Official U.S. Land Dist. Paper

VOLUME XVI—[Carrizozo News, Vol. 30] CARRIZOZO, NEW MEXICO, FRIDAY, AUG 22, 1941. NUMBER 7

Lyric Theatre

R. A. Walker, Mgr.

FRIDAY & SATURDAY

Frank Morgan, Billie Burke, Mary Howard

— In —

"THE WILD MAN FROM BORNEO"

A rapid-fire story of old-time sideshows, when horseless carriages were a fad.

- ALSO -

"Glamorous Kentucky" and "The Little Mole".

SUNDAY, MONDAY & TUESDAY

Paul Muni, Gene Tierney, Laird Creager, Virginia Field

— In —

"HUDSON'S BAY"

The story of Pierre Radison, trapper, hunter, renegade and outlawed from Quebeck to Montreal, who became the first Canadian.

—ALSO—

March of Time, Paramount News "The Home Guard"

WEDNESDAY & THURSDAY

"LAND OF LIBERTY"

A record of the United States of America during its 150 years up to the present time.

— ALSO —

"One, Two, Three, Go" "Lions on the Loose"

The unlucky young librarian's hitch-hike with death. When she accepted a lift from the "Old Man" in the jalopy, she never dreamed that the sordid romance which was to follow would end with her body in the bottom of a lake --- and a life sentence for her lover. Read this true tragedy of twisted lives and mysterious emotions in the The American Weekly, the magazine distributed with next week's Los Angeles Examiner.

Miss Agnes Degner is the new clerk at the Carrizozo Hardware Co.

N. M. State Fair

New Mexico women who enter exhibits in the senior division of Home Arts and Sciences of the 1941 State Fair, will compete for something more than pretty ribbons and honors. They will be competing for cash prizes that total more than $1,000. In addition there are special awards in several departments which bring the total cash awards available to more than $1,500. Anticipating a much larger number of entries than heretofore, space allotted to the division in Agricultural Hall has been considerably enlarged.

Soil Conservation Districts Approved By State Committee

The Claunch-Pinto Soil Conservation District was approved by the State Soil Conservation Committee at a meeting held on August 11 at State College, according to J. V. Taylor, State Coordinator for the Soil Conservation Service.

The districts, as approved, include the Chupadera Mesa and Claunch Flats in Socorro County, approximately five townships in the northwestern part of Lincoln County, and extends north of GranQuivera into Torrance County some 15 miles.

Mr. Ben Roberts of Corona, and Noah Hibler of Mountainair, were appointed supervisors. It will be the duties of these men to carry out the organizational steps which will include holding elections for three additional supervisors, obtaining a state charter, developing programs, work plans, policies, etc.

Visitors From Kansas

Mrs. Zoe Glasmire and Miss Kathleen Doering of Lawrence, Kans. are visiting their sister, Mrs. A. F. Roselle, who is postmistress at Jicarilla. All were in Carrizozo last Saturday. Mrs. Glasmire was an employe of Ziegler Bros. for several years here. After five years in Kansas she finds many local improvements, especially new buildings and homes.

Mrs. Ball, district supervisor of the State Welfare Department spent Saturday and Sunday in Carrizozo on her round of the welfare offices in the district.

KNOW YOUR BANK

Who Needs Safe Deposit Protection

Men or women who have personal papers with either actual or sentimental value, can hardly afford to be without a safe deposit box. Valuables kept at home are often misplaced. Sometimes they are destroyed by fire. And occasionally they are stolen. Some things can never be replaced; others can be, but only at the expense of much inconvenience. You can minimize these risks by renting a safe deposit box in our vault.

Member Federal Deposit Insurance Corporation

This Week in Defense

President Roosevelt and Britain's Prime Minsiter Churchill held a series of secret conferences at sea and jointly issued a declaratson of national policies calling for:

No territorial 'aggrandizedment', no territorial changes not in accord with the will of the people concerned, right of all peoples to choose their form of government, equal access to the raw materials of the world needed for prosperity, international cooperation for improved living standards, safety to all nations within their own borders from fear and want, freedom of the seas, disarmament and other measures to lighten "the burden" of armaments.

Assistant Secretary of state Berle, speaking in Washington, said "it is the plan of this Government, when the tides of barbarity shall be roled back, to turn the full measure of its economic strength to bringing help, relelf and sustenance to the . . . many countries . . . now cold and hungry.

Production

OPM Director Knudson, speaking in New York, said that by next July defense production will be at its peak and "after that America can write its own ticket on war material and it can be twice anybody else's ticket." To do this, however, small communites and manufacturers must be willing to band together to seek defense work, he said.

Willam Batt, deputy production director, speaking in New York, said the Government and large corporations are more anxious to give work to small contractors now than a few months ago because of the great pressure of work today.

Agriculture

Agriculture Secretary Wickard announced there is no prospect of food rationing "in the foreseeable future" although the nation may have to depend on some foods more than others. He said there are 17 percent more cattle on feed for market in 11 cornbelt States than a year ago and the corn crop will exceed last year's by nearly 150,000,000 bushels.

In a letter to Mr. Wickard, the President said "increases in the production of vital foods and feeds is reassuring (because) food is a weapon against Hitlerism just as much as munitions. . ."

The CCC agreed to furlough enrollees so they might help harvest where labor shortages exist. The work would be voluntary and the enrollees would receive the prevailing wage. Congress passed a measure forbidding the Government to dispose of any cotton or wheat now in its bins except for domestic and foreign relief, export or lend-lease aid. The bill also permits farmers to use excess wheat for feed or food without penalty and extends 85 percent parity loans to peanut growers.

Air

The OPM announced 1,460 planes were produced in July. War Under Secretary Patterson, dedicating a new plane factory, said the monthly output of combat planes increased 114 percent in the last nine months and production of other military planes increased 105 percent. Speaking at the same ceremonies, Chief of Army Air Corps Brett said that American planes abroad have had "great success."

Economic Defense

The Economic Defense Board, composed of Vice-President Wallace and ranking Cabinet officers, met for the first time and outlined two undisclosed projects to coordinate and strengthen the nation's economic defense. The National Resources Planning Board issued a booklet, "After Defense-What?," calling upon public and private agencies to start immediate planning to prevent chaos after the emergency. The Board stated that if adequate post-defense employment plans were not ready and another depression allowed to set in, the nation could lose everything it is now striving to defend.

Labor

A WPA survey showed unemployment declined 300,000 in July to 5,600,000, nearly 4,000,000 less than last July. The Bureau of Employment Security reported job placements of persons under 21 years increased 78 percent in the past year. The Bureau also reported placements of Negroes are 47 percent higher than six months ago. The Committee on Fair Employment Practice announced Army, Navy and Maritime Commission contracts now contain clauses prohibiting hiring discrimination because of race, creed, color or national origin.

Army

Congress approved an 18 month extension of service for selectees, reserve officers and National Guardmen and voted to increase by $10 the monthly basic pay of all except officers after the first year of service.

The Senate committee investigating the defense program issued a report stating that costs of the Army's $1,000,000,000 camp construction program were "unduly and unnecessarily high" because of lack of planning. War Under Secretary Patterson replied that dispite cold weather, labor and material shortage and other "almost insurmountable difficulties" the camps were ready before the time set for troop arrival and the American Army "is now the best housed Army in the world."

Here From California

Mrs. Maggie Alvarez, of Stockton, California spent Sunday here visiting the Juan Martinez and St. John families, she left Monday for Roswell to visit relatives there. Mrs. Alvarez is the daughter of Mr. Ben Lujan, former Carrizozo resident, and one time chairman of the board of county commissioners of this county.

Dr. and Mrs. R. T. Lucas of Kansas City are visiting the A. L. Burke family. They are accompanied by their niece Miss Mabel Rumburt.

New Residents

Mr. and Mrs Winzell Rickerson and infant son have moved to Carrizozo from El Paso and will occupy an apartment in the Carrizozo Hardware building.

Mrs. Rickerson has accepted a position with Attorney John E. Hall and began her duties Monday of this week. Mr. Rickerson will be employed by the Carrizozo Hardware Comyany.

Earl Thornton went to Lubbock Wednesday to make arrangements to attend school at Texas Tech.

Carrizozo Blackout Sept. 12

A meeting is called by the Local Defense Council for Friday night, August 22 at 8 o'clock at the Community Center Building, for the purpose of completing plans for Statewide Blackout to be September 12.

There are a number of important plans to be laid, namely, organization of Auxiliary Police Force, appointmeut of Air Raid Wardens, zoning the city for the Blackout and arranging the Alarm System. There are also minor plans that will require the cooperation of all organizations and citizens.

Close co-ordination between all headquarters and individuals is highly desirable.

Local Defense Council.

To Celebrate

Arrangements are being made to celebrate the opening of Highway 380 between Lincoln and Hondo, with a picnic at Spring Ranch near Hondo next Wednesday, August 27, at noon.

The Governor and members of the State Highway Commission have been invited.

Mr. Simpson, Secretary Chamber of Commerce of Roswell has agreed to have Roswell represented with several car loads of people and speakers.

Citizens of Capitan and Lincoln have agreed to assist the program in an agreeable manner also.

All Citizens of Lincoln County interested in this celebration should be on hand at noon with a basket lunch.

NOTICE OF HEARING OF FINAL REPORT AND ACCOUNT

In the Probate Court of Lincoln County

State of New Mexico

In the Matter of The Estate of J. M. Minter, Deceased.

To Attie Minter Pepper. Zetta Minter Brockwell, Young D. Minter, Celeste Minter Hempstead, James Wilber Minter, Mack Duff Minter and Lewin A. Minter and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the estate of the said decedent, and to whom it may concern:

You, and each of you are hereby notified, and notice is hereby given, that the Administratrix of the Estate of J. M. Minter, deceased, has filed in the above entitled Court her final report and account as such Administratrix, and the Court has appointed Monday, the 6th day of October, 1941 at the hour of 10 o'clock a. m., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of the said Attie Minter Pepper as such Administratrix and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant thereto and therein and the persons entitled to the distribution thereof.

The name and post office address of the attorney for the Administratrix is John E. Hall, Carrizozo, New Mexico.

Witness the honorable Marcial C. St. John, Judge of the said Court, and the seal thereof, this 18th day of August, 1941.

FELIX RAMEY,
Clerk.
By Miriam Payne,
Deputy.

(A22-Sept. 12)

Miss Rhoda Freeman spent Friday and Saturday visiting Albuquerque friends.

Mrs. O'Dell Baker and baby and Mrs. Roy Richard were El Paso business visitors last Wednesday.

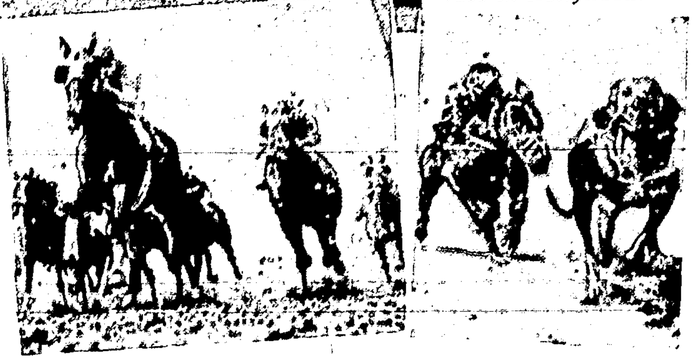
Speeders All

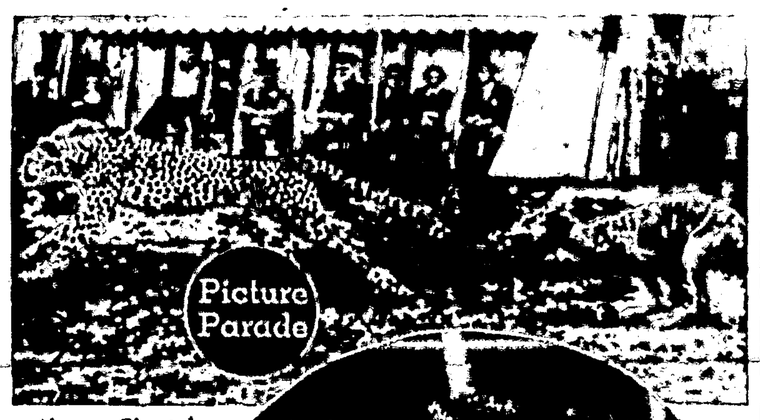
Speed has always been one of man's many obsessions. From the dawn of history man has raced against man; he has raced his horses against the steeds of other men; dogs against hare and deer. Then came balloon races, auto races, airplane races. These are all familiar to us. These pictures show unfamiliar races.

A real neck-and-neck race in Hollywood.



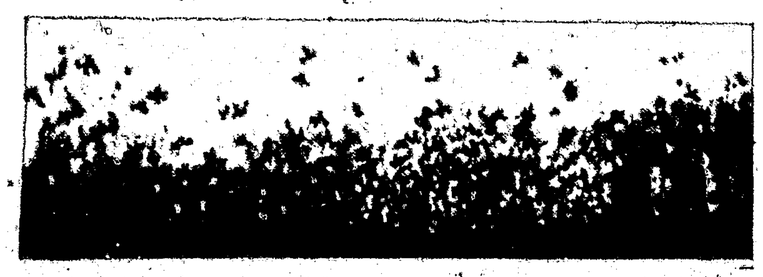
Horse racing is not unusual, but the picture at the left is unusual, as the cameraman risked his life to get this head-on shot. Right: This dog race is different, as the dogs carry jockeys—Jocko, the monk, in each case.

Croaker's Derby . . . This frog race was staged at the late New York World's fair. The pretty maids acted as jockeys by nudging the frogs.



Above: Cheetah and dog race. The dog has no chance of winning. The spotted cat can hit 70 miles per hour. Right: Two cheetahs match speed at a British course before the war.

Esme, a cow on the stud farm of Dorothy Paget, British race horse owner, who won by a nose over "Golden Miller," the horse that won the grand National Steeplechase in 1934—believe it or not!



Start of the Bicentennial Futurity from Washington, D. C. This was the scene as 6,000 homing pigeons flew the coops and headed for home.

Statue of Liberty Becomes Mecca For Freedom-Loving U. S. Citizens

Conceived more than 65 years ago by Auguste Bartholdi, a French sculptor, and victim of German oppression then, the Statue of Liberty, above, was a gift of the French nation to this country. In a world threatened with the loss of the very ideals the famous figure stands for, the people are making Bedloe's island, more and more their national shrine, as they visit there by the tens of thousands.

By DON G. SANDRA
(Released by Western Newspaper Union.)

NEW YORK. — Visitors to the Statue of Liberty, declared a recent news item, are running about 60 per cent ahead of last year, and all indications point to a record attendance of more than a half a million for 1941.

Inquiry among gentlemen who analyze statistics showed that the colossus of Bedloe's island currently lures more people than such sights like Radio City, the Brooklyn bridge, or the Hall of Fame. In this 165th year of United States independence, the monument to Liberty probably ranks as the world's foremost tourist attraction.

All the day the tide of pilgrims flows back and forth across the mile and a half stretch of New York bay that separates Bedloe's island from the body of Manhattan. Children and teachers, mothers and infants, honeymooners, vacationists and sightseers — all ages, colors, nationalities, religions. Everybody curious to see and touch this malachite green copper-coated Goddess, the embodiment of a human longing handed down from ancient times.

Why are they bent on visiting the shrine of Liberty? Many reasons reduce to this: In 1941 the liberties of every American—man, woman, and child—are at stake. The pilgrims see this hollow figure of copper as a dynamic symbol of 1941's sanguinary struggle to preserve the freedoms born of the French Revolution, the American Revolution, and the numerous New world revolts against oppression by foreign regimes.

The Goddess of Liberty also personifies a new meaning; it was thrust upon her by President Roosevelt when he envisioned a world granting all men the Four Freedoms: freedom from want, freedom of religion, freedom from fear, and freedom from hunger.

Interest in the pilgrims increased as I mingled among them on the teamer Ossining, which plies between Battery park and Bedloe's island.

All eyes fix on the Goddess, whose dimensions expand as the Ossining draws near. And from the children arises a murmur of "Ahs" upon discovering how huge the Goddess really is. The torch outstretched stabs a cloud; the folds of her garment show up as weather-beaten waves.

Erected in 1885.

Elderly folk who, perhaps, had witnessed the erection of Liberty, in 1885, recall for the benefit of those who care to listen such dimensions as, height above sea level, 300 feet; the length of Liberty's arm, 40 feet; the length of her index finger, 8 feet, the length of her nose, 4½ feet, the width of her eye, 2½ feet, the thickness of her waist, 35 feet, etc.

On close inspection you can see the riveted joints of wrinkled copper sheets which form the outer skin. The interior steel structure braces the Goddess against wind pressure and provides support for an elevator shaft and several corkscrew staircases.

Pilgrims enter the foundation through an opening in the thick blocks of granite, and for a few cents they travel by elevator to the top of the stone pedestal. To ascend beyond that point they climb 161 steps up the narrow staircase which lands them inside the skull of Liberty. Above her brow, Liberty's diadem consists of windows through which one can see the map of New York harbor.

In the foreground is Governor's island, covered with army barracks and supply depots. Away to the left, lies the Battery, with dozens of skyscrapers crowded together. Directly ahead lies Brooklyn, most populous borough in the city of New York; and off to the right are the Narrows, the bottleneck for all large vessels entering or leaving New York harbor.

European Refugees.

From the Narrows, the visitor arriving by boat gets his first full glimpse of Liberty. Here tens of thousands of immigrants and refugees driven from lands of oppression first set their eyes on that serene, majestic face at the gateway of the New world civilization.

Here is where the sculptor Auguste Bartholdi, driven from his Alsatian home by the Germans, conceived an epic tribute to liberty; and he saw on Bedloe's island the logical site for a colossal allegorical statue, a Goddess of Liberty, released from imprisoning chains and holding aloft her torch of enlightenment at the gateway to a free civilization. It is said that Bartholdi modeled Liberty after his own mother.

For millions who sailed past the Narrows, the Goddess spelled a new dawn, especially on remembering that the monument is a gift from the people of France to the people of the United States and commemorates the alliance of the two nations in achieving the independence of the United States of America.

Survey Suggests Study to Balance American's Diet

MINNEAPOLIS.—"Family health defense" classes should be set up immediately in public and vocational schools, to teach the American wife and mother how to keep the family healthfully fed in spite of rising food prices and possible scarcities, warns a current study of the food price situation.

"Bottled" vitamins are not a substitute for a balanced diet of healthful foods, in spite of their specific values, and there is a real hazard to public health if the layman gets exaggerated ideas of what they will accomplish, the study states. Injecting these products into common staples such as white flour can correct certain important deficiencies, but such measures can do only one part of the job.

With food prices on the rise, and a growing need to share our food supplies with other nations, moderate and low-income families are liable to be badly pinched on their food budgets before the emergency is over, the study warns. The usual mistake made in such circumstances is to substitute with too large a proportion of starchy foods, which are cheaper and give a feeling of fullness. This error can have widespread ill effects on health, as the British have already learned.

Simple, non-technical instruction in common food values is needed, so the American housewife can learn quickly how to substitute without cheating her family of food elements absolutely necessary to maintain health. This, the study says, means instruction that does not bewilder her with complicated tables of calories, "international units," alphabetical lists of vitamins, and milligrams of minerals—but instead deals in pounds and cupfuls and teaspoonfuls—in terms and ingredients with which she is accustomed to work.

Meats, eggs and dairy products, known as the animal protein group, and the fresh fruit and vegetable group are the sections of the menu which suffer most when the food budget is pinched. Though starchy foods are relatively cheap, and have a large and necessary place in the diet, they cannot take the place of the other essential groups too, however much they are fortified with added vitamins and minerals. The whole alphabet of vitamins, the study cautions, cannot offset a lack of proteins—the stuff from which the body is rebuilt. And proteins are getting more expensive.

Therefore the American housewife needs immediate training, this study by the Northwestern National Life Insurance company continues, in wise choice of those cheaper foods which are often fully equal to more expensive articles in actual food value. Also she needs training in the tasty preparation of those cheaper foods so the family will accept them.

Cheaper cuts of meat, and some of the animal organs—hearts, livers, kidneys, etc.—furnish just as much protein, and oftentimes more of the valuable fats, while the hearts, livers, etc., also furnish extra vitamins and minerals not found so richly in many expensive cuts of meat. Powdered milk and evaporated milk are relatively low cost sources of animal protein for body-building.

Whole wheat flour, and potatoes with the skins on are examples of inexpensive foods that are rich in food value.

Pays $80 for $1

Genevieve Paulson, 15, holds aloft a check for $1 as E. J. Merrissey of Valeria, Iowa, auctions it off to Lynn Grant of Melrose, Conn., at $80, for the benefit of the U.S.O. The check represented the two-billionth dollar loaned to farmers by the nation's production credits associations. The benefit auction was suggested by M. Paulson, father of Genevieve.

Correct Labels on Cans Will Assist U. S. Housewives

NEW YORK.—The day of universal grade labeling—when the American housewife can buy canned goods with absolute certainty as to quality and value—is just around the corner.

In an experiment to run throughout this year, grocers in co-operation with the National Consumer-Retailers council, are offering canned fruits and vegetables graded A and B according to standards set up by the Agricultural Marketing service of the U. S. department of agriculture.

Informative labels on the canned goods will explain the meaning of the different grades, and the specifications which the product met to merit its grade designation; also type and style of the product, and number of servings in the can.

Lo! The Poor Sausage

WAUPUN, WIS.—The famous, but poor cousins of the meat family, those two processed farm "moos," Bologna and Sausage, visited their prison relatives once too often, at the state prison here. 900 inmates folded their arms and refused to associate with the "main dish ballons." They sulked at the thought of lunching on the innocent little links and slabs. They demanded and received, of Warden John C. Burke, a better and more varied menu.

We Can All Be
EXPERT BUYERS

● In bringing us buying information, as to prices that are being asked for what we intend to buy, and as to the quality we can expect, the advertising columns of this newspaper perform a worth while service which saves us many dollars a year.

● It is a good habit to form, the habit of consulting the advertisements every time we make a purchase, though we have already decided just what we want and where we are going to buy it. It gives us the most priceless feeling in the world: the feeling of being adequately prepared.

● When we go into a store, prepared beforehand with knowledge of what is offered and at what price, we go as an expert buyer, filled with self-confidence. It is a pleasant feeling to have, the feeling of adequacy. Most of the unhappiness in the world can be traced to a lack of this feeling. This advertising shows another of its manifold facets—shows itself as an aid toward making all our business relationships more secure and pleasant.

$$$$$$$$$$$$$$$$$$

The Lamp in the Valley

BY ARTHUR STRINGER

W. N. U. Service

THE STORY SO FAR

Carol Coburn is Alaska born, the daughter of Klondike Coburn, a "bush rat," who died with an unestablished mining claim.

Carol is returning north to teach in an Indian school.

Aboard ship, she is annoyed by Eric (the Red) Ericson, an agitator. She is rescued by a young engineer.

They talk of the changes that had come to the north, and of course a good deal about themselves. It is a dark night on the deck of a ship and they chat quite freely.

There is no doubt that a touch of romance enraptures the pair.

Carol tells of working her way through a university and of a trip to Europe as companion of a rich man's daughter. "That was a break," he says.

INSTALLMENT II

"It was," I agreed. "It was all rather wonderful. But it made me feel like a deserter. And it was too good to last. Just when I was telling myself I had about everything one could ask for, I got a letter from Alaska, nearly seven months old."

"Telling you what?" prompted the voice at my side.

"Telling me my father had been found dead on the open trail," I answered, doing my best to be casual about it. "He'd been found there, frozen to death, between his Chakitana claim and Trail-End Camp. His grub bag was empty. Two of his dogs had died and the others must have left him in the night. I can't help thinking of that lonely grave between the hills when you talk about the uselessness of the sourdough."

"I'm sorry," said my companion, with a quick note of contrition. He stood beside me, for a full minute of silence. "Where was your father's claim on the Chakitana?"

"That's what I've got to find out," I told him. "But it seems to be somewhere along the Three-Finger Range between the Cranberry and Blackwater Pass. Father, you see, was just an old-fashioned sourdough. He was always brooding about some final strike that was going to make him a millionaire. And he always felt there was a fortune in that mine of his, once it was opened up. It was his secret. And he hugged it tight, even from me."

"But the important point is, did he establish his claim?"

"I'm afraid not," I had to admit. "That's one of the things I've got to find out."

He leaned closer, as though trying to decipher my face in the starlight.

I found myself moving away a little. Lonely ladies, after midnight on starlit nights at sea, needed the feel of something solid under their feet.

"It was kind of you," I said as I drew my polo coat closer about me, "to help me as you did."

But he disregarded that valedictory note.

"I don't even know your name," he reminded me.

Names, on a night like that, didn't seem to mean much. We were up between the stars, I wanted to tell him, where time and titles didn't count.

"Who are you?" I found myself asking, foolishly glad because of his nearness.

He didn't answer me at once. And in that moment of silence I summoned up courage to reach for the forgotten flashlight. Then I pressed the button and framed his stooping head in a sudden shaft of light.

I gulped as the light fell on his face. That face was strong and bronzed and touched with a quiet audacity that went well with his big frame. But I had seen it before, in an altogether different setting. For this was the mackintosh man who had stood in the rain with a blonde and blue-eyed girl in his arms before the Yukon pulled out from the Seattle wharf. He had been so absorbed in that last clasp that he almost missed getting aboard.

The memory of that scene promptly chilled and steadied me. An ice wall as wide as the Columbia Glacier seemed to drift in between us.

"I don't suppose it makes much difference," he said out of that silence, "but my name is Lander, Sidney Lander."

"No, it doesn't make much difference," I heard myself saying in an oddly thinned voice.

"Why?" he demanded, conscious of that remoter note.

"We'll probably never see each other again," I said with a limping enough effort at indifference.

"But I think we will," he corrected with unexpected solemnity. My hand, resting on the rail, could feel his bigger hand close over it.

"Hasn't Eric the Red done enough of that?" I asked in an adequately frosted voice.

The man who called himself Sidney Lander promptly lifted his hand away.

"But I still want to know your name," he quietly reminded me. "I think you owe me that much."

I laughed and stood silent a moment.

"My name's Carol Coburn," I finally admitted, "free, white, and twenty-one, and heading back to the icebound hills of her birth."

"Coburn?" he repeated. And his voice impressed me as almost a startled one.

"Carol Koyukuk Coburn," I announced, "with the Koyukuk usually suppressed."

"What was your father's name?" he asked.

"His real name," I said, "was Kenneth Coburn. But back on the creeks he was known as Klondike Coburn."

That brought silence between us again. And when the man beside me spoke, it was in an oddly altered voice.

"It's a small world, isn't it?"

I didn't, at the moment, see much point to that observation.

"I was beginning to feel it was an oppressively big one," I said as I stared out over the lonely hills.

"How long," he asked, "will you be at Toklutna?"

"For at least a year," I told him. "But why do you ask?"

"Because I think I'll be seeing you," he said, without the slightest trace of levity.

CHAPTER II

It wasn't until the crowding and confusion of our shore stop at Cordova that I saw Sidney Lander again. Then I caught sight of him on the dock, stooping over a wire-covered crate. He let out a long-haired sheep dog which disdained the chop bone held out in front of it. The quivering animal merely flung itself on its master, whimpering and crazy with joy.

"This is Sandy," he said as he stroked the dog's nose. "There's just Sandy and me."

"I'm flying in to the Chakitana," he said. "But Sandy doesn't like air travel." I could feel his eyes on

Instead of answering me he led me toward the gangplank.

my face. "You go on to Seward, of course?"

"Then in to Toklutna," I said.

"It would be funny, wouldn't it, if we found ourselves on the same trail there?" he said.

"What does that mean?" I asked, when the Yukon's warning whistle gave me a chance to speak again.

Instead of answering me he led me toward the gangplank over which the last of the passengers were crowding aboard. The smile faded from his face as he stood there, with my hand in his. He neither spoke nor said good-by. But his eyes, as he looked down at me, did things to my heart action. For my woman's instinct told me that something was stirring deep in that bear cave of silence. Those eyes, I felt, were saying something that his lips seemed afraid to put into words.

All the way to Resurrection Bay, in fact, I felt oddly alone in the world. It seemed less and less like going home.

Yet I knew, once we reached Seward, that I was back on the frontier.

But when I found myself face to face with that solemn big schoolhouse surrounded by a straggle of cabins that made it look like a mother hen surrounded by her chicks, no sense of high adventure reposed in my arrival.

It was Miss Teetzel who spoiled everything. For Miss Teetzel, the school head, proved to be a somewhat dehydrated spinster with an eye like a bald-headed eagle's and a jaw like a lemon squeezer. I could see her disapproving glance go over my person, from my gray tweed cap with its rather cocky Tyrolean feather to my frivolous suede pumps. I plainly didn't fit in with her idea of what a teacher should be.

I didn't much mind being consigned to the smallest and meanest room in the big old building. But I couldn't overlook the spirit of hostility with which I was ushered into my far-north mission. For that spirit expressed itself, once I'd unpacked, in the first task with which Miss Teetzel confronted me. It was to take charge of the washing from the children's ward. And it was rather a septic mess to get clean, even with the power machine which Miss O'Connell showed me how to operate. But I knew the lemon-squeezer lady was playing an operatic air or two on the keyboard of my endurance. So I put on my rubber gloves, and shut my teeth, and went through with my job

It wasn't until my third day at Toklutna that I had a chance to humanize the cell-like baldness of my room.

Miss O'Connell helped me do the decorating. And this same Katie O'Connell proved herself the one girl I liked in that new valley of loneliness. She had Irish gray eyes, a sense of humor, and a frame like a man's. She was, I discovered, really a graduate nurse and should have worn a uniform. But she bowed to the law of the frontier and dressed that muscular body of hers in mannish-looking flannel shirts and khaki breeches and high-laced hunting boots.

At Toklutna she plainly found plenty to do. For of the thirty-seven children in our school three had tubercular neck glands, two had congenital hip disease, and another dozen either ear trouble or ominous chest coughs. They were the offspring of the once stalwart Eskimo and the noble red man of the North, proving how merciless the hand of mercy could sometimes be. Our civilization, plainly, hadn't done much for those misfits. We thought we'd been helping them, but all we did was take away their stamina and pauperize them. We left them so improvident they came to regard it as foolish to go out and fish and hunt and trap.

So they let the white man bask in the glory of the white man's burden. They gave up and wallowed in shiftlessness and loafed about in rags and mated and reproduced and passed their ill-begotten offspring over to Toklutna to feed and clothe and make into good little Americans.

Miss Teetzel, I soon discovered, did her best to keep the native girls in the school from talking with the old women of the outside settlement. For these verminous old squaws had a lot of tribal superstitions they tried to pass on to the youngsters. According to Miss O'Connell, they made a practice of not letting their first-born children live, especially the Copper River Indians who believed that if their first little papoose lasted only until he was eight or nine months old his father went straight to the Happy Hunting Grounds.

Katie O'Connell, in fact, was on the warpath because of an Indian couple who sneaked over into the Matanuska Valley with their seven-months-old baby, ostensibly on a hunting trip. But if they came back without that papoose, our grim-eyed nurse proclaimed, she was going to have them locked up for life.

Miss Teetzel took the savor out of my mission. She also quietly contrived to make me as uncomfortable as possible. She seemed to feel that the scrub brush was a major factor in pedagogics.

But Sidney Lander was right. I hadn't much to work on at Toklutna. The little slant-eyed Eskimos, I found, were both brighter and merrier-minded than the Siwash children. They all seemed fond of music, though, especially the march music Katie and I pounded out on the old school organ. So the two of us concluded that a little dancing might brighten up the emptiness of their evenings. We tried putting them through an old-fashioned square dance or two. And just when the fun was at its highest Miss Teetzel appeared and looked me over with that sardonic eye of hers.

"I'm afraid," she observed, "that you're a trifle too modern for us."

I had to swallow it, of course. But after that we were restricted to group-singing and saluting the flag and a handful of dolorous old hymns which my Siwash charges translated into a pagan chant of woe.

As I quartered back across the schoolyard, after stopping a fight between two of my little redskin warriors (based on a can of tinned cow stolen from the kitchen), I bumped into Doctor Ruddock, who looked us over once a week. He stopped, with his black bag in his hand, and rather solemnly looked me over.

"You're not very happy here," he said. "How'd you like a whack at a school over at Wasilla?"

My first impulse was to tell him that I didn't believe in running away from things. But I said, instead, that I was waiting for rather an important report from the Record Office at Juneau.

He glanced at the shabby old barracks that overshadowed us.

"Well, if they crowd you too hard here, let me know. I can pull a string or two, when you're ready. And that Matanuska Valley, if I don't miss my guess, is going to be very much on the map."

The memory of that message didn't stay with me as long as it might have. For on my way to my room Katie O'Connell handed me a letter from Sidney Lander. It had come out from Chakitana by airplane and had been mailed at Fairbanks. The writer of that letter said that I had been very much in his thoughts. But the comforting little glow a message like that could bring just under one's floating ribs was cut short by the further message that the sooner I could marshal all data and documents in connection with my father's Chakitana claim the more definite it would make Lander's course of action in the immediate future. "The Trumbull outfit and I are parting company" it concluded.

FIRST-AID to the AILING HOUSE

by Roger B. Whitman

(© Roger B. Whitman—WNU Service.)

Laying Linoleum

QUESTION: I have rolls of linoleum one yard wide. Please advise on laying it in the following places: A shack with wood plank floors in poor condition, 18 inches above the ground; the wood floor of the main house, in good condition; the dirt floor in a damp cellar that I intend to concrete over cinders and drain tile. Should I use tar paper or felt paper? Should the paper and the linoleum be stuck down with linoleum cement?

Answer: In the first place, linoleum should be laid over a smooth surface, for roughness underneath would quickly wear it through. Also, it must be protected against dampness from underneath, for this would cause rotting. For this reason you should not use it either in the shack or on the concrete floor of the cellar, unless in the latter case you first put down a layer of waterproofing. In the main house the linoleum should be laid over felt, stuck to the floor and with the linoleum stuck to the felt. This part of the job requires experience, and the proper tools; you should have it done by a professional linoleum layer.

Cement Floor Coverings

Question: We are going to move into an apartment which has cement floors all through. It is right on the edge of a lake. What would be best to use under carpets and linoleum?

Answer: If the cement floors are laid directly on the earth, there is moisture in them, and any kind of floor covering except asphalt tiles will rot. If there is an air space under the cement, so that it is really dry, you can use any kind of padding under the carpets. The linoleum can be cemented down over felt in the usual way. To test the dryness of the floor, lay down a piece of linoleum, cardboard, or something similar, to prevent evaporation, and leave it for several days. If on picking it up the cement underneath is found to be damp, you cannot use any kind of a floor covering that will rot, unless you first put down a layer of waterproofing.

Wall and Floor Cleaners

Question: What do you recommend for cleaning painted plaster kitchen walls, painted and varnished woodwork, waxed hardwood floor?

Answer: For cleaning all kinds of painted surfaces, you can use a cereal cleaning powder that you can get at a paint store; it is used by professionals, and gives excellent results. A waxed hardwood floor can be cleaned with a dry string mop or a hair push broom; water should not be used on it, nor should an oiled mop be used. Soiled places can be cleaned with a cloth damp with water, followed by wiping dry, or with liquid floor wax; not water wax. The floor should be polished once or twice a week and rewaxed with paste floor wax when wear begins to show at doorways and elsewhere.

Clear Waterproofing

Question: Is it possible to get a transparent waterproofing for brick that will last indefinitely? I am told that there is such a substance.

Answer: There are many waterproof coatings on the market whose makers claim their product will last forever, but I have yet to find a well-known reliable manufacturer who will make these claims. The durability of transparent waterproofing cannot be definitely predicted. A masonry wall that is very sandy or porous may need a recoating in three years. In other cases the waterproofing will last for many years.

Cement Floor Paint.

Question: What kind of paint can we use on the floor of our cellar to make the floor smooth for dancing?

Answer: Any large paint store should be able to get you a kind of floor paint that is based on rubber and that is not affected by the lime in the cement. These paints are comparatively new and are made by specialist manufacturers; smaller dealers may not know of them, but they are on the market and are available.

Cigarette Burns

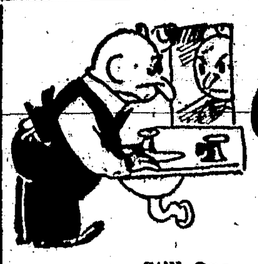
Question: How can I get a cigarette burn out of the top of a soft wood table?

Answer: Scrape it out with a razor blade. This will leave a slight depression, which will hardly be noticed when the table top is refinished. It will be less noticeable than the burn.

Clogged Vent Pipe

Question: What can I use to clear a vent pipe leading from kitchen plumbing, which apparently is clogged with rust and grease?

Answer: A new pipe is advisable.



A Bit on the Humorous Side

Still One

Stranger (watching boy fishing)—How many have you caught, sonny?

Sonny—When I get another, I'll have one.

The growls of a bear were broadcast the other afternoon from a zoo, and in some homes tiny tots were heard to remark that Daddy had come home early.

Slight Slip

Forced to put on his brakes suddenly, the driver of the sports car found it shooting crabwise across the road, just missing a lamp-post before it stopped. Up strolled a policeman.

"Well," he remarked genially, "you got a nice skid there, sir."

"Pardon me, officer," was the haughty reply; "this lady is my wife."

The Glutton

"Ladies and gentlemen," shouted the street performer, "in a few moments I will astonish you by eating coal, stones, and nails. I will also swallow a sword after which I will come around with the hat, trusting to get enough for a crust of bread."

"What!" came a voice from the crowd. "Still hungry?"

ASK ME ANOTHER

A General Quiz

The Questions

1. "Sail on, O Ship of State! Sail on, O Union, strong and great!" is a quotation from what American poet?
2. Over what country did the Incas reign?
3. Approximately how many miles of railroad are there in the United States?
4. How many vestigial organs has man?
5. Is sunburn caused by the heat of the sun?
6. Where was the Tower of Babel?
7. How many railway tunnels are there in the United States and what is their total length?

The Answers

1. Henry W. Longfellow ("The Building of the Ship").
2. Peru.
3. Approximately 230,000 miles.
4. Man possesses no less than 180 vestigial organs that, although probably once of vital importance, are now of little use to him.
5. No, sunburn is caused by the ultraviolet rays of the sun.
6. Babylon.
7. There are 1,539 railway tunnels in the United States totaling 320 miles.

Tough Game

"You are in a state!" said the sparrow to his battered friend. "How did you lose all those feathers?"

"Well, I was flying pretty low, swooping up and down, when suddenly I got mixed up in a game of badminton."

All or Nothing

Shyly the young man stood before the father of his adored.

"Mr. Jones," he stammered, "I—er—will—er—what I want is to ask you for your daughter's hand."

The old man frowned as he took his pipe from his mouth.

"Can't do that," he growled; "you must take the whole girl or nothing."

NEW EFFECTIVE HAY FEVER RELIEF

Hay fever, which annually causes more sneezes, more inflamed noses and more red, streaming eyes than any other scourge, may have its final big fling this September, all because a Pennsylvania electrical engineer was served a dish of corn meal mush which was entirely too salty.

The engineer, sneezing, and with all other hay fever manifestations, stopped at a hotel where he was served a dish of mush which he considered sending back as it was much too salty. Finally he ate it, however; the hay fever attack lessened, ultimately ceased. Next day he had three meals, all oversalted, and experienced his most comfortable time in years in the "hay fever season."

His analytical mind quickly grasped the possibility that the saline substance in his food was responsible for his relief.

About this time, Dr. E. E. Selleck, a graduate of Columbia University, met the engineer, made notes, and when he returned to his home, began experiments. Today Dr. Selleck declares he has found a certain means of relief for hay fever and is supported in his contention by other medical experts, and a nationally known chemical manufacturing concern, the Hollings-Smith Company, at Orangeburg, New York, has taken over making the remedy, which is called Nakamo Bell.

Describing the experiments, Dr. Selleck said, "After I was sure I had found a means of quickly relieving hay fever through the chloride group, I tested it in the most practical way I knew. I held a three day clinic, to which many hay fever sufferers responded, from ages ranging from 10 to 60 years. Each person was given two tablets with a little water. Some relief came to all within ten minutes. Reports on these cases during the ensuing weeks showed practically a complete cessation of symptoms."—Adv.

Slowly Perfected

Arts and sciences are not cast in the mould, but are found and perfected by degrees by often handling and polishing, as bears leisurely lick their cubs into shape.—Montaigne.

It's A GOOD AMERICAN CUSTOM

SATURDAY NIGHT BATHS have been an American custom since the first settler's wife pointed to the tub and said: "Climb in and wash some of that soil off your hide!" Objectors considered such frequent bathing harmful.

SMOKING KING EDWARD

Cigars is a truly pleasurable custom, enjoyed by wise smokers everywhere. America's favorite cigar.

IN THE PROBATE COURT
STATE OF NEW MEXICO,)
) ss.
County of Lincoln.)
IN THE MATTER OF THE ESTATE of THOMAS GRIMES,
Deceased.
No. 530
NOTICE OF HEARING PETITION FOR DETERMINATION OF HEIRSHIP

TO: ALICE GRIMES CLIFTON, KATE GRIMES BARNETT, and ERA GRIMES BAILEY, and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest in or to the estate of the said decedent, and to whom it may concern:

YOU, AND EACH OF YOU, are hereby notified, and notice is hereby given that A. A. Rhea has filed in the above entitled Court a Petition for Determination of Heirship, in accord with Chapter 187, New Mexico Session Laws of 1939, and the Court has appointed Monday, the 6th day of October, 1941, at the hour of 10:30 A. M., as the hour and day for hearing of objections, if any there be, to said Petition for Determination of Heirship and for determining the heirship of said decedent, the interest of each respective claimant to his said estate situate in the State of New Mexico, and the persons entitled to the distribution thereof, and to determine, if any, the amount of succession tax due the State of New Mexico.

That the property described in said Petition for Determination of Heirship is:

The East half (E½) of Section four (4) in Township seven (7) South of Range nineteen East (19E) of the New Mexico Meridian, situate in Lincoln County, New Mexico containing three hundred twenty and fifty-seven hundredths (320.57) acres.

The name and postoffice address of the attorney for the petitioner is John E. Hall, Carrizozo, New Mexico.

WITNESS the Honorable Marcial C. St. John, Probate Judge of the said Court, and the seal thereof, this 11th day of August, 1941.

FELIX RAMEY,
Clerk.

IN THE PROBATE COURT OF LINCOLN COUNTY STATE OF NEW MEXICO

In The Matter of The Estate of Ysidro Llamas, Deceased } No. 503

Notice of Hearing of Final Account and Final Report and Determination Of Heirship

STATE OF NEW MEXICO TO:

Petra Marquez and to all unknown heirs of the said Ysidro Llamas, deceased, and to all unknown persons claiming any lien, right of title or interest in, to, or upon the Estate of Ysidro Llamas, deceased, and to whom it may concern: GREETINGS:

Notice is Hereby Given, that Pablo Marquez, administrator de bonis non of the Estate of Ysidro Llamas, deceased, has filed his Final Account and Report as such with the Clerk of the Probate Court of Lincoln County, New Mexico, and has filed his petition seeking the determination of heirship and for discharge as such administrator, and the Judge of the Probate Court has fixed the 29th day of September, 1941, at 10:00 o'clock A. M. in the Probate Court Room of the Court House at Carrizozo, Lincoln County, New Mexico, as the time and place for the hearing of objections, if any, to said Final Report and Accounting, and that the said Probate Judge will at said time and place proceed to examine and inquire into said Final Report and Accounting and, if found to be correct, will approve the same and discharge the administrator de bonis non and will at the same time and place determine the heirship and ownership of said decedent's estate and the respective interest of each and all claimants thereto or therein and the persons entitled to the distribution thereof as is provided by law.

That A. B. Carpenter, whose post office address is Box 896, Roswell, New Mexico, is the Attorney for the administrator de bonis non.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the Probate Court of Lincoln County, New Mexico, on this the 7th day of August, 1941.

Felix Ramey,
Clerk of the Probate Court.
(P.C. Seal) A8A29.

Service Men

To the men of Lincoln County, whose numbers were drawn in the National Lottery and who are inducted into the Military Services of our country; The American Legion, cordially invites you to avail yourself of every facility of the American Legion and Auxiliary of Post No 11, Carrizozo. We wish to assure you of our heartiest co-operation and the services of this post are offered in any possible way that may be of benefit to you,

Albert Scharf, Commander,
By: Dan Conley, Adjutant.

NOTICE

Several hundred engineering aids are needed by various governmental agencies, the U. S. Civil Service Commission announced today. These Engineering Aids will be needed throughout Colorado, New Mexico, Utah and Wyoming as well as in other areas.

In order to qualify applicants must have had certain engineering training or experience. The amount of training or experience varies with the grade and responsibility of the position.

Applications may be filed until further notice with the Manager, Thirteenth U. S. Civil Service District, 136 New Customhouse, Denver, Colorado.

Applications and the necessary forms for filing may be secured from the Secretary, Board of U.S. Civil Service Examiners at any first or second-class post office in Colorado, New Mexico, Utah, or Wyoming, or the Manager, Thirteenth U. S. Civil Service District, Denver, Colorado.

The Civil Service Commission does not desire applications from persons now engaged in national defense work either in private industry or in a government agency.

The Revival of "Ghost Towns"

Albuquerque, N. M., August 21.-The revival of "ghost towns", the dumping of millions of dollars into new defense efforts, reopening of ancient mines and the feverish pace of construction activities caused New Mexico's industrial horizon to glow today with the promise of greater returns.

A labor market report released by Benjamin D. Luchini, chairman of the Employment Security Commission, listed new industries and the expension of present enterprises among the reasons for increased employment and growing prosperity in New Mexico.

One of the most fortunate communities in the state, said Mr. Luchini, is the town of Magdalena where the opening of old mines producing gold, silver, lead and zinc has given employment to about 200 workers. Once quiet because of suspended mining activities, Magdalena now hums now with life.

The "gost town" of Allison, near Gallup, abondoned after nearby coal mines were closed down, now shelters the families of workers employed on the Fort Wingate ordnance depot construction.

Roswell and the Pecos valley will profit enormously by the construction of a $6,500,000 army twin bomber training school, an benefit to the community after the temporary construction boom will have passed. The project will be even larger than the Albuquerque air base.

Work was expected to start this week on the construction of a $300,000 lamp black plant in Eunice, where operators said all labor would be employed locally. A by-product of petroleum, lamp black is used in the manufacture of electrical equipment. The plant will bring about greater utilization of New Mexico's natural resources.

Bumper crops were in sight for the dryland farming areas, where record rainfall was a boon to producers, and increased acreage in the irrigated districts, together with higher prices, was expected to boost producers' income.

Cattle were reported in excellent condition because of the best pastures in years, and a rising market added to the good fortune of cattlemen. Good prices for wool and mohair fattened the wallets of livestock producers.

Although the natural supply of potash in the Permian Basin of southeastern New Mexico was estimated as sufficient to supply the entire nation for many generations, Mr. Luchini said all mined reserves had been exhausted in the Carlsbad potash warehouses, and that all three mines were working at peak capacity to supply the growing demand. Metal mining companies in the Silver City area were operating at peak capacity to produce metals for war industries and other markets.

The seasonal decline in coal production failed to materialize this year, and the Gallup and Madrid communities were profiting because of it.

NOTICE

The United States Civil Service Commission announces an open competitive examination for the position of Attendant, for filling the positions of Hospital Attendant, Mess Attendant, Maid, Kitchen Attendant, and related positions. $1020 to $1080 a year, for filling vacancies in the U. S. Marine Hospital, Public Health Service, Federal Security Agency, Fort Stanton, New Mexico.

Applications must be on file with The Manager, Thirteenth U. S. Civil Service District, 136 New Custom House, Denver, Colorado, before the close of business on September 2, 1941.

Full further information may be obtained from The Secretary, Board of U. S. Civil Service Examiners, Fort Stanton, New Mexico, or The Manager, Thirteenth U. S. Civil Service District, 136 New Custom House, Denver, Colorado.

Expert Hat Cleaning and Re-Blocking

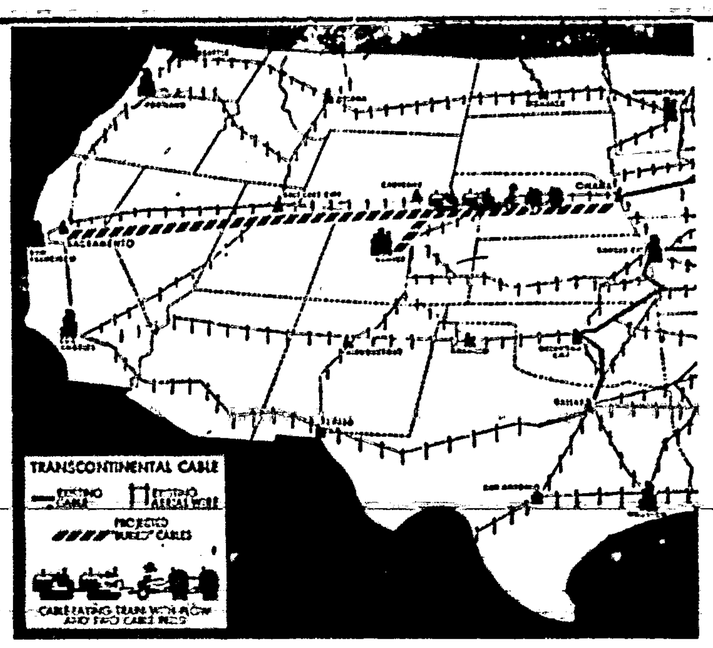
Carol Coburn was a "bush-rat's" daughter, who left Alaska for an education. When her father died on the trail she headed back North, where a shadow had fallen on the claim that should have been hers, though she returned primarily to teach in an Indian school.

When the school burned, Carol moved to Matanuska Valley, sub-polar land of promise—the latest American frontier—where the government planned its settlement project. And here against this background of fantastic social experiment, Carol's affairs mount swiftly to climax on climax. Sidney Lander, mining engineer, is in love with her, but is engaged to the daughter of his employer. Still another woman is in love with him. There are, indeed, a few threads to unravel, and the author does it skillfully.

Don't miss this absorbing story of the Far North—

IN THIS NEWSPAPER

IT'S YOUR MOVE--
Here Are Money Savers



A New Voice Highway for National Defense

Across Nebraska, Wyoming, Colorado, Utah, Nevada and California, work is proceeding rapidly on a new voice highway—an all-cable transcontinental telephone line.

Cable crews are equipped with mechanical plows hauled by large tractors. The cable laying train digs a trench about 30 inches deep, feeds the cable into it and back fills the trench in one continuous operation. Protected against ordinary hazards by being underground, the cable is also insulated against rodents by steel tape wound around the cable making it "gopher proof."

Increased facilities provided by this cable are designed to meet any demands that may arise for communication between centers of industry, railheads, troop concentration points and defense centers from coast to coast.

Fred Titsworth

Mr. Fred Titsworth, brother of Mr. G. A. Titsworth, of Capitan passed away in Colorado Springs, Thursday of last week, after an illness of more than a month. Mr. Titsworth was a prominent citizen of Colorado Springs, having made his home there the past ten or twelve years.

Church of Christ in Revival

Evangelist E. W. Stovall of Carlsbad, assisted by Elvin Bost of Carrizozo will conduct a revival at the Carrizozo Church of Christ beginning this Sunday. Aug. 24.

Every one is urged to hear Brother Stovall. Services will be at 10:00 a. m. and 2:45 p. m. throughout next week.

Open To High School And College Youth

Youth enrolled in the Portales High School if they do not carry more than 3-4 of a normal schedule, Oather Morper, Area Youth Personnel Officer for the National Youth Administration, announced today.

Fifty boys are enrolled in the camp at present. This number will be increased to 100 within the next three weeks. NYA provides transportation to school at begining of term.

To be eligible to enroll in the center, a young man must be between 17 and 25 years of age, unmarried, not steadily employed and a citizen. There are no educational requirements. The educational recreational program has been established to take up time not absorbed in productive work. This program shall be applicable only to enrollees not attending high school or college.

The work project activity shall be the completion of a dormitory which is now under construction for the college. Although youth are assigned on a 30-day basis, productive work to which they shall be assigned shall not exceed 100 hours per month. Enrollees will receive $30 a month, less $20 for subsistance.

Youth will be furnished coveralls, hobnailed army work shoes, towels, sheets, blankets, pillows and pillow-cases, mattresses, army cots, and soap for personal and laundry use. Each youth must furnish his own tooth paste, tooth brush, comb, razor, and all wearing apparel other than work clothes and bedding. Each boy is required to launder his own clothes. Washing machines and electric irons are at his disposal.

Eligible young men interested in being assigned to the Portales Resident Center should write for application blanks to Oather Morper, Box 488, Carlbad, N.M.

Defense Savings Stamps are available in denominations of 10, 25, and 50 cents, and $1 and $5. These stamps make possible the purchase of Defense Savings Bonds on a practical install ment plan.

Local and Personal

The Lincoln County News office has received some choice mountain apples from the Ferguson ranch on Nogal Mesa.

Mrs. Roy Skinner was a Carrizozo shopper last Saturday from their Angus ranch.

Mr. and Mrs. Billy Ferguson came down from the Nogal Mesa Saturday to attend the Sheriff's posse Rodeo.

Ex-Sheriff and Mrs. Ben Greisen of Capitan were attendants at the rodeo Saturday.

Mrs. R. C. Hemphill and daughter-in-law, Mrs. Robert E. Hempill and infant son, Robert, and Misses Marilyn Hemphill and Cooper from Orogrande visited Mrs. Era Smith Saturday and Sunday and Mrs. Robert Hemphill and son remained for a few days.

Miss Frances Ferguson, daughter of Mr. and Mrs. Billy Ferguson, who is employed in the health department at Santa Fe has been praised very highly for efficiency and has received a substantial raise in salary.

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON
(Consolidated Features—WNU Service.)

NEW YORK.—United States army men feared, when Maj. Gen. Allen W. Gullion was passed by in favor of Lieut. Col. Lewis B. Hersey as administrator of the selective service act, that President Roosevelt in all likelihood had him in mind for some important civilian duty.

Gen. Gullion Stays In Army; Fellow Soldiers Are Glad

Not that such a compliment would not have been appreciated by General Gullion's fellow soldiers. It was merely that his legal services as judge advocate-general, to which office he was appointed in 1937, were so valuable as to cause wonder as to just what officer could in precise degree fill the place of a man who, in addition to the Distinguished Service medal—for administrative brilliancy as chief of the mobilization division in the provost marshal's office in the first World war—holds a bachelor of law degree as a graduate of the University of Kentucky law school.

But the army keeps him, after all, by virtue of his appointment as head of the re-created office of provost marshal general with duties including the training and command of military police, supervision of internment camps for aliens and related activities. It will perhaps be recalled that this office was held in 1917-18 by Maj. Gen. Enoch Crowder.

General Gullion, now 61 years old, having been born in Carrollton, Ky., in 1880, was graduated from Centre college in 1901 and from West Point in 1905. While on duty as professor of military science and tactics at the University of Kentucky in 1914 he took the law course, being graduated with an LL.B.

During 1929 he was the war department representative at an international conference of 47 nations at Geneva to formulate a code for the handling of prisoners of war and to revise the Geneva convention of 1906. A graduate of the school of command and general staff at Fort Leavenworth, his experience as a student of arms was broadened by a course of study at the naval war college, Newport, R. I., from which he was graduated in 1932, having the previous year completed his courses in the army war college.

BUSY at the moment fixing up headquarters in Philadelphia, John B. Kelly, new federal director of health training for the men and women of the nation, retires as chairman of the Democratic city committee, a post he has held for eight years, in order that politics, or any suspicion of the same, shall be divorced from his duties. Kelly places physique above politics at all times and he rejoices as heartily at sight of a physically pulsant Republican as a herculean Democrat and always has.

Health Chief Out To Make Us Step Into Sound Bodies

Since the Civil war the tortuous waters of the Schuylkill river have been dotted on pleasant afternoons of the spring and summer with the fragile shells of single sculls oarsmen. The stream is the national home of sculling and many a champion has been sent forth from those placid waters. Kelly—Handsome Jack, as he was, and is, fondly known—was one of these sculllers. He took to the water as soon as he could handle a pair of oars and his fame was established in 1920 when he won the Olympic championship in sculls, a feat he repeated in 1924.

Always an enthusiast for a sound body—he is willing to let the sane mind develop as an inevitable corollary—Kelly has been preaching the virtues of trained physique with all the ardor of an evangelist in the years since his retirement from competitive rowing. A successful brick contractor, his political life has been characterized by wide experience and rugged battling in the Republican party of which he was once a member, as well as in his present affiliation, the Democratic party.

MRS. JOHN L. WHITEHURST, president of the General Federation of Women's Clubs, protests against the exclusion of women in the national home defense program, alleging discrimination against her sex. She also inveighs against the civil aeronautics board for its action in closing civilian pilot training programs to women. She will ask the General Federation to take steps in both matters. The wife of a Baltimore business man, she has been active in women's club affairs for 26 years.

Strike Stops Warship Building

While work on some $373,000,000 worth of warships and merchantmen remained at a standstill, these members of the C.I.O. industrial union of America picketed outside the yards of the Federal Shipbuilding & Dry Dock company at Kearney, N. J. The strike was called over the failure of the company and the union to agree in a dispute over the classification of some 1,500 workers.

New and Old Governors of Puerto Rico

Rexford Guy Tugwell, left, who has been nominated by President Roosevelt to be governor of Puerto Rico, shakes hands with Guy J. Swope, right, the retiring governor. In the center is Luis Monozmarin, president of the Puerto Rican senate. The meeting took place on the liner S. S. Coamo, when Tugwell greeted the newly arrived retiring governor.

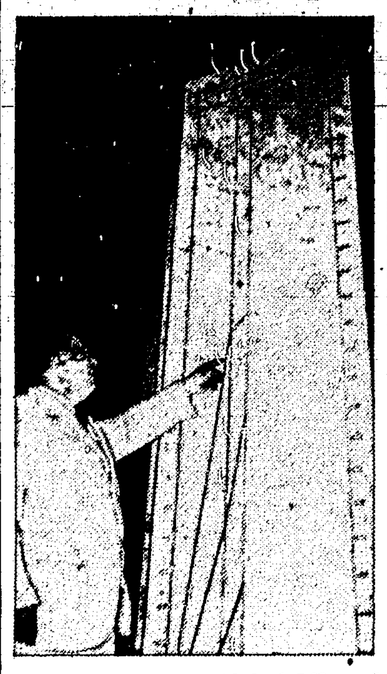
Maneuvers in Poison Gas

In the first demonstration of its kind, the second armored division at Fort Benning, Ga., shows how it plans to minimize effects of poison gas. Armored vehicles were gas bombed, then "minute men" sprang into action and established a decontamination unit. Real gas was not used. Top: plane drops "gas" bombs. Below: a decontamination squad removes traces of gas from a tank.

D. C. Inaugurates Gas Saving Campaign

Continuing the campaign for gas-conservation, District of Columbia park police warned drivers to keep their automobiles in economical running condition. Motorists driving smoky vehicles are warned to make necessary adjustments immediately. Those ignoring the warnings are subject to arrest under a nuisance statute.

Prices Going Up



Leon Henderson, chief of Office of Price Administration and Civilian Supply, told congress that there soon will be a tremendous increase in the cost of living. He appeared before the house banking and currency committee to urge passage of the price-fixing bill. Photo shows Henderson pointing to 10-foot chart showing changes in commodity prices of present war period.

Air Support Chief

Col. Wm. E. Lynd, appointed chief of the air support command, formerly air officer of general headquarters in the war department. There are now five air support commands.

Nazis in Action

Radiophoto showing German machine gunners in action protecting a bridge against attack from the houses in the background. Apparently Russian snipers were hiding in the buildings. No hint is given by German censor as to the location of the scene.

Pitching Star 'Passes'

Bob Feller, Cleveland Indian pitching sensation, having teeth inspected during draft board examination. He passed in fine style, so Indians will be short one good pitcher soon.

LEAVES from Uncle Sam's Notebook

(WNU Service) by HARRIET MAY WILSON

Growing the Lovely Iris

For the home-owner who has but little time to devote to a garden, no flower is better suited than the iris. This flower is very hardy, it comes in many colors and forms, it will thrive even under adverse conditions, and it has very few insect enemies.

VARIETIES TO PLANT

In their native habitat, the irises are of wide distribution and, in choosing varieties for garden or border, it is important to choose those suited to special conditions. The Siberian iris, for example, is a variety which is of great value to the gardener. It has a slender, graceful, grass-like foliage which looks attractive in a border, even when the plant is not in bloom. In the larger varieties in the Siberian group, the flower stalks grow three or four feet high, while some of the hybrids are dwarf in size, thus adapting the plant to almost any position in the border. These irises will do well in any moist garden soil and are especially adapted to the shores of streams or ponds.

All of the Japanese irises are beautiful, and one, at least, **Iris graminea** L., should be included in every garden list. This is a dwarf variety, not exceeding a foot in height, hence must be placed at the forefront of the border, but its flowers are very delicate and of unusual shape; moreover, they carry a delicate fragrance similar to that of the freesias. These irises do well in ordinary garden soil and require no special attention.

The common yellow-flag iris of Europe, **Iris pseudacorus** L., grows freely in either sun or shade but for best results it should be planted in the open, with an abundant supply of water. It is particularly happy when placed on the shores of ponds or streams where its thick root system serves a useful purpose in binding the soil to prevent washing.

The so-called "bearded" irises are the best known of the garden sorts. They are of easy culture, preferring shallow planting in sunny, well-drained locations. Their foliage is evergreen; their blossoms in all brilliant colors; they gain their designation "bearded" from the fact that each flower bears on the falls a linear "beard" of various colors, usually yellow. Of the bearded irises, **Iris albicans** is a truly white variety, Minnehaha shows yellow reticulations on the falls, Thorbecke shows dark lavender, Moonstone, a delicate lavender.

CRESTED IRIS

A crested iris, **Iris cristata** is a native of the United States. It is a dwarf species, having broad green leaves about six inches tall, and brilliant pale-lavender flowers, their crested falls marked in white and orange. This is an excellent plant for ground cover.

Of all the irises, perhaps those of greatest practical use to American gardeners are the ones known as Spanish, English, and Dutch irises. Of all these, the original species is blue, but many hybrids are now available in all wanted colors and combinations. The Spanish and Dutch irises are of easy culture. They are essentially garden flowers. They should be planted in groups—never singly—among perennials that will partly occupy the space left by the ripening of the iris flower stalks. They must not be overcrowded.

Irises as cut flowers lend themselves most charmingly to the present fashions in flower arrangement. Given an oval mirror for the center of the table, a flat, jade-green flower bowl, suitable figurines in the fore-front of the bowl, and at the rear the deep-green sword-shaped leaves of the iris flanking the delicate iris blooms, and you have a table decoration to enchant the most fastidious.

If, however, the flowers are being grown chiefly for garden effects, it is well to note that irises are most effective if planted to secure gradations of color rather than in contrasting masses. It is suggested, for example, to plant from white to pale yellow to dark yellow to bronze; then pale lavender to dark purple; then pale pink to dark violet-red, and to accent each mass with a clump of contrasting color.

Irises, like all bulbous or rhizomatous plants, should be divided every few years and reset, to prevent crowding.

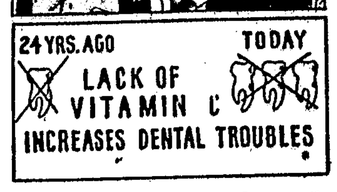
For complete information concerning varieties, breeding, planting and care of irises, send five cents to Superintendent of Documents, Washington, D. C., asking for Farmers' Bulletin No. 1406.

* * *

THE FIREFLY

Those lovely glittering insects commonly called "fireflies" are really not flies at all; they are beetles. They have a mystic power of self-illumination, displaying their light at will. Just why they display the light, no one seems to be very sure, but it has been suggested that the light is a means of protection since birds seldom eat fireflies. These beetles are often called "lightning-bugs" and the rays which they emit are almost entirely light rays—practically no heat is generated.

New Booklet on Vitamins Guide to Healthful Diet



SHOCKING news, to learn that your youngster needs costly dental treatment.

This is what lack of Vitamin C in our diet can do and what it has done to more and more young Americans. Three times as many men are being rejected for bad teeth in the draft today as in 1917. Yet you can easily get enough Vitamin C in your diet. Tomato juice, orange juice, grapefruit, strawberries are all rich in C.

* * *

Does this mean expensive meals? No, our new 32-page booklet suggests several vitamin-rich yet modest-cost menus. Gives charts showing vitamin content of everyday foods, the minimum you should get every day to have radiant health, youthful good looks. For your copy send order to:

READER-HOME SERVICE

Poor and Rich

No man is rich whose expenditures exceed his means; and no one is poor whose incomings exceed his outgoings.—Haliburton.

Nervous Restless Girls! Cranky? Restless? Can't sleep? Tire easily? Because of distress of monthly functional disturbances? Then try Lydia E. Pinkham's Vegetable Compound.

Pinkham's Compound is famous for relieving pain of irregular periods and cranky nervousness due to such disturbances. One of the most effective medicines you can buy today for this purpose—made *especially for women*. WORTH TRYING!

WNU—M 34—41

Without Beginning

Fear not that thy life shall come to an end, but rather fear that it shall never have a beginning.—Cardinal Newman.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. Ask your *neighbor!*

HERE'S TO SHORTCAKE TIME WITH CHERRIES BRIGHT
(See Recipes Below)

SUMMERY DESSERTS

Bring the tartness and sweetness of fruit into play with fresh, crumbly cake, top with a dash of whipped cream and you have summer's answer to a delectable dessert.

Garden-fresh berries peeking out from under their green foliage or fruit hanging heavy and ripe on richly laden branches deserve your best attention for they'll do mighty nice things by your meals. Since most of the fruits need no cooking you are doubly sure of getting the full quota of minerals and vitamins which they have to give.

Cherries bright and red make a tart and colorful dessert which you'll enjoy serving. If using the fresh ones pit and sugar them before using.

When I asked my mother how she made her extra delicious shortcakes, she replied, "There's nothing to it, my dear; just biscuit dough—but make the dough short and the fruit sweet!" This tip is a good one. I hope you'll follow it when trying:

Old-Fashioned Shortcake.

2 cups flour
3 teaspoons baking powder
½ teaspoon salt
½ cup shortening (8 tablespoons)
⅔ cup milk

Sift flour, measure, add baking powder and salt, sift again. Work in shortening until mass resembles coarse meal. (If you want to, add a tablespoon of sugar and an egg and count the egg as part of your liquid.) Now, add enough milk to make a soft dough, one which you can barely handle. Turn onto lightly floured board, knead a few seconds, divide in half. Pat one half about one-fourth inch thick into deep buttered 9-inch cake pan. Butter top and pat second portion of dough in layer over first. Brush on softened butter and bake about 20 minutes in hot oven (450 degrees F.) When baked, pull layers apart, spread sugared fruit on bottom layer, stack second one, crust-side down, on this—cover with more fruit, then with whipped cream and a garnish of fruit!

Variations from the original type of shortcake which we all know so well are much in order. Some people prefer a sponge cake base rather than a biscuit dough and for a real individual treatment of this type, you might like to try one with a custard filling for cool deliciousness. Since it is a trifle more elaborate than shortcake, this Cherry Sponge Custard Shortcake is ideal as a dessert for company. You'll need this sponge cake as a base:

Hot Water Sponge Cake.

4 egg yolks
1½ cups sugar
½ cup boiling water
1½ cups cake flour
¼ teaspoon salt
1 teaspoon baking powder
1 teaspoon lemon or vanilla extract
4 stiffly beaten egg whites

Beat egg yolks until very thick; gradually add sugar and continue beating. Add water, mix well, add flour sifted with baking powder. Mix until smooth, add flavoring. Fold in egg whites. Bake in ungreased pan, either Mary Ann or cup cake tins in slow oven 45 minutes. Cool before filling.

THIS WEEK'S MENU

Cold Meat Platter
Devilled Eggs
Sliced Cucumbers Tomatoes
Celery Curls
*Asparagus with Browned Butter And Crumb Sauce
Beverage Bread and Butter
Cherry Sponge Custard Shortcake
*Recipe Given

Cream Custard Filling.

¾ cup sugar
⅓ cup flour
¼ teaspoon salt
2 eggs
2 cups milk, scalded
1 teaspoon vanilla

Combine dry ingredients with slightly beaten egg yolks; stir in enough hot milk to make a thin paste. Then add paste to remaining milk and cook over boiling water 5 minutes, stirring constantly. Cook 10 minutes longer. Cool and add vanilla.

If you top with fresh cherries be sure they're sweet enough. Then garnish with whipped cream. Frozen berries need only be thawed and more sugar added if required.

If you want to make a sponge cake base and use just berries, then plan a lovely surprise so no one will even suspect they're getting a berry dessert. Make a sponge cake using a regular 9 or 10 inch cake pan. When the cake is still warm cut a round circle in the middle of the cake about an inch from the edge. Lift this out carefully keeping it whole. Into the hollow put in sugared berries or peaches or bananas mixed with sweetened whipped cream. Replace the cake top, wrap carefully in a slightly damp towel and chill for 3 to 4 hours. Garnish before serving with whipped cream or sprinkle with powdered sugar. They'll come back often for this one.

For luscious, shortcake puddings, there's nothing like a juicy cobbler. Here's a recipe made for large quantity, excellent if you're planning a church supper:

Cobbler.
(Cherry, Blueberry or Peach)

5 quarts fruit
2 quarts juice
Biscuit dough
5 cups sugar with cherries or berries
2½ cups sugar with peaches

Pour fruit and juice into square cake pans. Add sugar and mix lightly. Cover with biscuit dough (approximately ¼-inch thick) made in proportions of 1½ quarts flour, 2¼ cups milk, 1 tablespoon salt, 4 tablespoons baking powder and ½ cup shortening. Bake in a hot oven, 400 degrees F., from 30 to 40 minutes. Serve hot with cream.

A light, easy-to-make dessert is the best one with which to bring a hearty supper to a close. With raspberries at their brightest and juiciest, this combination with a graham cracker crust and frothy meringue will really be hard to resist.

Red Raspberry Fluffs.
(Serves 6-8)

Mix and press in a square pan: 1½ cups rolled graham crackers, ¼ cup melted butter, 2 tablespoons sugar, and a dash of cinnamon. Cover that with a meringue made of 4 egg whites stiffly beaten and ½ cup of sugar folded in the whites carefully.

Bake this in a slow (300 degrees) oven for 20 minutes. Cool. Spread with 2 cups of sweetened red raspberries and whipped cream.

***Asparagus With Browned Butter and Crumb Sauce.**

Asparagus, tender and green, should be cooked gently so as not to lose its color. It cooks quicker when stalks are tied in bunches. Stand them up in boiling water in a deep narrow pan. The steam will cook the tips while the water bubbles around the stalks.

Instead of serving plain butter, try browning it for a change, seasoning it and then adding a teaspoonful of fine bread crumbs. Have this piping hot and pour it over the asparagus just before serving.

(Released by Western Newspaper Union.)

LYNN SAYS:

Though dessert problems are easily solved by berries, be sure that they get the greatest care before reaching the table. Berries should appear clean and fresh, be full and plump and have a bright solid color. When they are over-ripe they look dull and often stain the container.

Don't wash berries until ready to use them since damp berries mold very quickly. The best method for washing is doing a few at a time in a bowl, lifting them out into another bowl while the hands are used as a sieve. When the berries are clean let them drain in a strainer or colander.

Fall Social Calendar Demands Smart Clothes for the Matron

By CHERIE NICHOLAS

THE time is not too far away now when you daughters of the household will engage in the exciting experience of getting off to school in the fall, with a wardrobe tuned to your exact needs and whims. Only please remember you are not the only heroines holding the spotlight in fashion realms. You have rivals, yes indeed!

We are not telling who but here is a tip. Keep an eye on modern mothers, matrons and women in general, who are so importantly carrying on in club work and in social activities that tend to "keep the home fires burning" while college faring daughters are away from home.

Fashion is catering to the costume needs of women with whom "life begins at forty." With unbounded zest and enthusiasm inspired by an ever-increasing appreciation of the tremendous influence smart clothes have, they are achieving new chic and poise. It's no secret or myth or fairy tale that women who "go places" and "do things" in this busy world of ours have gone utterly modern in matter of dressing glamorously. So look to your laurels Miss Teen-age, Miss Debutante and Miss College girl, you will have to step lively to keep up with queen-mother's fashion pace!

One of the fashion gestures that will serve mothers and matrons well who happen to be limited to a restricted budget, is to select a simple basic dress, smart in lines, made of good material and styled with the thought of complementing this one gown with flattering interchangeable accessories. These have a magic way of glorifying their appearance. Chic jewelry, feminizing and lovely lingerie neckwear touches, can do wonders in transforming the entire aspect of your costume. And don't forget flowers! Be sure to wear flowers for that refreshing accent of youthful charm that is always so endearing.

To the right in the illustration "somebody's mother" presents a lovely "picture" as she graciously presides at the initial autumn meeting of her favorite club. She is clad in the simplest sort of a gown made of fine sheer black wool to which frilly white lingerie accent lends endless charm. In the lovely quaint Victorian bouquet of carnations, violets and stephanotis which she carries so caressingly in her lovely hands, one immediately senses the gallantry of friend husband or a devoted son who, perhaps being out of town, wired to the nearest florist for the prettiest bouquet fancy might picture. Just as an afterthought this dainty bouquet may be a tribute of admiration to their leader from various club members.

The lady seated goes in for ultra modern fashion as you can readily see in her swank gown of handsome black wool ribbed crepe. This together with her chic English sailor so piquantly veiled, goes to show how very smartly one can dress in all-black. Notice the low-cut V-neckline, a stylizing detail that was popular this summer and will continue good form right through the fall. The patriotic corsage she is wearing is of blue cornflowers, fragrant red roses and white carnation petals.

Glittering satin is scheduled for a big play this fall. A satin dress is a good "buy" for it not only gives marvelous wear, but it has that air of dressiness that tunes in with social environs. The lady in the top oval has on a satin frock which is intriguingly shirred about bodice and sleeves. She wears a tiara of salmon pink gladiolas. Evidently the lady in the oval below to the right has a yen for pastel colorings. Her eyelet-embroidered dress in soft blue crepe is really lovely. She adds to the glamour by dramatizing her well-groomed hair with a cluster of rosebuds and hyacinths.

(Released by Western Newspaper Union.)

Jeweled Bow Knots

There is going to be a big play made on unique buttons and jewel fastenings of every description this fall and winter. Note the tailored jacket of chalk white crepe shown here. Its sleeves, yoke and front panel are cut in one, a characteristic feature of the newer fashions.

The five crystal and enamel bow-knot fastenings herald intriguing gadgets to be used like buttons.

Rich Browns for New Autumn Wear

There is considerable emphasis on handsome browns for fall. The dresses in initial showings are mostly of rayon crepes and jerseys. These are simply styled so far as "lines" are concerned but have interesting surface treatment in stitching, self-fabric appliques and quilted decoration.

The dressier afternoon models often combine fabric with lace dyed to match or with velvet or satin.

In keeping with the trend to browns, touches of embroidery appear in bronze sequins and metal threads, also favor is expressed for mink fur. Milliners are making up smart little mink hats with matching neckpieces.

Fringes Take On New Importance in Style

Fringed dinner gowns appear in scores of individual treatments. Afternoon dresses too take on accents of fringe. The originality and versatility expressed in trimming with fringe is most interesting.

There is every sort of arrangement from narrow fringe placed row and row in tiers covering the entire skirt to long swinging panels of fringe extending in one continuous line from waist to hem. Fringe also is worked in interlaced manner to give the new drop-shoulder line and to form pockets and girdle effects with long streaming ends to add grace.

PATTERNS SEWING CIRCLE

A GOOD frock to make in hot weather, because it is such a simple pattern, a good frock to wear in hot weather because it can be made with just a shoulder covering and no sleeves. Belt ties behind so that it may be smoothly adjusted to the figure. Notice the soft fulness let into the bodice, and the full skirt—both flattering for girls of the six to fourteen year age.

• • •

Pattern No. 8979 is in sizes 6 to 14 years. Size 8 requires 2½ yards 35-inch fabric without nap. 2¾ yards of 1½ inch bias fold for binding necklines and scalloped sleeve edges. For this attractive pattern, send your order to:

HOUSEHOLD HINTS

It is a good idea to have the kitchen table on rollers so you can move it wherever you want or need it.

• • •

If dried fruits become undesirably dry due to improper storage, they may be restored to packing house freshness by steaming in a colander or coarse meshed sieve for about 15 minutes.

• • •

One teaspoon of cornstarch added to each cup of sugar used in making fudge will make it smooth and creamy with little beating.

• • •

To eliminate the mutton flavor from lamb, cook it with raisins.

• • •

If stove polish is moistened with vinegar instead of water the stove will have a brighter polish.

• • •

If metal tops come off of shoe strings dip them in mucilage. This will stiffen the ends and make it easy to put them through eyelets.

• • •

If there is a constant smell of burning when cooking is going on examine gas burners. They are probably filled with sediment from "boilovers."

"You can't loaf in the race for news . . ."

"That's why I like the Self-Starter Breakfast!"

Struggle for Light

We forget that the human spirit, the spirit of goodness and truth in the world, is still only an infant crying in the night, and that the struggle with darkness is as yet mostly an unequal struggle.—Jan Christian Smuts.

Mrs. J. M. Beck and her son Allen went to Las Cruces Wednesday, where Allen matriculated in State College.

Defense Saving Stamps

Defense Saving Stamps soon will be on sale in retail stores throughout the country.

Secretary Morgenthau announced the extension of Defense Savings Stamps sales to retail outlets everywhere after a meeting at the Treasury Department Tuesday, August 12, when executives of associations representing more than a million stores pledged immediate participation of their members in the Defense Savings Program. Stamps will go on sale very shortly in department stores, grocery, drug, variety, furniture, hardware, and all other types of retail outlets.

At the meeting the retailers endorsed full participation in "Retailers for Defense" Week, September 15 to20, when the stores of every state will concentrate their efforts to enlist customers to buy Defense Savings Stamps. Before that time, most stores from coast to coast are expected to have Defense Stamps on sale.

The leaders of the retailers' associations met with Secretary Morgenthau and Officials to project the plan for initiating the nation wide store effort.

Mr. Isaias Marquez of Tularosa attended the rodeo here Saturday.

Mr. and Mrs. Buck Dillard of Oscuro went to California last week to visit relatives and were accompanied by Walter Berry and his sister Margaret. They spent one day at Hot Springs enroute.

Mr. Steve Boztian visited El Paso last Monday.

Mr. and Mrs. L. J. Adams spent a few days in El Paso this week.

Mrs. V. Reil has had her beauty parlor completely remodeled.

Postmaster and Mrs. Herman Kelt drove to Aztec the past weekend where they visited Mrs. Ethel Boettcher, who was formerly welfare worker for Lincoln County.

See Emil Reynolds and Dan Conley for check-up and car service.——— Standard Oil Station.

☞ Extra nice Elberta peaches for sale 3 cents per pound. Bring your own boxes, and get them fresh off the tree. These peaches are all off new young trees and there is no disease nor hail marks in them.

L. C. Hulbert, Lincoln, New Mexico.

No Best Age for Work

There is no golden age at which men do their best work, but a study of the achievements of 881 of the greatest men of history showed, according to Prof. E. L. Thorndike, that the "masterpiece age" averaged about 47.8 years.
