

WILSON AND MARSHALL.

Baltimore, July 3.—For president—Governor Woodrow Wilson, of New Jersey.

For vice president—Governor Thomas R. Marshall, of Indiana.

This was the ticket completed by the democratic national convention at 1:55 a. m. today.

The nomination of Governor Marshall for vice president came of something of a surprise, for when the night's balloting for vice president began, it seemed that the Bryan-Wilson contingent in the convention had definitely settled upon Governor Joseph E. Burke, of North Dakota.

There was not much of a fight, however, and when two ballots disclosed Marshall steadily in the lead, Governor Burke's name was withdrawn and Marshall was proclaimed the nominee by acclamation.

A minute later the convention had adjourned sine die.

The delegates, worn weary, made their way out of the big convention hall, singing and happy, to start for home.

Governor Wilson was nominated at the afternoon session on the forty-sixth ballot and his nomination, like that of Governor Marshall tonight, was quickly made unanimous. The best of feeling prevailed both sessions, and the delegates seemed to be in a happy frame of mind.

Mr. Bryan had announced his intention of introducing a resolution in effect discharging the national committee from conduct of the coming campaign and allowing Governor Wilson to appoint his own campaign committee.

Baltimore, July 2.—Governor Woodrow Wilson, of New Jersey, was nominated for president of the United States by the democratic national convention at the afternoon session today when, on the forty-sixth ballot, he received 990 votes to 84 for Champ Clark.

The Missouri delegation, which had remained faithful to Clark to the end, then moved that the nomination be made unanimous. There was a great chorus of approval and the long fight was over.

Only four ballots were necessary today to reach a nomination.

The forty-sixth ballot had been ordered when Senator Bankhead, of Alabama, was seen making his way to the stage. Word flashed over the great armory that his purpose was to withdraw Mr. Underwood from the race and release his delegates to vote for whom they saw fit.

The delegates, wearied by the long sessions of the past week, realized all at once that this was indeed the climax. There was a confusion of cheering, applause and calls from one delegation to another. The galleries added to the din.

Senator Bankhead stood for a long while before he could proceed. He had uttered but few words when the meaning of his remarks became clear and there were frequent interruptions of applause and noisy demonstration.

From the moment Senator Bankhead reached the platform the wheels of the convention to revolve with an energy that meant results.

Senator Stone, of Missouri, who had been in consultation with Speaker Clark climbed to the stage and when he could make himself heard, released in the name of the speaker, all of

the delegates who had been pledged to him.

"As for Missouri, however," he added, "she will cast her thirty-six votes for old Champ Clark to the end."

Mayor Fitzgerald, of Boston, followed Stone. The convention was in an almost uproar. The Wilson forces already were celebrating their victory.

There was no longer any doubt as to the result.

Mayor Fitzgerald withdrew the name of Governor Foss, of Massachusetts, from further consideration and declared that the "old Bay State" would fall in line for Woodrow Wilson. Then a second Fitzgerald was recognized. This was the congressman from Brooklyn. He made a plea for harmony and ended by suggesting that a further roll call be dispensed with and the nomination of Wilson be made by acclamation. New York, he said, was ready to vote for the man the great body of the delegates desired as their nominee.

The faithful Missourian objected to this plan because of their desire to vote a last time for Speaker Clark.

It was a foregone conclusion what the result would be as the last call of the states began. Alabama, which had started every other call with twenty-four votes for Underwood, changed to Wilson and state after state followed suit.

It was just 3:15 p. m. when the solid 76 votes of Pennsylvania carried Wilson over the winning line, making his total at the time, 733 votes.

The stampede did not end until 9:00 of the 1088 votes in the convention had been cast for the nominee. Missouri with her thirty-six, had been joined on the last ballot for Clark by 24 of California's 26 votes; by five delegates from Florida; two from Louisiana; all six from Nevada; four from New Jersey; the home state of Governor Wilson; six from the District of Columbia and one from Ohio. This little handful readily joined in the chorus of acclamation when Senator Stone moved that the nomination be made unanimous.

INDIANA'S FAMOUS GOVERNOR.

Indianapolis, Ind., July 2.—Thomas R. Marshall, governor of Indiana since 1908, and known in Hoosierdom as "Tom" Marshall, has assumed national calibre during the last few years. As a lawyer first in criminal and later in corporation suits, his practice extended over the northern part of Indiana. His boom as a candidate for governor resulted from a united appeal from the democracy of his section of the state, and he swept the election when the republican party was divided over the "wet" and "dry" question.

Marshall was born in North Manchester, Indiana, in 1854. After attending the common schools, assisting with the farm work at the same time, he later attended Wabash college, from which he was graduated.

He is now a trustee of the college. He is a member of the Phi Beta Kappa fraternity, of which his grand uncle, former Chief Justice John Marshall, was founder. He began the practice of law when he was twenty-one years old.

His work as a reform governor has gained him attention throughout the country. Probably his best known act was his recommendation of changes in the state constitution, which by many were regarded as radical.

LA FOLLETTE ON ROOSEVELT.

Until Roosevelt came into the open as a candidate for the Presidency five months ago, there was a strong and rapidly growing progressive movement within the Republican party. It was based upon clearly defined principles. It stood forth as the representative of modern political thought on fundamental democracy. It had assumed national proportions. It was united. Into this movement, when it gave promise of natural success, Roosevelt projected his ambition to be President a third time. He spent weeks carefully planning a "spontaneous call" for himself. He responded by announcing that he would be a "receptive" candidate. His candidacy began to drag; he, and his friends, were in despair. Then came his defeat in North Dakota. He became desperate. An enormous campaign fund was raised. Headquarters were opened in New York, Washington and Chicago, and states east and west. Newspaper writers were engaged at large prices to boom his candidacy. Special trains were hired and the "receptive candidate" started in frantic pursuit of the nomination. In the history of American politics, there has never been a primary campaign or a campaign for presidential nomination, an approach to the extravagant expenditures made in this campaign. Men notoriously identified with the Steel Trust and the Harvest Trust became his most active supporters. Leading reactionaries, standpatners and political bosses of the Hanna and Quay sort, became his closest political friends and representatives in many states.

A number of the newer recruits to the Republican progressive cause, men who before 1909, with three or four exceptions, had either been indifferent or opposed to the progressive movement became the noisiest supporters of Roosevelt, "the winner." It mattered not to them that Roosevelt had co-operated with Aldrich on legislation during the entire seven years he was President. They forgot that it was only when Roosevelt was out of office and in Afrasia, through the united efforts of men who for years had been fighting special interests, that the progressive cause became a national movement. That Roosevelt was for Taft in 1910, when Taft was denouncing all progressives as "pirates and traitors," that he waited until little more than a year ago, balancing the chances before deciding whether to cast in his lot with the progressives in this presidential year, counted for nothing with the class of progressives who wanted to "win," not a real progressive victory—just a victory. And they did win precisely that kind of a victory. They carried overwhelmingly the great standpat states of Illinois and Pennsylvania. That stamped the Roosevelt candidacy with its true character. No real progressive could have secured anything like such a vote in either of those two states. It had, however, the outward seeming of success, the sort of success that intoxicates the crowd. It enabled Roosevelt to win in two or three really progressive states. Fortunately it did not enable him to secure the nomination which would have compromised the progressive movement and defeated real

DISASTROUS TORNADO IN CANADA.

Winnipeg, Can., July 1.—From 500 to 600 people killed and property valued at \$10,000,000 destroyed in a tornado which struck Regina, Sask., Sunday evening.

The city power plant is out of commission and there is no light. Prospects are poor for publication of two morning papers. Two fires broke out, but the brigade got a stream and appeared to have the situation under control. Every vehicle in the city is being used as an ambulance.

Late reports place the property loss at ten millions.

The magnitude of calamity which Regina suffered could not be estimated at a late hour tonight. It seemed certain, however, that the casualties would roll up to a total between 400 and 500.

The confusion was such that to determine the number of fatalities was out of the question.

Crowds of volunteers all over the city assisted in the work of searching the wreckage and for hours hardly a minute went by that a human body or the mangled form of some living victim was not uncovered.

The sweep of the storm, the worst in the history of the Canadian northwest, was over a city which only a short time ago had completed the work of decking itself in gala attire for the celebration of Dominion day. Bunting and flags covered buildings everywhere and clusters of electric lights were strung and ready for illumination. Through gaily decorated streets the tornado swept and within a half hour Regina had been turned into a city of mourning. In the track of the storm, building after building lay in ruins. The tornado swooped down a few blocks to the north of the southern limits of the city, cutting a swath several blocks wide into the center of the town, leveling the buildings in its wake.

In a twinkling three of the handsomest churches in Regina were laid in ruins. They were the Methodist, Baptist and Knox churches, and the first of the city's large buildings to be blown down.

Then the roof was swept from the Y. M. C. A. building and the walls of the structure were shattered, while just beyond the new public library is badly wrecked and the Presbyterian church was laid in ruins.

In rapid succession the Masonic temple and the telephone exchange were leveled. Although many of the telephone girls were injured, none were killed.

Of the most serious losses to the city was that of the warehouses and long row of grain elevators in the Canadian Pacific yards. Upon these, the farmers of the district were dependent for the storage of their crops this season. But one grain elevator remains, and that was damaged.

The freaks of the storm were remarkable. A freight car was hurled through a freight shed, a canoe was carried from Wascana lake, a distance of three quarters of a mile to Victoria park and dropped. Many small sailing vessels lie strewn over the southern section of the city as far as half a mile from the lake.

The whole north side of the city was wiped out by the storm. Six hundred families are homeless.

Johnson Remains Champion.

Ringside, East Las Vegas, N. M., July 4.—Jack Johnson was awarded the decision over Jim Flynn in the ninth round of the afternoon after Flynn had repeatedly butted the black champion in the stomach with his head.

It was clearly Johnson's fight from the beginning and he soon had Flynn bleeding profusely. Johnson landed on Flynn at will and frequently stuck his stomach out to the white man to butt, while he exchanged remarks with the audience.

Flynn was clearly outclassed throughout.

The first round was a rather tame affair, Johnson fighting constantly, landing on Flynn a short jab or two. The second round was but little more interesting, Johnson clinching the fireman and playing with him. Some real fighting occurred in the third, in which the champion was easily the victor. The fourth round was a joke, Johnson poking cut his stomach and inviting his antagonist to wade in, and ended by Johnson administering a bloody face to Flynn.

Flynn landed several short jabs in the fifth, but didn't feaze his burly opponent, and Johnson grabbed Flynn's hands and slapped them together like he was a child. Flynn butted Johnson in the stomach with his head in the sixth, and urged as a justification that Johnson was holding his hands. In the seventh Flynn again attempted to use his head as battering ram, but was met by so many left and right swings that he failed to touch the black champion. The eighth round opened with the fireman again trying to butt, but the butter was repeatedly warned by the referee. Johnson, however, held the Puebloan at arm's length, and administered a rain of blows from which the fireman bled profusely.

In the ninth and final round Johnson held Flynn at arm's length in an attempt to safeguard himself against the Colorado man's butting. Flynn finally got in close, jumped a foot in the air and landed with the top of his head against the negro's jaw. Captain of police Cowles, realizing that the referee seemed loath to end the contest on a foul, hurried into the ring and brought the battle to an end. Referee Smith thereupon gave the decision to Johnson. Johnson was given a terrific cheer, while the crowd jeered Flynn.

The mayor and city council have started a fund and are providing for the destitute.

The tornado came from the south and first struck the new parliament building just completed at a cost of \$2,000,000. The building is of steel and concrete and while it still stands, it is badly shaken. It then swept northward, mowing a swath six blocks wide through the most fashionable residence district, transforming it into a mass of wreckage.

Victoria street from Sixteenth to Eleventh, 300 houses were destroyed, and many persons killed. Automobiles filled with people were hurled in the air and deposited blocks away.

At Eleventh street the business district, composed of wholesale warehouses, banking institutions and retail stores, was sent into a heap of ruins, while the air was filled with flying wreckage. Past Eleventh, Albert, Smith, Cromwell, Seath, Hamilton and Rose streets, the storm reached the severest force.

Mexican Rebels Defeated.

The Mexican federal army, under the command of General Huerta, defeated Orozco's command of rebels at Bachimba, on the 3rd. The battle was not only a defeat, it was a rout for the rebels, who retreated toward Juarez, about the last strong hold in their possession. Much apprehension is felt at El Paso over the impending conflict at Juarez.

Texas Battery May go to El Paso.

Austin, Texas, July 1.—Capt. Fred Logan, commander of the Dallas battery, who as stated in Saturday's dispatches, was detailed by the adjutant general's department to proceed to El Paso in connection with the border situation, has not only reported there, but he has made a report to the adjutant general's department.

The text of the report, however, was not made public. That it is serious, however, is evidenced by the fact that it was disclosed that there is no longer any doubt but that the Dallas battery is to be sent to El Paso. It came to light today that 100 military ambulances and other accoutrements have already been shipped to El Paso by the state adjutant general's department. This consignment is expected to reach there tomorrow.

The battery, it is understood, had orders to stand in immediate readiness to leave for the border city. The only thing which will prevent the battery from moving will be assurance from president Taft to the governor that ample protection will be afforded Texas on this side.

Thus far as far as can be learned, no positive assurance has been received.

After all, leeches are not half as dangerous as automobiles.

The rattle of the lawn-mower now makes life merry in the suburbs.

The male mosquito does not bite anyone. He gives precedence to the lady.

"Women first" should be the rule in the street cars as well as on the stairs.

Much poetry will have to be rewritten if the 24-hour clock is to come into general use.

An Indiana farmer is planning to sow his oats by airplane. Wild oats, presumably.

No, Helinda, it is not from economical motives that statesmen strive to save the party.

A New York tailor says motoring enlarges the chest, but he does not mean the money chest.

It takes more than a mere court decision to disturb the steady clicking of the faithful gas meter.

An American woman piloted the first airship across the English channel—the first one by a woman.

A Connecticut youth has played the piano continuously for 65 hours, which gives the endurance record to his neighbors.

A Chicago woman is seeking divorce because of her husband's fondness for onions. "Sour pigs" feet are, however, worse still.

Charles Frohman, who is in a position to know, would have us believe that tall chorus girls have run short of popularity.

A doctor says that card playing stupefies the mind. Evidently the doctor never sat in a game with two good poker players.

A Chicago judge has ruled that a man is not competent to help select his wife's gown. Hooking them is his specialty.

A man who was once a railroad president is now a beggar in New York. Couldn't he get a job as a palace car porter?

While the unsinkable ship gets them once in awhile, the revolver that was not loaded adds steadily to the mortality statistics.

An inventor has produced an apparatus for broiling 700 steaks in six minutes. It is, however, useless unless one can dynamite a bank safe.

A bird in New York robbed a woman of her feather torn from her hat by the wind. If ever there was a case of retributive justice, this was one.

A Chicago citizen has been arrested for dancing on the street in a costume consisting of nothing but a hat. Chicago policemen never "did" care for classic dancing.

An Ohio farmer is said to have recovered from an attack of blindness when two of his teeth were extracted, but it probably was the dentist's bill that opened his eyes.

An aviator claims that he was forced to descend by an attack of sea-sickness, but if he had been a real dyer in the wool nature-faker he would have made it flying fish.

The spring robin is shot down south and frozen to death up north. His life is short and full of trouble.

The cotton manufacturers still cling to the idea exemplified in that suggestion of boosting the market by getting Chinese to lengthen their shirts. Now they want women to widen their skirts.

The Englishman who had a walking stick made of the love letters he had received during his courtship possibly would be peevish if the young woman borrowed it and wore it out over his shoulders.

A New York court holds that a man with an income of \$100,000 a year is not in affluent circumstances. At the same time, he is able to buy a square meal occasionally, and hand the waiter a modest tip.

A New Jersey woman got a verdict from a sympathetic jury against an unscrupulous man who called her "an old maid." It is necessary to impress the fact that old maids in these feminist times are as extinct as the dodo.

The tailor who has discovered that automobiling enlarges the chest evidently forgot to measure the head.

The reason why a ship is called "she" appears to be because the ship is always alleged to be "the last word in naval construction" and never turns out to be.

A New York couple waited eight years before they were joined in the holy and everlasting bonds of wedlock. Plenty of time to think about the fatal step.

INDUSTRY AND MECHANICS

PREVENTS SAGGING OF DOOR

Simple Stay Has Been Devised Consisting of Hook Placed at Lower Corner of Screen.

Screen doors are usually of such a light construction that they are apt to sag after a little use. In order to prevent such sagging, or to correct such a condition in an old door, a simple form of stay has been devised consisting of a hook placed at the lower outer corner of the door, to which a wire is attached extending to a bolt at the opposite corner of the lower panel of the door.

Stay for Sagging Doors.

Consisting of a hook placed at the lower outer corner of the door, to which a wire is attached extending to a bolt at the opposite corner of the lower panel of the door. The wire is doubled and the bolt is so arranged that it may be turned to twist the wire, thus shortening it and lifting the sagging side to normal position.

PINE STUMPS FOUND USEFUL

Found Rich in Turpentine and Resin—Several Products Are Secured From Material.

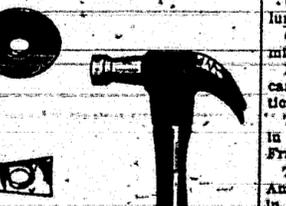

The stumps of the Norway pine left on the fields years ago in the trail of the woodman are now being turned to account by many establishments in Michigan and Wisconsin. These stumps are rich in turpentine and resin, and the process utilized is what is known as destructive distillation, which is quite simple and interesting owing principally to the great variety of materials which are secured from this refuse of the fields. The stumps are cut into blocks and loaded on iron cars of cage construction and fired in a retort. The heat drives out the moisture and oil and opens up the fiber of the wood. The water comes off first, followed by the resin, then turpentine, succeeded by a mixture of tar and turpentine, and finally the flow consists of pure tar. The average yield is 28 gallons of turpentine and 87 gallons of tar from a cord of wood weighing about 2,232 pounds. The residue consists of 40 bushels of soft charcoal.

From this material there are obtained the following products: Shrapnel, shingle stain, wood filler, embalming fluid, furniture polish, face lotion, paint and pigments.

FASTENING A HAMMER HEAD

Average Handy Man Probably Has Not Heard of New Idea, Shown in the Illustration.

The following method of securing hammer heads to handles may prove useful. It consists in taking an ordinary washer, cutting it away at opposite sides, and then beveling it to form a wedge. When this is driven into the end of the hammer handle it is held firmly in place by the fibers of the wood that are forced into the original washer hole in the center of the wedge. This idea is not offered as something new, but the average handy man has probably not heard of it, and may find it a very serviceable link.—Scientific American.

Handle Wedge Made of a Washer.

Asbestos Output. The Canadian asbestos output has increased from 380 tons in 1880 to 63,300 tons in 1909. The quarries and factories are capitalized to the amount of \$34,390,000. In the Black Lake quarries, province of Quebec, there are 48,000,000 tons of asbestos in sight.

Concrete Railway Sleepers. Reinforced concrete railway sleepers with asbestos fibers soaked in water and mixed thoroughly with cement is one of the parts that have been used on Bavarian railways, and in the first five months of service showed no defects.

Use Flange Couplings. Flange couplings should be used liberally in installing pipes. Sometimes it is necessary to take out a piece of pipe, thereby saving in time replacing and extra cost.

Production of Copper. The United States now produces more copper than all the rest of the world together.

Chicago is the world's greatest lumber market. Ovaries are now being made of a mixture of rubber and asbestos. Many shoes sold abroad as "American made" are not such in any particular. The coal consumption per capita in England is three times that of France. There are twenty-five types of American automobiles on the market in England. The German industries employ 9,000,000 women, of which 28,000 are employed in mining. Gas furnaces alone are now used at the royal mint for the melting down of precious metal. A single needle manufacturing machine will produce one and a half million needles per week. Germany has 438 plants for the preservation and utilization of potatoes in one form or another. The effect of seasoning wood is to bring into the same space 10 per cent more of the fibres as when the wood was green. As a possible substitute for cotton, German textile experts are experimenting with the fiber of the Asiatic silk cotton tree. There has been great industrial development in Austria in the last eight years and the standard of living has been raised materially. A new white metal alloy, aluminum, is lighter than aluminum, makes sound castings, turns well and may be soldered, forged and welded. Wood is so scarce in England that a process has been invented for producing it artificially. Straw, seaweed and grass are compressed to make it. A nail puller consisting of a curved shoulder and a toothed wheel, suitably mounted is carried on one end of a hammer patented by a Washington man.

LEAD IN FOOD SUPPLIES

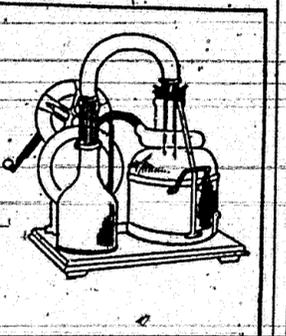

Lemonade, One of Most Popular American Drinks, Said to Contain Poisonous Lead.

A pure food investigation by Dr. Carlo Formenti, of Milan, has dealt with poisonous metals in food supplies. Most metal salts are poisonous, and are liable to occur in acid foods and drinks from chemical action on containing vessels. Lemonade and other acid drinks so popular in America, and even carbonated waters, often contain lead. This comes not only from metal utensils used in preparing the drinks, but also as impurities in tartaric acid and in carbon dioxide gas; and even in minute quantity taken often may be a real danger, as lead tends to accumulate in the tissues of the body until it causes illness or even death. Copper was found in nearly all canned green vegetables, its use for tinting such products being emphatically condemned. The finding of much manganese in certain vinegars was a surprise, but special inquiry showed that potassium permanganate is used to correct the taste of cheap vinegars made from refuse and rotting fruit. Though the manganese is probably not harmful, vinegar from such materials should be prohibited. Arsenic in wines sometimes comes from insecticides used on vines, and the use of arsenical insecticides was lately forbidden in France. The investigator recommends aluminum cooking and containing vessels as quite harmless.

ICE MACHINE FOR THE HOME

Water Is Frozen by Vacuum Apparatus Which Also Freezes Ice Cream—Idea From Denmark.

All the way from Denmark comes the idea of the vacuum ice machine for the home. The various uses of this apparatus makes it very convenient to have about the house. It works on the principle that water freezes when quickly evaporated, and is so simple that even the stupidest domestic can operate it, which is saying a great deal. A jar to hold water is connected with a vacuum bell by means of a hose, and the vacuum is

Turn Crank and Water Freezes.

created by turning a crank. As the air passes from the jar the water freezes. This same process can be used in making ice cream or iced tea and coffee, and in the first mentioned case, in particular, is a big improvement over the method that requires turning a crank for twenty minutes. The only chemical used in the apparatus is sulphuric acid, and the acid does not come into contact with the water or other liquids to be cooled.

INDUSTRIAL MECHANICAL NOTES

Chicago is the world's greatest lumber market. Ovaries are now being made of a mixture of rubber and asbestos. Many shoes sold abroad as "American made" are not such in any particular. The coal consumption per capita in England is three times that of France. There are twenty-five types of American automobiles on the market in England. The German industries employ 9,000,000 women, of which 28,000 are employed in mining. Gas furnaces alone are now used at the royal mint for the melting down of precious metal. A single needle manufacturing machine will produce one and a half million needles per week. Germany has 438 plants for the preservation and utilization of potatoes in one form or another. IN VOGUE

USEFUL SHIRT WAISTS

THREE WELL CHOSEN GARMENTS WILL MEET ALL NEEDS.

One of the Newest Models Offered for Hot Weather Wear is Comfortable Bodice That Can Be Worn While Traveling.

If the dress is to see hard service, have it in a dark color and match it with a hat suitably tailored yet capable of being changed with a bit of dressy trimming on occasions. The London hats, or the trim shapes which imitate these imported styles, are very useful for both long and short trips, and as some of these have only one bit of decking put on at the side, it is an easy enough matter to carry along a pretty "poke" of flowers—one of the high, tightly massed lifts—to put in place of the feather or cockade worn at more strenuous times.

The next useful garment for the suitcase traveler is the shirt waist, and with three in suitable fabrics she can successfully go through a week end at a fine country house or stop several days at a good hotel. The fabric of soft and washable sort is to be preferred for all three garments to a stiff material, wash silks, unsoftened batiste and pongee supplying about the best materials. For the traveling

One of the Newest Negligee Bodices Offered for Hot Weather Wear.

wallet the pongee in natural color, a rich tan or pale gold, would be useful and effective. The dressy waist could be of the batiste or of a fine lawn with a dainty lace and hand-run tucks, and there could be a negligee blouse in the wash silk for tired moments and very informal occasions. The last, in fact, could do duty as a wrapper, that is, serve instead of one, for it cannot be expected that there will be room in the suitcase for all the comforts of the toilet. The comfortable little bodice shown in the illustration is one of the newest

RED KID BOOTS IN VOGUE

Flery Colored Footwear Will Be Worn With White Suits, According to Dictates of Fashion.

A new fashion note, apropos of the popularity of white goods this spring and summer, was noted in the factory of a maker of women's high-grade shoes, where we saw a large number of red kid button boots being prepared for shipment.

Upon inquiry we learned that these red kid boots were intended for wear with white suits and gowns at fashionable country and seashore resorts as a change from white footwear, it being evident to many of fashion that she must have footwear that will take her out of the ordinary humdrum of fashion.

Her white suit or gown will have a touch of red trimming to complete the combination of a white dress and red boots.—Shoe Retailer.

Fashion's Fancies

New beret pins for velvet are of opaque green crystals in groups set in platinum.

Recent advices from Paris speak of the return of the skirt with a jacket.

Nothing can be considered smart in the way of a handbag that is over an inch thick.

A bunch of artificial flowers at the waist or higher on the bodice is the finishing touch in many afternoon gowns.

USEFUL SHIRT WAISTS

THREE WELL CHOSEN GARMENTS WILL MEET ALL NEEDS.

One of the Newest Models Offered for Hot Weather Wear is Comfortable Bodice That Can Be Worn While Traveling.

If the dress is to see hard service, have it in a dark color and match it with a hat suitably tailored yet capable of being changed with a bit of dressy trimming on occasions. The London hats, or the trim shapes which imitate these imported styles, are very useful for both long and short trips, and as some of these have only one bit of decking put on at the side, it is an easy enough matter to carry along a pretty "poke" of flowers—one of the high, tightly massed lifts—to put in place of the feather or cockade worn at more strenuous times.

The next useful garment for the suitcase traveler is the shirt waist, and with three in suitable fabrics she can successfully go through a week end at a fine country house or stop several days at a good hotel. The fabric of soft and washable sort is to be preferred for all three garments to a stiff material, wash silks, unsoftened batiste and pongee supplying about the best materials. For the traveling

models offered for hot weather wear, and a very young woman might wear it while traveling with perfect propriety, as a good throat and arms are its chief requirements. There are some lovely wash silks striped with the new dress colors, and while rather of the negligee species, such little bodices, made up in this manner, would be very effective with a wool suit on a hot day. If the silk is of a very stylish sort, too, it would be a good idea to hem a bias of it for a hat scarf, and a proper hat for this would be one of the duck tourist or outing shapes which are selling from 50 cents up. A "dicky," or front, made to show the possibilities of a plain waist, is likewise a useful trifle for the traveler to take along, and if she looks about the shops she will find many pretty styles in these. As to underwear, unsoftened dimity, from which every garment needed is made, could be used for the long petticoat; there is a wide range of light and reasonably priced materials. In several of the shops the smartest underwear imaginable is made of tan pongee, and this is much sought for traveling use. When selecting footgear remember that tan leather is cooler than any other, and that white wash leather gloves are about the smartest worn. A little pair of 50-cent Turkish slippers will also add to the traveler's comfort and contribute nothing to the weight of the suitcase. MARY DEAN.

THE AGREEABLE SWISH OF SILK

There is no denying the luxuriously impressive effect of a soft froth of silk in a woman's garments. She may be quite simply dressed, an unobtrusive little figure sitting meekly in a corner of the room—let her rise and walk across the floor with a delicious suggestion of rustling silk following her movements. The severely made gown will take on the contours of a Paquin model.

When several years ago fashion's stern decree substituted the soft meshalines for the noisy, tangle-under-skirts deep was the chagrin therein. But at an exhibition of this spring's styles at a fashionable dressmaker's, one of the models created a pleasurable sensation by filling the room with the agreeable swish of taffeta silk.

Fullness in Lingerie

Lingerie usually keeps pace with fashion and the newest trousseau petticoats and combinations are full—not at the hips, but at the befrilled hem—more so than for three years. This points distinctly to much fuller skirts in muslin frocks, otherwise the ruffles of the petticoats would be bound to make the wearer clumsy and uncomfortable. As embroidered panels are quite the rage in the sheer dresses, any frocks made narrow ahead of the season can easily be pieced out with something of the kind before the time comes for actually wearing them.

Chiffons

Many of the latest blouses which are worn under coats have lace ruffles at the wrist.

Many of the newest coats still show the side fastening, some starting slightly below the waist line, and others up at the shoulder.

Cape collars, extending over the shoulders are a feature not only of many heavy coats, but also of house and street gowns.

Striking Example of the Milliner's Art

Seen on the Boulevards of Paris.

One of the striking pieces of headwear of the Paris boulevards is an all-silk, close-fitting bonnet, which comes down well over one side of the face and sets jauntily. A bow effect in the back gives it a chic appearance. The colors range in hue from deep red to light pink.

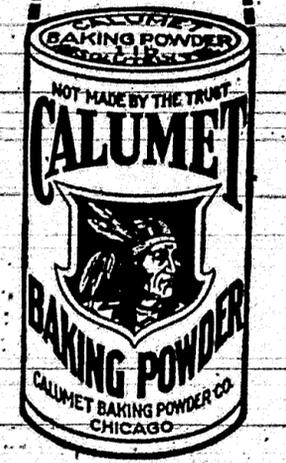

Care of Nails

The nails should always show, that they are well cared for. Carefully manicured nails are indicative of neatness; they should be manicured at least once a week and polished and the cuticle removed frequently. The equipment needs little and the money is certainly well expended.

Keep Your Eye on that Can

When Buying Baking Powder For this is the baking powder that makes the baking better. It elevates the food evenly throughout; puffs it up to airy lightness, makes it delightfully appetizing and wholesome. Remember, Calumet is moderate in price—highest in quality. Ask your grocer for Calumet. Don't take a substitute.

STORMS TO PREDICT SELVES

Wireless Stations to Be Used to Make Tempests Send Their Own Warning Ahead.

Storm centers move usually in an easterly or northeasterly direction. Hence the prediction of storms on the Atlantic coast is possible, since most of them come from the Mississippi valley. Some come up the coast from the Caribbean sea, but even in this case we have no warning.

But western Europe is less fortunate. Its tempests come from the Atlantic, and with little warning. European weather men have made as much as possible a study of the paths of American storms across the Atlantic and are sometimes accurate in predicting the time of their arrival; the same has been done with storms coming up from the South Atlantic.

But it often happens that storms vary either their route or the rate of movement, so that predicting cyclones on the coast of western Europe is more or less guesswork.

As a possible help in this respect Director Andre of the Lyons observatory is making a deep study of the galvanometer records of various wireless telegraph stations. He has found that the antennae are sensitive to any stray electric currents as well as to messages, and he hopes to discover a way to make the storms telegraph their own warning ahead of their arrival.

Every storm is accompanied by electrical disturbances, and already M. Andre has accumulated a mass of evidence to show that each storm in this way gives warning. Just how to read this evidence is the problem to which he is devoting himself.

A girl thinks a young man who spends money freely is the whole thing—but if she marries him and finds he has spent it all she changes her mind.

Agriculture supports nearly 18,000,000 of the inhabitants of the German empire.

Beware of Spring's sudden changes; keep Garfield Tea at hand. Delic hot on retiring.

There may be cramps of comfort in knowing that some people cast their bread upon the water.

Ten miles for a nickel. Always buy Red Cross Dog Biscuits; have beautiful clear white clothes.

German silver is an alloy of nickel, copper and zinc.

DEMOCRATIC NOMINEES AND PLATFORM.
 The result of the democratic national convention is a source of much gratification to us. The convention named a man for the presidency who is the ablest leader of advanced thought in the entire nation. In Woodrow Wilson the democrats have a standard bearer that, in intellect, training and knowledge, is in the forefront of progress. He is without a peer, perhaps, on the American platform, and is one of the most convincing speakers in public life. He is a democrat, in a broader sense than a party designation, in speech, thought, action, and his candidacy will appeal more forcibly to all the people than any man who has sought the presidency in the past half a century.

His running mate, Governor Marshall, is regarded as a magnificent executive, and whose record as governor of Indiana has shown him to be a strong progressive. The taint of Wall street does not hang about his garments, and he was not named for the vice presidency because he had a barrel to be tapped for campaign purposes. He is very popular in his own state, which has heretofore been designated as doubtful; but which can no longer be classed in that column.

The platform is everything that progressives demand, and it not only meets the approval of democrats, but is largely endorsed by that great wing of the republican party which is dissatisfied with the renomination of Taft and the platform upon which he stands. Indeed, it is asserted by them that the democratic nominees and the platform presented by the democrats so fully meet their approbation that there remains no necessity for a third party, of which much has been said since the Chicago convention. With candidates and platform so acceptable and with such an overwhelming sentiment in favor of popular government, it is plainly evident that the people, in November, will ratify the action of the national democratic convention at Baltimore.

The democrats at Baltimore, it is admitted by their enemies, even, have excelled in one thing, at least. The convention took a greater number of ballots than any convention in history.

The democrats in convention in 1844, at Baltimore took 39 ballots, nominating James K. Polk. The republicans in 1880 took 36 ballots, nominating James A. Garfield, thus defeating U. S. Grant's aspirations for a third term. But in 1912, at Baltimore, the democrats broke the record.

Few will deny La Follette's statement that Teddy broke the back of the progressive movement. Had Teddy devoted his energies to an unselfish endeavor he might have succeeded in nominating La Follette, Cummins or some other man much more acceptable to the people than president Taft.

The people will be satisfied with reasonable salaries for county officials, without discriminating against one set of officials or in favor of another, and such an arrangement should be satisfactory to the officers themselves. Working along these lines the next session of the legislature should have no difficulty in adjusting this much vexed question.

A person purchasing a bottle of Chamberlain's Cough Remedy has no conception of the magnitude of the laboratory where this medicine is manufactured. The machinery and apparatus used in its preparation was designed especially for the purpose and cost several thousand dollars. Europe, South America and the United States supply the various ingredients of this remedy, and only the highest obtainable quality is used. No pains or expense has been spared in making it as nearly perfect as possible.

A force of helpers representing homes enough to populate an average Iowa town are regularly employed at the plant of the Chamberlain Medicine Company at Des Moines, Iowa. Their printing department, which is usually overlooked in calculating the expense of a business of this kind, ranks as one of the best in the state, and is thoroughly equipped with automatic presses and folders of the latest improved type. Here enough print paper is used in one year to spread over ten farms of 160 acres each, upon which is printed advertising matter, directions and labels in twenty-eight different languages and dialects. Enough lumber is used in making the cases in which the medicines are shipped to build an eight room house on each of these ten farms every three months. The bottles used by this firm every year, which are filled by machinery at the rate of 2,000 per hour, if placed end to end would reach across the United States seven times or almost encircle the globe.

Two brothers were in partnership in the coal business. One of them got converted in a revival meeting and then urged his brother to get religion too. The brother replied, "Why John, I'd get converted who'd weigh the coal?"

Two brothers were in partnership in the coal business. One of them got converted in a revival meeting and then urged his brother to get religion too. The brother replied, "Why John, I'd get converted who'd weigh the coal?"

CARRIZO NEWS

CARRIZO NEW MEXICO

THE SCHOOL FOR COURTSHIP.

Courtship is an art so fine and subtle that the world has gone on for thousands of years with scarcely a thought of reducing it to anything like a definite science to be taught and learned by rule. The romancers, to be sure, have woven innumerable tales from this Garden of Eby Love, and lately the realists have begun digging lustily among its roots and hidden tendrils; indeed, the typical novel of today is concerned far more with the physiology than with the sentiment of courtship. Matrimonial bureaus have been established, too, and perhaps in certain desperate cases they have justified their trade. It has been left, however, to a high school in Los Angeles to lead the way by establishing a thoroughgoing department for the art of getting married—and of staying married, says the Atlantic Journal. The courses are proving immense popular. There are five classes in which the girls are carefully tutored in matters of deportment during the various phases of wooing. They are also instructed in household management, some dietetics, dressmaking, millinery and the care of babies. It was originally planned that the boys of Los Angeles should be permitted to take these courses next year. There is now a prevailing opinion, however, that this will be altogether unnecessary, for when the girls have mastered their subject and have sharpened their instructive skill with special knowledge, what need, pray, will there be of any man knowing anything at all about courtship? The fact is, the average damsel, though she should be reared, as Perdita was, upon a lonely trowerless island, can come upon the carpet at 18 and win as many proposals as she sees her head to. O, those wise women of the West! The Wise Men of the East were nothing to them!

There are more ways of getting the most out of the land than adding to its fertility by plowing in guano or phosphates. "Seedcorn" Holden has been lecturing to the members of the New York produce exchange and telling them what he told the Iowa farmers, that it is worth while to every farmer to take pains in the selection of his seed. Planting the best seed is rewarded when the time comes for gathering the crop. Observation in Iowa has shown that fifteen per cent of the corn kernels planted are dead before they are sown. It is not difficult to add ten bushels per acre to the production by simply taking care with respect to the seed. Ten bushels more per acre would add nearly a billion bushels to the corn crop. Undoubtedly it pays the farmer to take pains in the selection of seed.

There is something that looks very practical in the plan of the California rat and cat ranch man to feed the carcasses of the rats to the cats and the spruces of the cats to the rats, making his profit by marketing the skins. Of course it will be assumed that as the animals increase and multiply, the multiplication of each species will insure the food supply of the other. Isn't it fascinating? And all the time the checks will be coming in for the skins. There is nothing exclusive about this ingenious Californian. He is willing to allow the investing public to purchase some of the shares in his industrial enterprise, which is organized in the form of a stock company.

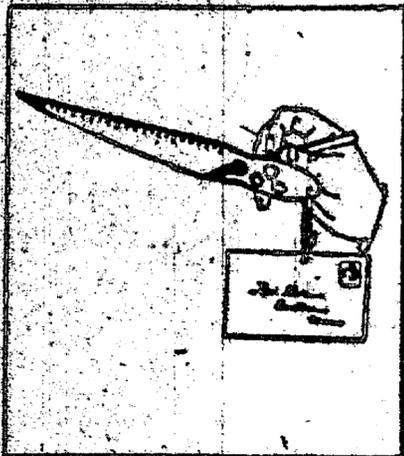

SCIENCE AND INVENTION

SCALES AND LETTER OPENER

Handy Little Implement Will Be Found of Great Convenience For Any Office Desk.

A handy desk combination is a letter opener and mail scales which is brand new and the handiness of which will be recognized by anyone in a short time. The letter opener is a

Balance and Letter Opener.

flat, slit-like piece of metal, the handle end of which is supplied with a letter clip. Mail matter to be weighed is placed in this and a lead pencil is thrust through one of the four holes. The weight of the letter is indicated by the particular hole through which a balance is struck in this operation. The edge of the implement is marked off in inches so that a six-inch rule enters into the combination.

"WATER KISS" IS SANITARY

Young Chicago Sculptor Concocts Idea of Drinking Fountain in Form of Upturned Face.

A sanitary drinking fountain in the form of an upturned sculptured face, from the lips of which the water bubbles as from a bubbling cup, is the idea of a young Chicago sculptor. The

"Water Kiss" Fountain.

head rises from a carved stone or marble chalice, and from the lips each thirsty passer-by may obtain what the young sculptor describes as a "water kiss."

The model can be reproduced in plaster, cut in stone or cast in metal, to suit local requirements.

Woman Invents Curtain Rod.

Women rarely invent anything, but an exception is a new kind of curtain rod, which will adjust itself to a window frame of any width. The rod is made to do this because it carries a stiff spring

BREAD MADE WITHOUT FLOUR

Parisian Machine Transforms Wheat into Dough—Homogeneous Mixture Forms Smooth Paste.

Parisian bread is made without flour in a machine that transforms the wheat into dough. The machine consists of a large screw turning loosely in a cage on whose inner surface is a screw thread running in an opposite direction. Between the main threads on the cylinder are smaller threads, and the depth of the groove grows progressively smaller from one end to the other, so that it will hold the entire wheat grain as it enters the machine and will accommodate only the pulverized wheat at the exit.

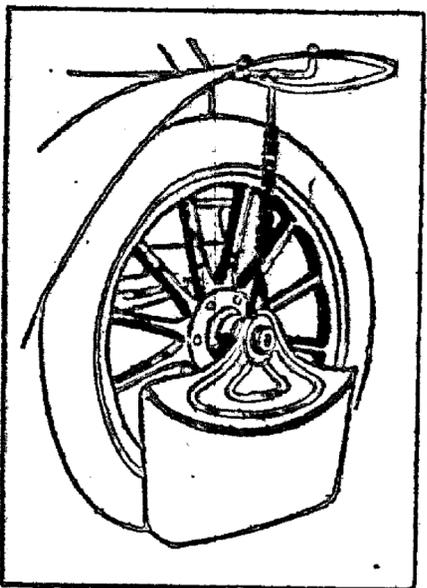

The wheat is prepared by a thorough washing, after which about a pint of tepid water to a pound of grain is added, and the whole is allowed to stand about six hours. At the end of this time the grains of wheat have swollen to double their ordinary size. It is then mixed with the yeast and salt and poured into the machine. It falls between the threads of the moving screw and of the fixed contrary screw, which simultaneously crush the envelope and body of the grain, making of them a homogeneous mixture which forms a smooth paste.

Bread obtained by this process contains a succession of holes whose size increases as they approach the crust, which is thin. The odor given off is most agreeable and far more pronounced than that of ordinary bakers' bread.

PREVENT SPLASH FROM AUTO

Guards Suspended From Hubs of Machine Shields Pedestrians From Water in Streets.

A serious cause for complaint against the automobile has been that in passing through puddles in the street the wheels will often splash

Auto Water Guard.

muddy water up on the pavement to the injury of pedestrians' clothing. Many a handsome gown has been ruined in this way, and the worst of it is that the stains are often of such a nature as to defy the most efficient cleaner. To prevent this annoyance the splash guards for automobile wheels have been designed. They are made of fan-shaped metal plates with a circular opening by which they are fitted over the hubs of the automobile wheels. From these frames a curtain of steel mesh depends to just above the street level, and this curtain effectually prevents any water from splashing up on the pavement. On dry, clear days, of course, the car need not be equipped with these guards, although they are no trouble at any time.

Pneumatic "Shake-Down."

A pneumatic rug or "shake-down" has been invented for the convenience of motorists who must lie on their backs beneath their cars while making repairs.

PRACTICAL HELP FOR POOR

Man Undoubtedly Had Great Scheme, Although There Was a Slight Obstacle in the Way.

In the den which opened off the living room the man was reciting soulfully his own modernized version of an old song, "If I had but ten millions a year, Gaffer Green, if I had but ten millions a year—"

"What would you do with it?" his sister interrupted, less for purposes of information than in pursuit of quiet.

"One thing, anyhow, Sis," he broke off with unexpected earnestness. "I'd establish a system of free laundries for the poor. Now Yorkers are wonderfully clean people, all things considered, but you can't go around much without realizing that mere laundry work and bathing would to an immense benefit in some directions."

"But how would you manage it? Who would be the beneficiaries? How could you discriminate?"

"All that would have to be considered, of course. Now, you work out the details, Sis, and I'll go out and try to scrape up the ten millions."—New York Press.

Not a Lively Fish, at Best.

One of the porters on the train out of Salt Lake City was an impressive-looking negro, who had a ready, if inaccurate, answer to almost any question put him by the passengers. It was hard to tell whether he believed all that he said or whether he was having fun with his questioners.

One man, on first catching sight of the lake, asked if there were any fish in it.

"No, sah," said the porter. "Jero ain't no fishes in dat lake, sah. Day done tried for ees of day couldn't have fishes in dere, but dey wouldn't stay alive. De fishes dat stayed alive de longest was salt creek's, but dey wa'n't gery prosp'ous, sah."—Youth's Companion.

BAD CASE OF GRIP

Caused Sore Throat and Tonsillitis. Restored by Peruna.

Mr. W. H. Housley, Brownsville, Tex. writes:

"Three years ago I took a very severe cold which resulted in a grippe. I never was as bad off. I was in bed several weeks, and when I did get up I had to swallow and sore throat."

Mr. W. H. Housley

"I tried to cure this for eighteen months, but it gradually got worse. A doctor advised me to have my tonsils cut out, but I did not like the idea. Another doctor examined me, and told me the same thing. I finally got a bottle of Peruna, and after I had taken one bottle my throat was better. I bought and used a dozen bottles, and now I was going to get well, and I did."

Ask Your Druggist for a Free Peruna Almanac for 1912.

No man ever strays on earth so much as he does his stomach.

Makes the hundreds happy that's Red Cross Day Dishes. Makes beautiful, clear white clothes. All good reasons.

The happiest people in the world are those who are most easily satisfied.

It's easier for a young man to write a satisfactory love letter during courtship than it is to write a satisfactory check after marriage.

Hankins Wizard Oil is recommended by many physicians. It is used in many public and private hospitals. Why not keep a bottle on hand in your own home?

Let this be said of our enemies. They'll not give us Christmas presents for which we never did and never will have any earthly use.

Constipation causes and seriously aggravates many diseases. It is thoroughly cured by Dr. Pierce's Peppermint Cure. They must costal glands.

A Celebrated Dance. "When Mary Grover began to sing did not you observe how our hearts glanted apprehensively at the window?"

"Yes. I dare say she was afraid the window-panes would be shattered."

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher* in Use for Over 30 Years. Children Cry for Fletcher's Castoria.

Entire Country Interested. On January 1, 1903, there were about 150 different agencies engaged in anti-tubercular work, of which number 111 were sanatoria. The increase to over 2,000 agencies has emphasized the National Association for the Study and Prevention of Tuberculosis points out the importance of the campaign for the prevention of consumption being carried on in all parts of the country.

FRIVOLITIES

PRETTY FOR NECKWEAR

BORDERED AND LACE-TRIMMED HANDKERCHIEFS MUCH USED.

Dress Accessories That Furnish Effective Opportunities—Little Finishing Touches in Dress That Save One From Monotony.

Bordered and lace-trimmed handkerchiefs are put to all sorts of uses in making dress accessories. In neckwear and in trimming the opportunities for their effective use are many and designers have only just begun to exploit them.

It is by changing the little finishing touches in dress that we are saved from monotony. It would be

absurd to have quantities of clothes made up just for the sake of having a variety. Wise is she who has many accessories of dress. Neckpieces, beads, brooches, turn-over collars and cuffs, laces, tabs and revers; things which may be kept clean and which supply the finish and variety which are more noticeable than the gown itself and the most charming elements in the apparel of women.

By choosing a good color in a bordered handkerchief one may have revers at the neck, cuffs and the border to match, to be worn with a dress having a Dutch neck. For cold weather such a dress is worn over a guinea. One large handkerchief supplies all the pieces. Among bordered handkerchiefs for men there are many in good fast colors and several of these sets are put to making.

A pair of coat revers are shown, made of a lace-bordered handkerchief.

The largest size made for women is chosen for them, and not diagonally across. The embroidered corner with tiny initial is an additional attraction. These are edged with a narrow binding of mail or braid and placed to the coat. A second handkerchief in this size may be cut into a collar and the two together make a pretty fabric effect.

JULIA BOTTOMLEY.

PRETTY SETS OF LINGERIE

Cups and Doves Are Embroidered on the Delicate Garments of One Dista.

Openwork wheel embroidery so often repeated that very little of the background was to be seen in the favorite embellishments of a complete set of underwear made for a coming trooper.

Two other sets of finest quality are embroidered with little cups and doves supporting a rope of roses, all rendered in the finest embroidery.

A third set has Malines lace first upon it, and the rich crests and Valenciennes decorative is fourth.

For some of the little capes which are finely pleated children's dresses are chosen as an elegant and others have scalloped ones overtopped with wool, which looks easy and of an unmanly appearance upon well-backed satin.

Completely charming are the eyelets sold to be thrown over the lingerie sets when put out by the lady's maid for morning or evening wear, each one being then a match to the lingerie.

The slips and blouses from the lingerie department of a well-known maker of such frivolities are like garments for lightness of weight and show the simplicity of line and design that is absolutely delightful when the finest fabrics are used.

There is a petal pink crepe blouse with a collar and straight yoke of black Chantilly lace, to which decoration is added a little transparent trimmed with a fan of black Chantilly.

Another is of the three layer kind, the first of finest embroidered tulle and the third of patent lace, with a sandwich between of "egg yellow" lace.

DRESSING THE LITTLE GIRL

Artistic Arrangement of the Hair Helps, But Mother's Good Judgment Is Limited.

Some children do not lend themselves to any sort of artistic dressing. Day or the other hand, there are a great many who do, the arrangement of the hair having a large say in the composition of a picturesque appearance.

Instances after instances can be recalled where a child with no real claim to beauty has been rendered of most attractive appearance, thanks to a clearest arrangement of the hair. But it seems to those who have the dressing of children very close to heart that we have come to a sort of conclusion.

The lack of any really fresh departure is very marked. The same ground is worked year after year, and anything more desirable than the spectacle of a little girl dressed in a tight, artificial travesty of her mother's, is nowhere to be found.

The stage may, perchance, essay a combination of any fashionable fashions, but a girl so dressed will go in with the crowd.

Costs of Breadstuffs

During the last few weeks there has been considerable interest shown in plain black coats of broadcloth, says the Dry Goods Economist. The majority of these coats are of a simple character and are trimmed with small velvet or satin and some with real or imitation fur.

IOWA WOMAN WELL AGAIN

Freed From Shooting Pains, Spinal Weakness, Dizziness, by Lydia E. Pinkham's Vegetable Compound.

Ottawa, Iowa.—"For years I was almost a constant sufferer from female trouble in all its dreadful forms: shooting pains all over my body, the headache, spinal weakness, dizziness, depression, and everything that was horrid. I tried many doctors in different parts of the United States, but Lydia E. Pinkham's Vegetable Compound has done more for me than all the doctors. I feel it my duty to tell you these facts. My heart is full of gratitude to Lydia E. Pinkham's Vegetable Compound for my health."—Mrs. HARRIET E. WAMPLER, 124 E. Rankin Street, Ottawa, Iowa.

Consider Well This Advice. No woman suffering from any form of female trouble should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial. This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for nearly forty years proved to be a most valuable tonic and invigorator of the female organism. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound. If you want special advice write to Lydia E. Pinkham Medicine Co. (consultative) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Munyon's Paw-Paw Pills RELIEVES TIRED EYES

NO SYMPATHY THERE.

Henderson—I'm not living with my mother-in-law any more.
Honepeck—I don't blame her.

He Did Not Wonder.

One of the worthiest of a Fifth village happened to be working in his garden with a very small spade, when a neighbor came on the scene and remarked: "Man, Jamie, that's a gay wee spade ye're working wif. Ma indies have bigger spades for suppin' their parritch wif."

Without glancing up, "Jamie" replied: "Ma maminie, I dhinn winder at it when I see their father's mouth."—Tit-Bits.

SURPRISED DOCTOR.

Illustrating the Effect of Food.

The remarkable adaptability of Grape-Nuts food to stomachs so disordered that they will reject everything else, is illustrated by the case of a woman in Racine, Wis.

"Two years ago," she says, "I was attacked by a stomach trouble so serious that for a long time I could not take much of any sort of food. Even the various kinds prescribed by the doctor produced most acute pain.

"We then got some Grape-Nuts food, and you can imagine my surprise and delight when I found that I could eat it with a relish and without the slightest distress.

"When the doctor heard of it he told me to take several small portions each day, because he feared I would grow tired of it as I had of all other food.

"But to his surprise, (and that of everybody else), I did not tire of Grape-Nuts, and became better day by day, till, after some weeks, my stomach entirely recovered and I was able to eat anything my appetite craved.

"My nerves, which had become so weakened that I feared I would become insane, were also restored by the Grape-Nuts food in connection with Postum which has become our table beverage. I appreciate most gratefully and thankfully the good that your food preparations have done me, and shall be glad to answer any letters inquiring as to my experience." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in place. "There's a recipe."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

LIKE THROWING AWAY MONEY

American Cook Wastes Liquids From Which French Cook Would Make Appetizing Meal.

"Only water," says the American and English cook, pouring off the liquid from asparagus and cauliflower and onions and potatoes, and thereby sending down her kitchen sink that of which a French woman would make an appetizing meal.

In French and Italian kitchens the soup pot stands always on the stove, and into it goes every bit of water from the following vegetables: Onions, peas, beans, turnips, parsnips, carrots, potatoes, asparagus, artichokes, cauliflower and cabbage. The liquid from "greens," such as beet tops, spinach, dandelion and kale cannot be used for soup, but the water from spinach is excellent as a sauce for fish, if slightly thickened and flavored with butter.

The soup pot, receiving all this contribution of savory liquid, does not need the great quantities of meat that make it so expensive an item in American and English cookery. The bone from a porterhouse or sirloin steak, well cracked, is sufficient, or, from a leg of lamb that has been cooked rare, or from any roasted or broiled meat.

Endless variations can be made on this foundation of a bone and water. A cupful of dried Lima beans and half a head of cabbage, chopped, together with a bit from the dinner of the day before, like string beans or carrots, will give a very good Milanese soup, of which Italians are so fond. A teaspoonful of Extract of Beef diluted with a quart of the essence of the pot will produce fine consommé. In August, when peas are getting too old and coarse to be eaten as a vegetable, strain a quart of them into the pot, after cooking them thoroughly, add the water in which they were boiled, thicken very slightly, and you will have a purée of peas that cannot be improved upon.

Clear vegetable soup can be produced by putting a cup of finely chopped parsley, onion and celery into the pot and simmering half an hour. "Crontons," little cubes of toasted bread, should be dropped in at the last moment. Rich vegetable soup is made by adding to the pot two or three fresh tomatoes, several onions, a bunch of carrots, two potatoes diced and a few stalks of celery. Any vegetables left from a dinner should be cut into little bits and dropped into the soup pot.

Raw string beans, chopped and cooked an hour in the pot, and a handful of water cress, added half an hour before serving, makes an unusual soup, which is typically French.

TO KEEP PARLOR RUG FLAT

By Use of Cleverly Contrived Snap-Button Exasperating Hummocks Are Eliminated.

An ingenious somebody has thought of a way to keep the parlor rug from humping itself into exasperating hummocks when the bridge table is dragged over it, and the bedroom rug from curling meanly at its edge so that you stumble over it and break your eyeglasses against the door jamb. The new device is nothing more nor less than a cleverly contrived snap-button and catch—much larger, of course, than the tiny affair which tailors use to fasten skirt openings. The button is tacked to the floor and the catch stitched to the wrong side of the rug—and there you are. It is the work of only a moment to unfasten the snap-catch and loosen the rug for a shaking out of doors.

Cider Apple Sauce.

Boil down the cider, use newly dried apples, pared and quartered if sour, allow one-fourth their weight in sugar or use late sweet apples, pared and quartered, very little or no sugar. Cook slowly, and be careful not to break the fruit in stirring.

SUFFERED FOURTEEN YEARS.

A Terrible Case of Dropsy and How It Was Cured.

Mrs. W. R. Cody, 603 Tenth St., Loviston, Idaho, says: "I was so lame and stro I could hardly move. Headaches were frequent and my whole body bloated. I had chills and hot flashes and my ankles swelled so I could scarcely wear my shoes. Kidney secretions gathered me and my nerves were unstrung. I began taking Dean's Kidney Pills and soon the swelling diminished. The backache and other troubles quickly disappeared, and I was completely cured."

"When Your Back is Lame, Remember the Name—DOAN'S." See all stores. Foster-Milburn Co., Buffalo, N. Y.

See Value of Open-Air Schools.

During the year 1911 the greatest percentage of increase among the different forms of anti-tuberculosis work was among the open-air schools for anemic and tuberculosis children. On January 1, 1911, there were only 29 open-air schools in operation or provided for in the entire country. On January 1, 1912, there were 91, an increase of 214 per cent. Sixty-two new schools have been established or provided for this past year. This entire number of open-air schools have been established since January 1, 1907.

DISFIGURED WITH CRUSTS

"Some time ago I was taken with eczema from the top of my head to my waist. It began with scales on my body. I suffered untold itching and burning, and could not sleep. I was greatly disfigured with scales and crusts. My ears itched as if they had been most cut off with a razor, and my neck was perfectly raw. I suffered untold agony and pain. I tried two doctors who said I had eczema in its fullest stage, and that it could not be cured. I then tried other remedies to no avail. At last, I tried a set of the genuine Cuticura Remedies, which cured me of eczema when all else had failed, therefore I cannot praise them too highly.

"I suffered with eczema about ten months, but am now entirely cured, and I believe Cuticura Remedies are the best skin cure there is." (Signed) Miss Mattie J. Shaffer, R. F. D. 1, Box 8, Dancy, Miss., Oct. 27, 1910.

"I had suffered from eczema about four years when boils began to break out on different parts of my body. It started with a fine red rash. My back was affected first, when it also spread over my face. The itching was almost unbearable at times. I tried different soaps and salves, but nothing seemed to help me until I began to use the Cuticura Soap and Ointment. One box of them cured me entirely. I recommended them to my sister for her baby who was troubled with tooth eczema, and they completely cured her baby." (Signed) Mrs. F. L. Marberger, Droversville, Pa., Sept. 6, 1910.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. L, Boston.

Any man ought to get three square meals a day if he is able to work and able to keep from being worked.

ONLY ONE "BROMO QUININE." This is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the World over to Cure a Cold in One Day. E. W. GROVE.

Even if a woman can't afford a new hat she can criticize her neighbor's.

Don't be misled. Ask for Red Cross Bag Blue. Makes beautiful white clothes. At all good grocers.

One thing rarer than a day in June is a woman who has nothing to say.

Money makes the mare go; the lack of it makes her go hungry.

Lost!

"Well, Tommie," said the jocular Ellipter, "you must congratulate me. I'm going to marry your sister."

"Of thunder!" growled Tommie.

"Why, Tommie," protested Ellipter, "don't you like me?"

"Oh, yes; I like you well enough," said Tommie, "but I bet Mabel a pound of candy you wouldn't be fool enough to ask her, and she bet you would."

The New and the Old.

Governor Ross of Massachusetts tells of a well known divine who was visiting a state prison when he came across a prisoner whose features were familiar to him.

"What brought you here, my poor fellow?" he asked.

"You married me to a new woman a little while ago, sir," the prisoner replied, with a sigh.

"Ah, I see," said the parson, "and she was dominating and extravagant, and she drove you to desperate courses, eh?"

"No," said the prisoner, "my old woman turned up."

Poor Tommy.

Tommy had been spanked by Miss Manners, his first grade teacher, but his next teacher had not reached the point where she felt she could do justice to him in spite of all his naughtiness.

"Send him to me when you want him spanked," said Miss Manners one morning, after her colleague had related his many misdemeanors.

About 11 o'clock Tommy appeared at Miss Manners' door. She dropped her book, grasped him firmly by the hand, led him to the dressing room, turned him over her knee and administered punishment.

When she had finished she said, "Now, Tommy, what have you to say?"

"Please, miss, my teacher wants the scissors," was the unexpected reply.

The Trust Test.

"Mother," said Bobby, after a full week of obedience, "have I been a good boy lately?"

"Yes, dear," replied his mother. "A very, very good boy."

"And do you trust me?" he continued.

"Why, of course, mother trusts her little boy!" she answered.

But the chastened child was not pacified.

"I mean, really, really trust me, you know," he explained.

"Yes, I really, really trust you," nodded his mother. "Why do you ask?"

"Just because," said Bobby, diving his hands into his pockets and looking at her meaningly in the face, "if you trust me like you say you do, why do you go on hiding the jam?"

Their Slender Income.

On his way homeward from the shop where he toiled at his daily vocation Mr. Billiger McSwat, carrying into effect a stern and sinister purpose he had cherished for months, stopped at a barber shop and had a portion of his beard removed.

Half an hour later he entered the humble dwelling which, in bristling defiance of newspaper style cards, he called his home.

Mrs. McSwat was sitting in an easy chair and gazing pensively at the fire that burned cheerfully, but economically, in the grate.

"Loholla, my dear," he said, "look at me!" She arose to her feet and looked at him. Then she sank back nervelessly into the easy chair.

During the twenty years of their married life, as it may be necessary to explain, sinking nervelessly into chairs had been one of Mrs. McSwat's leading specialties.

"Billiger," she gasped, "we never can live up to that pair of side whiskers."

Call at Kelly & Son's furniture store and see the Standard Central Needle Sewing Machines in obligation on your part to buy—Just look." Ira O. Wetmore, now located at Deming and engaged in the real estate business, was here a couple of days this week, looking after business interests. Mrs. Bert Bennett, of Oklahoma, came in Tuesday noon for several weeks' visit with her parents Mr. and Mrs. James Gray and other relatives. Mrs. John S. Williamson came in from Deming Saturday night, and went to Capitan Monday to visit her parents, Mr. and Mrs. Seaborn T. Gray. Mr. and Mrs. P. G. Peters are the happy parents of a wee girl, born yesterday morning. This event adds additional interest to them in the 4th of July. Mr. and Mrs. William Graham arrived Saturday night from Palomas hot springs and remained until Tuesday, visiting Mr. and Mrs. Geo. N. Hughes. Mrs. John A. Haley and children returned Wednesday from Roswell. Mrs. Haley has recovered from an operation performed there a month ago. Will Smith was in from the Ocasitas Monday, and left that day for El Paso. He may continue to Arizona, and if he finds conditions favorable will there locate. Mr. and Mrs. R. R. Bird and little son arrived today from Parsons, Kansas. Mr. Bird expects to return in about two weeks, but Mrs. Bird will spend the summer with her mother, Mrs. Mamie R. Grumbles. List your property for sale or rent with W. W. Stadman, dealer in Real Estate, Locating and Surveying. Office in Roselle Jewelry Store. Sprained ankle may be a rule cured in from three to four days by applying Chamberlain's Liniment and observing the directions on each bottle. For sale by all dealers.

How, that the world were hailed there would be enough nails to build house with. Out of town visitors are formally invited to make our store their headquarters while in our city.—Carrizozo Trading Co. A. A. Hudspeth and Paul Mayer, of White Oaks, went to El Paso yesterday. Mr. Hudspeth will visit Las Cruces before returning to attend a meeting of the Agricultural College. Buster Brown and Tige his dog will appear in Carrizozo under the direction of Ziegler Bros. The exact date of his arrival will be announced later. Watch for it. Luther Barnard, with the circulation department of the El Paso Times, was in town yesterday. He made arrangements with Rolland Bros., to distribute the Times to its subscribers here. Mrs. Monroe Harper returned to the Harper ranch on Three Rivers, after a month's visit in El Paso. Her daughter, Miss Rachel, who has been visiting in the northwest, returned with her. Judge E. L. Medler and Mrs. Medler came up today from Lincoln, where they remained for a week on their return from Roswell. The judge presided at a special term of court in Chaves county. W. M. Ferguson, county commissioner, was down Monday, to meet and adjourn the board of county commissioners. The board, at its last session, had agreed to this arrangement, and the regular July meeting will begin Monday of next week. FOUND:—Yesterday on the picnic grounds at Nogal, a bright pink (very loud) elastic, with metal clasp. The trinket is too large for a sleeve holder and too small for a belt. Should the claimant be of the tender sex, it will be surrendered without questions. Lewis England returned Tuesday morning from a visit to his old home in Childress, Texas. He went to his new home the same day, near the old brewery site on the Bonito. Mr. England brought some blooded stock to this country, and will engage in stock farming. Mrs. Chas. Pepper was quite painfully hurt at Nogal yesterday. A horse broke a post to which he was tied, became frightened and ran through the crowd gathered to watch the sports, dragging the post at the end of the rope. The end of the post struck Mrs. Pepper on the ankle, inflicting a very painful wound. It is reported the wound is not as serious as at first believed. Walter Winfield, wife and two children left yesterday for Plainview, Texas, where they expect to reside in the future. The Winfields came here from Texas about five years ago, primarily for Mrs. Winfield's health, and upon their arrival she was in such delicate health that she could not walk from the depot to the hotel. She is now enjoying excellent health and leaves this country highly praising its climate. At the Methodist Church. Sunday school at 10 a. m. Preaching at 11 o'clock a. m. Epworth League services 6:30 p. m. Preaching at 7:45 p. m. Prayer meeting Wednesday at 7:45 p. m. All are cordially invited to any or all of these services. Rev. R. B. BYANS, Pastor. FRANK J. SAGER, S. S. Supt. It is now well known that not more than one case of rheumatism in ten requires any internal treatment whatever. All that is needed is a free application of Chamberlain's Liniment and massaging the parts at each application. Try it and see how quickly it will relieve the pain and soreness. Sold by all dealers.

Various notes of the various celebrations that took place in this county yesterday, except that of Nogal, but from the preparations made in each place and the nature of the day, all must have had good crowds and a delightful time. Nogal, being near us, got the most numbers from our town, and in addition attracted from other places, White Oaks, Capitan and Bonito each furnishing its quota. The estimate of the crowd present was between 800 and 1,000. The crowd began to gather early and many of the minor sports were pulled off in the morning. Dinner was served at the appointed hour, and the general verdict was that the barbecued meats were most delicious, and the fact that the platter was cleaned strengthened the verdict. The ball game, between Fort Stanton and White Oaks, followed and was witnessed by the larger portion of the crowd. Stanton led off by 4 scores and was never overtaken by White Oaks, although the boys from the mountain town gathered themselves together and played good ball in the latter part of the game. The score was Fort Stanton 13, White Oaks 7. Alford Harris won in the bronco busting contest. The horse he mounted did some magnificent jumping and fell to the ground, pinning the rider's leg to the earth, but the rider retained his seat, never changing his position in the saddle, and when the bronco arose the rider was still there. It was a thrilling feat of horsemanship and one not seen often in a contest. The day wound up with a ball at night in the school house and many tripped the "light, fantastic" until the wee sma' hours this morning. The entire program was enjoyable and Nogal maintained its reputation for entertaining all comers. Every woman, before she is allowed to vote, should be able to make a cherry pie. A bucking gasoline engine increased our woes this week and delayed our appearance. FOR RENT—Several houses with from two to seven rooms each. See W. W. Stadman, office in the Roselle jewelry store. TIMES HAVE CHANGED In grandfather's day the American family stayed pretty much in one place. It grew up on the old farm, or lived in the comfortable farm house. The children went not more than a mile to school, and going away to college was exceptional. Travel had not become general. But the world has been extended. Today the typical American family is scattered much of the time. Father hurries back and forth between cities on business. Mother has her own interests, and goes to meetings, conventions, on visits and jaunts. These modern conditions are all good. They mean a broader life and better opportunities. But they also bring a certain element of anxiety and loneliness, due to separation. Trains are delayed, epidemics break out in schools, rumors and alarms come flying from many directions, very often groundless, yet causing worry and fear. The first resource in such emergencies should be the long distance telephone. The family with the best realization of the telephone possibilities enjoy the greatest peace of mind. THE MOUNTAIN STATE TELEPHONE AND TELEGRAPH COMPANY.

A Correction.
Our correspondent from Capitan last week erred in stating that Miss Mary Read had reached Capitan and was interested in an estate in this county, left by her father and mother who had died in Arizona. A daughter did arrive, but it was Mrs. G. S. Kelly, who has come to spend the summer with her brother and sister at Capitan, and who requests this correction.
Let There Be Light.
In the past five years I have installed many Lighting Systems in the business houses and homes of New Mexico citizens, and for the summer months I am especially anxious to install Lighting Systems of the Coleman Hollow System of Lighting in all the ranch homes and surrounding towns; so I will in the next three months put these plants in at prices charged here in my home town. After this time expires, my whole work will be devoted to the general agency of the Coleman System of Lighting in the States of New Mexico and Arizona. Write for prices and booklets in regard to the best modern Lighting System on the market and make up your mind to do away with the old kerosene lamps.

VENICE—A CITY OF DREAMS

Many Cherms for the Tourist in This Picturesque City of Italy.

To the wanderer in Italy, Venice has a peculiar attraction. Arrive there at sunset, or better still by moonlight, and you will fancy yourself transplanted to some city of dreams. With daylight this feeling may wear off to some extent, although there is never, at any time, as much bustle and stir in Venice as in other towns. Morning, noon or night, Venice has a fascination all her own. This is partly due to the fact that she is a city built on the water.

To explore Venice and to become intimately acquainted with her, a gondola is not a necessity, rather it is a luxury for sunset, evenings and moonlight nights. It is a delightful experience, and not a difficult one, to find one's way about Venice on foot; quaint, old world corners are discovered, bits of ancient architecture, carved doorways and little bridges, with a feast of color here, there and everywhere. Apart from all the beauty of scenery, there is the enthralling interest evoked by her history and traditions.

Among the traditions we read that St. Theodore was the first patron saint of Venice, to be superseded later on by St. Mark. The wanderer in Venice becomes familiar with the Lion of St. Mark. More prominently than anywhere is to be seen on one of the columns on the Piazzetta, whilst on the other is St. Theodore. These columns of beautiful red and gray granite are supposed to have come originally from Syria. They were erected by a Lombard engineer—Christian Science Monitor.

Antidrugery Club.

Six women in Chicago have organized a club to lessen household cares. The club is the possessor of an electric vacuum cleaner, one electric washing machine, two electric irons and a fan for drying the washing.

The only dues are those required for the upkeep of these labor savers, and this amount has been estimated to be about three cents a week. The initiation fee consists of the price of the apparatus divided into six equal parts.

The members arrange their work so that a small boy may take the apparatus around to each in turn. They live in one neighborhood, so the affair is easily arranged. How practical; how easily the idea could be explained to take in any number of housekeepers. What a help it would be in solving the servant problem.—American Club Woman.

Best Business Creator.

As a business creator, what is there better than advertising? Have you ever asked that question of yourself? The millions that advertising has made for merchants are uncountable, yet there are business men who even now don't believe in advertising, just as there are people who still think it is safer and more convenient to travel in a prairie schooner behind a pair of slow oxen than in a Pullman palace car. Yet this type of business man is seldom rated in commercial rating books.—Exchange.

Manila to Play Tennis.

The city of Manila is building tennis courts for the use of the public in the sunken gardens opposite the city hall. The courts will have the accommodations of baths, lockers and reading rooms, which will be made by transforming the bastion near Victoria gate into an up-to-date club.

WOMEN SHOULD BE PROTECTED

Against So Many Surgical Operations. How Mrs. Bethune and Mrs. Moore Escaped.

Sikeston, Mo.—"For seven years I suffered everything. I was in bed for four or five days at a time every month, and so weak I could hardly walk. Cramped and had backache and headache, and was so nervous and weak that I dreaded to see anyone or have any one move in the room. The doctors gave me medicine to ease me at those times, and said that I ought to have an operation. I would not listen to that, and when a friend of my husband told him about Lydia E. Pinkham's Vegetable Compound and what it had done for his wife, I was willing to take it. Now I look the picture of health and feel like it, too. I can do my own housework, hoe my garden, and milk a cow. I can entertain company and enjoy them. I can visit when I choose, and walk as far as any ordinary woman, any day in the month. I wish I could talk to every suffering woman and girl."—Mrs. DREMA BETHUNE, Sikeston, Mo.

Murrayville, Ill.—"I have taken Lydia E. Pinkham's Vegetable Compound for a very bad case of female trouble and it made me a well woman. My health was all broken down, the doctors said I must have an operation, and I was ready to go to the hospital, but dreaded it so that I began taking your Compound. I got along so well that I gave up the doctors and was saved from the operation."—Mrs. CHARLES MOORE, E. E. No. 3, Murrayville, Ill.

MODEL LANDLADY RETIRES AFTER FIFTY YEARS

Boarders Who Had Been With Her for From Fifteen to Forty-five Years, Give Her Farewell Banquet

CHICAGO—Miss Margaret Murray, Chicago's model boarding house keeper, has retired from business after conducting a boarding house for 50 years. She is eighty years old, and has as much money as she needs to keep her for the rest of her days.

Fourteen men gathered at the little farewell banquet she gave recently at her boarding house, at 122 South Green street, a dingy thoroughfare in the heart of a manufacturing district. Most of them were gray-haired and old, some were wealthy and all were well-to-do. They had been her boarders for terms ranging from 15 to 45 years.

On that occasion, these boarders toasted their retiring landlady in coffee of her own brew, and called her "the paragon of boarding house keepers," "the most wonderful boarding house keeper in the world," and "the best boarding house keeper in all history."

There are no statistics on boarding house keepers to test the exact truth of these encomiums. But the facts in the case would seem to prove beyond cavil that, even if Mrs. Murray were not the best boarding house keeper in history, she at least is to be numbered among the chosen few.

Boarders Seldom Left Her.

One may best judge the hold she had upon her boarders by the term of years each one has been with her. Here is the list of her boarders and the number of years each stayed:

Case Stewart, official of the Chicago & Northwestern railway, who became a boarder with Miss Murray before the Chicago fire, 45 years.

Inspector John Wheeler of the Chicago police department, who became a boarder when he was a patrolman, 34 years.

Neil McIntyre, architect, 29 years.

Edward Cooney, policeman, 26 years.

John Cassidy of the Central Trust company of Illinois, 22 years.

Daniel O'Connor, broker, 20 years.

Timothy Daley, policeman, 18 years.

Michael Daley, his son, seventeen years old, 15 years.

Edward Beal, buyer for a department store, 15 years.

Dr. W. A. Quinn, 18 years.

Dr. William H. McCarthy, 16 years.

Frank Hoy, 15 years.

Samuel Wilson, 15 years.

Dr. Charles W. Inwall, 15 years.

One perhaps might wonder why there was no boarder who had been with her throughout the full 50 years she kept a boarding house. Miss Murray explained this at the banquet.

"Michael O'Flaherty," she remarked, "was my first boarder. I never knew a man who liked good coffee so well or could eat so much boiled ham as O'Flaherty. He sat at my table three times a day for 30 years. It was through no fault of his own that he quit me. He died, poor man."

The food served at Miss Murray's table seems to have woven a sort of hypnotic spell about her boarders. Some of them went away—or tried to—and in every instance they came rattling back like fascinated birds. Some of her boarders used to say that, once a boarder with Miss Murray, always her boarder.

Officer Daley's Experience.

There was Officer Timothy Daley, for instance. He began boarding with Miss Murray 18 years ago. He didn't want to leave her, but he fell in love. The big policeman knew that if he married he would have to leave the

MODEL LANDLADY RETIRES AFTER FIFTY YEARS

Boarders Who Had Been With Her for From Fifteen to Forty-five Years, Give Her Farewell Banquet

The Famous Little Boarding House on South Green Street, Chicago.

boarding house because his bride had declared flatly that she would not marry him unless he set up house-keeping. For a long time Officer Daley debated with himself, matrimony pulling on one side and Miss Murray's cooking tugging on the other.

In this battle his heart finally won. He married and left Miss Murray's boarding house to live in a cozy flat of his own. A little son, Michael Daley, blessed his union. But in a few years his wife died. Right after the funeral Officer Daley took his baby and went back to Miss Murray. "He has been there ever since, and so has his boy."

Then there was Inspector Wheeler. Several years ago the inspector's brother built himself a new house, and thought it would be fine to have the inspector live there with him. The inspector liked the idea of living with his own kin, but he put off going as long as possible.

Finally he packed his belongings and stole away to his new home.

Went Back to Miss Murray.

But he was ill at ease in his new quarters. His brother and his brother's wife and his gay young niece and nephews wondered to see him sit in moody silence and to hear him pace the floor of his room until far into the night. Then one morning his room in his brother's luxurious home was found empty. The inspector had packed his things and gone back to Miss Murray's in the night.

As a model boarding house keeper Miss Murray was no accident. She fitted herself by years of study, experiment and hard work. In her old age she is able to formulate certain rules which, she says, if lived up to rigidly will enable other boarding house keepers to achieve success. Here are some of the rules:

Give everybody plenty to eat. Make the food plain and good. Make the table and house homelike. Don't run too much to style. A man would rather have a thick, juicy beef-steak than cut glass and fancy silver.

Put everything on the table at once and let the boarders help themselves. Try to please them.

Cater to individual appetites. If one wants his steak well done and another wants it rare, cook their steaks separately.

Do your own marketing and make marketing a study.

Make good coffee. Bad coffee has been responsible for more boarding house failures than any other one thing.

Have specialties in cooking—dishes that you cook differently from anybody else and that your boarders cannot get anywhere except at your own table.

Do your own cooking.

Have your table linen and dishes specklessly clean.

Never serve any dish that is not good as you know how to make it, slightly burned or faulty in any respect, throw it away.

Have plenty of hot water in the house at all times.

Have a certain hour for meals, and serve them promptly on the hour.

Keep your rooms clean, and have plenty of bedclothes in cold weather.

Have all men as your boarders or all women. Never try to mix men and women. As boarders they won't mix. Men are preferable.

Mother your men. Darn their socks and sew their buttons on. Keep their clothes in repair, and attend to their laundry.

boarders because his bride had declared flatly that she would not marry him unless he set up house-keeping. For a long time Officer Daley debated with himself, matrimony pulling on one side and Miss Murray's cooking tugging on the other.

In this battle his heart finally won. He married and left Miss Murray's boarding house to live in a cozy flat of his own. A little son, Michael Daley, blessed his union. But in a few years his wife died. Right after the funeral Officer Daley took his baby and went back to Miss Murray. "He has been there ever since, and so has his boy."

Then there was Inspector Wheeler. Several years ago the inspector's brother built himself a new house, and thought it would be fine to have the inspector live there with him. The inspector liked the idea of living with his own kin, but he put off going as long as possible.

Finally he packed his belongings and stole away to his new home.

Went Back to Miss Murray.

But he was ill at ease in his new quarters. His brother and his brother's wife and his gay young niece and nephews wondered to see him sit in moody silence and to hear him pace the floor of his room until far into the night. Then one morning his room in his brother's luxurious home was found empty. The inspector had packed his things and gone back to Miss Murray's in the night.

As a model boarding house keeper Miss Murray was no accident. She fitted herself by years of study, experiment and hard work. In her old age she is able to formulate certain rules which, she says, if lived up to rigidly will enable other boarding house keepers to achieve success. Here are some of the rules:

Give everybody plenty to eat. Make the food plain and good. Make the table and house homelike. Don't run too much to style. A man would rather have a thick, juicy beef-steak than cut glass and fancy silver.

Put everything on the table at once and let the boarders help themselves. Try to please them.

Cater to individual appetites. If one wants his steak well done and another wants it rare, cook their steaks separately.

Do your own marketing and make marketing a study.

Make good coffee. Bad coffee has been responsible for more boarding house failures than any other one thing.

Have specialties in cooking—dishes that you cook differently from anybody else and that your boarders cannot get anywhere except at your own table.

Do your own cooking.

Have your table linen and dishes specklessly clean.

Never serve any dish that is not good as you know how to make it, slightly burned or faulty in any respect, throw it away.

Have plenty of hot water in the house at all times.

Have a certain hour for meals, and serve them promptly on the hour.

Keep your rooms clean, and have plenty of bedclothes in cold weather.

Have all men as your boarders or all women. Never try to mix men and women. As boarders they won't mix. Men are preferable.

Mother your men. Darn their socks and sew their buttons on. Keep their clothes in repair, and attend to their laundry.

boarders because his bride had declared flatly that she would not marry him unless he set up house-keeping. For a long time Officer Daley debated with himself, matrimony pulling on one side and Miss Murray's cooking tugging on the other.

In this battle his heart finally won. He married and left Miss Murray's boarding house to live in a cozy flat of his own. A little son, Michael Daley, blessed his union. But in a few years his wife died. Right after the funeral Officer Daley took his baby and went back to Miss Murray. "He has been there ever since, and so has his boy."

Then there was Inspector Wheeler. Several years ago the inspector's brother built himself a new house, and thought it would be fine to have the inspector live there with him. The inspector liked the idea of living with his own kin, but he put off going as long as possible.

Finally he packed his belongings and stole away to his new home.

Went Back to Miss Murray.

But he was ill at ease in his new quarters. His brother and his brother's wife and his gay young niece and nephews wondered to see him sit in moody silence and to hear him pace the floor of his room until far into the night. Then one morning his room in his brother's luxurious home was found empty. The inspector had packed his things and gone back to Miss Murray's in the night.

We are also showing many new things in gent's furnishings, -- **STRAW HATS, WASH TIES, OUTING SHIRTS and FLORSHEIM SHOES.**

"THE HOUSE OF GOOD TASTE"

ZIEGELER BROTHERS

It appears to be considered the duty of newspapers to boost and keep on boosting for the town and its business men, its institutions, schools, churches, etc., but how often do the residents of a town or community let themselves be heard boosting for the local paper? A local paper should boost for its town and its business men. It is the editor's duty, because the paper derives at least seventy-five per cent of its support from home people of which it is a part. It is the duty of every man, woman and child within the city to stand stalwarts to their town and say a good word and do a good act whenever an opportunity presents itself and in this a newspaper should ever be found in the front ranks with such a band of town boosters. As has been said a newspaper gets much of its support from the town and the community and thus in return owes its support to the town but what can be said of the printer may be said of the grocer, the butcher, the merchant, the hotel keeper, the dry goods man, the tailor, the miller and any other who may come to mind. You owe a debt of gratitude to your fellow merchant for being here for what would the place amount to with only one business house? What would there be here to attract people and induce them to build comfortable homes, pay taxes for town improvements, etc. On the other hand people from the country realize that the town is a great boon to them and adds greatly to the price of their products and to the land on which the product was grown whether their stock is consumed here or shipped to other places. The merchant has much of his stock shipped in, yet a great portion of his trade is in that which he has purchased at home from the farmer or the villager, thus deriving the patronage of everyone. The farmer gives his patronages to the merchant and the merchant to the farmer. Each is enabled to make a profit and all is serene. Yet there are merchants who will not patronize each other, who will send away for their printing, hardware, groceries, furniture, harness, drugs, etc. Some even use safety razors rather than patronize the barber, will walk or go by train rather than give the local liveryman his fee and will ship in potatoes, cabbage, onions, apples, etc., rather than buy from the local gardeners and farmers. This is not all though, for the merchant complains that the farmer buys goods in some large city and will not spend the cash he has earned here with local people. It's a sad condition of affairs with a cure hard to find. One merchant states that the trouble is an easy one to overcome if all will unite in a determined effort to make their country ideal; co-operate in good roads work and ever boost and work for one another. As another year approaches let us one and all make it a resolve to help our neighbor, advertise our country, boost our town, build new roads and in fact co-operate in every manner possible. If we will but love our enemies they will soon cease to be such and in the end prove our most faithful friends.

WELCH & TITSWORTH

CAPITAN, N.M.

General Merchandise

\$15.00 Weekly Benefit for Accident or Sickness; \$1,000 for loss of limb or eyesight; \$100.00 for Emergency Relief Benefit. Coat is \$6.00 per year--no other dues or assessment. MEN and WOMEN between ages 16 to 65 accepted. Reliable company with \$100,000.00 state deposit for the protection of policy-holders and to guarantee payment of claims. Write for further information giving your age, sex and occupation. Address Dept. 441, American Registry Company, Erie, Pa.

Notice. DEPARTMENT OF STATE PATENTERS. No. of application 101. Santa Fe, New Mexico, May 26, 1912. Notice is hereby given that on the 29th day of May, 1912, in accordance with Section 10, Irrigation Law of 1907, Blancheard, Mrs. F. Miller and W. Johnson, of Achaola, County of Lincoln, State of New Mexico, made an application to the State Engineer of New Mexico for a permit to appropriate from the public waters of the State of New Mexico...

Secs. 4 & 5, T. 22 N., R. 20 E., bears N. 4 3/4 E. 1/4 Sec. 10, by means of diversion works 500 feet in length to be covered to Secs. 4 & 5, T. 22 N., R. 20 E. by means of storage works and canals and there used for irrigation of 500 acres. The State Engineer will take this application for consideration on the 29th day of August, 1912, and all persons who may have any objection to the above application, and the their objection substantiated with affidavits with their State Engineer and copy with the same on or before that date.
