OLDEST AND LEADING NEWSPAPER IN CIRCULATION IN THE COUNTY OF LINCOLN, NEW MEXICO

VOLUME 23

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, MAY 4, 1923

NUMBER 18

Carrizozo School Notes

(By Euph. E. Cole)

We are now in the last month of the school year.

In the last fire drill, the large building was emptied in 56 seconds, in good style and without any confusion.

The eighth grade again captures the banner for having the largest percentage of pupils on the Honor Roll.

The class play was a decided success from every standpoint. The young ladies showed hard work, careful preparation and faithful interpretation. Mrs. Harold Clarke, who trained the seniors, deserves much credit for her efficient work. A neat sum was realized.

The Girls' Glee Club of the High School is in training for Commencement music. Mrs. Mims is in charge and doing good work. The songs are what are called "Two-part songs," for soprano and alto. The names are "Amaryllis" and "Phebe."

Dr. Kent, president of the State College, recently sent a picture of the grounds and buildings of the State College, with some of the fine livestock of the institution in the foreground. The picture is four feet long and ten inches wide, well framed, and has been hung up in the High School room.

The eighth grade again took the state examination in eighth grade studies and we believe that all will pass in all of the studies without any question.

The Commencement Exercises of this year will be held on the evening of May Nineteenth, in the Crystal Theatre. Dr. Frank H. H. Roberts, President of the Junior College, of El Paso, will give the address. His subject will be "Who Is Your Friend?" Dr. Roberts is always heard with the greatest interest by the people of Carrizozo.

The Valedictorian of the class is Audrey Miller, who has twenty-one and a half credits, or five and a half credits more than are necessary for graduation. The Salutatorian is Juell Miller, who

Lyceum Entertainments

A contract has been made with the White and Myers Lyceum Agency, Kansas City, for half a dozen lyceum numbers to be presented here the coming fall and winter, the first number to be given in October. This agency had already sold to Alamogordo and Tularosa, and the terms made Carrizozo, as a consequence, were very favorable.

The list of entertainments and the number of persons taking part in each are as follows:

The New York Players, 5
Theresa Sheean Concert Co., 3
The Kellum Duo, 2
Frank Church, 1
Irene Bewley, 1
The Scotts, 2

The course will be in charge of the Carrizozo Entertainers, through whose manager, Mr. E. M. Brickley, the guarantee was given, thirty-two of our citizens signing the guarantee.

The selections listed are accounted high class productions and those presenting them have appeared in their several roles before many enthusiastic audiences. The people of Carrizozo and surrounding communities are justified in looking forward to a series of pleasant evenings for the fall and winter.

has twenty-one credits, or five credits more than are necessary for graduation.

The fifth grade, Mrs. Kelley's room have a two-weeks perfect record in spelling; not a word missed in the two weeks. This grade, on Friday of this week, is to entertain their mothers with a party, from 2:45 to 4 in the afternoon.

Beulah Burr, a member of the Commercial Department, has just received a bronze medal from the Underwood Typewriter people. This is for forty-five net words per minute, on the Underwood Typewriter, the copy corrected by the company itself, not by the local teacher, Miss Shrader. This is very good work for a first year student and we are proud of Miss Burr.

Care in Shearing and Packing Wool

"The first precaution to take in shearing sheep is to have a clean place to shear on," says Professor Snell, of the New Mexico Agricultural College. "This may be accomplished by building a shearing shed, if one has a large number of sheep, or by shearing on a platform. The floor or platform should be swept clean before beginning shearing and should be kept clean during the process.

"Smooth, close shearing is essential to prevent damaging the fleece. Each stroke should be cut clean and close to the sheep's body. When the contour of the sheep's body is not closely followed during the first cut, it may be necessary to go over the sheep again and make a second cut; it is short and of less value, and it also results in damage to the first cut by shortening its fiber.

"The fleece should be kept intact as it is removed and the locks and tags removed from it. The edges of the fleece should then be folded in with the flesh side out, and the fleece rolled up and tied.

"Glazed paper twine should be used for tying the wool. Sisal twines should never be used, as they shed fibers into the wool which cannot be removed without great expense. Wool tied with sisal twine is classed as defective along with burry, chaffy and other defective wools.

"Wool from different breeds of sheep should not be sacked indiscriminately. Even in the case of wool from the same breed, buck, ewe, lamb and wether fleeces should be kept separate. Tags, dung locks and black, gray or burry wool should be placed in a separate sack.

"In case wool is to be held for some time, it should be stored in a dry place, preferably in a barn or ware house and off the ground. If wool gets wet it is liable to fire and become permanently stained."

Art Exhibit

There will be an Art Exhibit at the School Building Monday, May 7, at 4 o'clock p. m.

This exhibit, which is given under the auspices of the Woman's Club, will consist of a collection of paintings by Mr. Gerald Cassidy, of Santa Fe, one of the most noted artists of the Southwest.

Mrs. J. G. Osborn, of Roswell, Chairman of Art, Third District, F. W. C., will be in Carrizozo on this date and will give us much interesting data concerning the artist and his paintings.

Everyone cordially invited. Admission Free.

Citizen's Training Camps

An opportunity now presents itself to young men between the ages of 17 and 24 to spend an interesting and profitable vacation this summer. The Eighth Army Corps Area, embracing the states of Texas, Oklahoma, Colorado, New Mexico and Arizona, will have four training camps for citizens, and applicants will be sent to the nearest training camp to their homes. The nearest training camp to Lincoln county applicants is Fort Huachuca, Arizona, and the time is July 28 to August 26.

Mr. Frank J. Sager, at the Exchange Bank, has application forms and will be glad to give all the information he possesses to anyone, within the age limit specified above, who are interested in the proposition; and he is prepared to make all necessary arrangements for those desiring to enter these military training camps for citizens.

All expenses will be paid by the government, which include:

Transportation to and from the camps.

Sustenance to and from the camps.

Uniforms, arms and equipment. Quarters and meals at the camp.

Laundry at the camp.

Medical attention.

Young men, not otherwise employed, or those desiring a vacation, should take advantage of this offer. It promises a valuable training, an interesting vacation and a chance to come in contact with people, scenes and conditions that should be profitable; and at no expense to the applicant.

"A Rogue's Romance"

The above is the title of a screen play that will be shown at the Crystal Theatre Wednesday and Thursday nights, May 9 and 10. Two celebrated screen artists, both at the top in filmdom—Rudolph Valentino and Earle Williams—carry the roles and they are supported by players of little less magnitude. The story pictures the underworld of Paris; the cafes; the lights and shadows; the mysterious movements of a master criminal, and his narrow escapes; the skillful cunning of the Paris police, and an appealing romance. Love in the underworld, with its rivalries and hatreds, is blended with the romance of society, showing that elementary they are the same. The gay and the tragic; the good and the bad, are mingled throughout, adding spice; holding the eye from beginning to end. Though a big and attractive production, only popular prices will be charged.

Oddfellow-Rebekah Meet

The Oddfellows and Rebekahs had the town last Saturday and Saturday night. They came here from Alamogordo, Tularosa and Vaughn. The 104th anniversary of the birth of the Independent Order of Oddfellows was fittingly commemorated by the gathering of members from the lodges up and down. A district association was formed, with J. B. Dinwiddie, of the local lodge, as president. A closer relationship will thus be established by the associated lodges and an increased interest in the work will be built up and maintained.

In the afternoon, and until evening, the ladies of the Baptist church served a pie-luncheon for visitors and homefolks, alike. The feed was attended by large numbers and the service was all that could be desired.

At night the Oddfellows assembled in the local hall and conferred degrees, visiting teams putting on the work. The Rebekahs met in the Baptist church and did a similar work in their order. Following these sessions, the membership of both orders joined in a banquet in the Oddfellows hall and indulged in a pleasant social hour.

Carrizozo enjoyed having the members of these various lodges here, and took delight in making their visit as pleasant as possible. We hope the visitors enjoyed being with us as much as we did in having them, and that they will come again.

Rural School Exercises

The rural school exercises for the week beginning May 14 are: Hondo, May 16; Glencoe, May 17; Lincoln, afternoon of May 18, and Pecos, evening of May 18. The County Superintendent will deliver the address and present the diplomas.

Ladies Aid Society

The Ladies Aid Society of the Methodist church will meet with Mrs. E. D. Boone Tuesday, May 8, at 3 p. m. All members and all others interested in this work are urged to attend.

G. A. R. Encampment

The annual G. A. R. Encampment for New Mexico will be held at Albuquerque May 16th and 17th. William Kahler, Sr., is the representative from the local Kearney Post and expects to attend the encampment. Mrs. Kahler is planning to accompany her husband.

U. B. Thrifty says

The young fellow with money to burn seldom sets the world afire.

There are plenty of ways to get rid of money without burning it.

Because the necessary spending generally eats quite a hole in the family cash pile.

Watch the expense account in PAYING BY CHECK

In this way you can tell where your money is going and correct unnecessary expenses.

Paying by check gives you a good book-keeping system and the advantage of having your surplus amount safe in your bank.

We Pay 4 per cent on Time Deposits

The Blind Man's Eyes

By William MacHarg, Edwin Balmer

Copyright by Little, Brown and Company

CHAPTER XXI—Continued.

As he started forward, impatient at those days, he saw several times that narrow, crowded roads and crowded, busy streets of the little village where he had been. The ground was trampled around this spot when the train went on they were changed in character. The two men were still carrying the third—a heavy man whose weight strained them and made their feet sink in deeply where the ground was soft. But now they were not careful how they carried him, but went forward slowly as though bearing a dead weight. Now, too, no more stains appeared on the brown leaves where they had passed; their burden no longer hid. Eaton, reading what this meant, felt neither excitement nor surprise. He had known that the man they carried, though evidently alive when taken from the car, was dying. But now he watched the tracks more closely even than before, looking for them to show him where the man had a grip of their burden.

It was quite plain what had occurred; the wet sand below was trampled by the feet of three or four men and cut by a boat's bow. They had taken the body away with them in the boat. To sink it somewhere weighted with heavy stones in the deep-water? Eaton's search was hopeless now.

But it could not be so; it must not be so! Eaton's eyes searched feverishly the shore and the lake. But there was nothing to sight upon either. He crept back from the edge of the boat, lying beside a fallen log banked with dead leaves. What was he to do? He had said to Harriet, "I will come back to you—as you have never shown me before." He remembered the words in mockery. How would he return to her now? As he moved a nerve, but pain from the dotted wound on his shoulder shot him through and through with agony and the alienated and darkness of unconsciousness overcame him.

CHAPTER XXII

Not Eaton—Overton.

Sandrine awoke at five o'clock. The blind man felt strong and steady; he had food brought him; while he was eating it, his messenger returned. Sandrine saw the man, alone and when he had disclaimed him, he sent for his daughter.

Harriet went up to him fearfully. The blind man seemed calm and quiet; a thin, square packet lay on the bed beside him; he held it out to her without speaking.

She snatched it in dread; the shape of the packet and the manner in which it was fastened told her it must be a photograph. "Open it," her father directed.

"What is it you want to know, Father?" she asked.

"That is the picture of Eaton?"

"Yes."

"I thought so."

She tried to assure herself of the shade of the meaning in her father's tone; but she could not. She understood that her recognition of the picture had satisfied him in regard to something over which he had seen in doubt; but whether this was to work in favor of Hugh and herself—she thought of herself now inseparably with Hugh—or whether it threatened them, she could not tell.

"Father, what does this mean?" she cried to him.

"What, dear?"

"Your having the picture. Where did you get it?"

"I knew where it might be. I sent for it."

"But—but, Father—" It came to her now that her father must know who Hugh was. "Who—"

"I know who he is now," her father said calmly. "I will tell you when I can."

"When you can?"

"Yes," he said. "Where is Avery?" as though his mind had gone to another subject instantly.

"He has not been in, I believe, since noon."

"He is overseeing the search for Eaton?"

"Yes."

"Send for him. Tell him I wish to see him here at the house; he is to remain within the house until I have seen him."

Something in her father's tone startled and perplexed her; she thought of Donald now only as the more eager and more vindictive of Eaton's pursuers. Was her father removing Donald from among those seeking Eaton? Was he sending for him because what he had just learned was something which would make more rigorous and desperate the search? The blind man's look and manner told her nothing.

"You mean Donald is to wait here until you send for him, Father?"

"That is it."

It was the blind man's tone of dismissal. He seemed to have forgotten the picture; at least, as his daughter moved toward the door, he gave no sign that he had seen it.

or thought of him, she trusted him; she was proud of her love for him.

"May I take the picture?" she asked steadily.

"In whatever you want with it," her father answered quietly.

And so she took it with her. She found a servant of whom she inquired for Avery; he had not returned so she sent for him. She went down to the deserted library and waited there with the picture of Hugh in her hand. The day had drawn to dusk. She could no longer see the picture in the fading light; she could only recall it; and now, as she recalled it, the picture itself—not her memory of her father's manner in relation to it—gave her vague discomfort. She got up suddenly, switched on the light and, holding the picture close to it, studied it. What it was in the picture that gave her this strange uneasiness quite separate and distinct from all that she had felt when she first looked at it, she could not tell; but the more she studied it, the more troubled and frightened she grew.

The picture was a plain, unretouched print pasted upon common square cardboard without photographer's embers or signature; and printed with the picture, were four plain, distinct numerals—5223. She did not know what they meant or if they had any real significance, but somehow now she was more afraid for Hugh than she had been. She trembled as she held the picture again to her cheek and then to her lips.

She turned; some one had come in from the hall; it was Donald. She saw at her first glance at him that his search had not yet succeeded and she threw her head back in relief. Seeing the light, he had looked into the library; but when he saw her, he approached her quickly.

"What have you there?" he demanded of her.

She dashed at the tone. "What right have you to ask?" Her instant impulse had been to conceal the picture, but that would make it seem she

She Struggled to Free Herself From Him.

or, if he is found, he cannot be let to live. Harry, have you never seen a picture with the numbers printed in below like that? Can't you guess yet where your father must have sent for that picture? Don't you know what those numbers mean?"

"What do they mean?"

"They are the figures of his number in what is called 'The Beguets Gallery.' And they mean he has committed a crime and been tried and convicted of it; they mean in this case that he has committed a murder!"

"A murder?"

"For which he was convicted and sentenced."

"Sentenced?"

"Yes; and is alive now only because before the sentence could be carried out, he escaped. That man, Phillip Eaton, is Hugh—"

"Hugh?"

"Hugh Overton, Harry?"

"Yes; I found it out today. The police have just learned it, too. I was coming to tell your father. He's Hugh Overton, the murderer of Matthew Latron!"

"No; no!"

"No, Harry; for this man is certainly Hugh Overton."

"It isn't so! I know it isn't so!"

"You mean he told you he was—some one else, Harry?"

"No; I mean—" She faced him defiantly. "Father let me keep the photograph. I asked him, and he said, 'Do whatever you wish with it.' He knew I meant to keep it! He knows who Hugh is, so he would not have said that, if—"

She heard a sound behind her and turned. Her father had come into the room. And as she saw his manner and his face she knew that what Avery had just told her was the truth. She shrank away from them. Her hands went to her face and hid it.

She knew now why it was that her father, on hearing Hugh's voice, had become curious about him, had tried to place the voice in his recollection—the voice of a prisoner on trial for his life, heard only for an instant but fixed upon his mind by the circumstances attending it, though those circumstances afterward had been forgotten. She knew why she, when she had gazed at the picture a few minutes before, had been disturbed and frightened at feeling it to be a kind of picture unfamiliar to her and threatening her with something unknown and terrible. She knew the reason now for a score of things Hugh had said to her, for the way he had looked many times when she had spoken to him. It explained all that! It seemed to her, in the moment, to explain everything—except one thing. It did not explain Hugh himself; the kind of man he was, the kind of man she knew him to be—the man she loved—he could not be a murderer!

Her hands dropped from her face; she threw her head back proudly and triumphantly, as she faced now both Avery and her father.

"He, the murderer of Mr. Latron?" she cried quietly. "It isn't so!"

The blind man was very pale; he was fully dressed. A servant had supported him and helped him down the stairs and still stood beside him sustaining him. But the will which had conquered his disability of blindness was holding him firmly now against the disability of his hurts; he seemed composed and steady. She saw compassion for her in his look; and compassion—terrified her. Stronger, far more in control of him than his compassion for her, she saw purpose. She recognized that her father had come to a decision upon which he now was going to act; she knew that nothing she or anyone else could say would alter that decision and that he would employ his every power in acting upon it.

The blind man seemed to check himself an instant, in the carrying out of his purpose; he turned his sightless eyes toward her. There was emotion in his look; but, except that this emotion was in part pity for her, she could not tell exactly what his look expressed.

"Will you wait for me outside, Harriet?" he said to her. "I shall not be long."

She hesitated; then she felt suddenly the futility of opposing him and she passed him and went out into the hall. The servant followed her, closing the door behind him. She stood just outside the door listening. She heard her father—she could catch the tone; she could not make out the words—asking a question; she heard the sound of Avery's response. She started back nearer the door and put her hand on it to open it; inside they were still talking. She caught Avery's tone more clearly now, and it suddenly terrified her. She drew back from the door and struck away. There had been no opposition to Avery in her father's tone; she was certain now that he was only discussing with Avery what they were to do.

(TO BE CONTINUED.)

New Mexico State Items

George Mackie, the 15-year-old lad who was accidentally shot near his home on the Johnson Mesa in Colfax county, died at the Miners' hospital.

In spite of the recent cold snap all over Otero county, there is at the present time every indication that there will be a big fruit crop this season.

The new brickyard at Farmington is now under way and the officials in charge plan on making over one million bricks before the end of the year.

The body of a man which has been identified as Noah Robinson, age 25 years, was found in a canon near Red-rock by James Burns, a ranchman, while hunting horses.

An automobile stolen from Mrs. W. F. Mailer of Denver has been recovered at San Marcos. Two women and one man in the party in the automobile were arrested and three men escaped.

Manojo Martinez, who escaped from the big pens at the penitentiary three months ago, has been caught at Silver City, according to word to Warden John B. McManus, and will be brought back in a few days.

The new high school building at Las Vegas, which was recently completed, has been thrown open to the public and large crowds inspected the new structure which is one of the finest in the entire state.

Sheepmen in the vicinity of Iles Melinas are looking forward to a good year as there is every indication that the lambing season will be a good one. Wool has recently been sold for 22 cents per pound.

Mainstream View, home of Mr. and Mrs. Otto Allen, and during the time that Tyrone was in operation, one of the finest resorts in this section of the state, was completely destroyed by fire a few days ago.

Operations will soon be resumed at the oil well near Eagle Flats by parties from Oklahoma. Coal is being hauled to the field and plenty of water for the boilers will be secured from the new well which has been drilled.

The Board of Trade building at Colorado Springs was gutted by fire and nearly all the contents will be a total loss. The walls of the building are still standing but it is thought that they are too unstable to be rebuilt.

Denver buyers, who have been in the vicinity of Lordsburg for the past month, are making plans to ship over 6000 head of cattle from the Lordsburg yards about the middle of May. Everything sold will be according to scale weights and the Southern Pacific is now putting in a big set of scales to handle the big shipment.

Reports from the Estancia valley along the foothills are that wheat and oats planted early are showing up fine with a good stand in all localities. Some spring wheat is yet being sown and a considerable acreage is being prepared for the planting of corn. Food stuff and beans will also show a good acreage which means that a large acreage will be seeded later in the season. As there are no plow beans held over from last year it is likely that a high price will be paid for this season's crop.

That Governor Hinkle's administration shows 64 per cent of jobs given to Spanish-speaking people, as compared with 58 per cent under Governor Mechem and 63 per cent under Governor Larrazolo is the verdict of Attorney David E. Grant after making a canvass of the state house and state penitentiary positions filled under the present regime. "This is the result of a careful survey," said Grant, "and gives the real facts as to the division of posts between the 'Anglos' and Spanish-speaking people."

Officials of the E. P. & S. W. railroad visited Roy with the view of making many improvements in the tracks and equipment at that place. Other improvements will be made during the summer all along the lines of the road.

Milford Smith and Frank Bustos of Las Vegas were sentenced to serve one year in the state reformatory, after a hearing before Judge Leahy, charged with stealing several articles from a store. Both the boys are under 16 years of age.

Work on the new addition to the Seaberg hotel has been started which will complete the wing that was started several months ago. This new addition will be 40x36 feet and when completed will make the last wing in the court 100 feet deep.

Lieut. Col. L. W. Prunty, for the past ten months stationed in Santa Fe as instructor of the New Mexico Cavalry, has received orders to report to Washington to the chief of the militia bureau. He will leave as soon as his successor arrives, Captain L. A. Sprinkle, U. S. A., now at Fort Ringgold, Texas.

The increase in business in the commercial department of the schools of Las Cruces has necessitated the founding of a national bank, of which William Kennedy will be the cashier. The capital of the new institution will be \$15,000. The bank has eighteen depositors, to whom statements are sent at the end of each week. The firms which patronize the bank are: Five coal companies, two hardware companies, and

COLORADO SEMI-MONTHLY CROP AND LIVE STOCK NOTES

General.—Spring plowing and seeding in Colorado are generally from one to two weeks late, due to the backward spring, according to reports of the U. S. Division of Crop and Live Stock Estimates. The moisture supplies including reservoir storages, are below normal, though known have been heavy in parts of the state more moisture than usual was needed to fill reservoirs and to put the soil in good tilth to commence spring operations. The drought continues in the southeastern counties and much of the soil is too dry for plowing or diskling.

Winter Wheat.—A few sections report the condition of the wheat crop as very good, but in general the condition is only fair and the abandonment will be considerable. There has not been much growth as yet, due to the backwardness of the spring, but moisture conditions are quite favorable for present requirements in the north-central and northeastern portions and should result in rapid growth with the advent of warmer weather. The condition is poor upon non-irrigated lands in the southeast, due to the long continued drought and some of the abandoned fields will be summer fallowed.

Live Stock, Hay and Pastures.—Grass on the ranges will be late in many sections, but the present prospect indicates a good growth may be expected for moisture conditions are quite favorable. Hay is becoming very scarce in some sections, due to the protracted feeding season. Some thin cattle are reported, but the health of stock is excellent and losses have been light. A fair to good calf crop is expected. The prospect for the lamb crop is quite good, but some heavy losses of early pigs have been reported.

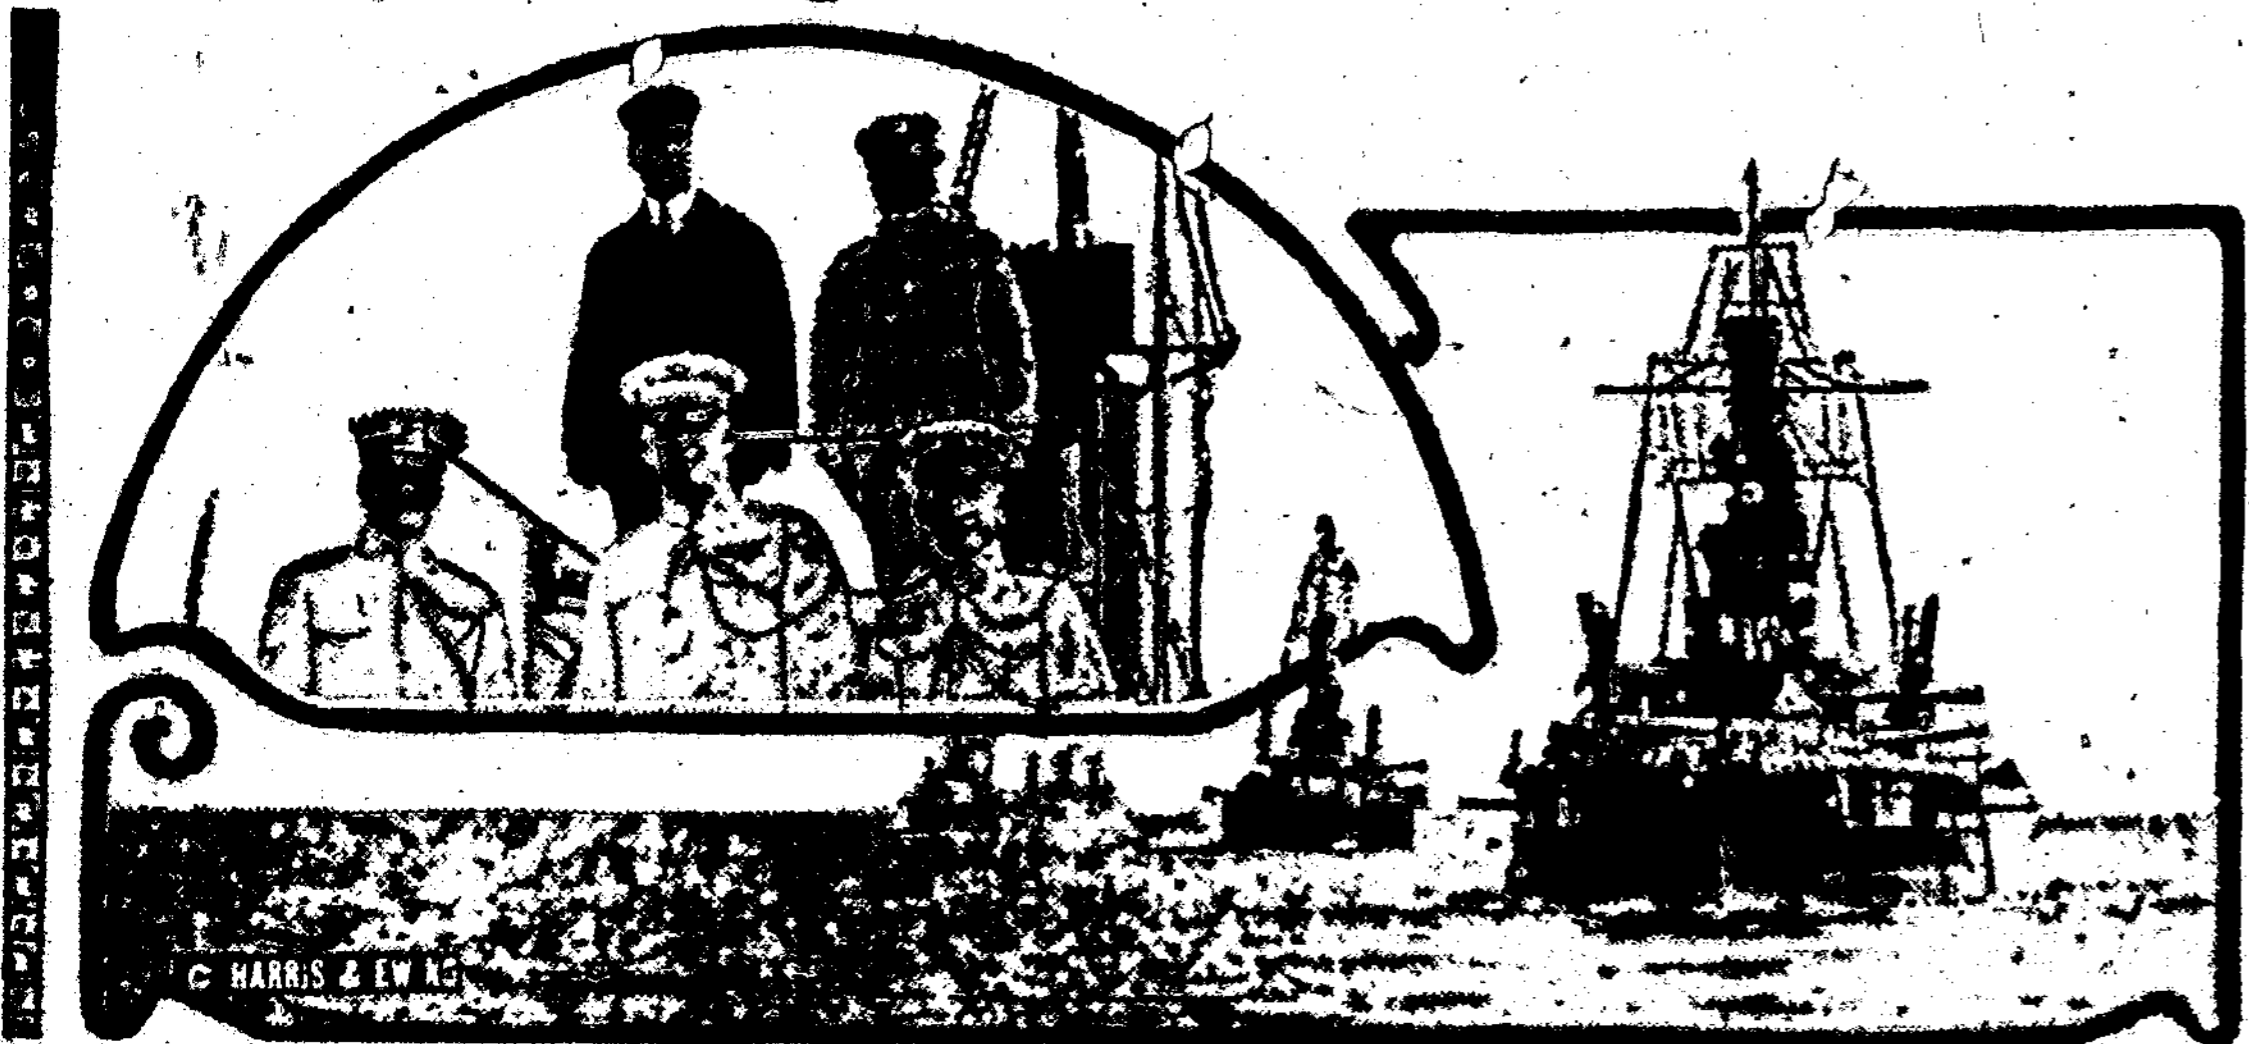

Miscellaneous.—A few early potatoes are already being planted. Present prospects are good for all classes of fruit with the exception of a little damage reported to apricots.

Marketing Bill to Be Revived
Washington.—Advocacy of the Norris-Sinclair bill creating a government marketing corporation to buy and sell farm products as a means of insuring higher prices will be renewed by the radical farm organizations at the next session of Congress, according to a statement made here by Benjamin C. Marsh, managing director of the Farmers' National Council. The bill received considerable support in both houses of Congress in the last session, although opposed by the conservative element.

Patented Land 46% of Total in State
Denver.—At assessment time in 1922 there was 30,580,922 acres of patented agricultural land in Colorado, or 41.1 per cent of the total area, according to compilations made by the State Immigration Department, from the reports of county assessors. The total patented area at the same time was 82,105,994 acres, the remainder being principally mineral land, railroad rights of way and town and city lots. There is still more than 10,000,000 acres of agricultural land in the state not on the tax rolls.

Mint Robbery "Confession" Discredited
Oakland, Calif.—Patrick James Kelly, dressed in the uniform of an army captain, created a momentary sensation here a few days ago by "confessing" that he was one of the men who robbed the Denver mint a few months ago. Federal agents quickly called to question him soon broke his "confession," however, and he then was said to have admitted he told the story at

Denby Reviewing Combined Fleets on the Pacific

This illustration shows the combined American fleets in battle formation photographed 150 miles out on the Pacific ocean from the U. S. S. Henderson; and Secretary of the Navy Denby, Admiral Conzts and naval and marine corps aids on the Henderson reviewing the fleets.

Hartley Made Name in War

Leviathan's New Captain Is Typical Son of the Sea and Won Promotion by Merit.

Doesn't the story of this man smack of the tales of the old sea dogs?

Washington.—Capt. Herbert Hartley, the new skipper of the Leviathan, is a typical son of the sea.

He is the sort of a seaman who truly pities the "people in the cities" on wild, stormy nights.

His associates on the American line—he has been with that company ever since he began his nautical career—say he is lucky; not because he landed the prize post in the American merchant marine but because in all his career he has never had an accident to his ship or any ship on which he has sailed.

Hunch Falls Him.

His worst half hour on the high seas was when during the World war a giant German submarine came to the surface within gun range of his ship, the Louisville, and opened fire.

"This object broke one of my real hunches, because I had a distinct feeling on starting the trip that we weren't going to have any trouble, and usually those hunches work out for me.

"The Louisville could outsteam any submarine that I knew of, but whether she could get out of range before she was mortally hit was the question most vital to all of us just then.

"It took us more than thirty-five minutes to get out of range. During

that time the submarine's other shots, which were plentiful, did not come as close as her first two. Ours, I am sorry to say, did her no damage and did not frighten her enough to make her submerge.

Wears Navy Cross.

The Louisville, under Captain Hartley's command, was the first armed ship to leave an American port after President Wilson decided that American vessels should carry their own protection.

Captain Hartley wears the Navy cross for efficient command of his ship during the war, and it is the only honor which he does not seem to take lightly.

He is forty-eight years old and is the first cadet of the American line to rise to the position of commander. He took the place of Capt. John C. Jamison as commander of the St. Louis in 1917 when that skipper was taken ill on board, and he brought the ship in and docked her so skillfully that his job as a skipper in his own right was secure.

He began his career twenty-eight years ago as a cadet on the training ship Saratoga with Rear Admiral W. S. Sims, loaned by the navy, as one of his instructors.

Bird, Freed in Wales, Is Found in Africa

Carmarthenshire, Wales.—News has reached here that a ringed swallow which was liberated from Laugharne, a neighboring village, has been picked up dead on a farm near Johannesburg, South Africa, 6,000 miles away.

This is the first time actual proof has been obtained of a swallow's flight from Wales to South Africa.

Would Insure Purity of Attar of Roses

Sofia, Bulgaria.—The adulteration of attar of roses, one of Bulgaria's most interesting and profitable industries has developed to the point where the government has found it necessary to intervene.

Essence of geraniums has been used in the debasing of this perfume, and so skillfully that it has been difficult to prove the presence of the cheaper and more common extract. The result has been very detrimental to trade in genuine attar of roses. It has not only weakened confidence in the purity of the true product, but has had a disastrous effect on prices.

Back to Civil Life.

According to a preliminary estimate recently made at the War Department, one out of every seven officers in the Regular army will be turned into civil life by January 1, next.

LIMIT SEEN IN SUPPLY OF GAS FROM NATURE

U. S. Mine-Bureau Says Output Is Not Inexhaustible.

Monroe, La.—The United States bureau of mines, having declared that the natural gas in this country is not inexhaustible, and that the supply is dwindling rapidly, persons interested in conservation of Louisiana's natural resources are launching a campaign with the object of either putting an end to the existence of carbon black plants in this state or at least curbing their operations.

The north Louisiana gas field is the largest producing field in the world, and the wells in the Ouachita-Morehouse district now are giving up the enormous total of 1,890,000,000 cubic feet of gas daily for the manufacture of carbon black.

Ninety per cent of this gas is wasted, it is claimed, and the conservationists have determined to do something to put a stop to it, if for no other reason than that industries in search of cheap fuel hesitate to locate in or near the field for fear the gas will be exhausted in the near future.

The Texas legislature recently refused to enact a law which would have permitted of the establishment of car-

bon black plants in the gas fields now being developed in that state, and it is expected the Louisiana legislature at its next session will be called upon to take steps to remedy the situation here.

Carbon black is used for many purposes, the best known of which is in the manufacture of printer's ink. It is nothing more than what is commonly known as soot, and its production is a simple process. The natural gas flame is permitted to burn against a metal plate, across which a mechanical scraper moves. The carbon, or soot, is scraped off, falls into a conveyor and carried to the packing room.

Profits from the business are enormous and any attempt to break it up is certain to meet with stiff opposition, as was the case when the question was considered at the state constitutional convention two years ago.

The cost of drilling and piping a gas well which will produce from 10,000,000 to 20,000,000 feet of gas daily is placed at \$20,000. Construction of a carbon plant capable of producing 3,000 pounds of carbon daily requires \$100,000. The cost of a gasoline absorption plant, which will produce from the gas, as a by-product, from 1,500 to 2,000 gallons of gasoline daily is \$50,000.

TELL OF REVIVING DEAD BY USE OF ADRENALIN

Men Who Have Died, Legally and Scientifically, Now Alive.

Chicago.—Men who have died—legally and scientifically—several times are now alive and working, due to the use of adrenalin, an extract of the adrenal glands, in a new method of resuscitation, according to reports made at a joint meeting of the Chicago Medical Society and the Chicago Society of Anaesthetists.

Dr. Dennis W. Crile of Chicago, who with his uncle, Dr. G. W. Crile of Cleveland, originated the method, read reports of cases in which persons were revived half an hour after they were pronounced dead, died again, and were revived again at intervals, ultimately recovering completely.

"Life can be restored by this method

the patient may be made to live again. "So far I have used the treatment only in cases of persons who were pronounced dead, not only by me but also by other surgeons. Hereafter I purpose to employ it upon persons who are dying."

The method as described by Dr. Crile calls for large injections of adrenalin directly into the heart, this organ being pierced with a hypodermic needle. Sometimes manipulation of the heart in the hands of the surgeon is employed as an aid, and respiration is assisted by mechanical reproduction of the processes of breathing.

It finds its greatest utility in operations during which patients die from the anesthetic, the discussion brought out, but can be used "in any situation where the cause of death can be reversed quickly."

tilated by shells were restored by it and accompanying surgery, according to Dr. Crile. Previously Dr. G. W. Crile had experimented upon dogs, on which the reactions were not so satisfactory.

Dr. Crile urged surgeons to make general use of adrenalin and advocated that hospitals be well supplied with it.

Dr. Nelson M. Percy added to Dr. Crile's report details of a case of a patient dying under an anesthetic, who was revived, but who passed away six hours later, due, he believed, to her poor physical condition and the severity of the operation.

The adrenal glands' secretions, according to medical authorities, control the emotions of courage and fear.

His Name Is Jaw-Breaker. Sunbury, Pa.—Spiros Pappatriantopoulos, Milton Greek, applied for first papers in the office of the clerk of the courts of Northumberland county. He says it's the longest name in

STRAHL FEELS LIKE NEW MAN

Portland Citizen Declares Tanlac Completely Overcame Stomach Troubles.

J. P. Strahl, 6517 88th St., Portland, Oregon, speaking of his experience with Tanlac, says:

"Tanlac has ended my stomach trouble, built me up eighteen pounds and I now enjoy the best health of my life. But for two years before I got Tanlac, stomach trouble had me in its grip, and all sorts of ailments kept hobbling up to cause me misery. Scarcely anything I ate agreed with me, and I kept falling off till I was sixteen pounds underweight. Gas on my stomach bloated me till I could hardly breathe. I had attacks of biliousness and had to be all the time taking laxatives. "Tanlac put me on my feet, fixed me up so I can eat heartily, sleep like a top and work at full speed. There's no two ways about it: Tanlac sure builds a solid foundation for health."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.—Advertisement.

People who look for trouble never look in vain.

Aspirin

Say "Bayer" and Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

- Colds Headache
Toothache Lumbago
Earache Rheumatism
Neuralgia Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monocetate of Salicylic acid.—Advertisement.

10 Cents Gives Charming New Color Tone to Old Sweaters

World Needs Such Men. The man who is just and resolute will not be moved from his settled purpose, either by the misdirected rage of his fellow citizens, or by the threats of an imperious tyrant.—Horace.

Important to All Women Readers of This Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and maybe despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample-size bottle by parcel post. You can purchase medium and large size bottles at all drug stores.—Advertisement.

Some Girl! Some Girl! Exchange—The bride is a woman of wonderful fascination and a remarkable attractiveness, for with manner as enchanting as the wand of a siren and disposition as sweet as the odor of flowers, and spirit as joyous as the caroling of birds and mind as brilliant as those glittering tresses that adorn the brow of winter and with heart as pure as the dew-drops trembling in a coronet of violets, she will make the home of her husband a paradise of enchantment, where the heaven-tuned harp of marriage shall send forth those strains of felicity that thrill the senses with the rhythmic pulsing of ecstatic rapture.—Boston Transcript.

Gas Keeps Strides With Electricity. In spite of the tremendous strides of the electrical industry, the gas industry today employs five times as many men and produces twice as much

Clothing is Higher, While the Cloth is Inferior

Woolen fabrics for women's dresses and men's suits and overcoats are not only growing dearer in price but also inferior in quality as a result of the use of shoddy in their manufacture, following the rise in the cost of wool since the enactment of the Fordney-McCumber tariff law. The tariff on wool has given the Wool Trust the opportunity to make the consumer pay a large increase in price for woolen goods of all kinds while at the same time it adds to its profits by substituting cheaper materials in their manufacture.

In the New York Tribune, a Republican newspaper, appeared the following:

"A dispatch from Boston yesterday reported that wool dealers there that this (use of shoddy) explains the light buying of raw wool by the mills at present. Dealings in waste reworked wool, and noils are exceeding a large, and some of the mills which formerly sold their waste and noils are now using these by-products themselves."

This substitution of shoddy cheats the purchaser of what purports to be woolen clothing and tends to deprive the wool grower of the little benefit that the high tariff on this product has brought him.

A Sweet Tooth Costly

Sugar is now 57 1/2 per cent dearer than it was in May, 1922 before the Republican Congress enacted the Fordney-McCumber high tariff law, which put a tax of two cents a pound on every lb. of sweetening used in American homes.

In the last days of April, just passed, the average retail price of sugar was 10 1/2 cents a pound. In May, 1922, the average retail price of sugar was 66 cents a pound.

This means that in May, 1922, a housewife could get 15 pounds of sugar for a dollar and that now the same quantity costs \$1.52 1/2.

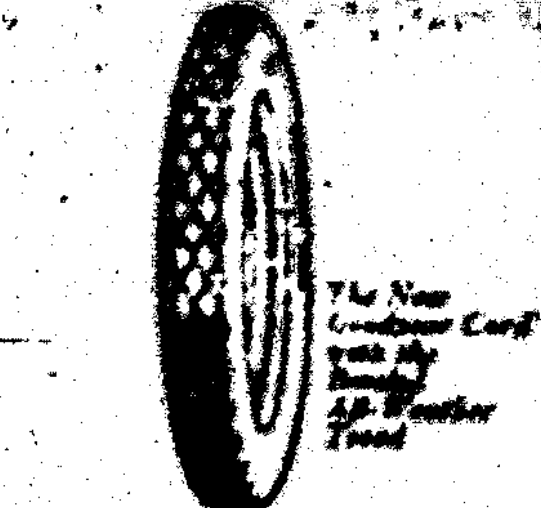

This increase is due to the Republican tariff, which has given the profiteers a license and an opportunity to exploit the consumer.

G. O. P. Gems

(Ohio State Journal, Rep.)
 Well, we suppose we shall have to defend the Fordney-McCumber tariff law as soon as the campaign opens next year and we are already beginning in our conscientious way to practice by telling a few lies around home.

Our foreign policy seems to consist of leaning a little in a tentative way toward some definite position until someone objects loudly enough to cause us to straighten up again and look for a better way.

WHO WAS JOHN PAUL JONES?

A VISIT to the United States Naval Academy, at Annapolis, Md., will almost certainly include at least a moment's pause before the magnificent crypt where lies what are supposed to be the remains of the first and one of the greatest of America's naval heroes—John Paul Jones. But an examination of the facts in the case will show that there is as much doubt as to whether this is really the body of the American commander as there is about the true identity of this personage, whose career from birth to death is one of the unsolved riddles of the Revolutionary war.

In the first place, "Jones" was not the real name of this hero, but one adopted by him in later years. He was born with the name "John Paul" and there is much doubt as to whether he was the true or the adopted son of the Scotch gardener in whose cottage he spent the first 12 years of his life.

Crawford, author of "The Sailor Who England Feared" and one of the leading authorities on the life of John Paul Jones, admits that "mystery surrounded his origin with an impenetrable veil" and that he encountered great difficulties in his efforts to sift the false from the true, the legend from the fact. The generally accepted story is that John Paul was born in the little village of Arbigland and that his father was a poor man, half gardener and half fisherman, while his mother was of pure Highland stock. But Crawford expresses more than a doubt that the Pauls were really the boy's parents, but has been unable to delve further into the mystery.

John Paul's brother was adopted by a Virginia planter by the name of Jones and, when this planter died he left his estate to his adopted son upon condition that he take the name. The brother, in turn, died shortly afterward, leaving the property to John Paul upon the same condition. Thus John Paul became John Paul Jones, the name by which he is known and revered.

When, after his memorable naval exploits, John Paul Jones finally died in France his death was practically unnoticed in America and the only record of the place of his burial was that left by a friend, for use, as he said, "if America should ever wish to perform her duty to the one to whom she owed the most."

Whether this memorandum of the grave was correct is a matter which caused much discussion about a century afterward when Gen. Horace Porter, American ambassador to France, discovered after a long search what was alleged to be the body of John Paul Jones, exceptionally well preserved in a leaden casket filled with alcohol. The measurements of the body compared exactly with those in the possession of the Navy Department at Washington, but the total absence of other distinguishing marks raised a doubt as to the real identity of the remains.

True Detective Stories SHADOW OF EVIL

Copyright by The Wheeler Syndicate, Inc.
 "I'll be back in a few minutes," said Henry Goudie, cashier of the Bank of Liverpool, to one of his associates. "I'm just going across the street to get a bite of lunch."

An hour later the officials of the bank began to wonder where Goudie was, but the fact that his hat still remained upon his accustomed peg indicated that the cashier wasn't far away, and that he would soon return. But at the closing hour that afternoon Goudie was still missing—and when an auditor went over his books it was discovered that a hundred and seventy-five thousand pounds (some \$850,000) had also disappeared!

Inquiry at the house where Goudie had lodged failed to bring to light any trace of the missing cashier, who had left home that morning as usual, apparently without any intention of being away over night. His clothes were in their accustomed position, and even his toilet articles were untouched. In fact, if it hadn't been for the disappearance of the money from the bank, the police would have searched the hospital on the theory that Goudie had met with an accident.

But, as Frank Frost, superintendent of Scotland Yard, pointed out, it was hardly likely that a bank official and \$850,000 would vanish at one and the same time without some connection between the two events.

"As luck would have it," continued Frost, one of the ablest detectives in England, "Goudie has chosen the simplest manner in which to make his escape—the easiest from his point of view and the most difficult from the standpoint of the police. It is comparatively simple to find a man who lays his plans in advance. You can usually trace his baggage or his railway tickets. But Goudie just 'walked out to lunch and lost himself somewhere. He left only one clue behind him—his hat."

Therefore, working on the assumption that a hatless man would be quite conspicuous, and that Goudie, knowing this, would immediately purchase another hat, Frost made the rounds of the shops near the Liverpool bank. From the clerk in one of them he obtained the information that a man answering to the description of the missing cashier had purchased a cloth cap of a distinctive pattern only a few moments after noon on the day that Goudie vanished.

By means of this clue and a detailed report on Goudie's appearance, Frost soon had every man connected with Scotland Yard searching for the absconding cashier. But it was several weeks before he was located and captured in a lodging house in the north of England.

However, the arrest of the man who looted the Bank of Liverpool did not by any means close the case. Even before he was discovered, Frost had found out that Goudie had been in the habit of playing the races—patronizing a clique of "hand-book men," who had played upon his credulity in such a manner that they, and not he, had secured the benefits of his alibi. In order to recover the money, Frost therefore had to round up the members of this gambling ring and force them to disclose.

It developed that the leader of the organization, sending a way in which to make a lot of money, without running any risk, had approached Goudie with an account of a "fixed race" which was to be run at Epsom Downs, and that the cashier, believing that he could clean up a fortune in a single day, had taken twenty-five thousand pounds from the bank, falsifying the accounts to conceal the shortage. The man's credulity is evident from the fact that he placed the money at odds of 20 to 1, which meant that he stood to win half a million pounds, or \$2,500,000 if his horse came in first. Of course, no bookmaker could afford to pay a bet of this size—but Goudie overlooked this fact and cheerfully wagered his "borrowed" capital. The horse naturally failed to win, and, in an effort to recover his losses, the cashier commenced systematically to loot the bank's funds.

One of the odd features of the case which Frost discovered, by blind luck, Goudie one day placed a big bet on a horse that won. When he went to collect his bet with the firm intention of repaying it, he discovered that the horse had been stolen.

Well Known Author Dies

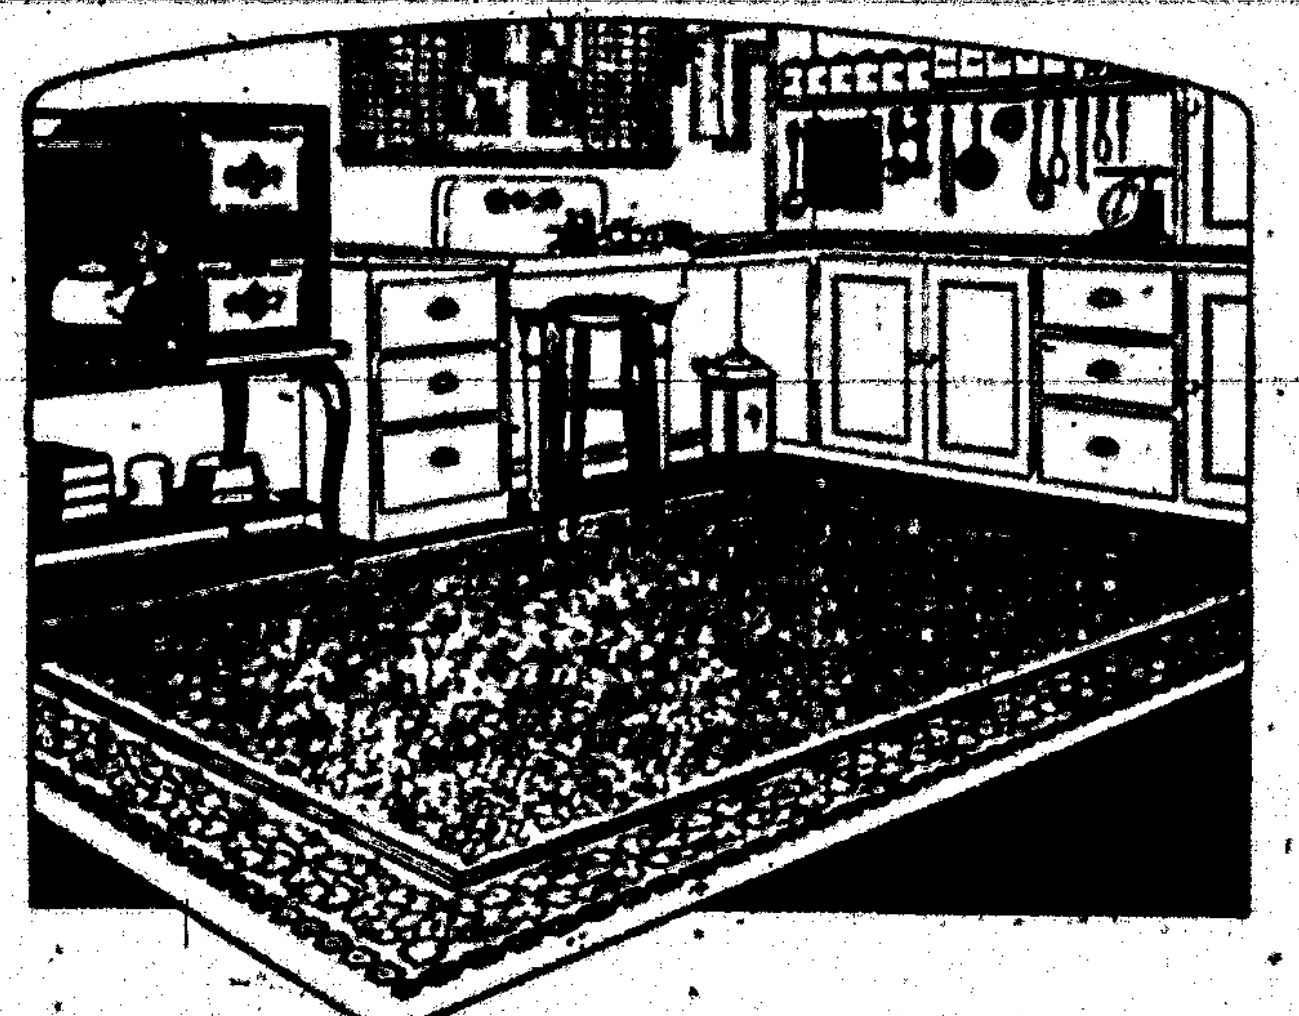

Emerson Hough, well known author and writer, died at Evanston, Illinois, April 30, at the age of 66. Mr. Hough's stories were mostly of the west, this particular section supplying the material for a number of his stories. He came to White Oaks more than forty years ago, shortly after having been admitted to the practice of law, as attorney for a mining concern, promoted by easterners, but the company failed and Mr. Hough returned east.

Abandoning law, he began to write articles on outdoor life, and occasionally a story on western life and customs, and enlarged on these with the years, until he became one of the best known writers of this class of stories in the country. Many of his stories have been published in book form, two of which relate to our locale, viz: "Heart's Desire," a story of the early days of White Oaks, and "With Hoops of Steel," an interesting recital of the troublous period in Dona Ana county.

Twice in the last two decades Mr. Hough revisited Lincoln county, gathering material for other productions. A number of Lincoln county citizens still reside here who knew Mr. Hough when he first landed in White Oaks and many others made his acquaintance upon his subsequent visits here.

AUTOMOBILE OWNERS TAKE NOTICE

I find that a number of automobile owners in Lincoln county have not yet made application for their 1923 licenses. It is my duty to remind them that they must apply for their licenses by the 10th day of May. If they do not do so, they will be liable for a fine and every day they are late they will be liable for a fine. It is my duty to remind them that they must apply for their licenses by the 10th day of May. If they do not do so, they will be liable for a fine and every day they are late they will be liable for a fine.

LINOLEUM is the Ideal FLOOR For KITCHEN

In Summer your Kitchen floor should be cool. But in winter, naturally, you want a warm floor. No floor meets these requirements so well as Linoleum. It is made mainly of cork, the best non-conductor of heat known. In summer it is cool; in winter, warm. Because there are no cracks in a Linoleum floor. It is warmer than the average wood floor.

LINOLEUM is sanitary and easy to clean. It saves you hours of scrubbing. It is comfortable to tired feet, a point to think of if you have to stand at your work. It is durable and inexpensive. Furthermore,

Every yard of ARMSTRONG'S LINOLEUM is guaranteed to give entire satisfaction. Our stock includes both printed patterns and inlaid designs that run clear through to the burlap back, and last till the floor is completely worn out.

Our prices will interest you.

"Our Family Medicine"

I WILL WRITE you in regard to Black-Draught Liver medicine, as I have been using it more than 14 years," says a letter from Mr. S. F. Mintz, of R. F. D. 2, Lakeland, N. C. "I keep it in my home all the time, for it is mostly our family medicine. When we begin to feel feverish or sluggish, with trouble from the liver or stomach, we take a dose of Theodford's Black-Draught and the trouble is soon over. I mostly buy a dollar package at a time, and it has saved me many a bill."

Theodford's Black-Draught is a purely vegetable remedy, acting on the liver, stomach and bowels. It is made from selected herbs and roots, and contains no calomel or other mineral drugs.

It has been found of great value in indigestion, stomach trouble, sick headache, constipation, and lazy liver, helping to relieve the symptoms caused by these troubles, and to put the digestive system into proper working order. Get a package of Black-Draught Liver medicine from your druggist or dealer, today. Be sure to get the genuine—Theodford's.

HISTORY'S MYSTERIES

SHIP THAT NEVER CAME BACK

THE sea has its full quota of mysteries—ranking all the way from the depredations of Captain Kidd, through the strange affair of the Marie Celeste, and up to the disappearance of the cutter Cyclops during the World War—but none of these contain elements any more remarkable than the vanishing of the President, one of the first of the steam leviathans to cross the ocean.

Eighty years ago, Englishmen and Americans alike, were rejoicing in the fact that steamers had succeeded in regularly crossing the Atlantic, that a voyage could be made in as short a time as two weeks and that the first of the Cunarders, the steamship Britannic, had come safely into the harbor at Boston after the quickest passage on record. Steam, it was freely predicted, had conquered the sea, and men who had gone to London, spent nearly a week in England and returned within 20 days were regarded as wonderful examples of the new-found marvels of trans-Atlantic travel.

One of the vessels which had been launched only a short time before, and which the English public would hail as the latest word in luxurious oceanic comfort, was the President. Two hundred and sixty-eight feet in length, 64 feet wide, and with a displacement of 2,900 tons, this liner was not as large as many of the ships which ply the inland waterways today—but she was the marvel of the hour in 1840, and when she sailed from New York on her ill-fated voyage in March, 1841, every craft in the harbor paid tribute to her size and her superior ability.

In April, however, reports began to filter in from Liverpool that the President was overdue, and throughout the spring and far into the summer there was an agony of suspense in England as well as in the United States, particularly as the passenger list of the missing ship contained the names of many prominent in public life, including Tyrone Power, hailed as the prince of American comedians and George Clugston Cookman, whose eloquence was claimed to be superior to that of Henry Clay or Daniel Webster. The latter carried with him the first dispatch which Webster, as secretary of state, had written to King John, and the superstitions of both sides of the Atlantic claimed to see a strange omen in the coincidence that the first President of the United States to die in the White House, William Henry Harrison, had passed away at the time when the ship which bore the name of his office began to be missed.

The fate of Power and Cookman, as well as that of the duke of Devonshire, and a hundred other passengers, has never been settled. The only ray of light that was shed upon the mystery was that a Portuguese ship had reported sighting a large steamer moving slowly under sail, but as the steamer did not hold the flag nor display any signal, it is believed that she was the President, no substantial trace of which has since been discovered.

How to Make and Use It

BY A. HYATT VERRILL

Copyright by Harper & Brothers

- ### XXV. USEFUL THINGS TO REMEMBER
- That a crystal detector set is never as efficient as a vacuum-tube set, no matter what sort of equipment you use.
 - That a crystal detector set cannot be satisfactorily amplified.
 - That most small or cheap sets cannot tune out local interferences.
 - That grid-leaks are not used on crystal detector sets, but only on vacuum-tube sets.
 - That a large tuning coil with wires spaced closely will give better results than a short coil or one with wires far apart.
 - That a vari-condenser and a loose coupler gives finer tuning.
 - That a vacuum-tube is about thirty times as efficient as a crystal detector.
 - That a wave length has little to do with the distance you can receive.
 - That 1000 ohm resistors will often raise a cheap set from inefficiency to efficiency.
 - That a loading coil is not needed with a loose coupler and variable condenser.
 - That if two or more crystal sets are used on one aerial one can be used to tune out a set and a switch must be provided to throw sets out and in.
 - That a loose coupler is better than a transformer.
 - That a loose coupler should be placed between aerial and ground.
 - That most saves in buying cheap loud speakers by dealers is really their price, and that a great deal of trouble is caused by them.
 - That a loud speaker should be placed between aerial and ground.
 - That when you receive in buying cheap loud speakers by dealers is really their price, and that a great deal of trouble is caused by them.
 - That a loud speaker should be placed between aerial and ground.

PRESS COMMENT ON PHILIPPINES

Islands their independence before they have cause to rebel.

Shall We Let Philippines Go? (Editor "Rapido" (n.) Republican.)

The United States cannot continue to hold the Philippines unless this nation wants to give the lie to its own principles in the matter. The United States must keep faith with the world. The American people do not want the Philippine Islands to become their...

Bible Thoughts for the Week

Sunday.
INFINITE WISDOM AND KNOWLEDGE.—O the depth of the riches both of the wisdom and knowledge of God! how unsearchable are his judgments, and his ways past finding out! For who hath known the mind of the Lord? or who hath seen his counsel?—Romans 11:33, 34.

Monday.
A NEEDED PRAYER.—Will thou not revive us again: that thy people may rejoice in thee.—Psalm 85:6.

Tuesday.
PRESERVED FROM EVIL.—The Lord shall preserve thee from all evil; he shall preserve thy soul.—Psalm 121:7.

Wednesday.
OMNIPOTENT.—I can do all things through Christ which strengtheneth me.—Philippians 4:13.

Thursday.
POWER AND MAJESTY.—Bless the Lord, O my soul. O Lord my God, thou art very great; thou art clothed with honor and majesty.—Psalm 54:1.

Friday.
HONESTY IS BEST.—A false balance is abomination to the Lord; but a just weight is his delight.—Proverbs 11:1.

Saturday.
THE WINDOWS OF HEAVEN.—Bring ye all the tithes into the storehouse, that there may be meat in mine house, and prove me now herewith, saith the Lord of hosts, if ye will obey my voice, saith the Lord of hosts.

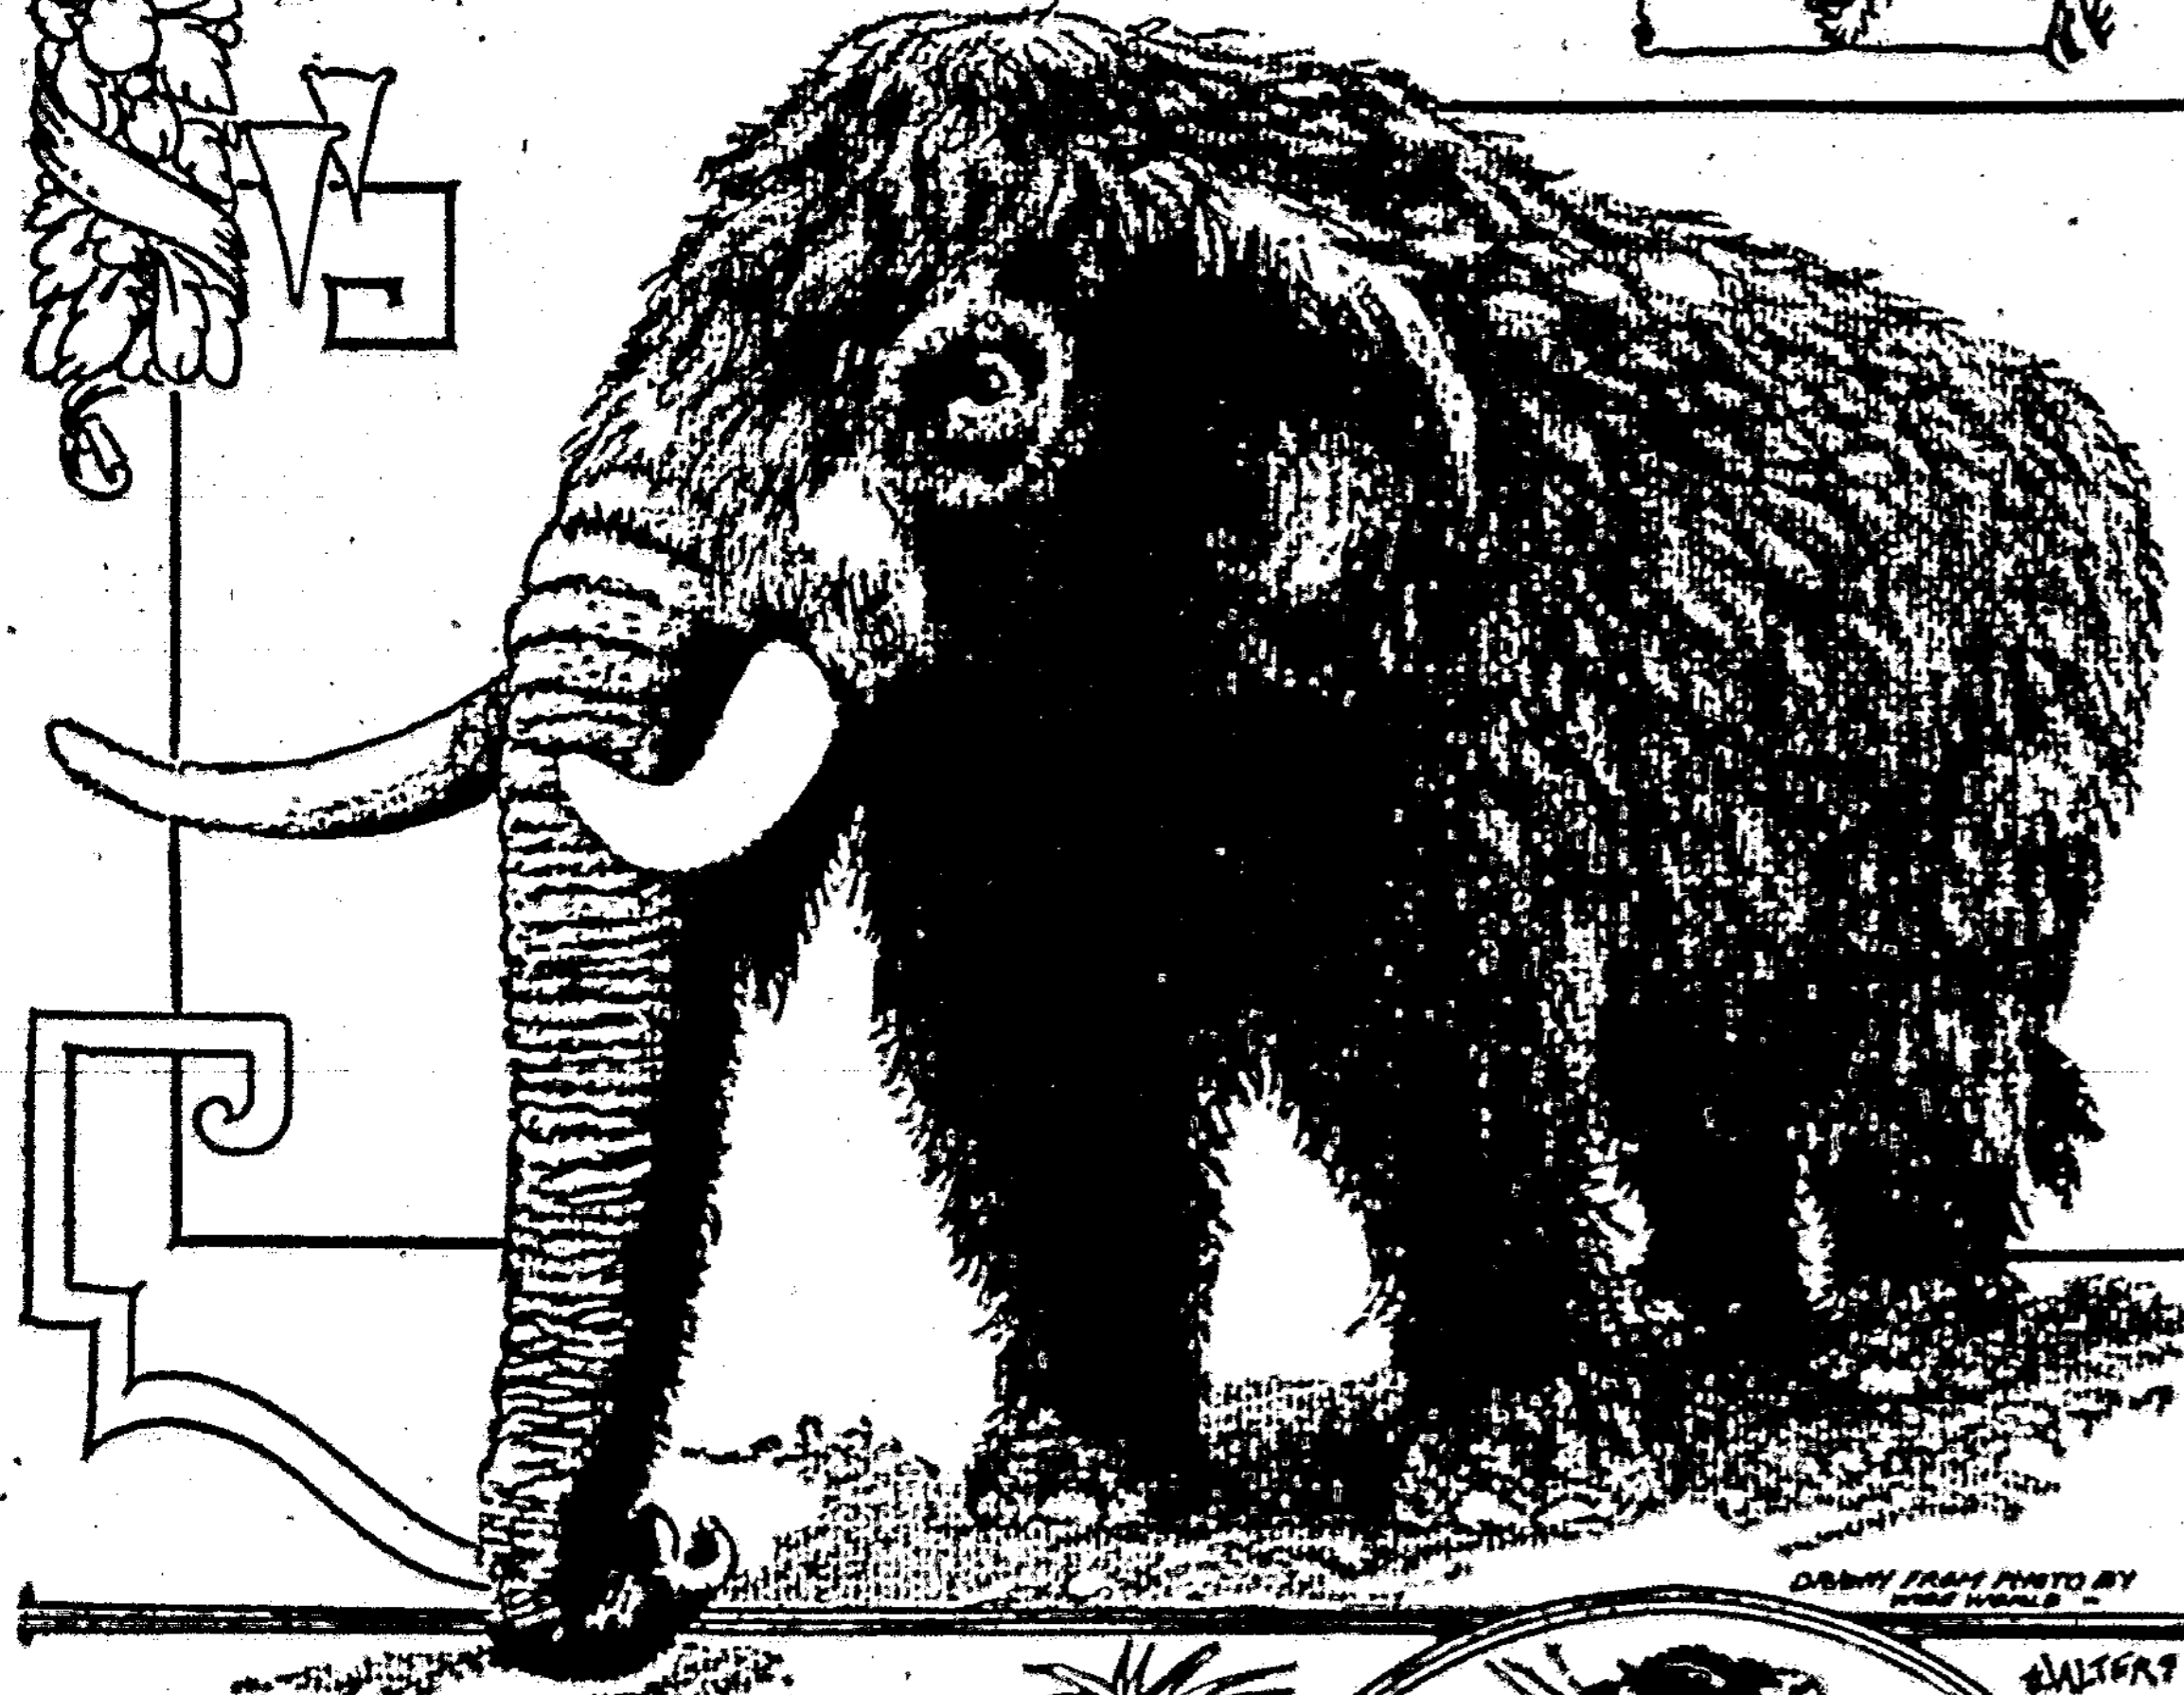

Notice of Suit
IN THE DISTRICT COURT THIRD JUDICIAL DISTRICT, NO. 3861, CIVIL ACTION BY ATTACHMENT

LINCOLN COUNTY, NEW MEXICO
ED S. GIBBANY, Plaintiff,
VS.
ALBERT MASSEY and
BARNEY L. MASSEY, Defendants.

NOTICE OF PENDENCY OF SUIT
The defendants, Albert Massey and Barney L. Massey, are hereby notified that the plaintiff, Ed S. Gibbany, has commenced suit against you in the above styled court and cause, the general object of which suit and the nature and amount of plaintiff's demand are: The civil action by attachment on two certain promissory notes, aggregating the sum of \$1,000.41, principal, interest and attorney's fees due from the said defendants, and your property has been attached, which property is described as follows, to-wit: All your right, title and interest in that certain 40% acres in Lincoln County, New Mexico, aforesaid, described as follows, to-wit:

Beginning at a quarter corner of north and south lines between sections 7 and 12 in Twp. 11 South, Ranges 17 and 18 East; thence west parallel to section line 26 chains to corner No. 2; thence south 20 chains to corner No. 1; thence east 20 chains to corner No. 3; thence north 20 chains to corner No. 4; thence west parallel to section line 26 chains to corner No. 2; thence south 20 chains to corner No. 1; thence east 20 chains to corner No. 3; thence north 20 chains to corner No. 4.

Mighty Mastodon Unearthed

By JOHN DICKINSON SHERMAN

SPADES are tramping these days. It would seem as if the archeologists and paleontologists and many other "ologists," to say nothing of plain antiquarians and fossil hunters, were digging all over the globe. More power to their elbows. They are trying to wrest both historical and prehistoric secrets from Mother Earth in the interest of science. And we all want to know how old man is, at what stage of the evolution of the modern animal world he put in an appearance, and what he did.

One of the pet theories of the paleontologists is that Asia is the "mother of continents" and the cradle of life on this globe. Dr. Henry Fairfield Osborn, director of the American Museum of Natural History, put forward this hypothesis in 1900. He based it on the fact that two great deposits of the remains of animals at the dawn period of mammalian life on the northern hemisphere have been found at widely separated points—one in Europe, the other in the American Rockies. He reasoned that these animals could not have originated where the remains were found, else they would have spread westward and eastward respectively. His conclusion was that they must have originated at some half-way spot on the other side of the globe. That is why the third Asiatic expedition of the museum is now in the Gobi desert in Mongolia in search of the paleontologic garden of Eden and the "missing link."

Luck plays its part in this business of wresting secrets from the earth with a shovel, just as it does in politics and horse racing. It is a curious fact that mining, road-building, and the ordinary activities of civilized men have brought to light by accident many of the most important fossils.

A mighty mastodon—or at least its skeletal parts—has just been unearthed at Los Angeles. By accident? Well, rather. It was found by workmen in a brickyard within a stone's throw of the Mission road.

And it is a "mighty mastodon." The tusk measures nine feet and weighs 105 pounds—the largest mastodon tusk ever discovered in America.

Any other city but Los Angeles would be excited over this mastodon, but the finding of prehistoric mammals is an old story in this region. Out of this locality, centering in the brickyard, have been dug skeletal parts of a Columbian elephant, an Imperial elephant, and another mastodon. The bones of mylodons (giant ground sloths), horses, camels, deer, and many other herbivores have also been found.

Besides all this, seven miles from the center of the city are the famous La Brea asphalt pits from which have been taken the remains of over 2,000 sabretooth tigers, seventeen specimens of the elephant family, and 185 dire wolves, together with an im-

mensal mass of the bones of camels, sloths, cave-bears, deer and bison and of lesser animals and of birds.

One wishes for the imagination of a Dante to vision the pictures suggested by this brickyard and these asphalt pits and their contents. There are two significant facts to be noted. One is that the claybanks of the brickyards contain the bones of herbivores only. The other is that the asphalt pits were the common burial ground of herb-eaters and flesh-eaters. On these two facts hangs a thrilling story of the prehistoric tragedy of the Ice Age.

This big mastodon of the claypits and the sabretooth tigers of the asphalt pits belong to the Ice Age of the Pleistocene epoch, which some authorities think may have begun 500,000 years ago and lasted until 25,000 years ago. It was after the "Age of Reptiles" and before the "Age of Man."

The brickyard excavation extends back from the ancient bed of the Los Angeles river in the form of a horseshoe into a thirty-foot bank. This perpendicular bank of clay shows four levels of drift material, which were washed down from the mountains and deposited layer by layer during four inter-glacial seasons of the Ice Age. In each layer are the fossils of the animals that met their death in the river during the corresponding time. The mastodon was found in the lowest layer of the four. Before the Los Angeles river changed its bed this brickyard basin was a soft-clay quagmire about a quarter of a mile wide.

The La Brea asphalt pits were originally blown out by eruptions of gas. In these miniature craters oil collected. Evaporation changed this oil into asphalt with a semi-solid crust. Water seeped in on the crust and sufficient vegetation grew to camouflage the death-trap.

The stage is set. Now for the tragedies of the river quagmire and the asphalt death-trap.

Before the ice cap marched down from the north the climate of all the country from Alaska to Los Angeles was tropical. So the mammals had nothing to do but eat, increase in size and multiply. The ice cap and the cold drove the vast animal borders steadily south. The weight of the ice

cap, miles in thickness, forced up volcanic fires, with their poisonous gases. The feeding areas decreased. Food for the grass-eaters grew correspondingly scarce. In time every green spot was the center of the herbivores surrounded by the carnivores which preyed upon them.

The region about Los Angeles may have been the scene of the final tragedy. Picture a bison driven by a sabretooth tiger onto the surface of a La Brea pit! The heavy bison cuts through the crust. It falls. The tiger leaps upon it, since a beast of prey will usually follow its prey into any danger the distance of one leap. The tiger in turn is stuck in the asphalt. Both perish. Down swoops a bird of prey to pick their bones and to perish in turn.

Picture our mastodon feeding on the edge of the river marsh and attacked by a pack of dire wolves, too strong to be driven off! The great father of elephants takes to the marsh. The wolves do not follow him, since neither canines nor felines will usually wade or swim after their prey. The mastodon becomes mired in the soft clay, to perish miserably and to be covered in time by debris swept down by the stream from the mountains, and in later ages to be uncovered by civilized man excavating clay for bricks.

If you have the imagination, you may draw other pictures. Doubtless hunger drove many a grass-eater upon the asphalt death-traps and into the soft-clay quagmire, in spite of the instinct that ordinarily keeps wild things out of such dangers. Doubtless there were earthquakes, and in time of earthquake wild life goes crazy with fear. And certainly the carnivores outlasted the herbivores. It may be that the final struggle for survival among the flesh-eaters was around and even on the La Brea death-traps.

In any event, this was the end of the prehistoric horse, camel, elephant, mastodon, ox and tiger, on the North American continent. Man probably did not suffer in this tragedy of the animal world. He probably came, whether from the south or from the west, after the final ice cap had withdrawn into the north.

a pair of pillars. They will fill quickly owing to the fact that the air has been largely exhausted from them during manufacture. When a fire occurs one or two of these globes are thrown at the burning object.

Sand in the Housebold. Nothing is better than clean sand, mixed with warm water, for thoroughly cleaning the baby's mouth.

Fire Extinguishers

Cheap fire extinguishers may be made by filling old electric lamp globes—or bottles can be used with some solution having special fire-extinguishing properties. Such a solution can be made by taking 20 parts of sodium chloride, 5 parts of common

NATIONAL CAPITAL AFFAIRS

Americans Want a Billion From Germany

WASHINGTON—America asked no reparations of Germany as a result of the World war, but American citizens are demanding damages to the extent of a billion dollars.

This is the extent of American war claims—10,000 of them—involved in the demands of individuals and the government, covering damages to American property and loss of non-combatant American lives in the great conflict in which Germany was vanquished.

Argument of the case, said to involve more money than any other in the history of the United States, has been begun before the mixed claims commission of the United States and Germany, with Robert C. Moffis representing the United States.

The billion dollar total has a terrifying sound when Germany's present-day claims of inability to meet the huge obligations of the war are considered.

It is the opinion of officials of the alien property custodian's office and others connected with the government that the final score against Germany in this case will approximate \$150,000,000.

All the demands, if met dollar for dollar, would total a billion dollars.

Settlement of the issues involves the disposition of about \$350,000,000 of German owned property now held by the alien property custodian. On one side is the question whether these millions of dollars of alien-owned property shall be confiscated and the proceeds used to pay American claimants, hundreds of them the heirs of submarine victims, or held as a guarantee of payment and eventually returned.

Authorities here declare that the property held in this country will not be confiscated. There is agreement of minds on all sides that private property cannot be used to pay national debts, and also that claims of the heirs of Lusitania victims and other Americans who suffered at the hands of Germany are national obligations.

Besides the personal claims, the United States veterans' bureau has laid claim to the sum involved in the cost of insuring soldiers and sailors. No sum for Lusitania claimants has been announced, but prior to the establishment of the commission such claims had been filed with congress for \$100,000,000.

To Curb Powers of the Supreme Court

UNEXPECTED support of the movement to curb the powers of the Supreme court, which heretofore has been confined to radicals in congress, is found in Senator Fess (Rep., O.) long identified with the conservative wing of his party. He has declared in favor of legislation requiring concurrence of at least six justices to render a law unconstitutional.

Notwithstanding general opposition among Republican conservatives to interference with the authority of the Supreme court along the lines proposed by Senator La Follette (Rep., Wis.) and Senator Borah (Rep., Idaho), Senator Fess made public a letter in which he declared that acts of congress "should not be set aside as unconstitutional by a 5 to 4 vote," because this enabled one man to change a decision.

Senator Fess recalled that he supported the provision in the Ohio constitution requiring concurrence of all but one judge to declare an act of the legislature null and void.

"I supported the provision," Senator Fess said, "for the following reasons: The three departments, legislative, executive, and judicial, should be permitted to function independently of one another and should be free to exercise that function even when it sets aside the act of the other. That is, the legislative should be permitted to act inde-

Radicals Keen After Tax Legislation

RADICAL Republicans in the next congress are going after tax revision legislation tooth and toenail. Representative Frear (Rep., Wis.) has already framed the tentative tax revision program for submission to the radical congressional group, self-styled the "progressive group," of which Senator La Follette (Rep., Wis.) is the avowed and acknowledged leader.

This program, while subject to change when the radicals get together next fall for a round-up on legislative procedure in a congress which they hope to sway by holding the balance of power, was outlined by Representative Frear as follows:

Restoration of the excess profits tax but with a lower rate than formerly in the lower brackets but a heavier tax in the higher brackets.

Imposition of a retroactive tax on undistributed earnings of corporations. An increase in existing taxes on inheritances.

A tax on gifts to prevent evasion of estate taxes.

Abolition of the secrecy now required by law in the case of tax records and proceedings.

Besides these bills amending the revenue law Mr. Frear said that he also would urge a constitutional amendment making it possible for the government to reach both tax exempt securities and stock dividends.

This program is regarded by conservative leaders here as giving a fairly definite line of the form of attack to be launched against big business by the radical Republicans. Mr. Frear, the principal tax spokesman of the group, as a member of the ways and means committee which will frame revenue legislation, is in a position to be a leader in the fight.

"Pursuant to requests that bills be prepared and submitted next session for revision of the income tax laws, several measures have been drawn to meet weakness in the 1921 revenue law," said Representative Frear today.

"Tentative bills will be ready for submission to the progressive group and members of congress regardless of party who feel the need of definite legislation to meet wholesale investments in tax-free securities and in stock dividends, that are destroying the effectiveness of the income tax law. Over \$20,000,000,000 invested in tax-free securities and stock dividends pays no personal income tax today. When estimates for government purposes were made these wholesale tax evasions were never anticipated."

Plans for Reduction of Unemployment

RECOMMENDATIONS for reducing unemployment during business depression are contained in a report made public by Secretary of Commerce Hoover. The report was prepared by a special committee appointed by the President's conference on unemployment more than a year ago.

Members of the committee were Owen D. Young, chairman of the board of the General Electric company, chairman; Joseph H. DeForest, former president United States Chamber of Commerce; Miss Mary Van Kleeck, Russell Sage foundation; Matthew Well, vice-president American Federation of Labor; Clarence M. Woolley, president American Radiator company; Edward E. Hunt, secretary of the President's conference on unemployment, secretary.

The report represents also the work of more than 200 employers, labor leaders, economic experts, financial advisers and social workers.

Recommendations of the committee include the following: Greater control of credit expansion by individual banks.

Control of inflation by the federal reserve system.

After Every Meal
WRIGLEYS
Top off each meal with a bit of sweet in the form of WRIGLEYS.
It satisfies the sweet tooth and aids digestion.
Pleasure and benefit combined.
FOR THE CHILDREN

SPOHN'S
DISTERPHER
COMPOUND
A safe, dependable and effective remedy for Coughs, Colds, Distemper, Influenza, Heaves and Worms among horses and mules. Absolutely harmless, and as safe for colts as it is for stallions, mares or geldings. Give "Spohn's" occasionally as a preventive. Sold at all drug stores.
SPOHN MEDICAL CO. GOSHEN, IND. U.S.A.

Laxatives Replaced
By the Use of Nujol
Nujol is a lubricant—not a medicine or laxative—so cannot gripe. When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication. Try it today.
Nujol
A LUBRICANT—NOT A LAXATIVE

Possible Reason.
"Why does the boss get down so early in the morning?" "I think he enjoys seeing us come in late."

"COLD IN THE HEAD"
is an acute attack of Nasal Catarrh. Those subject to frequent "colds" are generally in a "run down" condition.
HALL'S CATARRH MEDICINE is a treatment consisting of an Ointment, to be used locally, and a Tonic, which acts quickly through the blood on the mucous surfaces, building up the system, and making you less liable to "colds." Sold by druggists for 25c a bottle.
W. J. Cheney & Co., Toledo, O.

Wall Heard in All Ages.
How great a pity that we should not feel for what end we are born into this world, till just as we are leaving it.—Walsingham.

Backache is a Warning!
Those agonizing twinges across the small of the back, that dull, throbbing backache may mean serious kidney weakness—serious if neglected, for it may lead to gravel, stone in the kidney, bladder inflammation, dropsy or fatal Bright's disease. If you are suffering with a bad back, have dizzy spells, headaches, nervous, dependent attacks or disordered kidney action, heed Nature's warning. Get after the cause. Doan's Kidney Pills have helped thousands. They should help you. Ask your neighbor!
A Colorado Case
J. B. Rose, R. F. D. No. 1, Box 122, North Dakota, Colo., writes: "I was so sore over my right kidney it seemed as though it were being torn from me. When I laid down at night I could hardly stand the pain. My kidneys acted too often and the secretion was a reddish color. I began using Doan's Kidney Pills and kept on using them until I was cured."

Shake Into Your Shoes
And sprinkle in the foot-bath Allen's Foot-Ease, the antiseptic, healing powder for Painful, Swollen, Sweating feet. It prevents blisters and sore spots and takes the sting out of corns and bunions. Always use Allen's Foot-Ease to break in new shoes and enjoy the bliss of feet without an ache. Those who use Allen's Foot-Ease say that they have solved their foot troubles. Sold everywhere. Trial package and a Foot-Ease Walking Doll sent Free. Address Allen's Foot-Ease, La Roy, N. Y.

YOU CAN color your hair naturally, quickly and safely. No pain, no itching. Just wash and dry. 50c a bottle.

LOCAL AND PERSONAL

Ed Peters was over Saturday and Sunday from the Bonito.

Tomorrow is the big clean-up day. Be ready for the wagon when it comes.

Mr. and Mrs. Tom Brag returned Tuesday from El Paso and went out to their home on the Bonito.

Just arrived — Buddy Fillers, Candies, Cigars, Etc. Paden's Drug Store.

Joe H. Montoya was down yesterday from Jicarilla. Joe reports everything quiet in the old placer camp.

Henry Lutz, president of the Carrizozo Trading Company, made a business visit to Albuquerque this week.

Robert Leslie, Sr., was in town Saturday from White Oaks. He says all kinds of stock are doing well in his ranching section.

The walls of the Board of Trade building, that had been standing since the fire some weeks ago, collapsed with last night's storm.

Remember Mother's Day, May 13. Candies and gifts. Paden's Drug Store.

We were developing an ode to spring, inspired by the warm, pleasant days just passed. But, this morning, we have placed the ode in cold storage. It may never be resurrected.

Leather Suit Cases, Leather Hand Bags, 20 per cent discount, at the "Store of Class."—Carrizozo Trading Co.

Phillip H. Blanchard was here yesterday from his ranch in the country. He reports abundant moisture in his section, grass coming on apace and stock showing great improvement.

W. H. Sevier was over Sunday from Capity to witness the ball game and to greet old friends. Billie recently sold his place on the south slope of the Capitana and is building a residence in Capitan.

King Tut's Shirts, King Tut's Neckties, the very latest, at the "Store of Class," where you always find the latest creations.—Carrizozo Trading Co.

Lloyd Taylor left yesterday to return to the State of Chihuahua, Mexico. Lloyd has been foreman of El Capitan Company, at the Block ranch, for many years, and is looking after the company's cattle in Mexico.

FOR SALE—Mammoth Bronze Turkeys—Toms, 34 to 36 pounds, \$25.00 to \$27.50. Hens, 12 to 15 pounds, \$15.00. Eggs, \$1.00 each. W. N. Williamson, Carrizozo, Phone 94. 4-20-4t

Only teachers' examinations will be given this year, we are informed by Mrs. Coe, County Superintendent of Schools. The dates have not yet been determined by the State Board of Education, but will probably be fixed for June and July.

Candies, the choicest and sweetest made, at Mrs. J. K. Such's. Get a sack.

L. R. Lamay was down Wednesday from his home on the Nogal Mesa. Dudge says range conditions are excellent and that prospects for farming were never better. He is preparing to plant and is planting a big crop, part of which includes 60 acres in frijoles.

A storm suddenly broke on us about 6 o'clock last night, and the sky soon took on the hue of the earth. It came from the east, unaccompanied by moisture, and a magnificent shower of dust was the result—and it continues this morning, though its fury has abated somewhat.

Baptist Church

(T. M. BLACKLOCK, PASTOR, PHONE 23)

We will be glad to see you at our regular services for the coming week, including preaching by the pastor at both hours Sunday.

The Fifth Sunday meeting at Mountain Park was a successful one, with fine fellowship, good talks and spiritual sermons. Among other good things there were four quartets—no, not white mule, but white people—four quartets of a quartette from Tularosa, which had a large part on the program Saturday evening. There were fifty young people from Tularosa at this service.

The meeting closed Sunday evening with a sermon by the Carrizozo pastor. The next session will convene with Cloudcroft church Friday evening before the Fifth Sunday in July.

Card of Thanks

We wish to extend our very sincere and heartfelt thanks to the many kind friends who were so sympathetic and helpful during the recent illness of our beloved wife and mother and bestowed such loving kindness after the passing.

E. E. COLX,
MRS. R. M. HAMILTON
MARGARET COLX.

Come in and be convinced that cash talks with us.—City Market.

Billie Ferguson is down today from the Mesa. He says the temperatures are low in the hills, but that the fruit is still undamaged, though, if there is not a rising temperature this afternoon, there is cause for serious concern for the safety of fruit tonight.

Delicious are the candies now at Mrs. J. K. Such.

Trunks, Traveling Bags, Suit Cases

The Month of May

Tells us that VACATION TIME is near. We are in position to give you the best selection in Trunks, Suit Cases and Hand Bags.

In Our Ready-to-Wear Department

You will find the very latest in DRESSES and COATS, New Sport Models in SKIRTS.

Shoes for any Occasion

Sport Shoes, Patent Lace Oxfords. Black Kid Strap Pumps and Satin Pumps. Suede Trim Mahogany Kid Colonials. Keds for Women include the latest styles.

Carrizozo Trading Company

"The Store of Class."

"More for your Money."

White Oaks Dance

A dance will be given at White Oaks Saturday night, May 5, to which everyone is cordially invited. The spacious hall, the splendid floor and good music, combined with the well known hospitality of the White Oaks people, assure a good time. Refreshments will be served, and a pleasant evening is in store for all who attend.

Leather Suit Cases, Leather Hand Bags, 20 per cent discount, at the "Store of Class."—Carrizozo Trading Co.

The base ball game Sunday on the local grounds resulted in a victory for Carrizozo over Capitan by the score of 11 to 9. It was more of a practice game than a contest, inasmuch as Capitan was not completely organized, and the locals furnished the visitors some of their players. The Carrizozo team goes to Mountainair Sunday to cross bats with its old rivals.

Notice of Clean-Up Day

Now that spring is upon us, with the usual cessation of winds and the more frequency of showers, we naturally want to enjoy the more beautified Village that nature in this way provides. Much more will be the enjoyment, however, and much more the beauty of our Village, if we put forth an effort at this time to clean up the streets and alleys and all vacant lots, and all other places, where silt and trash have accumulated during the winter.

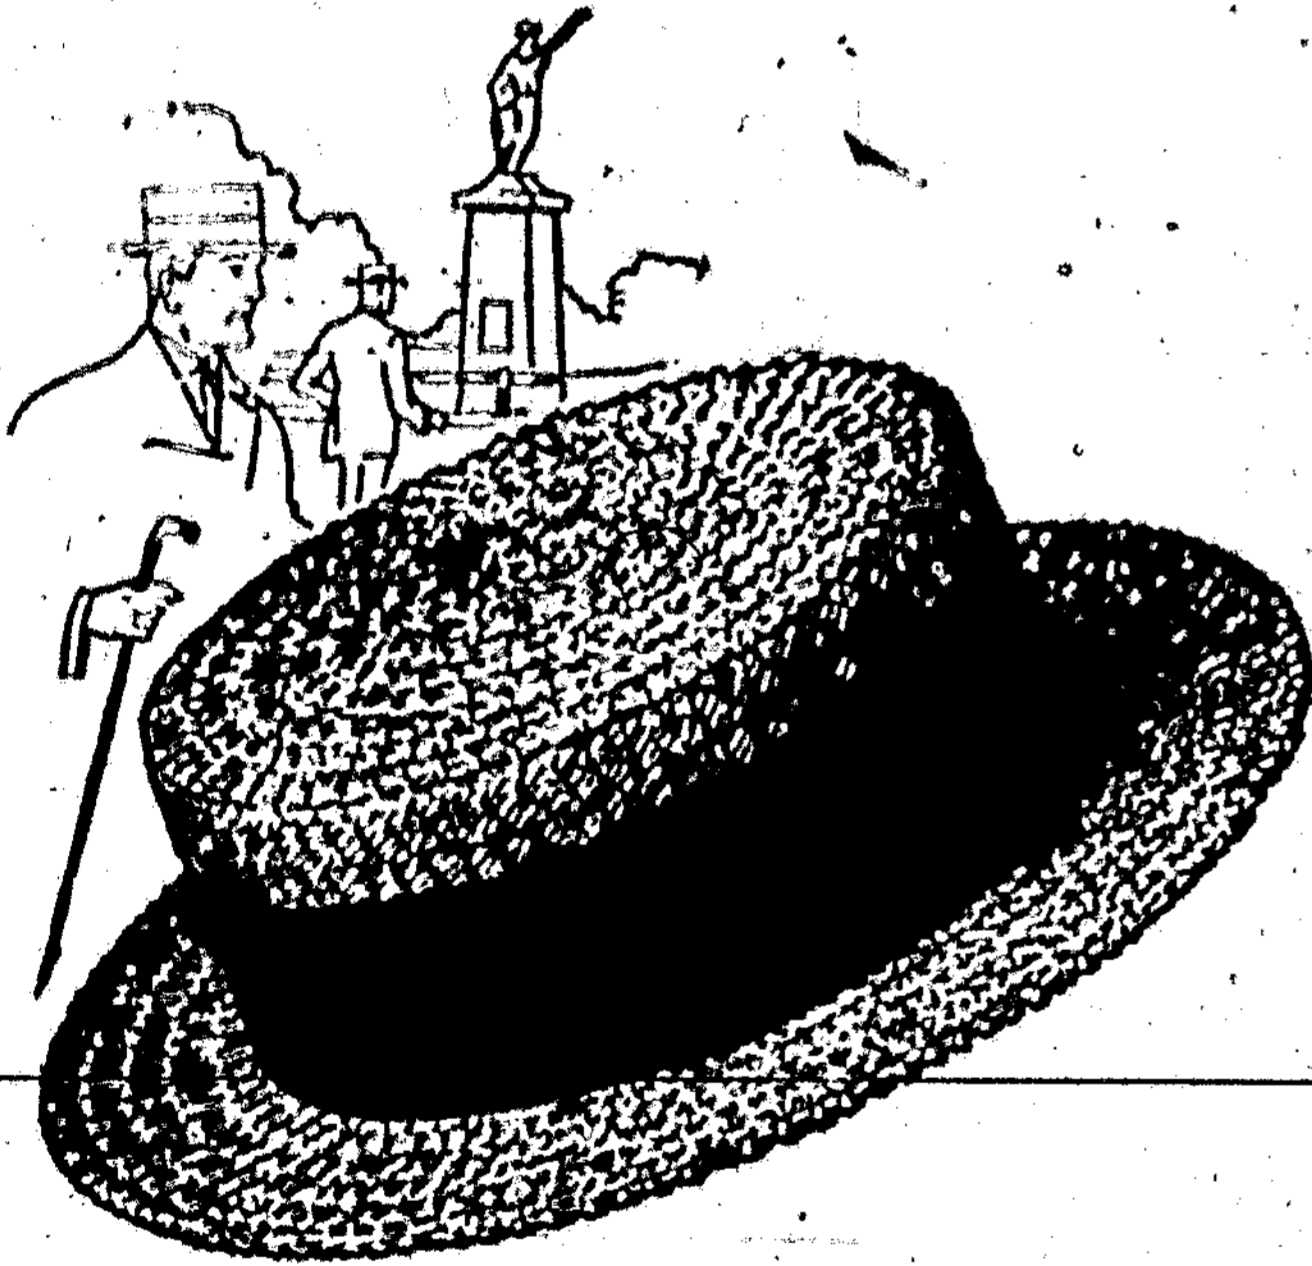

With this end in view, I hereby proclaim Saturday, May 5, 1934,

CLEAN-UP DAY;

and upon this day vehicles will be provided and call for all rubbish and trash that you may have gathered together convenient for loading. All are urged to put forth an effort to clean up their premises before the above date, and in this way do their part in this much needed service.

JULIAN M. TAYLOR,
Mayor.

Spring Hats

All the latest shapes and shades, up-to-the-minute styles.

Come in and look them over.

We have a Hat here to fit your taste and your purse.

There's a new Clothcraft Suit here waiting for you to slip into it.

Madras Shirts

Neat striped effects in blue and white, green and white and tan and white.

These are always in good taste and will stand a lot of wear and laundering.

You'll find all sizes, and just the kind of shirt you wish.
