Clean-up Drive Starts April 30

Saturday, April 30 sees the start of the annual Ruidoso clean-up campaign in which local citizens will join with the village of Ruidoso employees in staging a battle for safety, cleanliness, fire prevention and health—plus the added benefit of a more beautiful place in which to live. The village of Ruidoso city fathers last week proclaimed April 30 - May 7 for the spring attack on trash.

Chairman Blair Halladay of the 1966 Clean-Up Drive committee, presided in a second meeting of the panel Thursday night last week when further details for the program were outlined, primarily assignment of civic groups to certain areas to assist in cleaning the Rio Ruidoso and some of the parks.

Trash too bulky to be handled by the city's garbage truck crews will be hauled away by other village vehicles to a trash disposal site designated off Gavilan canyon near the eastern edge of the city. The clean-up disposal site was offered by Ruidoso Ranger Chief Bud Starkey in the Lincoln National Forest. The disposal area will be opened with a city blade, then covered after the clean-up drive and the spot seeded with grass, as was done after the 1965 campaign.

Residents who have trash to be hauled away may call the police dispatcher, 257-4333, and leave word for the sanitation detail to come by. Also, anyone having extra vehicles the city could use to haul away trash in the drive can also dial the dispatcher and report the offer.

Underway in the schools this week is a clean-up poster drawing contest among students who are competing for cash prizes of $15 for first place, $10 for second and $5 for third. Posters will be judged this week-end, then placed on display around town.

The committee last Thursday decided to ask organizations to help in this manner: The Boy Scouts to clean up School House Park, the Rotary Club in Two Rivers Park, the Jeep Club to clean the river from the second bridge west; the Lions Club, clean the river from Riverside to Mechem; the Elks clean the river in Two Rivers Park west to Riverside; The Volunteer Fire Department, check fire hazards and to burn weeds and grass on church yards, school grounds and parks as requested; the high school Letterman's Club, clean up beneath athletic field bleachers.

The committee also urged a wholesale attack on pine needles, described by the VFD members as a fire hazard year around here.

Postal Savings Accounts To Be Closed

Postmaster L. F. Dryden today urged depositors with postal savings certificates to withdraw their accounts from Post Offices as soon as possible or as soon as the anniversary dates on their certificates are reached.

The Postal Savings System was abolished March 27, 1966, with the signing of Public Law 89-377 by President Lyndon B. Johnson, he said.

Dryden pointed out that as of April 28, 1966, no deposits can be accepted and no new accounts can be opened. He said that interest will end on the anniversary date of each certificate.

The postmaster said that for convenience all certificates held by a depositor may be cashed at the same time and interest will be paid for each full month they have been outstanding beyond three months from interest date.

The postmaster said that unpaid deposits remaining in the post office beyond June 30, 1967 would be transferred to the Treasury Department in a trust fund and would be available for payment without time limitation whenever proper claims are received.

Commissioners Seek Tax Equalization Public Opinion

Lincoln County Commissioners have asked the citizens to speak their mind on a proposal to do a complete reappraisal of the county tax roll in an effort to equalize tax charges. Max Oliver, the county commissioner chairman, said following a meeting with school people and real estate dealers Thursday last week in Carrizozo with Jess K. Kornegay, chief tax commissioner, that he and the other two commissioners, R. M. Shafer and Joe McKnight, would like to know what the public thinks before it moves to put the project in motion.

(Additional and more detailed information is contained in a letter to the editor in today's News.)

Kornegay outlined steps to take and benefits that would accrue to the county in the meeting last week —which would include a rebate of some of the tax money to the county and to the schools as a reward and to help cover expenses of the big step.

The county board will decide in a meeting May 10 in Carrizozo whether to act or not.

Incentives offered the county would be a return of one mill of last year's appraised value and then the return of 1.7 mills to schools and .3 to the county when the appraisal and new valuations are posted on the tax roll. Capitan, Corona, Carrizozo and Ruidoso school and village officials and individuals were present for the discussion.

Oliver said he favors the move, and hopes the citizens of the county will also, but that the board will move to do what the people want. "If they don't want it, we'll not vote for it," he declared.

THANKS!
I am very grateful and pleased that the people of Lincoln and Otero Counties have shown enough confidence in me to give me the privilege of running for re-election UNOPPOSED in the primary election May 3.
Being unopposed, I have purposely not campaigned since the filing date in an effort to try to reduce the confusion caused by the Federal Court action regarding the re-apportionment of the New Mexico Senate. During the coming months I intend to wage an active and vigorous campaign and try to solicit the support of every person in both counties.
On the Democratic Primary ballot next Tuesday you will vote for TWO candidates for State Senator. You will vote for one from District 23 — a 4-year term — and one for District 24 — a 6-year term. Both districts will represent ALL of Lincoln and Otero counties.
PLEASE VOTE FOR THE CANDIDATE OF YOUR CHOICE

All-American Purse Near Half Million

Racing history continues to be made at Ruidoso Downs Race Track as the 1966 All American Quarter Horse Futurity soars toward the half-million dollar figure

Track officials state that 1966 All-American eligibles are some 15 ahead of last year at this time . . . and all things being equal, it should result in the 1966 All-American running more than $50,000 richer than last year's event which was $419,460.00, the richest stakes event in history.

This year's purse will become sweeter on June 1st when supplements are in order, and it is expected that some ten or more colts will be supplemented at $5,000 each to make them eligible for the All-American Time Trials in late August.

Nine New Mexico horses are among the 164 quarter horse juveniles perhaps headed for racing immortality in the eighth annual running of the All-American. The following New Mexico horses remain eligible for the 1966 All-American Futurity:

Kay Starr, owned by Cleotis L. Hutchins, Broadview; Ganna Straw, owned by Leon Hoyl, Hobbs; Triple Paula, owned by Sam Britt, Grenville; Bull's Amelia and Doer, owned by Jeamie and/or Philip McKee, Lamay; (Alamitos Bar-Gill Mare No. 71) Foal unnamed, Carry Sail and Jacarnda, owned by Mrs. Helen Mathieson, Las Vegas; Tento Davo, owned by Erick N. Culver, Raton.

The All-American Futurity was first run in 1959 when the purse zoomed to an unprecedented $129,682. Last season's running was won by Savannah, Jr., an Oklahoma colt, which made his owner $192,760 richer for first place share of the $419,460 history-making event. The All-American is a 400-yard race, usually sprinted in approximately 20 seconds.

Some of the more analytical minds have calculated this golden sprint at nearly $25,000 per second—$1250 per yard—and or $34.72 per inch (depending, of course, whether one is using a straight edge or a stop watch).

Twenty states are represented in the list of eligibles for this year's running of the All-American.

The summer racing season at Ruidoso Downs begins May 28, Memorial Day week-end, and continues each Friday, Saturday, Sunday and holiday through September 5th.

Here Are Some of Our Choices . . .

Some of the newcomers hereabouts often ask, "Who should I vote for," if they have not yet become very well acquainted with the men who are candidates for office in the area, or in the state. We wouldn't dare tell you how to vote that's your own decision. We're not shy, however, about saying who WE will vote for, in the Demo primary, and why in some cases.

In the torrid Third Judicial District Judge race we'll vote for George L. Zimmerman for re-election in Division II because of his firm and realistic handling of juvenile cases, and of some others, too, and we'll vote for Bill Bivins for his fellow judge in Division I for he seems like a fellow who likes to tackle tough probems and would deal with them properly.

In the governor's race, Ruidoso has two friends seeking the Demo nomination, and we'll go along with either one, but will cast our ballot for John Burroughs who did so much for our town back when he was in that office. He earned our support in several ways

We'll vote for Hollis "Ed" Gary of Rincon for state board of education in this district because he's been in to visit with us and talk over the race several times and we like his background.

Regarding other races, we hadn't made up our mind on some of them early this week when this was written.

We'd Like To See It Done . . .

A couple of times before we've mentioned we would like to see tax equalization actually in existence in Lincoln County. The last session of the legislature came up with a bill that would help counties begin on the job with some rebates in tax money for the county and the schools, if the county commissioners would order a reappraisal of the property on the rolls. Which, if done, would naturally bring some equalization, we could assume.

Now, Lincoln County is being asked if they want this — the county board will meet May 10 to vote yes or no on having the re appraisal done, but will act only on what the citizens want— the chairman, Max Oliver, declares. We'd like to say in view of the legislature's overwhelming support of the well studied tax commission sponsored bill, that we believe it will lead to corrections that should have been made years ago. And, it will be a democratic and fair action. We're hoping the board votes "yes".

Letters To The Editor

Dear Vic:

Ideas are being sought by the Lincoln County Commissioners on the new property tax reassessment law. This law as passed by the last session of the New Mexico State Legislature provides for inspection and appraisal of all property in a county by outside mass appraisal specialists and the return of part of the State tax dollar to local schools and the county government. The purpose is to equalize property tax in the State of New Mexico.

The new law was explained by Jess Kornegay, New Mexico Tax Commission Chairman, in a meeting held in Carrizozo last Thursday. Representatives of the School systems of Capitan, Carrizozo and Corona as well as municipal representatives of Carrizozo and Capitan were in attendance. Certain interested citizen taxpayers were also present. In all about 35 persons were at the meeting.

The law as explained by Mr. Kornegay will result in the State paying one half of the cost of reappraising the property locally assessed in Lincoln County. The State will loan the other half of the cost to the County to be paid back over a period of five years. If the County undertakes this reassessment program before July 1966 the state will return $21,000 of property tax to the local schools in the county for the first year only. In future years the State would return $2.00 of tax money per $100.00 of assessment back to local government bodies. This $2.00 is split $1.70 to the local schools and $.30 to the County. Under present assessment of $21,000,000 this would be $35,700 to the schools and $6,300 to the county.

This money would continue to come in through the years if the County Commissioners,

1. Hire an approved mass appraisal company to inspect and estimate the Fair Market Value of all county assessed property.

2. The County Board of Equalization accepts the appraisal done by the mass appraisal firm.

3. After acceptance of report the Commissioners decide on percentage of Fair Market Value that the county will assess.

4. Commissioners set up approved records and equipment to maintain the appraisals done by the appraisal company.

5. Commissioners set up a system of follow ups to properly appraise new and remodeled properties as well as other changes in the Fair Market Value.

Mr. Kornegay stated that Lincoln County can come under system voluntarily now. In a short time he expects this new program will be mandatory. He further stated that after a while it is expected that the Legislature will set the percentage of Fair Market Value that will be assessed. Some thirteen counties have currently agreed to come under the program.

This system as set out in the new law will be a complete change from the time honored method of assessing property in New Mexico. Heretofore the taxpayer has told the tax assessor what the property should be assessed for. Unless the amount was completely out of all reason it was accepted. Almost no properties have ever been inspected to see what the property consisted of. Under the proposed system the taxable property would be inspected and compared with known sales as well as productive ability to provide a base for property tax. Rural land would be appraised on a formula based on productivity. This formula is now being worked up by the New Mexico State University. This is a most radical change for the New Mexico Taxpayer.

Bernalillo County is now in the process of reappraisal. The report on the reappraisal is to be in by December 31, 1966.

No other counties in the state have been through the complete process so no actual New Mexico experience has been seen to properly evaluate the new system.

A meeting is called for Tuesday, May 10, 1966 at 2:00 p.m. in Carrizozo in the County Commissioners meeting room to discuss this vital question. The Commissioners are to take action at this meeting as to whether or not they want to voluntarily come under the program.

The Commissioners are most anxious to have an expression of opinion from the taxpayers of the county on this most important issue.

Observe The Annual Clean-up Campaign In Ruidoso April 30-May 7

GAME AND FISH NEWS

Five inches of snow covered the ground Sunday in three-fourths of the area open to the spring gobbler hunt. Hunters found that secondary roads were impassable and primary roads were in poor condition because of the wet snow. The turkey's spirits were also dampened as few birds were taken Sunday.

Of the 953 hunters who received permits for this special hunt, 521 checked into the area over the weekend. Twenty-eight gobblers were checked during the first two days at checking stations in High Rolls and Mayhill.

From information received from hunters most of the birds were killed in the western half of the Sacramento Division of the Forest with Lightning Lake being the approximate center of activity.

Roy Owen, Cloudcroft District Officer, reported that if the weather remains clear the majority of the roads will be passable and that hunting should be very good.

Only one accident was reported during the first two days of the hunt. It occurred when a hunter was attempting to remove mud from his shotgun barrel with his finger. The gun was loaded. Subtract one finger. A number of vehicles were stuck one time or another but no one was reported lost. Fire conditions are at a minimum.

Bonito Lake To Open

The big news to southeastern trout fishermen is the opening of Bonito Lake on May 7. Water conditions are excellent and Charles Cockerell, Ruidoso District Officer, expects a "very large turnout for opening day and a good catch of rainbows." Opening days in past years have produced a large number of fish, many in the four to five pound class.

Best baits are expected to be salmon eggs and worms and red and white small daredevils the best lures. Fishing hours will be from 5 a.m. to 9 p.m. There will not be a fishing fee as in the past. Floating devices are not allowed if larger than a cork.

Campers will find new South Fork campground above the lake an excellent location, complete with several units of fireplaces and tables.

TOOK TWO TO LAND THIS ONE—This four pound bass was so tough it took two Ruidoso fishermen to land it at Elephant Butte—at least that's what Harry Whipple reported when he sent this photo of Dr. C. H. Tate and C. L. (Bones) Wright. The two men caught four bass averaging 4 lbs. and two walleyes averaging 3 lbs., Whipple also reported.

Tormenting Rectal Itch Stopped In Minutes

Science Finds New Healing Substance That Promptly Stops Itching and Pain of Piles

New York, N. Y. (Special) — One of the most common afflictions is a condition known as "itching piles." It is most embarrassing for the victim during the day and especially aggravating at night.

No matter what you've used without results—here's good news. For the first time, science has found a new healing substance with the astonishing ability to promptly stop the burning itch and pain. It actually shrinks hemorrhoids—without surgery. Medical science has proved this substance produces a remarkably effective rate of healing. Its germ-killing properties also help prevent infection.

In one hemorrhoid case after another "very striking improvement" was reported and verified by a doctor's observations. This improvement was maintained in cases where a doctor's observations were continued over a period of months! Among these sufferers were a wide variety of hemorrhoid conditions, some of 10 to 20 years' duration.

The secret is this new healing substance (Bio-Dyne®) — discovery of a world-famous research institution. This substance is now obtainable in *ointment or suppository form* known as *Preparation H®*. Ask for Preparation H Suppositories (convenient to carry if away from home) or Preparation H Ointment with special applicator. Available at all drug counters.

Valley of Fires State Park To Be Dedicated May 6

Horsemen, have you seen our horseman's bar where you get saddles, stirrups, cinches, bridles, reins, blankets, many other such needs. Pay us a visit. Gambles.

JANET BUTTS 4-H CLUB MEMBER OF THE MONTH

Janet Butts, 4-H Club Member of the Month from the Hondo Valley 4-H Club, is especially proud of this ribbon as she likes to sew. Janet is in the second year of 4-H work and is taking Home Living III and Fat Lamb. Along with her sewing she also knits.

Last year she took two second place ribbons with her fat lambs at the county fair.

Janet is a freshman in high school and is the daughter of Mr and Mrs. George Butts of Tinnie.

GETS AWARD—Janet Butts, left, talks with Mrs. Pacheco about winning blue ribbon at dress revue last Saturday. Both are of Hondo.

Valley of Fires State Park, 460 acres of malpais stemming from an ancient lava flow, will be dedicated May 6 on US-380 three miles west of Carrizozo.

The park will be the 17th in the growing state system. The State Park and Recreation Commission has installed 20 individual camping-picnicking shelters with tables, benches and fireplaces, a group shelter with a capacity of 100 persons, six fiberglass toilets, a water system and playground equipment at a cost of $25,000.

The park's first custodian, Guadalupe Ortega, is on duty at the site.

The park is on an elevated "island" in the huge lava flow area that extends from north of Carrizozo southwest through a valley toward Tularosa.

Indian legend holds the area once was a "Valley of Fire." A great eruption turned the land into many fires. Red hot lava flowed like water, searing everything before it. The river of fire, steam and smoke surged down the valley.

A fire simulating the ancient volcanic eruption will burn during the dedicatory program.

The main speaker will be Lt. Gov. Mack Easley of Hobbs. Also set to speak are John L. Gray, Deming, chairman of the State Park and Recreatiin Commission, and John Elliott, state parks superintendent.

Also taking part will be Carrizozo Mayor Leandro Vega, Sr. and Capitan Mayor J. C. Germany. Carrizozo and Capitan high school bands will play before the program begins. Carrizozo Boy Sciuts will raise the colors.

Capitan Couple Gets Benefits Jointly From Social Security

In order to better acquaint the people of Lincoln County with the benefits provided by the 1965 amendments to the Social Security Act, two Capitan residents—Mr. and Mrs. Manuel G. Miller—have consented to the publication of facts about themselves and their social security benefits.

Isabel Duran and Manuel Miller first met in 1906 while attending school at Capitan. Eleven years later they were married. In addition to their two daughters and five sons, they have 14 grandchildren.

Their lives have been similar in many other respects. They both applied for social security numbers on the same day; they worked together at the same salary—working at Ft. Stanton for about 20 years; they retired at the same time; they were born the same year; and their social security benefits are the same.

As a result of their earnings, each began receiving $100.60 per month from the Social Security Administration starting Feb. 3 of this year. The Millers are eligible for these benefits because they worked a sufficient length of time under social security, have reached retirement age, made application to the Social Security Administration (at which time they proved their dates of birth), and are no longer working for earnings of over $1500 per year.

In addition to the cash benefits under social security, starting July 1 the Millers also have hospital and "doctor bill" insurance under the Medicare provisions of the law. Should they become ill, most of their hospital and doctor bills will be paid for by Medicare.

Student Of The Law

FROM ALAMOGORDO DAILY NEWS — MAY, 1965)

Judge George L. Zimmerman has been selected from more than 260 applicants to attend the 1965 session of the National College of State Trial Judges which will be held at the University of Colorado School of Law during July.

Judge Zimmerman is one of seventy-five who will receive a fellowship from money provided by the W. K. Kellogg Foundation to cover the essential expenses of his participation.

The National College effort grew out of the work of the Joint Committee for the Effective Administration of Justice which was chaired by the Honorable Tom C. Clark, Associate Justice of the United States Supreme Court.

Through seminars conducted on a state and regional basis, the Joint Committee gathered the information about judicial skills necessary to an educational effort. This information and experience is now being made the subject for instruction at the College.

Mr. Justice Clark who serves as chairman of the governing board of the College stated that, after examining the applications, he was impressed with the high quality of the judges who applied and is looking forward to having them in attendance.

County Agent's Report

— By — RALPH DUNLAP

Spray your apple trees with Guthion, phosphamidon, DDT, or lead arsenate when 85 to 90 percent of the flower petals have fallen. This petal-fall or calyx spray is the first step in a sound, seasonal worm control program. A recommended poison, applied when most of the blooms are gone, fills the calyx with poison. The calyx of the apple is the favorite spot for first generation codling moth worms to enter the apple. If the calyx is filled with poison, the young apples are protected from the first wave or brood of worms that hatch in the spring.

Use a fine mist, high pressure spray when applying insecticides. Thorough coverage is essential to fill the calyx ends of the newly formed apples. A fine mist spray is the only spray that will thoroughly wet and cover an apple tree with poison. Enough spray to wet all fruit, leaf and bark surface is also essential. It takes at least 10 to 15 gallons of spray to completely wet a 12 to 15-year-old apple tree in the petal-fall stage.

Speed or air blast sprayers must be driven slowly enough so that they have a chance to wet the trees completely. Adjust the speed and output of air blast sprayers so that at least 300 gallons of diluted spray is applied per acre of mature apple trees. If concentrate sprays are used, be sure that the correct amount of insecticide is applied per acre.

Examine your orchard before you spray. If bees are still active on the trees, don't spray until bee activity is at a minimum. If weeds or cover crops are in bloom—mow them! Protect bees that are collecting pollen and nectar in your orchard. Check leaves for aphids, spider mites and powdery mildew and twigs, cracks and pruning wounds for wooly apple aphids.

Guthion or phosphamidon will control codling moth worms, leafrollers, tent caterpillars and light to moderate infestations of spider mites and wooly apple aphids.

DDT and lead arsenate will control worms but they will not control aphids or spider mites. When using DDT, it is advisable to add a poison such as diazinon, ethion, parathion, Trithion or Systax to control mites and wooly aphids.

If spider mite infestations are heavy, then Kelthane, Morocide, Tedion, Trinthion, or Systox should be included in the first codling moth control spray. If wooly aphids are a serious problem, then BHC, diazinon, or Systox should be added to the Guthion, DDT or lead arsenate spray. If aphids and mites both are a serious problem, Systox should be added to the worm control chemical that you use.

Check Jonathan, Rome Beauty and Golden Delicious varieties closely for powdery mildew on young tender terminal growth. If you find 15 or more infected terminals per tree, add wetable sulfur or Karathane to the petal-fall or calyx spray.

To give apples continued protection against worm and other pests, spray the trees again in ten days and then apply a third cover spray 14 days after the second spray. These three sprays will protect the young fruit from the first brood of worms and will cut down on the second brood of moths which start emerging in mid-summer.

SUMMER SIZZLE JUST AHEAD

Time to have your electric air conditioning equipment checked

For extra comfort and economy this summer, have a qualified air conditioning serviceman check your electric air conditioning equipment. He'll see to it that your equipment is properly lubricated and adjusted and has just the right amount of refrigerant. He'll clean clogged filters, too, to assure the free air flow needed for maximum operating efficiency. Your electric air conditioning equipment will soon be workng longer and harder to keep you cool, so it's a good idea to have that maintenance check now. And now's the time, if you need additional cooling equipment, to see your air conditioning dealer.

Candidate's Stand on Issues:

1. Not entirely. The present personnel system, like all systems, can be improved upon. It is difficult for a person who must answer directly to the voters to not be able to hire the personnel he needs. One of the failings of the present system is that too much emphasis is put on education and not enough on the actual ability to perform the job. It tends to become loaded with people who can make good grades on tests, but have personality or other traits that prevent them from actually being able to do the work.
2. Of course, the Constitution can be revised in some respects. However, I would suggest extreme caution in throwing away a tried Constitution in favor of new untried provisions. As a practical matter, I doubt that it can be amended only as by a piece-meal process.
3. I have no strong feelings either way on pre-primary conventions. They do result in a lot of wasted effort. I think actually we should have either the complete convention system or the open primary, but not a combination of both.

Candidate's Stand On Issues

1. Please indicate the aspects of U.S. Domestic Policy with which you are most in agreement; those of which you are most critical.

The amazing growth of the American economy over the last six years is, to a significant extent, the result of policies and programs of the Administration which I largely favor. I endorse the Administration's efforts toward improving the health and educational opportunities of all Americans, as well as its goals in civil rights. I do not support extensive government controls on agriculture; rather, I favor flexible, free-market farm programs.

2. Please indicate the aspects of U.S. Foreign Policy with which you are most in agreement; those of which you are most critical.

Democratic and Republican Administrations and Congresses have approved programs to assist poor nations toward fulfilling their expectations of a better life for their people. I concur in that policy recognizing, however, limitations as to what we can expect to accomplish. I concur in maintaining military strength sufficient to keep the peace while seeking ways to reduce the danger of widespread war. I am unhappy with policies which over-extend our resources when we have urgent needs at home.

3. What do you envision as the role of the Federal government in meeting problems of urban areas?

Our large cities face a severe problem in obtaining sufficient revenue to meet urgent needs for schools, mass transportation, low-cost housing, health facilities and other public services. The Federal Government's role, it seems to me, is two-fold: To provide financial support (with local and state sharing) and technical assistance for relieving these problems.

POSITION 1

Democrat

Thomas G. Morris

Thomas G. Morris, Tucumcari. Education: Graduate of The University of New Mexico, Class of 1948. Received a B.S. Degree in Civil Engineering. Occupation: Rancher and Farmer. Additional training and experience: Service in the New Mexico House of Representatives from January, 1953, to December 31, 1958, chairman of the New Mexico Interstate Streams Commission.

I am completing my eighth (8) year as a Member of Congress. Member of the House Committee on Appropriations which funds all Federal expenditures. I am a member of the Joint Committee on Atomic Energy, and Chairman of its Subcommittee on Communities and Facilities.

CANDIDATE'S STAND ON ISSUES

1. Please indicate the aspects of U.S. Domestic Policy with which you are most in agreement; those of which you are most critical.

The 89th Congress has a good record of accomplishments, including enactment of the Elementary and Secondary Education Act of 1965, the "Medicare" Program, and the Voting Rights Act of 1965. I feel that each of these measures, in its own right, will make great progress towards a better life for all of our citizens. I am proud to say that I cast my vote in favor of all this legislation. I am generally in favor of the "War on Poverty" Program. However, I realize that it is yet in its stage of infancy and that additional time will be required before a thorough evaluation can be made of it.

I spoke on the Floor of the House August 18, 1965, in opposition to H.R. 9811, the "Omnibus Farm Bill."

2. Please indicate the aspects of U.S. Foreign Policy with which you are most in agreement; those of which you are most critical.

At the present time, the implementation of U.S. Foreign Policy in Vietnam is the most critical issue. Let me affirm that my position regarding our policy in Vietnam is that I support President Johnson and the Joint Chiefs of Staff. This does not mean necessarily that I would have made exactly the same decisions had the responsibility been mine. This is a political war just as much as it is a military war, and each day that our armed forces engage in combat there clearly demonstrates not only our intention to honor our commitment to the Vietnamese people but the determination to remain there long enough to safeguard their freedom of choice which is equally important.

3. What do you envision as the role of the federal government in meeting problems of urban areas?

I feel that the Federal Government must play a leading, but not a dominant, role in meeting problems of urban areas. The extensive shift in our population to urban centers has produced many serious problems that must be faced head on and solved. These problems are national in scope as well as local, and the solutions must come about by dual responsibility of the Federal and local governments.

POSITION 2

E. S. Johnny Walker

E.S. Johnny Walker, Silver City. Education: Graduate Albuquerque High School. Attended University of New Mexico, Albuquerque. Occupation: Presently United States Congressman from New Mexico. Additional training and experience: Former State Representative of New Mexico (2 terms); Former Land Commissioner, State of New Mexico (8 years); Former Commissioner Bureau of Revenue, State of New Mexico; Former Director of Oil and Gas Accounting Commission, New Mexico; Former Member Oil Conservation Commission, New Mexico; Former Member State Forestry Commission, New Mexico; Former Member State Investment Council, New Mexico; PRESENTLY SEEKING RE-ELECTION to second term as United States Congressman from New Mexico (At Large).

CANDIDATE'S STAND ON ISSUES

1. Please indicate the aspects of U.S. Domestic Policy with which you are most in agreement; those of which you are most critical.

I am in accord with the Domestic Policy in regard to expansion of programs in the field of education, in the fields of water and soil conservation, and the advancement of health programs for the older citizens as well as the expansion of our medical schools. I am most critical of reinstatement of excise taxes, and the reduction in expenditures for local projects that are needed by our own people while providing large expenditures in foreign aid.

2. Please indicate the aspects of U.S. foreign policy with which you are most in agreement; those of which you are most critical.

I am in agreement with the U.S. foreign policy concerning Viet Nam, and want us to contain the threat of Communism in its present boundaries. I am most critical of the large expenditures made in foreign aid for I believe much of this money is misappropriated and misused, and often going to countries that are not even friendly to us.

3. What do you envision as the role, if any, of the federal government in meeting problems of urban areas?

With the establishment of the Housing and Urban Development Department, I believe that we can look for a larger role in the Federal government's participation in helping the urban areas rehabilitate and renew their areas. However, I am not for rent subsidies.

Schuble C. Cook

Schuble C. Cook, Albuquerque. Education: I received a Bachelor of Science in Electrical Engineering from the University of Washington in December 1959. Occupation: I am an Electrical Engineer at Sandia Corporation where I have worked since graduating from the University of Washington. Additional training and experience that adds to your qualifications for this office: I have worked for good candidates and good government since 1948. I am a veteran having served in the United States Navy from 1952-1956. I was honorably discharged at the rate of Electronics Technican First Class. I have a long standing interest in good honest government.

CANDIDATE'S STAND ON ISSUES

1. Please indicate the aspects of U.S. domestic policy with which you are most in agreement; those of which you are most critical.

I am in agreement with federal involvement in problems that are clearly federal responsibility, and very much for repayable student loans for higher education. I agree with the organized federal highway and conservation projects. I am most critical of the very poor management and great waste in so many of our government projects. It is a mistake to take the responsibility away from local government and place it in the hands of Washington bureaucrats as is being done by the present administration.

2. Please indicate the aspects of U.S. foreign policy with which you are most in agreement; those of which you are most critical.

I agree with U.S. support of the U.N. but not as the almighty world law. I agree with responsible foreign aid to genuine allies that are in need, however, I am definitely against aid of the type where we give fighter planes to Yugoslavia. The United States needs clearly-defined and clearly--stated objectives in Vietnam that are clear to friend and foe alike if we are to limit the chances of miscalculation by the enemy and are to rally maximum support from our allies.

3. What do you envision as the role of the federal government in meeting problems of urban areas?

The United States government should strive to become and act as a knowledgeable consultant to the state and local governments on the solutions to the problems of urban areas. These problems should be controlled and alleviated by the state and local governments.

POSITION 2

Robert C. Davidson

Robert C. Davidson, Albuquerque. Education: Graduate Omaha Central High School, American Institute of Banking. Attended Baker University and Southern Methodist University. Occupation: Insurance agent since 1937.

CANDIDATE'S STAND ON ISSUES

1. Please indicate the aspects of U.S. domestic policy with which you are most in agreement; those of which you are most critical.

I favor Federal-individual-state cooperative programs, water cleanup, reclamation, conservation, tax cuts, job-creating anti-poverty programs, manpower retraining, highway construction, GI benefits, military space developments, separation of church and state. I oppose inflationary spending, excessive anti-poverty bureaucracy, secrecy in Government, black-jacking of Congress, rentcare, guaranteed annual income, federalized education, higher taxes without spending cuts and one-party Government.

2. Please indicate the aspects of U.S. foreign policy with which you are most in agreement; those of which you are most critical.

I favor: Judicious use of foreign aid, mutual defense alliances, Peace Corps, technical assistance to emerging nations, use of surplus food to alleviate hunger abroad. I oppose: drain on gold supply through imbalance of payments, dissolution of NATO and SEATO, lack of respect of allies, ineffectiveness of Alliance of Progress, soft loans through international financing agencies, waste in foreign aid, lack of information, trust in Communist agreements.

3. What do you envision as the role of the federal government in meeting problems of urban areas?

The urban areas of the United States pose a unique and difficult problem. Attempts at urban renewal have reduced local tax rolls, increased dependence on Federal Aid. It is obvious that cities have not had leadership in solving their problems. The Federal Government has moved into the leadership vacuum, and through matching fund programs has stimulated local financial participation in solving problems. It is apparent that raising city taxes accelerates flight to the suburbs. Since 70 per cent of the population will reside in the cities within a decade, it is apparent that larger portions of tax revenues will be applied to urban problems. I do not favor programs that set up "freeloader" generations living on Federal handouts. The Federal Government must be firm while helpful, generous but demanding of results.

JOHN BURROUGHS

John Burroughs, Portales.

Governor Burroughs graduated from Texas Tech with a degree in vocational agriculture. He took graduate work at New Mexico State University and Colorado State University. After teaching school at Los Lunas and Clovis, he worked for a major oil Company in its sales division.

John Burroughs is a businessman whose interests range from radio broadcasting to farming and peanut processing plants.

He has been a resident of New Mexico for about 40 years.

He established a peanut processing mill in Portales in 1942, and he has been instrumental in building the peanut industry in Roosevelt County to a point where it now is a major source of that area's income. In addition to his peanut plants, he operates an irrigated farm and owns radio stations in Albuquerque, Portales, Roswell, Santa Fe and Farmington. He is a partner in a Texas radio station at Muleshoe.

Prior to serving as Governor, John Burroughs served in the State Legislature, representing Roosevelt County. He served during the 1947 session. He was elected to serve as Governor during 1959-60. A life-long Democrat, Gov. Burroughs was coordinator in New Mexico for the successful campaign of President Lyndon Johnson

Candidate's Stand on Issues.

1. While serving as Governor, I implemented the State's First Personnel Act. I believe the Personnel System must be strengthened by providing in-service training for State personnel. Also steps must be taken to raise the salaries of State employees to attract better qualified people.

2. I believe the State Constitution needs revision. Ideally, I prefer a Constitutional Convention to make the needed revisions. However, until a Constitutional Convention becomes a distinct possibility, I believe the present work of the Constitutional Revision Committee should be continued. The piecemeal legislative process is necessary to carry out some of the proposals of the Constitutional Revision committee. Certain steps are necessary before Constitutional changes can be made, in lieu of the Constitutional Convention.

3. I do not favor the pre-primary convention, as we now know it. The added expense is a great burden on candidates and it stretches out the time for campaigning over too long a period. The pre-primary convention does have the merit, however, of eliminating the so-called "dummy" candidates put into the races to confuse the voters without serious intentions of serving in office.

Member of Carlsbad Chamber of Commerce, and a past state director of the Junior Chamber of Commerce. Active in Kiwanis and in a wide variety of civic and service organizations. Member of the Eddy County, New Mexico, and American Bar Associations.

Candidate's Stand on Issues.

1. Yes. I advocate improvement of the existing personnel system. In-service and on-the-job training must be emphasized. Salaries must be made competitive with those of other units of government. And the personnel system should become part of the state constitution.

The cost? I expect a saving. Better pay for experienced people costs far less than high turnover. Able and experienced people in state service mean better state government.

2. Yes, if elected governor, I will ask for and press for a Constitutional Convention. The amendment procedure has not and will not work. I definitely favor necessary constitutional revisions to bring our state government into the present, and permit it to function adequately in challenging years ahead.

3. No.

I served on the Board of Directors of the Valencia County Fair Commission and have served four terms as Chairman of the Republican party of Valencia County. I am a member of the Knights of Columbus, Council 641 in Albuquerque, and am a Fourth Degree Knight.

Candidate's Stand on Issues.

1. I am in favor of a personnel system in this State; however, I do not agree with the present system. No County Chairman should be appointed to head the various departments in our State government. Our present administration uses these as political "plums." This, I believe, should be set up according to individual ability from the ranks on up.

2. I believe the Constitution of our State needs revision; however, I must give further thought as to which method would be preferable for the people of the State. I do not agree with piecemeal legislative process.

3. I am opposed to the Pre-Primary Convention. I feel we must have either the direct primary or the Convention system. We should not have both.

Jack Jones has developed a businessman's approach to economically sound government. His executive ability and leadership have been proved in every venture he has undertaken in New Mexico.

Candidate's Stand on Issues

1. The present personnel system, while relatively new, should be a mainstay in developing sounder and more efficient government for New Mexico.

2. No nation or state could survive through years of activity on an original charter. As times change and men develop in government, there are bound to be changes in a constitution which need revision...thus we have amendments. I believe a Constitutional Revision Committee can best study the matter, present it to the State Legislature, the Governor should call for a Constitutional Convention, the recommendations of the convention thoroughly explained to the public and then have the voters act upon them.

3. I believe the pre-primary convention has at least two very valuable qualities. These are that it permits a precinct worker the opportunity to know intimately the views of all candidates and permits a precinct person to work closely within his own party; also the pre-primary normally precludes any attempt to "load" a ballot with unqualified candidates, thus giving the voter the opportunity to cast his ballot for candidates he knows are qualified.

(B) Practical - 7 years as a wholesale salesman (groceries). 7 years as a wholesale oil dealer. 12 years in sales and management responsibility in the insurance field. 8 years experience, to the present, in trust banking.

Banking, Trust Officer. Over 37 years, continuously.

Over 30 years experience in corporate procedure including administrative work, program layout and the study of legal instruments. I have written a series of six published articles on subjects in the trust banking field. During the past 8 years I have made over 50 lectures to various groups on "New Mexico Community Property Law", "Laws of Descent and Distribution", "How to Plan a Will", and "The Probate Process, With or Without a Will".

My 8 years of trust and estate administration work has required a close cooperation with lawyers and the reading of hundreds of legal documents.

The most valuable thing have learned is to seek legal counsel BEFORE trouble occurs.

Candidate's stand on Issues 1. Yes. It is the only personnel system we have that was provided for political employees with legislative approval. It is subject to (or should be) improvement as we discover its weaknesses.

2. Yes - because our Constitution was written in 1913 before many of our present facilities, customs and practices were existent. In many instances the constitution can and does prevent the enactment of proper statutory laws.

(b) My recommendation is to continue with the plan we have started and in which we have made good progress. This plan, briefly, is:

1- The legislature authorized a "Constitutional Revision Study Committee" about two years ago.

2- This committee has been very active in its study, is well staffed and is doing excellent work.

3 - My information says that this committee will report its findings to the legislature and recommend to that body that:

a. The legislature call or provide a Constitutional Convention to set up the machinery to revise or rewrite the Constitution. b. The committee will recommend writing a completely new Constitution. c. If and when these things are done the new or revised document will be submitted to the legislature and then to the voter for adoption.

3. Yes, until we develop (if ever) a candidate qualification method of some kind.

The direct primary may be considered to be more democratic because it spawns a greater number of candidates. But, most of these are not qualified to fill the position they seek and often are running as a "protester".

My belief that our present drift away from a strong two party system is so disgusting to enough people that their personal participation in precinct meetings, county conventions and state conventions will be felt. The trend toward participation is growing.

Politics is poison. Good government results when the aroused citizen provides the antidote. To stay aroused is to stay well.

Mr. Edward E. Triviz
Attorney at Law
300 South Water Street
Las Cruces, New Mexico

Dear Ed:

I am sure you understand how pleased I am that you have filed as a Democratic candidate for District Judge.

I talked about you many times with Senator Carl Hatch before he left the Senate and I know how greatly he admired you and how anxious he was that I get you as a member of my staff when I got to the Senate. I was glad to do it and I was rewarded by a very fine job on your part. When Judge Hatch became a Federal Judge in Albuquerque he continued his admiration for you and spoke of your many times to me. I, naturally, have been pleased to watch your career and to know the member of fine things you have done as a citizen, as a lawyer in the community and as chairman of the New Mexico Constitutional Revision Commission.

Your decision to run is almost an assurance that you will be elected, and your many friends in Washington and across the state of New Mexico will be highly pleased at your success. If I can help in any way I will be glad to do so because I am really grateful to you for offering yourself for service as a District Judge in your home area.

Sincerely yours,
Clinton P. Anderson

Dear Ed:

I want to extend my congratulations to you for filing as a Democratic candidate for District Judge.

I have watched your career since you worked for Senator Hatch here in Washington and later for Senator Anderson. Since you entered law practice, you have become one of the leading members of the Bar in Dona Ana County. As a lawyer, I have considered you one of the bright young men of the Bar in the State of New Mexico for quite a few years.

Cool Springtime Best For Shots

Dr. J. K. Fair, District Health Officer, has requested that all school children needing booster immunizations and re-vaccinations should consult their local health office or family physician this month. "It is not advisable," Dr. Fair said, "to take some of the immunizations during the extremely hot, summer months. Yet, we would like for all children to be completely immunized before school begins in September."

The New Mexico Law and the State Board of Public Health requires that all children in public, private, and parochial schools be immunized against diphtheria, tetanus (lockjaw), whooping cough, polio and smallpox. A certificate showing these immunizations must be presented to the school on admission. Children entering the first grade must furnish proof that all these series are completed. "It takes several months to complete these immunization series," Dr. Fair continued. "For this reason, it is advisable that immunizations begin now so that the child will be ready to enter school in September."

It must also be pointed out that adults, as well as children, need continuous immunizations, especially against smallpox, diphtheria and tetanus. These boosters should be given every five years at a minimum throughout the lifetime. It is also important that adults receive the Sabin Oral Polio Vaccine. Booster doses of this for adults are not necessary under unusual circumstances. Three oral doses usually offer lifetime protection. The antibodies produced by other vaccines gradually decrease in the body or "wear out." The vaccine must be repeated at intervals to provide continued protection. "If more parents would accompany their children for immunization, we would have fewer problems with these diseases which do occur in this area," Dr. Fair commented.

Gardner Assumes Curator Duties At Old Lincoln

Paul Gardner has assumed his duties as curator-custodian of the courthouse museum in Lincoln. These duties include not only the directorship of the museum, but also the general supervision of the Wortley Hotel, the Tunstall-McSween store, the torreon and other historical monuments under the control of the Old Lincoln County Memorial Commission.

Gardner was born in Boston where he attended the local schools and then enrolled at the Massachusetts Institute of Technology to study architecture. This schooling was interrupted by World War I when he entered the regular army in the Coast Artillery Corps and spent two years of service in France as a Captain and was awarded the French Decoration of the Croix de Guerre with Palm.

On his return to civilian life he spent several years at the George Washington University where he received his B. A. and M. A. in history. Later he attended the Fine Arts Department of Harvard University studying museum directorship and was also awarded a M. A. degree. Additional art history courses were taken at the University of Paris.

In 1931 he was called to Kansas City to supervise the architectural completion of the William Roskhill Nelson Gallery and to initiate the collections there which now rank among the ten leading museums of the United States. He was appointed Director in 1933.

These duties were interrupted by World War II when in 1942, Gardner was given a leave of absence to join the Allied Military Government of the Army. He spent three years in Italy as a Lt.-Col., supervising the Monuments and Fine Arts section and worked in Naples, Rome, Florence and Genoa.

In 1941 he purchased the Las Milpas ranch at San Patricio as a summer home. The almost one hundred year old home said to have been frequented often by Billy the Kid—was entirely restored and Gardner retired to it when he left the Nelson Gallery in 1953. Since that time, he has spent his winters in Europe and his summers in San Patricio and for several years he directed the pageant of The Last Escape of Billy the Kid.

Gardner has extensive plans for creating greater interest and attendance at the Courthouse Museum. These include special guided visits for school children, changing and temporary loan exhibitions of all branches of history and art. The Courthouse Museum is open daily and a cordial invitation is extended to everyone.

ASPEN TIME—This panoramic view of the White Mountains, made from a Jeep on a forest trail shows golden aspen shining in the sun in October—the time of year Ruidoso stages its colorful autumn festival—the annual Aspencade. Mountain roads open many golden vistas for visitors and homefolks during the tangy, zestful fall season.

FRIENDS:

I've had so many inquiries as to why my name isn't on the Primary Ballot as a candidate for Justice of the Peace that an explanation is in order. The early part of this year I changed my registration from Independent to Democrat and the Attorney General ruled that a person must be registered for over a year in a party before running for office. However, I am eligible to run for office in the November General Elections so at that time I will be seeking your support as a write-in candidate for Justice of the Peace of Precinct No. 19. Your interest is sincerely appreciated.

COLOR WITHOUT CABLE A WASHOUT
DON'T HANDICAP YOUR TV . . .
120 HOURS OF COLOR PROGRAMMING CAN BE YOURS
With the increase in color TV purchases at a headlong pace, you should be aware of the importance of a strong input signal at the "front end" of a color television receiver! Double the input strength and you splash strong hues and deep pigments, five fold, as stated and proven by engineers and technicians.
The true appreciation of gorgeous deep tones of natural color is directly dependent upon the "beginning signal." Since your TV CABLE COMPANY has increased this areas' Microvolt input strength from way below normal to above normal, you can expect the best color signal and truly enjoy over 120 hours of color-casting weekly.

Hollis Cummins stopped in to see us last Monday on his way to Ruidoso from Capitan

Mmes Harold Clary and J. B. Hightower spent Wednesday in Roswell

Terry Halladay of Ruidoso and his house guest, Dan Deaver, came by to see us Friday.

Jerry Van Rice of El Paso came home with Mr. and Mrs. Van Herrod on Friday. His parents, Mr. and Mrs. Jerry Rice came up from El Paso on Sunday for a few days stay.

Mmes. Joe Wiggley and Lyda Peebles were here on Saturday from Alamogordo. They went over to the Nogal Camp Grounds for "Work Day."

Sunday we were blessed with a wonderful rain—it continued all during the day. This should be a great thing for our cattlemen as this rain will do a great deal to improve the pasture land for spring and summer.

The Reagan Legg family of Midland was here the past week-end.
