RECORD OF IMPORTANT EVENTS CONDENSED FOR BUSY PEOPLE

EVENTS DURING THE PAST WEEK

CAUGHT FROM THE NETWORK OF WIRES ROUND ABOUT THE WORLD

WESTERN

In the presence of a large company of guests, many of them prominent in the motion picture world, Roscoe "Fatty Arbuckle, former film comedian and Doris Deane, film actress, were married at the home of the bride's mother, Mrs. Charles R. Dibble, in San Marino, a suburb of Pasadena.

The old adage, "It takes a thief to catch a thief," proved true in the capture of Floyd Hall, life termer at San Quentin, whose arrest was effected in Sacramento by an ex-convict after Hall had terrorized the residents of the Sacramento valley for fifteen days.

After narrowly escaping being carried to sea on a cake of ice while mushing around Cape Thompson, far within the Arctic circle, on the north coast of Alaska, and experiencing other harrowing adventures on an expedition of mercy, Mrs. G. O. Brady, goverment nurse, has returned safely to Kotzebue sound, a dispatch to Nome relates.

Charles Spencer Chaplin's balloon pants, snaky cane and flapping shoes, when used in conjunction with other characteristic touches of makeup, were declared to be his private property in a court ruling in Los Angeles that gave the film comedian a legal victory in his suit to enjoin Charles Amador from using them and the stage name of Charles Aplin.

Governor Pierce of Oregon, in reply to a letter from Gov. W. P. Hunt of Arizona, joins in the campaign for the purpose of having the United States turn over to the states all the remaining public lands within the boundaries of the states. Oregon has nearly 10,000,000 acres, he listed, and it is the desire of the governor to have these kept on the tax rolls and revenue diverted to the school fund.

A new rail artery through southern and central Oregon for through traffic between Oregon and the Eastern states will be made possible through steps taken by the Southern Pacific Company for the conversion of the Nevada-California-Oregon Railway to a standard gauge line and the completion of the Oregon-California & Eastern Railway, it was announced in San Francisco a few days ago.

Flood conditions were caused by cloudbursts in the mountains south and east of Glenrock, Wyo. Waters of Box Elder and Deer creeks, which were on a rampage for several hours, receded as fast as they had risen. Several families were forced to flee from homes on low ground bordering Deer creek in east Glenrock. A checking up of damage revealed smaller losses than first reported.

WASHINGTON

Manufacturers, wholesalers and bankers from all parts of the country will gather in Washington June 8 to 13 at the thirtieth annual convention of the National Association of Credit Men to survey the present credit situation, both domestic and foreign; lay down a credit policy for the coming year, and pursue their already well developed program, to be backed by a $1,000,000 fund for the prosecution of commercial criminals.

A substantial check from John D. Rockefeller is to pay the expenses of the four months' European honeymoon of his 21-year-old granddaughter. This most apt present of the hundreds she received was carried in her handbag by Mrs. David Meriweather Milton, who was Abby Rockefeller. Mr. and Mrs. Milton recently sailed from New York on the liner Paris.

First steps toward the program of financing that must be carried out in June have been taken by the treasury, which announced a few days ago that the Federal Reserve Banks had been authorized to redeem immediately the series of certificates of indebtedness which mature June 15. The securities aggregate $406,031,000 and are designed as series 01925.

The American government has advised its European debtors that in its opinion the time has come for settlement. In a communication addressed to nine nations, it has expressed an earnest desire that the war-debt question be brought to a solution without further delay. The nations so notified are France, Italy, Belgium, Rumania, Greece, Czecho-Slovakia, Jugo-Slavia, Esthonia and Latvia.

American adherence to the World Court on terms proposed by President Coolidge and favorable treatment in tariffs of the world for American manufactured products were urged in reports of the foreign affairs committee of the Chamber of Commerce of the United States in Washington.

Gaston B. Means, a storm center in the Daugherty investigation and outstanding figure in many court actions, surrendered to the District of Columbia Supreme Court and requested that he be allowed to begin a two-year prison term immediately.

FOREIGN

Foreign Minister Stresemann announced in Berlin to the reichstag that the German government will continue to carry out the Dawes plan.

Municipal suffrage just granted Italian women by a bill adopted by the Chamber of Deputies will be restricted to women over the age of 25 years.

Japan's largest submarine, capable of cruising across the Pacific and return without difficulty, has been completed and will be delivered officially to naval authorities late in May.

The first break in the tangle of interallied debts was seen by high government officials in Washington in the determination of Belgium to take independent steps in negotiating a funding settlement with the United States.

Pending preliminary conversations on France's debts, the French government is going ahead with the task of trying to find out exactly how much France borrowed from her allies and associates during the war, the conditions under which such debts were contracted and the rate of interest agreed at the time.

A rousing reception was accorded the Prince of Wales on his arrival at King Williams Town, South Africa, which is the chief center of the frontier Kaffir trade and has a population of about 8,000. The prince presented the mayor of the town with a medal in recognition of his good work in behalf of the Boy Scouts.

A dispatch to the London Daily Mail from Daresalem, Tanganyika territory, East Africa, states that 100 whites and 14,000 natives are engaged in working what is described as the largest alluvial gold field in Africa, on the Lupa river between Lakes Tanganyika and Nyassa, and that many others are rushing to the scene. Gold was first discovered in the neighborhood in June, 1923, but the area now is being rapidly extended. All unclaimed rights have been reserved by the government.

The Daily Mail and the Evening News, of Lord Rothermere's group of newspapers, deprecated the initiative of John Cownie, glove manufacturer of Des Moines, Iowa, who walked up to King George at the Wembly exhibition and shook hands. Heretofore, the papers said, the public had kept aloof when their majesties were in public, but if the practice of shaking hands is to increase unduly, "it may be necessary to have strong police cordons, which neither the king nor anyone else desires."

GENERAL

William Cavillier, 15-year-old slayer of his aged grandmother, was sentenced to the electric chair by Judge R. H. Koch in Schuylkill County Court at Pottsville, Pa. The entire proceedings required three minutes.

Clarence Darrow, Chicago lawyer who is to oppose William Jennings Bryan in a Tennessee evolution trial, came out in Chicago a few days ago with a few opinions about the commoner. Nero and Bryan were linked by Darrow as men whose irrational opposition enhanced the spread of great doctrines.

At least eighty persons were injured, two of them probably fatally, in a mad panic which swept a crowded New York subway train as it was about to leave the Grand Central terminal station. A blown fuse, followed by a series of electric lam pbulb explosions, was reported to have been the cause of the accident.

A warning against relaxation of antituberculosis work in spite of the 50 per cent reduction in the death rate from the disease in the last ten years was sounded in a report of Dr. I. D. Bronfin, superintendent of the Jewish Consumptive Sanitarium at Denver. The report was read at the closing session of the annual convention of the Jewish Consumptives' Relief Society at Cleveland.

That it will be a long and intensive campaign before the French forces in Morocco subdue the Riffs—if they are to be subdued—is admitted by military experts in Paris acquainted with the situation and with Abd-el-Krim. The war is much more important than it may appear across the Atlantic, because the continued success of the Riffs would imperil the hold of European nations on northern Africa.

Between a brisk shower, which sprang up a few minutes before the start of the race, and a terrific downpour which soaked thousands of spectators to the skin, Flying Ebony, a little horse, black as night, raced to an immortal victory in the $50,000 Kentucky derby at Louisville. He defeated a field of nineteen of the nation's finest 3-year-olds. The black colt, owned by Gifford A. Cochran of New York, and superbly ridden by Earl Sande, America's premier jockey, finished one and a half lengths ahead of Captain Hal, a Louisville-owned colt, stepping the mile and a quarter distance in 2:07 3-5. Son of John came thundering back of Captain Hal for third money.

The entrance of Henry Ford into Wall Street was seen by some bankers in the announcement that the Guardian Detroit Company has been established as the New York investment branch of the Guardian Trust Company of Detroit, of which Edsel Ford is a director.

Earl Woodward, charged with the kidnaping of 11-year-old Lucile Chatterton in Granville, April 24, was discharged "for lack of evidence" sufficient to hold him for a jury trial in Addison county Municipal Court at Middlebury, Vt.

NEW MEXICO STATE ITEMS

Al Sutton is in jail being held for investigation in connection with the blowing of the safe at Tatban last week.

A new company, composed of several Denver capitalists, has been formed at Ojo Caliente, near Taos, and mica mining in that district has taken on new activity.

Muck taken from a 115-foot well at the Gold Dust mining camp, near Hot Springs yielded over $25 worth of gold. This is said to be the greatest depth a which placer gold has ever been found in New Mexico.

The Chamber of Commerce of Aztec voted to hold a celebration of the Fourth of July at a meeting held last week. Committees have been appointed and the program will be made up by the first of June.

All three members of the State Highway Commission have been reappointed by Gov. A. T. Hannett. They are: Willis Ford, Roswell, Democrat, for six-year term; Sam Agee, Silver City, Democrat, for four-year term; Charles Springer, Cimarron, Republican, for two-year term.

The First National Bank of Albuquerque has been named state fiscal agent, with authority to buy and sell bonds for the state and collect obligations owing the state, by the State Board of Finance which adjourned after a day and a half session. The First National of Santa Fe and First National of Roswell were selected as state checking depositories.

The industrial employment survey report recently issued by the U. S. Employment Service of the U. S. Department of Labor at Denver, Colo., states that industrial employment in New Mexico is improving, due principally to the increases in activities usual at this season, particularly those of an out-of-door nature causing employment for practically all resident workers. Renewed seasonal activities in agriculture are causing employment for increasing numbers of field workers, especially in connection with the cultivation of an increased cotton acreage in the southeastern section of this state which is indicated to cause further demands for field workers who are available locally at present. The lambing season, now in full swing, is causing much short time employment to a considerable number of workers, of whom a slight shortage exists; the shortage is expected to be immediately overcome by the usual spring influx of transient seasonal workers. Industrial plants are operating full time; labor in connection sufficient. Seasonal increases are noted in building and general construction activities; resident building mechanics are well employed and sufficient. Municipal improvement work is getting under full swing and indicated to be quite extensive in some of the larger cities. Highway construction under way, includes much federal aid; surfacing, grading and paving; labor in connection ample. Employment in metal mining in the southwestern section of the state is well balanced; copper mines near Silver City working three full shifts a day. A slight surplus of coal miners exists; more noted in the Gallup district, where mines are operating only three to four days a week. Oil activities are increasing in the Roswell district, particularly new development work; labor in connection more than amply supplied by influx of oil field workers. Lumbering, especially Bernalillo, sawmills, is increasingly active; supply of and demand for labor in connection well balanced. There is a noticeable increase in railway activities, with full forces working six days a week at shops for the first time in several months; railway labor ample.

Las Cruces will have a real old-fashioned Fourth of July if the plans of the Joe Quesenberry post of the American Legion are carried out. The post has agreed to handle the program for the day and take complete charge of the celebration. A parade will be one of the features.

Mrs. Elizabeth Koger Rolland of Alamogordo has been chosen as Grand Exalted Ruler of the Grand Chapter of the New Mexico State College Association. Under new rules and regulations adopted at a meeting at State College last week, the New Mexico association will consist of 3,000 members, the grand chapter being formed by the presidents of the local chapters.

Santa Fe was chosen for next year's convention at the meeting of the state council of the Knights of Columbus at Albuquerque. M. J. Kelly, Roswell, was elected state deputy supreme knight; T. J. McCaffrey, Albuquerque, state secretary; T. E. Murphy, Raton, state treasurer; T. V. Truder, Las Vegas, state advocate; F. A. McClendon, Las Vegas, state warden. Alternates to M. J. Kelly and Vincent Jaeger as delegates to the supreme council meeting are Leo Lannigan of Gallup and Leo Murphy of Albuquerque.

Arno B. Cammerer, assistant director of national parks, accompanied by an expert electrician, visited Carlsbad last week to make an investigation of the improvements to be made at the cavern near Carlsbad. Mr. Cammerer has already intimated that he would make improvements along the same lines as they employed in the famous Luray caves in Virginia, where trails are built with substantial railings in places where there is any danger, together with special attention to the sanitation and lighting arrangements.

THREE ARE KILLED IN CYCLONIC WIND

MANY NARROW ESCAPES REPORTED AS HIGH WIND WRECKS BUILDINGS

GALE SWEEPS COLO. TOWNS

THREE KILLED IN TERRIFIC GALE THAT SWEEPS DENVER AND NEARBY SECTIONS

Denver.—High winds of almost cyclonic velocity which struck Denver and various points in eastern and northern Colorado a few days ago brought death to a boy at Berthoud, a girl at Platteville, a man at Boulder, resulted in injuries to three persons and numerous narrow escapes on the part of others. Telephone and power lines, trees, fences and small buildings were torn down by the gale in the northern part of thes tate.

The dead:

Victor Fells, 5, Berthoud.

Emily Pearl Steadman, 7, Platteville.

Loren H. Bennett, 55, Boulder.

The injured:

Walter Blanchard, Boulder, bruises and shock.

G. F. Turner, Boulder, bruises and shock.

Donald Chalburn, 7, exposure and shock.

Victor Fells, 5, of Berthoud, was drowned in Mud lake when the high wind overturned a boat from which he was fishing. The fatality at Boulder occurred when the wind tore a roof from a small structure upon which three carpenters were at work, blew the men ten feet into the air and carried them sixty feet, causing the death of Loren H. Bennett and injuries too Walter Blanchard and G. F. Turner.

The little girl, Emily Pearl Steadman, was the daughter of Mr. and Mrs. M. V. Steadman, Platteville farmers. She had gone to the chicken house to shut the door, without the knowledge of her parents. When the high wind swept across the place the parents became alarmed at her absence and started to search for her. They found her pinned beneath the board of the shattered building, suffering from a broken leg and internal injuries, the latter causing her death.

Kersey, Colo., ten miles east of Greeley, was in darkness and without water when the power plant which supplied lighting and power for the water pumps was put out of commission by the wind.

Miles of telephone and power lines and miles of fences were torn down by the wind in various vicinities in the northern part of the state. Damage to fences, trees and small buildings was reported from Ault, Eaton, Windsor, Kersey, Pleasant Valley and other northern Colorado towns, and numerous window glasses were blown out in several of these places.

More than $1,000 damage was done at the Reed dairy, two miles east of Greeley, when several new dairy buildings were blown down.

Sand filled numerous northern Colorado roads to a level with fences having been deposited there by the sweeping gale. Several small fires, fanned by the wind, occurred in the rural district in the Greeley region.

In Denver the gale struck hardest on the South Side.

The high wind, which lasted for half an hour in Boulder, caused considerable damage to trees and fences there. Similar damage was reported at Berthoud.

The wind at Fort Collins resembled a miniature cyclone and razed telephone poles, a shed and numerou fences and trees. At Broomfield several freaks of the wind were reported, but practically no damage.

Washington Awaits Debt Settlement

Washington.—With the diplomatic ice broken, official Washington apparently had settled down to await the results of the American government's notice to its European debtors that the time has come for arrangement of funding settlements. The action of this government, disclosed a few days ago, in advising nine debtor powers that it desired funding proposals from them, was expected generally to develop into more than a question of settlements between the United States and the nations to which it made war and post-war loans.

Dr. Erdman Named Church Moderator

Columbus, Ohio.—Dr. Charles R. Erdman, Princeton, N. J., was elected moderator of the general assembly of the Presbyterian church in the U. S. A. here and pledged to restore harmony in the church by "peaceful methods." On what his supporters declared was a direct issue raised by the modernist-fundamentalist controversy, Dr. Erdman defeated Dr. Lapsley A. McAfee of Berkeley, Calif., backed by the militant fundamentalists. His election came on the second ballot, the vote being: Erdman, 470; McAfee, 420.

Vanishing Herds Probed

Miles City, Mont.—Passing of the great beef herds of the West endsed the government little worry, but the gradual disappearance of the herds of 500 and 600 head is attracting attention. Starting here, in the heart of what is regarded as the only great beef range left in the United States, experts under the direction of M. L. Wilson of the Department of Agriculture, began a survey of the ranges of southeastern Montana, the western part of South Dakota, Wyoming and Colorado.

MEMORIAL DAY, 1925

Sioux at Sam's Grave in Arlington ©Keystone View Co.

Blue, Gray and Khaki ©Underwood & Underwood

By JOHN DICKINSON SHERMAN

TIMES change and we change with them. So wrote the Roman philosopher of old. It is as true now as then—no more and no less. Nature changes little. The seasons come and go in their appointed time. And each year brings around the recurrent miracle of the spring, when life springs anew from death.

Human nature changes little. Its conventions may change; its fundamentals remain much the same. Man still instinctively fears death, still mourns his dead, still honors those who die for their country, still believes in life beyond the grave, still hopes for the day when war shall be unthinkable.

We who fear death take heart in Spring—
The Spring with bursting sod
And cry "O Death, where is thy sting?
I bring new life from God!"

We who fear death in life's sharp strife
Take courage Easter Day,
Its message is immortal life
For our poor mortal clay!

We who fear death put fear away,
Pay homage to the brave
In pageant of Memorial Day,
When pride enshrines the grave!

Yet Memorial Day—how changed is it!

An American day of patriotic significance, particularly and peculiarly our very own, it was until a generation ago. Our fighting dead lay all at home, Blue here and Gray there, oftimes Blue and Gray sleeping side by side. And it was our own American quarrel that time was slowly assuaging, as Blue and Gray heaped up impartially the blossoms of remembrance for valor unsurpassed.

No more shall the war cry sever,
Or the winding river be red,
They banish our anger forever
When they laurel the graves of our dead;
Under the sod and the dew,
Waiting the judgment-day,
Love and tears for the Blue,
Tears and love for the Gray.

Thus wrote Francis Miles Finch with the inspiration of a prophet. For then came the blowing up of the Maine in Havana harbor, an dnatardly an outrage as ever blackened the records of civilization.

This Spanish-American war was none of our seeking. And Spain was a short horse and soon curried. Just the same, it was a war of tremendous importance. It marked a forward step in the nation's progress. For it put the American Navy on the Seven Seas—to stay. It made the United States a world-power overnight. And out of the Red, White and Blue and the Gray it wrought the Khaki.

Last March Alabama availed herself of a long-neglected privilege and set up, with appropriate ceremonies, a statue of Brig. Gen. Joseph Wheeler, U. S. A. And who is he? Why, none other than Fighting Joe Wheeler, who wore all three—the Blue, the Gray and the Khaki—and honored them all in the wearing. Heaped high with flowers on Memorial Day will be his grave in Arlington National cemetery between the Robert E. Lee mansion and the stately memorial to Sheridan. And the story of the "little old ex Confed." which tells of the coming together of the Blue and Gray in the Khaki, is this:

Joe Wheeler wore first the Blue. This was at West Point and in the Indian wars of the West. Next, when Alabama left the Union, he went with his state and won fame as a dashing Confederate cavalry leader second to none. He accepted the verdict of the sword and for ten terms he served Alabama as a useful member of the house of representatives.

Hot on the news of the Maine's destruction, Representative Wheeler of Alabama went personally to President McKinley and asked to be made a brigadier general of volunteers and sent to the front. Some Presidents might have said "too old," for the veteran was then sixty-three. But not McKinley. He was a veteran himself and he knew his man. So he went Wheeler one better and made him a major general of volunteers.

The day General Joe was to leave for the front he appeared in the house in uniform. The members crowded about him to wish him "Godspeed." It was a moment of intense emotion. And as he left, the old cavalry leader, tough as whipcord and a born leader of men, straightened up, touched the Khaki on his breast and said:

"Gentlemen, this is the proudest, happiest day of my life."

Into the thick of the fight he went,
pallid and sick and wan,
Borne in an ambulance to the front, a ghostly wisp of a man;
But the fighting soul of a fighting man, approved in the long ago,
Went to the front in that ambulance in the body of Fighting Joe.

Out from the front they were coming back, smitten of Spanish shells—
Wounded boys from the Vermont hills and the Alabama dells.
"Put them into this ambulance; I'll ride to the front," he said;
And he climbed to the saddle and rode right on, that little old ex-Confed.

That was Fighting Joe Wheeler at Santiago, according to an unknown poet whose verse was read at the capitol exercises last March. After the Spanish-American war was over the veteran stayed with the Flag and soon found himself back in the regular army—where he had begun as a "shavetail" forty years before. When he died in 1906 in Brooklyn his body was taken to Washington and buried with full military honors, President Roosevelt attending. And in the escort to Arlington were Blue and Gray and Khaki.

Then came the World war. This time it was the German who thought the "Yank" would not fight. We did keep out as long as we could with honor, but he pushed us too hard.

Ho, the Henglish an' the Hirish an' the 'owlin' Scotties, too,
The Canucks an' Haustralee-uns an' the airy French polu,
The thing that mostly bothered us hin hall hour staggerin ranks
Was wot hin ell would appen wen the 'Uns 'ad 'it the Yanks.
The thing that mostly bothered us that day hin lawst July
Was 'ow hin 'ell the Hin'd 'old hit they should run awy.

My word! Hit appened sudden wen the drive 'ad first begun,
We seen the Yanks a-runnin'—Gaw Blimy, 'ow they run!
But the honly thing that bothered us that seen the chase begin
Was 'ow hin 'ell to stop 'em 'fore they got into Berlin.
The thing that mostly bothered us don't bother us no more,
Hit's honly wy hin 'ell we didn't know the Yanks before.

So now we Americans have a new Memorial Day—a holy day of the Blue and Gray and Khaki, with more graves of soldier dead to decorate and greater responsibilities. As to the soldier dead "Over There," we shall wear poppies in remembrance, entrusting to other hands the privilege of strewing flowers.

Arlington National cemetery will be the epitome of the nation's observance. President Coolidge will lay a wreath on the tomb of the "Unknown Soldier" and will deliver an address. And there will be participants from every nook and corner of the land—for the heroic dead in Arlington belong to the nation.

As to new responsibilities, we must meet them worthily. It is well to remember the valor of our fighting men who in all our wars have never let Old Glory trail in defeat. Yet the spirit of Memorial Day is neither exultation nor revenge. It should be rather aspiration for "peace on earth, good will toward men."

For "War is hell," as Sherman said. And peace may be made all that war is not.

All Entitled to Honor

The Yankees killed at Lexington and the Southerners who fell at the Coypens; the men of Landy's Lane and the men of New Orleans; the heroes from every state who followed Scott from Vera Cruz to Mexico City; the soldiers of Grant and of Lee; the Vermonter who died at San Juan and the Virginian who found his fate in the Philippines; the New Yorker who went west at the Hindenburg line and the Tennesseean who perished to win Argonne forest—these men are not to be separated in the gratitude of their peoples. Why should not their nation be united in the formal commemoration of their courage?—Washington Star.

American Dead in France

The Oise-Aisne is the second largest of the American cemeteries in France, with about 6,000 graves, and in it have been assembled the American dead from all the surrounding temporary cemeteries, including the one at Plolay, directly southwest of Soissons, where large numbers of the First division were originally buried, those killed in action in the big counter-offensive of the allies beginning July 18, 1918, when more than 1,700 of the division fell during a period of six days. One of the five battle monuments of the First division in France has been erected just outside Soissons, not far distant from this cemetery, and it has on its four sides the names of these soldier dead.

Road Work Finished.

Billie Ferguson and his road gang have finished eighteen hundred feet of railing along the canyon just east of the town. The work eliminates a hazard that has caused many serious accidents in the past and adds to the appearance of the highway. The crew will go from here to the Rhidoso to construct a first class road from the Roswell-El Paso highway near the Mescalero Indian reservation to the cabin sites on the upper Rhidoso.

Good Game Expected.

The D. & A. Coalers are bringing up a strong team of sluggers for the two game series to be played at the Fort Saturday and Sunday, May 30th & 31st, according to Manager Gus Ferro of the aforesaid club.

The team is made up of young fellows for the most part, strengthened here and there by an old head to steady the team. They have been meeting all teams in El Paso, and while having lost a couple of games, they have always given a good account of themselves in all games played.

The Fort has not tasted defeat this season, and base ball fans are busy conjecturing just how the local nine will measure up with the youngsters who seem to have made such a "rep" in the Pass city. Mickey and Flores will bear the brunt of the hurling for Fort Stanton, while Wilkins, Peter and Harris are slated to hook the ball around the corners of the plate for El Paso.

Gus Lemp and his Original Roswell Orchestra are also on tap for the big dance the evening of May 30th. Gus has some tuneful hits never before played around here, and they are bound to please, he writes. The public is invited to attend both the ball games and the dance.

State Pharmacy Law.

Below will be found Section 4061 of the Pharmacy Laws of the State of New Mexico.

"Section 4061. Any person not a registered pharmacist, as provided in this act, who shall conduct a store, or a pharmacy, or place for retailing, compounding or dispensing drugs, medicines or poisons, or chemicals, for medical use, or for compounding or dispensing physicians' prescriptions in the State of New Mexico, or who shall take, use or exhibit the title of register-pharmacist, shall be deemed guilty of a misdemeanor, and upon conviction thereof, be liable to a penalty of not less than one hundred dollars, or imprisonment in the county jail for not less than one month nor more than three months, or both such fine and imprisonment, in the discretion of the court."

Advertisement.

NOTICE!

State Fire Laws

Below is quoted the New Mexico state fire law which is effective after June 10, 1921.

"Be It Enacted by the Legislature of the State of New Mexico:

"Sec. 1. Any person who shall wilfully or negligently commit any of the acts hereinafter enumerated in this section shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than twenty-five nor more than five hundred dollars, or imprisonment in the county jail for not less than fifteen days nor more than six months, or both such fine and imprisonment.

(a) Set fire, or cause or procure fire to be set to any forest, brush or any other inflamable vegetation growing or being on lands not his own, without the permission of the owner of such land; provided, that no person shall be convicted under this section who shall have set in good faith and with reasonable care, a backfire for the purpose of stopping the progress of a fire then actually burning.

(b) Allow fire to escape from the control of the person or persons having charge thereof, or to spread to the lands of any person other than the builder of such fire without using every reasonable and proper precaution to prevent such fire from escape.

(c) Burn brush, stumps, logs, rubbish, fallen timbers, fallows, grass or stubble, whether on his own land or that of another, without taking every proper and reasonable precaution, both before the lighting of said fire and at all times thereafter to prevent the the escape thereof; provided, however, that any person desiring to burn as aforesaid during the months of May, June and July, shall give notice to the owners of adjacent land of such intention to burn at least 24 hours before setting such fire.

Sec. 2. Any person who builds a camp fire upon lands within this state, not his own, without clearing the ground immediately around it free from material which will carry fire, or who leaves thereon a camp fire burning and unattended, or who permits a camp fire to spread thereon, or who shall be throwing away any lighted cigar, cigarette, matches or by the use of firearms, or in any other manner start a fire in forest material not his own, and leave same unquenched, shall, upon conviction, be punished by a fine of not less than ten dollars ($10) nor more than one hundred dollars ($100) or, by imprisonment for not more than 50 days.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)
(©, 1925, Western Newspaper Union.)

Lesson for May 31.

PETER AT LYDDA AND JOPPA

LESSON TEXT—Acts 9:32-43.

GOLDEN TEXT—And they went forth and preached everywhere, the Lord working with them, and confirming the word with signs following.—Mark 16:20b.

PRIMARY TOPIC—Two Wonderful Things That Peter Did.

JUNIOR TOPIC—The Story of Two Miracles.

INTERMEDIATE AND SENIOR TOPIC—Two Great Miracles.

YOUNG PEOPLE AND ADULT TOPIC—The Place of Miracles in the Spread of the Gospel.

In order to grasp the significance of this lesson, we should recall the conditions which prevailed in the church as suggested in verse 31.

1. Freedom From Persecution.

Saul, the ringleader of the persecutors, had only recently been converted, thereby disorganizing their forces and causing the church to enjoy a breathing spell. This period of rest was not used for growing lazy, indifferent, worldly and forgetful of God, but for growth in grace and in the knowledge of the Lord Jesus Christ.

2. Spiritual Growth and Development.

Most blessed will be the results following the times of outward peace if the members of the church will but spend time in building it up. The real meaning of the word "edified" is built up. This does not mean merely that the members were being instructed and comforted, but that strenuous efforts on the part of individual members, as well as the body as a whole, were being made for the advancement of the divine life. As suggested by another, this metaphor involves:

(1) A Foundation. This is Jesus Christ. No other must be laid (1 Cor. 3:12-16).

(2) Continuous progress. This means that a Christian's activities are purposeful, and that the work he undertakes "moves forward" with the proper progression.

(3) Persistent effort. This means that the present day's work begins the foundation upon which tomorrow's work must be built. Thus day by day the life is being raised higher and higher as each separate round of material is being laid by strenuous efforts.

(4) Completion. Finally the work is done. The building is completed; the top stone is brought forth and placed.

3. Outward Growth.

Building up within the church causes the whole work to be admired and respected by those without, inducing them to come and identify themselves with it.

I. Peter's Tour Among the Saints (v. 32).

This resulted in securing new converts.

II. Two Stupendous Miracles (vv. 32-43):

These were the greatest signs wrought since the days of Christ. The dreadful malady of palsy is vanquished, and a corpse is tenanted by the departed soul. The Lord had promised these signs as they went forth with the gospel message. They were given as encouragements to the disciples to convince them that the gospel did not lose any of its power by being spread, but rather it increased in power.

1. The Healing of Aeneas (v. 32-35).

This man's needy condition appealed to Peter just as men today should appeal to us for their semi-dead state. Like his Master, Peter could not refuse the needed help. In this he does not direct attention to himself, but confidently appeals to the power in the name of Christ. He said, "Jesus Christ healeth thee." The man who had kept his bed for eight long years immediately arose and made his bed. Peter wisely kept this miracle from being the end by making it the means to the end—that end was the preaching of the gospel.

2. The Raising of Dorcas (vv. 36-43):

This woman was full of good works and almsdeeds which she "did," not what she thought of doing. She was a practical Christian woman. Her death was a real loss as was evidenced by the mourning of those who had been helped. If all professing Christian women would use their needles as Dorcas did there would be much less of that profitless fancywork done. When this good woman fell sick and died, the disciples sent for Peter. This shows their growth in faith in the Divine power. Peter again imitated the example of Jesus in putting them all forth. At his command her soul came back to live in her body. This again caused the people to believe on the Lord.

In God's Purpose.

In no case does origin determine value. From the religious point of view, the dignity and worth of man lie in any case in God's purpose concerning him, and that purpose is not affected by the particular method of his working.—Henry Churchill King.

Much Difference.

There is as much difference between self-reliance and self-conceit as there is between the North and South poles—all the difference in the world.

See Capitan Telephone Co. For Phones and Rural Exchange Rates.

Scarlet Fever.

That grave danger of the spread of scarlet fever epidemic is imminent was indicated by the measures taken by Dr. Shafer, County Health Officer, when he made an inspection of Capitan Tuesday.

After visiting the home of Hart Hale just South of town the Doctor said that a second child of Mr. Hale was suffering from the disease. He immediately quarantined the premises and will not permit Mr. Hale nor any member of his household to be on the streets.

The local schools were closed Tuesday noon and all meetings or assemblies of any description were prohibited until further notice. This will serve to eliminate the commencement exercises of the High school which were to have taken place Friday night of this week and likewise stopped the preservation of the class play for Wednesday night. Church services are also prohibited.

Dr. Shafer is to be congratulated on the drastic methods taken to nip the epidemic in the bud, for news of such would seriously affect the prosperity of the town from a tourists stand point.

Superintendent Copeland of the local schools, who has been under quarantine for two weeks with the disease was released from the ban Sunday, Dr Shafer announcing that danger of spreading the disease from that case being past.

Card of Thanks.

We take this method of thanking our many friends who so willingly and ably assisted us during the sickness and death of our little daughter and granddaughter. We assure one and all that we are duly grateful.

WHEN BETTER AUTOMOBILES ARE BUILT, BUICK WILL BUILD THEM

No. 13 F-10-41A

Question: *Why do you find better workmanship in Buick motor cars?*

Answer: Buick's precision methods are possible because of Buick's great volume. It would be impossible to put such fine workmanship into Buick cars for their price if Buick built but a few thousand cars a year.

RAIN!!

A light shower of rain fell in this vicinity about 4 p. m. Wednesday which was a forerunner of one of the best general rains that has fallen in several years. About 9 p. m. a slow downpour of rain began which lasted throughout the night and had amounted to 1.10 inches at 8 o'clock Thursday morning. At noon Thursday the skies are overcast and rain has not slackened and the indications are that it will continue all day and possibly thoroughout the night.

The ranges and farms had reached the point where moisture was absolutely necessary for stock cattle and crops and predictions are rife concerning the possibilities of bumper crops for this year.

FORT STANTON

Dr. F. C Smith Assistant Surgeon General left here Saturday Morning.

Mr. Samuel Corky of New London, has purchased a Chevrolet Roadster with the intention of seeing the sights of New Mexico.

Dr. H. J. Warner, Dr. T. B. H. Anderson, Dr. Stewart, and Families, Miss McClure, Mr. Hendren, McCall, and Dr. Harrod, were a picnic party at Eagle Creek, Sunday.

The Fine Arts Club of Fort Stanton will put on a snappy revue consisting of one act plays interspersed with music and classical dancing on Thursday evening June 4th 1925, at the Amusement Hall in Fort Stanton. This is a second successful program given under the auspices of the Fine Arts Club and undoubtedly the best The play casts have worked faithfully for your entertainments, and you will be disappointed if you do not take advantage of their efforts, it will be well worth your time and money. The music will be furnished by the Fort Stanton Orchestra. Tickets will be on sale at the Sunshine Pharmacy in Capitan, the Smith Inn at Lincoln, and the Carrizozo Eating House.

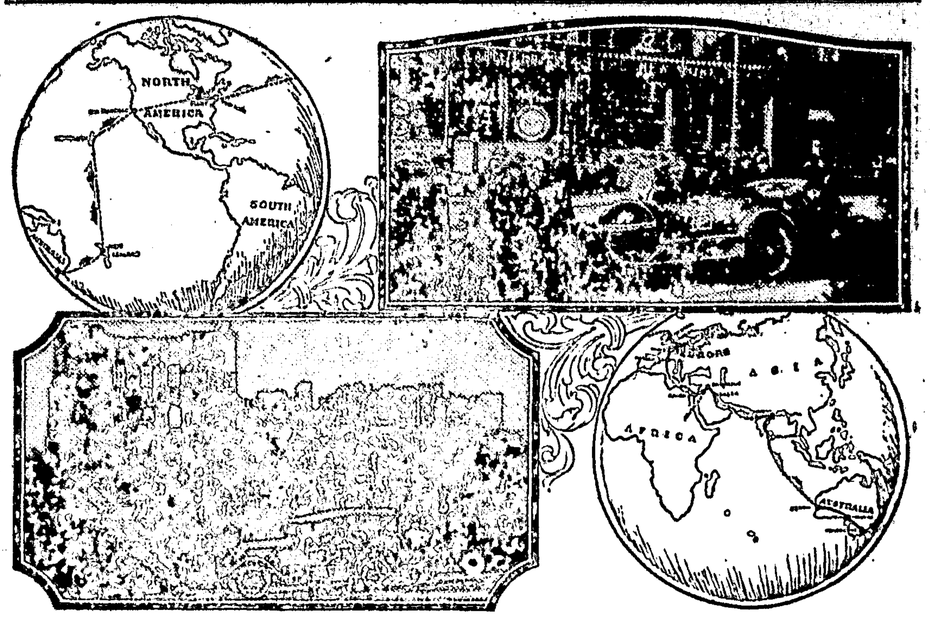
Buick Loops Globe in Record Run



The above illustration shows the route taken by the "round the world" Buick. The lower-left photograph shows Kenilworth Castle, Warwick, England, in the background; the photo at the upper right shows the globe circler in front of the Paris office of the New York Herald. The car is being driven by dealer representatives. It will have had 350 different drivers when it completes its world tour in New York.

A Buick car, which departed unheralded from New York City last December to be driven from one Buick dealer to another in a trip around the world, is nearing the end of its long journey

The car, a Standard Six Touring model, is strictly "on its own," being unaccompanied by mechanics or special drivers. When it returns to New York City the machine will have been handled by approximately 350 different drivers.

The last difficult leg of the trip has been completed, a long run over the quagmirable roads across the continent of Australia. The car is now enroute to New Zealand and Honolulu, from whence it will be shipped to San Francisco and driven across the United States through Detroit and Flint to New York.

The trip around the world was conceived to demonstrate that a Buick will travel to the remote corners of the earth and that on such a journey it is always safeguarded by service facilities.

The globe-encircling car has made its trip without faltering. Driven from dealer to dealer by dealers' representatives only, it has demonstrated Buick's ability to withstand the "man-handling" from hundreds of drivers of various nationalities and degrees of skill.

After coming from the regular assembly line in the factory at Flint, Mich., it was equipped with four spare tires and a shovel. Supplementary tanks on the running boards provide oil, gasoline and water for the long runs over deserts and other uninhabited regions.

After being boxed and sent to New York City it was shipped across the Atlantic to Liverpool, where the long journey started on December 21, 1924. The car was passed from dealer to dealer enroute to London.

It then was shipped from London to Amsterdam. With frequent changes of drivers, it passed south through Europe, visiting Brussels and Paris and finally reaching the Mediterranean at Marseilles, France.

On January 20, it was placed on a steamer bound for Port Said, Egypt. From there it was driven south to Cairo. Then the route swung east of Suez," where the real test began. Through Palestine and the biblical country the car proceeded to Beirut. On February 5, it left there for Damascus and Bagdad, accompanying one of the desert convoys of the Nairn Transport Company, which incidentally uses Buicks in its desert fleet.

The Syrian desert was crossed without difficulty. The Buick distributor in Beirut, however, gives some idea of the country traversed, in the following letter excerpt.

"The road was terrible in places, being nothing more than a cart track strewn with large boulders. In the run over the Lebanon Mountains the car climbed to a height of more than a mile. After spending the night at Damascus, the 540-mile run to Bagdad was made at an average speed of 35 miles an hour."

The Mesopotamian distributors took the Buick at Bagdad and drove it to Basra on the Persian gulf, from whence it was sent to Bombay, India. From there it was driven over indifferent trail-roads across India to Agra, and finally Calcutta.

It then went to Ceylon, where the Buick distributors drove it for three days before sending it to Perth, on the southwest coast of Australia, where it arrived April 1. The desert waste of southern Australia between Perth and Adelaide was regarded as the most difficult part of the trip. The distance is something more than halfway across the United States. This long stretch of bad going was negotiated successfully, as was the shorter journey from Adelaide to Melbourne, near the southeast end of the continent. The car since was driven to Albury and then to Sydney, from which point it was shipped to New Zealand.

After completion of the globe journey it is planned to preserve the car as an object of historical interest.

EXPERIENCE OF NERVOUS WOMAN

Weak, Blue, Discouraged—Relieved by Taking Lydia E. Pinkham's Medicine

Cincinnati, Ohio. — "I was nervous and could not sleep, had crying spells and the blues, and didn't care if I lived or died. My right side was very bad and I had backache and a weakness. I read about your medicines in the papers and wrote for further information. I took Lydia E. Pinkham's Vegetable Compound, Blood Medicine and Liver Pills, and used Lydia E. Pinkham's Sanitive Wash. I have had good results in every way and am able to do my work again and can eat anything that comes along. My friends tell me how well I am looking."—Mrs. F. K. CORIELL, 129 Peete Street, Cincinnati, Ohio.

Willing to Answer Letters

Philadelphia, Pa.—"I have used your medicines for nervousness and a run-down system with a severe weakness. After taking Lydia E. Pinkham's Vegetable Compound and using Lydia E. Pinkham's Sanitive Wash I feel like a different woman and have gained in every way. I am willing to answer letters asking about the medicines."—DORA HOLT, 2649 S. 11th St., Philadelphia, Pa.

Must Have Been a Very Sad Separation

"All aboard!" shouted the conductor.

The young couple who had been standing a little apart started.

"I'll sure be lonesome here without you!" he observed.

"And I'll miss you, too!" she told him. "This has been the best vacation I ever had, and all because I met you yesterday."

"But just think of all the days we might have been together!" he wailed.

"All aboard!" the conductor insisted.

"Oh, dear! I've got to go!" she exclaimed on the verge of tears.

He kissed her goodby, quite ignoring the persons who looked on with mild amusement.

"You'll write?" she called from the platform.

"Every day!" he promised as the train began to move.

And then he suddenly dashed after the train.

"Wait a minute!" he yelled despairingly. "What did you say your name was?"—Kansas City Times.

Why That Bad Back?

Is backache keeping you upset? Feel all tired out, so nervous and dispirited you can hardly keep going? Then look to your kidneys! Your kidneys rid the body of poisonous waste. But if they lag, impurities accumulate and poison the whole system. Then one is apt to suffer backache, stabbing pains, headaches, dizziness and other annoying kidney irregularities. If your kidneys are sluggish help them with a diuretic. Use *Doan's Pills*. They are praised the world over. *Ask your neighbor!*

A Colorado Case

Mrs. Ellen Owens, 330 E. Ninth St., Durango, Colorado, says: "My kidneys became weak due to hard work. My back was so painful I could hardly do my housework. When I bent over it seemed as if I could not straighten up quickly. I became dizzy. After using Doan's Pills I was cured. I have never had kidney trouble since."

DOAN'S PILLS 60c

STIMULANT DIURETIC TO THE KIDNEYS

Foster-Milburn Co., Mfg. Chem., Buffalo, N. Y.

For Arctic Animals

The French minister of colonies has set aside, by executive decree a number of islands owned by France in the Antarctic region as game sanctuaries for polar bears, walrus, sea lions and other animals. The protected area includes the islands of Crozet, St. Paul and Amsterdam, Adelia Land and the Antarctic coast between Dalgt de Sainte Anne and Port aux Lapins.

Outcasts Combine

Social outcasts of Tokyo have formed an organization which will work for laws abolishing class distinction in Japan.

GET FEELING WELL AGAIN

From Mother Nature's storehouse we have gathered the roots, barks and herbs which are compounded, under the famous Tanlac formula, to make Tanlac. This great tonic and builder has brought health and strength to millions.

If your body is weak and undernourished, if you can't sleep or eat, have stomach trouble or burning rheumatism, just see how quickly Tanlac can help you back to health and strength.

Most people notice a big change for the better after the very first bottle. They have better appetites and more pep. The sparkle comes back to their dull eyes and color to their faded cheeks.

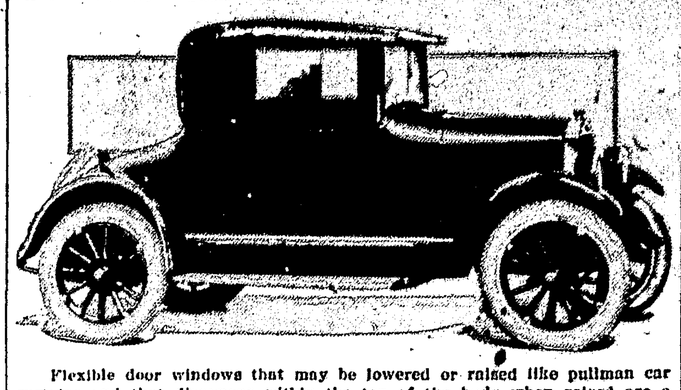
Don't delay taking Tanlac another precious day. Stop at your druggist's now and get a bottle of this, the greatest of all tonics.

Take Tanlac Vegetable Pills for Constipation

TANLAC FOR YOUR HEALTH

KEEP EYES WELL! Dr. Thompson's Eye Water

STRIKING FEATURES OF NEW STAR COUPSTER



Flexible door windows that may be lowered or raised like pullman car curtains and that disappear within the top of the body when raised are a striking feature of the new Star coupster.

In reality the coupster is a convertible car, affording all the comforts of closed car transportation, yet convertible into an open car by the simple expedient of raising two disappearing windows—a five-second operation. For all practical purposes it is two cars in one.

EFFICIENCY AND SAFETY OF CARS

Numerous Devices Add to Comfort and Satisfaction of Owner.

It is difficult to believe that the oil pressure gauges and the ampere-meters which now appear on the instrument boards of virtually all makes of cars were once regarded by many as unnecessary frills. Today there are a number of accessories being offered which are similarly regarded, which is the same as saying that they would be appreciated if only their advantages were better known.

By equipping a car with some of these fitments, greater satisfaction, efficiency and safety will result. Add front and rear bumpers to the car, attach one of the many rear signaling devices, keep a set of anti skid chains handy and the car will be enormously benefited in proportion to the cost of the protection. Frequently such safety devices add to the car's appearance and thus not only help protect the owner's original investment, but add to it. A spotlight attached to the windshield and played upon the road may prevent wrecking the car in a ditch.

Take efficiency as another instance. A car that is operated without proper regulation of the cooling system is at all times running inefficiently. This is especially true in winter when the engine is constantly operated at the wrong temperature, either boiling over because the radiator is covered with the lap robe or running cold because there is no covering at all. The market now offers several radiator covers with openings which can be operated from the dash.

Along the efficiency line are other devices which are destined to filter the gasoline before it is admitted to the carburetor thus preventing the entrance of dirty or watered gasoline to the carburetor or engine. A device of this character may pay for itself within a month after it is installed.

Then there are shock absorbers, which in addition to giving greater riding comfort, save the springs from breakage on the rebound and thus increase the usefulness of the car by preventing breakdowns. Even cut outs which were at one time regarded as toys for the speed maniacs are now shown to have a very important use.

Regardless of the selling points of each accessory or all of them as a group, it is a fact that any one of them adds to the second hand value of a car. So the motorist not only has the use of the accessories with which he equips his car and the savings on insurance, inconvenience, repair bills, etc., but he gets a return premium when he goes to sell the car.

Good Advice Is to Give Machine the Once-Over

There's economy, also satisfaction in giving your car the once-over in the spring, then if it needs replacements or anything else to bring it back to perfect form, have it done as quickly as possible.

Naturally the toll of a year's driving is most severe, and generally there is a reminder or two. Right here the old stitch in time principle works out. When the car is restored to its best shape, almost as good as the day it was bought, riding in it is far more enjoyable, also it will bring a much better price if you care to sell or expect to trade it in on a new car.

Letting your motor car run down is false economy. Eventually it costs you more, and in the interim you are not happiest when riding along the highways.

Even little things which you may think are of no special consequence develop into big items in repair bills if allowed to run on without interruption.

Windshield Rattle

When the windshield glass becomes loose in its frame, it causes an annoying rattle. It is very difficult to close the frame so that it will grip the glass more securely without the possibility of breaking the latter. If the glass is not too loose the rattle can be eliminated by filling the space in the frame with shellac. This can be applied with a sharp pointed stick or a brush and should be applied slowly so that it will pack tightly in the opening.

WATER INJURY TO TIRES IS SMALL

Running Through Stream Is Not Injurious.

Now and then in the course of an automobile trip a car has to pass through a stream, and the question is sometimes discussed whether the action of the water is harmful to the tires. The same question arises when the car is out in a heavy rain.

Such a wetting is practically nothing at all, either for damage or improvement. At any rate, the effect on the tire is not harmful. Two chief constituents of a tire are rubber and cotton, both vegetable substances, and as a rule water does not injure vegetable matter. As illustrative of this point, there is the old but true story of the farmer who, when one of his rubber boots fell into a well, placed the other on a shelf in a closet. Twelve years later when the well was cleaned the lost boot was found to be in excellent condition, but the boot on the shelf had fallen into ruin.

If running through a brook resulted a cooling a tire the effect would be decidedly beneficial, but a quick dash through the water has little effect on the heated air within the tire and consequently the temperature change in the tire after its bath is negligible.

Water itself apparently does no harm to tires, but the combination of air and moisture commonly known as humidity is very destructive, especially on the cotton in ordinary fabric tires. The moist air works in between the layers of the fabric and rots them out, sometimes even before the tires leave the dealer's storeroom. Cord tires stand humidity better.

The harmful effect of moist air is the chief reason why, when tires are stored, they should be kept in a dry atmosphere. As sunlight is also harmful, the storage place should be darkened.

Shabby Tires Are Not Favored for Any Car

Shabby tires on a good-looking car! Yet stand on any street corner today and count the number of patched-up, dilapidated tires which are being used to the last mile. The cost of keeping these tires running for a few thousand miles would nearly pay for new ones. Mileage such as this comes high.

Tire conservation does not mean picking up a decrepit tire and putting it back into service at a big repair cost just to save a little rubber left in the tread. It means taking care of the tire from the first so that it will be able to deliver all the mileage built into it by the maker. When tires are so far worn that they are soon to blow, it is poor economy to repair them. Such a course means sacrifice of the inner tube as well.

Cheap, makeshift patches, boots and temporary repairs of all kinds are now being called into use as never before, but patching up an old casing in which separation of fabric plies has already begun, cannot give the freedom from tire trouble on which the pleasure in motoring so largely depends.

Tying in Spring Leaves Will Prevent Spreading

Since the leaves in a spring have a tendency to spread apart, it is often hard to replace the spring tie-bolt in autos or trucks.

The easy way is to grip the head of the tie-bolt in a vise, and put all but the last four leaves one on top of the other. The last four leaves are put on crosswise, or spread around like the ribs of an umbrella, which allows the nut to be easily started on the bolt.

With the nut on the bolt, swing the bottom cross leaf into place. Then each succeeding leaf will slide easily into position. Then tighten the tie-bolt nut. Of course, the clamps on each end will have to be removed until the spring is assembled.

Anything These Days

Running downhill recently a driver found to his utter surprise that a motor truck, supposedly at rest in the downhill position on the right side of the road, was actually going uphill backwards. The driver could not get it through his head for a moment and nearly lost control of his machine trying to dope it out, which showed that he was not prepared to expect most anything nowadays. The truck driver was utilizing the lower gear ratio of reverse in order to enable the engine to pull up an extra heavy load.

Automobile Suggestions

License tags must not be obscured by bumpers, extra tires, etc., and must be kept free from grease, oil and dirt so that they are legible at all times.

* * *

English authorities keep automobile thefts at a minimum by a system of records which show the original and all subsequent owners of any one car. A finger-print record is also kept.

One editor has ascertained that there are three automobiles to every bathtub in the United States. Why not? There are seven days a week for the use of automobiles.

* * *

A lock should be provided for the gasoline tank. It is very easy for a thief to help himself to the fuel with the use of a small rubber tube inserted through the filler opening.

After Every Meal

Pass it around after every meal. Give the family the benefit of its aid to digestion. Cleans teeth too. Keep it always in the house.

SUCCESSFUL SHEEP RAISING ON FARMS

(By H. M. RINEHART, Knoxville, Ill.)

The successful raising of sheep on a farm depends a great deal upon the lambs produced by the flock. In fact, the meat side of the industry bears a direct relation to the profits of the flock.

The three essentials in the production of desirable lambs are: Good breeding, proper feeding and castrating and docking. The latter concerns us most and is also the most important since desirable and profitable lambs cannot be produced without castrating and docking them. The influences at work to educate the American people to eat more lamb and mutton cannot succeed if lambs are not properly bred, fed and castrated, and as these products must sell in competition with beef and pork, it is essential that the quality is at least as good as that of the others. No one thinks of marketing bull calves and boar pigs, and yet this is just what is being done in the case of lambs. The castrating and docking of lambs is essential if the farm flock is to produce a real profit and the veterinarian is in a position to help bring about the needed change.

It is estimated that 80 per cent of native lambs arrive at the markets entire and undocked and the shipments are often branded as "a trashing bunch of natives" by the buyers. Lambs which are undocked, uncastrated, uneven in size, weight, quality and condition, coming from the farming states, sell from $2 to $4 less per hundred weight than lambs properly docked, castrated and graded. In short, if the westerner did not find it profitable, castrating and docking would not be so universally practiced in the western states, where sheep raising is a vast industry. The benefits derived from the early castration of lambs are: More weight per age; no pregnancies from cohabitation of the sexes, greater docility, improved body development and quality of meat.

The castration of lambs is not a dangerous operation if properly done. Lambs should be castrated at about the age of fifteen days, provided the weather conditions are good. Damp, chilly days are very unfavorable for such operations.

It is essential to sort out the males before the work begins in order that they may be caught with the minimum of excitement. A clean, dust-free place should be provided, and there should be clean quarters provided for them to run in after the operation. Clean hands and knife are essential and scalpel, which is the best knife for the purpose, must be sharp. To avoid catching them the second time, docking should be done at the same time. Docking improves the appearance of lambs, prevents filth from accumulating on the tails and removes a useless appendage. And besides, feeders are more likely to buy docked lambs than undocked ones.

The veterinarian can make himself useful by advising farmers who raise lambs, along these lines, and can reap the benefits in the confidence good advice always brings a practitioner when it serves such a useful purpose.

Cost of Producing Hogs on Farms in Corn Belt

Studies of costs in producing hogs are being made by the bureau of agricultural economics on some 150 farms in the corn belt. These studies include the management of swine herds and the feed and labor requirements on hogs that are handled under the different methods of pork production practiced in the belt.

Acreages of two crops—alfalfa and sugar beets—are increasing rapidly in Pennington county, Minn., according to reports to the United States Department of Agriculture. Farmers of the county are endeavoring to establish a cropping system which will provide for more than one source of income and for maintaining good soil conditions. Only a few acres of alfalfa were well established in the county in 1919. At this time the county agricultural extension agent arranged with one or two farmers in each community to plant demonstration plots of this legume so that farmers in all parts of the county would have an opportunity to see how the crop is grown and what results might be expected from it. So successful were these demonstrations that over 2,000 acres were planted in the next two seasons, and by last year the total acreage approximated 10,000 acres. The sugar-beet crop reached 800 acres by 1924 and the farmers who have watched the progress of the crop say it has demonstrated its value for growing in their county.

Take Care of Ewes

When the lambs are to come while the weather is cold, the ewes should have access to a yard on the sunny, sheltered side of the barn where they will not be disturbed by other animals. When the weather is pleasant, one should continue to induce them to take a good deal of exercise, but when a ewe is about ready to lamb, she should not be allowed to wander far from shelter, for a lamb dropped outside is almost certain to chill to death.

Yard for Ewes and Lambs

After the ewe and her lamb or lambs have been kept together three or four days, they will be so well acquainted that the lambs will not easily become lost and several ewes may then be turned together in a larger inclosure. Keeping them in the individual pen for the first few days makes it much easier to see that each ewe is properly feeding her lamb. Also special care can be given to any ewe without disturbing the others.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

Severe Headache and Constipation Relieved Over Night

"After a serious illness I became very constipated and suffered from awful headaches. One day I bought a box of Beecham's and found that if I took them on going to bed I would feel fine in the morning. I never have a headache now.

"I am 53 years old and have taken Beecham's Pills for 25 years."—Mrs. W. C. Staub, Bethlehem, Pa.

Robin Made Good Job of Plastering Nest

A family of bird lovers watched a robin building its nest, the News of Indianapolis reports. After it was practically completed the robin flew over to the bird bath and got himself thoroughly wet.

"Probably taking a bath after his arduous labors are over," said the family. Once out of the bird bath the robin flew to the flower garden, where the top soil was dusty and made himself thoroughly muddy. Then it plumped its mud-covered self down into the nest and turned round several times, evidently finishing the shaping of the nest and cementing the inner surface with the mud. The nest was as smooth as though it had been done by hand.

Now the bird lovers are wondering whether the robins figured out the process or after a bath went about the process of shaping the nest by getting inside and turning round and round.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.

Rapid Word Sending

A new high-speed sending and receiving system for wireless apparatus has been perfected in France by which 6,000 to 8,000 words can be sent an hour. The apparatus is a modification of the Baudot machine. It is operated with five keys which, in different combinations, represent letters. At the receiving end the apparatus prints in plain language.

Cuticura Soothes Baby Rashes

That itch and burn, by hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each.—Advertisement.

One Thing He's Sure Of

A writer says one thing about heaven he is certain of is that there are no alarm clocks there. "There is no alarm clock in my home, either," observes J. Fuller Gloom, "but it isn't heaven."

One thing that keeps America free of revolution is the fact that one exciting sport season blends into another.—Vancouver Sun.

COLORADO'S CROPS SHOW $27,051,750 INCREASE IN YEAR

Denver.—C. R. Stedman, chairman of the committee on statistics of the Real Estate Exchange, at the luncheon of the exchange, discussed development of agriculture in Colorado in his blackboard statistics. He used the figures for 1923, as they are complete, while those for 1924 have not yet been assembled. The value of all Colorado crops in 1923 was $130,022,070, a gain of $27,051,750 over 1922, and the gain was 517,483 in acres, he said.

"In analyzing these official returns," said Mr. Stedman, "we find that there were grown 12,720,000 bushels of winter and 5,280,000 bushels of spring wheat on 1,390,000 acres, which was an average yield of 12.9 bushels per acre over the whole state and which sold for an average of $10.80 per acre.

"Weld county showed 52,370, which was the largest acreage of irrigated lands; Boulder county, 19,597; Prowers, 17,014; Adams, 16,751; Larimer, 14,602, and Montrose, 11,849 acres each.

"Washington county leads with 217,631 acres of nonirrigated wheat; Logan, 163,173; Kit Carson, 142,893; Yuma, 129,325, and Phillips, 101,550 acres.

"For many years Colorado was not considered a good corn state, but the crop of 37,250,000 bushels in 1923, a gain of 18,930,000 bushels over the previous year, and an increased acreage of 345,000 acres, shows that our farmers are finding it to be a good crop for them to raise. Indeed, the year 1924 they increased that acreage about 60,000 acres, which returned a value of over $10,000,000 over 1923.

"In the corn crop Kit Carson county showed the greatest increase in acreage from 67,030 in 1920 to 109,190 last year; Washington county from 85,933 to 123,648, and Yuma, 127,997 to 154,123. The eastern part of Colorado showed the greatest planting area and the extreme northeastern section in particular.

"One of the great crops of Colorado is the sugar beet, which has given the state the title, 'the Sugar Bowl of America,' because of the output of our sixteen sugar factories, which produced nearly 5,000,000 hundred-pound sacks of sugar in 1923 from the 165,000 acres planted, and which brought to the farmers over $15,000,000. In this crop Weld county took the lead with 45,805 acres, Morgan, Logan and Larimer following. This crop was increased in 1924 by about $5,000,000 to $7,000,000 to the farmers.

"The excellent flavor of our fruit makes it the favorite in the East and this crop showed an increase of $1,045,000 in value for the 1924 crop over 1923, Delta county taking the lead, with Montrose, Fremont and Garfield following.

"Potatoes is another very valuable crop because of their superior quality, and this brought the farmers $9,463,499. Weld county led with a crop valued at $2,103,200, followed by Rio Grande with $1,461,600.

"In the hay crop Weld county led, the crop selling for $2,647,000, and Prowers, Larimer, Logan, Mesa and Jackson following with over $1,000,000 each. In 1924 the acreage was increased about 12,000 acres, which brought the farmers about $720,000 more than in 1923.

"Our hay crop is another very important and valuable crop because of our great live stock interests. This sold for $25,015,000. There were 1,203,000 acres devoted to raising this crop, 780,000 of which was alfalfa.

Red Propaganda Menaces Country

Omaha, Neb.—Reading a recent communication from Minneapolis telling of "red" meetings in that city and propaganda therein against the military service and kindred organizations, Maj. Gen. George H. Duncan, commander of the Seventh Army corps area, declared in an address here that "our country is in danger from the teaching of false doctrines to our young men." "Reds" of military age, General Duncan said, are urged to get into the service and spread their doctrines among the men with whom they serve.
