VOLUME 15.

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, JULY 31, 1914.

NUMBER 24

## The Political Situation

A

The present writing the political conditions in New Mexico are both interesting and promising for the final defeat of the already discredited republican bosses. The defeat of the bosses also means the defeat of their schemes for the creation of a strong political organization at the expense of the tax payers.

The republicans started their campaign by announcing a new harmony programme which included both republicans and progressives. The claims of an understanding between republican and progressive leaders seemed to have some foundation in fact when Jesus Romero, progressive leader of Bernalillo county, led his forces into the republican camp and secured representation in the coming republican state convention upon the combined vote cast at the last election.

However, the republican bosses had hardly reached their homes before trouble broke out in a new place, and a new kind of trouble, too.

Elfege Baca has long had congressional aspirations, and after the double-cross worked on him at the first state election a number of the bosses, including one Andrews, known to politics as "The Bull," began operations to sidetrack the pestiferous Albuquerquean. Andrews decided to seek the congressional nomination and announced his candidacy as the result of a petition of citizens. Elfege immediately smeared himself with war paint and got busy with his tommy hawk—and got real busy, too. He started by charging Andrews with going back on his promises, of getting up the petition to himself, and promising to wear his tongue thin fighting the gentleman from Pennsylvania. And then the peace doves got busy, with the general result that four men are under charges of criminal libel and several \$25,000.00 damage to character suits have been started. Every boss turned against Elfege Baca, but that past master of political trouble makers has formed an offensive and defensive alliance with Jesus Romero, and that combination is so dangerous to republican peace that many of the bosses are already in their cyclone cellars.

The present situation almost assures two or more contesting delegations to the republican state convention from Bernalillo county. Elfege will have one, Andrews must have one, and Reilly, also a candidate, will have one if he can arrange it. Bernalillo county has three candidates for congress, and the candidate with no home delegation behind him stands no show.

Some of the bosses are working to slip over a dark horse in the person of E. C. Crampton, of Colfax county, who, because of his past political affiliations, would be slaughtered.

The race issue has been injected into the republican fight. Andrews realizes the importance of having a Spanish-American on his ticket, and is for himself for congress and a Mexican for corporation commissioner. If the friends of Hugh Williams, present commissioner and a candidate for another term, catch on to the Andrews game in time it will naturally lead to a combination with Elfege Baca, and then there will be some more trouble.

To add to the republican troubles the progressive state committee recently held a large and enthusiastic meeting in Santa Fe and declared against either going in with the republicans or endorsing any candidate but their own, which probably disposes of republican hopes in that direction. The progressives will hold their state convention in Belen.

There are rumors of trouble in the democratic party, but sifted down it dissolves into local rows over two or three postoffices, with nothing of sufficient importance to find its way into a state convention. And in the meantime the republicans are having real trouble.

### New Lawyer Locates

CARRIZOZO has a new lawyer located in the person of Huel R. Ingworth and splendid attainments, who arrived Sunday from Tucumcari, and who has secured offices in the Exchange Bank building. Mr. Wood is a native of South Dakota, born in the celebrated Black Hills. He graduated at the state university from the law department in 1910. Was active the same year in the management of his father's campaign for governor of South Dakota, the elder Wood being the democratic nominee. Removed from South Dakota to Chicago where he was employed in the capacity of private attorney for a public utility corporation. Came to New Mexico, landing at Tucumcari in 1913, and while looking the field over entered the engine service of the El Paso & Southwestern. Was admitted to the New Mexico bar January, this year. Mr. Wood comes to us

excellent recommendations from those with whom he has been associated as a young man of talents, and we bespeak for him a cordial reception.

### Will Drive to Mountainair

A number of automobiles are preparing to make the trip to Mountainair Sunday, over the Gran Quivira Highway. Monday, the 3rd, is Good Roads Day at the Chantauque, and on that day the Gran Quivira Highway Association will also hold a meeting. The plan of the autoists is to drive to the Gran Quivira ruins, take lunch, spend two or three hours there looking over these prehistoric ruins and motor to Mountainair in the afternoon. Was it not yet definitely ascertained how many cars will make the trip, but four have arranged to go and two others may be added.

### Carrizozo Wins from Capitan-Mesa Giants by Score 5 to 2

G. O. N.

THE Carrizozo Browns added another to their string of victories Sunday, defeating the Capitan-Mesa Giants, in a very good exhibition of the national game.

It was a pitcher's battle from the first, Dolan of the Browns, having a shade the better of it. While the strike outs and hits were the same Dolan showed the best form never being in a hole, while Hightower got into several bad holes and gave four passes.

Van Schoyck took the batting honors with two hits and hitting at opportune times. Nickel who has been hitting well all season must have had the Indian sign on him, as he failed to register a hit and struck out three times, which is very unusual for him.

The Carrizozo infield worked very pretty, only one error being marked up against them. Reilly showing up very good with 2 put outs and 4 assists and 1 error. Dingwall with 2 put outs and 2 assists. Grumbles 2 put outs and 1 assist; Van Schoyck 11 put outs and 3 assists; Dolan 2 assists; Lee 8 put outs.

One thing noticeable about the Carrizozo outfield, it is impossible to get a line on them this season as in this game there only being one ball hit to the outfield, which went for a clean hit. Coe, Captain's new catcher showed up very well, both behind the bat and throwing to base. And also in using good judgment and getting more out of Hightower than he has ever shown here.

The line up:

Carrizozo	AD	H	R	BB	FO	A	E	BI
Dawson, cf	4	1	0	0	0	0	0	1
Reilly, ss	4	0	0	0	0	0	0	0
Van Schoyck, c	4	0	0	0	0	0	0	0
Nickel, of	4	0	0	0	0	0	0	0
Dolan, p	4	1	1	0	2	0	0	0
Grumbles, 2b	4	0	1	0	2	0	0	0
Dingwall, 2b	4	1	0	0	1	0	0	0
Lee, 1b	4	0	0	0	0	0	0	0
Harris, 3b	3	0	0	0	0	0	0	0
Capitan-Mesa	AD <th>H</th> <th>R</th> <th>BB</th> <th>FO</th> <th>A</th> <th>E</th> <th>BI</th>	H	R	BB	FO	A	E	BI
P. Hightower, cf	4	1	0	0	0	0	0	0
Coe, c	4	0	0	0	0	0	0	0
Scott, 2b	4	1	0	0	0	0	0	0
J. Dawson, 1b	4	1	0	0	0	0	0	0
Ferguson, 3b	4	0	0	0	0	0	0	0
G. Hightower, p	3	0	0	0	0	0	0	0
Thompson, 2b	3	0	0	0	0	0	0	0
J. Gallacher, 1b	3	0	0	0	0	0	0	0
Keller, cf	3	0	0	0	0	0	0	0
W. Gallacher, ss	2	0	0	0	0	0	0	0
	31	4	1	0	7	0	0	0

Summary: Batteries Carrizozo, Dolan and Van Schoyck; Capitan-Mesa, Hightower and Coe. 3 base hits, Scott. Struck out by Dolan 11; by Hightower 11. Bases on Ball by Hightower 4. Stolen bases, P. Hightower, G. Hightower, Dawson, Dingwall and Reilly. Time of game, 1 hour 25 minutes. Umpire, Wayne Van Schoyck. Score-keeper, Art Roland.

### Crops Best on Record

LOCALLY, that is to say, in the vicinity of Carrizozo, little attempt has been made to farm, and yet those who have planted forage crops are going to reap abundant harvests this year. But on the other side of the big hill—on the Mesa, around Capitan, Bonito, Little Creek, Eagle and all the upland Mesas of the east slope of the mountains a most magnificent crop is being grown. Corn in much of that upland country will yield 40 bushels to the acre—some of it 50—oats 60 to 75 bushels, beans and other crops in proportion. Down in the irrigated areas fruit and alfalfa are most excellent and the farmer of Lincoln county, in common with the stockman, is enjoying unrivaled prosperity.

### Teachers Institute

MONDAY MORNING at the local school building opened the Lincoln County Institute, for a term of two weeks. We were fortunate in getting Supt. Jos. S. Holter, of Tucumcari, to take the place of Dr. Erloe who is ill. Miss Jean Forsyth, of Silver City and Prof. A. McChurdy are assisting.

Twenty-eight are in attendance mostly from the county. From Corona are enrolled Misses Donnie Franks and Theo Richardson, Mrs Edna Burnett, of Ancho, Misses Edith Wells and Robbie Taylor, of White Oaks, Prof J E Koonce, from Richardson, Mrs Eurlene Lane and Miss Ethel Phillips, of Fort Stanton, Mrs Smithson and Mrs Craddock, from Capitan, J F Davis, of Angus, Miss Agueda Baca, of Lincoln, Prof Geo E Cardwell, of Nogal, Mrs C E Hulbert, of Taos, Mrs Bessie Case, of Three Rivers, Miss Gertrude Keller, of Nogal Mesa, F A Haggard, of Varney; those enrolled from Carrizozo are S R Moss and wife, Mrs de Nison, Mrs Mary Orr, Mrs E V Jewett, Mrs E H Nickels, Misses Bernice Barber, Buelah Brazel, Vera Harris, Iona Stevens.

The classes are starting with great earnestness, and the schools should be much benefited by the excellent methods and professional work that is being discussed. The public are cordially invited to attend.

### Notice to the Public

At a meeting of the Civic League, it was decided to start the delayed cleaning of the town. All residents are urged to clean their premises and adjoining lots. Next week wagons will be sent to all parts of the town to collect refuse that has been piled or sacked.

Let us all do our share to make the town more sightly, and improve the sanitary condition of Carrizozo.

### CARRIZOZO CIVIC LEAGUE.

### Home Mission Society

THE ladies of the Home Mission Society will give a lawn festival at the adjacent residence of Mesdames Brown and Cribb on Thursday evening, August 6th. Luna will be doing her brightest and, together with the inviting prospect of ice-cream and cake mixed with music galore, you can expect the biggest time you've enjoyed "for many moons." Ice cream will be served at 15c per portion; with cake, 20c per portion. Remember the date and come.

### Baptist Church

HERBERT HAYWOOD, Pastor. Bible School at 10 a. m. At the 11 o'clock hour will be delivered diplomas for such as have passed examination in Teacher's Training Course. As we understand it the Carrizozo Baptist Church is the first church in the state to make this course. This being the anniversary of the present pastorate, special sermons will be preached morning and evening. Among the extra numbers in music will be solo by Mrs. Haywood, and duets by Mrs. Watson and Mrs. Haywood, morning and evening. The Bible and Education will be theme for the service at 7:45 p. m. You are cordially invited to attend all the services. Come and worship with us. Midweek service Wednesday nights at 7:45.

### To Mediate Differences

THE threatened strike of engineers, firemen and hostlers on ninety-eight western railroads, having a membership of over 50,000, has been averted for a time, at least. The operators and employees will submit their differences to the federal mediation board, and it is sincerely hoped that a compromise may be effected, satisfactory alike to labor and employer.

A strike of the nature proposed would probably be more disastrous than would a Mexican war. The organization demanding redress from the railroads has for members the most highly skilled class of laborers of any in America—an equal mixture of brain and brawn—and, as intelligent men, they must realize what an awful condition will follow the declaration of a strike. On the other hand, the operators must be as keenly alive to the disasters that would follow, the paralyzation of commerce and the misery and woe—not only to themselves and their employees, but to all people and every interest touched by the lines—in the event of a strike. So it would seem that both employer and employee would see the pressing necessity of compromising their differences rather than to go to extremities.

As to the real merits of the question at issue, we are not qualified to speak. So many technical features are involved, so many things that are peculiar to this line of work and with which the average man has no acquaintance are intermixed with an assertion, on the part of an outsider, as to the right or wrong in the matter would be an assumption not warranted. This we can say, with we think, a degree of safety, and that is that this strike, if strike it is to be, will not be one by an ignorant class of foreigners, but by intelligent, skilled laborers who think they have a grievance and who have been able to convince many disinterested people that some of their claims for redress are founded on justice.

Again we say, it is to be hoped that mediation will be successful and that both operators and employees will receive just treatment.

### Two Burglaries

BURGLARIES can't be said to be epidemic here, although they have a way of happening every once in a while. This week two successful attempts were made, and from indications both by the same parties, there being only a night's difference between the commission of the deeds.

The first occurred Wednesday night, when the shoeshop of A. E. Williams was raided and some of the contents taken. Among the missing articles was a pair of newly made boots, two pair of ladies' shoes and one pair of men's, the latter three items having been left at the shop for repairs. Entrance to the shop was effected through a side window, a bar of iron, crowbar or something similar having been used to pry up the window.

Last night another burglary was committed, the saloon of Porfirio Chavez having been forcibly entered from the rear. The instrument used in forcing an entrance in this instance appears to have been the same or one similar to the one used the night before to enter the shoe shop. At any rate, last night the

burglars filled the cash drawer, securing about \$25 00, took about 20 small bottles of whiskey and from one to two dozen bottles of beer. Carrying booty to that extent, and if a large portion should get inside, the apprehension of the culprits should not be difficult.

### Dogs of War Loose

AGAIN the Balkans furnish the locality for what promises to be a most bloody war. Serbia has refused to do Austria's bidding and Austria has invaded Servian territory. Fighting has already begun and the Danube was yesterday made red by the blood of the combatants. The most serious clash turned on an artillery duel, and the Servians are said to have repulsed the Austrians.

The disparity of the two powers would indicate an early end to hostility, if the two were left alone to fight it out; for Austria can put ten times as many men in the field as the Servians, and while the Servians are recognized as splendid soldiers the natural result would be that the preponderance of Austria would overcome them. But the situation is more grave than that; for all indications point to a larger field of activities, which almost inevitably must involve Russia, Germany, Italy and France in the conflict, not to mention a number of the smaller Balkan states, every one of which has its bristles up. Russia, if involved at all, is certain to take the part of Serbia; Germany and Italy, by reason of triple alliance, will join Austria; France will assist Russia, and as the conflict advances the possibility is that every continental nation of Europe will be drawn into the bloody vortex, and before it ends the map of Europe will likely undergo some radical changes. England, too, may be forced to take part, even against her settled policy of peace; and it is the general feeling that Europe will, in a very short time, be fighting in more different languages than ever before.

The effect of such a conflict on the commerce of nations has already been shown on the stock exchanges, not only in Europe but in America as well. The war scare sent stocks down and provisions up. But when the titanic struggle becomes an actual fact the kaleidoscopic changes will occur. Wheat has already jumped above the dollar mark and all provisions have taken an upward trend.

### Boil Your Water

THE source of our domestic water supply, the local reservoir, has been used by the boys as a bathing pool. It was reported last week that our supply for drinking purposes was not as sanitary as it should be, that a bunch of boys were making a natatorium of the reservoir and that the site was being watched. Therefore, yesterday five youngsters were caught in there and haled before Justice Massie, charged with polluting the water. They were Dayton Heron, Ivory Phillips, Dill Peck, Sam and Scott Kennedy. The boys, when arraigned, were given a lecture by Justice Massie, and discharged, not however, until they were informed that a repetition of the offense would mean a jail sentence. It is, therefore, the part of wisdom to boil all drinking water.

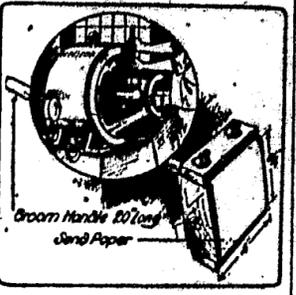

# THE ELECTRICAL WORLD

## CLEANING BLOCK IS USEFUL

A Handle About Twenty Inches Long Affords Chance to Apply the Necessary Pressure.

A simple and very useful commutator cleaning block may be made of three pieces of wood, two bolts and a piece of a broom handle. The broom handle is fitted into the block and the block drilled for two holes, as shown, taking one-quarter-inch bolts five inches long. The slotted heads may be countersunk in one of the strips of wood and thumb nuts are used at the threaded end of the bolts. The block may be hollowed out to conform to the arc of the commutator, but if the blocks is not made too wide, that is not necessary.

The handle being about twenty-two inches long gives a chance to apply

Commutator Cleaning Block.

necessary pressure to handle the block and move it across the surface, says Popular Electricity. It is a much better method than holding the sandpaper under the fingers or holding it to a block held in the hand.

## ELECTRICITY GRINDS COFFEE

Man of 45 Says It Does Not Taste as Good as Formerly—Little Work Required Now.

"Twenty years ago it was my duty to do some of the marketing," declared a man of forty-five, according to the New York Sun. "My marketing was confined mostly to buying groceries, as my wife was timid about trusting me with the purchase of meats and vegetables.

"Probably, the thing that pleased me most to buy was coffee. In those days, as now, grocers kept two kinds of coffee on hand, that already ground and that in the bean. From the first my wife wanted me never to buy the former, but to have the coffee freshly ground. This was agreeable to me, for the reason that it pleased me to watch the bustling grocer take the scoop, dig into the coffee in the canister and bring me half a scoopful of the brown beans.

"On his way to the grinder he tore down a paper bag from a hook near the counter. Then he poured the coffee into the grinder, arranged the receiving tin underneath, grasped the handle and with a jerk set the wheel spinning. The next instant you could hear the beans being ground inside the machine. Then you saw the ground coffee falling into the receptacle and the aroma of fresh ground coffee filled your nostrils. That's how they ground coffee in the old days.

"Not having done any marketing in recent years, I was not aware that modern methods have revolutionized coffee grinding. However, the other day I went to purchase coffee and I saw the old mill has been supplanted by the electric mill. The up-to-date mill does not require much work from the grocer. All he does is to throw in the beans, turn on the switch and electricity does the rest. But somehow the coffee does not taste as good as when ground by the old method."

## NEW ALLOY FOR DIAPHRAGMS

Metal Successfully Used in England for Telephone Connections Being Tested Here.

A new steel alloy metal is being so successfully used for telephone equipment in England that several of the telephone companies in this country are now testing it for receiver diaphragms. It is called "stalloy" and its chief characteristic is that the addition of three per cent silicon increases the resistance of the alloy to about three and one-half times that of the ordinary transformer iron, so that the eddy current, when it is used as part of the alternating current magnetic circuit, is greatly reduced.

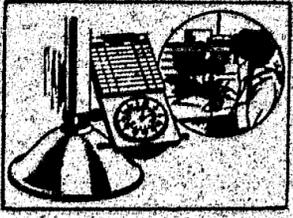

## Pictures by Telegraph

Berlin reports say that the latest method of Prof. Alfred Korn of Munich for sending photographs by telegraph has been perfected, that it may be possible within a year to transmit pictures across the Atlantic. Some time ago it was announced that Professor Korn had made great progress with his invention that successful telegrams had been sent from Munich to Nürnberg, a distance of about one hundred miles. He asserted at the time that he expected to be able to transmit to New York a picture which would be good enough for newspaper use to 35 pictures.

## Accurate Record of Length of Conductor

offered by Long Distance Communication to Make.

An accurate record of the time consumed in long-distance telephone conversations may be obtained by a clock-like device, recently placed on the market, which works on the principle of the stop watch, says Popular Mechanics. The device is provided with a minute hand and second hand, and is started and stopped simply by pressing

Device for Recording Time.

a lever on the left side of the case. It is easily attached to the telephone at the side of a desk by means of a clip, and carries a pad for recording the time.

## TELEPHONE MADE FOR DEAF

Letters and Numbers Flashed on Buttons by Electricity—Is Worked Like a Typewriter.

An optical telegraph intended to fill the place of the telephone for talking with a deaf person has recently been invented by a deaf and dumb married couple. It consists essentially of a keyboard, as in a typewriter, through whose keys single electric currents pass. In each circuit is included an incandescent lamp with a flat surface, bearing a letter of the alphabet or a Roman numeral. Pressing any key causes the corresponding lamp to glow. Thus words and sentences are spelled out and numbers are formed.

The keyboard can be operated as fast as that of an ordinary typewriter, so that with practice communication becomes very smooth and rapid. Each station, of course, must contain both a sender and a receiver, and these may be in different rooms or in houses a long distance apart.

The instrument can be conveniently used for conversation between a deaf person and a normal person who is ignorant of the finger language. The silence with which the device is operated is a very important point in its favor. This feature might make it especially useful where quiet or secrecy in transmitting information is desirable, as in sending war news or secret instructions in business houses.

## GIVES BIG BALL OF LIGHT

Fixture is Designed to Fit snugly to the Ceiling—Glass Used is of Diffusing Type.

A lighting fixture which fits snugly against the ceiling is shown in the illustration. The glassware used in the hemispherical globe is of the diffusing type. When lighted this gives the appearance

New Light Fixture.

of a solid half globe of light. The incandescent lamp is not visible to the eye and for this reason the fixture is well suited for the general illumination of a room.

The glass globe is released, for cleaning purposes, by means of a screw in the side of the fixture.

## ELECTRICAL NOTES

About six per cent of Ohio's automobiles are electric cars.

Wireless telephoning between Paris and a suburb of Brussels recently was accomplished.

A fan-cylinder motor for aeroplanes that can develop 100 horsepower is a French development.

The great electrical companies of Germany have taken up the construction of motor cars.

Electrical apparatus to trace the source of buried water pipes by sound has been invented by a St. Louis man.

In a Samokov, incandescent gas burner of European invention the gas is forced into a porous disk which it burns.

Experiments are under way in India with cooling buildings by forcing currents of air through hollow walls with electric fans.

Designed to tell children, a new incandescent lamp can be removed from a socket in the usual way, but cannot be removed until the glass is broken.

# IMPROVEMENT

## TO STUDY ROAD CONDITIONS

Data Being Sought Looking Toward Standardized System of Local Road Management.

Detailed studies of local road building systems in 100 counties are now being carried on by the department of agriculture in co-operation with the state highway departments and local road authorities.

The purpose of this study is to discover the points of weakness and defects in existing local methods of building and maintaining roads which will aid the state authorities to set local road management on a systematic basis. The co-operating state authorities have been asked to designate counties that present typical and exceptional features as to topography, character of road materials, methods of construction and maintenance, administrative organization, methods of road financing, and traffic conditions. From these lists 100 counties will be selected, and in these counties the division of road economics will make intensive studies.

This investigation is prompted by the fact that there is at present very little knowledge as to the most effective and economical methods by which a county can develop its roads. At present the methods of financing local road improvements vary from

Balling a Road Surface.

calling on farmers for a certain number of days labor in lieu of a road tax or the use of county prisoners in road construction, to bond issues or maintenance of roads from grant money.

The department will study all of these systems with the view to determining what system or combination of systems works best in actual practice.

There is, however, at present no standard system of keeping accounts for road building and maintenance, and as a result, while some counties know to a penny the purpose for which money was spent, others have no definite check or reporting system. Among various counties with the same conditions, cost for excavation or other labor is anything but uniform, and many counties, because of the absence of definite knowledge, fail to use local and cheap materials and construct roads which are unnecessarily expensive for their purpose, or which will wear out before the bond issues are redeemed. The investigation will include a careful study of the use of convict labor in road construction.

In connection with the scientific study, the department's highway engineers will advise freely with local officials as to improvements, and they give each county visited the advantage of direct co-operation, engineering supervision and assistance.

These investigations, it is believed, will yield important economic data bearing especially on the benefits and burdens of road improvement and showing the extent to which financial outlay makes given typical conditions is justifiable.

The heads of state highway departments are manifesting great interest and are co-operating cordially in this work. These data when obtained will be published and thus made accessible to all county and state road officials.

Letting Sun Shine on Highway. The earth road should have at least six hours of sunshine each day. This can be obtained either by locating the road with southern or western exposure or by having such brush and trees as impede the drying action of the sun and wind removed. With gravel and some roads this is not so necessary, as a certain amount of moisture is needed on such roads, especially in the summer time.

Bring Market Neerer. The good road brings the market nearer to your farm and adds materially to the value of the place, whether you want to sell or live there.

Heading Dry Headaches. Heads would never be located so close to streams had it not been subject to convulsion, or an ailment which is constantly drowsy and weary.

Every Citizen Interested. A highway is no longer of purely local interest. Every citizen of a State is interested in the road.

## Properly Plunged at Temperature Point in the Refrigerator at 45 Degrees

Details of the method of preparing the jelly are given. A lady dessert is made thus: Dissolve the contents of one envelope of granulated gelatin in one pint of boiling water; stir it to make the powder and then pour it into a bowl, and as soon as it starts to "set" beat with a rotary egg-beater until it is light. Then pour in half a pint of rich, sweet milk, a pinch of salt, two ounces of crushed stale-baked macaroons; if this is soft, put it on the ice until it stiffens again. Then add a few drops of sweet almond flavoring and one gill of granulated sugar. Wet a mold, pour the water out of it and refill with the mixture; put it in the refrigerator to ripen.

Serve with plain or whipped cream and lady fingers.

With Fruit.—Fill individual glasses a little more than half with mixed fruit, fresh or canned; drain off all juice; make one pint of orange or lemon gelatin; as soon as cold put it by spoonfuls over the fruit; serve very cold, with cream and sponge cake.

Prune Delight.—Wash, soak and cook in only enough water to cover them one pound of good prunes; while they cook put in a pinch of salt, two inches of stick cinnamon; grated yellow rind of an orange and one lemon; six whole cloves, one gill of strained lemon juice and one gill of brown sugar. As soon as the prunes are very soft stir in one package of granulated gelatin; previously dissolved in cold water. There should be over one pint of liquid. Stir until melted. When cold serve with cream and soft gingerbread.

Line a plain mold with pale apple jelly, dotted with diamond-shaped pieces of truffle. Blanch and brine a large sweetbread, and when it is cold, pound it in a mortar with eight ounces of the white meat of a boiled fowl and a tablespoonful of pate de foie gras; and then pass the mixture through a fine sieve. Bring a large cupful of milk to a boil with a small chopped onion, a dozen white peppers, a blade of mace, a few thin strips of lemon peel, and a thin slice of fat bacon. Simmer twenty minutes and then strain over a tablespoonful of butter rubbed smooth in two of flour. Stir quickly until thick, season with salt and white pepper and dissolve in half an ounce of gelatin. Pour into a basin with the sifted chicken and sweetbread and two tablespoonfuls of sherry.

## GOLD ENTREE HARD TO BEAT

Mousse of Sweetbread Just the Thing for the Table When the Weather is Hot.

Line a plain mold with pale apple jelly, dotted with diamond-shaped pieces of truffle. Blanch and brine a large sweetbread, and when it is cold, pound it in a mortar with eight ounces of the white meat of a boiled fowl and a tablespoonful of pate de foie gras; and then pass the mixture through a fine sieve. Bring a large cupful of milk to a boil with a small chopped onion, a dozen white peppers, a blade of mace, a few thin strips of lemon peel, and a thin slice of fat bacon. Simmer twenty minutes and then strain over a tablespoonful of butter rubbed smooth in two of flour. Stir quickly until thick, season with salt and white pepper and dissolve in half an ounce of gelatin. Pour into a basin with the sifted chicken and sweetbread and two tablespoonfuls of sherry.

While a pint of cream, and as soon as the sweetbread mixture is cool, stir it in and add the stiffly beaten whites of two eggs. Pour the mousse at once into the molds lined with apple, and leave it on ice to chill. Turn out on a flat platter and garnish with alternate slices of tomato and cucumber and a bunch of watercress here and there.

Green Gooseberry Pudding. This may be made the same as rhubarb pudding with a sweet paste, and boiled, steamed, or made in a deep pie dish with good ordinary paste with a little cornstarch mixed with the sugar to thicken the juice. When the gooseberry filling is thick enough to support the mixture, lift out the crust and pour in a layer of cornstarch custard cooked in a double-boiler, the whites of the eggs reserved for a meringue to cover the top. The top crust may be served at another meal spread with canned peaches or pears.

Or instead of a top crust, cover the dish with another pie dish until the gooseberries are done. Another way is to replace the top crust and return pie to the oven until the custard mixture is cooked quite firm. The pie is then served cold with upper crust, without a meringue.

Chocolate Fudge. Three cupfuls of light brown sugar, two squares of chocolate, a cupful of new milk, one-half teaspoonful of cream of tartar. Cook in a granite pan until it threads; add a lump of butter the size of a walnut, and when thoroughly mixed remove from the fire, add a tablespoonful of sweet cream and a teaspoonful of vanilla and beat till it begins to thicken. Pour into shallow buttered pans and when nearly cold cut into squares.

Mrs. Ford's Green Currant Pie. Like a deep pie with paste. Fill with green currants and sugar in alternate layers, using at least two-thirds as much sugar as fruit. Keep the fruit as well as it shrinks in cooking, and shake over the top a tablespoonful of flour to thicken the juice. Cut into in the top crust or prick with a fork. Bake in a moderate oven from thirty to forty-five minutes.

Delicious Pie. Line a deep pie plate with a rich crust, rub crust with butter and put in a layer of dates, ten to twelve to an ordinary pie; they must be stoned and cut in pieces; then fill the plate with sliced rhubarb, three heaping tablespoonfuls of sugar mixed with one teaspoonful of flour; put on top crust.

To Clean a Dishcloth. A dishcloth may be conveniently cleaned by wrapping it around a wash board and thoroughly scrubbing it in soap.

## HAD THE PICTURE'S MEANING

Spectators at Least Formed Some Idea What Famous Painting Represented.

Two men stood before a painting in a store the other day gazing wonderingly at a picture of an equestrian statue of General Lafayette. The famous Frenchman was represented on a prancing steed. Over his arm he carried a robe. At his feet stood an allegorical figure of Victory extending a sword toward him as a mark of homage. I wonder what that picture meant? asked one of the men. "I don't know," replied the other. "I was just trying to make out what section of the year it was when a woman could go around with so little clothing while a man was dressed up in a heavy suit like that." "Oh, I see what it is now," cried the first one. "You see the soldier stole the woman's cloak and when he took it from her he dropped his sword, and now the woman is trying to trade him back the sword for her clothing."

The Way of Progress. A dog barking at a passing automobile is generally supposed to be as telling a symbol of futile objection to the march of progress as could well be imagined. In the almost same category, however, belongs the strike of the stevedores in New Orleans against the introduction of the electric truck to transport freight between vessels and warehouses. The wonder is that this improvement has been so long delayed instead of being now appearing—and then as a source of a new labor difficulty. One cannot have much sympathy for opposition in this particular instance. The motor vehicle in all of its forms has come to stay, and the rest of the world has been rather rapidly adjusting itself to the new condition.—Engineering Record.

A Poet. Mathematical Professor—I have now completely discussed the theory of probability. Are there any questions? Problematical Freshman—Yes, sir. Will you please compute the probability of my passing this course?—Dartmouth Jack o' Lantern.

The Unfortunate Fact. "A man's sins find him out sooner or later," said the cynic; "but unfortunately, most of the time they find him in."—Judge.

Public Opinion. People say how strong public opinion is, and, indeed, it is strong while it is in its prime. In its childhood and old age it is as weak as any other organism. I try to make my own work belong to the youth of public opinion. The history of the world is the record of the weakness, frailty and death of public opinion, as geology is the record of the decay of those bodily organisms in which visible opinions have found material expression.—Samuel Butler.

If you wish beautiful, clear white clothes, use Red Cross Bag Dye. At all good grocers. Adv.

A man isn't necessarily honest because he is poor.

## Throw Away

your complexion troubles with your powder puff—no need of either when you use pure, harmless

Chicago

**LOCAL & PERSONAL**

The Parker residence on Elm street is sporting a new shingle roof.

Gene Schaeffer and George Dingwall returned Sunday night from El Paso.

Roadmaster New and Foreman Hale were here Wednesday from the Capitan branch.

Mrs. Harry B. Dawson spent this week at White Oaks, a guest of Mrs. Ray E. Lemon.

Miss Rosa Lutz was here Sunday to Tuesday, guest of Mrs. T. W. Watson.

Mrs. R. Burton Provine, of Capitan, is visiting her sister, Mrs. W. H. Orme Johnson.

Miss Ida Schimpff, one of Carrizozo's school teachers, will be home Sunday from Silver City.

Mrs. Massie returned last week from Las Vegas, where she has been attending the State Normal.

Property on which taxes are delinquent will be sold by the county collector Monday.

Miss Mildred Peters reached home Sunday night, having spent the past two months in the Silver City Normal.

Mrs. John W. Hendrix went to Mesquite last week to visit her parents. She is expected to return today.

J. H. McCutcheon was down Saturday Sunday from Holyway. Jack is not as patient as oh, though like afflicted.

Miss Mamie Humphrey returned this week from an attendance of two months at the State Normal, Las Vegas.

Rev. John W. Hendrix, the Methodist pastor, visited Alamogordo Saturday, returning yesterday morning.

Miss Edna E. Pettivan arrived this week from Muskegon, Michigan, to accept the position of ashur at the Gurney Hotel.

J. S. Patterson, who has been visiting the Galla hers, left yesterday for his home at Brownwood, Texas.

Monday, August 3, is the last day of grace to delinquent tax payers. The collector will place property under the hammer on that date.

Mr. and Mrs. Homer Reppit arrived yesterday from Indianapolis, Indiana, for an indefinite stay. Mrs. Reppit is a niece of Mrs. John E. Bell.

Walker Hicks went to Tucuman Tuesday, and, after a short stay there, will return to his old home at Zephyr, Texas.

Two dances were pulled off this week at the Hank Hall. Monday night and last night. Both were well attended and highly enjoyed.

Miss Bertha Mandell, cashier at the Gurney Hotel, the past few months, has returned to her home at Mesilla Park. She will teach school in her home county this year.

Humphrey Bros. have completed the cement basement of their warehouse, and are beginning work on the superstructure.

Tax payers could save themselves money and trouble by paying their delinquent taxes to Collector Watson on or before Monday, August 3.

Lu. Branum and family motored down Saturday from their Coyote canyon home. They were accompanied by Mrs. E. V. Jewett who remained for the institute.

The county or somebody will begin to purchase the property of delinquent tax payers Monday. When the collector issues a certificate it adds more to your taxes, and every step thereafter increases the amount.

George Weisbar, an old-time resident of Jicarilla, was here the early part of the week. He talked hopefully of some development on various mining properties in that well known camp.

Mrs. Frank English, who has been visiting her parents at Lincoln, is now at home for a few days. She will return to Lincoln to preserve some of the fruit, so abundant in the valley, for home consumption.

Howell Ernest, State Traveling Auditor, spent several days here this week, examining the condition of the Exchange Bank. Mr. Ernest is also Grand Chancellor of the Knights of Pythias, and while here and in this county visited the subordinate lodges at this place, White Oaks and Capitan.
