OLDEST AND LEADING NEWSPAPER IN CIRCULATION IN THE COUNTY OF LINCOLN, NEW MEXICO

VOLUME 20 CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, DECEMBER 12, 1919 NUMBER 50

The Health Situation in Carrizozo

An Interesting Letter from the State Health Department

An article appeared in the News early last month refuting a rumor that an epidemic of small pox existed in Carrizozo. Bad news travels rapidly, and the rumor reached the State Department of Health at Santa Fe, with the result that Dr. C. E. Waller and Dr. Lockett of that department came to Carrizozo to investigate it, and, it found to be true, to assist in stamping it out. The following letter, addressed to Acting Mayor Sager, will show that "no epidemic existed or had existed here," although there were four cases in quarantine at one time.

The News takes pleasure in publishing Dr. Waller's letter, as it corroborates our censure of the rumor, and our readers will find it to be interesting, instructive and educating.

Santa Fe, Dec. 6, 1919
F. J. Sager, Acting Mayor,
Carrizozo, N. M.

Dear Sir: I note in our clipping service an article referring to our recent inspection of the health situation in Carrizozo, which was made for the purpose of assisting the local authorities in arriving at some means of preventing the continued occurrence of small pox and diphtheria. Also that we found nothing whatever in Carrizozo to indicate that an epidemic of small pox or diphtheria existed or had existed. We did, however, find cases of small pox in the city, and learned from your health officer and other citizens that both small pox and diphtheria had occurred in the community more or less frequently for some time.

It is not a good advertisement for any community to have a noticeable prevalence of any preventable disease, and no city should feel satisfied with the presence of even a single case. Organized effort for the improvement of health conditions with a corresponding freedom from disease constitutes one of the most attractive advertisements which can be advanced by any community. By way of illustration I am sending you a copy of a page from the Birmingham News, containing a "boost" of Huntsville, Ala., as a result of its health work. The protection of the health is a highly specialized business, and the inauguration of adequate measures for the suppression of preventable diseases necessitates the providing by the community of a trained sanitarian who devotes his entire time to the carrying out of measures which will prevent illness.

According to information obtained while we were in Carrizozo, a considerable sum is spent annually by the city for subsistence for persons in quarantine, and anti-toxin for the treatment of indigent cases of diphtheria. An adequate full-time health organization would largely prevent this expense, and at the same time save many times its cost in the prevention of death and disease. The value of a human life to the community is estimated at \$2,000 by members of commerce and industry. It is estimated that the average case of typhoid fever costs the individual \$100, and the loss of efficiency from a week's absence from work is \$100. The cost of a case of small pox is \$100. The cost of a case of diphtheria is \$100. The cost of a case of scarlet fever is \$100. The cost of a case of measles is \$100. The cost of a case of whooping cough is \$100. The cost of a case of mumps is \$100. The cost of a case of influenza is \$100. The cost of a case of pneumonia is \$100. The cost of a case of tuberculosis is \$100. The cost of a case of cancer is \$100. The cost of a case of heart disease is \$100. The cost of a case of stroke is \$100. The cost of a case of paralysis is \$100. The cost of a case of blindness is \$100. The cost of a case of deafness is \$100. The cost of a case of insanity is \$100. The cost of a case of senility is \$100. The cost of a case of old age is \$100. The cost of a case of death is \$100.

The Red Cross Home Service

How well the American Red Cross is fulfilling its pledge to meet the needs of every ex-service man until he catches his normal stride, is indicated by a statement just issued by local officials of the every busy organization.

The statement says that more than 10,000 families in the Mountain Division were extended Red Cross Service. All except 18 were soldiers' families.

The local Home Service Section, according to our outgoing secretary, Mrs. H. S. Fairbank extended the service to 65 soldiers and soldiers families during the past few months. Every effort is being made to see that every soldier or sailor and the families of these men receive everything to which they are entitled in the way of insurance, compensation, allotment and allowance, back pay etc.

Up to the present time this work has been handled most successfully by Mrs. Fairbank who gave to it her ablest and best efforts. We regret exceedingly that owing to the fact of her moving from our city she has had to give it up. We feel that Mrs. Fairbank is due a vote of thanks by this community for the very able way in which she carried on this work.

From now on the Home Service Section will be in the hands of Mrs. J. B. French. All soldiers and sailors and their families who have not had these matters of insurance, compensation, etc., properly adjusted are invited to get in touch with the Home Service Section through the new secretary.

Health Department Endorses Seal Sale

Dr. C. E. Waller, State Commissioner of Health, today issued a statement endorsing the Red Cross Seal Sale to be carried on under the auspices of the New Mexico Public Health Association, the proceeds of which are to be used for public health work in this State, and urging liberal support of the campaign.

"The fundamental factor in the protection of the public from preventable diseases," said Dr. Waller, "is the education of the individual in the mode of spread and the method of prevention of these diseases, and as to his personal responsibility to his associates and to his community in keeping well himself and in the protecting of others.

"The most satisfactory means of carrying on such educational work lies in the employment of public health nurses, who may come directly in contact with the home, and in the conducting of actual local demonstrations of the methods of disease prevention and of what may be accomplished through the application of these methods.

"While the State Health Department is using every available means in the promotion of public health education, its resources under present conditions do not permit of such activities as have been outlined above, on a large scale. The carrying on of this work by the New Mexico Public Health Association, with which the State Department of Health is working in the closest cooperation, will lay the foundation for the activities of official local health departments which will be established in the near future. For the carrying on of the seal sale, the State Health Department is endorsing the campaign, and is urging liberal support of the campaign.

CARRIZOZO SCHOOL NOTES

SUPT. R. E. COLE

The Carrizozo schools will close for the Christmas holidays on Friday, December 19. The different grades will have appropriate exercises in the afternoon of that day and parents and friends of the schools are most cordially invited to be present.

The long table used by the class in typewriting is now down in the manual training work-room and is being overhauled. It will be planed, made over and an extra pair of legs added. Then it will be stained or painted, making it an attractive piece of furniture in the commercial department of the high school. This is the fourth piece of useful work done by the manual training department for the school. In this way it very largely pays for its " upkeep."

There was a very interesting program at the high school literary last Friday afternoon. The debate was on the subject: "Resolved, That capital punishment should be abolished." Barbara Hust and Lillian Merchant had the affirmative; Charles Scott and Rolla Place, the negative. Of course this debate settled the question for all time, but the most interesting thing about the discussion was that one speaker talked fourteen minutes, another eleven, another five and another four. This shows that our school pupils can make a pretty good "showing" in public if they will study and prepare themselves. This literary society meets on Friday afternoon, every two weeks, at 2:45, and is open to all who care to come. There is usually a large number of visitors present and every one is very welcome. Come and see what your children are doing.

This week closes the fourth school month of the year. Next week your children will bring home their monthly report cards. The superintendent urges parents to inspect these cards. If not satisfied, visit the school and have a heart-to-heart talk with the teacher. It is impossible for any teacher to be absolutely just in grading a pupil, but we are trying to be fair, and we believe that the average of our grades comes pretty close to the truth. We shall be glad to have a visit from parents at any time.

The Teachers' Reading Circle met last Monday afternoon, at four o'clock, in the high school. The leading book to be studied this year is Class-Room Method and Management, by George Herbert Batts. Some of the truisms laid down by the author are: "A good method doubles the efficiency of the teacher; education is to develop all the powers of the pupils; education can not prepare for the problem and the stress of the day's living; if the material studied bears no relation to such problems; no man is cultured who is satisfied with low-grade performance, no matter what be the line of his occupation; knowledge is power but action is accomplishment.

The reading circle course should benefit the teachers who are teaching. It makes them more efficient with the tools of their profession and, therefore, more efficient. On account of the present scarcity of teachers the profession is recommending higher pay, but a direct result of this is that school boards are going to demand in the immediate future, higher culture and greater efficiency on the part of the teachers.

Republican Attack Met By Republican Answer

THE ATTACK—By Dr. Nicholas Murray, president Columbia University.

"The Administration has permitted the industrial problem to take such a form as directly menaces our political institutions. When in September, 1916, the Adamson law was placed upon the statute book, in response to what the Democratic managers believed to be a political necessity, a false step was taken that has never been wholly retraced and whose ill effects are seen in what is taking place in a dozen States today. The far wiser policies that have just now been followed came too late to repair all the damage that had been done. Extract from speech before Union League Club, New York, November 22, 1919.

ANSWER—By Joseph G. Cannon, formerly Republican Speaker.

"The Adamson bill was passed. I voted for it. The President made an address to Congress in that address to Congress, August 29, 1916, the President made six recommendations for legislation: First, the enlargement and administrative reorganization of the Interstate Commerce Commission; Second, the establishment of the eight-hour day as the legal basis for work and wages of all railway employees engaged in interstate transportation; Third, the authorization of a small body of men to observe the results of the eight-hour day and report to Congress; Fourth, approval of an increase of freight rates to meet such additional expenditures by reason of the eight-hour day; Fifth, an amendment of the existing Federal statute which provides for mediation, conciliation and arbitration of such controversies as the President by adding to it a provision that in case the methods of accommodation now provided for should fail, a full public investigation of the merits of every such dispute shall be instituted and completed before a strike or lock-out may lawfully be attempted; and, Sixth, lodgment in the hands of the Executive of the power, in case of military necessity, to take control of the railroads for military service. "I agree with much that he recommended. I voted for the Adamson bill, not that I love it, but because it met an emergency and we had the implied promise of a permanent system for the adjustment of such controversies. It was a condition that confronted us. The President made certain propositions that he thought ought to be enacted into law, that the whole matter ought to be determined by mediation, and conciliation. I do not object to that. I believe in conciliation, and I believe in mediation, where employer and employee cannot agree. He was entirely practical. Congress has not been practical. Now let us have law, let us have mediation; and when the award is made, let it be the judgment of the Court. That is what Woodrow Wilson recommended. That is what I have always believed in."—From speech printed in Congressional Record November 17, 1919.

Christmas Seal Campaign

The Christmas Seal Campaign is on, and according to M. B. Paden, the seals are going like hot cakes. Instead of buying a few seals as in the past, people are buying liberally this year. Lincoln county must go over the top of its quota, and in order to do so many large purchases must be made, but the smallest amount will be gratefully received. The amount to be raised in the state is \$60,000, 91 per cent of which will be used to fight the "white plague" in New Mexico. Tuberculosis kills 150,000 people in the United States every year. Buy Christmas Seals or donate what you can spare to the Red Cross fund, and you help to kill old "T. B." himself, and save the lives of tens of thousands.

The Missionary Society

The Woman's Missionary Society wishes to thank the friends of the society for their liberal patronage of the Towel Sale last week. We made the neat sum of \$51.35 and feel generously rewarded for our efforts. The next regular meeting will be on Wednesday afternoon, Dec. 17th, at 2:30 o'clock at the home of Mrs. Geo. B. Barber. This will be an important meeting and we hope to have a full attendance in membership. The Social Service Program will be under the leadership of Mrs. R. E. Lemon. "Harvest Day" will be observed when all dues and pledges for 1919 will be paid.

Cattle Sale at Ft. Stanton

The public health service at Ft. Stanton has announced a sale, on Dec. 16, of about 200 head of Hereford range cows and calves. The cattle are full grown and are in good condition.

Commissioner Moulton Resigns

Mr. E. L. Moulton, manager of

the Corona Trading Co., who recently resigned from the Board of County Commissioners, has also resigned as a member of the County Board of Education. It is stated that he will shortly move to Albuquerque, N. M. and will take a position with the Chas. H. Feld Co., retaining his interest in the Corona Trading Co.

In the passing of Mr. Moulton Lincoln County loses one of its most up-to-date, energetic and capable citizens. With a sophomore's education obtained at the University of Chicago to start with, and the record of a very distinguished family, three brothers of which are University professors, behind him, he entered the business life of New Mexico, and his success at anything he undertook proved his ability beyond question.

Under his management the Corona Trading Co., grew to be one of the best paying institutions in the State of New Mexico, and the business handled there was out of all proportion to the size of the place. Always active in local affairs and ready to support what was best for the community, under his coaching the schools of Corona reached the point where they were second to none in the county, and are often spoken of by experts as being the best schools in Lincoln County. His record on the Board of County Commissioners and on the County Board of Education leaves nothing to be regretted. A republican in politics, he gave his support to the thing that he considered would be to the best interest of his community or County.

While Lincoln County regrets to lose such a man, yet the best wishes of all who knew him will go with him to his new field of endeavor.

Christmas Seal Campaign

The Christmas Seal Campaign is on, and according to M. B. Paden, the seals are going like hot cakes. Instead of buying a few seals as in the past, people are buying liberally this year. Lincoln county must go over the top of its quota, and in order to do so many large purchases must be made, but the smallest amount will be gratefully received. The amount to be raised in the state is \$60,000, 91 per cent of which will be used to fight the "white plague" in New Mexico. Tuberculosis kills 150,000 people in the United States every year. War Loss Is \$331,612,542,560

DEAD FROM ALL CAUSES—12,990,571

Washington.—The first comprehensive report on the "Direct and Indirect Costs of the War" has just been made by the Carnegie Endowment for International Peace and published in a volume under that title.

The direct costs for countries actually involved in the war are put at \$186,000,000,000 and the indirect cost at \$151,612,542,560. The latter total includes losses to neutrals, which are put at \$1,750,000,000. It also includes loss of production, put at \$45,000,000,000, and war relief estimated at \$1,000,000,000.

The capitalized value of soldier human life, also given among the indirect costs, is placed at \$33,531,276,280. The property losses are divided as follows: On land, \$29,960,000,000; to shipping and cargo, \$6,800,000,000.

The report, which was gathered by Ernest L. Bogard, professor of economics in the University of Illinois, in estimating the "capitalized value of human life," fixes the worth of the individual at figures ranging from \$2,020 in Bulgaria, Turkey, Greece, Japan, Roumania, Serbia and several other countries, up to \$4,720 for the United States, where the economic worth of the individual to the Nation is placed at the highest.

An additional \$23,551,000,000 is allowed for civilian losses. Although many of the latter were of children and old persons, the estimate given for the civilian loss is believed to be conservative.

The number of known dead is placed at 9,998,771, and the missing presumed to be dead at 2,991,800. To the losses from death and wounds there is added "those resulting from disease, pestilence, privation, hardship, physical exhaustion and similar causes."

Acreage Necessary

The Pecos country had to get 75,000 acres together before a reputable oil company would contract to sink a well. In addition to that, many times that number of acres were signed up in the Pecos Valley.

We ask for only 40,000 acres. It is hardly fair for the majority to lease and a few hold their land in order to profit by a development, by leasing later on.

A company will not drill in a wildcat territory, this far from producing wells, unless it is given leases that will protect its holdings.

We are asking only a five year lease at 25 cents an acre rental, the land owner to retain one-eighth royalty. That the royalty is where the real money lies, all oil men know, and there can be no royalty without sinking a well. As soon as a well is started and the assurance given that a thorough test will be made, small fractions of the royalty interests retained by the land owners will be worth money. Failure to get oil costs the land owner nothing.

It will require eighteen months or two years to drill a hole 4000 feet. It will take quite a while on preliminaries, as has been shown in every district drilling for oil today. Now is the time to interest capital. Should the wells now drilling in nearby sections prove to be "dry" it would then be too late, but now when everybody is looking for oil, capital will take a risk in wildcat territory. It gives sufficient assurance.

AMERICAN ARMY SENDS BACK GERMAN PRISONERS

The American army abroad has repatriated the 27,000 German prisoners in the prison camp at Issy-sur-Tille, France, without waiting for the official ratification of the terms of the peace treaty. A big batch of the prisoners is here seen leaving the stockade.

PLAN TO REBUILD LOUVAIN LIBRARY

American Educators Launch Movement to Raise Necessary Funds.

DESTROYED EARLY IN WAR

Geographic Society, Criticizes Acts of German Invaders in Wantonly Wrecking Belgian Art—Great Seat of Learning.

Washington, D. C.—American educators are launching a movement to raise funds to rebuild the famous library of the University of Louvain, destroyed by the German invaders early in the war. The city of Louvain, the "Oxford of the low countries," is described in the following bulletin from the Washington headquarters of the National Geographic Society: "Not only the University of Louvain, but the city is an object lesson in Belgium and France by the German army. Early in 1915 a group of university professors of other countries drew up a petition expressing strong indignation and abhorrence at the wholesale destruction of ancient buildings that has marked the invasion of Belgium and France by the German army and protesting in the strongest terms against the continuance of so barbarous and reckless a policy.

Manuscripts, its archives, its gallery of great portraits of illustrious rectors, chancellors, professors dating from the time of its foundation, which preserved for masters and students alike a noble tradition, and were an incentive to their studies, all this accumulation of intellectual, of historic and of artistic riches, the fruits of the labors of five centuries—all is in dust. "The city of Louvain ever will be remembered as the scene of the granting to the Belgian people by Duke Wenceslaus of the 'Joyous entry,' and the university will be associated with that character's preservation, more than four centuries later, when Kaiser Joseph, the 'crowned anarchist' of Austria, tried to deprive Belgians of their ancient rights. "The circumstances of that resistance form one more bond of union between Belgium and the United States of America, for it took place just ten years after the Declaration of Independence was signed, an act which left a deep impress upon the Belgians. Joseph's Move Against Holland. "It will be recalled that Emperor Joseph, brother of Marie Antoinette, had tried to abolish Holland's frontier forts. He won a temporary victory because Holland at that time was smothered with Great Britain over the former's recognition of the United States of America. "Next he turned to Belgium with a

Blacksnakes to Trail Rats as Traps Fail

New Lexington—Blacksnakes will be carried and turned loose in the Union station here in an effort to exterminate rats that have almost taken possession of the place. Employees have used traps, ferrets, cats and poison without avail. Hundreds of dollars' worth of damage has been done to merchandise and parcels post packages left in the building nights and merchandise are complaining. The rats are large and blacksnakes are now considered their only foe.

project for reforming the church, but the Belgians were determined that such reformation should not be imposed from without. When the Belgians resisted he declared his constitution annulled, sent an armed force into the country, and was met with a declaration that he no longer was duke of Brabant, and that the Belgians henceforth would be an independent people, to be known as the United States of Belgium. "Though the Belgian United States was short lived, largely because the great powers of Europe declined to set a precedent by recognizing it, and encouraged Joseph's successor in reconquering it, the seed of independence thus planted by the historic university bloomed again a half century later, and revealed itself gloriously in 1914."

ROAD BUILDING

MOTOR TRUCKS ON HIGHWAYS

Series of Impacts Being Conducted at Arlington to Determine Impact on Roads.

(Prepared by the United States Department of Agriculture.) To determine the destructive effect of heavily loaded auto-trucks on highways and streets, and to meet the demand for data on the design of road surfaces and foundations to withstand such heavy traffic, a series of experiments is being conducted by the bureau of public roads at the Arlington experimental farm to determine the impact of auto trucks on roads. The most striking single development in the highway field in 1918 was the tremendous increase in motor-truck traffic. Five years ago heavy motor trucks were few in number and limited practically entirely to the paved streets of larger cities. These vehicles now comprise probably 4 to 5 per cent of the grand total of all motor vehicles and are to be found wherever traffic conditions permit profitable use. But very few roads were designed to carry any large volume of this class of traffic. Consequently, the cost of adequate maintenance was increased greatly during the year. In many places the damage due to the incessant pounding of these fast and heavy vehicles was so great as to require complete reconstruction.

ADVICE ON BUILDING ROADS

Much Investigational and Experimental Work Done by the Department of Agriculture.

Much investigational and experimental work on road building has been in progress for a number of years and road engineers are able as a result of this work to give valuable advice as to the most economical method of building and maintaining roads for the varying conditions existing in different localities. Much of this investigational work has been done by the highways division of the United States department of agriculture and some by the various state highways commissions. No road building operations ought to be undertaken without the aid and expert advice which these agencies are willing and able to give. Taxpayers should insist upon this.

COMPACT SURFACE OF ROADS

Excess Water Successfully Removed By Use of Piece of Pipe, Operated by Two Men.

A simple method for compacting the surface of concrete roads and removing excess water has been evolved by an engineer, B. F. Batchelder, of Ravenna, Ohio. After striking off the surface with a template, according to Mr. Batchelder's plan, a piece of ordinary gaspipe, operated by two men, is used as a roller. After the excess water has come to the surface, another trip up and back with the roller removes all the

A Piece of Ordinary Gaspipe is Successfully Used as a Roller to Remove Excess Water From the Road Surface.

water and leaves the surface in good condition for further finishing if necessary. A wave of mortar is carried ahead of the roller the "first time over," which fills in porous places or depressions. The second rolling removes nothing but water that is virtually clear. This method is especially useful when using crushed stone or slag—Popular Science Monthly.

FIND WEAK PARTS OF ROADS

It Should Be Especial Business of Every Road Commissioner to Make Observations.

It should be the special business of every road commissioner to find the weak and susceptible parts of a road, and if there is any likelihood at all of the creation of a "bottomless pit," the saying of "a stitch in time" will apply very truthfully to the question in hand.

Interest in Road Building. The increasing interest in road construction in Ohio is an indirect result of the world-wide demand for sugar in the war period.

Water Truck Is Best. For all the general business on the farm a water truck is the best vehicle of the kind in the neighborhood, and

Maps Barren Coast

American Explores Northern Rim of the Continent.

Harold Noice, Accompanied Only by Eskimos, Making Way Eastward on Foot.

Seattle, Wash.—An American explorer, Harold Noice, formerly a member of Stefansson's party, is working his way eastward on foot along the route of the northern rim of the continent, according to word received here. He expects to reach the Hudson Bay country and civilization some time next summer.

Storker Storkerson, formerly second in command of the Stefansson party, who arrived here recently from the far North, said that Noice, accompanied only by Eskimos, is proceeding slowly and mapping portions of the coast line as he goes. A stretch of the coast line of Victoria Land, heretofore unmapped, is being charted by him.

Noice may visit the interior of Victoria Land, which, according to all reports, has never been explored by white men. All explorers, traders and trappers who have touched Vic-

torial Land have journeyed along its shores only. Stefansson found the tribe of "Unguk Eskimos" in the Victoria Land country.

Noice has no ship and but few supplies. He depends almost entirely upon his gun for his living. Stefansson, his former chief, who is noted among explorers as being able to live off the barren white lands of the North, probably taught Noice how to get about without carrying many supplies.

Noice's parents live in Seattle. The explorer is young in years, having graduated from a high school here about eight years ago. He went North in 1912 with Capt. Louis Lane on the schooner Polar Bear. When Stefansson bought the Polar Bear from Lane Noice shipped as a member of the crew. Later, when Stefansson decided to return to the outside world, Noice left the party and remained in the North. His parents expect him to return to Seattle next year.

Twelve Half Pints in Her Hoop. Homestead, Pa.—The police arrested their first "stocking legger" in the person of Clara Hobson and found the prisoner had 12 half pints of whisky hidden in her hoop.

REMOVE WAR'S SCARS

France Has Already Rebuilt 60,000 Houses.

Much of Railroad and Canal Systems Have Been Put Into Shape Again.

Capt. Andre Tardieu, member of the French Peace Commission, has given interesting figures on the reconstruction work accomplished since the armistice. Sixty thousand of the 800,000 houses wrecked by shell-fire have been rebuilt; 2,000 kilometers of the 3,000 kilometers of railway destroyed have been repaired and 500 of the 1,000 kilometers of canal destroyed have been repaired. Of the 1,100 kilometers of roads destroyed, 850 have been re-

areas which the end of the war left with their rich surface soil plowed under by artillery, sown with dangerous unexploded shells and cut up by trenches and thousands of miles of rusting barbed wire. The devastated area embraced 4,500,000 acres. Of this approximately 1,000,000 acres have been returned to the farmers and 500,000 acres are ready for seed. More than 8,000 miles of barbed wire have been dismantled and carried away in the operation. Commissioner Tardieu added that a country which had lost nearly 2,000,000 workers, killed or incapacitated by war, which had been deprived by invasion of one-fifth of its productive capital and which nevertheless of its own efforts had accomplished such a showing had a right to rely upon the

PAPER MONEY PUZZLES SLAYS

Currency in South S. S. Entangled Condition That It Hurts Business of Country.

Belgrade.—Not the least of the ills that beset Yugoslavia is the entangled condition of its paper currency. The paper money of half a dozen countries is in circulation in various parts of the kingdom of the Serbs, Croats and Slovenes. In Belgrade itself the "kroon" of Austrian currency is still the unit by which all commodities are priced. The situation is further complicated by the fact that the rates of exchange between the different monies varies from day to day. Indirectly, the chaotic situation has aggravated the problem of provisioning the country by increasing the movement of surplus foodstuffs from one section to another. Farmers who possess a surplus of food-

Criticism and Citizenship

It is the plain, public duty of every citizen to criticize proposed government measures believed to be harmful.

Swift & Company is in a better position perhaps, than others, to understand the meat packing business in all its relations to public and private interests, even though the others may have been giving the subject a great deal of sincere attention.

Swift & Company is convinced that interference with its legitimate business function by governmental agencies, however well intentioned, would be an injury to every man, woman and child who wants meat to eat, as well as to the men who raise the meat and to those who dress and distribute it.

Maximum service that cannot monopolize because of keen competition and lack of control over sources of supply is furnished at a minimum of profit—a fraction of a cent per pound from all sources.

Therefore Swift & Company is taking every legitimate step of citizenship to prevent such interference.

These advertisements are intended to help you, and to help Congress decide what is best to be done. Mistakes are costly and apt to be harmful in these trying times.

Let us send you a Swift "Dollar." Address Swift & Company, Union Stock Yards, Chicago, Ill.

Swift & Company, U.S.A.

INDIGESTION Caused by Acid-Stomach

Millions of people—in fact about 3 out of 10—suffer more or less from indigestion, acute or chronic. Nearly every case is caused by Acid-Stomach. There are other stomach disorders which also are sure signs of Acid-Stomach—heartburn, flat after eating, food retching, sour, gassy stomach. There are many ailments which, while they do not cause much distress in the stomach itself, are nevertheless, traceable to an acid-stomach. Among these are nervousness, biliousness, irritability of the liver, the stomach, impaired blood, weakness, insomnia, melancholia and a long train of physical and mental ailments. Victims in miserable health year after year. The right thing to do is to get rid of the acid-stomach at their earliest opportunity. A wonderful modern remedy called EATONIC has done this for thousands of people. One of hundreds of EATONIC writes: "I have been troubled with indigestion for about nine years and have spent money to no purpose, but without relief. After using EATONIC for a few days the gas and pain in my bowels disappeared. EATONIC is just the remedy I needed."

Advertisement for EATONIC medicine, featuring a large illustration of the product box and text describing its benefits for indigestion and acid stomach. The text includes a testimonial and a list of symptoms it treats.

FOGGY?

If Bilious, Constipated or Headachy take "Cascarets."

Tomorrow the sun will shine for you. Everything will seem clear, rosy and bright. Your system is filled with liver and bowel poisons which keep your skin sallow, your stomach upset, your head foggy and aching. Your meals are turning into poison, gases and acids. You cannot feel right. Don't stay bilious or constipated. Feel splendid always by taking Cascarets occasionally. They act without gripping or inconvenience. They never sicken you like Calomel, Salts, Oil or nasty, harsh pills. They cost so little too—Cascarets work while you sleep.—A.D.V.

Early Shopping. "You are beginning to say 'Shop Early,' rather ahead of the season." "Not at all. If you want to get to market before the best things are sold you want to start not later than 7 a. m."

Home-Made Christmas Presents

Pretty Gifts That You Can Make for Your Friends at Slight Expense

By JULIA BOTTOMLEY

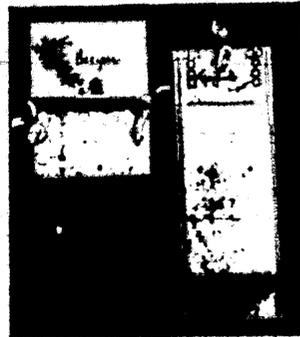

Home-Made Toys

The perennial rag doll that appears this year is made of any ribbed goods—as a ribbed stocking—dyed pink. It is cut out by a pattern, sewed and stuffed with cotton. The face and hair are the result of red, black and white water color. The doll is then dressed up in blue cotton crepe and a blue stocking cap.

A ball made from scraps of velvet is a fine gift for a very little boy. It takes twelve pieces, measuring three inches across at their widest part to make it. They are sewed together, leaving an opening for stuffing with cotton, and the brighter the colors used the better.

Gifts Made of Paper

Among inexpensive gifts that are at the same time elegant and worth while there are many little convenient articles made of prettily colored, heavy paper. Telephone and laundry lists, small portfolios, envelopes in which to place memoranda, etc., are among them. Two articles made of bright blue mottled paper are shown in the picture. The envelope for recipes is made by folding a straight strip of the paper into a pocket and flap. The sides of the pocket are fastened down with little bows of blue ribbon and the flap is ornamented with a painted spray of flowers in pink. The lettering is done in black.

A long strip of the same paper folded over at each end carries one or more sheets of white paper on which a telephone list is to be written. Small white squares outlined with black ornament it and suggest that this is a man's list. It is tied with a bow of blue ribbon at the top.

Little Wall Pockets

Here are two pretty wall pockets to hang beads or on the dressing table, ready to hold whatever their owners choose to put in them. Discs of cardboard covered with gayly printed ribbon make the frivolous and dainty pocket at the left, and it is suspended by plain satin ribbon that ends in small bows at the sides. At the right two heart-shaped pieces of cardboard are covered smoothly with red satin and fastened together. The edges are finished with narrow pieces of ribbon, and the same ribbon serves to suspend the pocket. This cheerful and matter-of-fact gift is especially intended as a gift for a man. Two hearts with but a single apex are quite meaningful. But you might use a compass, an openwork, printed disc or a photograph, and make a different pocket.

A Novelty in Fans

Small palm-leaf fans, all decked out with pretty furbelows are among the novelties that have been brought out for Christmas gifts. These fans are first painted any desired color and then varnished. Then the edge is bound with ribbon having a picot edge or with gold or silver braid or other fancy braid. A spray of millinery flowers is tied against the handle, on one side of the fan, and the handle wound with ribbon that is tied in a bow below the flowers. Or flowers may be painted on the fan or made with sealing wax, as in the fan pictured here. This sample is bound with silver braid and has a long tassel of silver tinsel besides a ribbon bow on the handle. It is pretty in turquoise blue, rose color, red, etc., with ribbon and flowers in colors that harmonize, and is easy to make at home.

A Fad for Flowers

There is a fad for artificial flowers to be used instead of natural flowers for household decoration just now and every home-loving woman will be sure to enjoy a gift of this kind. Small garden roses, nasturtiums and chrysanthemums are great favorites and these particular flowers are cleverly made. They appear in baskets and vases as shown above and make a charming Christmas gift.

Pretty Gift Cushions

Cushions were never so numerous or so beautiful within the memory of the oldest gift seeker as they are now. They are made for chairs, window seats, lounges, couches and the floor, of all sorts of cheerful materials. Here is a handsome specimen in which brocade and plain satin ribbon are used and embellished with satin-covered cord and a cluster of roses and leaves made of satin ribbon.

Christmas Slippers

At the top is a gay, little pair of ribbon slippers for the young girl. In the center there are old-fashioned, bedroom slippers for any member of the family, and just below a pair of much heavier for boys, lined with velvet.

Why That Lame Back?

Morning lameness, sharp twinges when bending and an all day backache; such is cause enough to suspect kidney complaint. If you feel tired all the time and are annoyed by dizziness, headaches and irregular kidney action, you are in need of additional proof and should act quickly to prevent more serious kidney trouble. Use Doan's Kidney Pills, the remedy that is recommended everywhere by grateful users. Ask your neighbor!

A New Mexico Case

J. F. Summers, 517 W. Lead Ave., Albuquerque, N. M., says: "I was lame and sharp pains pierced me. I was in a difficult situation. I read of Doan's Kidney Pills and a letter led me to use them. I noticed some relief when I had finished the first box, so I continued taking the pills until cured of the lameness and pains in my back. Doan's Kidney Pills deserve much praise."

Get Doan's at Any Store, or a Box DOAN'S KIDNEY PILLS. POSTER-MELBURN CO., BUFFALO, N. Y.

Saved Sealing. Patience—I like the movie because it's dark. Patrice—Naughty, naughty.

"No, not that, but when it's dark and a dozen men near you stand up and start putting on their coats before the end of the picture, you can't say anything because you're not sure which struck you in the eye."

Colds Break

Get instant relief with "Pape's Cold Compound"

Don't stay stuffed up! Quit blowing and sniffing! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a cold and ends all gripe misery.

The very first dose opens your clogged-up nostrils and the air passages of your head; stops nose running; relieves the headache, dizziness, feverishness, sneezing, soreness, stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance. Tastes nice. Contains no quinine. Insist on Pape's!—Adv.

Charished Attention.

"Salesmen used to be particularly attentive to me because I spent a great deal of money," remarked Mrs. Elling.

"Aren't they now?" "No; they regard my extensive purchasing as an effort to monopolize more of their time than I am entitled to."

"CALIFORNIA FIG SYRUP" IS CHILD'S LAXATIVE

Look at tongue! Remove poisons from stomach, liver and bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California!"—Adv.

No Smoker.

"You see that tin house? A man built that with the money he saved on cigars."

"He must have been a terrific smoker before he quit."

"He didn't quit—he's a cigar manufacturer."

If a man is unable to keep his word he can find plenty more in the dictionary.

A woman never thinks that a man thinks she talks too much.

NEWS and GOSSIP of WASHINGTON

Immigrants Must Learn English Within Five Years

WASHINGTON.—Deportation of immigrants after five years' residence in the United States unless they learn to speak and read English is to be considered by the senate labor committee, Chairman Kenyon announced. Senators on the investigating committee declare Americanization of foreign-born persons must be undertaken at once if grave industrial trouble is to be averted.

"To neglect this duty means very troublesome times and very serious industrial troubles, as well as rapid growth of socialism," Senator Walsh declared. He proposed to the labor committee that a bill be drafted providing for deportation of foreigners who have not learned English at the end of five years. Compulsory education and a shorter working day must accompany this, Walsh declared.

Senator Kenyon's concern upon discovering that more than 8,500,000 residents of this country are unable to read or write the American language ought to be shared by every thorough American. The senator thinks a moderate proficiency in our language, written and spoken, ought to be required of each newcomer. This is a modest regulation. Surely we cannot be called exacting if we ask our new-found citizens to acquire the fundamentals of daily communication. Real progress in American citizenship ought at least to imply the capacity for understanding the general principles of social intercourse. It is doubtful if we can make real progress otherwise.

When they speak their native languages they are coloring their native thoughts—resistance to oppression and the demand for freedom. Our task is to encourage them to think American thoughts and coin them in American currency. As soon as the newcomer can think "home" and coin it in American speech he begins to have some conception of all that citizenship here connotes.

National Forest Policy for Roosevelt Memorial

IF THE people of the United States want to establish a memorial for all time in honor of Theodore Roosevelt, let them link his name with a nationwide movement to establish a national forest policy. This is the message to the tri-state forestry conference delivered at Indianapolis by Charles Lathrop Pack, president of the American Forestry association of Washington. Mr. Pack urged everyone to join the American Forestry association in its campaign for a national forest policy.

The conference was practically of national scope, for foresters, timberland owners, lumbermen and representatives of wood-using industries from many states were present, in addition to those of Indiana, Ohio and Illinois. Theodore Roosevelt than a movement which will look to preserving the forests of this country," said Mr. Pack. "Knowing the man, as it was my privilege to know him, I am positive that could the selection of a memorial be left to his choosing he would say 'save the forests.' As president he called the first conference of governors which took up the great questions of conserving our natural resources. He was our greatest exponent of the value of these resources and of the value to the nation of outdoor life. Call your findings the Roosevelt Memorial National Forestry Policy if you like the suggestion and you will have honored the man who did so much in pointing to the value of our forests. In any event you will have done the greatest of services to posterity—you will have saved our greatest natural resource for that posterity."

Fire which damaged the headquarters of the American Forestry association in Washington will not seriously delay the activities of the association. The offices have been moved to another part of the Maryland building. The honor roll of memorial tree planting was saved, but some records of the association were lost.

Navy Lacks Men; Only One Battleship Fully Manned

DEFENDING the United States today in active sea service there is exactly one warship, the 20,000-ton battleship North Dakota, built in 1910. Capt. Thomas J. Senn commanding. With headquarters at Guantanamo, Cuba, Captain Senn commands the entire force that is ready to engage an enemy in either the Atlantic or Pacific. The North Dakota not only is able to navigate the sea at its full 21-knot speed, but could fire every one of its ten 12-inch guns and 14 5-inch guns.

All the other battleships and cruisers and most of the destroyers and other vessels of both the Atlantic and Pacific fleets are tied up in ports and navy yards, unfit for active service for want of enough men to man them.

At the Philadelphia navy yard are the battleships Connecticut, Louisiana, New Hampshire, Kansas, Minnesota, Michigan and Nevada; at the Boston navy yard, the battleships Utah and Florida of the Atlantic fleet, and Virginia and New Jersey of the Pacific fleet; at the Norfolk, Va., yard the battleships South Carolina and Oklahoma; at Brooklyn the battleships Pennsylvania and Arizona, and at New York the Delaware.

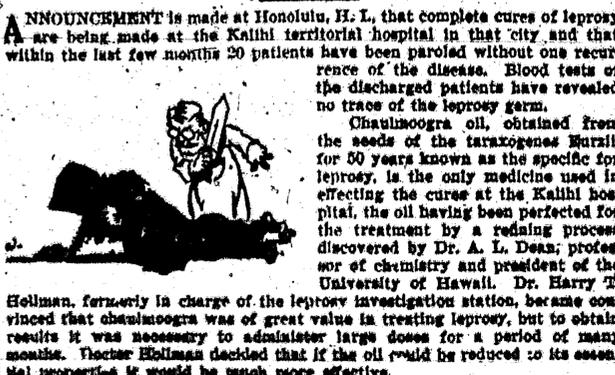

The Pacific fleet, under Admiral Rodman, was able to negotiate Secretary of the Navy Daniels' excursion to Hawaii and get back to home ports, where the ships are riding at anchor awaiting full complements of men. At the Mare Island navy yard are the battleships Rhode Island, Georgia, Nebraska and Vermont; at San Pedro, the Idaho and Mississippi; at San Francisco, the New Mexico, and at Bremerton navy yard the Wyoming, Arkansas, New York, and Texas.

Admiral Wilson disclosed the condition of the fleets when he informed the house committee on naval affairs that the North Dakota is the only warship able to put to sea with a full complement of 1,100 men.

Lepers Made Clean by Vegetable Oil in Hawaii

ANNOUNCEMENT is made at Honolulu, H. I., that complete cures of leprosy are being made at the Kalahehi territorial hospital in that city and that within the last few months 20 patients have been paroled without one recurrence of the disease. Blood tests of the discharged patients have revealed no trace of the leprosy germ.

Chaulmoogra oil, obtained from the seeds of the taraxogenes Murzil, for 50 years known as the specific for leprosy, is the only medicine used in effecting the cures at the Kalahehi hospital, the oil having been perfected for the treatment by a refining process discovered by Dr. A. L. Doan, professor of chemistry and president of the University of Hawaii. Dr. Harry T. Hellman, formerly in charge of the leprosy investigation station, became convinced that chaulmoogra was of great value in treating leprosy, but to obtain results it was necessary to administer large doses for a period of many months. Further Hellman decided that if the oil could be reduced to its essential properties it would be much more effective.

Will the "Flu" Return?

What has become of those medical scientists who predicted a return of the Spanish "flu" which decimated the population of this country in 1918, and who named October, 1919, as the month for its reappearance. Reading the opinions of those scientists as to what we should do to escape the influenza has a tendency to produce a mental condition of perplexity. With the bacteriologists, microbiologists, prohibitionists, and the rest of the so-called scientific outfit propounding their never-ending prognostications, it is hard to know how to dodge our multiplying enemies.

We have cut out the foods we like best, and have been forced by the law to cut out the best drinks; we have been cautioned to avoid physical contact with even our closest friends, as they might unknowingly be "carriers" of some of the numerous pestiferous microbes. We have been told not to visit the "movies," to fight shy of crowded places, and not even to attend church or meeting, or the "flu" microbes will grab us. Well, if those M. S.'s are right, and if we have reached the point where we cannot eat nor drink what we please, and must, in addition, carry a roll of medicated cotton, in place of a handkerchief, to blow our proboscis in, we might as well cease worrying, take a chance, and let the pestiferous microbes do their worst.

But the thought occurs to me: What happened to those who never heard of microbes or used a sanitary drinking cup, and who loved to quench their thirst from the old moss-covered bucket in which hundreds had previously submerged their snouts?

Holiday Trade Good

Carrizozo merchants report a heavy volume of holiday trade. Despite the difficulty of retailers to secure merchandise replacements, due to factories being behind, with their orders, local stocks are unusually large, due to purchases having been made early in the year in anticipation of the holiday rush. Early shopping appears to be the rule, instead of the exception, this season. There are only 12 more shopping days until Christmas, which should be heeded by those who have not yet done their holiday buying.

Married in El Paso

Allen E. O. Johnson and Miss Georgia B. Lesnet were married yesterday afternoon in El Paso. They left in the evening for Phoenix, Arizona, from which point they will motor back to El Paso in about ten days and will make their home in the Pass city, where the groom will enter business.

The groom has lived in Lincoln county since 1905, coming here from England, save two trips made to Old Albion since coming to America. He and his brother conducted a garage here for several years, selling out when called home last year a few months prior to the close of the war.

The bride, a daughter of Mrs. Annie E. Lesnet, of Roswell, has lived all her life in Lincoln county, with the exception of short periods spent at Roswell. She is a mother and brother in law, and has a brother, Frank Lesnet, who lives in Roswell, and two sisters, Mrs. Mary and Mrs. George Lesnet.

Will Dingwall Marries

William M. Dingwall and Miss Mabel Haney were married in El Paso last Saturday afternoon. The bride is a very charming lady whose home was at Stanton, Texas. She was employed in the E. P. & S. W. offices at Douglas, Arizona, as stenographer, but recently moved to El Paso. The groom is well known here, having been employed in the local railroad offices here. He is a brother of Geo. J. Bennett and Ernest Dingwall, of Carrizozo. Following his discharge from the army Mr. Dingwall re-entered the company service at Douglas, and was transferred to El Paso, the first of November. The newly-weds have many well wishers here.

Better than Gold—A Check on our Bank is better than Gold. Smile if you will, but it is true just the same. Why? Well, if you had a \$20 gold piece and lost it, or a hold-up man got it, or a thief picked your pocket, the chances are that it would be gone for good. Now, suppose you had that \$20 in the form of a check on our bank. Then if any of these things happened to you you could have the bank stop payment on the check, have another one issued and could still get the money. Which would you prefer?

OSCURO NEWS ITEMS

The oil industry that has made more people rich than any other...

Mr. Goodman, a well driller from California, was in town Wednesday.

C. F. Grey, is at home again after spending ten days or more in Kansas City.

J. A. MacDonald, of the MacDonald Mercantile Company, of Kelly, N. M., accompanied by some New York oil men, were in town Thursday.

Mr. O'Donnell and Mr. Mahony, were here Saturday looking over the oil prospects.

Mr. Galliger, a Government Surveyer, passed through town Friday, with a force of men, to work in north of Orange, N. M.

C. M. Johnson, of El Paso, is spending a few days with us looking up oil possibilities.

The Oscuro Woman's Club, met Saturday with Mrs. Grey.

Joe J. Boyd, of the K. C. Brokerage Co. of El Paso, was in town Wednesday.

W. T. Sterling, left for Tulsa, Wednesday.

PARSONS NEWS NOTES

Mr. and Mrs. C. B. Williams of Huntington, Ind. are visiting their cousins, the Rice family.

Thanksgiving was celebrated here by a turkey dinner in the school house in which many of the neighbors participated and all reported a good time and no one complained of leaving the table hungry.

Miss Coleman was assisted by Mrs. Hubert Reddy who furnished all the music on the program.

There were a few outside visitors here for Thanksgiving this year. Mr. and Mrs. Ike Wingfield and family were guests of Mr. and Mrs. B. R. Robison.

Mr. and Mrs. Weber and family came up to spend Thanksgiving with grandma's folks, the Rice family, while Mr. Wright kept the ladies of the mill settlement from enjoying a manless Thanksgiving dinner.

Snow storms and cold weather have been the order of the day for the past two weeks, but it looks now as if we might have a good spell of weather, and we surely have to be thankful that we don't have to worry over the coal situation.

A good

Arabela Correspondence

Mr. Jose Gonzalez was in from San Patricio Friday delivering apples. He contracted for another load to be delivered next week.

Fred McTeigue, Melvin Richardson and Pilar Villecas arrived in the village Friday. They returned from Lorenzo, Texas, where they have been employed in the cotton fields the past two months.

Mrs. Ines Lucero and her nephew Ed Richardson made the trip to the saw mill one day last week. Mrs. Lucero expects to have her commodious new residence completed and move in before the holidays.

Mr. Simon Sanchez and son Hilario are hauling wood to Roswell this week.

Mr. Negiris, our mail carrier, says that if the roads continue in as bad condition as they have been he will be compelled to eat and sleep by the wayside to and from Tinnie. He has been arriving at both ends of his route at noon instead of 10:30 o'clock.

Mr. J. H. Underwood, a rancher several miles out, was taken suddenly Wednesday and died before medical aid could be brought. He was buried in the local cemetery the following day.

Mr. A. Pacheco has been visiting relatives here the past week.

EX-SERVICE MEN'S COLUMN

ANSWERS TO QUESTIONS

1.—Please tell me where to write in order to get my service bonus from the State of Minnesota. My home residence is Virginia, and I enlisted in Duluth, Would it make any difference whether I reside in Minnesota or Nebraska at present. Please state whether Missouri is giving a bonus.—R. B. Ravenna, Neb.

2.—Am suffering from the effect of being gassed while in service. Please tell me where and how to obtain medical care provided by the Government.—W. A. G., Mitchell, Neb.

2.—Would like to know if I am entitled to the bonus put out by the state of Minnesota. My home is in Minneapolis, but I have not been home for three years, including two years in the army. Am a native son of Minnesota. Enlisted and served in the Wyoming Infantry which was transferred to Army Artillery on arrival in France.—P. W. K., Basin, Wyo

3.—Would like to know if the state of Nevada is giving a bonus to her soldiers.

Old Lincoln County

O. Lincoln County, they are great. We will stop the price of gold. The hills are full of it and gold. You're hard of hearing, but you're not deaf. And you're not blind, but you're not seeing. You have spotted in another well. O Lincoln County, then art so great. You are larger than one eastern state. More hills of iron ore are found lying loose upon the ground. To eat her apples is a treat. Her other fruits have never been beat. And of her oil we now will sing—A golden stream of wealth to bring. Our soldiers home, with but one leg up to Fort Stanton in drives their people. It will cure a man that's nearly dead. Of atomium, too, we have our share. In Congress' halls you'll find them there. We furnished the first governor of this state, O. Lincoln County, then art great. We did our share to link the East, Gringo and Greater shouldered a gun. Some beneath the poppies in Flinders lie. Others in France that were not afraid to die. Of Liberty Bonds we bought our share, Our Red Cross nurses, too, were there, So let us sing and shout and praise, O. Lincoln County, then art great.

Photos-Photos

How about your picture for Christmas—that long-delayed picture you promised your friends and dear ones? Well we are here to make it for you, up stairs in the Lutz building. Do not delay. We are here temporarily, and we make pictures of expression and character that please. THE EL PASO PHOTO CO.

EXCHANGE BANK CARRIZOZO, N. M. WE will never go back to old standards. During the war all of us learned to do bigger things than we had ever done before...

NOTICE! FORD DEALERS THROUGHOUT THE STATE ARE HAVING A HARD TIME TO GET CARS. In sufficient numbers to fill their orders. WE are fortunate at the present time in having Two Carloads of Tourings, Runabouts, and Trucks on the road, which should arrive this week.

WE BELIEVE In Savings. So do you. ONE DOLLAR Will start an Account.

A SAVINGS BANK Will make a splendid Christmas Present for the Kiddies. ONE DOLLAR Starts an Account.

Attention K. P's

Next Monday night at the regular meeting of Carrizozo Lodge No. 40, K. of P. officers for the ensuing term will be chosen. Following the session, refreshments will be served. All members will please take notice.

A GIRL'S LAUGH

Myosotis—Stacey Wallen, first mate of the bark Upolo, in the Java sea, is the sole survivor of the crew, all victims of yellow fever. Ting Wah, Chinese sailor, and five other Chinamen were sent aboard by "Drink-House Sam," notorious character of Singapore, to kill him. This recalls to Wallen an incident of his childhood which seems connected with the confession. White delicious Wallen enters in the ship's log for the fact of his death and abandons the vessel in a small boat. Wallen's boat drifts to the island of Arra and a Scottish trader there, MacKnight, cares for him. Learning that a ship is in port on the other side of the island, twenty miles away, Wallen, though unfit for the task, starts to reach it.

CHAPTER II—Continued.

He walked on steadily, without sense of fatigue, his mind abnormally active. And then, with a little shock of surprise, as the Malay made signs to halt and set about kindling a fire, he noticed for the first time that it had grown almost dark.

And also, to his surprise, he noticed that where he had experienced no fatigue before, he was, as he sat down, suddenly grateful for the rest.

He scowled a little over his dipper of tea that the Malay had prepared—and rubbed his legs, muscles vigorously. They twitched nervously as he put his weight upon his legs. That was bad! His lips set grimly. Well, had or not, they'd have to take him across the island before daybreak!

They started on again. An hour went by, and he was obliged to rest—and after another start and many more after that, to rest again and again with alarming frequency. And, worse still, his progress when he was walking kept growing less and less.

It was black in the tropical forest. He could see nothing, and he stumbled constantly in the vines and creepers that everywhere overgrew the path. He was at last forced to admit that he was not making much more than a mile an hour, and twenty miles at a mile an hour was—the ground.

It was breaking day when Wallen finally gave up—gave up when will power, and the grit of the man that did not know defeat, no longer sufficed for the physical strength to go farther.

The Malay, regarding him anxiously, offered by signs to carry him on his back. Wallen, from where he had flung himself down upon the ground, half rose to accept the offer, then shook his head. It was no use attempting that; it was too far.

He was bitterly convinced that he had accomplished little more than half the distance.

But there must be some way out. He wasn't beaten yet. He had to catch that steamer.

Suddenly he looked up.

Yes, of course. He had been a fool that he had not thought of it hours ago when he had first begun to realize that he was playing out. Instead of it now when it might be too late, when the steamer might be already gone! He couldn't speak the Malay tongue, but MacKnight would have told the man why they were crossing the island. He could send the Malay on ahead, and follow himself as fast as he could.

If he could write a message he might even get them to send him help from Pohl.

He felt in his pockets. Nothing! Well, the Malay was an intelligent fellow; he would get word to the ship and a written message after all wouldn't make any difference—it all depended on the ship's skipper.

The skipper would wait, or he wouldn't, after hearing the Malay's story just as readily as he would for a written message. He began to make signs, pointing to the other, then to the direction of Pohl, then to himself, and then to the ground, indicating that he would stay behind.

"And hurry—quick—Pohl," Wallen ended anxiously.

The Malay nodded.

"Pohl—quick," he repeated—and started off at a run along the path.

Wallen watched the man disappear, and after a little while started on again himself—and then gave it up completely. He was down and out, and he was furiously angry with himself for the state he was in.

There wasn't anything to be done but wait. He would make a letter, because the Malay got back—but what good was that?

One thing was certain, any message written would be long before it was received, if the vessel were not already on hand.

A tropical forest is not for a fever-stricken man.

self—he wasn't fit to work his passage. He began to regret that he had not accepted MacKnight's offer of money. After all he could have paid it back to the trader by mail sooner or later.

But that was a vain regret! He hadn't taken the money—the thought that he would not be able to work his passage if necessary had never entered his head. And now, even suppose he reached the ship, would they take, not only a penniless passenger but a sick one as well?

He had no means of judging the time there in the forest, save that it grew hotter as the morning advanced, nor had he any idea how long it had been since the Malay had left him, when at last at the sound of voices he raised up suddenly, supporting himself with his back against the trunk of a tree.

Came then the podpad of horses' hoofs, and the Malay, running, burst into sight around the bend of the path a few yards away, while a girl's laugh rang out—and was instantly checked as she and a man riding beside her also came into view.

"Oh!" she cried. "There's someone here! That must have been what the native meant. And—and I think he's hurt. Quick, Mr. Mott!"

She had slipped from her saddle and was running toward him—a little figure in white, brown-haired, brown-eyed, whose face was now very anxiously peered up inquiringly at MacKnight. Wallen wondered a little vaguely who these people could be, where the Malay had found them—and somehow he didn't like the man's face.

"Hello!" exclaimed the man. "What's wrong? Hurt?"

"No," said Wallen, a little weakly. "done up, I guess, that's all. Nothing serious. I— Could you tell me if that steamer that came into Pohl yesterday is still there? I overdid it a bit trying to get in from MacKnight's across the island in time to catch her."

"MacKnight's!" echoed the girl quickly. "Why, that's where we're going. Isn't it, Mr. Mott?"

"Yes," her companion answered, looking curiously at Wallen.

Then to Wallen: "We met this native fellow on the road, but couldn't make out what he wanted. He was

looking toward the town, but turned and came back with us, and kept running on ahead. You wasn't worry about the steamer—wasn't from her ourselves. I'm second officer—but, I say, you're too steady to stand up there and talk!"

Wallen was swaying unsteadily as he leaned against the tree.

"I'm all right," he said. "Just giddy for a moment. I'm—I'm rather anxious to make the ship."

"Well, there's no hurry now," Mott returned. "She won't sail without us. Look here! You've come from MacKnight's, you say. We heard at Pohl that there was a survivor from the bark Upolo there, and we were taking the risk over—Miss MacKay and I—to investigate. Is there any truth in the story?"

Wallen paused. What interest could they have in the Upolo?

"What's that?" he asked, with a faint smile. "You're saying that I'm the survivor?"

"What?" exclaimed Mott. "The name you are?"

"Wallen," he said. "My name is Wallen."

"What's that?" Mott asked. "You're saying that I'm the survivor?"

"What?" exclaimed Mott. "The name you are?"

"Wallen," he said. "My name is Wallen."

"What's that?" Mott asked. "You're saying that I'm the survivor?"

"What?" exclaimed Mott. "The name you are?"

"Wallen," he said. "My name is Wallen."

"What's that?" Mott asked. "You're saying that I'm the survivor?"

"What?" exclaimed Mott. "The name you are?"

"Wallen," he said. "My name is Wallen."

"What's that?" Mott asked. "You're saying that I'm the survivor?"

"What?" exclaimed Mott. "The name you are?"

Wallen's laugh died away, and he looked from one to the other anxiously.

"I—I don't understand, of course," he said. "But the point is, do you think your skipper will give me passage? I—I didn't say anything from the Upolo, and I was figuring on offering to work my way, but I'm afraid I'm hardly up to that for a spell."

"Could you ride a horse, d'ye think," inquired Mott with apparent irrelevancy. "If this Malay here and I hold you on?"

"Yes," said Wallen eagerly. "Yes; but the skipper—"

"Oh, I guess that'll be all right!" said Mott cheerily. "As near as I can figure it you're the one on earth—the skipper wants to see."

CHAPTER III.

Accident—Murder?

MacKnight's caustic estimate of the steamer's size had not been very far from the mark. The Upolo was certainly very small, and certainly a frowzy, unkempt and weatherbeaten little craft; and her general appearance bespoke her as one of those homeless, vagrant waifs of the ocean that knew no schedule—that took the crumbs of the world's commerce where she could find them—and was grateful for the crumbs.

Wallen had been afraid that morning that he was in for a relapse, but he had no fever now—there was none of that disquieting giddiness in his head, and—how he smiled happily to himself—a few days at sea would put him back again in his old form.

He sat up in his bunk as the ship's bell sounded from forward. Two bells—five o'clock in the afternoon. He got up, went over to the wash basin and plunged in his head.

How had Helen MacKay—she had told him her name on the way down to Pohl—come to be not only on a tramp like the Upolo but to be here at all? He hadn't seen any other women on board; but then—she was spluttering deliciously in the water—he hadn't seen much of anything.

Helen MacKay had wide-tracked even that thick-faced, queer-eyed skipper and insisted that he should go immediately to bed.

Wallen's thoughts began to run riot as he completed his toilet. The ship, and everyone connected with it whom he had seen—except Helen MacKay—had somehow got him wrong. He hadn't liked that fellow Mott's face from the instant he had set eyes on it in the forest. And his momentary interview with the skipper, despite the same offensive attentions, had produced the same intuitive distrust.

They were still at anchor off the three traders' storehouses and verandahed bangalows that were dignified by the name of Pohl. What, after all, did it mean?

What was the Monteign doing at Pohl?—there was no sign of any cargo being handled. And, above all, how had they heard of him and the Upolo—and what was their interest in him that would account for the second officer being sent to cross the island to MacKnight's to question a supposed survivor of the bark about him?

"Drink-House Sam of Singapore!"—the words unbidden came flashing through his brain.

Wallen whistled in a low, perturbed way under his breath. Could there be any connection? It seemed absurdly impossible! And yet what had happened was obviously not mere coincidence.

"It's a bit queer when you come to think of it," he muttered slowly. "I guess I'll hear what the skipper's got to say."

He opened the door of his cabin and stepped out into what was evidently the vessel's main saloon, down whose length ran a long mess table with five revolving chairs on either side.

There was no one in sight. Wallen crossed the saloon to the starboard and paused to get his bearings. Directly in front of him a short door-paneled way led upward. He investigated this and found himself in a small box-like smoking or lounging room. Here doors on either side gave onto a boat-deck that was fairly spacious for the size of the ship.

He stepped out onto the deck, and again paused to survey his surroundings. Forward from the smoking room was a small house, very evidently of temporary construction—his eyes rested on it speculatively for an instant, then he glanced quickly about the deck.

He hadn't noticed that in coming aboard.

Fall Suits On Tailored Lines

The 1919 autumn suit is strictly tailored. Its lines have none of the softness of recent seasons and often the edges of the coat are bound in braid, which makes it even more severe, notes a prominent fashion writer.

It seems certain that the strictly tailored effect with the three-quarter length coat and a skirt with circular fullness will remain with us during the season.

Resemblance of the time of Louis XV and Louis XVI with the "rippled-in" shoulder and semifitted waistline are many of these jackets with coat skirts that are full and flaring and equipped with big pockets at the sides, and though the skirts have more fullness than the models of the past season they are still straight of line.

The lines of the coat as well as the one-piece dresses have the effect of the redolent. The fullness, a little below the hips, is set in by cartridge plaits, as well as by cleverly placed stitched tucks, which give the slim silhouette.

Distinctive Models. A smart coat and skirt costume is fashioned on the lines of those which no doubt will be seen on the modish woman this fall and winter.

This suit is made of soft, green tweed. The sloping of the front is effected by one single button at the waistline. The collar is high and fastens with two buttons. There is a single wide revers faced with velvet. The full flaring coat skirts slant away from the front. The skirt is also made with a seam which begins at the left side of the waistline and plants toward the right. A hat of green velvet in same tint as the coat revers completes the costume.

Another suit is made of black velvet, the coat semifitted and fastened straight down the front from

colors. Often a blouse, say of navy blue or brown georgette crepe, will have a relieving note of beige or some light harmonizing tone and frequently they are made over a lining of the lighter tone material.

One blouse, admirably adapted as an accompaniment of a smart fall suit, was of navy blue georgette over beige. The beige formed a round yoke and short undersleeves. Tiny colored buttons trimmed the beige yoke and undersleeves, and the edges of both the overblouse and underblouse were piped in dark blue.

Another equally charming blouse was made of brown georgette over beige tulle. This blouse was also fashioned with a yoke and undersleeves of the lining material. The bodice was trimmed with green buttons and tiny frills of the beige crepe.

As be sure, there are more elaborate models, many of which are of chiffon or georgette crepe and are elaborately embroidered in beads or silk, dull gold or silver thread. But blouses of this class deserve a story all their own. Models in the dressy blouse class as well as those intended for more practical wear, are made with a peplum or in the form of a basque—the latter doing away with the necessity of a belt.

New and Vivid Colorings. The smart woman of limited income will pay little heed to the new and rather vivid colorings. She will quite wisely choose one of the lovely browns or blues or greens which are offered, leaving the new Liberty reds for her more fortunate sisters with a larger wardrobe.

For the materials, she will choose dainty—that is, if she can afford it—but, if she finds this too expensive, then she will favor fine velours of a soft texture, a tulle or a heavy English serge.

The phrase "unbelted, yet belted,"

Charming Models Built of Green and Brown Duvelyn, Which Promise to Be Copious Fall and Winter Favorites.

chis to a little below the waistline with a row of small, round, material buttons and loops. The sleeves are also button trimmed. At the hips three ruffles have been inset, which gave the modish flare. This unusually smart costume is topped by a small black draped toque.

Still another is an exceedingly attractive frock of velvety finished brown-duvelyn. It has the new high collar buttoned close up around the neck and chin and the new flaring sleeves button trimmed to the elbow. The bodice is made basque effect. The skirt is rather wide and has large pocket draperies at the sides. The costume is accompanied by a chic dark brown velvet hat trimmed at the edge with an antique gold cord.

After the momentous question of the fall suit has been settled the average woman immediately turns her attention to the blouse to accompany it. In former years the white lingerie waist was considered good form and quite elaborate enough for ordinary wear and most occasions. But conditions have changed. Such charming blouses have been developed these latter years that the simple shirtwaist—fancier of them all—now seems to be relegated to the row of discarded garments.

Perhaps the latest problem has had something to do with this. While many business women prefer the tailored shirtwaist it is now said to be of a soft plant and is the simplest laundry article.

may be used in describing a suit with a coat which is straight and long to the knees. It has a flat back and front, while circular rippling fullness is held under narrow belts at the waistline at either side. A narrow rolled collar runs almost to the waistline where the two front sections of the coat meet and fasten with link buttons of black bone. There are pockets outlined with bands of the material, but no trimming is used. The skirt, which is ever so slightly circular, falls in ripples to a becoming length.

Especially created for the woman who favors loose lines in spite of the new semifitted effects is a lovely design that would be charming in duvelyn or velvet, materials to which it is very well adapted. Most distinctive are the lines of the coat. Though back and front are flat, there are loose flowing sides that tuck in under at the bottom. The narrow belts of the material confine the waist in front, while a straight band of the material forms the collar, crushing softly around the neck. Long fitted sleeves are finished with unlined cuffs, loops of the material. The skirt is very simple with easy fullness.

Box Style for Coats. New jackets on fall suits are in box coat style with a single row of buttons and buttonholes down the front. Bands of the material are attached at even distance apart around the edge of the jacket and sleeves and sometimes these bands reach as high as the bust line on the jacket—these bands are the sleeves. Many of the coats have narrow bands of material on the coat.

THIS WEEK, NERVOUS MOTHER

Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health.

Philadelphia, Pa.—"I was very weak, always tired, my back ached, and I felt sickly most of the time. I went to a doctor and he said I had nervous indigestion, which added to my weak condition. I was worrying most of the time—and he said if I could not stop that, I could not get well. I heard somewhere of Lydia E. Pinkham's Vegetable Compound and I took it for a week and felt a little better. I kept it up for three months, and I feel fine and can eat anything now without distress or nervousness."—Mrs. J. WORTHINGTON, 2242 North Taylor St., Philadelphia, Pa.

The majority of mothers nowadays overdo, there are so many demands upon their time and strength; the result is invariably a weakened, run-down, nervous condition with headaches, back-ache, irritability and depression—and even more serious ailments develop. It is at such periods in life that Lydia E. Pinkham's Vegetable Compound will restore a normal healthy condition, as it did to Mrs. Worthington.

Outgassed Him. Pauline Lord went to call on William Harris, Jr., agent an engagement just before he set sail for Europe. "What's your salary?" demanded Harris, after the other details had been discussed, Miss Lord told him. "Quich!" decried the manager, wincing at the sum. "Why, don't you think I'm worth that?" Miss Lord asked. "Yes," admitted Harris, "but I didn't think you did."

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease. If the kidneys are not in a healthy condition, they may cause the other organs to become diseased. You may suffer pain in the back, headache and loss of ambition. Poor health makes you nervous, irritable and may be dependent; it makes you sad.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions. Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Birmingham, N. Y., you may receive sample size bottle of Swamp-Root. Test a man's pulse, medicine and large size bottles at all drug stores.—Adv.

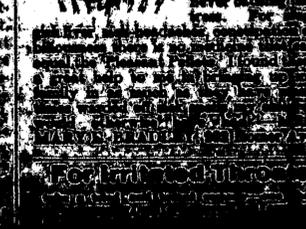

Record Hurricane Damage. The worst hurricane of which any record exists was that of October 10, 1780, which started in the Barbadoes. An English fleet anchored off St. Lucia simply disappeared. Nearly every building on the island was blown down and 6,000 people buried.

Some people are always complaining about their poverty who are rich without knowing it.

MY HEAD!

When the head feels thick or sore, when one feels all out-of-sorts, perhaps a cooled tongue—it is the signal that poisons are accumulating in the system, and should be cleaned out at once. Sleeplessness, after meals, biliousness, dizziness, acidity of the stomach, heartburn, offensive breath and allied ailments result from auto-intoxication or self-poisoning. Take either oil, or procure at the drug store, a pleasant, vegetable laxative, called Dr. Pierce's Pleasant Pellets, composed of Malt-apple, sassa and jalap.

Kansas City, Mo.—"Dr. Pierce's Pleasant Pellets have been my favorite family medicine for many years. I raised quite a large family and from the time my children were small I always gave them the 'Pleasant Pellets.' They were easy to take and pleasant in every way. I never saw any other medicine that did so much for me."—Mrs. J. W. BROWN.

FLAT ROOFS FOR HOT LANDS

American Indian Desert Dwellers Knew Secret of Home Building We Now to Have Forgotten.

We dwell with Colonel Roosevelt upon the historic and cultural value of the ancient Indian towns of Arizona which, had they been in Europe, would doubtless have been preserved unchanged as living records of successful cosmopolitan forms of government, whose social and ceremonial life offered a study of the greatest possible importance to our knowledge of mankind as a whole. And we asked: What right have we in "free America" to stretch forth an autocratic hand arbitrarily to change the village life of this ancient and peaceful folk? We spoke of the characteristic architecture of the pueblos, by many centuries the oldest inhabited towns in America, whose flat-roofed, terraced houses are not only in utter harmony with natural surroundings, but constitute, from a practical standpoint, the most successful type of building for desert cities. High above the sands, the flat roof forms a porch for the open-air Indian, whereon at certain seasons he works, rests, receives his guests, eats, and sleeps.

In North Africa, in Spain, in Asia Minor, where climatic conditions are similar to those in the Hopi Land, the same flat roof may be found. But we think we know better! In a land of burning sun, the slanting, hot, tin roofs of the government dwellings clinging in an inherited architecture of rain-soaked central Europe, cut their incongruous outlines against a rainless sky, impotent in their longing to shed water! And the sun streamed into their big European windows, inviting myriads of flies, and forming a contrast, indeed to the shadowed cool of the thick-walled Indian houses, whose open fireplaces insured at all seasons wholesome ventilation, in spite of high, narrow windows.

And yet the white man's impractical transplanted house, brought from far other climes, is urged upon the Indians as "civilized." With no eye to either beauty or fitness, our arbitrary standards (rarely? in the Indians' case, put to the test of experimentation first) are forced upon a people who through centuries of experience have learned how to conquer conditions foreign to us. Improvements there might certainly be in the Indian's manner of life, but why not along those lines which nature has taught? Most appropriate?—Natalie Curtis, in the Outlook.

GIRLS DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty

Oh, girls, such an abundance of thick, heavy, invigorated hair; a perfect mass of wavy, silky hair, gloriously fluffy, bright and so easy to manage! Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy, golden gleams and tender tints. The youthful glints, tints and color are again in your hair. "Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on bottle.—Adv.

Talking of Weather.
Patricia—When Percy proposed to Peggy he told her she'd see no more clouds, no more storms, in her life; he intended that all should be sunshine for her.
Alice—That's so much like Percy. He never could talk about anything but the weather.

Shave With Cuticura Soap
And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No wax, no ally soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Adv.

Horn Headlight.
An automobile horn and headlight have been combined by an inventor, the sound being produced back of the reflector and issuing around it.

State of Ohio, City of Toledo, Lucas County—ss.
Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for any case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.

FRANK J. CHENEY.
Sworn to before me and subscribed in my presence this 4th day of December, A. D. 1934.
H. A. W. Gleason, Notary Public.
HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System.
F. J. Cheney & Co., Toledo, Ohio.

Diuted.
Author—"I assure you, sir, there is a punch in my play." Manager—"Yes, there is; milk punch."

Removing Warts From the Face.
One of the difficult disfiguring things to get rid of is the eruption of many small warts on the face. The British Medical Journal tells how Dr. Charles Ind has succeeded in eradicating them. He paints the warts three times in one day with a saturated solution of salicylic acid in alcohol and the following morning he cuts them off with a flat sharp steel instrument, beveled on one side only. This is painless, but it leaves a tiny bleeding point at the site of the wart. This he immediately paints again with the salicylic acid solution, which is applied twice again the same day. On the second morning the sites of the warts have small brown scabs, which are bathed once a day with pure alcohol till they drop off, leaving a healthy skin.

New Electric Lamp.
An electrical lamp has been developed in Europe which virtually consists of a metallic arc inside of a sealed bulb containing attenuated helium and neon gases. The wire anode terminates so closely to the edge of the hemispherical iron cathode that the current discharges across the gap spontaneously. The rays have an orange hue and are only slightly actinic, making the lamp useful in photographic dark rooms. It is also recommended for use in mines, and other places where inflammable gases may be present, because breaking of the bulb instantly extinguishes the light.

Its Advantages.
"The automobile has one big advantage over a horse."
"What is that?"
"It can be tired without wanting to stop."

KIDNEYS WEAKENING? BETTER LOOK OUT!

Kidney and bladder troubles don't disappear of themselves. They grow upon you, slowly but steadily, undermining your health with deadly certainty until you fall a victim to insidious disease.
Stop your troubles while there is time. Don't wait until back pains become big aches. Don't trifle with disease. To avoid future suffering begin treatment with GOLD MEDAL HARRISON OIL CAPSULES now. Take three or four every day until you feel that you are entirely free from pain.
This well-known preparation has been one of the national remedies of Holland for centuries. In 1904 the govern-

ment of the Netherlands granted a special charter authorizing its sale. The good housewife of Holland would almost as soon be without food as without her "Real Dutch Drops," as she quaintly calls GOLD MEDAL HARRISON OIL CAPSULES. Their use restores strength and is responsible in a great measure for the sturdy, robust health of the Hollanders.
Do not delay. Go to your druggist and insist on his supplying you with a box of GOLD MEDAL HARRISON OIL CAPSULES. Take them as directed, and you are not satisfied with results your druggist will gladly refund your money. Look for the name GOLD MEDAL HARRISON on the box and accept no other. In sealed boxes, three sizes.

Syrup Purity

Absolute purity—with all its own virtues—is one good reason why you know you will like FARMER JONES Brand Syrup when you try it. Its superior goodness is proved by the Farmer Jones label and you can depend upon it.

SPOHN MEDICAL CO., Mfrs., Cochen, Ind.

Seeing the Bright Side.
Eberhart—He's an optimist, you know.
Egbert—Really?
"Oh, yes; one of the greatest ever."

Why the other night on his way home he was held up in the dark street and had a dark lantern flashed on him.
"Gee! I'll bet he was no optimist just then!"
"Oh, yes, he was. He was looking on the bright side of the lantern even then."

ASPIRIN FOR COLDS
Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin"
in a "Bayer package," containing proper directions for Colds, Pain, Headache, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy tin boxes of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacturing of Monocaceticacid of Kollidionfeld.—Adv.

His Lack of Consideration.
"My boss ain't got no respect at all for his help," grumbled Farmer Phil's hired man. "Why, consarn him, he'd just as quick call me a fool as he would his own son-in-law!"—Kansas City Star.

The Reason.
"That girl swimmer has such a ringing voice."
"Probably she is a diving bell."

Rather Mixed.
"Jones has a nice job on his hands."
"What is it?"
"To put his son on his feet."

112 Millions used last year to KILL COLDS

HILL'S ARAQUININE BROMIDE

Standard cold remedy for 20 years—44 tablet form—safe, sure, no opiates—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if it fails. The genuine box has a Red Star picture. At All Drug Stores

GROW SHORTHORN BEEF

The Fatchee Cattle Co., of California, recently secured Shorthorn cattle from a northern state weighing 1,000 lbs. off grass. These fine, fat, and strong animals were sold for \$100.00 each. They are a fine quality, which is a sharp contrast to the ordinary Shorthorn. The breed is good natured, the horns are red, white and black. For information write to the American Shorthorn Breeders' Association, 15 Dexter Park Ave., Chicago, Ill.

HINDERCORNS

Removes Corns, Bunions, etc. Stops all pain, restores circulation, breaks up corns, restores circulation, breaks up corns, restores circulation. Write for full particulars and price list. Hindercorns, 111 E. Colfax Ave., Denver, Colo.

RELIEVED MIND OF HOSTESS

California Newspaper Man Proved Himself a Diplomat in Situation That Called for Tact.

While a Los Angeles publisher was abroad, a few months ago, with a newspaper crowd he was invited, with the rest of the party to dine with a duke and duchess who were burdened with a double last name, such as Kelly-Angus.
The Californian was in an awful stew from the time the dinner started as to how he should address the hostess in case he fell into conversation with her, but finally, when the opportunity came, he proved himself every inch a diplomat.
The duchess, it seems was apologizing for the dinner not being more formal or something like that, and the newspaper man, desiring to make her feel at ease, just reached his right hand across the table, took the hostess by the hand, and said:
"Oh, that's all right, Mrs. Kelly, all of us like good home cooking."—Washington Star.

Sure Cure, Anyway.
An Ohio man is said to have been cured of rheumatism by being struck by lightning, but no mention is made of when and where the funeral was held.—Anaconda Standard.

When a bachelor meets the right girl he is apt to discover that he is the wrong man.
It is never too late to break yourself of a bad habit.

PHILOSOPHY TO THE RESCUE

How Mr. Johnson Resigned Himself to the Advent of the Unnecessary Quadruplets.

Andrew Johnson, negro, of Foreyth, Ga., father of quadruplets, three boys and a girl, never overlooks a business opportunity. The day following the arrival of the four pleaninnes, white citizens journeyed out to the little log cabin on the outskirts of the town to look 'em over. Whereupon Andrew painted a sign and nailed it to his door. The sign read:
"Come and see the babies. Admission, adults, 50 cents; children, 25 cents."
Money rolled in.
"I sure needed a lot o' things a heap worse than dem four chillun," Andrew said. "But you got to take dem as dey come."

In His Children's Eyes.
In the recently published "Theodore Roosevelt Letters to His Children" not a little space is given to the quaint sayings of Quentin. Here is one:
The other day a reporter asked Quentin something about me, to which that affable and uncanny young gentleman responded: "Yes, I see him sometimes; but I know nothing of his family life."—Christian Science Monitor.
Experience.
"That old teacher we had was as tough as leather."
"I suppose that came from his practice in tanning hides."

Sleepless Nights

and coffee-drinking are closely linked together with many people.
If your case is like that, try

Instant Postum

—a wholesome cereal drink with a really rich coffee-like flavor that meets the test of taste, just as the beverage itself meets the test of health.

Economical, Ready Instantly, Delicious

Made by Postum Cereal Company
