Range Cattle Feed Well on Native Roughness

Experiments at State College Prove Interesting to Cattle Men as Dry Season Forces Ranchmen to Substitute.

Recent experiments at State College on winter feed for range cattle, to prevent shipping them out of the state, shows in a bulletin recently issued, that prickly pear and bear grass are the most promising range feed available for cattle during the winter season.

These experiments grew out of the dire necessity of arriving at a substitute for cattle feed, owing to the dryness of the past season, and a great deal of work needs to be done to arrange the details of the experiment, so as to determine the value of each.

However, the bulletin contains an interesting table, giving the dry protein, ash, fat and fiber of a number of range feeds. The design of the quest after accurate data in regard to the substitute feed is of course to prevent the shipment of breeding cattle out of the state at a time when every effort is being made to increase the nation's food supply.

The method of handling prickley pear is common knowledge to men at home on the range. The thorns are burned off with a gasoline torch, or by brush fire.

A well known practice is to burn the thorns off while they are still standing and allowing the cattle free access to them without cutting. It is known that in Mexico cattle have been fed sotol and apparantly thrived on it. A machine for cutting and pulping yucca and sotol will soon be available for those who wish to experiment with these foods. In nearly all of foods suggested, however, the protein content is very low, and for growing or breeding cattle, it would be necessary to supplement them with some highly nitrogenous feeding stuff, such as cottonseed cake.

In order to make a properly balanced ration, 100 pounds of prickly pear should be supplemented with one or two pounds of cottonseed cake, and bear grass with about four pounds per hundred weight. The amount of feed will depend on the condition of the range, the feeder being required to to use his own best judgment as to this.

Farmers and cattle growers who may be interested in regard to winter range feeding are invited to correspond with President A. D. Crile, president of the state college. All inquiries directed to the president will be promptly acknowledged and referred to an expert for detailed information.

METHODIST CHURCH

(Rev. Lewellen, Pastor.)

Sunday School at 9:45 a. m.

Preaching at 11 a. m and 7:30 p. m. Special music by choir.

Epworth League at 6:45 p. m. Miss Iona Stevens will have charge of the program for the league.

BAPTIST CHURCH

(Rev. J. M. Gardner, Pastor.)

The pastor will preach Sunday, November 18, at 11 a. m. "Why Baptists Rebaptize." At 7:30 "How She Got the Preachor's Head."

Sunday School at 10 a. m.

Junior B. Y. P. U. and Sunbeams at at 3 p. m.

Senior B.Y.P.U. at 6:30 p. m.

Prayer meeting Wednesday at 7:30 p. m.

W. M. U. Friday at 3 p. m.

Remember you are always welcome to all services.

The pastor will preach at Oscuro Tuesday, Nov. 20 at 7:30 p. m., and at White Oaks Thursday, Nov. 22, at 7 p. m.

A Notable Personage

Frank P. Morgan, who died recently in Carrizozo, was one of the pioneers of this country. He came west as far as Kansas in 1868 and entered the service of the Santa Fe Railroad Company when it was first organized.

His first experience was making what was at that time called a "horseback survey" of Kansas, Colorado, New Mexico and California in the effort to determine the most available route over which the road could go.

In San Francisco he left his outfit and went by boat to New York where the company, so elated over his successful undertaking, sent him again to the west.

Young Morgan then made a survey of the Arkansas Valley in Colorado and down through the "Raton Pass" in New Mexico and on to where the town of Capitan is now located. Here he made an investigation of the coal fields in that vicinity to see if the fuel supply would be sufficient to justify the company in operating the line in that direction. The result of his work was so satisfactory that the road was constructed through the "Raton Pass," by the way of Albuquerque, and on to El Paso.

In those days the advice of Mr. Morgan was sought by men connected with railroad enterprises all over the middle and western sections of the country on surveying and general railroad construction.

Later on in life Mr. Morgan went to Old Mexico and engaged in the mining business and prospered until the revolution drove him, as it did many others, back into the United States. He then came to New Mexico and located on a ranch near Ancho where he resided until the time of his unfortunate death.

The remains were interred in the Capitan cemetery.

Pathfinder Syl Anderson's Big Hunt

Was Out With Party For Three Weeks and Landed Good Quantity of Game, Both Large and Small.

Syl G. Anderson and a party of friends started out on a hunting trip three weeks ago. His companions were George Beckley, Frank Smith, Howard Sweet, Tom Boylan (the cook), Harry Darr, Gus Lesserman and Bill Thorn.

The party, led by Anderson, journeyed to the San Merteo mountains and struck camp at the old Springtime Ranch, near Victor Peak, and from there they made their way to the forest ranger's cabin on the highest point on the peak. They spent four nights at the forest cabin and were treated royally by the forest ranger and his family.

The hunting party was successful from the fact that they got their limit of deer, bagged ten wild turkeys and seventy-five mallard ducks.

On their return trip they visited Parrhico and La Joy lakes and caught one hundred pounds of catfish. Mr. Anderson left the party at Belin and returned home. He says the shooting was excellent and through the mountains they saw many bear signs. Mr. Anderson says he has hunted all of the mountainous regions within one hundred miles of Carrizozo. One thing is certain, Syl is a "pathfinder."

To Keep Tab on Explosives

The following telegram was received by the county sheriff Tuesday:

"To C. W. Hyde, Sheriff:—

"Dear Sir—Relative to the licensing of explosives by the government. When licensing agents are designated, notice will be given in local papers and licenses issued in all localities, meanwhile there should be no interrruption of coal or other necessities involving use of explosives.

"Manufacturers will probably be licensed November 15th, and after that date vendors, foremen, experts, importers and analysists should keep itemized records of sales or other disposition of explosives, pending detailed instructions and licenses.

"(Signed) Manning."

In explanation we will say that Mr. Manning is a government official and the above telegram has reference to the precautionary meane now being used to guard the interests of the government and the people from its enemies, and all persons engaged in the manufacture, sale or handling of explosives must be licensed by the government.

Mrs. Jno. Bell has returned from El Paso where she has been visiting friends.

HIGH SCHOOL NOTES

By Miss Pearl Hyde

The Seniors will entertain the Sophomores at the Branum home on Friday, November 23, while the Juniors will entertain the Freshmen at the home of Mrs. D. S. Donaldson. Preparations are being made to have a merry time.

The high school boys are now organizing a tennis club which bids fair to be a great success. The school board has very kindly consented to help the tennis clubs with their good work.

On Friday afternoon, November 23rd, at 2.45 o'clock, the Criterian and Swastika Societies will give a joint program, to which the public is cordially invited. The program follows:

Song—Columbia, the Gem of the Ocean ..... School
President's Proclamation ..... Kathryn Spence
Reading—Romance ..... Bertie Rae Cochennetti
Music — Tennyson's Crossing the Bar ..... Glee Club
Reading—The Call to Thanksgiving ..... Ethel Hoffman
Governor's Proclamation ..... Milton Thompson
Pantomime—The Star Spangled Banner ..... Ruth Ediston and Lora Haley.
Reading—Selected ..... Linza Branum
Reading—The Good Thanksgiving ..... Barbara Hurst
School News—Real and Imaginative ..... Pearl Kennedy
Instrumental Solo.. Hilary Cooper
Chalk Talk ..... Dean Gumm
Essay—Thanksgiving ..... Pearl Hyde
Song—Praise to God ..... School
Current Events ..... Frankie Gray
Thanksgiving in War Times ....
Speaker to be announced later
Thanksgiving Song ..... School
America—Salute the Flag.. School

President of Swastika, Ethel Hoffman.

President of Criterian, Rachel Hughes.

The students will make a worthy effort to entertain all visitors, and they expect to have a large attendance.

St. John, Not Saint John

In the hearing of Vincent St. John on Tuesday of this week the defendant appeared without council and waived examination.

The certified copy of the indictment received from Chicago for the hearing, was sent to the United States District Attorney S. Burkhart at Albuquerque who will, after signing the indictment, transfer it to the United States District Judge at Santa Fe, who will in turn issue the necessary papers on which St. John will be sent to Chicago.

Our next issue of Nov. 23, it being the last before Thanksgiving day, we will publish in full the Thanksgiving proclamation of President Wilson, with a comment on this important masterpiece.

Subscribe for the Outlook.

The Development at Mine Being Made Rapidly

The Vera Cruz Mine Under Management of Mr. Foster is Now Showing Remarkable Development.

The new mill, amalgamator and electrical equipment have been shipped from three different points, viz., Denver, San Francisco and Chicago.

The work in the mine, while progressing in fine order, is being temporarily held in check by the re-adjusting of conditions about the mine to make room for the new machinery, which is daily expected.

The General Engineering Co. of Salt Lake City, Utah, have made a very exhaustive milling test of this ore recently and the test was so completely satisfactory that they recommended amalgamating the ore and cyaniding the tailings. Their results show an average extraction by amalgamation of 72.96 per cent and 98.57 per cent by amalgamating the ore and cyaniding the tailings, thus showing that on $7.00 ore 79.96 per cent extraction would be $5.10 gross recovery.

The Vera Cruz mine only needed the push and vim that Mr. Foster gave it to bring the heretofore hidden virtues of the enterprise to light.

The installing of the Ellis Ball Chili Mill whereby the milling of the ore is revolutionized, is an evidence in itself of the possibilities of the mine, and Mr. Foster can see where others have overlooked, that modern machinery for amalgamating the ore, is the only method of bringing about the wealth producing possibilities of an extensive venture.

Finley's Annual Round-Up

According to the annual custom of O. Z. Finley, this was the week for the round-up of cattle and branding of young calves. Consequently the Finley ranch is the scene of additional activity this week. Their ranch home has been open to visitors and friends, and those who could availed themselves of the hospitality offered by the host and hostess of the ranch.

Those who were fortunate enough to be present were Mesdames Wetmore, Dingwall, Crawford, Fairbank, Allen, Harris, Cole and French; Mr. and Mrs. Reily, Mr. Brickley and sister and daughter, Ruth.

It goes without saying, that refreshments and the best of everything in the way of ranch accommodations were bountifully in evidence, for the Finleys leave nothing undone that they undertake.

CHAPTER XVII.—Continued.

—17—

A little later Paloma, pale and heavy-eyed, stole into the room, and Dave's cheerful greeting awoke Mrs. Strange with a jerk.

"So! You're feeling better, aren't you?" the latter woman cried, heartily.

"Yes. How did I get here?" Dave asked. "I must have been right sick and troublesome to you."

Paloma smiled and nodded. "Sick! Why, Dave, you frightened us nearly to death! You were clear out of your head."

Mrs. Strange broke into his frowning meditation to ask, "How long since you had a night's sleep?"

"I— Oh, the prosecutor at Brownsville ain't let me alone a minute for a week."

"Umph! I thought so. You puzzled that pill-roller, but doctors don't know anything, anyhow. Why, he wanted to wake you up to find out what ailed you! I threatened to scald him if he did."

"I seem to remember talking a good deal," Dave ventured. "I reckon I—said a lot of foolish things." He caught the look that passed between his nurses and its significance distressed him.

Mrs. Strange continued: "That's how we guessed what your trouble was, and that's why I wouldn't let that fool doctor disturb you. Now that you've had a sleep and are all right again, I'm going home and change my clothes. I haven't had them off for two nights."

"Two nights!" Dave stared in bewilderment. Then he lamely apologized for the trouble he had caused, and tried to thank the women for their kindness.

He was shaky when, an hour later, he came downstairs for breakfast; but otherwise he felt better than for many days; and Blaze's open delight at seeing him did him as much good as the food he ate.

Dave spent part of the morning sunning himself on the porch, reading the papers with their exciting news. During his absence Paloma had done her best to spoil Montrosa, and among other marks of favor had allowed her free run of the yard, where the shade was cool and the grass fine, and where delicious tidbits were to be had from the kitchen for the mere asking. In consequence, Dave did not remain there long until he was discovered. Montrosa signaled, then trotted toward him with ears and tail lifted. Her delight was open and extravagant; her welcome was as enthusiastic as a horse could make it. Gone were her coquetry and airs; she nosed and nibbled Dave; she rubbed and rooted him with the violence of a battering-ram, and permitted him to hug her and murmur words of love into her velvet ears. She swapped confidence for confidence, too; and then, when he finally walked back toward the house, she followed closely, as if fearful that he might again desert her.

Phil Strange met the lovers as they turned the corner of the porch, and warmly shook Dave's hand. "Teeny—my wife—told me you was better," he began, "so I beat it out here. I hung around all day yesterday, waiting to see you, but you was batty."

"I was pretty sick," Dave acknowledged. "Mrs. Strange was mighty kind to me."

"Sick people get her goat. She's got a way with 'em and with animals, too. Why, Rajah, the big python with our show, took sick one year, and he'd have died sure only for her. Same with a lot of the other animals. She knows more'n any vet I ever saw."

"Perhaps I needed a veterinary instead of a doctor," Dave smiled. "I guess I've got some horse blood in me. See!" Montrosa had thrust her head under his arm and was waiting for him to scratch her ears.

"Well, I brought you some mail," Strange fumbled in his pocket for a small bundle of letters, explaining: "Blaze gave me these for you as I passed the post office."

Dave took the letters with a word of thanks, and thrust them carelessly into his pocket. "What seems to be the trouble?" he inquired.

"You remember our last talk? Well, them Mexicans have got me rattled. I've been trying everywhere to locate you. If you hadn't come home I'd have gone to the prosecuting attorney, or somebody."

"Then you've learned something more?"

Phil nodded, and his sallow face puckered with apprehension. "Rosa Morales has been to see me regular."

Dave passed an uncertain hand over his forehead. "I'm not in very good shape to tackle a new proposition, but—what is it?"

"We've got to get Mrs. Austin away from here."

"We? Why?"

"If we don't they'll steal her."

"Steal her?" Dave's amazement was patent. "Are you crazy?"

"Sometimes I think I am, but I've pumped that Morales girl dry, and I can't figure anything else out of what she tells me. Her and Jose expect to make a lump of quick money, jump to Mexico, get married, and live happy ever after. Take it from me, it's Mrs. Austin they aim to cash in on."

"Why—the idea's ridiculous!"

"Maybe it is and maybe it ain't," the fortune-teller persisted. "More than one rich Mexican has been grabbed and held for ransom along this river; yes, and Americans, too, if you can believe the stories. Anything goes in that country over there."

"You think Jose is planning to kidnap her? Nonsense! One man couldn't do such a thing."

"I didn't say he could," Phil defended himself, sulkily. "Remember, I told you there was somebody back of him."

"Yes, I remember, but you didn't know exactly who."

"Well, I don't exactly know yet. I thought maybe you might tell me."

There was a brief silence, during which Dave stood frowning. Then he appeared to shake himself free from Phil's suggestions.

"It's too utterly preposterous. Mrs. Austin has no enemies; she's a person of importance. If by any chance she disappeared—"

"She's done that very little thing," Strange declared.

"What?"

"She's disappeared—anyhow, she's gone. Yesterday when I saw you was laid up and couldn't help me, I phoned her ranch; somebody answered in Spanish, and from what I could make out they don't know where she is."

Dave wondered if he had understood Strange aright, or if this could be a trick of his own tired brain. Choosing his words carefully, he said: "Do you mean to tell me that she's missing and they haven't given an alarm? I reckon you didn't understand the message, did you?"

Strange shrugged. "Maybe I didn't. Suppose you try. You sabe the lingo."

Dave went to the telephone, leaving Phil to wait. When he emerged from the house a few moments later, it was with a queer, set look upon his face.

"I got 'em," he said. "She's gone—left three days ago."

"Where did she go?"

"They wouldn't tell me."

"They wouldn't?" Strange looked up sharply.

"Wouldn't or couldn't." The men eyed each other silently; then Phil inquired:

"Well, what do you make of it?"

"I don't know. She wasn't kidnaped, that's a cinch, for Dolores went with her. I—think we're exciting ourselves unduly."

The little fortune-teller broke out excitedly: "Yes we are! Why do you suppose I've been playing that Morales girl? I tell you there's something crooked going on. Don't I know? Didn't I wise you three weeks ago that something like this was coming off?" It was plain that Phil put complete faith in his powers of divination, and at this moment his earnestness carried a certain degree of conviction. Dave made an effort to clear his tired brain.

"Very well," he said. "If you're so sure, I'll go to Las Palmas. I'll find out all about it, and where she went. If anybody has dared to—" He drew a deep breath and his listlessness vanished; his eyes gleamed with a hint of their customary fire. "I reckon I've got one punch left in me." He turned and strode to his room.

As Dave changed into his service clothes he was surprised to feel a new vigor in his limbs and a new strength of purpose in his mind. When he stood in his old boots and felt the familiar drag of his cartridge-belt, when he tested his free muscles, he realized that he was another man. Even yet he could not put much faith in Phil Strange's words—nevertheless, there might be a danger threatening Alaire; and if so, it was time to act.

Phil watched his friend saddle the bay mare, then as Dave tied his rifle scabbard to its thong he laughed nervously.

"You're loaded for bear."

The horseman answered, grimly: "I'm loaded for Jose Sanchez. If I lay hands on him I'll learn what he knows."

"You can't get nothing out of a Mexican."

"No? I've made Filipinos talk. Believe me, I can be some persuasive when I try." With that he swung a leg over Montrosa's back and rode away.

CHAPTER XVIII.

A Surprise.

Law found it good to feel a horse between his knees. He had not realized until now how long Montrosa's saddle had been empty. The sun was hot and friendly, the breeze was sweet in his nostrils as he swept past the smiling fields and out into the mesquite country. Heat waves danced above the patches of bare ground; insects sang noisily from every side; far ahead the road ran a wavering course through a deceitful mirage of rippling ponds. It was all familiar, pleasant; it was home. With every mile he covered his strength and courage increased.

Such changes had come into his life since his last visit to Las Palmas that it gave him a feeling of unreality to discover no alteration in the ranch. He had somehow felt that the buildings would look older, that the trees would have grown taller, and so when he finally came in sight of his destination he reined in to look.

Behind him he heard the hum of an approaching motor, and he turned to behold a car racing along the road he had just traveled. The machine was running fast, as a long streamer of choking dust gave evidence, and Dave soon recognized it as belonging to Jonesville's prosecuting attorney. As it tore past him its owner shouted something, but the words were lost. In the automobile with the driver were several passengers, and one of these likewise called to Dave and seemed to motion him to follow. When the machine slowed down a half-mile ahead and veered abruptly into the Las Palmas gateway, Dave lifted Montrosa to a run, wondering what pressing necessity could have induced the prosecuting attorney to risk such a reckless burst of speed.

Dave told himself that he was unduly apprehensive; that Strange's warnings had worked upon his nerves. Nevertheless, he continued to ride so hard that almost before the dust had settled he, too, turned into the shade of the palms.

Yes, there was excitement here; something was evidently very much amiss, judging from the groups of ranch-hands assembled upon the porch. They were clustered about the doors and windows, peering in. Briefly they turned their faces toward Law; then they crowded closer, and he perceived that they were not talking. Some of them had removed their hats and held them in their hands.

Dave's knees shook under him as he dismounted; for one sick, giddy instant the scene swam before his eyes; then he ran toward the house and up the steps. He tried to frame a question, but his lips were stiff with fright. Heedless of those in his path, he forced his way into the house, then down the hall toward an open door, through which he saw a room full of people. From somewhere came the shrill wailing of a woman; the house was full of hushed voices and whisperings. Dave had but one thought. From the depths of his being a voice called Alaire's name until his brain rang with it.

A bed was in the room, and around it was gathered a group of white-faced people. With rough hands Law cleared a way for himself, and then stopped, frozen in his tracks. His arms relaxed, his fingers unclenched, a great sigh whistled from his lungs. Before him, booted, spurred, and fully dressed, lay the dead body of Ed Austin.

Dave was still staring at the master of Las Palmas when the prosecuting attorney spoke to him.

"God! This is terrible, isn't it?" he said. "He must have died instantly."

"Who—did it?"

"We don't know yet. Benito found him and brought him in. He hasn't been dead an hour."

Law ran his eyes over the room, and then asked, sharply, "Where is Mrs. Austin?"

He was answered by Benito Gonsales, who had edged closer. "She's not here, senor."

"Have you notified her?"

Benito shrugged. "There has been no time, it all happened so quickly—"

Someone interrupted, and Dave saw that it was the local sheriff—evidently it was he who had waved from the speeding machine a few moments before.

"I'm glad you're here, Dave, for you can give me a hand. I'm going to round up these Mexicans right away and find out what they know. Whoever did it hasn't gone far; so you get as my deputy and see what you can learn."

When Dave had gained better control of himself he took Benito outdoors and demanded full details of the tragedy. With many lamentations and incoherencies the range boss told what he knew.

Ed had met his death within a half-mile of Las Palmas as he rode home for dinner. Benito, himself on his way to the house, had found the body, still warm, near the edge of the pecan grove. He had retained enough sense to telephone at once to Jonesville, and then—Benito hardly knew what he had done since then, he was so badly shaken by the tragedy.

"What time did it happen?"

"It was noon when I came in."

Dave consulted his watch, and was surprised to discover that it was now only a few minutes past one. It was evident, therefore, that Benito had indeed lost no time, and that his alarm had met with instant response.

"Now tell me, who did it?"

Benito flung his hands high. "God knows! Some enemy, of course; but Don Eduardo had many."

"Not that sort of enemies. There was nobody who could wish to kill him."

"That is as it is."

"Haven't you any suspicions?"

"No, senor."

"You say Mrs. Austin is gone?"

"Yes."

"Where?"

"I don't know."

Dave spoke brusquely: "Come, Beni to; you must know, for your wife went with her. Are you trying to keep something back?"

"No, no! As God is my judge!" Benito declared. "I didn't know they were going until the very last, and even then Dolores would tell me nothing. We were having bad times here at Las Palmas; there were stormy scenes yonder in the house. Senor Ed was drinking again, you understand? The senora had reason to go."

"You think she ran away to escape him?"

"Exactly."

Dave breathed more easily, for this seemed to settle Strange's theory. The next instant, however, his apprehensions were doubled, for Benito added:

"No doubt she went to La Feria."

Law uttered an incredulous exclamation. "Not there! Surely she wouldn't go to La Feria at such a time. Why, that country is ablaze. Americans are fleeing from Mexico."

"I hadn't thought of that," Benito confessed. "But if she didn't go there, where did she go? Saints above! It is a fine condition of affairs when a wife keeps secrets from her husband, eh? I suppose Dolores feared I would tell Don Eduardo, God rest his soul! This much I do know, however: not long ago there came a letter from General Longorio, offering settlement for those cattle he stole in his government's name. Dolores told me the senora was highly pleased and was going to Mexico for her money. It was a mark of Longorio's favor, you understand me? He's a great—friend, an ardent admirer." Benito winked. "Dolores told me all about that, too. No, I think they went to La Feria."

Dave remembered his first conversation with Phil Strange and the fortune-teller's insistence that some powerful person was behind Jose Sanchez. More than three weeks ago Strange had forecast something very like this murder of Ed Austin. Dave felt as if he were the victim of an hysterical imagination. Nevertheless, he forced himself to ask, quietly:

"Is Jose Sanchez anywhere about?"

The range boss shrugged. "I sent him to the east pasture this morning."

"Did he go?"

"Eh? So! You suspect Jose of this. God in heaven! Jose is a wild boy—But wait! I'll ask Juan if he saw him; yes, and Victoria, too. That is Victoria you hear squalling in the kitchen. Wait here."

Benito hurried away, leaving Dave a prey to perplexity; but he was back again in a few moments. His face was grave.

"Jose did not go to the east pasture," he said.

"Where is he now?"

"No one seems to know."

Law walked to his horse, mounted, and galloped away. Benito, who watched him, saw that he turned toward the river road which led to the Las Palmas pumping plant.

The more Dave thought about Ed Austin's death, the more certain he became that it was in some way connected with Alaire's disappearance; and the loose end by which the tangle might be unraveled, it seemed to him, lay in the hands of Rosa Morales, Jose's sweetheart. That Sanchez was the murderer Dave now had little doubt; but since the chance of apprehending him was small, he turned his attention to the girl. He would make Rosa speak, he told himself, if he had to use force—this was no time for gentle methods. If she knew aught of Alaire's whereabouts or the mystery of her departure from Las Palmas, he would find a way to wring the truth from her. Dave's face, a trifle too sober at all times, took on a grimmer aspect now; he felt a slow fury kindling in his breast.

NEW BAGS PRETTY

Attractive Ones Can Be Made at Home at Small Cost.

Velvet, Fur and Satin Are Popular Materials as Throughout the World of Dress.

Bags are more alluring than ever this year.

The best of them are expensive trifles, but there are others that are attractive without being extravagantly high-priced, and as is always the case when drawstring bags are in order, many a woman can make a good-looking bag for herself without spending much money.

Velvet and fur and satin are the popular materials here as throughout the world of dress, with beautiful brocades and other fancy silks to help in the good work.

For the omnipresent knitting bag of course all sorts of materials are used, from raffia to gold brocade; but the smaller handbag is less catholic and less spectacular, though often exceedingly original.

The bead bag has lost none of its vogue and appears in delightful shapes, colorings and designs, one tone colorings being perhaps first choice this season.

A handsome brocade silk with the design outlined in beads makes an effective bag and one that calls for no great skill or labor on the part of the maker. Black or dark blue brocade, outlined in gold, silver or steel, is effective, and color schemes to match any costume are easily worked out. A rather long narrow drawstring shape with bead tassels across the bottom to match the beading of the brocade is good-looking for this type of bag.

Bags of Fur, Velvet and Beads.

Beads are used to relieve fur, too, and very clever things are done with this combination. One model in seal is flat, rather small, mounted on dull gold and has a butterfly embroidered in tiny gold beads on its side.

A muff bag of fur with turned-back flaps at the ends has each flap finished by a bead tassel and a half moon of solid beading just below the mounting on each side of the bag.

There are many fur bags also without the beading, the short hair, supple furs, such as seal and mole, being especially liked for this purpose, while the long-haired furs are used for trimming bags of velvet, silk and cloth.

NEW HANGER FOR SWEATERS

Special Holder, Made From Embroidery Ring, Will Preserve Shape of Garments.

Have you ever hung your pet sweater away on a coat hanger for a couple of days? If you have, you have probably found it stretched most distressingly when you took it down again. So then, have you hung it, ever so carefully, up on a hook?

Yes? Then, of course, you have found a most annoying little bump in the wool where it hung.

So then, perhaps, you have decided to keep your sweaters in a bureau drawer—and you have caught them on the edge of the drawer and pulled a thread.

Well, here is a suggestion to make the keeping of your sweaters truly easy. Have a special sweater holder. This special holder is no more than a huge embroidery ring, of the sort that is used for the handles and tops of knitting bags. Attach a ribbon or tape to the ring at each end, and by means of this ribbon hang it on a hook. Then pull the sweater through the ring. Several may be placed on the same ring without any trouble.

The ring, to be best fitted for its work, should be wound with satin ribbon. The quality need not be expensive, but the shiny surface of the satin ribbon makes it easier to pull the sweaters through the ring and there is no possibility of tearing by splinters from the surface of the wood when it is covered in this way.

KIMONO MADE FOR COMFORT

Kimono means comfort, but not all of these luxurious robes and coats, made in these days of extreme style, are carrying out the meaning of the word. Some of the garments are built so that they make for discomfort, tugging, tight and ill-fitting. A kimono should be loose-fitting, and the charming affair pictured here is representative of what a kimono should be. It is made in a very delicate shade of pale crepe, bound at the neck and bottom with a metal cord of red, gold and silver. At intervals translucent white beads are placed in the edging.

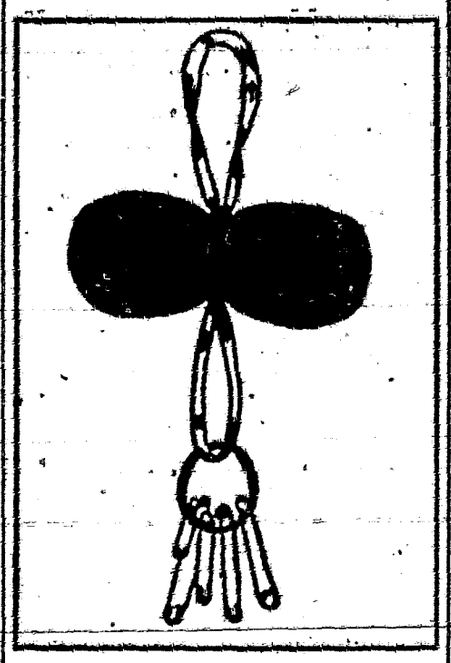
THIS PINCUSHION IS USEFUL

It Also Makes a Dainty Decoration to Be Suspended From the Dressing Table.

The pincushion in the sketch makes a dainty decoration suspended from the dressing table, and will be found useful, for it holds pins and needles of all sizes, and also has a ring for safety pins.

Make a little bag of white sateen and fill it with sawdust or bran. Use a piece of material that measures 6 by 5 inches.

Now cover this bag with a remnant of pretty silk; a piece of ribbon will do equally well, providing it is wide enough.



A Novel Pincushion.

Find the exact center of this pad, then take a prettily colored narrow ribbon, and bind it round the center as in sketch. Secure this band at the back of the pad with a stitch.

Now, with a piece of the same ribbon 6 inches in length, make a loop to hang the cushion up by. Sew to the top of the pad; at the bottom of the pad sew another similar loop, but first of all thread on to it a bone ring.

The dainty article is now finished. It only remains to stick pins of assorted sizes on the pad and to fasten several safety pins on the bone ring.

When Hair Is Dry.

While oily hair is not at all beautiful, it is usually much healthier and thicker than dry, harsh hair. If your glory crown has started in to be dry and wispy, it would be a wise move to take it in hand right away and call for an immediate reform. Twenty-four hours before the shampoo rub pure olive oil into the scalp. You can have no idea how much help this will give, and what lovely fluffy gloss it will impart to the hair after the shampoo. Have this cleansing with egg instead of soap.

Love Found the Way.

The spirited story of one of the most romantic weddings of the war was unfolded recently, writes a British correspondent. Lieutenant Wyndham was gassed in France, and taken to Lady Luchcapes's hospital. There he fell in love with Lord Inchcape's daughter, but the girl's father refused his consent to their marriage. The couple ran away to London, only to find Lord Inchcape in hot pursuit, and that Wyndham was wanted for being absent without leave. There followed a chase through London, in the course of which the couple got into telephone booths and changed their clothes, and then walked out under the very noses of the detectives who were waiting for them. They then made their escape to Scotland, where they were married.

CUTICURA STOPS ITCHING

Instantly in Most Cases—Write for a Free Sample.

Cuticura is wonderfully effective. The Soap to cleanse and purify, the Ointment to soothe and heal all forms of itching, burning skin and scalp affections. Besides these super-creamy emollients if used daily prevent little skin troubles becoming serious.

Free sample each by mail with Book. Address postcard, Cuticura, Dept. L, Boston. Sold everywhere.—Adv.

At the Post Office.

"What did she do when you told her it would cost 3 cents to send a letter hereafter instead of 2?"

"Umph—she got so angry she stamped her foot."

GREEN'S AUGUST FLOWER

has been a household panacea all over the civilized world for more than half a century for constipation, intestinal troubles, torpid liver and the generally depressed feeling that accompanies such disorders. It is a most valuable remedy for indigestion or nervous dyspepsia and liver trouble, bringing on headache, coming of up food, palpitation of heart and many other symptoms. A few doses of August Flower will immediately relieve you. It is a gentle laxative. Ask your druggist. Sold in all civilized countries.—Adv.

Wireless to Africa.

By the erection of a chain of stations for a distance of 1,800 miles up the Congo river it will be possible to send wireless messages all the way across Africa.

Housekeepers Can Save $200,000,000 on Food

In these days when the high cost of living pinches nearly every home, no waste should be overlooked. One of the most flagrant and the most easily prevented, is the destruction of food by rats. One rat will often do a hundred dollars' damage of food and property in a single night, and a careful estimate gives over $200,000,000 as the value of foodstuffs destroyed annually by these pests. Exterminate them with Stearns' Paste and save this enormous loss of food. A small box of Stearns' Paste costs only 35 cents and is usually enough to completely rid the house of rats and mice; also effective against cockroaches and waterbugs. Adv.

John Constanzo of Pittsburgh has been arrested, accused of biting off his wife's ears.

When a man begins to burn his money look out for a hot time.

Suffered Several Years. PERUNA MADE ME WELL

Mrs. Elizabeth Reuther, 1002 11th St., N. W., Washington, D. C., writes: "I endorse Peruna as a splendid medicine for catarrh and stomach trouble, from which I suffered several years. I took it for several months, found my health was restored and have felt splendidly ever since. I now take it when I contract a cold, and it soon rids the system of any catarrhal tendencies."

Its My Standby for a Cold.

Those who object to liquid medicines can procure Peruna Tablets.

Makes Up for Lost Time.

It takes a kitten nine days to get its eyes open, but then it has nine lives to live to make up for it.

Makes the laundress happy—that's Red Cross Bag Blue. Makes beautiful, clear white clothes. All good grocers. Adv.

Everybody's Luck.

The bargain hunter is just as apt to find a gold brick as anyone else.

With the Kings.

Punctuality is the politeness of kings.

What a crowd would be in heaven if people could go on Sunday excursions.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it Bears the Signature of Chas. H. Fletcher.

In Use for Over 30 Years.

Children Cry for Fletcher's Castoria

Flattery is harmless to the woman who doesn't flatter herself.

THE LAST EXAMINATION OF WAR'S DRAFT

Many a man has fallen down because a test of his water showed unmistakably that he had kidney disease.

The kidneys are the scavengers and they work day and night in separating the poisons from the blood. Their signals of distress are easily recognized and include such symptoms as backache, depressions, drowsiness, irritability, headaches, dizziness, rheumatic twinges, dropsy, gout.

"The very best way to restore the kidneys to their normal state of health and cure such symptoms," says Dr. Pierce of Invalids' Hotel, Buffalo, N. Y., "is to drink plenty of water and obtain from your favorite pharmacy a small amount of An-u-ric, double strength, which is dispensed by almost every druggist." You will find Anuric more potent than lithia, dissolves uric acid almost as water does sugar. Large package 60 cents.

Send Dr. Pierce 10c for trial pkg. and ask for advice if there is need.

TO RESIST THE ATTACK of the germs of many diseases, such as Grip, Malaria, means fight or die for all of us. These germs are everywhere in the air we breathe. The odds are in favor of the germs, if the liver is inactive and the blood impure.

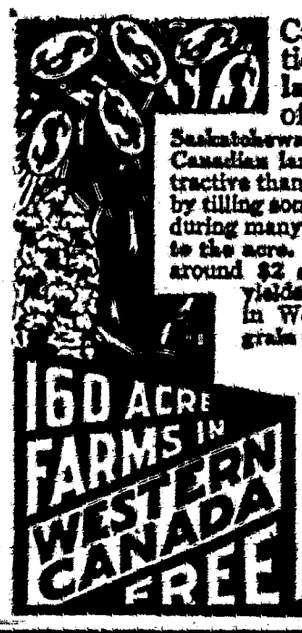
What is needed most is an increase in the germ-fighting strength. To do this successfully you need to put on healthy flesh, rouse the liver to vigorous action, so it will throw off these germs, and purify the blood so that there will be no "weak spot," or soil for germ-growth.

We claim for Dr. Pierce's Golden Medical Discovery that it does all this in a way peculiar to itself.

It cures troubles caused by torpid liver or impure blood. All druggists. Tablets 60c.

"The Common Sense Medical Adviser," latest edition, in French cloth binding, will be sent free on receipt of five dimes or stamps to pay the cost of printing, wrapping and mailing. Address Dr. Pierce, Invalids' Hotel, Buffalo, N. Y.

Raise High Priced Wheat on Fertile Canadian Soil



Canada extends to you a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta. This year wheat is higher but Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help feed the world by tilling some of her fertile soil—land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think of the money you can make with wheat around $2 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming in Western Canada is as profitable an industry as grain growing.

The Government this year is asking farmers to put increased acreage into grain. There is a great demand for farm labor to replace the many young men who have volunteered for service. The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient. Write for literature as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

YOUR FLAG AND MINE.

The Holy City

Reports from reliable sources furnish news of the retreat of the Turkish forces, before the British advance in Palestine.

This good news should be hailed with delight by all liberty loving people, for it is one of the most important pieces of information that has come over the wire for some time.

British forces are approaching the "City of the King," from two points, Gaza, the city made famous by the feat of Sampson, has been captured as has been Beersheba. forty miles from Jerusalem.

The Turks are fleeing in every direction in total disorder, and British aeroplanes are dropping bombs on them as they flee.

The British cabinet has announced that the Holy Land will never again be in control of the fiendish Turk, and that it will be returned to the Children of Israel, who took it from the heathen.

Jewish people are aiding in every Christian undertaking, and are, in this sense, returning from their wanderings. They are, and always have been, leaders in thought and action, and for two thousand years have had no national existence, yet they have maintained their racical integrity. They have always been foremost, when not held down by political restictions, in promoting the good and welfare wherever they have resided.

Now the British are to restore to them their beloved Jerusalem, and well may we rejoice with them in this fulfillment of prophecy, when the Children of Israel shall come into their own.

Red Cross Christmas

"Make it a Red Cross Christmas" is to be the recruiting slogan of committees for every Red Cross organization throughout the country in a nation-wide drive for fifteen million members of the Red Cross during the week beginning December 17.

In the Mountain Division, a committee will be working in evary city, town, village and hamlet, and will wind up the week's campaign with a final appeal on Christmas Eve, a time when the Christmas spirit is abroad and when the thoughts of all true Americans will be with the boys in the trenches awaiting the word to go "over the top" in a drive against the Huns and with those hundreds of thousands of other boys in training camps making ready to go across the water. And just at the same time when the final appeal for members is being made, those hundreds of thousands of American youths, abroad and in home camps, will be making ready for and anticipating the Christmas trees and entertainments to be furnished by the loyal people of the United States through the American Red Cross.

With other of our Exchanges, we welcome the weekly visits of the "Ft. Stanton Press." It is a bright, newsy publication, bristles with good local news, and is ably edited. Its staff is composed of Dr. F. H. McKeon, contributing editor, Ernest Dippel, Publisher, and Geo. W. McGunnis, Managing Editor. It is devoted to the interest of patients and residents of Ft. Stanton. The newspaper fraternity have moved up a notch to give place to Ft. Stanton Press.

We are continually put to the displeasure of opening letters from puny politicians, asking for space for articles of a political nature. To all such, we have no space for political "stuff," as we are engaged in Uncle Sam's business just now. Keep your mud slinging to yourselves.

This is a country of free speach and free press, but that does not license either tongue or press to abuse the government. He that is not for us, is against us, and we have on hand a good supply of tar and feathers for those who misundertand what freedom on American soil really means.

The quiet villages and hamlets furnish a good retreat for enemies of the government. Like the game during the hunting season, they sneak away to quiet places to avoid the hunter and hounds. Are we slumbering over a volcano?

La Follette sends words of anoouragement and comfort to those imprisoned for words and acts in opposition to the United States war policies. Be careful "Bob," you are not in the German Reichstag now.

The kaiser will soon find that he is bound hands and and feet with "Liberty Bonds".

Society Teachcs Navy Cooks to Cook

Many prominent society women, led by Mrs. Adrain Iselin, have given up social activities in in order to teach sailors how to cook. Mrs. Iselin, writing in the November issue of Harper's Bazar, tells how, thru the New York Cooking School, these women are traning able seamen to prepare food properly and are raplly lessening the shortage of capable chefs in the Navy.

Rear Admiral Usher, U. S. N., has co-operated with Mrs. Iselin and has endorsed her work.

Mr. Uno Sandstorm was a welcome visitor-? Saturday night.

FEE IN INSTALLMENTS

Geraldine—When are we to be married?

Gerald—When I can find a minister willing to take one dollar down and 10 cents a month afterwards.

Winter Touring

For the eastern motorist relieved of considerations of distance and time, California offers what a winter touring ground should have," writes Alexander Johnston in the November issue of MoTor. "A glorious climate with a January average of 54, and sunshine practically every day during this time of the year, outdoor life in the golden State is the accepted condition of existence. In its highway system California has a potent lure for motorists from every section of the country. At the present there are available nearly 18,000 miles of good roads, perhaps the best in the land, and the fact that these traverse a country that comprises some of the most magnificent scenery in the world, makes their attraction irresistable. California, moreover, has the added attraction of romantic historic association, in its memories of the days when it was a part of the far flung Spanish empire."

Sandoval—Lucero

On the evening of November 9th C. D. Sandoval and Felisita Lucero were united in marriage at the home of the groom, Justice of the peace A. H. Harvey performing the ceremony. Music was furnished by the Mexican orchestra, and bountiful refreshments were served.

The newly weds will be at home to their friends at the Sandoval residence on Ancho avenue.

Parent-Teachers' Association

The Parent-Teachers' Association will meet early in December and all may avail themselves of the opportunity of hearing J. H. Wagner, superintendent of public instruction. The date of the meeting will be announced later.

Pay Your Road Tax

Notice of Sale

Beatrice Romero de Martinez, Juanita Romero de Gonzales, Manuelita Mirable de Samora, late wife of Frederico Romero, deceased, and Conrado Romero, a minor, by Vitorio Martinez, his next friend, Plaintiffs,

Vs. | No 2648.

Antonio Lucero, late husband of Clara Romero de Lucero, deceased, Defendant.

In the district Court of the Third Judicial District of the State of New Mexico, within and for the County of Lincoln.

Under and by virtue of an order of sale issued out of the aforesaid Court, on the 30th day of October, A. D. 1917, in the above entitled action, I am commanded to sell at public auction in the manner prescribed by law, all that certain real property situate in the County of Lincoln, State of New Mexico, described as follows, to-wit:

About ten acres, more or less, of land situated in the northwest quarter of the northwest quarter of Section 23, Township 11 South of Range 18 East, N.M. P. M., together with all the improvements thereon and appurtenances thereunto belonging, and the rents, issues and profits thereof.

Public notice is hereby given that on the 27th day of November, A. D. 1917, at 2 o'clock p. m. of that day at the property herein above described, at Picacho, Lincoln County, New Mexico, I will, in obedience to said order of sale, sell the above described property to the highest and best bidder for cash, in lawful money of the United States of America.

Dated Nov. 2nd, 1917.

A. H. HARVEY,
Commissioner Appointed by the Court.

Thirty Years Ago

Telephones were used only by prosperous business houses and wealthy families.

Bicycle outing parties were all the rage.

You could buy more sugar for $1.00 than you could carry home.

More people visited Canada those days than now, bank absconders, for instance.

Spitting on sidewalks was no offense.

There was nothing said about carrying germs around in your whiskers.

Physicans advised people to avoid the poisonous night air.

Saloons kept open all night. They threw their keys in the "well."

Traveling medicine companies gave vaudeville entertainments on the streets.

Those days it was "Kaiser Wilhelm," now its "to ?!?! with the Kaiser!"

Bill Nye, the great humorist was in his prime.

Mothers sang little children to sleep with songs about the little fly. Now they "swat the fly."

Frank Lesnet, and G. O. Nickel, shook the dust of the city off their feet Sunday, and spent the day hunting.

Our Man About Town

Exchange—what — Exchange Bank of Carrizozo, of course. A good place to meet your friends, also a good place to start a savings account.

"Home, sweet home, there's no place like home." but the Grand View Hotel will make you feel nearer home, if you try their home table supplies.

Lincoln stands for loyalty,
Lincoln stands for rank;
Lincoln County, New Mexico,
Lincoln, the State Bank.

Activity prevails in the grading line all over the town. At the Exchange Bank it is plainly noticeable. If you want to see Spence or Merchant or Dr. Blaney, just twist the tail of the gray mule, push the button and the baloon will take you to the upper landing in safety.

It is no disgrace to walk in the middle of the street nowadays, because we are laying new sidewalks on the business portion of the city. It is a matter of business. (Exchanges please copy.)

Do you know that Humphrey's will sell you all kinds of food for stock and household use?

Tell us not in mournful numbers, life is but an empty dream, when you have the opportunity of buying at Barnett's feed store.

Distinctly Eldorado

J. F. Kimbell returned Sunday from a trip to points in Kansas and Missouri. He visited Kansas City, Mo., and Hutchinson, Wichita and Eldorado, Kas., which is Mr. Kimbell's old home.

Eldorado is a thriving town. Four years ago it had but four thousand inhabitants, whereas it now boasts of eighteen thousand, a gain of fourteen thousand in four year's time. Eldorado is widely known for its bountiful oil fields. The Shumway gusher alone yields ten thousand barrels of oil daily, and this is only one of hundreds of others of a lesser yield.

The old homestead of the Kimbell's is situated in the heart of the oil belt and of course is very valuable.

Kansas, as we all know, is a dry state, but the Eldoradoites are well provided with amusements such as opera houses, vaudeville and picture theater entertainments and other places of pastime of an innocent nature.

Len Branum killed a big deer in the Malpais last Friday.

Out For a Time

Captain John Baird of the "Motor Minute Men" and Ed. Harris were motoring around the other day when they noticed four men dressed in soldiers' clothes moving up the road alongside the railroad track north of the city.

Messrs. Baird and Harris, suspicioned them and driving up asked the boys if they would like to ride. They accepted the kind invitation, but when the car was turned in the direction of town they became frightened and begged their captors to release them. They said they were from Fort Bliss and gave their names, and told such a straightforward story that they were released and immediately started down the track toward El Paso.

The boys, according to their story, had taken too much "tea" the night before and in a sort of bantering manner had jumped a freight train, and when morning came they were in Carrizozo.

Realizing to what extent their pranks had led them they were hastening to make reparation for the wrong.

Patent Leather Anarchists

In Chicago the other day a report was made to the police of the finding of several hundred car loads of potatoes, cabbage, onions and sugar beets which had been allowed to freeze and rot in the railroad yards, being held for a higher market. Detectives say they found a pile of decomposed vegetables more than thirty-five feet high and one hundred feet long that had been dumped from freight cars.

When our nation is grappling with the food problem and every effort is being made to conserve the necessities of life, and such news as this comes to our ears, we feel that such anarchists as these, who will allow food to decay and perish in the faces of starving poor in the great cities, should be bound with chains and sent to the kaiser as a Christmas present.

War Time Economy in Fashions

War seems to have affected every item of daily life—and dress is not the least conspicuous of these. It is curious how much the latest styles have resulted from the insistent economies of the war; it is noticeable in line, in materials, in color, in trimmings. To quote from an article in Good Housekeeping for November: "Although there has been no decided change in the silhouette, the winter clothes can be distinguished by their narrower skirts. And for the woman who makes her own clothes, there is nothing quite so satisfying as to find models that are simple enough in line so as to be easily made, and yet smart enough to give the appearance of coming from the best New York shops.

The long waisted line, the gathered tunic with the deep band of fur, and the tighter underskirt, are the newest notes of the season. The top coat worn with the one-piece dress is replacing, to a great extent, the tailored suit."

Rub a sore throat with BALLARD'S SNOW LINIMENT. One or two applications will cure it completely. Price 25c, 50c and $1.00. Sold by all dealers.—adv.

SONS OF FAMOUS WARRIORS ARE IN WORLD'S CONFLICT

Many Noted American Names of Civil War Days Now on U. S. Army Roll at the Front.

By EDWARD B. CLARK.

Washington.—When American troops get into the actual fighting in France it is probable, if the censor shall allow names to be used, that the people of the United States will read of the doings of soldiers whose names will take readers back to the Civil war days.

In the American army today are a Grant, a Lee, a Sheridan, a Longstreet, a Miles, a Wheeler, a Macomb, a Henry, a Stanley, a Sumner, and a Christian who is a grandson of Gen. Stonewall Jackson.

When Theodore Roosevelt was president of the United States he appointed a Grant, a Lee and a Sheridan as his aides. The Grant was Ulysses S. Grant III, a grandson of the general; the Lee was Fitzhugh Lee, a son of the Confederate general of the same name and a grand nephew of Robert E. Lee; the Sheridan was Philip H. Sheridan, son of the famous Union cavalry leader.

When he was in office as president, Colonel Roosevelt visited Georgia, which was his mother's birthplace. There he met the widow of Stonewall Jackson, and he told her that it was his intention to appoint her grandson, Thomas Jackson Christian, to the Military Academy. He did appoint the young man, and today the appointee is an officer in the American army.

Gen. Simon Bolivar Buckner, who died not long ago in Kentucky, has a son of the same name serving in the army. General Buckner and General Grant were students at West Point together in the forties, and they met again in battle in the Civil war. When Grant was dying General Buckner made a trip from the South to Mount McGregor to see his early comrade and later antagonist. The meeting was a most affectionate one.

Young Fitzhugh Lee is an officer of cavalry. In the Roosevelt administration one of Lee's duties as an aide was to ride across country almost daily with the president. When the order was issued that army officers in order to prove their physical endurance should ride a hundred miles within the limit of three days, as a test, Roosevelt made the ride himself in one day, of course changing horses. He took with him on that ride young Lee. The two covered 108 miles, virtually straight away and returned.

Maj. Douglas MacArthur of the Engineer corps, who graduated number one in his West Point class about ten years ago, is a son of Lieutenant General MacArthur, who at the time of his retirement from the service was the ranking officer on the active list of the United States army. General MacArthur died not long ago.

It was young Major MacArthur who acted as censor in the war department for about three months. That work has been transferred to another, and now Major MacArthur is awaiting orders to go "Somewhere."

Sherman Miles, the son of Gen. Nelson A. Miles, is a major in the service at the present time. He was sent as an observer to the front in the Balkan wars of a few years ago, and had an interesting and instructive experience.

Adna R. Chaffee is a captain in the American army. He is the son of the general of the same name who led the American troops in their advance on Peking in 1900.

Lieut. Col. Guy V. Henry, just at present is commandant of cadets at West Point, but it is believed that he with all the others named soon will be ordered to go "Somewhere." Henry is a son of Gen. Guy V. Henry, the famous cavalry leader in the Civil war, and who later won additional fame as an Indian fighter in the West. It was General Henry who made the forced ride, with his troopers of the Ninth cavalry, of nearly 100 miles to the relief of a detachment of cavalry which was surrounded by Indians.

There are scores of other men now in the service whose fathers fought on one side or the other in the war between the states. Love for military life seems to be hereditary. The president of the United States has a right under the law to appoint each year to the United States Military academy at West Point 15 young men. The president, in order not to show favoritism, orders a competitive examination to be held for the 15 cadetships. As competitors he names the sons of army officers. Every year there are from 100 to 200 sons of the service ready to take the examination.

The rivalry is sharp, and it is known that virtually every young man who applies does such creditable work on his examination that if the trial were non-competitive each one of them would get a high enough mark to qualify him for admission to the academy. As it is, however, only 15 can enter, and the examiners see to it that the 15 who pass highest get the coveted positions.

The president also has the right to appoint each year a certain number of boys to the Naval academy at Annapolis. What is true of the land service is true also of the sea service, for the sons of officers who have sailed the seas for many years are ready and anxious to follow in the footsteps of the fathers who trod the quarter deck.

Duty of the Individual

By DEAN DAVID KINLEY,
Vice President of the University of Illinois.

The war calls for sacrifice. From some it has taken life. From others it has taken things dearer than life. From others still it has taken the small thing we call property. What it may take from you and me is yet to be seen. How great is our spirit of sacrifice? Shall we be ready, when our country and humanity and God call us, to say that all that we have we sacrifice and dedicate to our ideals of duty and loyalty? In this hour of our country's need, in this day of world suffering, I would impress upon university men and women particularly the thought that their highest duty is the sacrifice of what they have to their country's call. The spirit of sacrifice is ennobling. Out of it great good comes, great deeds arise and leadership is established.

The duty of sacrifice and service rests upon us all. In the providence of God to whom much is given from them much shall be required in this day of world trial. If not given willingly it will be taken. If it must be taken the individual who loses it loses also the spiritual nobility that marks the individual who is ready to sacrifice for and serve his fellow men. If the leaders in thought, those who have gone farthest in education, fail, how shall we expect those whose privileges have been fewer or less to rise to the height of the idealism that is the need of the hour? Duty is not general; it is specific. It rests on the individual and not on some fictitious group called society. It is an individual matter and each one must search his own heart to find whether he is living up to the ideals and spirit of the God of his father and mother. Service, sacrifice, is the prerogative and the duty of the soldier, the citizen and the Christian.

Now Famous War Tank Said To Have Had a Forerunner In the Nineteenth Century.

Jules Verne in "Twenty Thousand Leagues Under the Sea" gave an inkling of the present-day activities of the submarine boats. H. G. Wells predicted the work of air raiders, and now a historical delver comes forward with the statement that the tank had a forerunner in the sixteenth century. John Napier, laird of Mufchison, the mathematician who invented logarithms, devised a war engine something after the style of the tank.

Napier confided to Bacon's elder brother certain "secret inventions" for the purpose of confounding "enemies of God's truth." They included burning mirrors and a chariot of metal double musket proof, the motion of which was controlled by those within and from which shot was discharged through small holes, "the enemy being abased and uncertain what defense to make against a moving mouth of metal."

This description sounds much like the early type of tank and the "conforming" of the enemy, as predicted by Napier, was to have been accomplished by the tanks of the British when they first appeared among the Germans. Napier's engine never went into action, for the Scottish inventor directed that his weird instrument of war be kept secret unless necessity compelled its use. Napier, who was born in 1550, died in 1617.

Phonetic Spelling.

A good story is told by Lady Login concerning a coachman named William Turley, whom her husband, Sir John Login, had in his service, and who ultimately became private coachman to Queen Alexandra.

He was (writes the authoress) a very honest, trustworthy man, but I often wondered whether, in the royal service, he made out his accounts in the original fashion he used to do with us. He had an unbounded talent for phonetic spelling. His first monthly stable bill puzzled my husband not a little. On the left-hand side of the paper appeared a column of figures, and on the right-hand side a row of capital "A's."

"What does this mean, Turley?" asked Sir John.

"That's A, Sir John!"

"So I see. But what is 'A' for?"

"Ay for the hosses, Sir John!" said honest William, with an inflection of reproachful surprise at his master's denseness.

Works Both Ways.

"Do you consider it a good idea for a bank to send every depositor a statement once a month?"

"Well, some might be glad to see it. Others might not like to be reminded so constantly of how little money they have."

Melody Unappreciated.

"Your daughter knits constantly?"

"Yes," replied Mr. Cumrox; "and I approve of it for two reasons. In the first place, it's patriotic. And in the second place, so long as she keeps knitting she can't play the piano."

Alibi.

Father—Alfred, what did you learn at school this morning?

Alfred—The teacher asked me if I killed birds and I told her no, I couldn't hit them.

Senses of Elephant.

The elephant is accredited with having the keenest sense of hearing of any animal. His sense of scent is nearly as remarkable. Young and inexperienced elephants can detect the passing of a man over a trail hours afterward. The elephant is a true Oriental regarding domesticity. Bulls do not habitually go in company with the cows, old bulls especially holding themselves aloof and exclusive from the female of the species.

JUST FOR FUN.

An Easy Life.

"Who is the prosperous looking man?"

"The husband and business manager of an aviatrix."

"He seems to enjoy life."

"And does so. He's the only married man I ever met who encouraged his wife to be a high flyer."

Swearing Off.

"I guess I'm a little too keen with my repartee."

"Um."

"So I'm going to quit saying cutting things."

"That's right. Be a repartee-totaler."

Foresight.

"I'm taking lessons from a man who teaches people how to remember."

"Is he pretty good?"

"I guess so, but he doesn't seem to have much confidence in his methods."

"How is that?"

"I notice he makes his students pay him in advance, so there will be no chance for them to forget to do it after they finish."

Overdoing It.

The Son—Well, dad, a young fellow has to have his fling.

The Sire—Sure. But when you get flung out of six places in one night you're getting more than your share.

An Expensive Loan.

"I borrowed $2 from him once and I'm sorry I ever did."

"Why?"

"Ever since then he's felt free to touch me for ten or twenty at any time."

DADDY'S EVENING FAIRY TALE

BY MARY GRAHAM BONNER

BOASTING AND EATING.

The ducks and geese were giving a party in the Wild-Flower Pond, and all the creatures began at once to chatter in their shrill voices, quack - quacking without stopping for breath, it seemde.

Mrs. Mandarin Duck.

"I'm an excellent swimmer," said Mrs. Mallard Duck. "And when I am frightened, how I can fly! I am really one of the finest of swimming birds."

Mrs. Duck's husband, Mr. Mallard Drake, began at once to speak of the beautiful green hat he was wearing.

"You are good swimmers, and you both can fly well," said the Green-Winged and Blue-Winged Teal family, "but we are so delicate and refined. We are not coarse and tough. It's not nice to be too strong."

"Nonsense," said Mr. Mallard Drake. "Give me good wings and the power to swim. I don't want to be delicate and refined. It will get you nowhere, nowhere in the duck world."

"Of course," said Mrs. Mallard Duck; "we have a very fine reputation for being most delicious when eaten."

As soon as Mrs. Mallard Duck had said that, she was sorry, for it made her feel sad to think of such a thing, and of course in her boasting she had not realized how it would sound. Mr. Mallard Drake had shivered a little and was about to fly off, as he does when danger is near, when he said:

"Quack, quack, never say that again. Let's talk about our strong wings." And so they did not boast about being good to eat! The other creatures were quite amused that Mrs. Mallard Duck had actually known herself that she had boasted too much.

"When anyone is talking about beauty," said Mr. and Mrs. Mandarin Duck together, "they should simply speak of us, for of all the coloring and plumage, ours takes the lead."

"I'm not so sure about that," said Mrs. Paradise Sheldrake, who is just between a duck and a goose in looks and ways. "I'm almost like two creatures and I'm far more beautiful than Mr. Sheldrake," which was perfectly true. But at once they started quarreling, for they are very apt to argue and quarrel.

"Don't fight," said the Lesser Scaup. "I will dive for you and make you forget your troubles." So the Lesser Scaup made many fine dives, for he belonged to the sea duck family. He likes to dive way down until he reaches mud and there he hunts for his food.

The Sheldrakes had stopped quarreling, for they were listening to the Pintail Duck family telling the Mandarin or Wood Duck family that they were quite handsome.

"We have softer coloring," they said, but the Gadwall had interrupted by saying:

"What have you to say to me? I am a handsome gray bird."

The Baldpate family were trying to copy the diving of the Lesser Scaup, but they could not dive at all well and they felt quite badly about it.

"I am interesting," said the Shoveler. "My bill has become so used to getting the goodies out of the mud and it is very big and anyone passing me notices it first of all. It really is the shape of a shovel, too, which is a good way for one's bill, or beak, to be."

"We Are Delicate and Refined."

For the Shoveler can strain mud through his bill and simply swallow all the food he finds in the mud.

"Quack, quack," they all began together, for the Shoveler had made them very hungry.

"This was to have been a party," one of the ducks said, "and all we have been doing has been to talk of our beauty and charm and fighting with everyone who doesn't agree."

"There is one subject we all agree on," said another duck.

So they all began to eat worms and insects and to drink of the good pond water until Mrs. Mallard Duck said:

"When all is said and done, the joy of eating is greater than the thought of beauty." And all the creatures quack-quacked in agreement and the party ended off very successfully.

When Credit Is Due.

"A good-natured man," said Uncle Eben, "ain't entitled to much credit if he's good natured only jes' bekaise he kin take life easy an' not care what happens."

"Blue" and Worried?

"Blue," worried, half-sick people should find out the cause of their troubles. Often it is merely faulty kidney action, which allows the blood to get loaded up with poisons that irritate the nerves. Backache, headaches, dizziness and annoying bladder troubles are added proofs that the kidneys need help. Use Doan's Kidney Pills. Thousands thank them for relief from just such troubles.

A Colorado Case

Mrs. Dasie Brumley, 114 Twelfth St., Greeley, Colo., says: "I had a steady ache in my back and frequent attacks of dizziness made me feel weak and miserable. My kidneys acted irregularly. My feet swelled and ached so that I could hardly stand on them. For three months I hardly slept at all and I was so nervous I couldn't lie still. I used three boxes of Doan's Kidney Pills and the trouble is now entirely gone and I am in good health."

Saving the Bullets.

There are several kinds of airplanes adapted to different kinds of military service and their equipment varies according to whether they are intended chiefly for scouting, for bomb dropping or for gun fighting. On most of the machines of the last-named or battle-plane type, a writer in the Scientific American says, a machine gun is so fitted as to point along the axis of the machine. The pilot, who is alone, directs the nose of his airplane at the enemy and fires across the propeller. Two plans were tried for preventing the propeller from being broken by the bullets. The first consisted of stopping the machine gun whenever the propeller came within the field of fire, but experience showed that frequent stopping of the gun with the propellers making 1,200 revolutions a minute ends in putting the gun out of order. Designers then placed steel plates on those parts of the propeller likely to be struck, and these plates turn the bullets that strike the propeller. It is mathematically calculated that only one bullet in eighteen is wasted in this way.

Concealed Art.

The perfection of art is to conceal art, says a prophet. Fashion arbiters please take notice.—Exchange.

Gray Matter Counts.

"The author of this story is a clever chap." "That so?" "Yes, it takes brains to sell such rot."—Judge.

Save In the Use of Wheat

By eating

Grape-Nuts

All the food value of the grain is used in making this delicious food; and its blend of malted barley not only adds to its nourishing qualities but produces a flavor of unusual richness.

All Food—No Waste!

American Beet Sugar of Vital Aid in Food Problem

by Robert H. Moulton

Not only does cultivation of vegetable increase supply, but it adds greatly to land's fertility—Increasing area throughout country devoted to sugar beets successfully.

STRICTLY speaking, America has no reason to fear a sugar famine. That is to say, domestic refineries and their sources of raw materials are ample to meet all requirements. But local consumption and native production are not going to determine entirely the factor of sufficiency. We have pledged ourselves to help our allies in the matter of food, and in the opinion of persons qualified to judge sugar is a necessary part of a balanced diet. Indeed, the harder the body is worked the more it insists upon that particular form of energizing nourishment which sugar contains to a marked degree.

The war in Europe has radically upset the world's sugar supply, and has affected especially the normal sugar sources of France, England and Italy. A recent report from abroad announced that the Italians were paying 50 cents a pound for a mixture of sugar and saccharine, and even this sweetening compound could be had only in very small quantities.

In England the administration of the office of food control specifically prohibits the hoarding of sugar, and so moderate an amount as twenty pounds in a household is deemed a hoard. This is suggestive evidence of the relative scarcity of sugar. Like the English, the French are paying a very high price for every purchasable pound of sugar in the country.

Plainly, then, the shortage among our allies must to a large extent be made up from this side of the Atlantic, and the burden of the undertaking will rest upon us. The United States department of agriculture has recently given out some extremely interesting data upon sugar production in the United States and foreign countries, and a brief analysis of the figure brings out the present situation and the part we have to play in providing a generous percentage of the lacking normal supply.

It is evident that we cannot do this unless we practice economy and make every spoonful of sugar count. Wastefulness on the part of the individual would in a short time represent a national extravagance totaling hundreds, even thousands of barrels of sugar.

We are being urged on all sides to conserve our perishable foodstuffs and the experts are busy explaining how this can be done in various ways. Fruits need sugar for their preserving and the sugar for this service, if we are to be truly economical, must be drawn from that average supply which ordinarily is used up in meeting many other dietary demands.

The American sweet tooth is going to persist; it is a consequence of climatic conditions as well as of the physical activities, which are a part of our national life. There are those that have preached against sugar as a food for children, but some of the highest authorities have vigorously declared that this prejudice "is little better than a superstition." And, an eminent British expert has said: "There have been few more important additions to our dietary or which have done more to promote the health of the rising generation than our cheap and abundant supply of pure sugar." He spoke, of course, of the sugar market before the war.

In order to make it possible for us to save in the household and yet to have that measure of sweets to which we are accustomed, the department of agriculture has issued a bulletin explaining just how hundreds of thousands of us can grow sugar beets and make from them ourselves a palatable and a nutritious sirup for the table. Of course if anyone wants to carry the boiling and evaporating processes further, the sirup can be made to yield a dark sugar.

That sugar, so it is stated, will be found very satisfactory for home use for many purposes, as, for instance, in the baking of pies, puddings, dark colored cake, etc. The beet sirup otherwise is said to be good for buckwheat cakes and the like, and the making of some candies, and it would probably lend itself admirably to the putting up of certain fruits.

It is said that sugar beets can be grown in any locality which has a soil capable of producing good crops of vegetables. Anyone having a small piece of fertile, tillable ground and the usual garden implements is equipped to grow the beets necessary for the production of a home supply of sirup.

Of course the beets raised in some soils will be richer in sugar than when grown in others, but all sugar beets if properly handled are capable of yielding sirup. A few rows of sugar beets will generally suffice for an ample supply of sirup for home use. That is to say, a bushel of beets will produce anywhere from three to five quarts of sirup.

Should the amateur farmer raise more beets than he needs for sirup making the rest of them can be served upon the table. When partly grown the entire plant may be used as greens, and when mature the roots can be cooked and served just like garden beets. They are tender but richer in sugar than the familiar beet. Sugar beets, depending upon where planted, mature in from four to six months.

Undoubtedly the raising of sugar beets by the people at large in this fashion would go a long way toward increasing enormously the volume of native sugar or its equivalent, a rich sirup. But apart from this, the sugar beet may be confidently counted upon to do an immense service in fertilizing the soil and thus adding greatly to the abundance of succeeding crops of other vegetables. This is because of the characteristic manner in which the roots of sugar beets, bore their way deep into the ground.

When sugar beet culture was introduced into Europe, the farmers were practicing what is known as the three crop system of rotation, three successive cereal crops, followed by one year of fallowing, the fallowing in order to rest the soil and to enable them to pull out the dense growth of weeds by hand. It is stated that in Germany, approximately one-third of the total area of level land was regarded as being too poor to pay for cultivation and the average yield of cereal crops on the better lands was but twelve bushels per acre.

They were plowing but three to four inches deep, using fertilizers sparingly, and the fertility of the thin layer of loose surface soil was all but exhausted. The grain roots were unable to penetrate the hard soil underneath, and could, they have done so it would have been of no avail, for containing no humus and not having been aerated it was not fertile.

Being a deep rooter, a prerequisite to ideal sugar beet culture is that the soil be stirred to a depth of 8 to 14 inches. The tender beetlet having to undergo the shock of thinning as soon as it comes up, in order to leave only one beet in a place, demanded a well-prepared mellow seedbed.

Gathering the sugar in its leaves from the atmosphere by the aid of the light and storing it up in the root, the sugar beet would not thrive if the light were cut off through being shaded by weeds and the eradication of the weeds before going to seed meant not only further stirring of the soil by cultivation and hoeing, but weedless fields for succeeding crops. Being plowed out in the autumn gave an extra fall plowing, which left the land in condition to absorb, instead of shed the fall and winter rains, storing up the moisture for the following season's crops.

With the removal of the main root myriads of fibrous roots were broken off and left in the soil to an estimated average of a ton to the acre, and in rotting they not only deposited humus in the lower strata of the soil but they left minute channels through which it became aerated and hence fertile. The roots of subsequent crops followed these interstices and drew nutriment from two and three times the depth of the soil formerly reached, and hence the farmers doubled or trebled their soil without increasing their acreage. Not only that, but the succeeding crops became heavier, and it is probably no exaggeration to say that the sugar beet revolutionized German agriculture.

The sugar beet pays a handsome return upon the outlay involved, and depending upon the nature of the soil and the local climate, nets the farmer anywhere from $30 to $40 an acre. The widespread areas at present under cultivation illustrate how admirably suited is a great part of the United States to this department of agriculture.

Business Instinct.

The teacher was trying to impress upon her class the necessity of regulating the sinful human heart, and to drive her point home she produced her watch.

"Now, girls," she said, "you all see this watch"—an assertion so obviously true that there was no danger of contradiction. "Now," she continued, "just suppose for a moment that it did not keep correct time, that I found it was willing to go any way but the right way, what should I do with it?"

There was the usual pause which pupils indulge in because it flatters the teacher by making her suppose her problem is a very deep one, and that her wisdom is therefore profound. Then a bright little girl held up her hand.

"Please, miss," she said, "you would sell it to a friend!"

Pretty Mean.

"Aggravating, I call it."

"Eh?"

"To run for the elevator and then have 'em wait for a man who walked."

OCEAN SAILORS FEAR SUBS

Many Deep-Water Tars Went to Great Lakes, They Assert, to Escape Divers.

Ocean sailors went to the Great Lakes this year in greater numbers than ever before. The majority of the applicants sought able seamen's papers for work on inland waters. Some were negroes, some white and some yellow. Most of them gave as their reason for leaving the ocean their fear of submarines.

When John Ojala, a native of Finland, applied for papers, the examiner asked Ojala the usual questions, and then a few personal ones. Ojala said that he had sailed the seas for 15 years, but being twice on vessels sunk by submarines was enough for him. He said that he was going back to the ocean at the close of the lake navigation season.

On November 29, 1915, Ojala was sailing on the Mediterranean sea, about 50 miles from Malta, aboard the English ship Malinche, bound from Saloniki to Philadelphia. A U-boat stopped the Malinche and two German officers, after chasing off the crew, placed bombs in the boat.

Ojala shipped again aboard the Norwegian sailing ship Falls of Afton, which was sunk about 20 miles off the coast of England. Seven shots from a deck gun on the sub sent the Falls of Afton to the bottom.

He Blamed the Car.

Now and again an automobilist will throw discretion and dust to the winds and hit the closely watched highway for a speed of 80 miles or more. This is strictly prohibited, of course, and is a reflection upon the law-abiding qualities of the speeder. But in the case of a man in the New York traffic court the same speed was accomplished without discredit to the court, and inasmuch as he himself was utterly innocent, he was let off with a fine of $75. "It ain't me, yer honor," he explained, "but it's the blame car I got. It's one of those that'll either go eight miles or eighty. It won't do nothing in the middle. It ain't no medium speed. A feller don't like to go along eight, and they won't let yer go along at 80. What's a guy to do when he's got a funny car like that?" So then the court told him what a guy, for the nonce, was expected to do.

Great Opportunity.

"Here is one war correspondent who is totally lacking in a sense of humor."

"Why do you think so?"

"He has written a column about the 'tanks' and there isn't a laugh in it."

High Cost of Dyeing.

"Do you know my hairdresser has increased her rates for golden hair?"

"The wretch! To the high cost of living she has now added the high cost of dyeing."

TO STORE VEGETABLES

Outdoor Cellar or Cave Is Considered Best Place.

House Is Too Warm and Atmosphere Too Dry—Three Important Factors Are Ventilation, Temperature and Moisture.

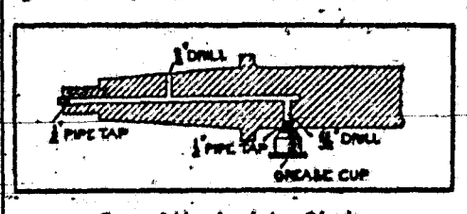
"All things considered, an outdoor cellar or cave is the best place to store your vegetables for winter," says a writer in an exchange. "An ordinary house cellar is, as a rule, too warm and the atmosphere too dry for most vegetables. Sweet potatoes and squash would keep well in such a place, but that is about all. A pit is also a very good place to keep most vegetables, but is rather inconvenient. There are three things to consider when storing vegetables for winter use; they are the temperature, ventilation and the moisture. They are very important. Always keep them in mind. You will either succeed or fail by the correct or improper management of these three things. The germs which are the cause of decay like a high temperature, and most of them like a poorly ventilated place.

"With this in mind, the logical thing to do, it would seem, would be to keep the pit or cave where you are storing your vegetables dry and as cool as possible. This, however, you cannot always do, as some vegetables must have moisture to preserve their plumpness and quality, while others must have heat in order to keep well. Fortunately, it seems the vegetables that require the moisture can be stored at a very low temperature, and those that must have heat can be kept in a dry place. Beets, cabbage, carrots, parsnips, potatoes, salsify and turnips require more or less moisture, but should be kept at a temperature as near freezing as possible and yet not freeze. Squash and sweet potatoes like a warm, dry atmosphere. Keep the temperature as near 50 or 60 degrees as possible. Onions must be kept at about 33 or 34 degrees and in a dry place."

GREASING WHEELS OF WAGON

Contributor to Popular Mechanics Magazine Gives Illustration and Description of Good Method.

Drill a hole, two-third-one-half inch in diameter, in the center of each axle and connect it with a hole of the same size just back of the shoulder on the spindle and on the under side of the



Cup Attached to Skein.

axle. This is the right size hole to tap for one-half inch fittings, writes W. E. Crane of Cleveland, Ohio, in Popular Mechanics Magazine. The center of the spindle is drilled with a three-eighths inch drill to make a hole intersecting the horizontal one.

A one-half inch plug is turned into the end of the hole, and a grease cup fitted on the under side, as shown. In greasing the wheel, turn the cup down sufficient to force the grease into the axle.

DIFFERENT TYPES OF PLOWS

Before Purchasing Farmer Should Consider Construction of Harrows and Packers.

Different types of land require particular kinds of plows, and there is a difference in the construction and quality of harrows and packers which every farmer should consider before purchasing a supply of these tools.

TO RESTORE LOST FERTILITY

No Better Method Can Be Found Than to Keep Enough Stock to Consume Grain and Forage.

It can be readily seen that the farmer must manage to restore lost fertility. No better method of doing this can be found than to keep enough stock on the farm to consume all the grain and forage produced. The stock should be kept under sheds and in stables when possible, and an abundance of bedding furnished to absorb the liquids as well as to add to the bulk of the manure heap. When such crops as clover, cowpeas, or beans are grown for hay and fed to good farm stock and the manure is returned to the land, 80 to 90 per cent of the entire fertilizing value is kept on the farm. At the same time the full feeding value is obtained; this is one way the farmer can get double the value he now receives for many farm crops.

It is reported that the women who are working as hay balers are especially efficient.

USEFUL WEIGHTS

The following weights may not be exact, but they are near enough for ordinary calculations:

One cubic foot of water, 66.4 pounds.

A volume of air equal to 12.4 cubic feet weighs 1 pound.

One barrel contains 31½ gallons.

One cubic foot of water contains 7.48 gallons.

One gallon of water weighs about 8 1-3 pounds.

One pint of water weighs about 1 pound.

Pine weighs about 35 pounds per cubic foot.

Oak weighs about 45 pounds per cubic foot.

Concrete weighs about 150 pounds per cubic foot.

Stone weighs from 135 to 200 pounds per cubic foot.

Seventeen cubic feet of clay weighs about a ton.

Eighteen cubic feet of gravel in bank weighs about a ton.

Twenty-seven cubic feet of gravel, dry, weighs about a ton.

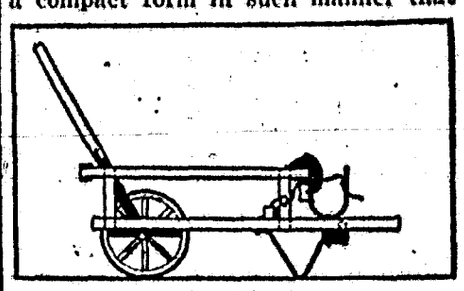
Lime weighs 75 pounds per bushel.

USEFUL AS FODDER BUNDLER

Device Invented by Ohio Man for Receiving Stalks of Corn and Holding in Compact Form.

The Scientific American in illustrating and describing a device adapted for receiving stalks of corn, invented by J. L. Wolffe of Willshire, Ohio, says:

This device is adapted for receiving stalks of corn and for holding them in a compact form in such manner that



Fodder Bundler.

a tie may be placed on the bundle while so held, and wherein the bundler is well supported for easy transportation, and wherein means is provided on the bundler for supporting cord and for permitting the cord to be drawn off to be used as ties for the bundles, and for compressing the bundle prior to the tying.

FEED SWINE CULL POTATOES

Spuds Are Poor in Protein, But Rich in Carbohydrates, Thus They Are Fat Producing.

(From the United States Department of Agriculture.)

It is estimated that four and one-half bushels of potatoes equal one bushel of corn in producing weight gains on hogs. Potatoes resemble corn in composition, and this is especially true of sweet potatoes. Both corn and potatoes are poor in protein and rich in carbohydrates, thus they make fat rather than bone and muscle. The potatoes should be boiled or steamed until they form a mealy mash, which should be mixed with some other feed such as corn-meal, shorts or bran. Only enough water should be added in the cooking to prevent burning and to make a thick mash. While some potatoes may be fed raw to add succulence to the ration, they should be given only at intervals and in small quantities. Too many are likely to cause scours. A potato ration should be supplemented with feeds rich in nitrogen, such as old-process linseed-oil meal or fish meal. Where sweet potatoes are plentiful and cheap a combination with gluten meal and skim milk makes a good ration.

CORN LACKING IN MINERALS

When Fed as Sole Concentrate in Rations for Swine Bodily Weakness Will Result.

Because of its low content of mineral matter, particularly lime, corn should not be fed as the sole concentrate in rations for swine. Bodily weaknesses result from a deficiency of mineral elements when other feeds are not supplied with corn.

In experimental feeding tests conducted by Dr. E. B. Forbes of the Ohio experiment station, hogs fed mainly corn had weak bones often resulting in lameness and fractures. Such injuries do not occur with hogs on pasture or with those given feeds rich in lime, such as clover, alfalfa, rape, skim milk and tankage. Bone flour, wood ashes, corncob charcoal and lime are useful supplements to rations deficient in minerals.

Plowed-Under Cowpeas.

Cowpeas should be allowed to come to maturity before being turned under, otherwise they will add to the acidity of the soil.

Local Red Cross Doings

The activity in local Red Cross circles is remarkable. Last Monday the first box of supplies was sent out—said supplies consisted of sewed garments, such as operating leggings, bed sox, bed shirts, shoulder wraps, etc. The ladies are expecting a growing interest in the work. and the first shipment of 666 garments is a noteworthy evidence of their activity.

The Denver supply house will soon make a shipment of "cut-out" garments and our local chapter expects to have them made up by Christmas. The society not only issues an invitation to ladies who are not identified with the work, but urges them to co-operate with the chapter in this important work for the boys who are away from home and engaged in their country's cause.

The rooms will be open every afternoon from 2 to 5 o'clock, and a chairman will be present to conduct operations in the work.

The Knitting Circle is very active, also, but at present they are out of yarn and needles, but a good supply will be forthcoming shortly.

This work being so perfectly performed is a labor of love on the part of this noble society and its local auxiliaries.

New Picture Show

The Star Theater is the name of a new moving picture house which has just opened at Navara Hall, just across the E. P. & S. W. tracks. Good films will be shown on the evening of Sundays, Thursdays and Saturdays. Admission is 5 and 10 cents, thus bringing the price within the reach of all.

The new theater is a branch house of the Crystal, and is conducted under the management of Mr. Dingwall.

Fetters—Kennedy

At the home of the bride's parents Thursday evening Mr. W. J. Fetters and Miss Lea Kennedy were united in marriage. Rev. Lewelling, pastor of the Methodist church, performed the sacred ceremony. Relatives and friends of the family attended. The couple left the same night for eastern points to enjoy their honeymoon. The best wishes of their friends follow them.

Hunting Party

A hunting party composed of Sephus Brown, Rocks Grumbles, and Walter Grumbles, accompanied by Miss Lena Grumbles, started out Wednesday. They will hunt over the Grumbles' homestead and the surrounding territory and expect good results.
