Proprietor.

SURPLUS WATER ONLY WILL BE USED BY CO.

The Bonito water supply has been a question of common discussion since the railroad company has completed its pipe line, and more especially since the irrigating season opened and the company began to irrigate its farms. The water in the river, however, was never more abundant at this season, and the company states, through its general manager, that it will discontinue to use the water for irrigating purposes at any time there fails to be a surplus. Attorney G. B. Barber, of Lincoln, has been appointed to look after this particular feature, and his acquaintance with local affairs and his associa-

Baseball--Double-Header.

The failure to play ball at Fort Stanton last Sunday, as scheduled, on account of rain, induced the contestants to arrange a double game—one for tomorrow at Capitan and one at Stanton the day following. Saturday night a dance will be given at the school house, to which a cordial invitation is extended to all.

tion with the people of the lower valley should be a guarantee that the rule will be strictly followed. This information came in a letter, which, by permission, is hereby reproduced:

El Paso, Texas.
April 28, 1908.

Mr. G. B. Barber,
Attorney at Law,
Lincoln, New Mexico.

Dear Sir:—

You are hereby authorized, in the event there is any shortage in the supply of water available to and needed by the appropriators below the Reservation during the coming season, to control the amount which shall be used by Mr. Pfingsten, Superintendent of the Company's farms above the Reservation, to the extent of discontinuing the use of same on the farms entirely, if doing so would result in increasing the available supply for the people within the section named. I have today issued instructions to Mr. Pfingsten that you have been authorized to control this matter, and be guided by your instructions when made.

Very truly yours,

(Signed) H. J. SIMONS,
Gen'l. Manager.

NOTICE TO VOTERS.

Notice is hereby given that there will be a Precinct Convention of the DEMOCRATIC VOTERS OF PRECINCT No. 14, in Lincoln County, New Mexico, at Wetmore's Hall, at 7:30 P. M., May 13, 1908, for the purpose of electing Four (4) Delegates to the County Convention to be held at Lincoln, N. M., on May 16, 1908, for the purpose of electing Delegates to the TERRITORIAL CONVENTION AT ROSWELL, on June 10, 1908.

(Signed) B. F. GOFF,
Committeeman.

Democratic Primary Call.

The Democratic voters of Precinct No. 9 are hereby notified that a primary is hereby called at the school house at 2 o'clock P. M., Monday, May 11, 1908, for the purpose of electing five (5) Delegates to the Democratic County Convention at Lincoln, N. M., May 16, 1908, at which place Delegates will be chosen to represent Lincoln County in the Territorial Democratic Convention at Roswell on June 10, 1908.

(Signed) Jno. A. HALBY,
Committeeman.

A report comes from Las Cruces that Delegate W. H. Andrews of Albuquerque has announced himself as a candidate for re-election to congress, and expects to make an active canvas of the territory at once. He will make an effort to have the delegates to the territorial convention instructed for him. This bit of news is almost too good to be true. A better man could not be nominated by the republicans, from a democratic point of view, as it would mean the election of any man the democratic party nominated for that office. The people of New Mexico know Andrews too well to be hood-winked for the third time.

Interest in the Thaw case will be revived this week, when his lawyers, by habeas corpus proceedings, will endeavor to secure his release from the Mattewan asylum for insane. District Attorney Jerome will oppose his release on the ground that he is insane, and would be a menace to the community if allowed to run at large. Evelyn, who is suing for a divorce and alimony on the ground of his insanity, and who would feel more secure with Harry in Mattewan, may be requested to take the stand. The trial will cost New York state \$30,000, and there is a belief that Thaw will be given his freedom.

LIGHTING THE ROOM

A MOST IMPORTANT FACTOR IN THE HOME.

Side Lights Increase Apparent Size of Apartment—Kerosene Still Used for Reading Lamps—Fernery for Dining Table.

Of the various problems of furnishing a house, the question of lighting is an important factor. For rooms of some height it is generally agreed that the invisible source of light is the best. This means concealed lights, high above the eye, that reflect upon the ceiling and then throw a soft light down over the whole room. High ceilings, however, are not built in the ordinary house, and, therefore, would be impracticable for domestic use. The apparent size of rooms in an apartment or house may be considerably increased by using side lights instead of the regulation chandelier. A pair may be placed near the piano, another over a corner seat or against a bookcase, and so on, to give light where specially needed.

Some consider, however, that a house is not properly lighted where side fixtures alone are used. Low central lights are often a necessity, and these requirements are best met by lamps or drop-lights. Even where electricity and gas are used, kerosene is still popular. It provides a steadier and softer light for reading. Many of the lamps of to-day are handsome to look at, but give a poor light for reading or sewing. No form of electric bulb has yet been designed that in its unshaded form is beautiful or artistic. The ordinary bulb needs a covering that will give beauty, and the shade must be carefully considered.

Nothing gives the dining table a more cheerful appearance than a few flowers or a fernery. So popular has the custom become that the filling of ferneries is a large part of the florist's business. They should be made with an outer and inner receptacle. The inner case can be taken out and removed from the table whenever watering is necessary. Stand the ferns in the dish first and then carefully fill in the soil between the plants, pressing it down firmly and evenly. Ferns will not grow in the common garden soil, but should have rich soil from the woods. The common hardy greenhouse varieties are the best plants to buy. Whatever receptacle is selected it should not be less than three inches deep.

Several new and attractive sandwich fillings are suggested: Take green peppers, remove seeds, chop fine and simmer for ten minutes in butter. Add a dash of salt and cool. Spread between thin slices of lightly buttered bread; cover with a layer of grated American cream cheese.

Mince fine cold boiled ham, chop fine some peanuts, using half the amount of ham. For every cupful of ham use a heaping tablespoonful of minced sour pickles and half a cupful of chopped celery. Mix to a good paste with salad dressing.

Chop very fine blanched almonds, add cream cheese and chopped olives.

Apple Marmalade.

Pare, quarter, and core apples and cook until tender, adding only enough water to prevent burning. Press through a sieve and weigh. To each pound add three-fourths pound granulated sugar and the juice of one lemon. Cook, stirring constantly, until the mixture will coat the spoon and drop from it in beads. Put into heated jars.

Creamed Carrots.

For creamed carrots, pare and cut in slices, put on in cold water. When they come to a boil pour off and cover with boiling water and boil till tender, adding salt when half done. Melt a tablespoonful of butter, stir in a heaping tablespoonful of flour and add one and one-half cupfuls of milk. Stir till it thickens and add salt and pour over carrots. Do parsnips the same way.

Safe Place.

"It states here that bulldog shoes are in fashion again," remarked Mr. Stubb as he perused the "latest styles for men" column.

"That so?" laughed Mrs. Stubb incredulously. "Why—er—where does a bulldog carry his shoes?"

"Don't you know, Maria?"

"No, John."

"Why, in his grip, of course."

LUMBAGO

This is really Rheumatism of the Muscles of the Loins and is characterized by a severe, at times, agonizing pain in the small of the back, allowing the sufferer scarcely a moment's rest, while the ailment is at its worst. It can come from cold, exposure to draft, from getting wet feet or wearing wet or damp clothing. It causes acute suffering, and if allowed to become chronic it may permanently disable the sufferer. The way to secure quickest relief is to redden the skin over the painful part by rubbing with a flesh brush or piece of flannel rag, and then apply ST. JACOBS OIL by gentle friction with the hand.

Red-Headed Boy Still Busy.

"What," asks the Wyoming Tribune, "has become of the old-fashioned freckled-faced boy who got the water, chopped the wood, split the kindling, milked the cows, fed the pigs, curried the horse and did such other chores as his parents found for him to do?" He's probably being kept busy handing his lazy son money with which to buy rolled-up trousers and cigarettes.—Denver Post.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and restoring nature to doing its work. The proprietors have watched their cure in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CURENEY & CO., Toledo, O. Sold by all Druggists, etc. Take Hall's Family Pills for constipation.

Where They Would Meet.

A news item published in the painters' column of the Cleveland Citizen recently has called forth widespread comment. The statement read:

TAKE NOTICE.

We will meet in the big hall, usually occupied by the plumbers.

In a Pinch, Use ALLEN'S FOOT-EASE.

A powder. It cures painful, smarting, nervous feet and ingrowing nails. It's the greatest comfort discovery of the age. Makes new shoes easy. A certain cure for sweating feet. Sold by all Druggists, 25c. Accept no substitute. Trial package, FREE. Address A. S. Olmsted, Le Roy, N. Y.

Hen Was Above Reproach.

Lodger—This egg is stale.
Landlady—Impossible, sir. Why, I would stake my existence on that hen.
—Ellegende Blatter.

"Brown's Bronchial Trochae"

have a direct influence on the throat, relieving Coughs, Hoarseness and Throat troubles. Free from opiates.

A Man of the Times.

A young fellow lived in Sweden, who said: "Life in these times is bunk; Quite plainly I see They've waited for me To give them of wisdom a chunk."

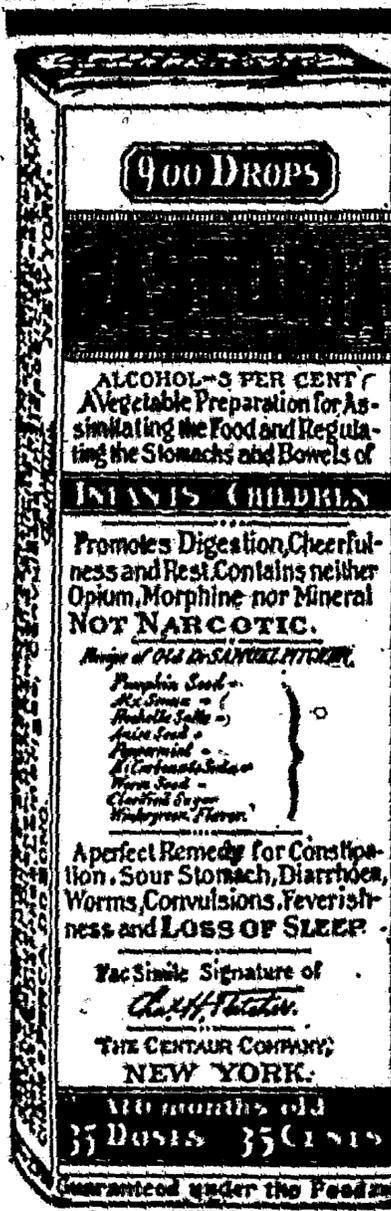

Public Land Opening.

Irrigated under "Carey Act." Low cost; easy payments. Write for date of drawing and full information, Irrigation Department, 406 Home Ins. Bldg., Chicago.

TEN YEARS OF BACKACHE.

Thousands of Women Suffer in the Same Way.

Mrs. Thomas Dunn, 153 Vine St., Columbus, Ohio, says: "For more than ten years I was in misery with backache. The simplest housework completely exhausted me. I had no strength or ambition and suffered headache and dizzy spells. After these years of pain I was despairing of ever being cured when Doan's Kidney Pills came to my notice and their use brought quick relief and a permanent cure. I am very grateful."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

To refuse to yield to others when reason or a special cause require it is a mark of pride and stiffness.—Thomas a Kempis.

"SPECIAL MERIT" SCHOOL SHOES

"WEAR LIKE IRON"

Mayer "Special Merit" School Shoes are expressly made for the hard knocks and severe wear of healthy, romping school children. They are made of thoroughly seasoned upper leather and tough, old-process and lime-seasoned soles, the strongest and most durable material obtainable—that's why they "wear like iron."

Plenty of room for growing feet, specially shaped shoes, strong enough for the hardest everyday use, dressy enough for Sundays.

Your dealer will supply you; if not, write to us. Look for the name and trade-mark on the sole.

F. Mayer Boot & Shoe Company MILWAUKEE, WIS.

FERRY'S SEEDS

For freshness, purity and reliability, Ferry's seeds are in a class by themselves. Farmers have confidence in them because they know they can be relied upon. Don't experiment with cheap seeds—your security lies in buying seed sent out by a painstaking and trustworthy house.

Ferry's Seed Annual for 1914 is FREE. Address: H. M. Ferry & Co., Detroit, Mich.

SOME ARMY DISHES

RECIPES TAKEN FROM UNCLE SAM'S COOKBOOK.

Many Among Them May Be Novelties to Housekeepers of This Section — "Jambalaya" a Spanish Creole Preparation.

The army cookbook contains many recipes that sound strange in some sections of the United States, because the dishes have been learned in Texas and Mexico. They comprise jambalayas, and chili con carne, and tortillas and many other novelties.

A jambalaya, which is a Spanish Creole dish, is made by frying some sausage, cut up ham, onions, tomatoes, red pepper and parsley in a little "meat drippings" or other fat. Boiling water is then added and some rice; the pot is covered and it is set back to cook slowly. It is salted to taste. A jambalaya can be made from chicken in place of the sausage, and oysters or shrimps may be used.

For proportions smaller than given in the book for the soldiers use a half pound of rice that has been washed and soaked for an hour, a half pound of ham cut small, one onion, one tomato, a quarter of a pound of sausage cut up, a small piece of red pepper pod and a sprig of parsley.

Instead of baking the heart of veal or beef creatures the hearts may be stuffed and steamed first and then browned in the oven and rich gravy made for them. Some persons think them quite like duck if the same kind of savory stuffing be made. Another way is to cut them fine and stew them with onion, celery, etc.

To refer again to the cookbook issued by the commissary general of subsistence there is a recipe for cooking hearts by stewing them, which sounds so well, put together that it would not be a hardship to partake of it. The heart is to be cut into small pieces and all tough parts removed. Then it must be washed in cold salted water. The meat is then to be put in a pot of cold water with two teaspoonfuls of salt and covered closely. The gum must be taken off as it rises and the meat removed after ten minutes' cooking. The liquor must be strained and the pot washed out before the liquor is returned to it. Add the pieces of meat, a pound of potatoes sliced thin, two medium-sized onions cut fine, one head of celery cut fine or one level teaspoonful of celery seed, half a pound of fresh tomatoes, canned tomatoes or three tablespoonfuls of tomato ketchup, two bay leaves and some cayenne pepper, a little chopped parsley and butter or clarified beef drippings the size of an egg. All these are to be stewed together until they are tender, stirring now and then. Season with pepper and salt and serve. A little browned flour may be used for thickening the stew, or if it has boiled away too much, add some water.

Hearts are not in general use for food, and at a public table recently when the waiter announced the choice of meats for dinner there was questioning and surprise openly expressed the word "heart" being repeated as if the diners had never heard of it. Of course the hearts of chickens are included in giblets.

Carrots may be boiled in stock. The gravy must be made thick with a little flour, seasoned well with pepper and salt and some ketchup poured over the carrots.

Potatoes Once Boiled.
If you have a quantity of cold boiled potatoes and wish they were hot, put the usual amount of water in a pot on the stove. Let it come to the boiling point. Drop the cold boiled potatoes into the water, if possible without lowering the temperature. If the potatoes are small boil for five minutes; if large, boil for ten minutes. In this way they will not have a warmed-over taste but will be as white and mealy as when freshly boiled.

Something New Under the Sun.

A lady in Illinois sent us 12c a year ago for our remarkable collection of vegetable and flower seeds and sold \$37.76 worth therefrom, or made 314%. That's new. Just send this notice with 12c and receive the most original seed and plant catalog published and

Above is sufficient seed to grow 35 bu. of rarest vegetables and thousands of brilliant flowers and all is mailed to you **POSTPAID FOR 12c**, or if you send 10c, we will add a package of Berliner Earliest Cauliflower. John A. Salzer Seed Co., La Crosse, Wis. K. & W.

Surely a No-Account Dog.

A man in Missouri recently sued a railway company for damages for the death of a hound killed on the track, says the Youth's Companion. The company defended itself upon the following points:

Said dog was chasing a rabbit up defendant's tracks in violation of the game laws.

Said rabbit lived on defendant's right of way, and was therefore the property of the defendant.

Plaintiff's dog was a trespasser, and was hunting defendant's property without permission.

Said deceased was not much of a dog, anyhow, or it could easily have kept out of the way of defendant's trains.

And having fully answered, defendant prays to be discharged.

Toole's Practical Joke.

John Lawrence Toole, the most popular low comedian of his day, once gave a supper to 80 of his friends, and wrote a note to each of them privately beforehand, asking him whether he would be so good as to say grace, as no clergyman would be present. It is said that the faces of those 80 men as they rose in a body when Toole tapped on the table, as a signal for grace, was a sight which will never be forgotten.

Nothing is more amiable than true modesty, and nothing is more contemptible than the false. The one guards virtue, the other betrays it.—Fenelon.

MUSIC STUDENTS

Should Have Steady Nerves.

The nervous system of the musician is often very sensitive and any habit like coffee drinking may so upset the nerves as to make regular and necessary daily practice next to impossible.

"I practise from seven to eight hours a day and study Harmony two hours," writes a Mich. music student. "Last September I was so nervous I could only practise a few minutes at a time, and mother said I would have to drop my music for a year."

"This was terribly discouraging as I couldn't bear the thought of losing a whole year of study. Becoming convinced that my nervousness was caused largely by coffee, and seeing Postum so highly spoken of, I decided I would test it for a while."

"Mother followed the directions carefully and I thought I had never tasted such a delicious drink. We drank Postum every morning instead of coffee, and by November I felt more like myself than for years, and was ready to resume my music."

"I now practise as usual, do my studying and when my day's work is finished I am not any more nervous than when I began."

"I cannot too highly recommend Postum to musicians who practise half a day. My father is a physician and recommends Postum to his patients. Words cannot express my appreciation for this most valuable health beverage, and experience has proven its superiority over all others." "There's a Reason."

Name given by Postum Co., Battle Creek, Mich. Read "The Road to Wellville," 14 pgs.

Proof is inexhaustible that Lydia E. Pinkham's Vegetable Compound carries women safely through the Change of Life.

Read the letter Mrs. E. Hanson, 304 E. Long St., Columbus, Ohio, writes to Mrs. Pinkham:

"I was passing through the Change of Life, and suffered from nervousness, headaches, and other annoying symptoms. My doctor told me that Lydia E. Pinkham's Vegetable Compound was good for me, and since taking it I feel so much better, and I can again do my own work. I never forget to tell my friends what Lydia E. Pinkham's Vegetable Compound did for me during this trying period."

FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness or nervous prostration. Why don't you try it?

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

Announcements.

FOR COUNTY SURVEYOR.

The News is authorized to announce that W. H. Beaty is a candidate for re-election to the office of County Surveyor, subject to the action of the democratic party.

NATIONAL POLITICS.

The democratic national convention is less than two months in the future, the republican only a little more than a month; and speculation, which can only be act at rest by those conventions, continues rife, and the doubt that now exists as to who the nominees are to be will no longer be a doubt. Apparently, even now, there is little reason to doubt who they will be, but the wish being father to the thought, a respectable number of republicans profess to believe they have Mr. Taft defeated—a condition that is possible but hardly probable. A similar condition exists in the democratic party; but Mr. Bryan seems to have as firm a hold on the nomination from his party, notwithstanding the two-thirds rule, as does Mr. Taft on the party he seeks to represent.

Notwithstanding the belief that Mr. Taft will receive the nomination from his party, it must be admitted that his candidacy, at times, resembles the stock market in its "fluctuations." A week passes by and he has made a phenomenal gather of delegates, and the opposition all but loses hope; another week is numbered with the past and his chances are not so bright. Last week the secretary did not seem to be in the running; this week he has about captured everything in sight; and so it goes.

On the democratic side of the house there has been a slight change; although Bryan continues to strongly lead. 'Tis true some of the larger states have elected uninstructed delegations, which means, of course, that they are opposed to Bryan; and a few delegates have been instructed for favorite sons, like Gray and Johnson. New York, New Jersey, Pennsylvania and all the New England states will be opposed to Bryan's candidacy; while Delaware and Minnesota will support favorite sons. This opposition, however, will be ineffectual, unless other forces can be lined up, part of which must come from the south. It is believed the south will be solid for Bryan, with the possible exception of Virginia, and if this belief is well founded Mr. Bryan's nomination is assured.

Assuming this to be the true situation, we may reasonably expect to see William H. Taft receive the republican nomination in June at Chicago, and that

William J. Bryan will receive a like honor from the democratic convention when it convenes at Denver in July.

Each man has his strength and his weakness. Bryan will be handicapped by eastern opposition in his own party and the record of two defeats; his strength lies in his personal following—the greatest, perhaps, in the history of our country—and in the cause he advocates. Then again, democracy's cause is strengthened by the admission of the republicans that their theories of tariff, after an absolutely fair trial, have proven to be erroneous, and that the existence of a high tariff is not an infallible preventative for disastrous panics; and the republican party will be compelled to wear the same clothes in 1908 that they cut and fitted on the democratic party in 1896. Taft is weakened by opponents who resent the interference of the president in his behalf; the flagrant use of federal appointees to compass his nomination; the well known opposition of labor, and the animosity of the negro. On the other hand, he becomes heir to Roosevelt's popularity, and it must be admitted that the president is some pumpkins, even though he is not the popular idol that he was; and the secretary's announcement that, if elected, he will endeavor to carry out the president's policies; but his greatest strength, perhaps, is that he has shown himself to be a very able administrator, and is regarded as being more level-headed than his chief.

Each candidate will have loyal supporters; each candidate will have opposition in his own party; Bryan will be accused of disrupting the democratic party; the distressful panic through which we are passing will go hard with Taft; party lines will not be drawn as of yore, and the whole situation promises as pretty a political battle as the most exacting could desire.

We this week received a proposition to exchange a ten years subscription for one fully paid up, non-assessable share of stock of the par value of \$10, in a publishing house doing business less than one thousand miles from "the Home of the Apple." We have not yet answered the communication, but will probably do so and make a counter proposition, which may perhaps result in a trade. A ten years' subscription to this paper, at \$1.50 a year, amounts to \$15. A ten dollar share of stock in the company referred to might possibly net us 50 cents, which would leave a balance of \$14.50. Now if the gentleman accepts this proposition, we will, on receipt of \$14.50, be pleased to mark him paid up to May, 1918. Or we will make him another proposition: on receipt of one dollar and his block of stock we will mail him the News for one year and take chances on unloading the stock.

Harry Orchard's case will be taken up by the board of parsons of the state of Idaho this week. Orchard owns up to seventeen foul assassinations, and as many

more attempted assassinations, besides wrecking trains, dynamiting buildings, and other innocent pranks. Judge Wood, who was forced to condemn the fiend to death on his plea of guilty, said he believed he told the truth and recommended him to the mercy of the pardons board, who will no doubt act favorable on the recommendation. Orchard will be kept in the pen an indefinite period, and whenever it becomes necessary, in the wisdom of the powers that be, to railroad some "undesirable citizen" to the gibbet, Harry is liable to be called into court and asked to assist. One good turn deserves another, you know; and Harry has already been engaged to appear in court in Telluride, Colo., next month to testify against one Steve Adams, who is accounted an "undesirable citizen."

In another column will be found an article on poultry by Mr. Wm. Ewart, of Fort Stanton, which we believe will be of interest to many of our readers. Mr. Ewart is not merely a bird fancier but a practical poultry man, with experience and knowledge of the business. Mr. Ewart will contribute regularly to the News on poultry subjects, and deal with the origin of the various breeds, diseases and their cures.

Tax schedules can be had and returns made on application to Jno. A. Haley, deputy assessor, at his office at Capitan.

WELCH & TITSWORTH.

For Sale—A second-hand wind-mill at Welch & Titsworth's.

A ball game is scheduled for Saturday afternoon at Capitan between the home team and Fort Stanton.

Attorney A. H. Hudspeth was in Capitan Sunday night on his way from White Oaks to Lincoln to attend court.

A light sheen of snow fell here Tuesday morning, but in the mountains it was heavier, the snowfall being about four inches.

The old Southwestern depot building, now the Welch & Titsworth store, is being newly plastered and otherwise renovated this week.

Geo. A. Montgomery has opened a sample room opposite the News office, where he has on exhibition a number of different kinds of Carborundum grinding wheels.

The fishing season opens on the 16th, and the usual number of camping parties from outside the county may be looked for after that date, headed for the haunts of the finny tribe.

All kinds of weather visited this section the early part of the week, with the exception of good weather. Wind, snow, sleet and rain were the predominating features.

Several parties of tourists from Oklahoma came in on Monday's train, and left the same afternoon for Bonito, where they intend to remain during the summer, and maybe longer.

A. T. Roberts was over from Carrizozo Sunday and Monday, with a Colorado cattle dealer. They looked over several local herds and will likely buy those for sale in this section.

Louis J. Mundell and family were down from the Gallinas this week. Mr. Mundell, who is a ranger on the Gallinas reserve, came to report to Supervisor Kinney, and was accompanied by his family, which visited relatives here and at Lincoln.

A goodly number of admirers of the great American game went to Fort Stanton Sunday to see the Marines and Captains cross bats, but were disappointed, as the game was postponed on account of weather conditions.

Reports from the Ruidoso are to the effect that fruit along that stream is comparatively safe, the damage done by the late cold snap not being as great as was at first believed. At Glencoe a sixty per cent crop is expected.

A. C. Austin of the Bonito fruit farm, was in Capitan this week.

He stated that all fruit in his district is practically dead. He hopes, however, to harvest about ten per cent of an average crop. On the other hand it is reported that the fruit in the lower part of the county is safe, being injured but very little.

J. M. McNeill, of Bonito, was in Capitan Monday to meet his family who arrived here from Oklahoma. A wife and grown son, and two pretty little tots of three and four years respectively, composed the family. They left in the afternoon for Bonito, where they intend to spend the summer, camping and fishing on that beautiful stream.

The affairs of this school district have been handled very economically the last three years. Three years ago W. H. Fisher began his three year term, and since that time his associates on the board have changed several times, by resignation and removal from the district. The other two members, who, with Mr. Fisher, turned over the management of the district Monday evening to the new board, are Clement Hightower and L. F. Avent. Three years ago the district had a floating indebtedness of \$400, which has been paid, schools

have been conducted and their is now a balance to the credit of this district of over \$300.

Mrs. W. M. Reilly met with a very painful accident while on her way, in company with her husband, to Carrizozo on Monday's train. At Indian Divide, while switching, the engine gave the coach a severe jolt and Mrs. Reilly was thrown against a seat with such force that her spine was injured and she was otherwise hurt. She was brought home yesterday, and is resting as well as could be expected.

A wind storm that probably attained a velocity of sixty miles an hour, passed over this county Monday. It was ushered in Sunday afternoon by a rain, hail and sleet storm, and was followed by a frost that is believed to have nipped, in some places at least, the fruit that escaped the freeze of the previous week. A report from Angus states that on the morning of the 5th, the trees in the Bonito Park fruit farm were festooned with an inch of snow, and the mercury registered 35 degrees. The Captains were covered with a mantle of the beautiful also. The ground is full of moisture, and farmers say that a late spring means large crops. So the case might be worse.

THE CAPITAN NEWS

CAPITAN, NEW MEXICO.

Man's Contest with Nature.

The greatest of inventions is measured not by their ingenuity, nor by the fortunes they make for their originators, or others, for that is a small matter, but by the service which they render the public and by their influence on civilization. If inventions are to be measured by their effects by far the greatest in the history of the world was the invention of the steam engine. In 1769, the same year in which the duke of Wellington and Napoleon Bonaparte were born, James Watt produced his steam engine, which was destined to exert more influence in shaping the world's future than both of these great captains put together. From the beginning man has had to struggle with nature for his life, says the New York Weekly. She scorched him; she froze him; she starved him; she smote him with disease; she overawed and terrorized him; her winds buffeted him; her waters drowned him. Against the measureless forces of Nature he could oppose only his puny arm. On that arm he must rely to wrest from her food, fuel, raiment and shelter. Such was the unequal contest for thousands of years. But, to-day Nature is man's servant; her mighty forces do his bidding and run his errands.

Ten Thousand Dollar Men Wanted.

Mr. Edison takes a deep interest in young men and offers them much encouragement, says Success Magazine. "To-day is youth's zenith in this great country," is the way he cheers them on. "The United States is starving for ten-thousand-dollar men." Corporations are actually clamoring for them; and the younger the better. But the man to-day must be technically educated. Modern industrial, financial and commercial conditions are more complicated than ever before and it takes a trained mind and a level head to get to the front. The demand for educated men, chaps that have brains, exceeds anything that I have ever known. They are doing the work, too; that's why more are wanted. So now is the time for the man who is going to make something of himself to get busy. If he is any good he won't be out of a job long; not much. There is entirely too much work and too few of the right kind of persons to do it. If you don't believe it, take a peep into the gigantic plant of the Bethlehem Steel company. Yes, sir, we are starving for brains—for ten-thousand-dollar men, if that way of putting it appeals more strongly to the young American instinct."

The shine-your-boots industry appears to be flourishing famously. Substantial evidence of this is furnished by the fact that small spaces in the terminal buildings of the New York tunnels have been leased to a boot-blackening corporation for a long term of years at an aggregate rental of \$124,000. The notion entertained in some conservative quarters that the boot-black business had been ruined or seriously injured by the growing popularity of patent leathers and tans is evidently a pipe dream. It is flourishing more extensively than ever. Shine 'em up!

Those Pennsylvania students who put a cow into the girls' dormitory were way behind the times. Girls do not act as milkmaids any longer. The patient and uncomplaining milking machine attends to that romantic job.

FURNITURE FOR THE BEDROOM.

Bobinet One of the Best of Materials That Can Be Used.

Bobinet is a material that can be nicely used for a bedroom set. The bedspread and bolster case, dresser cover and wash stand cover and numerous little fancy-work articles can be made with this durable, washable material. Some pretty designs in corner pieces can be worked with very coarse cotton flous. Either white or a color may be used. The bedspread should have a flounce, edged with narrow lace, and the bolster or pillow shams must be lace edged. Place it over a pink alkaline cover.

Beautiful bedspreads can be made with lace curtains if four pieces can be found to match and pointed with strips of bobinet 16 inches wide. One curtain, if doubled, will make a neat bolster cover. The bolster being much neater than pillows, it can be made with muslin and filled with fine shavings. False pillow shams can be made on a light wooden frame, using thin pieces of wood like those placed in the bottom of window curtains. A square of muslin is tacked very tight to one side, then it is lightly padded with shavings or cotton, and a cover drawn over the top, and either glued or tacked in place. These false shams will not weigh over a pound apiece and a bed looks much neater if the lace shams have a substantial backing. These sell for two dollars in the furniture store, but any woman could make a pair at home.

HOUSEHOLD HINTS.

Never beat or stir cereals or rice with a spoon. It makes them pasty. Use a plated or a silver fork.

Cake icing will not crack when cut if a little thick cream is added to it. Allow one teaspoonful to each white of egg.

To prevent hands from getting cold while hanging up clothes, wipe hands dry and rub thoroughly with powdered starch.

Milk will immediately and effectually extinguish the flames from gasoline or any form of petroleum, since it forms an emulsion with the oil.

In washing dishcloths, instead of using soap or borax, put a quantity of soda in the water and boil the dishcloths. The grease and soda makes a soap that does its own work.

A good combination for serving in grapefruit glasses or shells is pineapple and grapefruit. Shred both fruits and mix with sherry and a little sugar. Decorate with two or three maraschino cherries and serve very cold.

Novel Hanging Basket.

Take a large, round sweet potato, remove the top for some distance down, remove the inside, leaving a wall all around and a thicker one at the bottom. Bore three holes at equal distances half-inch from the top. Into these put suspending cords which unite at top. Tie, fill with water even to the holes, place in a sunny window. It should be covered with green shoots in a few weeks. Some of the sprays can be trained upward, others allowed to droop. The red skin sweet potato has a pretty streak of silver in its foliage. Put a small piece of charcoal in the water to keep it pure. A carrot treated in the same manner sends forth a mass of lovely, feathery foliage not unlike a fern.

Kalsomined Room.

Rooms whose walls have been white-washed or kalsomined present a difficult problem when one wishes to paper them. The usual method is to size the walls with a sticky preparation of molasses, vinegar, milk or glue, to "kill" the lime so that the paper will stick. I have learned a much better way that has proved satisfactory. Simply wet up the usual paste with vinegar instead of water and add five cents' worth of glue for each ordinary-sized room. Brush the walls well with a dry broom to remove any dust or loose particles, put on the paper in the usual way, and be assured that it will stay there.—Good Housekeeping.

PERUNA EDITORIAL NO. 2.

Dr. Hartman has claimed for many years that Peruna is an EXCELLENT CATARRH REMEDY. Some of the doctor's critics have disputed the doctor's claim as to the efficacy of Peruna.

Since the ingredients of Peruna are no longer a secret, what do the medical authorities say concerning the remedies of which Peruna is composed?

Take, for instance, the ingredient HYDRASTIS CANADENSIS, OR GOLDEN SEAL. The United States Dispensatory says of this herbal remedy, that it is largely employed in the treatment of depraved mucous membranes, chronic rhinitis (nasal catarrh), atonic dyspepsia (catarrh of the stomach), chronic intestinal catarrh, catarrhal jaundice (catarrh of the liver), and in diseased mucous membranes of the pelvic organs. It is also recommended for the treatment of various forms of diseases peculiar to women.

Another ingredient of Peruna, CORYDALIS FORMOSA, is classed in the United States Dispensatory as a tonic.

CEDRON SEEDS is another ingredient of Peruna, an excellent drug that has been very largely overlooked by the medical profession for the past fifty years. THE SEEDS ARE TO BE FOUND IN VERY FEW DRUG STORES. The United States Dispensatory says of the action of cedron, that it is used as a bitter tonic and in the treatment of dysentery, and in intermittent diseases as a SUBSTITUTE FOR QUININE.

OIL OF COPAIBA, another ingredient of Peruna, is classed by the United States Dispensatory as a mild stimulant and diuretic. It acts on the stomach and intestinal tract. It acts as a stimulant on the genito-urinary membranes.

Useful in chronic cystitis, chronic dysentery and diarrhea, and some chronic diseases of the liver and kidneys.

These opinions as to the ingredients of Peruna are held by all writers on the subject, including Bartholow and Scudder.

OF HYDRASTIS, BARTHOLOW SAYS it is applicable to stomatitis

(catarrh of the mucous surfaces of the mouth), follicular pharyngitis (catarrh of the pharynx), chronic coryza (catarrh of the head). This writer classes hydrastis as a stomachic tonic, useful in atonic dyspepsia (chronic gastric catarrh), catarrh of the duodenum, catarrh of the gall duct, catarrh of the intestines, catarrh of the kidneys (chronic Bright's disease), catarrh of the bladder, and catarrh of other pelvic organs.

BARTHOLOW REGARDS COPAIBA as an excellent remedy for chronic catarrh of the bladder, chronic bronchitis (catarrh of the bronchial tubes).

BARTHOLOW STATES THAT CUBEB, an ingredient of Peruna, promotes the appetite and digestion, increases the circulation of the blood. Useful in chronic nasal catarrh, follicular pharyngitis (catarrh of the pharynx), increasing the tonicity of the mucous membranes of the throat. It also relieves hoarseness. Useful in atonic dyspepsia (catarrh of the stomach), and in chronic catarrh of the colon and rectum, catarrh of the bladder, prostaticorrhea, and chronic bronchial affections.

MILLSPAUGH, MEDICINAL PLANTS, one of the most authoritative works on medicinal herbs in the English language, in commenting upon COLLINSONIA CANADENSIS, says that it acts on the pneumogastric and vaso motor nerves. It increases the secretions of the mucous membranes in general. In the mountains of Virginia, Kentucky, Tennessee and Carolina, collinsonia canadensis is considered a panacea for many disorders, including headache, colic, cramp, dropsy and indigestion. DR. SCUDDER regards it highly as a remedy in chronic diseases of the lungs, heart disease and asthma.

These citations ought to be sufficient to show to any candid mind that Peruna is a catarrh remedy. Surely, such herbal remedies, that command the enthusiastic confidence of the highest authorities obtainable, brought together in proper combination, ought to make a catarrh remedy of the highest efficacy.

This is our claim, and we are able to substantiate this claim by ample quotations from the HIGHEST MEDICAL AUTHORITIES IN THE WORLD.

A New Bluff.

"Hello, your hair is full of sand."
"Yes, balloon ballast. It's the fashionable thing nowadays. Makes people think that one goes in for aeronautics, don't you know?"

WHAT CAUSES HEADACHE.

DISH FOR BREAKFAST

FRIED BREAD A SPLENDID ADDITION TO MENU.

New York Newspaper Bemoans Fact That This Delicacy Is Comparatively Unknown in the North—Cuban "Oyaida."

Visitors to New Orleans never fail to retain the most pleasant recollections of the hours spent at the old French market, and among these memories few are recalled with more genuine delight than those which bring back the scene of some quaint old coffee stall, with its great, thick cups of strong black coffee and its invariable accompaniment, a plate heaped high with that greatest of all attractions, fried bread, says the New York Times.

It is rather strange, in view of the fact that fried bread is eaten with such gusto in New Orleans, that it does not appear more frequently upon the breakfast tables in the north. Comparatively easy to make and a most delectable change from the ordinary round of rolls, toast and biscuits, it would appear as though the energetic housewife who is always on the lookout for novelties of a culinary character should be only too glad to take advantage of this opportunity to break the monotony of her morning menu.

And if you don't believe that it is good—this fried bread of the French market coffee stalls—just try it some morning when you have mixed bread and still some dough on hand. That is to say, instead of molding this dough into the form of biscuits, to be baked in the oven, shape it into oblong pieces about the shape of the regulation French roll and then drop them into deep fat, to fry to that attractive brown tint that is recognized as the proper hue for doughnuts. Served with coffee and plenty of fragrant butter, they will prove a delight to the heart of the most morose of pessimists until life to him will seem actually worth living.

Still another delectable breakfast bread is the "oyaida," or fried bread, that is so invariable a part of every morning's repast in Cuba. To make this bread mix two cupsful of flour with the well-beaten yolks of two eggs and a generous tablespoonful of lard. Salt the mixture a little and stir the ingredients together thoroughly. When well mixed, add enough water to make a dough, but keep working it over and over until it shows by its texture that it is extremely light. When this result has been secured, roll the dough very thin, and, having cut it into small cakes, either round, square or oblong in shape, fry them in deep fat. Serve them as hot as possible, sprinkling them, if desired, with powdered sugar.

Flooring.

The fact that each of the familiar and long-tried materials for covering the walls and floors of bathrooms, and lavatories has at least one serious shortcoming has led to the introduction of a patent sanitary structural glass. It is milky white in color, and comes in thickness of half an inch, the slabs being otherwise almost unlimited in size. This insures ease of setting, and the least number of joints in the finished room. The material will not swell or shrink, craze or discolor, and is absolutely non-absorbent, which is more than can be said for marble. When used for floors it is given a thumb-nail polish (similar to statuary marble), while the highly polished variety is used for walls.—Indoors and Out.

Apple Chutney.

Chop and mix together 12 peeled apples, two green peppers, one cup of seeded raisins and one large onion. Into this mixture stir a pint of vinegar, the juice of three lemons, two cups of brown sugar, one tablespoonful of salt and one tablespoonful of ginger. Scald all together, pack into jars and seal.

HOW TO KNOW PURE PAINT.

A Way in Which It May Be Identified Before Using.

After a building has been painted long enough for a weather test, it is easy to tell if the paint used was made of pure White Lead or not. But such belated knowledge comes like locking the barn after the colt is stolen.

What one wants is a test that will tell the quality of the paint before it and the labor of putting it on are paid for.

Nature has provided a way in which genuine White Lead may be positively distinguished from adulterated or fake White Lead before you spend a cent on your painting.

Pure White Lead is made from metallic lead, and, under intense heat, such as is produced by a blow-pipe, pure White Lead will resolve itself back into metallic lead. If, however, it is not genuine White Lead, or if it contains the slightest trace of adulteration, the change will not take place. Therefore the "blow-pipe" test is an absolute and final one.

The National Lead Company are urging everyone interested in painting to make this test of paint before using it, and they guarantee that the pure White Lead sold under their "Dutch Boy Painter" trade-mark will always prove absolutely pure under the "blow-pipe" or any other test. To make it easy for you to perform the experiment they will send you free upon request a blow-pipe and everything necessary for you to make the test, together with a valuable booklet on paint. Address, National Lead Company, Woodbridge Building, New York City.

Result of Business Growth.

Recently a livery firm in a southern town built a one-story frame addition to its stable for the accommodation of wagons, etc. Jerry, the night watchman, whose long service has convinced him that he is part proprietor of the concern was overheard explaining the matter to a couple of inmates in this wise:

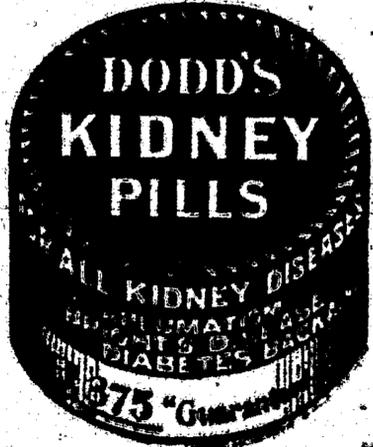

"Yes, our business done conered so dat we's been obliged to build dis hyar substantial in do reah!"

EYESIGHT WAS IN DANGER

From Terrible Eczema—Baby's Head a Mass of Itching Rash and Sores—Disease Cured by Cuticura.

"Our little girl was two months old when she got a rash on her face and within five days her face and head were all one sore. We used different remedies but it got worse instead of better and we thought she would turn blind and that her ears would fall off. She suffered terribly, and would scratch until the blood came. This went on until she was five months old, then I had her under our family doctor's care, but she continued to grow worse. He said it was eczema. When she was seven months old I started to use the Cuticura Remedies and in two months our baby was a different girl. You could not see a sign of a sore and she was as fair as a newborn baby. She has not had a sign of the eczema since." Mrs. H. F. Budke, LeSueur, Minn., Apr. 15 and May 2, '07."

There is nothing to be gained by being a knocker.

"SINNER" CAN COME AGAIN.

Thief's Visit Resulted in Nice Margin of Profit to Farmer.

If there are any more chicken thieves like the one who entered his hennery three weeks ago, Thomas Ingraham of Park Mills, N. Y., will gladly furnish a chart of the grounds and guarantee to tie up the dog. A few mornings ago Mr. Ingraham entered the hennery, and to his amazement found a dozen fowls in place of the ones that he had missed after the visit of the thief. He also found hanging to a nail in the building a scrawl which said: "Mister Farmer, I was wicked when I stole them chicks of you, but wringed their necks when I hooked 'em from the roost, so could not put 'em back. Am awful sorry I done it, and will prove what I say by bringing you other chickens which I never stole. Them I took were common chicks, these are blooded. Never will I steal any more. Sinner." With such a conscience, the sinner's resolution is evidence of good business judgment, for Mr. Ingraham says the fowls he received are worth at least twice as much as the ones whose necks were "wringed" when they were "hooked."

ONLY ONE "BROMO QUININE"

If afflicted with Thompson's Eye Water

W. N. U., DENVER, NO. 12, 1908.

Tonsilitis is swelling and inflammation of the glands at the side of the throat.

Sloan's Liniment

used as a gargle and applied to the outside of the throat reduces the swelling and gives instant relief.

For Croup, Quinzy Sore Throat, Branchitis, Asthma, Pain in Chest or Lungs this liniment is unsurpassed.

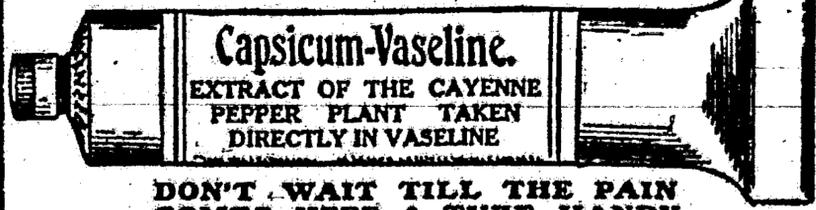

Sloan's Liniment is indispensable when travelling because it is penetrating, warming, soothing, healing and antiseptic.

Price 25¢, 50¢ & \$1.00
Dr. Earl S. Sloan, Boston, Mass. U.S.A.

NO MORE MUSTARD PLASTERS TO BLISTER

THE SCIENTIFIC AND MODERN EXTERNAL COUNTER-IRRITANT.

DON'T WAIT TILL THE PAIN COMES—KEEP A TUBE HANDY

A QUICK, SURE, SAFE AND ALWAYS READY CURE FOR PAIN.—PRICE 15c. IN COLLAPSIBLE TUBES MADE OF PURE TIN—AT ALL DRUGGISTS AND DEALERS, OR BY MAIL ON RECEIPT OF 15c. IN POSTAGE STAMPS.

A substitute for and superior to mustard or any other plaster, and will not blister the most delicate skin. The pain-allaying and curative qualities of the article are wonderful. It will stop the toothache at once, and relieve Headache and Sciatica. We recommend it as the best and safest external counter-irritant known, also as an external remedy for pains in the chest and stomach and all Rheumatic, Neuralgic and Gouty complaints. A trial will prove what we claim for it, and it will be found to be invaluable in the household and for children. Once used no family will be without it. Many people say "it is the best of all your preparations." Accept no preparation of vaseline unless the same carries our label, as otherwise it is not genuine.

Send your address and we will mail our Vaseline Booklet describing our preparations which will interest you.

POULTRY COLUMN.

By
WILLIAM EWART,
FORT STANTON, NEW MEXICO.

Member of Scottish and Canadian
Poultry Breeders' Association.

MAKING HENS LAY.

There is one method of inducing hens to lay that is reliable at all seasons, provided the hens are not out of condition. When they refuse to lay, and the farmer has provided them an abundance, he should withhold all other food and allow an ounce of lean meat or cut-bone twice a day, fed raw. Lean meat and cut bone will induce laying when other foods give no result. Meat is, apparently more costly than corn or wheat, but if the farmer is not receiving eggs from his hens he is losing money and time.

If meat will induce the hens to lay, then the cost of the meat is returned when the eggs are sold. It is apparent to all farmers (as the fact has been demonstrated repeatedly) that when the hens are not laying they may cost fully as much for maintenance as though they were profitable. This lack of profit is not always the fault of the hen, but rather in the management. Too much of one kind of food and not enough of another may be the cause of the hens not laying, although they are apparently receiving the best of care. It is not suggested that lean meat be given exclusively, as such feeding is going to the other extreme. Feed a variety, but do not overlook meat as a portion of the ration.

DISEASES OF POULTRY.

Prevention of disease lies in care and cleanliness.

Most of the diseases of poultry are caused by neglect and filth. This may be disputed by many, but nevertheless it is true.

The great advancement which has been made by scientists in the study and investigation of the cause, origin and source of disease, the discovery of the specific germs, microbes and bacteria which are constantly associated with these disorders; the fact that an animal inoculated with the fluid containing the germs or microbes identified with a disease from which another animal is suffering and that the disease is reproduced in the inoculated animal; the well known contagiousness of certain diseases, and their transmission from one animal to another, either by contact, contamination of food, drinking water or the atmosphere, can only be explained by what is now a question of dispute—the specific

organism, or microbe, the causation poisonous agent of that particular disease, conveyed and communicated to each other by means of the agencies just mentioned.

In the light of this knowledge, the "germ theory of disease" applies to the lower order of animals as well as the human, and a proper appreciation of the means and methods of preventing the development or afterward destroying these germs of disease is of paramount importance to the breeder of poultry. For quite often the prompt isolation of an infected bird and thorough and vigorous disinfection of all surroundings will prevent a spread of the disease and save his flock from total annihilation.

There are certain agencies which produce the death of these germs, render them inert and powerless to develop disease. These are sunshine, fresh air, perfect cleanliness, the free use of certain chemical compounds, as carbolic acid and its modifications, bichloride of mercury, boiling water, etc. There are many good disinfectants on the market, and by using any one of these freely a great deal of disease may be avoided.

The principal disease to which poultry is subject and appropriate treatment I will briefly describe.

DIARRHOEA

most common complaint in New Mexico.

CAUSE:—Sudden change in diet or weather.

TREATMENT:—In the beginning it may be checked by giving two or three meals of well boiled rice, dredged with flour or powdered chalk. A diet of boiled oatmeal or barley meal is very effectual.

SHERIFF'S SALE.

H. B. HAMILTON, JR.,
Administrator et al., Appellee,
vs. NO. 1178,
EAGLE MINING & IMPROVEMENT
Co., Appellant.

By virtue of a writ of execution issued out of the Supreme Court of the Territory of New Mexico, dated the 6th day of March, A. D. 1908, to me directed, whereby I was commanded that of the goods and chattels, lands and tenements of the Eagle Mining & Improvement Company, in my County, I cause to be made the sum of Eight Thousand Nine Hundred and Thirty-Three and 60-100 (\$8933.60) Dollars, with interest thereon from the twenty-eighth day of August, A. D. 1907, at the rate of six per cent per annum, which by the judgment of the said Supreme Court, Humphrey B. Hamilton as Executor recovered against the said the Eagle Mining & Improvement Company.

I, the undersigned sheriff of Lincoln County, New Mexico, have levied upon and will sell on the 25th day of May, A. D. 1908, at the hour of 12 o'clock noon, at the front door of the Lincoln County Court House, at

Lincoln, New Mexico, at public auction for cash to the highest bidder, all the following described lands and tenements, mines, mining claims, and mining rights and privileges and interest therein, within the said County of Lincoln, of the said the Eagle Mining & Improvement Company, to-wit:

All the interest of said Company which said interest does not exceed a 1/2 half interest in and to that certain mine or mining claim known and called as the "Hopeful Mine," which said mine was patented by the government of the United States of America to R. C. Parsons, by patent duly issued on August 3, 1892, and filed for record in the Recorder's office on October 15, 1895, and duly recorded in Book D at page 522, of the records of Lincoln County, New Mexico, said patent being described in the record of said patent and Land Office as Number 652 A. and 652 B. and to which reference is hereby made for a more full and complete description of said mine and mining claim; Also all that interest not to exceed a 1/2 half interest in that certain mine and mining claim, known as the Hopeful Millsite, which said Millsite is patented in connection and conjunction with the said Hopeful Mine, and is fully and particularly described in the above described patent to said Hopeful Mine;

Also the following described mining claims:

Lady Frances Mine; Buckshot; Etta Emma Mine; Bismark No. 1 Mine; Bismark No. 2 Mine; Silver King Mine; Rising Star Mine; which said several mines and mining claims are located adjoining and near the Hopeful Mine, and each of which said mining claims is more particularly described in the several Location Notices, of said several claims now on record in the Recorder's office of Lincoln County, New Mexico, and to which reference is hereby made for a more full and complete description of said mining claims;

Also the Golden Placer; Bon Ton; Haven, Independence; Fay; Mint; Top of the Morning; Only Chance; Topnot; Top; Mandrake; Red Jacket; Jocker; Stanton; Venus; Warsaw; Jennie; Amazon; Good Fortune; Red Bird; Little Hubert; Queen of the Hills; Wedge; Max; Thrifty Millsite; Legal Tender; Climax; Savage; Wild Irishman; Mammoth Giant; Phoenix; Cabin view; Lone Pine; El Plata; Grande Lode; Iron Mask; Monument Lode; El Oro Lode; Castle Rock Group comprising Castle Rock; Pyramid; Monument; Sphinx; El Oro; El Plata; Granite; Iron Mask; Cleveland; Chicago, New York; Porphyry; Gallinas; Oso; Indiana; Illinois; Gold Bug; Gold King 12-18-94; Ohio; Turkey Placer; Big Buck; White Pine; Potato Placer; Two Districts; Iowa; Excelsior; Little Fortune; Realto; Verness; Expansion; Dream Placer; Imperial; White Cloud; Raven; Blank Tiger; Washington; Jasper; Little Annie; Mountain Lion; Spider; North American; Oregon; Lost Pine; Main; Dolittle; Alabama; Deer Head; Clifton; McKinley; John D. Lee; Jenner;

To satisfy said judgment for Eight Thousand Nine Hundred and Thirty-Three and 60-100 (\$8933.60) Dollars with interest thereon from August twenty-eighth, 1907, together with all costs of execution of this writ.

Dated this 21st day of April, A. D. 1908.

JOHN W. OWEN,
Sheriff, Lincoln County,
New Mexico.
By E. C. SMITH,
4-24-5t. Deputy.

CONTEST NOTICE.

Department of the Interior,
United States Land Office,
Roswell, New Mexico, April 11, 1908.

A sufficient contest affidavit having been filed in this office by J. L. Crawford, contestant, against Homestead Entry No. 1275, made March 11, 1907, for 80 A. 3/4 & 3/4 Sec. 13 and E1/2 NW1/4 Section 24, Township 10 S., Range 13 E., by Joseph H. Williams, contestant, in which it is alleged, under date of March 10, 1908, that said Joseph H. Williams has wholly abandoned said land, by in the month of July, 1907, leaving said land and going to the State of Texas, and not being upon said land at any time since said abandonment took place as aforesaid; that said Williams left no family upon said land and that at the time he departed for Texas as aforesaid, he sold all his improvements upon said land to one W. G. Wear, who removed said improvements off said land; and that said alleged absence from the said land was not due to his employment in the Army, Navy or Marine Corps of the United States in time of war; said parties are hereby notified to appear, respond, and offer evidence touching said allegation at 10 o'clock a. m. on June 15, 1908, before W. B. Kimbrell, Probate Clerk, at Lincoln, N. M., (and that final hearing will be held at 10 o'clock a. m. on June 22, 1908, before the Register and Receiver at the United States Land Office in Roswell, N. M.)

The said contest and having, in a proper affidavit, filed set forth facts which show that after due diligence personal service of this notice can not be made, it is hereby ordered and directed that such notice be given by due and proper publication.

3-3-4t. HAROLD HORN, Receiver.
