

Proceedings of the Board of County Commissioners

of Lincoln County, New Mexico, begun and held October 4, 1915, in regular session.

Board met at 9 a.m.

Present: Hon. Melvin Franks, chairman; W. M. Ferguson, member; R. A. Duran, member; Porfirio Chavez, sheriff; A. H. Harvey, clerk.

The minutes of meetings of the Board held July 8 and August 13, 1915, were read and approved.

The change of location of saloon of Refugio Sedillo & Villescacos Co. to the Villescacos building, under liquor license No. 103, is hereby approved by the Board.

The official bond of Aron Montoya, constable Precinct No. 3, was examined and approved by the Board.

The butcher's bond of W. W. Brazel was examined and approved by the Board.

The resignation of J. L. Poole, justice of the peace, Precinct No. 10, was accepted by the Board.

The Board appoints George W. Coe justice of the peace, Precinct No. 10.

The Board appoints O. T. Gallegos justice of the peace for Precinct No. 3.

The following justice of the peace reports were examined and approved by the Board:

Augustin Chavez, Precinct No. 5.

Refugio Torres, Precinct No. 2.

J. L. Jones, Precinct No. 13.

Geo. Kimbrell, Precinct No. 4.

Ed. Massie, Precinct No. 14.

Adjourned until 2 p.m.

Met pursuant to adjournment.

The following wild animal bounty claims are allowed and ordered paid:

No. 620 J. H. Brown \$19.00

The petition of Charles Spence and others for the establishment of a public highway beginning at a point where the road crosses the E. P. & S. W. Ry. at crossing known as the McIlwain crossing in Sec. 24, T. 7 S., R. 10 E., thence in a northeasterly direction, was considered by the Board and the following viewers were appointed to view out said road:

and report to the Board at their next regular meeting: T. A. Spencer, Wayne Van Schoyck and H. S. Campbell. Said viewers are required to post notices at three most public places on proposed highway five days before viewing is done; said viewing to be done on October 23, 1915, viewers to meet at Railroad crossing herein mentioned, at 10 a.m. on said day, and T. A. Spencer is to post the notices.

Adjourned until 9 a.m. October 5.

SECOND DAY, OCTOBER 5.

Met pursuant to adjournment. The following wild animal bounty claims were examined and approved:

No. 700 Jimmie Cooper \$8.00

751 Nicholas Mason 6.00

752 Clarence Spence 10.00

753 W. W. Simpson 22.00

754 J. H. Wilson 32.00

755 F. H. Wood 40.00

756 Perry Humphrey 20.00

757 Robert Shultz 10.00

758 Malton Viall 15.00

759 W. G. Thompson 18.00

760 Nicholas Mason 75.00

761 Clarence Spence 44.00

762 William Bells 10.00

763 C. F. Stuart 2.00

764 Clarence Spence 21.00

765 R. E. P. Ward 8.00

766 P. R. Phillips 8.00

The following justice of the peace reports were examined and approved by the Board:

G. W. Smithson, Precinct No. 9.

J. L. Poole, Precinct No. 10.

The resignation of G. W. Smithson, justice of the peace, Precinct No. 9, was accepted by the Board.

The Board appoints C. C. Merchant justice of the peace, Precinct No. 9.

The petition of J. R. Coor and others for changing road passing through Sec. 26, T. 8 S., R. 14 E., is laid over as the bond filed with same is not regular.

Adjourned until 1:30 p.m.

Met pursuant to adjournment.

The following bills were allowed and ordered paid from the General County Fund and warrants returned for same:

No. 527 Severo Perez, buying paper \$15.00

528 W. B. Brady, interpreter prob. court 7.00

529 F. B. Holbert, notary fees 9.00

530 W. G. Miller, witness fee, J. P. court 3.00

531 Fulgencio Flores, witness fee J. P. court 11.00

(Continued on Page 4)

Fine Entertainment Under School Auspices

Superintendent McCurdy has been fortunate enough to sign up for an evening's engagement of the eminent humorist, singer, cartoonist and quick-change artist, Thomas Elmore Lucey, of Chicago. This unusually strong attraction will be given under the auspices of the High school at the Methodist church, Thursday evening, October 28, and is a guaranteed performance in every respect. Coupled with the genuine merit of the performance, which is simply a stop-over en route to the Pacific coast, are the popular prices of 50 and 25 cents, placing this first rate lyceum attraction within easy reach of all.

Hallowe'en Masquerade

Ball, October 30th, when the Carrizozo Commercial Club will do the honors, offering prizes for the best costumes. Some magnificent disguises are in preparation and Real's hall will be a sight for glad eyes two weeks from tomorrow. Get your gay goods ready.

Baptist Church

Rev. O. H. HULLINGER, Pastor.

The Baptist twelve-day meeting closed last night. State Evangelist L. O. Vermillion rendered very efficient service and made many warm friends here.

We will have our regular services Sunday at 11 a.m. and 7:30 p.m. Morning subject, "New Mexico as a Mission Field"; evening, "Your Personal Salvation." All are invited to come.

A. H. Norton, of Jack Peak precinct of Jicarilla, was in town Monday, with desire to meet his dentist, and passing the pleasant word with his many friends here.

Club House canned goods, absolutely guaranteed the best on the market. at The Carrizozo Trading Co.

J. J. Hammonds and Miss Oma Dorser, of Encinosa, were married Tuesday, the 12th inst., at the Baptist parsonage by Rev. O. H. Hullinger.

Irish potatoes, sound and large, by the hundred pounds \$1.65. The Carrizozo Trading Co.

Jelly roll, cup cakes, etc., at Pure Food Bakery of Carrizozo.

Record Breaking Crops The Country Over

American harvests this year will be the most valuable ever produced. With the wheat crop exceeding a billion bushels, the largest ever turned out in one season by any nation, a corn crop which also may prove to be the largest ever grown, the government's October crop report, just issued, announced preliminary estimates which indicate record harvests of oats, barley and rye, sweet potatoes, rice, tobacco and hay.

Corn still is king of crops with indications of 3,026,159,000 bushels. While that is 98,000,000 bushels below the record of 1912, the final production, when the harvest is finished and all statistics compiled, may more than make up for the deficiency. The higher prices this year assures the most valuable corn crop ever grown. At prices to farmers prevailing October 1, the corn crop is worth \$2,133,000,000.

Wheat prospects increased as the growing season progressed and the government's early season forecasts moved up month by month so that today's preliminary estimate of production was placed at 1,002,029,000 bushels. Wet weather at harvest time, however, reduced the quality of winter wheat so that much of it will not be available for milling purposes and will have to be used for feed.

At prices prevailing October 1, the farm value of the crop is \$910,844,000, considerably more than ever was paid for a wheat crop before.

September weather was particularly destructive to crops, causing a reduction of 37,758,000 bushels, or ten per cent in the forecast of production. Tobacco also suffered from unfavorable conditions which caused a decrease of 21,196,000 pounds in the production forecast. Tobacco, however, promises to exceed the record crop of 1909 by 43,000,000 pounds.

Oats will exceed the record crop of 1912 by almost 100,000,000 bushels. Barley will exceed its record by 13,000,000 bushels; sweet potatoes by 5,000,000 bushels; rice by 500,000 bushels and hay by 8,000,000 tons.

GOVERNMENT CROP REPORT

October estimates of crop production and prices for New Mexico and for the United States, compiled by the Bureau of Crop Estimates of U. S. Department of Agriculture, are as follows:

Corn—State: Oct. 1 forecast, 2,890,000 bu., Sept. 1, 2,765,000, final estimate last year 2,576,000; price Oct. 1 to producers 79c bu., year ago 95c. United States: Oct. 1 forecast 3,030,000,000 bu., Sept. 1, 2,985,000,000, final estimate year ago 2,673,000,000; price Oct. 1, 70.5c, year ago 78.2c.

Wheat—State: Estimate this year 2,020,000 bu., final estimate last year 1,838,000; price Oct. 1 to producers 93c, year ago 95c. United States: Estimate this year 1,000,000,000 bu., final estimate last year 891,000,000; Oct. 1 price 90 9c, year ago 93.5c.

Oats—State: Production estimate Oct. 1, 2,160,000 bu., Sept. 1 forecast 2,165,000, final estimate last year 1,976,000; price Oct. 1 to producers 62c, year ago 53c. United States: Production estimate Oct. 1, 1,520,000,000 bu., Sept. 1 forecast 1,408,000,000, final estimate last year 1,141,000,000; Oct. 1 price 34.5c, year ago 43.3c.

Potatoes—State: Oct. 1 forecast 949,000 bu., Sept. 1 forecast 895,000, final estimate last year 900,000; price Oct. 1 to producers 111c, year ago 130c. United States: Oct. 1 forecast 368,000,000 bu., Sept. 1 forecast 405,909,000, final estimate last year 405,921,000; Oct. 1 price 48.7c, year ago 64.7c.

Apples—State: Oct. 1 forecast 276,000 bbls., Sept. 1 forecast 278,000, final estimate last year

Fort Stanton

Mr. and Mrs. Chas. P. Downs and Miss Felton of Carrizozo spent Sunday afternoon visiting friends at the Post. They made the trip in their Dodge.

Miss Louise Meadows of Indianapolis left Sunday for Parsons after a delightful visit with Mr. and Mrs. Weber and family at 13 B.

Misses Helen Rice of Parsons, made a short visit to 13 B Sunday last while on her way to attend the expositions on the Pacific Coast.

Lient R P Munro of the U. S. Coast guard arrived last week to spend the winter here. His quarters have been assigned to 3 B.

Mr. and Mrs. Edward Kelly, of the Carrizozo Undertaking Parlor transacted business here last Friday.

Mrs. Oscar Brockwell returned Monday from an extended trip visiting in various parts of Texas.

Mr. Peter Duffy of No. 4 received the sad news of the death of his brother John J. Duffy, which occurred at Washington, D. C., on the 9th.

Next Sunday the regular non-sectarian services will take place in Library Hall at 7:30 p. m. A special program of music and song will be rendered.

Messrs. W. H. Smith and D. Lynch visited with friends at Capitan last Sunday afternoon.

The local dental parlors have been renovated in the past week making it up to date in many respects.

Master A. V. Sitten celebrated his 14th birthday last Sunday by giving an auto ride to a number of his friends.

On a recent date we read in the associated press news of a reception given to the Ex-Secretary of State W. J. Bryan at Jackson, Miss, and among those on the reception committee was Hon. W. D. Hannah, president of the state fair. Mr. Hannah is a brother of Mr. James Hannah, the ex-Ft. Stanton base ball manager.

Mr. P. W. Alton, the Post lightweight left Friday for Roswell to arrange for a bout to be held in that city at an early date.

Miss Alice Weber and brother, Willie, are visiting with their grand-parents at Parsons this week.

Mr. and Mrs. Fred Brockway, Sr., spent Sunday with relatives at Picacho.

Mr. Oscar Brockwell took in the Roswell fair a few days last week.

Those taking part in the bridge tournament report some exceptional fine scores, which is to result in quite a contest for the prizes offered.

Our local wireless operator continues to give out the latest associated press news. Bulletins are issued every morning giving the news some several hours before the El Paso papers arrive.

New Mexico's Mineral Product in 1914

The annual chapter of the Mineral Resources volume of the United States Geological Survey covering gold, silver, copper, lead and zinc mined in New Mexico in 1914 has just been published as a separate chapter, and copies may be obtained from the Director of the Survey, Washington, D. C.

300,000; price Sept. 15 to producers \$2.49 bbl., year ago \$2.85. United States: Oct. 1 forecast 71,600,000 bbls., Sept. 1 forecast 71,199,000, final estimate last year 84,400,000; price Sept. 15 to producers \$1.74 bbl., year ago \$1.85.

Will Dance to Down the 'Deficit'

which is one of those always-present microbes, with a bad temper and tenacious tentacles, that draws one deeper and deeper into the murky depths of trouble, unless it is downed.

Owing to the liberal entertainment afforded this community and the county on our recent Field Days there is a small (yet visible) deficit—common garden name, shortage of cash. Now, listen: lean over and pay attention, just a minute. It is confidently believed that many will be glad to fling a foot to assist in downing the durned thing. That well known coterie of pleasure preceptors, the Osborn-Bamberger-Roland combination, are the guarantors you will have one good time; the place is Real's hall; the time tomorrow (Saturday) night; and—

If you don't dance, or can't attend, the committee will take your dollar and see that it helps "down the deficit."

Jack Peak

State surveyors are at work north of Jack Peak.

Ranger Parks of the station near Capitan, was in the settlement several days last week.

F. W. Stoneroad of Jicarilla, is hauling his crop of cane home this week.

Maurice Brookin made a business trip to Capitan and Lincoln last week.

L. N. Stubbs has gone to Jicarilla for a while, to do assessment work.

Mrs. E. H. Talbert returned from Colorado Springs last week, where she visited friends for a month.

Mrs. Fair was called home to Oklahoma last week to her mother, who had suffered a painful accident in a fall.

Mrs. Burnett made a trip to the county seat the past week, returning Saturday last.

Mr. Pambrong and family, and Misses Buelah and Effie Dale left Friday last for Albuquerque to attend the fair.

Nicolas Maes and family camped a day or two on the Seco last week picking pinions.

Mr. Ed. Haskins was in the settlement Monday looking after stock.

Mr. and Mrs. Bivian Brookin spent a couple of days here this week.

Messrs. Dawson and St. John of Jicarilla were in the settlement Sunday.

There is a small crop of pinions this season, the birds having destroyed the most of them.

A. H. Norton went to Carrizozo Monday to obtain the services of a dentist.

Mr. Harry Comery has secured the contract for drilling for water on the Talbert place.

We have had a little snow but it was visible mostly in the air, and the flowers are still with us. Thus far we have seen but little frost.

Some of our settlers are contemplating taking in the big show when it arrives at Carrizozo.

Little Robert Wilson had a slight attack of cholera morbus one day last week but is able to be about again.

Public Notice and Warning

To the Public who Travel the Public Road from Encinosa to the town of White Oaks:

An order is hereby given by the Road Board to remove the gates or other obstructions on this public highway. The parties who have gates upon this road will have themselves expensed and prosecution by the removal themselves of the gates that are now obstructing the public road. The public is instructed to leave open and remove all gates on this road that may interfere with their travel, excepting therefrom any gates that may be on leased state land.

This same ruling applies to all public roads of the county.

Respectfully,
LINCOLN COUNTY ROAD BOARD,
Carrizozo, N. M., Oct. 4th, 1915.

INDIVIDUALITY

Was our main aim in buying our fall merchandise this year---something a little better, an additional feature here and there, without additional cost

We have something in every department to show you, that's out of the ordinary, that has the additional "touch."

IN OUR CLOTHING DEPARTMENT

A Men's \$18 all wool Clothcraft suit, with as stringent a guarantee as ever went with a suit at \$25; not only one, but several patterns, at

\$18

IN OUR SHIRT DEPARTMENT

A Signal Flannel Shirt, kahki color, with a knit collar, an absolutely new feature and just the thing to protect your neck from the east wind,

\$3

IN OUR SHOE DEPARTMENT

Many new features in this department, but one in particular is

QUEEN QUALITY SHOES

for women, where style and comfort combine,

\$3 to \$5

MEN'S SWEATERS FOR LADIES AND GIRLS

Until this season we have not been able to get quite the right kind of Sweaters for ladies, but now we have found a maker of men's sweaters who caters to ladies trade and shapes men's sweaters to fit the ladies. We have struck the right thing. Priced

\$3 to \$7

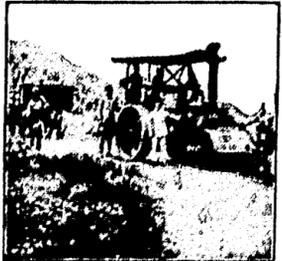

ZIEGLER BROS.

FOR BETTER ROADS

SUPERVISION OF ROAD WORK

Suggestion Made by American Highway Association and National Civil Service Reform League.

A concerted movement for skilled supervision of roadwork throughout the United States has been launched by the American Highway Association and the National Civil Service Reform League. These two great organizations co-operated in the holding of a session at the recent American road congress devoted to a consideration of the merit system in road management. The United States civil service commission was represented by Chief Examiner George R. Wales, who pointed out the manifest advantages

Steam Tractor as Road Maker in India.

of competitive qualification tests as a requisite for appointment to office.

To combat the rather general impression that competitive examinations in all cases mean the answering of stereotyped technical questions, Mr. Wales said:

For these high grade positions where men of experience and attainments are needed an examination is given which does not require the competitors to assemble at any place or to answer technical questions. They are called upon to furnish, under oath, a detailed statement of their education and experience, including all the work they have done since graduation. They also may be asked to submit an original thesis or report on published works, and they are required to give the names of persons able and competent to testify as to their experience and personal fitness.

"Confidential inquiry is made by the commission from various sources as well as of all persons referred to by the applicant. Gratifyingly accurate and discriminating testimony is obtained by this means of confidential communication. Such testimony approximates, if not equals, the testimony adduced upon cross-examination in judicial proceedings. A demonstration of the ability of the competitive system to obtain high-class men for technical positions has been made within the past year, in connection with the employment of men to appraise the value of the property of common carriers in the United States.

"For this work the interstate commerce commission required men with qualifications ranging all the way from rodman and chainman to senior positions in civil, mechanical, structural, electrical and architectural engineering, as well as motive power men and expert accountants.

"There have been approximately 18,000 applicants for these positions, and the task of sifting the wheat from the chaff and of grading the wheat after the sifting was one of considerable magnitude; but it was done, and it was done so well that the interstate commerce commission expressed its gratification to find that it could secure a force so well equipped to perform the gigantic task of obtaining an accurate appraisal of the value of common carrier property. A system which can successfully secure a competent force of high-grade engineers for this valuation work could surely provide the proper kind of men to have charge of the construction and maintenance of public highways."

It is expected that steps will be taken to wage an active campaign in every state for the elimination of the spoils system and to substitute for it the merit system.

Keep Out the Weeds.

It is just as important to keep the weeds from seeding along the public highway as it is on your own premises. Rippe weed seeds along the highway scatter into the adjoining fields. Cut the weeds and keep them cut.

Rest of Some Benefits.

When the day's work is done drop it there until tomorrow. Have the pleasant kind of a chat with the wife and children; that is the kind of rest that sweetens toil and takes the snarls out of the threads of life.

Growing Russian Sunflowers.

The mammoth Russian sunflower is grown for its seeds. While it is blooming at the back of a lot it is a sight worth seeing. The seeds are used for chicken feed and a variety of purposes.

IN CANNING SEASON

SECRET OF SUCCESS IN "PUTTING UP" SUPPLIES.

Absolute Sterilization Must Be Obtained—Best and Easiest Methods of Getting the Best Results From Fruit That Is Used.

If anybody appreciates the kindness of Mother Nature it is the practical housekeeper. This is especially true in summertime when by her bountiful store of fruits and vegetables she increases the housekeeper's store at little cost and contributes much to reduce her labor.

There are several methods of canning, and the secret of success in each is absolute sterilization. The best and easiest methods of canning are cooking the fruits in jars in an oven; cooking the fruits in jars in a steamer or in boiling water, and stewing the fruit before it is put into the jars.

Glass is the most satisfactory jar to use in canning. Glass jars are becoming so universally in favor that they are taking the place of tin cans for everything; even for tomatoes. They are more economical than tin, for although the glass costs more in the beginning, it lasts and can be used over and over again. While there are many kinds of jars, the preference should usually be given to those with wide mouths. In canning fruits or jelly it is important that the fruits or berries should not be over-ripe. Fruit for canning should be fresh, solid and not over-ripe. If over-ripe some of the spores may survive the boiling and fermentation takes place in a short time. In preparing the fruit remove all stems, then peel with a silver knife, core or remove the seeds or pits as the case may be. Peaches, pears or apples may be kept from discoloring if they are dropped as they are pared into cold water to which a little vinegar or lemon juice may be added.

Canned Pears.—Twenty-four Bartlett pears, eight cups water, two cups sugar.

Bartlett pears are the best for canning. Put the water and sugar into a preserving kettle. Let the sirup come to boiling point and skim off the froth if any rises. While the sirup is heating carefully halve, peel and core the pears, being careful not to use those that are over-ripe or imperfectly shaped.

Drop pieces into a basin of cold water until all are pared. Put the halved pears into the boiling sirup, but do not stir. Take a large roasting pan with handles and place in it as many sterilized canning jars as it will hold. Pour some tepid water in the pan to a depth of about two inches, and place the pan on the side of the stove. The water will get hot and keep the jars warm. Sterilize the rubber rings and covers. By this time the fruit will be boiling. When the pears commence to lose their hard whiteness they are ready to take off. Lift out pieces separately with a spoon and put them into the hot jars. Fill jars and cover with the sirup; fill even with the top, put the rings and covers on and screw tight.

For Cream Dressings.

All white or cream dressings are made by blending the butter with the flour, then stirring it rapidly into the boiling milk. Use white pepper when making the dressing and boil it in a double boiler. Keep it warm, and thin with cream if too stiff when done, or fold in the white of egg, whipped to a stiff froth.

A teaspoonful of vinegar to a quart of flour if added with the ice water, gives the much-desired flaky appearance to fruit pies.

Tomato Pickle.

Six pounds of green tomatoes, if very large, cut in pieces. Put them into strong brine for 24 hours, drain them very dry. Put them in a stewing pan, cover with vinegar to which has been added one pound of sugar, one-quarter pound long pepper, one-quarter pound allspice, one-quarter pound cloves and one-quarter pound cinnamon. Simmer till tender, but do not let them boil.

German Potato Klesse.

One pint mashed potatoes, mixed in two beaten eggs, one pint of flour, one even tablespoonful of salt. Form into small flat cakes (same as fishballs), cook in boiling water about ten minutes. When first put in kettle, stir around until they rise to the top of water. Very nice with roast of veal or any nice brown gravy. Good warmed over in butter, cut up.

Stale Bread Fritters.

Cut the bread in slices, about a third of an inch thick, fry in fat, from which a faint bluish smoke is rising, and when each piece is fried on one side turn it over and spread the browned side with marmalade or jam. When cooked, lift out and sprinkle with caster sugar mixed with a little cinnamon.

Fruit Fluff.

To every pint of chopped peach, banana or pineapple allow one pint of water, six eggs and one pound of sugar; beat eggs until light, then add other ingredients and cook until thick as custard. Strain, set dish in pan of cold water and beat until cold. Freeze and serve with a sirup like a quince.

Chocolate Rice.

One cupful of rice boiled until tender. Make a sirup of one cupful sugar, one square chocolate; pour over rice and stir. Put in a mold to cool and serve with whipped cream.

PRETTY CORSET COVER

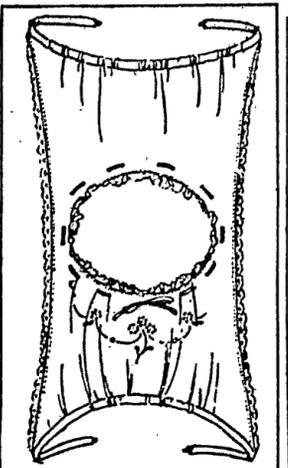

LATEST MODEL IS NOT AT ALL HARD TO MAKE.

Flesh-Colored Crepe de Chine Recommended for the Garment Illustrated, Which is One of the Best That Has Been Devised.

A girl cannot have too many dainty corset covers in the summer time, when the waists are so thin as to be almost transparent. The latest model is one requiring so little time or skill in making that the girl who knows how to sew will not hesitate to make at least half a dozen.

The camisole illustrated is a flesh-colored crepe de chine, embroidered in self color and trimmed with narrow cluny lace, but any thin material in a delicate shade may be used, as mull, chiffon cloth, nainsook, all-over shadow lace, net in white or flesh color, China and India silks.

A strip of material 26 inches long and 18 to 20 inches wide will make one cover. The latter width is for a stout figure. A very tall person might use a yard and an eighth for the length, but one yard will be enough for the average woman. The material is doubled, laid flat, and a crescent taken out at the fold, creating an oval opening for the head to pass through. A second crescent is taken out at the raw edges, and the ends turned up to form a hem. The long ends are finished with a narrow hem and trimmed to suit the sewer's fancy; also the neck.

A frill of lace is a pretty finish, with baby ribbon run through eyelets an inch or so below. If one can embroider, the front of the cover may be lightly decorated.

DESIGNED FOR SUMMER WEAR

Wrap That Has Won Especial Favor as a Garment to Be Worn in Hot Weather.

The wrap with the irregular hem is in special favor. It assumes draped lines that drop a little on either side and are lifted at the back, this all being achieved in the cutting of the garment. Such wraps are lined with very lightweight silks, or the lining may be of chiffon.

The blazer stripes are immensely popular and because of the return of gay colors, bright red has come into its own once more. One sees it in beautiful shades that are soft without being garish, and which are very attractive when worn by the right person. The beach coats to be worn with the bathing suit are quite as luxurious in their way as any of the wraps designed for regulation use. There is a delightful lack of trimming on these, but the fabrics are elegant in weaves and satisfactory in colorings.

GARMENT TO MAKE AT HOME

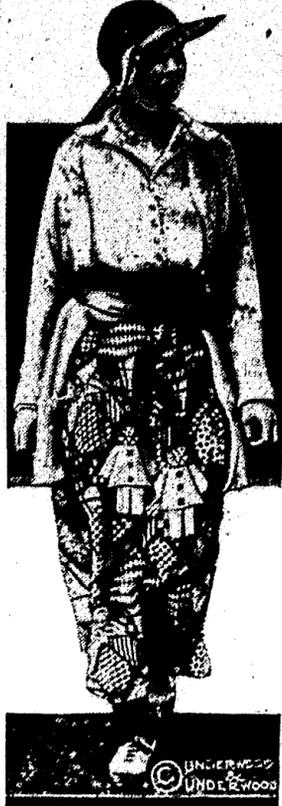

Negligee That Will Give Satisfaction is an Easy Task for the Amateur—Simple Design.

First make a straight, narrow slip of very pale blue pussy willow taffeta, with a tiny, bebe waist gathered into a belt just under the bust, and ribbon straps across the shoulders to hold up the little gathered waist. Attach a tunic of pale blue chiffon to this slip, about at the hips, and drop over it a second tunic from the high belt. Slash each tunic up at the front in a deep point and edge both tunics with lace insertion. The upper tunic will fall below the hip in front and almost to the knees at back; the lower tunic will hang to the back; but slope up to reveal the feet in front. Tie a sash of peach-pink satin ribbon against the lace-edged upper tunic where the apex of the slope comes in front. Now make a kimono-shaped coat of net-top lace with the border at the bottom. This is to fall six inches below the satin belt, over the upper tunic of blue chiffon. Edge the V-neck in the lace tunic or coat with lace insertion and trim the very short sleeves in the same way. Several little bows of pink ribbon will make the lace tunic gay and charmingly in keeping with the skirt.

When Travelling.

Dust is inevitable with travel by train, and as it is not always possible to obtain the means of a face bath, and if left on long the dust will seriously hurt the skin, the face should be cleaned at least twice a day with cold cream and a little of the wash

FUTURIST SKIRT

The critic that said the futurist and cubist schools of art would in no way affect our normal life, has another thought coming. Miss Violet King, one of the most prominent of the younger set at Newport, where this picture was taken, has originated and is wearing this multi-colored "futurist" skirt. It seems as if this novel design will take with her friends, from whom it will gradually spread into popular favor with the gentler sex. Miss King did not volunteer to make public the theme which the design was supposed to depict, but an artist who happened to pass remarked that it was an inspiration for a cubist painting he was then planning.

Another pretty model that the very thin girl would like because it is such a fluffy affair is made preferably from chiffon, though anything as thin as net or China silk will answer. You take a length of wash ribbon an inch or so wide, the circumference of the bust of the wearer-to-be. This supports a wide strip of fabric gathered several times, the first with a heading. Each row of gathers is sewed down to the ribbon. The lower edge of the fabric strip is gathered once and secured to a belt of ribbon two inches wide.

This is just the kind of cover the very slender girl should wear under her empire frocks or baby waist effects. It suggests only the much-dead natural fullness, the material being so very soft. Very narrow ribbon straps support this camisole.

carried along. For the last benzoin will be found excellent, a teaspoonful of this in half a cupful of water supplying quite a good face bath. Pour the diluted benzoin on a soft bit of rag and go over all the face with wiping movement, doing this after the skin has been first cleansed with cold cream. After the face has dried, powder as usual.

In place of the benzoin it is possible to employ orange-flower water or alcohoh—or any good cologne or toilet water—for taking off the grease after the cream cleansing, or even for the soil itself, but it is never wise to use too much of any of these things, as they scorch the skin after awhile.

Cheap Dust Caps. There is no excuse for getting the hair dusty. For dust caps can be bought, in pretty prints in pink or violet and white, for 12 cents each.

These are really pretty caps, with an elastic to keep them snug at the back, and a standing ruche-like frill about the face. They are useful not only for sweeping and dusting, but for cooking.

They keep any possible dust from the hair safely out of the way and they also keep the odors of cooking from entering the hair—where they would cling tenaciously.

Buttonhole Hint. In making buttonholes in soft muslin it is a very good idea to rub a little paste, made of flour and water, on the wrong side. This will give a firm surface to work upon and obviate the possibility of cutting a buttonhole too large. Of course, the paste will not discolor the fabric.

PLAN TO EXCHANGE IDEAS

Conferences Are to Be Held to Discuss the Best Means of Fighting Tuberculosis Plague.

How to munition and carry on the war against tuberculosis during the coming year will be discussed at sectional conferences on this subject being called by the National Association for the Study and Prevention of Tuberculosis, in Indianapolis, Ind.; El Paso, Tex.; Columbia, S. C.; Springfield, Mass., and Albany, N. Y.

The Indianapolis meeting, to be held September 29th, 30th and October 1st, will be known as the Mississippi Valley Tuberculosis conference and will take in the states of Ohio, Indiana, Illinois, Michigan, Wisconsin, Kentucky, Tennessee, Arkansas, Missouri, Iowa, Minnesota, Kansas, Nebraska, South Dakota, North Dakota, Montana, Wyoming and Colorado.

At El Paso the Southwestern health conference will meet September 27th to October 1st and will discuss not only tuberculosis, but other health subjects. This conference includes Texas, California, New Mexico, Arizona, California, Nevada, Utah and Colorado.

Covering Cream Cans.

A great part of the value of keeping cream cool on the farm and at the station or creamery is lost if the cream is exposed to the direct rays of the sun while being hauled from the farm to the point of sale. Far too few people stop to realize the importance of covering their cream cans when bringing them in to town. Expensive jacketed cans are not a necessity to keep the cream cool. In summer weather just an ordinary piece of wet burlap thrown over the cans will keep the temperature of the cream as much as 20 degrees below what it would rise to if left uncovered while being transported over the average hauling distance.

Women Life-Savers.

The National Women's Life-Saving league announces that with the opening of the coming indoor season they will inaugurate a new branch of work in the form of a junior branch for girls under the age of sixteen. No child will be considered too young to learn the rudiments of swimming, and practically all of the crack swimmers of the league have promised their aid to Miss K. F. Mehrtens, its president, in developing the younger members.—New York Evening Post.

Regiment of Renown.

The Sixth rifle, for which Sir Herbert Raphael is recruiting an "Arts and Crafts Battalion," is better known by its old name than as the King's Royal Rifle corps. Next to the Guards it is the most sought after of infantry regiments, and has always a number of famous names on its muster. No regiment has a finer list of battle honors.—London Evening Standard.

It's no use in trying to convince a mule that he is stubborn.

Libby's Vienna Sausage and Sliced Dried Beef

Both contain less heat producing properties than heavy meats.

Try them for summer luncheons and picnic tidbits.

His Trouble.

A stenographer was out of a job. He was discussing the best ways and means of rehabilitating his ebbing bank roll with a friend who also was listed among the unemployed. Said the friend:

"If I were you I'd write a letter for money."

"I have already done so," replied the stenog.

"For how much?"

"Oh, three thousand dollars."

"Well—?" asked the friend in astonishment.

"Well," repeated the shorthand man sadly, "the letter asking for the three thousand dollars is all ready to mail, but I'll be darned if I can think of anybody to mail it to."

City's Location.

A woman from the South visiting New York for the first time was much agitated when, after being conveyed through the Hudson tube, she found herself in another subway. Rushing up to a knowing-looking individual, she asked, in an agitated tone:

"Sir, do please tell me where is New York?"

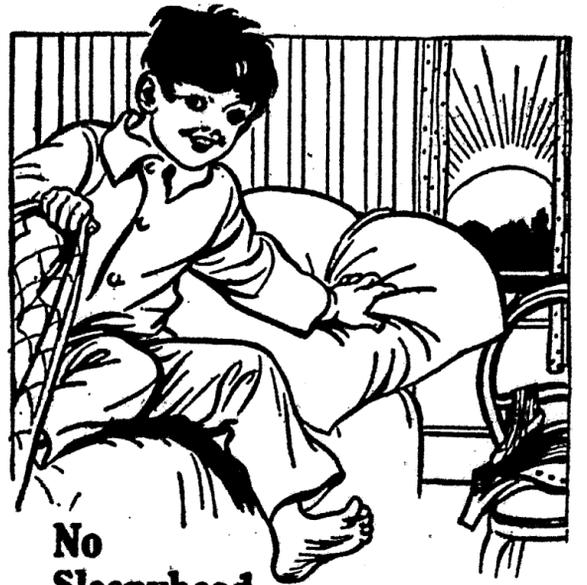

"Lady," said he, with the utmost gravity, "it's right at the top of those stairs."—Harper's Magazine.

A Good Request.

"It was a hard swim, mum," said the life guard who had just effected a difficult rescue. "But we made it."

"Quite so," said the lady calmly. "Thank you very much. And now would you mind going back for my bathing cap?"

He who is able to hold his tongue can sidetrack a lot of trouble.

A Chance Investment

By
Walter Joseph Delancy

(Copyright, 1915, by W. G. Chapman.)

"I do not wish you to become alarmed or change your plans," wrote the father of Eleanor Gwynne to his only daughter, two thousand miles away from home. "I tell you of the possible trouble in my business only because you might hear of it through other sources. I may be able to weather through. If not, it means our living on a more moderate scale, that is all. You still have the income from your mother's estate, so we cannot exactly starve."

"Poor, dear papa! and always thinking of my comfort and happiness!" mused Eleanor with some agitation. "Of course I shall not remain here—with him alone with his trouble. No, there is a stage Monday and it will see me homeward bound."

How different this, her second visit from the first she had made to the pine-laden breezes and exquisite solitude of an Arizona health resort! The year previous at exactly this same season of the year she and her father had spent three weeks together at this romantic spot. Only then everything was prospering, there were no cares of business to annoy. Eleanor folded the letter, when she noticed some additional lines, comprising a postscript, on the reverse side of the sheet.

"By the way," it ran, "it is a forlorn hope, but I mention it—that scamp, Warren Brill! I don't know if you remember him, but he is that likely looking young fellow who acted as our guide for a time. I never told you, but I was so taken with his manliness and energy that I was induced by him to trust him with five thousand dollars to buy a mine. He asked a year in which to develop it and make us both rich. I have never heard from him since, but a few months ago I wrote to some people at Croftutt Pass about him. They could tell me nothing about Brill, but said that the mine he purchased, or pretended to purchase, was abandoned because it was flooded and absolutely worthless. It is a vain quest, I imagine, but you might make some inquiries and let me know the result."

The Squaw Produced a Keen-Bladed Knife.

"That five thousand dollars would pretty nearly mean my business salvation just now."

There was a certain animation in the eyes of the pretty girl as she read these lines. These were not needed to at once invoke a remembrance of the person they named. Eleanor retained a vivid memory of the bright, gentlemanly young fellow who had been their companion for nearly a week. He was musical, educated, in harmony with their ideas of courtesy and refinement and had left a distinctly pleasing impression on the mind of Eleanor.

She was astounded at the implication of dishonesty made by her father. She had regarded Brill as the soul of honor. More than once in gay frivolous social circles she had compared their flippant admirers with this model young westerner, and not to his disadvantage.

That evening Eleanor made inquiries at a tourist hotel as to Brill. He was remembered, but had dropped out of sight months since, she was informed.

"There was a great friend of his named Savage," advised the landlady. "I think he is a clerk or something at the mail station."

There Eleanor went the next morning. It was to locate this Savage, a young man, a cripple, whose eyes brightened and whose face glowed at the mention of a name evidently cherished.

"Mr. Brill is across the range somewhere near Inc's," he said, and then he burst forth into extravagant eulogies concerning the man he designated as his best friend. It appeared that Brill had saved his life in a great freshet disaster and had secured him his present position.

The landlady, whom Eleanor began

to make inquiries regarding the route over the range, seriously advised her not to make the journey alone. "You should not attempt it, unprotected," she warned Eleanor. "The country is wild and infested with vicious half-breeds and even outlaws," but Eleanor was fearless and willful. She equipped herself in stanch walking trim, and noontide saw her passing down a lonely mountain gully and recognizing marks in the landscape described to her which indicated that she was nearing Croftutt pass. Suddenly, turning past a dense thicket, she recoiled with a start as a tawny-skinned woman darted directly in front of her.

The stranger, a half-breed squaw, was slovenly, half-intoxicated and vicious looking. Her eyes glowed as she made out the small netted hand-bag suspended from the belt that Eleanor wore. She thrust out her hand, seized it and tore it loose. Eleanor put out a detaining hand, for the bag contained some money and valuable jewelry.

The squaw produced a keen-bladed knife and showed her teeth. Then she quickly uncoiled a stout lariat from her waist. Eleanor read her purpose, to bind her hand and foot and leave her helpless while she fled safely with her spoils.

Eleanor sought to defend herself. She stooped suddenly, seized a heavy stick lying in the path, swung it around and swept her despoiler off her feet. With an angry snarl the squaw regained her feet, but Eleanor fled precipitately. She fancied she heard a masculine voice shouting out after her, but she feared an accomplice of the squaw and terror lent fleetness to her actions.

Eleanor deviated from the gully, seeking shelter in rushing up a side path. At the top she paused breathless. A view of the spot where she had been robbed was now shut out from her view. Eleanor made out a cabin, its door open. She rushed through the aperture and sank to a chair in a rudely furnished room, nearly at the point of fainting.

Her eyes opened wide as, wandering about the room, they fell upon a picture on a stand. It was her own. Near to it was a tiny vase and in this, as if replaced fresh every morning was a mountain daisy, her favorite flower.

She recalled having her picture taken the year before in this very district by a traveling photographer. Was this one printed from the same negative? Lost in anger, half-guessing the truth, she started up as a start-wart form crossed the threshold. It was "that scamp," Warren Brill!

He greeted her with manifest repression and respect. She wondered if Fate was in all this, as he told of witnessing the robbery, of recovering the booty from the squaw.

"I found this on the ground," he explained, and he handed Eleanor with the handbag the letter she had received from her father the day previous. There was a queer twinkle in his eye. She flushed deeply.

"It is just a year lacking three days since your father loaned me the money to purchase the old mine, Miss Wynne," he said. "It turned out a heartless swindle, but my defeat urged me up to new efforts to make amends to your generous backer. I struck a new rich prospect. See," and he exhibited receipts from the branch mint for over fifty thousand dollars.

Brill saw her safely back to town. He saw her, too, every day after that during her stay. Then, the last evening but one, he told his love.

"Dear papa," spoke Eleanor, home-returned a week later, after their greetings were over, "you asked me to find 'that scamp,' Warren Brill, for you."

"Yes, Eleanor."

"Well, I have brought him with me to explain all about his terrible duplicity!"

And Eleanor went into the hallway and beckoned to Warren Brill, and led into the presence of her amazed sire her future husband.

All the Day's Work.

In a town of Maryland one Bill Morton appeared before the postmaster one morning and the following colloquy occurred:

"Morning, Mr. Postmaster."

"Morning, Bill."

"Has Tom Moore been in for his mail yet?"

"No."

"Will you be here when he comes?"

"I guess so."

"Well, when he comes in will you tell him that on his way from the cheese factory I wish he'd stop and get that pig of Herman Stutz's and take it down to Henry Parker's, and tell Henry I said he could have it for the single harness even if he'll fix that bridle and throw in them russet lines instead of the old black ones; and if he won't trade, tell Tom to bring the pig down to my place and put it in the extra pen, and be sure and shut that door to the hen house, or all the chickens will get out. Sure there ain't no mail? Morning, Mr. Postmaster."

"Morning, Bill."

He Didn't Know.

"Well, how are you today?" asked the doctor.

"I don't feel a bit better, doctor," said the patient.

"Did you take the medicine as I directed?"

"What medicine?"

"Why, that prescription I gave you yesterday. Didn't you get it filled?"

"You mean that piece of paper you gave me when I went out?"

"Yes. That was a prescription."

"Oh. I thought it was a receipt for the two dollars."

LACY EVENING FROCKS

ARE ESPECIALLY SUITABLE FOR THE YOUNG GIRL.

Dainty and Graceful Design Shown Here That Would Make Up Well in Material of Ivory White Chantilly.

The sketch shows a graceful design made up in ivory white Chantilly with pansy purple velvet for the high girdle, and very tiny circular tunic which is in reality no more than a peplum. In black it runs longer, being about seven inches deep, but the front is not more than four. The girdle, carried up to a point in front, meets the point of the V-shaped decolletage and there is a flatly applied bowknot at this point, in narrow silver ribbon, its fluttering ends tacked in place up over the bust. The blouse is lined with flesh-colored maline, and a frill of this is arranged to extend over the neck of the dress. The tiny sleeves are cut in one with the blouse and gathered closely about the arm, then trimmed with applied silver ribbon bowknots.

The full flounce of the underskirt is mounted to a net top which is velled by the graceful tunic. The tunic itself must have a yoke of net running

Girlish Evening Frock of Fine Lace.

down to form a deep point in front and in back. The flouncing is then set on to the edges of this yoke so that the lower edge reaches that of the underskirt at center front and back and covers only half the depth of the skirt at the sides.

SHRINK THE COTTON FIRST

Will Be Found to Make Big Difference in Results When the Garment is Laundered.

Cotton naturally shrinks when wet. This property is greatly increased in the weaving, as the warp threads are stretched to their full length and held in place by the sizing and starch used in finishing.

If the garment is to be laundered it is better to shrink the material before

MATTER OF COMMON SENSE

Girl Who Would Retain Her Beauty Must Exercise Reason in the Selection of Food.

In the Woman's Home Companion, Alice Farnham Leader, a New York physician, tells how girls can keep their good looks. She says that health depends upon food, sleep and fresh air, and not upon pills and prescriptions. Her article is full of practical suggestions as to diet, sleep and exercise. Following is a brief extract from what she has to say about food:

"Rich pastry, frozen creams and candy are difficult to digest and, in addition to menacing the health, they cause positive homeliness. They contain more sugar and fat than the system can possibly assimilate, and the surplus is carried to the skin, where it makes its appearance in the form of pimples and blackheads. To avoid such foods doesn't mean giving up all desserts. Let your choice rest between light custards, fruits and ices."

"Coffee and tea are not always injurious, provided they are taken in moderation. Never drink more than one cup of coffee for breakfast, and add cream and sugar with a grudging hand. Drink plenty of water, hot and cold. Nothing will promote digestion and prevent sickness as will a glass of water slowly sipped immediately upon arising in the morning. The human body requires at least a quart of water a day, that is about a half pint every two or three hours."

"If the average woman gave as much attention to that much abused organ, the liver, as she does to her finger nails, her face would need less

FALL AND WINTER CREATION

The coat of this model originated by Michael of Fifth avenue is of black velvet bound in black braid. It is knee length and lined with black and white satin. With the coat a skirt of black and white striped chevrot is worn. The skirt comes to the ankles and displays the Russian boots, the new fall and winter footwear. The most striking feature of the coat is its cross combination, suggesting the work done by the noble hand of women on the battlefields of Europe. The particular one shown in the photo is of white fur background. The cross is of dark fur.

making it up as it is not easy to make the proper allowance for shrinkage.

Fold the material smoothly and place flat in a tub or large receptacle, the bath tub is excellent. Pour in enough cold water to cover. When the material is thoroughly saturated, pour in hot water, gradually increasing the temperature until the water is as warm as the hand can stand. The hot water is needed to loosen the sizing. The material should stand in the water over night when possible, but at least two or three hours. Pour off the water and press as much out of the material as possible, but do not wring. Hang on a line in the open air, stretching out smooth and pinning along one selvage.

Before the material is thoroughly dry take it down and press.

One must be sure that the colors in the material are fast before attempting to shrink it.—Charlotte E. Carpenter, Colorado Agricultural College, Fort Collins, Colo.

Ups and Downs in Scallops.

If you are planning one of the new ruffled dresses that bring one back to the days of hundred-leaved roses, let the bottom ruffle be scalloped, or if you are brave have them all scalloped. Quaint net dresses are being shown with the scallops bound in silk, or edged with tulle ruffles or chiffon velvet. Most of the net flouncings are scalloped and soft taffetas have half-inch pleated ruffles placed in a scalloped line at the top of a straight hem, or are tucked up in most unexpected places to give an uneven line at the bottom of the skirt.

attention. No wonder the liver rebels and reacts upon the complexion, its spite being betrayed in the form of pimples, sallowness and black shadows under the eyes."

In the Trunk.

If there is an abundance of space in a trunk, it is a good idea to leave coats on hangers, first filling out the sleeves and fronts, but if this is not convenient, fold the coat inside out, placing the sleeves together, front touching front, then fold once lengthwise, with tissue paper in between, the sleeves also being kept in shape with a slight stuffing.

Some soft gowns are kept smoother by being rolled over a heavy newspaper roll that has been first covered with sheets of tissue paper, then by straight packing. This, of course, depends upon the material and whether you can accommodate it to a given space.

Bordered Fabrics.

Bordered fabrics, probably because they are eminently suited to the skirt made with flounces, are in vogue this summer. There are some charmingly embroidered crepes, with deep or narrow embroidered borders in color. There is embroidered lace cloth, too—sheer and thin, with light, dainty embroidery in pastel shades. There are embroidered borders on chiffons and nets. Sometimes ribbon is embroidered into festoons in these borders.

High Collars.

High, anyfolding collars destroy the round softness of the throat. Shun them. Every night massage the neck with a good skin food.

Folk We Touch In Passing

By Julia Chandler Manz

YOUR FRIEND TODAY

Elizabeth and Martha were friends. Elizabeth said the word should always be written with a capital F. Martha declared that every letter that went into the making of so precious a name should be a capital, whereupon Elizabeth kissed her affectionately, and they both declared that no matter what the years might bring them they would keep their tie of friendship pure, and true, and lofty.

"And," said Martha, who was the more ardent and imaginative of the two, "there are to be no secrets between us; not even thought secrets."

To which Elizabeth agreed in an abstracted manner which did not quite satisfy her friend.

So Martha suggested that they draw up an agreement of eternal love and loyalty to be solemnly signed by each of them, and when Elizabeth said she didn't see the use of such a thing, her friend burst into a storm of grief that quite took the less intense girl off her feet.

"Why, you darling Martha," comforted Elizabeth. "Of course, we'll write the vow, and sign it. I only meant that all the vows in the world couldn't make me truer to our friendship, or more certain that I shall always love you just as I do now."

Whereupon Martha dried her tears, and spent many weeks in the composition of a vow of friendship which

"But He Doesn't Know You as I Do. He Doesn't Know You."

would have seemed more like a contract of the relinquishment of all personal liberty than a promise of undying love to an outsider. But the document quite satisfied the friends, who considered it a masterpiece in its own way.

In the weeks and months that followed confidences became almost an obsession with the girl, Martha. An overconscientious little soul, she spent a deal of her time in self-examination for fear that she would depart from the letter of her promise and hold back the admission of some thought or action from Elizabeth.

The vow was taken less seriously by Elizabeth, upon whom friendship sat with lighter meaning. Martha, in her frank and girlish ardor, would have called her friend a traitor, had she known that she did not share the deeper life of Elizabeth. Elizabeth would have said that she merely protected a God-given right, and that the matter of the vow was a silly thing, to which she had agreed merely to humor her friend.

So the years went by, and the friends became women grown.

Their companionship had been very close, and their affection for each other was a matter for admiration among their associates.

People said that they had never seen such remarkable confidence between two young women.

So far as Martha was concerned this was true. She shared her every thought of consequence with Elizabeth. She unveiled her weaknesses as well as her strength to the elder girl, nor did she notice that every year had brought Elizabeth more reserve, so great was her absorption in her own confidences.

One day The Wise Woman, who had

heard much of Martha and Elizabeth, sat quietly by while the former expressed it as her belief that friendship is the greatest thing in the world.

"The sort that will stand the test of actual self-denial is very rare," said The Wise Woman.

"YOUR FRIEND TODAY IS OFTEN YOUR ENEMY TOMORROW, THEREFORE, NEVER TELL YOUR FRIEND WHAT YOU WOULD NOT WANT YOUR ENEMY TO KNOW."

Martha listened as one might listen to treason.

Then, remembering Elizabeth, she abruptly left the room.

"She is young," remarked The Wise Woman. "She will learn."

It came to pass that the personal interests of the friends conflicted for the first time since, in that far away yesterday, they each signed the vow of eternal love and loyalty.

They fell in love with the same man. For a time The Man, knowing the closeness of the tie which bound the two young women, was very nice to both of them.

Then it became apparent that he was more interested in Martha, and after a little he asked her hand in marriage.

And for the first time in her life the girl, Martha, found it difficult to open the deepest chamber in her heart to her friend. Instinctively, she hugged her secret. It was so precious

a thing—this matter of loving and being loved—that she did so want to cherish it for just a little while against the knowledge of all the world. But she remembered the vow, the letter of which she had kept for years, so shyly she told Elizabeth that she and The Man were to be married.

"And you have the audacity to tell me this, you sly minx!" hissed the lifetime friend of the girl, Martha.

"You're a perfect little sneak, that's what you are! You've enticed him into this with your confiding little ways. But he doesn't know you as I do! He doesn't know you!" she cried, beside herself with rage and disappointment, for the girl, Elizabeth, also loved The Man and wanted to be his wife more than she wanted anything else in all the world.

Because of the vow which Martha had always kept to the letter, and which the wiser girl had always set aside as a mighty foolish sort of thing, Elizabeth was as familiar with the weaknesses of her friend as she was with her own. She knew her as she knew herself, for in her interpretation of the word friendship Martha had always uncovered her very soul for the other girl's inspection.

And, so it was that the confidences which the girl, Martha, had given in the sacred name of friendship were made the property of all who cared to hear them, and bounded back like boomerangs to hurt her a thousand times with a hurt so poignant that sometimes the injuries, done her seemed more than she could bear.

And The Wise Woman shook her head gravely and remarked again, that, so long as human nature is human nature, it will never be safe to tell your dearest friend anything that you would not want your bitterest enemy to know.

How Small the World's Become!

Wireless telegraphy from the Atlantic seaboard to Hawaii, a distance of 4,600 miles, is an accomplished fact, speech having been transmitted from Washington, a distance greater than from New York to London. That trans-Atlantic wireless telephone communication is assured is obvious, as it is more difficult to send wireless across land than across water.

Another interesting feature of tests made is ability to connect wireless telephone systems with wire telephone systems. At Washington wires were connected to the apparatus of a wireless tower and the message went wirelessly to its destination, 4,600 miles distant. A development from this is that communication can be established between places when it is impracticable to extend the wires.

The results recently accomplished by the American Telephone and Telegraph company have opened up a practically boundless usefulness for the telephone.

State University Is Cosmopolitan

The cosmopolitan character of the population of New Mexico is strikingly illustrated in the native, or birthplace, states of the 192 students enrolled at the state university in Albuquerque. Statistics given out this week by the registrar of the university show that thirty-four states are represented in the birthplaces of the students and that of the 192 total only 37 were born in New Mexico.

There are 116 men and 76 women enrolled in the university this year, all but 20 of whom are doing full college work. The classes contain 12 seniors, 21 juniors, 45 sophomores and 78 freshmen—the largest freshman class ever entered in any New Mexico institution. There are 13 special students, two in the extension department and one post graduate. Of the enrollment nearly one-third is entirely or partly self-supporting; that is, the students are making all or part of their university expenses in various forms of employment.

Notice of Application for Survey

Notice is hereby given to all parties interested that the State of New Mexico has applied for the survey of the following lands:

Sections 1, 2, 3, 4, 5, the north 1/2 of Sections 8, 10, 11, 12 Township 12 North Range 12 East

also the exclusive right of selection by the State for thirty days, as provided by the act of Congress, approved August 18th, 1904, (35 Stat. 201), and after the expiration of such a period of sixty days any land that may remain unselected by the State and not otherwise appropriated according to law shall be subject to disposal under general laws as other public lands. This notice does not affect any adverse appropriation by settlement or otherwise, except under rights that may be found to exist prior to inception.

Dated at Santa Fe this 9th day of October, 1914.

W. C. McGINNALL,
Governor of New Mexico.

Notice of Contest

09221
Department of the Interior
United States Land Office
Howell, New Mexico

September 23, 1915.

To Samuel C. Chapman, of ———, Contestee:
You are hereby notified that Truman A. Spenser, who gives Carrizozo, New Mexico, as his post-office address, did on September 20, 1915, file in this office his duly corroborated application to contest and secure the cancellation of your Homestead, Serial No. 016386, made February 4, 1909, for NE 1/4 NE 1/4, Section 11, Township 8-S, Range 10-E, N. M. P. Meridian, and as grounds for his contest he alleges that said Samuel C. Chapman has for the two years last past wholly abandoned the said land and has failed to live on same or cultivate or improve the same in any manner.

You are, therefore, further notified that the said allegations will be taken up contested, and your said entry will be cancelled unless further right to be heard, either before this office or on appeal, if you fail to file in this office within twenty days after the FOURTH publication of this notice, as shown below, your answer, under oath, specifically responding to these allegations of contest, together with due proof that you secured a copy of your answer on the said contestant either in person or by registered mail.

You should state in your answer the name of the post-office to which you desire future notices to be sent to you.

EMMETT PATTON, Register.

Saved Girl's Life

"I want to tell you what wonderful benefit I have received from the use of Thedford's Black-Draught," writes Mrs. Sylvania Woods, of Clifton Mills, Ky.
"It certainly has no equal for la grippe, bad colds, liver and stomach troubles. I firmly believe Black-Draught saved my little girl's life. When she had the measles, they went in on her, but one good dose of Thedford's Black-Draught made them break out, and she has had no more trouble. I shall never be without

THEDFORD'S BLACK-DRAUGHT

"in my home." For constipation, indigestion, headache, dizziness, malaria, chills and fever, biliousness, and all similar ailments, Thedford's Black-Draught has proved itself a safe, reliable, gentle and valuable remedy.

If you suffer from any of these complaints, try Black-Draught. It is a medicine of known merit. Seventy-five years of splendid success proves its value. Good for young and old. For sale everywhere. Price 25 cents.

EUROPEAN CAVES and EARLY MAN

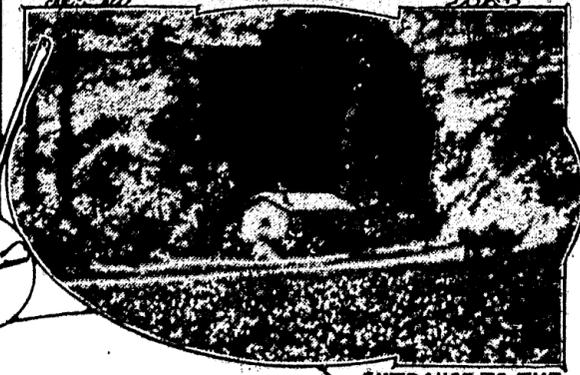

By N. C. NELSON
FROM THE AMERICAN MUSEUM JOURNAL

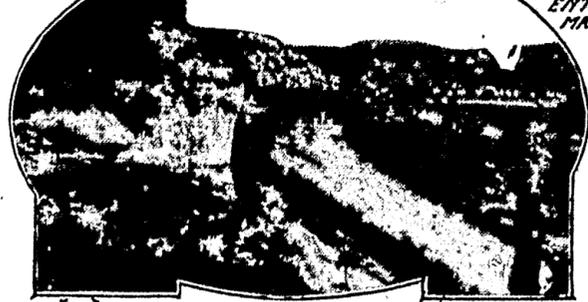

INDENTATION IN LIMESTONE CLIFF TO SHELTER EARLY MAN

Grotte de Nefer

ENTRANCE TO THE MAS DAZIL CAVERN

VEZERE RIVER, ITS FLOODPLAIN AND CLIFF WALL

HERE are recorded at the present time for the southern two thirds of Europe, including Mediterranean Asia and Africa, no less than four hundred paleolithic stations, that is, places where remains of one kind or another have been left behind by early man. This man was primarily a hunter and his chief center of activity appears to have been what is now southwestern France and northeast Spain although Germany, Austria, Italy, Belgium, England and to a lesser degree other countries came within his range. This apparent distribution may be deceptive, however. Many of the stations are out in the open, as for example on the valley terraces of the Thames and the Rhine, but the majority of the sites, especially those of later times, are sheltered in some way. The shelter may consist merely of an overhang of a cliff or a grotto yawning on the mountain side and it may be the far interior of a cave. This latter type of site is relatively easy to find by making a deliberate search while the location of an ancient camp or workshop in the open country is the result only of chance. It is conceivable of course that these roaming, migratory hunters returned occasionally to the natural shelters, but on the other hand it is possible that many of them built huts. Some of the geometric cave paintings suggest that they did, and unless these huts stood in very close proximity to some sheltering cliff, all traces of the spot and its relics would be lost. Hence we may properly take for granted that hundreds of archeological stations will remain undiscovered, in consequence of which our notion of the actual strength of the population at any given place during these early millenniums of human existence must continue imperfect, if not inadequate.

An need hardly be stated the presence of natural habitations depends ordinarily on a high relief or a more or less mountainous topography. Caves are most abundant in volcanic regions as in the western United States, or in limestone areas such as Kentucky and adjacent commonwealths. Shelters are notable features of steep-walled valleys or box canyons and our own cliff-dweller region affords the best example of them and their utilization. In Europe the most famous cave groups are located in the lower French Pyrenees and their Cantabrian extension in northern Spain, while the equally famous shelter region includes short sections of the Vézère and Dordogne valleys at Les Eyzies, in the French department of Dordogne. Both regions are wonderfully picturesque and impressive, and barring some alterations in the flora they have not changed much in general appearance since the arrival of paleolithic man. These caves and shelters are all in limestone formations and are the results chiefly of mechanical erosion. Some of the caves, especially those of the lower altitudes, are still in process of making, while others, well up on the mountain sides, are very ancient—in fact, were in their old age when man first entered them.

Roughly speaking, the shelters proper, that is the overhanging cliffs and the wide open grottoes were the homes of paleolithic man and therefore naturally furnish us with important data concerning his physical make-up, his practical ability, and the general nature of his everyday life. The caves, on the other hand, served him mainly as galleries for a remarkable series of paintings, engravings and carvings, which in a measure reveal to us his mental attitude toward life. The caves, it must be understood, were exceedingly dark and damp, ordinarily unfit for habitation, except possibly as temporary retreat during the hard winters, and contrariwise, the shelter walls, having been exposed for thousands of years to the weathering elements, could not have preserved for us other paintings or delicate engravings that may have been made upon them. There are several somewhat qualifying exceptions to these sweeping statements however. For instance, the Gargas cavern, near Montrojeau, France, and likewise the Altamira cave, near Santander, Spain, appear to have been occupied for protracted periods, although in both cases only very close to the entrance. On the other hand, some of the shelters such as Cap Blanc, near Les Eyzies, France, have preserved, mainly through accident, a fine series of high relief sculptures. But as a general thing the camp sites are in large half-open shelters, usually facing the sun, while the entrances to the painted caves face in any direction, and for the most part are very small and inconspicuous. At Castillo only there is the perfect combination—a large, sunny grotto, which was occupied periodically throughout most of paleolithic times and which served besides as the vestibule to a considerable cave, famous for its mural art.

An examination of the various Dordogne shelters, coupled with a study of the changing types found in them, is most instructive. Nearly all of the stations here are at the base of the high cliffs that hedge the narrow valleys on one or both sides; but in a few instances the relic-bearing debris lies on an eroded ledge some distance up the face of the protecting wall. Almost within

shot of Les Eyzies are a series of stations which taken together furnish data on human history practically from Acheulean times to the present day. These stations begin with the old shelter of La Micoque, include the partially ruined shelters of Upper and Lower Laugerie; another ledge shelter that served old-time brigands as a rendezvous and also as a fortress to defy the English in 1410; still another ledge marked by ruins of what looks like some old baronial chateau and end up finally with the more or less well-kept houses of the modern peasant. These houses often stand on several meters of ancient relic-bearing debris and seem to cling in an infantile sort of way to the overhanging cliff in spite of its cold, damp nature. Some distance up the Vézère, at the Rock of St. Christopher, where the last houses have been removed, there are over four meters of debris dating from neolithic to present time, and the adjacent cliff is marked by several series of parallel holes, cut for the insertion of colling beams, precisely as we find them in our own Southwest. Some of these holes are high up the cliff, but others are below the surface of the accumulated debris, which is itself below the high-water mark of the river. With all this evidence suggestive of continuous occupation, it is not to be wondered at that some students profess to see among the local inhabitants a number of individuals that resemble the physical type of paleolithic man.

A visit to the painted caves is the experience of a lifetime; but while it is an adventure bound to excite more enthusiasm than the examination of the shelters, it is less instructive and certainly less convincing. It is also an undertaking fraught with some difficulty and disappointment, except perhaps in such cases as Altamira, Niaux and Font-de-Gaume. The painted and incised representations on the cave walls are seldom so plain and striking as one might infer from the superb reproductions in the published reports, and to make them out the visitor must take time. In this effort to decipher, he is most ably assisted by Prof. Emile Cartailhac of Toulouse, who has given a good part of his life to the study of paleolithic art and who as present guards nearly all the Pyrenean caverns. In Spain and in the Dordogne country, however, local guides must be taken, and as these are not always competent, the student who would profit by his opportunity must prepare himself beforehand, in regard to what is to be seen and then insist on being shown, or he may not see much.

The last cave to be discovered, and also the most beautiful, is the Tuc d'Audoubert, located on the estate of Comte Begouen, near Saint-Gérons, France. This is perhaps the most difficult cavern to explore. But to risk passage in the improvised boat that the visitor must sail in order to reach the interior, and to crawl on his stomach along muddy passages that are really too small for a full-grown man, and finally to receive innumerable bumps on his head from pending stalactites is not too much to pay for the privilege, which, as it happened, was accorded the Museum's representative as the first American—to see the wonders inside. Ordinarily, the natural wonders of the caverns are more or less discolored with mud, but here is gallery after gallery of bewildering forests of pillars and pendants and posts—all a pure white and glittering as if studded with myriads of diamonds. Here and there the stalactites hang in large sheets like folded draperies and by placing a light behind them the translucent substance flashes up in colors of green and rose too beautiful to be described. No fairy palace was ever more adorned! You are led along devious passages, stepping again and again in lakelets of invisibly clear water, and when on dry footing you are warned to move circumspectly for fear of obliterating some ancient human footprints that are faintly visible under the thin coat of stalagmites which covers the clay floor. Bones and skulls of the giant cave bear and other animals lie all about, commingled in places. Finally, near the extreme inner end of the cavern, comes the real object of the ja-

borious journey, viz. the representations of two bison (male and female) modeled in clay. The figures, which are about two feet in length, are propped against the sloping side of a rock which rises from the floor, and in front of the animals on the floor there are some tracings as if the artist had here sketched and improvised before beginning his real work. About twenty-five feet away in a low side chamber is to be seen the place where the modeler scraped together the clay of the floor and kneaded it. Two or three worked rolls of his material still lie there. The whole thing looks as if done a week ago, and yet the bison has been absent from the locality probably for thousands of years.

The least suggestion of skepticism is in keeping with the general impression that the visitor retains from the painted caves. It is a most baffling experience. When the investigation is confined to the stratified deposits everything is beautifully simple. Art objects have a definitely ascertainable place in the series and go back to Aurignacian times. The cave proper is of the same general style as that of the stratified refuse and must of course be of the same date; moreover, the animals represented are in nearly all cases either extinct or absent from the region. And yet almost all the mural figures in the caves are within reach of the hand. In other words, the caves have undergone no particular changes since the artist did his work. Not a few of the paintings, and especially the finer engravings, seem as fresh as if done yesterday. In the Pindal cave is the representation of a fish incised on the wall and the visitor who examines it closely will swear that he could make a line exactly like it with a lead pencil, but with Professors Brouil and Obermayer standing behind him he says nothing. And how did paleolithic man manage to get about in those caves? It is unsafe to move ten steps in them without a light. It is true that a very few stone basins have been found that may have served purposes similar to the Eskimo lamp, or the artist's right-hand man may have carried a torch; but there are no signs of such torches, or of carbonization on the walls in the vicinity of the paintings, although smoke spots made by modern lamps and candles held too close are abundant enough. The conviction that this cave art is not so old as some would have us believe seems irresistible.

HE WAS SILENCED.

Said She—After all you must admit that women are better than men.
Said He—Oh, I don't know. The good book doesn't say anything about seven devils being cast out of a man.
Said She—No, of course not; he has every one of them yet.

SIMILAR, BUT DIFFERENT.

Mrs. Graspit—You are always growling about the household expenses, yet you used to say that I could make a dollar go twice as far as you could.
Graspit—And so you can, my dear. You make it go so blamed far that I never even get a glimpse of it again.

TWO WAYS OF EXPRESSING IT.

"Oh, don't worry about such trifles," said the Indianapolis girl. "Just keep a stiff upper lip and you'll come out all right."
"But," protested her fair cousin from Boston, "it is a physical impossibility for me to maintain a strict labial rigidity."

FEMINE "SHORT AND UGLY."

"You say Mrs. Gadders and Mrs. Plimly are changed the short and ugly word?"
"That's what they did."
"Shocking! Was it 'liart'?"
"No, 'cat'."

IN POULTRYVILLE.

"I love that chicken," said the young red rooster, "but she gave me the rigid claw."
"Oh, well," replied the old brown hen, "that was probably the best she could do. A mother was a cold storage egg."

NEATNESS IN CHILDREN

MORE READILY LEARNED IF TAUGHT ATTRACTIVELY.

Simply-Made Devices Which Will Encourage the Little Folks to Give Proper Care to Their Belongings.

There is no doubt children will more readily learn neatness if it is taught attractively. Children by nature are careless and oftentimes lazy. To make them pick up their belongings and put them away in the proper places is quite as much trouble as doing it oneself.

They leave their shoes around probably because there is no charm in putting them away in a closet, but if a child is given a shoe bag for its own, to be hung inside the closet door, like the one shown, it will be a pleasure to put the shoes away and visit with the tiny figures pictured there.

The foundation is gray or tan linen and the figures are worked in brilliant colors, using mercerized cotton, fast colors.

Little folks never tire of the old woman who lived in a shoe and her large family, or the kittens who lost their mittens (because they had no bag). A row of tiny boy or girl figures, each in different stages of putting on their shoes, is another suggestion for decoration that will appeal to children also.

Mothers may be saved many pennies and children taught a lesson in neatness if they are provided with a case for keeping their pencils. What mother has not experienced the wild hunt for pencils when it was time to start to school? All this commotion can be saved by making a case on the shoe bag order.

Put the runners in to take a pencil in each pocket. One half of the bag could be given to the pockets for the pencils. The other half could be a scratch pad. On the outside of the case, over the larger pocket, one could work a couple of brownies, an owl or a squirrel.

Many mothers know the value of a pretty box for collecting toys, but I know of one child who never could be taught to put away his toys until his mother bought a fair-sized tin water pail one day. The small man was told to put away his toys in the box, but he promptly took the pail and banged the toys into it. Nor would he ever put them away in the box again. He liked

will like a tin pail, another will only be happy if taught neatness through the medium of satin and lace.

SOMETHING NEAT AND SMART

Pretty Crepe de Chine Blouse Suit Designed for General All-Around Service.

A pretty crepe de chine blouse suit is pictured here. Though white, this is meant for service, being fashioned of washable crepe de chine. Two box plaits are laid closely together on

each side of the blouse below a yoke cut in points and bound with soutache. A length of soutache weighted with tassels ties about the neck. The skirt is a box-plaited model without a yoke, but with the pointed yoke effect repeated in the soutache trimming. Pearl buttons with simulated buttonholes of soutache trim both blouse and skirt. A somprincess effect is achieved by the use of head soutache, which is laid about the waist, loosely crossed at the back and returned to the front and tied once, the tassol-weighted ends hanging at the side.

GREAT VARIETY IN COATS

Notable Features of This Season's Offerings in Garments for Outer Wear.

Not for many seasons have coats displayed so much variety.

There are mannish coats of English tweeds and dainty, feminine wraps of silk, satin or even chiffon to protect mildly from the summer breezes. The sportswoman wears a coat whose chief feature is utility, and it is usually a garment built on the lines of her brother's. In a few of the smartest models made of English tweed the full, flaring lines are confined about the waist with bolts.

Patch pockets, raglan sleeves and turned down collars accentuate the masculine effect, and with a coat of this type the outdoor woman will wear a Panama hat with a band of checked or striped ribbon.

Another popular material for sports coats is "escorte," which is a clever combination of silk and wool, and because of its wonderful sheen is, in many instances, preferred to the homely tweeds.

Challis Dress for Child.

Challis dresses that are made for little girls are excellent for traveling, as they do not muss or soil so easily as cotton frocks.

A Touch of Black.

In fashion the touch of black is a recognized addition to a color scheme. The same is true of embroidery. Many a centerpiece or scarf that lacks tone may be improved by outlining the color design with black. This is especially recommended on the heavy linens and scrims covers where brilliant hues appear unadorned or need bringing out.

However, black outlining is very effective on the ordinary white linen centerpieces worked in plain white. One of these seen recently had a jewel pattern with conventional scrolls done all in white. The jewels and the scrolls were outlined with a thin black thread. The centerpiece was bordered with heavy white forchon and the whole was very effective.

The Season's Parasols.

Smart parasols which look like miniature awnings are to be had in awning stripes of black and white. These "awning" parasols also appear in other colors. A parasol of very rich effect is the new Japanese parasol. The framework is so adjusted as to make this sun umbrella very flat and Japanese in line. The silk covering is plain, but the shade may be as rich as you wish. The border of the parasol is hemstitched, and upon the double fold are worked tlay Japanese characters in gold thread two to a gore.

Tulle on Straw.

A charming hat shows an accented-plaited tulle ruffle around the brim of a straw hat—the straw is coral pink, the tulle is turquoise blue. The result is truly delightful.

Shoe Bag for Children.

to hear the noise, he said, "when the toys got fired into the pail."

A Japanese matting box is an ideal toy box. It is attractive, hard, and shiny inside, and makes a nice seat for little people besides. But it is much better for mothers to come down to the children's way of thinking and let them learn good habits in their own way. One child, it will be found,

SLEEVES FOR FALL GOWNS

The Set-in Sleeve is One of the Novel Features of the Offerings for Fall.

The set-in sleeve is featured on the majority of gowns for fall. To impress their presence upon the minds of prospective buyers they have made themselves conspicuous by being emphasized in various ways. In some instances the armhole is outlined with bands of the material, embroidered in silks or wools. Then, again, wide bands of contrasting materials or of braid are used to bind the armhole.

A very unusual sleeve is an interesting part of a blue serge gown. Three-inch silk braid is sewed around the top of the sleeve, the sleeve being attached flat by this braid band to the outside of the bodice, not in the armhole.

Of course, all of the new sleeves of daytime dresses are long. Many of them are slashed from the wrist to the elbow, the place between the slashed material being filled in with lace, net or silk. When the material is slashed only a few inches up from the wrist the sides are finished by a narrow plaited frill or lace or chiffon.

Voile Hem on Net.

The fashion of combining two fabrics in one's frocks is not new with the millennium, but it is still prevalent. One pretty frock is made of white net, with a deep hem of white voile applied in an irregular top outline. This is the only touch of voile on the frock, but it gives a weight to the net that adds to its dignity and grace.

OH! MY BACK

A stubborn headache is cause to suspect kidney trouble. When the kidneys are inflamed and swollen, stooping brings a sharp twinge in the small of the back, that almost takes the breath away. Soon there may be other symptoms: scanty, painful or too frequent urination, headaches, dizziness, or rheumatic pains. Don't wait for these troubles to become serious—use Doan's Kidney Pills at once. You'll find no better-recommended remedy.

A Colorado Case

Mrs. T. F. Conners, 726 W. Bleeker Ave., A. P. O. No. 100, Colo., says: "My back was terribly sore and painful and I could hardly straighten it. After a few days of stooping, I tried Doan's Kidney Pills and they brought me relief and for three years I have had practically no further trouble."

Get Doan's at Any Store, 50¢ a Box
DOAN'S KIDNEY PILLS
FOSTER-MILBURN CO., BUFFALO, N. Y.

Your Liver Is Clogged Up

That's Why You're Tired—Out of Sorts—Have No Appetite.
CARTER'S LITTLE LIVER PILLS will put you right in a few days. They do their duty. Cure Constipation, Biliousness, Indigestion and Sick Headache. SMALL PILL. SMALL DOSE. SMALL PRICE. Genuine must bear Signature.

Too many people are like cider—they become sour with age.

Makes the laundress happy—that's Red Cross. Buy Blue. Makes beautiful, clear white clothes. All good grocers. Adv.

In Style. "I'd like a stylish loan." "What kind is that?" "One which is V-shaped."

Easily Settled. "What's the trouble about the program?"

"This prima donna insists that her name be in larger letters than that of the trained chimpanzee."

"Let her have it that way," directed the vaudeville manager. "The monk is intelligent, but he hasn't arrived at the point where he is going to kick about the way we print his name."

Genuine Happiness.

A fact concerning modern religious activity, which seems to have escaped general remark, is that Christians know better how to play than ever before. In the normal times of recent years a visitor at one of the summer conferences of the student Young Men's Christian association, for instance, would be surprised and delighted at the hearty good times which the delegates enjoyed. Christian Endeavor, too, has taught young people how to play. The whole conception of recreation and its place in life has received new attention of late years. Anybody who is seeking for it may find abundant evidence that there is more genuine happiness and intelligent pleasure among Christians than among the followers of frivolity.—Exchange.

IT SLUGS HARD.

Coffee a Sure and Powerful Bruiser.

"Let your coffee slave be denied his cup at its appointed time! Headache—sick stomach—fatigue. I know it all in myself, and have seen it in others. Strange that thinking, reasoning beings will persist in its use," says a Topeka man.

He says further that he did not begin drinking coffee until he was twenty years old, and that slowly it began to poison him, and affect his hearing through his nervous system.

"Finally, I quit coffee and the conditions slowly disappeared, but one cold morning the smell of my wife's coffee was too much for me and I took a cup. Soon I was drinking my regular allowance, tearing down brain and nerves by the daily dose of the nefarious beverage.

"Later, I found my breath coming hard, had frequent fits of nausea, and then I was taken down with bilious fever.

"Common sense came to me, and I quit coffee for good and went back to Postum. I at once began to gain and have had no returns of my bilious symptoms, headache, dizziness or vertigo.

"I now have health, bright thoughts, and added weight, where before there was invalidism and the blues.

"My brother quit coffee because of its effect on his health and now uses Postum. He could not stand the nervous strain while using coffee, but keeps well on Postum." Name given by Postum Co., Battle Creek, Mich.

Postum comes in two forms: Postum Cereal—the original form—must be well boiled. 15c and 25c packages.

Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

Both kinds are equally delicious and cook about the same per cup. "There's a Reason" for Postum. —sold by Grocers.

WASHINGTON GOSSIP

Government Breeds Fine Horses for Army Mounts

WASHINGTON.—The result of the government's experimental work in horse breeding, begun in 1913, is interesting. Unlike foreign governments, the United States had made no experiments in the scientific breeding of horses for army uses, and it was only as the result of a recommendation to congress by a number of experts who had inspected foreign studs that an appropriation of \$50,000, was set aside and the work turned over to the department of agriculture, which in turn delegated it to the bureau of animal husbandry. The object was to produce desirable types of cavalry remounts and artillery horses.

Thoroughbred sires had been pronounced most serviceable by continental experts and the project was undertaken along the same lines here, though there was a desire to try other light horse types of stallion, and a few trotting, saddle and Morgan sires were included in the original stud.

The war department had received as a donation the thoroughbred sires Octagon by Rayon d'Or, dam Ortegale by Bend Or, and Henry of Navarre by Knight of Ellersle out of Moss Rose by The Ill Used, from August Belmont, president of the Jockey club, and these were turned over to the department of agriculture.

Other thoroughbreds were purchased and there are now at the station at Front Royal, Va., eighteen sires, of which ten are thoroughbreds, the others being trotters and saddle stallions. The propinquity of the thoroughbred, experts declare, makes him ideal for the work in hand, and, his racing was in its darkest days when the work was inaugurated, the task of securing horses of quality was easy. There was a disposition from the start to render the government every assistance in a work that is regarded as second to none in economic importance.

With Russia's appropriation for horse breeding totaling more than \$4,000,000 for 1914, and the czar adding more than \$1,000,000 in the same period from his private purse, there was cause for baffling when the appropriation for the work in the United States during the same period was cut from the original \$50,000 to \$30,000. Now the department has been notified that it must carry on the work for the coming twelve months for \$25,000, and here is certain to be an appeal to congress as soon as the house convenes.

"Snookums" Gets a Government Job at the Zoo

It usually takes a civil service examination to enter the United States government's surveying corps, but such red tape did not trouble "Snookums." He nonchalantly annexed himself to the government surveying party at Papago reservation, Arizona, and now he has obtained a permanent appointment. He even got free transportation to Washington to take his new job. Now "Snookums" is on duty at the Zoo. He doesn't have much to do—just walk up and down for visitors to look at, but a number of calls already have been paid by government surveyors, for his fame had preceded him.

Edward Anderson, Jr., son of Dr. and Mrs. Edward Anderson of Rockville, discovered "Snookums." His position not only found him, but those who assigned him to it had an interesting time spriting him away from his mother. He was found while Mr. Anderson and his associates were surveying near the Mexican line, in Arizona.

The wildcats are regarded as dangerous animals in that region, and even after "Snookums" was taken to camp, it was feared his mother might track him by night and put up a fight to rescue him. But the rest of the family probably kept her home.

The party became attached to the mascot, and, when the work was done it was decided that "Snookums" ought to remain in the government service. Superintendent Baker of the Zoo here wrote that he would be glad to provide permanently for the animal.

Meantime the cat had become domesticated. He was friendly and intelligent. He did not much like being placed in a box for shipment East, but even at that indignity he did no more than show his teeth and ugly claws.

On his box was placed the inscription, "My name is Snookums. Treat me well. I am from Arizona."

Washington's City Market Proves Big Success

THE effort to make Washington the experimental ground for the development of scientific methods of food distribution is, in less than a year's time, showing practical results that stand as a working model for any city whose population wants to reduce the cost of living.

This is due largely to the efforts of John H. Sherman, superintendent of the weights, measures and markets department of the District of Columbia, who has taught the housewives how to eliminate the middleman by community buying.

A nucleus for the proposed market system already existed. Three municipal retail markets were operating with indifferent success, isolated from the sources of their supplies. Mr. Sherman persuaded congress to appropriate \$32,000 for steel shelters along Big B and Little B streets, N. W., and then obtained another appropriation—\$235,000—for a terminal market, to be erected on the wharves, for the wholesale distribution of fish and produce from the Potomac valley.

Mr. Sherman's enthusiasm in his attempt to reduce the living expenses of the masses in the city of Washington is not to be confined to the District of Columbia, but the plan as outlined and partially materialized will stand as a working model for other cities whose infant death rate and racial disease are statistically known to increase proportionately with the cost of foodstuffs. Washington feels that there is a splendid purpose back of this experiment, far-reaching in its various individual phases, which extend from the hard-working farmer who jogs into market long before dawn to the worried woman whose household expenses are such that there is no chance to lay aside enough for the education of her children.

Putting Together Bones of Mastodon Is Puzzle

THE preparators and aids in the section of vertebrate paleontology of the United States National museum are busy putting together the bones and fragments of a huge skeleton of a mastodon secured near Winamac, Ind., by the assistant curator of fossil animals, James W. Gridley.

The laboratory where the skeleton is being assembled, with its corps of earnest workers, reminds one of a lot of children working on a cut-up picture puzzle, only the problem before the scientist and his assistants is a more difficult one; it is a three-dimensional puzzle with some of the pieces missing, and others broken into many small fragments. Nevertheless they are forced to resort to a system similar to that employed on a picture puzzle in many ways, for a small piece is first examined carefully, then tried here and there, until presently—ureka!—it fits exactly, or so nearly so that its position is definitely determined, and then the assembler takes up another fragment with renewed interest.

The specimen is believed to be that of a full-grown male, although not an old individual, who lived in the pleistocene age, probably 150,000 years ago.

Lights Out! Sergeant—Now, then, how many times do you chaps want telling to put that light out? Voice from Tent—It ain't a light, sergeant; it's the moon. Sergeant—I don't care a tinker's clank blash what it is; put it out!—London Opinion.

Twilight Piffle. "The twilight wore on—" "Wore? What did it wear?" "The clothes of a summer's day." Comparative Fun. "That fellow had the nerve to tell me to hant." "Oh, that was only his banter."

News From the Front. "Vicar (who had called to read a letter to one of his parishioners from her son at the front)—Your son, Mrs. Codling, has been fighting in the trenches. For a whole week he was standing up to his neck in water!" Mrs. Codling—Well, I never! This war is doing some funny things, sir, to be sure. We couldn't get 'im to put water anywhere near 'is neck when 'e was at 'ome!—London Tit-Bits.

Don't Poison Baby.

Forty years ago almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. CASTORIA DOES NOT CONTAIN NARCOTICS, if it bears the signature of Chas. H. Fletcher. Genuine Castoria always bears the signature of Chas. H. Fletcher.

FIXED IT IN HER MEMORY

Ingenious Method by Which Lawrence Hutton Cured Waitress of Her Forgetfulness.

The late Lawrence Hutton used to say that having to take a little trouble would impress a fact on anyone's memory so that he would never be able to forget it. In illustration he would tell this story:

"Our waitress, Maggie, could never remember to put the salt on the table, and time after time Mrs. Hutton would remind her to do it. One morning it was absent, as usual, and I said, 'Maggie, where is the stepladder?'"

"It's in the pantry, sir."

"Please bring it in, Maggie," I said, kindly.

"Maggie brought it in with a look of wonder on her face."

"Put it right beside the table," I commanded; and when she had done so I added, "Now, I want you to climb up to the top of it, look all over the table and see if there is any salt there."

"Maggie never forgot the salt again."—Youth's Companion.

DO NOT HESITATE

To Use Cuticura on Skin-Tortured Babies. Trial Free.

A hot bath with Cuticura Soap and gentle application of Cuticura Ointment at once relieve, permit rest and sleep and point to speedy healing of eczemas, rashes, itchings and irritations of infants and children even in severe cases. Sample each free by mail with Book. Address postcard, Cuticura, Dept. XY, Boston. Sold everywhere.—Adv.

His Knowledge Limited.

"Do you know all the latest dance steps, Mr. Gayboy?" asked the debutante.

"Certainly!"

"Will you teach some of the very latest to me?"

"What I meant was that I know 'em when I see 'em."

Not Free.

"The ocean should be free to everybody."

"It'm," replied the man who always differs; "evidently you never went bathing from a seashore summer hotel."

The Kansas City Jitney companies have decided to run an all-night or "owl" service.

5 Women Avoid Operations

For years we have been stating in the newspapers of the country that a great many women have escaped serious operations by taking Lydia E. Pinkham's Vegetable Compound, and it is true.

We are permitted to publish in this announcement extracts from the letters of five women. All have been recently received unsolicited. Could any evidence be more convincing?

- HODGSON, Me.—"I had pains in both sides and such a soreness I could scarcely straighten up at times. My back ached and I was so nervous I could not sleep, and I thought I never would be any better until I submitted to an operation, but I commenced taking Lydia E. Pinkham's Vegetable Compound and soon felt like a new woman."—Mrs. HAYWARD BOWEN, Hodgson, Me.
- SHELBYVILLE, Ky.—"I suffered from a severe female trouble. My right side hurt me badly—it was finally decided that I must be operated upon. When my husband learned this he got a bottle of Lydia E. Pinkham's Vegetable Compound for me, and after taking it a few days I got better and continued to improve until I am now well."—Mrs. MOLLIE SMITH, R.F.D., Shelbyville, Ky.
- HANOVER, Pa.—"The doctor advised a severe operation, but my husband got me Lydia E. Pinkham's Vegetable Compound and I experienced great relief in a short time. Now I feel like a new person and can do a hard day's work and not mind it."—Mrs. ADA WILT, 803 Walnut St., Hanover, Pa.
- DECATUR, Ill.—"I was sick in bed and three of the best physicians said I would have to be taken to the hospital for an operation as I had something growing in my left side. I refused to submit to the operation and took Lydia E. Pinkham's Vegetable Compound—and it worked a miracle in my case, and I tell other women what it has done for me."—Mrs. LAURA A. GRISWOLD, 2437 East William Street, Decatur, Ill.
- CLEVELAND, Ohio.—"I was very irregular and for several years my side pained me so that I expected to have to undergo an operation. Doctors said they knew of nothing that would help me. I took Lydia E. Pinkham's Vegetable Compound and I became regular and free from pain. I am thankful for such a good medicine and will always give it the highest praise."—Mrs. C. H. GRIFITH, 1668 Constant St., Cleveland, O.

Write to LYDIA E. PINKHAM MEDICINE CO. (CONFIDENTIAL) LYNN, MASS., for advice. Your letter will be opened, read and answered by a woman and held in strict confidence.

The Power behind the dough

You may use an old favorite recipe and the best of materials and make it carefully, the oven may be just right, yet you will have a failure if "The Power behind the Dough" is not the right one to leaven it properly and make it light, digestible, wholesome.

Good baking without good baking powder is out of the question. K.C. Baking Powder has wonderful leavening power, and the double action—in the bowl and in the oven—makes good results doubly certain.

Take no chances of failure—see K.C. and have "good luck" every time. At all Grocers.

WILL RENT MY PIANO

to out-of-town private party and give privilege of buying later if suited and applying rent on price or will sell out to responsible party at special price on easy monthly or quarterly terms. If interested write me at once, address "PIANO" care Box 1011, WESTERN NEWSPAPER UNION, Denver, Colo.

School Notes

The general enrollment of the school passed the three-hundred mark some time ago, and the excellent average in attendance insures a full house at both schools every day. The attendance in high school is especially gratifying, thirty-three pupils being enrolled and absence almost unknown.

The Carrizozo school is being represented in the boys' and girls' encampment at the State Fair in Albuquerque this week by Margaret Lacey, Lorena Haley and Ware Brazel. The county superintendent is with them in the Duke city. They are expected to return for school Monday.

Arrangements have been made for return games of basket ball in Capitan Saturday, October 23. The boys are planning to give a better account of themselves at this time if gruelling practice will do it, and the girls are not idle, since they desire to maintain the high standard of efficiency which they have set for the entire year.

The board of education wisely refused the Barnes Circus the use of the open ground facing the school building. We hope every child will be able to take in the circus with a big time, but it is a self-evident fact that school and circus do not mix into a healthful compound.

Granulated sugar at \$5.85 per sack. Best grade Colorado potatoes at \$1.50 per hundred pounds. Welch & Tittsworth, Capitan.

Just received, a car of fine Colorado Potatoes. Also a car of Cotton Seed Meal and Cake. Humphrey Bros.

ROSWELL AUTO COMPANY OWNERS AND OPERATORS

County Road Board Met

At the meeting of the Lincoln County Road Board at the court house, October 4, D. L. Jackson and Sam Wells urged improvement of the road from White Oaks to the Alto Light and Power company's plant. As this is in a measure a private road the board did not act further than to authorize Paul Meyer, member of the board, to use his discretion.

Acting upon the request of the Roswell Auto company and Welch & Tittsworth for betterment of the Carrizozo-Roswell road, it was decided the board would meet those interested half way, and when their share of money is raised for carrying out a definite plan, the board will further consider it.

The petition of E. L. Moulton and others concerning improvement of the Corona road from Elda to Gallinas was thought to best lie in the hands of the county commissioners, with recommendation that a road along the railroad, east or west side, would be preferable to the present road.

The board directed that road tax collectors be instructed to more rigidly enforce collections of the money tax, or work in lieu.

Dr. J. W. Laws, chairman, was authorized to represent the county board at the State Highway convention at Santa Fe October 19-20.

Beside Chairman Laws, Secretary J. B. French, Member Paul Meyer and Clerk H. B. Dawson were present. Bills aggregating about \$3500 were approved.

Six Hundred

Educated Animals

Barnes circus has a great array of educated wild animals and gives sixty-five big acts.

Without doubt, some of the most sensational, thrilling, death-defying wild animal acts ever shown are presented by the Al G. Barnes Wild Animal Circus.

Over 600 educated wild and domestic animals are used in giving the performance of this show—the greatest collection of trained animals ever assembled under one management. The Barnes circus was the original wild animal show and now holds the rank of being the largest aggregation of the character in the world, presenting as it does more trained animals than all other shows combined.

Sixty-five sensational, amusing, amazing, thrilling acts are presented at each performance. These acts are given in two divisions, the wild animal acts in a large steel-barred arena in the center of the big tent and those of the domestic animals in the regulation sawdust rings at either side of the arena. There's something doing in these two rings and the arena every minute of the three solid hours of entertainment.

The members of the Barnes animal-acting troupe have been recruited from jungles, plain, desert, forest, ocean, and home-stead. Lions, tigers, elephants, leopards, jaguars, zebras, hyenas, camels, zulus, monkeys, apes, orang-outangs, dogs, horses, goats, seals and sea lions are members of the troupe—every one trained to perform, in fact every animal carried with this big show is an actor.

One of the greatest features of the show is the troupe of beautiful horses and ponies—550 in number, which for size, beauty and breeding are unrivalled in the entire world. These horses are all shown during the action of the show's program.

The most thrilling wild animal spectacle known is Herr Roth's group of man-eating African lions—24 in number, which he presents in one act. Mile. Florine, with a group of Persian leopards and jaguars, and Miss Mabel Stark's Royal Bengal and Siberian tigers are also "thrillers" of the first rank. Thirty bear actors among which is Big Bill, the wrestling grizzly, provide another exciting feature. A big herd of posing and comedy elephants also have a headline act.

Fifty comedy animals, including Danger, Dynamite and Mile-a-minit, unrideable mules, provide a clean line of fun.

A glittering, six-band, mile-long street parade is presented at 10:30. Performance will be given here at 2 and 8 p. m., on Friday, Oct. 22.
