little Child Dies

"Kidding" the Farmers

The Republican policy of isolation—political, commercial and social—from 1918 was the chief factor in the ruin that came to the American farmer in 1921-22. Isolation meant no further international cooperation—after 1918—either by the government or by bankers or business men—in any definite or systematic way, to maintain or keep stabilized, the international exchange, credit, and trade situation, so as to keep a steady and even flow of commerce back and forth between Europe and America. The result was that when the cash and the liquid or gilt-edged credit of Europe became exhausted, she could not, unaided, keep stabilized the exchange situation and so buy our surplus foodstuffs or raw materials so as to go to work. Europe needed vast quantities of these, being entirely depleted. The result was—her purchasing power becoming exhausted—that the mechanism and entire international trade situation became dislocated and demoralized, and prices and market conditions in Europe went to pieces early in 1921. The fluctuating exchange was one cause of this. The law of supply and demand was thereby suspended.

Since that time our farmers have sold to Europe in a disrupted and dislocated market, which meant any old price far below that which the law of supply and demand would have fixed under some reciprocal trade conditions which international economic cooperation would have maintained.

It is "kidding" the farmer pure enough to point to the larger quantity of his exports during 1921-22 to a broken and collapsed market and keeping silent as the grave about the almost nominal prices he got, when the farmer is only interested in the latter. Our farmers could have exported even larger quantities had they been willing to give it away or take nominal prices.

Everyone knows that tens and even hundreds of millions of able bodied people in Europe have either been in want or star[illegible] for our surplus foodstuffs d[illegible] 1921-22, and that the law of [illegible] ply and demand therefore w[illegible] have insured a splendid pric[illegible] our surplus if permitted to ope[illegible]

BASIL SANTOINE

Gabriel Warden, Seattle capitalist, tells his butler he is expecting a caller, to be admitted without question. He informs his wife of danger that threatens him if he pursues a course he considers the only honorable one. Warden leaves the house in his car and meets a man whom he takes into the machine. When the car returns home, Warden is found dead, murdered, and alone. The caller, a young man, has been at Warden's house, but leaves unobserved. Bob Connery, conductor, receives orders to hold train for a party. Five men and a girl board the train, the Eastern Express. The father of the girl, Mr. Dorne, is the person for whom the train was held. Philip D. Eaton, a young man, also boarded the train. Dorne tells his daughter and his secretary, Don Avery, to find out what they can concerning him. The two make Eaton's acquaintance.

CHAPTER IV—Continued.

—4—

The canyon through the snowdrifts, bored by the giant rotary plow the night before, was almost filled; drifts of snow eight or ten feet high and, in places, pointing still higher, came up to the rear of the train; the end of the platform itself was buried under three feet of snow; the men standing on the platform could barely look over the higher drifts.

"There's no way from the train in that direction now," Harriet Dorne lamented as she saw this. "What shall we do with ourselves?"

"Cribbage, Harriet? You and I?" Avery invited.

She shook her head. "If we have to play cards, get a fourth and make it auction; but must it be cards? Isn't there some way we can get out for a walk?"

"There's the top of the cars, Miss Dorne," Eaton suggested. "If we could get up there, we'd get a fairly decent walk and see everything."

"Good!" the girl applauded. "How do we get up?"

"I'll see the conductor about it," Eaton offered; and before Avery could discuss it, he started back through the train.

CHAPTER V

The Hand in the Aisle.

The man whose interest in the passenger in Section Three of the last sleeper was most definite and understandable and, therefore, most openly acute, was Conductor Connery. Connery had passed through the Pullman several times during the morning, had seen the hand which hung out into the aisle from between the curtains; but the only definite thought that came to him was that Dorne was a sound sleeper.

Nearly all the passengers had now breakfasted. Connery, therefore, took a seat in the diner, breakfasted leisurely and after finishing, walked back through the train. Dorne by now must be up, and might wish to see the conductor.

As Connery entered the last sleeper his gaze fell on the dial of pointers which, communicating with the push-buttons in the different berths, tell the porter which section is calling him, and he saw that while all the other arrows were pointing upward, the arrow marked "3" was pointing down. Dorne was up, then—for this was the arrow denoting his berth—or at least was awake and had recently rung his bell.

Connery looked in upon the porter, who was cleaning up the washroom.

"Section Three's getting up?" he asked.

"No, Mistah Connery—not yet," the porter answered.

"What did he ring for?" Connery looked to the dial, and the porter came out of the washroom and looked at it also.

"Fo' the lan's sake. I didn't hear no ring, Mistah Connery. It mus' have been when I was out on the platform."

"Answer it, then," Connery directed.

As the negro started to obey, Connery followed him into the open car. He could see over the negro's shoulder the hand sticking out into the aisle, and this time, at sight of it, Connery started violently. If Dorne had rung, he must have moved; a man who is awake does not let his hand hang out in the aisle. Yet the hand had not moved. The long, sensitive fingers fell in precisely the same position as before, stiffly separated a little one from another; they had not changed their position at all.

"Wait!" Connery seized the porter by the arm. "I'll answer it myself."

He dismissed the negro and waited until he had gone. He looked about and assured himself that the car, except for himself and the man lying behind the curtains of Section Three, was empty. Walking briskly as though he were carelessly passing up the aisle, he [illegible] against the hand and [illegible] [illegible]

The [illegible]

shoulders jerked, and he drew back, instinctively pressing his two clenched hands against his chest and the pocket which held President Jarvis' order.

The man in the berth was lying on his right side facing the aisle; the left side of his face was thus exposed; and it had been crushed in by a violent blow from some heavy weapon which, too blunt to cut the skin and bring blood, had fractured the cheekbone and bludgeoned the temple. The proof of murderous violence was so plain that the conductor, as he saw the face in the light, recoiled with staring eyes, white with horror.

He looked up and down the aisle to assure himself that no one had entered the car during his examination; then he carefully drew the curtains together again, and hurried to the forward end of the car, where he had left the porter.

"Lock the rear door of the car," he commanded. "Then come back here."

He gave the negro the keys, and himself waited to prevent anyone from entering the car at his end. Looking through the glass of the door, he saw the young man Eaton standing in the vestibule of the car next ahead. Connery hesitated; then he opened the door and beckoned Eaton to him.

"Will you go forward, please," he requested, "and see if there isn't a doctor—"

"You mean the man with red hair in my car?" Eaton inquired.

"That's the one."

Eaton started off without asking any questions. The porter, having locked the rear door of the car, returned and gave Connery back the keys. Connery still waited, until Eaton returned with the red-haired man. He let them in and locked the door behind them.

"You are a doctor?" Connery questioned the red-haired man.

"I am a surgeon; yes."

"That's what's wanted, Doctor—"

"My name is Sinclair. I am Douglas Sinclair of Chicago."

Connery nodded. "I have heard of you." He turned then to Eaton. "Do you know where the gentleman is who belongs to Mr. Dorne's party?—Avery, I believe his name is."

"He is in the observation car," Eaton answered.

"Will you go and get him? The car-door is locked. The porter will let you in and out. Something serious has happened here—to Mr. Dorne. Get Mr. Avery, if you can, without alarming Mr. Dorne's daughter."

Eaton nodded understanding and followed the porter, who, taking the keys again from the conductor, let him out at the rear door of the car and reclosed the door behind him. Eaton went on into the observation car.

Without alarming Harriet Dorne, he got Avery away and out of the car.

"Is it something wrong with Mr. Dorne?" Donald Avery demanded as Eaton drew back to let Avery precede him into the open part of the car.

"So the conductor says."

Avery hurried forward toward the berth where Connery was standing

"You See Him as We Found Him, Sir."

beside the surgeon. Connery turned toward him.

"I sent for you, sir, because you are the companion of the man who had this berth."

Avery pushed past him, and leaped forward as he looked past the surgeon. "What has happened to Mr. Dorne?"

"You see him as we found him, sir." Connery stared down nervously beside him.

Avery leaned inside the curtains and recoiled. "He's been murdered!"

"It looks so, Mr. Avery. Yes; if he's dead, he's certainly been murdered," Connery agreed. "You can tell"—Connery avoided mention of President Jarvis' name—"tell anyone who asks you, Mr. Avery, that you saw him just as he was found."

He looked down again at the form in the berth, and Avery's gaze followed his; then, shrugging, it turned away. Avery stood [illegible] his eyes [illegible] [illegible]

[illegible]

man's head, there was no evidence of anything unusual. It was self-evident that, whatever had been the motives of the attack, robbery was not one; whoever had struck had done no more than reach in and deliver his murderous blow; then he had gone on.

Sinclair made first an examination of the head; completing this, he unbuttoned the pajamas upon the chest, loosened them at the waist and prepared to make his examination of the body.

"How long has he been dead?" Connery asked.

"He is not dead yet. Life is still present," Sinclair answered guardedly. "Whether he will live or ever regain consciousness is another question."

"One you can't answer?"

"The blow, as you can see"—Sinclair touched the man's face with his deft finger-tips—"fell mostly on the cheek and temple. The cheekbone is fractured. He is in a complete state of coma; and there may be some fracture of the skull. Of course, there is some concussion of the brain."

Any inference to be drawn from this as to the seriousness of the injuries was plainly beyond Connery. "How long ago was he struck?" he asked.

"Some hours. Since midnight, certainly; and longer ago than five o'clock this morning."

"Could he have revived half an hour ago—say within the hour—enough to have pressed the button and rung the bell from his berth?"

Sinclair straightened and gazed at the conductor curiously. "No, certainly not," he replied. "That is completely impossible. Why did you ask?"

Connery avoided answer. But Avery pushed forward. "What is that? What's that?" he demanded.

"Will you go on with your examination, Doctor?" Connery urged.

"You said the bell from this berth rang recently!" Avery accused Connery.

"The pointer in the washroom, indicating a signal from this berth, was turned down a minute ago," Connery had to reply. "A few moments earlier all pointers had been set in the position indicating no call."

"That was before you found the body?"

"That was why I went to the berth—yes," Connery replied; "that was before I found the body."

"Then you mean you did not find the body," Avery charged. "Someone, passing through this car a minute or so before you, must have found him!"

Connery attended without replying.

"And evidently that man dared not report it and could not wait longer to know whether Mr.—Mr. Dorne was really dead; so he rang the bell!"

"Ought we keep Doctor Sinclair any longer from the examination, sir?" Connery now seized Avery's arm in appeal. "The first thing for us to know is whether Mr. Dorne is dying. Isn't—"

Connery checked himself; he had won his appeal. Eaton, standing quietly watchful, observed that Avery's eagerness to accuse now had been replaced by another interest which the conductor's words had recalled. Whether the man in the berth was to live or die—evidently that was momentously to affect Donald Avery one way or the other.

"Of course, by all means proceed with your examination, Doctor," Avery directed.

As Sinclair again bent over the body Avery leaned over also; Eaton gazed down, and Connery—a little paler than before and with lips tightly set.

CHAPTER VI

"Isn't This Basil Santoine?"

The surgeon, having finished loosening the pajamas, pulled open and carefully removed the jacket part, leaving the upper part of the body of the man in the berth exposed. Conductor Connery turned to Avery.

"You have no objection to my taking a list of the articles in the berth?"

Avery seemed to oppose; then, apparently, he recognized that this was an obvious part of the conductor's duty. "None at all," he replied.

Connery gathered up the clothing, the glasses, the watch and purse, and laid them on the seat across the aisle. Sitting down, then, opposite them, he examined them, and, taking everything from the pockets of the clothes, he began to catalogue them before Avery. He counted over the gold and banknotes in the purse and entered the amount upon his list.

"You know about what he had with him?" he asked.

"Very closely. That is correct. Nothing is missing," Avery answered.

The conductor opened the watch. "The crystal is missing."

Avery nodded. "Yes; it always—that is, it was missing yesterday."

Connery looked up at him, as though slightly puzzled by the manner of the reply; then, having finished his list, he rejoined the surgeon.

Sinclair was still bending over the naked torso. It had been a strong, healthy body; Sinclair guessed its age at fifty. As a boy, the man might have been an athlete—a college track-runner or oarsman—and he had kept himself in condition through middle age. There was no mark or bruise upon the body, except that on the right side and just below the ribs there now showed a scar about an inch and a half long and of peculiar [illegible] shape. It was evidently a [illegible] and [illegible] completely [illegible]

[illegible] this carefully [illegible] to Avery. "He [illegible]

Avery hesitated. "I believe so."

He watched Sinclair more closely as he continued his examination. Connery touched the surgeon on the arm. "What must be done, Doctor? And where and when do you want to do it?"

Sinclair, however, it appeared, had not yet finished his examination. "Will you pull down the window curtains?" he directed.

As Connery, reaching across the body, complied, the surgeon took a matchbox from his pocket, and glancing about at the three others as though to select from them the one

"He Was Operated On Recently?"

one most likely to be an efficient aid, he handed it to Eaton. "Will you help me, please? Strike a light and hold it as I direct—then draw it away slowly."

He lifted the partly closed eyelid from one of the eyes of the unconscious man and nodded to Eaton. "Hold the light in front of the pupil."

Eaton obeyed, drawing the light slowly away as Sinclair had directed, and the surgeon dropped the eyelid and exposed the other pupil.

"What's that for?" Avery now asked.

"I was trying to determine the seriousness of the injury to the brain. I was looking to see whether light could cause the pupil to contract. There was no reaction."

"His optic nerve is destroyed."

"Ah! He was blind?"

"Yes, he was blind," Avery admitted.

"Blind!" Sinclair ejaculated. "Blind, and operated upon within two years by Kuno Garrt!" Kuno Garrt operated only upon the all-rich and powerful or upon the completely powerless and poor; the unconscious man in the berth could belong only to the first class of Garrt's clientele. The surgeon's gaze again searched the features in the berth; then it shifted to the men gathered about him in the aisle.

"Who did you say this was?" he demanded of Avery.

"I said his name was Nathan Dorne," Avery evaded.

"No, no!" Sinclair jerked out impatiently. "Isn't this—" He hesitated, and finished in a voice suddenly lowered: "Isn't this Basil Santoine?"

Avery, if he still wished to do so, found it impossible to deny.

"Basil Santoine!" Connery breathed. To the conductor alone, among the four men standing by the berth, the name seemed to have come with the sharp shock of a surprise; with it had come an added sense of responsibility and horror over what had happened to the passenger who had been confided to his care, which made him whiten as he once more repeated the name to himself and stared down at the man in the berth.

Conductor Connery knew Basil Santoine only in the way that Santoine was known to great numbers of other people—that is, by name but not by sight.

Basil Santoine at twenty-two had been graduated from Harvard, though blind. His connections—the family was of well-to-do southern stock—his possession of enough money for his own support, made it possible for him to live idly if he wished; but Santoine had not chosen to make his blindness an excuse for doing this. He had at once settled himself to his chosen profession, which was law. He had not found it easy to get a start in this, and he had succeeded only after great effort in getting a place with a small and unimportant firm. Within a short time, well within two years, men had begun to recognize that in this struggling law firm there was a powerful, clear, compelling mind. Santoine, a youth living in darkness, unable to see the men with whom he talked or the documents and books which must be read to him, was beginning to put the stamp of his personality on the firm's affairs. A year later his name appeared with [illegible] of the firm; at twenty-eight, his was the leading name. He had begun to specialize long before that time, in corporation law; he [illegible] steadily after this. At thirty the firm [illegible] represented to those who knew its particulars only one personality, the personality of Santoine; and at [illegible] five—though his indifference to [illegible] was proverbial—he was many times a millionaire.

End of Twelve-Hour Day Sought.

New York.—Elbert H. Gary, chairman of the United States Steel Corporation, has urged his board of directors to help him hasten elimination of the twelve-hour day from the steel industry, according to an article appearing in the New York Tribune. The appeal of the corporation chief is said to have been spoken from a "confidential memorandum," delivered before the board, at which time Mr. Gary denounced the inter-church world movement's report on the steel strike of 1919.

Reds Barred From Mine Union.

France Occupies Entire Ruhr Basin and Seizes All Mined Coal, Cars and Barges.

MINES ARE NOT CONFISCATED

Operators Help German Government's Passive Resistance Program—Revolt of Lithuanian Peasants in Memel Zone — President Obregon Expels Papal Delegate to Mexico.

By EDWARD W. PICKARD

MANY statesmen in Washington are supporting the movement for the acquisition by the United States of the British and French West Indies in the interest of national defense. The prohibitionists like the idea because some of the islands are now headquarters of the rum runners. Do you think President Harding should go ahead with the plan?

CONFRONTED with a powerful "passive resistance" of the German government and the German coal barons, the French last week found that their organization for the exploitation of the Ruhr basin needed enlargement and strengthening and, in consequence, they slowed up a bit—but without any apparent diminution of their determination to get from the Germans all that can be had.

Early in the week the Berlin government instructed the coal mine operators of the Ruhr to refuse to deliver any more coal to the French under penalty of a year's imprisonment. The operators therefore defied the demands of the French economic commission and ignored its orders to attend conferences. Some of them left the region. Immediately the French extended their zone of occupation to include the entire Ruhr valley, the troops advancing on the north to the Lippe river almost to Hamm, on the south to Unna and Witten and on the southwest to Dusseldorf. They met with no real opposition anywhere, though they had to fire on a crowd in Bochum, killing one man. Exasperated by the official attitude of the Germans, the French threatened to arrest and court-martial the coal operators and to confiscate the mines. And, too, there was a lot of "On to Berlin." Not far from Muenster 25,000 men of the German reichswehr, or national police, were said to be concentrated and for a few days it looked as if there might be real warfare.

Then the French commission temporarily modified its plans. It announced that for the present the mines would not be confiscated, but all coal already mined would be seized and diverted to France and the recalcitrant operators would be tried by court-martial, but not arrested. The state forests along the left bank of the Rhine also were seized and will be worked to produce reparations. Every coal car and barge in the Ruhr was commandeered and Germany now can get no German coal except some of an inferior quality that is produced in Upper Silesia.

So far as the workers in the occupied region are concerned, they appear to be apathetic. Most of them are communists and they say they have been exploited by the German industrialist magnates and that the change of masters neither harts nor helps them. [illegible] insist that the capitalists are the ones who should pay the reparations. [illegible]

C[illegible]

to pay and are still open on condition that the French withdraw from the Ruhr. They state that their program of economic resistance will be carried even to the point of ruining Germany, arguing that this would also result in the ruin of France, while acceptance of a reparations program beyond the country's ability to pay would ruin Germany alone. The government is said to have agreed to reimburse the mine owners for the profits lost by refusal to deliver coal to the French—which enraged the socialist press—and also to pay the wages of the workers in case of a general strike.

Cuno is not receiving the unified support that was expected. The socialists dislike some parts of his program and, of course, the communists are always trying to stir up trouble. The reactionary element, especially in Bavaria, sees an opportunity in the present affair and is agitating for a restoration of the monarchy, presumably with Prince Rupprecht as king.

On Sunday some 200,000 Bavarian Fascisti armed to resist French occupation, in the words of their leaders, were reviewed by Adolph Hittler, head of the National Socialists.

PREMIER MUSSOLINI of Italy, who has advised France not to go too far with the military occupation of Germany, says he is working on a plan for a continental economic bloc, which he hopes would be joined by England and which, in that case, he believes would bring peace to Europe.

The reparations commission on Tuesday voted new defaults against Germany on coal, cattle and horse deliveries. Friday the commission met again and it is said Roland W. Boyden, the American unofficial member, submitted a report setting forth the present situation and intimating that the reparations should be drastically revised, but not specifying figures or totals. It would seem that the time for discussion of such a document has passed.

Russia is reported to have called new classes to the colors, but has informed Berlin that she will not attack Poland without provocation.

TURKEY is occupying a strong strategic position just now. Should there be a renewal of war in central Europe her nonparticipation could be assured by concessions to her demands for full national sovereignty and, at least so long as the situation continues acute, all she has to do is to insist on those demands. Kemal is strengthening his army for possible contingencies. The British are preparing to evacuate Constantinople, but, according to the Turks, are merely moving their military equipment to Chanak to retain control of the straits until a peace treaty is signed at Lausanne.

MUCH space and many large headlines have been devoted to an affair in Europe that probably will turn out to be of minor importance. When the allies undertook to remake the map of central Europe they accepted the suggestion of Woodrow Wilson and made of the seaport of Memel and some adjacent territory a temporarily neutral zone, under the control of the League of Nations. It was claimed by both Lithuania and East Prussia, between which it lies. A few days ago the Lithuanian peasants living in this zone, several thousands in number, armed themselves and marched to the city of Memel, which they occupied, the small French garrison being unable to offer resistance. The "Little Lithuanian Volunteers," as they called themselves, announced they were in revolt, not against the League of Nations, but against the German administration and German money imposed on them. Several French warships were at once dispatched to Memel and the allied council of ambassadors decided to send a mission to that city to establish a provisional inter-allied government under the authority of the British, French and Italians. Lithuania, France, Russia and Germany were each blamed [illegible] by some of the others, Germany being especially [illegible]

formed by the premier that the government would not accept any decision of the council of ambassadors regarding Memel unless it reflected the will of the inhabitants of that territory.

Late dispatches from Memel carry the story of Anthony Ivas, an American citizen from Boston visiting his parents in Lithuania, who says that he both instigated and financed the insurrection. He declares the Lithuanians would accept an English and Italian administration of the zone until a plebiscite could be held, but would resist the return of the French because they have been trying to find an excuse to give Memel to Poland.

ALTHOUGH both the British and American war debt refunding commissions are still apparently confident of the success of their negotiations, the sessions were broken off temporarily last Thursday by the Englishmen, who announced that "the conversations had reached a stage making desirable a personal report to their government." For this purpose, and to obtain further instructions, they sailed Saturday for London. The difference in views between the commissions is not believed to be great, relating mainly to the interest rate. The Washington administration is hopeful the entire question can be settled in time for action during the present session of congress, and the feeling in England also is quite optimistic.

SAMUEL GOMPERS and the general executive board of the Brewery Workers' union have arranged for the mobilization of the forces of organized labor to obtain a modification of the Volstead act so that the manufacture and sale of light wines and beer may be permitted. Said Mr. Gompers: "We plan to make America once more the home of the sane and the land of the free. Wine and beer of light alcoholic content are sure to come back, and they will come back soon."

If Representative Upshaw of Georgia sought notoriety by the rather cheap means of charging that many members of congress and high government officials were liquor drinkers, he has achieved his purpose. Washington seems unduly annoyed, and Congressman Hill of Maryland has demanded that the house investigate the charges.

Governor Silzer of New Jersey, in his inaugural address, made some very moist recommendations to the legislature, and Governor Pinchot of Pennsylvania, on being installed, made an equally dry speech. These pronouncements were coincident with the third anniversary of the prohibition amendment.

Deaths from poisonous moonshine and bootleggers' booze are becoming so numerous that the government has decided to curtail the dealings in denatured and industrial alcohol. It also will bottle, for medicinal purposes, all bulk liquors now held in bond and guarantee them as to proof and quality.

PRESIDENT OBREGON, it is reported, is about to begin a campaign against the Catholics in Mexico and, as an opening gun, he last week expelled from the country Mgr. Filippi, the papal delegate, as a pernicious foreigner. The churchman, who is believed to be the instigator and organizer of the Fascisti movement in Mexico, was charged with holding a large public religious meeting at Silao, contrary to the law, and with refusing to obey the orders of the governor of Guanajuato. Mgr. Filippi, who came to the United States, denies that the law was violated by the meeting.

Obregon declared that he would see that high dignitaries of the foreign clergy should not come to Mexico and direct the church of Mexican Catholics, making themselves arbiters of the church. Mgr. Filippi is an Italian. In official circles in Mexico City this utterance is said to mean that no future papal delegate will be allowed to come to Mexico.

AMONG recent deaths that of "Judge" William H. Moore, nationally known as financier and horseman, is [illegible]. He leaves an estate valued at [illegible] all of which goes to his family. [illegible]

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—Advertisement.

The Honest Teacher.

Seven-year-old Johnny's mother had given him a handkerchief to give to his teacher as a Christmas present, but when Johnny was told about it he curled his lips in scorn and said:

"Aw, mother, I don't want to give it to her. She won't let me do nothin'. It's always Walter and William that get to do everything. Let them get her a handkerchief. I'll give it to Miss —— (his last year's teacher). She's honest."

CATARRHAL DEAFNESS

is often caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing. Unless the inflammation can be reduced, your hearing may be destroyed forever.

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh. HALL'S CATARRH MEDICINE has been successful in the treatment of Catarrh for over Forty Years.

Sold by all druggists.

Japanese Poetry Contest.

"Mountain Cloud at Dawn" is the subject chosen this year by the emperor of Japan for the annual poetry contest. In the days of the Kyoto court, only court nobles and poets participated, but now anyone can contribute. The best poems are read to the emperor. Verse making has always been one of the national pastimes of the Japanese people. Emperor Meiji used to compose a poem every day, and his consort also left a collection of verses.

To Have a Clear, Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Advertisement.

WOULDN'T PAY FOR MATCHES

Scotsman Not Likely to Expend a "Bawbee" When He Could Walk to His Hotel.

A young Scotsman, shortly after his graduation from the University of Edinburgh, came to this country to teach. Thirty years later he revisited the country of his birth. On his return to his teaching post he was regaling some of his confreres with an account of his trip.

"One morning," related the professor, "as I was strolling along a street in Edinburgh, I stopped at a tobacconist's and bought some cigars. Finding myself out of matches I asked the clerk for some.

"'Ha'pence a box,' said he.

"'What! Why, in America when a man buys a cigar he is given a small package of matches.'

"'I'm sorry, sir, but they're ha'penny a box here.'

"And, do you know," added the professor, "I had to walk back eight blocks to my hotel to get some matches."—Judge.

Some things that happen are more bearable than the worry that preceded them.

When the unexpected happens a man's true nature begins to show on the surface.

MINISTERS MEN OF MEDICINE

Both in England and America Clergyman Acted as Doctor in the Seventeenth Century.

Some of the medicines dispensed in the Seventeenth century were fearful and wonderful concoctions. Human skulls, bones, human fat, mummies, etc., were freely prescribed. At the deathbed of Charles II a preparation from a human skull was administered.

The education of the pharmacist at this time was largely based on his trade experience, although some knowledge of Latin was required. The apprenticeship lasted from five to six years, and at the end of that time he became a "journeyman." On assuming control of a pharmacy as a proprietor, he was required to pass a supplementary examination.

Pharmacy in America during the seventeenth century was largely based on English usages modified by practices derived from the Indians. In Massachusetts, a great many clergymen practiced pharmacy for a means of livelihood, while preaching. Indians and old women also practiced it. The witchcraft epidemic brought the practitioners of pharmacy into suspicion as selling poisons for spells.

Cause and Effect.

The teacher was angry when Thomas appeared ten minutes late for school one morning.

"Why are you late, Tommy?" he said sharply.

"Please, sir," replied the sinner, "it was late when I started from home."

"Then why didn't you start from home earlier?"

"Please, sir, it was too late to start early."

One who sings for her friends soon is never heard at all.

SURELY WOULD HAVE TO GO

Matter of Dismissal of Stenographer Simplified by "Insult" Conveyed in Unqualified Statement.

Mrs. Carter dropped in at the office for a few minutes' chat with her husband.

"John," she remarked, "I think you had better discharge that stenographer you have now. I am sure she is trying to flirt with you ever since she has been here."

Mrs. Carter, when she said this, thought the stenographer was safely out of hearing—but she wasn't! She stepped to the door of the private office and vented her indignation:

"Madam, I'll have you know that I wouldn't flirt with your old husband for a million dollars!"

Mrs. Carter was aghast.

"Now, John," she exclaimed, "you simply must discharge that girl! She has insulted you!"—Kansas City Star.

Important Thing Overlooked.

I taught my daughter the important dates on the calendar, the figures being marked in red. It chanced that her birthday, too, was in red.

On the arrival of her baby sister she immediately wanted to know where her birthday was. But when it failed to appear in red she was stricken with awe.

She took the calendar from the wall and began to wrap it up, saying, "Daddy must tate dis right back and det it fixed, 'tause dey fordot to red sister's birthday."—Exchange.

Honesty is the best policy; it is hard to tell whether modesty always is or not.

We all seem to prefer the fruit that has paid a thousand miles freight to that grown nearer home.

Nerves of Steel—

The successful man of today is clear-headed, self-reliant. His keen eye and steady hand result from abundant, self-controlled energy, and steady nerves.

Such a man can overcome difficulties because he is physically fit. Foolish habits of food and drink have no place in his scheme of things. When he finds that coffee disagrees he promptly changes to healthful POSTUM.

This pure cereal beverage is not only free from the health-disturbing drug element in coffee, but there's comfort and satisfaction in its delicious, full-bodied flavor.

You'll find Postum a factor for Health.

HEALTH PRODUCTS

"There's a Reason"

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer to make the drink while the meal is being prepared; made by boiling fully 20 minutes.

President Keeps Promise

Judge Edwin L. Davis, who represents the fifth district of Tennessee in congress, who has won additional distinction by his leadership of Democratic opposition to ship subsidy, has made the discovery that President Harding gave one pledge in the 1920 campaign which he has faithfully kept. Being eminently fair in all things, Judge Davis took the opportunity at the Jackson Day Dinner in Philadelphia to give President Harding full credit. He said:

"During the 1920 campaign you will recall that they (Republicans) denounced President Wilson and his administration in unmeasured terms. They criticised him severely because, although the head of his party, he had taken the lead in party matters; they upbraided him bitterly because, although the chief magistrate of the nation, he had taken a lead in governmental affairs. They said that they proposed to elect a man who would not do these things:

"They proposed to set up some sort of a political Sanhedrin of elder statesmen and master-minds, perhaps permitting the President to sit in as an observer.

"Candidate Harding acquiesced in this sort of a program, and he is the only man who ever ran for President who had as one of the chief planks of his platform a promise that, if elected, he would only be a figure-head President. However, he has kept that pledge to the letter, and I want to be fair enough to give him full credit for it."

Ship Subsidy Is Futile

From the Marine News

Subsidy cannot make ship operation nor promote commerce. The former is a matter where the efficiency and ability of the ship operating concern is the only consideration. As to the development of commerce, this is a matter where the willingness of Americans to engage in world affairs will be the deciding factor.

Let us not have any false notions as to the benefits that will accrue from ship subsidy.

Working

The present legislature is making a record for work and results. Instead of cards and joy rides at night, its members sleep, and are therefore ready for work every morning instead of just retiring for a nap.

Retirement Not Depressing.

From Ohio State Journal (Rep.)

We note no special depression over Secretary Fall's resignation except for a little stifled sobbing among the great lumber interests and an occasional snuffle which we think emanates from a prominent oil man.

HISTORY'S MYSTERIES

MOUNTAIN MEADOW MASSACRE

ONE of the little known chapters of American history—an episode which is cloaked in mystery even today—concerns itself with the massacre of a party of emigrants, which took place near Mountain Meadow, in Utah, in September, 1857, and for participation in which John D. Lee was executed some twenty years later.

About a hundred and forty men, women and children were crossing the continent at the time, on their way from Missouri to the coast, and stopped in Mountain Meadow, about 360 miles west of Salt Lake City, to rest their horses and to permit the members of the party to recuperate from the strain of their journey up to this point. Familiar with the dangers of cross-country travel, they arranged their wagons in a circle with the women and children inside, and the men taking turns at watching for signs of a possible attack. Two days passed without any indication of trouble, and the emigrants were on the point of setting out on the next portion of their trip when their outposts reported that apparently hostile Indians had made their appearance at a number of points nearby.

Little by little the enemy's scouts crept closer, and then, as one of the Missourians forced the issue by holding up his hand as a signal for a peaceful conference, the sharp crack of a rifle shot made it plain that the Indians were intent upon an attack, rather than a parley or the exchange of goods. Hardly an hour of the encounter had passed, however, before it became plain that fully half of the hostile force were not Indians, but whites—Mormons who had joined forces with the redskins in order to effect an extermination of the visitors who, they feared, would undermine their influence in this section of the country.

The combination of Indian cunning and a constant stream of ammunition supplied by the whites, was almost too much for the little band of emigrants, but, having been careful to pitch their camp in a spot which commanded all the available approaches, they stood by their guns and resisted the siege for four full days and nights. Finally, on the fifth day, they left the shelter of their wagons under the promise of protection by John D. Lee, a Mormon bishop and Indian agent. Within the hour, however, all the adults and children over seven years of age had been slaughtered in cold blood, and 17 of the younger children were then distributed among Mormon families, but were afterwards restored to their relatives through the action of the government.

When, after an investigation of the matter by officials of the War department, Lee was arrested and charged with murder, he implicated a number of the highest officials in the Mormon church in his confession of treachery, claiming that Brigham Young himself had full knowledge of the intended massacre, and had taken no steps to prevent it.

"Governor Young told me," declared Lee, "that if I would stand up and shoulder full responsibility for the affair, it would be a feather in my cap some day, and that I should achieve celestial salvation, but he added that the man who shrunk from a responsibility of this kind would be certain to be consigned to Hades forever."

Despite his confession, and the manifest evidence that he was far from being alone in the laying of the plans for the cold-blooded massacre, Lee was executed on March 23, 1877, twenty years later. Government investigators developed clearly the fact that Lee had been only a catspaw in the whole matter, but when they attempted to place the blame where it belonged, they were frustrated at every turn by the far-flung machinery of the Mormon church.

The identity of the real leaders in the Mountain Meadow massacre has never been definitely decided, and contemporary historians state that Lee would never have been convicted had it not been for the fact that he had been ostracised by the Mormon church, Brigham Young having instructed his adherents to facilitate the progress of this prosecution, for reasons best known to themselves.

Tracing Bees in Australia.

Some interesting facts concerning native bee hunters come from Australia.

Wild bees' nests are usually well hidden, and, the flight of the bees being too fast for the eye to follow, the aborigines have devised various ingenious methods of tracing them.

One way is to watch the bees gathering pollen, and then, when a honey-laden bee alights on a flower, to place a piece of white feather-down, moistened with gum, on the underside of its body. The native eye can then follow the bee's homeward journey.

A white ... [illegible]

Hurt Murder Hearing

Two additional arrests have been made during the week of men charged with complicity in the assasination of Robert A. Hurt, near Capitan last week They are Will Titsworth and Tom Simer. Titsworth was taken to Roswell and placed in jail there; Hobbs, who was arrested last week, was taken to the Alamogordo jail, while Simer was incarcerated here. Alec Burks, who was arrested with Hobbs, has been released.

A preliminary hearing had been arranged before Judge Mechem for today, but has been postponed until tomorrow, as the judge was unable to be here today. In the meantime, a detective from El Paso has been working on the case, and, in conjunction with the sheriff's office, uncovered evidence that led to the additional arrests mentioned above. District Attorney Newell has spent the week in this county investigating the surroundings, gathering testimony and preparing the case for hearing.

Revival Next Sunday

Remember that the revival services are to begin next Sunday at the Baptist church, Rev. G. E. Ellis preaching, and Rev. E. F. Woodruff leading the song service. The morning hour will be 10:30 each day, except Sunday, when the hour will be 11 o'clock The evening hour will be 7:30 We invite all the Christian people of the town to co-operate in the meeting. Let's make it the best meeting Carrizozo has ever had. Let's have auto parties from near-by towns come for the benefit of this meeting. Get your part of the Gospel. It will be served fresh and spicy.

T. M. Blacklock, pastor.

Methodist Church

(D. S. Donaldson, S. S. Supt.)

Preaching services at the Methodist Church morning and evening, Sunday, February 4, Bro. Carlton having been assigned to serve this charge two Sundays each month. Special sermon of ten minutes to Sunday School at close of Sunday School session.

Sunday School at 10 a. m.; special music for children. Send your children; we are making special effort to teach your children what goes to make good citizens.

"My Dad."

The surge of rugged life in the open spaces of the snow-covered North charges "My Dad," the big dramatic film production at the Crystal, Saturday night, Feb. 10, with a glow of realty that makes it stand out as one of the really big dramatic subjects of the year. The nobility of self-sacrifice and the daring heroism of a boy who fights to remove the stain of guilt from the shoulders of his aged father, form the subject of this most engrossing narrative. As the heroic boy, Johnnie Walker, of "Over the Hill" fame, gives a brilliant performance of the youth reared amid the vast snows of the North. The play is released through the Film Booking Office of America.

No. 3018

Minnie B. Fambrough, Plaintiff
Vs.
Samuel B. Fambrough, Defendant.
E. M. Brickley, Receiver.

Final Settlement

Notice is hereby given to all creditors and others interested in the estate of the above named defendant, Samuel B. Fambrough, that I, E. M. Brickley, Receiver, duly appointed by the above-named court and acting as such, intend to make final settlement and accounting of my actings and doings in the disposition of said estate, before the Hon. Edwin Mechem, Judge of said District Court, at his chambers in the court house in the Village of Carrizozo, New Mexico, on the seventh day of March, 1923, or at a later date if a hearing cannot be had on that date.

All creditors and others interested in said estate who may desire to object to the approval by the court of said accounting and final settlement, will be given a hearing by the court.

E. M. BRICKLEY,
Receiver of the Estate of
2-2-4t Samuel B. Fambrough.

II. PRINCIPLES OF WIRELESS TRANSMISSION

Before attempting to explain the functions and the principles of the radio telephones, or describing how to make, use and operate them, it is necessary to understand something of the underlying principles and fundamental laws of wireless transmission.

It is not, however, necessary to enter into a long discussion on the theories and principles of electricity or physics which enter into the subject, but merely to illustrate and make clear a few important and salient laws, causes and results which make the transmission of sounds possible without the use of wires between the sending and receiving instruments.

The first and most important principle of all radio transmission is the fact that all our atmosphere is constantly disturbed by vibrations or oscillations or, as we may call them for the sake of simplicity, waves. We are accustomed to think of the atmosphere about us as a more or less uniform substance which we call air, but in reality the air or atmosphere, space, and in fact all solids as well are pervaded by an invisible, odorless, and almost weightless but exceedingly elastic substance known as ether or luminiferous ether. It is by means of this ether that all heat, light, electricity, etc., are transmitted, in the form of waves or vibrations. Light and heat waves have been known to science for a long time, but it is only within comparatively recent years that man has learned that electric or electro-magnetic waves also travel through the ether, and it was through this discovery, and by means of these waves, that wireless telegraphy and telephony became possible. In a way, the electro-magnetic waves are very similar to the waves or ripples formed by dropping a stone in a calm pool of water, for, just as the water waves travel in gradually widening circles from the splash, so the electric waves, started by the spark of a wireless transmitting or sending instrument, spread in ever-widening circles through the ether. Moreover, just as the waves in the pool are short and clear near the spot where the stone is thrown and gradually become [lo]nger and less noticeable and farther apart as they flow from the splash, so wireless waves are clearer and sharper near the instrument and decrease in clearness and size as they get farther and farther away and, to draw still another comparison, just as the shore of the pool or any object in the water interrupts or breaks the waves, so a wireless receiving instrument will interrupt or receive the electrical waves of the ether. Indeed, just as the waves or vibrations set up by the wireless spark are electro-magnetic waves and the energy that starts them is electrical energy, so the waves in the pool are started by muscular or mechanical energy. You can readily understand how it would be possible to communicate by means of such liquid waves, for, if a person at a distance should toss stones into the water at stated intervals, a person watching the shore, and noticing the intervals of the waves, could understand signals which had been prearranged. This, of course, would be a very crude and uncertain method of communication; but if you could devise some instrument to count and measure the waves and could devise means for creating waves of definite sizes and numbers, a practical means of communication could be established. It is just this which occurs in the transmission and reception of electro-magnetic or wireless waves, for, by breaking or interrupting the waves sent out by the spark they are transformed into long and short sections which correspond to dots and dashes as used in wireless telegraphy. These waves set in motion by the sending apparatus, possess the property of starting oscillations in any conductor which they strike, and if they strike the aerial or antennae of a wireless station they start oscillations in the wires, but so faint and weak that they would not be detected unless sensitive instruments were provided to magnify and catch them. Such instruments are known as detectors and consist of various substances or devices which are adjustable and from which wires lead to a telephone receiver. The high frequency oscillations of the ether, which are known as alternating currents, as they flow back and forth, are cut off by the magnets in the receiver, while the detector is designed to allow the oscillations to pass through in one direction, but will not allow them to return, and thus it acts as a check-valve in a water pipe and the alternating, back-and-forth currents are transformed into impulses going in one direction only and known as direct currents. These will flow through a telephone receiver and cause the diaphragm to vibrate, and thus the ear detects the interrupted buzzing sounds which indicate the dots and dashes of the code. Another very important part of the mechanism of the wireless apparatus is the tuner, for without this the various vibrations of the ether sent out from numberless stations would come as a hodge-podge of meaningless sounds to the receiver. But by arranging the receiving instrument so it may be adjusted to receive or pick up only those waves of a certain length, all other vibrations, and the messages they carry are eliminated or cut out. So, the wireless operator who is receiving messages, may adjust his instrument back and forth until he picks up any message which may be passing through the ether at the time.

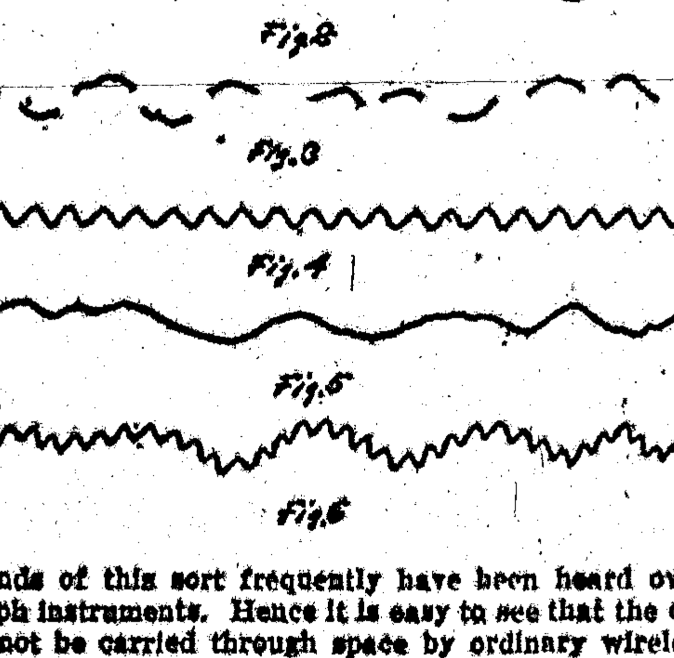
III. WIRELESS TELEPHONY

In many ways, all the principles and laws of wireless telegraphy apply equally well to radio telephony, but, in other ways, there are great differences between the two. In the first place, the vibrations or waves sent out by the wireless telegraph transmitter are interrupted as they are produced by the vibrator of a spark coil and while the flow of the oscillations or waves may be so rapid that they appear as a steady stream, yet there is really a distinct pause after each one. If a telephone transmitter and receiver were attached to the ordinary wireless instruments used in telegraphy, the sounds or vibrations of the voice would vary the path of the electrical oscillations and the same variations would be produced on the receiver. But, owing to the fact that the waves are interrupted and are not continuous, the words or sounds would be cut up into sections which would be meaningless, although such sounds as music, bells, whistling, etc., might be recognizable. In fact



sounds of this sort frequently have been heard over ordinary wireless telegraph instruments. Hence it is easy to see that the only reason why all sounds cannot be carried through space by ordinary wireless telegraph apparatus is because of the interrupted or broken waves, whereas, if these waves were continuous or were so incredibly rapid as to appear continuous, the sounds they transmitted could easily be heard and understood. Therefore, the real fundamental key to successful wireless telephony lies in producing what are known as continuous waves and it is to the perfection and control of such waves that radio telephony owes much of its rapid advancement.

The accompanying figures, Nos. 1, 2, 3, 4, 5, 6 illustrate just how the interrupted telegraphy currents and the continuous waves carry sounds. Thus, 1 represents the variations in vibrations in a certain word. 2, the intermittent oscillations of the wireless telegraph sender and 3, the way the word would be broken and interrupted by being transmitted by means of such interrupted waves. Figure 4, on the other hand, shows the continuous waves of the wireless telephone transmitter; 5, the sound waves of a word and 6, the way the continuous waves, interrupted by the words would appear. By studying these diagrams you can easily see the difference between the word broken up as in figure 3 and flowing smoothly as in figure 6. It must be borne in mind, however, that whereas the sounds of the voice, of music, etc., cannot be satisfactorily sent or received by wireless telegraph instruments, yet wireless [illegible] can be sent to perfection, and can be perfectly received, over wireless telephone instruments. Indeed, the very best transmitting radiophone sets [illegible] sending telegraphic messages, the only difference being that [illegible] continuous high frequency waves are used, whereas, when [illegible] by telephone, the waves are broken or "chopped" by [illegible] closes the circuit. "Our Family Medicine"

"I WILL WRITE you in regard to Black-Draught liver medicine, as I have been using it more than 18 years," says a letter from Mr. S. F. Mintz, of R. F. D. 2, Leland, N. C. "I keep it in my home all the time, for it is mostly our family medicine. When we begin to feel feverish or sluggish, with trouble from the liver or stomach, we take a dose of Thedford's Black-Draught and the trouble is soon over. I mostly buy a dollar package at a time, and it has saved me many a bill."

Thedford's Black-Draught is a purely vegetable remedy, acting on the liver, stomach and bowels. It is made from selected herbs and roots, and contains no calomel or other mineral drugs.

It has been found of great value, in indigestion, stomach trouble, sick headache, constipation, and lazy liver, helping to relieve the symptoms caused by these troubles, and to put the digestive system into proper working order.

Get a package of Black-Draught liver medicine from your druggist or dealer, today. Be sure to get the genuine—Thedford's.

IN THE SOUTHWESTERN DIVISION, AMERICAN RED CROSS, THE LAST YEAR—

521 chapters carried on active public service programs..

740 loans, aggregating $0,000, were made to ex-service men.

Compensation claims of 47,844 former soldiers were adjusted. Many of these men also have been assisted in other ways.

8 Public Health Service hospitals and 11 Contract hospitals in the Division are manned by Red Cross medical social service workers.

Nurses in the Southwestern Division—

Have made 201,927 visits to cases,
Have inspected 881,683 children,
Have conducted 408 classes in Home Hygiene and Care of the Sick.

First Aid and Life Saving is being taught throughout the Division.

There are 437,576 Junior Members of the Red Cross in this Division.

$780,926.79 has been expended in disaster relief in the Southwestern Division.

The Southwestern Division comprises the states of Missouri, Arkansas, Texas, Oklahoma, Kansas, Colorado and New Mexico.

EX-SOLDIER GETS PENSION AND INSURANCE

Through more than two years of unwinding of official red tape and other efforts the Red Cross of Waco, Tex., has obtained compensation for permanent total disability and government insurance for a veteran of the World War. This soldier was wounded in a peculiar way. A piece of shrapnel which tore away the muscles of his back and injured his vertebrae also exploded his cartridge belt, thus inflicting an additional injury which required many operations and more than a year in the hospital, most of the time lying on his face.

The operations were not successful, the shock and other contributing causes caused heart trouble, all of which have made him a permanent invalid.

Through an error in his record, this soldier has been allotted only $27 a month and it required more than two years to correct the error and obtain for the man the compensation which was his due, as well as to obtain for him and his aged mother the insurance which also was coming to him.

Qualified.

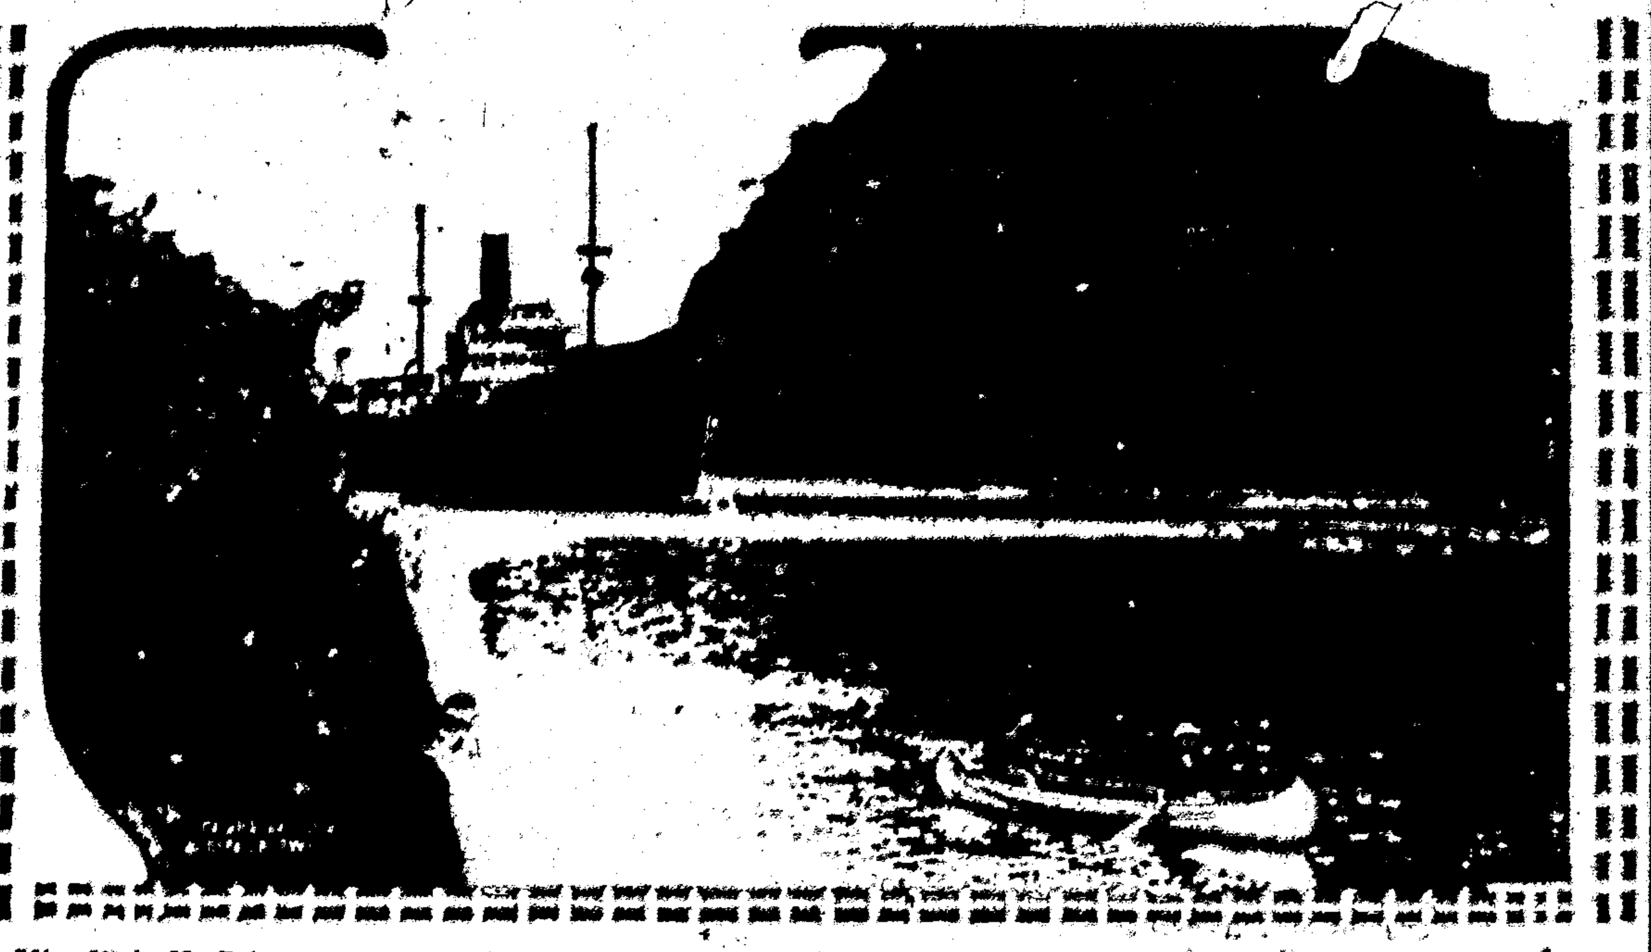
Woman Paddles Through the Panama Canal



Miss Elsie K. Grieser recently paddled a canoe through the Panama canal, being the first of her sex to accomplish that feat. The trip of 42 miles occupied 15 hours. She is here seen in the Culebra Cut, her brother being in the canoe with her.

National Aerial Day Is Demanded

Aviatrix Urges That Annual Tribute Be Paid Flyers Who Have Given Lives.

ALSO TO HONOR MOTHERS

Plan Has Official Approval of the Chiefs of Army and Navy Air Service—Lillian Gatlin Is Back of the Movement.

> **Don't you think that the men who gave their lives in the development of flying should be remembered?**

Washington.—A young woman in aviation clothes stooped beside a flyer's grave in Arlington the other day and placed there a pink rose, a spray of white chrysanthemum and a bit of Jerusalem ivy. Twenty-four army and navy officers stood at attention close by. From overhead came the throb of five planes flying in formation, while in the background some 500 onlookers watched the little ceremony.

From this grave the young aviatrix and her little company went to the other 49 flyers' graves in the national cemetery, and last, to the grave of the unknown soldier, leaving each time the three floral tributes.

The young woman who paid this honor to the aviators who have given their lives for the country was Lillian Gatlin. She is the girl who recently came East by the air mail route from San Francisco to New York, thereby becoming the first woman to fly across the country.

Began Flying in 1911.

Miss Gatlin has been flying since 1911, and she considers herself one of the pioneers. Many of the aviators who were her friends have crashed to earth, leaving mothers, who had been so proud of them, suddenly broken. Because she gets the point of view both of the aviators who flew until they crashed in spite of everything and of the mothers they left, Miss Gatlin is giving herself to the cause of proving that the flyers are not forgotten.

She has asked President Harding to permit her to designate the second Sunday in September as a national aerial day, when tribute may be paid to the gold star mothers of aviation and their sons. Her plan has the official approval of Major General Patrick, chief of the army air service, and of Rear Admiral Moffett, chief of the naval air service.

To stop in the midst of our busy whirl to place a flower on a grave once each year and to think about men who have done their work and gone on, may seem a sentimental thing. The strictly practical minded would agree with Vachel Lindsay that "To live in mankind is far more than to live in a name."

But most people cannot take so Spartan a view. The fact remains that almost every individual craves to be remembered either for his personality or for his achievements. Miss Gatlin points out that the man who provides in his will for a tombstone generally does so because he is afraid no one else will erect a stone for him and that his name will be forgotten. The carved name on a stone is his one hope of keeping his name alive.

Flyers Not to Be Forgotten.

Miss Gatlin is determined that the flyers who risked their lives that aviation might progress are not going to be forgotten. Their mothers are to have the comfort of being assured that their boys have not given their lives for nothing.

Miss Gatlin tells about it eagerly. She is a blonde young woman with a boyish, straightforward manner of speech and gesture, which contrasts with her close sympathy for the maternal point of view and her feminine use of symbolism.

Everything about her method of paying tribute to the flyers has some significant association. She placed the Jerusalem ivy on the graves at Arlington because it is said that it never dies. Each part of the flyer's costume she wore on her trip East once belonged to some aviator who has "flown on," as Miss Gatlin puts it. The pair of white baby shoes she carries for a charm are associated with a flyer who crashed just before his baby was born. These little shoes interested President Harding when he talked with Miss Gatlin about the proposed national tribute. The pink roses are reminiscent of Lincoln Beachey.

Penguin Drops Pebble at Feet of "Lady Love"

London.—The social habits of penguins were described by Surgeon Commander Murray Levick, just returned from the Antarctic, who lectured here.

He says that when the birds are mating, the males walk about in groups from nest to nest. When a male makes a selection he places a pebble at the feet of the hen.

Then the other males fight him, and if his resistance is hardy, he is let alone and the other males go about their courting.

BLIND MAN STUDIES STARS

Takes Course in Astronomy in Michigan University to Qualify for Degree.

Ann Arbor, Mich.—Blind from birth, with his conception of the heavens formed by descriptions from others, Joseph Caldwell of Indiana, Pa., is studying astronomy at the University of Michigan in order that he may meet the scientifical requirements to permit him to be graduated from the college of literature, science and arts.

Mr. Caldwell, a sophomore and forty-six years old, is doubly handicapped. In addition to his blindness, he lacks the mechanical aids for the study of astronomy that often are afforded students who take up other studies. Blind students of astronomy are so rare that there are no textbooks with raised type. Therefore, he depends upon fellow-students to read his lessons to him. So proficient has he become, his professors say, that he frequently memorizes a lesson by hearing it read only a few times.

In addition to astronomy, Mr. Caldwell is studying psychology, German, French and Italian. He ranks as one of the best students in his classes.

CLIPPER SAVED FROM JUNK PILE

Famous Old Square Rigger, Gloria, Gets Stay of Execution.

Once Queen of the American Merchant Marine and Holder of Scores of Sailing Records in Every Ocean.

Seattle, Wash.—Memories of the golden days of the clipper ship era stirring the hearts of Boston men have brought about a stay of execution for the famous old square-rigger Gloria of the seas, once queen of the American merchant marine and holder of scores of sailing records in every ocean.

Condemned to the funeral grounds for the copper and iron in her hull, the Glory, as she is affectionately known by many a sailor throughout the ports of the seven seas, was being towed down from Puget sound to be beached when a telegram was received from Boston asking a reprieve. The Boston men plan to tow the old ship to Boston to rig her as she was in her heyday and moor her in Boston harbor as a monument to the American sailing ship, now fast vanishing before the encroachment of the faster but less romantic steamers and motor cargo carriers.

The Glory, built in East Boston in 1800, was the last masterpiece of Donald McKay, premier American builder of the clipper ship age. In the early part of her career she made remarkable passages between New York and San Francisco and between East coast ports and Europe. Later, with the rapid development of ship construction, she fell upon evil days and became a coal and cargo barge. A few years ago the gallant old square rigger was converted into a floating fish refrigeration plant and warehouse, and early last year was sold as junk.

Shipping men who inspected the old vessel said her hull today was as sound as when she slid down the ways 58 years ago.

HENS GREAT HELP TO PASTOR

He Adds Considerably to Salary by Selling Eggs.

Organizes Poultry Club Among Members of His Congregation and Teaches Members Scientific Care of Birds.

Hartford, Conn.—The story of the Long Island pastor who discovered his flock of chickens had a language all their own may be interesting from a linguistic standpoint, but if there is any truth in the old adage that "money talks" the flock owned by Rev. R. L. Richards of Canton Center has "said [illegible]" ... [illegible] bringing a greater degree of prosperity to his spiritual flock through his knowledge of his feathered one.

"When I took the pastorate of the Canton Centre Congregational church a few years ago," said Rev. Mr Richards, "I was confronted with two serious problems.

"Like all rural pastors I faced the problem of bringing up a family on the small salaries paid by country churches and the constant migration of young men on the farms to the cities. To eke out my salary, I decided to go into the chicken business in a small way. I studied the methods used at Storrs Agricultural college and carried them out to the letter with amazing results.

"I then organized among my congregation the Canton Center [illegible] ...

"During the last year I, as manager of the club, sold more than $8,000 worth of eggs alone from the coops of the few members of the club. Every egg sold was candled and pronounced perfect. Many were thrown away—those that showed any sign of blood streaks seen in so many eggs. At present we are getting 80 cents a dozen wholesale for our largest eggs. We have found that by lighting the coops with electricity for a few hours each night the egg production is increased 30 per cent."

Milk Scarce in Berlin.

Berlin.—On account of the scarcity and high price of milk extraordinary measures have been taken for aiding the poor in various communities. The [illegible] creameries agreed to contribute one [illegible] ... [illegible] every liter of milk supplied.

Southwest News
From All Over
New Mexico and Arizona

Reports from Farmington are that the Midwest Refining Company has spud in its new oil well on the Hogback dome.

The Senate of the Arizona Legislature passed a bill appropriating $31,008.25 to meet the pay roll of the State Highway Department.

According to reports W. W. Saxon, for many years a prominent resident of Otero county, N. M., was drowned in a large tank at his home in Little Rock, Ark., a few days ago.

Average annual discharge of the Colorado river and all its tributaries is, according to the records of the geological survey, made at Yuma, Ariz., about 17,300,000 acre feet.

Calling attention particularly to this year's pack, the best on record, leaflets urging the greater use of Arizona olives are being distributed by the Arizona Industrial Congress.

Workmen of the Southern Pacific railroad began recently taking down a group of buildings near the round house at Lordsburg to make room for the largest storage oil tank on the system.

Carlsbad will have a second cotton gin before the season opens next year. Mr. Brady of the El Paso Refining Company has leased the ground and the new plant will be erected in the spring.

Sales of eggs and fowls by the Mesilla Valley Poultry Association during the year ended Dec. 31, amounted to $31,030.02, L. E. Freudenthal, chairman of its executive committee, reported.

Gen. John C. Greenway announced that some $2,000,000 in contracts had been let during the past week for machinery for the new 5,000-ton flotation plant at the New Cornelia Copper Company, Ajo, Ariz.

The House of the Arizona Legislature passed a bill carrying an appropriation of $10,000 for the use of the governor in conducting an investigation of state institutions, banks and irrigation and reclamation projects.

The Taylor-Willson store at Pearce, Ariz., was entered recently and robbed of a small amount of cash, some clothing and blankets and other articles, the robbers gaining entrance by breaking one of the panels in the rear door.

The big drill of the Florida Oil Company, which is sinking a test well north of Deming, struck oil sand at the depth of 565 feet. The operations at the well are being watched with great interest by oil men and the officials of the company feel that they are now sure of a producer.

The United Eastern Mining Company, Oatman, Ariz., Ray Moore, manager, recently purchased the Black Range Mining Company's property in the Oatman district. It is said that this deal will mean the development of what is known as one of the most promising properties in this section.

The board of trustees of Tularosa, at a meeting recently let the contract for the new water works for the city to Mitchell Brothers, the total cost to be nearly $00,000. The supply of water is to be taken from the Tularosa creek and brought from a large reservoir to the city in a pipe line after it has been purified.

The Ivanhoe Copper Company, Warren, Ariz., recently purchased 200 acres additional patented ground, according to an announcement made by the management. Superintendent Harry Hendrickson states that equipment for the shaft sinking is now completely installed and the shaft is already down fifty feet, with two shifts working.

Charles T. Francis of Douglas, Ariz., representative from Cochise county in the Third and Fourth State Legislatures, was appointed secretary to the Live Stock Sanitary Board, according to an announcement made by the members of the board.

Wayne Hubbs, state treasurer of Arizona, received a check from the Maricopa county highway commission for $165,000 for the credit of the State Highway Department. The check represents the amount the county commission agreed to pay as its share toward the construction of the highway between Phoenix and Wickenburg via Congress Junction, now in the course of construction by the state highway forces.

Oscar C. Bartlett has been appointed state entomologist by the Arizona State Board of Agriculture and Horticulture to succeed Don C. Mote, who held the position under the administration of former Governor Campbell. R. C. George, plant pathologist in the department for several years, was chosen as secretary to the Board of Agriculture and Horticulture. This position was formerly held by Will H. Robinson of Chandler.

The Verde Central Copper Company, Jerome, R. L. Bartholomew, superintendent, announces that contract has been let for the sinking of the shaft to the 1,500-foot level, and the contractor, Dick Howatt, states that the work will be completed in approximately forty days.

Superstition Helps Cat.

In France it is a custom to give the cat all it can eat on Christmas eve, for if, by any chance, it mews, bad luck for the household is sure to follow.

Oh, Dear, How Cynical.

"Speaking about witty definitions," writes Miss K. C., "let me offer this one: "A bachelor is a man who lives alone with the one he loves."—Boston Evening Transcript.

England has nearly nine hundred women magistrates.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited to those who are in need of it.

A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by parcel post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Advertisement.

Crime in Rhyme.

Dale Stansbury, a deputy attorney-general, on hearing that one George Pollonius was convicted for an act felonious cried: "Oh, how harmonious!"

Write W. V. Bennett, Desk W, 300 Peter's Trust Bldg., Omaha, Neb., for full particulars about cheap lands and great opportunities in Western Canada.

A few men understand the currency problem, and the rest have to take their word for it.

Which Is Larger the Sun or a Cent

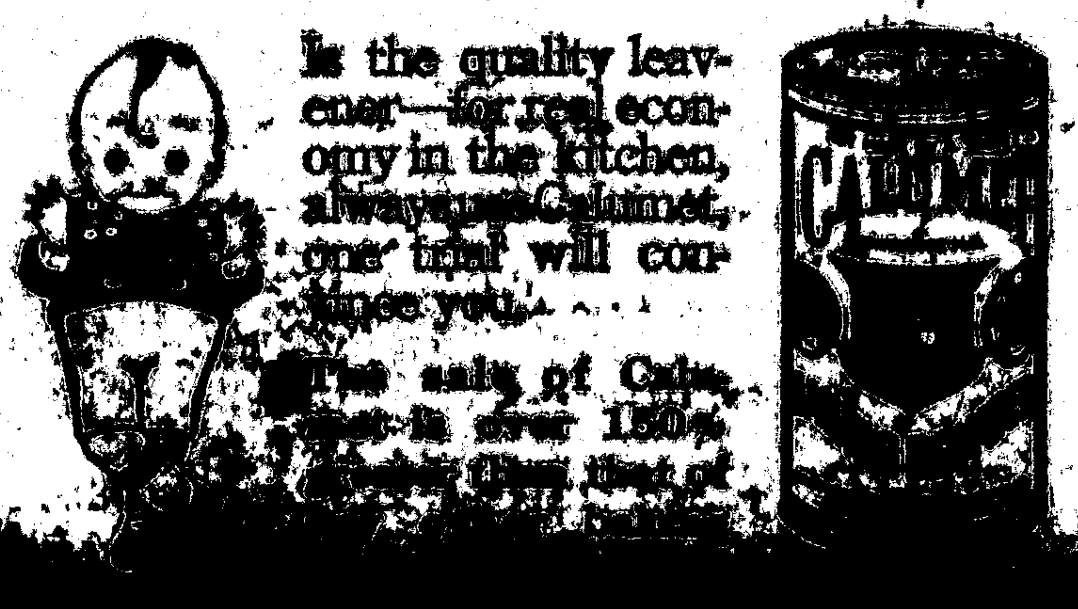
The sun is the largest but you can hold the cent so close to your eye that you'll lose sight of the sun. Don't let a cheap price or a big can baking powder make you lose sight of quality.

CALUMET

The Economy BAKING POWDER

Is the quality leavener—for real economy in the kitchen, always use Calumet, one trial will convince you.

The sale of Calumet is over 150% [illegible]



Soft Furs Used for the Lining

This is a year of linings, notes a Paris fashion authority in the Boston Globe. And in this connection the strongest note is struck by supple fur. Some months ago I wrote about the growing popularity of "fancy" furs of extra supple quality: Dyed rabbit, dyed and natural squirrel, specially prepared panther skins and, perhaps most fashionable of all, gazelle.

Good gazelle skins have a peculiarly soft appearance. The subtle brown and beige tints mingle deliciously. Sometimes the skins are left in their natural condition, as regards color, but often they are cleverly dyed to appear natural. When gazelle is at its best it makes an ideal lining for heavy satin or soft silk.

An exquisite model recently designed by Redfern will prove useful to smart American women. It is one of the new coat-dresses, shaped to the form without being actually tight, and quite long.

This model is ideal from every point of view because it looks like a chic street costume, while forming the most comfortable and practical wrap-coat one can imagine.

Appropriate for Afternoon.

This garment would be just the thing, for instance, to wear when going out for the afternoon. It would absolutely cover and protect the loveliest and most fragile dance-tea frock, the soft fur lining being so warm that the dress underneath might be made of crepe de chine or embroidered chiffon even on the coldest winter day. This is a boon which all fashionable girls will appreciate.

Even a very smart and lovely wrap-coat has a way of looking ultra useful. And of course the ideal thing is to achieve a garment which is thoroughly useful while looking smart and frivolous.

Coat-dresses are, as I have said, very popular in Paris, but most of them are only suitable for walking or driving. They are in themselves a handsome costume which can be thrown open, but not taken off. The Redfern model is quite another thing.

The soft fur lining makes it as easy to throw off as a satin-lined cape and gazelle is so supple—when perfectly prepared—that it follows the lines of the figure and falls in natural, straight lines. All the cold shades of brown

The Winsome Robe Manteau, Made of Kasha Cloth and Lined and Trimmed With Gazelle Fur, Now So Popular.

are fashionable this winter. We have grown a little tired of red-browns and henna-browns. At the moment the run is on nut and "gazelle" tints.

Dyed Rabbit Is Used.

I have seen dyed rabbit used to line coat-dresses similar in design to the Redfern model, with some rich fur on the collar and cuffs. One model of this order, designed for Monte Carlo, was in silver gray, the cloth of the coat the same tint and smoke gray fox on collar and cuffs. This was a very elegant garment and so useful.

I must point out that the idea was to have a straight necktie and muff to match the coat-dress. Of course the large revers turn up and cross on the chest, invisible buttons and loops being introduced in the fur, but since we are all wearing high collars of some sort it was considered necessary to have a separate fur tie which could be put on when the coat was buttoned up for the street.

These smart little ties, the French call tours de cou, are universally becoming. To women of all ages they act as beautifiers because they make the throat and chin look perfectly shaped and proportioned. Just a length of fur, [illegible] wide and long enough to [illegible] the neck and cross slightly, the fastening being a big silk loop and handsome button, or a button covered with fur.

I know several famous Parisian beauties who [illegible]

with a bow brooch which carries an antique pendant.

The narrow fur tie, worn at night, is a revival of old-world fashions. The lovely Madame de Pompadour often wore them, so did Madame Dubarry.

Small Fur Neckties.

Our great actress, Cecile Sorel, is at present in America. If you have happily had an opportunity of enjoying her "Le Demi-Monde" you will understand the feminine charm of the small fur neckties I have just described. I saw a good many of Sorel's "American dresses" before she left France and she had a dark mink tour de cou to ac-

No. 1. The Bat Toque Made of Blue and Black Velours Ombre. No. 2.—Sphince Toque, Brown and Green Velours Ombre.

company a superb green lame and dull blue velvet gown, which she intended to wear in that piece. Sorel has always represented the real Grande Dame on the French stage. No other actress has so completely and successfully revived the glories of the Louis XV period—even in her private life.

Apropos of Sorel, and of coat-dresses, I must call your attention to one specially designed for her which was not unlike the model.

It was made of pure white crepe cloth, with revers, collar and deep gauntlet cuffs of leopard skins—the coat lined with tawny yellow velvet.

The strictly tailored frock has almost been left out of consideration by the French designers. Practically every frock Paris sends over has little feminine touches that relieve all suggestion of plainness.

A smart little toque is one of Lucy Hamar's latest creations. Immensely chic and yet demure. This is the style of toque which is generally worn in the afternoon at Monte Carlo and Nice, where everyone dances or gambles.

The Rumanian Tiara.

There is a strong suggestion of the Rumanian tiara in the pointed brim, but the model is quite free from exaggeration, except, perhaps, the quaint chin strap. These close fitting toques are having a great success this winter. They are made of the most gorgeous and expensive embroideries, or passementeries, and very often there is a large hand bag to match.

A rarely lovely toque of this kind had a soft crown of silver gray velvet and a pointed brim covered with silver and steel embroidery. The sack to match was round, with a cut-steel mount and long gray tassels hanging at either side.

The dress which accompanied the toque and sack was black charmeuse, a full chemise robe banded in over the hips with chinchilla. No trimming whatever on the corsage, absolutely no sleeves. Gray silk stockings and black patent leather shoes finished off with big cut-steel buckles.

Just one touch of color in the guise of a large bunch of parma violets thrust into the chinchilla belt. This was essentially a Parisian "get up," apparently simple, in reality supremely elegant, and original.

The little "bat toque" is a quaint thing. The original model was created for Suzanne Dantes, a pretty young actress who has recently achieved considerable success at "La Potiniere," one of those small, ultra smart, theaters which are so dear to the Parisian heart.

Made of Shot Velvet.

This particular bat-toque was made of shot velvet and the wings at either side stood out aggressively. They were, of course, carefully wired, but the impression given was of velvet cunningly plaited, standing alone.

Considerable width at the sides may be noticed in many of the newest hats and toques at both sides or at one only. Some of the leading milliners in the rue de la Paix are trying hard to revive an interest in drooping ostrich feathers, and I have seen as many as four of these placed together under the brim of a small hat, the tips of the plumes wandering down the front of the dress.

This is [illegible] pretty fashion and it [illegible]

GOOD ROADS

ROAD SYSTEMS FOR DEFENSE

General Staff of Army Indicates What Road Development Is Needed for Military.

(Prepared by the United States Department of Agriculture.)

Road development needed for national defense as planned by the general staff of the army has recently been indicated to the Department of Agriculture by the secretary of war and the information has been placed in the hands of the engineers of the bureau of public roads who are at the present time getting into final shape the plan for the system of federal-aid highways. This system will consist of approximately 180,000 miles of road, so laid out as to serve all parts of the country and will be built by the states in conjunction with federal aid.

The general staff has been investigating the subject since 1919, the bureau of public roads collaborating. Briefly summarized, the report made is as follows: There are certain vital areas along the boundaries of the United States against which any invasion will probably be directed. These areas have been outlined by the general staff. For military purposes they should be connected with the centers of production and storage and industrial centers. The roads will then become strategic lines of supply and will usually conform with roads located for other purposes. Transcontinental routes are of no particular value for military purposes.

The plan submitted by the War department shows important centers that should be connected, but does not give detailed routes. Engineers of the bureau state that these points can be connected by roads withou

Cement Road Built to Carry Heavy Traffic.

any serious dislocation of the plan of development for other purposes and that in general the military need for roads conforms with surprising closeness to the commercial and economic needs. It is thought that the plan submitted can be embodied in the federal-aid highway system and thus make the system an important factor in our plan of national defense.

Roads of a purely military nature such as those leading to coast fortifications have not been included in the plan submitted and will be handled by the War department as heretofore.

BENEFITS OF BETTER ROADS

Farmer Enabled to Transport Fruits and Vegetables to City and Take Back Meat.

Proper food is one of the greatest necessities if the health of the community is to be properly preserved. Better roads mean better food. In years past, the farmer too often lived on a restricted diet of salt pork, corned beef, smoked meats, and other foods which could be prepared on the farm, while the city dweller did not have the advantage of fresh fruits and vegetables. As roads are improved, the farmer is enabled to bring his produce to the city for the use of that community and take back for himself fresh meats and other foods only obtainable in the city.

GAS CONSUMPTION INCREASED

Tests in Pavement Traction Problems Show That More Fuel Is Required on Dirt Road.

According to tests in the problem of pavement traction, gasoline consumption by motor vehicles is increased in traveling over a dirt road. Concrete highways show the least resistance to traction in terms of miles per gallon. Brick, macadam and gravel are next in order.

Laws Are Different.

Recently a tourist in passing through four states was required to buy four different sets of lenses in order that his headlights would comply with state laws. More uniformity in highway regulation is needed.

Everybody Can Ride.

The [illegible] of public roads of the [illegible]

WOMAN SO ILL COULD NOT WORK

Gained Strength, Weight and Now Doing Own Work, by Taking Lydia E. Pinkham's Vegetable Compound

Marion, Ind.—"I was all run-down, nervous and bent over. I could hardly drag around, let alone do my work. I read some letters in the papers telling what Lydia E. Pinkham's Vegetable Compound had done for others and I thought I would try it. Then a man told my husband about his wife and what good it had done her and wanted him to have me try it. I took one bottle and could see what it did for me in a week's time, and when I had taken three bottles I had gained both in strength and weight and was doing my own work. I took it before my last baby was born and it helped me so much. I sure am glad to recommend the Vegetable Compound to any woman who suffers from female ailments, for I know by experience what it can do. I have used Lydia E. Pinkham's Sanative Wash, also the Liver Pills, too, and think them fine."—Mrs. Wm. Eldridge, 620 E. Grant Street, Marion, Indiana.

A record of nearly fifty years service should convince you of the merit of Lydia E. Pinkham's Compound.

Constipation

Relieved Without the Use of Laxatives

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE

Enormous Cost of the World War.

An estimate made in behalf of the Carnegie Endowment for International Peace shows that the cost of the World war exceeded $335,000,000,000. This amount is equal to the combined wealth of the United States, France and Great Britain when the war began.

LOCAL AND PERSONAL

Bill Craig was here yesterday from Capitan.

The "Flu" or grip is prevalent throughout the county, though, in most cases, not of a violent type.

Ed C. Pfingsten and William M. Ferguson, two well known farmers of the Nogal Mesa, were down Wednesday.

Rev. J. H. Lewis, a Baptist minister of Seminar, Hill, Texas, spent Monday in our town the guest of C. H. Haines.

Roy G Skinner, of the City Market, made a trip to El Paso last Saturday, and returned the day following, driving a brand new Chevrolet run-a-bout.

Miss Mamie Humphrey came up from El Paso Saturday and resumed her duties in the school here Monday. She left her sister, Miss Margaret, improving.

A very good rain fell throughout this section yesterday. It was a substantial reinforcement to the moisture of the week previous, and adds more hope for a prosperous year.

Sherwood Corn returned yesterday morning from northern Chihuahua, Mexico, to attend to some business matters. He reports the cattle shipped from Lincoln county doing fine.

G. B Greer was in Tuesday from his ranch in the San Andres. He reports that a large number of his goats are suffering from sore mouths, he thinks due to eating prickly pear and cactus, and fears he will suffer considerable loss, if the trouble is not soon overcome, as the animals refuse to eat.

Jim Hurt, brother of the late Robert A Hurt, has been here several days this week. Jim was one of the early postmasters of Carrizozo. He left here about fourteen years ago to take charge of his father's estate in Texas, and says he would have difficulty in recognizing the burg were it not for some of the old landmarks like the Exchange Bank, the Carrizozo News and the depot.

Mr. and Mrs. Charles Rolland came in Monday from Fenton, Michigan, for a visit with A. J. Rolland and family. They were joined here by Frank Rolland, of Alamogordo. The three brothers, accompanied by Mesdames Charles and Arthur Rolland, left Tuesday, overland, for Elephant Butte Dam, and will swing back by El Paso on their return. The Michigan Rollands will later go to California.

Mrs Frances C McDonald, accompanied by her father, Grandpa Tarbell, and her daughter, Mrs. Morris B Parker, arrived last night from Hollywood, California. Grandpa suffered two broken ribs, from a fall recently, and was placed in the Paden Hospital upon his arrival here. Mr. Tarbell has weathered many a gale during his brief existence of ninety-five years, and his legion of friends hope to see him overcome his present difficulty without a prolonged confinement.

Card of Thanks

We wish to thank our friends in Carrizozo for the generous sympathy accorded us in the tragic death of our husband, father and brother, and for the beautiful floral offerings attending his funeral.

Mrs. Myrtle Hurt;
Katie an Bessie Hurt;
J. E. Hurt, Ovalo, Tex.
W. P. Hurt, Van Horn "

True Detective Stories

OUT OF THE AIR

Copyright by The Wheeler Syndicate, Inc.

SOMEWHERE, somehow, the Germans were getting messages through from the United States to the fatherland. That much was certain. Washington knew it beyond the shadow of a doubt, but the way in which the messages were transmitted was a mystery—dark and apparently unfathomable.

This was in the days before America entered the war, in the days when the United States was, theoretically at least, a neutral nation. But Von Bernstorff, Von Papen and the rest of the embassy at Washington were doing everything they could to further their schemes from this side of the Atlantic.

But not even the secret service could penetrate the mystery of the messages. That these were flashed from the huge wireless towers on this side of the Atlantic, or relayed from the German radio stations, seemed fairly obvious. But how?

"They must be sending the stuff through the air," argued the chief of the secret service to Talbot, one of his best men, "for the simple reason that we've closed all their other channels."

"Any idea as to the code they are using?" asked Talbot.

"None at all, but it's probably concealed somewhere in the messages which they send out to the ships at sea—press bulletins, stock quotations, and the like. We've studied them carefully, but haven't been able to find a thing."

"How about the outburst from Nauen every morning?"

"The only explanation for that seems to be that it's an attempt to 'fog the air' so that ships and other towers can't get anything through."

"Yes, but in that case would the Germans send it for an hour early every morning? Why not all day long? And why that hash of language that doesn't mean a thing? If they were trying to fog things they'd wireless the Bible or Nietzsche or excerpts from some other long book instead of that mess of meaningless rot."

"All right," retorted the chief, "if you think there's a clue there, go to it."

But Talbot didn't begin his investigations with a study of the Nauen "hash." He made his way at first to the laboratory of Charles E. Apgar, a deep student of wireless telegraphy. It was to Apgar that he told his troubles and, when he had finished, the expert leaned forward and picked up something from the table in front of him.

"See that?" Apgar asked. Talbot nodded.

"Looks like an old-fashioned cylindrical phonograph record," he said.

"Just what it is," admitted the expert, "only you use it in connection with a wireless phonograph."

"A wireless phonograph?" and the government operative's voice showed that he had never heard of such a contrivance.

"Yes, a phonograph attached to the receiving end of a radio station. I finished working on it a few days ago, and I think it's just what you need for this job. It will record and keep track of every sound that comes into the station, enabling you to 'listen in' on messages months after they have been sent. With a supply of these records and the necessary patience you ought to be able to figure out the system the Huns are using, without their being any the wiser. It may take weeks or even months, but it's just a question of being everlastingly at it."

Apgar was right. Talbot found that it took him nearly four months to get on to the system—four months of ceaseless listening-in at the end of a De Forest audion detector which picks up sound waves from thousands of miles away, and even then he would never have located the secret had it not been for the wax cylinders. But with the aid of these automatic detectives he was able to repeat each message until he had it almost by heart, trying out the various combinations and symbols until he stumbled across the right one.

Then, one morning, when the chief of the secret service least expected him, he burst into the office with the exclamation:

"I've got it—the fifth, tenth and fifteenth Sambos! See?" and he held out a sheet of paper on which were row upon row of figures and letters, commencing with "5—8—K—14—B."

"Looks interesting," admitted the chief, "but what does it mean?"

"Got a German dictionary here? No—well, I have. Luckily it's an old edition—just the one they're using for the code. The letters give the numbers of the pages, and the figures designate the words, the big ones in bold type. Five and eight K means the fifth and eighth words on page eleven, 14 B means the fourteenth word on page two, and so on. By spacing 'em so far apart in the meaningless wireless messages—or even in the press bulletins [illegible] [illegible] [illegible] But the [illegible] what [illegible]

The Hurt Funeral

The funeral of Robert A. Hurt, who was assassinated Wednesday night, January 24, took place at Capitan Monday afternoon, January 29, Bishop Ziegler, of Albuquerque, conducting the last sad rites. A large crowd gathered from the surrounding country, a number of friends of the family attending from Carrizozo. It was one of the saddest funerals in the history of Lincoln county, not only because of the prominence of the deceased and his possession of a great many freinds, but grief over the brutal manner of his taking off; and the vast concourse seemed to sense the tenseness of the situation as the remains were lowered to their last resting place. Besides the immediate family of the deceased, James E. Hurt, of Ovalo, Texas, and L. L. Hurt, of Firth, Idaho, brothers, were present at the funeral. Another brother, W. P. Hurt, of Van Horn, Texas, although not reaching Capitan in time for the funeral, has since arrived, and is with the bereaved family.
