

The only thing certain about litigation is its uncertainty.---Bovee

One U. S. Senator True to his Faith

THAT the Democratic party contains some measurably protectionists no well informed man will deny, and that they are sailing under false colors is equally undeniable. They belong in the Republican party which advocates protection, and a republican has a perfect right to preach protection, because it is a tenet of his party. But a democrat who preaches protection not only violates the principle for which his party stands but confesses his selfishness; for he has been advocating low tariff duties in season and out of season, and now that his party has an opportunity to give the tariff a real revision he is howling loudest for protection for his local interest. One need go no further than Louisiana to recognize how insidious is the tariff influence. The representatives and senators from that state are joining with the republicans to maintain a tariff on sugar. They are not democrats—only location and environment make it convenient for them to call themselves such. That the sugar senators are approachable on other things—or at least suspected of it—which goes to make up the basis of tariff bills—selfishness, pure and simple—is evidenced by a telegram sent to Senator Bryan of Florida by the Florida Citrus Exchange. The telegram reads:

"Remember that the welfare of 100,000 Floridians and the safety of \$100,000,000 capital in Florida is seriously jeopardized by any reduction in tariff on oranges; and, believing that it is your pleasure as well as your duty to safeguard such vital interests in your State, we beg to notify you that a tariff of one cent a pound on oranges and grapefruit is not protective, but is necessary for the life of the citrus interests of Florida.

"Louisiana has notified us that their senators will help us on citrus tariff if you will help their senators on sugar. Will you consult with both Louisiana and Mississippi Senators in this matter, and see if such an alliance can be safely arranged?"

Now, if Senator Bryan and his colleague were tarred with the same stick as the Louisiana senators, and two more so-called democratic senators could be induced to "swap" votes for local protection, the fate of the Underwood bill in the senate could now be announced. Protect sugar in Louisiana, citrus fruits in Florida, live stock in the west, etc., ad infinitum, would give us another Payne-Aldrich bill, which the people have condemned so thoroughly. But Senator Bryan isn't the Louisiana kind; he is a democrat for other reasons than that he lives in a democratic community. He is what he says he is: a democrat and will not support a protective measure even though it does benefit some particular interest of his state; for he knows it will be a detriment to millions who consume. He looks further than the little peninsula that comprises his state; his vision is broader, and takes in the whole country. Such is true statesmanship and unquestionably is it patriotic and just, because selfishness, sectionalism and favoritism is wiped out and he acts not for the few but for the many. But we will let the senator make his own reply to the citrus growers. He says:

"Florida is Democratic and has endorsed, among other things, the position taken by the Democratic party on the tariff question. A very simple method of ascertaining whether a person believes in a principle is whether he will shrink from having it applied to himself. We ought not to be willing to apply a principle of government to other industries or sections and then refuse to be bound by it ourselves. If we do this on the tariff wherein do we differ from the Republicans in this most vital of all the questions which control men in their party allegiance?"

"One of the vices of the system of protective tariff has been that one industry will support another, in return for protection for itself. Under such a system those industries which do not make trades of this character are left unprotected, while those which do make the trades succeed in securing protection. That this statement is true is illustrated by your telegram, in which you state that Louisiana (meaning thereby, I assume, some organization of business men who undertake to speak for that State) has notified you that the Senators from that State will help Florida on the citrus schedule of the tariff if the Florida Senators will help Louisiana on sugar. Then you request me to consult with the Senators from both Louisiana and Mississippi to find out if such an alliance can be made. I cannot do this. But, suppose the alliance you speak of could be made. If it were my duty to do this, would it not equally be my duty to make similar alliances with any other Senators and agree to support protective tariff schedules in which their States would be interested, in return for their support for such a tariff on citrus fruits as you desire? Does not such a plan as outlined inevitably lead to a tariff made up of trades? And can anybody expect justice or fair treatment to the whole country under such a plan?"

"I have written you thus at length because I do not wish to be misunderstood and because I feel as much interested, I hope, in the success of the people of Florida engaged in that industry as any other citizen of the State.

News Notes from Outside Points

FORT STANTON

There was no ball game on the local diamond. The game of the season will be next Sunday afternoon, May 18th, when Carrizozo's newly organized set of fans will visit us and redeem themselves if possible for the "put out of business" they received recently.

Wild rumor has it that W. Johnson, the auto man, will umpire Sunday's game provided he can have his auto near in case of accident.

Mr. Ben J. King, of No. 4, left last week on a business trip to the east. Ben will be missed by all for he is of the character that appeals to everybody. He will not forget his stay here. While passing through El Paso Ben saw to it that a double crate of strawberries came to No. 4. Thank you, Ben, they were fine.

Mrs. R. G. Pearce and son, Russell, Jr., of Detroit, arrived Thursday of last week and are guests of Mr. and Mrs. A. E. Lovett at No. 13. Dr. Pearce will return to Detroit with Mrs. Pearce and son in a few weeks.

The Chaplain spoke on "Knowledge" last Sunday evening at the non-sectarian meeting in Library Hall.

Mr. and Mrs. Sitton and son and daughter have arrived and will reside at the Fort. Mr. Sitton is Chief Engineer of the Post.

Mr. Andrew Canton, who sang at our big minstrel last March, left for his home in Cleveland last week.

This being the month of May, special May devotions are held in the chapel every morning at 8 o'clock.

Mr. Dunlap Mullins of No. 4, who has been quite ill for the past two weeks, is recovering and will soon be out.

The following is a list of the donors to the Chapel in the past month, notably a set of gold

vestments: Mrs. B. F. Soul, Mrs. S. M. Miller, Mrs. Mary Hinkel, Mrs. Mary Pierce, Mrs. J. W. Orme, Miss Hanna Dunn, Mrs. Ryan, Mrs. Helen Keane, Mrs. Geo. May, Mrs. Ellen Walsh, Mrs. Hugh Reilly, Mrs. Chas. Earl, Mrs. P. J. Duffy, Mrs. T. F. Tobey and Miss R. F. Duffy, all residents of Washington, D. C.; Mrs. Giarta, of Hyattsville, Maryland.

Dr. S. E. McDaniel, of No. 4, left Monday for Tulafosa, where he will reside in the future. His wife from the east will join him shortly.

Everybody line up for the battle to "swat the fly" which will be waged with special effort this season.

Corona

Miss Gladys Bond is making preparations to go to visit her brothers in El Paso the coming week.

Several of our pupils took the state examination for the 8th grade promotion certificates.

Prof. Thomas McMurray of the Varney school was a Corona visitor last week.

We had two preaching services here the past Sunday, Rev. Spriggs of Vaughn in the morning and Rev. Le Breton in the evening.

Dr. Stone made a business trip to El Paso the past week.

E. A. Haggard spent Saturday night at Duran.

Rev. Grant of Estancia has been holding a meeting at Cedarvale which resulted in four persons being baptised at Gallinas last Sunday. Several of our young people drove down. They reported a large crowd.

Messrs. Moulton and Varney with their wives motored to Carrizozo last Sunday, returning the same day.

Dr. Richards, with his wife and daughter, returned from an extended visit to California.

Road Board to Hold Session

THE Lincoln County Road Commission will hold a session in Carrizozo the first Monday in June, the same being the 2d day of said month. All persons presenting bills for any kind of service rendered are notified that each and every account must be verified by oath before some official qualified to administer it, as no bills will be paid otherwise. If this is done before the board meets it will facilitate business before the board and result in a more rapid payment of accounts.

The chairman, Dr. J. W. Laws, authorized a further announcement, as follows:

A general invitation is extended to all who are interested in road work to be present at the meeting during the day and remain over for the evening session. The board thus hopes to meet individuals and hear expressions from all portions of the county and if possible ascertain what is needed in road building.

I had this question to meet when I was a candidate for the Senate and I can only say to you now what I said to the growers themselves then—that I will not vote for a protective tariff on anything, wherever grown, manufactured, or produced. If I believe I should do that I would not be Democrat but Republican instead. Yours very truly,
"N. P. BRYAN."

John J. McCourt, Banker

THE many friends of John J. McCourt will be glad to learn he has stepped up a niche in the financial world. He has just been elected secretary of the Security Trust and Savings Bank of El Paso. Those of us who have known Johnnie the past twenty years in this county—known him as miner, dry goods and grocery salesman and later on the road for Armour & Co., rejoice in his good fortune and wish him all kinds of success.

Al Smith, Major Campbell, J. O. Nabours and the writer took a spin Tuesday down the Carrizozo-Three Rivers road to the big bridge. Foreman Gray has the road in very good condition to that point; but the question at issue now is whether to cross under the bridge or cross the railroad nearer Polly. Both routes have their advocates, and without a survey it is difficult to choose wisely.

E. P. & S. W. to Straighten Track

UNOFFICIALLY we are informed that some extensive railroad work will be under way at an early date. Nothing definite has been given out, but some of the preliminary work is of public knowledge and the other is surmised. Those connected with the railroad are not giving out the information, but when anyone is approached the reply is invariably made that the work will be done, and that it will begin at an early date.

What is known is that surveyors have been in the Oscuro locality for a month past, running lines from Polly to and below Oscuro. It is also known that a number of preliminary lines have been run and it is almost equally certain that the permanent line is now, or about to be established. The permanent survey, it is believed, will leave the main line in the neighborhood of Polly and run in practically a straight line to Oscuro, thus cutting out the radical curves that now exist in the old road bed, which seriously interfere with fast traffic. If this is correct, it will not only shorten the line, but will also facilitate traffic, as the existence of present curves makes fast running dangerous.

Taking rumor and all the information obtainable at their face value, it will readily be seen that a work of considerable magnitude is ahead of the company; that the time required to make the change will extend over a period of several months, and it means the expenditure of several hundred thousand dollars. About ten miles of road bed will have to be built, through a country much lower than that where the present road bed is located, which will necessitate heavier fills and cuts. And in addition to this change in the line it is also stated that a number of minor changes are to be made in the road bed south of Oscuro, extending as far as Three Rivers. Many curves are to be eliminated and the road bed raised in various places.

The expenditure of this large sum of money means the employment of a great many men and teams and will be instrumental in a general distribution of money throughout this section. It is a big link in the chain of prosperity that is striking old Lincoln county and all rejoice over the bright prospects that are looming up for the future.

Character Sketch

IT MADE A DIFFERENCE

IT was a good many years ago in White Oaks, when the Old Abe and other mines in that celebrated old camp were turning out thousands of dollars of the yellow metal. An old miner, noted not only for his capacity to break rock, but more particularly for his burning thirst at certain and stated periods, supplies one of the characters. This old miner when sober was not only industrious, but of a quiet and retiring disposition, seldom speaking unless spoken to, doing his work well and conscientiously attending to his every day duties.

When, however, he had imbibed too much of the Kentucky product his disposition, or manner, underwent a complete change. He became loquacious even to garrulity, and made himself so obnoxious that all who could dodged him. He seemed to take a special delight in cornering some individual who never indulged in highballs and to whom one addicted to the habit was just the opposite of companionable.

On this particular occasion, old John—that part is real—selected for his target one of the most prominent and best loved citizens of the county, a man who stands high in his profession of law and a leader in public thought and a man who had done, and continues to do, much for Lincoln county.

Old John made his way upstairs, entered the office of the lawyer, and, in his maudlin way, opened a conversation that was anything but entertaining. His auditor listened with all the patience he possessed—and he has sober.

more than the average man hoping his inebriated entertainer would ultimately reach a period. This seemed furthest from old John's thoughts, and the more he talked the more evident it became that he was wound up for the day. Finally, after using every subterfuge to rid himself of

The News' Weekly Lay Sermon

HE who looks from without through an open window never sees as many things as he who looks at a closed window. There is no object more profound, more mysterious, more rich, more shadowy, more dazzling than a window lighted by a candle. What one can see in the sunlight is always less interesting than what takes place behind a blind. In that dark or luminous hole life lives, dreams, suffers.—Charles Baudelaire.

John's presence, the attorney lost his patience and said:

"John, you are drunk now; I don't want to talk to you in that condition. Come around when you are sober and I shall be glad to discuss the matter with you. I don't want to talk to you when you are drunk; come around when you get sober."

Old John was, apparently, stupefied for a moment, but rallied his wits and replied:

"Judge, (hic) I don't think we can get together; you (hic) don't want to talk to me (hic) when I'm drunk (hic) and I don't want to talk to you (hic) when I'm

CARRIZOZO NEWS

CARRIZOZO NEW MEXICO

WANTON WASTE

Now that the whale fishers who valued that denizen of the deep merely for his oil and his ambergris and his bone have nearly depopulated the ocean of whales, it is beginning to be realized that the abandoning of the colossal carcasses after these spoils had been secured involved a shocking waste—that the flesh of the whale is valuable for human food. The inhabitants of West Africa, it is said, always have been aware of this fact, and have fasted upon many a whale abandoned by the whalers and tossed upon their coast. The Japanese eat the flesh of the whale and esteem it as a delicacy. There seems to be no reason whatever why hereafter it should be wasted by the seamen of any of the nations which are engaged in the pursuit of this monster of the deep. But think of the millions upon millions of tons of good whale meat that have been abandoned at sea! There is nothing to compare it with but the ruthless slaughter of the American buffaloes for their hides that followed the opening of railroad communication with the Pacific slope, and that in a few years nearly extinguished the race of those noble denizens of the plains.

The scheme of changing the Gulf stream, so that it will sweep up the east coast of this country instead of sliding over to Europe, has reached the dignity of a bill in congress providing an appropriation for advancing the project. The New York Tribune suggests a more practical way of ameliorating our climate by means of dams, increasing the oblateness of the earth—and reducing the angle of the ellipse so that the sun would not go so far south or come further north and providing the whole year the climate of the southern states, and thus make it possible to raise strawberries and peas the year round. But the real consideration concerning this change would not relate to the strawberries and citrus joys, but to the character of the people. Temperaments and temperatures are closely allied. A person who is used to frost and freezes can never get along with a tropical climate without losing some of his "get up" and enterprising dash. The fact is the earth as finished by the Creator in the first place cannot be improved upon. The Gulf stream is in the right place, and the oblateness of the spheroid likewise.

The lower house of the Pennsylvania legislature toyed with a bill proposing to make it criminal for burger bowls in public eating houses to be used a second time without having been thoroughly cleaned. After half an hour's humorous debate the bill was killed. The public is not ripe for what look like super-refinements of precaution growing out of the germ theory. Of course, however, nice people will want perfectly clean finger bowls or none at all.

The new Russian stamps have been called in because they could not be cancelled without stamping on the czar's face. If the latter is so sensitive, he should take pattern by the way in which George Washington smiles serenely on under the daily and hourly nutrition of his classic countenance, confident in the knowledge that while he is intact in the hearts of the nation he cares not what becomes of his features on its letters.

While Burbank in California has been developing a spineless cactus, Burrows in Essex, England, has been endeavoring to evolve a stingless bee. Many a farmer who would add the occupation of an apiarist to his other activities has refrained because he dreads the industrious insect's "hot foot." If Mr. Burrows can give the world a honey-producing bee with cold foot, there will be a larger production of honey.

The governmental edict is that this name is "catchup" and not "kotchup." But, says the New York World, "all the power of government regulation will not cause it to be popularly pronounced that way." Will it not be pronounced by the popular element that pronounces "catch" as if it were spelled "ketch"?

One thing about the motor truck that pleases the pedestrian is the fact that it is ordinarily agile he can get out of its way.

New York college girls refuse to marry on less than \$10,000 a year. Just wait a few years, and they'll be willing to accept the first man who proposes.

St. Louis boasts of a man with a wooden arm who plays baseball. That's nothing! Many players have wooden heads.

Where do the fair suffragettes stick their chewing gum when they are shouting for the cause?

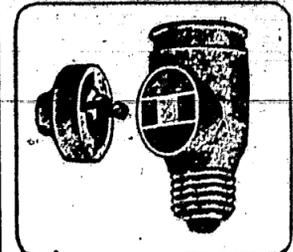

The ELECTRICAL WORLD

CURRENT TAPPED AT SOCKET

Contrivance May Be Used for Lighting and Operating Power—Made of Glazed Porcelain.

The device shown in the illustration is a simple and safe device for tapping the current from an electric light fixture to any of the small heating and power devices now on the market.

The incandescent lamp is attached in the ordinary manner, while the

Device for Tapping Current.

attachment cord is inserted in the side. In this manner the light and device may be operated separately or together, as desired.

The body is made of one piece of glazed porcelain, with bronze contact tips.

CURTAIN AS BURGLAR ALARM

Electrical Device Successfully Tested by Police Authorities of Berlin and Dresden.

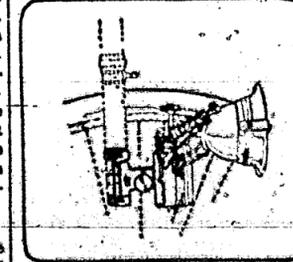

An electric burglar alarm from Dresden has been tested thoroughly by the police authorities of Dresden and Berlin. The most experienced experts were unable to find flaws in the apparatus or to enter into the protected premises without starting the alarm. The appliance is exceedingly simple. It consists of a curtain or portiere wired with fine conductors. At certain places on the curtain are affixed small metal knobs which are connected with the wire conductors. The curtain is then drawn across the window or door, or around the safe, and the slightest disturbance of this position immediately breaks the circuit, as the metal knobs are thrown out of contact with each other.

Should the burglar notice the wires and cut one or several thereof, the breaking of the circuit would also start the alarm. Any other attempt to destroy the protecting curtain also would be noticed. Any curtain, unless made of fireproof material, would also act as a fire alarm. The alarm itself may consist of a series of bells, lights, or other electrical appliances. This invention can be used to protect doors, windows, safes. The curtains, forming the most conspicuous part of the device, can be designed and arranged to suit individual taste.

ELECTRIC LAMP FOR BICYCLE

Complete Apparatus Clamps to Fork of Machine—Current is Generated by Small Dynamo.

An electric lamp for motorcycles and bicycles, receiving its current through the revolution of the front wheel, is the invention of a German engineer, says the Popular Mechanics. The current is generated by a dynamo, which consists of a fixed field magnet in which the armature is revolved.

Electric Lamp.

The shaft of the armature receives its rotary motion through a small horizontal wheel, which is in frictional contact with the tire. The complete apparatus clamps to the fork of the machine.

Electrica Waiter

An Australian has invented an electric waiter for hotels and restaurants, operated by the customer seated at his table. A wooden frame, holding the menu card, is fitted with push buttons opposite each item, and "pressing the button" rings a bell in the kitchen and displays the order and the table number. The kitchen apparatus also prints a check, the original of which comes to the customer, with a duplicate on an endless tape. This device has been in successful use in New Zealand.

New Telephone Device

A Pennsylvania has patented a tube and ear-shaped cup which form an extension for an ordinary telephone receiver to permit a man to have both hands free while telephoning.

ELECTRICAL HOUSE IN PARIS

Everything in Dwelling From Opening of Front Door to Laundry Work Done by Electricity.

In the heart of Paris is an electrical household. The door is opened by pressing a button, the telephone receives the object of the visit. In the dining room there is no waiter, but an electric elevator rising from the kitchen to the center of the table. On the table beside the host are four push buttons. When the host presses the white button a little drum beats in the kitchen. Immediately the doors of the elevator shaft open, the soup tureen ascends to the table, and the doors close and conceal the opening.

By pressing a red button to the right or left the dish is caused to travel around the table, in the corresponding direction. It is arrested at any point by removing the finger from the button. The function of the fourth button is to cause the dish to rotate in order to assist the guest in helping himself. The dish is returned to the elevator and thence to the kitchen by the operation of the buttons.

Attached to the electric range in the kitchen are a switchboard, an electric clock, a rheostat by which the strength of the current and the heating effect are varied, and an ammeter which measures the current employed in cooking each dish. With the clock every dish can be cooked to the precisely proper degree. At the moment when the desired number of minutes has elapsed the current automatically is cut off and an electric bell announces the fact to the chef.

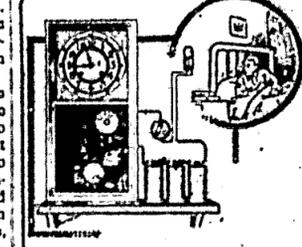

In the laundry are electrical washing machines, drying stoves, irons and ironing machines. In the bedroom is an electric bed warmer. Press a button and an elevator concealed in a table, by the bedside brings breakfast and the morning paper. Electric spies distributed in all the rooms behind wallpaper and hangings and connected with sensitive microphones make it possible for the master of the house by pressing a button without leaving the bed to know all that is being said and done in the house.

BELL MADE TO STRIKE HOUR

Gong Insulated by Being Mounted on Wooden Back and Hammer Closed Circuit in Striking.

It was necessary that I arrange to have a bell at a distance from a clock strike the hours at the same time as the clock.

The gong of the clock was connected to one wire and the hammer to another. These two wires were at-

Bell That Strikes the Hours.

tached to batteries and run to the distant bell as shown, writes J. P. Wood in Popular Electricity. As the gong of the clock was insulated by being mounted on the wooden back, the hammer closed the circuit with each stroke. A single stroke bell is best, but a vibrating bell may be used.

ELECTRICAL NOTES

New York has six blind operators at telephone switchboards. More than 20,000 lamp filaments of 20-candle power each can be manufactured from one pound of tantalum.

Tourists will be able to reach the famous Leaning Tower of Pisa in Italy by an electric street car line in the near future.

Paris expects to get 300,000 electrical horsepower by damming the River Rhone at a point 200 miles from the city.

For pressing garments a North Carolina has patented a pair of electrically heated irons, mounted on what resembles large shears.

An Ohio inventor has patented a telephone receiver casing made of metal as more durable than the rubber ones generally used.

Electric locomotives have been built for a German railroad that has heavy grades that draw loads of 250 tons at forty-two miles an hour.

Although Burma has been producing tungsten only for about two years it promises to lead the world in the production of that metal.

An electric furnace in which the heat is applied to metals to be melted by a tungsten tube has been made by two German scientists.

The oldest submarine cable in active operation in North America is said to be that across Northumberland Strait. It dates back to 1852.

A Danish scientist has designed an electrochemical apparatus for storing up the energy of sunlight and transmitting it in the form of electric energy.

Experimentally, at least, a young Italian inventor's wireless telegraph apparatus transmits written messages, sketches, shorthand characters and all sorts of designs.

THE REASON.

"Why are you going to church so early, Mildred?" "To pray for my sweetheart." "But I didn't know you had one." "I haven't—that's why."

A CLERGYMAN'S TESTIMONY.

The Rev. Edmund Heslop of Wighton, Pa., suffered from Dropsy for a year. His limbs and feet were swollen and puffed. He had heart-luttering, was dizzy and exhausted at the least exertion. Hands and feet were cold and he had such a dragging sensation across the loins that it was difficult to move.

After using 5 boxes of Dodds Kidney Pills the swelling disappeared and he felt himself again. He says he has been benefited and blessed by the use of Dodds Kidney Pills. Several months later he wrote: I have not changed my faith in your remedy since the above statement was authorized. Correspond with Rev. E. Heslop about this wonderful remedy.

Dodds Kidney Pills, 50c. per box at your dealer or Dodds Medicine Co., Buffalo, N. Y. Write for Household Hints, also music of National Anthem (English and German words) and recipes for dainty dishes. All 3 sent free. Adv.

Knows He's Right. "Does your husband ever tell you you have poor taste?" "Frequently."

"And what reply do you make to him?" "I think of what I married and say nothing."

GIRL SUFFERED TERRIBLY

At Regular Intervals—Says Lydia E. Pinkham's Vegetable Compound completely cured her.

Adrian, Texas.—"I take pleasure in adding my testimonial to the great list of women who have benefited and hope that it will be of interest to suffering women. For four years I suffered untold agonies at regular intervals. Such pains and cramps, severe chills and sickness at stomach, and finally hemorrhage until I would be nearly blind. I had five doctors and none of them could do more than relieve me for a time."

"I saw your advertisement in a paper and decided to try Lydia E. Pinkham's Vegetable Compound. I took seven boxes of it and need two bottles of the Sanative Wash, and I am completely cured of my trouble. When I began taking the Compound I only weighed ninety-six pounds and now I weigh one hundred and twenty-six pounds. If anyone wishes to address me in person I will cheerfully answer all letters, as I cannot speak too highly of the Pinkham remedies."—Miss JESSIE MARSH, Adrian, Texas.

Hundreds of such letters expressing gratitude for the good Lydia E. Pinkham's Vegetable Compound has accomplished are constantly being received, proving the reliability of this grand old remedy.

If you want special advice write to Lydia E. Pinkham Medicine Co. (consultants) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

PRETTY COLOR SCHEME

FLOWER PUNCHES A NOVELTY FOR AMBITIOUS HOSTESS.

Just the Requisite "Something New" That is So Much Desired—Nasturtium Probably the Easiest That Can Be Made.

When a color scheme is to be carefully carried out, the royalty-loving hostess can use flower punches of ices.

An appetizing nasturtium punch is made by chopping fine the fifty freshly gathered nasturtium blossoms, rubbed to a paste with four tablespoonsful of sugar. Boil for five minutes a pound of sugar and a quart of water; take from the fire and add the juice of one lemon and two oranges; the grated rinds of the orange and the nasturtium paste. Let the mixture get cold, freeze and pack away for at least two hours. Serve in sherbet glasses garnished with a nasturtium blossom and the glass set in a bed of leaves and tendrils.

Fresh violets may be used in the same way, adding the juice of two lemons and omitting the oranges. Just before freezing stir in a pint of purple grape juice, and when frozen stir in a meringue made from the well-beaten whites of two eggs and a tablespoonful of powdered sugar. Stand three hours to ripen and garnish with candied violets. If you cannot get the fresh violets, color with grape juice only.

For rose ice, wash carefully a pint of freshly culled pink or red rose petals and pound them to a paste with two ounces of granulated sugar. Add a quart of water and pound of sugar, boil ten minutes and cool without straining, when the juice of half a dozen oranges is added. Freeze and serve in sherbet glasses, the stems twined with rose leaves and the ice garnished with candied rose petals and a mat made of petals and foliage on the plate.

For a green punch chop tender nasturtium leaves and tendrils—enough to weigh half a pound—and rub to a paste with two ounces of granulated sugar. Boil for five minutes a pound of sugar and quart of water, add juice of two lemons and two oranges and the leaf paste. When cold freeze and stand three hours. This may be served with a green liqueur poured around it. A few drops of vegetable coloring may be added if needed.

A mint ice may be made in the same way, using sixteen large stalks of mint. Serve with creme de menthe poured over the ice.

In making any flower punch be sure the petals are fresh, have been carefully washed and are not culled from bushes that have been sprinkled with disinfectants.

Veal Recipes.

Veal Collops—Cut veal from leg or other lean part into pieces size of an oyster and season with pepper, salt and a little mace. Rub some over each piece, dip in egg, then into cracker crumbs and fry. They both look and taste like oysters.

Mixed Veal on Toast—Take cold veal which has been left over, chop fine, add small onion, grated, salt and pepper. Sprinkle sifted flour over all, mixing all together. Place tablespoon of butter in hot dish, add meat. When browned pour over boiling water until it covers and let boil until thickened. Serve on hot toast and garnish with parsley.

Orange Charlotte.

One-third box of gelatin, one-half cup of cold water, one-half cup of boiling water, one cup of sugar, juice of one lemon, one cup of orange juice, and pulp, whites of three eggs. Soak the gelatin in cold water until soft, add the boiling water, sugar and lemon juice and a little of the grated rind. Cool in a pan of ice water and when it begins to harden beat in the stiffly beaten whites of the eggs. Serve with a custard made with the yolks of the eggs, one pint of milk, three heaping tablespoons of sugar and a little salt. Flavor to taste, or you can cut it up in pieces and serve with whipped cream.

New Kerchiefs.

At one time any handkerchief that had its snowy whiteness sullied by a colored border was considered poor taste, but now we not only think colored borders quite desirable, but pale colored handkerchiefs are also chosen, and the newest thing is a colored handkerchief with a different colored border. In both handkerchiefs and hats the colors are very delicate, almost pastel in tints.

Doughnuts.

One egg, one and one-half cups of sugar, one cup of sour milk, one cup of sweet milk; one large tablespoonful of cream, two tablespoonfuls of cream of tartar, one teaspoonful of soda, a pinch of salt and a dash of cinnamon and nutmeg. Flour enough to handle.

Shewball Muffin.

Sift together four cups flour, four teaspoonfuls baking powder and a pinch of salt; add one cup of sweet milk and stir into the dough until thick; flour the hands and roll the dough into small balls. Bake in a hot oven.

Raisin Pie.

One-half cup raisins soaked overnight in cup water; Next morning add one cup sugar, beat together. Mix one-half tablespoon cream tartar in a little water. Stir in. Add one beaten egg, juice of one lemon.

CONSTIPATION

Munyon's Paw-Paw Pills. Pills are called all other laxatives or cathartics. They coax the bowels into activity by gentle methods, they do not scour; they do not gripe; they do not weaken; but they start all the secretions of the liver and stomach in a way that soothes these organs in healthy condition and corrects constipation. Munyon's Paw-Paw Pills are a tonic to the stomach, liver and nerves. They invigorate instead of weaken; they enrich the blood instead of impoverishing it; they enable the stomach to get the nourishment from food that is put into it. Price 25 cents. All Druggists.

LADIES, LOOK YOUNG

Must Be. "Is he making good?" "No question of it. He can get credit."—Detroit Free Press.

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of Dr. J. C. Fletcher. In Use For Over 30 Years. Children Cry for Fletcher's Castoria.

Friendly Hint. "I'm afraid to say exactly what I think," said Governor Blount. "That's interesting," replied Senator Sorghum. "But a man who adopts that principle ought to be more careful what he thinks."

A Winner, If— At an Easter breakfast John Rockefeller, Jr., once said: "The road to success is called perseverance. Perseverance conquers everything. But—" Mr. Rockefeller, with a smile, held up an Easter egg. "But," he added, "let us remember that a hen on an egg of porcelain perseveres."

Going Half Way. Rutgers Jowett, the literary editor, was urging a young novelist to take up his residence in New York. "Come to New York," he said, "then, in every emergency, the publishers and magazine editors can get to you." "Men continually tell me," Mr. Jowett continued, "that things never get their way. I feel like shouting to them: 'But why not try putting yourself in the right place?'"

Something Seemed Lacking. One of the best known London newspapers, in a review of "Lionel Lincoln's Own Stories," collected by Anthony Gross, commented on the anecdote which Lincoln was fond of telling of a family of such migratory habits that they were able to get everywhere whenever they saw the wagon wheels brought out they laid themselves on their backs and crossed their legs ready to be tied. The British reviewer, with an insular sneer of humor remarked: "One feels a little though something must have been accidentally left out of this and of many other stories in the book."

Solves the Breakfast Problem. A bowl of crisp, sweet Post Toasties makes a most delicious meal. These crinkly bits of toasted white corn, ready to serve direct from package, are a tempting breakfast when served with cream or milk, or fruit. The Toasties flavour is a pleasant surprise at first; then a happy, healthful habit. "The Memory Lingers"

LOCAL AND PERSONAL

Mr. and Mrs. Eaker returned this week from Tucumcari.

Chas Bird and family now occupy the Hunt building near the air place.

Wayne Van Schoyck was down from White Oaks yesterday morning.

Brakeman Chislium has been a sufferer the past ten days with sinusitis. He is slowly improving.

Mr. and Mrs. Allen A. Lane and Mrs. Wm. Watson and sons are down Wednesday from White Oaks.

Geo. A. Titworth, of the big firm of Welch & Titworth, of Capitan, was in town Sunday Monday.

Oliver Peaker was down from White Oaks Friday afternoon and dropped into The News of a moment.

One pair of socks—six pairs for \$1.00, guaranteed to wear six months or new ones free. Sold at Ziegler Bros. 5-17-21

Knit union suits, athletic and summer weights for \$1.00. Come in and see Priced \$1 to \$3.50. Ziegler Bros. 5-17-21

Francis G. Tracey and daughter, Marjan, started for Los Angeles, California, and they will spend the summer there.

Law Hats, Silk Hats, Cloth Hats, everything that's comfortable for the summer days that's coming now. Ziegler Bros. 5-17-21

A. Highfill and R. D. Haynie came over from Capitan yesterday. Mr. Highfill went on to White Oaks while Mr. Haynie will remain here.

O. Woolman, of Watonga, Oklahoma, in company with others has been investigating coal fields in Lincoln county. They may develop some coal fields in this section.

B. Garven, has purchased Perry property on the McCall addition known formerly as Land residence. It is very well located and is considered a valuable piece of property.

The measles continue to spread in town. So many new cases have developed that it is believed the material is about exhausted. Serious developments have not as yet, so far as we have heard.

For the man who knows—Chamberlain's Shoes and Oxfords—leathers and styles, button lace. Priced at \$5 and \$6. Brands, good ones too, at \$4. Ziegler Bros. 5-17-21

The infant of Mr. and Mrs. Lee died Wednesday afternoon at their home in White Oaks. Rev. Herbert Haywood, local Baptist minister, went to White Oaks yesterday to conduct the funeral service.

Traffic on the E. P. & S. W. system has been brisk for some time. More cattle have been handled by the road than for a number of years. Fruit shipments continue to be made and all classes of traffic have been good.

Mr. and Mrs. F. M. Hobbs returned this week from Willard, where they had gone to see their little grandson, who was very ill. The little fellow was improving when they left Willard on their return to their home at Capitan.

Clyde T. Chamberlain, of Roswell, who has been visiting friends here and at Capitan for several days, left Tuesday afternoon to visit friends at Alamogordo. The young man originally came from St. Louis, is a deaf mute, but a printer—and, of course, is all O. K.

Roland Box and family, Marshal C. West and family and Tom Brown and family passed through Saturday afternoon enroute to Palomas Springs. All these are ranchmen and farmers of the Little Creek country and went to the springs to drink of and bathe in the curative waters of this celebrated resort.

Mr. and Mrs. W. A. Franklin were in last night from Jicarilla enroute to El Paso. Mr. Franklin, who has been operating in Jicarilla for about three years, stated that he had developed one particular property to the extent that it is a mine. He has opened up a strong lead, which is firm, continuous and rich.

Cure for Stomach Disorders
Disorders of the stomach may be avoided by the use of Chamberlain's Tablets. Many very remarkable cures have been effected by these tablets. Sold by all dealers.

Preaching at Capitan
Rev. Haywood, of Carrizozo, will preach at Capitan on Monday, Tuesday and Wednesday nights, May 19-21, in the school house. All are cordially invited to attend services.

Health a Factor in Success
The largest factor contributing to a man's success is undoubtedly health. It has been observed that a man is seldom sick when his bowels are regular—he is never well when they are constipated. For constipation you will find nothing quite so good as Chamberlain's Tablets. They not only move the bowels, but improve the appetite and strengthen the digestion. They are sold by all dealers.

Dr. T. W. Watson was over from Lincoln Friday on business.

STATEMENT OF THE FIREMAN'S FUND INSURANCE CO.
San Francisco, California, Dec. 31, 1912.
Assets \$1,200,000.00
Liabilities, including capital 6,100,000.00
Surplus \$4,900,000.00

Two more new autos have reached town. They are both Overlands; one, a "45," was purchased by H. S. Fairbanks; the other, a "30," by S. L. Northlane. Mr. Northlane's car, though much smaller than that of Mr. Fairbanks, has all the latest attachments, such as an electric starter, electric lights, etc.

The little ten months' old baby of Mr. and Mrs. Clark Hust died this morning at 10:15. The little infant had been in delicate health for some time, and the attack of measles with other complications ended its life. The sympathy of the community goes out to the family. Funeral arrangements have not been announced.

Teachers' Institute

Lincoln County Teachers' Institute will be held in Carrizozo, June 9-21, 1913. Fee \$1.50.

J. B. Taylor, Principal of the Deming Schools will be in charge assisted by Mrs. Lillian A. Bess of Tucumcari.

The law makes it compulsory that teachers attend institute or present certificate of attendance from some recognized school.

Examination for certificates will be held June 20-21.

Special examinations on professional subjects may be taken on application.

For further information address Mrs. WALLACE L. GUMM, Lincoln Co. School Supt., Carrizozo, N. M.

Mr. and Mrs. Edward Tompkins and children returned to Tucumcari Tuesday. They had been in White Oaks since Mr. Keith met with an accident in a mine two weeks ago. Mr. Keith is the father of Mrs. Tompkins. He was sufficiently recovered to accompany his daughter and family to Tucumcari where he will remain for a fortnight.

Most Prompt and Effectual Cure for Bad Colds

When you have a bad cold you want a remedy that will not only give relief, but effect a prompt and permanent cure, a remedy that contains nothing injurious. Chamberlain's Cough Remedy meets all these requirements. It acts on nature's plan, relieves the lungs, aids expectoration, opens the secretions and restores the system to a healthy condition. This remedy has a world wide sale and use, and can always be depended upon. Sold by all dealers.

At the State Good Roads Meeting in Albuquerque last week, County Commissioner Ferguson was selected as vice-president for Lincoln county and Dr. J. W. Laws was chosen as organizer. Both of these gentlemen have been prominently identified with road work for a number of years past, and will, no doubt, be of good service to the county road commission in the work it has before it, not only in giving aid to the commission, but also in arousing an interest among the people.

Rheumatism Quickly Cured
"My sister's husband had an attack of rheumatism in his arm," writes a well known resident of Newton, Iowa. "I gave him a bottle of Chamberlain's Liniment which he applied to his arm and on the next morning the rheumatism was gone." For chronic muscular rheumatism you will find nothing better than Chamberlain's Liniment. Sold by all dealers.

Miss Keller was here yesterday from the Mesa.
John C. West, a merchant at San Patricio, visited the county seat Wednesday.

Commercial Club Holds Session

Peace Day, May 18

A SPECIAL meeting of the Carrizozo Commercial Club was held Monday for the purpose of discussing matters of local and general interest, such as roads, incorporation, etc. A committee was appointed to look into the proposition of a road, via the upper crossing of the mal pais, to Mocking Bird Gap. It was decided to hold another meeting of the club on the 21st, at which time road matters, particularly, would be dealt with.

On the recommendation of the committee on incorporation, a mass meeting was called for Tuesday night, June 27th. On that date it is hoped that every one in the town will be present to the end that a full, frank and fair discussion of the question of incorporation may be had.

A committee consisting of Lee B. Chase, H. S. Campbell and Jno. A. Haley was selected to arrange an entertainment for June 2d, at which time the County Road Commission will be in session here, and to invite all citizens in the county interested in good roads to meet here on that occasion.

In pursuance with that idea the committee took the matter up the following day with Dr. Jas. W. Laws, of Lincoln, who is chairman of the County Road Commission and also organizer, by virtue of appointment of the State Good Roads Association, for Lincoln chairman. The chairman was asked for an expression of his views as to a meeting of the nature proposed and the following letter outlines his views.

Lincoln, New Mexico,
May 14, 1913.

Editor Carrizozo News,
Carrizozo, N. Mex.
Dear Sir:

Please announce to your readers that the County Road Board will meet in Carrizozo on Monday, June 2, 1913, at the same place and time of the meeting of the Board of County Commissioners. All bills presented to the board must be duly sworn to before a notary public.

All petitions contemplating changes in the public roads or in any way relating to public roads should be presented at this meeting.

I would also suggest that citizens from every precinct and vicinity in the county be invited to attend a Good Roads meeting to be held at a suitable building in Carrizozo on the night of June 2nd. That the object of such Good Roads Meeting be to ascertain from the people of each vicinity what is needed to improve road conditions in their locality, and the improvement of the roads in the county.

Getting together in the form of a smoker, an experience meeting or some informal gathering, such as may suggest itself to your Commercial Club would no doubt result in good.

Yours truly,
J. W. Laws,
Chairman Lincoln County Road Commission.

Following the suggestion of the chairman in the above letter, with which the Club is in hearty accord, arrangements will be made for a banquet or smoker, on the night of June 2d, and a general invitation to citizens in all parts of the county to be present and participate will be extended. It is hoped that representative citizens from every community in the county will be present on that occasion. A demand for good roads, expressed in a general meeting, is a most effective means of attaining that end.

IN calling attention to May 18th as Peace Day, State Superintendent Alvan N. White makes the statement that since the first Hague Peace Conference the movement for international peace has grown rapidly, and the growth of the peace sentiment in this country he attributes largely to the activity of the American School Peace League of which this state contains a well organized branch. As Peace Day this year falls on Sunday the State Superintendent urges schools to hold appropriate exercises on the preceding Friday, which is today. And he also expresses the hope that all churches on Sunday, May 18, will observe the day with appropriate sermons and addresses by the ministers; and urges the newspapers of the state to give due publicity to the event. The Superintendent closes his appeal with the following sentence: "Especially should teachers, principals and superintendents take advantage of this splendid opportunity for directing the minds of the children toward the inspiring ideal of nations striving with one another in the pursuits of peace for the general welfare of all rather than contending in war for one another's destruction."

Experimental Farm Humming

THINGS are moving at the Experiment Farm. The farm is entirely inclosed with a rabbit proof fence and was precisely broken and harrowed and made ready for planting.

The casing, piping and pump were installed yesterday, under the superintendency of W. L. Gumm. The gasoline engine, though not yet arrived, is expected daily.

J. G. Textor has been employed as gardener and has begun the planting of seeds in the section in which dry farming is to be tested. From a quarter to a half an acre will be devoted to various products, principal of which will be: Kaffir, milo maize, cane, broom corn, beans (frijoles), barley, rye, peanuts, dryland alfalfa and sweet corn. A test will also be made on potatoes, cow peas, etc.

Of course, all realize we are badly handicapped this season by a late beginning, but if earnest and close attention will make up for that short-coming we shall have something to show at the end of the season. Next year, with the land in better cultivation and by means of fertilizing much better results will be obtained than can be hoped for from raw land.

Ball Game Sunday

NEXT Sunday the E. P. & S. W. shop team from El Paso will be here to meet our team on the local diamond. The El Paso shop team is one of the best amateur teams in this section and our boys will have to "go some" if they hope to defeat them. Be at the Athletic grounds Sunday; encourage the boys by your presence as well as your voice also. Dr. Lucas, the manager, hopes to have a good team ready to confront the foe on that occasion.

Socialist Lectures

WE are informed that P. G. Zimmerman, a socialist lecturer, will be at the Ancho picnic on the 18th to deliver an address. Also that he will give a street lecture at Capitlan, Monday afternoon, May 19th.

Exchange Bank Increases Capital

BY reference to our columns the past two weeks, it will be noted that the Exchange Bank has increased its capital stock from \$40,000.00 to \$50,000.00. This institution, formerly located at White Oaks, was organized June, 1892, with a capital of \$30,000.00. It was moved to Carrizozo in 1907, and its capital increased to \$40,000.00. Its business has continued to grow until it has now a \$50,000.00 capitalization. This strong, substantial and conservative institution is one of the oldest banks in the southern part of the state, only about two antedating its establishment. All the old officers retain their positions in the bank and the office of assistant cashier was created, with Harry B. Dawson, for a number of years, teller, filling that position. Harry, therefore, continues to do business at the old stand, taking in and handing out the coin as of yore.

Returns received by the Bureau of Navigation of the Department of Commerce indicate that the current fiscal year will show an output of American shipyards greater than any of the past four years, and equal to the average annual output for any series of active years of construction.

Senator Owen has introduced a bill for a legislative reference bureau in connection with the congressional library. Representative Nelson of Wisconsin has been pushing this measure, of which he is the original author, for more than two years, and late in the last congress Senator La Follette came to his assistance by introducing a similar measure. The "legislative reference bureau" has been brought to a high standard in Wisconsin, and as the state capital is the home of both Representative Nelson and Senator La Follette they have had an opportunity to study its great benefits.

Baptist Church

H. HAYWOOD, Pastor
Bible School at 10 a. m.
Subject of the morning sermon at 11: "Some Characteristics of Christianity."

The chorus will meet in practice at 3 p. m.

Young People's Meeting at 6:45, followed by the evening preaching service.

Special music at these services; you are cordially invited.

The Woman's Missionary Union will meet Friday, May 23rd, with Mrs. Haywood.

Midweek service on Wednesday at 7:45 p. m. Devotional and Teachers Training Course.

SPECIAL NOTICE - The Sunday School picnic as announced for this Saturday 17th, will not be participated in on account of so much sickness existing among the young people.

If you want the news and all the news while it is news, take The News.

ORIENTAL RUGS

give an air of luxury to an apartment that nothing else can give, and they permit a variety of arrangements that prevents monotony. We are showing a splendid assortment in rich and artistic designs at \$12 to \$45.

Attest: Albert H. Harvey, Clerk.
First pub. May 9, 1913; last pub. May 30, 1913.

Death Claims Marcial St. John
AT his home in Carrizozo. Monday night, Marcial St. John passed to the Great Beyond. He had suffered from a violent attack of erysipelas, which baffled the skill of the physicians. Deceased leaves a wife and seven children—four sons and three daughters. Two sisters also survive—Mrs. Eusebio Gurule, living here, and Mrs. Clara Chavez, at Dawson. Marcial St. John was born at Las Cruces September 20, 1872, but came with parents, who located at Lincoln during his early childhood, and made Lincoln county his home until the day of his death. The community sympathizes with the bereaved family.

Card of Thanks

Republicans to Reorganize

CHICAGO, May 12.—That a uniting of the Progressive party with the Republican party is not only desired, but is actually being sought, was the gist of sentiment expressed at the close here today of a two days conference at which Republican leaders outlined plans for reorganizing the party.

Herbert S. Hadley, former governor of Missouri, who with Senators Albert Cummins, of Iowa, Wm. F. Borah of Idaho and L. Y. Sherman of Illinois, led in the discussion at the conference, said afterward that the desire to get those back in the party who had left it to join the Progressive party was 'manifest.'

The conference, attended by six United States senators, numerous members of the house of representatives, and from states as distant as Massachusetts and California, resulted in the issue of a statement. The statement urged the calling of a national convention at as early date as possible to effect radical changes in party lines, and especially the conduct of future national conventions.

What was considered a significant part of the statement was that which referred to "uniting" the party.

"Is it to be inferred that the Republicans who met here desire to have adherents of the Progressive party come into the ranks of the Republicans?" Mr. Hadley was asked.

"Manifestly so," he replied. "The coalition is to be brought about not by any mechanical means, but by a frank recognition by the rank and file of both parties that by remaining divided they are defeating all they both favor. All we could accomplish or try to accomplish here was to start the movement for bringing about the changes in conducting the affairs of the party which seem necessary. These changes are to correct the evils which have been a just cause of complaint in the past and are necessary in order that the will of the majority may, control in future party councils.

"The changes we shall seek are for a new basis of representation, a recognition of the result of direct primaries, so that we shall favor that system and a different method of passing upon the credentials of delegates to conventions."

Notice for Publication

DEPARTMENT OF THE INTERIOR
U. S. LAND OFFICE at Roswell, New Mexico.
March 23, 1912.
Notice is hereby given that Paul Bentley, of Carrizozo, N. M., who, on Nov. 3, 1904, made H. E. Serial No. 04215, for 82 1/2 NW 1/4, S4 NE 1/4, sec. 10 and NW 1/4 NW 1/4, Sec. 11, Township 14 S., Range 10 E., N. M. P. Meridian, has filed notice of intention to make five year proof, to establish claim to the land above described, before Albert H. Harvey, County Clerk, in his office, Carrizozo, N. M., on May 21, 1912. Claimant names as witnesses: Alexander W. Adams, Charles W. Hyde, Marvin Barton and Albert T. Roberts all of Carrizozo, N. M.

The Danger of Forest Fires

FOREST fires not only endanger loss of valuable timber, but sometimes loss of life, and to a large degree, at times, endanger the range of stockmen. The forest service uses every precaution to prevent fires and to extinguish them when they get started. It is to the interest of every settler, whether farmer or stockman, to see that every precaution against fires is exercised and to aid the department in keeping them down. With this end in view we take pleasure in presenting some suggestions from a circular issued by the department, which should interest every reader:

In spite of the abundance of snow and rain which fallen very generally throughout the mountains of Arizona and New Mexico during the winter and early spring, a number of fires have already occurred on the National Forests. The largest fire thus far reported is one which recently burned over about 200 acres in the Sundia mountains on the Manzano National Forest. A fire which was discovered on the Alamo Forest at 5 p. m. on April 19, was fought from early that evening until 3:30 p. m. on April 20 before it was finally extinguished. Reports indicate that most of the fires thus far have been caused by carelessness on the part of campers or other users of the Forests. The Alamo fire which was fought at considerable expense and time broke out from a camp fire which was carelessly left burning. The Forest Service has an organization on each National Forest for discovering fires and fighting them when they occur. Lookout towers have been built where needed and connected by telephone lines with rangers' headquarters and towns and camps where fire fighters can be secured at short notice. The organization is more complete this year than ever before and thousands of dollars are being spent to provide for handling serious emergencies if they occur. The most important factor in fire protection, however, is fire prevention and to secure this the cooperation of the public is absolutely necessary. Practically the only fires which cannot be prevented are those which result from lightning. While a great many

of these occur, especially in the high mountains, they can usually be located promptly by the lookouts and extinguished before much harm is done. Immunity from all other classes of fires depends upon an enlightened public opinion and carefulness on the part of every one who visits the mountains, particularly during the dry season.

It is during this dry season particularly that residents of the Forest, fishermen and all others who have occasion to visit the mountains, should keep constantly in mind the following six rules for care with fire:

1. Be sure your match is out before you throw it away.
2. Knock out your pipe ashes or throw your cigar or cigarette stump where there is nothing to catch fire.
3. Do not build a camp fire any larger than is absolutely necessary. Never leave it even for a short time without putting it OUT with water or earth.
4. Do not build a camp fire against a tree or a log. Build a small one where you can scrape away the needles, leaves or grass from all sides of it.
5. Do not build bonfires. The

wind may come up at any time and start a fire you cannot control.

6. If you discover a fire, put it out if possible; if you can't, get word of it to the nearest U. S. Forest Ranger or State Fire Warden just as quickly as you possibly can.
