

Fort Stanton

Mrs. G. W. Bagg, mother of Mrs. F. C. Smith, returned last Sunday morning on the Golden State Limited from New York, where she has been on an extended visit with relatives and friends.

Mrs. A. V. Sifton and son, Alva, motored to Carrizozo last Saturday to spend the day shopping.

Mr. H. C. Barnes, of East Vaughn, has arrived and has been assigned as head cook at Number 6.

Miss Jennie Boone and brother, Master Robert, visited with the Sifton family a couple of days last week. They came from Captain, their home.

Library hall was crowded again last Sunday evening to witness and take part in the special Thanksgiving program as arranged by the chaplain.

Mr. and Mrs. Oscar Brockwell motored to Glencoe last Sunday on a pleasure trip, returning in the evening.

Messrs. Walter Breunig and Alex. Preson, formerly head cook and baker at Number 6, have resigned and gone to Roswell, where they have opened up a first class restaurant. They invite all their Post friends when in the New Mexico metropolis to call and sample their cooking in the good old German and French style.

The following residents of Captain came over on last Saturday evening in their cars to witness "Spartacus," an eight reel movie at the local theater: Mr. and Mrs. Geo. Fitzworth, Mr. and Mrs. John Norton, Mrs. Coombs, Misses Maude Bryan, Jennie Parker, Nellie Merchant, Messrs. Ralph and Seth Smith with Master William Smith.

Mr. James Hanna is anticipating an extended vacation trip in the near future.

Becomes Benedict

Cards have been received by a number of friends here announcing the marriage of Mr. Francis R. Canning to Miss Mabel Elizabeth Hager. The marriage occurred at Los Angeles on the 17th inst., and the newly wedded couple will make their home at Perris, California. Nearly everybody in Lincoln county is acquainted with the groom, as he spent the greater part of his life in this county, going to California with his parents four years ago. A host of friends wish Mr. Canning and his bride a long, happy wedded life.

The local agent has been busy in the past few days taking orders for Christmas cards, engraved greetings, etc.

A thanksgiving mass was celebrated in the local chapel on Thanksgiving morning at 8:15, the chaplain presiding.

This Friday evening we are to have the pleasure of seeing at the local movie house a six-reel film of "Officer 666."

Rehearsals are being held regularly for the coming big minstrel show to be given in Library hall during the holidays. Mr. Harry Leach, as chairman of the committee, and Dr. C. Irby, as head of the orchestra, are very much enthused over the liberal support given them, which further guarantees a success.

Mr. Purdy, the successful bidder recently, for the building of a new wing to the local corral, is busy on the ground rushing the work so as to have same completed before winter sets in.

The daily bulletins issued by our local wireless operator, Mr. Falconio, serve to accommodate especially those who are making a close study daily of the manoeuvres in the war zones of Europe.

The usual "movies" for each week are given on Tuesday and Wednesday evening, which with

Judge Mann Killed

Judge Edward A. Mann was killed last week near Gallup, as a result of an automobile accident. The automobile turned over, pinned Judge Mann and the other occupants under it, and when assistance arrived it was found that Judge Mann's neck had been broken and some of his companions badly injured. Judge Mann had lived in Albuquerque the past few years where he was engaged in the practice of law. From 1904 to 1909, Judge Mann was the presiding judge of this district, and was quite well known in this section.

Conductor Killed

Scott Vance, a conductor on the E. P. & S. W., was shot and killed in El Paso Wednesday night. The killing occurred in a cafe where Mr. Vance and Mrs. Mackey were dining, the slayer, Donald Mackey, being the divorced husband of Mrs. Mackey. The dead conductor had been in the employ of the Southwestern for a number of years and for a short time ran out of Carrizozo, and had many friends here who regret to hear of his tragic death.

M. C. Porter, of the Porter Mercantile company, Corona, was here Saturday, attending the Masonic lodge meeting.

Bulletin on Blackleg

The Department of Agriculture, in its weekly news letter just out, has a lengthy article on blackleg from which we take the following, and trust it may be of service to our stockmen:

The use of blackleg vaccine as a preventative measure has resulted, according to a recent publication of the department on this subject, in reducing the loss from blackleg to less than one-half of 1 per cent. Where this disease is allowed to prevail the losses to cattle from it frequently exceed those from all other causes combined, and in certain badly infected regions have amounted to more than 10 per cent of the annual calf crop. In the '18 years in which the vaccine has been distributed, nearly 24,000,000 doses have been sent out, and it is estimated that at least 20,000,000 animals have been vaccinated.

The vaccine which is now being distributed free by the Department of Agriculture is accompanied by directions which should enable the stockmen to administer it without difficulty. Where veterinarians are available it may be advisable for the farmers to engage one to prepare and inject the vaccine, but this is not regarded as essential. There are, however, a number of important points on which there appears to be some misunderstanding. Attention is, therefore, called in the circular of the following:

- Owing to the fact that a number of cattle owners have attempted to modify or have otherwise deviated from the printed directions, losses have occurred which might have been easily avoided. It is, therefore, urgently recommended that directions be followed implicitly, and especially that castrating, spaying, and deborning be not done at the time of vaccination.
- Vaccine which for any reason is not used should be returned to this office (The Bureau of Animal Industry, Washington, D. C.) immediately.
- All vaccine should be used within three months from the date on the back of each package. After this period has elapsed the vaccine may be used to advantage, in cases of emergency, as a first vaccine, but to insure immunity it is advisable to revaccinate with fresh vaccine in the course of two weeks.
- The only vaccine distributed by this department is a single-powdered vaccine for the prevention of blackleg, and it may be injected at any season of the year.
- Blackleg vaccine is distributed free of charge to stock owners of the United States.
- Neither vaccine nor application blanks will be furnished to any person for distribution among others; each stock owner must apply in his own behalf.
- The immunizing properties of the vaccine are not usually imparted until 10 or 12 days following the vaccination.
- Death of animals within one or two days after vaccination should not be attributed to the vaccine, but to the fact that they were already infected with the disease before vaccination.
- It is not advisable to vaccinate an animal after the symptoms of blackleg have developed, as the vaccine is a preventative and not a curative agent.
- Vaccination is generally followed by insignificant symptoms. In some cases there is a slight rise in temperature, and a minute swelling may sometimes be noted at the point of injection.
- Calves vaccinated before

Parsons

Thanksgiving is being celebrated this week in Parsons as well as better known parts of the world. The school under the efficient management of Mrs. Nichols, will give a Thanksgiving entertainment in Wednesday afternoon followed by a supper in the school house. The parents and friends of the scholars are cordially invited to the exercises as well as the supper.

Mr. and Mrs. J. F. Kimbell and daughter, Harriet, will spend several days in Parsons as guests of the Rice family.

Mr. and Mrs. Rice will entertain Mr. and Mrs. Anderson, Mr. and Mrs. Merriam, Messrs. Wright, Bjeldness and Markley, as well as the Kimbell family at an old fashioned Yankee Thanksgiving dinner.

Mrs. Nichols made a short visit to Carrizozo the last of the week and upon her return home was accompanied by her mother and sister.

Mrs. Ed. Pfingsten and children spent a day or so with Grandpa Robinson and family.

Miss Charlotte Rice, who has been visiting her sister, Mrs. W. L. Weber, of Fort Stanton, returned home for a few days.

James Robinson, who has been working with Mr. Purdy at Fort Stanton has returned home.

J. H. Fulmer, president of the Parsons Mining Company, spent several days here. He was accompanied by Miss Isabel Thorson and Mr. Wm. E. Dorgan, of Chicago.

The Parsons Mining Company has brought many people to our mountains this summer. Many of them have come in doubt as to resources and possibilities of this country, but all have returned to the east, to boost this particular corner of the world.

Mr. and Mrs. Dug Caine are the proud parents of a brand new baby boy.

Wild cats are not popular in and around Parsons, except for bounty procured from their scalps, so there is not much danger of the principal mining company of the Bonito district turning over any property to them.

Mr. and Mrs. Thomas Grafton and Mrs. James Robinson paid their respects to the new baby at Grandpa Greer's last Sunday.

By far the most important event of the week was the capture of a big bear by Messrs. Zumwalt and Bietters, of Nogal district. It is the second one that has been killed in the mountains this fall.

Mrs. Luther Skinner and children visited Mrs. Skinner's sister, Mrs. Lute Jennings, last Sunday.

They are 6 months old lose the artificial immunity produced, and should be revaccinated before the beginning of the next blackleg season.

12. Animals which have been vaccinated may be revaccinated after an interval of two weeks without any unfavorable results.

13. It is not advisable to vaccinate pregnant heifers within one month of the time for them to calve.

14. Immunity is not transmitted by the immunized parent to the offspring.

15. Do not vaccinate cattle while they are overheated.

16. Animals should be vaccinated on the side of the neck just in front of the shoulder and always on the same side.

17. The only satisfactory method of administering the vaccine distributed by the department is by the use of a hypodermic syringe. The method of soaking a cord in the vaccine solution and inserting a portion of the cord under the skin can not be recommended.

18. Anthrax is an entirely different disease from blackleg, and therefore blackleg vaccine does not act as a preventative against anthrax. Anthrax vaccine is not distributed by the department.

THAT FIRST SWEETHEART

We've loved many a beautiful maiden,
From the blonde to the queenly brunette;
There was Phyllis with lashes so shady,
And Flo, the vivacious society;
There were innocent school-girls and widows—
With the latter love-making 'an art—
But you ask for a toast, and I give you—
A toast to your baby sweetheart.

There was Sadie, whose lips were so saucy,
And Marie, whom you met on the beach,
And the parasol girl, dearest Floppie,
And Irene, always just out of reach;
There were some who liked moonlight and hammocks—
What a madness a kiss could impart!
But you ask for a toast and I give you—
The first kiss of your baby sweetheart.

It was long, long ago that you met her,
In the blur of the pink cherry trees,
But somehow, you cannot forget her—
Little girl with the bramble-scratched knees;
Sometimes now in your dreams and your fancies
She comes stealing with red lips apart,
Down the long lane, o'er Memory's byways—
Your pink-and-white baby sweetheart.

Train N. M. Youth

For Home Service

W. C. Reid, general solicitor for the Santa Fe railroad, sounded the keynote of the need of higher education in New Mexico at the recent 25th anniversary banquet of the Albuquerque Commercial Club, when he urged New Mexico parents and New Mexico business men to encourage New Mexico boys and girls to attend the State University and other New Mexico educational institutions, instead of going to other states.

"Half of the young men and young women you permit to go out of New Mexico to other schools, do not come back," he said. "You need those young people; need them trained in this atmosphere, trained in our conditions and trained with a knowledge of New Mexico resources; for upon them depends the future development of this state. If the New Mexico university were not as good as any other, if our schools did not properly fit young people for life, sending them to other states might be excusable. But our university and our other state schools are giving as good as can be found anywhere. Patronize your home State University."

Shoots Self In the Foot

A. H. Tiffany, who is visiting his brother, D. D. Tiffany, met with a painful accident last Saturday. The two brothers were out hunting in the mal pais country and, upon getting ready to return, Mr. A. H. Tiffany, who had been using a 20-gauge shotgun, started to throw out a loaded shell before getting into the car. Instead of doing so, however, the gun was discharged and the contents of the gun passed through the right foot. Only one bone was broken, that in the little toe, but the wound is, nevertheless, a painful one and it will be several days before Mr. Tiffany will be able to use the injured member.

COLLECTING OF TIMEPIECES IS INVENTOR'S HOBBY

Wealthy Retired Brooklyn Man Has Rare Lot of Watches and Clocks.

7,100 TICK-TOCK TOGETHER

Members of Family Take Turns Winding Up the One-Year Family Clock—One Clock Upon Which Swiss Spent His Entire Life.

New York.—The largest private collection of clocks and watches in the world is housed in the home of James Arthur, a wealthy retired machinery inventor of Brooklyn.

The mansion, built by the late William H. Hill, long has been one of the show places of the borough on account of its hardwood panelings and other decorations. Every room and hall is treated differently, and many of the rarest foreign and American woods have been employed. One room is finished in black birch, another in hickory, a third in mahogany, and so on. Another of Mr. Arthur's hobbies is cabinetmaking, and so the hill residence falls in precisely with his fancy, and he bought it partly as a museum for his timepieces, many of which are encased in the finest of woods, matching or contrasting with the paneled walls and ceilings.

There are in the collection about 7,100 clocks and 1,000 watches. The clocks of which 44 are grandfathers, are scattered throughout the entire mansion, and 21—one in each room—are kept going constantly. The others are always ready to go.

Cases Also Notable.

Not included in the collection itself are several massive hardwood cases of African rosewood, marble wood, made by Mr. Arthur with his own hands, and which stand there in silence, awaiting the day when their owner shall have designed or invented special works for them that will register in some unusual way the flight of time. He has never sold a clock or a watch, nor has he ever given one away except to his own children, for their separate homes, when they marry.

In the main parlor is the first complete clock ever made by Mr. Arthur. It is a ten-day time piece with two 10-pound weights, and a compensating pendulum of aluminum and steel. One dial is in the case and above it are three other dials, showing the way in which the machinery is arranged in a triangle tower clock. The works as well as the case are the personal handwork of Mr. Arthur, and the actual cost is estimated at over \$1,200.

The "Family Clock," also made in every part by the hand of the inventor, runs a year at one winding. The works are in a case of dark mahogany. The seven-inch spring is the largest in the United States, and the ticking arrangement, technically known as "encampment," is of the astronomical dead-beat pattern and is jeweled with diamonds.

This family clock was started by Mr. Arthur in 1908, and has been automatically wound up once each year ever since then, each time by a different member of the family. The name of the winner each year and the date are engraved by Mr. Arthur from year to year on a brass plate set in the case. The clock actually will run thirteen months without re-winding, he says. Also, he adds, it is contained in a case within a case, and is so thoroughly protected from the weather that it will last, unimpaired, indefinitely.

"Five hundred years from now," declared Mr. Arthur to a New York World reporter, "this clock will run just as well as it does now."

The outer case is of plain dark mahogany with dark oak panels.

A Glass Plate Clock.

One of the curiosities of the collection is a "glass plate clock," so called because all the wheels—there are only three in the whole mechanism—are pivoted in a single heavy plate of glass. There is no framework. The instrument was made in France and is of unknown age. There are only two others like it—one in London and one at the Conservatoire des Arts et Metiers in Paris. The large wheel has 200 teeth. The day of the week and also of the month are shown on the dial, which is enameled on copper.

Another clock has a brass skeleton frame in exact imitation of the Gothic monument to Sir Walter Scott in Edinburgh. The movement is of the chain-and-fusee type, the wheel for the chain being cone-shaped. The clock was built in Edinburgh many years ago for a priest, who brought it to the United States.

Unique Repeater.

Also in the collection is a five-minute repeater clock, designed and made by Mr. Arthur—machinery, oak case and all. A big bell rings the hours, and if a certain chain is pulled the bell will ring the last preceding hour, and a smaller bell strikes once for each five-minute period since the last hour. Thus, if it is 10:35 a. m., the big bell rings ten times and the little bell also rings seven times, indicating that it is within five minutes of 11 a. m.

WOMEN HELPING TO DEFEND RIGA

Russian peasant women digging trenches for the defense of Riga, the Baltic seaport which the Germans are trying hard to capture.

The figures on the glass dial are cut out, clear through the metal, which makes them show very distinctly in almost any light on account of the perfect blackness behind them.

In Mr. Arthur's bedroom is a get-up clock of his own invention. The face is two feet in diameter and the hands, covered by an aluminum paint, show plainly across the room if there is any moonlight. The wheels and dial are of New Jersey dogwood. The pendulum, which is over five feet long and has a 27-pound bob, beats once every one and one-fourth second a stately measure.

A Fabian Robins Clock.

Standing beside the get-up timekeeper are two tall and beautifully inlaid clocks, one made by the celebrated Fabian Robins in London, in 1695, the other by the noted Jan Gobel in Amsterdam in 1767. There are only ten of Gobel's clocks now in existence, so far as known. The Robins masterpiece has unique handmade lacquer steel hands. Though the works were made in London, the inlaid wood case was contrived in Holland, the task occupying a year.

One of the clocks downstairs has a Gothic dome of dark mahogany, made by Mr. Arthur, and the instrument is surmounted by a solid brass bell, made long ago in France or Germany, in copy of a famous cathedral bell in Moscow.

Hour First, Then Quarters.

In a mummy coffin case of dark oak of his own construction, 7 1/2 feet high, Mr. Arthur has put the works of an old French clock, made in the Department of Jura near Switzerland. It strikes the hour first, then the quarters. Most modern big clocks, including the one at Madison square, strike the quarters first. The only thing new about the machinery is the brass face, which Mr. Arthur designed.

There are two carriage-spring clocks in the house. The spring is simply the lower part of a very diminutive laminated carriage spring, lying at the bottom of the clock, with its ends turned upward. The spring is of steel and runs the mechanism for a month without rewinding.

Among the ornate clocks is one of inlaid brass and tortoise shell, in designs which include stinging birds and dancing women. Each number on the dial is on a separate plaque enameled on copper. There is a French built eight-day clock in an old case finely inlaid with ivory and tortoise shell. One of the large timepieces has an aluminum dial and a heavy brass pendulum jeweled with agates.

Distinctive Hour Hand.

Scarcely without exception the hands on the clocks in the Arthur collection consist of a spade (for the hours) and a pointer, in contrast to the common American plan of two

HER HUSBAND AT FRONT

Baroness Andre R. de Heckenrodt, formerly Miss Gertrude Covington of Kentucky, is here shown playing golf on the roof of a New York hotel in an effort to relax from the worries over the safety of her husband who is fighting for the east.

pointers. The use of the spade pattern, Mr. Arthur says, greatly facilitates telling the time at a glance.

A fine example of a Howard eight-day clock of Boston is contained in a case of unknown, unsurpassed American workmanship, so perfectly jointed, in dark mahogany, that no one ordinary man, unaided, could have done it. A new dial and hands have been added by Mr. Arthur.

There are several examples in the collection of the ancient clocks whose weights, on cotton cords, were pulled up instead of being wound. Among them is a one-day Dutch timepiece with a hand-painted dial. The works are 375 years old. Some early American owner tore off the original case, and substituted one of Pennsylvania cherry wood.

Made for a King.

On one of the mantels stands a French clock made for one of the old-time kings. It has a porcelain dial and is topped by a bronze elephant, remarkable in that it is entirely unlike an elephant in every single feature—legs, trunk, mouth, joints, ears, toes, everything—although resembling an elephant as a whole when looked at from a distance.

Among the Japanese timepieces are a number of long, narrow wall clocks that look like lizards frozen straight and stiff. The hands of these clocks are fastened to weights and move up and down, marking the hours, which are arranged in a line, one above the other. There are three elaborately designed Japanese clocks in cases, one yard in height.

Mr. Arthur has a number of curious one-minute remontoir (rewinding), springless clocks, with weights and compensating pendulums.

Made by a Blacksmith.

One of Mr. Arthur's valued antiques is an old church timepiece. Tradition has handed it down as the "English blacksmith's clock." It has the very earliest application of the pendulum, which in this case is less than three inches long, is hung on the verge of pallet axle, and beats 222 times a minute. This clock is at least two hundred and fifty years old. The wheels are of cast brass, but their teeth were laboriously filed by hand. All the staffs, pinions and pivots were filed by hand, as also were the four screws. It is a complete striking clock, made by a man so poor that he had only his anvil, hammer and file. There is only one hand, and the weights are hung by cords and have to be pulled up.

Among the other interesting timepieces in the collection are a four-faced chimney clock a yard high, on which a man in Switzerland spent his entire life; a French clock by Foligney of Jura; a gilt clock in glass, the pendulum bob of which is a child swinging in and out instead of across; an eight-day clock, 250 years old, made with iron plates, with a dial of melted pewter spoons; a French clock which has a dinner plate dial and no hole for winding.

COURT MAKES QUEER ORDER

Robber Gains Two Years' Parole on Condition He Repays Cost of His Trial.

Houghton, Mich.—John Spelch has been released from the county jail for two years' probation on one of the queerest orders known here. Spelch was given his freedom by Judge O'Brien on condition that he repay within two years the costs of his capture and his trial.

Spelch stole \$1,000 from a teapot belonging to Mrs. John Mosander, a widow. The money was the life insurance of her husband. All of the cash was recovered and the woman did not want to prosecute.

He will return to the widow and work for her.

Well Will Heat Town.

Edgemont, S. D.—Edgemont soon will enjoy the distinction of being the only city in the state or northwest which has buildings heated by water from an artesian well. The famous hot water spouter which was completed here some months ago will be utilized in the business district.

Nine Pearls in One Mud Clam.

Elma, Wash.—Victor Minkler of Montezuma has taken 120 pearls from mud clams along the Chehalis river within three days. For one of the pearls he was offered \$20. He said that from one clam alone he had taken nine pearls.

NEWS and GOSSIP OF WASHINGTON

State Department Needs Fine Penmen for Notes

WASHINGTON.—A "note" in the old sense of the term was a brief, informal message sent to a friend or acquaintance. In the language of the diplomatic world, a "note" is a most formal document. In fact, it is the most formal method of communication between two sovereigns.

"Notes" have been going from Washington with more or less frequency of late, and while the world is interested in the contents, few think of the way the word of the president of the United States is conveyed to the rulers on the other side of the seas. Such messages are written, or more properly speaking, they are engrossed by the fine penmen in the employ of the department of state.

Ben G. Davis, E. B. Russ, and Percy F. Allen. The department of state is the home of perfect penmanship. More of it is done there than in all the other offices of the government put together. The reason is that all foreign correspondence is essentially distinctive and individual in its character. Here old forms of address and quaint complimentary closings are the order of letters of diplomacy going out to kings, emperors, potentates, and rulers of the great and small countries that are dotted over the face of the earth.

This correspondence that has a tendency to redundancy, or at least to verbosity in some cases, cannot be conducted by printed or engraved forms. It is individual and it is necessary that the document shall be entirely legible, and artistic as well. It must, therefore, be done under the hand of a man who is a master of the pen—a "Jim the Penman," who uses his talents only for good and legitimate purposes.

Corps of Engineers Keeps Busy in Peace Times

THERE is one division in the war department as busy in times of peace as it is indispensable in time of war—the corps of engineers. To it falls not only the preparation of our forts and coast defenses, but the care of all the national waterways and harbors.

If Podunk wants its creek converted into a raging ship canal Podunk must secure the approval of the district engineer and the chief of engineers before congress will appropriate from the treasury the money to pay for the operation.

The jurisdiction of the war department extends to the navigable waters and the streams that feed them, so that no bridges can be constructed over the navigable waters without a permit, and practically no dam can be maintained in even the smallest stream if the department finds that it is against the interest of the government, as guardian of navigation, that it should exist.

The courts have held that the water supply of a navigable river must not be curtailed. So, when a complaint was made by a ferryman that manufacturers on the Savannah were putting up flashboards from Saturday afternoon until Monday morning to conserve their supply of water, thus making the river below the dam fall so low that he could not operate his ferry boat, the department ordered the flashboards removed, and although there were threats of lawsuits, the water resumed its flow Sundays as well as other days.

All the functions of this nonmilitary authority of the war department are exercised by the secretary through the engineer corps, and since the government has already expended more than \$800,000,000, and the appropriation last year was a little more than \$35,000,000 for this branch of the service, it will be seen that some heavy work must be done.

Rifles, Dogs and Ferrets Clean Out "Rattown"

THE population of "Rattown," in the Eastern market, Seventh and C streets southeast, one of the most prominent local centers for the tribes of rodents of the District, suffered the other night at the hands of men armed with rifles, eager terriers and lithe ferrets. To the latter crawling into pipes about half as big as their own bodies is all in the day's work.

For months the activities of the rats caused Marketmaster James A. Mangan to suffer with nightmares. Not contented with holding bacquets each night among the big stands, they had grown so bold that they staged caucuses, debates and committee meetings in the middle of the floor at noon, the presence of customers and clerks making no impression upon them. That is all over now, though. James H. Sherman, superintendent of weights, measures and markets, was appealed to, and, like a modern Pidd Piper, he indicated the method by which the rats could be restrained from running the bazaar. The dogs, ferrets and marksmen were procured, and they commenced a ten-day war.

When the popping of rifles, shrill yelps of dogs and squeaks of rats—generally gave just one squeak before the terriers broke their necks—proceeded from the market, groups of spectators gathered about. There were precipitate retreats from doorways and windows when some rodent working the law of self-preservation to the limit dashed nimbly for the sidewalks.

When the ferrets were released from the boxes in which they lay sleeping unconcernedly, things began to move more quickly.

Great Recreation Ground for Adults in Capital

A MAMMOTH recreation ground for grown-ups, so universal in appeal that the lover of practically every sport will find the means of indulging his favorite pastime; so central in location that the business man and the government clerk need waste no precious moments after office hours in reaching it, and so cosmopolitan in establishment that the multimillionaire can find congenial companionship as well as the man who works for a small wage.

Such is the gigantic plan now under way in Washington, that will give to the capital a recreation ground equaled in no other world center and far outshining all other similar places in this country. Furthermore, Uncle Sam is backing the project, financially as well as in every other way. The location for this recreation ground is that portion of Potomac park east of the railway tracks. It is a piece of ground which on the old maps of the District was designated merely as "river." In other words, it is "made ground."

Present plans for the recreation park call for a vast stadium, one 18-hole golf course, 40 tennis courts, six baseball diamonds, two gridirons, two cricket fields, two bathing pools, with suitable house adjacent for dressing-room purposes; a boating area, band stand, golf house and refreshment house, as well as general picnic grounds.

Just how long it will take to build this gigantic playground for grown-ups and how much money will be needed are two questions which Colonel Harris tries himself unable to answer. He makes the emphatic statement, however, that a beginning will be made just as soon as congress appropriates sufficient money, and that as soon as the next session convenes plans will be made to show the appropriations committee.

If Never Came Back

Backache Sufferer! Thousands will tell you what wonderful relief they have had from Doan's Kidney Pills. Not only relief, but lasting cures. If you are lame in the morning, have headache, nervous troubles, dizzy spells and irregular kidney or bladder action, don't wait until gravel, dropsy or Bright's disease gets hold. Use Doan's Kidney Pills, the best recommended kidney medicine.

A Colorado Case

Mrs. W. H. Dawson, 403 S. Ninth St., Canon City, Colo., says: "For years I had a dull ache in my back and a headache. I had a hard time to get up in the morning. Spots appeared before my eyes, and I frequently had headache and dizzy spells. My kidneys acted irregularly, too. Doan's Kidney Pills did me of all these ailments and I have since been in good health."

Get Doan's at Any Store, or Write to: DOAN'S KIDNEY PILLS, FOSTER-MILBURN CO., BUFFALO, N. Y.

Your Liver Is Clogged Up

That's Why You're Tired—Out of Sorts—Have No Appetite.

CARTER'S LITTLE LIVER PILLS will put you right in a few days. They do their duty. Cure Constipation, Biliousness, Indigestion and Sick Headaches. SMALL PILL, SMALL DOSE, SMALL PRICE. Genuine must bear Signature.

Information about Lincoln.

It was left to a Boston schoolboy of a dozen years to give the world some entirely new information about Abraham Lincoln. He did it in this way when asked by his teacher to write what he knew about the great war president.

"Abraham Lincoln was born on a bright, sunny day in February, 1809. He was born in a log cabin he had helped his father to build."

Some of the many artists who are at the front in France make their sketches undaunted by shell fire. The Century magazine publishes a picture of the ruins of a farm house, about which the battle had raged, drawn by Henri Jaquier, who took the first grand prize of the Salon. "While M. Jaquier," says a fellow-artist, "was finishing this drawing with very rapid pencil strokes, a shell burst near him, and actually lunged the earth into his car. But the drawing was finished."

Crinolines in History.

The oft-threatened return of the crinoline, prophesied by alarmists of fashion, leaves us all wondering. We find that the crinoline was first worn in the sixteenth century by a Spanish princess, who used it to conceal her love letters from a forbidden admirer. According to pictures of Queen Elizabeth she was the first to wear it in England, a writer in the St. Louis Post-Dispatch states. Perhaps she wore it for the same reason. She had need of pockets to hide such, provided all her admirers wrote to her. Among her earlier portraits we find that her dress resembled that of Queen Mary, her sister. The skirts of these were simply widened at the bottom.

FEED CHILDREN On Properly Selected Food. It Pays Big Dividends.

If parents will give just a little intelligent thought to the feeding of their children the difference in the health of the little folks will pay many times over, for the small trouble.

A mother writes: "Our children are all so much better and stronger than they ever were before we made a change in the character of the food. We have quit using potatoes three times a day with coffee and so much meat."

"Now we give the little folks some fruit, either fresh, stewed, or canned, some Grape-Nuts with cream, occasionally some soft boiled eggs, and some Postum for breakfast and supper. Then for dinner they have some meat and vegetables."

"It would be hard to fully describe the change in the children; they have grown so sturdy and strong, and we attribute this change to the food elements that I understand, exist in Grape-Nuts and Postum."

"A short time ago my baby was teething and had a great deal of stomach and bowel trouble. Nothing seemed to agree with him until I tried Grape-Nuts softened and mixed with rich milk and he improved rapidly and got sturdy and well."

"There's a Reason."

Thanksgiving Services At Fort Stanton

In Library hall last Sunday the following program was carried out.

- Organ prelude. Hymn, selected—Assembly. Invocation—The Chaplain. Violin solo, "Praise the Lord"—S. Beckstrom, and Dr. C. Irby, accompanist on piano. Reading, Thanksgiving Proclamation—E. T. Carroll. Hymn, selected—Assembly. Poem, "Autumnal Reflections"—The Chaplain. Vocal solo, selected—Mrs. F. C. Smith, with violin obligato. Address, "Thanksgiving—The Chaplain. National Air—Assembly.

Chaplain Frund's address upon "Thanksgiving," to the exceptionally large audience, follows.

To many the Thanksgiving proclamations of our President and the Governors of our various states seem to strike jarring notes in these days of tragedy. To most men these seem to be times for dirges rather than for hymns of thanksgiving. The souls of men are harrowed by the tales of intolerable suffering and incredible slaughter. No man with a soul in him can be indifferent to the human catastrophes that have filled the past year with a record which no other year of human history has ever matched.

Notwithstanding the evils that have filled the past year, it is entirely fitting that we should sing our hymns of thanksgiving. Sobered though our hearts may be, they find many blessings from heaven amid the horrors wrought by men. All is not carnage. The conditions that call forth martyrdom may be as black as hell, but self-immolation illumines them with the very glory of heaven. Whatever the reasons for war, it

is noble to die for one's country. We thank God that the race has not lost its stamina and is still ready to seal with its blood, if needs be, its love for country.

Amid the changes among nations and races that are being worked out by this world war, men's souls may well be fearful as to the future. What will come of it all? What will be the price of it and who will pay it? We thank God in such a moment as this the unquenchable optimism of the race asserts itself. In the very storm centers of adversity men are planning the renewal of a devastated world.

An optimist that believes that there is nothing so bad that it cannot be worse will make the charred battle fields of Europe bloom again. A courage that can endure the worst and rise out of it asserts anew the nobility of man. We thank God for the spirit of man as revealed and ennobled by this year of tragic events. War arouses the worst passions of men and calls forth abominable vices. In spite of the riot of sin the man of faith is conscious of glorious virtues formed in heroic molds. The human beast may be more of a beast in times when men can be what they will to be, but the typical man in the trenches is no beast. He is the average man. He belongs to the great crowd that constitutes the rank and file of the army. He is the saint and the sinner, but there is so much of the saint in him that we thank God for His abundant grace which can fit man for any task. Thousands that had seemed to have forgotten God in the days of peace have proved that in their hearts they remembered Him. Under the clouds of the approaching storm they prayed for the grace of repentance, and it was given them plentifully. Thousands have gone

forth into the valley of death with their faces towards their Creator, who in days of peace had walked in contrary ways.

Heaven has been peopled with thousands whose feet had been planted on the road to perdition. We thank God for His marvelous redemption amid distress and storm of war.

America has not escaped all effects of the great war. Its peace and unity have been threatened in many respects. Its business has been injured and its poor have suffered. Above all, its heart has been wrung by sympathy for those who are in the trenches and those who weep at the soldier's fireside.

Many Americans are bound by ties of blood to those who are dying at the cannon's mouth, and those who are bereaved at home. It would be unseemly if we were to forget our share in the world's great sorrow. Notwithstanding deep radical antagonisms a common misery has established anew the claims of a common humanity. We thank God that the race of giants is not extinct. We thank God that in the midst of material havoc, His grace has achieved spiritual triumphs that belong to

all His people. We thank God for much light in darkness.

Thanksgiving day is an American feast day. It is entirely proper that we should rejoice in the special good fortune of our own beloved country. We are glad that that war has not blighted our fair land, and decimated our fellow citizens. We are glad that we have been able to maintain peace with honor, although provocations have been great and from many quarters.

We are glad that our people have sensed their danger and demonstrated that they will be ready, when need be, to pay the price of love for country. We thank God for most abundant harvests. We thank God for assurances of returning prosperity, for the abounding health of our people, for happiness of our boys and girls, and the healthy sports of our youths. We thank God for the good cheer of the countless homes throughout the nation. Above all we thank God for the increasing prosperity of religion in this land of true liberty.

We have been very rich in inestimable blessings during the past year, and for many years. It is good for us to be mindful of these at all times. It is more fitting than ever that we remember them with gratitude, when the clouds are upon the horizon.

If the earth seems to be slipping beneath our feet, let us never forget that the sun is in the heavens and God reigns over all.

Let us thank God that our country has never forgotten that "every best gift and every perfect gift is from above, coming down from the Father of Light, with whom there is no change, nor shadow of alteration."

OUR PUBLIC FORUM

F. C. Howe On The Advantages of Free Ports

Mr. F. C. Howe, Federal Commissioner of Immigration, who is one of the best American authorities on marine commerce, in discussing the relation of free ports to the development of sea trade said in part:

"Ships will go hundreds of miles out of their way to avoid ports surrounded by a tariff wall. The only way, therefore, for a country with a tariff to compete in the shipping world with a free-trade country is to establish free ports at strategic points along its coast line. Germany has done so, and in a comparatively short period has built up a carrying trade which before the war was seriously threatening England's supremacy. Hamburg, one of the three German free ports, now ranks as the second greatest seaport in the world, its total foreign commerce in 1913 being only \$3,000,000 under that of New York.

"The free port would offer great opportunity for financial operations, now made possible by the recent currency act. It would stimulate international banking, and would tend to shift the financial center of the world to this country. And America, by the logic of events, has become the natural center for the world's financing, just as London became that center several centuries ago, when it shifted from the cities of the Netherlands. But the financial center will only move to this country when it becomes a clearing house of goods as well as of money. For credit the world over is created by currently created wealth in transit or in change so that our financial expansion is dependent upon the opening up of American ports to the clearance of the wealth of the world. A port should not operate to yield a return on the investment, but to develop the prosperity of the country." In recapitulating the advantages, Mr. Howe brings out the importance of the free port in developing our shipping and linking us with South America, Asia and Africa, and then concludes:

"The most important gain is the direct gain to America. It will cheapen commodities by bringing great quantities of goods to our doors for importation or export, as trade needs demand. It will stimulate the growth of exporting houses, which can hold goods for an indefinite period without payment of tariff dues (often equal to the cost of the article itself) for disposal to meet the trade demands of the whole world. It will uphold international credit and shift to America an increasing and ultimately a predominant share in international exchange.

"Finally, America is the natural country to be the counter of the world. Its seacoasts face every other continent; it is the greatest of all reservoirs of raw materials and foodstuffs. In iron and steel and standardized production it is in a position to compete with the world. But international trade (and this is always overlooked) must be reciprocal. It cannot be one-sided. And credit balances cannot for any prolonged period be paid in gold. They can only be paid by exchange of wealth."

Strange Politics

The recent elections in a few eastern states brought out a peculiar political situation. The European war has been productive of a new political alignment, or, at least, a new basis for political affiliation. The German vote in several states was cast almost solidly against the democratic candidates as a rebuke, so it is said, to President Wilson. Now since the English have been requested to right some wrongs suffered by Americans it seems, using the same basis for argument, that they, too, will oppose President Wilson's re-election. Therefore, if there are not enough Irish and pure Americans who have been away from the mother country so long that they consider their American citizenship above anything the old country offered their forefathers, the chances of the present occupant of the White House cannot be said to be the best. How republicans who pride themselves on their American lineage and admiration for American institutions can get any comfort out of such a situation must be left for them to explain.

That the so-called foreign vote is a determining factor cannot be questioned, and that it is a menace to our government when directed against the government's foreign policy is equally patent. The menace at this time, it is true, makes the democratic party the recipient, but if the republican party were in power it would merely reverse this situation; for it is inconceivable that the republican party would have adopted any other course of neutrality toward European combatants had it been in power than the one pursued by the authorities at Washington. In fact, republicans, generally, commend the attitude of the government in its stand for neutrality and protection to American interests. But the menace remains just the same, and the following from Leslie's Weekly is sufficiently convincing to justify a settled belief in its existence:

"Something more than 15,000,000 votes were cast at the last presidential election. There are nearly 27,000,000 males over 21 years of age in the United States, but not all of these, of course, are qualified voters. About one-fourth of the males over 21 years of age are foreign-born, while nearly one-half are foreign-born or of foreign parentage. This indicates clearly the strength of the foreign-born, or those of

foreign parentage, in the elections held in the United States. No list has ever been prepared to show the exact number of Germans, Russians, English, or any other race in any election, but it is possible to show the percentage of those races qualified to vote in the United States in the next presidential election. In the New England states, for instance, there are 34,000 Germans qualified to vote, as against 69,000 naturalized Englishmen. In addition to the 34,000 Germans there are 30,000 Austrians, and about 8,000 Hungarians. In the Middle Atlantic states there are 142,000 naturalized Englishmen, as compared with 371,000 Germans, 270,000 Austrians and 130,000 Hungarians. Out on the Pacific coast there are but 43,000 Englishmen, 12,000 Frenchmen and 16,000 Russians, as compared with 73,000 Germans, 2,300 Austrians and 3,000 Hungarians. One of the states where the German vote may have the greatest influence at the next election is New York, with 215,000 naturalized Germans, 105,000 naturalized Austrians and 39,000 Hungarians, or 359,000 out of a total foreign-born white naturalized population of 502,083. The same proportion of voting strength is maintained in Pennsylvania, with its 95,000 naturalized Germans, 68,000 naturalized Hungarians and 145,000 naturalized Austrians; and in Ohio, with 87,000 Germans, 38,000 Austrians and 47,000 Hungarians, and in Illinois with 159,000 Germans, 81,000 Austrians and 20,000 Hungarians. Considering the fact that the total naturalized foreign-born population of the United States is 3,034,117, it is significant that the number of naturalized Germans in the country is 889,070, while the number of Austrians is 149,914 and the number of Hungarians 36,610. This is by far the largest potential voting strength of any class of foreign nationality. It would mean that in close elections in nearly all the large eastern states, the Germans probable would hold the balance of power.

"The influence of the Teutonic vote was felt in elections on November 2nd, and in Maryland and Massachusetts. It is said that nearly 20,000 Germans in Baltimore alone voted the republican state ticket in hope of preventing a democratic victory and an endorsement of the Wilson administration. More Germans might have voted that way had

not the democratic state leader refused to ask from President Wilson a public approval of Harrington, democratic candidate for governor. In Massachusetts the victory of McCall, republican candidate for governor, may have been due to the fact that Walsh, the democratic candidate, was regarded by Germans as the representative of President Wilson."

GOOD ROADS

IMPROVING THE POST-ROADS

Four Hundred and Sixty-Five Miles of Experimental Highways Are Now Under Construction.

Four hundred and sixty-five miles of experimental post-roads of different types, benefiting 28 different counties, are now under construction in 13 states, which are co-operating with the federal government. These roads, which are being built under the supervision of the department, are authorized by the act of congress of Au-

Ohio State Highway, Brick.

gust 24, 1912, which appropriated for the post-road department \$500,000, to be expended in an experiment to test out the value of improved rural-carrier routes. The federal government pays one-third and the state or county benefited must defray two-thirds of the cost. The entire sum of \$500,000 of federal funds and \$1,000,000 of local funds will be expended under the supervision and checking of federal highway engineers.

The following work on post-road improvement has been undertaken, according to a bulletin dealing with the construction and maintenance of roads and bridges, issued by the department:

Lauderdale county, Alabama, 30 miles of earth road.

Boone and Story counties, Iowa, 61 miles of earth road.

Dubuque county, Iowa, 20 miles of gravel road.

Bath and Montgomery counties, Kentucky, 11 miles of macadam road.

Montgomery county, Maryland, 5.4 miles of macadam road.

Cumberland county, Maine, 21 miles of bituminous macadam road.

Leflore county, Mississippi, 24 miles of gravel road.

McDowell county, North Carolina, 16 miles of earth road.

Davis, Forsyth and Iredell counties, North Carolina, 48 miles of sand-clay and top-soil road.

Licking and Munking counties, Ohio, 24 miles of concrete road.

Jackson county, Oregon, 61.4 miles of earth road.

Aliken county, South Carolina, 27.3 miles of sand-clay and top-soil road.

Loudon county, Tennessee, 6.4 miles of macadam road.

Montgomery county, Tennessee, 7.6 miles of macadam road.

Hexas, Comal, Aravis, Hays and Guadalupe counties, Texas, 71.6 miles of gravel road.

Fairfax county, Virginia, 12.3 miles of gravel road.

Spotsylvania, Caroline and Hanover counties, Virginia, 38.2 miles of sand-clay and top-soil road.

As rapidly as these roads are constructed the department is endeavoring to interest the local authorities in insuring systematic maintenance to keep them in condition. The county engineer has undertaken the maintenance of the Virginia post-road in Spotsylvania county, and another will supervise the upkeep of the completed part of the Ohio post-road. It is believed that this local maintenance system will be extended to the post-roads to be built in Maine, Tennessee, Texas and Alabama.

Bulletin on Roads.

The United States department of Agriculture bulletin, No. 220, is upon the subject of roads, and it is well worth reading. It tells of Roman roads, French roads, and treats not only of road surfacing, but of road grading and foundations for roads. Send for it, it's free.

Orange Ice.

Four cups of water, two cups of sugar, two cups of orange juice, quarter cup of lemon juice, grated rind of two oranges. Make a syrup by boiling water and sugar 20 minutes, add fruit juice and grated rind; cool, strain and freeze.

To Prevent Blue From Fading.

To prevent any shade of blue from fading soak for two hours in a pail of water to which one ounce of sugar of lead has been added. Then be sure to dry well before washing and ironing.

LATEST FRENCH GOWNS

NEWEST IDEAS OF THE MAKERS OF FASHIONS.

Innovations Set Forth by Worth Have Been Accepted as Getting Forth Styles of Season—For Afternoon and Evening.

An attractive feature in some of the very new gowns is the introduction of trains that hang from the waist. Worth is responsible for this innovation. That house has always liked the ceremonial in clothes, going in strongly for the dignified English effects, as the founder was an Englishman.

The uncle who runs the house is opposed to many of the modern features of clothes; the exploiting of new ideas through manikins at public places was never allowed, and well-known members of the half world were not allowed in the house. When one knows Paris and knows how much courage it required, and monetary loss it involved, to insist upon these eliminations, then one can get a bird's-eye view of the dignity of the house of Worth. It may not have paid, commercially or artistically, but it exists.

Now that the firm has closed its historic London house, the Paris creations may become more eminently French, but, so far, there is no evidence of it. Only America matters now with the makers of clothes, and Worth believes, rightly, that there is a large number of Americans who do not like the modern tendency toward girliness and frivolity in clothes, especially for those whose youth has gone.

The evening gowns which he advances for this winter have their cascaded trains lined at the sides with satin in a pale color. Someone who wanted a simple gown from which was eliminated the gogaws that spot the surface of most of the Watteau frocks, asked Worth if he could make it.

His answer was a pinkish red velvet without a touch of any other color or trimming on it. The deep décolletage was cut in the English man-

Evening Frock of Silver Lace, With Full Plaited Tunic of Pink Satin.

nor and held over each shoulder by a band of red velvet ribbon, ending in a bow that stood almost to the ears.

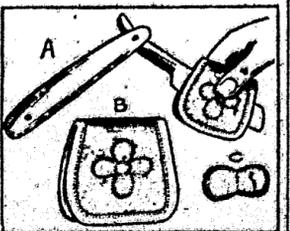

It was necessary that the French designers choose chiffon or silk for the best of their afternoon frocks, because they did not have recourse to a variety of fabrics so long as the Germans hold the industrial towns of northern France.

Thus, Rodier, the fabric maker, put up new mills and went on with his work as though the Germans were in

FOR POLISHING THE RAZOR

Useful Little Article That Will Be Found of Value in Almost Every Household.

It is a common habit with many men to polish a razor with a towel after they have finished shaving with it, and the consequence is the towel often suffers from a number of small cuts. Our sketch shows a useful little article to be used for this purpose in the place of the towel, that can be made in spare moments from

almost any small remnants of material, and that can take its place upon the dressing table.

It is made of silk, and bound at the edges with narrow ribbon and lined with soft wash leather. It is cut out in the shape shown in diagram C, and measures six inches in length and three inches in width when spread out quite flat. It folds together in the center in the manner shown in diagram B, and diagram A shows the way in which it can be used to wipe the razor.

For appearance sake, some simple

TIPPERARY HAT

The Tipperary Hat is a Stovepipe affair, Trimmed With Green Shamrock and Was Made Especially for Miss Harrison by Paquin of Paris. This is the First Time It Has Been Seen in America. In England, Miss Harrison, whose father is a Colonel in the Royal Engineers, Reversed the Laws of Romanticism by Acting as a Romeo to the Suffering Soldiers in the Hospitals and Serenading Them.

their own country, not his, but Franco had on hand, and found easy to get, a mass of chiffon, so the fashion was created for frocks of that fabric, and the top coat emphasized an adjunct to them.

These chiffon frocks are in entrancing colors. There is nothing flamboyant. Green that has gray in it, pale purple, yellow, called orange-red, crow blue, taupe-a-plenty. Mole skin is revived to trim the taupe-colored frocks, and seal skin is here to touch off the gowns of deep brown and pale gray blue.

There are few frocks of heavy materials. They would be unbearable under heavy top coats in this climate. So the woman who wants one good frock that will serve many purposes can be suited easily this season.

(Copyright by the McClure Newspaper Syndicate.)

DICTATES OF FASHION

Wool embroidery and odd fur trimmings are features.

Many coats are high waisted either in back or front.

Broad-striped coats are worn for sports over white dresses.

Vests and pocket flaps give a suggestion of Louis XVI fashions.

Jersey scarfs in wide stripes are used about the neck and as girdles with white morning frocks.

Sleeves on some of the new evening frocks are no more than little ruffles, sometimes of tulle edged with beads and sometimes held out with a flexible wire at the lower edge.

Little design such as suggested in the sketch can be worked upon the exterior, and should it be desired to hang it up it is an easy matter to sew on a small loop of ribbon at one corner. A similar case to hold tissue paper about the same size should also be at hand so that the razor can be wiped before being polished.

USE FOR THE OLD WAISTS

Skilfully Haddled They Make the Very Best Kind of Slipover Corset Covers.

Make use of your embroidered waists that are out of style by making them into slipover corset covers. Cut out the sleeves and open underarm seams, sew up the back or front, finish with small tucks or strips of lace. Cut out the neck large enough to slip over the head. Cut in shape from shoulder to underarm, finish with lace, put tape on back.

Some of the newest neckwear is made of black and white silk. It is very effective. There are some in wide stripes, high stock with flaring points under the ears, and waistcoats that button straight up to the throat. Often these points and the big collar are lined with plain black or plain white for contrast, and the buttons match the lining. Then there are white gumpes and vests and collars trimmed with piping and embroidery of black.

Variety of Sleeves.

New models show great variety of sleeve design. Some are full above the elbow and very narrow on the forearm; others flare widely at the wrist.

HOW TO SERVE LAMB

SUGGESTIONS THAT MAY BE NEW TO HOUSEWIVES.

Preferences of the Family Are, of Course, the First Things to Be Considered—Best Method of Utilizing the Broth.

"You know I said the other day that I had some good recipes for neck and breast of lamb." Mrs. Happy Home-maker opened her manuscript "cook book" and proceeded to read:

"The neck may be used for various kinds of stews. The neck cut in small pieces is boiled with onions, turnips, and carrots, and when almost done add half a cupful of flour made into a thick, creamy paste with milk. Let this boil with the stew for ten minutes.

"Or use this recipe: Put the pieces of lamb into a frying pan with melted butter, and turn until the pieces are a light brown; then pour into a stew pot with two or three large tomatoes (or a can of tomatoes if the fresh ones are not in season), an onion, and a few carrots. When this is served it makes an appetizing addition to circle the dish with boiled rice.

"The breast may be used as a roast with browned potatoes and vegetables, and served with a sauce of tomatoes.

"But this is the way the family likes it best. Take the lamb bones, which the butcher will take of the forequarter in boiling it for you, and to these add the breast, putting all into a pot to boil with one onion, one large carrot, a couple of potatoes for thickening, and two tomatoes for flavor. When the breast is thoroughly cooked carefully take out all the bones so as not to break the meat. Press the meat between two large plates, with a weight on top so that the meat may be molded into an even roundness. This may be served cold with a garnishing of lettuce and cold vegetables, with salad dressing, and is a delicious hot day luncheon dish. Or the mold may be cut into slices and fried in bread crumbs.

"The broth which is made from the liquor in which the breast has been cooked is very rich; add a little barley or rice and you will have a wholesome and ample supper for the little folks.

"In buying a shoulder of pork ask the butcher to bone it for you, then tie into a round roast so it will keep its shape. Rub well with salt and pepper, and a little thyme or sage, too, gives a pleasant flavor, and roast in a medium hot oven. If you do not use a self-basting roaster, the meat should be basted often. A shoulder of pork weighing eight pounds takes about 40 minutes to cook. This may be served with apples baked in the same pan, if an open roaster is used or with apple sauce."—Kansas City Star.

Non-Fattening Foods.

Many foods which are nourishing do not produce fat. The two kinds which create fatty tissues are fats of all kinds, like butter, lard, drippings (food cooked in them), and the large group of foods classed as starches. If eaten in excess starch will be laid up in the body as superfluous or stored fat.

Following is a list of nourishing foods which will not produce excess fat:

Light meats, like chicken, white fish, lean beef; all vegetables except potatoes, parsnips and other starchy kinds; fruit of all kind except bananas, grain or cereals, except oatmeal and rice; beans and cheese; milk, in small quantity, eggs.

Milk and eggs will fatten unless exercise is taken or the body is in a very run-down condition. Cocoa is a fattening drink also.

Chicken Truffles.

Chop the raw meat of a four-pound chicken very fine; add four well-beaten eggs, one at a time, with one-third of a pint of thick cream and salt and pepper to taste. Cook in buttered timbale molds, garnished with truffles, and set in a pan of hot water in a slow oven. Cover with buttered paper. Bake half an hour. Serve with this sauce: Two tablespoons each of butter and flour, a cupful of chicken stock or milk, turned onto the broken yolks of three eggs.

Grape Sago.

Wash one cupful of sago, and soak it in three cupfuls of cold water for two hours. Cook till transparent and add one cupful of grape juice and one cupful of sugar. Turn into a mold and serve very cold. Currant jelly may be substituted for grape juice by thinning a tumbler of the jelly with one cupful of boiling water.

About Roast Pork.

When buying a strip of pork to roast get your butcher to saw the long bone on the top of the strip lengthwise instead of cracking it at each chop. When roast is done it can be taken off and each slice cut without any splintered bones.

Grape and Meat Salad.

After washing a bunch of white and a bunch of purple grapes remove the seeds with a sharp knife. Make nests of watercress on lettuce leaves and fill with the grapes and nuts. Serve with a French dressing.

To Reheat Rolls.

Roll either cold rolls or biscuits in wet paper, lay in a pan and let them remain in a hot oven until the paper scorches. They will then taste as if freshly baked.

COULD DO NOTHING MORE

Captain's Responsibility for the Safety of His Passengers Had Been Automatically Ended.

The dangers of travel by sea at this time have played havoc with the nerves of timid passengers.

Early one morning recently there was considerable commotion on the deck of a coastwise vessel plying between Savannah and Baltimore, when a scantily clad man hurried from his stateroom and dashed toward the upper deck. "On the way he ran into the captain of the vessel.

"What's the matter, captain?" he managed to gasp. "Have we been torpedoed?"

"Calm yourself, my dear sir, and be prepared for the worst," answered the official.

"Oh, don't tell me we're going down!" moaned the other. "Quick, where are the life preservers?"

"They wouldn't be of any service at this stage," explained the captain.

"Too late?" quavered the despairing passenger.

"Yes," said the captain, very solemnly. "We've done all we can for you. You'll have to look out for yourself from now on. You see, we've just tied up to the dock."

"SO SHINES A GOOD DEED"

Thoughtful Act of Busy Man Led Another to Emulate His Work of Kindness.

He was a brisk, well-groomed young man, who looked as if he were hurrying to keep a date with Fortune. He had crossed the green grass and goldenrod place by the big hotel near Union station, and had jumped the tiny ditch that is going to be a gutter some day, when he noticed an old whitey gray horse standing by what will be the curb.

The dejected patience of the poor creature must have appealed to the young man, for he sprinted back to the green grass, pulled a bunch of it and slipped it into whitey gray's mouth.

Old Mr. Horse munched his treat with a sudden interest in life that expressed itself in the flicker of its pallid ears and the general bracing up that means courage.

And a man who had come out of the big hotel in time to catch the incident also went over to the green grass pulled a bunch and slipped it into whitey gray's mouth.

Such is the force of example.—Exchange.

THICK LOVELY HAIR

Because Free From Dandruff, Itching, Irritation and Dryness.

May be brought about by shampoos with Cuticura Soap preceded by touches of Cuticura Ointment to spots of dandruff, itching and irritation. A clean, healthy scalp means good hair. Try these supercreamy emollients if you have any hair or scalp trouble.

Sample each free by mail with Book. Address postcard, Cuticura, Dept. XY, Boston. Sold everywhere.—Adv.

No "Smoke of Battle" Now.

One of the marked features of the European conflict that distinguish it from the wars of the past is the absence of smoke on the firing line. Owing to the use of smokeless powder, no smoke is made when a rifle is discharged, while the heaviest artillery throws off nothing more than a thin mist that is invisible a hundred yards away and disappears within a few seconds after the gun is fired. Only when shrapnel or a shell explodes in the enemy's line is there anything visible in the way of smoke, the whole purpose being to conceal the position of the guns throwing the projectiles while making the points where the projectiles explode clearly visible. The expression, "the smoke of battle," so faithfully descriptive of the wars of the past, has little meaning when applied to a modern war.—Popular Mechanics Magazine.

Reassuring.

The Kind.

"He was a regular furnace of wrath."

"Yes—a hot-air furnace."

Cut the Cost of Living!

A plate of hot biscuits or muffins, a fresh, home-baked cake, a loaf of brown or nut-bread, rescues any meal from the commonplace, and more expensive things are never missed.

With K.C., the double acting baking powder, good results are doubly certain. There's economy too, in the cost of K.C.

MRS. THOMSON TELLS WOMEN

How She Was Helped During Change of Life by Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"I am just 52 years of age and during Change of Life I suffered for six years terribly. I tried several doctors but none seemed to give me any relief. Every month the pain were intense in both sides, and made me so weak that I had to go to bed. At last a friend recommended Lydia E. Pinkham's Vegetable Compound to me and I tried it at once and found much relief. After that I had no pains at all and could do my housework and shopping the same as always. For years I have praised Lydia E. Pinkham's Vegetable Compound for what it has done for me, and shall always recommend it as a woman's friend. You are at liberty to use my letter in any way."—Mrs. THOMSON, 649 W. Russell St., Philadelphia, Pa.

Compound to me and I tried it at once and found much relief. After that I had no pains at all and could do my housework and shopping the same as always. For years I have praised Lydia E. Pinkham's Vegetable Compound for what it has done for me, and shall always recommend it as a woman's friend. You are at liberty to use my letter in any way."—Mrs. THOMSON, 649 W. Russell St., Philadelphia, Pa.

Change of Life is one of the most critical periods of a woman's existence. Women everywhere should remember that there is no other remedy known to carry women so successfully through this trying period as Lydia E. Pinkham's Vegetable Compound.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

WHO IS TO BLAME

Women as well as men are made miserable by kidney and bladder trouble. The standard recommendation Dr. Kilmor's Swamp-root, the great kidney remedy. At drug stores in fifty-cent and dollar sizes. You may receive a sample size bottle by Parcel Post, also pamphlet telling about it. Address Dr. Kilmor & Co., Binghamton, N. Y., and enclose ten cents, also mention this paper.

Hope Gleaners May Return.

For many years a picturesque scene has vanished from the countryside, but which on account of the high price of corn I trust may be revived this year. I allude to the gleaners, who gladly avail themselves of the privilege of gathering in the aftermath of the reapers' toll.—London Globe

Easily Satisfied.

"What do you think of the new state constitution?"

"I haven't read it, but I'm for it, provided there's nothing in it to prevent me from going out to play golf on election day."

LOCAL AND PERSONAL

Robert Train, a boyhood friend of T. A. Spencer, is here from Kansas City visiting the latter and his family.

Mr. and Mrs. S. L. Squier and Mr. and Mrs. T. E. Kelley returned Saturday from an outing in the Ocueros, but without the much wished for venison.

The commissioners held a short session Wednesday to adjust some urgent tax matters, particularly concerning special levies.

Mr. and Mrs. J. F. Kimbell and daughter, Harriet, went to Parsons Wednesday. They took Thanksgiving dinner with the Rice family and will spend the week end there.

Dr. Blaney and Syl G. Anderson returned the first of the week from a hunting trip in the Ocueros, bringing in a deer.

Coal, Coal, Coal. Having enlarged our bins, we are now prepared to furnish the trade with Dawson Fancy Egg and Nut, and Swastika Lump. Humphrey Bros.

Robert P. Ervein, commissioner of public lands, and Capt. Fred Mueller, a prominent citizen of the capital, were here this week from Santa Fe.

San Patricio

Ramon Maes is putting a new floor in his house.

The high wind of the 10th blew off most of the roof of Aniceto Luera's house.

Mr. and Mrs. Munroe went to Roswell last week.

F. C. Stover had a calf to die of blackleg Monday.

Our merchant, W. B. Rose, is dressing a bunch of turkeys for the market. Turkeys are rather scarce around here this year on account of so many having been caught by the foxes. Not only turkeys but also chickens have suffered from their depredations, to such an extent that some of our people have less than they started with in the spring.

J. J. Reeves went to the sawmill Saturday for a load of lumber for himself and Mr. Stover.

Mr. Munroe has moved on W. B. Rose's place.

Mr. Whitt and Mr. Gallegos have dissolved partnership in the blacksmith shop and report has it that Mr. Whitt will just put up one of his own. Mr. Gallegos has leased the shop and tools to Jack Murray, who is expected to move his family here soon and become a citizen of our burg.

And still we grow.

Allie Stover and Tom Jones passed through here with lumber from Hoagland's mill for the Hondo school house. Mr. Jones had a hard luck story to tell—having broken down his wagon, besides having to pull Mr. Stover out of a few tight places.

Miss Francis Gallegos is back in school again after several week's absence on account of sickness.

The new blackboard for the school has at last been hung, and several of the classes are being arranged so as to take full advantage of it. The amount of improvements made on the school this year shows the proper school spirit and the directors and patrons are to be commended for their efforts to make the school a success.

Our hunters do not seem to have much luck. One reporting an empty bag after two days' hunting where the deer signs were plentiful.

Mr. Whitt is over on the Penasco on business.

Old Citizen Passes Away

Maximiano Guebara, an old and highly respected citizen of Lincoln, died here Monday morning after a short illness. Mr. Guebara has been engaged in the mercantile business at Ancho and Jicarilla the past few years, having formerly lived in White Oaks. He leaves a wife, three brothers, Lorenzo and Manuel, of White Oaks, and Frank, of El Paso, and a sister, Mrs. J. Letcher, of Tucumcari. The body was conveyed to White Oaks, where it was interred Tuesday morning. Many relatives and friends were at the graveside to pay the last sad tribute of respect.

Maximiano Guebara was born at Magdalena, New Mexico, August 19, 1859. He came to Lincoln county when a young man and was, therefore, one of the oldest citizens of the county. He was regarded as an honorable, upright citizen whose efforts were ever exerted on the side of friendship and justice.

Mr. and Mrs. A. H. Tiffany and daughter, of Cedar Rapids, Iowa, arrived Friday and are visiting Mr. and Mrs. D. D. Tiffany. The Cedar Rapids Tiffany is a brother of our Dan.

Killed by Train

A man, unknown, supposed to have been stealing a ride on a freight, was killed at Oscuro Monday night. The unfortunate man is supposed to have been on a freight passing Oscuro at 9:30, but he was not found until about 11 o'clock. Both of his legs were horribly mangled and the lower part of his body as well. Dr. Rauniger, the local company surgeon, gave the injured man every attention, but he succumbed to his injuries early Tuesday morning. On the body was found a card indicating that the bearer had been sent to some point east by an El Paso employment agency, and, not securing employment, was making his way back to El Paso.
