

Carrizozo News.

A Journal Devoted to the Interests of Lincoln County.

VOLUME 17.

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, JUNE 9, 1916.

NUMBER 23

New Mexico's

Unpreparedness

"Had the last republican legislature granted our request for funds for the National Guard, and for the enactment of a military code, the call of the president would have found us with an adequate force, physically fit, and the state would have been spared its present humiliation."

This declaration, made by Adjutant General H. T. Herring in Santa Fe a few days ago, explains in a few words why New Mexico is now short the required number of men for military service on the border; why the governor and the adjutant general have been compelled to appeal to the people to uphold the honor and dignity of the state, and why officers of the guard are now scouring the various districts in search of 300 recruits. At the same time it places the responsibility for the present situation where it properly belongs—on the shoulders of the blindly-partisan republican politicians, whose slogan, ever since they were repudiated by the people in the first state election, has been, "Keep every dollar possible out of the hands of the democratic governor, regardless of results."

"We asked the legislature," continued Adjutant General Herring, "to appropriate \$30,000 for the National Guard, to the end that encampments might be held, rifle practice indulged in, shooting contests arranged, and other measures carried out that would add greatly to the attractiveness, and also the efficiency, of the state militia. We were given \$16,500, or only a little more than half of the amount requested, which represented a very conservative estimate of the guard's needs. An urgent request for a military code enactment, requiring a thorough physical examination, and which would have meant a force physically fit for military service, was turned down with little or no consideration. The intention to let the guard struggle along as best it might was plainly shown."

In ignoring the matter of state preparedness, the last republican legislature followed the example of the first state legislature, likewise dominated by republican machine leaders. Due to uneasiness then existing, that body was asked to make an appropriation that would enable the state to take measures for its protection in case of emergency. The bill carrying the appropriation was put through the house, but when it reached the senate, two-thirds republican, its death was promptly decreed, and it was allowed to expire in committee, wholly because the bosses determined that the democratic governor and his appointees should not have the chance to use the money in a manner reflecting credit on the democratic administration.

The history of the country records no greater instances of picaresque partisanship; it presents no more striking illustrations of the unpatriotic in republican party politics.

H. O. Bursum, defeated republican candidate for governor in the first state election, who is again a candidate for his party's nomination, and who is now actively campaigning, has suddenly manifested patriotic fervor, and has sent telegrams to various parts of the state urging that efforts be made to secure recruits for the National Guard. Bursum was the chief republican "whip" at the last session of the legislature, and his position at that election in November.

Fort Stanton

Mrs. A. P. Sitton, Miss Mary Tiley, Messrs. A. P. Sitton, Jr., H. Brooks and C. Edwards spent Sunday up near the White Mountains on a picnic given by Mrs. A. P. Sitton. The trip was made in the Sitton Dodge.

Mrs. F. C. Smith, after a month's visit down in Georgia, is expected home next week.

The funeral of the late Captain Bouteiller took place at 3 p.m., Saturday, June 3. Chaplain Frund in charge. A large attendance was present at the cemetery. Floral pieces from the Captain's wife, Mrs. Helen Bouteiller, and Mrs. E. G. Rice, Long Beach, Calif., arrived in time for the funeral. The pall bearers were Captain Jones, W. Smith, E. Carr and J. Kallsen. At the close of the services in the cemetery Chaplain Frund read the beautiful poem, "Beyond," by A. Proctor.

Mrs. F. H. McKeon leaves Saturday, June 10th, for Seattle and other points on the western coast to spend the summer. Her son William will accompany her.

Mr. and Mrs. Weber entertained the Post Bridge club last Thursday evening at 13 B.

Lieut. J. R. Besse will return on the 15th, after a six weeks' visit with his wife and daughter at Spencer, Iowa.

A large number of magazines arrived last week for the library, from Miss Isabel C. Hyde of New York city, and Miss Vandyke, of Philadelphia.

Mr. and Mrs. Charles Richards have been assigned quarters. Mr. Richards is our head dairyman.

V. B. Ware of El Paso, the well known contractor and builder, visited the station Monday on business.

Miss Helen Rice came down from Parsons Wednesday to remain over a few days visiting her sister and family, Mr. and Mrs. Weber, at 13 B, and be present at the card party Thursday evening, when Mrs. Weber entertained the Post Bridge club.

Miss Alva Beattie, the popular school teacher of the Capitan High school, visited her many friends at the Post last week, leaving later for her home in Kansas. Miss Beattie won much merited praise for her rendition of two solos during the Memorial Day program in Library hall.

We buy hides, green or dry, and guarantee highest prices. Carrizozo Trading Co.

time did not cause him to turn a hand or utter a word in support of the National Guard appropriation.

H. B. Holt, Dona Ana county senator, who has been echoing Senator Fall's blatant denunciations of the national administration, and who has been demanding "protection," was republican floor leader of the republican senate that killed the emergency appropriation, and that refused adequate support to the National Guard.

Because of its defeat at the polls in 1911, the republican machine still retaining legislative control through its outrageous gerrymandering of the state, set out deliberately to cripple New Mexico along the line of preparedness, and along other lines as well, in the hope that it would hurt the democratic administration. This fact is made plain by the legislative record. It is something for the people of New Mexico to ponder over well, and to deal with at the last session of the legislature, and his position at that election in November.

Get Exhibits Ready

"Get busy on your exhibit for the State Fair, and get busy right now."

This is the urgent message which the State Fair commission has been sending to every county

in New Mexico since Monday, when county commissioners in almost every county in the state

had up for consideration the matter of financial support for exhibit preparation.

Three counties already have made substantial appropriations for their respective exhibits, two of them having increased the amounts voted last year.

Assurances have come to the fair headquarters that every county in New Mexico

will participate officially in the coming fair, and with this assurance of statewide co-operation,

President Southard of the fair board is setting to work on a campaign of preparedness, the keynote of which is "early work on the exhibits."

"We looked for co-operation everywhere this year," said Mr. Southard, "and we are getting it; getting it in a way that makes

work on the fair this year a pleasure, for we feel that the whole state is behind us. I'd like to say, however, that one thing is most important in the preparation of exhibits; that is, an early start."

Now, this first week in June when crops are young is the time to plan the exhibit for late September. If the men in charge in the various

counties will take the preliminary steps now, if they will interview the farmers and fruit growers, if they will make a general outline of what is wanted and let the people know about it; if they will lay the foundation this month, we will have a display in Albuquerque in the fall which

will be a world beater. If I were asked the most important thing

Flag Day Proclamation

BY THE GOVERNOR

The 14th of this month will be the 139th anniversary of the adoption of the Stars and Stripes as the flag of our country, the emblem of freedom. Wherever it

floats not only protection of life

and property but absolute freedom of thought and action with

in the law ought to be a reality to all.

The stress of present conditions

must attach unusual significance

to our flag. The glory of its past should electrify the sentiment of the present and strength-

en the high resolve of every real

true American citizen.

Now, therefore, I, William C.

McDonald, Governor of the State

of New Mexico, do hereby pro-

claim Wednesday, June 14, 1916,

as Flag Day in the State of New

Mexico.

Let the folds of the beautiful

flag float from every public and

private building and adorn every

home on this day, so that we may

fully appreciate our peaceful con-

ditions under it and be prepared

for any emergency to protect

what it represents for our people

and country. The time ought

soon to come when there will no

longer be room for divided, or

foreign allegiance and traitorous

tongues.

Take off your hats Flag Day

and shout for "Old Glory," the

flag that set us free and must

keep us free.

Done at the executive office this

2d day of June, A. D. 1916.

Witness my hand and the Great

Seal of the State of New Mexico.

WILLIAM C. McDONALD,

Attested:

Governor.

ANTONIO LUCERO, Sec'y of State.

News "Classif" ads do the biz.

in connection with a state fair

exhibit, I am sure that I'd say,

an early start."

Our Summer Chautauqua

Military Institute

Had Successful Year

The season's chautauqua for Carrizozo will begin the night of July 14 and close July 18. A number of our citizens entered into contract with The Western Chautauqua System, guaranteeing a sum of \$250 for a series of five numbers. These numbers consist of two lectures and three musical features.

The first number is by the Musical Art company, the personnel of the company being Miss Marjorie Bruner, an impersonator of wonderful versatility, assisted by two accomplished artists, Miss Flora Mae Morse, soprano soloist, and Miss Frances Biese,

The commencement of the New Mexico Military Institute, which has just closed, was usually gay and delightful, marking as it did the close of the most successful year that the institute has ever passed. It was the nature of an epoch-making event.

The commencement address, delivered by Rev. Austin D. Crile, was an exceptionally able effort and was listened to with the closest attention by a large audience composed of many out-of-town visitors as well as several hundred residents of the city of Roswell. Dr. Crile showed with convincing clearness that military preparedness is not incompatible with Christianity, but on the other hand is one of the imperative duties of a nation.

A feature of the commencement, which was particularly impressive, but which was not on the program, was the reading of a number of telegrams of congratulation from alumni and students of the institute who are now with the national guard at the border, utilizing in the service of their country the training they received at Roswell.

The drills by the battalion of cadets, which formed a part of the exercises, were up to the standard of military excellence which has caused the New Mexico Military Institute to be officially recognized as one of the ten best military schools in the United States. Company B, under command of Captain Sam Lusk, was the winner of the company prize at inspection and competitive drill.

The following young men graduated from the institute: J. S. Lusk, Carlbad; Richard L. Dunlap, Los Angeles; Roy C. Hill, Dawson; C. C. Cornish, MacAlester, Okla.; William B. Crow, Isom, Texas; Bart G. Gordon, Roswell; Samuel F. Gray, Clayton; Ransom B. Lether, Salt Lake City; John H. McCutcheon, Santa Fe; C. O. Morris, El Paso; J. W. Puckett, Amarillo, Texas; George W. Reed, Kingsville, Texas, and George R. Willson, Cedar Vale, Kansas.

Great Naval Battle

What is described as the greatest naval battle of history occurred in the North Sea June 1, the navies of Germany and England engaging in a battle for supremacy. It appears from reports that have been given out that the English fleet sustained the greater loss in men and ships, although the German fleet retired to its base in Kiel canal. Several thousand men went down and from twenty-five to thirty ships of all classes in the combined navies were sunk, among them being seven of the major class. Germany claims a great victory, while England maintains that her supremacy on the sea is still unimpaired. The battle may be barren of results, but it has shown that the Germans are as good fighters on the sea as they are on the land.

Lord Kitchener Dead

Lord Kitchener, the greatest English soldier of the age, lost his life June 5 while traveling on a ship bound for Russia. The ship bearing Lord Kitchener and staff struck a mine or was torpedoed off the Orkney islands near the coast of Scotland and all on board lost. It was said that Lord Kitchener was on his way to Russia to confer with the Russian government concerning the conduct of the war, and had taken the northern route to avoid the submarines. Lord Kitchener was England's war minister and through his activity and energy had enrolled, according to reports, over 4,000,000 men in the English army.

Methodist Church

Rev. E. D. Lewis, Pastor.

Everybody notice change in place for our camp meeting service next Sunday. We will go to Nogal canon, instead of Water canon as was previously intended. Everybody plan to go and be at the church at 8:30 sharp, with a bag full filled with good things to eat. Let us go with the purpose to have a pleasant, profitable day in every way.

G. B. Greer is in town today from his Bosque ranch.

SCIENTISTS WILL WIN THE NEXT WAR

NIKOLA TESLA,
electrical scientist,
says not armies alone but
whole populations will
be destroyed by use of
wireless currents—His
own air torpedo deadly

on chemistry; but future warfare will wield the enormously more destructive power of destruction pro-

vided by electricity, according to a writer in the St. Louis Post-Dispatch.

Then it will not be a question of the annihilation of armies; it will be one of the extermination of whole populations. It will not be a matter of demolishing cities and fortresses, but of wiping whole nations at one stroke from the face of the earth. The scientists, in fact, offer us one ultimate alternative:

In the imagination of every scientist in the world today there is a vision of a machine with a key by means of which a wave of electricity will be flashed through the air to explode the enemy's bombs, torpedoes, cartridges and magazines. The man who first perfects this device will go down in history—if any historians are left alive—as a greater man than Roger Bacon, for his invention will make typhus and plague as obsolete, and will send rifles, cannon and dreadnaughts to the junk heap.

Only one scientist so far makes a claim to have advanced some steps towards the perfect electric man-killer. But that man is no other than Nikola Tesla, electrical wizard, who has just been awarded a part of this year's Nobel prize for physics. In an interview the other day he laid down these prophesies:

1. This is the last war in which the explosive power of chemicals will decide the issue.

2. In the next war electricity will be the force of organized slaughter.

The confidence with which Tesla uttered these predictions is based upon an invention which he says he has just completed, but the details of which he is for the present jealously guarding, for fear they might be worked out by one of the belligerents in the present war;

however, he says he would place his device un-

derivedly at the disposition of the military authorities.

"It is, of course, possible," he said to a representative of the Post-Dispatch Sunday Magazine a few days ago, "to produce electrical effects at a distance by means of wireless energy. But the insurmountable difficulty thus far has been to aim an electric wave in one direction only, with all of its force concentrated on a given target."

"I will go so far as to say that after twenty years of application to the problem of transmitting energy by wireless, I have just made a valuable advance in this direction. The stage has been reached where to an extent it is practicable to use this force in war, and to predict such a development as will make electricity supplant cannon in battle."

"It is impossible to give details at this time, but in a general way my invention can be used in three methods:

"In the first place, it will be possible to send an explosive body through the air—an aerial torpe-
do flying many times faster than an aeroplane—
to direct this projectile to the spot desired, where it can be exploded by wireless, it will be
possible to guide the projectile by wireless after
it has passed beyond the range of the eye, and the
aim is so accurate that it is possible to reduce
the error to a few feet in a thousand miles."

"In the second place, it will be practicable with this apparatus to produce effects at a distance which will interfere with the enemy and tend to make him ineffective."

"In the third place, it promises to be able to produce at a distance such effects of electrical tension as will jeopardize life and property."

The inventor declined to go into specific details, saying that it is safer to be specific after the fact. But one would gather from the words he did speak that he has contrived a torpedo of the air flying under its own power as a torpedo swims in the water, which can be steered by wireless and exploded by the same forces. Such a projectile would have a range not of some twenty miles, like the highest power canon, but one limited only by its own flying endurance. It would be harder to hit with shell and rifle fire than an aeroplane, because of its smaller size and swifter velocity, and it need not be manned by a crew who would be exposed to death at every instant.

Such a missile, aimed according to the mathematical formulas used today by gunners whose target is beyond the range of eye and telescope, could be dispatched for the destruction of a battleship long before her own guns would be able to come into play. Safe from the shells of the greatest ordnance, it could start from a point miles beyond their range and destroy the batteries without the possibility of a reply.

The second and third methods of which Tesla speaks are discussed in rather cryptic language, but leave the inference that he believes himself already able, in some degree, to produce at a dis-

TEST OF YOUTH

You often see a woman at the market pinching the end of a chicken's breastbone to find out how tender it is. In other words, how young the fowl is. Oddly enough, the same test with human beings is one of the most reliable known. If it is advanced the lower part of your breastbone feels elastic when pushed toward you, you may assume that the important changes have yet taken place in your arteries, or otherwise in your anatomical makeup.

The human breastbone is shaped like an ancient Roman sword, and the upper part of it is like the sword hilt. Its point is a piece of cartilage, which anatomists call the "xiphoid" cartilage. The early hardening and thickening of it indicate that the changes that accompany old age have probably begun. You're Companion.

ON THEY WOULD BE MUCH TROUBLE.

As a rule women look at things differently from men—and it's a good thing for most husbands that they do—Indispensable Star.

Now, Doctor—Do you consider Alice very good?

Now, Doctor—Oh, Alice is pretty enough, but she's not up to Adele.

N THE science which man has spun out of his brain he has created a monstrous Frankenstein, which is now rending him limb from limb on the battlefield of Europe. But one of the fatal qualities of science is that it always progresses. What part will it play in the next world war? Will the inventive intellect of then have unleashed forces which, compared to the 42-centimeter howitzer of today, will be as the 42-centimeter gun is to the two-handed sword of the Roman legions? Yes, reply the experts; the present war is based

on chemistry; but future warfare will wield the

enormously more gigantic power of destruction pro-

vided by electricity, according to a writer in the St. Louis Post-Dispatch.

Then it will not be a question of the annihilation of armies; it will be one of the extermination of whole populations. It will not be a matter of demolishing cities and fortresses, but of wiping whole nations at one stroke from the face of the earth. The scientists, in fact, offer us one ultimate alternative:

In the imagination of every scientist in the world today there is a vision of a machine with a key by means of which a wave of

electricity will be flashed through the air to explode the enemy's bombs, torpedoes, cartridges and magazines. The man who first perfects

this device will go down in history—if any historians are left alive—as a greater man than Roger Bacon, for his invention will make typhus and plague as obsolete, and will send rifles, cannon and dreadnaughts to the junk heap.

Only one scientist so far makes a claim to have advanced some steps towards the perfect electric man-killer. But that man is no other than Nikola Tesla, electrical wizard, who has just been awarded a part of this year's Nobel prize for physics. In an interview the other day he laid down these prophesies:

1. This is the last war in which the explosive power of chemicals will decide the issue.

2. In the next war electricity will be the force of organized slaughter.

The confidence with which Tesla uttered these predictions is based upon an invention which he says he has just completed, but the details of which he is for the present jealously guarding, for fear they might be worked out by one of the belligerents in the present war;

however, he says he would place his device un-

derivedly at the disposition of the military authorities.

"It is, of course, possible," he said to a representative of the Post-Dispatch Sunday Magazine a few days ago, "to produce electrical effects at a distance by means of wireless energy. But the insurmountable difficulty thus far has been to aim an electric wave in one direction only, with all of its force concentrated on a given target."

"I will go so far as to say that after twenty years of application to the problem of transmitting energy by wireless, I have just made a valuable advance in this direction. The stage has been reached where to an extent it is practicable to use this force in war, and to predict such a development as will make electricity supplant cannon in battle."

"It is impossible to give details at this time, but in a general way my invention can be used in three methods:

possible to guide the projectile by wireless after
it has passed beyond the range of the eye, and the
aim is so accurate that it is possible to reduce
the error to a few feet in a thousand miles.

"In the second place, it will be practicable with this apparatus to produce effects at a distance which will interfere with the enemy and tend to make him ineffective."

"In the third place, it promises to be able to produce at a distance such effects of electrical tension as will jeopardize life and property."

The inventor declined to go into specific details, saying that it is safer to be specific after the fact. But one would gather from the words he did speak that he has contrived a torpedo of the air flying under its own power as a torpedo swims in the water, which can be steered by wireless and exploded by the same forces. Such a projectile would have a range not of some twenty miles, like the highest power canon, but one limited only by its own flying endurance. It would be harder to hit with shell and rifle fire than an aeroplane, because of its smaller size and swifter velocity, and it need not be manned by a crew who would be exposed to death at every instant.

Such a missile, aimed according to the mathematical formulas used today by gunners whose target is beyond the range of eye and telescope, could be dispatched for the destruction of a battleship long before her own guns would be able to come into play. Safe from the shells of the greatest ordnance, it could start from a point miles beyond their range and destroy the batteries without the possibility of a reply.

The second and third methods of which Tesla speaks are discussed in rather cryptic language, but leave the inference that he believes himself already able, in some degree, to produce at a dis-

tance by wireless an electric shock similar to that produced by touching a charged wire. One can think of no other way in which effects pernicious to life and property could be obtained with electricity.

With this idea worked out to its ultimate perfection, one might foretell such appalling events in warfare as this: An entire army, in its trenches, is without warning seized with the death agonies of a wrench in the electrical chair, and is exterminated by a silent enemy, using no bullets. Or, at a given moment, every living thing in a great city is struck dead as if by lightning, by means of a force unleashed hundreds of miles away by an officer who merely pulls a lever in a wireless tower.

Tesla appears to see in the future a warfare of electrical appliances more deadly than all the canons ever made; he sees entire areas electrified and made untenable for any living creature.

Death and destruction will be dealt out at unheard of distances, with zones of action more spacious than we now dream of. There is foreshadowed a conflict in which not armies but nations may be destroyed in a single action, by men armed with thunderbolts more mighty than those of the heavens. No wonder that Tesla, his own imagination recelling in horror, says:

"I hope this is the invention that will make war impossible."

Another device for which inventors are seeking is one that will be able, by means of the wireless current, to explode at a distance the enemy's magazine of ammunition. If this were perfected, one man in London, by pressing a button, could set fire to all the explosives in the Krupp factories and blow that institution into bits; or he could blow up all the cartridges and explosives in the German army. Or another man in Berlin could with one stroke blow the English fleet out of the water with his own powder. In an article in Paris newspaper recently, Marconi, father of wireless telegraphy, declared that such an invention would mean the abolition of firearms and a revolution in hand-to-hand fighting.

A Dutch inventor named Lanzius, now in New York, claims to have made such a device. An Italian inventor was considerably notorious for himself two years ago by demonstrating an apparatus which he declared would explode ammunition at a distance by means of a wireless current—but he was shown to be a fraud. A young New Yorker, who already has several authentic inventions to his credit, declares he has patented a method of splitting wireless current which will melt all matter within a certain radius. A California inventor asserts that he can create a flame by means of wireless, and others to follow him in this field approach the Pacific coast.

The inventors reported herein need heat to destroy the berried wire entanglements of the Russians. Tesla believes that the recent war established

NIKOLA TESLA

ROAD BUILDING

MANAGEMENT OF GOOD ROADS

Specialists of Department of Agriculture Place Responsibility for Highway Defects

Where a county builds a good road and soon lets it become rutty, washed out, uneven, who or what is principally to blame? As a result of a study of conditions in a number of counties, road specialists of the United States department of agriculture are inclined to place the responsibility upon the following defects in road management, some or all of which are found in all counties where good roads are not properly repaired and maintained:

1. County boards, although having full administrative authority, appear not to attach to their official action in road matters the importance or legal effect which it should have.

2. County boards do not generally have sufficient accounting control of

their funds to know what is available

for any particular project, where funds have been or where existing balances are to be expended.

3. Lack of any systematic practice

in handling funds among most counties makes it very difficult to carry out over even a single year any persistent

maintenance policy, because funds officially obligated for maintenance pur-

poses are not protected against sporadic and irregular drafts for miscel-

laneous purposes. The greatest like-

lihood consequently exists everywhere

that there will be no balance in the

maintenance fund in the last half or

third of the year, although only a part

of the fund allotted may have been

spent.

4. Local labor available for main-

tenance work is made dissatisfied by

the constant, unintelligent and unfa-

vorable criticism of those using the

roads.

5. Maintenance continuing over a

period of years—the ultimate indis-

pendable condition of effective main-

tenance—is jeopardized by lack of ac-

counting control that will prevent

spending next year's current income

in this year.

6. The lack of skilled supervision

in construction and the effect of this in

increasing the cost of or in making ef-

fective maintenance impossibly expen-

sive is everywhere seen.

7. The county authorities are com-

monly opposed to following sugges-

tions for maintenance that involve ty-

ping up road funds in any way, such

as purchasing materials in advance to

store along the road for making re-

pairs or maintaining the road surface.

MUCH WASTE OF FARM LANDS

Suggested by Country Gentleman That

"Extremely Heavy Maintenance"

Cost Be Avoided.

The Country Gentleman makes the

sensible suggestion that a prodigal

waste of land and a recklessly

expended maintenance cost be avoided by

American roadmakers. Upon a four-

rod government highway "one dozen

farm wagons could be, by a little

crowding, set side-by-side" and each

mile of government highway contains

eight acres of land, "much of it good

land, capable of growing 500 bushels

of corn," while thousands of miles of

the best highways of France, Germany and England are but one rod

wide.

The Country Gentleman objects to

leaving deviating 16,000 acres of the

best farming land in the world" to

growing a sufficient assortment of

Injured-in-Auto.
Married in Hospital

According to the Denver News, Watt Hoyle, a well known mining man, formerly of White Oaks, pulled off an unusual stunt when he became a Benedict. The affair occurred in April, but we have just been shown the item which we give below.

"Matthew Watson Hoyle and his bride, Mrs. Sarah Bell Dingey Hoyle, will spend their honeymoon—the first part of it, anyhow—in wheel chairs in a Boulder hospital, instead of their auto, as was first planned.

"The auto in which they were to have taken their wedding journey is a wreck as a result of an accident that occurred Monday near Boulder when Hoyle and his bride-to-be were thrown over a twelve-foot embankment. Hoyle suffered a broken rib and she who is now Mrs. Hoyle had her collar bone broken.

"The pair awoke in the Boulder hospital after their wounds had been attended. Undaunted they summoned a minister and 'mid the odors of ether and chloroform, instead of the customary fragrance of bridal flowers, they sat in their wheel chairs and were married. The Rev. R. A. Schell presided.

"Mr. and Mrs. Hoyle will return to their Denver home at 1659 Broadway as soon as they are able to leave the hospital."

Mining Application

No. 041300

United States Land Office

Roswell, New Mexico

March 20, 1918.

Notice is hereby given that Leo H. Hudliss, whose post office address is White Oaks, Lincoln County, New Mexico, has filed his application for a patent for the Hudliss Group of mining claims comprising the Midnight Lode and the Black Knight Lode bearing iron and other minerals, together with surface ground as shown on the official plan or file in this office, situated in White Oaks Mining District, Lincoln County, New Mexico and described by the field notes on file in this office, Survey No. 174, in Township 8 S., Range 11 E. Said survey No. 174 being described as follows, to wit:

MIDNIGHT LODGE.

Beginning at corner No. 1 from which the corners of Sections 22, 24, 25 and 26 in Township 8 S., Range 11 E., New Mexico Principal Meridian, bear N. 75° 08' W., 1726.4 feet, Corner No. 4, Survey No. 019—Henry Clay Lode—Bears S. 49° 40' W., 342.5 feet, to corner No. 22—E. Thence S. 50° 29' W., 81.88 feet to corner No. 2, Variation 11° 30' E.,

These S. 50° 29' E., 563.99 feet to corner No. 2, Variation 11° 30' E.,

These S. 50° 29' E., 873.17 feet to corner No. 4, Variation 10° 40' E.,

These S. 50° 29' E., 1000.11 feet to corner No. 1, point of beginning.

Area of Midnight Lode claim 11.71 acres.

BLACK KNIGHT LODGE.

Beginning at corner No. 1, identical with corner No. 2 of Midnight Lode, from which corners of Sections 22, 24, 25 and 26, Township 8 S., Range 11 E., New Mexico Principal Meridian, bear N. 75° 08' W., 1726.4 feet, Corner No. 4, Survey No. 019—Henry Clay Lode—Bears S. 49° 40' W., 342.5 feet, to corner No. 22—E. Thence S. 50° 29' W., 81.88 feet to corner No. 2, Variation 11° 30' E.,

These S. 50° 29' E., 563.99 feet to corner No. 2, Variation 11° 30' E.,

These S. 50° 29' E., 873.17 feet to corner No. 4, Variation 10° 40' E.,

These S. 50° 29' E., 1000.11 feet to corner No. 1, point of beginning.

Area of Black Knight Lode claim 10.67 acres.

The total area of this group is 22.38 acres.

Each of the said mining claims in record in the office of the recorder of said Lincoln County, New Mexico.

There are no adjoining claims so far as known.

Any and all persons claiming adversely the mining ground, veins, lodes and premises or any part thereof so described, surveyed, platted and applied for, are hereby notified that unless their adverse claims are duly filed according to law and the regulations thereunder, with the Register of the United States Land Office at Roswell, New Mexico, during the sixty days period of publication hereof, they will be barred by reason of the statute.

Attest: KENNETH PATTON, Register.

Notice of Contest

No. 041300

Department of the Interior

United States Land Office

Roswell, New Mexico

May 24, 1918.

To Robert C. Price, of Arco, New Mexico, Contestant:

You are hereby notified that Irene Price, who gives Arco, New Mexico, as her post office address, did on May 24th, 1918, file in this office her duly corroborated application to contest and secure the cancellation of your Homestead Entry, Serial No. 04080, made August 21st, 1912, for Lots 3 and 4 and NW 1/4 SW 1/4, Section 24, Township 11 S., Range 11 E., New Mexico Principal Meridian, and her grounds for her contest and allegations that you have wholly abandoned said land for over nine months last past, had not complied with the Homestead Laws and regulations upon said land, nor are not now occupying same.

You are, therefore, further advised that the said allegations will be taken as contested, and your said entry will be cancelled without further notice to yourself, either before this office or at appeal, if you fail to file in this office within twenty-four hours after the "ROUTE" publication of this Notice, as shown below. Your answer under oath, specifically responding to these allegations of contest, together with due proof that you served a copy of your answer on the most convenient either in person or by registered mail.

You should state in your answer the name of the post-office to which you desire future notices to be sent to you.

KENNETH PATTON, Register.

Date of first publication June 2, 1918.

Date of second publication June 9, 1918.

Date of third publication June 16, 1918.

Date of fourth publication June 23, 1918.

Episcopal Service
At Crystal Theater

Rev. Edward J. Hoering, Rector of Tucumcari, who has charge of the church work on the line of the E. P. & S. W. between Clayton on the north and Alamogordo on the south, held a service at the Crystal theater Wednesday afternoon, which was well attended by Episcopalians and friends.

The thought of the sermon was, that unless the Holy Spirit is the center and source of the whole of the Church's life, no form of organization, however successful as regards numbers or finance, can make it the Church, or the Body of Christ. So the Spirit which Christ made it His life work to bestow upon mankind, high and low, rich and poor, saint and sinner, must be the keynote of the individual life, and enable it to stand alone, independent of the crowd or any extraneous formality.

The next service will be on the first Wednesday in July at 2 o'clock.

NOTICE

Notice is hereby given that after June 2, I will not be responsible for the payment of any debts contracted by Mrs. W. H. Wilson.

Common American Birds

Kingbird

(*Tyrannus tyrannus*)
Length, about eight and one-half inches. The white lower surface and white-tipped tail distinguish this fly-catcher.

Range: Breeds throughout the United States (except the southwestern part) and southern Canada; winters from Mexico to South America.

Habits and economic status: The kingbird is a pronounced enemy of hawks and crows, which it vigorously attacks at every opportunity, thereby affording efficient protection to nearby poultry yards and young chicks at large. It loves the open country and is especially fond of orchards and trees about farm buildings. No less than 85 per cent of its food consists of insects, mostly of a harmful nature. It eats the common rose chafer or rose bug, and more remarkable still it devours blister beetles freely. The bird has been accused of eating honeybees to an injurious extent, but

interesting information about them supplied by the Bureau of Biological Survey of the United States Department of Agriculture.

In Minnesota, Michigan, New York, and Massachusetts, winters in the southern two-thirds of the United States and south to Panama.

Habits and economic status: This member of our beautiful wood warbler family, a family peculiar to America, has the characteristic voice, coloration, and habits of its kind. Trim of form and graceful of motion, when seeking food it combines the methods of the wrens, creepers, and flycatchers. It breeds only in the northern parts of the eastern United States, but in migration it occurs in every patch of woodland and is so numerous that it is familiar to every observer.

Druggist Recommends Fine Kidney Medicine

We have been selling Dr. Kilmers Swamp Root for the past seven years and during that time we have never heard a complaint. All of our customers speak in the highest terms of the results obtained from its use and all are well pleased with it as a kidney, liver and bladder medicine. We think it is a fine remedy and we sell a great quantity of it.

Very truly yours,

E. E. HARRAH & SON,
DRUGGISTS

Dec. 17th, 1918, Golden City, Mo.

Prev's What Swamp Root Will Do For You
Send ten cents to Dr. Kilmers & Co., Binghamton, N. Y., for a sample-size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Regular fifty-cent and one-dollar size bottles for sale at all drug stores. Adv.

The average woman can praise her husband to other women without believing one word she says.

Dr. Pierce's Pellets are best for Liver, Bowels and Stomach. One little Pellet for a laxative—three for a cathartic. Adv.

The world may owe every man a living, but a lot of them haven't sense enough to show up on pay day.

Smile on Wash Day. That's when you use Red Cross Bag Blue. Clothes whiter than snow. All grocers. Adv.

Upward. "You should think of higher things." "I do. I am unable to keep my mind off the price of meat and gasoline."

Important to Mothers
Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it

Children Cry for Fletcher's Castoria

Innocent. "Why, Mr. Frontpaw," exclaimed his pastor reprovingly, "I am surprised and grieved to see you coming out of a common liquor saloon."

"Well—er—you too," stammered Mr. Frontpaw. "I—er—just stepped in thoro to look at the mirror to see if I had a smudge on my nose."

Girl Paul Reveres for Zepplin. Girl Paul Reveres now give warning of the approach of Zepplin over London. They are telephone operators attached to the telephone and who have volunteered to ride a bicycle around to rouse their colleagues. All go to the exchanges where there is a rush of business every time there is an impending raid.

There are now 420 women on night duty at the London telephone exchanges, and when there is a threatened raid hundreds more can be called out. Between 80 and 90 per cent of the girls are on duty within half an hour of the call being sent out.

M. D. Meant Movin' Day.

Two young negroes were on a Central Avenue car. They talked of the work they had done that day. One said that he had been helping a woman move, adding that his companion had helped her move several times.

"Who is she?" questioned the second negro.

"Go on and guess."

"I can't guess. What's her initials?"

"M. D."

Silence followed while the possible meaning of the initials were pondered. Then a laugh.

"Ah, bah, I know who you mean now, M. D. Movin' Day."

Then both remembered that months before they had nicknamed a move once-a-month whose initials are M. D. as Movin' Day—Indianapolis News.

MEAL-TIME CONSCIENCE.
What Do the Children Drink?

There are times when mother or father feeds the youngsters something that they know children should not have. Perhaps it is some rich dessert but more often it is tea or coffee.

It is better to have some delicious, hot food drink that you can take yourself and feed to your children, conscious that it will help and strengthen, but never hurt them.

A Yorkshire lady says: "I used coffee many years in spite of the conviction that it injured my nervous system and produced my nervous headaches. While visiting a friend I was served with Postum and I determined to get a package and try it myself.

The result was all that could be desired—a delicious, finely flavored, richly-colored beverage. Since I quit coffee, Postum has worked wonders for me."

"My husband, who had suffered from kidney trouble when drinking coffee, quit the coffee and took up Postum with me and since drinking Postum he has felt stronger and better, with no indication of kidney trouble."

"You may be sure I find it a great comfort to have a warm drink at meals that I can give my children, with a clear conscience that it will help and not hurt them as coffee or tea would."

Name given by Postum Co., Battle Creek, Mich.

Postum comes in two forms:

Postum Cereal—the original form must be well boiled, 1½ and 2½ pints.

Instant Postum—a soluble powder dissolves quickly in a cup of hot water, and, with cream and sugar, makes a delicious beverage instantly. 25¢ and 50¢ cans.

Both forms are equally delicious and cost about the same per cup.

"There's a Reason" for Postum—sold by Grocers.

—sold by Grocers

LOCAL AND PERSONAL

Mr. and Mrs. A. S. McCampant drove down Monday from Corona.

Mrs. Frank R. Miller went to Roswell Wednesday to visit relatives.

William Ballard and Mrs. Alberta and the Misses Carper were here Tuesday from Roswell, guests of the Reillys.

Just received a car of seed barley. The Titsworth Co., Capitan.

Ed O. Pfingsten and W. H. Sexton motored down from the Mesa Tuesday.

John Roberts was over Tuesday from the Meek country. He reports stock in good condition, but the range is beginning to need moisture.

Ladies! See Spirella and Barclay Corsets before buying. Accurate measurements taken in your homes. Telephone No. 1, or address P. O. box 204. Mrs. G. T. McQuillen.

Mr. and Mrs. James A. Cooper, Sr., were down Wednesday from their Ancho home.

Mrs. Clarence Spence and children returned last week from El Paso, and occupy their commodious home in the north end of town.

William Chisholm returned last week from El Paso, where he conferred with the railroad authorities concerning his injury. A satisfactory agreement was reached and all litigation for damages stopped.

Just received a car of Table and Stock Salt. Humphrey Bros.

Miss Lorena Sager returned yesterday morning from Denver. Miss Sager has been engaged as instructor of music the past year, and is home on a vacation.

E. Northrup and L. L. Luzanne of El Paso left Monday afternoon, with a wagon load of supplies, for Water canon, where they have copper claims they will do work on.

For Sale—Yearling Hereford bulls. The Titsworth Co., Capitan.

Mr. and Mrs. Samuel F. Miller returned Wednesday night from a visit to their old home in Indiana.

The cool spots on the South Fork are quite attractive these warm days. About a dozen cars went over Sunday from this section. It is less than a two hour drive to the pipe line intake.

Bring your wool and pelts—highest prices paid always. Carrizozo Trading Co.

Mrs. S. W. Perry returned Saturday from Plainview, Texas. She was present at her daughter's graduation and marriage.

Mr. and Mrs. E. E. Phillips were in yesterday from the iron mines west of the nail pale. Mr. Phillips is sinking a well for Luiza and Fritz, and is down over 500 feet and yet no water.

Mrs. H. B. Hamilton and two sons arrived from El Paso this week and will spend the summer in the highlands.

For Sale—Dynamite blasting caps and fuse. The Titsworth Co., Capitan.

The board of county commissioners was in session this week, sitting as a board of equalization. Only two days were required to finish the work, following which the members, all of whom were present, departed for their homes.

G. G. Shannon was arrested Saturday on the charge of a misappropriation of funds of the White Oaks Mine Consolidated. The charge was later withdrawn and the defendant released. Mr. Shannon was until recently business manager of and attorney for the mining company.

Born at Douglas, Arizona, May 31, to Mr. and Mrs. Dick McNamee, an eleven-pound baby boy. The father is a former well known White Oaks boy who has resided the past few years in Arizona having married there.

Graduated and Married

Miss Sybil Perry, daughter of Mr. and Mrs. S. W. Perry, of our town, was married at Plainview, Texas, last Thursday, June 1, to Mr. W. D. Brashier. The bride is the younger daughter of Mr. and Mrs. Perry and was one of Carrizozo's most charming young ladies. She had just graduated in music and expression from the Wayland Baptist college at Plainview. The groom is a resident of Plainview and is employed with a leading mercantile establishment at that point.

Still in Recess

Judge Medler became ill last week at Ruidoso and was unable to come in Monday to reconvene court. Court will reconvene at the call of Judge Medler, but there is nothing definite as to the time, owing to the judge's illness.

Republican-Progressive:

wranglefest is still on as we go to press.

Aw, Teddy, have a heart! Don't be always pickin' on the old folks. They haven't long to live.

Dr. T. W. Watson returned to Ruidoso yesterday to see how the summer cottage is getting along.

Dr. F. H. Johnson came over from Capitan Sunday to meet Mrs. Johnson, who was returning from a visit to Texas points.

O. W. Bamberger of the Carrizozo Trading company made a business trip to El Paso this week.

Mrs. William M. Barnett has been a sufferer the past ten days with rheumatism. Her condition is greatly improved, however.

John J. McCourt was here from El Paso one day this week to meet his family, who are here for the summer.

Fred Shields, the local Ford dealer, has had a tussle the past week with a case of fever, but is now able to be out.

Dewey Herron and William Cole are here this week from Columbus, N. M. They have been engaged as helpers in the government garage at Columbus, and will be here until Monday on furlough.

Carrizozo, New Mexico

Rode the Hood

It is told on a Ford owner-owner of a runabout. He went to the country to pick up some individuals who wanted to come to town, but found the number too great to be accommodated in his machine—one man too many. The extra man, nothing daunted, strapped his saddle on the hood, climbed aboard and rode into town. The utility of the Ford is exemplified in this story, as well as the resourcefulness of the cowboy.

Died

Mrs. Candelario Sandoval died at Miami, Arizona, last week, and the remains were brought to Carrizozo and interred Saturday. The husband accompanied the body. Mrs. Sandoval was well known here and throughout the county, and a large number of friends joined the funeral procession and paid their last respects to the departed.

In Institute Work

Supt. C. Y. Belknap, of the Lincoln County High School, Capitan, is in Santa Fe engaged in institute work. He is in charge of the manual training course in the Santa Fe county institute.

Pasture Goats

A bunch of stock goats, thirty-seven in number, are being held in corral at Earl Berry's place. G. B. Greer has examined the herd and finds they do not belong to him, nor does he know who the owner is. This notice is published with the hope of locating the owner; who, if he finds his goats, will be duly appreciative of the information herewith given.
