SOUTHWESTERN OUTLOOK

The Official Republican Newspaper of Lincoln County, New Mexico.

VOLUME IV. NO. 10. CARRIZOZO, NEW MEXICO, FRIDAY, DECEMBER 3, 1909. PRICE $1.00 PER YEAR.

TWO MASONIC GATHERINGS

The Institution, Dedication and Consecration of Carrizozo Lodge, No. 41 A. F. and A. M. were held las Friday night the twenty-sixth of November. District Deputy Grand Master A. D. Goldenburg of Tucumcari was in charge of the ceremonies, assisted by a number of Brethern from Tucumcari Lodge No. 27. After the completion of the ceremonies and the installation of the officers, a banquet was served at the White House Restaurant the management of which squitted themselves very creditably on this occassion. After several hours of indulgenance in the humorous side of life, the gathering broke up toward early morning. Those present were: A. D. Goldenburg, C. H. Rankin, J. C. Elkins, Geo. Mojors and Geo. Benson of Tucumcari, Geo. Roslington of Albuquerque, Dr. R. E. Blaney, D. G. Ranniger and J. V. Edwards of Oscuro.; F. M. Goodin of Three Rivers; E. H. B. Chew and Wayne Van Schoyck of White Oaks and Wm. F. A. Gierke, Geo. Spence, J. E. Bell, J. R. Stodgrass, S. F. Miller, W. C. Miller, Dr. H. G. Miller, Geo. Lykes, F. R. Eschwig, W. Watkins, G. W. Glenn, T. T. Cavender, R. C. Burton, N. M. Scoggins, G. B. Greer, Harry Chant, H. W. Woodworth, F. C. Noessel and W. E. McGraw.

The next night Saturday the first regular communication of Carrizozo Lodge 41 A. F. and A. M., was held. The election of officers for the ensuing Masonic year resulted as follows:

Worshipful Master,	Wm. F. A. Gierke
Senior Warden,	W. C. Miller
Junior Warden,	S. F. Miller
Treasurer,	Wayne Van Schoyck
Secretary,	Guido Ranniger
Senior Deacon,	E. H. B. Chew
Junior Deacon	F. M. Goodin
Senior Steward	Henry Chant
Junior Steward	G. B. Greer
Tyler	I. T. Cavander

The installation of the new officers will be held on St Johns day, December 27, and will be public, to which all Master Masons, their families and freinds are cordially invited.

White Oaks Whiffs

—From the number of the automobiles that came scorching into town from Carrizozo last Thursday evening to the Thanksgiving dance it looks like all Carrizozo people have, "autoites."

—Prof. F. A. Walker and family arrived Saturday evening and the White Oaks school is progressing smoothly this week under his charge.

—This is the month of the year when the citizen of this mining camp taketh his little dinner pail, a prospecting pick and goeth out upon the mountain side to delve into the bowels of the earth, until he startetn the sweat all over his two story brow, which has remained calm and unruffled from any kind of exertion during the year, peradventure the other fellow, when he considereth an interloper, cometh along and findeth the ground unbroken procedeth to "jump" the claim and take it with all its dips, angles and spurs into his own possession; even as the ungodly men, the hustlers and the heathen round about, Selah.

MINOR MENTION

—Alfonso Davis of Chicago and H. R. Wiseman of Luisiana Mo., spent several days in the city this week looking after mining interests.

—The next meeting of the Carrizozo Card Club will be held at Mrs. F. W. Jones' home.

—Dr. Walker will vacinate any children free Saturday morning at his office, who are undable to pay for same. Ten O'clock.

—Jim Nabours of Three Rivers has been in the city this week and has been urging that work commence on the road south out of Carrizozo

—Watchman Kirby left Wednesday night for Douglas. Cook Will releive him here.

—The Outlook has issued a new set of Location blanks, Bill of Sale blanks and Proof of Labor blanks. Don't forget us when in need of Legal Forms.

—Ira O. Wetmore was up this week from Tularosa, inspecting the building work in progress here. He expects the new store building next to Rollands to be finished by the first of the year.

—W. R. Corwin of Oscuro arrived from Monterey Thursday to put in the brick front on the new store buildings.

—Mrs W. B. Hoeck and Miss. Clara Hoeck visited Capitan this week.

—Miss. Fannie Collier spent the week in Ancho.

—Miss. Alma Martin of Oscuro was among the visiting teachers to the meeting here last Saturday.

—The new dance hall and Opera House will be a two story structure instead of one. The second story has been rented to the Masonic lodge for their quarters, when same is completed.

—Ed Pfingston of Nogal was down this week on business.

—Jesse Dawson is spending a few days on a pleasure trip to Chihuahua Mexico.

—Santa Claus has again made our store his headquarters. "Watch our show windows for him."

Ziegler Bros.

—A Big line of comforts and Blankets for these cold nights at prices to suit the times.

Ziegler Bros.

—E. William Johnson has been raised to the Sublime degree of a Master Mason.

ABSTRACT OF COUNTY RECORD

Furnished By The American Title and Trust Co

DEEDS

F. C. Noessel and wife to S. L. Northlane, Lts 28 and 29 blk. 27 McDonald Add. Carrizozo. Cons. $850.00.

LOCATION NOTICE

S. C. Berry Regulator Mining claim, Bonito district.

MARRIAGE LICENSES

Manuel Tafoya	23	San Patricio.
Lovies Stewart	21	Lincoln.
Antonio Sanches	22	Las Palos.
Emiliana Lucero	19	"
D. Richardson	22	Corona.
Ethyle Haynes	19	"

QUICT CLAIM DEED

Allen A. Lane and David L. Jackson to Edward L. Queen Und. ½ Int. N. Homestead Mines and Millsite, in S. E. ¼ N. W. ¼ Sec. 7 Rg. 12 WW. O. Dist. Cons. $6000. Subject to Mtg.

GOV. CURRY OUT OF POLITICS

The governor will go into promotion enterprises when he leaves his office and will handle real estate and promote companies in the southwest. He expects to make his headquarters at El Paso but will continue to make his home at Tularosa, N. M. where he owns a home.

"I am a New Mexican and will continue to live in New Mexico." he declared, in response to a question as to his future residence, "but I will make headquarters at El Paso, because it will be easier to get in and out.'

"I am out of Politics," he declared "and expect to settle down now and try to make some money."

"Will you run for senator when New Mexico becomes a state?" he was asked.

"I am temporarily out of politics, if I could make a lot of money I might be like a lot of other people in public life—like to get a political position again—but I am not after a political job any more until I can at least try and make some money."

Nogal Notes

—Thanksgiving passed with its usual good dinners and glad hearts. We had two good sermons that day by the Rev. Logan of Alamogordo.

—If bright eyes and smiles are indications of happiness the bride and groom who ate Thanksgiving dinner at the Nogal Hotel on the dawn of their "Honey Moon" are tasting bliss supreme.

—Mr John Sementaffar left for Lookeba, Oklahoma, his home, on business he will return soon with his family, he expects to locate here, such men are what our County need.

—Mr. J. W. Ashenhurst and his son T. W. Ashenhurst who have been with us for a week, left for further inspection of New Mexico, then for home in Oklahoma. T. W. Ashenhurst is cashier of the first State Bank of Binger Oklahoma. They will be back some day for they liked the looks of the ranches and mines here.

—Mr. Tom Bailey of Hinton Oklahoma after a months stay at Nogal left for home, Mortals will be guided and drawn by the "Silver cords," and long for the bright smiles of the girl we left behind us," He will come again.

—Mrs T. W. Watson made a visit to Nogal with her friends Mrs. W. C. Anderson and Miss Lillie Mae Bythewood.

—Mr. Geo. Dilard Jr. and wife, Mr. Will Bourne and Mrs. Emma Morris of Nogal visited El Paso last week.

—A rich strike of gold ore was found a few days ago on the Rio Bonito, in this county, which assays as high as forty dollars to the pound.

—The machinery for the Plaza Company is all in place and work has started in ernest.

—L. C. Barlow manager of the Vera Cruz Mines is again with us.

—Mr. John Gnew, foreman of the work on the pipe line wants six more men immediately, at Walnut Station.

—Subscribe to the Outlook.

THE NEW GOVERNOR MILLS

Chief Justice William J. Mills who has been appointed governor of the territory was born at Yazoo City, Mississippi, on January 11, 1849. His father was William Mills of Virginia and his mother Harriett Bealt of Philadelphia Penna. Judge Mills father died when the judge was but a child and his mother removed to Connecticut where she married William H. Law. In Connecticut, Mills attended private schools and graduated from the Yale law school in the class of 1887. He represented New Haven in the lower house of the Connecticut legislature and was a member of the state senate in 1881 and 1882. In 1885 he was married th Alice Wadingham at West Haven, Connecticut, and on account of the ill health of his wife removed to New Mexico the same year, opening a law office at Las Vegas. There he practiced law until 1898, when he returned to New Haven, Connecticut, to open a law office but was appointed chief juctice of the territory by president McKinley and has been reappointed twice since. His present term expires on Januaty 30, 1910. Judge Mills is a literary student and a successful business man. He has a son in attendance at Yale and a daughter still in her teens. Chief Justice Mills was a gold Democrat but has been a staunch Republican the past twelve years.

Lincoln Locals

—Juan Duran of Arabela who was operated upon at Ft Stanson a short time ago, died last Sunday and was buried the following day at Lincoln cemetary. He had been suffering from a cancer of the stomach for some time.

—John Williams a county prisoner, was removed to Alamogordo last Friday, he having been indicted by the United States Grand Jury now in session at that place. Deputy U. S. Marshal Beard conveyed the prisoner to Alamogordo for trial.

—John Cole who has been busy looking after his sheep interest came home last Sunday to spend a few days with his family.

—Thanksgiving day was observed by the closing of all business establishments and a number of big turkey dinners.

—Probate Clerk Riggle has been on the sick list for several days and was confined to his bed all day Sunday, but appeared again at the clerks office on Monday.

—John W. Owen left for Kansas City with a car load of cattle and will be gone about a week. Mr. Owen recently purchased 1000 sheep from Aragon Brothers and expects to engage in the sheep business more extensively in the future.

The regular services of the M E church will be held in the basement room of the bank building next Sunday the fifth. The morning services will be held at eleven o' clock and Dr. Miller's subject will be "The things that cannot be shaken, or the supplanting of the imperfect by the perfect." The evening service will be callen at seven-thirty and Dr. Miller will speak on the four great things of life." Everyone will be cordially welcomed to these services.

COUNTY TEACHERS MEETING

The Lincoln County Terchers met Saturday Nov. 27th 1909 at 10 A. M. at the new school house in Carrizozo. The meeting was called to order by Mrs. W. L. Gumm, chairman and Miss. Elsie K. Mountz, Sec.

Mr. W. C. McDonald favored the association with a very eloquent and effective address, in which he gave to the teachers some excelent thoughts regarding the necessity of the teachers best work in order to attain the best success.

Miss Anna Hensler spoke on, "The Influence of Music". A subject scarcely to be equaled, for, "By music minds an equal temper know".

"Supplementary Work" was effectually and very entertainingly rendered by Miss Callie Thompson to the good of the visiting teachers and friends.

In the afternoon Mrs. W. L. Gumm in a very thourough and complete method showed to the public and teachers how she teaches the first Grades to spell and pronounce words, a method that is recognized as the best and most up to date in the United States.

Miss Elsie Mounts, in her most beautiful and inspiring subject "Literature" showed the different classes and kinds of literature, the strength and power of a few words arranged in the form of a sentence and expressing a thought.

Professor Chapman in his original way lectured on the use of a rod in school. He says, "let the parents use the rod at home."

Prof. G. Kennedy, and Mr. J. R. Koonce had some interesting words regarding "Dry Farming", and the advisability of introducing a course in the schools of this county.

Dr. Miller then discused the "Twentieth Century of Education" in a clear, forciful and pleasing manner.

Supt. John A. Haley, then gave a summery of the condition of the County schools and says that there are more teechers now employed than ever in the history of the county, that there are more pupils, more money in the school fund, and that everything points to a wonderful development intellectually in the Lincoln County Schools.

Oscuro Jottings

—It may be of interest to the many settlers on Township 9S Range 8E ajoining the town of Oscuro on the west, that Pitt Ross of Albuquerque who holds government contract 429 covering the survey of this township, in a recent letter to the Editor stated that it would be some months yet before he could get to this work, being behind on other contracts at the present time. The survey will not be completed before the time specified, December 31 1909.

—Dr. Guibo Ranniger will give a dance for his niece Miss. Laura Hutchins of Sheldon Illinois, who is visiting here.

—L. R. Wade was a visitor here last Sunday from Carrizozo.

—Mr. Brechtold has leased the Oscuro Hotel for a period of six months from E. G. Rafety.

OUR NEW GOVERNOR

The selection of chief justice W. J. Mills to be governor of our Territory is generally approved throughout New Mexico. Justice Mills is an old timer in the territory and married into a pioneer family. He has lived long enough in the territory to become throughly acquainted with her people, her needs, and her aspirations.

Without reflecting a particle upon others who were mentioned for the appointment, it is nevertheless indisputable that the appointment of a very recent arrival or of an outside man would have been resented in some quarters. It is better that the choice has fallen upon one who is both an old resident and a man acceptible to the people of the territory regardless of politics.

Speaking broadly, the appointing power in the territories should not be used to appoint a man who could not or would not be elected by the people under ordinary conditions of free choice. It is fortunate that the present appointment is in a sence a non-political appointment The present governor is not of a sort to build up a powerful central polical machine. It is expected that he will give the territory during his term a conservative, businesslike administration, fair and square and progressive without recklessness.

From the very nature of his office, he has been barred for years from extraordinary political activity. Consequently he will not go to the governorship bearing the illwill or jealousy of any faction; nor will he be under obligations to any faction.

The principle of home rule is fully maintained, and the appointment will indirectly strengthen President Taft in the territory.

PAY YOUR TAXES.

"We have just paid the first half of our 1909 tax. Of course, it was a little more than we expected, but then we looked for that. The entire amount is considerably less than our tobacco bill, and we have more to show for it. "For the money paid for the taxes we have protection for ourselves and property. We have school houses and schools, roads and bridges, all of which make property more valuable. For the tobacco bill we have a lot of old pipes, burnt matches and a breath that makes us back out of the presence of ladies.

"Yes, the taxes are the better investment. Suppose someone does steal a part of the tax? What of it? You will still have more than the Hottentot who pays no taxes. But who wants to be a Hottentot?

"They say there are only two things certain in this life—death and taxes. Well if most of us get as much out of death as we do out of taxes we will be mighty fortunate." So says Editor Klinfelter in the Obar Progress; despite his name is a cheerful cuss.

The Wells-Fargo express company have recently declared a dividend of $300 per share. We can porve it by any patron of the comp- that most of it was made in New Mexico.—Roswell Tribune.

Subsist on Natural Foods for Health

By EUGENE CHRISTIAN

I subsist entirely upon uncooked foods—that is to say, upon natural foods as nearly in their natural state as possible.

I was led to adopt this diet because after many years' suffering and experimenting I found in order to make a science out of eating or establish a science of human nutrition, that it was necessary to partake of food, chemically speaking, in its natural or unchanged state.

The results have been a condition of perfect health gained from a condition of chronic invalidism.

I did not adopt uncooked foods because I had studiously thought out a great principle in nutrition, but because I was compelled to in order to put dietetics upon a scientific basis.

I believe that building up the human body and keeping it in perfect repair is the most important study among civilized people, and I believe this can be made a science. In order to make it a science we must have some starting place, some certainty which is the basis of all the sciences to begin with.

The reason no progress has been made in scientific dietetics during the last thousand years is because we have been led by appetite instead of hunger and have permitted the most uneducated, unlearned and unscientific classes to select and prepare our food.

THE ONLOOKER

WILBUR D. NESBIT

The WUNNERFUL MAN...

Hennery Jones is a wunnerful man!
Yes sir!
Not many people can do what he can—
No, sir!
Hennery Jones, he can wiggle his ears,
Turnin' 'em back till he says 'at he hears
What is behind him as well as we do
What is in front. I can't do it. Can you?
Wisht I could wiggle my ears just like his!
Wisht I was as smart as ol' Hennery is!

Hennery Jones 'd fill you with surprise—
Yes sir!
You wouldn't hardly believe your own eyes—
No, sir!
Hennery Jones he can wiggle his hair
Till it will slide on his head everywhere—
He says he studied for years an' for years
Learnin' to wiggle his hair an' his ears.
Wisht I could do things 'at Hennery can—
Hennery Jones is a wunnerful man.

Hennery Jones says 'at workin' is bad—
Yes sir!
He can't remember a job 'at he's had—
No, sir!
Hennery say 'at a bee is a fool,
Hustlin' around when it's time to be cool,
Fillin' the hive for somebody to rob—
Hennery says it's the same with a job.
Wisht I was Hennery Jones, yes, indeed—
He says his folks didn't want him to feed!

Hennery Jones is a wunnerful man—
Yes sir!
Not many people can do what he can—
No, sir!
Wriggles his hair from his furrud to neck;
Mebbe he'll learn me some day, I expec'.
He says he practiced for years an' for years
Till he got so's he could wiggle his ears.
Wisht I could wiggle my ears just like his!
Wisht I was smart as ol' Hennery is!

LITTLE HENRY'S MEMORANDA.

Uncle Bill says lots of time a man blames fate for things that is caused by his own foolishness.

Pa says the prettier a woman is the more other women see that her hair is bleached and her dress made over.

My sister's beau told her last night that she was his guiding star. I told ma, and she said after they are married he'll be like all the rest and forget most of his astronomy.

Mr. Perkins, who is a candidate, come to see pa yesterday and he patted me on the head and said I was a fine little fellow and pa ought to be proud to have such a son. Pa is going to vote for him, and Uncle Bill says it is shameful how little it takes to bribe some men.

Uncle Bill says something ought to be done about these nature fakers

that tell about how smart their children are.

My teacher asked us what great lesson we should learn from the career of Napoleon, and when I told her it taught us that no matter how big we got some one could come along and lick us, and she said I could go home.

Our Gentle Amusements.

We mingle with the crowd which is waiting for the time when the air ship man shall go up in an attempt to fly.

"Did you read about the poor man who fell from his air ship when it was a mile high, and broke every bone in his body?" asks one.

"Yes, but that was an accident," says another. "Thank heaven, we are enlightened enough not to want to see the brutal sacrifices of life and limb that gratified the ancient Romans and Greeks."

His Block System.

"Captain," says the retired railway conductor to the chief officer of the ship, which has stopped because of a break in the engine room, "you are not taking proper precautions."

"What do you mean?" asks the captain.

"You ought to send a flag man back half a mile."

Wilbur D. Nesbit

"Do you believe in heredity?"

"No. I have never acquired the drink habit sufficiently to need that excuse."—St. Louis Star.

The Proud Heart of Danko

By RACHEL CAREW

(Copyright, by Short Stories Co., Ltd.)

A cloud arose over the sea, black and heavy like the crest of a mountain; it trailed across the steppe curtain-like, rifts and rags of its dark mass blotting out the stars one by one; the moon became a pale opal spot, and in the wide steppe, now black and terrible, as if it held some guilty secret, tiny blue lights flamed forth here and there like the sudden and soon-quenched glow of a match. There was something uncanny and mysterious in thees dancing points of light which I could not understand.

"Do you see the blue sparks?" asked Isergil, the mummy-like old gipsy from the steppe of Bessarabia—the wide steppe which had been her cradle, her home, and was ready soon to grant that surest of all shelters, her grave.

"I, Isergil, cannot see them any more—there is much that I can no longer see. I am ages old, but the dancing lights are always there."

"Yes, I see the little blue flames; what are they?" I had often heard mention of those fairy light, not fata morgana, not insect, but I wished to hear the old sibyl's version.

"Those sparks come from the hot heart of Danko," she began, in tones that vibrated with intense belief and feeling—the born narrator of the legends of her tribe. "There was once in the world a heart that flamed like fire, and the blue gleams are the sparks from that flame. Listen! I will tell you the old, old story, and how it was in that long dead past, of which there is nothing good left; no more real men; no real deeds; no real stories as in those days.

"A fig for you young people of modern times! what do you know? what do you understand? Look back into the past; there, everything is explained; but you, foolish children of to-day, look not back, as do I, old Isergil, and I see, though my eyes are dim; I see that you young ones know not how to live. You wait always for opportunity which comes not of its own self. Then, when you find that you have wasted your time, you whimper over your fate.

"What is fate? Everybody makes his own. There are many kinds of people to-day, except great and mighty ones—where are they? And beauty in man and woman—still less is there of that."

After a long pause, the ancient one resumed: "Ages ago there was a band of people, where it was I cannot tell you. I only know that the camp of these people was surrounded on three sides by a tall, impenetrable forest, and on the fourth side lay the steppe.

"They were a strong, joyous, daring folk, probably gypsies, content with little, and happy in the good of each day as it came.

"After a time strange tribes crept in among them bringing discord and unrest, and driving these simple folk, few in comparison, deeper into the woods. Here it was dismal with swamp and darkness, because the forest was old as time, and so dense that one saw no sky between the branches, and hardly a ray of light pierced through to the sodden ground. The people sickened and died like stricken sheep. Distracted with the weeping of their women and children, the men looked helplessly in each other's hollow eyes, asking in vain for rescue. Two ways there were out of the snare—one backward to the cruel grip of the enemy; the other, forward, to a far deeper, denser forest. Giant trees clasping each other in a tangled embrace, with roots like twisted iron, deep in the black slime. Here at high noon a dim twilight only flickered down through the branches, and at night when the wind blew it wailed like a dirge for these people at bay from their enemy in the dreary forest fastness.

Night after night the outcasts sat around their camp fire and bethought themselves of a way to freedom, but in vain. Nothing, neither work nor follies, so weaken men as anxious, brooding thoughts, which suck the blood from the heart.

"Fear arose in the breast of these men, and the women drove them to despair with wailing over their dead and the bitter fate of those still living. At first in faint whispers in the camp, then louder and bolder, the tribe declared that bondage was better than death—they would give up their freedom and return as slaves to their enemy.

"Then rose up Danko, the rescuer of them all. He, Danko, was one of the band, a beautiful youth and brave—the beautiful are always brave—and thus he spoke to his companions:

"'Thinking moves no stone out of the way. Action only counts. Why are we wasting our strength with fret and fear? Rise up, let us win a way through the forest; there is an end to every struggle. Come, rouse yourselves, one and all!'

"They looked at the youth and saw in his eyes that which made him their leader and superior. 'Lead us!' clamored they all, and he led them."

Old Isergil paused and looked out over the steppe where the sparks from the hot heart of Danko gleamed like blue flowers.

"Danko led them; willingly and trustfully they followed.

"That was a weary way, dark as night, with the black mud of the marsh yawning for prey, and the trees in close ranks like a mighty wall. Their branches were interwoven like a knot of snakes, everywhere their twisted roots coiled and clung; every step cost blood and sweat. Onward they toiled, each morrow's hardship worse than yesterday's; each day their strength less.

"At last it grew so dark in the forest that it was as if all the nights, that had ever been since time began, had melted into one blackness. The thunder rolled, the wanderers staggered helplessly among the rocking trees, blinded by the cold, blue lightning.

"They halted, and in the roar of the forest, in the thick of the darkness, exhausted and angry, they turned upon Danko: 'A useless creature are you, harmful and hateful to us all,' they began. 'You have led us forth to destruction, and for this you shall suffer,' the thunder and lightning giving force to their words. 'You bade me lead you, and I obeyed,' cried Danko, confronting the angry troupe with bared breast. 'I have the courage to lead, therefore I do it—and you—what have you done to help yourselves? You follow only, and your courage is too weak for the strain of hardship. You only follow—follow like a drove of sheep.' These words angered the people still more. 'You shall die!' they cried, and to their clamor the wind howled an echo, and the lightning tore rents in the darkness.

"Danko gazed upon them, his followers, for whose sake he had borne such toil and suffering, and saw that they were like wild beasts. They crowded about him, but in no eye was the light of kindness—to no one could he look for help. Then anger against the people flamed in his heart only to quench itself soon in pity. He loved these, his companions, and knew that without him they would perish. Then his heart glowed anew with desire to save them and lead them upon an easy path, and forth from his eyes gleamed the light of this desire."

"The forest sang unceasingly its solemn song, the thunder roared and the rain gushed in streams. 'What can I do for my people!' cried Danko in a voice louder than the thunder. Suddenly he rent open his breast, tore out his throbbing heart and held it high above his head. It flamed as bright as the sun, and even brighter; the whole forest fell silent, awed by his torch of love for humanity; the darkness fluttered away from this light and sank trembling in the black mold of the swamp. The amazed people stood as if turned to stone.

"Follow!" cried Danko, striding forward, his glowing heart held high in his uplifted hands, lighting the way to the people who flung themselves madly in his wake. The roar of the forest began again, but the sound of it was drowned by the rushing footsteps of the people. Everyone ran, fearless and fast, enchanted by the sight of the burning heart. Many fell by the way and died even now, but without lament or tears. Danko ever at the head of the troop, his heart flaming, flaming, and ever flaming.

"Suddenly the forest opened and fell back, and Danko with his flock found themselves bathed in a sea of sunshine, and pure, sweet-scented rain-washed air from the steppe fanned their faces. The tempest was behind them, grumbling over the forest; here the sun beamed, the grass sparkled with rain diamonds, and the river glowed like gold. The setting sun turned the river red, like the blood that dripped from Danko's torn breast.

"The proud, brave Danko cast his dying gaze over the broad steppe, and laughed with joy at the sight of the pleasant land—then he sank down and died.

"The wondering trees began a dirge-like murmur, and the grass, wet with Dankoo's blood, whispered in sympathy, but the happy, hopeful people took no more notice of Danko—saw not that he lay dead, nor that beside his body, on the sod, his brave heart still flamed.

"One cautious soul only saw the glow, and, fearful of danger, trampled the proud heart with his foot. Then was the flame quenched and scattered in a thousand sparks. These are the blue lights which dance on the steppe before a thunderstorm."

As the old woman ended her fantastic story, a profound stillness fell over the steppe, as if it, too, were awed by the power of the brave Danko, the bold spirit which burned itself out for humanity without asking reward. Isergil sank into uneasy slumber, and watching her, I mused over the many legends stored in her memory—What power of human fancy to conceive these legends; what heroism and bravery adorned that golden past!

And our present—poor in strong men and great events—rich in cold distrust that turns everything into ridicule—the miserable epoch of miserable people with still-born hearts.

Unwritable English.

"Did you know that there is at least one sentence in English that can be spoken, but that it is impossible to write?" asked a Cambridge university don.

"Yes, it's correct English, I suppose, and then again it isn't. Here is the sentence, although I vow I don't know how you are going to write it: 'There are three twos in the English language.' You see, if you spell two, t-w-o, the sentence is incorrect, as it is if you spell it either 'too' or 'to.' Catch the point? Really, it is incorrect to say it, although it certainly should be possible to express the thought. This thing has set me going, and it simply goes to show what a tangle the English language is. There certainly is a word 'two,' and a word 'too,' and another 'to,' and they are all three pronounced alike—two, too, or to—which makes it correct to say: 'There are three twos,' or 'three toos' or 'three tos' in the English language. But what's the use?"—Tit-Bits.

Bells Silent for Twelve Years.

On the wall in the immediate rear of the collector of the port's desk in the custom house in Savannah are three electric push buttons, placed there 15 years ago for the convenience of the collector in calling his assistants at the other end of the building. The three assistants have always during this time been white men. John H. Deveaux, colored, was collector of the port for 12 years. He never touched one of these buttons. The three bells bear silent witness to the discretion, deference and regard for the proprieties which were characteristic of the man.—Savannah Press.

Remarkable Golfing Feat.

Miss Maitland, the Scottish International golf player, and Mr. S. Christie, of Westward Ho! have accomplished the remarkable feat of holing out in one on the St. Andrews old and new courses respectively. Both paid the usual penalty to the caddies.

Just In the Nick of Time

Newsboy Came to the Rescue of Crowd of Men of Erudition and Intelligence.

The mean man was a well-dressed and intelligent looking man. He had come out of the postoffice and he stood on the steps and gazed fixedly across the street until he had stopped 30 pedestrians, who also gazed and inquired of each other what they were gazing at. Then the mean man took off his hat, made a bow to those around him and began:

"Gentlemen, during the late discussion of the tariff all of you read about ad valorem in connection with it. I now ask you what the meaning of the term is?"

No one answered. Fifty more people came up and stopped, and the mean man raised his voice and asked:

"Ad valorem, gentlemen—who can tell me what ad valorem is?"

The silence was painful. Then 25 more men halted and whisperingly asked who was dead, and the mean man called out:

"Gentlemen, there are old men and young men here. There are men of erudition and intelligence. I am asking what ad valorem means?"

Those men of erudition and intelligence looked at each other in a sheepish way and took no chances. The crowd increased to 200, and again the mean man demanded to know what ad valorem meant. It was then, and while at least half the crowd were thinking of tearing him limb from limb that a newsboy held up his hand and then piped:

"I know sir. Teddy shot one in Africa and has sent him over to the John Smith institute. He looks sunthin' like a hog!"—Joe Kerr, in Boston Globe.

Danger in Chicago Streets.

An average of 11 persons have been injured daily, and one person killed every other day for the last three months by the Chicago street cars.

WORK OF A BUDDING GENIUS

Couplet That Lacked Something of the Divine Fire, But Strikingly Original.

The ten-year-old daughter of an artist believes that she is destined to fill a great place in literature, and all her spare moments are devoted to writing poetry about every conceivable subject, according to the San Francisco Wasp. Recently she attended her first church wedding, and so filled with inspiration was she that she immediately began to write a poem descriptive of the event. A few days afterward, when her mother was entertaining friends, the youthful prodigy asked permission to read her poem before the guests. Her mother humored her with not a little secret pride. Stanza by stanza the poem progressed until the young lady reached the point where the description of the bridesmaids was set forth. There one of her couplets read thus:

Some had pug noses and some had Roman,
And each wore a blue ribbon about her abdomen.

TORE HIS SKIN OFF

In Shreds—Itching Was Intense—Sleep Was Often Impossible.

Cured by Cuticura in Three Weeks.

"At first an eruption of small pustules commenced on my hands. These spread later to other parts of my body, and the itching at times was intense, so much so that I literally tore the skin off in shreds in seeking relief. The awful itching interfered with my work considerably, and also kept me awake nights. I tried several doctors and used a number of different ointments and lotions but received practically no benefit. Finally I settled down to the use of Cuticura Soap, Cuticura Ointment and Cuticura Pills, with the result that in a few days all itching had ceased and in about three weeks' time all traces of my eruption had disappeared. I have had no trouble of this kind since. 'H. A. Kruiskoff, 5714 Wabash Ave., Chicago, Ill., November 18 and 28, 1907.'"

Potter Drug & Chem. Corp., Sole Props., Boston.

Pathetic Pride.

Willie had had a tumble when he was a baby and his hip was so hurt that ever afterward he was obliged to use a crutch. On one occasion, when his mother had bought him a new crutch of the latest and most approved style, Willie expressed his enthusiasm and delight in the roundest terms. "And oh, mother!" he exclaimed, in conclusion, referring to a little friend of his who having the use of both legs had no need of crutches, "won't Johnny Knowles be jealous!"

Dr. S. F. Spohn, President of the Spohn Medical Co., proprietors of Spohn's Distemper Cure, was recently elected mayor of Goshen, Ind., by a good majority. Mr. Spohn was for a number of years County Supt. of Schools, making such a record that his neighbours and friends, regardless of political lines, insisted on his accepting the nomination for mayor.

Hypnotism Long Recognized.

Hypnotism has been recognized by the medical profession since the fifteenth century and in the last 100 years has been experimented and tested out in thousands of cases by such savants as Charcot in Paris and Bernheim in Nancy, yet with all these years of trial its results have not justified its practical and general use in sickness.—New York Press.

Important to Mothers.

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it Bears the Signature of Chas. H. Fletcher. In Use For Over 30 Years. The Kind You Have Always Bought.

A Domestic Arrangement.

"Bluster and his wife seem to get along very well together."

"That's because they have set aside one day in the week to do all their fighting. On the other days they keep the peace."

What the Name Means.

"'Pa, what is a pony coat?'

"Something I've got to work like a horse for to keep your mother peaceable."—Detroit Free Press.

Mrs. Winslow's Soothing Syrup.

For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

Occasionally a thin woman acquires the art of not showing it.

Dr. Pierce's Pleasant Pellets first put up 40 years ago. They regulate and invigorate stomach, liver and bowels. Sugar-coated tiny granules.

The worm may turn, but the grindstone has to be turned.

The Exceptional Equipment

of the California Fig Syrup Co. and the scientific attainments of its chemists have rendered possible the production of Syrup of Figs and Elixir of Senna, in all of its excellence, by obtaining the pure medicinal principles of plants known to act most beneficially and combining them most skillfully, in the right proportions, with its wholesome and refreshing Syrup of California Figs.

As there is only one genuine Syrup of Figs and Elixir of Senna and as the genuine is manufactured by an original method known to the California Fig Syrup Co. only, it is always necessary to buy the genuine to get its beneficial effects.

A knowledge of the above facts enables one to decline imitations or to return them if, upon viewing the package, the full name of the California Fig Syrup Co. is not found printed on the front thereof.

Purchasing Power.

A young gentleman of our acquaintance, who had just reached the age of six, was recently waiting with his mother for a train at a railway station, when he noticed a penny-in-the-slot weighing machine. He asked his mother a great many questions about it, and at last received permission to drop in his penny and be weighed. Having obtained that important information, he said: "How much would I have weighed, mamma, if I had dropped in a dollar?"

Catarrh Cannot Be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly upon the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.

F. J. CHENEY & CO., Props., Toledo, O.

Sold by Druggists, price 75c.

Take Hall's Family Pills for constipation.

He Knew the Reason.

"I can say one thing in favor of Mr. Featherly," remarked Mrs. Hendricks, the landlady; "he never takes the last piece of bread on the plate." "No, indeed, Mrs. Hendricks," assented Dumley, cordially, "Featherly ain't quick enough."—Bazar.

WHEN YOU'RE AS HOARSE as a crow, When you're coughing and gasping, When you've an old-fashioned deep-seated cold, take Allen's Lung Balsam. Sold by all druggists, 25c, 50c and $1.00 bottles.

A wise man suppresses fully two-thirds of his opinions.

COLT DISTEMPER

Can be handled very easily. The sick are cured, and all others in same stable, no matter how "exposed," kept from having the disease, by using SPOHN'S LIQUID DISTEMPER CURE. Give on the tongue, or in feed. Acts on the blood and expels germs of all forms of distemper. Best remedy ever known for mares in foal. One bottle guaranteed to cure one case. 50c and $1 a bottle; $5 and $10 dozen of druggists and harness dealers, or sent express paid by manufacturers. Get circular how to localize threatens. Our free booklet gives everything. Local agents wanted. Largest selling horse remedy in existence—twelve years.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Ind., U. S. A.

SOUTHWESTERN OUTLOOK

Leo B. Chase, Editor.

CARRIZOZO, - - NEW MEXICO

STILL THE LAND OF PROMISE.

That America is still looked upon as a land of promise by the people of foreign countries is well illustrated by the desertion of some 200 men from the British warships which visited New York for the Hudson-Fulton celebration. The United States is still the lure of Europe, says Cleveland Plain Dealer. The Eldorado is yet west of the Atlantic. The experience of the English fleet is but a repetition of what has been met many times before by fleets visiting the American coast. There is always the temptation for the visiting tar to come ashore and forget to return. Perhaps they have relatives in this country ready to shield them and give them a home and a start in the new world. Perhaps they have merely absorbed the current European opinion that the way to fortune and comfort lies through the gates of New York. A striking contrast is offered between the experience of the American fleet on its recent world tour and the usual experience of the fleets visiting this country. It was one of the boasts of the returning American ships that the men aboard and ashore had conducted themselves with almost predect decorum; that none had deserted, though opportunities to do so had been many. This is not to argue that American tars are any better grade of men than those of other navies—though we are pleased to believe they are—but merely indicates their different point of view.

The custom of turning up the trousers in damp weather presumably originated in the metropolis of Great Britain. Its practice there has been universal for several generations, and has been imitated by Americans affecting English styles. Years ago, when the fashion of trousers too long for the legs of the wearers, with the deliberate intention that they should be perpetually turned up, was first introduced, the humorous paragraphers said that Anglomaniacs who adopted it were going about with their trousers turned up because it was raining in London. From London, however, comes now a warning voice to the effect that turning up the trousers is a practice prejudicial to health. London is suffering from an epidemic of influenza, and a physician connected with one of the great hospitals suggests as among the causes of the outbreak the habit of turning up the trousers.

American exporters, it appears from a report of Special Agent Butman, are not sufficiently courteous in their business correspondence with Spanish-American dealers, and the fact is represented as operating to our disadvantage. Politeness goes far with the Latin American buyer, he points out, and an instance is cited of loss of trade due to a curt acknowledgment by a New York house of a check from a Panama importer. Except with the mercantile firms of the old school with which traditions are strong, the omission has become general from commercial correspondence of the formulas of courtesy which once characterized it. The little niceties of phraseology with which letters were begun or ended are dispensed with under the new order of office economies, in which time-saving has become the main thing.

The disruption of the international potash syndicate, which is reported from Germany, calls attention to an industry that has grown to enormous proportions in recent years. Potash is used for reviving impoverished soils. There are immense beds of it in Germany and in the United States. During the present year Germany has taken steps to prevent the exportation of potash from Germany. It is expected that very low prices will result from the disagreement between the owners of large German mines.

The popular conception of warm countries, like Mexico, is that they are lands of plenty, because of the succession of crops that can be readily raised. But Mexico reports an experience suggesting a different state of things. An appeal comes from Guanajuato, where the crops were destroyed by an unusual visitation of cold weather and frost. The government has ordered from the United States by telegraph 200,000 bushels of corn, and undoubtedly more will have to be provided.

NEW MEXICO TERRITORIAL NEWS

Newly Appointed Governor.

William Joseph Mills, chief justice of the New Mexico Supreme Court, who has been appointed governor of New Mexico to succeed Governor George Curry, resigned, March 1st, was born in Yazoo City, Miss., January 11, 1849. His father was William Mills of Virginia, and his mother, Harriet Beale of Philadelphia. Judge Mills' father died when the judge was a child, and his mother then moved to Connecticut and there married William H. Law.

Judge Mills attended private schools and graduated from the Norwich Free academy, and later from the Yale law school in the class of 1877. He was married January 11, 1885, to Alice Waddingham at West Haven, Conn. After his graduation from Yale law school he practiced in New Mexico and New Haven, Conn., until appointed chief justice of the Supreme Court of the Territory by President McKinley on January 31, 1898. He has been twice reappointed, and his present term would have expired next January.

A son, Wilson W., is a student at Yale. A daughter, Madeline, still in her teens, is at home.

Judge Mills is a literary scholar and a man of dignified appearance, impressing even the casual acquaintance as a man of splendid attainments. He is personally known not only to almost every business man, attorney and official in the Territory, but his acquaintanceship is national.

Ninety-Nine-Year Sentence.

An Albuquerque dispatch says: Confessing that he had murdered Ignacio Gallegos at Alcatraz, in northern San Juan county, by administering strychnine in a bottle of whisky, Donaciano Aguilar was sentenced by District Judge McFie at Aztec Monday to ninety-nine years in the penitentiary.

Besides being by his own confession a deliberate and cold-blooded murderer, Aguilar's crime is aggravated by the charge that he had previously wronged the wife of the man whom he poisoned. It is said that Gallegos, on learning that Aguilar had ruined his home, threatened to kill him on sight.

Aguilar then went from his home at Rosa, Rio Arriba county, under a flag of truce, bearing a bottle of whisky in which he had placed strychnine. He persuaded Gallegos to drink and he died in a few minutes in great agony.

Ross Alive and Hiding.

The wife of W. A. Ross, promoter of the Brazito townsite scheme at Las Cruces, writes the chief of police at Albuquerque that Ross did not commit suicide in New York, as reported a week or more ago, but is alive and hiding, leaving his wife with a family of small children destitute in Chicago.

She alleges that the woman for whom Ross deserted her was living in Albuquerque, and after some search the authorities believe they have located the woman described, who is said to have severed all relations with Ross.

It transpires that the Ross who killed himself was Francis A. Ross, and not the promoter who is charged with having sold thousands of dollars' worth of townsite lots to which he had no title.

Two Pronunciations.

A conductor and a brakeman on a Montana railroad differ as to the proper pronunciation of the name Eurelia. Passengers are often startled upon arrival at this station to hear the conductor yell:

"You're liar! You're a liar!"

"You really are! You really are!"—Everybody's Magazine.

New Mexico Football Games.

An Albuquerque dispatch November 25th says: The University of New Mexico football team defeated the University of Arizona eleven at Tucson by the decisive score of 23 to 11, this game making the locals the champions of the Southwest.

Today, also, at Roswell, the Roswell Military Institute defeated the team from the Agricultural college at Las Cruces, by the score of 34 to 0 and, while the university here has not played the Las Cruces team, it defeated the Roswell men by a decisive score.

This has been the most sucessful season in the history of the local university team. A game with the Agricultural college mey be played next week here.

Severiano Quinana, recently arrested on the charge of assaulting and murdering Sallie Hatton, near Santa Rosa last month has been released proving an alibi. The mystery of this fiendish crime is deeper than ever and the officers are hopelessly baffled.

Newly Named Chief Justice.

President Taft has appointed Judge W. H. Pope of Roswell to be chief justice to succeed Chief Justice Mills, recently appointed governor, on March 1 next.

Of Judge Pope the Santa Fe New Mexican says: "Santa Fe claims Judge William H. Pope as its own and does so with a great degree of affection. It has seen him develop almost from boyhood although when he came here he was already a member of the bar and had been in partnership with such veterans as former Secretary of the Interior Hoke Smith in Georgia, which is Judge Pope's home state and also that of his wife. Local residents recalled many incidents in Judge Pope's career; how he delivered a Fourth of July oration in the plaza shortly after coming here, doing so on the spur of the moment, the orator selected for the day having become ill suddenly. All who remember the incident agree that he made a splendid address. Another resident recalled how, as assistant district attorney in the prosecution of the Chaves murder trials, he made a brilliant address which was cut short by a hemorrhage brought on by overwork.

He served as assistant in the office of the attorney general of the Territory and later was appointed assistant to the U. S. attorney for the court of private claims, where he gave evidence of a scope of learning and of judicial poise that added materially not only to his reputation, but also to the success with which the court disposed of its task. It was in recognition of this work that Judge Pope was appointed U. S. attorney for the Pueblo Indians and later judge of the first instance in the Philippines Islands, where he first came under the personal notice of President Taft, who has a high opinion of Judge Pope's character and attainments. Upon his return from the Philippines, in 1903, Judge Pope was appointed an associate justice of the New Mexico Supreme Court and was reappointed in 1907. Some of the most scholarly opinions in the New Mexico reports of late years are from his pen.

Judge Pope has done invaluable service for this commonwealth in various capacities, notably as a member of the board that had charge of the rebuilding of the capitol. He is a property owner, both at Santa Fe and at Roswell and takes a live interest in the progress of the commonwealth and its people. Some speculation is indulged in whether Judge Pope will continue to make his headquarters as chief justice at Roswell or whether he will go to Las Vegas, but general opinion seems to be that Roswell will have the honor of being headquarters of the next chief justice of the Territory.

Senators Well Pleased.

Governor Curry reports that Senators Warren, Jones and Carter of the Senate irrigation Committee were greatly pleased with what they saw of the Mesilla and Pecos valleys. Everywhere in New Mexico where the special train stopped, the governor says, the people turned out splendidly and the visitors were shown every honor. School children waving flags and singing greeted the senators at every town along the route and their journey assumed the proportions of an ovation.

At Roswell a procession of twenty-five autos took them to see the beautiful farms and orchards of the valley.

Governor Curry believes from the expressions of the senators that they have become fast friends of New Mexico and are firm advocates of statehood.

That the famous Old Palace at Santa Fe has been built over an ancient burial place is apparent from daily finds of skeletons that are being made by workmen who are excavating under the structure to put in a steam heating plant.

Incorporation papers have been filed at Santa Fe by the Western Construction Company, headquarters at Wichita, Kans., and Santa Fe, N. M. The capitalization is $250,000. The incorporators and directors are C. H. Rittenhouse, J. R. Detweiler, W. A. Vincent and A. M. Jack of Wichita and F. C. Wilson, Santa Fe, the last named being the New Mexico representative.

Fifteen million dollars is the capitalization of the Cooney Consolidated Mining Company, which has filed incorporation papers at Santa Fe. The headquarters are at Cooney, in the Mogollon district, Socorro county, and the New Mexico agent is Thomas J. Curran. The incorporators and directors are Frank W. Vellacott and Eunice S. Calder of Silver City, and William A. Henry of Halifax, N. S.

Two Arrests for Hatton Murder.

An Albuquerque dispatch of November 21st says:

Charged with the fiendish murder and assault of Sallie Hatton between Santa Rosa and Los Tanos, N. M., September 25th last, Epimiento Sanchez was arrested today at Los Colonias, San Miguel county, forty miles from the railroad by Mounted Policeman W. E. Dudley, of Alamogordo, and A. A. Sena, of Las Vegas, following a long and patient pursuit of their quarry by these officers. News of the arrest, with no details, was received by Captain Fred Fornoff, of the mounted police, in Santa Fe today.

What will be done with the prisoner is not known. He may be placed in the penitentiary for safekeeping, and, on the other hand, the officers may take their prisoner to Tucumcari or Alamogordo. The officers will not take the risk of taking their man to Santa Rosa, as the feeling in that section is so intense on account of the unspeakable crime that a lynching would certainly follow.

Mounted Policeman Dudley has been detailed on this case from the first, and long after the people of Santa Rosa and Los Tanos has given up the capture of the criminal, Dudley, later assisted by Sena, has been working quietly and industriously, picking up one clue after another and following it to the end.

What the evidence is against Sanchez is not known, but is understood to be strong.

Another dispatch, dated November 22d, says:

Soveriano Quintana, of La Liendra, San Miguel county, who was arrested yesterday by the mounted police for the murder of Sallie Hatton, near Santa Rosa, was placed in jail at Santa Rosa today by Sergeant Dudley, of the mounted police.

The people of Santa Rosa are quiet, and there is no disposition to treat the prisoner with violence. The officers claim strong circumstantial evidence against the prisoner.

It is alleged that he was staying with his uncle, Bruno Chavez, in a cabin near the scene of the murder, previous to the crime, that he had a horse secreted in the canon where the girl was killed, and that he disappeared the night of the day the crime was committed.

The prisoner is a slight youth of only nineteen. He will have his preliminary examination at Santa Rosa Wednesday.

Indians Rob Turquoise Mines.

A Santa Fe dispatch of November 22d says: A conference was held here today to consider a complaint sent Governor Curry by the American Turquoise Company, controlled by the Tiffanys of New York, protesting against depredations of the Pueblo Indians, especially of Santo Domingo, on the company's mines at Turquesa, fourteen miles south of Santa Fe.

The protest states that the life of the company's manager, J. P. McNulty, has been constantly threatened and endangered by the Indians, who claim the mines because of their ancient rights and visit them at night to take out turquoise.

The conference was attended by the Governor of Santo Domingo, the attorney for the Pueblo Indians, Francis C. Wilson; the captain of the mounted police, Fred Fornoff; Superintendent Clinton J. Crandall, of the United States Indian Industrial School, who has jurisdiction over the Indians of Santo Domingo, and Governor Curry.

Several of the Indians have been indicted in district court and convicted.

It is stated at Silver City that the government is going to spend some $257,000 next year in improvements at Fort Bayard, which will make the institution there one of the greatest of its kind in the world. Advertisements for bids for the work will be placed in December, the contracts will be let shortly after the first of the year, and it will take a year or more to finish them.

Soldiers Charged with Robbery.

An Albuquerque dispatch of November 22d says: Sergeant Major Bartlett, Sergeant Folsom and Private Smith, of Troop I, Third cavalry, at Fort Wingate, are under arrest here and will be taken back to Fort Wingate for examination regarding a robbery at the army post Saturday night, when $400 was taken from the till in the post exchange.

These men, members of a party of five who were taking five federal prisoners to Fort Leavenworth, Kan., were taken off an eastbound train last night. When searched at the police station here no money was found on them, but this morning $200 in bills was found behind a radiator in the station, where it had evidently been thrown by one of the soldiers.

Private Smith is strongly suspected of having knowledge of the robbery. The five prisoners will be taken to the federal prison by a new guard which arrived today.

COOK DENOUNCED AS AN IMPOSTOR

WALTER WELLMAN, EXPLORER AND JOURNALIST, DECLARES COOK'S STORY FALSE.

ELIBERATELY FAKED

SAYS THE JOURNEY HE CLAIMS TO HAVE MADE IS AN IMPOSSIBILITY.

Washington. — Walter Wellman, whose preparations for a conquest of the North pole in an airship were abandoned, he says, upon the announcement of the claims of Dr. Frederick A. Cook and Commander Robert E. Peary, has issued a long statement in which he analyzes the narratives of the two explorers, declaring that of Peary "precise, workmanlike, consistent, credible in every particular," and denouncing that of Dr. Cook as a self-evident and even deliberate imposture."

"Cook's story is suspicious both in what it does tell and what it does not tell," Mr. Wellman declares. "He is generally vague and indefinite, but, like most men of his class, altogether too precise at the wrong place. Nowhere does his story ring true. It is always an approximation of reality itself. This is true of his figures, his descriptions of everything.

"Those of us who have had a share in Arctic work and who have felt anxiety that no blot of fraud should stain the proud record of effort and sacrifice had a first hope that Dr. Cook would be able to demonstrate his good faith.

"This has dissolved in analysis of his own story. A second hope, that he was the victim of some hallucination or mental illness, and himself believed he had been to the pole, though of course he has not, vanishes in the light of earlier and subsequent events. There remains, though one says it with keenest regret, only the wretched alternative that the journey which he did make, and the report which he gave of it, were deliberately planned from the outset."

The gist of Mr. Wellman's finding is that with his meager party and equipment Dr. Cook could not possibly have accomplished the feat for which he claims credit, that his astromonical data are too minutely precise to have been made under the claimed conditions in the field, and that the explorer's dash for the lecture platform and his acceptance of "crowns of flowers placed upon his head by innocent women and children," before submitting his field records to scientific examination all conspire to his discredit.

Mr. Wellman first attacks Cook's story of his journey. He points out that Arctic sledging is not a new venture, nor an experiment, but has been reduced almost to a science.

He says that the first thing to be done in advancing over the ice fields is the reduction to the minimum of the food and fuel to be carried, and, secondly, the organization of supporting parties that can be sent back from the dwindling main body, until the few who are hardiest enter on the final struggle to the goal.

The longer the route, he sets forth, necessarily the greater weight of food and fuel, and in consequence a much slower pace.

Basing his argument mainly on these principles, Mr. Wellman takes up a comparison of the supposed achievements of Peary and Cook. He quotes from the records to show that the former took his ship within 460 miles of the pole, advancing supplies and his party four miles closer during the autumn and spring. Cook, he points out, started from Annatok, 700 geographical miles from the pole, and went 170 geographical miles westward before turning northward, according to his own story.

Peary, Wellman continues, mapped out his plans carefully for the advance and started with fifty or sixty men, 140 dogs and twenty-one sledges. He divided his party so that he had four supporting parties who kept open the back trail, and in leaving the main body, lightened the loads the men and dogs were compelled to draw.

Dr. Cook had no supporting party, says Wellman, except for the first three days. His party consisted of three men, twenty-six dogs and two sledges in the long dash he made.

"That which he claims to have done," declares Mr. Wellman, referring to Cook, "with his equipment and organization, was physically impossible. It is beyond human power."

LEGAL NOTICE.

CERTIFICATE OF COMPARISON
TERRITORY OF NEW MEXICO
Office of the Secretary

I, Nathan Jaffa, Secretary of the Territory of New Mexico, do hereby certify that there was filed for record in this office at ten o'clock A. M., on the eleventh day of November, A. D. 1909;

Articles of Incorporation of
NEW MEXICO REDUCTION CO,
No. 6184.

And also, that I have compared the following copy of the same, with the original thereof now on file, and declare it to be a correct transcript therefrom and of the whole thereof.

Given under my hand and the Great Seal of the Territory of New Mexico, at the City of Santa Fe, the Capital, on this Eleventh day of November, A. D. 1909.

(SEAL) NATHAN JAFFA
Secretary of New Mexico.

To Nathan Jaffa, Secretary of New Mexico:

We the undersigned, J. Luther Peacock, Alfonzo Davis, Frank E Thuerer, propose to form a corporation under the laws governing the formation of companies and corporations, of the Territory of New Mexico, and all acts amendatory thereof, and for the purposes, of such organization, we hereby state as follows, to wit:

I

The name of such corporation is "New Mexico Reduction Company."

II.

The location of the principal office of this corporation shall be in the Village of Carrizozo, in the County of Lincoln, Territory of New Mexico, and the Agent in charge thereof is Frank E. Thuerer, an actual resident of the Territory of New Mexico. A branch office of said Corporation shall be located at 258 E. Madison St., in the City of Chicago, State of Illinois.

III.

The object for which it is formed is to buy, sell, lease and otherwise acquire mineral lands, prospects and mines in the Territory of New Mexico and elsewhere; to operate, handle, mine, sell lease, and otherwise dispose of mineral and mineral products found in such lands, and to do a general mining business.

IV.

The capital srock shall be $100,000; the amount of each share is $1.00; the number of shares is 100,000; the amount of capital stock with which it will commence business shall be $100,000. The stock shall be divided into two classes, namely, common stock and treasury stock; there shall be $10,000 of common stock and $90,000 of treasury stock: Treasury stock shall be issued only when paid for either in cash or property, and shall not be entitled to a vote until released from said treasury.

V.

The names and Post Office adresses of the incorportators, and the number of shares subscribed for by each are as follows; J. Luther Peacock, 258 E. Madison St., Chicago, Illinois, 99,998. Alfonzo Davis, 258 E. Madison St. Chicago, Illinois, one (1) share. Frank E. Thuerer, of the Village of Carrizozo, in the Territory of New Mexico, one (1) share.

VI.

The duration of this Company shall be for fifty years.

VII.

The direction of said corporation shall be J. Luther Peacock, 258 E. Madison St., Chicago, Illinois. Alfonzo Davis, 258 E. Madison St., Chicago, Illinois. Frank E. Thuerer who is an actual resident of the Village of Carrizozo, in the Territory of New Mexico, where the principal office of this corporation shall be located and who shall be the agent therein and in charge thereof and upon whom process against said corporation may be served.

In Witness Whereof the said J. Luther Peacock and Alfonzo Davis have hereunto set our hands and seals this 4th day of November A. D. 1909; and the said Frank E. Thuerer has set his hand and seal this 4th day of November, A. D. 1909.

(Signed) J. Luther Peacock (Seal).

STUDY FOR THE SCIENTIST

Investigation of Eskimo Life Should Be of Immense Value to the Medical Profession.

The Eskimos are one of the most extreme varistions of the human race, and because they have lived for ages in almost ideally sterilized atmosphere they present at first hand many of the difficult laboratory experiments already worked out, but which Metchnikoff, Flexner and other experimenters are strenuously seeking along the lines of human immunization. It is very necessary for science to know well a people like the Eskimos, who have always been free from cancer and tuberculosis, but the trouble is, medical science, with a few exceptions, has not yet awakened to the serious necessity of studying so strange and interesting a branch of humanity.

Medical science is trying to establish an environment free from disease germs. Now in the Eskimos science has this very thing, the Eskimos having been in a germ-free environment for ages. Just to give an offhand illustration, England has had a royal commission investigating cancer for years, but with no positive conclusions. The fact that the Eskimo is free from disease germs, and is also free from cancer and all other new growths, may mean that cancer is causal by germs.

The fact that the Eskimo has the most powerful digestion of any human being ought to lead to a close study, and especially in regard to appendicitis and other fatal, probably preventable diseases of the digestive tract.

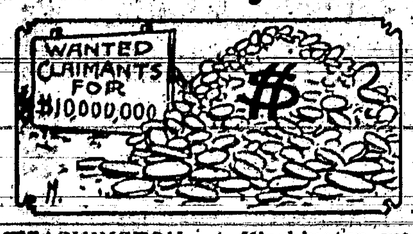
Gossip of Washington

What Is Going On at the National Capital.

Lost Money Orders Worth Millions



WASHINGTON.—A Washington woman discovered some days ago that her German nurse was destroying the money orders she purchased to remit to the Fatherland. She had torn up within the last five years more than $500 of money orders, thinking they were receipts for the money deposited in the office at Washington and that the money had been duly sent to her old mother in Germany.

This incident recalls the fact that there has accumulated in the national treasury millions of dollars, possibly ten millions, since the establishment of the present system in 1864. The government assumes the role of trustee for the safe transfer of money from one individual to another, and the protection is nearly perfect, yet Uncle Sam cannot always remedy the carelessness or ignorance of persons buying money orders.

An official, speaking of the system, said: "This vast accumulation of money is steadily being augmented from year to year, and unless the people become better acquainted with the character of a money order transaction the accumulated sum promises to become almost fabulous. This money has accumulated through no fault of the United States. The system is perfect and instructions are clear and ample.

"For one thing it is known that persons purchasing money orders ignorantly destroy them, believing that the order constitutes nothing more than a receipt. Many persons also are in the habit of purchasing money orders before traveling from one place to another, with a view of converting them into cash as needed, and these are lost through carelessness, by fire, etc.

"It also frequently happens that orders are sent to wrong addresses, and after repeated attempts on the part of the postoffice department to find the payee or remitter, are sent to the department, together with advices, as unpaid.

"In one instance a claim for the payment of a lost postal note was allowed 25 years after it became invalid. It will be seen that as trustee for its citizens in the transfer of private funds the United States exercises diligence in an attempt to find the rightful owner. And yet millions are still outstanding for which claimants will never appear. This vast sum is held in suspense by the government."

When Uncle Sam Has an Auction Sale

THE number of going; going, gone sales which the government conducts ought to qualify Uncle Sam for admission to the guild of auctioneers. These sales are the real thing, too, red flag and all.

The tourist in Washington gets a shock when he is passing the back of the department of agriculture building these days and sees a big red flag with the usual white letters sowed on: "Auction To-day." He wonders if the government is restoring to desperate means of raising the wind.

But your Uncle Sam is not in the auction business from necessity. The agriculture sales are explained in this way. Whenever an invoice of any article of food arrives from abroad a certain number of packages are taken by the government for examination to see whether the article complies with our food laws.

For instance, olive oil, Maraschino cherries, wine, sardines, mushrooms, French peas, preserves and jams—in fact all imported food articles—come under this regulation. But though the government requires half a dozen packages to be turned over to it for inspection—in order to avoid the chance of a single one being fixed up and slipped off upon them—the analysis rarely goes beyond the contents of one specimen out of the six.

So that of each consignment of six cans of olive oil, six bottle of cherries or of champagne or six cans of sardines, five remain untouched. If graft were really as prevalent as the muckrakers would have us believe the entire six packages would probably be opened and a nip taken from each one, while the rest of the contents would be appropriated as a legitimate perquisite of office (by the heads of the department).

Instead of that, five out of six of the articles received for analysis under the law are sold at these auctions behind the department building. The receipts go into the exchequer of the bureau.

Disaster to Japanese Editor's Chin

LACK of mastery of the English language led to the loss of a carefully cultivated beard which graced the chin of S. Zumoto, editor of the Japan Times of Tokyo and a member of the commercial commission visiting this country. Mr. Zumoto visited the barber shop in the hotel at which he is a guest.

"I would like to be shaved," he said, in halting English. "Not altogether, but conservatively."

He carressed his vandyke as he spoke. The barber, a taciturn workman, said nothing, but tucked the towels and aprons and other articles of his trade in and around the Japanese editor's neck. Then he began.

Americans in the shop were startled when they heard a flow of what probably was strong language in Japanese. The barber had encroached on the Japanese imperial, with the result that nearly half of it fell beneath his keen blade before the customer could protest. It was necessary then to cut it all off.

Members of the Japanese party enjoyed the situation. M. Zumoto declined to see it in a humorous light.

Farmer Is Real Spender, Says Wilson

"THE average laborer is living better to-day than did Queen Elizabeth in her time," said Secretary Wilson of the department of agriculture. He was speaking of the prosperity of the farmers in the west and of the high wages of the workingman in the east.

"Take the meat bills of the laborer in Washington," he said. "You will find that they eat meat three times a day—most of them—and they are not content with any kind, but demand the best cuts. They can afford them. As a consequence the price of meat is high. While the farmers are producing more beef every year, they are not producing enough to meet the increase in population. I do not expect prices to fall soon."

Secretary Wilson was asked if western farmers really were investing large sums of money in automobiles.

"There is too much truth in those reports," he responded. "The farmer is out of debt. He has paid for his farm, his fences and his machinery. He has money in his pockets and big crops continue to come on. He is afraid to invest in eastern securities, lest a year bring trouble there. Therefore he puts his money in luxuries, instead of channels that might give a return. People in the east do not know what luxuries are; they must go west to find that out.

"The farmer is handicapped by lack of labor. Too many have gone from the farm to the sidewalk. I hope that education along agricultural lines will remedy this, but the tide has not yet turned. But by means of improved machinery the farmer to-day can do many times as much as he accomplished ten years ago. He does it with ease, too, for he sits at nearly all his work nowadays."

PLANS NEW ENGINE

APPLICATION OF THE TURBINE SYSTEM TO LOCOMOTIVES.

Success of British Engineer's Idea Would Mean the Revolutionizing of Present Traction Equipment on World's Railroads.

President Hugh Reid of the Glasgow (Scotland) University society has announced that a new locomotive is under construction which may lead to the application to the railroad engines of the world of the turbine system, which has revolutionized steam propulsion on the Atlantic. Mr. Reid describes this engine as the first steam turbine electric locomotive.

Various proposals had been made to electrify the existing steam railroads he said, but the anticipated cost of conversion and of prospective and subsequent maintenance had hitherto prevented progress. Attempts had been made to also introduce independent self-generating electric units that might operate over the existing railroad systems without necessitating any electrical equipment on the railroads themselves. The Heilmann steam-electric locomotive which was built in 1894 was the most notable of these attempts, but Mr. Reid asserts that the new steam turbine electric locomotive which is now being built by the North British Locomotive Company is a much more practical development.

The steam is generated in a boiler of the ordinary locomotive type, which is fitted with a superheater. The steam from the boiler is led to a turbine of the impulse type, running at a speed of 3,000 revolutions a minute, to which is directly coupled a continuous current, variable voltage dynamo or generator. The dynamo supplies electrical energy of from 200 to 600 volts to four series of wound traction motors, the armatures of which are built on the four main or driving axles of the locomotive.

The exhaust steam from the turbine passes into an ejector-condenser, and is, together with the circulating and condensing water, delivered eventually to the hot well. As the steam turbine, unlike the reciprocating steam engine, requires no internal lubrication, the water of the condensation is free from oil and consequently is returned from the hot well direct to the boiler by means of a feed pump. The water evaporated by the boiler is therefore returned to the boiler again and again and the supply of water carried in the tanks is actually circulating water for condensation purposes. This condensing water is circulated within what is practically a closed cycle by means of small centrifugal pumps driven by auxiliary steam turbines placed alongside the main turbine and dynamo.

Most of the component parts of this steam turbine electric locomotive have already proved themselves effective and efficient in other applications, and the novelty lies in the combination of the different elements of which the locomotive is composed. The expected results in this case should not, therefore, Mr. Reid believes, be so problematical as in the case of an invention where the novelty is in the details. It is the question of the cost of the locomotive which most troubles the patentees or raises any doubt as to its general adoption.

Woman Is Station Master.

There is a woman station master at Latchley, England, who does work that would tax the ability of a man. She is in charge of the Plymouth, Davenport & Southwestern Junction railway stations, and has both freight and passenger trains to attend to while she also does some of the booking.

Locomotive Blown Into the Air.

An accident such as seldom occurs on the railway, took place west of River Beaudette, about fifteen miles from Ottawa Junction, shortly after midnight recently, when the boilers of a Grand Trunk locomotive hauling an east-bound train, blew up. The train was running along at a good pace at the time, and the explosion came like a clap of thunder, and without the slightest warning. So terrific was the force of it that the engine was blown up into the air and carried a distance of 75 feet from the track.

Telephone in Train Dispatching.

For train dispatching the Canadian Pacific railroad has found the telephone so serviceable that the present system of about 500 miles of telephone lines will be extended to 1,000 miles within a year. The company states that about 50 per cent more traffic can be handled now than was possible under the old telegraph system of dispatching.

Adds to Beauty.

What makes a girl pretty is the way she can look when you tell her she is.

IS WORLD'S LARGEST ENGINE

Locomotive Weighing, with Tender, 300 Tons Has Just Been Completed.

Weighing, with the tender, 300 tons, in working order and having a hauling power of one-half greater than the most powerful passenger locomotive now in use, the largest passenger engine in the world has just been completed by the Baldwin locomotive works, says a Philadelphia dispatch to the New York Herald. It will be used for fast trains on the mountain division in southern California and Nevada.

Apart from its tender this locomotive weighs 376,450 pounds and is 65 feet long. The tender carries 12,000 gallons of water and 4,000 gallons of oil, which is the fuel the monster locomotive will use. This will run the engine about a hundred miles without stopping for water or fuel. Total length of locomotive and tender is 105 feet. The traction power of this locomotive is 53,000 pounds.

It is built for speed as well as great hauling power. There are five pairs of driving wheels, 73 inches in diameter, which work in two sets, the locomotive being of the Mallet articulated compound type. The three pairs of wheels in the rear set are driven by the high-pressure cylinders, while the two pairs in the forward set get their power from the low-pressure cylinders.

The locomotive has a steam-making area of 4,756 square feet. A feed-water heater raises the water temperature above boiling point before it is admitted to the boiler. Steam passes through a superheater before going to the high-pressure cylinders and, exhausted from them, goes through a reheater before entering the low-pressure cylinders.

In the boiler proper are 294 tubes, 19 feet long and 2¼ inches in diameter. The feed-water heater contains 314 tubes seven feet long.

This locomotive is the first for passenger service to be built on the Mallet type and the first to combine feed-water heater, superheater and reheater in one machine and its firebox is built upon a new plan which eliminates stay bolts.

GROWTH OF THE RAILROADS

Enormous Increase in Passenger and Freight Traffic Shown in One Decade.

The American railroad system changes while you wait. You can see it grow. A decade ago the railways received only a billion and a quarter dollars from the patient people, hardly more than our annual national expenditure. Now they receive—with fewer thanks—$2,500,000,000. Then the passenger traffic amounted to only 13.3 billions of miles for one passenger; now it amounts to 29.5 billions of miles.

In other words, if one passenger were carried each week day from Des Moines, Ia., to the sun, his journeying would fairly represent the distance daily traveled by passengers on American railroads.

Our freight traffic, too, is bigger. In one year we carried 1,000,000,000 tons of freight an average of 240 miles each. If each man, woman and child in this country hauled each day 500 pounds of freight a distance of 32 miles, they would not accomplish in the year the vast amount of carrying that the railroads perform.

The next ten years will show still greater progress. Many railroads will be rebuilt; others will be electrified. New roadbeds, new tracks, new stations, stronger locomotives, bigger and better cars—all of these are in the estimates of the next decade. And if the people stay awake and demand their rights, the whole vast engine of progress will be equitably and efficiently administered in the interest, not of stock jobbers, but of investors, employes, passengers and shippers.—Success Magazine.

WRECKS TRAIN TO SAVE HER

In saving the life of 12-year-old Mary Mallin of Ashley Engineer John Knapp of the Central railroad of New Jersey caused a wreck which blocked the road for several hours and will, it is estimated, cost the company about $4,000, says a Wilkesbarre (Pa.) dispatch.

His train, a heavy coal train, was going down grade when he saw the little girl crawl out from underneath a passenger car on a siding and start across the track in front of the coal train. When she saw the engine rushing upon her she was so scared that she fell in a faint directly across the rails.

Engineer Knapp saw there was but one chance of saving her. He jammed on the emergency brakes, stopping the locomotive as the tip of the pilot touched the girl's dress. The sudden stop caused the train to buckle and several cars were wrecked, one of them falling upon a passing freight train under a bridge, wrecking and derailing one of the freight cars. The child was unhurt.

Good Work Goes On.

During the year that has passed since the international congress on tuberculosis met at Washington, one institution or organization for the treatment or prevention of tuberculosis has been established every day, Sundays and holidays included, according to a bulletin of the National Association for the Study and Prevention of Tuberculosis. Fifteen new beds in hospitals or sanitoria have been provided also for every day of the year.

Eating for Strength.

The greatest pleasure to be derived from eating is the pleasure one gets in the knowledge that his food is giving him greater strength and vitality.

Because of this fact there is a constant increase in the consumption of Quaker Scotch Oats; every time the strength making qualities of Quaker Scotch Oats have been tested by scientific investigation or by experiments in families it has been found to be a food without an equal.

It builds the muscles and brain without taxing the digestive organs; it costs so little anyone can afford it, and it is so carefully prepared and packed that it is absolutely pure and clean. A Quaker Scotch Oats eating family is always a healthy family.

Quaker Scotch Oats is packed in regular size packages and also in large size family packages. The latter very convenient for those not near the store. 11

MRS. CAUDLE AT THE POLE.

"This is a nice time to get home. Here you've been gone six months."

"Sorry, my dear, but I was afraid to come home in the dark."

RECIPE FOR CATARRH.

Furnished by High Medical Authority. Gives Prompt Results.

The only logical treatment for catarrh is through the blood. A prescription which has recently proved wonderfully effective in hospital work is the following. It is easily mixed.

"One ounce compound syrup of Sarsaparilla; one ounce Toris compound; half pint first-class whiskey." These to be mixed by shaking well in a bottle, and used in tablespoon doses before each meal and at bedtime.

The incredients can be gotten from any well stocked druggist, or he will get them from his wholesale house.

Ups and Downs.

"Why are you so hard up?"

"Oh, I'm down and out!"—Cleveland Leader.

The danger from slight cuts or wounds is always blood poisoning. The immediate application of Hamlins Wizard Oil makes blood poisoning impossible.

What has become of the old-fashioned boy who would rather stay home and work than go to school?

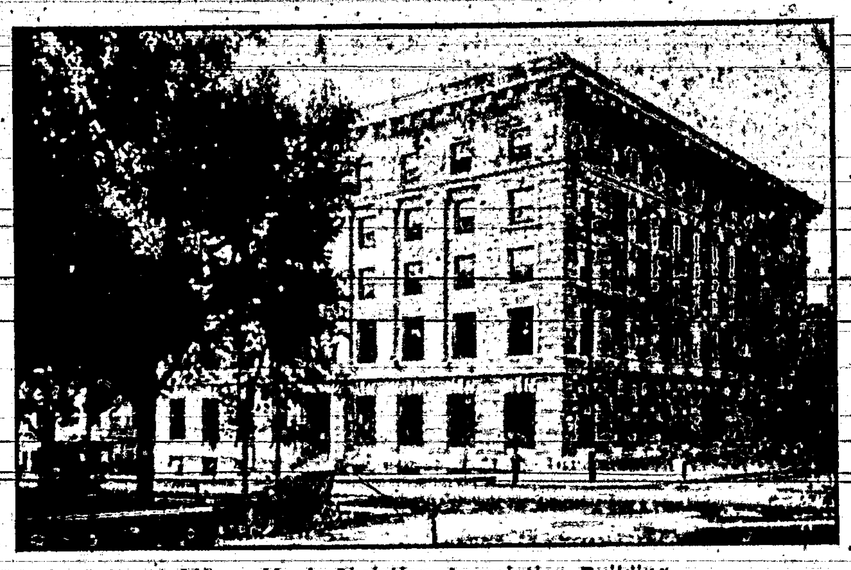
THE BUSY MAN'S UNIVERSITY

The educational department of the great Young Men's Christian Association is serving as a busy man's university to more men than are enrolled in Harvard, Yale, Princeton, Columbia, Chicago and ten or more state universities.

The work being done is perhaps not so great in extent, but in no sense is it inferior in quality. The students are uniformly efficient and reliable and many employers look upon them as more adaptable than the college product.

In Denver the Association conducts over fifty courses of study, in which, last year, over five hundred men were enrolled.



Young Men's Christian Association Building.

A great many of the best students were from the rural districts, and these students were generally the most industrious. The plan under which new courses are added particularly commends itself to the practical man.

Whenever a group of men make inquiry, who can afford, jointly, to pay the cost of the instructor, a course is added.

In Denver some of the best teaching talent in the world is to be had, and there is never any trouble in providing expert practical instruction.

Real success today depends upon trained brains more than upon "beef" and muscle. Plenty of men are to be had for the hard, manual work, but not enough men who can work with their muscles and brains together. Machines and mechanical contrivances do most of the hard work today. Men are needed to guide them with their brains.

Most every young man, if he lacks the education he needs, discovers it sooner or later. He sees other fellows forge ahead of him. His friend

Commercial Class Room.

gets a "raise" while he stays pegging away at the same old job. This is the critical time in that man's life. His future depends upon what he does.

To learn what he must know to get ahead to-day, a man has to spend his extra hours so that they will count. In study, with books, at the bench, at the drafting table, in the class room, with a teacher. He cannot afford to waste them, as many do, in loafing about "having fun nights," and spending all his spare time and money in fruitless games and amusements that have no bearing on his future success in life.

The Y. M. C. A. has evening classes specially planned for the man who must increase his efficiency or give way to some one else. The young man in the country or in a small town can get employment in the city and enjoy the advantages of these night schools. Therefore, lack of money need be no bar to his advancement.

If he is situated so that he can devote his whole time to the work he can, of course, make more rapid advancement.

The Association schools are thoroughly equipped with all the necessary apparatus. The chemical laboratory

Plumbing.

includes facilities for carrying on all the ordinary phases of high school and college chemistry, with much in the way of special apparatus for research work and specialized forms of investigation. Polariscope, microscope and fine analytical balances are included in the equipment.

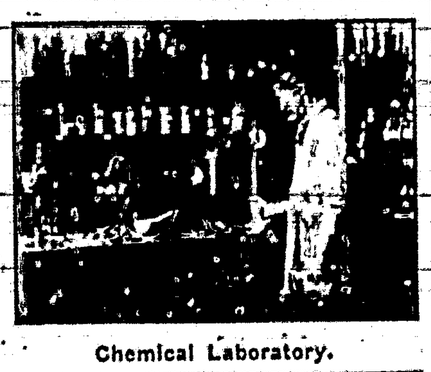
In pharmacy, in addition to the chemistry equipment, are included several complete cases of crude drugs. These give ample facilities for identifications.

The assaying equipment is unusually complete, including two types of furnaces, special tables, balances and apparatus.

The electrical laboratory is second to none in the state, including testing instruments of a high standard, meters, motors, transformers, rheostats, resistance boxes, high tension apparatus, etc. The laboratory occupies one of the best parts of the new Trade School building and is constantly being improved by addition of new apparatus.

The plumbing laboratory is arranged and designed to furnish the students with as nearly as possible actual working conditions. It occupies the best room in the Trade School building and is complete.

The steam engineering laboratory includes, besides the power and heat



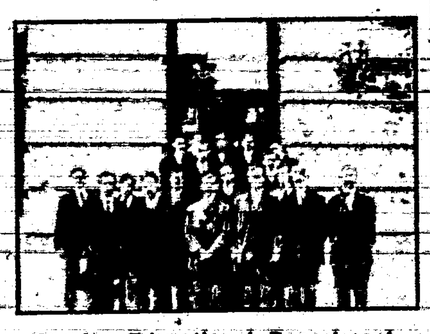
Chemical Laboratory.

ing plant of the building, a vacuum cleaner system and parts, charts and tools to make possible a thorough course.

Membership in the Denver Young Men's Christian Association means that he who holds it is connected with a body of young men of exceptional character and outlook. Morally their attitude is correct. Intellectually they are of high standard, with ambitions leading forward. Athletically they are not to be surpassed by any other organization in the world.

The only qualification required of the applicant who would join the Y. M. C. A. is that he be a boy or man of good moral character, over twelve years old and under one hundred years young.

The typical form of membership for the educational department is the "student membership," costing six dollars a year. This entitles its holder to regular privileges in the Association for one year, together with full privileges of the gymnasium and baths, swimming pool, etc., for the



Faculty Educational Department.

period of enrollment in educational classes.

Another part of the work of the physical department is to promote and perpetuate habits of play. Unfortunate, indeed, is the man who cannot play—cannot relax. He is destined to wear out before his time. Students of the schools are admitted to this work free of charge.

All members of the schools are included in the program of the social department. The social activities of the year involve many good things, such as monthly entertainments for members and ladies; monthly receptions for new members; Saturday night fireside rallies for members and ladies; reception to night school students; banquets to members; Hallowe'en social; Thanksgiving dinner to members; Christmas social; New Year's open house, etc.

The Y. M. C. A.'s business—a part of it—is to offer a man the chance of fitting himself to meet the demand for "brains." The world wants men who can do one thing better than anything else, and it pays roundly for the job, too; it pays in proportion to a man's ability and training.

GOING UP!

City ways were not altogether new to him, but, as he waited at the elevator shaft, in one of Omaha's large office buildings, he said to his companions.

"Well, I'll be hanged if that isn't a beater."

"Why, what?"

"Just look at that confounded railroad advertising on an Omaha elevator—UP! What won't they do next?"

His companion replied, "Sh—, Sh—, those letters mean 'up.'"

When I see that word, this jingle always comes to my mind:

"Whenever the little word 'up' you see,
Think of Safety, Speed, Service via U. P."

You will see that word at almost every passenger elevator in the country, but before you leave for the West, be sure to buy your ticket via "The Safe Road to Travel."

On to the Pole!

When word of the discovery of the north pole came to Chattanooga, a slightly deaf old lady remarked unctuously: "Well, now I always said them Cook tourists got about 'most everywhere. I ain't a bit surprised to hear that one of 'em's reached the top notch in the traveling line.—Lippincott's.

DOCTOR YOURSELF when you feel a cold coming on by taking a few doses of Perry Davis' Painkiller. It is better than Quinine and safer. The large 50c bottles are the cheapest.

Silence!

The instinct of modesty natural to every woman is often a great hindrance to the cure of womanly diseases. Women shrink from the personal questions of the local physician which seem indelicate. The thought of examination is abhorrent to them, and so they endure in silence a condition of disease which surely progresses from bad to worse.

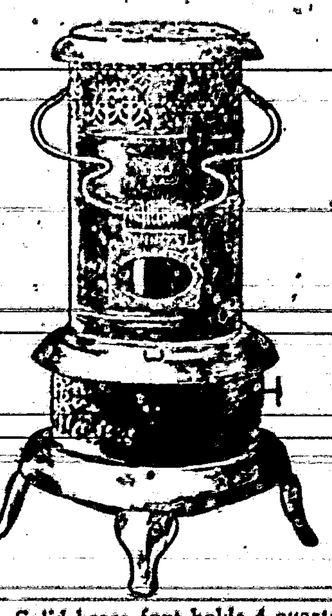
It has been Dr. Pierce's privilege to cure a great many women who have found a refuge for modesty in his offer of FREE consultation by letter. All correspondence is held as sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Favorite Prescription restores and regulates the womanly functions, abolishes pain and builds up and puts the finishing touch of health on every weak woman who gives it a fair trial.

It Makes Weak Women Strong, Sick Women Well.

You can't afford to accept a *secret* nostrum as a substitute for this non-alcoholic medicine of KNOWN COMPOSITION.

From Arctic to Tropics in Ten Minutes



No oil heater has a higher efficiency or greater heating power than the

PERFECTION Oil Heater

(Equipped with Smokeless Device)

With it you can go from the cold of the Arctic to the warmth of the Tropics in 10 minutes.

The new **Automatic Smokeless Device** prevents smoking. Removed in an instant for cleaning.

Solid brass font holds 4 quarts of oil—sufficient to give out a glowing heat for 9 hours—solid brass wick carriers—damper top—cool handle—oil indicator. Heater beautifully finished in nickel or Japan in a variety of styles.

A FALSE PREDICTION

Mme. Cleo, prima-donna soprano of the Rush opera company, sat before the long table in her dressing room "making up" for the evening performance.

A dash of rouge, a dab of powder, myriad beads of blue cosmetic along the slender edge of her blond eyelashes; and she was transformed from a plain, middle-aged woman into a radiant vision of youthful beauty. Suddenly a shriek, sounding from the stage, startled her.

Scream after scream went up from the chorus of fairies gathered for the opening tableau. Madam's first thought was of fire; catching up her chamois bag of jewels, she made a dash for safety, but the scene which her open door disclosed reassured her.

It was no fire. It was only an accident to one of the chorus girls. Indifferently she would have turned back to her preparations, but she spied the manager, Lynn Rush, striding through the excited crowd.

"What is it?" she called to him.

"Rigging broke; one of the girls killed, I suppose," he answered, shortly.

"Her own fault, probably," she flung back. "The 'firefly girls' are too careless. Don't let it annoy you; come in a moment, Lynn."

He paid no attention to the honeyed invitation; he had long ago sounded the depths of Mme. Cleo's

"Realize the Danger to Your Reputation."

honeyed phrases. Pushing his way through the horrified chorus of flimsily-dressed ladies he saw a heap of red and blue and flame-like gauze lying prone on the stage, where she had been dropped by a defective rigging.

"Bring a doctor," he said to one of the stage hands. "A doctor, quick."

Alarmed, he knelt on the stage floor feeling for a pulsation of life, bending his ear to catch a sound of breathing. To all appearances the girl was lifeless; it had been a cruel fall from the flies.

"Here," he called to some of the men, "help me to carry her into Cleo's room."

They lifted her gently and bore her to madam's door. The star dressing room was on the stage, only a few feet away, but madam was in no mood to play the role of nurse to a mere chorus girl. She raised her voice in loud objections, until Rush, disgusted, bade the men bring a carriage at once.

"Does anyone know who this young woman is?" he asked.

Several of the girls told him.

"Amy Ames; she lives at 19 Welton court, with her blind mother." And some one added:

"She is her mother's only support. What a pity if she is killed."

Lynn Rush, man of the world, theatrical manager, and as selfish as such a life is inclined to make one, felt something like pity stir his heart. She was a pretty little creature lying there, white and helpless, against his breast. The carriage had come; without reasoning why, he stepped in with his unconscious burden, gave the address to the driver and slammed the door.

"What a pity if she is killed," he repeated. "Poor little flotsam upon life's ocean." And he caressed the hand that lay limply against his knee.

She struggled to sit up and he helped her; in the darkness of the carriage he could see her extreme pallor, the weakness which assailed her, but she made a brave effort, smiling faintly as she told him that she was better, asking where she was, where they were going.

He told her.

"Oh, but I must not go home!" she exclaimed in distress. "My mother—it would frighten her; and I cannot lose a night's salary! Please take me back."

"You are not fit to work. Besides," he added, kindly, "you shall not lose a night's salary."

"Are you Mr. Rush? I thought I knew your voice."

So, she had known his voice, and he, self-centered cad, had not known of her existence.

It was a long ride to Welton court, but Lynn Rush felt that it was too short. He ought to be in the "front of the house" at that moment, still it was with reluctance that he left her in the care of her blind old mother, after being assured that no fracture had been sustained.

Never again was Amy permitted to be drawn up into midair as a "firefly;" Lynn Rush looked after her so closely that Mme. Cleo became alarmed fearing the waning of her own influence.

A month passed; Amy had been given a small part and sang it so well it was suggested by Rush that she take the understudy for the prima donna.

When Cleo heard of this she sent for Miss Ames, all the arrogance of her nature flashing from her eyes.

"Ah, my dear," the tone was sweetness as of distilled nectar. "So you are to be my understudy? I congratulate you; but, really, do you realize the danger to your reputation if you continue to permit our manager to show you such marked favors? You are surely not so stupid as to imagine you are capable of singing my part. Be careful, my dear, be careful. You are young and pretty."

"Oh," Amy felt a great tug at her heart. "You are mistaken, I am sure."

"I mistaken?" Mme. Cleo's voice had a ring of mockery. "Listen, let me make a confidant of you, for your own sake, deluded girl. This whole season he has deluded me with bouquets, jewels, attentions. He loves me, in a thousand ways he has shown it—"

"But you have a husband!" cried Amy, aghast.

"Ha, ha!" laughed Cleo. "Hear the little innocent! That is what you will never have if you continue to accept Lynn Rush's favors."

A step on the threshold.

"I beg your pardon," interposed Mr. Rush, entering. "Your prediction is fated not to come true, madam. I offer Miss Ames a husband here and now. She not only possesses my admiration, but my respect and love."

He drew Amy away, leaving madam undecided whether to resort to hysterics or to faint.

In Amy's dressing room the manager of the company slipped an arm around her.

"You have not said if you will accept the husband I offer, sweetheart."

A blare of instruments, the call-boy's cry of "overture," drowned her whispered reply, but love understands though lips remain mute.—Waverly Magazine.

AN EPITOME OF LATE LIVE NEWS

CONDENSED RECORD OF THE PROGRESS OF EVENTS AT HOME AND ABROAD.

FROM ALL SOURCES

SAYINGS, DOINGS, ACHIEVEMENTS, SUFFERINGS, HOPES AND FEARS OF MANKIND.

WESTERN NEWS.

Since the recent lynching at Cairo, Ill., a committee of fifty business men has been organized to bring about a better enforcement of the laws. The mayor has closed all gambling houses.

The "K" Club, a University of Kansas organization, has started an agitation for the building of a $75,000 stadium at Kansas City. It plans to build the structure within the next year.

The steamer Empress of China recently brought a consignment of 116 barrels of eggs from Shanghai, China, to Victoria, B. C. This is said to be the first shipment of the kind to America.

The Union depot of the Rock Island and the El Paso & Southwestern at Santa Rosa, New Mex., was burned on the morning of November 23d, most of the railroad records being destroyed. The loss is estimated at about $25,000.

Hon. Lyman J. Gage, formerly secretary of the treasury, now a resident of San Diego, Calif., was married at San Diego on Thanksgiving Day to Mrs. Ada Ballou, a widow of thirty-five years of age. Mr. Gage is seventy-three.

At Danville, Ill., a few days since, a charge of dynamite was exploded under the fruit and wine house of Joseph Mascari, demolishing five buildings and doing damage of about $50,000. Mascari charges members of the Black Hand with the crime.

Wilbur and Orville Wright and other aviators may soon be made defendants in suits brought by Prof. J. J. Montgomery of Santa Clara College, Calif., to establish his exclusive right to certain devices which are now used in the most successful aeroplanes.

Cortland F. Bishop, of New York, president of the Aero Club of America, announced at the annual dinner of the Aero Club of New England that an effort is being made to have the international contests for balloons and flying machines take place at Denver next year.

At Auburn, Calif., after being out one hour and fifteen minutes, a jury composed largely of sturdy mountaineers acquitted Alma Bell of the murder of her lover, Joe Armes, on the ground that the young, unlettered mountain girl was temporarily insane when she shot Armes.

Judge Smith McPherson of the United States District Court, at Council Bluffs, Ia., has issued an order postponing until March 8 the trial of J. C. Maybray and others, indicted on charges of using the mails to promote fake racing schemes and other alleged swindling devices.

Among the conventions to be held in Colorado next summer the most unusual will be the world's congress of the deaf, to be in session in Denver and at Colorado Springs August 6th to 12th, at which time the most prominent deaf mutes in the United States will convene.

In order that a clearer atmosphere may be assured for the study of Mars, Dr. Lowell of the Lowell observatory at Flagstaff, Ariz., is installing a 12-inch telescope on San Francisco peak. At an altitude of nearly 13,000 feet. Prof. V. M. Slipher will have charge of the task of erecting the big telescope.

By virtue of an agreement between the Union Pacific and Northern Pacific railroads for use of the latter's Portland-Tacoma track for Union and Southern Pacific trains the Harriman roads will begin to operate trains into Seattle January 1st. Between Seattle and Tacoma the Union Pacific has its own track, owning a half interest in the Milwaukee line connecting these cities. Until the Union Pacific terminals and tunnel at Tacoma are completed, the Harriman trains will be run through Tacoma on the Northern Pacific tracks.

GENERAL NEWS.

F. B. Kellogg, the government's prosecutor in the Standard Oil case, says that the court decree actually dissolves the company, that being in effect the result of the injunction.

Miss Louise W. Taft, daughter of Henry W. Taft and niece of President Taft, will be married at New York City during the Christmas holidays to George H. Showdon, a Seattle lumberman.

A tornado that struck Dexter, Mo., November 22d, demolished fifteen houses and wrecked the Stoddard county fair buildings, including the amphitheater. Two women and two children were injured.

Bradham hall, the girls' dormitory of the South Carolina State Agricultural and Mechanical College for negroes, together with the dining hall and kitchen, was burned a few days since. Loss, $50,000; insurance, $20,.

Had it not been for the recent trouble in Spain, King Alfonso would have been a challenger next year for the America's cup, according to a report published in New York. The threatening troubles at home prevented the issuance of a challenge for the international yacht race.

In order to attend the hunting party of the Marquis de Polignac at Berru, in France, Hubert Latham flew in his monoplane from Chalons, a distance of nineteen miles, in thirty minutes. He killed a goodly number of pheasants and partridges and at sunset boarded his monoplane again and returned to Chalons.

Negotiations have practically been concluded at Paris whereby M. Paulhan, the French aviator, will come to America to participate in the exhibition flights during aviation week at Los Angeles. Later he will give exhibitions at the Mardi Gras at New Orleans and at other places in the South. M. Paulhan will receive $20,000 a month.

Three hundred Americans were present at a Thanksgiving dinner in Exposition Park, Berlin, where the American Exposition will be held next year. Consul General Thackara presided and Prof. Benjamin Ide Wheeler president of the University of California, made the principal address. The gathering sent an address of greeting to President Taft at Washington.

Solon Chase, a celebrated figure in the days of the greenback agitation, 30 years ago, died of heart disease a few days since at his home at Chases Mills, in Maine. He was 67 years old. During the height of the greenback campaign Chase stumped the country as far as the Middle West, driving a pair of steers hitched to a hayrack, from the rear end of which he delivered his speeches.

Reports were received at Nairobi November 22d that all the members of the American hunting expedition were well and would return to Londiana November 30th. During the hunting on the Guas Ingisu plateau Colonel Roosevelt and Kermit Roosevelt, in company with the Chicagoan, Carl E. Akeley, killed four elephants for the American Museum of Natural History in New York.

The Wright Company of New York has been incorporated, with $1,000,000 capital, "to manufacture, sell, operate and otherwise use at any place on the North American continent and the islands adjacent thereto machines, ships or other mechanical contrivances for aerial navigation." The directors are Wilbur Wright, Orville Wright, of Dayton, Ohio; George A. Stevens; Henry F. Hooker and A. F. Barnes, of New York.

The widespread allegations of deplorable conditions in Portuguese East Africa, particularly in the islands of San Thome and Principe, credited by recent English and American writers to the existence of a cruel slave trade in African negroes among the planters, are denounced as unwarranted fabrications by Col. J. A. Wylie, Fellow of the Royal Geographical Society of England, who has just returned from a tour of investigation in that region.

NEWS FROM WASHINGTON.

"I shall cheerfully aid in your proposed temperance move in the army," promises Gen. Fred D. Grant, in command of the Department of the Lakes, in a letter addressed to the Rev. Wilbur F. Crafts of Washington, superintendent of the International Reform Bureau.

James L. Davenport, first deputy commissioner of pensions, has been selected for commissioner, following the resignation of Vespasian Warner of Illinois. Mr. Davenport is from New Hampshire and has been deputy commissioner twelve years. He has been in the pension office since 1881.

Secretary of the Interior Ballinger has decided that a private land owner, having acquired the right to use water from an irrigation project, may dispose of all title to the land. This carries with it a transfer of the water right and of the purchase of another tract of irrigable land within a reclamation project.

It is said to be shown by Department of Justice records affecting the so-called electrical trust, that the government in July, 1908, was offered a million dollar bribe to cease further operations of the General Electric Company and the Westinghouse Company in particular, and of the American Telephone and Telegraph Company incidentally.

BALLINGER TELLS OF YEAR'S WORK

Report of the Secretary of the Interior Received.

PROBLEM OF PUBLIC LANDS

Development Through Private Enterprise Under National Supervision and Control Desired—Reclamation Service Discussed.

Washington, Nov. 2.—The annual report to the president of Richard A. Ballinger, secretary of the interior, was made public to-day, and makes interesting reading. The report covers a portion of the time under the administration of James R. Garfield, and Mr. Ballinger gives him credit for his earnest and efficient services.

Secretary Ballinger comments on the old public land statutes, and continues:

"The liberal and rapid disposition of the public lands under these statutes and the lax methods of administration which for a long time prevailed naturally provoked the feeling that the public domain was legitimate prey for the unscrupulous and that it was no crime to violate or circumvent the land laws. It is to be regretted that we, as a nation, were so tardy to realize the importance of preventing so large a measure of our natural resources passing into the hands of land pirates and speculators, with no view to development looking to the national welfare.

Must Continue Prosecutions.

"It may be safely said that millions of acres of timber and other lands have been unlawfully obtained, and it is also true that actions to recover such lands have in most instances long since been barred by the statute of limitations. The principal awakening to our wasteful course came under your predecessor's administration. The bold and vigorous prosecutions of land frauds, through Secretaries Hitchcock and Garfield, have restored a salutary respect for the law, and the public mind has rapidly grasped the importance of safeguarding the further disposition of our natural resources in the public lands in the interest of the public good as against private greed. Notwithstanding this, it is necessary to continue with utmost vigor, through all available sources, the securing of information of violations of the public land laws and to follow such violations with rigid prosecutions.

Use Private Enterprise.

"On this present policy of conserving the natural resources of the public domain, while development is the key-note, the best thought of the day is not that development shall be by national agencies, but that wise utilization shall be secured through private enterprise under national supervision and control. Therefore, if material progress is to be made in securing the best use of our remaining public lands, congress must be called upon to enact remedial legislation."

Mr. Ballinger then gives in detail his recommendations for the classification of public lands, and the features of a measure which he advises for the direction of the disposal of water-power sites.

The Reclamation Service.

Concerning the reclamation service, the report says in part:

"In view of the importance of a speedy completion of existing projects and their proper extension, and of the necessity in 1912 of an adjustment between the states by which the major portion of the funds arising from the sale of public lands within each state and territory shall have been expended so far as practicable within such state or territory, and in view of the importance of making a beneficial use of waters already appropriated or capable of appropriation to which rights may be lost for nonuse, I believe an urgent appeal should be made to congress to authorize the issuance of certificates of indebtedness, or of bonds against the reclamation fund, to an aggregate of not exceeding $30,000,000, or so much thereof as may be needed."

Energetic reorganization of the Indian bureau is in progress, says Mr. Ballinger, and he recommends that the Indian warehouses at New York, Chicago, Omaha, St. Louis and San Francisco be closed as soon as possible. A more advanced policy respecting the maintenance, improvement and operation of the Yellowstone and Yosemite national parks is urged on the government.

Contracts Made on Feast Days.

The fixed date for Easter is probably a matter of little concern in the United States, but of great importance in continental Europe, where rent and other contracts are written on such feast days rather than at New Year's or the 1st of May.

FIRES IN OUR NATIONAL FORESTS

CONSTRUCTION OF GOVERNMENT TELEPHONE LINE

CONSTRUCTING A FIRE LANE

WORKING along the line of securing the greatest results in protection against fire, with a minimum of expenditure, the forest service has decided to establish on the most advantageous points of the national forests in the west a series of lookout stations from which news of the breaking out of forest fires can be telephoned to forest officials.

Since all of these stations will command a view of the country for miles around, the work of detecting and extinguishing fires in their incipiency will, by this plan, be greatly expedited, with the result that many thousands of dollars worth of valuable timber will be saved annually.

In most of the national forest states the climate is very dry, and the rainfall light. Conditions, therefore, are remarkably favorable for the spread of fire and extraordinary diligence is necessary in patroling dangerous areas. To administer the vast area included in the national forests, approximately 195,000,000 acres, the government has about 1,400 men in the field. If each man could be used for fire patrol, he would have to cover approximately 138,000 acres. As a matter of fact, however, the volume of business on the national forests has grown to such proportions that less than twenty-five per cent of the force is available. This makes it necessary to spread an average man's service over nearly four times 138,000 acres, decreasing fire protection far below the point of safety in many cases.

In the face of this, however, fire losses on the national forests are kept at a point where they are trivial when compared with the damage which would be caused were the lands contained in the national forests unprotected.

A lookout station has been established on Shuteye peak in the high Sierras, for the purpose of watching for any fires which might occur in the mountains. This peak has an elevation of 8,858 feet and the observer commands a view of a large portion of Tuolumne, Madera and Fresno counties, in California.

A cabin constructed at the top of the mountain and a telephone installed, connects with the forest supervisor's office in the valley and the various ranger stations on the Sierra forest. The observer is equipped with powerful field glasses and when a fire is discovered news is instantly telephoned to the nearest ranger.

During the short time the station has been maintained its usefulness has twice been demonstrated by the discovery of fires in remote localities. These were readily extinguished before they could gain dangerous headway, thus saving valuable timber and forage which might otherwise have been devastated had not the fires been discovered in their incipiency.

The forest service is planning to establish several other similar stations in the Sierras which will virtually command the entire range of mountains and in this manner remove the necessity for constant patrol on the part of the rangers scattered throughout the hills. Much of the rangers' time can now be devoted to trail and other improvement work without interfering with their availability for fighting fires, and the nervous strain under which many of the men labored when constantly patroling has been materially reduced. The telephone on the national forest is not only of the greatest assistance in the management of the forest, but its value is inestimable when used to report or summon help for a fire. In a single case of forest fire it may be worth the entire cost of its construction. No other work of improving the forests has been more acceptable to the residents in their vicinity.

In the summer of 1905, Secretary Wilson and United States Forester Gifford Pinchot, after going over large areas of little developed and almost unexplored national forest land, decided that systems of telephones, with proper connections, would be invaluable on the forests of the west.

It was not until some time later, however, when congress made a specific appropriation for the improvement of the national forests, that funds were available for this purpose. Last year 3,200 miles of telephone lines were constructed on the 148 national forests in the west, and wire to build about 400 miles of additional line was shipped to the various forests, but with the funds on hand the work of construction could not be completed.

A town in southern Utah, with about 1,000 inhabitants, was isolated four days' ride from the nearest railroad station until a telephone line was built by the forest service across the mountainous country for 40 miles, thus connecting the town, the headquarters of the forest and several ranger cabins with the telegraph station.

From two to five ranger stations are now connected with the supervisor's office on many of the national forests, and by the use of phones in the homes of settlers centrally located other points on the forest are reached. The marked saving in time othewise required for a trip of from 20 to 40 miles is evident.

On some forests "lookout stations" have been established to which wire is run and a man stationed in the vicinity, so that he can climb the point of vantage several times each day and with his glass sweep over the landscape in every direction, quickly scanning an area of two or three hundred thousand acres. It is by such plans that fire patrol and fire control have been established on the national forests with an exceedingly small protective force, and damage from fire has been reduced to a minimum.

SYNOPSIS.

Richard Derring, returning from a winter in the woods to his mother's farm home, is overtaken by his uncle, accompanied by his eccentric wife, coming to pay a visit at the farm. Aunt Jerusha's questions about Emily Hutton, supposed to be Richard's sweetheart, bring out the fact that she is to marry a merchant, Edwards. Derring's disappointment stimulates his ambition and under the advice of Seth Kinney, a hermit of the woods, he resolves to fit himself for college. Kinney promises to teach him Greek.

CHAPTER IV.

"You must get a man to work the farm on shares. He will make it pay you better than I have. I am no farmer." The tone had no note of discouragement; it had rather the ring of success.

Mrs. Derring looked up from her sewing. Richard had never said "must" to her before.

"What is the matter, Richard?" She looked at him searchingly.

"I want to go to college. I shall never do anything at farming, but I might at something else if I had the chance." He spoke impersonally, as if they were talking of some one else.

"Well, perhaps it is the best thing to do."

Mrs. Derring sewed on for a few minutes in silence; then she said slowly, as if the plan were forming itself: "I guess Tom Bishop would take the farm on shares and they could go to housekeeping in the L part. The rent would bring in a little something. He and Mary have wanted to go to housekeeping ever since they were married." She ended with a questioning inflection, submitting the plan.

She was not a "capable" woman. The queerness of Geoffrey Crane had descended to the daughter, and she was conscious that her plans were often impracticable. But 21 years of farming life had taught her to adjust herself to the inevitable. Almost without volition her mind had begun to turn over ways and means to meet this new emergency.

"I could let them have the south chamber and the back storeroom. And perhaps we could pack up the things in father's room so they could have that."

The young man listened in surprise. He had expected remonstrance, even refusal. He was not prepared for such rapid furthering of his project. He was almost inclined to make obstacles himself—so rapidly did she plan.

"Father Crane would be pleased, if he were alive, to know you wanted to go. He always wanted Eben to go to college. But he married Jerusha. They all said he ought to have been a scholar. He was bright at his books. But he was possessed to marry Jerusha. So father had to give it up. He always wanted me to go to school more, too. It was a disappointment to him that I married so young."

She sat looking thoughtfully out of the narrow-paned window, lost in thought of that far-off time when she was courted and won by Marcus Derring.

Richard, the Greek grammar in his hand, stole softly out of the room and climbed the steep stairway. He went quickly down the long hall and opened a door at the end. The room thus disclosed was a curious one. Across one side ran a sloping shelf, broken at one end by a zinc-lined sink. The other sides of the room were filled with cabinets in which were arranged specimens of rock, chemicals, blowpipes, and many curious contrivances, the use of which Richard could not even guess. In this room Geoffrey Crane had lived and dreamed and died. Here, in the midst of his heritage, the boy sat down to begin the work that should make him what his grandfather would have wished.

But instead of opening the brown-covered book he sat with it in his hand, thinking of the new life its thinking of the new life its pages were to open up to him. Life crowded before him. College—new faces—new friends—study—success. And Emily would be—she would not know—or care. She would marry Edwards. She would not know whether he succeeded or failed. Was it worth while?

Something flashed upon him and startled him. If she had cared, he should not now be planning a new life.

"I should have been as happy as Uncle Eben," he thought with a half smile.

To-day he did not resent the implied disloyalty to his idol. He was not thinking of her so much as of Love, the power that holds all men in its grasp and bends them to its will, till each soul longs for nothing so much as that Love shall take human shape and dwell beside him. Dimly it flitted before him—luminous but indefinable—filling him with wonder. Uncle Eben married the woman he loved and his life had been dwarfed. Seth Kinney lost the woman he loved, and his life was warped, distorted, and spoiled. Was it fate? Life without love was hard and cold. He opened the grammar and began to read, "Sixteen Greek letters—viz.:

a, g, b, e, i, o, d, k, l, m, n, p, r, s, t, u

were introduced into Phoenicia by Cadmus fifteen hundred years before Christ."

"Well, Perhaps it Is the Best Thing to Do."

CHAPTER V.

At breakfast next morning his mother faced him over her coffee-cup, stern and less ready. "I have been going over the accounts all night." She spoke in a voice that was half complaint. "I don't see how we can manage it. The interest is a hundred and eighty-six and the taxes thirty-five, and there is never anything left at the end of the year, even as it is now." She looked at him, her dark eyes weary with the night's work.

His own eyes flashed back a still light. "I shall do it some way, mother. Don't worry."

She shook her head, choking back something in her throat. "Your father would have wanted you to—if he had lived—" She rose quickly and turned away to the pantry.

When she came back her eyes were shining again.

He looked at her, smiling. "You'll find that Tom makes twice as much off the farm as I ever have. You'll be rich."

"There's the schooling," she said anxiously.

"I shall earn it." His lips came together. The dreamy look in his eyes was replaced by one of shrewd determination.

His mother's glance followed him admiringly. She rose from the table and began to clear away the dishes. Her step was light.

"And if I find I can't study and earn, too, I'll stop till I get enough to go on. It isn't as if I were good for much—" He looked at her, waiting.

"No, no—have your way. You've never asked for what you hadn't ought to have. It's true enough you'll never be a farmer." She stood for a moment, one hand holding the plates and cups, the other resting on the table, looking at him fondly. Then she turned brusquely away to the sink.

He took down his cap from its nail and went out into the clear light, whistling. Particles of frost glinted in the air. They formed on the edge of his upturned collar and fur cap and deepened the down of his lip. He blew them aside with a laugh. Taking the ax from the shed, down the lane he strode, the crusted earth crunching beneath his vigorous tread. The ax was shifted from side to side, as he walked, and the free arm swung across his chest. He struck into the wood-road with a song and hallooed to the stillness. The love-sick boy of yesterday was gone. Taking off his cap he called and sang till the blue-jays forgot to be frightened and hovered, curious, in the trees overhead. He took off his cap to them, looking up through the tree-tops to the blue shimmer of sky. He swung the cap around his head and they darted away—a blue and white clatter of sound. He replaced it, laughing softly.

The earth was alive. He reached out to the bushes as he passed, trailing the budded stems through his fingers and brushing the purple-brown oak leaves with swiftest touch. When he came to the tree that he was to cut he ran his palm up and down its rough bark before he seized his ax and swung it clear from his shoulder. The blows rang even and hard, and with every blow he drove home the first declension of the Greek grammar.

Every day found him at work in the woods. Soon Tom Bishop joined him and the cross-cut saw flashed to its work in the trunks. Richard, to the tune of its monotonous seesaw, sang Greek verbs and declined nouns—till Tom caught the rhythm and chanted declensions in sheer self-defence. At night when he repeated the strange sounds proudly to his little wife she looked at him in delight—but half in fear that he would grow away from her. She counted jealously the days that must elapse before the sledding should be done.

The fame of Richard's learning went abroad through the land. All the world knew that Seth Kinney was "learning him Greek." The old man came often to the wood-lot to hear him recite. Sitting on a fallen log, he would repeat long, rolling lines of poetry that the choppers repeated after him, to the rhythm of the saw, till the still, cold light was alive with tumbling Greek. Perhaps the blue-jays, flitting among the treetops, heard the news and told it to the crows; and the crows of the open field called to the snowbirds and sparrows; and the snowbirds lisped it to the chickadees; and the chickadees, turning upside down on the orchard trees, twittered to the hens running to and fro and cackling everywhere. Or it may be that Tom's wife told her mother. In any case, the whole village knew it. And, perhaps, it was a little balm to Richard's heart—if balm it needed—as he swung by her lighted window at night to know that she knew.

With Every Blow He Drove Home the First Declension of the Greek Grammar.

(TO BE CONTINUED.)

DECEIVED BY THE SHADOWS

Discovery That Must Have Come as a Great Relief to the Young Lawyer.

One rainy day recently, a young lawyer, thinking he would like to take a little flyer in stocks, called at the office of his broker, who happened to be his most intimate friend. When he reached the office a new clerk whom he had never seen before told him that the broker was engaged, but would be at liberty in a few minutes. While sitting idly in the waiting room the young lawyer noticed something that made his eyes almost drop out. The gloom of the day necessitated the use of artificial light in the broker's private office. Silhouetted upon the ground glass partition between the two rooms the lawyer saw the shadows of a man and a woman. They were both seated, the broker at his desk and the woman beside and facing him. Every moment or so the lips of the shadows seemed to meet affectionately. Something about the profile of the woman struck the lawyer as strangely familiar. He rose instantly and threw open the door. Sure enough it was his wife, but she was sitting decorously in a chair two or three feet from the broker, but almost in line with him, engaged in an animated discussion.

Both looked up at the intrusion, but without the least embarrassment.

"Why, hello, Tom!" exclaimed the broker. "Your wife here thinks she would like to speculate a little, too, and I've been using all my eloquence to dissuade her from it. What's the matter? Are you ill?"

"No," answered the lawyer, as he dropped into a chair with an air of great relief. "My eyes have been bothering me a good deal to-day. Do you know a good oculist?"

Influence of "Thee" and "Thou."

In a little essay in a contemporary on the "Sweet Girl Graduate" we find the following: "A young woman who has just graduated from a private school conducted by Friends is proving the truth of the report which has made this school popular and financially successful. From a quick-tempered, sharp-tongued girl she has developed into a mild-mannered, soft-spoken young woman whose serenity is never ruffled, apparently. She says that it was due to the fact that during her stay at the boarding school she was compelled to use the quaint language of the Friends, and that she found it impossible to be cross when saying 'thee' and 'thou.' If this item is widely copied, there will be a demand for a Quaker young ladies' seminary in every town that is without one."

Saintly "Guide."

An Englishman having business in a certain Danish town arrived at the railway station. He inquired of a group of men standing near the way to the house he wanted, whereupon one of them offered to go with him and show him. With recollections of what such a service meant in England, he said: "I don't want a guide." "But surely you asked us to show you the way," said one of them. "Yes, but I don't want a guide." "My dear sir, I am not a guide; I am the bishop."

INTERESTED IN WEST.

Meat Supply of the Future Must Come From Intermountain Country.

The great interest being taken by the cattle interests of the country in the coming National Western Stock Show to be held in Denver during the week of January 8-15, is largely due to the fact that the country is just commencing to realize that the future beef supply of the country must come from the West. The West has the only available pasture lands left. In the corn states of the Middle West, where heretofore the bulk of the beef has been produced, the growing demand for wheat and corn has resulted in the breaking up of thousands of acres of pasture lands and cropping them to grain. On top of this the great influx of settlers to the West has almost driven the range cattleman out of the business and as a result the country is confronted by a shortage of cattle. The West must be encouraged to grow cattle and the National Stock Show at Denver provides the method of starting the work. The National Record Associations of the four principal beef breeds, the Shorthorn, Hereford, Aberdeen-Angus and Galloway, have arranged to have a number of their best and most representative herds on exhibition at the show and each of the associations will put up fifty head of bulls and heifers selected by a committee from the leading herds. These will be sold at public sale for whatever they will bring to western breeders in order to introduce the pure blood into the western country.

The new farmers coming into the West have not been taking hold of the live stock business for two reasons. First, few of them are financially able to buy a foundation herd and many of them have no knowledge of the business. It is expected that plans will be made to finance some of the new farmers who desire to start in cattle growing, and educational work will be conducted through the big show. At both the show and conventions in Denver, the cattle supply will be the principal subject discussed. A special train load of feeder buyers from the East are coming to the show for the purpose of purchasing the car loads of fine stock cattle that will be on exhibition and incidentally to show the profit there is in the business.

COLORADO NATIONAL APPLE EXPOSITION.

Denver Auditorium, January 3 to 8.

A rate of one fare for the round trip will be made by the Colorado & Southern railway, from all points in Colorado. Tickets will be on sale January 2 and 3. Final limit, January 10, 1910.
