

Disinfection Houses on Mexican Border

By the U. S. Department of Agriculture

All along the Texas-Mexican border, equipment has been completed for the disinfection houses erected by the United States department of agriculture for the purpose of making sure that no larva or moth of the pink boll worm of cotton enters the United States.

Charges have been fixed in such a way as to cover the cost of the chemicals and labor required in fumigation. The fee is \$5 for a railroad car and 50 cents for any other kind of vehicle.

Clothing the Family

Consideration of Real Purpose of Clothes Will Help in Economizing

Clothing the family is a business which should be handled as systematically as any other business, declares Laura Makepeace of the Colorado Agricultural college.

What do you want your clothing to do for you and what do you want it to show? Do you not want these things:

Protection from cold, heat, moisture and rough surfaces?

Freedom in movement, breathing and standing?

Beauty, by choosing materials, colors and designs suited to you and your occupation?

Self respect, clothing which is appropriate, becoming and within your means, makes yourself and neighbors think well of you.

Have you thought of the different kinds of garments you should have? These can be divided into three groups: outer-clothing, under-clothing and accessories.

Allowing 15 per cent of the yearly income for clothing, a good proportion is, outer-clothing, 70 per cent; under-clothing 20 per cent; accessories 5 per cent, and care, 5 per cent.

Go shopping with a purpose. Learn to recognize quality. Choose slowly and thoughtfully.

Stoppage of Circulation Causes "Pins and Needles"

After being for a long time in a constricted attitude a peculiar numbness and prickling is often felt in the arm, the leg, or the foot.

This is caused by some interruption to the circulation of the blood and can usually be removed by rubbing or exercise.

Physicians say that the reason for this sensation, which is decidedly uncomfortable, is that pressure for a certain length of time deadens the sensibility of a nerve.

When this pressure is suddenly removed (as in straightening out the leg after sitting with it doubled underneath the body) sensibility gradually returns to the nerve and as each nerve-fiber discharges the trunk regains its normal condition of sensibility.

Useful Absorbent is Found in West Part of Country

Absorbent in modern times has come to be very extensively manufactured into incombustible cloth, gloves, felt, paper and other articles of common use.

It is found in most parts of the world, chiefly in connection with serpentine. Notwithstanding it is described as a highly inflammable substance, it is a very useful material.

Short Measure in Canned Goods to Have Attention of Federal Authorities

Federal food inspectors have been instructed to watch for interstate shipments of canned goods which have been slack-filled; that is, which contain too much water and too little solid food.

The practice of slack-filling food cans, in the opinion of the officials, is demoralizing to the trade and unfair to the consumer. To put a full can in competition with a slack-filled can places the honest canner at a disadvantage.

Putting excess liquid in cans adds unnecessary expense in canning, storing and shipping, since the excess liquid requires more cans and increases freight and storage charges all along the line.

ASPIRIN FOR HEADACHE

Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Headache, Colds, Pain, Neuralgia, Lumbago, and Rheumatism.

Number, Please. Bless—Were they married in haste? June—Goodness, no; why, they were married by telephone.

You have one great duty in these high-priced times. You can advise your friends to economize.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle.

It is difficult to realize that the sweet girl graduate was once a short-haired baby with a red nose.

RASCALS

Biliousness, Headache, Colds, Constipation, driven out with "Cascarets"

Why take nasty cathartics, sickening salts, or stomach-turning oils to drive these rascals out? Let gentle, harmless Cascarets remove the liver and bowel poison which is keeping your head dizzy, your tongue coated, your skin sallow, your breath offensive, and your stomach sour.

"You used to write verses to my dainty chin," sighed Mrs. Addy-Pose. "Well, now I must write couplets," she said.

Women read bargain advertisements because they believe there is something in store for them.

Forty is Sacred Number With Respect to Weather After St. Swithin's Day

The 40-day period of imaginary food or drought following St. Swithin's day is now long past for this year, and we shall hear no more of that singular superstition, says the New York Herald, until next summer.

Why 40 days was selected as the period of meteorological monotony is an interesting question, though it is probable that it was suggested by the 40 days' downpour in Noah's time.

After the 40 days and 40 nights of rain at the deluge, it will be recalled, Noah waited 40 days before he opened the window of the ark and sent forth the raven.

Largest Shade Tree in Country is Sycamore; 46 Feet in Circumference

The American Forestry Magazine is urging the planting of sycamores for shade trees. It shows that they are of rapid growth and attain large size.

The largest shade tree in this country is a sycamore in Worthington, Ind. It is 46 feet in circumference and 150 feet in height—the most beautiful specimen of a tree to be found at least in the middle West.

The sycamore requires plenty of moisture, but moisture is easily supplied in a modern city. Besides, the tree has a habit of reaching out after moisture, its roots extending for long distances and going deep into the earth.

IT IS TO SMILE

A Classy Yegg. Officer—How will I know this "gentleman burglar?" Captain—If he shoots you with a pearl-handled revolver it's him, me lad.

Squaring Himself. "I claim that man Blump is a born diplomat." "How's that?" "His wife objected to his spilling cigar ashes on her rug, so he bought her a carpet sweeper."

Had Him There. "I am an agnostic," said the thin man. "And an agnostic is what?" inquired a listener. "An agnostic is—well, a fellow who is not sure of anything."

Loud Rejoinder. "Did you sell that man the green and blue checked suit you were showing him?" asked the proprietor of the "Nifty Togs Shop." "No, sir," replied Percy, the peerless salesman. "Why not?" "He said he couldn't stand excitement."

In Very Close Contact. "Have you ever come in contact with the moneyed classes?" "Oh, yes; I was knocked down once by a millionaire's auto."

Perish the Thought. Mrs. Tungstith—Did I hear you refer to me, your wife, as nothing but a talking machine? Her Husband—I never said it. Why, if you were a mere talking machine you'd talk only when I wished you to.

Why Not? The Caller—Is Mrs. Van Stin in? The Doorman—I will see, Mr. Will you kindly step withup?

Rabbits Afford Good Meat to Help Check the H. C. L.

It seems a pity that more families who are struggling with the high cost of living and who are appalled at the prices they are forced to pay for their meat supply, do not know what a help a few rabbits in their back yard would be.

The Brazil Nut Tree.

In the vast territory covered by the

Backache only a Symptom

"It Seems as Though my Back Would Break."

This is a common expression among women, yet they toil on day after day heedless of the significance of this distressing symptom.

Backache is often a warning of some inward trouble that requires attention, and which unless relieved will sooner or later declare itself in more serious ailments.

If it is caused by female derangement Lydia E. Pinkham's Vegetable Compound is what you need. It quickly asserts its curative powers in all those peculiar ailments of women.

For more than thirty years this good old fashioned root and herb medicine has been restoring American women to health.

The Splendid Recovery of Mrs. Coventry

Newark, N. J.—"The doctor said I had organic trouble and treated me for several weeks. At times I could not walk at all and I suffered with my back and legs so I often had to stay in bed. I suffered off and on for eight years. Finally I heard that Lydia E. Pinkham's Vegetable Compound was a good medicine, and I tried it with splendid effect. I can now do my housework and my washing. I have recommended your Vegetable Compound and Blood Medicine and three of my friends are taking it to their advantage. You may use my name for a testimonial." — Mrs. THERESA COVENTRY, 75 Burnett St., Newark, N.J.

Mrs. Hunt tells how it helped her Detroit, Mich.—"I was in a general run-down condition, was very nervous and tired, had backache and other troubles. I suffered for several years, was not able to work at times and tried doctor's medicine with no results. I saw Lydia E. Pinkham's Vegetable Compound advertised, and after taking it a short time I was much better. I am still taking it myself and giving it to my daughter, and am glad to recommend Vegetable Compound at anytime." — Mrs. M.E. Hunt, 171 Division Ave.

FRIDAY, DEC. 20, 1919

President at the Helm

From the National Weekly "Labor."
The people of the country have reason to thank God that the reports concerning the President's condition have been found to be greatly exaggerated.

Owing to the stupidity of Lansing, we were on a point of war with Mexico. The jingoes seemed to be in control of Congress and the press was practically a unit for intervention. The President restored the sanity of the country by laughingly relating one of "Mr. Dooley's" jokes, and the militaristic Senator from New Mexico, Mr. Fall, left the White House a chastened man.

The absurdity of the hurry about Mexico is shown by the fact that Mr. Jenkins, the consul who caused all the trouble, was released when a friend put up a five hundred dollar bond. He had been charged with a criminal offense in a state court and the federal authorities of Mexico were without power to intervene.

Jenkins added a touch worthy of a Gilbert and Sullivan opera when he attempted to break into jail after he had discovered that his release had relieved the tension between Mexico and the United States. The suggestion that this country could be plunged into war by a consul who was so insistent upon his "rights" that he would not accept liberty except on the terms which he believed to be technically correct, should serve as a warning to the American people. Hereafter they should receive stories of Mexican "outrages" with a liberal application of salt.

Having disposed of the Mexican situation the President took up the coal strike and within forty-eight hours he rectified the blunders of the Attorney General and the Fuel Administrator. These gentlemen, having found that they could not dig coal with a court injunction, decided to permit the people to freeze while they battered their official heads against a stone wall. The situation was fraught with ugly possibilities, and it is difficult to prophesy just what might have occurred if the sick man in the White House had not regained his strength. Verily, the God of the Fathers still watches over the republic.

Disapprove of Lodge

To the Editor of the Republican:
New that the Senate, under the leadership of the senior Senator from Massachusetts, has killed the peace treaty with its possibilities for a real League of Nations, we, the undersigned, Republican voters, desire to publicly record our profound disapproval of Mr. Lodge's course, and our determination to do all in our power to see that his misrepresentation of the old Bay State shall end at the close of his present term in the Senate.

So this in the hope that our fellow Republicans all over the country will agree with us in our action, if possible, to disapprove of Mr. Lodge with a vote and un-
This save our banner which is the presiden-
tial seal.

Better than Gold—A Check on our Bank is better than Gold. Safe if you will, but it is true just the same. Why? Well, if you had a \$20 gold piece and lost it, or a hold-up man got it, or a thief picked your pocket, the chances are that it would be gone for good. Now, suppose you had that \$20 in the form of a check on our bank. Then if any of these things happened to you, you could have the bank stop payment on the check, have another one issued and could still get the money. Which would you prefer?

Helps Sick Women

Cardui, the woman's tonic, helped Mrs. William Eversole, of Hazel Patch, Ky. Read what she writes: "I had a general breaking-down of my health. I was in bed for weeks, unable to get up. I had such a weakness and dizziness, ... and the pains were very severe. A friend told me I had tried everything else, why not Cardui? ... I did, and soon saw it was helping me ... After 12 bottles, I am strong and well."

TAKE

CARDUI

The Woman's Tonic

Do you feel weak, dizzy, worn-out? Is your lack of good health caused from any of the complaints so common to women? Then why not give Cardui a trial? It should surely do for you what it has done for so many thousands of other women who suffered—it should help you back to health.

Ask some lady friend who has taken Cardui. She will tell you how it helped her. Try Cardui.

All Druggists

Build now—

THE DEMAND

for buildings of every kind was never greater than it is today. Over-crowded houses is the condition in all parts of the state.

Conditions are as normal now as they will be for a long time. Let's get busy with the construction that the war has halted.

BUILD NOW the houses the war stopped, and make CARRIZOZO a better place to live in.

Prosperity comes only from industry and prosperous thinking.

Yours for Business

Foxworth-Galbraith

TYPICAL FARM CENTER IN LITHUANIA

In Lithuania, the new republic of the Baltic, the farm houses are grouped together as shown above, the families going out each morning in all directions to work their respective farms and returning in the evening to enjoy a community and social life which is unknown to the farming people of America.

IN NEED OF CLOTHES AS WINTER BREAKS

People of Poland Will Suffer Unless Help is Forthcoming.

U.S. MINISTERS SENDS APPEAL

In the Widespread Areas of Devastation in the Country People Are in Rags and Barefoot—Fuel Shortage is Also Acute.

New York.—Hugh Gibson, United States minister to Poland, is urging the Lutherans of America to do their utmost to provide clothing for the Polish people before winter. His appeal has been received by the European relief committee of the national Lutheran council through Dr. J. A. Morehead, chairman of the Lutheran committee to Europe. The appeal follows: "I hear that your council is opening a campaign in America to gather clothing for Poland. I hope this is being made a very earnest campaign, as the need is far beyond anything that people in America are likely to understand.

"The lack of clothing in this part of the country is bad enough, as you have seen, and although really cold weather has not begun the suffering is already apparent, but I do not know whether you have been out in the wide-spread areas of devastation, where the people are in rags and barefoot, and where the situation will soon be desperate.

"If people at home had any conception of the misery of these people, they would not rest until shipments of warm clothing were actually distributed. I hope you will impress upon the Lutheran council the urgency of the situation, and the fact that the Polish people are not now in a position to help themselves. We have got to see them through this winter."

Appeal in Another Letter.

Similarly E. Richard of the American relief administration of European children's fund is emphasizing the need in Poland which the Lutherans are endeavoring to meet in their campaign for clothing and money. In a letter received by Dr. Laurits Larsen, chairman of the European relief committee of the national Lutheran council. The letter follows:

"The appeal of the Lutheran council's European relief committee for funds for the purchase of clothing to be distributed in Poland and other countries of central Europe ought to receive a wide hearing. There is a desperate need for clothing—a greater need than can possibly be supplied. For five years practically no new clothing has got into the hands of these people; practically none has been manufactured, and old stocks are exhausted. The rags and remnants which remain are simply not sufficient protection during the winter. "Conditions are especially bad in Poland, where the cold months are very severe, where the fuel shortage is acute, and where 2,000,000 or more

refugees must pass the winter in makeshift dwellings.

"The American relief administration European children's fund is cooperating with various organizations to the limit of its resources in order to provide to some measure clothing for children who must leave their homes to go to the relief kitchens. More than 1,200,000 children in Poland will be given a meal a day at these kitchens for the next seven months.

"However, our work is limited to meeting the requirements of the children of eight and under. I earnestly hope that the Lutheran committee will be able to help largely in meeting the needs of others in want.

Old Clothing Not Sufficient.

"If old clothing can be obtained quickly of course it can be used to great advantage, but we have decided as far as the children are concerned that this immediate need cannot be met by old clothing nor can we wait for a clothing drive to bring results. We have consequently purchased new cloth and shoes and we suggest that any of your surplus funds could be used in this way.

"It is our conviction—voiced more than once by Mr. Hoover—that relief work in Europe must know neither creed, race nor country. Only the very great need of those who are hungry and cold must be considered.

"If we can in any way cooperate with your committee to hasten clothing relief not only in Poland but in all parts of central Europe you may count upon us to go the limit."

Have Three Sundays

Turks Observe Friday, Jews Saturday, Christians Sunday.

American Relief Workers in Bosnia, However, on Duty Seven Days a Week.

Sarajevo, Bosnia.—Sunday is observed three times a week here.

Because there are 35,000 Turks in the city Friday is the first Sunday. Then all the Turkish stores close and one goes twice a day to some of the hundred mosques whose slender minarets gleam white against the green background of the hills.

Because 200 years ago a group of Spanish Jews settled in Bosnia, Saturday is Sunday for many Sarajevans. Then all the Jewish stores are closed and the Jews of the city crowd the big yellow synagogue of the main street.

Because all the rest of the 54,000 inhabitants of Sarajevo and hundreds of peasants from the hills around are Serbs and Bosnians, following the Roman Catholic and the Greek orthodox beliefs, the Sunday Sabbath is the biggest holy day of all in Sarajevo. All the stores, except the Turkish are closed.

WOMEN BARRED FROM TESTS

Not Permitted to Compete for 60 Per Cent of the Government Positions.

Washington.—The official report of the woman's bureau of the United States department of labor, just made public, reveals that women were barred from 60 per cent of the government positions for which examinations were held in the first six months of 1919. This statement covers examinations for 229 different types of positions.

According to the report, women were not allowed to compete for 10 per cent of the clerical positions.

The complete report, according to Miss Mary Anderson of Chicago, director of the woman's bureau, covers investigations which have been in progress for a month.

The second and larger section of the report will consist of an analysis of the salary scale of women in the government service, the requirements of the positions they fill, and the specific inequalities in the pay they receive.

BACK TO U. S. TO SAVE TAXES

Son of Inventor Singer Says He Can No Longer Live in England.

London, England.—Adams N. Singer of Berkshire, son of the American inventor of sewing machines, has complained to the royal commission on income tax that his income derived from property in the United States is so depreciated by double taxation, once in America and once in Great Britain, that he cannot continue to reside in this country. The United States, he said, takes 34 to 36 per cent and the British inland revenue takes about one-half of what is left after the American tax is deducted.

The KITCHEN CABINET

"When one is in a pool of trouble, there is no possible good in splashing other people."—Huxley.

THRIFT IN LITTLE THINGS.

It is in the little things and small wastes that multiplied by hundreds, make the great wastes in many homes.

Example speaks louder than words, so if the house mother wishes to train inside or children to be thrifty, she must first be thrifty herself. It takes but a moment's thought to turn off the light when leaving a room, even for a short time, and the turning off of the gas from the range before removing a dish, should become second habit.

How many women leave the soap floating in the dishwater while washing the dishes instead of using the little economical soap shaker which holds even the tiny bits? The same habit is noticed when doing any cleaning about the home, soap floating in the scrubbing pail, instead of resting in a dish where it can be easily reached when needed.

China and all crockery is so costly now that we must of necessity take care of the household supply. When washing dishes they are often nicked or broken by striking the handles of the pan; turn the pan so that the handles are in front or a little at the side, out of range when handling the dishes.

Use triplicate dishes on one burner to save gas; the heat of the burner will cook three things in nearly the time used for one.

"A stitch in time" and "a penny earned" are proverbs so well known that it is futile to mention them, yet we need to constantly remind ourselves that a nickle is the interest on a dollar for a year, and it is not parsimony to save, but something of which to be proud in these days of costly living.

If making ginger bread, add a cupful of cold coffee instead of the boiling water; save the coffee and improve the cake. Cold coffee may be used in spice cake, in place of milk; thickened with gelatine and served with cream it makes a dainty dessert.

A small bit of butter, too small to seem of use may be saved and when six small bits are added, one will have enough butter to season a dish of vegetables. "Let nothing be wasted," is a fine motto to have framed in our kitchens.

Announced by all the trumpets of the sky, Arrives the snow, and driving o'er the fields, Seeks nowhere to alight; the whited air flutters billa and woads, and the heaven, And veils the farm house at the garden's end.

—Ralph Waldo Emerson.

GOOD THINGS FOR THE FAMILY TABLE.

When a dish is both good and economical it is bound to be popular.

Liver Pie.—Cut calves' liver into strips using one pound, parboil five minutes in boiling water to cover, drain and roll in flour. Fry two slices of bacon until crisp, remove and cook the liver in the fat until brown.

Carefully arrange the liver in a casserole, add two cupfuls of boiling water and stir until well heated. Cut the bacon into small strips and lay over the liver. Put five medium-sized potatoes and one small onion through the meat-chopper and mix with three tablespoonfuls of salt. Spread this over the liver, pouring the water and fat over it. Cover and bake in a hot oven until the liver and potato are well cooked.

Bran Gems.—Mix together one cupful of flour, two cupfuls of bran, two teaspoonfuls of baking powder, then add two tablespoonfuls of shortening two tablespoonfuls of sugar, or molasses, one teaspoonful of salt, one and one-half cupfuls of milk and a half cupful of chopped raisins. Place in greased gem pans and bake in a moderately hot oven for twenty minutes.

Vegetable Chowder.—Take two cupfuls of corn, six medium sized potatoes, one onion, one green pepper and two tomatoes, put through the meat chopper. Brown one fourth of a cupful of sausage, add a tablespoonful of flour, then the vegetables, and a teaspoonful of salt, cayenne to taste. Add boiling water to barely cover and simmer gently for one hour. Add one cupful of milk and simmer until it is absorbed.

Lemon Apple Pie.—Take two cupfuls of chopped apple, one cupful of sugar, the juice and rind of a lemon, one egg well beaten, half a cupful each of water and rolled cracker crumbs. Bake in a two crust pie in a moderate oven.

Marshmallow Sauce.—This sauce may be used on any baked pudding like cottage pudding, but is nice with steamed cake. Mix one cupful of thick brown sugar with three tablespoonfuls of lard, add hot and thick cream of boiling water and stir.

Farmer Jones Syrup is Better. First, last and all the time we maintain the quality! Its sweetness cannot be duplicated. It's wholesome, economical and delicious. Nature helps us. Formerly Was Oyster King.

Jack Ockers, known as the "Oyster King" who died recently at his Long Island (N. Y.) home, was the first exporter of oysters to Europe, and his name came to be known in all markets where the blue point oyster was found in foreign countries. His foreign shipments the first year amounted to only 1,000 barrels. Later his export business became the largest of its kind in the United States, and amounted to 10,000 barrels annually.

HIS SCHEME DIDN'T WORK

This Colonel Evidently Was Wise as to the Foxy Ways of His Junior Officers.

In the regular army it is one of the customs of the service, when at a regular army post, for the junior officers to call upon the senior officers. To comply with this custom without making the calls, the junior officer frequently waits until he knows the senior officer is away and then calls at his home and leaves a card. One night when I was stationed at a post in Texas, I saw the colonel down town and on my way home stopped at the colonel's quarters and put my card under the door. I was just leaving the porch when I noticed a car at the gate, and on closer inspection I noted that the colonel was in the car and was awaiting me at the gate. He laughingly said: "Kind of late to make a call, isn't it, Lieut.?" This became one of the colonel's best stories, and to say that I was more than once embarrassed would be putting it mild. —Exchange.

Taxing the Millionaires.

Under the new scale of income tax imposed by the recent United States revenue bill every citizen in receipt of \$150,000 or more a year must pay at least half of it to the state. Mr. Henry Ford, for example, is said to have an income of \$25,000,000 a year, of which the revenue authorities will claim between \$15,000,000 and \$20,000,000—a sum sufficient to keep 1,000 families in modest comfort forever. But even Mr. Ford gets off lighter than Mr. John D. Rockefeller, who is reputed to have an income of \$100,000,000 a year. Mr. Rockefeller's contribution to the treasury, it is said, will not fall short of \$60,000,000 for the current year—a sum which represents 2,000 times his weight in gold.

India Needs American Goods.

The fact that the Bombay Electric Tramway company, Bombay, India, recently placed an order for 130 trolley-cars in America, on account of the advantageous prices quoted, indicates that there is further opportunity for the marketing in India of this and kindred lines.

It's a shame the way some young widows break into the game again and don't give the maids a chance.

Sometimes a fellow is eating celery and can't hear opportunity knock.

BELGIUM IS WORKING

Country is Quickly Recovering From War's Effects.

Steel Mills, Sugar Refineries and Locomotive Works Operate Nearly at Normal.

Brussels.—All Belgium is returning to work and the country is recovering from the war.

In Brussels factories which were damaged during the German occupation are being fitted with machinery and some of them already are turning out their accustomed products to the public.

Mostly demolished and others so badly damaged that entire blast furnaces had to be rebuilt. Within a year it is believed the most important of these plants will be operating at capacity.

The cotton trade of Ghent also has resumed and steamers loaded with American cotton are arriving almost daily. During the German occupation all copper fittings were removed from the machines in the spinning factories and some of these have not yet been replaced.

The linen industry also has taken on new life, and additional workers are being employed every week. The export trade in linen is growing just as rapidly as the factories can turn out the finished product.

people to produce their own food, and they are working from early morn until late at night to attain that end.

Operation Stops Growing.

Lakewood, O.—People of this town some time ago started raising chickens to help beat the high cost of living. The roosters crowded so loudly, however, that neighbors complained because their sleep was disturbed. Dr. Robinson, one of the chicken raisers, solved the difficulty. He discovered that by a simple surgical operation the rooster's crew could be reduced to a mere squeak. Vocal organs of all roosters now are being submitted to the knife and chicken raising has been resumed.

Pileus Prunes.

Watsonville, Cal.—The manufacture of a landmark production, prunes in baskets, is a popular trade. The fruit

Jumpy, Irritable, Frazzled Nerves—when caused by coffee—are helped to become normal, healthy nerves, when a change is made to Instant Postum. This wholesome table beverage with a rich aromatic, coffee-like flavor is deliciously satisfying, economical, and respects both health and pocketbook. Made by Postum Cereal Company.

Braids and Fur Bands on Gowns

The question of trimmings is always an interesting one, and the present models are not lacking in valuable suggestions. Through the French and American designers are not always in accord on this point as is the case on a number of others, observes a prominent fashion correspondent.

White embroidery is still one of the chief standbys of the American maker. It appears to be distinctly on the wane with the French. Both are agreed that trimmings for daytime frocks shall be confined to braid, ribbon and bands of fur though the French makers have a penchant for trimmings of buttons which is shared in only to a limited extent by the Americans.

Platings of all sorts are new and very much in evidence, whether used as trimmings in the shape of narrow trills, or as a feature of the frock itself. Shirring and cording in groups, narrow belts and girdles, double and cut wool fringe, ribbon and fringed silk all do their part toward leading an unwooded variety to trimmings.

For evening frocks, which have this season blossomed in such picturesque beauty, the trimmings are brilliant and luxurious to a degree which fortunately always, or nearly always, escapes the garish, and strongly suggests eighteenth century exquisiteness.

As has been said, embroidery is still very favorably considered by the American designer. This may be because he finds his clientele loath to part with the simple straight line frock, on which embroidery is at its best. Embroidery, in fact, might more justly be called a decoration than a trimming, because it is imposed on the flat surface of the fabric and does not alter the outline of the garment in the least.

Needlework in striking designs. Needlework, in striking but uncomplicated designs, is used in narrow traceries for picking out the salient features of a model and still covers large portions of the whole surface of a garment, either in a continuous pattern or in large whorls scattered here and there.

The patterns are effective, but are produced by the least intricate stitches known to the needle woman, such as single stitch, over-and-over stitch, couching, buttonholing and French knots.

Embroidery floss, wool yarns, chenille and gold and silver threads are used to work out the patterns and, of course, beads, which, however, are

for their continuance in favor though other long fringes have definitely passed the meridian of popularity.

A quite new note, fringed ribbon and fringed silk, is not reserved for its obvious use as trimming on alike evening gowns and wraps, but is met with in strange company.

To give the modish width about the hips of this frock, a series of crisp

For instance, there is an attractive little frock of blue duvetyne with a slightly fitted bodice cut in the Spanish manner, which rounds back and front below the waist line, and a straight narrow skirt.

For any disease due to catarrh or catarrhal conditions, PE-RU-NA is equally dependable. Coughs, colds, catarrh of the head, stomach trouble, constipation, rheumatism, pains in the back, side and limbs, bloating, belching gas, indigestion, catarrh of the large and small intestines, are some of the troubles for which PE-RU-NA is especially recommended.

PE-RU-NA can be purchased anywhere in either tablet or liquid form.

Frock of Blue Duvetyne With Fringed Tulle Finishes.

taffeta flounces have been placed one above the other, extending from the bodice line to the knee.

Each flounce is fringed at the edge and a line of bright brocaded flowers runs through its center.

Little tassels of silk, of soft tubular silk cord, of chenille and of beads have a by no means inconsiderable place in the season's trimmings.

A brown velvet afternoon frock with a simple short sleeved crossover bodice has a double skirt, each flounce of which is accordion plaited.

In the French collections, one sees an occasional model which possesses a tunic bordered with a rather wide band of fox but on the whole the furs used for trimming either duvetyne or satin-frocks are the short-haired furs such as Persian lamb, squirrel or kolinsky and these in narrow bands are used for edgings or are set on the fabrics in many lines, close together. Often, hanging tabs of the fabric at the neck or girdle terminate in small fur balls.

Narrow bands of brightly striped silk are used to relieve the neck and sleeves of a sober frock and we find again in one of the best French models the pleasing fashion of finishing a navy blue serge frock with a sash of Roman striped ribbon.

Ribbons should have a whole chapter devoted to their beauty and their many uses, which range from nosegays to entire frocks. But there is only space to mention the enormously wide and brilliantly processed ribbons which can be made to go very far toward the fashioning of an evening toilette.

Evening Gown Trimmings.

When one enters the realm of fabrics and trimmings which are only suitable for evening gowns the variety is so bewildering that it is hard to know where to begin and quite impossible to know when to stop.

Perhaps it is as well to only touch in passing on the sequined and beaded bandings, the jeweled lace-trimmed and girdles, the exquisite lace threaded with gold and silver and all the other luxurious trimmings and dwell with most weight upon the charming saw-tricks which evening frocks take upon themselves in these days.

Skirts are pulled over rods on the hips to produce the infant's silhouette, are scalloped, kilted or finely ruffled.

The fashion of cutting the fabric into deep scallops or vandykes and accentuating these in gathers or fine pleats on a narrow skirt is a new and pretty one. They are intended to represent flower petals and hand-made flowers of silk are an all but indispensable adjunct to the modish evening frock.

Some of the material of the frock

HAD CHRONIC BRONCHITIS FOR TWENTY-SIX YEARS NOW WELL AND HAPPY

THIS IS WORTH READING

The experience of Mr. E. J. Teupalik, 1438 Rose street, LaCrosse, Wisconsin, is chiefly remarkable on account of the length of time he was afflicted.

He writes: "I have been suffering with chronic bronchitis for twenty-six years and every winter I would catch cold and become so hoarse I could not speak for six or eight weeks. I could get only temporary relief.

"This winter I was taken with Grip and was in awful shape. A fellow workman advised me to take PE-RU-NA. By the time I had used three-fourths of a bottle, the hoarseness was gone, also that tired feeling. I am on my second bottle. Hereafter PE-RU-NA will be constantly in my house. It is the best medicine ever put up for the purpose."

For any disease due to catarrh or catarrhal conditions, PE-RU-NA is equally dependable. Coughs, colds, catarrh of the head, stomach trouble, constipation, rheumatism, pains in the back, side and limbs, bloating, belching gas, indigestion, catarrh of the large and small intestines, are some of the troubles for which PE-RU-NA is especially recommended.

PE-RU-NA can be purchased anywhere in either tablet or liquid form.

RES-PO-LIX-O
A STRIKE FOR FREEDOM
Unionism in a slightly different phase is being used by students of Shanghai, who have in their organization some 20,000 of their number, one-fourth of whom are girls.

WORSER THAN DEADLY POISON GAS
Kidney disease is no respecter of persons. It attacks young and old alike. In most cases the victim is warned of the approaching danger. Nature fights back. Headache, indigestion, insomnia, lame back, lumbago, sciatica, rheumatism, pain in the loins and lower abdomen, difficulty in urinating, are indications of trouble brewing in the kidneys.

PLANT TREES IN MICHIGAN
Stock to Be Distributed at Nominal Cost by State Agricultural Institution.
A law was recently passed by the Michigan legislature for the encouragement of the planting of fruit and nut-bearing trees along the highways of that state.

TOWNSEND BILL IS FAVORED
Measure Introduced by Senator From Michigan Calls for Appropriation of \$425,000,000.
Of forty or more bills on various highways plans introduced in congress, the most important is that introduced in the senate by Senator Charles H. Townsend of Michigan, chairman of the senate post office and post roads committee.

Catarhal Deafness Cannot Be Cured
by local applications as they cannot reach the diseased portions of the ear. There is only one way to cure Catarhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system. Catarhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a running nose or a dripping ear, and when it is entirely closed, Deafness is the result.

When Weak and Nervous
Kansas City, Kan.—"I have taken Dr. Pierce's Favorite Prescription many times with very good results. I have taken it for woman's weakness when I was all run-down, weak and nervous and it soon had me built up in health and strength. I have taken it at different times as a tonic and it has never failed to give relief. I have also recommended it to others who have been weakened by the use of it."

PUBLIC ROADS

FINISH OLD NATIONAL ROAD

Completion of Highway Now Under Contemplation After Lapse of Nearly Century.

(Prepared by the United States Department of Agriculture.)

A project under the federal aid road act, filed with the bureau of public roads, United States department of agriculture, which will undoubtedly hold the record for length and cost for some time to come, is of unusual interest aside from its great length and cost. It contemplates, after the lapse of nearly a century, the completion of the Old National road, extending from the Potomac to the Mississippi, which already has been largely improved as far west as the Indiana line.

The proposed type of surface is monolithic brick and concrete pavement, the average cost of which is about \$30,000 per mile. The proposed improvement includes also the construction of 40 bridge structures, of lengths ranging from 22 feet to 300 feet. At present the uncompleted portion of the highway is generally an unimproved earth road, which becomes

Earth Road Which Becomes Nearly Impassable at Certain Seasons of the Year.

nearly impassable at certain seasons of the year. There are, however, near some of the villages, short stretches of macadam pavement, generally in very poor condition. The local traffic consists of approximately 60 trucks, 700 motor vehicles and 50 horse-drawn vehicles per day, to which is added during the summer months a through traffic of about 20 trucks and 200 passenger motor vehicles.

Whoever has traveled over the tree-lined highways of Europe will greet with satisfaction this measure as the beginning of a policy of combining aesthetic and economic values in our methods of road-building.

Signatures on treaties have become way to arrange now that the system of alphabetical order is followed, but formerly the light for precedence was a cause of grievous difficulty. The order in which names appeared on treaties used to be determined by the status of the realm concerned. But this device involved such interminable disputes that other systems were suggested, and as long ago as 1718, at the signature of the quadruple alliance, each Power signed their copy which was to remain in its possession.

Steel Pipe Industry.
Very few persons realize the varied applications of the prosaic steel or iron pipe. It has been used for many years as a conduit for water, sewage, steam or gas, but at the present time pipe enters into the construction of such varied products as agricultural implements, automobiles, architectural ironwork and grill work, building columns, refrigerating machinery, dry-kin apparatus, elevator cars, wheelbarrows, work benches, ornamental gates, elevator shaft supports, safety ladders, warship masts, lighting and high-tension poles, electric wiring, railway signal apparatus, sprinkler systems and signal towers.

Tractors Do Fine Work.
Gasoline tractors fitted to road machinery do fine work cheaply and quickly.

KILLS TREE PESTS

Doctor Woodpecker Is Nature's Chief Wood Surgeon.

In Everlasting Conflict With Millions of Dangerous Enemies That Would Destroy the Life of the Sturdy Forest Monarchs.

If half a thousand disease germs should suddenly begin eating into the life tissues of your body, you would surely need a doctor, writes F. E. Brimmer in the Farm Journal. Yet more than 500 species of insects prey upon the oak tree, and still we wonder at its strength and vigor. So much, indeed, that "sturdy as an oak" has become an advertising slogan.

The sturdy oak owes much of its long life to Doctor Woodpecker, nature's skilled wood surgeon. One borer would kill a tree single-handed if left at his deadly work long enough; so will a few beetles. A single mother beetle will produce nearly 500,000 young destroyers in a summer of uninterrupted activity. Weevils stunt the growth of the tree and leave it full of holes, an easy victim to other destroyers. Saw flies, caterpillars, ants and moths are among the hosts of tree pests that damage the outer part of the trees. Against all these the tree is defenseless, except for the busy surgeon. A hungry bird of any other kind cannot help the tree, for the pests are hidden beneath the bark or far under the surface.

Just as plagues and epidemics wiped out whole villages of people in the middle ages, so if left to their enemies it would be only a few decades before all forests would be murdered—nothing but dead, grub-bored stumps and fallen trunks left. To prevent this terrible condition nature sends a physician regularly to each patient. Sometimes Doctor Woodpecker has been known to spend as many as three days operating on one very bad case, constantly using to advantage his trepanning tools. Generally his incision is only as deep as the thickness of the bark. Often he slides his spearbill between seams or crevices and draws out the worm, leaving no mark or scar on the bark to show where he did it. At other times his cuttings may be deep galleries tunnels or caverns.

A great deal of the drumming that we hear is only for squawking purposes—much like a man taps the wall with a hammer to find a stud. When Doctor Woodpecker has discovered a diseased part he directs a rapid fire of rattling beats upon the spot with his pickax bill, raining his hammer-like blows with automatic and astonishing precision, until his prey is brought to light. Then he thrusts in his barbed bill and, with a sudden backward jerk, brings forth the deadly grub.

Early Aviation Flight.

One may be reasonably surprised that interest in aviation has not sooner revived, as a curiosity of the past, the legend of Alexander the Great and his youthful ascent in a small car drawn by gryphons. The legend was widely current in the middle ages, and many who heard it doubtless believed that Alexander's "gryphoplane," as a modern headline writer cheerfully calls it, had attained an altitude which would make the record ascension of modern aviation seem like a childish experiment. Gryphons, as those who know their "Alice in Wonderland" will remember, were odd birds, and Alexander, an adventurous boy of twelve, was said to have harnessed two of them to a basket of rushes and been carried to a height of 917,654 feet, returning to meet a protesting parent, who asked him "how long he expected to keep up his infantile tricks."—Christian Science Monitor.

Signing Treaties.

Signatures on treaties have become way to arrange now that the system of alphabetical order is followed, but formerly the light for precedence was a cause of grievous difficulty. The order in which names appeared on treaties used to be determined by the status of the realm concerned. But this device involved such interminable disputes that other systems were suggested, and as long ago as 1718, at the signature of the quadruple alliance, each Power signed their copy which was to remain in its possession.

Steel Pipe Industry.
Very few persons realize the varied applications of the prosaic steel or iron pipe. It has been used for many years as a conduit for water, sewage, steam or gas, but at the present time pipe enters into the construction of such varied products as agricultural implements, automobiles, architectural ironwork and grill work, building columns, refrigerating machinery, dry-kin apparatus, elevator cars, wheelbarrows, work benches, ornamental gates, elevator shaft supports, safety ladders, warship masts, lighting and high-tension poles, electric wiring, railway signal apparatus, sprinkler systems and signal towers.

ST. CHARLES WOMAN WAS FORTUNATE

It Was a Lucky Day for Mrs. Wiethecker When She Read About Doan's

"I had such awful cutting pains in the small of my back and hips. I often had to cry out," says Mrs. Wiethecker, 550 Madison St., St. Charles, Mo. "The pain was knife-like and I couldn't turn in bed, in fact I was almost helpless. My feet and ankles swelled badly, my hands were puffed up and there were swellings under my eyes. I often got so dizzy I had to sit down to keep from falling and my health was completely broken down. The kidney secretions pained terribly in passage and in spite of all the medicine I took, I kept getting worse until I was a wreck."

"By chance I read about Doan's Kidney Pills and bought some. After I had used half a box there was a change and I continued to improve; the pains, aches and swellings left and my health returned."

WM. F. WOLTER, Notary Public. ALMOST TWO YEARS LATER, Mrs. Wiethecker said: "I think as highly of Doan's as ever. Whenever I have used them, they have benefited me."

Get Doan's at Any Store, Or a Box DOAN'S KIDNEY PILLS POSTER-MERBURN CO., BUFFALO, N. Y.

Make It Snappy.
If you were in the telegraph business you wouldn't make much money if many people sent messages like the following one: "It was written by a woman, who won a prize for it being the longest 12-word telegram ever sent."

"Administrator-general's counter-revolutionary intercommunication unconstitutionality. Quartermaster-general's disproportionableness characteristically contra-distinguished unconstitutionality's incomprehensibility."—Boston Post.

BOSCHEE'S SYRUP.

In these days of unsettled weather look out for colds. Take every precaution against the dreaded influenza and at the first access remember that Boschee's Syrup has been used for fifty-three years in all parts of the United States for coughs, bronchitis and colds, throat irritation and especially for lung troubles, giving the patient a good night's rest, free from coughing, with easy expectoration in the morning. Made in America and kept as a household remedy in the homes of thousands of families all over the civilized world. Try one bottle and accept no substitutes.—Adv.

Merely Broke.

She—They say Mr. Destyle is financially embarrassed.
He—Well, he's horribly in debt, but it would take more than that to embarrass him.—Boston Post.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fitch* in Use for Over 30 Years. Children Cry for Fletcher's Castoria

He is a mean man who will not keep a sharp axe for his wife to chop wood with.

Of course, man is like any other animal that grows when it's hungry.

Those Women Who Dread Middle Life

Athleon, Kan.—"I took Dr. Pierce's Favorite Prescription during pregnancy and it was a great help to me. It was the means of keeping me in good condition and when I came to middle life I took it again and it brought me through this period safely. I am always glad to recommend Dr. Pierce's Favorite Prescription."—MRS. C. O. HINES, 825 Mound St.

After long experience in the treatment of women's diseases, Dr. Pierce solved a valuable tonic and corrective which he called Dr. Pierce's Favorite Prescription. This is a purely vegetable preparation, without a particle of alcohol contained in it. When a woman complains of backache, dizziness or pain—when everything looks black before her eyes—a dragging feeling, or bearing-down, with nervousness, she should turn to this "sensation" tonic. It can be obtained in almost every drug store in the land and the preparation is printed in plain English on the wrapper. Put up in tablets or liquid. Dr. Pierce's "Fruitful" Hotel, Buffalo, N. Y., will send a trial size of the tablets for ten cents.

When Weak and Nervous

Kansas City, Kan.—"I have taken Dr. Pierce's Favorite Prescription many times with very good results. I have taken it for woman's weakness when I was all run-down, weak and nervous and it soon had me built up in health and strength. I have taken it at different times as a tonic and it has never failed to give relief. I have also recommended it to others who have been weakened by the use of it."

LOCAL AND PERSONAL

Ed Sullivan and Allan Lane of White Oaks went to El Paso on the 24th.

Lowr:—A mink fur neck piece on the road northeast of Carrizozo or in Carrizozo on or about the 14th of November. If the finder will leave it at the Exchange Bank he will be suitably rewarded. 12-26-21

Claire H. Bradley, who recently located in the Jicarillas, made a marketing trip to Carrizozo this week.

Call in and see the new Fords with self starters. Western Garage. 12-19-19

Mrs. J. H. Fulmer, Jr., and Miss B. M. Wahl were down from Parsons the first of this week.

How about storing your automobile for the winter? The Carrizozo Transfer & Storage Company will store it for you at a reasonable rate. Phone 140. 21

Thomas Johnson and Claud Branum came up from Three Rivers Wednesday to spend the holidays with home folk.

If its anything for a Ford, we have it. Western Garage. 419

Joe E. Gentry, the genial post master at Fort Stanton, was here yesterday, enjoying Christmas with friends.

For your Winter Needs.—Thermite for your Radiator, Radiator Covers, Chains.—Western Garage

Marshal St. John went to Alamogordo on the 24th to attend a meeting and dance given by the American Legion.

Carrizozo Transfer & Storage Co.—Phone your wants to 140 for anything in the feed and flour line. We will call for and store anything you wish taken care of at reasonable rates. 12-12-21

A. H. Norton was here Monday from Jicarilla, making final proof on his homestead.

One good sleeping room, nicely furnished, lighted and heated, close in.—J. S. Ross. 21

Mr. and Mrs. Allan J. Johnson came up from El Paso Wednesday to spend the holidays at their old home. They expect to return to El Paso Sunday.

Eight precincts, including Carrizozo, remain without enumerators to take the 14th census, which is supposed to begin on the 2nd of January.

Mrs. Zeala Morgan came in from Texas this week, and is spending the holidays with her mother, Mrs. Massie R. Grumble, and family.

James W. Baxter came in last Saturday evening from Columbus, Mississippi. Jimmie has his old position of machinist at the shops here after a year's stay in his old home town.

Mr. and Mrs. Wayne H. Hamilton were here Wednesday from El Paso, to spend Christmas with relatives. They returned today. M. U. Finley, president of the Carrizozo Live Stock Commission Co., came by Carrizozo Monday on his return from Santa Fe to Roswell.

O. T. Nye returned Saturday morning from Santa Monica, California, where he left his family comfortably located for the winter. He left the same day for Piecho and Roswell to look after his oil interests.

Mr. and Mrs. Edwin Finley, of the I-X ranch, left Monday for Valentine, Texas, where they will spend the Christmas holidays with Mr. Finley's parents and relatives. They expect to return about the New Year.

J. S. Cox, of Hondo, was marketing apples here the past week. Mr. Cox is the owner of the Hilburn ranch and orchard below the town of Lincoln. He stated that on account of the heavy traffic between the Hondo and Carrizozo, the roads are badly broken.

The hand touched calendars ordered nearly a year ago by the First National Bank have not yet arrived. Word has been received at the bank that they were shipped on the 19th. inst. They should be ready for distribution by Jan. 1, 1919.

Misses Mae and Pearl Kennedy are here from El Paso, spending the holidays with their sister, Mrs. W. J. Fetter, and enjoying a visit with friends.

Miss Edith Webb landed in New York from Birmingham, England, last Friday and arrived here last Tuesday, joining her aunt, Mrs. John H. Robertson, who resides at Nogal. She is delighted with our mountains and expects to make her home with her aunt.

A rumor was circulated here last week that gas and oil was struck in the Tinnie-Piecho well, at a depth of 750 feet. The rumor was incorrect, but the drill had entered a blue shale strata, similar to that found in the Ranger field, and believed to be a good indication. The hole is now down over 1000 feet.

W. P. Tompkins, formerly of White Oaks and Carrizozo, stopped off here Tuesday to say "How do" to his friends. Mr. Tompkins was returning from New York, where he went to claim the girl of his choice. They intend to make El Paso their future home. Mr. Tompkins is a brother of Engineer Tompkins of this Division and also of Mrs. John M. Penfield of Lincoln. The News extends its best wishes.
