

CARRIZOZO News

OLDEST AND LEADING NEWSPAPER IN CIRCULATION IN THE COUNTY OF LINCOLN, NEW MEXICO

VOLUME 24

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, MARCH 7, 1924

NUMBER 9

Wedding Bells

Last Friday evening at the Methodist parsonage, Rev. W. R. McPherson officiating, Elmer Baker and Miss Grace Taylor were united in marriage. Early this week the young couple were given a "shower," and many friends were there to give hearty congratulations.

The principals in this trip on sea of matrimony are among the most popular of the younger set in town. The groom, who has filled a man's position long before he donned knee pants, is so favorably known that in chronicling his good qualities we need only say that he is entitled to, and is accorded, every esteem by all who have known him during boyhood when he played a man's part.

The bride, a daughter of Mr. and Mrs. Robt. H. Taylor, is one of the most charming young women in our community, and numbers her friends by her acquaintances. The News joins the many friends of the young couple in wishing them a pleasant and prosperous future.

Basketball Tournament

The basketball tournament for the Eastern New Mexico championship was held as scheduled at Roswell Friday and Saturday last week. In the initial game Friday the Corona girls lost to Roswell and were no longer contenders in the contest.

The Carrizozo boys met with a like defeat, Tatum being the victor, and they were out of the running. The Carrizozo girls, however, won steadily up to and including the semi-finals, but lost in the final, in a grilling game with their old antagonist, Floyd, by a score of 19 to 23. Two of the regular players of the Carrizozo team were out of the final test—one from an injury received in a previous game and the other on account of illness. Even so, Floyd was forced to her best, and won by a very slight margin. Regardless of our failure to cap the peasant, we still believe we have the best girls' team in the southwestern part of the state of New Mexico. Hagerman again drew down the honors for the boys' team.

Santa Fe Letter

(From Our Correspondent)
Santa Fe, March 4.—Governor

Hinkle has come out in favor of the repeal of the poll tax.

Raising this tax from \$1 to \$2

and making it applicable to

women as well as men (the act

of the last legislature) has

brought down a flood of protest-

ing petitions on his office. Since

the legislature has long since

adjourned, they come addressed

to the chief executive.

An effort is being made in some

quarters to make political capi-

tal out of the unpopularity of the

increased tax, according to the

governor. It can't be gotten

away with.

The senate, where a Republi-

cian majority was in the saddle,

first passed the school code, which

carried the provisions for the in-

creased poll tax, by a vote of 23

to 0. Then the house, which did

not get it until the rush of the

closing hours of the session, pass-

ed it, 44 to 3.

In the Republican senate, not a

single senator is on record as

having voted against it.

But for the fact that such ac-

tion would result in crippling the

schools, Governor Hinkle would

have vetoed it when it came to

his office. It was a case of Hob-

son's choice with him. He had

either accept the bill as it was or

deal a body blow to the schools.

Following a conference with

Governor Hinkle and Attorney

General Helmick, State Land

Commissioner Justissana Baca

has announced that the state will

appeal to the United States Su-

preme court if necessary in con-

test proceedings against approxi-

mately 210 sections of coal land.

In the majority of cases, the

Santa Fe Land Office has held

adversely to the state and the

general land office at Washingt-

ton, D. C., has sustained it as to

50 sections, or parts of sections,

in the first group of cases taken

up on appeal. The state now

will carry these cases up to the

secretary of the interior.

The contest proceedings are

based on the contention that the

sections were automatically ex-

empted from land grants to the

state by congress because they

were mineral in character.

If the state loses out eventu-

ally, it will get cured later on

in the play.

Conservation

"It would have been bad enough if these leaves had been drawn up in the light of open day, but it was done in secret. There is a long line of precedent that there must be publicity and competition in such matters, but there was never a word heard of it until some man saw preparations made for the digging of the wells and brought the whole matter into the open.

"Such things are not done in secret unless there is something rotten. The American people of all parties stand aghast at the exploitation of these reserves. Do you know it to be a fact that in all these weeks and months that the secret service agents in five departments turned not a hand to save these reserves or find the men who gave them away?

"Conservation of our reserves is essential if the republic is to grow. We shall one of these days have no coal, no oil, no forests. And there will be nothing. I am glad that even at the expense of a national humiliation we have been warned. It is no matter for partisan rejoicing. I pity the man who can look upon this scandal in the hope that it may redound to somebody's good. It is a national disgrace. It would have been none the less a national disgrace had a Democrat made the lease. Every man and woman in America has it upon his or her conscience to stand firm for the righting of this wrong. Righted it will be or America has lost its soul."

(From a speech delivered by ex-secretary Daniels, at Philadelphia, on the subject of the oil scandal.)

of these sections, of course, but hardly as valuable.

State Comptroller R. H. Carter has called for bids for an additional state highway department for the period from March 7, 1929, to February 28, 1930. The bids are to be received up to and including March 10. The bids will be opened not later than April 1.

Senator A. A. Jones' bill for the relief of drought-stricken sections of New Mexico has passed the senate.

It is now up to the house. The measure makes available \$1,000,000 to be advanced to farmers in these sections to buy seeds for this year's planting and other necessities without security except liens on this year's crops. Unless it gets through the house, it is feared many farmers will have to abandon their places.

Senator Jones has wired Governor Hinkle asking him to use all influence he can exert to facilitate prompt action on the part of the house.

Thirty-eight federal aid projects of 378 miles of road, are now under contract for construction in New Mexico, according to State Highway Engineer James A. French. This will cost \$2,429,712.12.

Previously 71 projects, or 376.99 miles, had been built at a cost of \$6,352,448.96.

High School Play

TUESDAY, MARCH 11
(By Sept. E. R. Cole)

On next Tuesday night, March 11, at the Crystal Theatre, the Dramatic Club of the Carrizozo High School will give, as an evening's program, three short plays: The Exchange, The Darkey Wood Dealer, and My Cousin Timmie.

teacher of English in the Carrizozo High School, is director of the Dramatic Club and has done all the training on these plays.

The entertainment is given for the purpose of raising money to pay off some indebtedness on playground equipment and to provide for some more. The purpose is a most worthy one and we hope that the people of Carrizozo and Lincoln County, in their liberality and appreciation, will fill Crystal Theatre. The plays are clean and wholesome comedies, full of fun and with fine moral points. A delightful evening's entertainment.

Pupils of the schools, 25 cents; adults, 50 cents.

THE EXCHANGE

Cast of Characters

Judge, the exchanger of miseries,

Marshall Beck

Imp. office boy to the judge,

Jean Reily

A Poor Man - Fred Lalone

Oldest Dated Stone Was Found in These Ruins

Above is pictured the temple of the moon god at Ur of the Chaldeans in Mesopotamia, where the joint expedition of the British museum and the University of Pennsylvania has unearthed many new reliefs of prehistoric days. In a tomb was found the oldest dated stone, a tablet of King A-An-Ni-Pad-Da, about 4600 B.C.

National Goat Farm Helps Sick Babies

Produces Milk Worth Double Cow's Product

Washington.—The surroundings of Washington lack the cozy chafers, the snow-crowned mountains and the robust Alpine climbers and singers that are infallible guide posts in introducing the traveler to the heart of Switzerland, but the neighborhood of the national capital boasts one typically Swiss earmark—it is the Belvoirville milk goat herd owned and operated by Uncle Sam and one of the best Tom Thumb Dairy projects of its kind in the country.

Washington has benefited markedly as the result of Uncle Sam's entrance into the goat-raising business some sixteen years ago, remarks the Washington Star, for much of the nutritious and easily digestible goat's milk produced at the national farm, about sixteen miles from the White House, has been used to cooperative research at the City Kitchen and Georgetown University Hospital for the treatment of pasty infants and invalids suffering from malnutrition.

Disciples of Sanitation.

The pictorially milling goat is the exact antithesis of the ordinary, run-of-the-mill goat. The blue-blooded goats are disciples of sanitation. They will eat nothing but clean and pure food. They require sanitary stables and yards. Fortunately, they keep their shiny coats as spotless and immaculate as those of the most prolific "fashion" of the feline world.

The government goat farm features a herd of 40 grade and pure-bred Toggenburg and Saanen milk goats of all sizes and ages.

The average milk doe weighs between 110 and 115 pounds yet despite her diminutive size she produces from seven to ten times her weight in nutritious milk each year. The average milk doe in the Belvoirville herd produces from 85 to 95 quarts of milk daily during the peak production of her short annual milking period. The herd due to the fact has a record production of 1,267 pounds of milk and 95 pounds of butterfat for one lactation period, while the average output of the entire herd of 24 milk does is well over the 300-pound milk production mark.

Coddy growth continues to come about to 10 cents a day to feed the 1,267 cows that supply the nation with the large weather maps distributed in public places, such as railway stations, post offices, or government buildings. The weather bureau of the United States Department of Agriculture issues a printed explanation of the weather map, telling in detail what the various marks and lines mean, and how the map is read. The daily weather reports consist of observations of the barometer and thermometer, the humidity and direction of the wind, the amount and character of the cloud, the state of the weather, the amount of rain or snow. On the New York city map the scale for as much as 60 miles is chart. The regular mechanical components of goats' milk make this food ideally adapted for the feeding of invalids and sickly infants. The suggestion is that the increased digestibility of this food comes from the very uniform distribution of the fat globules.

Many chemical tests have demon-

Orders Civil War Record on Tombstone

North Bergen, N. J.—When a tombstone is raised over the grave of James Lyon, who died recently, the inscription upon it will note the fact that he served the entire period of the Civil war as a member of the New Jersey Volunteers in the Union army.

The will left by Lyon, admitted to probate by Surrogate Norton, specifically mentions that the clause be the first carried out.

Dog Kills \$1,000 Fox Caught Stealing Hens

Vancouver, Wash.—A cookout in a chicken yard at night caused H. H. Miller of Fruit Valley to investigate, and he arrived in time to see a blue fox leaving the yard with a chicken in its mouth. His dog, a mixed Airedale and Alaska wolfhound, dashed after the fox and killed it before Mr. Miller could interfere.

De. R. J. Mercer claimed the poll, as the fox was one of three that escaped from the Mercer fox farm some time ago. The mate to the one that was captured the following night, at Hazel Dell by some boys and the third animal is believed to be in the neighborhood of the farm, as several chickens and ducks have disappeared recently. The fox killed was valued at \$1,000.

Paints With Mouth

Lansing, N. Y.—Morris Ballou, a young Lansing artist, whose attack of spinal meningitis incapacitated him from the use of his hands, and who has achieved much success in painting by holding the brush in his mouth, was another humor when a watercolor, entitled "The Spirit of the Sea," was accepted by the Toronto Art gallery.

EXPLANATION ON HOW TO READ GOVERNMENT WEATHER MAPS

Marks and Lines Made Intelligible by Experts.

Washington.—Almost everyone is familiar with the large weather maps distributed in public places, such as railway stations, post offices, or government buildings. The weather bureau of the United States Department of Agriculture issues a printed explanation of the weather map, telling in detail what the various marks and lines mean, and how the map is read.

The daily weather reports consist of observations of the barometer and thermometer, the humidity and direction of the wind, the amount and character of the cloud, the state of the weather, the amount of rain or snow. On the New York city map the scale for as much as 60 miles is chart. The regular mechanical components of goats' milk make this food ideally adapted for the feeding of invalids and sickly infants. The suggestion is that the increased digestibility of this food comes from the very uniform distribution of the fat globules.

Many chemical tests have demon-

strated that the average fat content of goat's milk ranges from 8.2 to 4.4 per cent. Relatively speaking, there is no marked difference between the milk of the goat and that of the cow except the more uniform distribution of the fat particles in the former. Goat's milk is eminently suitable for practically all the purposes to which cow's milk is put except for making butter.

Overseas, large quantities of goat's milk cheese is manufactured annually. Often artificially colored, the butter made from goat's milk is very white and resembles lard in appearance.

Yankee-made at Belvoirville, however, it has proved irrefutably that a good quality of butter can be produced when the goat's milk and cream are properly handled.

The Belvoirville herd of goats was established in 1908 when the initial attempts were made to cross 20 common British goats brought to Washington from Alabama with pure-bred goats from Switzerland. The breeding experiments have been continued until now. Out of the goat's milk the government herd are at least seven-eighths pure while some of them are 31/2 pure bred.

The national researches in goat farming improvement at Belvoirville demonstrate that native American goats can be readily improved by intermixing their blood lines with those of the aristocratic milk goats of foreign ancestry.

Unquestionably in the vicinity of every large city in America today there are attractive opportunities awaiting the initiative and energy of good citizens who will establish profitable herds and embark in the special goat milk business.

GIRL OPERATOR SUCCEEDS IN RUNNING FEDERAL BLOCKADE

Evades Reporters After Ex-citing Experience.

Texas City.—The sea air never relaxes, although those who are asked to tell their experiences as matters of fact, find it remains too burdensome to spin the yarns.

A lot of the unusual came to light when it was learned that the famous Miss V. Thorne, which was berated as being the last federal blockade at Texas City recently, carried as her wireless operator Miss Leon Michelson, daughter of the reporter. That the ship came through without being molested, but this girl had come in contact with the Mexican enough to know that they often do the unexpected, and a single experience should teach both the teacher and her ways of crude oil less obvious. Nevertheless Miss Michelson appeared to have reported the incident as a lack

Bequeaths Property to Unnamed Niece

Winchester, Va.—Bequeathing a valuable house and lot in Winchester to a niece whom probably some she did not know, and of whom resided in the Northwest was ignored, the will of Mrs. Mary Webb, who died recently, has been probated in Circuit Court.

The testator stated that her niece's maiden name was Maggie Anderson, "but her married name I do not know."

Automobile Output 4,012,000

Kansas City.—The output of motor vehicles in the United States in 1930 was placed, in a Commerce department announcement, at 4,012,000 vehicles, as compared with 3,600,000 and 3,400,000, respectively, in 1929 and 1928.

Light planes from the mass to the mass is another notable record.

NATIONAL CAPITAL AFFAIRS

100,000 PEOPLE PRAISE TANLAC FOR ITS MERIT

World's Greatest Tonic Is Endorsed by People Grateful for the Relief It Has Given Them.

Actuated by a deep sense of gratitude and desire to help their suffering neighbors, more than 100,000 well-known men and women have offered their personal experiences as proof of the wonderful health-giving powers of TANLAC, the World's Greatest Tonic.

Throughout each and every one of this long list of testimonial rings the spirit of earnest sincerity which characterizes the following excerpts:

Alma D. J. Pritchard, Cleveland, Ohio: "People wanting to know what TANLAC will do may communicate with me. It increased my weight 32 lbs. and brought me the very help I longed for."

J. H. Taylor, Memphis, Tenn.: "To me TANLAC was just like a good friend—gave me help when I needed help most."

Mrs. Mary Schumaker, Racine, Wis.: "Every year at the change of seasons a course of TANLAC makes me eat with a relish, restores my strength and leaves me in splendid health."

Judge George P. Wagner, Police Magistrate, Belleville, Ill.: "That I am enjoying such fine health now I can attribute only to the help I received from TANLAC."

Mrs. G. K. Sellers, Springfield, Mo.: "Since taking TANLAC I enjoy the blessing of perfect health and have the complexion of a schoolgirl."

V. E. Ferry, age 73, Seattle, Wash.: "TANLAC built my weight up 21 lbs., rid me of fifteen years' stomach trouble, and left me feeling many years younger."

TANLAC IS FOR SALE BY ALL GOOD DRUGGISTS. ACCEPT NO SUBSTITUTE OVER 40 MILLION BOTTLES SOLD.

TAKE TANLAC VEGETABLE PILLS.

CAPTAIN SAZARAC

CHAPTER XV—Continued.

—20—

"Abaratari!" he howled. "La—" The Seraphine suddenly heeled with a puff of wind that came as she cleared the shoals. It shook the wounded buccaneer from his falling grasp on the rigging. But even in mid-air Gorgio, the Catalan, repeated his call of the old days; then his body heaved out and plunged to the opalescent waters, streaking like a comet to the depths.

"D—n!" growled Dominique. "Is this a dead ship? Where are the bullels that I raise not a man? Monsieur de Almonaster! Captain Sazarac! I lay course now have this ship worked!"

"Lay her as she is, old gabbler," retorted Sazarac. "Starboard a bit—the mist is closing on the Spanish, and he cannot stir in the air that moves this beauty! A long trick at your wheel, Dominique!"

Still the rotund politician would not understand. "Our lads—" he jumed. "If I take the deck I want something to work with, Monsieur Sazarac!"

De Almonaster was holding his arm through whose sleeve the blood would spout despite his efforts. Louise Leiston stared in a wild-eyed disbelief from the shadowy disorder forward on the schooner to the master.

When Sazarac spoke, it appeared to be to her: "There are none left—you have seen the last man of a vanished race. You have seen men die in honesty. For you, Mademoiselle—for a woman, at which they would have laughed—for the peace of the world, which they would have scorned!"

The two gentlemen took her in the cabin while the crippled schooner fled on a blinding path anywhere to be out from the guns of the king of Spain. They took her to the emperor's office, and Monsieur de Almonaster raged and swore for her; and Monsieur Sazarac held wine to her lips.

There, also, the gentlemen discovered a thing which they did not report to Mademoiselle. They closed the door softly to the cabin, and tried to make a jest of all the terrors that came with the taking of the Spaniard.

In the teapoye-hung stateroom, with his boots on and his bloodstained hand very fit to yank, the Emperor of the Bottle lay upon Bouapapa's bed once more. He might be sleeping, or he might be dead . . . the gentlemen could not take time to discover, or with so many other grim questions concerning the eyes of each across the emperor's board.

He that sat by him, the Emperor, having reached the privacy of his chamber, fully refused to leave it again, even though his lady of the camellias was now just outside the passed door.

CHAPTER XVI

The Last of a Buccaneer.

The shortened sail was snapping in a clear morning breeze which worried Dominique, still at his trick with the wheel, which was all that a round admiral, his bones too much numbed with fat living, might attempt. A tall morning, and a following sea; when not a soul in sight. Far off, even from the heavily-flocked Spanish flycatcher might have gone body with the two hundred schooners, short-handed and unprovided.

The two gentlemen who had been privately watching down the deck, came about the bow looking to where the waves lay. The deck was wet, the

By Charles Tenney Jackson
Copyright by The Bobbs-Merrill Company

arisen he looked about at her from under his gray bushy brows and smiled. "I want to lie w' you a moment, and look at the flying tops. You will need to shorten sail, and I urge that I cannot spring to the tops again. Name o' G—d!—a seaman on his back and loose blocks clattering! . . . Is the English woman gone?"

"She is well away with Monsieur de Almonaster."

"Good! Now, you are Lafitte, and not this woman's Sazarac. It is this, Jean. In my shrimper's camp back at La Caravelle there is a jacket in my sea chest. It tells of plunder that Crump and De Jonville and I buried on Cozumel twenty years ago. Some gold, some silver and a handful of jewels. The two others have been dead long since; and I wish the stuff

"I can never return to Louisiana, Johanna," said the leader gently.

"Eh? Well, that is so!" The old man's voice was breaking lower. He turned his face to watch the white spume arise along the weather rail, the highest glimmer of it striking his face. "Well, let me be, my captain! I wish to lie alone staring at the dizzy tops. Naught but them against the blue and the sea weathering up at me. Now—let be, Jean!"

The master put his hand back on his breast and walked aft. The weary group by the steerage looked questioningly up.

"Let no one go near him. It is his wish. I shall roll him from the chains. That, too, is his wish. I—alone!"

And again the girl looked wonderingly at him. "What are you to them all, Monsieur? That rough man turns to you in this fashion, as I have seen them do—the priest, the brother and the confessor?"

"A name," he said, and smiled; and then would say no more.

Louise had bound up De Almonaster's severely-wounded arm. Now they all lay in the shelter of the after-hawing, save the lad, Clark, who had taken the wheel. Old Dominique, Monsieur Sazarac and Count de Almonaster with the English woman.

The creak and haul of the gear in the freshening wind was all the sound, and Dominique created his misgivings.

"I am wild night for us all, brother!—if brother you are!—And another mystery there may be for the coffee beans, and that is the end of the Seraphine and the yellow bullet who sent her from the Place d'Armes! I trust the Mayor Roulleau will put her on my desk in the council chamber."

They tried to smile for the sake of Mademoiselle. Now and then, with a curious little frowning fear, she had glanced down the tilted sky-light ladder of the emperor. It was, indeed, as if she was watching them for an apportion. At Queen's the world had taken of the rugged man she saw there in the chair of honor with the scalp wound that had given him something the appearance of one who were a red convert and Jewish; but always the two gentlemen had consistently exuded her.

The two gentlemen had conferred apart, now and then; reservedly, perhaps, but with common honesty.

"You would rock the Mississippi with this ship, Monsieur?" inquired De Almonaster. "It appears quite impossible that we should."

"What is it you asked, Monsieur?" retorted Sazarac dryly.

"You! Me again. Crossing this shortened vessel can be brought to the Mississippi, there is an answer we must make for this adult."

"There is the answer I made to Mademoiselle Leiston."

"True—true!" The younger man admitted. "There is, in addition, no honor that the Seraphine yet did in the mission for the emperor. There are no survivors in New Orleans who never in this venture, if a crew could be shipped by any means."

Monsieur Sazarac laughed aloud. At the end it seemed like this young man repaid such bad honor to him—his own and the other man's, and each for the other's life and fortune. That was what Mademoiselle Leiston had not appreciated, this naivete action to stand aside rather than overreach.

"Come," he said good-humoredly. "It is a quarrel in us, Monsieur?"

"Is the end she will know you are Jean Lafitte," went on De Almonaster evenly. "But it is not I who should tell her. It is not that fair."

"I will how to her from the parents the governor will exert in the Place d'Armes, and announce myself, if need be," said Monsieur Sazarac.

"Jean!" the younger man sprang to his feet. "This is no jesting! She loves you!"

"A ghost—Sazarac," snorted the other. "All before this is worthy of the man who lies below in the hold of Napoleon, basking a glory which is composed of fever and despair! What is there to here in Sazarac, vice the word to torn from him?"

"That is the point of it," retorted the older soberly. "One can live a month . . . a woman can go on forever loving the Master she dreams of now to her."

"A ghost—Sazarac," snorted Sazarac.

"Old robber!" snorted Sazarac.

"The WIT NOT BE Moved, Monsieur!"

His buccaneer was wet; Mademoiselle Leiston looked up, the skin lined with the signs, gold exchange, powdered on her lip; and her eyes were wet—no sparkle left in the sea and the remains of her woman's companion.

She turned from her ministrations with a wan smile: "We will not be moved, Monsieur!"

"Old robber!" snorted Sazarac.

"Old robber!" snorted Sazarac.

"The WIT NOT BE Moved, Monsieur!"

The buccaneer was wet; Mademoiselle Leiston looked up, the skin lined with the signs, gold exchange, powdered on her lip; and her eyes were wet—no sparkle left in the sea and the remains of her woman's companion.

She turned from her ministrations with a wan smile: "We will not be moved, Monsieur!"

"Old robber!" snorted Sazarac.

"The WIT NOT BE Moved, Monsieur!"

Kelley & Co., Inc.

The WINCHESTER Store
Carrizozo, N. Mex.

"Chicago asks states to keep its soldiers," says a Chicago Tribune headline. "Either keep it on or keep a sharp eye on it."

The great area at Washington, D. C., was to be the scene of the Republican party's national convention. And now look at the thing!

The Literary Digest goes right on fooling its readers with a poll on the Mellon tax plan. The Digest got here the game of figures propaganda just in time to get a dead one.

If anybody doubts further Secretary Mellon's importance to the Republican party, that person ought to take a look at the pile of telegrams sent to him by Republican leaders while he was working at Palm Beach.

The "best minds" in the Republican party will have a fine opportunity to justify its reputation by writing a satisfactory plank in the Republican platform as the subject of the Teapot Dome scandal. Page Senator Willis?

The reason why the Department of Justice, with all its strength, has not laid a hand in the big oil scandal may be due to the fact that it has devoted all its energy in endeavoring to find some Democrats at "odds" in the Republican cabinet.

The Republican party just now has a great many liabilities, but it may well be questioned if the Republican National Committee is not the greatest of all.

"Best Minds"

Albert Barnes Fall,
Harry Nicajah Dongherty,
Edwin Derby,
Col. Theodore Roosevelt,
C. B. Bacon Stump,

Among the several millions of persons whom the propaganda for the Mellon plan hasn't swayed is Congressman Green, of Iowa, Republican Chairman of the House War and Peace Committee. He is taking his ease from the folks back home.

He's been called a "peach" often, but, according to the code, it should be "apples."

MARIMBA HEARD FOR MILES

Odd Musical Instrument Used by Natives in South Africa Is Sort of Xylophone.

The marimba is a musical instrument of African origin. It is a sort of xylophone. The hardwood keys are attached by rawhide thongs to the semicircular framework and are beaten with rubber-tipped drumsticks.

Gourds in graduated sizes are attached underneath for sounding boxes, and each gourd has a hole in its side covered over with a parchment-like film obtained from spiders' nests. This device is quite essential to the production of musical sound. The marimba can be heard at a distance of several miles, and the music has a very characteristic and pleasing quality.

The marimba with some structural differences has been highly developed in South America, and "marimba bands" from there have visited the United States, where phonograph records of their playing are available.—Detroit News.

QUEER BIRD BUILDS NO NEST

California Murres Just Drop Its Eggs Anywhere It Happens to Be.

The California murre is a common bird about the rocks in its home location but has its own peculiar habitat. It never makes a nest, lays but one egg, dropping it down anywhere and leaving it. The egg is prepared by nature to meet the test, as it does not roll straight, but will swing about as top would on its own axis.

The birds have a habit of gathering in large numbers on a shelf of rock, where the eggs are left in large numbers, no two alike, a variety of colors making the display of eggs resemble a flower garden in bloom.—Ohio State Journal.

Japan Use Paper Umbrellas

The Japanese carry paper umbrellas instead of cloth ones, but the paper is a very tough kind and is heavily oiled to shed water.

They are made of all colors, and a rainy-day street scene in a Japanese city is a very cheering sight to view by reason of these bright-colored umbrellas. They use paper napkins and handkerchiefs and burn them after use, which to them seems a much more cleanly custom than ours.

They also make lanterns and lamp shades of paper, and a Japanese friend, when visiting at a big fire, carries a lighted lantern in one hand, no matter how fierce the blast from the fire may be. This custom is still in vogue in many towns and country districts, though in the larger cities modern kerosene lamps are currently replacing lanterns.—Detroit News.

Herring Fish Flies

New uses for the species herring caught on the coasts of Iceland have had to be devised, because the supply is so much greater than the quantity required to be salted. Factories for the preparation of herring flour were erected in Iceland several years ago through Norwegian, Danish and Icelandic interests. The product is highly valued in Norway as a strength food, although it contains 70 per cent of fat and protein. Much of this flour is also exported to Japan, where it is used as a relish in connection with salmon gravy. As herring can be raised in unlimited quantities in Iceland in summer time, it is planned to be a future market there before, in connection with the selling for export, to use herring for strength food and for oil. Herring oil is extracted by pressing out the fat in the herring.

By Way of Protection

A country minister was driving a spaded horse through a village when he overtook the local doctor and offered him a lift.

Ten minutes later the horse jolted, upsetting the carriage and spilling both men. The doctor rose to his feet and ran blindfold over to see whether he was injured. Then he turned abruptly toward the clergyman.

"What do you mean by leaving me to ride behind such an animal?"

"Well," replied the minister, "I was rocky that this time there were no bones broken, but I always like to have a doctor with me when I drive my horse."—Pittsburgh Chronicle Telegram.

Few Hungry

A Baltimore man, who was formerly a resident of a town in an eastern state, recently visited his old home town after an absence of many years. One day he was riding when he struck about various people he knew.

"What became of the Hall family?" he inquired.

"Dad," said the letter, "Tom Hall did very well. Got to be an actor out on the Pacific coast. Tom, the older brother, is something of an artist in New York; and Lucy, the sister, is doing heavy work. Tom Henry never amounted to much. It took all he could for his hands to support the others."—Baltimore Ledger.

No Sabbath

A young man who claimed to have been raised of 300 was asked to state the denomination of the various bibles that gave him.

"None," responded comes for the man on trial. "You know, remember every book you had."

"When you work for them over the weekend," she replied simply, "you remember them."

That ended the cross examination.

Giving the Telephone Life

YOU can talk across the continent as if face to face. Your telephone is the latch to open for you any door in the land.

There is the web of wires. The many switchboards. The maze of apparatus. The millions of telephones. All are parts of a country-wide mechanism for far-speaking. The equipment has cost over two billion dollars, but more than equipment is needed.

There must be the guardians of the wires to keep them vital with speech-carrying electrical currents. There must be those who watch the myriads of tiny switchboard lights and answer your commands. There must be technicians of every sort to construct, repair and operate.

A quarter of a million men and women are united to give nation-wide telephone service. With their brains and hands they make the Bell System live.

Hondo, March 6.

The Hondo Valley is beginning to show signs of coming spring, with the grass modestly peeping out from its winter home.

Mr. Lamascus, an old timer of this county, but now living in California, has been visiting with relatives in the Hondo community the past week.

The grading on the new road is being finished up this week, and all that remains to be done is the graveling and cement work. Then we will have good highway in both directions.

Signs of spring irrigation have begun to appear, one of which is the decrease of the volume of water in the Bonito.

J. H. Johnson has moved to a place on the Ruidoso above San Patricio. We are sorry to lose him from our community, but pleased to still have the children here acquiring an education.

Miss Ruby Coleman has been unable to attend school this week because of a severe cold.

The High School seems to be making a good showing. Every pupil is interested and is a booster for his school. One girl, Mary Hale, has not missed a day during the school year; and Robt. Casey of Picacho, who rides from there to school each day, has missed only four days, which was during the big snow storm in December. He said his mule couldn't track those days.

T. H. Kirkland has been in Texas the past two weeks with a car of apples. He says the demand is slow there. Mr. Roberts was in El Paso on a similar mission and speaks the same of the market there.

Mrs. J. M. Penfield, the Misses Rice, and others from Lincoln, were Hondo visitors Saturday afternoon.

William Risch, whose home is in Montana, has been visiting with his sister, Mrs. J. A. Cox.

LINCOLN NEWS NOTES

Lincoln, March 7.—Elmer Hardcastle and family have moved to Artesia.

Mrs. J. M. Penfield entertained the "Thimble Club" Wednesday afternoon. About twelve ladies were present, and all spent a pleasant as well as a profitable afternoon.

Mrs. Clayton E. Berry, who was called to Carrizojo recently by the death of her grandfather, John Bryan Sr., spent a day in Lincoln on her return visiting old friends.

The Sunday School held its first session this year Sunday at 2:30 p.m. in the High School building. The attendance was good for a first meeting, but it is expected to be better as the weather becomes more settled.

A nice shower of rain Wednesday that turned to snow was much appreciated by the farmers. These little showers make the daisies pop up their little heads.

There will be preaching Saturday in the High School building at two in the afternoon.

Ford Plants Employ Many Thousands

Employment in the Ford Motor Company organization is now at the highest point in the company's history and reflects in a general way the prosperous condition existing in the country as well as in the automobile industry.

There are approximately 157,000 workers employed in Ford industries in the United States, according to recent figures. Of these, more than 24,000 work in branch assembly plants.

The largest number employed in any single manufacturing unit is, of course, at the Highland Park plant at Detroit, where 66,500 men are at work.

The biggest increase in the number employed at any one place during the last year was made at the River Rouge plant of the company. A year ago, 28,000 men were employed there, while today there are nearly 42,000 workers on the payroll.

Other manufacturing units, including the Lincoln car plant at Detroit, and the plants at Kearny, New Jersey, Hamilton, Ohio, Green Island, New York, Glassmere, Pennsylvania, and Poughkeepsie, New York, employ close to 11,000 men.

Smaller plants around Detroit give employment to more than 800, while at the present time there are over 4,000 men at work on the company's timber and iron properties in the upper peninsula of Michigan.

Ford coal mines in Kentucky and West Virginia are giving employment to more than 3,500 men and the Detroit, Toledo &

WHOLE BODY SEEMED IN ONE AWFUL PAIN

MORIA, Ia.—MFL L. P. Lambert, who has been a popular school-teacher here for several years, recently told a visitor of her interesting experiences with Cardioli.

"Just before my . . . came on," said Mrs. Lambert, "I would ache all over. My feet, my toes, my arms, hands, head—my whole body seemed to be in one awful pain. I would groan so nervous that I could not hold a cup in my hand. My husband would have to hold my coffee for me to drink. Last fall I was in such a bad condition that I had to spend about three days in bed every month. It seemed to me that I was on my last go-round."

Then one day, said Mrs. Lambert, she happened to read about Cardioli and the experiences of some women who had been helped by it. "I felt that Cardioli might help me if I tried it," she

continued. "For I had been suffering with similar troubles to those mentioned there. I had heard of Cardioli all my life and I knew many women who told they had been helped by it. The very next day I began to take it."

"Very soon after, I began to notice my improvement. I kept on till I felt like a different woman. I gained in weight from 96 pounds to 116 and felt better than I had in years. I took six bottles right along and found it a splendid tonic. My suffering was partly due to a run-down condition and the Cardioli stimulated my appetite and helped me to gain the strength I needed."

"I take a bottle every now and then, even now, just as a tonic to keep up my strength, but I am in better health than I have been in for years."

All druggists sell Cardioli. Try it.

NEWS REVIEW OF CURRENT EVENTS

Denby Resigns From Cabinet and President Is Urged to Drop Daugherty.

By EDWARD W. PICKARD.

SHRETER-OF-THE-NAVY DENBY said repeatedly that he would resign from the cabinet Monday of last week, to save the President and the Republican party further embarrassment; he tendered his resignation exactly March 16, and it was promptly accepted.

Attorney General Daugherty, more persistently attacked even than Mr. Denby, declared he would not resign from the cabinet. The Republican party leaders in Washington and Senators Lodge and Pepper to the White House with the message that it was the unanimous opinion of the Republican members of the senate that the President should get rid of Mr. Daugherty. The attorney general again said he would not resign, but at this writing it is believed he will do so, and within a few days.

Mr. Denby stepped out with a smile, and to the correspondents he repeated his defense of the wisdom of the oil reserve leases. In conclusion he said: "My own vindication and that of the Navy department will come with the proper ventilation of all questions connected with these leases in the Imperial rooms. As a private citizen, if I have committed any offense against the law, I am still subject to action. I am able to fight my own battles, but I cannot fight another's preferred by semantic trickery." No one more than I can more deeply deplore fraud or corruption in public or private life, etc., where such acts are shown. It should be definitely pointed.

The President has stood up manfully for right and justice. The spontaneous thing for me to do is to relieve him of the further embarrassment of continued political intriguers and partisan political trickery."

Assistant Secretary of the Navy Theodore Roosevelt relates his wife was attacked in the Senate by Senator Harrison of Mississippi and defrauded by Senator Miles. Mr. Denby's successor has not yet been named.

Senatorial Senator K. Wheeler of Montana, author of the resolution for an inquiry into the conduct of the attorney general and the Department of Justice, had the assault on Mr. Daugherty, whom he charged with protecting himself of prosecuting crime and criminals. He asserted that offenders had purchased immunity by payment of large sums to Thomas E. Fader, the attorney general's associate in the Moore pardon case, and to Jessie Bush, Mr. Daugherty's confidential aide, who committed suicide last year under mysterious circumstances, leaving the attorney general a legacy of \$10,000. Senator Wheeler raised the question of whether the attorney general received a share of such payments, and declared that if he had not "he is a bigger fool than the people of the United States give him credit for being."

Mr. Daugherty denied Mr. Wheeler's charges specifically and generally, and said that, though he had been exonerated in one respect, he was quite ready to undergo another. He then sent a letter to Special Prosecutor Worcester and Roberts, placing at their disposal the machinery of the Department of Justice. The Senate had confirmed the nomination of Mr. Roberts by a vote of 65 to 2.

THROUGHOUT the country investigating committees held no public hearings during the week. It was busy however into the alleged "million-dollar slush fund" and with preparations to bring to light stock transactions connected with the oil leases. There was a lot of "secret talk" circulating and rock-bottom prices were demanded. Mr. Daugherty frankly admitted that he had brought and sold stocks so he had been doing the same, and Senator David Morris of West Virginia forced a statement saying he had brought 200,000 shares, but "without any intention with respect to the oil leases." Harry Sinclair refused to

Europe and is expected to be called before the committee this week, as are Harry Payne Whitney and R. B. McLean.

WHAT has been neatly termed the process of "candling" William G. McAdoo was carried out according to program by the conference of his leading supporters in Chicago, and he was declared to be a good egg. In other words, he was told that his availability as a candidate for the Democratic nomination for the presidency was not lessened by the fact that he had been in the employ of Edward Dooley and that he must continue his campaign. There was no doubt at any time as to the decision the conference would reach. If there had been it would have been dictated by telegram from Senator Walsh of Montana, chairman of the senate investigating committee, endorsing McAdoo and his candidacy in unrestrained terms. Republicans noted with amusement that this message was sent to the Montana representative in the conference, who happened to be Thomas Arthur, a stockholder and employee of the Continental Oil company and formerly in charge of a legislative oil lobby in Montana.

Mr. McAdoo of course accepted the mandate of his followers and then made a long speech in which he not only explained Mr. Denby's feet but told what he proposes to do when he becomes President—if ever. James M. Cox of Ohio, Democratic candidate for the presidency in 1920, was willing to try again. Having been informed that his Ohio friends wish to present his name to the convention in New York, he has given his consent.

IT BEGINS to look as if the taxpayer would get no relief from congress this session, despite the fact that all members agree with him that there should be a reduction. Of course, if he doesn't get it, partisan politics will be to blame. Last week the House, sitting as committee of the whole, approved by a vote of 222 to 101 the German amendment to the tax bill, embodying the Democratic tariff and normal tax rates and increased personal exemption. Voting with the 200 Democrats were 17 Independent Republicans, one Independent and one Farmer-Labor member. The Wilson plan was rejected by a vote of 138 to 244. All efforts of Representative Longworth and other Republican leaders to arrange a compromise that would pull their constituents follow Rep. Wilson failed.

The German plan provided:

Normal rates of 2 per cent on incomes below \$4000; 4 per cent on incomes between \$4000 and \$8000; 5 per cent on incomes exceeding \$8000. A graduate student scale beginning at 1 per cent on incomes between \$12,000 and \$15,000 up to a maximum of 40 per cent on incomes exceeding \$15,000.

Reimbursements of \$2000 for single persons and \$3000 for heads of families. Many economists and financial experts have held that this plan is not comparable to that proposed by Secretary of the Treasury Mellon. Since President Coolidge already has publicly declared that it is "impossible to practice" it is fair to assume that, if the bill goes through congress as now framed by the coalition, it will be vetoed by the new Executive. The Republicans assert that the entire German plan would mean an annual deficit of \$100,000,000 after the law is in full operation.

CONSTITUTORY AMENDMENT is trying to go into effect toward the adoption of an immigration bill that will not be likely to involve the State Department and its agents abroad in trouble. He already had told why the proposed Japanese measure is objectionable to Japan and last week he called the attention of the immigration committee to the protests of Italy and Romania against the plan to make the Manchurian agreement the basis for quota restrictions. Chairman Johnson read the Romanian protest on the floor of the house. It said adoption of the Manchurian quota as a restrictive basis would "deeply offend the pride of the Japanese people" and "tend to affect their national interests."

"These important protests received from foreign governments due to reciprocity of the purpose of the proposed

American people will have the result soon," he said, "I hope, of insuring enactment of really restrictive immigration legislation."

PRESIDENT COOLIDGE nominated George B. Christian, secretary to President Harding, as a member of the federal trade commission. Opponents to his confirmation sprang up at once in the senate, so the name was withdrawn at the request of Mr. Christian.

On Thursday President Coolidge sent to the senate his nomination of Charles H. Warren of Detroit to be ambassador to Mexico. Mr. Warren had agreed to serve in that post, but reluctantly for he preferred to remain in private life. He and John Barton

were the special commissioners who brought about the agreement by which recognition of the Obregon government was accorded, and his selection as ambassador is especially pleasing to President Obregon.

Henry P. Fletcher, new ambassador to Belgium, has been selected to succeed Richard Washburn Child as ambassador to Italy.

GEORGE DAWEH and his committee of experts last week practically completed their report on the German problem and presented it in outline form to Premier Polakow, who is said to have accepted in principle those features of it.

To surrendered control of the railways in the Ruhr and Rhineland in exchange for a general ban on the German railroads.

The establishment of a bank of reinsurance with a capital of \$60,000,000 gold marks (\$75,000,000), the seat to be in a neutral country and the government to be selected from the founders of some neutral country.

Economic reconstruction of Germany with the surrender of various French-Belgian economic control services established to extract reparations directly from the Reich.

A mortification for Germany—although the expert recommendation of three years will be reduced by France to two years.

Premier Polakow has been trying hard to bring the French experts into accord with the American and British so that the report may be unanimous. To this end he is willing to make great concessions. Presently the attitude is induced largely by the fall of the franc and his more democratic tendencies, including the fact that he is being made in the chamber of deputies against Mr. plan for increasing taxation.

The German plan provides:

Normal rates of 2 per cent on incomes below \$4000; 4 per cent on incomes between \$4000 and \$8000; 5 per cent on incomes exceeding \$8000. A graduate student scale beginning at 1 per cent on incomes between \$12,000 and \$15,000 up to a maximum of 40 per cent on incomes exceeding \$15,000.

Reimbursements of \$2000 for single persons and \$3000 for heads of families.

Many economists and financial experts have held that this plan is not comparable to that proposed by Secretary of the Treasury Mellon. Since President Coolidge already has publicly declared that it is "impossible to practice" it is fair to assume that, if the bill goes through congress as now framed by the coalition, it will be vetoed by the new Executive. The Republicans assert that the entire German plan would mean an annual deficit of \$100,000,000 after the law is in full operation.

New Mexico State Items

Steve Walter shot and killed Miss Blanche Kell and her mother, Mrs. John Kell, and then shot and killed himself in Las Cruces last week.

According to word received in Silver City, plans are progressing rapidly for the reopening of the Tyrone Bank. The institution is chartered by the State Banking Department and all these conditions will be met in the reopening. When reopened the bank will have new stockholders and new officers.

George Howard, superintendent of the Mineral Mining and Milling Company's lead-zinc mine, thirteen miles from Embudo, N. M., was blown to atoms when the Company's powder-house blew up. No traces of Howard could be found, according to a report of the accident, except small fragments of his clothing.

George Howard, superintendent of the Mineral Mining and Milling Company's lead-zinc mine, thirteen miles from Embudo, N. M., was blown to atoms when the Company's powder-house blew up. No traces of Howard could be found, according to a report of the accident, except small fragments of his clothing.

H. B. Smith, former assistant cashier of the Reserve State Bank of Roswell, N. M., was arrested in a Denver hotel by Everett Wilson, deputy United States marshal, and was returned to Santa Fe to stand trial in United States District Court charged with conspiracy to defraud the United States Postal Department.

The body of John W. Rhee, 60 years old, prominent cattleman and banker of Roswell, was found stretched on the floor of the bath room of his home by his family. Life was extinct. The bath room was filled with gas. Mr. Rhee had been a resident of New Mexico for twenty years. He had been in poor health following a collapse which occurred shortly before the Citizens National Bank, of which he was vice president, failed.

Word was received from Jenny Springs, sixty miles north of Albuquerque, of the tragic death of John W. Casper, 42, of Belen, N. M., when his automobile overturned on the famous Soda Dam Hill. Casper was pinned beneath the car, with a piece of glass from the windshield pressing against his jugular vein. Before he could be recovered the glass severed the vein and the young man bled to death. Two companions were uninjured.

According to an announcement of the district forest office at Albuquerque, a contract has been closed for the sale of 2,000,000 feet of pine timber from the Mescal National Forest. The contract calls for the sale of the timber at \$2.50 per thousand feet, the company to operate on the south and east of the Mount Baldy ridge division. The sale covers about 500 acres of merchantable timber and provides that all brush must be removed to prevent fires in the forest.

The launching of the Daily Range places Raton on the newspaper map of the country. The Range, which started as a daily many years ago, has been published as a semi-weekly for the past twelve years and at this time has developed into one of the first papers in the northern part of the state. Willis G. Brown, editor of the paper, believes in building for the future and has every confidence in the future of his city and the surrounding country.

If the present plan of the officers and directors of the San Juan County National Bank of Farmington, which was closed some time ago, is carried out, the bank will be opened soon. Bank Director Kennedy, of Denver, is now going over the books of the institution and believes that the bank will be opened as soon as the reorganization is completed. Adequate funds are available to handle the deal and there is little chance for a check in the work to be done.

In an endeavor to get more good draft horses all over the state the State College has purchased the prime stallions. There is a need for better stallions in the state of Colorado, and the college has got them. Bank Director Kennedy, of Denver, is now going over the books of the institution and believes that the bank will be opened as soon as the reorganization is completed. Adequate funds are available to handle the deal and there is little chance for a check in the work to be done.

ROAD BUILDING

GEOLOGISTS REDUCE ROAD-BUILDING COSTS

How the cost of building Wisconsin state trunk highways is being materially reduced by the field investigations made by geologists, especially through the hunting out and using of local materials, is pointed out by M. F. Dean, assistant state geologist and former professor in the University of Wisconsin, in an article on "Economic Geology and Highway Construction," which has been published as a reprint from "Economic Geology."

The increased use of local materials which has been developed by the geologists' road-material investigations has not only reduced the cost of construction materially but has greatly decreased the use of railway cars for hauling road materials, he points out.

Many university geology students have devoted their summers to the geological end of highway work and this, he points out, greatly extended the scope of this work. From the students' point of view, summer field work in connection with highway building has furnished a wide range of field experience.

The first step in the geologist's investigation is to determine what types of road material are available locally for that particular project. He then recommends such local material as may be used to save freight charges or truck-haul. Detailed reports are made on the results of the investigations, and estimates are also furnished on the quantity of material available, conditions of quarrying rock or gravel, cost of gravel and transportation problems. The aim of such studies is to furnish good road construction at the lowest cost possible without sacrificing service and efficiency.

"In addition to the financial saving, the use of local material has a direct bearing on the problem of rail transportation," Mr. Dean writes. "The use of local road materials relieves the railroad of this additional load and liberates cars for the use of coal and other commodities, and in addition prevents expensive delays in highway construction."

Construction of Modern Automobile Roads Gaining

That the construction of modern automobile roads and paved streets in this country is gaining in volume year by year is shown by statistics just announced by Highway Information Service, New York. The figures show also that highway contracts awarded during the second half of the year average in volume only about 20 per cent less than those let during the first half and that there is not a month of the year in which a large amount of construction is not under contract.

In 1929 a total of \$300,000,000 in new road construction was awarded in this country. In 1931 the amount was \$360,712,000, an increase of \$60,000 over 1929. Last year contracts were awarded to the amount of \$300,000,000, an increase of \$30,000 over 1931 and \$100,000,000 over 1929. From January 1 to June 1, this year, a total of \$360,712,000 was placed under contract. At this rate new highways for which contracts will be let during 1932 will cost approximately \$700,000,000, a gain of \$100,000,000 over 1931.

Highway System to Meet Big Demands of Traffic

The federal highway system is indicative of the determination of the American people to have a highway system consistent with the demands of the trade. The system will include nearly 30,000 miles of the most important roads of the United States, so located as to form a complete network of state, interstate and intercounty roads. When completed it will be traversed practically every city and town of 5,000 population or greater, and a ten-mile zone on each side of the roads will include the homes of 90 per cent of the population of the United States. To encourage the early completion of this system, all federal appropriations will be increased. It is spent only on roads which form a part of the system.

Pan-American Study of Good Road Construction

Much of the Latin-American republics is to be invited to send a representative to study the road building and transportation systems of the United States. This was decided at a meeting in Washington of officials of the Departments of Commerce and Agriculture, the Pan-American Union, and Inter-American High Commission and representatives of the motor industry. The investigation is preliminary to a Pan-American motor road conference.

Good Highways Develop Peru Milton and Farms

The leading car and auto trade are rapidly replacing the horse and pack mode which have for centuries ruled transportation in the Andean states. During the last decade, the cost of transportation by pack animals has been the chief cause of the rapid development of the Andean states. The recently organized Trans-Andean Motorist Association is developing the region between these two cities in mining and agriculture.

WOMEN WHO WORK

Women Know how the Work is Done Strong and Well By Lydia E. Pinkham's Vegetable Compound

ZAHN, N. Dakota.—"I was nervous and weak and pain frequently. I also had pains frequently. I was sickly for seven years and finally had a nervous breakdown following an operation. I am a dressmaker and milliner, and a lady I work for told me of Lydia E. Pinkham's Vegetable Compound. I am taking it and it has made me feel much better and I have not had pains frequently since. I have even helped to care for a sick neighbor recently, so you can see how fit I am. I highly praise your medicine and you may use my letter as you see fit. I hope it will help some other women." —Mrs. Oma Nord, Box 22, Zahn, North Dakota.

Over 121,000 women have so far replied to our question, "Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"

"This means that 86 out of every 100 women taking this medicine for ailments for which it is recommended are relieved by it. For sale by all drug-gists."

Had Time to Think

"Charles, do you love me as well as you thought you would before we married?"

"I didn't think before we were married. Is dinner ready?"

A Simple, Safe, Sure Remedy

For all local aches and pains due to cold or over exertion. Take a spoonful of Allcock's Plaster.

Ducks Feed on Bees

Ducks love to feed on bees, while they will swallow in dozens, without any ill effects.

Dandelion Butter Color

A harmless vegetable butter colored by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 25 cents—Adv.

FOR SALE: ONE EGG, \$5,000

ADRIAN HOLDING TWO EGGS.

It's a Dinosaur's Egg and Guaranteed to be 10,000,000 Years Old

Illustration by John Dickinson Sherman

FOR SALE ONE EGG \$5,000! This is not an advertisement—just a plain statement of fact, which gives the lie to the time-worn saying that there is nothing new under the sun. For this one egg is the egg of a dinosaur. And that's something new, I assure you. Civilized man never saw one before.

And this dinosaur's egg, instead of being green, white, or brown, or ordinary blue, or even dirty, is guaranteed to be at least 10,000,000 years old. Incidentally, it's a hatching egg, not cold storage. Of course dried eggs are nothing new, but here's one with the reverse English on it. And that's new.

And this egg, though fossilized and solid rock, is cherished as a nest egg—which again is something new.

Moreover, you may have to pay considerably more than \$5,000 for this one egg. The chap who wants it most has the longest purse is the fellow who is most apt to be K. And then he'll have something new.

In brief, this fossil discoverer's egg was brought to America, with others, from Mongolia by the Third Asiatic expedition. It is for sale at an open price of \$5,000, the money to form the nest egg of a field to finance a fourth expedition, planned in the hope of finding the fossil remains of the very earliest man.

The leader of this Third Asiatic expedition was Prof. Roy Chapman Andrews, curator-in-chief of the division of exploration and research of the American Museum of Natural History, who on two previous expeditions to Mongolia had made important discoveries. It was financed by the members of the American Asiatic Association and the Magazine.

The objective was a depression in the Gobi desert of Mongolia, a thousand miles or more from Peking and about thirty miles from the Altai mountains. Here is a hole of a dozen miles or so across in a narrow place, its edges a vast complex of red beds. It was reached last July by a 40-mile journey by mule-train across a desert, supplied before carried by camel. Professor Andrews writes that in part in Asia Magazine of the discovery of the egg:

"Our real thrill came on the second day when George Olsen reported at 10 a.m. that he was sure he had found fossil eggs. We joked him a good deal, but nevertheless all of us were anxious enough to walk down with him after him. Then our indifference suddenly evaporated; for we realized that we were looking at the first dinosaur eggs ever seen by a human being. That they must be those of a dinosaur we felt certain. True enough, it never was known before that dinosaurs did lay eggs, but, since most modern reptiles are oviparous, it was considered probable that their ancient ancestors followed this method of reproduction. Nevertheless, although hundreds of skulls and skeletons of dinosaurs had been discovered in various

EGG OF DINOSAUR

one parts of the world, never had an egg been brought to light.

These eggs could not be those of a bird. No birds are known from the Lower Cretaceous geological horizon in which the eggs were found, and all the Jurassic and Upper Cretaceous birds were much too small to have laid eggs of this size. The elongate shape of the eggs is distinctly reptilian. A bird's egg usually is much larger at one end than at the other, because it is deposited in a nest, from which it might roll out unless it is rotated on its point. Reptile eggs, which often are buried in the earth around, usually are elongated and stand in shape to the positions that we found. These eggs were in a great deposit full of broken shells and consisting, as far as we could discover, no remains of other animals or of birds.

Three of the eggs lay in a cluster and evidently were in the exact spot where they had been deposited by the discoverer. The broken shells of several others were partially imbedded in the rock. Just under a low sandstone shelf, beside which they were found, the animal "Garden of Eden." It is hoped to prove that it was also the human "Garden of Eden."

The expedition has not yet carefully examined the geological strata that may contain the remains of primitive man and there the work of the fourth expedition will be concentrated.

The work already done proves that both Europe and America were continents at sea-level and practically arid, while the tropics had not yet appeared. Mongolia was a fortified plateau, the animal "Garden of Eden." It is hoped to prove that it was also the human "Garden of Eden."

The expedition has not yet carefully examined the geological strata that may contain the remains of primitive man.

Professor Henry Fairfield Osborn of the American Museum of Natl Hist. believes that the odds of man and of the higher apes was to control Asia. The fossil beds already partly explored are too old to contain the remains of man. But the Chungku beds are of the right period, as they belong to the latter part of the Age of Man.

Professor Osborne believes that the odds of man and of the higher apes was to control Asia. The fossil beds already partly explored are too old to contain the remains of man. But the Chungku beds are of the right period, as they belong to the latter part of the Age of Man.

The preservation is beautiful. Some of the eggs have been crushed, but the polished surface of the shells is as perfect as if the eggs had been laid yesterday instead of ten million years ago. The shells are about one sixteenth of an inch thick, and probably were hard and not membranous. The sand has filtered through them, and the interior of all the eggs is solid sandstone. In the photographs the bits of broken shell partially imbedded in the rock are plainly to be seen, and it needs no stretch of imagination to realize that the objects pictured are really eggs.

"A few days after the first discovery

clusters when rain is coming, and white flakes appear before the snow. The entire winter becomes cloudy when a bad storm is coming.

Three Parts of Kansai
The Marukachi family of Tokyo, who operated a drug house of old established name, had received and transmitted from generation to generation a special instrument, with instructions that it should be passed only to the family house till less fortunate circumstances. The secret

was passed during the earthquake and it was found to contain instructions to dig at a certain place. Three earthenware pots of bamboo-shaped gold coins of Roman days were found buried at several hundred feet.

Worry for Coffee Drifters
Complaints of raw coffee beans bitter, in order of their comparative amounts, are coffee, tea, peach, coffee, coffee, acid, sugar, coffee, peach, coffee and tea.

Two-Piece Suits for Spring Wear

Paris spring openings will announce the mode for another season. Certain differences are inevitable—indeed, the time is ripe for some radical departures from the current styles, says a fashion writer in the New York Tribune. This winter found a uniformity in dress among the Parisians which was reminiscent of the days of the *polonaise*. Individuality, usually the rule of the smart French resort, was the exception, and there was a startling conformity to certain types of dress and color. Inasmuch as the history of fashion shows that each of its phases ends in a too extended popularity, it would appear that the new mode will differ distinctly from that of the previous spring.

Some of these expected changes are clearly marked at the present moment. The tailored two-piece suit, for instance, is scheduled to enjoy a wide vogue. The return of this mode connotes many changes in neckwear, which is always complimentary to the tailored costume.

Outstanding features of the neckwear for spring include convertible collars which may be spread out or turned over and held closely about the throat with a silk tie, the emphasizing of the V-neckline and the use of two tailored silk or linen panels to simulate a waistcoat. Plain and novelty linens and white and pastel organdies are forecasted as the most favored materials.

From the modes at Palm Beach and the Riviera an accurate prediction may be made of the color tendencies for the approaching season. White will be appropriate for both formal frocks and sports wear. The general tone of the latter will be particularly vivid, with special emphasis placed upon bright yellows, green and yellow. Jade greens and Chinese bluish-greens will sparkle in rivalry with the imperial yellow of the Marchioness.

For informal daytime wear beige, brown and tan give evidence of a renewed popularity. These same colorings will dominate the spring hostery, in addition, of course, to the shade hue which has attracted so much attention. Just one more thing is certain. As far as the silhouette is concerned, the keynote of the new mode will be simplicity. And it will be stressed in the most simple ways.

The dress with dual and occasionally triple personality is the mode of the moment at Paris, and the practical French couturiers have avoided the usual mid-season quiet with numerous interpretations of this capricious and economical style. Each model, instead of being a double gown for a single definite purpose, is suitable for two, or possibly three, widely different functions. Thus a dressy short-

skirted models for the Riviera and the season in Rome. In a Lanvin interchangeable model the outstanding feature is an elaborate embroidery in black silk which covers the flowing sleeves and ornaments the corsage of the overhanging tunic skirt. A narrow foundation of silver cloth is revealed at one side and the hips are girdled with a wide sash.

“Tear the saree”

Spring and Summer Creation Suggested in the New Fashion Sheet. The Outfit is of Coral-Colored Drawn Cloth, Cream Net Trim. It requires no apology at an afternoon tea. Particularly interesting are the sleeves on this model, which is developed from white crepe with incrustations of gold metal cloth; these are indicative of an avowed interest in lace. Another effective combination for the same dress is that of black crepe and silver incrustations.

The Steeple Dress
An elegant but equally versatile frock is the steeple afternoon dress, a model quite as acceptable for an informal afternoon tea. From Laroche comes a dress of this type with a color ensemble which only the world dare. It is developed in pink crepe georgette over a foundation of silver cloth which is then applied and embroidered and this is the Laroche touch—in black. It is an ideal traditional dress.

Thomast displays her accustomed preference for black as a medium for the beribboned dress. There is a reserve about the designs of this designer suggestive of many things it is not.

LOCAL AND PERSONAL

Miss Helen Rice came up yesterday from Lincoln.

Mrs. Robert Keil, who has been critically ill, is recovering.

Mrs. H. E. Keller was down last evening from her home on the High Mesa.

Mrs. George A. Titworth and Mrs. Will Titworth were here yesterday evening from Capitan.

Walker G. White, the Nogal merchant, and Billie Stevens were here yesterday from Nogal.

Mrs. Frank Maxwell, who has been suffering from rheumatism the past week, is slightly improved.

Mrs. George J. Dingwall returned Monday morning from El Paso, where she visited with relatives.

Mrs. C. H. Haines visited here this week from El Paso. She and her husband conducted the Pure Food Bakery for a number of years, leaving here last fall.

Mrs. R. E. P. Warden came down from Ancho for medical treatment this week. She is at the home of her mother, Mrs. Mattie Cooper.

Mrs. Eva S. Coldren returned this week from Phoenix, Arizona, where she had spent the winter. Mrs. Coldren has a ranch and cattle south of town in the Water Canon country.

R. C. Skinner was brought down this week from his home on the Mesa, and is at the home of his parents, Rev. and Mrs. John H. Skinner. He is suffering from an attack of typhoid fever.

Miss Grace Moss, who has been in the post office the past year, left on Sunday morning's No. 1 for Long Beach, California, to join her parents, Mrs. Joe A. Hale. Hale has taken her place in the post office.

Judge W. E. Kimbrell came up Sunday afternoon from his home at Picacho to hold the regular

term of probate court, beginning Monday. Having concluded the business before his court, he returned home yesterday.

E. H. Goodall, U. S. Commissioner at Capitan, was a county seat visitor Tuesday. Mr. Goodall says business in Capitan is a little slow, caused by financial losses the past year, but it is still one of the best trading-towns in the county.

Supreme Court Reverses Exchange Bank Case

The supreme court of the state has just handed down a decision in which the lower court, Judge Holloman, Santa, presiding, was reversed. The suit related to the bonds given by the Exchange Bank to indemnify the State Treasurer for state funds deposited in said bank.

Different classes of bonds were filed to secure this deposit—Liberty bonds, a surety company bond and a personal bond. The State Board of Finance, upon the closing of the Exchange Bank, advertised the Liberty bonds, amounting to \$56,800, for sale. The sale was enjoined and the lower court held that the liability should be pro rated among the various classes of sureties that had been given and that the Liberty bonds were liable only on a basis of 99 per cent.

The supreme court specifically reversed the 99 per cent claim, but upheld the contention that the Liberty bonds should be held for only their pro rata of the full liability, and the other securities, the court classing the surety company bond and the personal bonds as one class, to be liable to the same extent; except that the surety company must pay its liability in full and secure from the personal bondsmen its share of the pro rated amount. The case was remanded with instructions for the lower court to enter a judgment in accordance with the above.

Jury Lists Drawn

Judge Edwin Mecham and District Attorney Newell were here Saturday from Alamogordo, and with District Clerk R. M. Treat drew the list of grand and petit jurors for the spring term of court. The clerk prepared the summons for the lists thus drawn and the sheriff has been busy this week in serving them.

The grand jury has been called to appear Monday, April 21, and the petit jury the following Monday, April 28.

A regular term of court, with a jury, has not been held since the regular fall term, 1922. That term was a rather lengthy one, and the docket was pretty well cleared of cases. During the intervening eighteen months a large volume of business has accumulated, and the indications are that the length of the coming term of court will be limited only by the amount of money in the court fund.

Change now to the brand that never changes and you'll never change again.

San Patricio Items

Due, no doubt, to the great accumulation of snow in the Sierra Blanca, at the head of the stream system of this section, the nights have been, and still are, cold enough to hold back the fruit trees and other vegetation, all of which sugar well for the fruit season. Only a very few fruit trees are beginning to bud and show a few green leaves. None of the native forest trees show indications of new life.

At an election for ditch officials of the San Patricio community ditch last week, Yggaelo Orlin was elected Mayordomo and F. G. Stover Treasurer.

Messrs. L. O. Pepper and John A. Kimball, of Picacho, came up this way Monday on business in connection with a farm lease. Mr. Kimball has leased about 50 acres of the Pepper farm at Picacho.

A. G. Maryfield, who recently purchased the Cole farm, near Hondo, has taken possession and is preparing to farm extensively.

Jim Jackson has rented the Gallegos farm this season, where the family will reside. Jim will continue all road repairs on the section between Hondo and Capitan.

Catholic Church

Sunday, March 9, mass will be held at 7 p. m. Mass is held at this hour for the reason that I shall leave at 8 o'clock for Fort Stanton for the purpose of holding mass at 10 o'clock.

CARRIZOZO, N. M.

Established 1886

Commercial Club

A meeting was called at the Carrizozo Eating House Tuesday evening to consider matters of moment to the town and community. A good number attended, and a lively interest was manifested by all present.

The organization of a commercial body was first taken up and by unanimous agreement a commercial club was organized. E. H. Sweet was chosen president and A. D. Brownfield secretary.

The body authorized a governing committee of five, of which the president and secretary were to be members, and the other members selected were G. T. McQuillen, M. H. Paden, T. A. Spencer.

The question of roads was discussed, and it was decided to send a delegation to Santa Fe to confer with the State Highway Commission, which meets Monday. The delegation selected contains the following names: A. D. Brownfield, E. H. Sweet, C. P. Heppe, A. H. Hodspeth, Joe A. Haley and T. A. Spencer.

In addition to this delegation the Board of County Commissioners agreed to send a representative, and Brack Sloan, commissioner from the third district, will go on behalf of the board.

T. E. Kelley and G. T. McQuillen were appointed on a committee to raise funds for the expense of the trip, and they have performed their duty and report sufficient sums of money to meet the contingency. The delegation will leave Sunday and has arranged for a meeting with the commission the first thing Monday morning.

A Misunderstanding

Agent—"When are you going to pay for that electric washer?"

Mrs. Deorio—"Pay for it? Why,

you said that in a short time it

would pay for itself!"—Knobstage,

Educational News

(By Mrs. Louis H. Cox)

The "attendance banner" will be awarded to Miss Lauren Wilson, District 44, for two weeks and will then be sent to Miss Thula Vandenbush, District 45, for two weeks, as both these schools had 100 per cent attendance for the month of February.

Mrs. Callie Franks is the teacher of the sixth and seventh grades at Carrizozo since Mrs. J. H. Morris resigned.

The following schools have been visited in the last two weeks: Spindale, Pleasant Hill, Arabela, Davis, Blue Water and Encinal. Teachers and pupils are doing good work in all these schools.

This is Eighth Grade Examination week. One hundred and fifty questions have been distributed in our schools. The second eighth grade practice examination will be held April 18 and 19.

Teachers will please remember that examination papers must be sent to this office by first class mail.

No accounts against Districts will be paid hereafter that are not filed on the new state adopted teacher form, which must be sworn to by payee before a notary, county clerk or justice of peace.

Port Stanton News

The whole interest at the Fort at this time is centered in the dance to be given by Major and Mrs. Warner on the evening of Saturday, March 15, to raise funds for increasing the number of volumes in the patients' library. This is expected to be an intercommunity affair, and many of the friends of the sailors who are bedridden are planning to attend the dance, both from Carrizozo and many of the surrounding towns. This is to be an occasion where many whom you have met

seen for some time will be present, and one which those who are not able to attend will be very sorry to have missed.

In this column it is intended to have news from the Fort from time to time, and it is hoped that it will increase the great cordiality which has always been felt between the people of the Fort and the other many readers of the News.
