VOLUME 12.

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, JANUARY 5, 1912.

NUMBER 49

Absolutely Complete Election Figures.

The following gives the exact result on state officers at the November election:

For Governor:	
McDonald	31,036
Bur-sum	28,019
McDonald's maj.	3017
For Lieutenant Gov.	
E. C. De Baca	29,642
Martinez	28,906
De Baca's maj.	736
For Secretary of State:	
Lucero	29,692
Romero	28,932
Lucero's maj.	760
State Auditor:	
Sargent	29,574
Delgado	29,133
Sargent's maj.	441
For Treasurer:	
O. N. Marrow	29,867
Mirabal	28,977
Marron's maj.	890
For Atty. General:	
Clancy	30,162
McGill	23,721
Clancy's maj.	1441
For Superintendent of Public Instruction	
A. N. White	29,521
Stronp	29,410
White's maj.	111
For Land Commissioner:	
Ervien	29,704
Emerson	29,242
Ervien's maj.	538
For Judges Supreme Court 3 to Elect	
Roberts	29,681
Hanna	29,674
Parker	29,583
Wright	29,541
Burkhart	29,453
Dunn	29,423
For Corporation Commissioners 3 to elect	
Williams	29,835
Groves	29,783
Van Stone	29,451.
Armijo	29,108
Martinez	28,577
O. L. Owen	28,509
Sol, Owen	1,032
For Congressmen: 2 to elect	
Curry	30,162
Fergusson	29,999
Baca	28,636
Valverde	28,353

It is impossible to give here every county officer's vote but if the reader wants the figures on any particular race, he can obtain them by asking

CAPATAN, N. M.

Taft in Race to Stay.

Washington, D. C., Jan. 3 - "Nothing but death can keep me out of the fight now."

President Taft is reported to have made this statement to white house callers today and to have added that he had no objection to the statement being made public.

The president is said to be thoroughly aroused to the gravity of the situation in the Republican party and determined to let his attitude be generally understood. He has declared that under no circumstances will he withdraw his name from consideration by the Chicago convention next June, and has asserted that his position with respect to the nomination has not changed in any particular since he first entered the white house.

The president was urged by a number of his closest friends to make a definite statement as to his position and agreed to do so in the language quoted above.

With this statement as their inspiration, it is said the Taft supporters will at once begin an active campaign in his behalf.

It was said today that some of Mr. Taft's friends have gone so far lately as to advise him openly to break with colonel Roosevelt and to challenge the latter to make plain his intentions. The president has declined to do this. The white house has been fairly flooded with with callers lately who have brought word to president Taft that colonel Roosevelt so far has declined to say that he would not accept the nomination if it were tendered to him.

The president has been urged for weeks to make a more aggressive campaign in his own behalf. He has replied that he did not think political activity comported with presidential dignity. He now has consented that his friends carry forward the fight as vigorously as they desire and he will lend what assistance he properly can.

Teachers' Examination.

The regular mid-winter examination of teachers will be held at Carrizozo, New Mexico, on Friday and Saturday, January 12th and 13th, 1912. All permits expire on the date of the examination, as do, also, all third grade certificates issued in January, 1911, and all teachers who hold these classes of certificates, and who expect to continue teaching, are required to secure a certificate at this examination. The issuance of two successive permits is prohibited by law: hence the necessity for holders of permits to secure certificates in order to receive salaries from the public school fund. The Territorial Board has planned to furnish questions for first, second and third grade certificates. The examination will begin at eight o'clock Friday morning, and a specially allotted time will be given each subject until the examination is completed.

JNO A. HALEY,

Supt of Schools.

Carrizozo, N. M., Jan. 2, 1912.

WOMAN'S ABILITY.

The late Premier Stolypin's recognition of the capacity of women for public business took a very practical form, which is pleasing to the women of Russia in general as well as to the strong-minded Dowager Empress. It is displeasing to men who are candidates for official honor, as it makes women in certain cases their successful rivals. It is true that by an amendment ordered after the original promulgation of the order only one in five of the civil service staff can be a woman; nor can a woman rise higher than the seventh of the twelve ranks in the service, says the Milwaukee Evening Wisconsin. So men will continue to monopolize the coveted title "High Excellency," and the chance that a woman will be a cabinet minister is very remote. One noteworthy feature is that women receive the same pay as men in positions of equal rating. Women officials are to receive full pensions, even if they marry before leaving the service, and their children will get the same pensions as if they had fathers in the service. When both parents serve, they will get almost double pensions. In all cases, the women are to have the same salaries, lodging and traveling expenses as the men. This latter feature of the Stolypin system is the one that is likely to make the deepest impression on the women school teachers of the United States.

Alfred Tennyson Dickens from far away Australia plunges Boston femininity into gloom by observing that in respect to ankles "the beefy sort greatly outnumber those graceful appendages that linger so much longer in a man's memory," says the Boston Globe. This is one of the effects of the recent rainy weather, and is not to be taken too seriously. Besides, so far as our observation goes, the criticism is grossly exaggerated, not to say unfounded. Mr. Dickens must have poor vision or perhaps he spent all his time in the shopping district where, to be frank, the display of ankles is very prosaic. Our women who are striving to be beautiful of course will feel downcast over the unartistic picture that Mr. Dickens frames. Our ladies are accustomed to reduce their weight or increase their avoirdupois, as the case may be, to become more Venuslike, but nobody yet has ever advertised an ankle-reducing emporium, nor does it seem possible that such an establishment could operate to advantage. Probably this Dickens man, a perfect Shylock on fashion, would suggest that a pound of flesh be taken from each ankle, so that it might linger longer in his memory.

The thing about Paris that seems to have most impressed our great fellow American, Edison, is that the Champs Elysees is a twilight lane in the country compared with the great white way in little old New York. It is to be presumed that this is the fault of Paris' age. Being some thousand years the senior of Manhattan, she is rather averse to casting too much illumination on her features—the same feeling has been known by a part of humanity, it is said. It takes irrepressible youth to stand the dazzle of Broadway. But if Paris doesn't burn so many electric lights, it has charms that Gotham cannot match.

WASHINGTON GOSSIP

Nation Loses Millions by Bad Roads

WASHINGTON.—In the United States there are in all about 2,500,000 miles of roads of one kind or another—enough to reach around the earth 100 times. Much of this, however, is of a character not worthy of the name road. Some of it is little better than a rock pile, and others are wide tracks through ditches and swamps. Of the whole only seven miles in each hundred can be said to have any improvements whatever, and on the most of it the improvements are such as to be unworthy of note. Altogether not two per cent. can be called first class.

The roads in the United States may not be the very worst in the world, but they are bad enough as a whole, that is certain, compared with those in other civilized countries. Europe is a network of magnificent highways. In Germany, France and England one can

ride for miles without striking a stone or a puddle. This does not add to pleasure alone. It is the means of saving millions of dollars each year to those countries where such roads are maintained.

The cost of hauling over our country roads is now about 23 cents per ton to the mile. In the European countries as long as 18 years ago the cost had been reduced to 10 cents, and it is much lower today.

According to the report of the interstate commerce commission in 1906, our railroads handled more than 800,000,000 tons of freight which originated on their respective lines. All this had to be taken to and from the cars. A great deal of it was made up of the products of the farm and the forests, and it is estimated that at least 200,000,000 tons of it had a haul of nine miles at a cost of 23 cents a ton. That bill alone would represent more than \$400,000,000, and other freights and hauling would run the sum to \$500,000,000 or over. Now suppose we cut the wagon freight bill in half, or to 11½ cents a ton, which is still far above the cost of hauling in Europe, and the saving would be \$250,000,000 a year.

Government Busy Cleaning Out Opium

SLOWLY the federal arm is sweeping in the opium dens. The recent raid here by internal revenue agents, when \$8,000 worth of the drug, prepared for smoking, was confiscated and the distributing organization for the District of Columbia broken up, was one of a series of big hauls in the larger cities of the country in recent months, as a result of which several hundred thousand dollars' worth of the drug is now in government possession.

In the last five months just such hauls, many larger and more important, have been made by means of which agents have in many cases been able to trace the drug to the illicit manufacturers, thus dealing the most serious blow of all. In Terre Haute, Ind., where the richest haul of all was made, nearly \$100,000 worth of the drug was found when the inspectors raided a small river shack where the crude opium was being prepared for distribution to smokers throughout the middle west.

"We are learning how to go about it. We are discovering the haunts of them," said a special officer. "It has been a hard job, because there is no interstate regulation. There is a bill for that purpose before congress now. The only way to stamp out the use of opium and cocaine primarily is through interstate regulation.

"Since the importation of opium was prohibited, in 1909, a process of manufacture has been evolved which has left the door wide open again. The process of manufacture is very simple and can be carried on quietly for years. The crude opium is bought from druggists who, without an interstate regulation law, can import the crude drug and distribute it at will

Mammoth Guns to Guard Panama Canal

THE greatest gun ever built will become part of the coast defense at the Pacific end of the Panama canal. The giant weapon is now at Sandy Hook, N. J., but according to orders received from the war department it will soon start on the most remarkable journey ever taken by a weapon of its size. It weighs 180 tons, is 50 feet in length, with a 16-inch caliber and power to throw a 2,400-pound projectile a distance of 23 miles. The gun is being moved because war authorities believe New York is in less danger of being attacked than the west end of the Panama canal. There no ship that pokes its nose above the horizon will be safe against the mon-

ster gun for with a single well-directed shot it could send to the bottom the largest war craft the world knows today.

Although the fortifications for the canal have already been fully planned, the details regarding them are kept secret. All that is known is that the two ends of the ditch will be defended by seven forts in all, three at the Atlantic end and four at the Pacific opening. These works will constitute two systems of forts—the four at the Pacific end operating together, and likewise the three at the Atlantic end. The fortifications will all be under ground. A hostile fleet approaching from the ocean will see nothing but a slope of grassy greenward, whether on the islands or on the mainland. There will be nothing visible to shoot at, for the great guns will be hidden in concrete lined pits, from which they are uplifted momentarily by their disappearing carriages to deliver their fire.

A Pint of Unequaled Cough Syrup for 50c

The Quickest, Surest Cough Remedy You Ever Used, or Money Refunded—Stops Even Whooping Cough Quickly.

You may not need the \$2 which a 50-cent bottle of Pinex saves you, but you do need the wonderful effectiveness of this famous cough remedy. It will usually stop the most obstinate deep-seated cough inside of 24 hours, and has no equal for whooping cough.

A 50-cent bottle of Pinex, mixed with home-made sugar syrup, gives you a full pint—a family supply of the most pleasant and effective cough remedy you ever used. Easily prepared in five minutes—directions in package.

The way this takes hold of a cough and gives instant relief, will make you regret that you never tried it before. Stimulates the appetite, is slightly laxative and tastes good—children take it willingly. It has a wonderful record in cases of incipient lung trouble and is splendid for croup, asthma, bronchitis, throat trouble, etc.

Pinex is a special and highly concentrated compound of Norway White Pine extract, rich in guaiacol and other natural healing pine elements. Simply mix with sugar syrup or strained honey, in a pint bottle, and it is ready for use. Used in more homes in the U. S. and Canada than any other cough remedy.

Pinex has often been imitated, but never successfully, for nothing else will produce the same results. The genuine is guaranteed to give absolute satisfaction or money refunded. Certificate of guarantee is wrapped in each package. Your druggist has Pinex or will gladly get it for you. If not send to The Pinex Co., 234 Main St., Ft. Wayne, Ind.

Same.

Friend—What were your sensations in the wreck?

Victim—Just the same as in football. Three coaches passed over me, and then the doctors came.—Puck.

Takes More Than That.

"Truth lies at the bottom of a well."

"Yes, and unlike most wells, you can't raise it by hot air."—Baltimore American.

BABY'S ECZEMA AND BOILS

"My son was about three weeks old when I noticed a breaking-out on his cheeks, from which a watery substance oozed. A short time after, his arms, shoulders and breast broke out also, and in a few days became a solid scab. I became alarmed, and called our family physician who at once pronounced the disease eczema. The little fellow was under treatment for about three months. By the end of that time, he seemed no better. I became discouraged. I dropped the doctor's treatment, and commenced the use of Cuticura Soap and Ointment, and in a few days noticed a marked change. The eruption on his cheeks was almost healed, and his shoulders, arms and breast were decidedly better. When he was about seven months old, all trace of the eczema was gone.

"During his teething period, his head and face were broken out in boils which I cured with Cuticura Soap and Ointment. Surely he must have been a great sufferer. During the time of teething and from the time I dropped the doctor's treatment, I used the Cuticura Soap and Cuticura Ointment, nothing else, and when two years old he was the picture of health. His complexion was soft and beautiful, and his head a mass of silky curls. I had been afraid that he would never be well, and I feel that I owe a great deal to the Cuticura Remedies." (Signed) Mrs. Mary W. Ramsey, 324 E. Jackson St., Colorado Springs, Col., Sept. 24, 1910. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 5 L, Boston.

Country's Safeguard.

DAIRY

VALUE OF A PURE-BRED SIRE

Pedigree Bulls Get Calves Far Superior in Dairy Quality to Those of Local Animals.

(By W. R. GILBERT.)

Although the general run of dairy cows are of no definite breeding, they are not necessarily the worse for that. Good dairy quality is a natural characteristic which is hereditary to an eminent degree. A long line of ancestors of dairy character on both sides of the family tree is quite sufficient to insure good dairy quality of the offspring.

Dairy character has been developed by careful selection. It is not a quality originally inherent in any one

Champion Holstein.

breed, although some breeds prove themselves more amendable to the influence of selection than others.

Dairy farmers are fully alive to the importance of heredity in this respect, and although they favor cattle of certain breeds, they fight shy of cattle of those breeds from pedigree herds. This is because they have found that pedigree bulls in many instances get calves far superior in dairy quality to the calves of locally-bred bulls.

The influence of an unsuitable bull is very far-reaching, for his heifers do not show of what they are capable until three years after his introduction.

During these three years, that bull, if he is a wrong one, will have been destroying the dairy character that probably took many years to establish.

The reason why pedigree bulls in the past have failed as popular sires in the dairy herds is to be attributed to a great extent to the cattle-shows. Breeders of bulls for sale, naturally look to the show yards for publicity and success to bring their cattle under the notice of the buyers.

Bulls of dairy strains at one year old, the usual age for exhibiting, do not fill the eye with the same effect as the beef type, so they do not appear in the prize list and are branded as inferior accordingly.

CATCH FOR ANY SMALL DOOR

Device Shown in the Illustration Will Be Found of Much Convenience on Farm.

An easily made and very effective catch to hold any small door, as in a washstand, sideboard, etc., is shown in the sketch. It is simply a small

Catch for a Small Door.

screw eye and an upholstering staple attached, as shown at A. The manner in which they hold the door, says Popular Mechanics, is shown at B.

TYPHOID FEVER FROM MILK

Dr. Evans, Noted Authority on Preventive Medicine, Tells of Dangers in Bacteria.

Dr. W. A. Evans, the greatest authority on preventive medicine in the country, writing for the Chicago Tribune on "How to Keep Well," states that during August, September and October there is greater danger of contracting typhoid fever than any other time of the year.

He says those who escape until November 1st will be fairly safe.

Typhoid is a bacterial disease, the bacteria being taken into the system with food and water. If these are made safe there is no danger from the fever.

The most important article of food from the typhoid standpoint is milk.

Typhoid gets into milk from the hands of people who handle milk. The farmer or milkers, any one who has handled the can, the workers in the factory, the milkmen in town, or any one who handles milk in the household where it is used can be responsible for its infection with typhoid.

A typhoid water supply on the farm would spread it, not through infection of the cows drinking the water, but through washing the cans with it.

If milk is properly pasteurized it is safe from infection by any one who handles it prior to the time of pasteurization.

Raw milk should never be used without heating.

To heat milk put the bottle in a boiler of cold water and heat until bubbles are rising in the milk. Put the milk in the refrigerator or cool it gradually with faucet water. It should be kept below 55 degrees.

Putting typhoid infected milk into hot coffee will not kill the bacteria and make the milk safe. The milk cools the coffee. The sides of the cup cool it more. Between these two, the temperature is lowered to a point where some of the typhoid bacteria survive.

It is much safer to drink hot milk in coffee than it is to use cream. Coffee and hot milk is somewhat easier on the digestion than is coffee and cream.

An Illinois stable where milk is produced for sale in the neighboring village.

It will not be safe to drink commercial raw milk for several years yet. I do not mean that every man who drinks raw milk will get typhoid fever. If that were true there would be no need of this article. The wave would rise spontaneously and the situation would be cured. The condition is tolerated because most of those who are endangered escape without injury. Those who have the disease are in the minority.

Excitement, noise and confusion are not conducive to best milk production. A money-making combination is the cow and the sow. Give the latter warm skim milk. The only way to absolutely know a cow, is to weigh and test the milk through the entire year.

Excitement, noise and confusion are not conducive to best milk production.

TIRED, SICK AND DISCOURAGED.

Doan's Kidney Pills Brought Health and Cheerfulness.

Mrs. J. P. Pemberton, 854 Lafayette St., Marshall, Mo., says: "For years I suffered with Bright's disease which doctors said was incurable. I grew so weak, I had to take to my bed. Kidney secretions were suppressed, I became terribly bloated, and finally reached the point where I took no interest in life. It was then I began using Doan's Kidney Pills and soon improved. Before long I was without a sign of the trouble that seemed to be carrying me to my grave."

"When Your Back Is Lame, Remember the Name—DOAN'S." 50c, all stores. Foster-Milburn Co., Buffalo, N. Y.

Unfair Play.

"Foul tactics," declared the quarterback.

"What's the trouble now?" demanded the referee.

"I tried a kick for the stomach, but this fellow blocked it with his face."

Old Board Adjourns.

The board of county commissioners, that have conducted the affairs of this county for a number of years past, met Monday and adjourned sine die Wednesday night. Whether the old board will reconvene before finally going out of office depends entirely on the time that will elapse before the new board is installed, and whether or not anything of serious moment should arise that would require immediate attention. This contingency is not anticipated; for it is the general belief that the president will issue his proclamation admitting us to statehood, whereupon the new board will at once convene and organize. Therefore, it is reasonably safe to assume that Wednesday night saw the curtain lower for the final act on the old board.

It is therefore, quite appropriate at this time to glance over the record the old board has made. The retiring board, the last to serve the people of Lincoln county under a territorial form of government, consisted of R. A. Duran, of Lincoln, representing district No. 1, who was elected in 1906 for a four-year term, and who held over an additional year by the terms of the Enabling Act, and who has also been elected as a member of the first board as a state, for a term of five years: Robt. H. Taylor, of White Oaks, representing the 2nd district, who was elected in 1906 and re-elected in 1908 for a term of four years, but who, by reason of statehood, loses one year of his term; Mr. Taylor served as chairman of the board for a period of three years; W. R. White, of Nogal, who has served by appointment since May, 1910, the commissionership of district No. 3 having become vacant by the death of C. W. Wingfield. Mr. White has been chairman of the board the past year.

In January 1907, when Commissioners Duran and Taylor went into office, an old floating indebtedness hung over the county, caused by a falling off in the tax valuations of the county the previous term, of about \$4,900.00. This debt, happily

(Continued on last page.)

JANUARY CLEAN UP SALE

Inventory is now over and we begin Monday morning our January Clean-Up Sale. We have an immense quantity of Merchandise that must be "Cleaned Up" at once. The following items represent the greatest values ever given, either by Zeigler Bros. or any one.

Clean Up Sale of Suits and Overcoats--All Suits and Overcoats are offered at "Clean Up" prices. None is reserved. Every Overcoat and Suit bears a reduced price.

OVERCOATS

TWENTY FIVE PER CENT DISCOUNT

SUITS

GREATEST VALUES EVER IN CARRIZOZO

Ladies' one piece dresses--They are of Serge and Silk, in Navy, Black and Green. Made in the season's best styles. Large collars, three quarter sleeve and high waist effect. They must be "Cleaned Up" and will be sold in our January Clean Up Sale at a great reduction.

All Shirt Waists and Skirts, the newest styles that were exclusive with us this season--some that will be copied next year, all included in this sale.

Great values in "Knit Goods" including our entire line of Ladies' and Misses' Sweaters, Scarfs, Shawls etc.

"Watch For The Big Circular and Study It."

Precious Metal Production.

Washington, D. C., Jan. 3.—The gold production of the United States during 1911 was \$96,233,528, and the silver production 57,796,117 ounces, according to a preliminary estimate issued by Geo. E. Rogers, director of the mint. This year a reduction in gold of about \$45,000 and in silver of about \$660,000 ounces as compared with the returns for 1910.

Among the states and territories the principal gold producers were: California, \$20,310,987; Colorado, \$19,153,860; Nevada, \$18,968,578; Alaska, \$16,029,976; South Dakota, \$7,430,367; Utah, \$4,709,747; Montana, \$3,168,840; Arizona, \$2,954,790, and Idaho, \$1,169,261.

In the order named, Utah, Montana, Nevada, Colorado and Idaho lead as silver producers. At the average price for the year the total silver product was worth \$30,854,500.

The net amount of gold and silver used in the industrial arts was approximately \$34,000,000 gold and 24,000,009 ounces of silver. The coinage of the mints was: Gold, \$56,176,822; silver, \$6,457,301; nickels and coppers, \$3,156,726. Total, \$65,790,850. The net gain in the country's stock of gold coin including bullion in the treasury during the year was close to \$100,000,000. The director's report gives the final figures for the production of gold in the world in 1910 at \$454,703,900.

The director also make a preliminary estimate on the world's production in 1911, of \$466,700,000, or a gain of about \$12,000,000.

Ancho Items.

The dance that was given in the school house Saturday night proved to be a great success. Everyone reported a jolly time.

Ancho school started Tuesday. B. J. Coomes and E. R. Roberts are erecting a new two room cottage on Main street.

Miss Edith Tickner, who has been home spending the holidays with her parents, has returned to her school at Nara Visa.

Mr. and Mrs. E. C. Riley are spending a few days at Capitan.

Mr. and Mrs. C. O. Davis entertained a number of friends New Year's night.

S. F. Fambrough and family, who have been spending the holidays with relatives in Texas, have returned home.

Charley Martin, who has been ill with Typhoid fever, is slowly recovering.

R. B. Davis, of Tecolote, is visiting his son C. F. Davis

Inauguration on 15th.

News reached here from an authoritative source this morning that the president would issue the proclamation, admitting New Mexico to statehood, today. The date of the inauguration has been definitely fixed for January 15th. The inaugural date is authentic and all who intend to attend the inaugural of the first governor of the state of New Mexico, who is also the first citizen of Lincoln county, may act accordingly.

Ancho Marriages.

At the residence of the bride's father, Dec. 27, 1911, by Rev. J. B. Perkins, Mr. E. C. Riley and Miss Ora Carter, both of Ancho, N. Mex.

At Ancho, N. Mex. on Dec. 28, 1911, by Rev. J. B. Perkins, Mr. C. E. Clark of Vaughn, N. Mex. and Mrs. Vaughn Mathis of Ancho, N. Mex.

At the Methodist Church.

The usual services. Sunday School at 10 a.m. Preaching at 11 a.m. and at 7:30 in the evening. You are welcome to any and all of these services.

R. B. EVANS, Pastor.

Constipation is the cause of many ailments and disorders that make life miserable. Take Chamberlain's Stomach and Liver Tablets, keep your bowels regular and you will avoid these diseases. For sale by all dealers.

LOCAL NEWS

A. T. Anderson came down from Parsons Thursday.

Mr. and Mrs. F. W. Gurney left Wednesday for El Paso.

Attorney Edwin C. Mechem was in town yesterday from Alamogordo.

Henry Corn, Lincoln county's new assessor, spent several days in town this week.

Conductor McNamara returned Saturday night from a trip to Canada.

Mrs. J. T. Lobdell left Saturday for El Paso to join her husband who has located there.

Melvin Franks, the new county commissioner from district No. 2, was down Tuesday from Corona.

A. D. Gaudin is back on his run after being off for the holidays.

Fireman D. T. McLane is back on his runs on No. 4 and 1 after laying off a few days.

A. C. McElvain of the Brown Shoe Co., was interviewing the merchants of this city this week.

Mr. and Mrs. J. B. French spent the last of the week in town, shopping and visiting.

H. B. Hamilton and family came up from El Paso on No. 4 Thursday to spend a few days.

T. J. Grafton was a caller at this office yesterday, having come down from his home at Parsons.

Mrs. Edith E. Anderson and son, Lesnet, left last night for Roswell, on a visit to the former's mother.

School re-opened here Tuesday with all the teachers on the job and with a full attendance of pupils.

R. Bracken and Frank Allison, two prominent farmers and stockmen of Ruidoso, were in Carrizozo two or three days this week.

R. L. Hust came down from Nogal Tuesday, loaded to the guards—with apples and pork—for which he found a ready market.

Miss Mary Thayer, of Warsaw, Ind., came in Thursday and went out on Monday's Capitan train for San Patricio where she will teach school the rest of the winter.

R. E. P. Warden of Ancho was in town Saturday, and left on delayed No. 1 for El Paso.

Dr. M. G. Paden returned from his hunt in the Capitans this week, having bagged two turkeys, a trace of ducks and some quail.

The weather is quite threatening this morning, and the indication is that snow will be falling before the ink is dry on this issue.

Mrs. W. A. Alexander of Tucumcari returned home Wednesday after spending a few days visiting her mother, Mrs. M. A. Franklin.

A. J. Salyer, of the N. K. Fairbanks Co, passed through on No. 4 Wednesday, on his way to the Pecos Valley.

H. B. Hamilton and wife, of El Paso, arrived in Carrizozo Thursday evening, after spending Wednesday and Thursday in Alamogordo.

W. T. Henley came in yesterday from Deming, where he located last March. He expects to remain here, his old home, only long enough to transact some personal business.

Attorney Prosper Sherry returned yesterday from Alamogordo, where he formerly resided. He occupies a suite in the Exchange Bank building, as may be noted by his professional card to be found elsewhere in these columns.

Robt. A. Hurt and J. S. Williamson, of Capitan, passed through Wednesday, en route to the Rio Grande Valley and the Deming country. They travel by auto and will thus be able to see the country over which they ride. They will be absent about ten days.

Medicines that aid nature are always most effectual. Chamberlain's Cough Remedy acts on this plan. It allays the cough, relieves the lungs, opens the secretions and aids nature in restoring the system to a healthy condition. Thousands have testified to its superior excellence. Sold by all dealers.

Notice for Publication.

Department of the Interior.

U. S. Land Office at Roswell, N. M.

Nov. 16, 1911.

NOTICE is hereby given that Charles B. Lane, of Alto, N. M., Administrator of the Estate of Ripzi A. Phillips, deceased, who, on September 5, 1903, made Homestead Entry No. 09098, for 8 1/4 NE 1/4 & N 1/4 SE 1/4, Section 28, Township 10 S. Range 13 E., N. M. P. Meridian, has filed notice of intention to make Final five-year Proof, to establish claim to the land above described, before A. H. Harvey, U. S. Commissioner, at Carrizozo, N. M., on the 9th day of January, 1912.

Claimant names as witnesses: Marshal O. West, of Capitan, N. M.; Marvel H. Lane, of Angus, N. M.; Anson J. Gilmore, of Ruidoso, N. M.; William R. Brooks, of Angus, N. M.

11-24-86 T. O. TILLOTSON, Register.

School Again Open.

School reopened Tuesday morning with a very good attendance and prospects favorable for completing a good year's work, if funds will warrant a sufficient length of term.

The number of pupils reporting this week in the several rooms and classes is as follows:

First Primary Room — Mrs. Gunn, teacher: C. 1st grade, 18, B. 1st, 15; A. 1st, 12; total 45.

Second Primary — Miss Laws, teacher; B. 2nd grade, 12; A. 2nd, 16; 3rd, 19; total 47.

Intermediate — Mrs. Massie, teacher: 4th grade, 22; 5th grade, 19; total 41.

Advanced — Miss Brockway, teacher: 6th grade, 17; 7th grade, 11; total 28.

High School:

Miss Spellman, } Teachers.
Mr. Schreck, }
8th grade, 16; 1st year High School, 6; 2nd year High School, 3; total 25.

Total for the school, 186
Parents are urged to visit the school, and get more in touch with its work. Come often, get acquainted with those who have your children in charge so much of the time, and talk with the teachers concerning school work and the means of improvement.

It is greatly to be desired that some means may be devised by which we may have at least eight months of school. Alamogordo will this year have a nine months term, Tucumcari also. Of smaller towns, more nearly comparable with Carrizozo, and on this line of road, Tularosa and Santa Rosa will each have eight or nine months. Many other small towns will do as well.

Carrizozo pays an annual school tax (local) of 10 mills. Alamogordo and Tucumcari pay 20 mills; Santa Rosa, 18, and Tularosa 15. At the latter place there is talk of raising to 20 mills this year. Artesia widely known as a school town is enabled to earn this reputation by paying a tax of 25 mills. Is it not time for Carrizozo to seriously consider the proposition to increase the available school fund by taking her place among the progressive communities who vote sufficient tax to maintain a full nine months school each year?

CHAS. L. SCHRECK,
Principal of Schools.

Do you know that fully nine out of every ten cases of rheumatism are simply rheumatism of the muscles due to cold or damp, or chronic rheumatism, and require no internal treatment whatever? Apply Chamberlain's Liniment freely and see how quickly it gives relief. For sale by all dealers.

"If it's not Good, We'll make it Good."

Fourth Lyceum Entertainment.

Perhaps one of the best of the series of the five entertainments, given by the J. S. White Lyceum Agency, will be presented at the Methodist church Wednesday night January 10th. The entertainment will consist of a lecture by Dr. Homer T. Wilson. Dr. Wilson comes highly recommended as a speaker, in fact, one authority, in commenting on his platform addresses, speaks in the superlative by saying, "He combines the language of Graves, the humor of Burdette and the eloquence of Grady."

Dr. Wilson has five subjects as follows: "Sparks from the Anvil," "Americas Uncrowned Queen," "The Man of Galilee," "The Sculptors of Life" and "The Dynamo of Genius." Which of these subjects will be used by the lecturer on his visit here is not known at this time, but his ability to handle either in a masterly and entertaining manner warrants us in urging a good attendance upon the date of his coming.

The charge for those not holding season tickets is 50 cents

Remember the place and date; at the Methodist church Wednesday night, January 10th.

The W. O. W. Ball.

The first annual ball, given by Camp No. 57, Woodmen of the World, New Year's night, was a hummer. The town and country attended en masse, and wore masques. Many attractive costumes were worn, as were also quite a large number of grotesques ones. At eleven o'clock the masks were removed, and the judges awarded the prizes to Mr. and Mrs. William Loughrey. Mr. Loughrey was dressed in a buck-skin suit, topped off with an immense Mexican Sombrero, while Mrs. Loughrey represented an Indian Maiden.

William E. and Phillip H. Blanchard were in Carrizozo Tuesday and Wednesday this week, from their ranch on the Macho. The former was elected as a member of the first legislature, and expects to be called to Santa Fe in the near future, to assume his duties as a legislator.

Gilmore-Linam

Matt Gilmore, of Ruidoso, and Miss Estelle Linam, of Alto, were married in Alamogordo. Following the ceremony, the couple went to El Paso where they remained several days before returning. The contracting parties are well known young people of Lincoln county, and have a host of friends who wish them every happiness.

A Noisy First.

The ringing of bells, the blowing of whistles, the firing of guns and the shouts of the populace awakened all at 12 o'clock Sunday night—that is, all who were not deaf. The new year was ushered in with sufficient noise to warrant the belief that the producers of the disturbance were glad to extend it a welcome.

When given as soon as the croupy cough appears Chamberlain's Cough Remedy will ward off an attack of croup and prevent all danger and cause of anxiety. Thousands of mothers use it successfully. For sale by all dealers.

INDUSTRY AND MECHANICS

STETHOSCOPE IS VERY HANDY

Placed Against Parts of Machine Sound Will Tell If Anything Amiss With Machinery.

A sort of stethoscope for the use of engineers for the detection of loose follower bolts, broken snap rings, leaking pistons, etc., is suggested and described by a contributor to Power and the Engineer. The illustration shows its general arrangement. A small tube B is soldered to the dia-

Engineer's Stethoscope.

phragm of the transmitter, and a small rod A supported by a spiral spring C is fitted in the tube and projects at the end of the transmitter. Tube connections at the outside of the transmitter and of the two receivers and connections of 3/4-inch rubber tubing complete the apparatus. When the rod is placed against the cylinder, water pipe or other parts of the machine and the receivers to the ears, the sound will tell the engineer whether anything is amiss with his machinery.

EACH EMPLOYEE HAS HIS CUP

Ohio State Journal Furnishes Individual Drinking Vessel to Composers Employed on Paper.

Each compositor on the force of the Ohio State Journal of Columbus, O., has an individual drinking cup, the cups being kept in a wall case as shown in the illustration. The case is 3 feet high by 27 inches wide, and accommodates 49 cups. A number is stamped on each cup and a check

Sanitary Cup Rack.

bearing the same number is tacked above the cup set on the back of the case, along with the printed name of the owner of each cup.

WHY DO MAINSPRINGS BREAK?

Despite Best of Care Little Strips of Steel Sometimes Snap Into Many Pieces.

"Who wrote the letters of Junius?" "Who was the man with the iron mask?" Why do watch mainsprings break? The best mainsprings break, and they will break until the watch-makers discover some secret of nature which is as yet unrevealed to them. They know that a sudden electrical disturbance of the atmosphere, extreme changes of temperature, or contact with a cold substance will occasionally result in a broken mainspring. But they do not understand why a spring sometimes snaps in twain or in twenty pieces despite the best of care. The spring is a piece of tempered steel, usually about twenty inches long, coiled in a barrel between the upper and lower plates of the movement. It is the motive power of the watch. It is made in degrees of strengths, widths, and thicknesses suitable to the watch. As it is subjected to varying conditions from highest tension when fully wound to comparative rest when the watch is run down, and as it is constantly undergoing a change in resistance as its coils unfold, it seems to be the only part of the watch subject to casualties against which even careful use cannot always provide.

One of the largest manufacturers of watches in the world states that a sudden spell of hot weather is invariably succeeded by a noticeable increase in the number of complaints of broken watch springs. At first thought this information is puzzling. A sudden drop rather than a sudden rise in temperature would seem to be the natural cause. Cast metals show greater brittleness at low temperatures under all kinds of stress. And steel and iron show a marked loss under impact or sudden stress.

It may be easy to understand the breakage of a mainspring when in exceedingly warm weather the watch is removed from a superheated pocket and laid suddenly on a cold marble or iron slab. But the sudden breaking of the spring while the watch runs undisturbed in the pocket is a fact and a mystery.

MAKING NEW COPPER GUTTER

Illustration Shows How to Construct New One as There is No Way of Repairing Old Ones.

The gutters on large buildings are liable to buckle and crack, which will cause a leak, says the American Artisan. As there is no way of repairing

Gutter That Will Not Crack.

old copper gutters except by soldering, the sketch shows the proper way to build a new one. The copper sheet is bent with a crimp in the lowest part of the gutter as shown at A, and fastened with a 1/2-in. turn over seam B to a clip C that is 1 1/4 in. wide. This clip is fastened to the sheathing with copper tacks.

Save Gutta Percha Trees.

On account of the extreme usefulness of gutta-percha in many industries, every effort is being made to save the tree that yields the valuable gum from extinction. No satisfactory substitute for gutta-percha, as found in the forests of the Malay peninsula and in Malacca, has been discovered, and the natives, in order to get quick returns, are destroying the trees so rapidly that a gutta-percha famine is feared.

Save Loss of Lumber.

To save the loss of box lumber because of insect holes a man in California has invented a machine to saw the holes out to a uniform size and shape so they will be fitted into the

W. N. U., DENVER, NO. 48-1911.

Aids Nature

The great success of Dr. Pierce's Golden Medical Discovery in curing weak stomachs, wasted bodies, weak lungs, and obstinate and lingering coughs, is based on the recognition of the fundamental truth that "Golden Medical Discovery" supplies Nature with body-building, tissue-repairing, muscle-making materials, in condensed and concentrated form. With this help Nature supplies the necessary strength to the stomach to digest food, build up the body and thereby throw off lingering obstinate coughs. The "Discovery" re-establishes the digestive and nutritive organs in sound health; purifies and enriches the blood, and nourishes the nerves—in short establishes sound vigorous health.

If your dealer offers something "just as good," it is probably better FOR HIM—it pays better. But you are thinking of the cure not the profit, so there's nothing "just as good" for you. Say so.

Dr. Pierce's Common Sense Medical Adviser, in Plain English; or, Medicine Simplified, 1608 pages, over 700 illustrations, newly revised up-to-date Edition, paper-bound, sent for 21 one-cent stamps, to cover cost of mailing only. Cloth-bound, 31 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

PERFECTION SMOKELESS OIL HEATER

Always ready for use. Safest and most reliable. The Perfection Smokeless Oil Heater is just like a portable fireplace.

It gives quick, glowing heat whenever, wherever, you want it. A necessity in fall and spring, when it is not cold enough for the furnace. Invaluable as an auxiliary heater in midwinter. Drums of blue enamel or plain steel, with nickel trimmings.

Ask your dealer to show you a Perfection Smokeless Oil Heater, or write to any agency of

Continental Oil Company (Incorporated)

Continental Oil Company (Incorporated)

NEWS for the YOUNG PEOPLE

USEFULNESS OF BOX KITES

Scientific Instruments Have Been Carried into Air for Study of the Atmosphere.

In reply to a query for instructions as to how to make a box kite the following instructions are given:

The examples of this style of kite shown in the accompanying illustration seem to be of simple construction. The brief directions given, with the study of the drawings, may perhaps be sufficient aid to the enquirer in building such a kite.

These cellular or box-kites have square or oblong cells, the frame-work of which are made of light wooden rods and are then covered with cotton except the ends, which are left open. The two cells or cases are fastened at a little distance from each other by four or more sticks.

These kites have been made use of to send an instrument into the higher air in order to obtain information as to pressure, temperature, humidity, and the force of the wind.

Some box-kites stand nine feet high, have seventy square feet of lifting surface and weigh only eleven pounds. The kites are flown singly or in tandem. Steel piano wire is used instead of cord, and as much as 32,000 feet is coiled around a drum driven by steam power. By this means kites have raised scientific instruments for the study of the atmosphere to a height of over three miles above the earth's surface.

The great practical importance of using kites in this way lies in the

Fig. 1, Box Kite. Fig. 2, Meteorological Box Kite. Fig. 3, Meteorograph attached to Kite. Fig. 4, Multi-cellular Kite. Fig. 5, Five Box Kites Raising Man in Basket. Fig. 6, Kites carrying Meteorograph.

information they give of coming weather changes which are first felt in the upper air.

The box kite was invented by Laurence Hargrave of Sydney, N. S. W.

SOME VERY WISE OLD CROWS

They Pecked the Dog and Carried Off His Meat by Clever Trick—One Bit Animal's Tail.

In the inn garden I saw a dog eating a piece of meat in the presence of several covetous crows. They evidently said a great deal to each other on the subject, and now and then one or two of them tried to pull the meat away from him, which he resented, says a writer, in an exchange.

At last a big, strong crow succeeded in tearing off a piece, with which he dashed to the pine, where the others were congregated, and after much soaring which they all surrounded the dog. The leading bird dexterously dropped the small piece of meat with its beak in its mouth, when he immediately landed at its setting so

the big piece unwisely for a second, on which two of the crows flew away with it to the pine, and with much fluttering and hilarity they all ate, or rather gorged it, the deceived dog looking vacant and bewildered for a moment, after which he sat under the tree and barked at them inanely.

A gentleman told me that he saw a dog holding a piece of meat in like manner in the presence of three crows, which also tried to tear it from him, and after a consultation they separated, two going as near as they dared to the meat, while the third gave the tail a bite sharp enough to make the dog turn round with a squeak, on which the other villains seized the meat, and the three fed triumphantly upon it on the top of the wall.

THE FRIGHTENED STARS

The sea was blue and curly-white; I played with it all day; It splashed me and ran after me, Then laughed and ran away;

I went to say good-night to it, Before I went to bed, But rows and rows of little stars They shivered overhead;

And then I saw the reason why— And oh, I hid and cried— The sea was black and sly and smooth, With swallowed stars inside!

BEGINNER ON ROLLER SKATES

Amusing, as Well as Useful Device for Novice, is Made of Three-Quarter Inch Pipe.

One of the most amusing as well as useful devices for a beginner on roller skates is shown in the sketch. The device, which is described in Popular Mechanics, is made of three-quarter-inch pipe and pipe fittings, with a strip of sheet metal one inch wide fastened about half way down on the legs. On the bottom of each leg is fastened an ordinary furniture caster which allows the machine to roll easily on the floor.

Novice on Roller Skates.

The rear is left open to allow the beginner to enter, then by grasping the top rail he is able to move about on the floor at ease, without fear of falling.

THE SECRET OF SUCCESS

Genuine Merit Required to Win the People's Confidence

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfil the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been cured, to those who are in need of it.

In an interview on the subject a prominent local druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows immediate results, as many of my customers testify. No other kidney remedy that I know of has so large a sale."

The success of Dr. Kilmer's Swamp-Root is due to the fact that it fulfills every wish in overcoming kidney, liver and bladder diseases, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

A free trial bottle will be sent by mail, absolutely free. Address Dr. Kilmer & Co., Binghamton, N. Y., and mention this paper. Regular size bottles sold at all druggists—50c. and \$1.00.

Mule Was a Dead Shot.

A southern farmer was trying to sell a mule to a negro who two years before had been kicked on the head by the animal, says the Popular Magazine.

"Of course," said the farmer, "this mule kicks, but—"

"I don't want him," objected the colored man, emphatically.

"Just because he kicks?" asked the farmer with an air of contempt.

"Humph!" grunted the negro. "Dat mule don't kick. He shoots."

Diphtheria, Quinsy and Tonsillitis begin with sore throat. How much better to cure a sore throat in a day or two than to be in bed for weeks with Diphtheria. Just keep Hamlin's Wizard Oil in the house.

It Goes Off.

Dragging a gun through the fence seems to be almost as effective as rocking the boat.

If it is safe to trust God in anything it is safe to trust him in everything.

Don't be misled. Ask for Red Cross Bag Blue. Makes beautiful white clothes. At all good grocers.

A sunny spirit will do more to improve the looks than a powder rag.

Mrs. Winslow's Soothing Syrup for Children's teething, softens the gums, reduces inflammation, allays pain, cures wind colic, &c a bottle.

When an optimist loses his job he is apt to become a backslider.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. Easy to take.

We show how much of the Bible we believe by the way we trust God.

Your Liver Is Clogged Up

That's Why You're Tired—Out of Sorts—Have No Appetite.

CARTER'S LITTLE LIVER PILLS will put you right in a few days.

They do their duty.

Cure Constipation, Biliousness, Indigestion and Sick Headache. SMALL PILL, SMALL DOSE, SMALL PRICE. Genuine must bear Signature.

Warranted

Kind Parent.
"Dad," said young Jack Shiftless to Old Bill the other night, "I want to go to the show tonight." "A show at night is no place for a kid like you," said Bill. You should be at home in bed." "But I peddled bills and have two tickets," said Jack, as he began to snifle. "All right, then," answered Old Bill, "I will go with you to see that you don't get into trouble."

Plenty of Such Men.

"What kind of life insurance policy is yours?"

"Twenty-year plan."

"How long have you been paying premiums on it?"

"Fifteen years."

"Then at the end of twenty years do you get your money back or merely a paid-up policy?"

"Why-er-I've never really read it through yet, and I'm not sure about that. You know how a fellow puts off such things, and—er—"

Some Peroratin'.

In making a peroration before enraptured hearers a speaker said:

"We must not be content but must advance. We must go on and on. We must reach higher heights, broader breadths and deeper depths."

A village evangelist was improvising in prayer and presently stumbled into a pitfall.

"Oh, Lord," he prayed, "Make the intemperate temperate; make the unholy holy; make the industrious industrious."

Apply to the Cashier.

A timid knock, a gruff "Come in!" and the tear-stained, new office boy stood before the manager.

"P-lease, sir," he blubbered.

The manager looked up sharply.

"P-lease, sir!" he blubbered again.

"Well, well," asked the manager, "what is it?"

"P-lease, sir, I upset a p-packet of envelopes," said the office boy, dabbing his streaming eyes with his coat-sleeve, "and the c-cashier k-kicked me!"

"Good gracious, my lad!" snapped the manager irritably. "You don't expect me to attend personally to every detail of business, do you?"

Any Port in a Storm.

In a New England seaport town there is a wealthy but illiterate man, who owns many vessels, and follows their course over the seas by the aid of a large atlas and a ten-horse-power magnifying glass.

"I've just had a letter," he said to a neighbor, "from one of my captains, and he tells me he's been in a fearful storm. I'll read you from his letter what puzzles me. He says:

"The waves rose like mountains. We were driven before the wind, to the very great danger of our lives, and put into great jeopardy."

"What I want to know," said the ship owner, "is, where is Great Jeopardy. It's somewhere in the Mediterranean, but I can't find it on the map anywhere."

Old Board Adjourns.

(Continued from editorial page)

for the tax payers, and to credit of the members of the board, has been wiped out, last October witnessing the payment of every old account in full. In the meantime all running accounts had been met and many improvements made, that will be monuments to the members of the old board. Some unlooked for expenses, however, occurred during the past year, brought about by the county seat controversy, and it seemed the irony of fate that, after meeting all expenses, and paying all back indebtedness that the retiring members should be confronted with a small deficit at the close of their term, about \$700.

And now, as everything the old board can do is history, we feel that, collectively and individually, the people of Lincoln county, eliminating the feeling engendered by the county seat controversy the past two years and a half, have a right to feel proud of its board of county commissioners, and we take pride in the assertion that no county in New Mexico has been better governed; its affairs more economically administered; the rights of all citizens better protected and, proportionately, more lasting improvements made, especially in road building, than has been done during the terms of office of Commissioners Duran and Taylor, Commissioner Wingfield and his successor, W. R. White. All honor, then, to the old members, two of whom retire to private life, and the third to continue the good work as a member of the new board.

Cleveland and the Cook.

President Cleveland went to visit General John B. Gordon at the Gordon plantation in Georgia. The dinner was superb and President Cleveland asked who cooked it. General Gordon told him his cook was an old negro mammy who had been a slave in the Gordon family before the war and had continued as cook.

"I'd like to shake hands with that cook," said the President.

General Gordon sent a servant to ask the mammy to come to the dining room. The servant came back with this message: "Tell Marse John ah won't come."

"Did you tell her what I wanted her for?" asked the General sharply.

"Yes, sir," replied the servant. "Tell me exactly what she said."

The servant hesitated. "Go ahead" commanded the General.

"She said—" replied the servant. Then he stopped,

shuffled a bit and looked appealingly at General Gordon.

"Out with it!" commanded the General.

"She says: 'Tell Marse John ah'se not a comin'.' The servant stopped again.

"What else?" asked the General.

"She said," blurted the servant, in an agony of apprehension, "she said: 'Ah'se not a-comin'. Ah'se lived with bettal people than Mistah Cleveland' all mah life.'"

President Cleveland shouted with laughter. "That," he said, as soon as he had composed himself, "is the most beautiful example of loyalty I have ever observed."

Notice For Publication.

Serial No. 011201.

Department of the Interior.

U. S. Land Office at Roswell, New Mexico.

December 1, 1911.
