

Patronize Your Local Schools

SINCE the establishment of the Lincoln County High School at Capitan I have written a time or two on patronizing home schools. I have assumed in these letters that we have a standard school which is a fact. We offer a standard four-year high school course which admits the students, or graduates to the higher institutions or colleges. It was doubtless the purpose of the high school act to enable each county to educate its young people to the extent of a high school education when, of course, if they so desired, they can go to a college or university. This will enable many a young person who might otherwise be lost to usefulness, to secure an education which will enable them to fulfill their place in society in a creditable manner, or they so desire to go to the higher institutions of learning. A boy or girl should never be sent away from home to school until he has reached the age where he or she is somewhat settled, and this age comes about the time when they should ordinarily finish high school. This is why I contend that the County High School is the greatest institution that we have now. It will benefit more people, and people who really need the benefits, and whom other higher institutions can never reach, than any other institution. Rockefeller gave an ample endowment for the establishment of the University of Chicago, but does it reach the class of people who need it worst? Only the rich and those who have passed the ordinary field of learning can benefit from this institution. Then I say every citizen should patronize the County High School. It is just as good as the school in the other city. You go to the town where you are contemplating sending your boy or girl to school and you will find people there sending their children somewhere else. They want to send them off where they can get training other than "book learning." Say, did you ever think that boy or girl is not fitted to receive that other "learning" until he has really reached manhood or womanhood and has at least a high school education. To sharpen a tool you first grind until you get a rough edge, then you begin to polish.

At the commencement exercises of St. Michael's College at Santa Fe, Es. Governor Prince delivered an address which touches this subject and I desire to quote from it below because it could not be better said: "I congratulate you, young men, that you have been educated in what is known as a home college. I wish that every country town had such excellent school facilities that no boy need leave home for an education. But as that is impossible let us rejoice that especially for the native sons of New Mexico there is such a home college as this. How a father or mother can consent to send a young man who has always had the loving care of his family and is at the most impressionable age and utterly without worldly experience, hundreds or thousands of miles away from home relatives and friends, from the father who is his natural protector against evil, to live among strangers, in the companionship of youths, amid all the allurements and temptations that can beset his path, is to me one of the most inexplicable as well as most melancholy and dangerous things in this wide world. The child who has been nurtured and cherished and shielded and protected from infancy to early manhood, is suddenly cast forth, into a very vortex of temptations, with no one to guide, none to protect."

"And we see it with girls as well as boys, sent from home just when they most need a mother's care, almost to the ends of the earth. To me it is absolutely beyond comprehension. I am not criticising the great universities. For certain purposes they are very desirable. But I am criticising the parents who send their children far away from advice and assistance into an irresponsible mass of immature humanity, and then expect good results. I hold a diploma from the largest of these great institutions and I prize it, because it says 'with especial honor,' but I was so situated that I never had to be away from the old home a single night in order to obtain it. It is for a just regard for the home and the home schools that I plead."

The above expresses my sentiments better than I could possibly express them so I shall leave the subject here.
L. R. YORK.

Birthday Party at Capitan

IN defiance to the mercury which snow-man created from marsh was climbing close to the eighty mark. Mrs. Fittsworth was mark, Master George Lane and assisted in ministering to the his sister, little Miss Elizabeth wants of the little folks by Mrs. Fittsworth, entertained all the Will Fittsworth, Mrs. John Nor-Capitan little people Wednesday ton, and Mrs. C. C. Belknap.

afternoon with a snowball party on the spacious lawn of the Fittsworth home, the occasion being the little lady's fifth birthday. After a spirited contest at building a frary to results of the past when snow-ball fort, followed by throw- these two teams have met, Carr- ing the balls through a small rixozo is going to wallop them. hoop, the children indulged in a The winning streak that has been regular old fashioned snow-ball ours this season must not be fight. Carrizozo Defeats Stanton Again (G. O. N.)

SUNDAY'S Baseball game was won again by Carrizozo and Stanton once more met defeat by the Browns.

The feature of the game was Dolan's superb pitching, having Stanton at his mercy at all times not a man did he walk nor was he ever in a hole and Stanton was never able to get more than two men on bases in one inning.

Dolan served them such a mixture of curves and change of pace that his opponents were in a puzzle all time they were facing him and he was given very good support there only being three errors chalked up against Carrizozo.

But Tex Loughrey put the climax on Stanton's hopes when he made that awful clot in the ninth inning for a homer. But take the game as a whole it was the fastest ever pulled off in Carrizozo and was anybody's game till the last. Stanton put up a good clean game and started the scoring with one in the second and one in the third, while Carrizozo was not able to score until the fifth, when they put two over; Stanton got two more in the sixth which ended their scoring. Carrizozo got one in the seventh one in the eighth and one in the ninth.

Game by innings: Carrizozo took the field, P. Hightower flew out to Lee, Brockway struck out, G. Hightower put a hot one to Dingwall who made a nice stop catching him at first.

Carrizozo: Reilly grounded to 3rd, unable to beat the throw; Dawson flew out to 2nd, Nickel grounding to same place out at first.

Second Inning, Stanton: W. Norman hit safe over first, stole second, H. Norman struck out, Gallacher hit for a single scoring Norman; Lane struck out.

Carrizozo: Dolan flew out to right, Lee hit a slow one to 2nd, beating the throw, then stole second, Van Schoyck safe at first on error, Lee caught off second, Dingwall struck out.

3rd Inning, Stanton: Howard struck out, P. Hightower hit safe to right for a single, Brockway and G. Hightower both struck out. 1 hit, no runs, 3 strike outs for Dolan.

Carrizozo: Grumbles, Loughrey, and Reilly struck out, giving Hightower 3 strike outs.

4th Inning, Stanton: W. Norman struck out, Van Schoyck failed to hold the ball Norman, safe on a wild throw, H. Norman, Gallacher and Lane all struck out.

Carrizozo: Dawson hit to short stop, beating the throw to first, Nickel flied out to 3rd, Dolan struck out. No runs, no hits, no errors, one strike out.

5th Inning, Stanton: Coe and Howard struck out, P. Hightower flied out to Lee. No runs, no hits, no errors, 2 strike outs.

Carrizozo: Lee hit safe to center for a single, Van Schoyck struck out, Dingwall hit to center scoring Lee, Dingwall taking 2nd, on the throw, Loughrey to first for getting in the way of one of Grover's fast ones, Reilly struck out, Norman failed to hold it; to first on error by Norman, Dingwall scoring on the throw to first, Reilly out trying to steal. 2 hits, 2 runs.

6th Inning, Stanton: G. Hightower hit a grounder to Reilly who was unable to handle it, Norman hit to right for two bases, scoring Hightower; Norman stole 3rd, scoring on a wild pitch by Dolan, this seemed to make Dolan mad and he proceeded to tighten up by

striking out the next three men up. 2 runs, 1 hit, 1 error, 3 strike outs.

Carrizozo: Dawson hit to 2nd for a single, Nickel flied out to 3rd, Dolan struck out. No runs, no hits, no errors, 1 strike out.

7th Inning, Stanton: Coe struck out, Dolan playing with Howard force him to hit to infield, he laid a slow down to Reilly who cut him off at first, H. Norman hit a slow one to Grumbles who caught him at first. No runs, no hits, no errors.

Carrizozo: Lee out at first by Gallacher, Van Schoyck struck out, Dingwall hit for a single, Grumbles hit for 2 bases scoring Dingwall, Grumbles taking 3rd on the throw, Loughrey struck out. 2 hits, 2 runs, no error.

8th Inning, Stanton: Brockway hit to short, who could not handle it in time to catch him at first but Van Schoyck and Dingwall caught him at second; G. Hightower struck out, Norman flied out to Reilly. No runs, no hits, 1 error.

Carrizozo: Reilly safe at first on an infield hit, Dawson to first on a single Reilly taking 2nd, Nickel got a fielder's choice in right, Reilly taking 3rd, Dawson being forced out at second, Dolan hit to right, Reilly out at home trying to beat the throw, Lee hit to center for a single, Nickel scoring from 2nd, Van Schoyck flied out to left.

9th Inning, Stanton: H. Norman hit to 3rd beating the throw stole 2nd, tried to steal 3rd, out by Grumbles, Gallacher and Lane both struck out, thus ending Stanton's hopes. No runs, no hits, no errors, 2 strike outs.

Carrizozo: Dingwall flied out to left, Grumbles safe at first on an error by Gallacher, now comes the sad part, Loughrey landed on the first one for a homer, which settled it with only one down.

Summary: Struck out by Dolan 19, by Hightower 8, 2 base hits, Grumbles and Norman, Home run Loughrey, Stolen bases, Norman, P. Hightower, Brockway, Dingwall, Lee, Grumbles, Nickel, Wild pitch Dolan 2, Hightower 2, Earned runs, Carrizozo 5, Stanton 4, Left on bases, Carrizozo 9, Stanton 4.

Umpires, Brown and W. Van Schoyck; Time of game 1 hour 35 minutes; Score keeper Rolland.

White Mountain Bible Conference

THE White Mountain Bible Conference will convene on Ruidosa July 10-August 1. Hundreds of pounds of literature have been sent out, the district covered including all of New Mexico, a part of Colorado and most of Texas. A large pavilion is in process of erection and arrangements are under way to care for and entertain a large crowd. The gathering is under the auspices of the Protestant societies of the Pecos Valley and those of the White Mountains.

Husband Kills Wife

NEAR San Patricio, Tuesday about 12:30, Ramon Vigil shot and killed his wife. Sheriff Cole was notified and left immediately for the scene of the tragedy. Vigil was arrested and given a preliminary hearing the following morning before Justice Leopoldo Gonzales, plead guilty and remained to jail without bail, Sheriff Cole reaching here Wednesday afternoon and placing his prisoner behind the bars.

The defendant and wife had lived at Picacho for many years, both being old people—65 years or more. According to the testimony of eye witnesses Vigil and wife were driving in a single buggy, and upon nearing San Patricio Vigil was seen to get out of the buggy, pass around to the rear, draw a six-shooter and fire. Vigil then re-entered the buggy and drove to the home of his wife's brother, calling the brother to the buggy and telling him that he had brought his sister to him, dead. The witnesses who saw the shooting, but heard no conversation nor know nothing of the circumstances leading up to the uxoricide, are Jesus Morales, Pablo Latta and a small son of Pat Carrillo's.

Local Train Service

Trains 3 and 4, the Golden State Limited, the two day light trains for this section, now stop at Corona, Ancho, Osceuro, Three Rivers, Tularosa, Ora Grande and Newman. A ticket may be purchased to either of these points or at either point.

These stops are in addition to regular stops for the limited, like Alamogordo, Carrizozo and Torrance, and improves very materially the local service that has been in operation since numbers 7 and 8 were discontinued. Passengers, under this arrangement, may make a round trip to almost any county point in a day, and expressions of satisfaction are general.

Arthur Swafford Dies

ARTHUR SWAFFORD, who had been working in the mines at White Oaks for several months, fell suddenly ill, he lingered along for several days and finally a physician was called. After making a thorough examination the physician announced it a bad case of typhoid fever. The disease taking a strong hold upon his constitution and in a few days was beyond hope of recovery. His parents who live at La Mesa, N. M., were wired to come. His mother came and was with him a few days before he died and also at his death. He died on the afternoon of the 21st, of June, and was buried in the little village church-yard on Monday the 22nd; Rev. Hendrix, Methodist pastor, held the service. Mr. Swafford was very much liked by all who knew him. He was a nice, quiet, kind-hearted boy and his presence will be missed in the community by his many new friends. He was born Oct. 27th, 1893 and leaves parents, three sisters and two brothers to mourn his death.

He had made application for membership in the Woodman lodge, and had he lived to have been present on the night of June 23rd, his application would have been accepted and he would have been a full fledged member of that lodge. —CONTINUED.

County School Notes

Dr. E. L. Buloe, who is to conduct the institute here next month, has been elected president of the New Mexico Normal at Silver City. Many of our citizens remember Dr. Buloe, who conducted the institute at Lincoln in 1908.

James A. Lafferty, director of school district 22, when in town Monday, reported the new school house at Meek completed and paid for. The people are justly proud of the building.

The Carrizozo News is to be complimented on the neat appearance of the institute announcement which are now ready for distribution. Requirements of state teachers, information as to examinations and Reading Circle work are included in the circular which may be had from the office of county school superintendent upon application.

The directors of the Carrizozo district announce the election of the following corps for the coming year: Principal, A. McCurdy; assistants in the high school, Mrs. E. V. Jewett and Miss Maude Hancock; in the grades, Miss Ida Schimpff, 7th and 8th; Miss Mamie Humphrey, 5th and 6th; Miss Ola Brock, 3d and 4th; Miss Mildred Peters, 2d; Mrs. Nora Masnie 1st.

Director P. M. Rodriguez of Ruidosa, who was in town last week, says the adobe for the new building are about completed and his sister, Mrs. Rosa Herrera, will give the district a two-acre tract adjoining present site.

Prof. E. A. Haggard, principal of the school at Varney, is spending his vacation touring the county.

Delinquent Tax Sale

COUNTY OF LINCOLN
I, the undersigned treasurer and ex-officio collector of taxes for the County of Lincoln, in the State of New Mexico, hereby give notice that I will, on the 3rd day of August, 1914, at the hour of ten o'clock in the forenoon, at the court house of said county, in the town of Carrizozo, Lincoln County, New Mexico, offer for sale, separately and in consecutive order, each parcel of property upon which any taxes are delinquent as shown by the tax rolls of Lincoln County, New Mexico, for the years 1911, 1912 and 1913, or so much thereof as may be necessary to realize the respective amounts due, which sale shall continue until not later than four o'clock in the afternoon, and from day to day at the same hours, until all of said property shall be sold or until the amounts due shall be paid or realized, but each sale shall not continue for more than thirty days.

T. W. WATSON,
Treasurer and Ex-Officio Collector of Taxes for the County of Lincoln. 6-26-14

Skidding

WITH Albert B. Fall, George Curry and Bill Andrews boosting for Roosevelt, there ought to be no difficulty in proving to the progressives of all parties that the Rough Rider is the only pure and unadulterated progressive on earth. If anything more should be wanted the endorsement of Senator Penrose and Ex-senators Foraker and Spooner might be secured. —Farmington Times-Hustler.

INDUSTRY AND MECHANICS

OUTPUT OF ARTIFICIAL SILK

Last Year 600,000 Pounds Were Used in One German Town for Manufacture of Men's Ties.

The organization here, now in progress, of a \$500,000 company to manufacture artificial silk from cotton gives an added interest to recent figures in consular reports covering the artificial silk industry.

There is little doubt that Germany now leads the list both in production and consumption of artificial silk. Last year 600,000 pounds were used in Krefeld alone, chiefly in the manufacture of men's ties, whereas only 7,700 pounds were consumed by Swiss manufacturers. The total valuation of goods made from artificial silk in Lyons last year is estimated at not more than \$386,000.

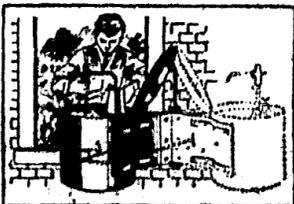

The German silk trade showed increased interest in the product in 1909, when prices were reduced from \$2.15-\$2.37 a pound to \$1.72-\$1.83. The piece goods trade uses chiefly the finer qualities, nitrocellulose silk being almost exclusively employed, while the velvet manufacturers take the coarser qualities, principally viscose silks.

During the last three years the price of nitrocellulose silk has ranged between \$1.27 and \$1.56 a pound, and that of viscose silk between \$1.29 and \$1.40.

SAFETY FOR GASOLINE CAN

Danger of Fire Avoided by Placing Receptacle on Device Arranged Outside of Window.

The peril of fire, always present when gasoline is kept in quantities within factories or shops, may be in large measure avoided by the use of an outdoor attachment recently patented. The can, which is of the ordinary pump type, swings on a hinged support fastened outside the window. A lever arrangement worked from the inside brings the can around in easy

Gasoline Safety Device.

reach when wanted, or swings it back again out of the way. The can is fitted with a hinged cover, excluding rain, snow or dust.

OLD SHOES ARE USED AGAIN

Leather Pulp Utilized by Decorators and Carriage Builders—Pressed into Thin Sheets.

Old boots and shoes which, when quite past wearing by anyone, find their way into our dumps are extremely valuable, and find their way again into our houses in most artistic forms, London Globe states. They are soaked in water to remove the dirt, all the nails and threads are picked out and the leather reduced to a thick pulp, from which wall papers, screens, etc., are made. The finer the original quality of the leather the better it takes the bronze and old gold of the designs which make these hangings things of beauty. Bookbinders and framemakers also know the value of this pulp, and carriage builders press it into sheets, which are invaluable for the roofs of the most luxurious vehicles.

Economy of Material.

Economy of material was the explanation of the erection of a house in Los Angeles in which every part was made of concrete in the same forms they would have been if made of wood, then called or wired together.

Improving Etchings.

Apparatus has been invented for forcing a jet of compressed air into the acid bath in the manufacture of newspaper etchings, which is said to improve them by keeping the acid in motion and removing metal particles.

Success in Louisiana.

Since a process for recovering sulphur from beneath gulleys was put into operation in Louisiana in 1904 more than 2,330,000 tons of reduced product have been recovered.

Revolving Ribbons.

For office use there has been invented a machine for re-lacking ribbons for typewriters, adding machines and other such devices.

For Molding Concrete.

By using the extractions from building wreckage concrete is melted and made to run like molten under the head of the ram.

Smoothing Vice Jaws.

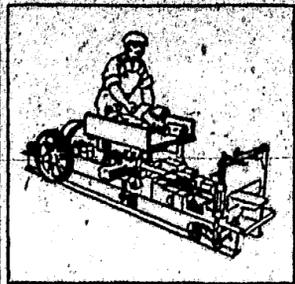

Sheet aluminum is better than other brass or copper for smoothing vice jaws when soft metals are joined.

MACHINE CLEANS OLD BRICK

Mortar and Cement Scraped Off Quickly, Making Bricks as Serviceable as New Ones.

Among the recent grants of patents there has been one to a Philadelphia inventor which will be of great interest to builders, contractors and such persons. It is a machine which attends to the matter of cleaning bricks which have been taken from an old building, and after passing through this device the brick issues as clean as new and just as serviceable.

This machine is portable, and can be taken anywhere and operated on the site of a demolished building, taking the old bricks and transforming them into shapes as good as new for many purposes. It weighs about four hundred pounds and is four feet long. It is operated by two men, but this combination of machine and man has a capacity of 15 bricks per minute at a

Brick-Cleaning Machine.

rate of 60 cents per 1,000 bricks. The capacity of one man is about one thousand bricks per day by hand.

At one side of the machine there is a pair of coarsely toothed plates, one being stationary and the other moving back and forth at regular intervals. One man places the end of an old brick between these plates and the mortar or cement is cleaned away for the distance of about an inch. The brick thus prepared is thrown into a trough, and the second man takes it and places the cleaned brick into an opening, which is supplied with a pair of sturdy knives. The brick is automatically seized and held in place, whereupon a plunger thrusts it through the opening, and as it passes along the knives clean off the foreign matter.

SAFE STORAGE FOR GASOLINE

London Concern Uses Water to Fill Space Made Vacant When Liquid Is Drawn Off.

The loss by evaporation and considerable of its danger is eliminated by a new system of storing gasoline which is used by a London concern. Air is always excluded from the storage tank by making use of water, which fills the space which is not occupied by gasoline. In other words, the tank is always filled completely, no matter how much the quantity of gasoline varies. As the gasoline is drawn off its place is taken by water, and as the two do not mix the gasoline is not in the least affected by the close presence of the water, the latter always seeking the lower part of the tank. Under this system no dangerous gas can issue from the tank, as it does when a tank of the ordinary construction is being filled.

INDUSTRIAL AND MECHANICAL NOTES

Most of the type used by Chinese printers is made in Japan.

A process has been devised by which rubber is made to cling to steel.

A machine has been invented for washing large quantities of eggs rapidly.

Mineral waste in the United States is estimated at \$1,000,000 a day by the bureau of mines.

Experts are now pointing out the danger of putting too much power into light automobiles.

Mercurial ointment not only will prevent firearm barrels from rusting, but also will loosen any lead deposits.

All of the Australian states are well supplied with iron ores, New South Wales having the richest deposits.

A method has been invented in Germany for spinning kapok fiber into yarn so that it can be woven into textiles.

Because copper is an important medium of currency in China its mining is rigorously controlled by the government.

Aluminum foil for wrapping purposes is being produced that is only one-sixth of an inch thick and as tough as steel.

Natural gas consumption in the United States in 1911 was 62,000,000 cubic feet, at an average price of 12.04 cents per thousand.

In Germany there has been invention of a process for compressing air for breathing that allows only certain parts of the metal impurities to be

SMART OUTING COATS

HANDSOME GARMENTS DEVISED FOR COMING SUMMER.

Sketch Shows Idea That May Be Taken as Representative—Informality Always the Chief Object in the Cut.

Judging from advance models, the separate coats of the sporting type designed for the summer are to be even smarter and more attractive than those which were so successfully launched last year. They will be made up in all the same bright colors and practically the same materials as last year's models, but the new ones are possessed of a clever cut and grace of line that make them quite the nicest sort of a serviceable summer wrap.

Of course, they are designed primarily to wear with white tailored skirts and blouses or with white serge frocks, for, as a general rule, they are made up in such bright colors that

Warm Weather Outing Coats Are Smarter Than Ever.

they could hardly be worn with anything but white. Emerald green, mustard color, navy or Columbia blue, cerise, magenta and scarlet are the shades that are most used, while there are any number of pure white ones just as there were last year. The striped blazer cloths will not be used at all.

Today's sketch shows a coat that is representative of the new designs. It can be made in any color desired and is of velvet de laine or a lightweight polo weave.

The sleeves have very wide armholes and are cut in one with the body. A very deep cut is fitted to the forearm and starts at top and bot-

SPECIAL COVER FOR FROCK

Best Method of Protecting the "Party Gown" When It is Hanging in the Wardrobe.

Nearly every girl realizes that the average party gown gets more hard usage when hanging in the crowded wardrobe than while it is being actually worn. And as most girls have far less wardrobe space than they need, the best means of protecting the party frock from contact with the workaday garments is to make a special cover for it of lawn, dimity, muslin, cheese-cloth or a similar material. Having measured the length of the gown from shoulders to skirt hem, take two full widths of the chosen covering material and shape an end of each one of them into shoulders and the half of a neck. The shoulders and the long, straight sides of the cover are then sewed together, the bottom is hemmed, the neck is neatly bound with ribbon bowed in front at the top of two short silk cords from which depend two small square or oval sockets. When the gown is adjusted to its individual hanger and the muslin cover drawn smoothly over its folds and draperies it is in a condition to be as nicely kept as it is possible to keep any unboxed garment.

How to Shopping.

Prosty shopping bags are of the galley variety with narrow brims and not overhanging. Some of these are made of cloth, some of paper, which just fit the head, when used with the bag, when the stiff crown band of paper is removed, they are almost of the same shape as those on the brim.

Some of the best of the sporty hats come. The brim of the coat is put with some fulness that is disposed of in naturally hanging folds held in place under an easily fastened-on belt, which knots loosely in front. A row of buttons set closely along one side of the front is the only trimming aside from the tasseled ends.

Most of the sporting coats reach well below the hips, are unlined and have their seams bound with silk lute-siring. Of course, such coats are always most informal. But now that they have lost that stiffness that used to characterize outing gowns and are instead graceful of line and big looking with a certain dash about them, they are altogether useful, in fact, almost indispensable adjuncts to a well regulated spring and fall outfit.

TULLE USED IN MILLINERY

One of the Most Effective of the Hat Trimmings That Are Just Now Popular.

Tulle as a hat trimming is growing in favor and wonderful things can be done with it. It is placed on straw, tafeta, satin or on any material that goes to make a hat. It is used to drape the crown, folded into most fantastic shapes, and it can be twisted into spirals that resemble the tendrils of a feather, or clipped to look like pompons. It is not as perishable as it looks, as there are moilproof tulle which may be exposed to dampness and even rain without becoming limp. Lace is also used in high-wired effects and in artistic drapings.

The new flowers are works of art. There is a great variety of stick-up motifs, in wing and quill effects, and fantastic ornaments made entirely of thickly clustering small flowers, in color schemes that are truly wonderful in their beauty. Fine ferns, grasses and moss are used to subdue too brilliant coloring.

Dainty pompons are made of forget-me-nots, lilacs and other small flowers, mounted on slender branchlike stems. Delightful little clusters of flowers are composed of a silk rosebud, two fuchsias and a sprig of mignonne, placed on the brim of a hat. Berries are either worn as bunches or else in trails right round the hat, often being mixed with flower buds.

Cotton voiles strewn with small flower motifs and tulle printed in the same effect are made up into smart hats with the addition of a small quantity of fine straw braid, lace or embroidered edging and small flowers or fruit and are elaborate enough to be worn with the daintiest summer frock.

Summer Stockings.

Embroidered clocks on stockings are never more appropriate than when worn with an organdie dress or a white lingerie gown that has upon it a touch of colored ribbon. If the colored ribbon is omitted, embroidered stockings can be worn just the same for the embroidery can be in white also. A dainty Southern girl, known for her good taste in dress, wore with a blue and white figured organdie white silk stockings upon which with her own pretty fingers she had embroidered forget-me-not clocks. Tiny sprays of the flowers ran up each side of the stockings and peeped out when my little lady's skirts were raised over it slightly.—The Philadelphia Press.

Lines Embroidered Sets.

Among the hand-embroidered accessories being worked by clever needlewomen are sets for summer frocks, including collar, cuffs and wash or giraffe of colored linen worked in oriental embroidery. One notable design was worked on one side of the front, with ends reaching below the knuck. These ends were scalloped and embroidered in dull blues, rose and yellow to correspond with the turnover collar and elbow cuffs. The whole was intended for wear with a white linen morning dress, or perhaps a sheer muslin.

NEW OUTING HAT.

Model of black and white checked straw hat with crown and brim of satin.

Fine Finishing.

A touch of handwork on net ruffling is distinctive. The objection to embroidery is that the wrong side usually displays all rough defects, and any threads may be seen through its absorption on the right side. But with buttonholing the wrong side may be made to look quite as neat as the right side, says the Philadelphia North American. The net may be edged with buttonholing of any color that is desired. Buttonholing is done with silk or cotton thread.

FOR BETTER ROADS

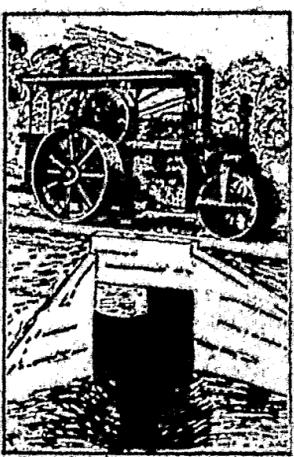

NOW IT'S ROADS OF CEMENT

Modern Country Thoroughfares Constructed of Concrete Require Very Little Repairing.

In a way, it is fortunate that the United States has been rather slow in the matter of road-making. The roads can now be built of lasting materials, such as will withstand the wear of motor traffic, which is fast ruining Europe's century-old roadways. Lasting road materials are everywhere present in the form of sand and gravel from pits and stream beds and crushed rock from stone quarries. Combined with Portland cement into concrete, they form an inexpensive and permanent road surface which successfully resists the usually destructive action of automobiles.

The first consideration in the building of concrete roads is a careful study of local deposits of sand, gravel and rock—known as the "aggregate"—to see whether they are suitable for concrete. Sand must be clean and hard and must grade uniformly in size of grain from one-fourth inch down. The same applies to gravel and crushed rock, except that the largest particles commonly allowable are one and one-fourth inches in diameter. If local materials are usable, a considerable saving will be effected, as only cement will need be freighted.

It is much faster and cheaper to mix the concrete with a machine than by hand. Depending on the grading of the aggregate, the concrete is usually proportioned one bag of Portland cement to two cubic feet of sand and four cubic feet of screened gravel or crushed rock, or one of cement to two of sand and three of gravel or rock. During the grading and draining of the road, the "aggregate" is hauled and piled at convenient points. The concrete is mixed mushy wet, is deposited to the thickness of six inches upon the firm old road-bed, and is brought to grade and shape by means of a trowel. In order to shed the water to the side drains the surface of the concrete is given a rise or crown in the center of one one-hundredth to one seventy-fifth the width of the roadway. The surface is finished with a wooden float and wire broom, by which means there is afforded perfect footing for horses. At intervals of 25 feet the road is divided

Modern Type of Concrete Culvert Referred to as the Heaviest Load.

into sections by narrow contraction joints extending crosswise the road and entirely through the concrete. These joints are formed by means of a thin metal or wooden cross-form or divider to which is tied a single or double thickness of tar paper with the paper face against the last laid section of roadway. After the surface of this section is finished, and while the concrete for the adjoining section is being placed, the cord holding the paper to the cross-form is cut and the cross-form is removed. The tar paper adheres to the concrete and stays in the joint, which is reduced to the thickness of the paper by forcing against it the freshly placed concrete of the section under construction.

MEND MARKET ROADS FIRST

Country Producers Must Have Easier Way to Town, Says President Waters of Kansas College.

Improve the roads first by which farmers must market their produce, then look to the betterment of the cross-country roads. That is the advice of Dr. H. J. Waters, president of the Kansas Agricultural college.

Ten per cent of the Kansas public highways carry 75 per cent of the total traffic, the president said. Figures in the office of the state highway engineer show that it costs \$11,000,000 every year to get the surplus produce from the Kansas farms to the railway stations. If this ton per cent of road were improved, a saving of \$2,000,000 a year to Kansas farmers yearly would be effected.

REMARKABLE CASE OF Mrs. HAM

Declares Lydia E. Pinkham's Vegetable Compound Saved Her Life and Sanity.

Shamrock, Mo.—"I feel it my duty to tell the public the condition of my health before using your medicine, I had falling, inflammation and congestion, female weakness, pains in both sides, backache and bearing down pains, was short of memory, nervous, impatient, passed sleepless nights, and had neither strength nor energy. There was always a fear and dread to my mind, I had cold, nervous, weak spells, hot flashes over my body. I had a pain in my right side that was so sore that I could hardly bear the weight of my clothes. I tried medicines and doctors, but they did me little good, and I never expected to get out again. I got Lydia E. Pinkham's Vegetable Compound and Blood Purifier, and I certainly would have been in grave or in an asylum if your medicine had not saved me. But now I can work all day, sleep well at night, eat anything I want, have no hot flashes or weak nervous spells. All pains, aches, fears and dreads are gone, my house, children and husband are no longer neglected, as I am almost entirely free of the bad symptoms I had before taking your remedies, and all in pleasure and happiness in my home." Mrs. JOSE HAM, R. F. D. 1, Box 22, Shamrock, Missouri.

If you want special advice write Lydia E. Pinkham Medicine Co., (Confidential) Lynn, Mass.

When a fellow is as straight as a string it seems natural that the girls want to tie up to him.

Dr. Pierce's Pellets, small sugar-coated, easy to take or candy, regulate and invigorate stomach, liver and bowels and cure constipation. Adv.

Limit of Courtesy.

Japan's new prime minister, Count Okuma, has a wooden leg. It replaces a limb which was blown off by the bomb of a political assassin. In connection with that outrage, a story is told which goes far to support the claim that is made for Okuma that he is the best-managed man in Japan. After the explosion, which had killed his servants and horses, besides shattering his leg, he was lying in his office in an agony of pain, yet he was able to say smilingly to a foreign statesman who was taking leave of him, "Excuse me, sir, for my impoliteness in not seeing you to the door."—Fall Mail Gazette.

Gave Heckler a Chance.

At one time the Republicans of Chicago were out and were fighting Democracy on industrial conditions and the putative helplessness of a situation which did not let the Republicans in. A parade was started off and was well on its way—stray to the file closers—when a ward boss saw that two lighted transparencies lacked carriers. He looked around hurriedly and noticed that one of his retainers was idle. "Here," he yelled, "shoulder this and get in line." The shanghaied recruit was a gambler who busied himself in ward politics on occasions, but for the most stuck to his trade when trade was possible. As he hoisted the lighted legend, "Open up the mills and factories," there was a chorus of derisive yells from the sidewalk: "Never mind the mills. Open up the poker game."

Toastie Flavour A Winner

Every day many are finding out that

Post Toasties

are different from other "ready to eat" foods. It's in the making.

Toasties are carefully cooked bits of choicest Indian corn toasted to an appetizing, golden-brown crispness.

Care and time in toasting and the delicate flavoring make this crisp corn-food delightful.

Post Toasties—ready to eat direct from the sealed package, with cream and sugar to taste.

—sold by Grocers.

LOCAL & PERSONAL

The walls of the Ziegler annex are about complete.

Joe Stratton returned Sunday from a protracted visit to his old Oklahoma home.

Blanchard Bros., William and Francis, were over this week from their Macho ranch.

Mr. and Mrs. Ira O. Wetmore are in town, having motored up yesterday from the south.

The Johnson racing car can be seen only in the shop—on the road only its dust is visible.

Miss Lola Highfill is here from Jackson, New Mexico, visiting her sister, Mrs. W. C. Pittman.

The Dalton-Roberts-Moore party returned this week from a month's stay at the Palomas hot springs.

Mr. and Mrs. Roy E. Lemon were here from White Oaks the past week, guests of Mr. and Mrs. John E. Bell.

A number of the younger set were entertained Wednesday evening at the home of Mr. and Mrs. H. B. Hamilton.

A. H. Hudspeth, U. S. Marshal, came in Monday from Santa Fe and went up to White Oaks that afternoon.

Miss Blanche Murray, who has been visiting her aunt, Mrs. John B. Baird, returned this morning to her home at Tinnie.

Mr. and Mrs. Mills B. Foreman returned Monday from Palomas Springs, to which point they went some three weeks ago.

Misses Harriet Kimbell and Lorena Haley went to Parsons, where they will spend the week end as guests of the Rice family.

The home of Mr. and Mrs. Harry L. Humphrey was visited by old Dr. Stork Monday, and a tiny young lady left in the home.

The Woodmen had a pleasant gathering Monday night, in which dancing and refreshments served to enhance the pleasure of the gathering.

Jacob Ziegler went over to Stanton Monday to receive a shipment of hides for which Ziegler Bros. were the successful bidders.

J. F. Nicolas and George Anton, representing Charles Friend & Co., Chicago, wool buyers, are here consulting the wool growers concerning consignments.

California fruit continues to pass through on its way east, and the boys are so busy that they have time only for eating and sleeping.

Base ball dance tonight at bank hall. Attend; enjoy the music and dancing and, at the same time, give the management a finance lift.

Sao Juan's day, the great religious festival, was celebrated here in a mild manner Wednesday by the native population, and at night a dance concluded the festivities.

I. D. Walker, a nephew of Dr. E. B. Walker, came in from Louisiana last week, visited with his uncle's family until Sunday, at which time he went to Three Rivers where he secured a position as operator.

Mr. and Mrs. Benj. F. Adams and daughter, Miss Mary, drove down from Corona Tuesday, returning that evening. They came in their new car, Reo Fifth, 1915 model, and one of the prettiest and most completely equipped cars we have seen.

Wm. J. Lindsey came over from Fort Stanton and went to El Paso on No. 3 Sunday. He returned this week, having purchased some necessary things for the big celebration at the Fort on the Fourth.

R. W. Johnston, representing a Denver commission house, has spent the week here, purchasing cattle. We understand he has purchased the Ferguson-Duke steers and is negotiating with a number of other local stockmen for their yearlings.

A baby boy put in an appearance Sunday at the home of Mr. and Mrs. Walter McMillan, White Oaks.

Capt. J. A. Adams has leased the Burrell House and has refurbished the rooms and offers them for rent.

The Eagle Creek pipe line is being rapidly pushed to completion. About all, if not all, the pipe has been shunted up to Capitan and from there conveyed by wagon to the line.

A. J. Rolland and H. S. Campbell went to the Capitan mountains this week. They, with Dr. Randles, own some promising iron claims in the east end of the Capitan.

S. A. Simmons, who was at Fort Stanton for many years but who went to Colorado two years ago, returned yesterday and went to the Fort today to receive the benefits of the sanatorium.

The shearing season is in full swing and the sheep men and all their help are at the ranches. When the wool is brought to market the employes will drift back to the towns.

By reference to the "School Notes" column this week, it will be seen that the Carrizozo school board has employed eight teachers for the coming term. The good schools Carrizozo has enjoyed in the past will be still better in the future.

Where to Worship

Baptist Church
 HERBERT HAYWOOD, Pastor
 Bible school at 10 a. m.
 Preaching services at 11 in the morning, and at 8 p. m. Subject of the morning: "Eternal Life, What it is." That of the night will be: "The Spirit of Christianity." Good music. We cordially invite you to come and worship with us.

Methodist Church
 J. W. W. HENDRIX, Pastor.
 Sabbath school, 9:45 a. m.
 Preaching both morning and evening by the pastor.
 Theme, morning: "The Need of a New Social Conscience." The discussion will touch upon the development of a social consciousness, the victories that have destroyed nations, and what is now needed to save ours. It will prove interesting to business men and those interested in social moves.
 The theme for the evening service is not fully developed but may be upon this subject: "Constructive Ideals." We promise to do our best and discuss these popular subjects. It seems there are some things on these subjects that should be said just now. Come and bring your friends.

Program for 4th. July Celebration at Corona, N. M.

100 guns at sun rise.
 5:23 a. m. Arrival of train No. 2 of delegations from Capitan, White Oaks, Carrizozo and Ancho.
 8:20 a. m. Arrival of train No. 3 of delegations from Santa Rosa, Vaughn and Duran.
 9 a. m. Arrival of special train from New Mexico Central Ry. of delegations from Estancia, Willard and Torrance.
 10:00 a. m. Saddle horse race, at tracks.
 10:30 a. m. Pony race.
 11:30 a. m. to 1:30 p. m. Big barbecue dinner.
 1:45 p. m. Tournament race.
 2:15 p. m. Burro race.
 2:30 p. m. Foot race.
 3:00 p. m. Ball game, Willard vs. Corona.
 3:30 p. m. 25 mile automobile road race.
 7:30 p. m. until morning, Big free dance.
 All day, all night, all kinds of fun.

Splendid Rains

LAST night a fine rain visited this section, and this morning all nature smiles. From almost every part of the county come reports of good rains and optimism prevails generally. Lincoln county gives promise of a bumper crop and also the fattest cattle and sheep in her history.

NOTICE
 STATE ENGINEER'S OFFICE
 Number of Application 852.
 Santa Fe, New Mexico, June 14th, 1914.
 Notice is hereby given that on the 27th day of April, 1914, in accordance with Section 56, Irrigation Law of 1907, J. O. Naburns, of White Mountains, County of Lincoln, State of New Mexico, made formal application to the State Engineer of New Mexico for a permit to appropriate the Public waters of the State of New Mexico.

Such appropriation is to be made from Three rivers creek at a point where the N. Section corner of Sec. 33 on East line Twp. 19 N., Range 10 East, bears N. 83 degrees 15 minutes, E. for 1200 feet distant; Ditch No. 3 bears N. 82 degrees 15 minutes East 210 feet distant from same point by means of diversion works and straighten out ft. per sec. some feet is to be conveyed to lands in Section 23, Twp. 10 S., Range 10 East by means of earth dams and canals and there used for the irrigation of 45 acres and domestic purposes.

Any person, association or corporation desiring that the granting of the above application would be truly detrimental to their rights in the water of said stream system shall file a complete statement of their objections substantiated by affidavits with the State Engineer and serve a copy on applicant on or before the 7th day of September, 1914, (the date set for the Engineer to take this application up for final consideration unless protested, when all parties will be given a reasonable length of time in which to submit their evidence in detail or arrange a date convenient for a hearing or appoint a referee satisfactory to all to take testimony. Appearance is not necessary, but advised officially by letter from the State Engineer.

JAMES A. FRENCH,
 State Engineer. w. s. s.

QUIT GET-RICH-QUICK SPECULATION—BE A "PRUDENT" MAN!

BANK YOUR MONEY

Many, many, good, honest men have worked hard and piled up a little fortune, and then all at once LOST all they had by just ONE foolish investment.

The following appeared recently in the newspapers about a very prominent man who died:—

*** Despite his marvelous financial career in and around Chicago, which caused him at one time to be rated as a millionaire, he died a BANKRUPT. Most of his great fortune melted in disastrous speculations. ***

Make OUR bank YOUR bank

We pay 4 per cent interest on certificates of deposit

EXCHANGE BANK, Garrizozo, N. M.

Member Not Kicked Out of It, if He Would Accept the Situation as It Was.

He was one of those insufferable young peeps who patronize restaurants trying to flirt with stenographers and telephone girls who drop in about noon for lunch. Approaching a young woman who was sitting alone, he lifted his hat and said gravely:

"I beg your pardon, miss."

"Wait!" interrogated the girl calmly.

"Why, er—you see, it is this way. I made an engagement with a young lady whom I have never seen to meet me here. Now, are you waiting for me?"

The girl smiled sweetly.

"I might be waiting for you," she said.

"Ah! Indeed," responded the man, delightedly.

"Yes. You see, I ordered lobster and it hasn't come yet."

MOON, MAN NEVER SAW EVIL.

Francis Turk Lived 94 Years Near New York City, But Stayed Away.

Babylon, L. I.—Samuel Muncie, ninety-six years old, one of the famous Muncie twins of Babylon, is dead, having gone through life with his brother William, hearing no evil, seeking no evil, speaking none. He never drank, chewed or smoked, never went to a theater or saw a show of any kind, except church festivals, and when he wanted amusement usually painted the barn.

Some time ago the twins became known through the country as the heartiest, oldest twins on record. Born Christmas, 1818, they lived and worked together on adjoining farms. They never quarreled and never played. Once Samuel was asked if he ever played checkers. He snorted: "No, sir, I never waste my time."

Although within almost walking distance, he never saw New York. Once he drove to Brooklyn, but found the place too bustling and noisy. That was back in 1859, and he never felt another call to wander from Babylon.

TIMBER USED IN MINES.

About One-fourth Timber Cut in Colorado Consumed by Mining.

Denver.—Approximately one-fourth of the timber cut in Colorado is consumed by the state's mining industry, says the Department of Agriculture in a bulletin issued on Rocky Mountain pine timbers. The total annual consumption of timber of Colorado for mining purposes is about 21,000,000 board feet, valued at something like \$1,250,000.

Lodgepole pine, or white pine as it is sometimes called locally, is the timber most used, with Engelmann or white spruce next. Douglas fir, the so-called red spruce of the Rocky Mountain region, was once the favorite wood for mines, but its growing scarcity has brought the two other woods into prominence.

Fire-killed lodgepole pine and Engelmann spruce, of which there is a great quantity in the Rocky Mountains, ought to give satisfactory service in mines, says the department, provided it is free from decay. Exams cut from timber standing dead for about thirty years showed a strength, when tested by the department, intermediate between that of green and of air-dried material cut from live timber. Drying increases the strength and stiffness of the wood, but decreases its toughness.

Attention is called by the department to the possibility of using preservative treatments to prevent decay of timber when set in the mines. As a general rule such treatment, if properly applied, will work for economy in the long run.

Novellist's Romance.

Mr. S. H. Crockett, the Scottish novelist, whose death is announced, was fond of relating among his intimates how he met his best wife. It was his day of early struggle. He had written for a London daily review of one of George Miller's books. Pleased with the review, which was unsigned, Mr. Miller communicated with the writer of it and invited him eventually to visit his home in Manchester. In time the invitation was accepted. The future novelist of fame fell in love with Miss Miller, and a marriage of perfect happiness was the result.

WASHINGTON GOSSIP

"It Ain't a Menagerie; Pull Down the Fence!"

WASHINGTON.—From an obscure corner of the congressional directory and a not overly well-known portion of the state of Indiana, steps into the limelight, one Henry A. Barnhart, member of congress from the Thirteenth district of the Hoosier state, and leader of a constituency of 258, 674 souls.

From May 1, 1914, until time shall be no more, the Indiana congressman will be canonized on the pages of fame as the man who discovered that wild animals no longer roam the grand old sidewalks of the District of Columbia, and the man who accordingly introduced a resolution in congress asking that Secretary Lane of the Interior department pull down the high picket fence that surrounds his balliwick. With a flowing wealth of legislative parlance, including sonorous and euphonic phrases, the "gentleman from Indiana" introduced his resolution in the house the other day.

It seems that at some time or other, the picket fence surrounding the Department of the Interior building, on the block bounded by Seventh, Ninth, F and G streets northwest, has held the attention of the Indiana congressman.

Lifting one hand majestically toward the skylight, Mr. Barnhart turned to the house, which waited with bated breath.

"Mr. Speaker," he announced, "this is my resolution:

"Whereas, wild animals no longer infest the business district of the national capital, and horses, cattle and dogs are no longer permitted to roam at large therein, and

"Whereas, ours is a nation of civilized people without need of restraint by barrier of high fences; therefore, be it

"Resolved, by the senate and house of representatives of the United States of America, in congress assembled, that the secretary of the interior be, and hereby is, authorized to remove the iron fences now surrounding the buildings occupied by the department of the interior and the general land office."

ERUPTION SPREAD ON FACE

216 East Elm St., Streator, Ill.—"A running sore broke out above my right eye, which spread over my entire face. It started as a small pimple. I scratched it open and the contents of this small pimple ran down my face. Wherever this ran a new sore appeared. They itched and burned terribly; I couldn't touch my face. I tried to wash my face with soap and water, but it only made it worse. I couldn't see for everyone was afraid of it. It looked like a disease of some kind; it was all red and a heavy white crust on it. Everybody kept out of my way, afraid it would spread. I lost rest at night and I couldn't bear to have anything touch my face, not even the pillow. I had to lie on the back of the head. I was always glad when morning came so I could get up. It was extremely painful.

"At last I thought of Cuticura Soap and Ointment and I commenced using them. It took three weeks to complete the cure." (Signed) Miss Caroline Miller, Apr. 30, 1913.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 22-p. Skin Book. Address postcard "Cuticura, Dept. L, Boston."—Adv.

Tests Show the Value of Fresh Air Schools

THAT school children who are taught in fresh-air classrooms advance more rapidly in their studies and make greater improvement in weight and strength than children in regular classrooms is a conclusion demonstrated by Frank H. Mann of New York before the sociological section of the National Association for the Study and Prevention of Tuberculosis. The speaker reported on a series of experiments carried on jointly by the New York committee on the prevention of tuberculosis and the board of education; in which three groups of children were studied to note the effect of fresh air upon them.

In one group the children were placed in fresh-air classes and were fed during school hours with milk and crackers morning and afternoon; in the second group the children were left in the ordinary classroom under regular conditions. Every effort was made to eliminate or equalize in the comparison such variable factors as age, home conditions, physical condition, school conditions, nativity, etc. The two groups of children in the fresh-air classes were all undernourished and anemic at admission.

The results of this experiment, extending from September to June, showed that all of the poorly nourished and anemic children in the fresh-air classes gained in weight, red corpuscles in the blood, general nutrition and physical tone. The gains were made for the most part independently of the home environment and of the financial conditions of the children's family, suggesting that the association between poverty and malnutrition in school children is not so close as has been commonly assumed, and that cases of extreme poverty with lack of necessary food at home are not nearly so prevalent as has been frequently stated.

It was also demonstrated that, even without school feeding, fresh-air classes can be run with advantage to the children of poor families, although the greatest benefit was obtained where extra feeding of children was employed.

Effort to Stop Traffic in Habit-Forming Drugs

IN A desperate effort to stop the traffic in habit-forming drugs in the United States, such as opium, cocaine, morphine and heroin, congress will, within the next few weeks, place upon the statute books a law that is more drastic than anything ever before attempted along this line. This law, the consideration of which by the senate committee on finance has been delayed for many months, will require that every person who imports, manufactures, sells or gives away opium, morphine, coca leaves, cocaine or any of their derivatives or preparations shall register his name with the collector of internal revenue of the district.

Further, he shall not sell this opium, cocaine, heroin or morphine except in pursuance of a written order on a form to be issued in blank for that purpose by the commissioner of internal revenue of the United States treasury department. This order shall be kept on file for a period of two years by the dealer so that it may be accessible for inspection by federal and state officials. The purchaser of these drugs must keep a duplicate of the form for similar inspection.

In other words, if a citizen is addicted to the use of opium or cocaine, and purchases either of these drugs, he must be on public record as a drug fiend, and the dealer on record as a person who is willing to sell to the unfortunate. The law will make certain exceptions in the use of these drugs for purely medicinal purposes when procured on a written prescription from a physician.

"Business" Is Now Dead for Capital's Beggars

"PANHANDLERS" who hang out under the trees along Pennsylvania avenue a few blocks from the treasury have come to the conclusion that "business" here is "dead." The "first aid" ticket of the Associated Charities is blamed by the beggars. The nickels and dimes obtained from citizens of prosperous appearance during the old rich years have gone. Instead the "panhandler" now is given a "first aid" ticket.

When somebody devised the ticket plan packages of the tickets, done up like mileage books, were issued to the business and professional men of Washington.

The "first aid" ticket is the printed application of a citizen for help on behalf of some individual who is supposed to need it. So far the plan has worked well, hence the complaint of the beggars that "business" is poor.

There was a time in Washington when an alert panhandler could get \$4 to \$6 on any pleasant summer evening—all in money, mostly nickels and dimes. But now times have changed. Within the past few weeks Washington has been flooded with "first aid" tickets and the tired business man, instead of shelling out his nickel or his dime, took off a "first aid" ticket and gave his way rejoicing.

The officials of the Associated Charities are pleased with the plan. They say that a man really needing help will come to them, get what he requires and submit his case to the investigation of the charity workers. If he's a professional he wants cash and coin only and he never comes back.

Distress After Eating

is not usually caused from what one eats but from food not properly digested and excessive fermentation.

Booth-Overton Dyspepsia Tablets

Immediately Relieve

WASHINGTON GOSSIP

"It Ain't a Menagerie; Pull Down the Fence!"

WASHINGTON.—From an obscure corner of the congressional directory and a not overly well-known portion of the state of Indiana, steps into the limelight, one Henry A. Barnhart, member of congress from the Thirteenth district of the Hoosier state, and leader of a constituency of 258, 674 souls.

From May 1, 1914, until time shall be no more, the Indiana congressman will be canonized on the pages of fame as the man who discovered that wild animals no longer roam the grand old sidewalks of the District of Columbia, and the man who accordingly introduced a resolution in congress asking that Secretary Lane of the Interior department pull down the high picket fence that surrounds his balliwick. With a flowing wealth of legislative parlance, including sonorous and euphonic phrases, the "gentleman from Indiana" introduced his resolution in the house the other day.

It seems that at some time or other, the picket fence surrounding the Department of the Interior building, on the block bounded by Seventh, Ninth, F and G streets northwest, has held the attention of the Indiana congressman.

Lifting one hand majestically toward the skylight, Mr. Barnhart turned to the house, which waited with bated breath.

"Mr. Speaker," he announced, "this is my resolution:

"Whereas, wild animals no longer infest the business district of the national capital, and horses, cattle and dogs are no longer permitted to roam at large therein, and

"Whereas, ours is a nation of civilized people without need of restraint by barrier of high fences; therefore, be it

"Resolved, by the senate and house of representatives of the United States of America, in congress assembled, that the secretary of the interior be, and hereby is, authorized to remove the iron fences now surrounding the buildings occupied by the department of the interior and the general land office."

ERUPTION SPREAD ON FACE

216 East Elm St., Streator, Ill.—"A running sore broke out above my right eye, which spread over my entire face. It started as a small pimple. I scratched it open and the contents of this small pimple ran down my face. Wherever this ran a new sore appeared. They itched and burned terribly; I couldn't touch my face. I tried to wash my face with soap and water, but it only made it worse. I couldn't see for everyone was afraid of it. It looked like a disease of some kind; it was all red and a heavy white crust on it. Everybody kept out of my way, afraid it would spread. I lost rest at night and I couldn't bear to have anything touch my face, not even the pillow. I had to lie on the back of the head. I was always glad when morning came so I could get up. It was extremely painful.

"At last I thought of Cuticura Soap and Ointment and I commenced using them. It took three weeks to complete the cure." (Signed) Miss Caroline Miller, Apr. 30, 1913.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 22-p. Skin Book. Address postcard "Cuticura, Dept. L, Boston."—Adv.

Tests Show the Value of Fresh Air Schools

THAT school children who are taught in fresh-air classrooms advance more rapidly in their studies and make greater improvement in weight and strength than children in regular classrooms is a conclusion demonstrated by Frank H. Mann of New York before the sociological section of the National Association for the Study and Prevention of Tuberculosis. The speaker reported on a series of experiments carried on jointly by the New York committee on the prevention of tuberculosis and the board of education; in which three groups of children were studied to note the effect of fresh air upon them.

In one group the children were placed in fresh-air classes and were fed during school hours with milk and crackers morning and afternoon; in the second group the children were left in the ordinary classroom under regular conditions. Every effort was made to eliminate or equalize in the comparison such variable factors as age, home conditions, physical condition, school conditions, nativity, etc. The two groups of children in the fresh-air classes were all undernourished and anemic at admission.

The results of this experiment, extending from September to June, showed that all of the poorly nourished and anemic children in the fresh-air classes gained in weight, red corpuscles in the blood, general nutrition and physical tone. The gains were made for the most part independently of the home environment and of the financial conditions of the children's family, suggesting that the association between poverty and malnutrition in school children is not so close as has been commonly assumed, and that cases of extreme poverty with lack of necessary food at home are not nearly so prevalent as has been frequently stated.

It was also demonstrated that, even without school feeding, fresh-air classes can be run with advantage to the children of poor families, although the greatest benefit was obtained where extra feeding of children was employed.

DEMAND IS FOR ABLE MAN

High Positions Waiting for Those Who Are Competent Properly to Fill Them.

We know a big firm in one of the oldest and most important industries in this country which has been hunting for over a year for a man to whom to pay \$15,000, and they cannot find him, writes the editor of the American Machinist.

We know an executive who wants two or three men as assistants; if he could find them in his plant he would gladly pay them \$40 a week. He has tried a considerable number in these positions during the past year, but without success as yet. He feels that he is positively hampered by the lack of them.

We know that there is an active demand for \$2,000 men, and we can readily believe that there is a keen demand for \$10,000 men.

It is remarkable that in a plant employing, say a thousand men, there are so few who raise themselves above their fellows far enough to be conspicuous to the management. And even, of those few, not all have the initiative, the ginger, and faculty of being thorough that would make them of value as assistants to the executive. What a god-send to the engineer is the draughtsman who can do his own thinking, and dig out the solution of a problem somehow without constant prodding and pointing from the boss!

Queen Poor Conversationalist.

Queen Mary is a poor conversationalist. On some one being brought up to her it is said she will begin to talk with remarkable felicity, getting the other at ease and delighting him. Then, all of a sudden, she suddenly ceases, an acute silence supervenes and the other does not know whether to break the pause or slip away. The fact is the queen talks well by dint of concentration; this does not always last until the end of the conversation, and once the thread is broken she grows abstracted, thinking of something else.

The Busy Man.

Peals of laughter came from the president's room as the secretary stopped out.

"Mr. Green is too busy to see you at present," said the secretary, politely.

"I'm sorry," said the man who called on business. "Will you go back and tell Mr. Green that I've got two stories just as good as the one he's heard, if he'll let me in to tell them?"

Lived by His Character.

"That man is absolutely devoid of character."

"What does he do?"

"Oh, he is a character sketch artist on the stage."

DID THE WORK

Grew Strong on Right Food.

You can't grow strong by merely exercising. You must have food—the kind you digest and assimilate.

Unless the food you eat is digested it adds to the burden the digestive organs have naturally to carry. This often means a nervous breakdown.

"About a year ago," writes a Manly lady, "I had quite a serious nervous breakdown caused, as I believed, by overwork and worry. I also suffered untold misery from dyspepsia.

"First I gave up my position, then I tried to find a remedy for my troubles, something that would make me well and strong, something to rest my tired stomach and build up my worn-out nerves and brain.

"I tried one kind of medicine after another, but nothing seemed to help me.

"Finally a friend suggested change of food and recommended Grape-Nuts. With little or no faith in it, I tried a package. That was eight months ago and I have never been without it since.

"Grape-Nuts did the work. It helped me grow strong and well. Grape-Nuts put new life into me, built up my whole system and made another woman of me!"

Miss Vergie Moberly returned a week ago, to take up life again among her friends in this vicinity.

W. A. Franklin visited White Oaks on business one day last week.

There was, we learn, a Sunday picnic at the school house last Sabbath day. People from Ancho attended.

Max Guobarra returned from El Paso last week, where he was called on business.

Maurice Brookins left Monday for the Bonito river in search of straying cattle from this neighborhood.

We understand that Mr. Carter, of Ancho, has bought the ranch belonging to James Cooper in Jicarilla.

Mrs. Mary Campbell, of this place, is getting homesick for Oklahoma, and is anticipating a visit to that state in the near future.

Coyotes are so numerous and so hungry around here that they are slaying poultry in great numbers. Some people are losing at an alarming rate.

One of the heaviest down pours is said to have occurred at or near the Pecos last week. From a person who witnessed the rain, we learn that water lay a foot deep on the ground for some time.

and when it subsided it was found that great numbers of "prairie dogs" were drowned. Having been driven from their holes by the water, they rushed out to be drowned on the surface.

St. Cafabajal is having his wool crop hauled to Coroda, we hear, and T. W. Stonerod is delivering the "goods" across country with his big mules.

Now that the big strawberry crop is drawing to a close, the cherries are coming in, and of each we have a bountiful crop. But one must be vigilant, for the birds are numerous and share with man his eagerness for fruit. The peach crop is the heaviest we have ever had in this part of the country, all of which seems strange tidings to go forth from the Jicarillas, but it is never-the-less a fact.

All crops and gardens are fine, and every one who planted is more than satisfied with the conditions. Outside of the farmers realm every thing is quiet but hopeful.

The health of the camp and vicinity is perfect, and who could be sick in such an ideal climate.

Profits in Hides and Horses

LIVESTOCK breeders have for many years neglected the breeding of horses and mules and each year see the government experiencing greater difficulties in securing the number of animals actually necessary for the present military establishment, while actual war would feed the country

without suitable horses for the cavalry and but a small number of mules in comparison to the needs of the army.

This condition was brought about because many years ago horses became very cheap and breeders went out of the business, to stay out, and very few stopped to consider that the unfavorable conditions were due to the flooding of the markets with inferior animals. It is a fact that an animal capable of meeting the government requirements has readily sold at a good price, and always will, mule or horse, and at the present time the United States government is making desperate efforts to purchase a sufficient number of horses and mules for existing needs.

The government recently closed a contract for 1,800 horses and 858 mules, involving more than \$250,000, and it is admitted by the government buyers that it will not be long until the standard at present established by the government must be modified or the prices will go still higher. The government will pay fancy prices before permitting established standards to be lowered in any way, as army officers are well aware of the demonstrated fact that the very best is more too good for the important work depending upon the horse and mules in all branches of the army.

The splendid ranges of Lincoln county can be easily and cheaply utilized for the breeding of horses, and that without crowding off one head of stock of any kind

now being grazed. Many of the stockmen of the county could easily bring up the grades of their present herds to meet even present requirements of the government, and could extend the business with a smaller investment than is now necessary if they desire to increase their herds of cattle or sheep.

The bids of the various dealers in Kansas City, where the contract was let, ranged from \$149 to \$237.50 per head, according to the Drover's Journal.

Those desiring information as to government standards can secure it by addressing the department of agriculture, and can also obtain such bulletins as the government issues. It will be an easy matter to estimate the percentage of large and medium animals by the recent contract.

Of the 2,658 animals contracted for 1,000 were cavalry horses, 230 seige battery horses, 320 light artillery horses, 250 saddle horses, 380 wheel mules, 270 lead mules and 208 pack mules.

The lead and pack mules could be bred in this county from present herds with comparatively small expense for good jacks, and stock men should look into these opportunities. At the present time there is also a strong demand for good cow horses, almost every large ranch in the entire country complaining of a shortage.

There is money to be made in horses and mules.

Notice for Publication

02323
Department of the Interior,
U. S. LAND OFFICE,
Hoswell, New Mexico,
June 23, 1914.
