OFFICIAL COUNTY PAPER DEVOTED TO THE INTERESTS OF LINCOLN COUNTY, NEW MEXICO

VOLUME 19

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, AUGUST 16, 1918.

NUMBER 33

State University to Give Military Training

The efforts of President Boyd of the University of New Mexico to have his institution designated by the government for military training under the direction of the war department has met with success, as the following telegram explains.

Albuquerque, August 15, 1918.—The department of military training at the New Mexico State University is an accomplished fact and installation of the equipment for the new department will proceed at once according to a telegram received today by President David R. Boyd from Adjutant General McCain. The telegram follows:

"Washington, D. C., August 15, 1918.—Your institution having satisfied conditions prescribed in circular letter of June 29 upon basis of your figures steps will be taken at once to establish a unit of the student army training corps.

"An officer of the United States army will be detailed and upon arrival will proceed with the organization of your unit. Uniforms, overcoats and other equipment will be shipped at an early date.

"McCain, Adjutant General." This telegram finally insures immediate establishment of the University's military department, beginning October 1. The University authorities will continue enlistment of students prepared for college work, and up to the maximum capacity of the institution will provide them with rooms. It is likely that the organization's required quota of one hundred will be exceeded by fifty per cent."

Home Wedding

Walker G. White and Miss Blanche Garvin were married, at the home of the bride's mother, near Nogal, Wednesday, Chaplain Lederle, of Fort Stanton, performing the ceremony. The couple left the same afternoon on their honeymoon and shortly after their return will take up their abode at the Garvin home.

The groom is well known here, being foreman of the Vera Cruz ranch of Lee Prude, located at the foot of Carrizozo. The bride enjoys a wide acquaintance, having taught school in this county at various points, the past two years of which were in Carrizozo. A charming and refined young lady, a host of friends there are who extend to her and the groom best wishes for a delightful married life.

Sheriff Contest

News was received from Santa Fe this week of the reversal by the supreme court of the decision in the lower court in the sheriff contest, Corn vs. Hyde. The decision is not based on the case itself, but merely deals with the injunction of the lower court concerning a recount of ballots in two precincts, Capitan and Lincoln. An order, under this decision, is expected soon that will authorize a recount of the ballots in the two precincts named.

History of Our Liberty Loans

"The United States entered the war on April 6, 1917. Eighteen days later by a practically unanimous vote Congress passed the Liberty Loan Bond bill.

"On May 2 the First Liberty Loan was announced and on May 14 the details were made public; on the 15th the campaign began and closed one month later. The issue was for \$2,000,000,000, the bonds bearing 3½ per cent interest and running for 15-30 years. The bonds carried the conversion privilege, entitling the holder, if he chose, to convert them into bonds of a later issue bearing a higher rate of interest. Four and a half million subscribers from every section of the country, representing every condition, race, and class of citizens, subscribed for more than \$3,000,000,000 of the bonds. Only \$2,000,000,000 was allotted.

The Second Liberty Loan campaign opened on October 1, 1917, and closed on October 27. The bonds of this issue bear 4 per cent interest and run for 10-25 years. They carry the conversion privilege. It was announced that 50 per cent of the oversubscription would be taken. Nine million subscribers subscribed to \$4,617,532,000 of the bonds, an oversubscription of 54 per cent. Only \$3,809,766,150 of the bonds was allotted.

The Third Liberty Loan campaign opened on April 6, 1918, one year exactly after our entrance into the war, and closed on May 4. The bonds of this issue bear 4½ per cent interest and run for 10 years, are not subject to redemption prior to maturity, and carry no conversion privilege. The loan was announced for \$3,000,000,000, but the right was reserved to accept all additional subscriptions. Seventeen million subscribers subscribed for \$4,170,019,650 of the bonds, all of which was allotted.

A little over a year ago there were some 300,000 United States bondholders; there are now somewhere between 20,000,000 and 25,000,000. Awakened patriotism has made the American people a saving people, a bond-buying people. The effect of the Liberty Loans on the national character, on our national life, on the individual citizen and our home life is immeasurable—of incalculable benefit.

The Fourth Liberty Loan campaign will begin Saturday, September 28, and close October 19. No American doubts its success; no good American will fail to contribute to its success. The blood of our men fallen in Europe calls to us; our answer must be and will be worthy of them and our country."

A. M. Vega, our efficient city marshal, says he had a hard fight—not officially, as he says things are moving smoothly along that line—but the fight was to get enough feed to keep his cattle alive until the rains came. However, notwithstanding a slight loss and heavy expense, the recent rains have ended his troubles on that score, and his cattle are rapidly putting on fat.

\$5,000,000 Available to Aid Farmers

Acting upon the urgent representations of many of the wheat growers in certain sections of the west, who have lost two successive crops by drouth and have exhausted their resources, President Wilson on July 27 placed at the disposal of the department of agriculture \$5,000,000 to furnish aid to that extent.

Generally stated, the plan of operation is this: Federal land banks in the districts affected will be designated as the financial agents to make and collect the loans. The county agricultural agents in the different districts will ascertain the needs of the different farmers and determine the feasibility of the planting.

Money so borrowed will bear interest at 6 per cent and will be due in this locality on October 1, 1919. No money will be lent in excess of \$3 per acre and 100 acres will be the maximum amount of land planted by an individual.

The object of this loan is not to stimulate the planting of winter wheat where conditions are not favorable, but to help farmers who have suffered losses in the past and who now have good prospects for a crop, to be able to secure their seed.

With the rains that have fallen in Lincoln county, conditions are exceptionally favorable for winter wheat or rye. It is still too early for actual planting, but now is the time to put the land in shape to retain the moisture. All ground should be disked and weeds killed and it should be harrowed thoroughly after each later shower, no matter how slight, to break up capillary action. We have an exceptional opportunity at present to retrieve our losses and to help our government, and I would urge that every farmer who has unplanted cultivated land get in touch with the financial agent of Lincoln county or the county agricultural agent, who will be very glad to assist in any manner possible. But first get in touch with the areas to be planted and kill the weeds and conserve moisture.

STUART STIRLING,
County Agricultural Agent.

Uniformed From Start

The following has been issued from Santa Fe, under date of August 13:

The War Department has recently prescribed a uniform for National army men enroute from their respective counties to mobilization camps.

Such uniform will be a brassard worn on the left arm, two inches above the elbow, bearing the letters U. S. N. A.

Men wearing such uniform come within the law prohibiting the sale of intoxicating liquor to soldiers in uniform. It is made the duty of local boards to secure evidence of violations of this law by liquor dealers or other persons and to institute vigorous prosecution of such cases where evidence is found.

R. C. REID,
Captain, U. S. R.

All repair work guaranteed at Western Garage.

Cheer-makers Needed For Service Overseas

The American Red Cross wants 550 cheer-makers—female.

These women, "who must be strong, self-reliant, cheerful and not stout," will be attached to hospital huts, to assist in maintaining the morale and spirits of convalescing American soldiers. General Manager Harvey D. Gibson has cabled for this number, and Washington headquarters looks to the Mountain division states for a substantial number of women of the qualities enumerated.

The Red Cross hut workers will be "pals" for the Sammys, as they are released from hospitals. They will sing or play some musical instrument; they will chat with the boys and take a hand in the card games; in short their duties will be to keep the sick and wounded chaps from getting homesick, weary, unhappy or distressed.

Hut workers, according to H. D. Gibson, commissioner to Europe, will be interchangeable with canteen workers. They will, at times, be on their feet for many hours. Their work will often be hard. For these and other reasons experience has shown that heavy, stout women are not fitted for the work.

The Red Cross canteen service is badly in need of more women. Mr. Gibson has advised Washington that 260 must be provided by January 1, if the Red Cross is not to fall down in its duties and obligations.

Transportation to and from France and a salary to cover living expenses while abroad will be paid. The term of enlistment is for not less than one year.

Every chapter in the Mountain division must assist in obtaining the requisite number of workers. This is a large requisition, and chapter officials are urged by the division bureau of personnel to secure publicity and prepare to take care of applicants.—From Arc Rays, publication of Mountain Division.

Little Son Dies

Harold Kenneth, the eight-year-old son of Dr. and Mrs. H. E. Pine, died Tuesday night and was buried the following evening in the local cemetery. As noted last week, in mentioning the little fellow's illness, the symptoms indicated appendicitis and later typhoid, but a more thorough examination developed that it was an attack of colitis, an inflammation of the colon.

Twice within the past eighteen months the death angel has visited this household, each time taking a son. The eldest son, Gordon, fourteen, died in February, 1917, from injuries received in an automobile accident, the injuries being heightened by a street car accident in El Paso, to which point he had been taken for an operation. The death of this second son has almost prostrated the parents and they have the deepest sympathy of the entire community. A large concourse of friends attended the funeral and attested their sympathy.

The Allies Continue to Drive the Germans

Severe fighting has taken place the past week on the western front, with the battles uniformly successful for the Allies. The Germans have lost a lot of their territorial gains made by their earlier drives, besides 75,000 to 100,000 prisoners, a still larger number dead and wounded, hundreds of big guns, thousands of small arms and great stores of supplies and ammunition. Military critics think Foch's big push is on and still greater gains for the Allies are anticipated.

The Russian situation remains about the same. Many reports are given out, the authenticity of which may be questioned. The people of that great empire appear very restless and a very respectable element welcome the plans of the Allies for intervention. Competent observers assert that the Russian situation is daily becoming more dangerous to the Germans.

Y. M. C. A. Wants Recruits, Ages 30 to 50

The following has been issued by E. C. Wade, Jr., secretary of Bureau of Personnel of the Y. M. C. A. at El Paso, and in charge of recruiting in the southwest for overseas service.

"Never before has the Army Y. M. C. A. been so under-staffed as at the present time. With more than 1,000,000 American boys overseas and the increasing demands for our help by the Allied governments, it is imperative to secure men for our service."

Undergoes Operation

Grace, fourteen-year-old daughter of Mr. and Mrs. S. R. Moss, underwent an operation for appendicitis in the Paden hospital Tuesday. The operating surgeon was Dr. Johnson, assisted by Dr. Paden.

The patient's condition is excellent and no complications are looked for.

Louis and Claire Adams went to Waco, Texas, this week, Louis to assume a position in that city and Claire to enter school.

A. R. Tice and wife left Tuesday night for a visit to Mr. Tice's relatives in Pennsylvania. This is Doc's first visit home in fifteen years.

Mrs. Rebecca Tinnon and her daughter, Belle, returned this week from El Paso. Belle has been in the hospital for about three weeks, having undergone a major operation. The effects of the operation are still quite evident, but her condition is improving.

Him Try Eat It?

We dig a hole in this page to say as how no paper come to print on Friday, for you to eat mit your supper. Maybe Mickydoe railroad, maybe eggpress kompany, maybe anyting. Types all stand up, tention, ready to start by der press on, no paper to shoot on. What Sherman he say 'bout war, if he be printer wouldn't print. Too ruff stuff.

"OVER THE TOP"

By An American Arthur Guy Empey Soldier Who Went Machine Gunner, Serving in France

Copyright 1917, by Arthur Guy Empey

EMPEY AND HIS COMRADES REPULSE A FIERCE GAS-ATTACK MADE BY THE GERMANS.

Synopsis.—Fired by the sinking of the Lusitania, with the loss of American lives, Arthur Guy Empey, an American living in Jersey City, goes to England and enlists as a private in the British army. After a short experience as a recruiting officer in London, he is sent to training quarters in France, where he first hears the sound of big guns and makes the acquaintance of "cooties." After a brief period of training Empey's company is sent into the front-line trenches, where he takes his first turn on the fire step while the bullets whiz overhead. Empey learns, as comrade falls, that death lurks always in the trenches. Chaplain distinguishes himself by rescuing wounded men under hot fire. With pick and shovel Empey has experience as a trench digger in No Man's Land. Exciting experience on listening post detail. Exciting work on observation post duty. Back in rest billets Empey writes and stages a successful play. Once more in the front trenches, Empey goes "over the top" in a successful but costly attack on the German lines.

CHAPTER XXIII—Continued.

A gas helmet is made of cloth, treated with chemicals. There are two windows, or glass eyes, in it, through which you can see. Inside there is a rubber-covered tube, which goes in the mouth. You breathe through your nose; the gas, passing through the cloth helmet, is neutralized by the action of the chemicals. The foul air is exhaled through the tube in the mouth, this tube being so constructed that it prevents the inhaling of the outside air or gas. One helmet is good for five hours of the strongest gas. Each Tommy carries two of them going around his shoulder in a waterproof canvas bag. He must wear this bag at all times, even while sleeping. To change a defective helmet, you take out the new one, hold your breath, pull the old one off, placing the new one over your head, tucking in the loose ends under the collar of your tunic.

For a minute, pandemonium reigned in our trench—Tommy adjusting their helmets, bombers running here and there, and men turning out of the dugouts with fixed bayonets, to man the fire-step.

Re-enforcements were pouring out of the communication trenches. Our gun's crew were busy mounting the machine gun on the parapet and bringing up extra ammunition from the dugout.

German gas is heavier than air and soon fills the trenches and dugouts, where it has been known to lurk for two or three days, until the air is purified by means of large chemical sprayers.

We had to work quickly, as Fritz generally follows the gas with an infantry attack.

A company man on our right was too slow in getting on his helmet; he sank to the ground, clutching at his throat, and after a few spasmodic twistings went West (died). It was horrible to see him die, but we were powerless to help him. In the corner of a traverse, a little, muddy cur dog, one of the company's pets, was lying dead, with his paws over his nose.

It's the animals that suffer the most—the horses, mules, cattle, dogs, cats and rats—they having no helmets to save them. Tommy does not sympathize with rats in a gas attack.

At times gas has been known to travel, with dire results, fifteen miles behind the lines.

A gas, or smoke helmet, as it is called, at the best is a vile-smelling thing, and it is not long before one gets a violent headache from wearing it.

Our eighteen-pounders were bursting in No Man's Land, in an effort, by the artillery, to disperse the gas clouds.

The fire step was fixed with crouching men, bayonets fixed, and bombs near at hand to repel the expected attack.

Our artillery had put a barrage of certain fire on the German lines, to try and break up their attack and keep back re-enforcements.

I trained my machine gun on their trench and its bullets were raking the parapet.

Then over they came, bayonets glinting. In their respirators, which have a large mouth in front, they looked like some horrible nightmares.

All along our trench, rifles and machine guns spoke, our sharpshooters were bursting over their heads. They went down in heaps, but few could take the places of the fallen. Nothing could stop that mad rush. The Germans reached our barbed wire, which had previously been demolished by their shells, then it was bomb against bomb, and the shell for all.

Suddenly my head seemed to burst from a loud "crack" in my ear. Then my head began to swim, throat got

dry, and a heavy pressure on the lungs warned me that my helmet was leaking. Turning by gun over to No. 2, I changed helmets.

The trench started to wind like a snake, and sandbags appeared to be floating in the air. The noise was horrible; I sank onto the fire step, needles seemed to be pricking my flesh, then blackness.

I was awakened by one of my mates removing my smoke helmet. How delicious that cool, fresh air felt in my lungs.

A strong wind had arisen and dispersed the gas.

They told me that I had been "out" for three hours; they thought I was dead.

The attack had been repulsed after a hard fight. Twice the Germans had gained a foothold in our trench, but had been driven out by counter-attacks. The trench was filled with their dead and ours. Through a periscope I counted eighteen dead Germans in our wire; they were a ghastly sight in their horrible-looking respirators.

I examined my first smoke helmet. A bullet had gone through it on the left side, just grazing my ear. The gas had penetrated through the hole made in the cloth.

Out of our crew of six we lost two killed and two wounded.

That night we buried all of the dead, excepting those in No Man's Land. In death there is not much distinction; friend and foe are treated alike.

After the wind had dispersed the gas the R. A. M. C. got busy with their chemical sprayers, spraying out the

A Gas Helmet.

dugouts and low parts of the trenches to dissipate any fumes of the German gas which may have been lurking in same.

Two days after the gas attack I was sent to division headquarters, in answer to an order requesting that captains of units should detail a man whom they thought capable of passing an examination for the divisional intelligence department.

Before leaving for this assignment I went along the front-line trench saying good-by to my mates and letting it over them, telling them that I had picked a cushy job behind the lines, and how sorry I felt that they had to stay in the front line and argue out the war with Fritz. They were serious but still good-natured, and as I left the trench to go to the rear they shouted after me:

"Good luck, Yank, old boy; don't forget to send up a few tags to your old mates."

I promised to do this and left. I reported at headquarters with attention ethics and passed the required examination. Out of the sixteen applicants four were selected.

I was highly elated because I was, I thought, to get a cushy job back at the rear.

The next morning the four reported to division headquarters for instructions. Two of the men were sent to large towns in the rear of the lines with an easy job. When it came our turn the officer told us we were good men and had passed a very creditable examination.

My tin hat began to feel too small for me, and I noted that my man, Atwell by name, was straining his chest out more than usual.

The officer continued: "I think I can use you two men to great advantage in the front line. Here are your orders and instructions, also the pass which gives you full authority as special M. P. detailed on intelligence work. Report at the front line according to your instructions. It is risky work and I wish you both the best of luck."

My heart dropped to zero and Atwell's face was a study. We saluted and left.

That wishing us the "best of luck" sounded very ominous in our ears; if he had said "I wish you both a swift and painless death" it would have been more to the point.

When we had read our instructions we knew we were in for it good and plenty.

What Atwell said is not fit for publication, but I strongly seconded his opinion of the war, army and divisional headquarters in general.

After a bit our spirits rose. We were full-fledged spy-catchers, because our instructions and orders, said so.

We immediately reported to the nearest French estaminet and had several glasses of muddy water, which they called beer. After drinking our beer we left the estaminet and hailed an empty ambulance.

After showing the driver our passes we got in. The driver was going to the part of the line where we had to report.

How the wounded ever survived a ride in that ambulance was inexplicable to me. It was worse than riding on a gun carriage over a rock road.

The driver of the ambulance was a corporal of the R. A. M. C., and he had the "wind up," that is, he had an aversion to being under fire.

I was riding on the seat with him while Atwell was sitting in the ambulance, with his legs hanging out of the back.

As we passed through a shell-destroyed village a mounted military policeman stopped us and informed the driver to be very careful when we got out on the open road, as it was very dangerous, because the Germans lately had acquired the habit of shelling it.

The corporal asked the trooper if there was any other way around, and was informed that there was not. Upon this he got very nervous and wanted to turn back, but we insisted that he pro-

DESTINED TO BECOME DESERT

Great French Colonial Territory in North Africa Seem to Hold Out Little Promise.

Wadai was the last point of colonial expansion of the French before the European struggle drew their energies and attention homeward. The great African territory was added to the French Congo only a short time before the war broke out.

Very few white people have actually visited Wadai, but tales of the region are numerous both in upper Egypt and in Tripoli. Occasionally some of the inhabitants of the little-known region can be seen in the bazaars of Khartoum or Algiers. Wadai lies at the head of caravan routes that cross the desert both from the Mediterranean and the Nile. It bears a bad reputation.

It is known as one of the last strongholds, and sources of supply of the slave trade. Its people are divided into conquerors and conquered—the former belonging to a powerful native tribe that holds the Mohammedan faith and the latter including all manner of very primitive savages. Up to very recent times these savage people are known to have been captured and sold as slaves along the Barbary coast. The French only established a protectorate in 1912, so that they had little opportunity to break up the trade before the European war.

By physical appearance Wadai is described by the caravan men as a vast, low-lying plain. Great tracts of it have never been explored. It seems to have been formed the bed of a great inland sea, of which Lake Chad, in the southwest, is the shrunken remnant. In fact the Sahara is steadily encroaching on it from the northward. It is crossed by the old channels of several streams, but without a single flowing

ceed, and explained to him that he would get into serious trouble with his commanding officer if he returned without orders; we wanted to ride, not walk.

From his conversation we learned that he had recently come from England with a draft and had never been under fire, hence his nervousness.

We convinced him that there was not much danger, and he appeared greatly relieved.

When we at last turned into the open road we were not so confident. On each side there had been a line of trees, but now, all that was left of them were torn and battered stumps. The fields on each side of the road were dotted with recent shell holes, and we passed several in the road itself. We had gone about half a mile when a shell came whistling through the air and burst in a field about three hundred yards to our right. Another soon followed this one and burst on the edge of the road about four hundred yards in front of us.

I told the driver to throw in his speed clutch, as we must be in sight of the Germans. I knew the signs; that battery was ranging for us, and the quicker we got out of its zone of fire the better. The driver was trembling like a leaf, and every minute I expected him to pilo us up in the ditch. I preferred the German fire.

In the back Atwell was holding onto the straps for dear life, and was singing at the top of his voice:

We beat you at the Marne,
We beat you at the Aisne,
We gave you hell at Neuve Chapelle,
And here we are again.

Just then we hit a small shell hole and nearly capized. Upon a loud yell from the rear I looked behind, and there was Atwell sitting in the middle of the road, shaking his fist at us. His equipment, which he had taken off upon getting into the ambulance, was strung out on the ground, and his rifle was in the ditch.

Empey is called upon to do duty as a member of a firing squad. His description of the execution is given in the next installment.

(TO BE CONTINUED)

Traits of Bird Lovers.

Years ago, during a winter's visit in London, I used to watch the persons who regularly fed the birds in Hyde park. I noticed that most of them were people of apparently humble circumstances, a few pretty close to underfeeding themselves. It was delightful to see how much pleasure they all took in keeping these birds from hunger.

Two that I saw each day for a week or so, evidently husband and wife, I ventured to speak to. Eagerly they talked about the birds as they might have talked about children, noting and relishing individual characteristics.

"We have become so fond of them," said the wife. "They recognize us now, many of them, and a few come to us quite fearlessly. We should feel quite uncomfortable if we should miss a day. They are like members of the family that have to be cared for."—Exchange.

stream. At no very remote geologic epoch of the future Wadai will apparently become a part of the great desert to the north.

Schwab's Story on Himself.

When it comes to borrowing money, Charles M. Schwab, president of the Bethlehem Steel company, says he will take second place to no one. You remember the story about the former Pittsburgher trying to make a "touch" for \$2,000,000 and the banker calling Mr. Schwab's attention to the fact that he already owed the bank several millions, and his reply was that he had forgotten all about it. Mr. Schwab, at the New York Players' club, related another "touch" he made. "I wished to enlarge the Bethlehem Steel company," he said, "to cope with conditions in the world free from contract obligations. I went to Philadelphia and called upon Mr. Stotesbury. I outlined my plans, leading up to telling him that I required money. He listened attentively and responded heartily: 'Well go the limit with you. You can call on us for \$300,000.' 'That won't be a starter,' I protested. 'Why, Mr. Baker over in New York has offered me many times that sum and he doesn't even know me.' 'That,' he shot back at me with emphatic promptness, 'is the reason he is ready to loan it to you.'"

Lines to Be Remembered.

Think well about great things; and know that thought is the only reality in this world. Lift up nature to thine own stature; and let the whole universe be for thee no more than the reflection of thine own heroic soul. Combat for honor's sake; that alone is worthy of a man. And if it should fall to thee to receive wounds, shed thy blood as a beautiful dew, and smile.—Orrinater.

FRECKLES

Now is the Time to Get Rid of Those Ugly Spots

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these lovable spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it at night and morning and you should soon see that even the most freckled have begun to disappear, while the freckles that have remained actively. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

Be sure to get the double strength Othine, as this will give you the greatest money back if it fails to remove freckles.—A.B.

Church Mice Get Fat

Even the devout New York mice are waxing fat on the war. That old saying about being "as poor as a church mouse" is surely passe these days, because there isn't any such animal in any of the houses of worship. They are all rich, fat and well fed.

The cause is that most of the churches are offering free "feed" every Sunday night to the boys in khaki. And these young men, try to be so careful as they may, always let a few crumbs fall from the wholesome sandwiches and tasty little cakes with their rich icing.

That is where the transformation of the church mouse comes in.

A woman reporter, dropped into the chapel of the Fifth Avenue Presbyterian church the other evening expecting to attend prayer meeting, but she got a glimpse of a mouse and from that moment until she reached the street she forgot all about religion.

She, however, got a good glimpse of the mouse. Never, she declared, had she seen so large, so healthy, so prosperous a looking mouse in a church. All of which proves that the war has a silver lining even for the poor church mouse.

Didn't Notice It

"Doris, those people will be here in a minute. Put on your evening gown, quick!"

"Don't be funny, Charles; it is on."

Experiments have shown that good paper can be made of grapevine.

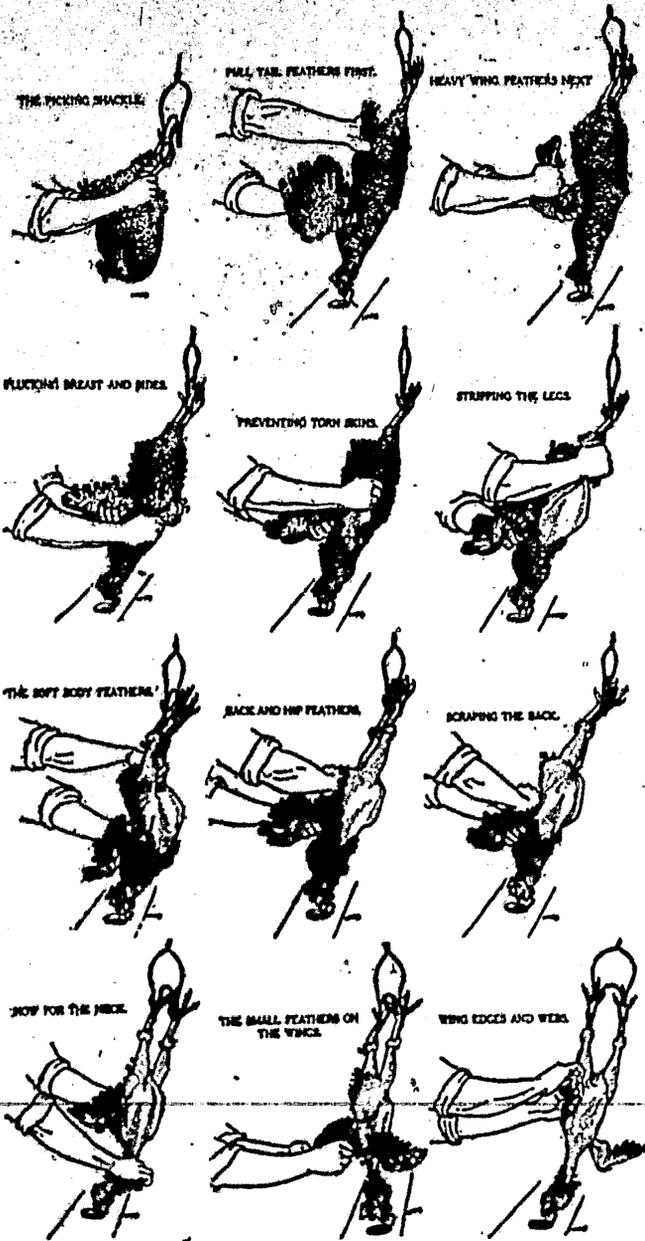

Combine the Grains

That's what is done in making Grape-Nuts food—barley and other grains are used with wheat. This adds to food value and flavor, and the sum total requires less wheat. The malted barley in Grape-Nuts also helps digest other foods. For an economical, nourishing and delicious food, try Grape-Nuts

HOW TO PICK CHICKENS

Successive Steps Shown in Pictures From Left to Right.

PROPER PICKING VERY IMPORTANT

Poorly Dressed Fowls Cause of Loss to Packer and Can Be Prevented.

Badly picked chickens cause money losses to packers, and the importance of proper picking is comparatively as great to the owner of a small flock whose picking is done only for the family table.

Torn skins, "burnt" wings and legs due to continued and rough "stripping" pin feathers that show discolored necks because the neck feathers were pulled first instead of last—these things can be prevented by proper picking.

Much loss results from "roughing" when the quills and most of the soft feathers are removed. The few feathers, pins and down remaining should be removed by the "tipper" or "pinner." Proper braining is essential to easy dry picking—it makes dry picking as easy as "scalding."

The following paragraphs explaining the steps in picking are numbered to correspond with the sketches in the picture, reading from left to right.

No. 1.—The picking shackle, made of galvanized wire one-eighth inch in diameter, is suspended by a cord. With the feet in the shackle the wings of the bird should be level with your elbows.

No. 2.—As soon as the throat vein is cut and the brain punctured, grasp the wings in the left hand, being sure not to clamp the neck. Grasp the tail with the right hand—thumb down—then turn the wrist and twist out the feathers as the first turns upward.

No. 3.—Pull the large wing feathers next. Hold the hand with the thumb upward. Grasp as many feathers as you can in one hand. Jerk them out with a sharp, quick downward movement. One grab for small birds—two for large.

No. 4.—Now for the breast and

sides. Begin at the wishbone. Take large handfuls. Seize the feathers with the whole fist, thumb upward. Pull up and out, twisting the forearm outward.

No. 5.—Work up to the thighs, taking large fistfuls of feathers and bring large to pull upward and twist the forearm outward. It's the twist that turns the trick and prevents torn skins. Do one side first, then the other.

No. 6.—The legs come next. Clasp the leg firmly at its base. Keep the thumb downward. Move the closed hand along the leg, pressing hard enough to strip the feathers. Be sure to work in the direction of the feather setting, and strip only once. Feathers left must be pulled.

No. 7.—As the shackle holds the legs apart, it's easy to slip the hand between them to pull the soft body feathers. Pull up, and toward the body of the picker.

No. 8.—The trick in removing the back and hip feathers is to grasp the feathers with the palm of the hand outward, and then rotate the forearm inward. This makes a sort of scraping motion, and out come the feathers.

No. 9.—In the picture is a hand in the act of scraping. Do you see the way the forearm is turned inward? Pull out the little feathers between the shoulders with thumb and forefinger.

No. 10.—Now is the time to strip the neck. Clasp the neck, thumb upward, around the base. Strip by sweeping downward. Sometimes two sweeps are needed—one on the upper, the other on the lower half of the neck. Any feathers left must be picked out.

No. 11.—Great care must be taken with the small wing feathers, especially near the body. Stretch the wing as shown. Pick the medium-sized soft feathers on the broad surfaces in small bunches with the thumb and forefinger. If the bunches are too large the skin will be torn.

No. 12.—Hold the wing in a vertical position with the thumb and forefinger pinching the second joint from the body. With thumb and forefinger moving downward against the feather setting remove the small feathers on edges and web. The stiff feathers and fans are pulled one at a time by bending sharply downward and jerking quickly.

ADVANCEMENT IN WESTERN CANADA FARM LAND PRICES

Stories of phenomenal advancement and prosperity in Western Canada have been told the reading public for some years past. The stories were told when there were hundreds of thousands of acres of splendid land adjacent to railways and projected lines; which could be had on the payment of a mere \$10 entry fee, and under cultivation and living conditions. As was prophesied then, the day has come when these are few. There are still available thousands of these; they are some distance now from the railways. The land is as good as ever, but pioneering conditions will have changed. A great many are still taking advantage of this free offer from the government. The story was told when good lands near lines of railway could be bought for from \$3 to \$10 per acre and the prophecy made that these prices would double in a few years, for the intrinsic value was far more than that. That day has come more quickly than expected. The immense crops of grain that could be raised has brought about the change, and the demand for low priced lands with maximum returns has prompted the keen purchaser as well as the owner of higher priced land from which no greater return could be looked for. Prices of land in Western Canada are still advancing, and will continue to advance until, of course, the limit is reached—when returns will warrant no further increase. That day is not far distant. But, in the meantime, there are large tracts of land owned by land companies and private individuals that have not felt the advance that has been shown in other districts. The opportunity to purchase these should not be lost sight of, and if there are those amongst the readers of this article, which is authorized by the Canadian government, who wish cheap land, such lands as produce from 25 to 40 bushels per acre, and will pay for themselves out of one year's crop, advantage should be taken of the present opportunity.

Coming to Alberta with his family thirteen years ago, his assets consisting of a small outfit and \$20 in cash, Mr. O. F. Malmberg has accumulated by farming and live stock raising assets to the value of more than \$300,000, and has a personal credit, worth on demand, \$100,000. He has not speculated in land, but bought only to farm. Near Blackie, Alberta, he operates 3,100 acres of wheat land. He has just purchased an additional 11,500 acres near Cardston, in Southern Alberta. His personal credit enabled him to finance this deal in Calgary in a little over three hours. The ranch just purchased is a fully equipped stock and grain ranch. At the present time it carries a thousand head of cattle and several hundred horses, and is fully equipped with buildings, machinery, corrals, sheep sheds, dipping vats, etc. That is a story from one district. Let us select one from a district some hundred or more miles from that.

"Peter A. Klassen, who recently moved to Herbert, Sask., from Kansas,

has purchased a section of prairie land in the Hillsboro district, about 24 miles northwest of Herbert, for which he paid \$12,000 cash. He is erecting temporary buildings to live in while putting the place in cultivation, and, this summer plans to erect good buildings on the farm and equip it for a home. Mr. Klassen recently sold his 90-acre farm in Kansas for \$15,000 and is investing the proceeds in Canada."

With the proceeds of the sale of his land in Kansas, this farmer purchased in Saskatchewan a piece eight times as large as he had previously been farming, and had a balance with which to purchase equipment, stock, etc., of \$3,000. Moreover as land in Saskatchewan may be expected to yield twice as much grain per acre, he will be able to produce sixteen times as much as formerly.

The average value of farm land for the whole of Canada, including land improved and unimproved, together with dwelling houses, barns, stables and other farm buildings, is approximately \$44 per acre as compared with \$41 in 1916, according to the latest report of the Census and Statistics branch at Ottawa. The average value of land in the Prairie Provinces is as follows:

Manitoba	\$31.00
Saskatchewan	28.00
Alberta	20.70

It is the low prices at which land can be obtained in Western Canada which is rendering this country such an important factor in the production of foodstuffs at the present time. It is enabling men who have been farming small areas in older districts to take up and farm with the same capital areas not only many times as great, but which are also capable of producing considerably larger crops to the acre.—Advertisement.

Coal Flows Like Water.
In a great steel works at Pittsburgh powdered coal flows like water through 1,500 feet of four-inch pipe under a pressure of 40 pounds to the square inch, and flows so rapidly that four tons have been put through a 550-foot line in five minutes.

If you wish beautiful, clear white clothes, use Red Cross Bag Blue. At all good grocers. Adv.

As Usual.
"War doesn't change husbands much does it?" "No; mine loses his collar button as usual."

He who is satisfied with his lot is rich.

Lemon Juice For Freckles

Girls! Make beauty lotion at home for a few cents. Try it!

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle, sunburn and tan lotion, and complexion whitener, at very, very small cost. Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands and see how freckles, sunburn and tan disappear and how clear, soft and white the skin becomes. Yes! It is harmless.—Adv.

Hard Luck.
Flatbush—I lost my wife in the crowd the other day.
Bensonhurst—You found her all right, I suppose?
"No, I did not."
"Well, say, that's hard luck."
"I know it; but how did you happen to know she found me?"

KIDNEY TROUBLE OFTEN CAUSES SERIOUS BACKACHE

When your back aches, and your bladder and kidneys seem to be disordered, go to your nearest drug store and get a bottle of Dr. Kilmer's Swamp-Root. It is a physician's prescription for ailments of the kidneys and bladder. It has stood the test of years and has a reputation for quick and effectively giving results in thousands of cases. This preparation so very effective, has been placed on sale everywhere. Get a bottle, medium or large size, at your nearest druggist. However, if you wish first to test this preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

A Thing to Be Avoided.
It's all right to loan some of our glib boys to Italy, but we do hope they won't wander over into Switzerland and learn to yodel.—Grand Rapids Press.

There are 130 colleges in China devoted to the study of scientific agriculture.

W. N. U., DENVER, NO. 30-1918.

Save the Babies

INFANT MORTALITY is something frightful. We can hardly realize that 1 of all the children born in civilized countries, twenty-two per cent, or nearly one-quarter, die before they reach one year; thirty-seven per cent, or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save many of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stupefy, retard circulation and lead to congestions, sickness, death. There can be no danger in the use of Castoria if it bears the signature of Chas. H. Fletcher as it contains no opiates or narcotics of any kind. Genuine Castoria always bears the signature of *Chas. H. Fletcher*.

Tired Nervous Mothers

Should Profit by the Experience of These Two Women

Buffalo, N. Y.—"I am the mother of four children, and for nearly three years I suffered from a female trouble with pains in my back and side, and a general weakness. I had professional attendance most of that time but did not seem to get well. As a last resort I decided to try Lydia E. Pinkham's Vegetable Compound which I had seen advertised in the newspapers, and in two weeks noticed a marked improvement. I continued its use and am now free from pain and able to do all my housework."—Mrs. B. B. ZAKLINSKA, 202 Wells Street, Buffalo, N. Y.

Portland, Ind.—"I had a displacement and suffered so badly from it at times I could not be on my feet at all. I was all run down and so weak I could not do my housework, was nervous and could not lie down at night. I took treatments from a physician but they did not help me. My Aunt recommended Lydia E. Pinkham's Vegetable Compound. I tried it and now I am strong and well again and do my own work and I give Lydia E. Pinkham's Compound the credit."—Mrs. JOSEPHINE KRAVIZ, 685 West Race Street, Portland, Ind.

Political Announcements

REPUBLICAN

We are authorized to announce the candidacy of LYTON R. TAYLOR of Las Cruces, for the Republican nomination for District Judge of the Third Judicial District, composed of the counties of Lincoln, Torrance, Otero and Dona Ana.

For District Judge

In another column will be found the announcement of Attorney Lyton R. Taylor, of Las Cruces, for the position of District Judge of the Third Judicial District, subject to the action of the Republican party. Attorney Taylor spent his early boyhood in Lincoln county and is well known to many of our people. Leaving here, he attended college, and after graduation entered the practice of law and is engaged in the practice of his profession at Las Cruces. Speaking with members of the Lincoln county bar, we learn that Mr. Taylor is held in high esteem, both as a gentleman and a lawyer, and we are told he enjoys the same distinction in his home city. Mr. Taylor requests the careful consideration of his candidacy by the voters of Lincoln county and will appreciate any assistance they may accord him in his candidacy for the Republican nomination for District Judge.

Loans to Farmers

President Wilson has placed at the disposal of the Treasury and Agricultural Departments \$5,000,000 to enable them to furnish aid to wheat growers in certain sections of the West who have lost two successive crops by winter killing and drought. The Federal land banks will act as financial agents of the Government to make and collect the loans.

This fund is not intended to be lent to farmers who have banking collateral; the action of the War Finance Corporation in urging banks to finance such farmers and its promise to support them in such financing, it is believed, will amply provide for them.

Loans from this fund will be made to individuals who have not banking collateral, and only where it is necessary to enable a farmer to continue to grow food products. The money will be advanced upon the crop of wheat or substitute grains planted on the land, and no loan will be in excess of \$3 per acre and no applicant financed beyond 100 acres.

The use of this fund will be under the joint control of the Treasury and Department of Agriculture; as the machinery for the work is already in existence, no substantial delay is expected.

The cooperation of local banks and local associations and individuals is looked for.

AMERICANS ASKED TO LIMIT USE OF SUGAR

Must Use No More Than Two Pounds Per Person a Month if the Present Meagre Allied Sugar Ration Is Maintained.

Stocks Will Be Short Until Beginning of New Year—Ration May Be Enlarged Then.

Two pounds of sugar a month—half a pound a week—that is the sugar ration the U. S. Food Administration has asked every American to observe until January 1, 1919, in order to make sure there shall be enough for our Army and Navy, for the Allied armies and for the civilians of those nations.

By New Year's the world sugar situation will be relieved somewhat by the new crop. Cuban sugar of this year's crop will be arriving in this country.

Every available sugar source will be drawn on by the Food Administration during the next winter months to maintain sufficient stocks here to keep up our national sugar supply. During October the first American beet sugar will arrive in the markets. By the middle of November some of our Louisiana cane crop will be available. All of this sugar and more may be needed to keep this nation supplied on a reduced ration and to safeguard the Allied sugar ration from still further

reduction. In Europe the present ration is already reduced to a minimum.

Our Situation.

The situation which the United States faces in its efforts to maintain a fair distribution of sugar to the allied world is as follows:

Sugar supplies throughout the country, in homes, stores, factories and bakeries are at a low ebb. We must make increased sugar shipments to the Allies.

Production of American beet and Louisiana cane crops have been disappointing.

Porto Rico crops have been curtailed.

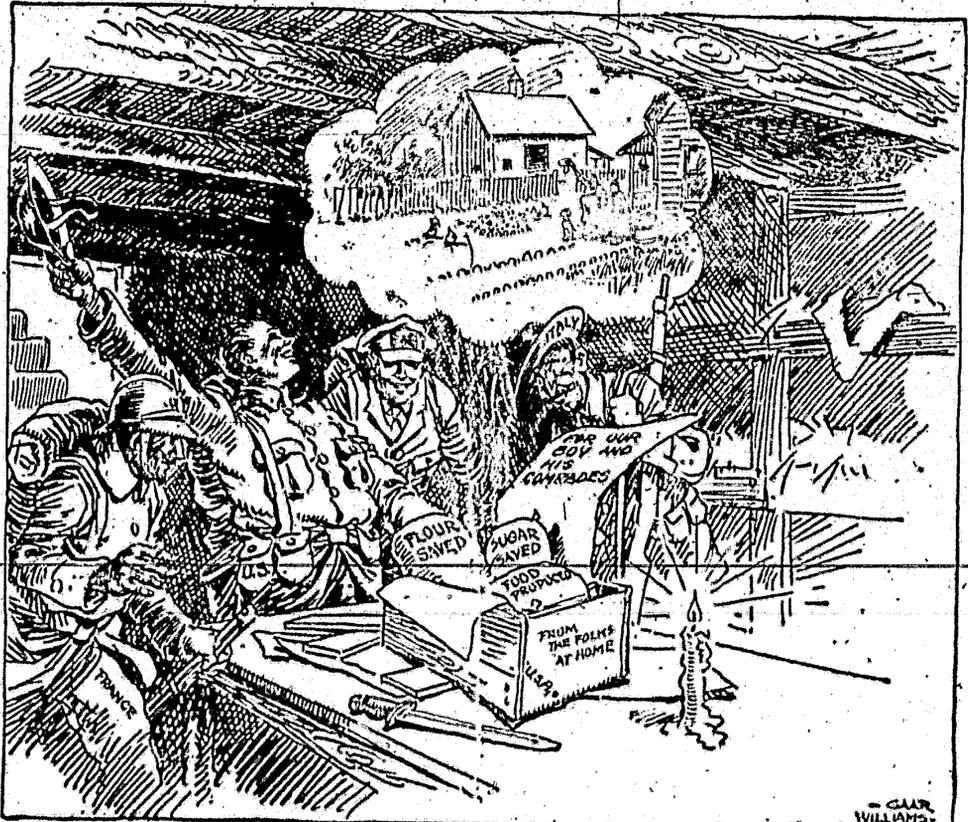

Immense sugar stocks in Java cannot be reached on account of the shipping shortage; ships are needed for troop movements and munitions.

Army and Navy sugar requirements have increased as well, as those from the Allies.

Most industries using sugar have had their allotment reduced by one-half; some will receive no sugar.

Households should make every effort to preserve the fruit crop without sugar, or with small amounts of sugar. Later, when the sugar supply is larger, the canned fruit may be sweetened as it is used.

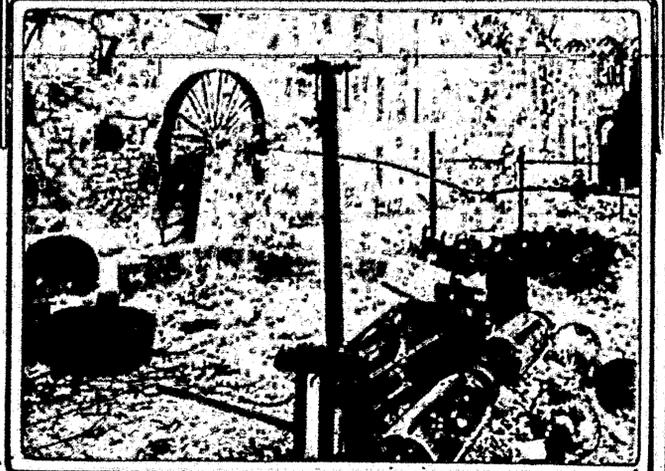

A BOX FROM HOME

Drawn by Gaar Williams, Division of Pictorial Publicity.

Food savings of millions of Americans during our first year of war enabled this government to send enormous food shipments abroad for our fighting forces and the Allied nations. Our savings in cereals—out of a short crop—amounted to 153,900,000 bushels; all of which was shipped to Europe. We increased our meat and fat shipments 844,600,000 pounds. This was America's "box from home" to our army abroad and the civilians and military forces of the Allied nations.

French Sugar Mills Destroyed

France must import sugar today, most of it from this side of the ocean, because the largest portion of French sugar beet land is in German hands. As a result, the French people have been placed on a sugar ration of about 18 pounds a year for domestic use; a pound and a half a month. This photograph shows how the German

troops destroyed French sugar mills. Thanks to the French rationing system the annual consumption has been cut to 600,000 tons, according to reports reaching the United States Food Administration. Before the war France had an average sugar crop of about 750,000 tons of sugar and had some left over for export.

Nation's Small Savings Mount to Billions

There are now forty million pledged war savers in the United States, according to a letter received by State Director of War Savings Hallett Reynolds, at Las Vegas, N. M., from R. P. Swiford, assistant to the Federal Director of War Savings, who recently visited New Mexico, and who is now in Washington. Mr. Swiford writes, in part:

"The national drive for war savings pledges inaugurated by the National War Savings Committee has resulted in securing between 35,000,000 and 40,000,000 pledged war savers in the United States, and within the next few months this number will in all probability be increased to not less than 50,000,000. The pledge card has become one of the fundamentals of the War Savings campaign. Signing the pledge is hitting the trail for war savings. The national committee feels that the educational campaign, reaching as it does into every corner of the United States, must now be put to practical use. The citizen must not only be educated to the necessity of war savings, but he must pledge himself to become an actual purchaser of stamps.

"The following states have secured their quota in cash sales and pledges: Arizona, Nebraska, Oregon, South Dakota, and Utah, and the following states are so close to their quota that within the next thirty to sixty days they will have secured the entire amount in sales and pledges: California, Colorado, Iowa, North Carolina, Tennessee, Kansas, Mississippi, Montana, Oklahoma, Wisconsin. Definite reports from twelve states show that the average percentage of pledge signers to population is 32.69. Connecticut leads with 54.81 per cent.

"The June 28th pledge drive has greatly stimulated the sale of stamps for cash, the Treasury Department receiving as high as \$21,000,000 in cash from the sale of stamps in one day. Sales for July were \$211,000,000, and the total cash sales in the United States to date approximately \$518,

000,000. The war savings organization is one of the most complete ever perfected in this country. It now numbers over 300,000 workers; 248,469 authorized sales agents have been appointed, and 103,548 war savings societies have been organized. The fundamental principles of the war savings plan may be summed up in the words "pledge, save and invest," and fundamentally it is one of the most important campaigns which the government has ever inaugurated, as it aims to secure \$2,000,000,000 in new wealth for the government to use in the prosecution of the war, but in spreading the gospel of saving the effect of the war savings work is felt in every government activity. The war savings is a great popular load and every man, rich and poor, should be proud to have a part in it. It is designed as well for those who can save and invest \$1000 as for those who can save and invest only \$5.

"The greatest men in the country, the president of the United States, the secretary of the treasury, Frank A. Vanderlip, chairman of the National War Savings Committee, the great merchants and bankers throughout the country realize the importance of this effort to convert a nation of spenders into a nation of savers, and in every state will be found financial and industrial leaders actively engaged in this work."

"No Time to Be Hating Each Other"

"This is no time to be hating each other for the love of God," exclaimed a Roman Catholic priest when a newcomer from the States remarked about his work in a Y. M. C. A. but in England, writes Arthur E. Hungerford. This remark has gone up and down the American camps in England and France and typifies the spirit of women Catholics and Protestants alike in working for the common good of the American soldier.

At a great rest camp in England, where thousands of American troops are sent after landing to rest for six or seven days before going on to France, a man,

who back home is a Presbyterian minister, may be heard urging Roman Catholic soldiers to make their confessions and go to mass. More than that, he arranges for the priest to visit the camp, turns his office over for a confessional and prepares the hut for mass on Sunday morning.

This man is Rev. G. William Russell, who was assistant pastor of Bethlehem Presbyterian church of Philadelphia. Here is a typical example of how he looks after the spiritual welfare of the Catholics.

"How many of you are Roman Catholics?" he asked of a crowd of soldiers gathered in a "Y" hut. More than half of them raised their hands.

"Men, I have arranged for Father Gile, an English chaplain, to come tomorrow night to receive your confessions. He will use my office. He will celebrate mass on Sunday morning in this hut. Won't you come? I am Protestant, but you men have just escaped the perils of the submarine. Attend mass and then write home to your mothers or wives or sweethearts that one of the first things you did upon landing was to make your confession, attend mass and thank God for your safety. We have a Roman Catholic secretary here. If any of you want to meet him you may do so by asking for him."

Nearly every man attended mass and many called on Rev. Mr. Russell to thank him for giving them the opportunity to do so.

The services conducted by the Y. M. C. A. are attended not only by Protestants, but also by Jews and Roman Catholics. At some of the huts the men are allowed to smoke during religious services. Said one secretary, "I would rather have religious service in a hut chuck full of men who are smoking than a formal service with only one or two men inside and all the rest turned out of doors. A religion that won't stand every day wear and tear won't last long over here."

See the lovely silk and Jersey Cloth Dresses Ziegler Bros. are receiving daily.

Dynamite Cap Wounds

Adilaido Rail, a young Mexican boy employed by Blanchard Brothers on their Macho ranch, met with a serious and painful accident Tuesday of this week. He was examining a percussion cap and incidentally punctured the cap with a nail. The natural result followed; the cap exploded, blowing off the thumb and the tips of three fingers. The wounded boy was brought to Carrizozo and had his injuries cured by Dr. Johnson. The next morning the injured boy was taken back to the ranch.

Registration August 24th

The Local Board has received the following notice of registration to be made one week from next Saturday.

Santa Fe, N. M., August 13, 1918.

Local Board, Carrizozo, N. M.

All male persons who have attained their twenty-first birthday since June 5, 1918, and on or before the 24th day of August, will register on Saturday, August 24, between the hours of 7 a. m. and 9 p. m. Do not confuse this with the coming registration in September. Give this the widest publicity.

R. C. REID,
"Captain, U. S. R."

County Road Work

W. C. Davidson, county highway superintendent, and W. M. Ferguson, road foreman, were here Wednesday night, having returned from reviewing the Carrizozo-Corona road. Supplies, tools, teams and men will be taken to the other end, where the work will begin, and a substantial sum of money will be expended upon this important highway. The State Highway Commission recently apportioned \$2,000 for this road, which, supplemented by bond fund applicable thereto, will total something over \$4,000 for this work.

Additional Business

Robert H. Taylor, of the firm of Taylor & Sons, has moved down from White Oaks, and in connection with the firm here will open a shop on El Paso avenue, facing Barnett's feed store. Besides being a blacksmith shop, it will be equipped for auto repairing, vulcanizing, will handle oils and gasoline and will make a specialty of heavy forging. The combined hardware and furniture business will be continued as usual at the old location on Alamogordo avenue, opposite the postoffice.

Heavy Rains, Bad Roads

The continuous rains of the past week produce a feeling of satisfaction, from a standpoint of prosperity, that has long been absent, but at the same time have added difficulties to travel that make life a burden. The roads are heavy, bridges have been washed out and travel conditions are worse than for many years. The mail lines, as a result, experience great difficulty in getting over the roads, much less meeting schedules.

Miss Beatrice McCleughan, a niece of Mrs. J. B. French, arrived this week and will pay the French family an extended visit.

Miss Georgia B. Lesnett went to Roswell today in response to a phone message that her mother was quite ill.

Lester Greer went to El Paso this week and enlisted in a Texas infantry company organizing there. The company will be federalized soon.

Advisory Service

OUR customers find it much to their interest to confer freely with our officers, who keep in close touch with trade and financial conditions.

These conferences often bring out the advantages which anxiety and business cares hide from the average individual.

This is a service we keep ourselves prepared to give gladly in addition to our regular banking facilities and without regard to the size of your account.

CALLED HER FAMILY TO HER BEDSIDE

Six Years Ago, Thinking She Might Die, Says Texas Lady, But Now She Is a Well, Strong Woman and Praises Cardui For Her Recovery.

Royse City, Tex.—Mrs. Mary Kilman, of this place, says: "After the birth of my little girl... my side commenced to hurt me, I had to go back to bed. We called the doctor. He treated me... but I got no better. I got worse and worse until the misery was unbearable... I was in bed for three months and suffered such agony that I was just drawn up in a knot... I told my husband if he would get me a bottle of Cardui I would try it... I commenced taking it, however, that evening I called my family about me... for I knew I could not last many days unless I had a change for

the better. That was six years ago and I am still here and am a well, strong woman, and I owe my life to Cardui. I had only taken half the bottle when I began to feel better. The misery in my side got less... I continued right on taking the Cardui until I had taken three bottles and I did not need any more for I was well and never felt better in my life... I have never had any trouble from that day to this."

Do you suffer from headache, backache, pains in sides, or other discomforts, each month? Or do you feel weak, nervous and fagged-out? If so, give Cardui, the woman's tonic, a

WELL-PAID WOMEN BUY NEW CLOTHES

New York.—A wounded Anzac had come to America to lecture. He bore some honorable scars on his body, which were symbolized by stripes on his arm. A woman touched the stripes and asked what were his worst wounds. He described one, which was a clean hole made by a bullet. In his informal Anzac manner, he asked if she would like to see it. She would. So would everyone else at the luncheon. So he showed her the bullet hole below the collar bone.

"How very disappointing!" she exclaimed. "I expected a great gash."

The Anzac buttoned his collar thoughtfully, and turning to the table said: "Now, I ask you, what are we going to do, with women if they begin to expect so much of men in this war?"

And what will they do with them? Men have begun to expect so much of themselves, that the situation is the most vitally interesting thing on this planet, next to the war, observes a distinguished fashion writer.

Women are gaining so much more by this war than they ever demanded, that many are puzzled and some are near-hysterical.

Once we were a contented race; then we became an unquiet sex; then we became a restless force; and then we became a militant power.

Those with the keenest visions saw ahead of them a long struggle. They

When a woman knows there are three thousand jobs open to her and that she can command as good a salary as the man she sent to war, she is not going to be niggardly about getting new clothes, enjoying herself and re-furnishing her house.

Human nature never changes, no matter what else changes on this planet, and spending will be a woman's antidote to hard work. If she has been repressed in the matter of buying attractive things for the house or for her body, she will go out and gorge herself on those things when the first freedom from debt gives her a buoyant feeling of happiness.

The business of feminine apparel should always have been attended to by women, not men. This channel of activity is being directed to its right course. A million or more men on this continent, who are mixed up in women's apparel, will have to give up their places to women, who have an instinctive knowledge of what other women want, and do not want. With training, which will give them a cool head, a smooth tongue and the ambition to rise, they will make admirable clerks, floorwalkers, heads of departments, buyers and shopkeepers.

It is toward the apparel business that they are rapidly drifting. That is their desire, and all their preliminary training of the centuries has fitted them for this particular sector of industry. Being in the business, they will spend more money on clothes, and they will influence the expenditures of other women.

It is useless to tell women that they must not buy clothes. The reformers mean well, but they are planting seed on barren soil. There must be some pleasure in this world, or we would all go mad with the pain and anxiety of it and if you ask three million women to work for their living, you must give them the chance to deck themselves out in a bit of gay plumage and go out and eat and laugh; otherwise, they will become useless for all service, patriotic or industrial.

Demand for Evening Clothes.

Let me tell you an odd thing about this development of women's work, which has been brought about not only through their service in paying positions, but in war relief work.

It is the growing demand for evening clothes by women who have heretofore never indulged in them. We are only following in the footsteps of human nature as it has asserted itself in France and England during the last eighteen months. Paris has shown an extraordinary interest in this development, and the London thinkers and merchants have found it to be an engrossing by-product of the war.

Evening dress has always been a thing for the luxurious. It has been indulged in by those whose lives were more or less given to leisure. Millions of women have not considered it necessary to change their somber street clothes into low or half-low, fragile ones for the evening meal or evening gayeties. The street suit, with a few changes, has served during the waking hours. The shirtwaist and sport skirt have filled in the rest of the service needed.

But this condition no longer exists in Europe, and it has changed in America in the twinkling of an eye. Why?

Women have more money; they have more opportunities; industry, charity, war relief, hospital service and committee work have brought women from the depths of social obscurity into hourly contact with those who lead fashions and live leisurely lives.

All of this has lifted the art of dress instead of degrading it. It enlivens life; it brightens the prospect of our sacrifices; it is a light to our endurance.

(Copyright, 1918, by the McClure Newspaper Syndicate.)

Black satin, tulle and lace. There is a long tunic, which starts with a pointed bodice built of the satin and swings free over a tight petticoat of black Chantilly lace. There is a shawl of black tulle, which stands well away from the shoulders and reaches to the elbows.

outlined the propaganda of self-education for women; they lectured to men and of men concerning what we should have in the way of industry and commercial opportunity. Whenever men said that we were not sufficiently educated to take over the commercial burdens of the world, we retorted that we would never be educated if we did not begin to study.

Women Spend More Money.

Of one thing the prophets are sure; that women, making money, will spend more. Not having to ask for it, they will cease to be petulant about it.

COLORS FOR THE RAINY DAYS

Red, Golden Brown, Purple, Bright Shades of Blue and Green Are Cheerful.

"If we give but a few minutes to the selection of our clothes for rainy days, we can add with our dress much of the warmth and cheerfulness that is lacking in nature," asserts a student of attire. "Bright-colored dresses are appropriate, and give a pleasant note to otherwise gloomy surroundings."

"If one must go outside of the home in rainy weather, high shoes with rubbers, a short dark skirt which does not soil easily with rain and mud, a rain-coat, a rain-hat, and dark gloves should be worn. However, a bright-colored tie or blouse will give a warm note to the costume when the wraps are removed."

"Red is a color of warmth, and looks well on rainy days. Golden-brown, purple and bright shades of blue and green are cheerful colors. Dull grays, blues and greens should be worn only on bright days. Light

materials should be saved for warm, sunny weather or evening wear."

New Ideas in Curtains.

The soft graceful hangings at the doors and windows of a pretty room were the subject of comment by some visitors, so the hostess revealed the secret. "It hangs as softly as velvet, yet it's lighter in weight," commented an interested observer. "What is it—a new art fabric?" "Rather," laughed the hostess. "It's just a good grade of flannellette, dyed with ordinary commercial dyes. I used orange dye with a little deep pink, experimenting until I got this peach and apricot combination. It wasn't at all hard to do, and now I feel that I have a sunset at every window, even on the darkest day."

Wide Girtees.

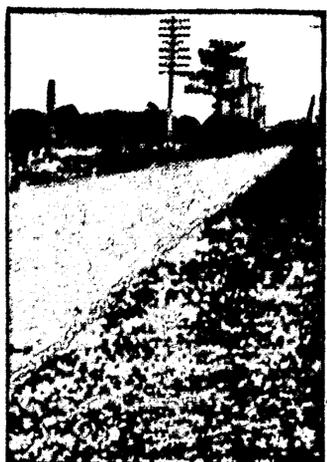

Very effective and useful are wide girtees with each bow and end made of fancy flowering ribbon when worn on simple white dresses. The coloring in the ribbon of such girtees is chosen usually to match the colors in the hat trimming.

GOOD ROADS

ATTENTION GIVEN TO ROADS

No Matter What Construction May Be Highways Must Be Given Some Consideration.

Let no man be deluded into the thought that such things as "permanent roads" are possible. All roads, no matter what kind, require attention and the more they receive the better they are. A chief cause for poor roads is the fact that a great proportion of the road work done the country over is of so temporary and make-shift an order. Of course, the only real satisfactory road in all weather is a hard road—either paved

Hard Road Well Cared for.

or stone, with gravel next in favor, says Indiana Farmer's Guide. But even such roads fall into disrepair, if given no attention. What is said to be the worst stretch of highway in Illinois was once a magnificent macadam road. Now it is almost impassable owing to the deep hollows and ruts which it contains. Everyone gives it a wide berth and it is "black listed" in all automobile guides. Concrete and brick paving also must have oversight and repair.

Autoists have a saying that there is no better road than a dirt road—when it is dry. This is because, in the case of a well-drained earth road, passing vehicles smooth out the ruts left after a rain and iron it into a sufficiently level surface to permit of easy traveling. Here, again, it is a case of "working the roads," though the work given is of an automatic kind and rendered without thought of the service performed. However, it sometimes takes a long time to smooth out the roughness after a rain—especially if the soil is a heavy clay. And usually the same makeshift attention is given the earth road that is the too-frequent lot of macadam and gravel.

In some townships the dirt roads are dragged at rather infrequent intervals and if a rain comes right after the dragging the effect of the latter is largely nullified. The best dirt roads, year in and year out, are those which are dragged whenever possible at all seasons of the year. This should be done as soon after every rain as possible but not when the mud is in such condition that it will stick to the drag. It is best to drag one side of the road at a time and forbid travel upon it until it is thoroughly dry. As a general rule the softer the material of which a road is composed the more frequent attention it should receive. But let no one forget that good roads of whatever kind are possible only at the price of constant oversight.

RESULTS FROM GOOD ROADS

After Improvement Price of Tillable Lands Show Big Increase—Children Benefited.

After improving the main market roads in four counties in Virginia, and one each in New York, Alabama, Florida and Mississippi during a period of five years, a survey was made of the work and its results. It was found that the price of tillable land served by the roads increased from one to three times the total cost of the improvements. The total saving every year in hauling costs due to this improvement in the roads amounts to \$267,400 for a traffic of about 3,000,000 ton miles. The net saving on the hauling, after deducting the cost of interest and principal for the improvements, averages 11.6 cents per ton mile. After the roads were better, the average attendance of children in the public schools was 76 per cent; before the roads were improved it was 66 per cent. Ten more children out of every 100 were enabled to get schooling as a result of better roads.

Don't Neglect a Bad Back!

It's Mighty Poor Policy to Worry Along Time Handicapped When Health and Strength is So Needed

THE man or woman handicapped with a bad back in these times when physical fitness is so necessary, is indeed crippled. It's mighty poor policy to worry along with an aching back day after day; work is neglected and the simplest duties are a burden. Plowing, planting, harvesting, churning, the daily housework all throw a heavy strain on the kidneys and kidney ills, with attendant backache, are a common result. Don't wait! Neglect may mean gravel, dropsy or Bright's disease. Get a box of Doan's Kidney Pills today. They have helped thousands. They should help you.

Personal Reports of Real Cases

A COLORADO CASE.

Mrs. Pearl M. Miller, 120 W. Abriendo St., Pueblo, Colo., says: "I suffered from kidney trouble since I was 14 years old and I had backache. Being on my feet so many hours during the day made me worse. One day I was suddenly taken with a sharp pain in the small of my back and for two weeks I was in bed, as helpless as if I was paralyzed. My feet and ankles were swollen and my kidneys acted too often. After using Doan's Kidney Pills I was able to get up and as I continued their use I regained my health. I have never had any kidney trouble since and give Doan's the credit for saving my life."

ANOTHER COLORADO CASE

J. W. Conrad, prop. of cigar store, 1221 Pearl St., Boulder, Colo., says: "Doan's Kidney Pills proved of great value to me in relieving difficulties arising from disordered kidneys. Backache was the worst symptom I had, but Doan's Kidney Pills greatly benefited me. At times since then I have used Doan's Kidney Pills when I have had a slight return of the trouble. I have always had prompt and satisfactory benefit." (Statement given September 14, 1907.)

CONTINUED CONFIDENCE.

On February 24, 1911, Mr. Conrad said: "I have publicly recommended Doan's Kidney Pills for more than fifteen years. I am glad to confirm all that I have said before in their praise. Doan's Kidney Pills are of unquestionable merit."

DOAN'S KIDNEY PILLS

Somewhere.
Mrs. Flatbush—So your husband is "somewhere in France?"
Mrs. Bensonhurst—So I believe.
Mrs. Flatbush—But don't you know where?
Mrs. Bensonhurst—No.
Mrs. Flatbush—Don't you feel somewhat concerned?
Mrs. Bensonhurst—Why, no. When he was here I knew he was somewhere in America, but half of the time I didn't know where.

Correct Place.
"We are going just into the teeth of the gale." "Yes, and it's right at the mouth of the river."

Doubtful.
"How's your war garden, old man?" "There's a cutworm drive on at present."

Deceptivity.
"You can't judge a man's usefulness by the size of his purse."
"No. And you can't judge a woman's industry by the size of her knitting bag."

Cuticura Stops Itching.
The Soap to cleanse and Ointment to soothe and heal most forms of itching, burning skin and scalp affections. Ideal for toilet use. For free samples address: "Cuticura, Dept. J.R., Boston." Sold by druggists and by mail. Soap 25, Ointment 25 and 50.—Adv.

Between 1901 and 1916 Canada had 1,634 strikes, involving 908,201 employees.

Don't tell your troubles to others; they are looking for an opportunity to tell theirs to you.—George Elliot.

Hot Weather Hits Us Hardest in Stomach

Keep a close watch on your stomach this summer. We need all our fighting strength. War work—change of diet—will make us all easier prey to stomach and bowel trouble than ever before. It is so easy to become overheated on a blazing hot day, especially after eating a hearty meal. And then the excessive heat makes us flood our stomachs with all kinds of cold drinks. That's bad at any time; much worse—ever dangerous—when there is the slightest feeling of stomach trouble.

Keep the stomach sweet and cool and free from too much acid—that's about all that is necessary. It's not so much the diet as to keep the poison from starting trouble. You can easily do this if you will just take a tablet or two of EATONIO after your meals.

EATONIO is the wonderful new compound that absorbs the harmful gases and juices and almost instantly drives away stomach misery.

Instead of sudden and painful attacks of indigestion, after you begin using EATONIO you'll forget you have a stomach. And there will be no more heartburn, food repeating, sour stomach, gas pains, or that lumpy, bloated feeling you have so often experienced after eating. Then your appetite—you know how hard it is to satisfy in hot weather—eat one or two EATONIO Tablets a half hour before meals—and you will enjoy the results and feel better in every way.

These are a few reasons why you should start using EATONIO today and fortify your stomach against the chance trouble this summer. It costs only 50c for a big package. Your druggist whom you know and can trust, will promptly refund your money if you are not more than satisfied.

Well Named.
Old Lady—Can you tell me what is inside the sandbag, young man?
Special Constable—Sand, ma'am—hence the name.—London Punch.

Red Cross Bag Miss makes the trousers heavy; makes clothes whiter than snow. All good green.—Adv.

When Your Eyes Need Care Try Marine Eye Remedy. A special preparation of purest water and salt. For relief of all eye troubles. Sold by druggists and by mail. Price 25c per box. 100c per dozen. Sent by mail on receipt of 25c.

Money Orders Good in France

They Are Drawn on the "U. S. Army Postal Service" and Only Domestic Fees Are Charged

How to send money to a soldier in France in case of need, has puzzled many parents and relatives of members of the American expeditionary forces. There are several ways, but a certain and easy one is to use United States postal money orders. They can be cashed readily and easily by any payee. Here is the way to do it, according to an official statement by Postmaster W. B. Cahill of Chicago:

"Money orders issued in the United States payable to members of the American expeditionary forces are made out on domestic forms precisely the same as if they were drawn on offices in this country and domestic fees only are charged therefor. Such orders are all drawn on 'U. S. Army Postal Service' without indicating the name of any post office abroad.

"The orders are, of course, delivered to the remitters to be mailed by them to the payee precisely the same as any other mail would be addressed. It is necessary, however, in any such case that the remitter furnish the full military description of the payee, that is, the company, regiment and branch of the service to which he is attached.

"There are many branches of the U. S. Army postal service and a money order drawn thereon is payable at any of them. It should be explained, however, that the postal service in France has been militarized, which means that the distribution of the mail has been taken over by the military authorities. The post office department distributes and pouches the mail in the United States, but the war department carries it on its transports and distributes it to the soldiers abroad. The entire administration of the money order service still remains, however, under the post office department.

"The secretary of war has explained that owing to the fact that the military units were moving constantly from place to place, the changes being concealed from everybody except the particular commanding officer, it was necessary to let the mail follow the distribution of supplies. No doubt the soldiers at the front to whom a money order is delivered will turn the order over to the company mail orderly to have it collected and the amount thereof given to him. This office was informed some time ago that the payments were made in France in the money of that country."

Archer, National League's Star Catcher, Comes Back With His Old-Time Speed

Jimmy Archer, once the National League's star catcher when he played with the Chicago Cubs, is doing a remarkable comeback stunt in Pittsburgh.

Archer was released by the Cubs last year because a bunch of crippled fingers prevented him from throwing to bases with his former speed and

Jimmy Archer.

accuracy. The veteran was passed up by the other National League clubs and retired.

Manager Beadek of the Pirates signed Archer to coach the pitchers this season. Archer soon proved that he could catch and throw as well as in former campaigns, with the result that Beadek is playing him regularly, while the other Pirate catchers—Schmidt, Wagner and Fischer—are sitting on the bench. If Archer doesn't break down there isn't a doubt that he will help the Pittsburgh pitchers and also will steady the whole team.

Gardeners Have Difficulty In Getting Weather That Is Just Suited To Their Crops.

No sort of weather is good for gardeners or gardeners, laments a writer in the London Mail.

In fine weather everything, except weeds, stops growing. The ground is too hard for the hoe; the grass is too wiry for the mower. The one idyllic and painless job of the amateur gardener is snubbed by the instructions of his gardening books. "Never start watering," they tell him, "until crops show urgent signs of needing it." When he has examined his crops and decided between honest distress and mere malingering, he reads again. "Don't water too much, it is fatal. Don't water too little, it is worse than not watering at all. When once you have started watering you must go on watering." It is this sort of garden technique, fermenting like yeast in the fevered brains of amateur gardeners, that accounts for cases of mental breakdown among converts to this terrible hobby.

Wet weather is as disastrous as fine weather for gardeners and gardeners. Everything grows too fast and the weeds grow faster still. The ground becomes too heavy to be hoed; the grass becomes too long for the mower; the gardener becomes too rheumatic to work. Mixed weather is still more disastrous. Everything in the garden that does fine weather fails because it is not having enough drought, and everything that does wet weather fails because it is not having enough moisture. And the weeds, if possible, do a trifle better than in other weathers.

Tornadoes and Cyclones

Storms as Defined by the U. S. Weather Bureau

Weather men define a tornado as a violent windstorm, with rain or hail, thunder and lightning, in which the air masses whirl with great velocity around a central core, while the whole storm travels across the country in a narrow path at high speed. The thunder and the whirling motion have given rise to two theories of the derivation of the word, as to whether it is derived from the Spanish "tornado," a thunderstorm, or from the Latin "tornare," to turn.

A cyclone, in the definition of the weather bureau, is not necessarily a windstorm of great velocity, but rather a widespread storm that moves with no great speed. Its width may cover several states. This cyclone, or area of low pressure—indicated as "low" on the weather map—gives conditions essential to tornadoes. Many cyclones never develop a tornado, but a tornado never develops without the cyclone, and almost invariably the tornadoes occur in the southeast quarter of the low area. About 120 cyclones pass across the United States each year, moving in a general way from west to east. They are of great benefit because they induce movement of surface air from the south and southeast, and the rainfall that makes the great interior valleys a rich agricultural region is dependent upon these southerly, moisture-bearing winds.

Practically all of the cyclones of the warm season give rise at some time or place to thunderstorms or hail or violent winds. These winds may be violent enough to cause destruction, but unless they have the whirling column of air they are not tornadoes. In the East it is not always easy to distinguish the funnel-shaped cloud, but the lay of the debris after a storm will tell whether there has been a twisting motion.

Tornadoes almost invariably move in an easterly direction and generally from southwest to northeast. The average length of the path of destruction is about 25 miles, and this path may not be continuous, if the funnel cloud is not in contact with the earth during its whole course. Sometimes it rises and goes for a considerable distance before descending again.

Traumatic Shock, Harvard Medical Expert Finds Far Most Deadly in Trenches

Men rarely die of shell shock but they have been dying at the rate of 20,000 a year in the English and French armies alone as a result of a far more deadly form of shock—traumatic shock, says the Atlantic Monthly. In fact, the latter is usually fatal when skilled assistance is not at hand. Dr. William T. Porter of the Harvard medical school has been sent into the front line trenches in France to study this strange enemy in action. Traumatic shock, he found, usually follows a serious fracture of a major bone, like the hip bone or multiple wounds through the substantial fat layer.

By experimenting with injecting olive oil into the veins of a cat Dr. Porter developed symptoms identical with those appearing in cases of traumatic shock, confirming his belief

that fatty globules are released into the veins by certain wounds and these gradually clog up the hairlike capillaries of the brain until circulation ceases. Then began an interesting series of experiments in the front line trenches in which Dr. Porter tried the experiment of giving carbon dioxide to freshly wounded men to prevent shock. The patients were delighted with his tests and crowded around eagerly to watch the operation.

All of these details, together with many keen and humorous reactions of a trained observer in the war zone, are set down in Dr. Porter's recently published little book, "Shock at the Front." In fact, one well known critic insists that the book, far from being a mere medical treatise, is rather "a glimpse of the war done in sharp stroke by a physician who has as pretty a technique with the pen as with the scalpel."

Keeping Books Aids Farmer In Ascertaining What Part of Living Comes From Farm

(By the United States Department of Agriculture.)

How many people know just what it costs them to live? Such information is extremely valuable, especially if the makeup of the cost is known, both as to money cost and the other factors. To the farmer such data should prove valuable, indeed, especially in determining what part of his living comes from the farm.

If the accounts have been completely kept, the household expenses are easily assembled from the cash record, inventory and record of supplies used. Nothing in the realm of figures is more likely to astonish the average farm family than a summary of the household costs. The farm furnishes the family a house to live in, milk, butter, cream, eggs, pork, fowls, fuel, vegetables and fruit, and often a great many other things. Yet the farmer often does not think of all these unless they are set before him. If he breaks even on the year he is likely to think there is no profit in the business when, in fact, he may have been living much better than the average city business man of like education, attainments and capital.

All these things may have to be seen to be believed, but a well-kept set of records, by adequate handling, can be made to show them.

SMILES FOR ALL

Not a Thing.

"The youngsters think they're smart with their new dances."

"Well, Uncle Joseph?"

"I'll admit they do give you a good excuse for hugging a girl, but at that they ain't got nothing on the old-fashioned kissing games."

The Jury Understood.

"I fear I went too strong on that talk about it wasn't money we were suing for, but the principle of the thing."

"Why so?"

"The jury saw it in that light, evidently. Gave us eight cents damages."

Heels Vs. Heads.

"I suppose she's head over heels in love?"

"I think it is a case of heels over head this time. She is engaged to a tango fiend."

Of Course!

Kidd—What caused Gaybird to fly the coop?

Kidder—Chickens.

Not Hindering It.

"Cholly, why don't you let your mustache grow?"

"Why don't I let it? Good heavens, dear boy, I do; but it won't."

Too Considerate.

"That's a fine stenographer you have."

"Yes," replied Mr. Comrox. "But she's too deferential. I never pretended to be any great scholar, and sometimes she flatters me to the extent of trying to imitate my style of spelling."

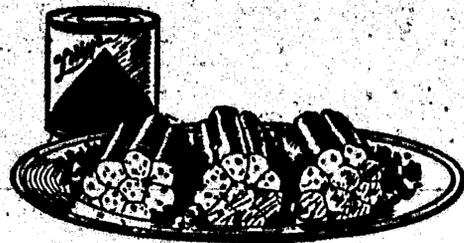

Wornout Feet.

"You ought to be ashamed of yourself. A man like you ought to be in the army instead of a tramp, begging from house to house."

"I tried to get into the army, ma'am, but they wouldn't take me."

"Why not?"

"Fist feet, ma'am. I broke down my arches walking away from work."

Libby's Vienna Sausage A Refreshing Change

THE tenderness of the meat, the delicacy of the seasoning are noticeable the moment you taste Libby's Vienna Sausage. For it is made from morsels of choice meats, seasoned with the greatest care—to bring out all the rich, savory flavor.

Serve Libby's Vienna Sausage today. Not only is it a refreshing change, but a hearty and inexpensive meat.

Eleven million women and girls are at work in our industries.

St. Louis, Mo., has discovered and arrested a firebug gang.

Milwaukee has five-cent street car fares.

How France Has Been Fed

"Before the war, a distinguished French Officer, General Maitrot, wrote a series of articles in the 'Echo de Paris' to warn France, that in case of war, the French meat industry would be unable to supply the French army in the field with fresh meat,—owing especially to the lack of modern refrigerating plants and of refrigerating transportation,—and too, owing to the deficiency in the national herd."

"Since the war began the French army has never been short of fresh meat, thanks mainly to the prosperous condition of the American meat industry, and too, to the American live stock breeders."

The foregoing statement was made by a representative of the Allies now in the United States.

Another representative of the Allies said recently:

"that the American packers have been of the greatest possible assistance to the Allies and have, by their efficient co-operation, contributed in the utmost degree to the successful prosecution of the war."

Pay Your Road Tax

I have been appointed by the Board of County Commissioners to collect the road tax in this precinct. The tax is \$3.00 assessed against every able-bodied man between the ages of 21 and 60 years old. This tax is now due, and prompt payment of the same is requested.

G. T. McQUILLEN, Collector Precinct 14. 7-26 tf.

Just Arrived, A New Shipment of Georgette Crepe and Crepe de Chine Silk Waists from 3.75 to 6.75

Among the newest Georgette Crepe Waists, fashion favors the round collars to a surprising degree. Here are the new round collars, arranged in pin tucking; others of frills. Too, the tailored styles are very popular, and quite a number of these are shown with the new comers.

Also, some very pretty stripes in Silk Wash Waists, on display now, and offering splendid values.
