CONDENSED RECORD OF THE PROGRESS OF EVENTS AT HOME AND ABROAD

WORLD PARAGRAPHS IN BRIEF

SAYINGS, DOINGS, ACHIEVEMENTS, SUFFERINGS, HOPES AND FEARS OF MANKIND

WESTERN

The district attorney's office in Los Angeles announced that Dr. Thomas W. Young, a dentist, had confessed that he killed his wife, Mrs. Grace Young, a wealthy society matron who has been missing since February.

Bathed and clad in clean clothes, refreshed with sleep and food, Robert Hill, imprisoned for fifty-seven hours in the Black Hole of the Baltic mine tunnel near Grass Valley, Calif., was the center of a family reunion at his home the day after the rescue.

The election of Miss Gertrude Vaile of Denver as president, and the announced recommendation of the time and place committee that Cleveland be selected as the meeting place for 1926, were the outstanding developments during the day at the National Conference of Social Work, held in Denver.

From the standpoint of engineering the forty-on-mile Wendover cutoff stretch of the Victory highway is unique in the history of road building, Secretary of Agriculture William M. Jardine declared in an address at Wendover, Utah. He was the principal speaker at the celebration of the official opening of the new highway across the mud flats and salt beds of the Great Salt Lake desert.

Frederick Ray Martin of New York, commencement day speaker at Rhode Island State College at Kingston, R. I., took for his topic, "Our Mania for Legislation," saying in reference to the complaint of a few years ago, that business was being strangled by law making. "Today the plaint is broader, that private rights, individual habits, even thoughts, are being hampered by legislative enactments."

One fireman was killed and three injured in two spectacular fires in separated districts of San Francisco. The largest fire burned away three of the principal packing houses in the Islais Creek section and thousands of cattle ready for slaughter were sent roaming through the streets when they were freed from their pens by firemen. The Islais Creek fire did damage estimated in early reports at $1,000,000.

President Coolidge still is hopeful that the Colorado river compact will be ratified by all states affected. He believes that objections which have arisen in Arizona will be overcome. With regard to waterways generally, Mr. Coolidge is of the opinion that the government should not go into the business of generating power, but that flood control is properly a function to be met by public funds. In carrying out flood protection, development of power may often be a minor factor.

WASHINGTON

While President Coolidge will be kept in constant touch with government affairs during his summer stay at Swampscott, Mass., arrangements are being made to afford him as much relaxation and freedom from the cares of office as possible.

Express companies are justified in maintaining charges for the shipment of bodies which are double the usual passenger rates, the Interstate Commerce Commission held recently in dismissing a complaint brought by undertaking associations.

Great Britain recently paid the United States $62,310,000 on her $4,600,000,000 war debt, according to a treasury announcement.

An apparatus by which persons may see moving objects miles away by radio was successfully demonstrated at a private test in Washington of an invention by C. Francis Jenkins, Washington scientist.

A new commander-in-chief of the United States fleet, to succeed Admiral Coontz upon completion of the Australian cruise this summer, has been selected by the Navy Department, and announcement of the appointment is expected soon. Admiral Coontz will then round out two years' service as commander-in-chief, and will be assigned to other duty.

The administration will support the government in Mexico "only so long as it protects American lives and American rights and complies with its international engagements and obligations," Secretary Kellogg declared a few days ago in a formal statement. "Our relations with the government (of Mexico) are friendly, but nevertheless, conditions are not entirely satisfactory," the secretary's statement said.

Washington has been selected for the 1925 national convention of the Ku Klux Klan, it was learned a few days ago. The time for the meeting has not been announced but it is understood to be the wish of Imperial Wizard Evans to hold the "klonvocation" here.

Secretary Kellogg's statement concerning conditions in Mexico has drawn an equally plain-worded reply from President Calles, who regards as an insult the implication that Mexico is on trial before the world in the guise of a defendant.

FOREIGN

A dispatch to the New York Evening Post from Hongkong said that more than 700 Yunnanese were slaughtered at Canton by the victorious Cantonese army which captured that city last week.

Persia withdrew from the arms conference being held in Geneva because of the conference's decision that Persian ships in the Gulf of Persia could be searched if suspected of engaging in forbidden arms traffic.

Sydney, Nova Scotia, police assisted by special constables recruited from the United Mine Workers of America, frustrated an attempt to loot a warehouse of the British Empire Steel Corporation at Glace bay.

The Italian senate approved measures converting into laws the decrees approving the treaties of Versailles, Trianon and Neuilly. The senate also approved bills reorganizing the naval command and then adjourned sine die.

President Calles, in a statement issued in Mexico City, said that Mexico would not modify her agrarian policies. The statement was issued to deny reports that Mexico intended to change these policies because of the recent statement of Secretary of State Kellogg.

The British consul at Swatow, a port to the northeast of Canton, telegraphed to the British authorities in Shanghai that a general strike had commenced at Swatow and naval protection was required. The British sloop Blue Bell was ordered to proceed from Hongkong to Swatow.

All but one member of the Greek cabinet which resigned last week have been reappointed in a new ministry formed under the presidency of Andrew Michalacopoulos, who also retains the portfolio of foreign affairs, it was reported in a dispatch received in Washington by the Hellenic information bureau.

"If the government of Mexico, as affirmed, is now on trial before the world," President Calles of Mexico says, "such is the case with the government of the United States, as well as those of other countries, but if it is to be understood that Mexico is on trial in the guise of a defendant, my government absolutely rejects with energy such imputation, which in essence would only mean an insult."

GENERAL

Mrs. Edith Nourse Rogers, widow of John Jacob Rogers, was overwhelmingly nominated to succeed him in Congress at a special primary election held in Lowell, Mass.

Warren S. Stone, president of the Brotherhood of Locomotive Engineers and one of the leading labor leaders and labor financiers of the country, died in a hospital in Cleveland, Ohio, last week.

Stringent measures to prevent introduction of spread of plant pests or diseases in Western states are advocated in resolutions passed by the Western plant quarantine board at the closing session in Boise, Idaho, of that body's seventh annual convention.

Arizona has given American scholars the year's best cross-word puzzle in Latin, dating back ostensibly to the eighth century and inscribed on mysterious lead swords, spearheads and crosses. The puzzle has been referred by the University of Arizona to Prof. Charles H. Beeson, scholar of the classics at the University of Chicago, who is versed equally in secret codes and in the broken lore of Roman Carthage.

Thirty-six persons were killed and approximately seventy injured, several of them perhaps fatally, when a special five-car train on the Delaware, Lackawanna & Western railroad, speeding from Chicago to Hoboken, was derailed at Rockport, three miles from Hackettstown, N. J. The victims were on their way to New York to sail Tuesday afternoon on the Republic of the United States lines, for Bremen, Germany.

Garber and Osterdock, Clayton county, Ia., towns, were flooded as a result of the overflowing of Turkey river after a heavy rain.

Scott S. Goodnight, dean of the University of Wisconsin, announced in Madison, Wis., that a sophomore in the School of Commerce has admitted the theft of the examination questions which were stolen from Bascom hall and sold to students at $5 and $10 a set. The identity of the student is being withheld. According to the dean, the youth confessed with a show of bravado, and boasted that he had made $80 out of his venture.

One of the most bitter legal battles in Nebraska's history is being fought in Lincoln over the conviction of Walter R. Simmons, former Montana cowboy deputy sheriff, who is under a death sentence for his alleged murder of Frank Pahl, Spencer, Neb., garage man, in May, 1923. After having lost an appeal from his conviction to the Nebraska Supreme Court, Simmons, through his attorneys, has received twenty reprieves from his sentence. The last one came a few days ago when Governor Adam McMullen granted an extension of the date of the execution until July 6.

Dallas Hubbard, the University of Michigan's sensational negro athlete, finally achieved his aim to crack all standing marks for the running broad jump before he left college. In his final collegiate appearance in the national intercollegiate track and field games on Stagg field, Chicago, he set a new world's mark when he leaped 25 feet 10½ inches.

A vast army of Rotarians—officially estimated at 12,000—from the "four corners of the earth," stormed Cleveland to attend the sixteenth annual convention of Rotary International.

NEW MEXICO STATE ITEMS

A petition is being circulated in Albuquerque for the recall of Mayor Clyde Tingley.

Troop F, 111th cavalry, Silver City, stood first in both mounted and dismounted drill in the National Guard inspection recently made by Capt. John O. Lawrence.

The annual fair in Tucumcari which was to have been held this fall, has been abandoned. It is believed that the recent poor crops would cut the exhibition to such an extent that it would not be worth while.

First Lieut. R. C. Charlton, Roswell, has been promoted to captain and placed in command of Battery A, 158th field artillery. Adjt. Gen. Vincent J. Jaeger announced last week. He succeeds Capt. Harry P. Schram.

The Woman's Improvement Association of Las Cruces has installed a lighting system at the municipal pool so that it can be used at night during the summer months. The pool is one of the finest in the state and one of the attractions of the city for both children and adults.

James M. Johnson of Gage, is probably the oldest homesteader in the state. In spite of the fact that Mr. Johnson has just passed the 85-year mark he proved up on a homestead last week and intends to work the place during the rest of his life. He is a pioneer of the Gage district.

County school superintendents now in office are to be paid in accordance with the 1923 salary law and not the act passed by the 1925 Legislature, fixing the salary according to the number of school rooms in the county, says Attorney General John W. Armstrong in an opinion to Chief Tax Commissioner J. E. Owens.

The Socorro State Bank, the only bank in Socorro, closed last week, according to State Bank Examiner H. P. Saunders. The bank had a capital of $60,000. On April 6, when it made its last report to the bank examiner, it had $187,778.95 demand deposits, and $154,050.11 time deposits. The officers were E. G. Hills, president; Powell Stackhouse, vice president; G. E. Cook, vice president; S. M. Long, cashier.

The seven-mill levy on the assessed valuation of sheep in the state will be reduced to five mills on Jan. 1, it was announced by the sheep sanitary board in Albuquerque, following the selection of a new secretary. Joseph DeGraffenreid of Fort Sumner was elected over John Robertson, present secretary, by a vote of 3 to 2. The reduction in the sheep levy is due to the bank balance of $8,403, which the board has on hand and due to the increased assessed valuation of sheep in the state. The board refused to recognize a score of applicants for jobs as sheep inspectors, retaining all present inspectors.

Business conditions are improving throughout the state, declared Arthur Seligman, president of the First National Bank of Santa Fe, and head of the Seligman Brothers Company, in discussing the financial outlook. Cotton has advanced to be one of the big crops for New Mexico, Mr. Seligman pointed out, declaring that it should be worth $15,000,000 this year, much to the gratification of cotton growers and others in the Pecos and Mimbres valleys. This is estimated to be double the value of the wool produced in New Mexico, long listed as an important asset in this state. The wool growers are also happy for the price of wool has been high and the lamb crop is reported excellent. There is good grass, according to reports, all the way north from Santa Fe and Lamy; Taos and Rio Arriba counties are green.

The Industrial Employment Survey report issued from the U. S. Employment Service of the U. S. Department of Labor at Denver states that industrial employment conditions in New Mexico are on an upward trend, particularly in building, agriculture and highway construction. Resident labor is well employed and the surplus of transient unskilled workers less this season than usual. Agriculture is absorbing to a considerable extent the existing slight surplus of workers, especially on the cultivation of cotton. Industrial plants are all operating; labor in connection ample. Building is increasingly active affording employment to the majority of resident tradesmen. General construction for this season includes a $211,000 telephone construction program. Normal conditions prevail at the metal mines in the southwestern section of the state; coal mines have decreased operations, usual at this season. Extensive lumbering operations continue in the Bernalillo district, at the saw mills in particular. Increased operations of one month ago at the railway shops continue.

Owing to the depleted condition of the city water reservoir due to the long rainless period, officials of Raton have reduced the hours for irrigation. For the rest of the summer, or until it rains in the hills, only two hours in the morning and evening will be allowed.

Due to the long drouth and poor crops in the vicinity of Tucumcari, the building of a cotton gin this spring has been abandoned. Very little cotton has been planted and the stand is in poor condition due to the lack of moisture.

AMUNDSEN RETURNS FROM ARCTIC REGION

ROALD AMUNDSEN EXPEDITION HALTED BY FUEL SHORTAGE; PLANES ABANDONED

FAILED TO DISCOVER POLE

EXPLORER ARRIVES IN SPITZBERGEN SAFELY AFTER REACHING POINT 100 MILES FROM POLE

Stockholm.—A dispatch received here from Oslo, Norway, says the two airplanes in which Roald Amundsen's expedition set out for the North pole on May 21 have arrived in Spitzbergen.

The dispatch indicated the members of the expedition are safe and that it is likely a new attempt to reach the pole will be made shortly.

The dispatch received here says Amundsen used so much fuel that he was unable to continue and after descending in latitude 87.10, was forced to return.

Latitude 87.10, where the Stockholm dispatch says Amundsen came down, because of a shortage in his supply of gasoline, is only about 200 miles from the North pole and about 600 miles from Kings bay, Spitzbergen, where the expedition took off for the flight.

If Amundsen's planes have been damaged by the ice, there still are two other planes in Spitzbergen which he and his party can use in another endeavor to fly to the North pole and back. These two planes, belonging to the Norwegian government expedition sent to the north to try to locate the missing North pole expedition, arrived at Kings bay Wednesday from Norway. They were transported from Norton on board the steamer Ingertre and were put in the water at Advent bay, from which place they flew over the glaciers to Kings bay. The planes are in charge of Lieut. Lutzow Holm, Harold Styhr and Bernt Balchen and four mechanics.

Oslo.—The entire Roald Amundsen north pole expedition arrived safely in Spitzenbergen in one plane. The party did not return to King's bay by plane, but was picked up by a fishing boat and conveyed there. It is reported that the expedition reached north latitude 88 degrees 30 minutes, or about 100 miles from the north pole.

The Amundsen-Ellsworth airplane expedition of two machines hopped off from Kings bay, Spitzbergen, for its attempted flight to the north pole on May 21

The venture was one at which the world held its breath, for the plunge out over the arctic wastes was everywhere counted one of extreme hazard, but those who knew from experience conditions in the north and were well acquainted with Amundsen's ability to cope with them were almost to a man confident that he would return safely.

With Amundsen, as observer in the second airplane, was Lincoln Ellsworth, aviator, engineer, athlete and explorer into many of the out-of-way parts of the western hemisphere. Amundsen and he were the navigators of the expedition, charged with the responsibility of heading it aright on its journey and co-ordinating its activities. In addition, the expedition carried four men, two in each of the planes.

Amundsen has a long, brilliant record as explorer of both the northern and southern polar regions. He was the first man to reach the south pole, at which he planted the Norwegian flag on Dec. 14, 1911, beating the late Capt. R. F. Scott, the British explorer, by thirty-four days in achieving the discovery.

Senator Robert La Follette Dead

Washington.—Death has brought to an end the daring and stormy political career of Robert M. La Follette of Wisconsin. Peacefully the Wisconsin senator, last year an independent candidate for President, passed away at his home here, a victim of heart attacks, from which he had been a sufferer for a decade, bronchitis and bronchial asthma. To the last, Mr. La Follette sought to ward off death's thrust, as he had done on several occasions in recent years, but when he realized that the fight was a losing one he called his son, Robert, to his bedside, and in an almost inaudible voice gave this last message to the public: "I am at peace with all the world, but there is a lot of work I could still do. I don't know how the people will feel toward me, but I shall take to the grave my love for them which has sustained me through life." The body was taken to the senator's home at Madison for burial.

Communists Called Traitors

Paris.—Premier Painleve called radical members of the French Chamber of Deputies "correspondents and counsellors" of Abd-el-Krim during a parliamentary outburst against the war in Morocco. Painleve declared he would speak soon and with definite information regarding the situation in Morocco. The Communists were charged by M. Painleve with informing and advising the Riffian chieftain, and he promised to present shortly a bill of particulars against them.

"Old Rough and Ready"

Neglected Grave of Gen. Zachary Taylor Is to be Restored

By JOHN DICKINSON SHERMAN

THE United States is about to take over the care of the burial ground of Gen. Zachary Taylor, twelfth President. He died in the White House July 9, 1850, after giving his country more than forty years of service. If it be admitted that it is the duty of the nation to see that the burial places of its Presidents are cared for, congress has long neglected this duty in the case of "Old Rough and Ready."

Upon the death of President Taylor his remains were interred in the congressional burial ground (Christ Church cemetery), Washington. In accordance with his wish, they were transferred to the old Taylor homestead near Louisville, Ky. The State of Kentucky erected, years ago, a handsome memorial near the burial vault. But no provision has ever been made for the adequate and permanent care of the grounds. Long ago the homestead passed from the hands of the Taylor family. The State of Kentucky now holds title, with some private interest, in five acres about the burial vault.

The grounds lie near the Brownsboro road, an important thoroughfare of Jefferson county. A half-mile roadway leads to them; it has been recently improved by the county. The Louisville Outdoor league purposes to plant this roadway and make it a "Zachary Taylor Memorial lane."

The last congress passed a resolution appropriating $10,000 for the care, maintenance and improvement of the burial grounds and directing the secretary of war to establish thereon a national cemetery. The precedent for the latter is the Andrew Johnson National cemetery of fifteen acres, established by congress in 1906. So we shall have the Zachary Taylor National cemetery, maintained by the United States government.

Zachary Taylor deserved well of his country. He was born in Orange county, Va. His father was Col. Richard Taylor, an officer in the Revolution. He was a descendant of Elder William Brewster of Mayflower and Plymouth fame. The Taylors moved to Kentucky in 1785. In 1808 at the age of twenty-four Zachary was commissioned a first lieutenant in the Seventh infantry, a new regiment. In 1812, as major, he defended Fort Harrison (near Terre Haute, Ind.) against Indians and was breveted major. In 1815, when the army was reduced to 10,000 men, he resigned.

Major Taylor was, however, induced to return to the army as lieutenant colonel in command of Fort Snelling. The Black Hawk Indian war of 1832 found him in command of Fort Crawford at Prairie du Chien, Wis. Incidentally, it was to Colonel Taylor that Black Hawk surrendered after the second campaign.

The Black Hawk war was only a so-called war, but it has an interest all its own in that it brought together historic personages. Gen. Winfield Scott took command. At Fort Crawford with Colonel Taylor was Lieut. Jefferson Davis. And in Col. Samuel Thompson's regiment of Illinois volunteers was Capt. Abraham Lincoln.

Jefferson Davis (1808-89) was a West Point graduate of 1828. After the close of the Black Hawk hostilities he eloped from Fort Crawford with Sarah, the oldest daughter of Colonel Taylor. A little later he, as an engineer, made a survey of the Chicago and Calumet rivers, the federal government having decided to establish a harbor on the west shore for the fast-growing schooner traffic of Lake Michigan. Davis recommended Calumet, his chief reason being that Lake Calumet could be made a land-locked harbor for the maintenance of a fleet to be used against Canada. No, you will not find this in the histories. And the trick by which Chicago finally won over Calumet is still another story.

Davis left the army in 1835 to become a cotton planter in Mississippi. In 1845 he was elected to congress, but resigned to get into the Mexican war as colonel of a Mississippi regiment. He fought under General Taylor at Monterey at Buena Vista; in the latter battle he displayed great gallantry and was wounded. From 1847 to 1851 Davis was in the senate. Then he served as secretary of war under President Pierce. The year 1857 found him back in the senate and in 1861 he resigned to go with the South and to become president of the Confederacy.

Abraham Lincoln was twenty-three when the Black Hawk war broke out. He responded to the call for volunteers by the governor of Illinois. The "boys" insisted upon electing him captain and away he marched. You have, of course, read of his amusing experiences. But did you know that once he was under arrest for firing off his pistol, contrary to regulations? And did you know that he had to wear a wooden sword for two days, while under arrest because some of his men stole whisky and got drunk. And did you know that he saved the life of an old Indian, who surrendered, from a crowd of bloodthirsty soldiers? And did you know that he demanded the same food for his men that the regulars got and bluffed the army officers into giving it?

And here's another thing that you will not find in all the histories. After Captain Lincoln's company had been disbanded at Ottawa, Ill., Lincoln enlisted as a private in the "Independent Spy company." Just what services he rendered as a spy is unknown to this writer. He was, however, discharged at White Water, Wis. A thief stole his horse. He had to make an inglorious return to New Salem by foot, by canoe and by timber raft.

Colonel Taylor, after the Black Hawk war, took command of our forces in Florida, where the Seminole war was on. He wound up that war by defeating the Indians at the Battle of Okeechobee. In 1840 he was put in command of the southern division of the army and moved his home to Baton Rouge, La.

In 1846, upon the breaking out of the Mexican war, Brigadier General Taylor was ordered to the Rio Grande. On two successive days, he fought and won the battles of Palo Alto and Resaca de la Palma and cleared the lower valley of the Rio Grande. Next he marched to Nuevo Leon and fought a series of battles, ending, in the same year, with the capture of Monterey. Notwithstanding the fact that, under orders from his government, he had sent his best troops to reinforce General Scott, who was invading Mexico by the way of Vera Cruz, he pursued Santa Ana and, with a much inferior force, defeated that Mexican commander at the Battle of Buena Vista May 23, 1847. This important victory was followed by the Mexican campaign of General Scott which ended with the capture of the City of Mexico September 14, 1847, which virtually ended the war. Peace between the two countries was declared February 2, 1848. This war confirmed the annexation of Texas and also brought into the United States California and Nevada, most of Arizona, New Mexico and Utah and a part of Colorado.

General Taylor's way of "treatin' 'em rough" and his readiness to fight the Mexicans under any and all conditions earned him the title of "Old Rough and Ready." His brilliant victories made him a popular hero. There was an insistent demand for him for the Presidency. Taylor himself was not enthusiastic. He said: "If the people want me to be President, I shall serve, but I shall do nothing to get the office." He was elected by the Whigs over the Democrat, Lewis Cass of Michigan.

Taylor married Margaret Smith in 1810, when he was a young captain. She was ever his companion and helpmeet wherever he was stationed. When he was elected President she said it was "a plot to deprive her of her husband's society and to shorten his life by unnecessary care." She had no social aspirations. She refused to take any part in the social life of the White House and turned the duties of hostess over to her youngest daughter, the wife of Maj. W. W. S. Bliss. "Miss Betty" was the youngest hostess the White House ever saw. As for Mrs. Taylor, she put gas in the White House and kept everything spick and span. She reserved for herself a few rooms out of the way, where she could knit and smoke her corncob pipe in peace and think up things for the comfort of her husband.

Epigram Explained

During a discussion of Oscar Wilde's interesting posthumous work, "De Profundis," an editor said: "I had the honor of meeting Wilde in London on the opening night of his amusing comedy, 'The Importance of Being Earnest.' A little group of us got supper at the Carlton, and during the supper the subject of epigrams came up. To Wilde, as the foremost living epigrammatist, the duty of defining an epigram was assigned. He thought a moment, smiled slightly, and then, in his low and pleasant voice, he said: 'An epigram is a commonplace couched so adroitly that only clever people can tell what it means.'"

Hearing With the Hands?

To teach the totally deaf to hear through the palms of their hands is the purpose of an instrument invented by Dr. Robert Gault.

The instrument resembles a telephone receiver and operates on a similar principle to the telephone, except that, instead of carrying sound vibrations to the ear, it causes them to reach the hand or some other sensitive part of the body.

It is necessary for the person using the apparatus to recognize what speech sounds caused the particular vibration he detects through his sense of touch. With the aid of the instrument Doctor Gault has succeeded in teaching five deaf persons to identify 15 sentences containing 91-syllable words.

Boothe-Herron.

Mr. Glendon Boothe and Miss Anne Herron were married Tuesday at the home of the bride's parents, Mr. and Mrs. J. D Herron, Roswell, Rev. Rudolph Caughey of First Presbyterian church readung the services.

Mr. and Mrs. Boothe left immediately for Denver where they will make their home in the future.—Roswell News.

The bride is a sister of J. D. Herron of this city.

Goods Arriving.

Large shipments of merchandise are now arriving for the new drygood store which is being opened here by S. Stolaroff and associates who conduct the chain of Popular Stores at El Paso, Roswell and other points. These people are putting in a store here that would do credit to a much larger city.

Eastern New Mexico farmers produced over $600 worth of dairy and poultry products per farm in 1924.

NOTICE!

State Fire Laws

Below is quoted the New Mexico state fire law which is effective after June 10, 1921.

"Be It Enacted by the Legislature of the State of New Mexico:

"Sec. 1. Any person who shall wilfully or negligently commit any of the acts hereinafter enumerated in this section shall be guilty of a misdemeanor, and upon conviction there of shall be punished by a fine of not less than twenty-five nor more than five hundred dollars, or imprisonment in the county jail for not less than fifteen days nor more than six months, or both such fine and imprisonment.

(a) Set fire, or cause or procure fire to be set to any forest, brush or any other inflammable vegetation growing or being on lands not his own, without the permission of the owner of such land; provided, that no person shall be convicted under this section who shall have set in good faith and with reasonable care, a backfire for the purpose of stopping the progress of a fire then actually burning.

(b) Allow fire to escape from the control of the person or persons having charge thereof, or to spread to the lands of any person other than the builder of such fire without using every reasonable and proper precaution to prevent such fire from escape.

(c) Burn brush, stumps, logs, rubbish, fallen timbers, fallows, grass or stubble, whether on his own land or that of another, without taking every proper and reasonable precaution, both before the lighting of said fire and at all times thereafter to prevent the the escape thereof; provided, however, that any person desiring to burn as aforesaid during the months of May, June and July, shall give notice to the owners of adjacent land of such intention to burn at least 24 hours before setting such fire.

Sec. 2.—Any person who builds a camp fire upon lands within this state, not his own, without clearing the ground immediately around it free from material which will carry fire, or who leaves thereon a camp fire burning and unattended, or who permits a camp fire to spread thereon, or who shall be throwing away any lighted cigar, cigarette, match or by the use of firearms, or in any other manner start a fire in forest material not his own, and leave same unquenched, shall, upon conviction, be punished by a fine of not less than ten dollars ($10) nor more than one hundred dollars ($100) or, by imprisonment for not more than 30 days. ****

Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)
(© 1925, Western Newspaper Union.)

Lesson for June 28

REVIEW

GOLDEN TEXT—Ye shall be witnesses unto me, both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost part of the earth.—Acts 1:8.

PRIMARY TOPIC—The Boy Jesus at the Temple School.

JUNIOR TOPIC—Jesus Asking and Answering Questions.

INTERMEDIATE AND SENIOR TOPIC—The Growth of the Early Church.

YOUNG PEOPLE AND ADULT TOPIC—How the Gospel Spread.

As usual, the methods employed in the review largely depend upon the teacher and the class. Two methods are suggested:

First: The biographical. This is a method which can nearly always be used to advantage, since pupils of all ages are interested in the study of persons. Peter, Paul, Stephen, Philip and Barnabas are very prominent characters in the quarter's lessons. These may be assigned to members of the class the week before with a view of a brief biographical sketch being prepared and read to the class.

Second: The summary method. This method calls for the review of the principal facts of each lesson with statement of the leadings teachings thereof. The following is suggested:

Lesson I.—On the Day of Pentecost, the risen and ascended Christ sent the promise of the Father causing the Holy Ghost to descend upon the disciples to qualify them to be witnesses of His death and resurrection to all the world.

Lesson II.—The healing of the lame man shows that the risen Christ is able to make strong a man who was born a cripple. The man who was healed thoroughly advertised the miracle. Those who have experienced the life of God cannot help but make it known.

Lesson III.—The church is God's dwelling place. Since it is His dwelling place it is as holy as the holy place in the sanctuary. The judgment which befell Ananias and Sapphira proves that God will not allow the hypocrite to escape His judgment.

Lesson IV.—The behavior of Stephen proves that the risen Christ is able to sustain His witnesses, even while they are sealing their testimony with their blood. His standing shows His active interest in His disciples, and that He welcomes home to heaven those who are faithful.

Lesson V.—The experiences of Daniel and his companions show that total abstinence pays.

Lesson VI.—Philip, the only man in the New Testament called evangelist, is in the energy of the Spirit preaching the Word and winning men to Christ.

Lesson VII.—The conversion of Saul, the bitter enemy of Christ, is an illustrious example of what the revelation of Christ in His glory can do, and also illustrates the method of the conversion of lost souls.

Lesson VIII.—After Saul's conversion, he straightway preached Christ as the Son of God. Those who are really saved know whom they have believed.

Lesson IX.—The stupendous miracle wrought by the risen Christ at the hands of Peter proved that the gospel lost none of its power by being preached abroad.

Lesson X.—When Christ would break down the middle wall of partition between the Jews and Gentiles, He gave to Cornelius and Peter each a vision. When the gospel was offered to the Gentiles, the Holy Ghost came upon them as at Pentecost.

Lesson XI.—Before the foreign missionary enterprise was launched, a new center of operation was established at Antioch. The Holy Spirit established this strategical center and sent out the missionaries.

Lesson XII.—The risen Christ hears the prayers of the church and sends His angels to deliver His faithful servants.

The Best Judges Us

Our attitude concerning the great value, the great reality, the great personality, is not to put pressure upon our own minds or upon the minds of others to believe in them; and not primarily either with ourselves or others to defend them or to argue for them, but simply to give them opportunity with us, and to do what we may to help others, too, to give that opportunity. The best, thus, judges us rather than we it.—Henry Churchill King.

Better Than Guilt

Better it were, that all the miseries which nature owns were ours at once, than guilt.—Shakespeare.

Let Us Not Lose Faith

Earl Balfour said not long ago: "Let us not fear that the future is going to be less glorious than the past. Problems of which we never dreamed multiply upon us until we are almost overwhelmed. But let us not lose faith or courage."

For Truth's Sake

To love truth for truth's sake is the principal part of human perfection in this world and the seed-plot of all other virtues.—John Locke.

FORT STANTON

The Fort team added a forfeited game to their list of victories last Sunday by the score of 9 0 when the Mescalero Indians failed to arrive for their scheduled game at the Fort It was Ladies Day and many were present.

No additional games are scheduled for June, and the next series will be played Saturday and Sunday, July 4th with the Southern Pacific team of El Paso.

Roswell is organizing a town team and games with them are being arranged for the month of July. They are said to have a strong aggregation.

Nurse, Anna H. Schatz of Montgomery, Minn., arrived last week to replace Miss Madeline Wilkinson who resigned a fewdays ago.

Mrs. Nell Broderick of Sheridan Wyoming will arrive to take the place of Miss O'Brien on the nursing staff early in July.

Dr. and Mrs. Warner delightfully entertained their friends of the Fort at their home last Sat. night. Dancing and Bridge were in vogue all evening after which delicious refreshments of ice cream and cake were served.

Sam Kritzer, patient, left for his home in New York City last week. He has been actively interested in the affairs of the Seamen's Social Club and the Fort Stanton Base Ball Club since he came here a few months ago.

Concessionaires among the patients are making final arrangements for their stands on the picnic grounds July 4. The day program has been arranged for, and a full day of pleasure is assured in the diversified intertainment provided.

Alfred F. Kersey is back on duty in the dispensary after an absence of thirty days on vacation.

OIL NEWS.

That Lea county is coming into its own as one of the oil producting counties of the state, particularly the Cap Rock section, is being proven by the fact that already six wells are being drilled in the Cap Rock section.

The latest operators to enter this section are Bruce Arborgast, C. W. Titton, O. E. Foulke and Fred Mack Smith, Wichita, Kansas. These men are drilling a well in section 33-11-35. This well was spudded in recently and good progress is being made.

These men are experienced oil men and made a careful examination of the various fields before beginning operations.

Other wells drilling in this same section and on which good progress is reported are: F. A. Ross, section 27-10 32; Tilton-Croft, section 33 11 35; Holmes, 13 12 35; Cass-Ellis section 14 16 32.—New Mexico Oil News, Albuquerque.

Artesia—Ohio Oil Company acquires large acreage from New States holdings.

Roswell—Maijamer Oil Well No. 2 producing 1,000 barrels on 24 hour test.

Oil reports show that drilling activites all over the state are very active.

The Arkansas Field Oil Company in its well on the Manning Dome has encountered a stratum of soft coal at a depth of 325 feet. This strike has been very interesting to oil men as, it indicates and proves the theories of geologists of large companies that the sedimentary formations in that area carry an abundance of organic matter which is suitable for the distillation of petroleum and gas in the Pennsylvania series of carboniferous age.

The Dunken Dome and Manning Dome is fast becoming the most promising area for production in the Rocky Mountain area More large companies have purchased acreage there than any place elsewhere in the state. Among the major companies are The Arkansas Field Oil Company, The Arkansas Natural Gas Company, the Texas Company, the Ohio Company, the Continental, the Mid West, the Marland and a number of independent companies.

An extensive detailed geological survey was made of the area by Irvin E. Stewart, consulting geologist of Denver. Upon completing his survey it was submitted to the major companies and it looked so unusually promising that the geologists of these companies immediately went into the field and as a result of the combined recommendation of these geologists the major companies have entered the Dunken and Manning Domes area

In this territory there are three exceptionally good sands, the first being sand 25 feet and found at approximately 2400 feet; the next is 110 feet thick and found at 27.0 and the third sand 60 feet thick is located at 3300 feet.

Geologists of the major companies believe that the maiden course of the oil found in the Artesia field comes from the underlying Pennsylvania formation which is too deep to be drilled in that area and that the oil migrates up through the fault planes to the overlying Permian formation, and also this is indicated by the quality of oil found, which comes up from the Pennsylvania strata.—Roswell News.

CHURCH DIRECTORY

The Dedication of the new Nazarene Church at Capitan will be held Sunday June 28th from 10 to 12 a. m.

District Superintendent Jno. F. Roberts will be in charge.

Everyone is invited. Dinner on the ground. Bring your lunch and stay all day.

Sign Up.

Don't fail to get your John Henry on the road petition that is being circulated—it means dollars to cash if one contributed.

LET'S GO!!

A petition is now being circulated asking for contributions toward the construction of a road from Capitan to Ruidoso, via Angus and Alto. It is the intention to secure as much by individual subscription as possible in order to get all available funds from the County. When this is accomplished efforts will be put forth to secure State and Federal appropriations. This, coupled with the aid that can reasonably be expected from the Forest Service will create a fund that will be sufficient to construct a first class highway over the proposed route.

The road will open up some of the most beautiful country in the National Forest and will attract enormous tourist traffic upon completion and increase each year thereafter. This portion of the state has seen the tourist traffic increase ten-fold during the past three years and steps are absolutely necessary toward taking care of the anticipated volume in the coming years.

It should not be necessary for the solicitors to hunt you up on the proposition but you should look them up and lend your moral and financial support toward this worthy project.

If the solicitors fail to see you the petition can be signed by seeing L. L. Beard.—Now, all together like Brown's cows—let's put this over strong.

THE COMMITTEE.

Didn't Show Up.

The "Noble Red Men" of Mescalero Reservation failed to keep their obligation in the matter of playing ball at the Fort last Sunday. Their delinquency caused many Capitan people some disappointment.

Railroad News.

El Paso, June 22.—What is characterized by Ross Simpson as one of the biggest development projects in West Texas is forecast in press dispatches from Austin which says the M K & T railroad intends to extend its line west from Rotan, north of Sweetwater, through Snyder, Gail, La Mesa, Seminole and Lovington to Roswell, New Mex

Mr. Simpson was a member of the committee named by the El Paso chapter of the American Association of Engineers to study the feasibility of a proposed railroad from El Paso to the plains country. He has made study of railroad development in West Texas a hobby.

Recovering.

J. T. Gardenhire is recovering from the effects of a very bad hand which has caused him considerable pain. At one time it was feared the wound would cause blood poisoning.

Here From Tucumcari.

Mr. and Mrs. A. E. Rohde are here from Tucumcari where Mr. Rohde has been selling Buicks for the past several weeks. They will take two 25-20 Buick Coches with them on their return to Tucumcari.

Crop Parasites.

At this time of the year the common parasites known as "screw worms" or "gusanos" are very common and effect all sorts of wounds in livestock. Dr. Huge Hurst of the New Mexico A. & M. College, gives the following descriptions of the pests, and also a simple remedy for getting rid of them:

Screw worms are especially harmful to sheep that are grazing in meadows or alfalfa fields, or, in fact, any place where moisture and forage is in abundance. The fly, which is of a bluish caste, lays about two hundred eggs around the margin or surface of the wound, or in any part of the body where moisture and heat are available. These eggs hatch within a few hours into a tiny maggot provided with hooklets not only at the head, but also the segments of the body. By means of these hooklets they force their way into the wounds or into the surface of the body, provided they have protection such as is afforded by the year's growth of wool on the fine wool breeds of sheep.

These parasites cause severe losses thru bringing uneasiness and discomfort to the host, and in many cases actually cause the death of the sheep. The worm matures in about nine days' time, when it leaves the host and crawls into the ground where it forms a hard leathery shell This shell protects it for about ten days, the time varing according to the degree of humidity and temperature present in the soil. At this time it emerges as a mature blow fly, to repeat the process, thus making it possible to complete a life cycle within a period of 25 days, each fly producing approximately 200 screw worms for each generation.

Means of control.—Saturate all eggs or worms with a soltion of commercial chloroform and common pine tar, equal parts. The chlorform is the active principal and will destroy the eggs or the worms in a very few seconds when it comes in direct contact with them. The chloroform being highly volatile, soon evaporates, leaving a thin film of pine tar to protect the denuded surface of the wound on the animal.

Methods of prevention.—If people burn dead animals and clean up all decaying matter about the premises and on the range, this dreaded parasite will have no feed for development and no place for propagation.

Hear Ye, And Fail Not.

If you live at Hondo, Lincoln, Capitan, Carrizozo, Angus, Alto, or along the proposed route of the new road to Ruidoso you are vitally interested in the proposition See those circulating the petition NOW.

Fringed pool,
Ferned grot,
The veriest school of peace; yet the fool
Contends that God is not—
Not God in gardens? When the eve is cool?
Nay 'tis I have a sign,
'Tis very sure God walks in mine.

DAINTY CAKES

The small ornamental cakes which are served at weddings and receptions, and which look like small flower gardens, are easily made in the home kitchen. Small and dainty is the rule, and they may be even more delicious and quite as attractive as those which cost so much when bought.

Cakes of sunshine, angel food or pound-cake mixtures baked in sheets and then when cool cut into tiny diamonds, crescents, squares and oblongs, covered with fondant and then decorated with colored candies, cut gumdrops of different colors, citron, angelica nuts, in fact any dry preserved fruit like pineapple, ginger, lemon or orange peel will make sufficient variety to satisfy any one. Buy a sample of some well-made cake and use it as a model for decoration. With a little practice any one who likes to do such work will find many new ways of beautifying foods.

Plain Cake.—Cream two tablespoonfuls of fat, add three-eighths of a cup of sugar, one egg, one-fourth of a cupful of milk and three-fourths of a cupful of flour, one teaspoonful of baking powder and one-half teaspoonful of flavoring. Mix and bake in a moderate oven.

Babies who will not thrive on any kind of food have been nourished on whey in combination with skim milk, milk, sugar and cream. Whey is valuable because of its abundant mineral content in natural physical solution.

Sweethearts. Cream two thirds of a cupful of butter with one-half cupful of powdered sugar, then add one teaspoonful of boiling water and a teaspoonful of vanilla. When the mixture is very light break in two eggs, one at a time, beating one minute after each addition. Now add three cupfuls of pastry flour gradually, and when the dough leaves the side of the bowl turn it out onto a pastry board covered with one cupful of flour. Knead lightly, working in the flour; the dough must be smooth and not stick to the hands. Place the dough back in the bowl and cover with a cloth; let stand two hours. Now roll out one-half of the dough, one-quarter inch in thickness. Cut with a small heart-shaped cutter, place on a baking sheet and bake slowly. When the cakes are cold, ice with confectioner's sugar, made smooth with hot water; to this add a little bit of red vegetable coloring to give a pale pink color; mix thoroughly, then ice the cakes. This same mixture may be cut with a doughnut cutter; decorate with halves of blanched almonds, three on each cake; sprinkle with sugar mixed with cinnamon. These are called sand tarts and are very attractive as well as palatable.

Picnic Time.

At this season of the year when little trips into the country are such a joy, the need of a variety of sandwiches is felt. Here are a few suggestions:

Fried Egg Sandwich.—This made and served at once is a most filling sandwich. Butter bread, cook an egg in butter in the frying pan, lay a thin slice of onion on the buttered bread, then place the egg, another slice of onion and the top slice; it is now ready to "fall to."

Tomato Club Sandwich.—Lay thick slices of tomato on slices of buttered toast, sprinkle with salt and pepper, finely minced olives and parsley, add a layer of thin, nicely cooked bacon and cover with another slice of toast.

Russian Egg Sandwiches. — Chop three hard cooked eggs and mix with the following dressing: Add chopped pickle, pepper or chili sauce to mayonnaise, using about four tablespoonfuls, enough to make the mixture the consistency to spread.

Italian Sandwiches.—To chili sauce, mayonnaise, chopped ham, celery, mustard and cayenne, add salt if needed and spread on whole wheat bread.

Anchovy Sandwiches.—Pound to a paste enough anchovies for the desired number of sandwiches. Add lemon juice and a little mayonnaise to soften.

Tomato and Cucumber Salad.—Prepare small-sized tomatoes by scooping out the pulp and draining the cups. Chop one small cucumber and a tablespoonful of onion with a little chopped celery, refill the cups, using some of the pulp removed. The remaining pulp may be used in various dishes, as soup or molded salads. Mix the filling with a highly-seasoned salad dressing, finish the top with a spoonful of thick mayonnaise and sprinkle with finely minced chives or green pepper. The tomatoes may be arranged on lettuce, endive, water cress or a nasturtium leaf.

Nellie Maxwell

Preachers Grow Scarcer

In the United States there are 50,000 churches in 10,000 villages that are without regular preachers, according to the federated church authorities. In many communities a preacher is obtainable for only one Sunday in the month and in some detached localities not that often.

Scenic Food

Still, if you slow down to enjoy the scenery, passing cars will make you eat it.—Quincy Whig-Journal.

Help That Achy Back!

Is backache making you miserable? Are you tired, nervous, "blue"—utterly played out? Have you suspected your kidneys? Your kidneys are the blood-filters. Once they fall behind in their work, there's slow poisoning of blood and nerves. Then is apt to come backache, headaches, dizziness, and other annoying kidney irregularities. Don't wait! If your kidneys are sluggish, help them with a stimulant diuretic. Use *Doan's Pills*. *Doan's* are recommended the world over. *Ask your neighbor!*

A Colorado Case

Mrs. James Howitt, 636 East Fourth St., Durango, Colo., says: "My kidneys were weak and I had sharp, cutting pains through my back that almost took my breath. Mornings when I got up, I was so dizzy that I almost fell. After using Doan's Pills my kidneys became strong and I haven't had need for a kidney medicine."

DOAN'S PILLS 60c
STIMULANT DIURETIC TO THE KIDNEYS
Foster-Milburn Co., Mfg. Chem., Buffalo, N. Y.

Ancient Gems on View in Wisconsin College

The oldest manufactured jewelry in the world, ivory, deer horn and stone beads used as ornaments by cave men and women of prehistoric Europe, was recently brought to this country by Alonzo W. Pond of the Beloit college museum, and is now on display there. Besides the beads, which were found in the Cave La Blanchard, department of Dordogne, France, the sharp blades and stone drills with which the beads were pierced are also included in the collection, Science Service says.

In order to display the collection to the best advantage, the various beads have been strung in the form of a necklace similar to the kind which may have been worn more than 20,000 years ago.

Highways Said to Need Thick Edges

That highways should be designed with extra thick edges is indicated by a survey of where, on the road, automobiles run, made by the United States bureau of public roads. This investigation showed that motor trucks are habitually driven closer to the edge than passenger vehicles and that the heaviest load placed on the pavement comes about six inches from the edge, says Science Service.

Drivers of speeding vehicles tend to crowd closer to the center. Too high a crown to the highway or a bad shoulder also cause machines to run nearer the middle. Highways should be at least 18 feet wide and not over 20 feet wide for two-way traffic, the experts declared after the observations.

Where to Find Them

"Business morals have improved," said John Van Antwerp MacMurray, the new minister to China, at a Washington banquet.

"There's a story about a ghost, the ghost of an old time business man. He appeared to his son one day and complained:

"'I've looked round Wall street and studied all the big corporations, George, and I find that there ain't a single business man of the old school left.'

"'Oh yes, there is,' said George. 'Just you give the once over to a few jails.'"

Film Newspaper Next?

Cans of newsreel films soon will be delivered to subscribers in much the same manner as the daily paper, Dr. Hugo Reisenfeld, manager of a New York theater, predicts. Each home will have its own projector and thus view the more important events of the preceding day.

Trachoma Among Indians

Every Indian family living on government Indian reservations will be investigated for trachoma.—Science Service.

FARM STOCK

SHEARING SHEEP IS NOT HARD TASK

Brief suggestions on shearing sheep are given below by the animal husbandry division for the benefit of those farmers who are growing sheep for the first time and are inexperienced in the method of shearing.

The first mistake commonly made in shearing sheep is the method of catching and holding. There are three ways by which the sheep may be satisfactorily caught. The first is to throw the hand in front of the neck, the second is to grasp them in the rear flank, and the third is to catch the left hind leg just above the hock in the right hand and then gradually pull the sheep backward and throw the left hand around under the chin. The next thing to do is to lift the sheep entirely clear of its feet and place it on its rump, inclining it back somewhat so that the hind legs cannot get a foothold. Sheep placed in such a position will struggle very little—the beginner, however, will have considerable difficulty in preventing the sheep from struggling violently.

In shearing, the wool should be cut smoothly and close to the body. A very common mistake is to clip them the first time not very close to the body and then go over the surface again and reclip. This method results in a lot of short fibers which are practically worthless, so far as the manufacturer is concerned. The fleece should be kept intact and should not be taken off in bunches or patches. After it is taken from the body it should be carefully rolled with the inside (side which was next to the body) out. When thus rolled it gives the fleece a splendid appearance and it will sell better on the market.

Probably the worst mistake made in shearing sheep is that all sorts of twine are used in tying the fleeces. One should select twine which has a very hard finish and which will not shed its fibers in the wool. Good three-ply No. 4½ twine is very satisfactory. There is a so-called wool twine on the market which is very soft and sheds its fibers readily, which is very objectionable. Ordinary binder twine, which is used in harvesting small grain is also objectionable. There is a paper wool for the purpose of tying fleeces and which is thoroughly satisfactory.

After tying, the fleeces should be stored in a clean, dry place where they will not accumulate moisture or dust. When placed in bags for shipment or storage care should be taken to select bags which are closely woven, so that they will not shed their fibers on the fleeces. When placed in ordinary burlap sacks the fibers from these sacks will get in the fleeces, and when woven into cloth or blankets they will not dye readily and consequently the buyer cannot afford to pay as much for fleeces stored and shipped in such bags as he could if the proper type of bag were used.

Better Demand for Pure-Bred Horses in Kansas

Unusually large numbers of licenses issued to owners of stallions, and the good demand for breeding stock of the Kansas State Agricultural college herd indicate an increased interest over Kansas in pure-bred horses in the opinion of Prof. D. L. Mackintosh of the department of animal husbandry. Licenses issued so far this year to stallion owners number 150 more than those given out at the same time in 1924.

Within the past ten months the college has sold 17 stallions and mares to Kansas breeders. The outstanding individuals sold from the college herd were the Belgian stallions Colgar and Hazelton Lad. Colgar, winner at the Kansas free fair in Topeka, and at the American Royal last year, was sold to W. F. Swafford, Concordia. Hazleton Lad, winner at the free fair, and reserve grand champion at the Kansas state fair, was sold to J. F. Schowner of Miltonvale.

Prices for pure bred stock are fair, and the demand is fairly steady over the state, Professor Mackintosh reports.

Market for Clean Hogs

Hogs fed on properly pasteurized whey, skim milk, or buttermilk are coming to slaughter clean and free from disease even though some of the cattle herds supplying milk to the factory are badly infected. Every hog infected with tuberculosis means a loss to every farmer who raises a hog, for this loss is charged back on the purchase price of all hogs sold on the various markets.

Baby Beef Requirement

One of the principal requirements of baby beeves is that they be finished when they go to market, according to R. W. Kiser, animal husbandry specialist, Kansas State Agricultural college. In order that calves may carry enough finish to be classed as baby beef, they must be fed upon a well balanced fattening ration. Ground ear corn when fed with silage and hay is too bulky for calves and they do not fatten readily upon this feed.

Ram Lambs for Market

Ram lambs over three months of age tend to grow thin and develop coarse shoulders and neck. Thin-fleshed, coarse, open-shouldered lambs are not of a desirable quality and when they reach the market they are discriminated against by the buyers because of these features. If the lambs are castrated and docked when they are a few days old, their growth will not be retarded. On the other hand they will present a better appearance.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and inclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.

What Appealed to Him

Mr. James Caldwell, formerly deputy of the British house of commons, who died in London recently, was a privy councilor and held other high honors; but he was above all things a Scot. On one occasion during the later eighties he attended one of those typically Victorian functions, a garden party at Windsor castle. Driving back to London with another M. P., the latter observed to the then young and enthusiastic Glaswegian: "Marvelous old place, Windsor castle, a complete epitome of English history." "Yes, indeed," agreed Caldwell; "did you notice the gold key that her majesty used to open the Glasgow waterworks in 1859?"

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

String Made Trouble

A robin was busily engaged building her nest at Washington. She found a particularly long string and was carrying it to her new home. The string became tangled over the limb of a tree and also around one of her wings, and she was left suspended in the air. The fire department was called and a fireman scaled a ladder and cut the string. The robin fluttered away, temporarily embarrassed by the large crowd, but later returned and recovered the string.

Puzzled Youngster

A little boy recently puzzled his mother with this query:

"What's the Miz?"

"The Miz, dear? I'm sure I don't know. Where did you hear about it?"

"At Sunday school. The superintendent said God made heaven and earth an' all that in the Miz!"

There's little pleasure in Beauty that's only "Skin deep"

"Beauty is only skin deep." That's true of the rooms in many a home where unsanitary wall coverings hide unnoticed dust and dirt.

For real beauty you must have absolute cleanliness. And right there is the reason why so many women are turning to KING WALL FINISH for practically all interior finishing. This unusual wall finish is easy to apply, even by one without experience. The cost is less than $1.00 a room for room of average size. And best of all KING WALL FINISH is the last word in cleanliness and sanitation. Applied directly to the plaster, there's no chance for hidden dirt—no chance for lurking germs in cracks or crevices.

Low cost — easy to apply — the most attractive color combinations—and the last word in sanitation. These are the things you get when you decorate with KING WALL FINISH. Isn't it worth investigation? Write today for name of nearest dealer and FREE Color Chart, showing 19 beautiful colors to choose from.

Her Neighbor's Advice Helped Mrs. Frick

MRS. ADA FRICK
PERRYSBURG, OHIO

"YOU can be just as healthy, strong and happy as I am," said one woman to her neighbor after listening to the description of her ailments,—"if you will take Lydia E. Pinkham's Vegetable Compound. My condition was very similar to yours, I suffered from those awful bearing down pains, weakness, backache, nervousness and headaches until I could hardly drag around. Today I am strong, well and happy because I followed the advice of a friend who had been greatly benefited by this old-fashioned root and herb medicine."

Nearly fifty years ago Lydia E. Pinkham of Lynn, Mass. prepared from medicinal roots and herbs Lydia E. Pinkham's Vegetable Compound. Its fame has spread from shore to shore. You will now find in every community or neighborhood some woman who has been restored to health by its use, or has some friend who has. Therefore ask *your* neighbor.

Thousands of unsolicited testimonials such as the following are on file at the Pinkham Laboratory at Lynn, Mass., and prove the merit of this medicine. Therefore no woman should continue to suffer from such ailments.

Mrs. Frick Tells of Her Experience

Perrysburg, Ohio—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my sides all the time. I can't remember just how long I suffered but it was for some time. One day I was talking with a neighbor and I told her how I was feeling and she said she had been just like I was with pains and nervous troubles and she took the Vegetable Compound and it helped her. So then I went and got some and I certainly recommend it for it is good. Whenever I see a woman who is sick I try to get her to take Lydia E. Pinkham's Vegetable Compound."—Mrs. Ada Frick, R. No. 3, Perrysburg, Ohio.
