

When the state is most corrupt, then the laws are most multiplied.---Tacitus

### Splendid Road Meeting

**O**NE of the best road meetings in Lincoln county and the best ever held in Carrizozo was called to order Monday night in the basement of the Exchange Bank building. The meeting of the County Road Commission and also that of the Board of County Commissioners had attracted many citizens from various portions of the county, and the hall was well filled with a representative body of citizens of Lincoln county—all interested in the building of good roads. The spirit manifested was excellent—extremely excellent—and we predict much good will follow this meeting and others of a like nature in the future.

Pursuant to previous announcement, the Carrizozo Commercial Club assumed the part of host, invited the citizens of every portion of the county to become its guests, arranged for a smoker, prepared punch—a la Bryn—and we have yet to hear a criticism of its efforts. It was not only a good roads meeting and a boosters meeting, it was also a get-together meeting—a meeting in which every man from every section was asked to participate, to enjoy, to express to the meeting and through it to the road board the needs of his section; a pull-together meeting—a meeting in which a common interest and a common endeavor was sought; and, judging from the expressions made and the policies outlined, the gathering was an unqualified success.

Commissioner Ferguson, by virtue of his appointment by the State Road Association as vice president for Lincoln county, called the meeting to order, and asked Dr. Jas. W. Laws, chairman of the County Road Commission and organizer for Lincoln county, to outline not only the purpose of the meeting, but to give a review of the proceedings of the State Good Roads meeting and apply the proposition to Lincoln county. This, Dr. Laws did in a very entertaining manner, showing how the county boards, working in harmony with the people and with the State Road Commission, could accomplish splendid results. He illustrated and drove home some valuable suggestions on road building being done by other counties and urged the cooperation of the people with the county board.

General discussion followed the remarks of Dr. Laws in which many present took part. The discussion of building connecting links with our present highways brought forth many substantial reasons for their construction and the sentiments expressed led to the belief that the county board would do all in its power to remedy the disagreeable conditions that exist in that respect. This was especially true with reference to the building of a road from the Ruidoso to the Carrizozo-Roswell highway in order to give the Ruidoso and Bonito valleys an outlet to, not only the county seat, but a road on which they could transport produce to a main line of railroad. The present condition of the road in those localities were asserted to be such that in a number of instances produce was hauled to points outside of the county for shipment. Such conditions, when stated by men who live on those roads and have to travel them, aroused a unanimous sentiment for some practical road construction at an early date along the line proposed. Offers of individual aid were made by a number if the road was established and appropriations made for its establishment and construction.

J. B. Van Deren, representing the Emerson-Brantingham Company, El Paso, was present and was called upon to give the meeting the advantages of his experiences and observations on road building in various parts of the state. Mr. Van Deren spoke of the growth of enthusiasm for good roads, mentioned different counties of the state which had already spent thousands of dollars on roads and were continuing the work by the expenditure of many more thousands. He spoke of the issuance of bonds by some counties of the state, the proceeds of which, in addition to the regular county funds and those to be derived from the state, were to be applied on the further building and improvement of roads. Mr. Van Deren closed his remarks by inviting a committee to visit Alamogordo and see one of his machines in operation, and offered to bear the expense incident to the trip. His remarks were well received and his invitation accepted, as will appear in a report of a later proceeding of the meeting. T. H. Bell, also of El Paso, representing the Western Metal Manufacturing Company, was next called upon, and gave an interesting talk on road building, very much in line with that of his predecessor, adding from his store of personal knowledge of road building in various localities.

A motion unanimously prevailed to organize a County Association, empowered specifically to work with the County Road Commission. W. M. Ferguson was elected president, and H. B. Hamilton vice president. W. J. Doering was chosen secretary-treasurer. The president in conjunction with the county road commission, was authorized to appoint a vice president in every precinct in the county, and the secretary instructed to write each vice president, when so appointed, what duties were expected and inviting the cooperation of each community.

A committee of three, consisting of George L. Ulrick, Jas. V. Tully and O. K. Ingram, was appointed to get in

### News Notes from Outside Points

#### FORT STANTON

Mr. A. V. Ware, of the firm of Jolly & Ware, Contractors of El Paso, visited the Post last Friday on business.

Mr. Charles I. Irwin, the pharmacist, left Monday on his vacation in the east and Ottawa, Canada.

Dr. F. H. McKeon, of San Francisco, has been ordered to Fort Stanton for duty. The Doctor has had a wide experience in the service, having been stationed in the Philippines and Alaska and many other noted stations of the service. He will be a welcome addition to the present efficient medical staff, and in social circles as well.

Dr. and Mrs. F. C. Smith and daughter visited Dr. and Mrs. Laws at the Laws Sanitarium Sunday, June 1st.

Chaplain Frund took in the Lutz auto party to Santa Fe the early part of the week, and reports a most enjoyable time. He was accompanied by Father Girma and Mr. Lutz and his son, Henry Lutz.

Mr. and Mrs. Guy Cramer, of No. 2, left for their home in New York last week. The eve of their departure a reception was tendered them at No. 4 and the Hightower band gave a serenade at 10 p. m. Mr. and Mrs. Cramer will be missed at Fort Stanton. Both added much to the social doings from time to time.

Dr. C. L. Lincoln gave a party to a number of his friends at 13 A one evening last week. How he enjoyed same can be seen by calling at Hope Cottage, South Easy street.

We are glad to note that Mrs. Lovett of 13 B is again up after a short but acute illness.

Mr. A. E. Lovett, the expert billiard shot, has issued a challenge to all the professional billiard sharks of the Post. Just recently Mr. Lovett succeeded in making the side pocket in 59 shots, Dr. Brown being present.

Very impressive Memorial Services were held at the Fort Cemetery on Decoration day. The following program was carried out, a large crowd being present: Organ Prelude—Walter Scott. Poem—Geo. Curran. Vocal Solo—Mrs. F. C. Smith. Memorial Address—Chaplain Frund.

Song: "My Country 'Tis of Thee"—Assembly. Decoration of the Graves.

Question:—Who is the weather man?

communication with the state road commission, ascertain the amount that Lincoln county would receive as its pro rata of the state bond issue, and, in fact, to delve into many matters in which the association was lacking information.

The invitation of Mr. Van Deren to visit Alamogordo and see his road machine in operation was accepted, and eight were named on the committee, including the members of the County Road Board, as follows: Dr. J. W. Laws, Paul Mayer, Jose Vega, Jno. A. Haley, J. M. McDaniel, Rinaldo Duran, Lin Braunum and Melvir Franks. This committee is to go to Alamogordo Monday. An additional committee of three was appointed to present to the road board the following day the proposition of the road from Ruidoso, via Alto, Angus and the Mesa, to the Carrizozo-Roswell road. This committee consisted of W. W. Slack, A. J. Gilmore and Jno. A. Haley.

At midnight the association adjourned. It was a splendid meeting—one that will make history—and of which every participant may well feel proud.

#### Corona

Miss Franks returned Tuesday from Cutter where she has been teaching.

Miss E. Frances O'Neal from Wichita Falls, Texas is visiting Miss Thompson.

Rev. Le Briton filled his regular appointment here the first Sunday.

Mr. E. A. Haggard is to start to Carrizozo Thursday where he will attend county institute.

The Molton family spent Sunday with D. C. Baker and family at the Baker ranch.

The Mexican, Antonio, who was operated on at Corona for appendicitis was able to be moved home Sunday.

Marshall Atkinson made a business trip to Albuquerque this week expecting to visit his mother at Estancia while gone.

Mrs. B. F. Neighbors made a trip to Corona Sunday and Monday.

The wedding bells rang Sunday for Mr. Frank Melton and Miss Cox. Mr. Melton has lived here several years and is one of Corona's well known young men, while the bride has lived some time near the Gallinas mountains.

#### Jicarilla

Mex Guebara was thrown from a horse and his head badly bruised a few days ago.

Two men from the Parsons country were here looking over the mines, one day last week. We did not learn their names.

L. B. Chase and Dr. Randles pitched into camp via Añicho from Carrizozo a few days since.

William Merhman, who had his foot crushed a week ago, is improving rapidly.

Col. G. W. Prichard and Dr. Paden from Carrizozo, were in camp Sunday last.

Ed Hays is employed at the mill by W. A. Franklin.

Mr. Wenchner has returned to Jicarilla after six weeks spent in the Capitans.

The coyotes and bob cats are depredating on the poultry at an alarming rate. Some are losing them by the dozen.

#### Card of Thanks

We wish to express our heart felt thanks to the people one and all for the kindness shown us during the illness and death of our darling baby.

MR. AND MRS. CLARK HUST.

### Protect the Birds

**F**ROM the "sign of the times" the propitious hour has arrived wherein all should work together for the most worthy cause of protecting the birds. Killing and trapping goes quietly on in the face of all efforts to enforce the law. In studying the subject and by careful observation, one will actually note the decrease in bird life from season to season. A true lover of nature will discover the trend of the times, a growing scarcity of birds, and an enormous increase in destroying insects. Do you know that one can really miss the birds that from force of habit for generations have nested around the home, in the orchard or garden?

A few years since the robin was conspicuous for his presence and great numbers, around the country home of the writer. Each season their number was less; the present spring only one pair returned to their accustomed home. Mocking birds are very scarce, almost extinct, when a few years ago the hills resounded in their glad song. The same thing is apparent of almost all of the different species of birds. The consequence is fearful to contemplate. Destructive insects have increased at an alarming rate, and their ravages are baffling the wits of the planter and orchardist.

Sprays, mixtures and powders are not so dependable as the birds, besides adding to the already overworked planter a duty he does not relish. Just now it seems opportune to mention that statistics show there are fifty-three species of birds that eat the hairy caterpillar. The face of the whole country is crawling and squirming alive with this repulsive insect just now. Why? Because the quail, the sparrow, etc., are so few they cannot lessen the number. The insects are in the ascendancy, and the destruction they cause is complete. It is said that the apple states of the east and north are paying out from one million to three million dollars to keep down the codling moth. It was not so in the past, yet it is growing to be almost impossible now to meet the demands of this insect so fatal to the orchard. Why the change? Because the woodpeckers, the robins, the orioles, the jays, the tanagers and many other kinds have been killed off to satisfy the pot-hunter or to obtain the plumage for "vanity fair." From reliable sources it was estimated that there were twelve million plant lice on one cherry tree; and in an eight inch space there were counted twenty thousand chinch bugs. It was ascertained by actual count that the hop-aphis develops thirteen generations in one year, and if, in the absence of birds, or some other means of checking their growth, at the end of the twelfth generation they would be multiplied to the number of ten sextillions. What appalling consequences follow in the wake of this prodigy! And yet the slaying of the birds goes on. How proficient would be the work of annihilation if found by the mother bird and her hungry brood. All through the early summer, the robin is searching the mellow earth for the big fat gent and each catch saves the orchardist a great deal, when this grub visits the fruit later on in the form of the June-bug.

The enemies of the birds for the most part are the pot-hunters, the little boys and the plume and wing hunters. It would be a simple matter to settle with the first named destroyer. The law is drastic and if vigilance is employed he can be apprehended. It is the duty of mothers and teachers to instill mercy into the hearts of the little boys for they exhibit very early a disposition to barbarity, either inherent or acquired, and their first warfare is waged on birds, "the pretty brown birds around the door."

The cat is a natural enemy to birds. Suggestions will come to your aid when pondering on what disposition to make of her. It is to be hoped your resolutions may be severe, when the culprit is caught.

All kinds of societies are forming, and the women are declaring against wings and plumes of song birds as a means of discouraging the wholesale slaughter of birds. But withal the birds are going fast and the insects are increasing by untold millions.

Scientific minds are striving to bring the world's thoughts to the importance of saving the insects' most formidable foe and in elaboration they calculate at the present rate of bird annihilation, that man may not long be able to cope with the ever increasing number of insects and will be powerless to dominate over their sway.

This is no sentimental hobby; it is a true cause for action, and one and all should act in unison to save the birds, and to assist Nature in her work of repairing the ravages of man and time by a fulfillment of the law—"the survival of the fittest."

JANNY WREN.

#### Home Mission Society

THE Ladies Home Mission Society will hold a called meeting at the Methodist church Wednesday afternoon, June 11,

at 3 o'clock. The purpose of the meeting is to arrange for the purchase of a piano to be used by the society for entertainments. The Society met with Mrs. Ulrick in regular session of this week.

EQUAL RIGHTS AMONG BIRDS.

"The male blue warbler takes no part in the incubation of his young. He believes in equal rights of women, takes no part in the nest building, watches his little wife gather the material and put it together, while he sits on a branch close by, pouring out his love in sweet, delicious notes. It's a case of everybody works but father," says Prof. William Brinckley, discussing "Our More Common Warblers," in a recent lecture.

The feats of professional runners seem insignificant when compared with the regular performances of an East Indian caste.

These Kshatrias, who are also known as Jhinwaris, live in the Punjab, where for centuries they have acted not only as runners, but as fishermen and as water fowling. These men are said to be able to accomplish 100 miles a day without resting. There is said to be a well authenticated instance wherein one Tika Ram carried dispatches 300 miles in three days, from Meerut to Meerut says Harper's Weekly. It is further said that so far from shortening their lives, these performances really conduce to longevity in the Kshatrias, many of whom are able not only to withstand the strain of covering great distances, but to thrive under it.

Professor Allen Hoban of the practical theology department of the University of Chicago told an audience in that city that if the average boy of the slums when eighteen years of age, decides to pay back his parents what it has cost them to bring him up, he will find himself in debt \$4,000.

He went on to calculate that sons of wealthy parents cost much more in some instances as high as \$100,000. If a clever business man could arrange to buy some of those Chicago boys at what they are really worth and sell them on the basis of Professor Hoban's calculations as to their cost price, he would make enough money to live at Palm Beach every winter and at Newport every summer for the rest of his life.

The cockroach always has been an object of detestation to housewives.

Now that physicians are indicting the cockroach as a disease-carrier equal in menace to the fly, public health officials will exert themselves to exterminate the pest of cockroaches in hotels, restaurants and bakeries. Lately it has been suggested that cockroaches may have something to do with the spread of cancer. There is confidence in the assertion that they carry the germs of diphtheria, scarlet fever and smallpox. Pulverized sugar and borax sprinkled in the dark corners that the cockroach loves is said to be a sovereign recipe to keep him away.

In the interests of dress reform in China, women are to be asked to give up their trousers for robes, and probably the conservative element will denounce them for their unwomanly eagerness to discard the garb of their mothers and grandmothers.

For profudico and custom never did play up consistency as a strong point. In California they propose to have women policemen on motorcycles. This age is full of shocks to old-fashioned notions, but the world might as well get used to woman's refusal to acknowledge that the kitchen is her sphere.

A man has been found in Los Angeles whose wife censors his news in the public press. This seems to mark the top notch of marital submission in this age where daily news is one of the necessities of life.

HIGH PLACE PREDICTED FOR WILLIAM AVERELL HARRIMAN

Career of Power Open to Fortunate Youth, Elder Son of the Railroad King, Who Is Being Thoroughly Trained to Step Into His Father's Shoes and Direct the Family's Immense Interests.

IMMENSE INHERITED WEALTH IS HIS, BUT HE WILL LIVE NO IDLE LIFE

Already He Has Shown Ambition and Industry and Has Gained Notable Success at Yale. A Director of the Union Pacific and the Harriman Bank at Twenty-one, He Will Nevertheless Start In at the Bottom.

TUTORS OF THE WIZARD'S SON WHEN HE LEAVES COLLEGE.

Ex-Judge Robert S. Lovett, head of all the Harriman lines. Julius Kruttschnitt, Vice-President of the Union Pacific, and transportation expert. Oliver Ames, Henry C. Frick, Marvin Hughitt, Otto H. Kahn, Chas. A. Peabody, Wm. Rockefeller, Frank A. Vanderlip. (All old associates of E. H. Harriman, who will help to develop his son.)

What could YOU do if you had such successful man to guide you?

LISTENING gold does not dazzle William Averell Harriman.

Fortune has looked upon him with no threatening eye. Yet here is a young man, just turned twenty-one, who seeks to write his better deeds of achievement, not in water, but on marble. Harriman, like Vincent Astor, has great aspirations. The frivolous work of polished idleness is not for this elder son of Edward H. Harriman. He is designed to succeed his famous father as the head of the enormous railroad interests of the Harriman estate. That prospect is enough to dazzle and confound many a youth. But such young ambition finds animates young Harriman and he has accepted eagerly the chance to strive for a place among the princes in the empire of constructive endeavor.

What a vision to thrill even one who was born to luxury and millions! Already Harriman has put one foot on the ladder. Although still a senior

His daily life at Yale is quite different from what it will be when he buckles up against the financial world, but nevertheless it is very busy. At 7:15 a. m. he rises, shaves and has breakfast.

at Yale, for a little more than a month he has been a director of the Union Pacific railroad—the medium of many of his father's many triumphs—and also of the powerful Harriman National bank.

Modest and unassuming, Harriman has shown signs of tenacity and thoroughness that have delighted the old associates of his father, who are keeping a close eye upon him. And he knows something of railroading, too, for he was working as a chain bearer for a surveyor's party on the Oregon Short Line railroad at \$65 a month when called east to the bedside of his dying father. He has been also engaged in the operating and transportation divisions of other roads dominated by the elder Harriman.

Fired Engines Entire Distance.

It is related of him that several years ago, when E. H. Harriman was making a tour of inspection in Wyoming, the fireman of the big Mogul engine that pulled the special train out of Laramie was surprised when Averell crawled into the cab and grabbed a shovel. The fireman and engineer looked wise and expected to see the youth pick fire from his self-imposed task of hurling coal into the furnace, but he stuck to it. To the astonishment and admiration

of the crew, Averell fired the huge locomotive all the way over the mountains to Rawlins, a distance of 120 miles, and the run was made on perfect time.

That incident furnishes a keynote to his character. He showed his caliber in another way when he entered college. He doesn't look like a rugged lad and was even slighter then. But he started out at once to make the freshman crew.

His evenings are spent in study and in social occupations, always attending the secret rites of Skull and Bones on Thursday and Saturday evenings.

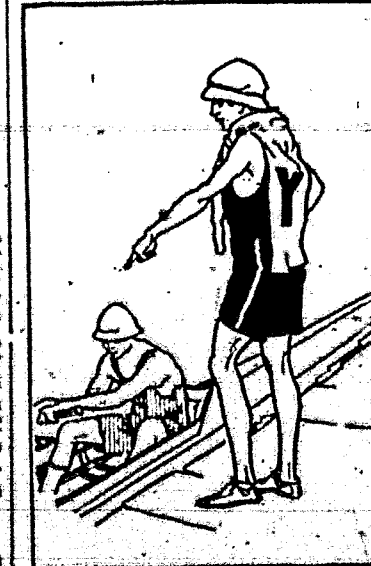

The sharps shook their heads and prophesied that he wouldn't last. But he won, and at the same time lost, only to turn his defeat into a telling victory!

Harriman had been just selected for the first varsity boat when he was ordered by his physician to stop rowing permanently. So what does Harriman do but make a scientific study of oarsmanship, with the result that at the end of his sophomore year an unprecedented thing occurred.

The frail youth was appointed coach of the freshman crew! Captain Radcliffe Romoyn and the graduates agreed that he would make good. He certainly did! All of last year he quietly labored with the freshman crew. He had everything his own way and in the end, out of commonplace material, turned out the best crew of neophytes that Yale had had in years.

Went to Study English Stroke.

Several weeks last spring were spent by Harriman in England watching the stroke of Cambridge and Oxford. His power to easily master all his studies won him a furlough from Yale. He also studied the Cornell stroke. Returning to college in the fall he spent much time with the varsity

At the end of his sophomore year an unprecedented thing occurred. The frail youth was appointed coach of the freshman crew!

crew, and presently a still more surprising event occurred. He was made head coach of the varsity crew! There has been only one other to win that distinction. To be head coach while still an undergraduate was a

record made by Bob Cook in the early seventies. And Bob Cook's crew won! If Harriman's crew should do likewise after the five consecutive defeats at the hands of Harvard he would become the idol of the college and of the alumni.

As a student, Harriman has shown brilliantly, and, true to his trend of

He was working as a chain bearer for a surveyor's party on the Oregon Short Line railroad at \$65 a month when called east to the bedside of his dying father.

mind, has been prominent in the Yale Economic club and allied organizations.

His daily life at Yale is quite different from what it will be when he buckles up against the financial world, but nevertheless it is very busy. Here is the routine of a day:

- 7:15 a. m.—Rises, shaves and has breakfast.
8:10 to 8:25 a. m.—Chapel.
8:30 a. m.—First recitation of the day.
12:30 p. m.—Luncheon.
1:30 to 6 p. m.—Coaching the Yale crew, rain or shine, at the harbor boat house.
6:30 p. m.—Dinner at the training table with the members of the crew.
Evenings Spent Quietly.

His evenings are spent in study and in social occupations, always attending the secret rites of Skull and Bones on Thursday and Saturday evenings. At least one other evening he spends in the Pal Upillon tomb, a less-secret and presumably as enjoyable a gathering place as that of Bones. But he is not by nature in sympathy with the secrecy practised by such societies.

Aristodemus wrote: "This money makes the man." It is an old axiom that "He that lacks money, means and content is without three good friends."

Having those words of wisdom in mind, study the plain ways of Harriman's manner of living.

That is best typified by the fact that he lives in Connecticut hall, the oldest building at Yale. It was put up in 1760. Nathan Hale and John C. Cal-

Averell crawled into the cab and grabbed a shovel.

houn had rooms there. To the average student of wealth the luxury of Vanderbilt, Haughton or Fayerweather halls offers greater attractions. Connecticut hall is meant for youths of limited means. It has four stories and the top story rooms are low and have dormer windows.

Averell Harriman lives on the fourth story!

With Charles Henry Marshall and George A. Dixon of New York he occupies three rooms. These lodgings cost each of the men \$68 a year. The furnishings, as in the case of all Yale men, are provided by the lodgers themselves and are in good taste, but in no way elaborate. If a visitor were told that the place was occupied by Harriman he would be likely to think the budding young financier was doing it on a bet.—From the New York World.

In the Title Market.

In the past 55 years nearly 450 American girls have wedded titled foreigners and it has been estimated by those who keep in close touch with such affairs abroad that 150 of these girls brought to their husbands dowries aggregating \$181,000,000 in gold American cash. And in the great majority of the marriages this cash has been squandered in a most extravagant manner by the husband, who has proved himself anything but thoughtful or dutiful. This realization of their grave mistake caused the wives to become disgusted and either live apart from their husbands or immediately to start legal proceedings for divorce.

NEEDS SOME PLANNING BUT TO THOSE FOND OF SHAD, COOKING IS WORTH WHILE.

Properly Prepared, It May Be Made to Serve Several Meals—Planked Probably Is the Best of All Ways.

This is the season for shad. If a popular vote were taken as to which is our most delicious fish, probably shad would come out far in the lead. But the housewife who caters for a small family is inclined to regard early shad as a pretty expensive luxury.

It does, in fact, call for some clever planning, but a fine roe shad can be made to serve for several meals and at the same time satisfy the most critical appetite. This is made possible by first having the shad split, using one-half for baking, the other half (the bone side) for broiling. The roe can be served at still another meal in any one of a number of ways. The famous way of cooking a shad is planking it, a method that has been handed down to us by fishermen, who utilized driftwood instead of a pan. They baked the fish on the wood, and the fumes of the cedar or hickory flavored the fish so deliciously that this makeshift custom has been adopted by epicures all over the world.

Planked Fish.—Planked fish should be baked on a board of cedar, hickory, oak or ash. Place the board in the oven until very hot. Now paint the board with butter or olive oil, place shad on it, season with salt and pepper. If fish has been split place skin side downward on board, brush with butter or olive oil, and dust with salt and pepper. Baste often and bake until golden brown. This takes from 20 to 30 minutes, according to thickness of fish. Serve with parsley, lemon, sliced pickles or maitre d'hotel butter.

Maitre d'Hotel Butter.—This is made by working one-fourth cup butter till creamy, then add one-half teaspoon salt, one-eighth teaspoon pepper, one-half teaspoon chopped parsley, then one tablespoon lemon juice and one tablespoon Worcestershire sauce. This may be served hot or cold as desired.

Baked Shad.—Remove scales and insides, wash both inside and outside, and wipe dry with a cloth. Rub both sides with salt and pepper. Grease the bottom of a roasting pan with butter or olive oil. This prevents the shad from sticking. Paint the top of fish with olive oil or pieces of butter. Place in a hot oven for ten minutes.

Now take pan out of oven for a minute and cover the fish with the following mixture: Three-quarters of a can of tomatoes, one green pepper and two onions chopped fine, one tablespoon of sugar, one teaspoon of salt, one-half teaspoon of pepper. Bake for 25 minutes, basting occasionally with parsley or water cross.

Broiled Shad.—Remove scales, split and wash. Wipe fish dry. Grease the broiler well with oil or butter, place shad with the skin side downward on broiler. Now have a good hot fire, hold shad near the flame so as to sear over the outer surface at first, in order to keep the juices in, then move it a little farther from the flame, and cook for twenty minutes. Melt three teaspoons of butter, add one teaspoon of salt, one-half teaspoon of pepper, mix. Place shad on hot platter and pour sauce over it.

Veal and Oyster Pie.

Cut one pound of neck veal into small pieces, put them into a saucepan covered with water and stew them for an hour. Cut two ounces of pork into bits and put them in with the veal and add one chopped onion, one tablespoonful of thickening, a teaspoonful of milk and salt and pepper to taste. Cook the mixture for twenty minutes longer, then turn into a shallow dish, put a breakfast cupful of oysters over the top, dredge in some pepper, salt and flour and cover the pie with a common pie crust. Bake for about half an hour and serve either hot or cold.

Ginger Snaps.

To make delicious ginger snaps, boil together a cupful of shortening, half a cupful of sugar and a pint of molasses, and then a teaspoonful of cinnamon and a teaspoonful of ginger. Dissolve two teaspoonfuls of soda in a tablespoonful of vinegar and add it to the boiled mixture. Stir in three or four cupfuls of flour, enough to make a fairly stiff mixture. Put in a good place over night. Sprinkle the board with granulated sugar instead of flour when rolling out the snaps.

Potato Soup.

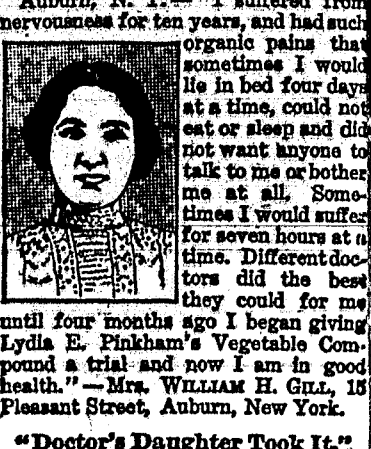

Six potatoes cooked. Mash while hot, add 1 pint milk, onion to taste, salt and pepper, tablespoon of butter. Cook onion in milk, to get flavor; pour this on to potato, add butter, salt and pepper. Strain when ready to serve. Take common crackers, halve them, butter and brown in oven, or cut bread in small cubes and brown in oven to serve with meat.

Dishwashing Help.

Any man or woman who is obliged to wash dishes will find that a dish cloth made of a piece of woolen goods is the greatest help obtainable. Take a piece of worsted woolen goods—unshorn is quite suitable. One can clean the dishes in half the time with less effort, and with one rinse in soap suds have a clean dishcloth each time.

WOMAN SUFFERED TEN YEARS

From Nervousness Caused by Female Ills—Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Auburn, N. Y.—"I suffered from nervousness for ten years, and had such organic pains that sometimes I would lie in bed four days at a time, could not eat or sleep and did not want anyone to talk to me or bother me at all. Sometimes I would suffer for seven hours at a time. Different doctors did the best they could for me until four months ago I began giving Lydia E. Pinkham's Vegetable Compound a trial and now I am in good health."—Mrs. WILLIAM H. GILL, 15 Pleasant Street, Auburn, New York.

"Doctor's Daughter Took It."

St. Cloud, Minn.—"I was so run down by overwork and worry that I could not stand it to have my children talk aloud or walk heavy on the floor. One of my friends said, 'Try Lydia E. Pinkham's Vegetable Compound, for I know a doctor's daughter here in town who takes it and she would not take it if it were not good.' 'I sent for the Compound at once and kept on taking it until I was all right.'—Mrs. BERTHA M. QUICKSTADT, 727 5th Avenue, S., St. Cloud, Minn.

Lydia E. Pinkham's Vegetable Compound may be relied upon as the most efficient remedy for female ills. Why don't you try it?

THEY SIDESTEP FOR MOTORS

Filipinos Heed the Signal and Give the "Devil Machine" Plenty of Road.

Manila may now be said to be up-to-the-minute in things metropolitan. The latest adjunct to its activities calling attention to progress in this direction was the recent appearance upon the streets of a motor car washed in mud and powdered with the fine dust of various grades of colors produced between here and Baguio. It had made a new record between the summer capital and Manila.

The machine was stripped to a condition almost immodest, fenders and top were superfluous to requirements, and no windshield protected the driver's face against the hot winds that blow at midday across the plain.

The friendliest feeling exists for the motor car. The harriss become a chorus of children with the ready "hello," even the dogs and chickens get the inspiration.

It may be due to the machine's being a stranger in this new section, but it is a fact that pedestrians and people in vehicles do respect the warning signal and give plenty of road.

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of Dr. J. C. Fitch. In Use For Over 30 Years. Children Cry for Fletcher's Castoria.

Just the Right Age. "Has the millionaire Prudence married much of a past?" "Sixty-nine years."

Don't be misled. Ask for Red Cross Bag Blue. Makes beautiful white clothes. At all good grocers. Adv.

Its Fault. "What do you think of that labor theory?" "It won't work."

Heartrending Process. "Was your work edited with acumen?" "No; with an axe."

Helping a Woman

Generally means helping an entire family. Her back aches so she can hardly drag around. Her nerves are on edge and she is nearly wild. Headache and Sleepless-ness unit her for the care of her family. Rheumatic Pains and Lumbago rack her body. But, let her take

Foley Kidney Pills and all these ailments will disappear. She will soon recover her strength and healthy activity. Foley Kidney Pills are healing, curative, strengthening and tonic medicine for all Kidney, Bladder and Urinary Diseases that always cure.

BEE SUPPLIES. At best quality, at lowest prices than you can buy same goods elsewhere. Write for free illustrated catalog giving information on beekeeping. We are located at the apiary, our members, by freight parcel post. Ask for prices.

## LOCAL AND PERSONAL

Mr. and Mrs. H. B. Hamilton are in Alamogordo this week.

Miss Katie Textor is the guest of Miss Euna Harkey this week.

Dr. E. B. Walker has been quite ill the past week.

O. K. Ingram was here Monday, returning from his sheep ranch near Corona.

Geo. A. Titsworth, of Welch, was a business visitor Tuesday.

Father Frund was here Monday from Fort Stanton. He returned the following day.

Tom McDonald was here a day or two this week from his ranch in the Mocking Bird Gap country.

The little daughter of G. T. McQuillen arrived this week from Deming to visit her father.

Miles B. May was down from Cortez Monday, and attended the county road meet that night.

Miss Callie Thompson, a teacher in the Corona schools the past year, was a visitor in Carrizozo yesterday.

Charles Scheruch, of Clovis, was here Wednesday and Thursday, looking into local insurance adjustments.

Mr. and Mrs. Bell and Mr. and Mrs. Rutledge are going on a camping trip on the Ruidoso for ten days' outing.

Mr. and Mrs. James Lee, Mr. and Mrs. Ed Queen, accompanied by their children, motored down from White Oaks Tuesday.

Mr. and Mrs. Ed Rutledge, of Vanaville, Indiana, are visiting Mr. and Mrs. John E. Bell. Mrs. Rutledge is a sister of Mrs. Bell's.

A marriage license has been issued to Geo. W. Myler and Miss May McBrayer. The contracting parties reside in the Anchorage section.

J. O. Nabours was here Monday to Wednesday. Mr. Nabours was interested in a road in his section and went before the board in behalf of the proposition.

Miss Sarah F. Aguayo, of White Oaks, visited friends here and left Thursday afternoon for El Paso, where she will attend the International Business College.

A. S. McCamant, a Corona ranchman and one of the best all-around citizens of the county, was here Monday, greeting friends and transacting some business matters.

Mrs. Jephtha D. Howe arrived this week from St. Louis on a visit to her mother, Mrs. D. C. Jones, and sister, Mrs. Geo. G. Shelley, who are spending the summer here.

Anton Boravansky was up from Ocuero yesterday. Mr. Boravansky is putting in a large dam on his homestead to impound flood waters with which to irrigate his agricultural land.

Mr. and Mrs. Samuel Kelsey left today for the lower end of the county, to be absent a week or ten days.

Miss Catherine Reily, returned Tuesday from Deming where she has been visiting her aunt, Mrs. John H. Williamson.

Joe R. Adams and family have moved to their ranch east of town. City life disturbed Joe's slumbers and he now has the bracing country air in which to recuperate.

W. W. Slack was here Monday and Tuesday from Alto. Mr. Slack was here in the interest of roads, attended the Smoker Monday night and stated the needs of his section regarding road matters.

Wm. J. Lindsey returned Wednesday from Philadelphia to which point he had gone six weeks ago. He left the same morning for Fort Stanton, where he has been with the Marine Hospital Service for a number of years.

George Smith, road foreman of the Capitan-Bonio country was here the first two days of the week. He submitted his report of work to the road board, which was in session here and was assigned further duties in road building.

A. J. Gilmore, L. F. Avent and Pete Hale represented the Ruidoso country in the road meeting Monday night. They also asked the road board for an appropriation for the Ruidoso-Alto-Angus-Carrizozo road, and succeeded in securing it.

**Mr. Campbell's Mother Dies**

H. S. CAMPBELL left last Friday evening for his old home at Monroe, Wisconsin, in response to a telegram that his mother was dangerously ill. Before he reached his mother's bedside she had passed away, her death occurring the same night Mr. Campbell started home. The mother had been an invalid for the past three years and while her death was not unexpected, it was, nevertheless a shock to her son with whom our entire community deeply sympathizes. Mr. Campbell expects to return next week and will probably be accompanied by his wife's mother.

**Chamberlain's Colic, Cholera and Diarrhoea Remedy**

Every family without exception should keep this preparation at hand during the hot weather of the summer months. Chamberlain's Colic, Cholera and Diarrhoea Remedy is worth many times its cost when needed and is almost certain to be needed before the summer is over. It has no superior for the purposes for which it is intended. Buy it now. For sale by all dealers.

**Rooms Wanted**

Parties having rooms, with or without board, they wish to rent during the Lincoln County Teachers' Institute, June 9-21, leave description with price at the office of County School Superintendent. Besides our own increasing corps, some of the Otero county teachers are planning to attend, so we shall need more accommodations than usual.

**MRS. WALLACE L. GUNN**  
Superintendent.

**Can't Keep It Secret**

The splendid work of Chamberlain's Tablets is daily becoming more widely known. No such grand remedy for stomach and liver troubles has ever been known. For sale by all dealers.

Preparations for the erection of a substantial brick building for a business house are being made by N. B. Taylor & Sons. The old hardware lumber building, in which the firm has conducted its business during the past six years, has been torn down, the building site graded down to the street level and the foundation being laid. The building will be 25 x 60 and will be a substantial addition to that block.

**Take Plenty of Time to Eat**

There is a saying that "rapid eating is slow suicide." If you have formed the habit of eating too rapidly you are most likely suffering from indigestion or constipation, which will result eventually in serious illness unless corrected. Digestion begins in the mouth. Food should be thoroughly masticated and insalivated. Then when you have a fullness of the stomach or feel dull and stupid after eating, take one of Chamberlain's Tablets. Many severe cases of stomach trouble and constipation have been cured by the use of these tablets. They are easy to take and most agreeable in effect. Sold by all dealers.

**Braem-Peck**

Seated in the spacious dining room of the Hotel Grandview at 5 o'clock on Monday evening were Miss Mary Louise Peck and Mr. Herman Braem, the latter of El Paso. On the entrance of the local minister, the couple rose, and in a very short time Rev. Haywood said the words, which, with the legal certificate, made this fine couple of young people one for life. They seem to be well suited to each other and we bespeak for them a happy voyage on life's journey, which is the wish of their many friends.

**Shake Off your Rheumatism**

Now is the time to get rid of your rheumatism. Try a twenty-five cent bottle of Chamberlain's Liniment and see how quickly your rheumatic pains disappear. Sold by all dealers.

## Mail Carriers to Report Forest Fires

THE official Postal Guide for May calls the attention of postmasters and rural carriers to an order of the Post Office Department that the carriers report to the proper authorities all forest fires detected along their routes. This order was issued at the request of the Secretary of Agriculture.

For several years in some sections of the country a sort of informal understanding has existed between National Forest rangers and mail carriers with the idea of securing increased fire protection. The marked effectiveness of this cooperation was a strong argument in favor of its extension and official sanction, and was in part responsible for the request of the Secretary of Agriculture which resulted in the order by the Post Office Department.

The plan is for the carrier to report a fire to the nearest forest officer on his route, or, if no officer lives on the route, to have him notified by some responsible citizen. State and national foresters are supplied with post road maps and with postal guides containing the addresses of the different postmasters. The postmasters in turn are supplied by the foresters with the names, addresses and telephone call numbers of forest officers residing on or near the carriers' routes.

Cooperation between rural carriers and federal forest officers will take place in Florida, Arkansas, South Dakota, Wyoming, Utah, Montana, Idaho, Washington, Oregon and California. Cooperation with state officers is given in all the New England States, and in New York, New Jersey, Pennsylvania, Maryland, West Virginia, Tennessee, Kentucky, Michigan, Wisconsin, Minnesota, Idaho, Washington, Oregon and California, all these states having established fire protective systems.

## Miss Carrington Becomes Bride

THE daughter of Dr. and Mrs. P. M. Carrington, who formerly resided at Fort Stanton became a bride at Port Townsend, Washington, May 19. Dr. Carrington, who was surgeon in command at Fort Stanton for eight years, and his estimable family are well known to a large number of our readers. We reproduce the following from a Port Townsend paper:

Miss Estelle Lola Carrington and Lieutenant John W. Wallis of the coast artillery, United States Army, were married Monday in Port Townsend, Wash. The ceremony took place in the home of Mr. and Mrs. W. L. Clark, Chaplain J. F. Easterbrook of the United States Army officiated; Miss Ethel Wilson was bridesmaid and Lieutenant J. T. Thiele, United States Army, was groomsmen. Miss Carrington is the daughter of Dr. and Mrs. P. M. Carrington of the United States public health service, stationed in the Marine Hospital in this city. Lieutenant Wallis is stationed in Fort Flagler, Wash. Miss Carrington, while her father was stationed in New Mexico, went to school in this city and graduated from the Central High School, later being graduated from the University of Washington. Lieutenant and Mrs. Wallis will make a thirty days' trip in the Cascade Mountains, and after July 1 will be at home in Fort Flagler.

## The News' Weekly Lay Sermon

I SWEAR to myself henceforth to adopt the following rules as the everlasting rules of my life: To pray every morning to God, the Fountain of all strength and of all justice; to pray to Him to give me necessary strength to accomplish all my tasks. To work all day, or at least as long as my strength lasts. To trust to God—that is to say to Justice itself—for the success of my projects. To pray again every evening to God to ask Him for life and strength. To divide all my earnings into four parts—one for my daily expenses, one for my creditors, one for my friends and one for my mother. To keep the principles of strict sobriety and to banish all and every stimulant. Charles Baudelaire.

## Roosevelt Awarded Six Cents

MARQUETTE Mich. June 2. Theodore Roosevelt has gone home without waiting to collect the six cents awarded him in his libel suit against George A. Newell, editor of the Iron Ore. The Colonel was thoroughly satisfied and himself asked the court to instruct for a nominal verdict, saying, after Newell had admitted his error, that he did not care for the money but merely wished to stand by the law. Newell frankly stated that the testimony had fully convinced him that he was mistaken about the drinking habits of the colonel and said he would make no effort to prove his charges, as he believed he had been misinformed.

## County Road Board

FOR the first three days of the week the county road board, composed of Dr. J. W. Laws, Paul Mayer and Jose M. Vega, has been wrestling with road propositions in various parts of the county. The board not only had the last three months' business to examine, but took up, at the request of committees, other propositions of road building. A patient hearing was given every suggestion and in nearly every instance an appropriation was made or a promise given for aid in the immediate future. A number of new roads—or perhaps, better to say, old roads to be rebuilt—were arranged for and the work outlined and the aid guaranteed will have a most beneficial effect. More substantial results were obtained at this meeting than at any previous one of the board, and the members of the board deserve much praise for their untiring efforts.

## County Commissioners

DURING the greater part of the week the Board of County Commissioners, the County Clerk and Deputy Assessor Nye, Assessor Corn being ill, have labored on tax valuations, one-third of which is to be taken for taxation purposes. This feature is a new one to the board as well as to the tax payers, and, necessarily, many changes were found to be necessary. It was a big job, as equalization matters always are, and was doubly so at this time.

## Shearing Sheep by Machine

A SHEARING MACHINE is, or, in fact a half dozen are, in operation on the flocks of J. B. French, north of here. As soon as Mr. French's flocks have been shorn the machines will go to Gallacher Bros. ranch, shear their flocks and finish on the flocks of Clarence Spence. A gasoline engine furnishes the power for two machines and six machines are kept busy taking one of Lincoln county's most valuable products. One machine handles from 75 to 100 head of sheep per day, owing to the knowledge and ability of the operator, and, properly handled, produces better results in wool and less harm to the animal than the old method of hand shearing.

## Rebel Leader Killed and Scalped

Laredo, Texas, June 2.—Mexican federal soldiers, returning to Nuevo Laredo from Colombia, where they routed 300 rebels Saturday, brought the scalp of Capt. Longoria, rebel commander as a trophy of their victory. Longoria and 21 of his followers were killed, six federal soldiers also were killed, all of them, it is stated, by bullet from Longoria's revolver. Longoria, an Indian, organized his band and swore vengeance on the federalists when a relative named Pancho was hanged a month ago as a rebel spy.

## Assessed Valuation Over \$6,000,000

AS a Board of Equalization the Commissioners of Lincoln county concluded their labors yesterday at noon—that is, so far as the initial adjustment of the tax schedule is concerned. Of course, at the July meeting some readjustments will occur, adding to and taking from; and the final totals will be made up at that time. The total valuation, as now summed up, exceed

\$6,500,000. Of this total one-third will be taken for assessment purposes and the rate will, therefore, be figured on between \$2,000,000 and \$2,250,000.

# The ELECTRICAL WORLD

## DIRECTORY ON A TELEPHONE

Any Address May Be Found When Desired Within Minimum Space of Time by Late Invention.

In describing a telephone directory, invented by J. Sonthofner of Lincoln, Neb., the Scientific American says: "This invention relates to telephone directories, and more particularly to a device which comprises a plurality of circular members carrying reference characters and provided with

Telephone Directory.

means whereby any desired reference is rapidly found. The directory can be easily attached to a telephone, and will not interfere with its action or add much to its bulk. The invention provides a directory carrying telephone references and addresses of such parties with whom most of the telephone connections are made, and locates such references when desired with a minimum expenditure of time.

## CHECK LEAKAGE OF CURRENT

Experiments Made in Italy to Prevent Accumulation of Salt on High-Tension Wires.

Experiments have been made in Italy to discover the best form of insulator for high-tension transmission lines which run near the sea. It is found that in the vicinity of the sea a thick layer of salt accumulates on the insulator, and serves as a conductor to cause leakage of the current to ground, says the Scientific American. The Italian experimenters have discovered that the incrustation forms chiefly on parts which are not protected from the wind and rain. The ordinary insulator for high-tension purposes consists of a number of petticoats or bells, in which the salt accumulates to a considerable depth. For this reason it was found best to provide an insulator with an almost flat bell, which would be so exposed to the weather that the crust could not form to any harmful extent. Insulators of this type were used with perfect success over a period of eighteen months on a 25,000-volt line. Under tests in the laboratory they withstood 75,000 volts dry, and 30,000 in a heavy rain.

## HEAT ROBE BY ELECTRICITY

Using Garment Is Like Taking Turkish Bath at Home—Useful in Breaking Up Colds.

The electric heated garment is made up in the form of a bath or lounging robe of woolen material. There is an interlining in which there are 7,000 feet of specially constructed magnet wire through which current taken from the lamp socket is allowed to pass, says the Popular Electricity. The wire is so constructed that it is as pliable as thread and very durable.

Electrically Heated Robe.

The additional weight of the wire is only 20 ounces. As the current passes through the wire it is heated up in a very few minutes to any temperature desired. There is no electric shock experienced when wearing the garment, but the heating effect is wonderfully efficient. They say that using it is like taking a Turkish bath at home, the heat causing profuse perspiration which is efficient in breaking up colds, treating rheumatism, etc.

**New Telegraph System.**  
Two musical tones, received through a telephone though sent by the usual key, are being used to replace the dot and dash in telegraphy in an experimental way in England.

## DISHES WASHED BY MACHINE

Electric Apparatus Will Operate as Fast as Dirty Crockery is Placed on Rack.

A motor-driven dish-washing machine capable of cleansing 2,000 to 2,500 dishes per hour, its output being limited only by the speed of the operator in loading the dishes, is described in the Electrical World Magazine.

A wheel of metal revolves slowly half immersed in a tank of hot soapy water, and on this wheel the plates, cups and saucers are cradled in spring clamps during the process of washing. By means of a cam arrangement each cradle is automatically opened by the time it reaches the position uppermost on the wheel, where, one at a time, the wheel revolves, conveying the dishes down into and through the soapy water, where two high-speed propellers serve to create a strong current over the surface of each plate.

Each dish thus receives an individual washing, and as the large wheel revolves at the rate of about three times a minute, a single plate is immersed and being vigorously washed during ten to fifteen seconds. As the plates emerge from the soaped-water solution, a cam-operated valve is opened and sprays them thoroughly with hot clean water.

Another cam automatically opens the cradle, in succession, allowing the plates to slide down onto a conveyor which separates the flat dishes from the cups, discharging the latter onto one shelf and delivering the plates to a slowly rotating rack wheel, from which they are taken by the attendant. The plates come from the machine so warm that they are quickly dried by evaporation. Drains are arranged so that the large tank can be emptied and flushed, while the addition of the fresh rinsing water constantly renews the contents of the tank.

The entire device can be driven by a motor to one-horse-power rating, which operates through silent rawhide pinions, chain sprockets and worm gears. Several of these machines are in use in large hotel kitchens, and the record on a preliminary test of one of these practical installations was the washing of 17,000 pieces, nicking only two.

## ELECTRIC LIGHT IS UNIQUE

Tiny Lamp Is Set in Bottom of Opera Glass Bag or Box—Owner May Follow Libretto.

To most people a cursory glance at the program before any entertainment is sufficient, but music lovers often like to follow the score during the opera and are unable to do so

Novel Electric Light.

when the house is in darkness. For their benefit an opera-glass box has been designed that has a tiny electric lamp and battery in the bottom. The lamp is at one end of the box and by pressing a button it will give forth enough light for the owner to read his or her libretto.

This recalls, however, that in Covent Garden Opera House, London, several years ago, regular attendants to the Wagner festivals being given there brought with them pocket electric lamps. The continual flashing of these lights produced a weird fiery effect.

## ELECTRICAL NOTES

Swedish railroads have decided to adopt flashlights in the signaling system.

An automatic telephone system is to be introduced into the principal cities of New Zealand.

A perfect dynamo that weighs but a quarter of an ounce has been made by a French electrician.

Using three candlepower per capita, Denver claims to be the best lighted city in the United States.

Cheerfulness is being used as a substitute for cedar telegraph and telephone poles. It is very durable.

More than 20,000 lamp filaments of 20 candlepower each can be manufactured from one pound of tantalum.

# NEWS and GOSSIP OF WASHINGTON

## Doorkeeper at the Capitol Stops President Wilson

WASHINGTON.—Just as the day shift of the Capitol police force was about to knock off duty at dusk the other evening an automobile rolled into the driveway, under the house steps, and a middle-aged man and a young woman got out and walked briskly through the doorway. One of the officers on the door stopped them and politely gave the information that the time for receiving visitors for the day was over.

For a moment the man hesitated. Then, from behind him there stepped out hurriedly a much younger man, who said something in a low voice to the officer. The latter's manner changed immediately. He grabbed his cap from his head, and, bowing low, said:

"Come right in, Mr. President."

"I just thought I would like to look over the new seats in the house," said President Wilson with a smile.

The officer led the way to the elevator, and they were lifted up to the next floor.

The officer hurried back downstairs to the sergeant-at-arms' office to get the key.

While this was going on Neal, the negro messenger, who sits continually outside of Speaker Clark's door, left his post and rushed into Mr. Clark's private office.

"The president is outside, sir," said Neal, excitedly.

"The who?" said the speaker.

"The president, sir," repeated Neal. "He's right out in the corridor."

Mr. Clark went out. Sure enough there was the president, and the speaker greeted him warmly.

"Welcome to the house," said the speaker.

President Wilson explained that he wanted to see the house chamber and that he and his daughter, Jessie, were especially interested in reading in the newspapers about the new bench seats which have been installed in place of the time-honored desks.

By that time the officer had returned with the key and Mr. Clark did the honors. He ushered the president and his daughter into the chamber, told them about the new seating scheme, and invited them to try the seats.

## Riskiest Deed in the Whole List of Bad Omens

SHE was a pallid woman who looked as if her dyspepsia tablets had run out.

And she stood behind the counter of a small homemade shop, submitting a mended umbrella to a customer with two chins and another coming.

The customer, satisfied with the job, rummaged in her bag, for the even change, handed it over and then, in a sudden gust of energy, emptied the bag's insides on the counter.

"Well, if I haven't lost that thing at last—and I wouldn't do it for a dollar!"

The sympathy in the umbrella woman's face flushed it to an almost life-like hue.

"Was it your mascot?"

The chin woman wasn't up to psychological snuff. She had to ask what a mascot was.

"Why, a charm—to keep off bad luck."

The customer chuckled till the third chin took courage and asserted itself.

"My soul and body, woman, you talk as if I hadn't cut my eye teeth. No, indeed, it wasn't no charm. It was just a little chunk of quartz I been carryin' around because my son Jimmie sent it to me to show what they dig up in the mine where he works out west yonder. If the good Lord chooses to send me troubles there

ain't any luck charm going to stave it off. I don't believe in no such foolishness as that."

"You oughter talk like that. I wouldn't do it for the world. I know too much about it. See this horseshoe I'm wearing? I wouldn't dant leave off wearing this horseshoe for any money you could name."

"What good does it do you any more than any other bracelet?"

"What good? Just listen at you! Why, it keeps me well and gets me customers and—everything. That's the reason so many people have troubles, because they keep on doing unlucky things without knowing it."

And a third woman, who was waiting to have her umbrella operated on for a floating rib, wondered how the mascot devotee could reconcile herself to risking that awful deed in the whole list of bad omens—raising umbrellas in a room.

## Connecting Link Between Opposite Mentalities

TWO women heard in the same house up Georgetown way. Each has her personal treasures set on walls, shelves and tables in the "furnished room" that stands for her home.

In one the decorations run to Remington sketches and Kipling. There is a winged victory on a bookcase, a couple of handed-down brass candlesticks and a squatty Chinese god that once had its day in a museum.

The walls of the other room are broken out in the rash of "popular" art that includes a chrome Beatrice Cenci in a walnut frame, a near engraving of "The Ironworker" and another of that especially rigid George Washington with fish bladder legs.

The women themselves are as opposite mentally, as the atmosphere of the room they live in. One studies. The other does fancy work. One wishes with all her soul that she was capable of doing great deeds. The other is serenely satisfied to let things go as they are.

And they are such good friends that they take tea with each other, evenings and have friendly powwows that both honestly enjoy.

None of the other boarders in the house could understand the friendliness between two such apparently un congenial women until a third woman ferreted out what she believed to be the cause.

Working on the principle of that early wise man, that all humanity is bound in a common chain, with its connecting link visible to any eye sharp enough to find it, she looked the two rooms over. And she found them alike in one small detail. On the wall above each bed hung a small crucifix.

It was the link between.

## Stranger Wanted Whack at the Wire Grass Turf

A LABORER was digging up the wire grass which was already asserting itself in the new green velvet of a park up Capitol Hill way. A well-dressed middle-aged man, who was passing, paused to say:

"Let me have a turn at that spade, won't you?"

The laborer—a white man—straightened up, grinned politely, but kept his spade.

"Say, hand over that shovel for a minute, son. I haven't had a whack at this sort of fun for 15 years. Been living on the desert, where there isn't a blade of civilized grass in a day's ride."

No good-natured laborer could possibly withstand an appeal like that, especially with no park guards around, so the spade was handed over.

The laborer watched the man until he wound around a path. Then he tucked his cigar into the pocket of his coat that was hanging on a tree branch and went back to the wire grass. And the only word he had to say was:

"Geet!"

## Heartless Man.

"Now, what are you feeling bad about?"

"Oh, I'm utterly wretched! He doesn't love me as I love him!"

"How do you know?"

"Why, we discovered last evening that the day we have fixed for our wedding day is the day of the opening of the cricket season, and also there's a bargain sale on at one of the big shops."

"And he wanted to change the date of the wedding?"

"We both wanted to change it. He couldn't miss the opening game, and I couldn't dream of missing those bargains."

"Well, then, I—"

"But he wanted to have the wedding a day later, while it was I who suggested having it a day sooner."

## ITCHING AND BURNING

1756 West 4th Ave., Denver, Colo.

"I had a very sore leg. It troubled me for some twenty years and finally broke out to a running sore with much fever and terrible itching and burning. It burned and itched so badly I could not rest day or night and was obliged to lie in bed. The sores were in spots just as raw as a piece of beef. I used medicine, yet it wouldn't heal. Seeing the advertisement for Cuticura Soap and Ointment I immediately wrote for some. The immediate cure was more remarkable than I can describe. I was completely cured." (Signed) Mrs. Curry Brown, April 11, 1912.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston." Adv.

## Good Evidence.

Katherine had been brought up to believe that tale-bearing was despicable, but there were times when her greedy twin strained her principles to the snapping point.

"Katherine," said her mother one day, "is it possible that you and Howard have eaten that whole bag of peppermints that I meant to take to grandmother, just because I left the bag on the table?"

"I didn't take one of them, mother," said Katherine, indignantly, "but Howard—well, I shan't tell tales, but you just smell him!"—Youth's Companion.

## Allen's Foot-Ease

Makes the laundress happy—that's Red Cross Bag Blue. Makes beautiful, clear white clothes. All good grocers. Adv.

STATE OF NEW MEXICO  
STATE CORPORATION COMMISSION OF NEW MEXICO  
CERTIFICATE OF COMPARISON  
UNITED STATES OF AMERICA  
STATE OF NEW MEXICO

It is hereby certified, that the annexed is a full, true and complete transcript of the Certificate of Incorporation of HONDO VALLEY FRUIT COMPANY, (No. 7545), with the endorsements thereon, as same appears on file and of record in the office of the State Corporation Commission.

In Testimony Whereof, the Chairman and Clerk of said Commission have hereunto set their hands and affixed the seal of said Commission, at the City of Santa Fe, on this thirty-first day of May, A. D. 1913.

Attest: EDWIN F. COARD, Chairman.  
HUGH H. WILLIAMS, Clerk.

CERTIFICATE OF INCORPORATION OF HONDO VALLEY FRUIT CO.  
We, the undersigned, for ourselves, our successors and assigns, have associated ourselves together for the purpose of forming a corporation under the laws of the State of New Mexico, United States of America, and we do hereby certify and declare as follows:

ARTICLE I.  
The name of the corporation is Hondo Valley Fruit Company.

ARTICLE II.  
The location of its principal office in the State of New Mexico, is at Capitan in said State, in the County of Lincoln. The name of the agent therein and in charge thereof and upon whom process against the corporation may be served is John W. Norton.

ARTICLE III.  
The object or objects for which this corporation is formed are:

To acquire by purchase or otherwise, to own and hold for investment or otherwise, to sell, assign, transfer, mortgage, convey, rent or otherwise deal in, or dispose of, real estate, whether improved or unimproved, in the State of New Mexico, or in any of the States, Territories, Districts or possessions of the United States of America, or elsewhere.

To drill or bore wells for, collect, store and use surface or artesian water on any such real estate, and to frigate the same, and to develop, lease, manage, improve, sell, rent, hire, cultivate, farm or otherwise turn to account the same to sell or otherwise dispose of such water in far as may be permitted by the laws of the State, Territory, District or place wherein it may be located, but not to do anything contrary to such laws.

To erect, build, construct and alter houses or other buildings or structures on real estate belonging to the corporation, and to hold the same for investment, or sell, rent, hire or otherwise turn the same to account.

To engage in the growing, producing, handling, selling and marketing of fruit, nuts and other products and supplies generally.

To manufacture, produce, acquire, buy, hold, mortgage, pledge, lease, sell, assign, transfer, trade and deal in and with, goods, wares, merchandise and property of every kind, nature and description; and to carry on any business which may be properly or conveniently conducted through or from time to time vary or invest or employment of the capital stock of the corporation; and to connection

with its other business it shall be authorized to engage in the raising, buying, selling and handling of live stock of any description.

To acquire the good will, rights and property of all kinds, and to succeed to the whole or any part of the assets and liabilities of any person, firm, association or corporation, and to pay for the same in cash, stock of this corporation, bonds, or otherwise.

To borrow money and to make and issue notes, bonds, debentures, obligations and other evidence of indebtedness of all kinds, whether secured by mortgage, pledge or otherwise, without limitation as to amount, and to secure the same by mortgage, pledge or otherwise.

To buy, hold, sell and deal in its own bonds and in shares of its own capital stock; with the right to re-issue any of said shares of capital stock which it may have acquired; provided, however, that no share of stock belonging to the corporation shall be voted upon by it.

To do all and everything necessary, suitable or proper for the accomplishment of any of the purposes of attainment of any one or more of the objects herein enumerated.

ARTICLE IV.  
The amount of the total authorized capital stock of the corporation is Thirty Thousand and no one hundredths (\$30,000) Dollars. The number of shares into which the same is divided is Thirty Thousand. The par value of each share is One (\$1.00) Dollar. The amount of the capital stock with which it will commence business is Two Thousand and no one hundredths (\$2,000) Dollars.

ARTICLE V.  
The name and postal office addresses of the incorporators and the number of shares subscribed for by each is:

NAMES	P. O. ADDRESSES	NO. OF SHARES
Leona Jones	Rowell, N. M.	1
A. Hanny	" "	1
W. A. Dunn	" "	198

Trustees

ARTICLE VI.  
The period of the duration of said corporation is Fifty (50) years from the date of this instrument, and it shall be managed by a board of not less than three (3) directors. After the filing of this certificate with the State Corporation Commission and the proper copy thereof with the County Clerk of Lincoln County, New Mexico, the incorporators shall be authorized to meet for the election of directors, the adoption of bylaws and the transaction of any other business of the Company.

ARTICLE VII.  
As authorized by the laws of the State of New Mexico, any action which now requires the consent of the holders of two-thirds of the stock at any meeting, after notice to them given, or requires their consent in writing to be filed, may be taken upon the consent given and filed by the holders of two-thirds of the stock of such class represented at such meeting in person or by proxy; provided, that a majority in interest of the stockholders represented in person or by proxy at any such meeting shall constitute a quorum.

ARTICLE VIII.  
Stockholders shall adopt at any regular or special meeting, bylaws for the government of the Company and may adopt any such bylaws as they see fit concerning the declaration and payment of dividends by the directors.

In Testimony Whereof, We have hereunto set our hands and seals this 29th day of May, A. D. 1913.
