

Any man may make a mistake, none but a fool will stick to it. Second thoughts are best, as the proverb says.--Cicero.

## Commanding Officer's Quarters

Fort Stanton, New Mex.

## News Notes from Outside Points

### FORT STANTON

Mr. John F. Truesdell, assistant attorney general of the United States, and Mr. P. W. Dent of the reclamation service, transacted government business here last Tuesday and Wednesday, leaving by auto for Carrizozo later.

Miss Cathrine Becker, trained nurse at No. 10, arrived Tuesday morning from El Paso.

A new Merroroid motion Picture Screen was placed in the Ft. Stanton Theater last Monday afternoon by Mr. C. U. Babbs. This is the finest and only one of its kind in the state.

Master Donald and Richard Smileach arrived for a visit at the Post and are having the time of their lives, as junior cowboys.

Mr. C. W. Martin arrived Monday from Denver and will be quartered at No. 4 during his stay at the Post.

The office force was photographed last week by the Heasley Photo Co.

Commanding Officer Dr. F. C. Smith made a hurried business trip to Alamogordo last Wednesday.

Two new members will arrive at the No. 4 Club in a few days.

Special memorial service is announced by Chaplain Frund next Sunday evening for the late Dr. W. W. Markoe who died in the east last Sunday.

The following are the "Movies" at the Post theater this week: "The Answered Prayer," "Celery Industry," "Bronco Billy's way," "Pathos weekly No. 14," "John Bunny in Seeing double," and "Jean the dog and her family."

The Rev. Father Girma visited the Post last Wednesday morning on business matters, returning to Lincoln in the afternoon.

The Chaplain is giving private lessons in the commercial line to a number of the children of the Post. He has a large attendance.

All the latest styles in gents clothing, as well as most moderate prices at Room 23, in Officer's club house, Mr. W. Johnson, a local agent.

Mr. R. G. McCorkle arrived from Denver last week, and is registered at No. 4 Bachelor's quarters for indefinite stay.

Miss Velma White of Capitau

visited with Mr. and Mrs. Leaches at No. 3 last Friday and Saturday.

Mr. H. H. Mann of Bellingham, Washington arrived last Monday to accompany the remains of his son home leaving the Post the following Thursday.

Mr. J. Ware, engineer of the U. S. Forest Reserve, and a resident of Albuquerque visited Ft. Stanton Sunday and Monday last.

The engagement is announced of Miss Laura Thomas of Nashville, Tenn. and Doctor A. Lanza of the Public Health Service at Ft. Stanton, N. M. Dr. Lanza is the son of the late Marquis Lanza Di Brolo of Italy and the Marquis Di Clara Brolo now living in Washington, D. C. He is a grandson of the late Dr. William Hammond. The wedding will take place in December.—Washington Post.

The memorial service held in Library hall last Sunday evening was most impressive. Mrs. F. C. Smith sang "One Sweetly Solemn Thought" while the entire assembly sang various hymns in keeping with the occasion. Chaplain Frund spoke of the deceased, as a man, a Father, and a physician. The hall was crowded with the many friends of the deceased.

Dr. McKeon returned last Monday from his vacation of thirty days spent in New York and Washington. Mrs. McKeon met her husband in El Paso and returned to the Post with him.

The stork visited the home of Mr. and Mrs. John Able last Monday morning leaving a beautiful girl baby. Both mother and child doing splendidly and as to the father,—a more happy man cannot be found.

Dr. Currie will return to the Post in a few days after three months spent at his home in the south.

The Number Four Sextette were present at the memorial services in Library hall last Sunday evening in honor of the late Dr. Markoe, and their presence was highly appreciated. Their singing is becoming more popular each week.

Mr. Sitton, chief engineer at Ft. Stanton received the sad news of the death of an only brother last Saturday in Mississippi.

Next Saturday being November 1st is Holy Day of obligation in the Catholic and Episcopal Church, and therefore special Masses will be celebrated in the Catholic chapel on that day at 6:15 and 8:30 a. m.

The following was the programme in full last Sunday evening for the late Dr. W. W. Markoe:

### PROGRAMME

Hymn No. 454, red book, "Lead Kindly Light,"

"The Apostles Creed,"

Invocation, by Chaplain,

Solo—"One Sweetly Solemn Thought," by Mrs. F. C. Smith.

"Our Father, who art in Heaven, hallowed be thy name; Thy kingdom come; Thy will be done on earth as it is in Heaven. Give us this day our daily bread; and forgive us our trespasses as we forgive those who trespass against us; and lead us not into temptation, but deliver us from evil."

"Dies Irae," by Chaplain, Hymn No. 79, red book, "Abide with Me."

Memorial address, by Chaplain, Hymn No. 315, red book, "Nearer My God to Thee."

"O saving victim, open wide The gate of Heaven to men below,

Our foes press on from every side; Thine aid supply, Thy strength bestow."

"To thy great name be endless praise, Immortal Godhead, One in Three!

Oh, grant us endless length of days In our true native land with Thee."

### Jicarilla

Ed Haskins had the misfortune to cut his foot very seriously with an axe.

Joe Ross and his son Albert returned to Jicarilla the last of the week, and left next day for Mountainair, their home.

E. E. Wilson and family were visiting in Camp Sunday last.

Rev. Perkins of Ancho made a trip to the east-side the end of last week for a supply of late vegetables.

A. H. Hays left for the lower country a few days ago on a business mission.

Bivlan Brookin returned to camp the last of the week from White Oaks, and is contemplating

ing a trip to Arizona very soon. George Tomkins went to White Oaks last week, and had his mail hack repaired and a set of new wheels put on, and is now able and solicitous for the trade up to a thousand pounds, from the station at Ancho.

Mr. Dale and family hiked out for a visit among friends in the lower country.

Mrs. Hays returned from a visit to her parents near Richardson, and will be boss of the situation while Mr. Hays carries in the lower country.

A cold wave arrived Sunday, and is still hanging in threatening attitude over the Jicks.

Claud Braum was riding among the hills Monday looking after his stock on this side of the divide.

The placer workers, including two more who recently arrived, are on a trade to lease the water from the well of T. W. Stone-road. When this is concluded they will have an abundance of water for their machines, and conveniently near the gravel.

An auto passed through this camp a few days ago. It is not a rare sight to see a car nowadays. But to have the courage to venture the rugged descent of Juggler, and pass on out through the rough route in the canyon is worthy of remark, since this is the first auto to attempt the trip through this way. We learn that Mr. French was the courageous driver, accompanied by ladies from Carrizozo.

E. E. Wilson and Maurice Brookin have been delivering cane and kaffir heads to the different buyers in Jicarilla.

All praise to the White Oaks boys who displayed a courage of their convictions in striking for better conditions. If it is contemptible to uphold their rights, what is it to degrade the very name of an independent American laborer by forcing him to fawn beneath the man "higher up?" Is it not more ennobling to assert your rights that to sink to the level of a serf? To meet and combat with the extreme danger of working in the great depths, to submit to long hours and short pay, a miner should have some redress at improving conditions.

There are very many who, both here and at White Oaks, who resent the correspondent's phase of "contemptible" being applied to the cause of the striking miners. As a rule the young American is easily led but is sustained with pride enough not to be driven.

## Forest Road Funds

**T**HE expenditure of forest reserve funds on roads is quite generally misunderstood and few understand the manner in which the government is handling the matter. In view of this misunderstanding on this important matter and in order that the government's object may be placed before our readers in the proper light, we present herewith a bulletin prepared by our district forester at Albuquerque, which deals with the subject in a very intelligent manner, and is of great interest to many of our readers because of the National forests within Lincoln county, from which funds for local road work are derived. The bulletin reads:

District Forester Arthur C. Ringland has issued a statement in regard to the Forest Service's road building policy designed to correct certain impressions of the scope and character of that work which he says have arisen.

"Published statements of the amount of money available for roads and trails on National Forests," said Mr. Ringland, "have stimulated public interest in this subject, particularly in communities on or near the Forests. The natural effect on the reader of a statement that we have money to put into roads is for him at once to think of some road near his home that needs repair and to wonder if he and his friends can't get some of the Forest road fund for the purposes. That's only natural.

But we have to expend this money under certain restriction and it is obvious too, that the amount we have is not enough to do all the road work needed in the district at once. We've got to put the money we have where the law prescribes and where it will do the most good. I want to outline the policy we use and the limitations that affect us in doing this work, for the benefit of anyone who is not entirely clear on the subject.

The amounts earned during the past fiscal year for expenditure under the road and trail item are \$26,000 for Arizona and \$12,000 for New Mexico. The fund is cumulative, that is, if the entire amount earned during any given year is not spent during the year it goes over as available until used.

The law specifically states that the funds shall be used for the construction and repair of roads in the Forests within the state from which the fund is derived. In allotting funds the Forests within the state have been considered as a unit, and certain districts within this unit have been considered as more important and needing more funds than others. Since good road construction needs ample funds it would not be practicable to distribute small sums to every Forest or every ranger district and derive permanent results. The fund is assured yearly, through increasing receipts, and it is therefore planned to repair and construct first the more important roads and in time reach roads in every Forest.

The roads worked on last year were those that seemed to us the most important projects. It has been found that road work or repair amounts to about \$300 per mile. Once a road is started it must be put in shape to avoid heavy repairs in the future. So that most all of last year's projects will need additional funds this year to complete them or to put the road in shape to prevent future damage.

In New Mexico work has been started on the Red River road on the Carson Forest, the Espanola-Cuba project on the Jemez, the Pecos River Road on the Pecos, the Tijeras Canyon road on the Manzano, the Alma-Reserve road on the Datil and the Perk Canyon road on the Alma National Forest.

From this outline of the conditions we are working under and the necessity of doing one thing at a time, with the limited funds at our disposal, but doing it well, it will readily be appreciated that there must of necessity be many roads that should receive attention which we must leave untouched for the present. We are using our best discretion to undertake what seem the most important projects first with the idea of best serving the interests of the people of each state as a whole by making our road work as thorough and as permanent as possible."

### Kick of Horie Fatal.

**W**E were in error last week in giving the nature of the injury that caused the death of Mr. J. E. Snell of Alamogordo. Death resulted from the kick of a horse, as is shown by the following from the Alamogordo News-Advertiser:

Wednesday morning while J. E. Snell was engaged in taking care of his stock at his home in the south part of town, a colt kicked him from the effects of which he died Thursday morning at 4 o'clock. Mr. Snell has been

engaged as one of the workmen in remodeling the Oliver building, and his failure to appear on the job Wednesday morning led to inquiries which developed the above facts. Dr. Holmes was called during the day and later Dr. Gilbert was called in consultation. Internal injuries resulted in quick complications and the patient was unable to rally. Mr. Snell was a highly respected citizen, a man through and through. He was a member of the Masonic orders, which he loved and in which he was very active. He leaves a widow and three children.

**LOCAL & PERSONAL**

T. Nye, the abstractor, was from Lincoln Saturday.

S. G. Burnett, principal of the 6th school, was here Saturday.

W. J. Doering went to Vaughn to install some lighting stems.

Mrs. Frank Gurney and little Frank came up last evening from El Paso.

Dr. R. E. Blaney has returned from a hunting trip of a week—unsuccessful.

**GOOD PASTURE**—plenty of water, reasonable terms. Apply 43, 9-26-4t

cattle the past week to Kansas City. The shipment consisted entirely of Herefords.

Dr. G. Ranniger spent a couple days here this week from Osage, on professional business.

Mrs. John J. McCourt is here this week from El Paso, visiting her father and other relatives.

Ancho is loading out several tons of sheep today—some for the market, others for the feed pen.

A. S. McCamant, a leading citizen and stockman of Corona, made a shipment of a trainload of W. H. Cavanaugh, returning Saturday from El Paso to his home at Eichel, stopped over a day here.

Dr. H. E. Pine has purchased a car, and his duties as inspector will keep the car about as busy as the next.

The threatening aspect of the weather this morning portends a low. A little dampness would be amiss.

R. L. Howell returned Tuesday from Roswell, where he had the previous week on a business mission.

Joe N. White is getting material on the ground for the erection of a dwelling for himself. The walls will be adobe.

The editor had his dwelling moved into town from the ranch this week, and hopes soon to be warmed by his own fireside.

**For Sale**—A few Jersey milk cows; some now giving milk; others will be fresh soon.

J. W. LAWS, 24-30 Lincoln, New Mexico

Finis Atkinson was down yesterday from Corona. He had just made a delivery of his lambs and is going to south Texas for the winter.

Mrs. McDonald is home on a visit from Santa Fe. She will be here in a few days and they will return to the capital.

County Clerk Harvey, Discher Osborne and Dr. Lucas spent this morning for the Ruidoso contingent on getting a deer—or two, maybe three.

"Uncle Tom's Cabin" put on a show here Saturday night, and many came from the surrounding country to witness the performance.

New Models in Misses and children's fall and winter coats arrived, and await your inspection. Ziegler Bros.

Governor McDonald came in Wednesday morning on No. 1 and left a few hours later on the stage for Roswell, where he will look after a shipment of cattle.

Fred Getty returned this week from California, to which point he went some weeks ago to rest an injured leg. He is now entirely recovered and is ready for duty on his local run.

Lloyd Weber was down Wednesday from Parsons. He was apparently taking up quarters in his home.

Mr. and Mrs. G. B. Greer are town today from their San Antonio ranch. Mr. Greer has just delivered his fall clip of mohair on the railroad at Osage, and it will be shipped to the Eastern market.

**FOR SALE**—A 600-acre tract of land, Apply to Mrs. R. L. Howell, Temple, Texas.

All indications are that the weather will wind up a game before this day is past.

John E. Bell has received word from Mrs. Bell, who has been in a hospital at Evansville, Indiana, that she is rapidly recovering from an operation which she underwent recently, and that she hopes to return home soon.

The new Methodist minister, assigned by conference to this station, is expected to arrive soon. Rev. J. W. Campbell, retiring pastor, was transferred to the Arkansas conference and has gone to take charge of his work.

Ben Lujan returned yesterday from Dawson, to which point he went upon learning that his brother was in the mine wrecked by the explosion. His worst fears were realized and his brother's body, when finally recovered, was brought to the surface almost unrecognizable—the head had been torn from the body by the force of the explosion.

The disaster at Dawson has seriously crippled business on the local road. Coal shipments almost ceased for a time and they are yet far from normal. Shipments continue, however, from the other company mines in that camp and it is thought the usual fuel tonnage—which at this season is heavy—will soon be passing over the road.

A. E. Williams has moved his tools, fixtures, etc., from his former place of business on El Paso avenue to his new location at the head of the same avenue, at the junction with Main street. He is having his building repaired and is ready to receive all work in his line—shoe repairing, clothes cleaning and pressing.

**They Make You Feel Good**

The pleasant purgative effect produced by Chamberlain's Tablets and the healthy condition of body and mind which they create make one feel joyful. All dealers.

**New Placer Machine**

W. F. McDowell, Oklahoma City, is in today from Jicarilla, where he is interested in some placer work in that camp. He is with the Kellogg Gold Separator Co., and is making tests of placer grounds. The tests are being made by small machines each of which has a daily capacity of 20 tons and require two men to operate.

**A Marvelous Escape**

"My little boy had a marvelous escape," writes P. E. Bastians of Prince Albert, Cape of Good Hope. "It occurred in the middle of the night. He got a very severe attack of croup. As luck would have it, I had a bottle of Chamberlain's Cough Remedy in the house. After following the directions for an hour and twenty minutes he was through all danger." Sold by all dealers.

**Get the Number**

G. T. McQuillen, manager of the local phone company, has been twitted about the manner his company adopted to hide the identity of its local patrons. According to instructions, a patron, calling central, should give the number desired, but patrons don't like to do that as the Carrizozo numbers are sandwiched in a directory that requires a microscope to locate them. Hence the difficulty when the company stands on its own instructions.

**Chronic Dyspepsia**

The following unsolicited testimonial should certainly be sufficient to give hope and courage to persons afflicted with chronic dyspepsia: "I have been a chronic dyspeptic for years, and of all the medicine I have taken, Chamberlain's Tablets have done me more good than anything else," says W. G. Mattison, No. 7 Sherman St., Hornellsville, N. Y. For sale by all dealers.

# Hart-Schaffner & Marx Clothes

## Overcoats and Suits for Men and Young Men

Come in and see the many new styles and patterns for fall 1913. Our line embraces only the best numbers of the H. S. & M. line. The style we illustrate here is but one of the many models we have on display for your approval. HART-SCHAFFNER & MARX CLOTHES are the best clothes you can buy—the prices are right too.

Our Showing at \$18<sup>00</sup> to \$27<sup>50</sup> will surprise you

Erving System Clothes At from \$12 to \$18

## Florsheim Shoes for Men

Tans are very popular—our stock includes many new lasts, including the Duke, Stride and Picadilly—strictly English Flats.

Our Flannel Shirts are all made in coat style. Something that makes them better than the ordinary kind at from

\$1.25 to \$3.50

Be Sure and Investigate Hart-Schaffner & Marx Clothes

**PASTURE**—Good grass, plenty of water, splendid shelter. Persons wish to pasture stock. Address: Elbert T. Collier, Hurlburt, N. N.

**Avoid Sedative Cough Medicines**

If you want to contribute directly to the occurrence of capillary bronchitis and pneumonia, use cough medicines that contain codeine, morphine, heroin and other sedatives when you have a cough or cold. An expectorant like Chamberlain's Cough Remedy is what is needed. It cleans out the culture beds or breeding places for the germs of pneumonia and other germ diseases. That is why pneumonia never results from a cold when Chamberlain's Cough Remedy is used. It has a world wide reputation for its cures. It contains no morphine or other sedative. For sale by all dealers.

**Notice for Publication**

DEPARTMENT OF THE INTERIOR U. S. LAND OFFICE at ROSWELL, NEW MEXICO, October 11, 1913.

Notice is hereby given that the State of New Mexico, by virtue of the Act of Congress, approved June 25, 1910, has filed in this office selection lists covering the following lands: Serial 029615, List No. 113, Inmane, Arizuna, 1/2 Sec. 34, T. 7S., R. 10E., containing 40 acres.

Protests against any or all of such selections may be filed in this office during the period of publication hereof, or any time thereafter, and before final approval and certification.

T. C. TILLOTSON, Register.

**Notice for Publication**

DEPARTMENT OF THE INTERIOR U. S. LAND OFFICE at ROSWELL, NEW MEXICO, Oct. 16, 1913.

Notice is hereby given that Albert J. Fisher, of Corona, N. M., who, on December 12, 1907, made H. E. No. 1278 Serial No. 01850 for SW 1/4, SW 1/4, SE 1/4, Sec. 22, and NE 1/4, NW 1/4, SW 1/4, Section 27, Twp. 14, Range 10E., N. M. P. M., has filed notice of intention to make Five Year Proof, to establish claim to the lands above described, before Benjamin F. Adams, U. S. Commissioner, in his office at Corona, N. M., on Nov. 12, 1913.

Claimant names as witnesses: John T. Kimmons, John F. Dabbert, George W. Grove, Tom M. Dyre, all of Corona, N. M.

T. C. TILLOTSON, Register.

## President Wilson Announces Policy

**I**n a speech at Mobile, Alabama, Monday, President Wilson made declarations as to the policy of the United States to which Secretary Daniels refers to as "epochal." Continuing the secretary said: "It will live in history as the 'Mobile declaration.' It was a logical and necessary addition to the Monroe doctrine." Many comments, all most favorable, came from every side, without reference to party ties and the general conclusion is along the lines outlined by Secretary Daniels. We quote that portion of the speech which relates to Latin-America, defining our position on matters so prominent at this time:

"I came not to speak for the south, because the south has the gift of speaking for herself. I came here because I would speak of our present and prospective relations with our neighbors to the south. The future is going to be very different for this hemisphere from the past. Those states lying to the south which have always been our neighbors will be drawn closer to each other by common ties of understanding; interests do not tie nations together; it sometimes separates them. But sympathy and understanding do bind them together.

"You hear of concessions to foreign capital in Latin-America but you don't hear of concessions to foreign capital in the United States. They are not granted concessions. They are invited to make investments. It is an invitation, not a privilege. And states that are obliged to grant concessions are in the condition that foreign interests are apt to dominate their domestic affairs. Such a condition of affairs is likely to become intolerable. And it is emancipation from this inevitable subordination which we deem it our duty to assist in.

"Their self-respect, their achievements in spite of these differences deserve nothing but the admiration and applause of the world.

"I rejoice in nothing so much that they will be emancipated and we ought to be the first in taking part in assisting in that emancipation.

"In the future," he continued, "the nations to the south of us will draw closer and closer to us because of those circumstances of which I am speaking. We must prove ourselves their friends and champions on terms of equality and honor. We can't be fast friends on any other terms than those of equality. And we must show ourselves friends by comprehending their interests whether they square with our interests or not. It is a very perilous thing to determine a foreign policy in terms of material interests. It is indeed a degrading thing.

"The development of constitutional liberty and world human rights, the maintenance of national integrity as against material interests that is our creed. I want to take occasion to say, too, that the United States will not seek again to secure one additional foot of territory by conquest. She will devote herself to showing an honest and fruitful use of the territory she has and she must regard it as one of the duties of friendship to see that from no quarter are material interests made superior to human liberty and national comity.

"I say this merely to fix what our real relationship should be. It is a relationship of a family of mankind devoted to the relations from which human liberty springs. We have seen material interests threaten constitutional liberty in America, so we know how to sympathize. I would rather belong to a poor nation that is free than a rich nation which has ceased to love freedom. Morality and not expediency is the thing that must guide us and we must never condone iniquity."

### Alamogordo Attorney Jailed

**H. H. MAJOR**, a prominent citizen and attorney of Alamogordo, was arrested this week and placed in jail. The arrest grew out of the death of Major's wife and daughter which occurred under suspicious circumstances. Following the mother's death, and the collection of an insurance policy, the daughter died, whose life was also insured. The insurance company refused to pay the policy on the daughter, and the matter has been dragging for months. Finally the daughter's remains were disinterred, a chemical analysis made, in which it is said arsenic was found, and Major's arrest followed. Major was probate clerk of Otero county for two terms several years ago, is a prominent Mason and has been engaged in the practice of law.

### The Dawson Disaster

**M**ORE than a week ago an explosion in No. 2 Coal mine at Dawson entombed 284 men, killing all but 23, to which death list is to be added 2 of the rescuing party, and yet, at this time, all the bodies have not been re-

covered, or had not been up to yesterday. The force of the explosion was such that every crevice and room in which the men were at work have been filled with rock, dirt and thousands of tons of debris. No definite announcement has been made as to the cause of the explosion; indeed it may never be known, as only a few of the entombed men were recovered alive, and that, itself indicates they must have been far removed from the initial cause, else they would not have survived the awful affair.

### Millions of Mohammedans

**O**NLY thirteen centuries have passed since the death of Mohammed and today there are 225,000,000 Mohammedans, one-seventh of the population of the globe. There are 50,000,000 in Africa, 62,000,000 in India, 30,000,000 in China, 29,000,000 in the Malay Archipelago, and 250,000 in the Philippines, not to speak of the lands that are almost wholly Mohammedan in Western Asia. A recent writer said: "What fires of faith and devotion must have

burned in the hearts of the early champions of Islam, to make them gird on the sword and fight and die for the new religion. It swept across Syria and all North Africa like the desert simoon—swift, fierce, impetuous, irresistible, destructive—only to be curbed and cooled by the waves of the Atlantic."

### Eagle Mining Company

**T**HE litigation that has tied up the Eagle Mining Co. for a number of years, resulting in the appointment of a receiver, is in a fair way to be closed up. In fact the receiver, James M. Simms, has applied for discharge, has filed his report with the court and everything will be adjusted the coming month. The property involved is the celebrated Parsons mine at Parsons, about 15 miles east of Carrizozo. It is a low grade gold proposition, but vast in extent, and our locality is delighted with the prospect of an early settlement of the company's difficulties, which means the resumption of work on a large scale, the development of the property and the employment of a large force of men.

### Sunday School Convention

**A**NNOUNCEMENT has just been received of the date of holding the second Annual Convention of the Lincoln County Sunday School Association at Carrizozo on Saturday and Sunday, November 22nd, and 23rd. Rev. W. C. Merritt, Field Secretary for New Mexico, will have part in the program.

All Sunday Schools in the County are urged to arrange for representation in the Convention and to send a list of officers and teachers at once to Mr. A. F. Roselle, County Secretary, Carrizozo.

"Eternal punishment" may be the price of being too poor to buy a divorce. Important to Mothers Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children...

Nothing To It. "I believe in calling a spade a spade." "Guess you might as well. I've never been able to pass one off for a diamond or a heart."

Caution. It was the last day of his vacation. He had just finished carving her name in the smooth bark of the birch tree. "Dear," he said, "will you promise to wait for me till I come again next summer?"

Had His Goat. Evidently. A Springfield man, replying to his wife's petition for divorce, says: "Defendant states that the plaintiff is much better qualified than the defendant to carry her part in nagging contests; that she commands a better and more extensive vocabulary than the defendant, and simply overwhelmed him with her complaints and reproaches, and she was so master of her feelings that she could readily pass from storm to sunshine, from abuse to tears, from harsh language to tenderness, and from nagging plaintiff to contented wife upon the appearance of a third person so readily become all smiles and amiable that her sudden and complete changes of moods completely bewildered defendant."

HAPPY OLD AGE Most Likely to Follow Proper Eating.

An old age advances we require less food to replace waste, and food that will not overtax the digestive organs, while supplying true nourishment. Such an ideal food is found in Grape-Nuts, made of whole wheat and barley by long baking and action of diastase in the barley which changes the starch into a most digestible sugar.

"I have used Grape-Nuts," writes an Iowa man, "for 8 years and feel as good and am stronger than I was ten years ago." "Among my customers I meet a man every day who is well along in years and attributes his good health to Grape-Nuts and Postum which he has used for the last 5 years. He mixes Grape-Nuts with Postum and says they go fine together."

INDUSTRY MECHANICS

LARGE SUPPLY OF PULPWOOD

Important Question Has Aroused Considerable Interest In United States In Recent Years.

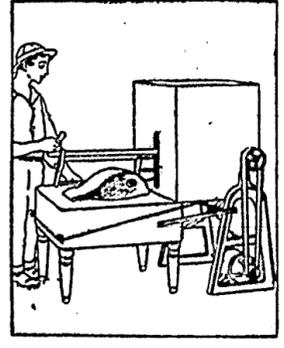

The scarcity of pulpwood appears to have been greatly exaggerated. The problem may be solved, according to good authorities, without the discovery of substitute material by the preservation of forests in wood producing states.

It has been shown that to supply a mill having an output of 300 tons of newspaper a week 2,500 acres planted with spruce and hardwoods would be sufficient to give the wood pulp necessary for one year.

HANDY MEAT SAWING MACHINE

Shoulder of Beef Can Be Separated Like a Piece of Wood—Worked by Clumsiest Butcher Boy.

There is an art in cutting meat and it isn't easy work to do well, but the clumsy butcher's boy can cut a shoulder of beef as neatly and accurately as his employer if he have the

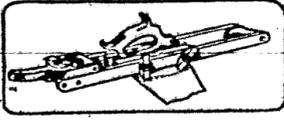

Meat Sawing Machine.

sawing machine invented by a California man. The meat block is attached to the machine and a reciprocating saw operates over it. The meat is laid on the block beneath the saw and the butcher turns a crank at the side with one hand, while with the other hand he guides the saw. The crank sets in operation the driving gear that moves the saw and, being multiple gear, it requires very little effort to turn the handle.

DOUBLE HANDLE FOR A SAW

Excellent Method of Providing Substitute for Buckaws Where Much Work is to Be Done.

The ordinary crosscut and rip hand-saws can be used as buckaws where a large amount of work is to be done, or for sawing timbers and posts, by attaching a double handle, writes A. B. Thomas of Gardon, Calif., in the Popular Mechanic. This consists of two crosspieces clamped to the saw handle and having a hand hold at each end. The handle on the front or

Double Handle as it is Applied to the Handle of an Ordinary Hand-saw.

cutting edge of the saw is made to turn so that a straight or spade handle can be used as desired.

Big International Trade.

It gives an impressive idea of the immensity of the international trade carried on in vessels to read that 65,000,000 tons of coal are consumed in a year in the furnaces of ships employed in international commerce.

Chairs With Pointed Seats.

Chairs with pointed instead of square seats have been designed for use with round dining tables, as they take up less room when placed under a table when unoccupied.

Substitute for Gasoline.

A new fuel for internal combustion that is said to act in all respects like gasoline but to be much cheaper is being made in England from gasoline, kerosene and benzol.

Handling Ore in Alaska.

The problem of handling ore at a temperature as low as 50 below zero has been solved in Alaska by building ore cars with steam pipes in their bottoms.

GOOD FOR STRETCHING SHOE

Not Always Convenient to Go to Shoemaker When Bothered by Irritated Corn or Pinched Foot.

(By JOHN K. BRACHVOGEL in the Scientific American.)

Nearly every person, at some time or other, has wished he could stretch a shoe which at a particular point pinched the foot or irritated a corn. It is not necessary to go to a shoemaker to have the leather stretched. It can easily be done at home by means of a shoe tree of suitable form upon which an enlargement is formed at the necessary point. The enlargement must adhere firmly to the tree and must be of such a nature that it can be molded, and that it will not become detached from the tree when the latter is forced into the shoe. A matrix answering all these requirements is ordinary candle wax. Sealing wax might be used, but the candle wax is preferable as it will not injure the tree, and as it is easier to manipulate. The enlargement is formed by stripping a suitable quan-

An Improvised Shoe Stretcher.

tity of the melted wax upon the tree at the desired point, and molding the resulting excretion into proper shape while the wax is plastic. It adheres to the tree with remarkable and unexpected tenacity, and owing to its waxy nature tends to slip easily into the shoe with the tree. The shoe can be slightly moistened at the troublesome part, to facilitate the stretching action.

INCREASED VALUE OF LUMBER

Georgia Farmer Recently Received \$7,000 for Rails Used for Fencing in His Property.

There is no one nowadays who indulges in the luxury of building, or who attempts an investment in the building line, who does not realize that timber is scarce in this country and that lumber is high in price and not always of the best quality. The science of forestry has a great field before it, and it is to be hoped that the present generation will respond enthusiastically and intelligently to its own profit and the profit of those who are to come afterward. The rails which a member of the Illinois convention exhibited and declared were split for him by Abraham Lincoln would be priceless now, but at the time of the incident they were not in it with the present value of cedar rails from fences in Georgia. The demand for lumber is such that Georgia farmers are selling the cedar rails with which their farms were fenced a comparatively few years ago. The Lexington (Ga.) Progress states that one farmer in Rutherford county recently received \$7,000 for the cedar rails on his farm, and there are said to be other farmers having as many to sell.

NOTES OF INDUSTRY AND MECHANICS

Utah made a record last year by mining more than 3,000,000 tons of coal for the first time.

A process for using peat powder as locomotive fuel has been perfected by a Swedish engineer.

Eight million mouth harmonicas are made by the large Wurltemberg factory and its 25 branches.

South Dakota broke all previous records for the production of gold silver and lead last year.

Rohmed mineral oil valued at \$12,644,668 was shipped from this country to South America in 1912.

China imports great quantities of old horseshoes, chiefly from Belgium to be made into knife blades.

An English railway is experimenting with fuel briquettes made from waste coal with a tar binder.

Sheet aluminum is better than vit or brass or copper for sheathing live jaws when soft metals are handled.

Two parts of ammonia to one of turpentine will soften old paint or varnish and make its removal easy.

Spare automobile tire inner tubes will be safeguarded against hardening if immersed in hot water every month or six weeks.

A new method for aluminum is made in the form of tubes which contain a flux, which melts with the solder as a tube is heated.

By using the oxyacetylene torch in building wrecking concrete is melted and made to run like butter under the heat of the sun.

Austrian laws, which are rigidly enforced, require dwellings and business houses to be built of solid material from interior to exterior.

JAM AT ITS VERY BEST

RULES FOR MAKING MOST DELICATE OF PRESERVES.

Essential Points That Are Important to Remember—Absolute Cleanliness of All Things; the First Element of the Work.

Most of the hints and instructions given to the maker of jam have for their object the preparation of preserves that will keep for an almost indefinite length of time, but with this aim in view delicacy of flavor and color is to a certain extent sacrificed. These instructions are for jam that is not intended to be kept as long as jams are usually kept.

The fruit must be sound, dry and not over-ripe. For absolute safety a heavy enamelled pan and wooden spoon are best used when making, avoiding all danger of the flavor or color of the fruit being affected by the action of fruit acids on metals. In no case must an iron pan and metal spoon be used.

The points to be remembered are: Quick boiling all the time, with only enough stirring to prevent burning and to allow the scum to rise freely. Careful skimming, though with clean, sound fruit and sugar which is dry, absolutely clean, and of pure quality the scum will be small in quantity. Sprinkle the fruit with a little dry warm sugar to remain over night.

Next day put it into the preserving pan, bring to a boil, and boil ten minutes, then add the remaining bulk of the sugar, dried in the oven, and let it come to the boiling point again. Boil quickly for 15 minutes longer, then put two or three drops of the juice in a saucer standing in cold water so as to test as quickly as possible, as every unnecessary minute of boiling takes from the delicacy of the preserves. As soon as jellying is proved in the drops cooled in the saucer, remove from the fire and pour into the hot jars. Tie down at once with this paper dipped upper side in milk, or rubbed over with white of eggs. Press the cover well round the edges of each jar so that it will stick and become airtight, and when cool and dry write the name and date on, adding that the contents are not intended for long keeping. By thus covering down while the space above the jam is filled with steam, the entrance of air is prevented, and the keeping power of the jam increased. Pour a little brandy over the jam to keep longer.

Delicious raspberry preserves of fine color are made as follows: Sprinkle the fruit with a little dry, warm sugar, directly you obtain it, and when ready to make the jam put it into a pan and let it get quite hot. Have ready the sugar, hot and dry in the oven, allowing one-half pound to each pound of raspberries. Add to the fruit, let dissolve, heat to boiling point, then remove and treat as directed.

The storage place for these jams is an important as other details. They will keep for many weeks in a cool, dry place, free from dust.

Good Pot-Holder.

For a pot-holder that really saves the hands, and is not big enough to get into things, make a little cover of ticking, like a pillow-top, about six inches square, with a tape at each side of the opening. Slip into this cover old newspapers, cut to fit the cover, putting in as many as will conveniently go and yet allow the holder to bend easily in the hands. Add a loop to one corner to hang it near the stove.

Danish Pudding.

Wash thoroughly one cup of pearl tapioca, cover with three pints of cold water and soak over night. Turn into a double boiler, add one-half cup of sugar and one-half teaspoon of salt and cook until very tender, then add a tumbler of any kind of tart jelly, stir and cook until well blended and turn into a wet mold. Serve cold with sweetened cream, either plain or whipped.

Starching Colored Clothes.

If a glossy starch is added to the ordinary lump starch used for dark prints, the pieces can easily be ironed on the right side without making any visible change in the appearance of the material, which is noticeable when ironing dark red, blue and black pieces especially.

How to Kill Moth Eggs.

Having discovered a good way to get rid of moths in carpets and woolen material, I contribute it to this page. Wet a towel and lay over the article; then iron the spots with a hot iron and the steam will kill the eggs.—New York Press.

Pretty Idea.

Have a flower like those used for the decoration of the table floating in each of the finger bowls. A bit of old-fashioned herbage, which sometimes takes the place of the time-honored rose geranium leaf, is a sprig of lemon verbena.

To Make Light Biscuits.

If you put your biscuits in the ice box for a few hours before baking them, they will be much lighter than if baked at once.

When making pastry always use

a knife instead of a spoon and touch it with the hands as little as possible. I find this very much better, as it makes it extremely light.

His Species. "I'll bet that crooked looking fellow is a bird." "I know it. He's a stool pigeon."

THE BEST TREATMENT FOR ITCHING SCALPS, DANDRUFF AND FALLING HAIR

To allay itching and irritation of the scalp, prevent dry, thin and falling hair, remove crusts, scales and dandruff, and promote the growth and beauty of the hair, the following special treatment is most effective, agreeable and economical. On retiring, comb the hair out straight all around, then begin at the sides and make a parting, gently rubbing Cuticura Ointment into the parting with a bit of soft flannel held over the end of the finger. Anoint additional partings about half an inch apart until the whole scalp has been treated, the purpose being to get the Cuticura Ointment on the scalp skin rather than on the hair. It is well to place a light covering over the hair to protect the pillow from possible stain. The next morning, shampoo with Cuticura Soap and hot water. Shampoos alone may be used as often as agreeable, but once or twice a month is generally sufficient for this special treatment for women's hair.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston."—Adv.

Few men are prominent enough to claim that they were misquoted.

Red Cross Bag Blue makes the laundress happy, makes clothes whiter than snow. All good grocers. Adv.

The fit pleasures of youth become misfits in after years.

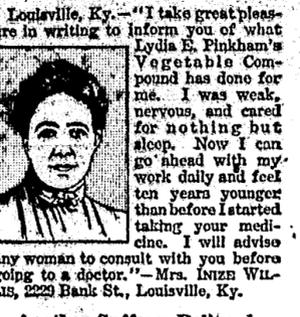

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. See a bottle at all good grocers.

Knocking, as a profession, is badly overcrowded.

**Little Change in Mexico**

**A**SIDE from the election in Mexico last Sunday, which was a howling farce, as had been freely predicted, and also the fact that General Felix Diaz, who was a candidate against Huerta for the presidency, fearing assassination, and taking refuge on an American man of war, little has occurred in the Mexican republic the past week that indicates a very decided change in the situation. As was to be expected, Huerta was elected president, notwithstanding the inhibition of the Mexican constitution and the demand of the United States that he must not be a candidate. Less than ten per cent of the legal vote exercised its right of franchise, and as that was confined almost exclusively to the federal army the result was not surprising.

It is freely predicted by many that the United States will be compelled to intervene before peace is restored and that the restlessness of European governments will tend to hurry intervention. Notwithstanding the feeling that intervention is inevitable, dispatches from Washington are to the effect that the administration will make one more effort to bring order out of chaos. The following paragraphs from Washington dispatches indicate the position of the administration:

Officials were reticent as to what it contemplated. As the United States has asked not only the European governments, but those of Latin America and the Orient to withhold the formulation of their policy toward Mexico until the Washington government can make known its plans for dealing with the situation, the solution upon which the president and Secretary Bryan are working is believed to be more comprehensive than any suggestions heretofore made for the pacification of the southern republic.

High officials of the government, while declining to say what steps would be taken by the United States, declared that the purposes and aims of the government had been explained in the president's speeches at Swarthmore and Mobile. The American government's course of action will be embodied in a formal note which it is expected will set forth the principle that constitutional government must be established out of the chaos in Mexico and will suggest means for accomplishing that purpose.

Although the state department has not been informed officially of the reported purpose of General Huerta to declare General Blanco as having been elected, it is certain that in line with previous declarations, the election of last Sunday will not be recognized as constitutional.

The inability of the Huerta government to conduct a constitutional election, it is thought, will lead the American government to suggest a method of holding the elections in which safeguards and guarantees can be given which will permit the constitutionalists to participate freely. Many diplomats here believe that before suggestions concerning any election can be carried out, the elimination of Huerta from the situation must be accomplished.

It is thought that the president will repeat the suggestions he outlined recently to John Lind upon which a satisfactory settlement of the trouble in Mexico seemed to be conditioned, but will add the stipulation that someone acceptable to all factions be placed in provisional authority to conduct a fair and free election. Details of an election plan, it is thought, will accompany such suggestions.

With the united support of foreign governments it is thought by some officials here that the removal of Huerta could be accomplished, although others who know of Huerta's personality de-

clare he will not yield to any foreign pressure, and will retire only if the constitutionalists are successful. Several alternatives such as moral support for the constitutionalist cause, or lifting the embargo on arms, have been suggested as ways to influence Huerta to retire.

**Carrizozo-Corona Basket Ball**

**T**HE Carrizozo basket ball team and the heralds that accompanied it have been very reticent in discussing the game played at Corona last Friday. It seems from the meager information obtainable, that some disagreement or misunderstanding arose about the middle of the game, when both teams had scored an equal number of points, and the game broke up in confusion. Later the differences were adjusted, but night approaching the game was called off. We hope these teams will again have an opportunity to test their skill and that nothing will intervene to mar the sport.

**Mass Meeting.**

**A**T a meeting of the Commercial Club Wednesday night of this week it was decided to call a public meeting for Wednesday night, next week. Several important matters are to be considered, among which are the incorporation of the experiment farm, incorporation of a county fair and village incorporation. All subscribers to the experiment farm fund who desire stock for their subscriptions are especially requested to be present.

**The News' Weekly Lay Sermon**

**I** shall often go wrong through defect of judgment. When right, I shall often be thought wrong by those whose positions will not command a view of the whole ground. I ask your indulgence for my own errors, which will never be intentional, and your support against the errors of others, who may condemn what they would not if seen in all its parts. The approbation implied by your suffrage is a great consolation to me for the past, and my future solicitude will be to retain the good opinion of those who have bestowed it in advance, to conciliate that of others by doing them all the good in my power, and to be instrumental to the happiness and freedom of all.

Jefferson's First Inaugural Address.

**To Feed Lambs**

**J**. B. French has been busy the past thirty days, visiting different sections of the surrounding county, purchasing lambs. He has been accompanied on a part of his trips by Charles Spence, who is associated with him in the purchase. They have bought between 16,000 and 17,000 head, and the entire lot will be shipped to the feeding pens and put on the market at favorable times. Feed is very high, on account of the crop shortage, but fat stuff will be correspondingly high; so the feeder stands to even up on that score.

**Masquerade Ball**

**T**ONIGHT at the railroad club house the big masquerade ball will occur. At 8:30 the dancing will begin and it should be distinctly understood that all attendants are expected to masquerade. Music by the orchestra.

**Married**

**N**arciso Portillo and Mariana Montoya, both of Carrizozo, were united in marriage by Justice of the Peace Massee, at his office, last Saturday evening.

A. F. & A. M.

Chartered Nov. 1908. Meets every Monday evening at 8 o'clock in the hall of the Commercial Club.

**GROOM'S MEAT MARKET**  
AN ORIENTAL

**Beef Was Never so High**

Grades, or no fine, if it was too good for our stock. The choicest that ever fed upon pasture, and, or drank from a clear running brook, is what we look for and get. The cow that was in such good condition that it jumped over the moon, would have been the most for us if we could have possessed it. When you want prime, juicy meats call upon us and you will get the finest in the land.
