Carrizozo News

OLDEST AND LEADING NEWSPAPER IN CIRCULATION IN THE COUNTY OF LINCOLN, NEW MEXICO

VOLUME 25 — CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, APRIL 17, 1925 — NUMBER 16

Drunks Increase in Nation's Capital

Washington, April 13.—Despite renewed efforts of federal and district authorities to break up bootlegging in the national capital, records of the police court for March show a new high mark for convictions for intoxication, The total was 1,029, exceeding, court officers said, the number even in pre-prohibition days.

Grand Fleet Moves

San Francisco, April 15.—The grand fleet—mightiest concentration of sea power ever assembled under the flag of the United States—steamed out today to "war" across the broad Pacific.

Through the Golden Gate and into the ocean, the fighting ships of the nation exactly as they would proceed if their mission of capturing the island of Oahu, chief of the Hawaiian group and the country's western outpost of defense, wer real instead of imaginary.

Radio silenced and "darkened ship" were to be maintained on all units as soon as the last vessel filed out of the gate.

The departure of the assemblage—127 vessels of all classes in a procession estimated to be 25 miles in length—was a spectacle as impressive and imposing as was the fleet's arrival on April 5. The hills that crown the bay were dotted with hundreds of residents of the region who gathered to bid farewell to the guardians of the country's coasts.

As would be the case in war, the long concentration of the nation's mightiest arm of defense was led by the mine-sweeping force of the fleet.

Lincoln's Coach Found

Baltimore, April 15.—The railroad coach in which Abraham Lincoln rode to Gettysburg to deliver his famous address on the battle field in 1864, was found today on a siding in the yards of the Western Maryland Railway. The historic, but dilapidated, car was discovered by a Pennsylvania committee of the Lincoln highway association that visited Baltimore.

The A. L. Campaign for a $5,000,000 Endowment Fund

Santa Fe, April 14.—"New Mexico is ready to hear the appeal of the American Legion for the two greatest classes of sufferers of the World War—the disabled men and the orphans of fallen veterans," declared George Quesenberry, commander of the New Mexico department of the Legion.

The American Legion campaign for a $5,000,000 Endowment Fund for rehabilitation and child welfare, which has been going on in several states, is now under way in New Mexico. It will culminate in an intensive drive probably about the last of May.

"The Legion wants the people to have the opportunity of helping the Legion help the disabled veterans and the children of men who gave up their lives as a result of their service to the country," Commander Quesenberry said. "Rehabilitation and child welfare are the two greatest post war problems. They are so closely related that they are almost one. What disabled father has not looked down upon the faces of dependent children with terror lest they suffer the pangs of privation which his restoration to health alone can prevent? Does not his mental anguish over the fate of little children erect a material bar to his own reconstruction?

"There are 35,000 war orphans, and many times more sick, ailing and disabled ex-service men whose lives the war blighted. We can not do too much for them. The American Legion has assumed the obligation of seeing that these two consequences of the war receive a full measure of justice, but we need the public's assistance to the limit.

"Everywhere the endowment movement has spread, it has met with a kindly reception. I feel it will meet with that same response in New Mexico."

Already the work of organizing state and local endowment committees has been begun. These committees will contain the names of prominent citizens and members of the Legion and Legion Auxiliary, Commander Quesenberry said.

Gran Quivira Flag Raising and Pageant

Gran Quivira, N. M.
April 11, 1925.

The Gran Quivira National Monument, situated a half mile from the town of Gran Quivira and twenty-five miles from Mountainair, N. M., will be the scene of an impressive flag-raising ceremony to be held at 2 p. m. Saturday, April 25th, according to plans being formulated by a committee appointed by the Gran Quivira Welfare Club. It is suggested that this day be observed annually as "Gran Quivira Day," with a pageant depicting early Indian life and pioneer American history.

According to Mr. W. H. Smith, custodian of the Monument, Gran Quivira was once inhabited by the semi-civilized tribe of Piro Indians, whose history, it is claimed, can be traced back as early as the year 1339. Early in the seventeenth century, Acevada, a Spanish priest, did missionary work among the natives, building a church in the year 1629. Later in 1650 a more pretentious place of worship was erected near the old mission. In 1680 the Apache Indians attacked the city (then called Tiberias), killing off most, if not all, the inhabitants, numbering some 1500 souls. Some years later, a Spanish explorer from the West, finding Tiberias in its deserted condition, named it "La Grande Quivira—"The Great Mystery."

Gran Quivira National Monument, accordiug to the data compiled by the United States Park Service, is the largest and one of the most important of earliest Spanish missions in ruins in the Southwest. It was created a national monument by the government on November 25, 1919. Besides the old Spanish ruins, the reservation contains a large number of Pueblo ruins. Extensive exploration has been accomplished by the National Park Service the dast two years and more work is contemplated for this season.

Besides the flag-raising, other exercises to be held on the 25th of this month include drills, recitations and songs by the children of the public schools, speeches by pioneer settlers, and an address by the Rev. Max A. X. Clark, pastor of the Pentacostal Church of God at Mountainair. Preceding the celebration, which marks the raising of the colors of the United States for the first time over the old ruins, an old-fashioned picnic will be enjoyed. By far the largest crowd ever attending any event in the history of Gran Quivira is expected that day.

Strikes a Pure Gas Flow Near Duran

Duran, April 13.—Considerable excitement prevails here as the result of a shallow well eight miles west of this place that is making almost pure gasoline from a depth of 66 feet. Located on the Melor Luna ranch, Torrance county, the well, it is said, will cause considerable drilling, as from all indications the present production is coming from a deeper pay sand.

Drilled by Mr. Luna for water, the well suddenly turned to making oil which has tested 74 gravity, and is making approximately 15 to 20 gallons daily, which is being used in local cars.

According to Alex Hindi, local merchant, the well was completed on March 12, but residents of this section refused to believe the land owner when he advised them that he had drilled in an oil well instead of the expected water. However, after prevailing upon them to visit his ranch, the owner convinced them by pouring some of the fluid into their gas tanks. Further proof of the production is the daily baling of the hole.

A number of large company geologists, land men and scouts, have visited the lease during the past ten days and many are convinced that big production will be obtained in this section of the state.

Duran is about 70 miles north of Carrizozo on the E. P. & S. W. railroad.

Form French Ministry

Paris, April 15.—Ex-premier Paul Painleve undertook this afternoon the task of forming a cabinet to succeed the Herriot ministry. He notified president Doumergue that he would accept the invitation and at once set about the effort to get together a ministry that would command a parliamentary majority.

It was first believed that M. Painleve would have his task simplified, or at least made more clear, by willingness on the part of the Socialists, a group in support of the ministry he intended forming, to allow members of their party to enter the new cabinet. Announcement to this effect was made this afternoon.

Late today, however, the Socialist national council voted to adhere to its previous policy of supporting the government but barring its members from accepting cabinet posts.

Defend Stockingless Legs

Hollywood, April 13.—"No stocking" crusaders of Hollywood defended themselves from attacks of ministers and club women.

"Any girl who has beautiful legs has at least two good reasons for going without stockings," declared Hedda Hopper, the first to join the ranks of the bare legged women.

"The women who are denouncing the no stockings fad are no doubt still wearing the old-fashioned corset. By next season hosiery will be as passe as the old ironsides."

Nita Naldi, one of the veterans who paradod the main streets of the cinema citadel was very indignant.

"What's all the sudden criticism?" she asked. "I haven't worn stockings for more than a year and really can't remember when I last put on a pair."

"Why pick on the movie folk," she asked. "Can't we dress or undress as we please? How do you like the latest design on my knees?"

Pauline Garron declares the short skirt vogue compels elimination of stockings.

"Short skirts and rolled hose are very awkward looking," says she. "And those horrible garters."

Virginia Valli says, "I have taken off my stockings for good. You won't see my legs in hosiery advertisements any more."

$500,000 Hooch Cargo Captured

New York, April 14.—Capture of the three masted auxiliary British schooner Madeline Adams yesterday by the coast guard cutter Seminole, after a chase of 150 miles off the New York coast was reported today when the schooner was brought into port with its crew of nine men as prisoners, and its liquor cargo valued at $500,000 under seizure.

Coast guard officials said the Madeline Adams was the schooner from which the government patrol boat No. 203 obtained 500 cases of whiskey and champagne on Saturday when an alleged conspiracy to smuggle liquor from rum row on government boats was uncovered with the arrest of two men, who were held as agents of the rum fleet.

Cancer Kills 125,000 Annually

New York, April 13.—Cancer takes an annual toll of 125,000 lives in the United States and causes an economic loss of $625,000,000 a year, Dr. Francis C. Wood, director of the Institute of Cancer Research at Columbia University, asserted in a report submitted today to the Gorgas memorial institute of tropical and preventive medicine. Of this number probably 15,000 lives could be saved annually if cancers were treated by reputable physicians within a few weeks of formation, he estimated.

Geo. Curry and Wife Hurt When Car Overturns

One of Mrs. Geo. Curry's arms was broken and Mr. Curry was bruised but not seriously when their auto overturned at Hondo Saturday, according to information received here.

They were enroute from San Antonio. Hondo is about 45 miles from there. They returned to San Antonio after the accident.

U. S. Trade Balance

Washington, April 14.—Exports from the United States in March were valued at $452,000,000 and imports were $385,000,000, leaving a balance favorable to the United States of $67,000,000.

"The outflow of gold which began last December was shown to be still in progress, the exports of the metal during March amounted to $23,104,416, compared with imports of $7,337,322, leaving a net loss of $17,767,094.

Real Old Age Pension

Libau, Latvia.—Boris Ustschek, a farmer who says he has attained the age of 125, and has proved his age to the satisfaction of the Latvian government, has been granted a pension by the government that he may be freed from labor the rest of his days.

WNU SERVICE

DELIRIUM

SYNOPSIS.—Lee Anderson, Royal Canadian Mounted Police sergeant, is sent to Stony Range to arrest a man named Felly for murder. He is also instructed to look after Jim Rathway, reputed head of the "Free Traders," illicit liquor runners. At Little Falls he finds Felly is credited with having found a gold mine, and is missing. At the hotel appears a girl, obviously out of place in the rough surroundings. A half-breed, Pierre, and a companion, "Shorty," annoy the girl. Anderson interferes in her behalf. The girl sets out for Elston Lake, which is also Anderson's objective. He overtakes her and the two men with whom he had trouble the night before. She is suspicious of him and the two men are hostile. Pierre and Shorty ride on, Anderson and the girl following. In the hills the road is blown up, before and behind the two. Anderson, with his horse, is hurled down the mountain side, senseless. Recovering consciousness, Anderson finds the girl has disappeared, but he concludes she is alive and probably in the power of Pierre and Shorty. On foot he makes his way to Elston Lake. There he finds his companion of the day before, and Rathway, with a girl, Estelle, a former sweetheart of Anderson's, who had abused his confidence and almost wrecked his life. Rathway strikes Estelle, and after a fight Anderson, with Estelle's help, escapes with the girl. Anderson's companion's mind is clouded and she is suffering with a dislocated knee. Anderson sets the knee.

CHAPTER VI—Continued

The joint slipped into position, the tortured body ceased its protest, and Lee rose, the perspiration streaming down his face.

Trembling in the nervous reaction from the struggle, Lee listened to the increasing noise of the motor boat again.

It rose to a roar as it passed again along the channel immediately in front of his hiding place, and gradually dwindled away.

Leaving the girl where she had fallen back into unconsciousness, Lee ascended the spruce trees and scanned the channel. The motor boat was moving up the shore of the island along the edge of the reefs. It contained Rathway and two other men.

Another York boat was coming from the direction of the promontory. This contained three men also.

Six on the trail; and Lee guessed that they would leave no nook unsearched in their determination to locate himself and the girl.

The island appeared to be about a mile in length by a third wide. Lee, seeing that discovery was only a matter of time, decided that it would be better to abandon the boat and take refuge somewhere in the undergrowth. If the York boat had not been found by nightfall, he could return with the girl and try to escape in the whaleboat. If it were discovered, their situation would be no worse.

He stripped one of the packs about his back, picked up the girl, and, thus encumbered, proceeded through the thick brush, making for the crest of shore, where he put the girl down in a small dell-like where the growth was thickest. Removing the provisions from the outside of the pack, he obtained water and poured some down the girl's throat. He noted that the professing rodent was present, a favorable sign in unconsciousness, as he had learned at the front.

Toward the middle of the afternoon the sun, which had shone brilliantly throughout the morning, went permanently behind the clouds. Another snowstorm was beginning up. A few soft flakes began to fall.

Suddenly a distant rattle broke out and continued. There was no mistaking what was meant. The York boats had been discovered.

The Free Traders began to beat across the island, calling to one another. Their voices gradually ascended nearer. Crouching beside the girl in the thick of the brush, Lee waited. At a distance he saw two of them pass through the trees and disappear. The shouting died away.

As soon as they had passed him, leaving the girl where she lay, Lee slipped softly through the undergrowth, making his way back to the muddy spit. His expectations were confirmed. The York boat had disappeared.

Reconnoitring the spruce tree, he saw the two York boats moored to the motor boat in mid-channel, a man with a rifle seated in it on guard.

They were trapped on the island.

Lee made his way back, and waited while the afternoon wore away. The gloom fell thicker. He took off his mackinaw and placed it over the girl.

She was no longer in a coma, but semi-conscious, and unaware of her surroundings. She muttered and mumbled; sometimes it was all Lee could do to quiet her. And the disjointed phrases of speech that fell from her lips confirmed the most acutely unpleasant idea he had revealed to him during their ride through the range.

She referred to HIM, of her meeting with him, and unknown to her listener she was betraying the secret of her own heart.

But there was no time to be lost, for the tall ruffian who had fled was howling somewhere along the shore, and all depended upon the nearness of the motor boat. Lee, covering Pierre, backed quietly to the place where he had laid the girl. He picked her up and ran toward the boat with her.

Instantly Pierre's figure was blotted out in the darkness.

Lee had set down the rifle when he picked up the girl; he placed her in the bottom of the boat, ran back and found it and threw it inside, together with the pack from his shoulders. He raised the heavy anchor. He threw all his weight against the boat, which receded in a trail of viscous mud until it was afloat. Lee leaped in, seized the oars, fired another shot in warning. All the while the wounded man was howling along the shore.

Lee pushed desperately with the oars till he was in deeper water. He pulled furiously for mid-channel. As he did so there came a sound that for one instant almost unnerved him, what with the psychological effect of that all-day listening to it—the chugging of the engine. Then, as he reached open water, he saw by the light of the pallid moon that issued for a moment through the storm-clouds, the black speck of the motor boat trailing the second York boat dimly.

But suddenly the rattling of the engine died in a splutter. The motor boat was about a hundred yards distant. The next instant the bang of a rifle confirmed Lee's hopes. The engine had either run out of gasoline or had become out of order.

Instantly Lee was pulling as he had never pulled before. Again the rifle sounded. Twice more. Now the motor boat was almost invisible in the darkness.

Then, simultaneously with another discharge, something struck Lee a violent blow in the side that knocked him on his back.

He was up in a moment, and pulling with all his might, though he knew he was wounded. But at all cost he must reach that beating, welcome shore. He felt the wet blood trickling down him. His breath was coming in short gasps.

He beat to the oars with all his remaining might upon the completion of that journey. At last the shore seemed to reach out to him, the forests parted, the distant shouts died away. He was the boat aground.

Lee's brain seemed preternaturally acute. In that moment he did not forget the pack, but, snatching it from the bow, leaped ashore, and, running some fifty yards, placed it carefully in the brush at the base of a tall pine. He ran back, picked up the girl, and, carrying her in his arms, began to make his way into the thick of the forest.

And all the while by rote, he was weighing everything. The Free Traders would not know that he was wounded, they would certainly abandon the pursuit as hopeless; he must carry the girl a mile into the forest, where the light of their fire would not betray them, returning for the pack in the morning. He suffered no pain, and seemed momentarily endowed with some extraordinary vitality, but there was a numbness in his side which seemed to be spreading upward.

He had no idea how serious the wound was, everything that was then and was yet upon the completion of the task before him, to him, if he should die, the girl should at least come back to civilization in this forest and not on the waters.

He stopped on the highest point, and, [illegible] a fire, [illegible] and, [illegible] the girl [illegible] the [illegible] of the [illegible] of the [illegible] of the [illegible]

Lee Had Set Down the Rifle When He Picked Up the Girl. He Placed Her in the Boat, Ran Back and Found It and Threw It Inside, Together With the Pack From His Shoulders.

and the knowledge that he must retain intact the thread of consciousness if he was to save the girl from the alternative between death in the forest and recapture.

At earliest dawn he must retrieve the pack, in case Rathway's men should decide to beat about the shore, and so, perhaps, might find it. Beyond that point he would not let his anticipations carry him.

It was some time before the dawn when Lee heard the girl cry out suddenly, a moan of pain and of surprise as the body, heavy with its coma, struggled to convey the sense of distress to the dazed mind.

That cry drove the phantoms of delirium from Lee's mind, pulling him back to consciousness, and in an instant Lee was at the girl's side, perfectly master of himself, and, as she stirred and murmured, he raised her, put his arms about her, and took her head upon his shoulder, as tenderly as if she were some boy comrade, wounded upon patrol.

But as he listened to her broken utterances Lee realised that it was more than physical pain that was tormenting her.

"I cannot go on. It was too heavy a price. I must go back. If you won't kill him, save me and take me away. It is not that I didn't trust you, only you didn't understand.

"No, I'm not sure that I trust him. He looks honest, but who knows that he is? He isn't a prospector, he hasn't a pick or a pan. What should he be doing in the range? Yes, I'll go through with it. I'll go with you when he's asleep, only don't harm him. You must promise me not to harm him.

"Yes, he means well and wants to help me. He doesn't know who you are. You must swear that no harm shall come to him—"

She was living over again the events of the past. Her utterances became more broken, she moaned—suddenly she lay quiet, relapsing into the mood of profound exhaustion.

And Lee staggered to his feet and lay down once more.

But this time it was neither to sleep nor to fall back into the nether depths of delirium. He saw that a titanic conflict had been going on within the girl, and it seemed to him now that she had been going up to Rathway. Something in the conversation between Rathway and Estelle—what had it been?

He pondered over it all in a disconnected way as he lay there, still aware that another part of him was living over those days of long ago. Then at last the first light of dawn came creeping through the trees, and slowly this pain-racked, thist-tormented being settled down into himself again.

As soon as it was half light he was on his feet. After looking at the girl, and convincing himself that she was not likely to awake for several hours he set off, aching in every limb, toward the shore of the lake, in order to retrieve the pack.

In less than half an hour he emerged out of the forest, and, after a careful survey of the lake had convinced him that neither the Free Traders nor their boats were in evidence he struggled down to the river, and bathed in the ice-cold water, lapping these up and feeling new life flow into his veins.

He adjusted and tightened the bandages. The broken rib was roughly held, and Lee felt that he had gone through the worst of it.

He found the pack. It contained a blanket and waterproof sheet, tea, sugar, bacon, flour, cream of tartar, salt, corn meal, some dried apricots, matches, and nails; there were a pot, a pannikin, plate, knife, fork, and spoon, as one said a small saw.

His wound made it impossible to carry this on his back, but with the saw in one hand Lee sliced off a number of pine branches, out of which he constructed a rough dragnet, on which to haul the pack. An hour's work and an hour's struggle through the woods brought him back to the girl.

She was sleeping naturally, and there was a faint tinge of color in her cheeks. After a short rest Lee set about the task of making camp. He gathered brushwood and built a fire, he put on to boil the pot which he had brought back full of water. And, having on the return journey discovered a small, clear stream near by, he decided that that would be a safe camping place until they could proceed, and accordingly knelt down some saplings and proceeded to thatch them with branches, to make a shelter for them.

He had just begun when he heard a low call behind him. The girl was awake and conscious at last. She was looking at him in wonder, but not in fear.

(To be Continued.)

Inconvenient "Currency"

Economists tell hilariously why money makes the commercial world go round, but a Parisian opera singer of a decade ago learned the lesson in very classic experience. She was determined to tour the world thoroughly and she stopped over in the Society Islands, where her manager contracted to have her sing for one-third the receipts. Her share of "the box office" was 1,000 francs, or thereabouts, which was quite a sum and an unexpected opportunity to combine work and vacation. But, possibly correct her reckoning, the audience had no money. She had the gate to the theater and therefore the company, but

Of course the girl's delicious utterances mean nothing. What will the future people do next?

Radio Towers Now Span Globe

Stations Springing Up All Over the Earth.

Washington.—"I got Hastings, Neb., last night!"

Hastings is on the lips of every radio fan who merits the name. Hastings, an obscure village of Nebraska, is the goal of millions. There may be other cities, places like Lincoln, Omaha, North Platte, but for dial turners, Hastings is Nebraska—Nebraska is Hastings.

"Radio is a Croesus of fame, playing the prince for many Cinderella cities," says a bulletin of the National Geographic society from its headquarters at Washington.

"Once Hastings was just one of the 'American cities under 12,000 population.' Now it is a radio niecca. A tube set that has not made a pilgrimage to Hastings and back is an outcast, indeed. It is at once the best known and least known city in the United States. The huge relay station for KDKA of Pittsburgh located there is nearly in the geographical center of the United States.

Why Station Was Chosen.

"Absence of tall buildings in Hastings and of high hills in the neighboring countryside and the presence of good ground water are conditions counted in favor of establishing a station at this place.

"When America tunes in on Hastings, it gets a Main Street town on the edge of what used to be called the Great American desert. If Hastings could broadcast motion pictures of its activities it would show the large peas down near the railroad where steers and sheep are stopping off for a bite to eat (according to government regulation) before re-entraining for Kansas City or Chicago. We might see laborers leaving for the sugar beet fields near Grand Island on the Platte river. For scenery there are the foothills just to the west, out-riders of the Bad Lands farther north. Probably we would be shown farming operations in the east, where fertile loess soil, sometimes 300 feet deep, supports corn Jack of the Beanstalk would admire, and seas of wheat. And we would see the volcanic ash diggings where raw material for highly advertised scouring powders is scooped up.

"Although wireless telegraph stations pepper a world map, radio broadcasting stations are still scarce except in the United States, Canada, Cuba and England. Cuba, with 26 stations, is far ahead of England with 21.

"France has eleven broadcasting stations to Germany's nine. Soon India will shortly have ten. Despite severe governmental restriction in nearly every place except in North America, new radio towers are springing up all over the face of the earth. On the whole, American listeners would find the overseas programs little different, except in language, if they could get them successfully.

"Argentinians now sit in on the discussions of their national legislature. The heated debates are carried to the firesides on the pampas. Vienna and some other European capitals have broadcast operas which have been denied American fans thus far. In England it is now becoming fashionable to go to your favorite cafe and listen to the evening program.

"Despite the challenge of the electric bulb Old Sol has had a pretty stern hand on the habits of man. Until radio came along, the sun alone seemed able to stir up a froth of activity on the earth, as it swept the surface with light and plunged it in darkness. Then a few weeks ago music for evening diners in the United States served as a breakfast concert in Australia. Old Sol's scepter wavered then. To add insult to the injury that that accomplishment gave to the sun's control of man's affairs, residents on the west African coast abstain from sun-ordained sleep until 2 a. m. to hear that same American jazz.

Around World in Five Seconds.

"Once the sun considered it pretty good time to travel 27,000 miles around the earth in 24 hours. On a recent relay test radio telegraphy looped around the earth in five seconds.

"Broadcasting is too recent a development to have experience with the ogre war. What would happen to it under military necessity is mostly conjecture. The last war may have cast a portending shadow by the fact that broadcasting has been suppressed in the occupied territory of Germany. The League of Nations, in the interest of preserving peace, is reported to be planning a great station on Mt. Saleve, overlooking Geneva, capable of sending around the world. Mexico is probably the only country which has made use of radio broadcasting in war. During the recent revolution bulletins from the front were put on the air at Mexico City."

Tilting Tourney Revived by South Carolina Town

Cameron, S. C.—Reviving an old Southern sport, fallen into disuse for nearly fifty years, the people of this little South Carolina town have reinstituted the annual tilting tournaments.

The sport consists of horsemen charging down a course in attempts to secure upon their wooden lances small rings suspended above the track.

Following the tournament, the most colorful event of the day is the coronation of the queen at the town auditorium.

Originating probably in the "quintain," a sport of old France, in which five, instead of three, rings were used, the Southern sport of tilting is thought to have been introduced into this country by early settlers of French origin.

Dumb Since 1870 Man Now Speaks

Ether, in Operation, Removes Inhibitions and Patient Talks Fluently.

New York.—A remarkable example of the strange workings of the subconscious mind was revealed when Lincoln Schleider, a deaf mute for 56 years, burst into fluent speech as he emerged from the influence of ether, after an operation at Bellevue hospital.

Schleider is sixty, an engraver, and lives at No. 234 East Seventy-fifth street. None of his friends ever had heard him speak a word and he said, after suddenly regaining the power of speech, he had been utterly mute since he was five years old.

Several days ago he was taken to Bellevue suffering from a tumor of the neck, and Doctors Eaton and Bromberg decided to operate.

Silent During Operation.

During the actual operation he was in a complete repose, but as he began to regain consciousness words poured from his lips.

"Bring Doctor Bromberg!" he cried. "I want to tell him what he has done for me. It is wonderful. I can talk."

When Doctor Bromberg entered the patient thanked him effusively.

The man's vocal cords had not been touched during the operation, and the case was without precedent. Doctor Bromberg feared that after the effects of the ether had completely worn off the man might relapse into voiceless mumbling.

However, five hours later, Schleider still was talking, and it seemed certain he had permanently regained his voice.

A third physician explained the case. This doctor, who has been in intimate touch with the patient, said:

"It is a phenomenal case of the operation of the subconscious mind. A study of the case reveals that, even as a boy of two or three years, this man was extraordinarily shy and self-conscious. His own voice frightened him and he avoided speech whenever possible.

"During the year, between four and five, he lapsed into long periods of silence, showing whole days to pass without talking.

All a Delusion.

"And by the time he was five he had deluded himself into the belief that he could not talk at all. It was auto-suggestion, self-hypnotism of the most acute kind.

"After that time he never talked, and he began to delude himself into the belief that he could not hear. From that time he went on under the impression that he was a deaf mute. Actually, he heard every word spoken in his presence. And he used ordinary words in the train of his thoughts. But the words he heard with his ears did not penetrate into his conscious mind. Psychologically, he did not hear at all.

"The ether did nothing but break down his inhibitions, remove the subconscious mind and return him to the realm of a normal individual."

Mr. Schleider lives with his wife and daughter. The wife is deaf and speaks with difficulty. Her affliction is the result of spinal meningitis, suffered in childhood. According to the daughter, there were late occasions when her father spoke among the family, but his words were so indistinct as to be understood with difficulty and outside the family circle he invariably used a pad and pencil for conversation.

The daughter, as well as Mr. Schleider's three other children, is perfectly normal.

Harnessing the Wind—a New Invention

The ministry of agriculture of England is now erecting an aerodynamo. It is a German invention. It works on the same principle as an airplane. The invention is supposed to aid in producing heat.

CHINESE WINS RACE TO BUY LUSTROUS PEARL

On the Way to Part With the Jewel Valued at 500,000 Francs White European Buyers Arrive.

Papeete, Tahiti.—What undoubtedly is the largest and most valuable pearl ever discovered in the south Pacific was brought to Tahiti from the Gambier islands in January. Its weight is 200 carats. The coloring is brilliant, with green and golden hues predominating. One hemisphere of the pearl is marked by two distinct iridescent bands, which give the jewel, on that side, something of the appearance of the planet Saturn encompassed by its rings.

When the news of the finding of this pearl reached Tahiti, the European buyers who make Papeete their headquarters during the diving season chartered schooners to take them to the Gambiers, almost exactly 1,000 miles, only to find on their arrival there that the pearl was at sea in the possession of a Chinese trader, who had purchased it from the native diver and was bringing it to Tahiti. The price paid to the native is said to have been 150,000 francs. Experts at Papeete who have examined the jewel appraise its value at from 300,000 to 600,000 francs.

An unusual number of fine pearls have been found in the islands during the diving season just past. Lagoons closed for many years had been opened for diving, and it was from them that the most valuable pearls were taken.

Many years ago the Gambier islands were a center of great importance in the South seas. From the lagoons came the most valuable shell and the choicest pearls. That was before the days of restriction on pearl diving and the lagoons were stripped year after year until they became fished out and the trade drifted to other quarters.

During the last ten or fifteen years the Gamblers have been the least visited islands in the eastern Pacific.

1923 Was Healthiest Year Known to Irish State

Dublin.—According to the official figures of the registrar general of the Irish Free State, the year 1923 was the healthiest ever known in Ireland. The marriage and birth rates increased and the death rate decreased. The death rate was 16.51 a thousand, as compared with 16.99 for the ten-year average, 1913-22. The births numbered 61,696, of which 31,395 were boys and 30,301 girls. The estimated population—there has been no regular census since 1911—is 3,100,000.

Romance Blunders

London, Ohio.—A romance of youth culminated in old age with the marriage in St. Louis recently of Carl Hubbell, seventy-five, and Mrs. Elizabeth Wagner, seventy, both formerly of this city. Both are parents of ten children.

Wit and Humor

GENERAL KNOWLEDGE

"Jack," said the teacher, "what is a cape?"

"A cape is a piece of land extending into the water."

"That's right. Now, Jimmy, define a gulf."

"A gulf is a piece of water extending into the land."

"Good, Hector," to a small, eager-looking little chap, "can you tell me what a mountain is?"

"A mountain," responded Hector, "is a piece of land extending into the air."—Japan Advertiser.

Not Well Trained

Peggy had been to the circus and mother thought to impress a lesson.

"When dogs, and ponies, and monkeys obey so well, don't you think a little girl ought to obey even more quickly?" she said.

"So I should, mummy," was the instant reply, "if I'd been as well trained as they have."

Where She Looked

"Darling, that encyclopedia you bought is no good at all."

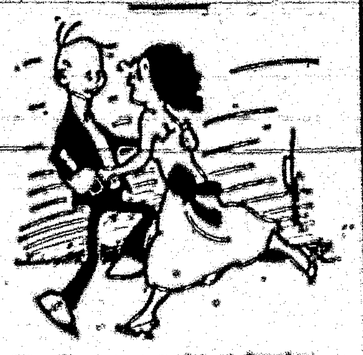
"Why, whatever's wrong with it?"

"This morning I wanted to find out why swallows migrate in winter."

"And you couldn't find it? Where did you look for it?"

"I looked under 'why,' and I couldn't even find the word there at all."

DANCING ARTISTS



He—You're an artist at dancing.
She—And you're a curiosture at it.

Economy

Economy we practice now,
Were gradually learning it.
This thing of saving coal, we vow,
Is harder still than earning it!

Let Others Worry

Anxious Wife—Alfie, have you done anything about that horrible Black Hand letter?

Alfie—Oh, ain't I, though. I turned it over to my insurance company. They got $20,000 tied up in me; let them worry.—Morristown Star.

Desperate Case

"That fellow looks downcast."

"Yes, they are going to shoot him at sunrise."

"A deserter?"

"No, a movie star. And that's a darn mean hour to get out on the set."

Business Man

Gentleman—What? Buying here? You simply stand in Main street!

Pitchman—Yes, but I have opened a branch store here.—Durchschlag (Berlin).

Class

"How be a gentleman farmer located here by?"

"What makes you think that?"

"I noticed the last scarecrow we passed had on golf togs."

WILL RAISE PRICE

Mother—Silence is golden, Willie, not silver, as you say.

Willie—I'm glad to hear that—mister has never given me more'n a quarter, you know.

Cannibal

In Mexico, where natives abound,
And dirty work,
The colored visitor questions cries,
"He does not work."

Must Be Lonely

Applicant—All I ask is a position with the same pay that you yourself would want if you were to take the job.

Proprietor Pluto—Thunder and lightning; you must be loony. Do you think I'm made of money?

But Expressive

The Pilot—If this squall continues I shall heave to.

Passenger (faintly)—What a horrid way of putting it.—Stony Brook.

"How I Decorated 7 Rooms at a Cost of less than $1.00 a Room"

"Last fall I tried my hand at redecorating the walls of my home, using King Wall Finish. I was surprised at the pleasing results. It took me less than an hour to do most of the rooms. When starting out I meant to try only two of the seven but things went so easily that I did them all in just the colors I have wished to have for so long. The tones are so pleasing and fresh that they brighten my whole house. I am sorry I put off doing this work for so long. I had thought it an expensive undertaking, but the cost was less than a dollar per room."

MRS. F. S. BRIGGS, Racine, Wisconsin

Claims Sure Cure for Scarlet Fever

A serum for scarlet fever has been found which will cure the most hopeless cases in 24 hours, according to Dr. Francis G. Blake, professor of medicine at the Yale Medical school, the discoverer. The serum is prepared from immunized horses, and 72 cases have been treated at the New Haven hospital, an adjunct of the Yale Medical school. The cases were classified as 43 without complications, and the remainder complicated with measles, typhoid and other diseases. In the first classification, with treatment and single serum injections, before the third day the entire group was cured, he said. In most cases within 12 hours temperature subsided to normal, the rash disappeared and an excess of anti-toxin circulated in the blood. Only one death resulted in the remaining 29 cases, all complicated and treated on various days from the third to the ninth. A child, in coma, and having typhoid and scarlet fever simultaneously, treated on the eighth day, recovered.

Van Buren's Grandson

Don Carlos Van Buren, a grandson of President Martin Van Buren, is a citizen of Santiago, Chile, where he is well known for his philanthropic activities.—The Living Age.

The Tangle

France would, no doubt, agree to reduce her army to the size of ours, and her air force to the size of Britain's, if America and Britain would formally agree to stand by her in the event of another German invasion, which she fears.—Phil Sims, Scripps-Howard foreign editor.

That sort of an agreement, made six years, and we would today have a better world and be miles nearer to "outlawing" war.

But our statesmen, and others, failed to realize the French people's determination to make safety against German attack the paramount aim of their lives. Refused such an agreement, France went on spurging on armaments, at home and abroad, and today is on the abyss of printing paper and calling it money. Can it be wondered at that France hesitates to talk disarmament and that does not include a "security pact?" Whether she will be content with security possible in an alliance with Great Britain alone is a question depending much upon how close she is to reckless inflation.—N. M. State Tribune.

Outdoor Good Manners

Schools, clubs and other organizations are urged to cooperate with the General Federation of Women's Clubs in a campaign of education for the improvement of "Outdoor Good Manners." Mrs Frances E Whitley, of the conservation division of the federation, has this to say, in outlining the purpose and plans:

"The greatly increased number of parks, forest reserves and tourist camps, the throngs of motorists who more and more visit not only these, but every attractive woodland spot, the growing use of the national forest for recreational purposes—all these are factors in a situation which calls for such an effort. What is more disheartening than to find some lovely place among the trees left by tourists and picnickers defiled with refuse, unfit for use, where soiled paper plates, empty containers and perhaps a camp fire left smouldering, offer a sorry exchange for the wild flowers torn up by the roots, the branches left broken, the beauty destroyed.

"But the menace of nation-wide thoughtlessness is more serious. We are told that a large proportion of the forest fires that involve the annual loss of millions of dollars as well as of life, are started by hunters and campers.

"It seems clear that a great service would be rendered to the future if the children, at least, could grow up with the idea that such abuse of outdoor hospitality of parks and forests is as much a breach of good manners as to mistreat a home where one is entertained.

"We are, therefore, asking all good citizens to help us to emphasize the importance of this matter, taking it up in the schools as a part of the training of good citizenship, securing the aid of the press, and in every way bringing the subject to the attention of the public.

"We have asked for and are assured of the cooperation of other organizations, the Parent-Teachers Association, the Boy and Girl Scouts, the Department of Public Instruction and others, besides the General Federation of Women's Clubs.

"All are asked to join in this campaign to promote "Outdoor Good Manners."

A headline reads, "Hoseless Folk Defend Legs." Some of them don't need any defense.

Noah won a race the other day However, it did not equal the acquatic performance of several thousand years ago.

France has legalized the issue of 45,000,000,000 francs. The franc, naturally, is tumbling like the German mark did.

Governor "Ma" Ferguson, of Texas, has appointed her five-year-old grandson on her staff. It is said the youngster proposes to display as much gold braid as his associates.

Wyoming must be lacking in the usual courtesy and respect for women. Its woman governor, Mrs. Nellie Ross, has had to be protected by a guard. Probably a few more Virginians wouldn't hurt the state.

The oil excitement continues in the Pecos Valley and now wells are brought in regularly. In other parts of the state a kindred interest is manifested, and the prediction that New Mexico will become a great oil producing state seems on the eve of fulfillment.

Forty witnesses have been summoned by the government in its case against Senator Wheeler. One thing can be said about the senator, and that is, he declines to ask to have the indictment quashed, as it is said he might do, were he to follow in the footsteps of some gentlemen who were recently charged with graver crimes.

The Letter "E"

Someone has advanced the opinion that the letter "e" is the most unfortunate character in the English alphabet, because it is always out of cash, forever in debt, never out of danger, and in hell all the time.

But we call his attention to the fact that "e" is never in war and always in peace. It is the beginning of existence, the commencement of ease and the end of trouble. Without it there would be no meat, no life and no heaven. It is the centre of honesty, makes love perfect, and without it there would be no editors, devils or news.—Charleston Gazette.

When is a Widow not a Widow?

Austin, Texas.—The question "When is a widow not a widow?" was answered by C. A. Wheeler, assistant attorney general, today in an opinion to Victor A. Smith, county attorney of Henderson county.

"When she has been divorced," was the reply.

The question was raised by Mr Smith as to the legal right of a step-son to marry his step-mother his father and step-mother had been divorced, in the face of the statute prohibiting marriage of a man to "his father's widow." He asked for the definition of "his father's widow."

Mr. Wheeler held that such a marriage is legal because the woman was not the widow of the man's father because the divorce "absolutely destroyed the status of husband and wife and had restored the wife to the status of feme sole."

RICHER LIFE SOUGHT BY FARMING PEOPLE

Comfortable Home, Leisure for Worth While Pleasures, Would Come With Electric Service.

That it is the enrichment of life, in all that this term represents, which the average farmer hopes electricity will ultimately bring him is the reflective opinion of H. W. Riley, professor of rural engineering of the New York State College of Agriculture. Professor Riley, who has lived with farmers and studied their problems for years, appreciates that the immediate ambition of the farmer, in respect to electricity, is to obtain a larger cash return from his farming; but he maintains that the farmer looks beyond this, and has in his mind, as the final goal, a greater share of the stimulating social and mental possibilities of life, which he hopes will come with an increased cash return.

Showing that so far as getting through season after season of farm work and actually producing marketable crops is concerned, the farmer could, doubtless "get along" if he never secured electric power, Prof. Riley asks why, then, is there such an insistent demand for rural electric lines and what is the real service that electricity from such lines is to render?

"The answer to these questions," he asserts, "can be found readily enough when it is realized that the farmer's central objective in life is the maintenance of an independent and comfortable home, where he and his wife may live, where his children may grow up strong in body and resourceful in mind, and where he may live in peace to the end of his days.

"Money must come in reasonable amounts sometimes, to be sure, or, like any other man, he will not count his work successful, but money is of value to him mainly as it enables him to improve his farm and home and to enjoy some of the pleasures and amenities of modern life. The ready sale of automobiles and small electric light plants to farmers, the extension of country telephone lines, the demand for rural free delivery of mail are instances that prove this point. Now interest is starting to concentrate on the extension of electric power lines into the country for the very evident reason that the whole farming population have seen what electricity has done in the cities and they want the same benefits for themselves.

"The farmers want electricity mainly because they know that it will make their lives better worth the living. They do not want it to cost too much because cash money is scarce with them, but they want it mainly for what it will do for them and not primarily because of a possible low cost for the service."

S. G. ALLEN, W. M.

SIMON P. MILLER, Secretary.

LOOK OUT FOR SELF POISONING

Neglect of the liver results in self poisoning! Not so quickly, perhaps, but just as surely as if you drank poison out of a bottle. If your liver is not doing its work of helping digestion, eliminating waste from the bowels and purifying the blood, you will always be troubled with sick headaches, nausea, biliousness, bad breath, sour stomach, or constipation.

Cleanse and tone your liver! Put your system in condition so you feel your very best again! Try just a spoonful of Dr. H. F. Thacher's excellent Liver and Blood Syrup after the next few meals and notice the quick improvement in the way you eat, sleep, look and feel—the return of strength, vigor and energy. You will be completely satisfied; otherwise there will be no cost.

Dr. Thacher's Liver and Blood Syrup is sold and recommended by RAMON VIDAURRI, Carrizozo, and all leading druggists.

A Protest with Merit

[Capitan Mountaineer]

It is with sincere regret the citizens of this part of the state receive the order of the Secretary of the Interior closing the Roswell land office and consolidating it with the Las Cruces district.

* * * * * *

The reason, and the only one of any merit, whatsoever, advanced by the powers that be for abolishing the Roswell land district is based on the magic word, economy. Let's see if even that argument is sufficient consideration. First, we are sure that the authorities are agreed that governments are organized for the sole object of granting its subjects life, liberty and the pursuit of happiness. To this may be added the implied law that those granted privileges be made easy of attainment—that is, that every reasonable convenience be exercised toward that end. Our postal department and our forest system are examples of the implied law of convenience. Neither is self-sustaining and possibly will never be, but an order from the Postmaster General abolishing all save two post-offices in the state would incite merited rebellion; or if the Secretary of Agriculture should perchance be bitten by the economy bug and order the Ranger force reduced to one station in the northern part of the state and one in the southern, disregarding such minor details as to whether or not either or both such stations were located on a forest or in a desert country, our forest rights would be nil and the benefits of convenience would be unknown.

Then, the whole matter simmers down to the plain facts of whether the greatest number of people will be adequately served by removal of the office from this district to a more inaccessible location. The patrons of this district are accustomed to courteous and prompt service, willingly rendered, and it is to be reasonably expected that this cannot be continued if the Secretary of the Interior's proposition to consolidate the offices and eliminate the major portion of the personnel is carried out. Chaotic conditions and grevious errors are certain to be prevalent. The single item of re-calculating the entries to conform with the existing numbers will in itself keep a corps of clerks busy for a period of several months.

Assets are oftentimes liabilities. Likewise, the veriest of expenditures is sometimes the result of misdirected economy.

We are prone to believe that the Honorable Secretary has been over zealous in trying to exercise an economy program to the sacrifice of service and the burden placed upon those for whom the public land office was created—the homesteader.

We hope the order for the closing of the Roswell office will be rescinded and that our citizens will be spared the expense and inconvenience of journeying to a distant point for no other reason than that point happens to be in the center of the state when one looks at a map.

If we are going to centralize our government according to geographical bounds, then it is fit and proper to locate the national capital at a point some ten miles SSW of Grasshopper, Kansas. Such is but "penny-wise and pound-foolish" bunk.

[Note: Since the above was published in the Mountaineer, and the filing of protests by many others, department officials are now in Roswell arranging for the removal to Las Cruces. We, nevertheless, reproduce the article because we believe it to be a very meritorious statement of the case from the standpoint of the public interest.]

PIONEER WOMEN VS. THE FLAPPER

Harold Bell Wright, Famous Author, Challenges Younger Generation in New Novel.

Is America denying God?

Are we losing the sturdy faith and rugged virtues which transformed a wilderness into the world's greatest and most prosperous country?

Is the old pioneer spirit dead?

Do modern "improvements" improve?

Where is this new generation headed?

These are some of the questions which Harold Bell Wright raises in his new novel of Western adventure, "A Son of His Father," which is being published serially in McCall's Magazine. The former clergyman, who is now the world's most popular author, hits straight from the shoulder. Thus he says of Tucson, Ariz., on a ranch near which most of the action in the story takes place:

Church Changed to Garage

"The Tucson of today, in the heart of this old, old land, is a city of fathers and sons. The fathers, with their ox teams, stage coaches and Indian wars, laid here the foundation upon which they hoped their sons would build a civilization worthy of the race. And the sons are building.

"With feverish activity they are putting down pavements, putting up electric lights, putting down gas and water pipes, putting up real estate signs, putting down more city wells, and extending the city limits to include new additions of the surrounding desert.

"With a few contempt for the past they have destroyed the ancient wall,

The FOOD WE EAT

THE FAMILY TABLE

PREPARING VEGETABLES

POPULAR VEGETABLES

Control Over a Man's Diet Means Control Over His Conduct

POPULAR tradition, observes a writer in the New York Times, has always claimed that diet, more than anything else, makes the man, and now scientists are reaffirming the fact. Food is what produces human energy, physical and spiritual. Food is what builds the body and conditions the growth of the mind. By means of proper victuals the blood maintains its neutrality, the heart its regular beat, the nerves and muscles their ready response to every impulse. The dyspeptic has always been remarkable for his jaundiced temper and erratic ways; the anemic man marked by his lack of virility. Chronic indigestion means chronic mental depression, according to Doctor McCollum, author of "The Newer Knowledge of Nutrition," and he goes on to say: "Intolerance tends to develop in those who are continually in low spirits, and there can be no reasonable doubt that the diet may deviate in the United States to a degree which can easily cause the results we see."

* * * * * * *

However much you may feel that your appetites determine what you shall eat, there is ultimately very little free will for most of the world in the choice of food. Most men are born to a certain fill of fare just as they are born to their racial environment. For the average man his diet, like his religion, is largely a matter of tribal custom, and it touches more strongly than his hereditary ideas about God. It is as impossible as childhood memories. It lasts through life, even though he wander far from home. The Romanov who has resided in the Middle West for the last thirty years still clamors as a matter of right for the buns and black bread, the clams and the clam chowder of his childhood.

At home you must eat according to the family custom; in Rome you must eat as the Romans do. The culinary habits of every race is consecrated by the necessity to live in peace with their neighbors and will continue to do so whether the effects are good or bad. It becomes almost a matter of self-respect. This was illustrated in the recent epidemic of beriberi in southern China, where the cooking continued to demand polished rice, even after the former was known to be the cause of the disease. The poorer Chinese, who are little else, took pride in the fact that at least their rice was as white as their neighbors', and stubbornly refused the safe, unpolished article.

* * * * * * *

Since the average man is as wholly in temperament as in fact, one naturally wonders what effect a national diet has upon its consumers. Is the character of John Bull molded by the mutton he eats? Does the fierce Celtic child which Mistress Eve incites to revolution? It seems plausible enough that a diet of "black pepper flavored with red pepper" should make for hot temper. That the plain, unspiced dishes of Scandinavia should produce the phlegmatic Swede. It is common scandal that the Germans eat five meals a day, with the result that they are pleading but ponderous. Remember that the German genius has created bulkiness like THE Rabelaisgland, but—except for Heine, who was a Jew—not a single great humorist has come from Germany. Whereas France, with its piquant cookery, has borne a nation of volatile wits, among whom have been Rabelais and Voltaire.

On the other hand, a species can be strengthened by better diet. Japanese children born in this country are uniformly taller than boys and girls of the same age in Japan, where there is practically no milk supply. Milk is always a great factor in producing physical size and strength. The vigor of pastoral peoples is well known. In the high pasture lands of central Asia the Aryans and Mongols developed. There, in a climate of extreme heat, cold and drought, originated the virile people who have conquered climate and all in every direction more favorable to easy existence. Abstemious as Mark Twain knew an Irishwoman and were every year brought face to face with the disaster of nearly total failure, they left their homes in wave after wave and dispossessed their neighbors in more fortunate lands. The Arabs, who are a direct survival of the early Aryan tribes, are well developed, athletic, courageous in caring for their flocks under trying conditions. Their nourishment contains meat, cereal and dairy, but chiefly they live upon pressed milk—goats' and camels'—milk in the form of cheese and dried curds.

The Cossacks, too, who are noted for their brawn, eat a great many dried curds. From such facts Doctor McCollum is led to generalize: "Wherever daily animals are abundant in proportion to the population, fine physical development is seen." Fine moral development does not always accompany it, we must add. For the Kaffirs of South Africa, drinking great quantities of milk, are perfect nakedness, while China, entirely without dairy products, held up one of the greatest civilizations the world has ever known.

* * * * * * *

It is hard to say just what foods will decolorize the mind, but it is perfectly easy to tell what will clog mental and physical activity—notably, the man's meat and too few vegetables. In some ways a strictly carnivorous diet is good, illustrated by the Lapps, who live almost wholly on reindeer herds and fish. They are a short, heavily made people, of good body development and great endurance. So were the primitive Eskimos, who, substituting fats as a carnivorous diet, did not even have a word for toothache in their language until seventy-five years ago. But these people have the stern reluctance to carnivorous attitude to exerting themselves. Like the well-fed lion or tiger, they are lethargic and remain like as much as possible. They work only when hunger makes them, and they never think, except under strong pressure. Doctor Grenfel states that the Eskimo is a poor fisherman, and will catch only one fish in a while man's ten. This is attributable in part to intoxication from poisons of bacterial origin, due to putrefaction of proteins in the intestine.

* * * * * * *

The meats of industrial nations, it is true, are very different from those of a carnivorous people. The latter eat all the flesh of an animal, and the marrow and the fats as well, whereas our meats consist chiefly of muscle-containing steaks, chops, joints, etc. But in either case, extreme fat-eaters lethargy. Consider those Britishers who live upon mutton and black pudding, and know the reason for their stolidity.

It used to be supposed that meat was what made a man red-blooded, and grandmothers were fed raw beefsteak to make them donkey tenacious. Now we know better. Green vegetables, once considered harmless, appear to have a much more mission of fact. We hear how the Turks will arise from a meal of cucumbers, and go out to massacre Armenians. The reputation, after all, is the man to be feared, and we feel how fortunate it is that no people is solely vegetarian, in the sense that certain animals are.

What food can do to affect the behavior of races and persons, it follows that control over it would give control over the conduct. Prison authorities have always known this. They feed the convicts sulphates, which, as the exact opposite of an aphrodisiac, keep down riots in the jails. This effect as depressing a question in connection with lives and yet deserved that the hand that rocks the cradle is the hand that rules the world. In the kitchen, the mother of a family has a power for good and evil which she hardly suspects. But if she will only select three wise, well-mixed meals a day, she may expect that the home fires will not fail.

Surgical Pencil

Among the most interesting pencils made is one intended for the use of surgeons. For marking outlines or divisions on the surface of a patient's body before performing an operation the use of the pencil is sometimes necessary, and, as the ordinary pencil is useless, a special one is made which marks the skin as clearly as an ordinary lead pencil will mark a sheet of paper.

New Mexico State Items

The $150,000 bond issue at Deming, for a new school building, was defeated at the special election held last week.

Lavan Oliver of Albuquerque sued seven citizens of Rock Island, Ill., to collect a reward of $2,000, offered for the apprehension of John P. Looney, central figure in the Rock Island vice war.

The postoffice at Los Tanos, near Santa Rosa, has been discontinued and in the future the mail to that point will be checked at Quervo. Los Tanos people are making a big fight to keep the office.

A warrant has been served, charging W. C. Massie, a well known cattle man of Roswell, and his son, Cecil, with the murder of Jim Taylor, another rancher. Taylor was found dead on the Massie ranch near Roswell.

Orchardists of San Juan county are now using an emulsion made of local crude oil for spraying the trees. The county agent is assisting in the work and it is believed if successful it will means a big saving to the fruit growers.

Kentucky tobacco men have arranged for two experimental tobacco farms near Las Cruces during the coming summer. If the experiments prove successful tobacco may become one of the principal crops of that part of the state.

Federal Judge O. L. Phillips at Albuquerque appointed Edgar L. Street, vice president of the Santa Fe Water and Light Company, as receiver of that corporation upon petition of Edward Cornell of New York City, trustee for bondholders under the last bond issue of the company.

The American Manufacturing Company of St. Louis recently closed a contract for over a half million pounds of prairie grass with the farmers of Curry county to use in the making of twine and cotton bags. It is believed that this may develop into one of the big industries of the country.

The first shipment of oil to leave the Pecos valley field was sent out last week when twelve cars were loaded at the pipe line station of the Illinois Producers Company near Artesia. While the Illinois line is not running to capacity a few tank cars may be seen at the loading track every day.

A. A. White, well known resident of Dawson, was instantly killed and his wife seriously injured when they were pinned underneath their auto when it overturned ten miles east of Dawson. Three friends of the Whites in the car escaped with a few bruises. The cause of the accident is not known.

The high school auditorium, recently built at Corona at the cost of over $30,000, was destroyed by fire last week and only the foundation is left standing. The fire, of unknown origin, started in the home of Mr. and Mrs. George Clement while the family was absent and due to the high winds the flames spread to the school building and little could be done to check them.

Orders of dismissal were signed by Judge Neblett of Santa Fe in suits brought by H. A. Jacobs, as receiver of the First National bank in Clovis. It appearing to the court the defendants had paid in full their account, the cases were dismissed. The defendants were P. R. Lyons, A. G. Chalk, C. F. Doggett, E. A. Key, Lee Thomas, C. C. Rogers, Cyn Smith, R. S. Brown, J. F. Sellers, L. M. Woods and H. A. Miller.

Russell and Arledt are recovering from a pneumonia scare, according to word to the state health office. All vaccine in both places was used up and new supplies were rushed by train. All this was the result of one case, of suspected case, in Roswell.

Plans are under way for the forming of a power company at Deming to secure electric power from the Elephant Butte dam for the farming community of that part of the state. If the plans are carried out it will mean that the entire valley will be electrified during the next year or two.

Miss Arlice Bernard of Colfax county is winner of the state prize in the American Legion's 1924 national essay contest, Miss Isabel L. Bolton, state superintendent, announced recently. The Legion is putting on another contest this year. The subject is, "Why Has the American Legion an organization of veterans of the World War, dedicated heart first of all to uphold and defend the constitution of the United States of America?" Miss Bolton is anxious to have a big number of children enter the contest and is sending out instructions to county and city school heads.

The capacity of the Noble Sky mine of the Anita Copper Company at Lordsburg has been increased nearly 100 per cent by the opening of the new mill. There is now every indication that this will soon develop into one of the best paying copper mines in the southwest.

Mr. R. R. Jones, head of the commercial department at Texarkana College of Silver City for the past two years has resigned to resume his accounting practice at Las Cruces—the place of Professor Gallegos has been filled by Mrs. Fred Hernandez.

ROAD BUILDING

PAVING PROGRAM OF NATION INCREASED

A new automobile was bought in 1924 for every 13 feet of rural highway constructed throughout the country. If all the new automobiles were strung in line along all the new roads, each would be able to move only five or six feet before traffic would be blocked. The result of this situation is that 1925 will see the greatest program of new road building ever known in America. Populous districts already have started to do what the railroads did years ago—double track existing rights of way.

Pavements in metropolitan districts constructed a few years ago are not wide enough to care for the increase in traffic. Wayne county, Michigan, in which Detroit is located, fittingly took the first step to rectify this condition. That county spent $1,000,000 in 1924 acquiring wider rights of way and will pursue a similar policy this year. The program planned there involves super highways with widths of 86, 120 and 204 feet, according to traffic demands.

About 64,112,565 square yards of rural highway was constructed last year, equivalent to 6,071 miles of 18-foot road. This exceeded the record of any previous year by nearly 875 miles. Hard-surfaced highways in this country now total 31,700 miles. The greatest increase in pavement construction was in the building of streets and alleys, which totaled 34,927,862 square yards, or 40 per cent more than in 1923. This work is equivalent to 3,278 miles of 16-foot highway, or enough to run a band 54 feet wide from the Atlantic to the Pacific. In addition, contracts for 2,000 miles of hard-surfaced highways were carried over into this year.

Asphalt pavements laid on the streets and highways of the United States in 1924 total 118,800,000 square yards. This is an increase of 10 per cent over the yardage laid in 1923. Reports from Washington, Oregon, California, Arizona and Nevada indicate that 72 per cent of all paving contracts let in those states in 1924 were for asphalt.

Telegraphic forecasts from 37 state highway commissioners and 40 city engineers of cities of 100,000 population or over indicate the 1925 paving will run 20 per cent over 1924.

Grade Separation Urged for Safety of Public

Separation of all grades, either by depressing the railroads or elevating them, is advocated as the only sure method of eliminating the appalling loss of life at such danger points. Sooner or later, an aroused public indignation will force the separation of all grades, such as have been brought about in European countries.

Just now the railroads are making a "last ditch" stand by attempting to get through congress an act which would make every motor car stop at every railroad crossing. This is an attempt to deprive ordinary citizens of all rights to damages in case of accident between a motor car and a railroad train.

Such a law would not reduce crossing accidents to any appreciable degree, because many motorists are not sufficiently acquainted with the territory in which they are driving to know when they are approaching a railroad crossing. Oftentimes it is safer to proceed across them than to stop.

There is one answer to this problem. Either make the locomotive stop, which is perfectly feasible, since the engineer knows just where every crossing is, and economically it would be cheaper than to make the line stop for automobiles; or separate all grades and eliminate the hazard once and for all.

Much Road Work Done by Forest Service Bureau

More than 1,000 miles of roads and nearly 5,000 miles of trails were constructed within or adjacent to the 157 national forests during the fiscal year ending June 30, 1924, according to the annual report made by the chief of the forest service to the secretary of agriculture. In addition maintenance work was performed on 7,000 miles of roads and 32,000 miles of trails.

Including the construction work completed within the last year, the total mileage of national forest roads constructed by June 30 of this year stood at 8,700 and the total mileage of trails at 35,000.

The sum of $6,301,142 was expended on the road and trail work of the forest service during the last fiscal year, the report says. This sum was augmented by funds from co-operative agencies, such as states, counties and local organizations.

Saved Good Road Taxes

Some of the automobile owners concerned here with piled rocks holes of stones during the year will be more let up at times over extra car expenses in dollars, roughly speaking. A dollar of "taxes saved" is quite apt to mean a "tax-spot" hole—some out of your pocket and up on the club register in the garage. The big question—but—about—we quite glad roads—perhaps to get more good roads?" It is worthy of consideration by those concerned.

SICK WOMEN ATTENTION!

Read this Remarkable Testimony Regarding Results from Taking Lydia E. Pinkham's Vegetable Compound

Norfolk, Virginia.—"If you only knew how many women and girls have taken your medicine by hearing my testimony, it would seem wonderful to you. Every day and every chance I have I advise some one to try it. It was in June, 1904, when I had given up to never get well, that I wrote to you. My husband went to the drug store and brought the Vegetable Compound home to me. In a few days I began to improve and I have often taken it since. I am now passing through the Change of Life and still stick by it and am enjoying wonderful health. When I first started with your medicines I was a mere shadow. My health seemed to be gone. The last doctor I had said he would give me no more local treatments unless I went to the Hospital and was operated on. That was when I gave the doctors up. Now I am a healthy robust woman. I wish I could tell the world what a wonderful medicine Lydia E. Pinkham's Vegetable Compound is. I will be only too glad to answer letters from anywhere. I wish all sick women would take it."—Mrs. J. A. Jones, 817 Colley Avenue, Norfolk, Virginia.

SPOHN'S DISTEMPER COMPOUND

Don't take chances of your horses or mules being laid up with Distemper, Influenza, Pink Eye, Lymphitis, Sleeves, Coughs or Colds. Give "SPOHN'S" to both the sick and the well ones. The standard remedy for 30 years. Give "SPOHN'S" for Dog Distemper. 50 cents and $1.20 at drug stores. SPOHN MEDICAL CO. GOSHEN, IND.

KEEP YOUR SCALP Clean and Healthy WITH CUTICURA

Bringing Him Down

Him—I feel like a perfect fool.

Her—Don't flatter yourself; nothing is perfect.

Another Nurse Praises Tanlac

"As a nurse I have seen many marvelous results from Tanlac. For anaemia, nervousness, stomach trouble and building up the system after operations I consider Tanlac great"—Mrs. K. M. Lowe, Walnut Park, Cal.

NURSE Lowe's statement merely backs up what over one hundred thousand grateful Tanlac users have said about this great natural tonic and builder. Our files are packed with such testimony.

If your system is run down, if you can't seem to eat or sleep, have lost weight or suffer from aching pain, why not let Tanlac start to bring you back to vigorous strength and health.

No long, wrecked visit to get results! Tanlac starts right in to build you up. It cleans the blood, revitalizes digestive organs, fires up the liver and makes you feel like a new person.

For Constipation Take Tanlac Vegetable Pills

TANLAC FOR YOUR HEALTH

Queer Thing

Father William P. Cantin, who has resigned his chaplaincy of Sing Sing prison after 12 years' service, takes a deep interest in prisons and reform laws.

Taking apart a typewriter of rather antiquated pattern, Father Cantin said the other day:

"A queer thing happened to a man in that penitentiary in 1902."

"Yes? What happened?" said the reporter.

"He reformed," said Father Cantin.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the hard calluses, without soreness or irritation.

Speeding the Crops

Dr. Mikhail Popoff, professor in the University of Baku and Bolshevist ambassador to Berlin, says claims to having increased the yields of many crops, including cotton, cereals and tobacco, by from 20 to 50 per cent, by a process of chemical treatment of the seed. He has used various chemicals, such as magnesium chloride and a number of metallic salts, which are poisonous to vegetable as well as to animal life when taken in large quantities. He immerses the seeds in the proper chemical solution, leaving them there for a fixed time. If left too long, the seed life is destroyed; if not long enough the chemical is ineffective.

Unscrambling

Fannie Hurst, the well-known writer, was discussing her recent Russian tour.

"It was horrible," she said. "The Bolsheviks tried to put their best foot forward, but they couldn't hide the fact that the condition of Russia is unutterably horrible.

"The Bolshevik defenders of that horrible, tortured country were about as convincing as the Dutch barber.

"A patron said to the Dutch barber: "Can you honestly recommend this hair-grower?"

"Dun I? Dun just bet I can,' the barber answered. 'Look what a head of hair I got.' Then in removing the hair, for it was only a wig, and went on: 'And now look how bald I was before quit!'"

Flared Skirt and Marked Waistline

The final Paris openings served principally to consign the tubular silhouette of last season and its invariable accompanist—boyish simplicity—to the dark caverns of oblivion. The outstanding themes of the later exhibitions, writes a Paris fashion correspondent in the New York Herald-Tribune, were the flared skirt, a marked waistline and the molded bodice, and, although many salons omitted one and even two of these ideas, at least one of the triumvirate appeared in each collection—and obviously only one is necessary to terminate the tubular silhouette. Brief summaries of the final Paris openings are appended.

It would be patently stretching a point to describe the Callot showing as one which emphasized all of the spring departures. The collection was so large that it naturally included most of the new themes, but none of these was made a significant feature. The skirt is short and it often terminates in a bomline flare as a result of an added flounce. The waistline is not particularly in evidence, except in several period models which exploit a slightly lower than normal line. Molded lines are generally adhered to, except, of course, in some bouffant formal gowns. The lavish ornamentation which has become the custom in Paris robes du soir this season is again sponsored by Callot, who uses lace and embroidery in her interpretations. Ensembles and tailleurs occupy prominent places in this collection, a significant trimming on the former being the lace or chiffon jabot. The outstanding color note is light except where dual color combinations are employed.

Lanvin's Ideas for Spring.

Jeanne Lanvin has never been noted for a strict conformity to the tenets of the mode, and her present collection wanders as far afield as ever. There is added width to the skirt, achieved principally through the circular cut and through plaited effects, but there is little evidence of molded lines or a distinctly marked waist. The jumper sports frock, always typically Lanvin, remains one of the noteworthy features of this collection, the new models comprising a long jumper and a plaited skirt. In many instances woolen capes accompany sweater-jumpers. Sports hosiery frequently matches the color of the accompanying frock or suit. The tailored suit appears usually in gray mixtures and shows a preference for the short jacket. Bouffant period effects are developed in taffeta and trimmed with ribbons after the traditional robe de style manner of Lanvin. Printed crepes, foulards, taffetas, chiffons and satins are employed by this house, the outstanding colors being red, blue and a shade which is a blending of green and yellow. Pointed designs appear on several daytime frocks.

A marked waistline—sometimes high, sometimes low and occasionally normal—and a definitely wider skirt are the principal new tendencies of the Chanel collection. The added width

Ensemble Suit of Black Faille—Blouse of Dull Red Crepe.

to the skirt is arrived at by means of flounces, pleats and godets and it is most manifest toward the abbreviated hemline. There is little of the molded effect apparent except in the high-length jackets of the tailleurs. Three-quarter length coats also accompany the tailored suit. Printed designs and two-tone effects characterize the fabrics, among which satin, taffeta, crepe de chine and chiffon are noteworthy. The evening silhouette is a little longer than the daytime prototype and a lot more elaborate. Beads, embroideries and metallic brocades are the principal modes of ornamentation.

Frankly departs from the tubular silhouette in such a moderate manner that many of the models still give the impression of the straight, slim contour of recent seasons. There are definite tendencies, however, toward a high, marked waistline and fairly full skirt, the latter achieved principally through plaiting and flounces. Skirts, incidentally, are quite short. Tailored suits and sports frocks were prominent in this collection, the former consisting of either long or short coats, short straight skirts and tailored blouses, while the latter invariably combined a jumper blouse and a plaited skirt.

A wide skirt and a frequently marked normal waistline are the significant contributions of Madeleine Vionnet to the new spring fashions. This house presents, as always, an extremely individualistic assortment of frocks which

Smart One-Piece Frock in Black and Red Printed Crepe.

adheres to the mode only in its elementals. Blurred prints, effected by screening the printed fabric with a gossamer plain material, share the stage with alpaca and satins for formal and informal dresses. Fringe trimming is an important note in this collection, and it appears on afternoon as well as evening gowns. Evening dresses are elaborate and feature striking color combinations as well as intricate embroideries. Black is the outstanding color.

Drecoll is decisive in its sponsoring of the mold and flare, continuing the form-affecting silhouette from the bodice to more than half the length of the skirt, at which point the flare is introduced. There is nothing vague about the skirt flare and the sharp-line lines from bodice to knees are just as distinctive. Tailored models are straight all the way, featuring both the long and the short coat with the former in the majority. The ensemble is a feature of afternoon dresses, the talking object frequently being a fur trimming. Drecoll has made a pronounced effort to conform to British and American ideas in an assortment of sports frocks which are quite different from the Paris viewpoint.

Modes Sharp by Person.

Renee pays little attention to the flare of the high waist in her spring collection—the slim silhouette is retained and the waistline, though marked, is distinctly low. Taffeta and poplin stand out among the afternoon fabrics while satin and chiffon are most important in the robes de soir. Woolen mixtures are used for the tailored suits. Gray is the dominant color of the tailleur which is of the English type and generally favors the short jacket. The jumper frock, of course, leads all the sports models, while the ensemble is still a feature of daytime clothes. Trimmings are scarce—they are replaced by fabrics, hand painted in designs which are essentially modernistic—notably cubist floral effects, animal motifs and bizarre geometric figures.

Daytime dresses of one designer are typical of the spring tendencies of the mode. The skirt is definitely wider and there is a distinct waistline which occurs at a higher than normal point. Each of these characteristics is usually confined to the front portion of the frock, the back remaining straight and molded. The tailored suit and the ensemble occupy important places with this house, the former usually accompanied by a short coat and the latter by a three-quarters-length model. The jumper frock and the cape ensemble are among other features of the daytime costume. Sleeves then characterize the evening gowns, and these are often studded through girdles which are draped over the hips. Bustle effects are also introduced in robes du soir.

The SANDMAN STORY

CHINA DOG AND JOHNNIE

IT WAS a funny little white china dog with yellow ears and tail and yellow spots on its sides. It stood on the mantel in Grandma's parlor in the farmhouse. Johnnie looked at it with longing eyes but he had been told not to touch anything in that room.

It was a warm day and the old haircloth sofa was so slippery and cool to sit upon so Johnnie curled up on it and looked at the china dog.

"It wouldn't hurt if I just took it down carefully," he thought with his eyes fastened upon the dog. "I would be very careful not to break it."

And then a queer thing happened. Johnnie found himself running through

Saw Little China Dog Chasing a Rabbit in the Woods.

the woods behind the china dog, which was chasing a rabbit—the very thing Johnnie had thought he would like to do many times with Grandpa's hunting dog.

He was so interested in catching the rabbit that he quite forgot the dog was china and might be broken on the runes. For though it seemed to be quite alive Johnnie saw its smooth coat shining in the sunlight as it had always shone.

Under a stone wall at the edge of the woods the rabbit ran and over the wall went the china dog and, crash, on a pile of stones on the other side Johnnie heard it fall.

"Oh dear, what shall I do," he began to cry. "Grandma will be sure to blame me and I didn't take him off the mantel."

Johnnie jumped over the wall and began to pick up the pieces of the little china dog, when he felt someone gently shaking him by the shoulder. "What are you crying about, son?" inquired Grandma's kind voice.

"I didn't take him down," said Johnnie. "He must have jumped off the mantel and followed me and he almost caught that rabbit, too."

"What are you talking about, dear?" asked Grandma. "I guess you have been asleep and dreaming." Johnnie looked at the mantel. There was little china dog just as he always had been, not broken at all. Johnnie looked at his grandmother. "I thought he was all broken," he said, "but I didn't touch him or anything in here. I just looked at the pretty china dog, that was all."

"I know you didn't touch anything," said Grandma, "and because you have been such a good little boy I am going to give you the china dog to take home with you. It belonged to your father when he was a little boy."

Johnnie's eyes grew bright. He hugged the china dog close in his arms and went out of the cool parlor with Grandma. "I shan't take him hunting," he said.

"He must be a hunter, though," said Grandma with a smile, "for he found the best little boy I know." And when his Grandmother leaned over and kissed him Johnnie was glad he had not listened to the tempter and taken the china dog from the mantel.

Little china dog stood on the bookcase in Johnnie's room for many years. And often when he was tempted to do something he knew he shouldn't Johnnie looked at the china dog, which always seemed to have his black eyes fixed upon him, and remembered what his Grandma had said, and resisted temptation just as he had in the farmhouse parlor when he was a very little boy.

Have You This Habit?

By Margaret Morison

CONDITION, NOT A THEORY

CONNIE'S name was not, as most of her friends supposed, an abbreviation of "Constance," but of an inverted form of "Confucius" to whom, at the time of Connie's arrival, her mother had been a temporary convert. By the time Connie was grown, her mother had run the gamut of the isms, and then Connie herself began.

She broke her engagement with Jim because she had arrived at the stage of "Careers for Women." Then in the theory of supply and demand, she plunged into the old furniture business. Part of the world she reasoned, was always living and in need of it, and at the same time that another part was in the frame of mind for wanting something new. Civilization required furniture; for the person who established the clearing house for those two complementary wants, fortune was waiting.

Connie never knew where the idea came. She suspected that it might be because her supply list was always ahead of her demand list. At all events, about a year later Jim rescued her from bankruptcy and nicely married her.

Then Connie threw all her energies into being a model, modern mother. What a mother should not become to her children was her chief preoccupation. Jerry and George and James were to be independent; they were to be trained up without the benjamin. So Connie told them that in society people tattooed under a disadvantage if they did not pay attention to personal cleanliness, and that it was up to the younger generation to wash their own hands before going to school. Above all, their wills must not be broken. She was to be its own punishment; so, when her three continuously stole apples from her neighbor's trees, and broke limbs off the trees Connie smiled and waited—"for a stomach ache or a criminal career?" her neighbor asked rather tartly.

Then one day Jerry in his free way decided that at thirteen he wanted to see the world, of which mother talked so much; and, with George and James in his wake, he started down to the station; and, with those unhampered imaginations that Connie felt she had produced, they hid themselves aboard a freight car.

Fortunately a yard man knew them and haled them home by the collars, just at the time of Jim's return from the office. There's evidence were a couple of relief and priest but Jim, with his coarse, masculine nature, was circumcised. Silent and serious, he took the three to their own room, and presently there issued forth sounds of no common nature.

When, later in the evening, Connie discovered on the score of instilling fear into her sons' natures, Jim said, "My dear, in the words of a great American statesman, 'It is a condition, not a theory that confronts us.'" Thereafter Connie's habit of theorizing tailored under some constraint.

Adams Not Superstitious

John Quincy Adams was the first President to take the oath of office on Friday.

"What's in a Name?"

By MILDRED MARSHALL

FACTS about your name; it's history; meaning; whether it has definite significance; your lucky day and lucky jewel

MARCELLA

A MOST popular French name which has gained great vogue in this country is Marcella. It is a name with a distinguished origin and history. It comes from ancient Rome directly, though its earliest origin is found in the Greek word meaning soft or tender, yet by curious twist this word signifies "of Mars," and hence should be regarded as a term denoting strength or an heroic quality.

In early Rome Marcius was a name belonging to a noble gens of Sabine origin which gave a king to Rome and later named the high-spirited Marcius Coriolanus. The daughters of this gens were called Marcia or Marcis, and later from the same origin sprang Marcius. The last mentioned was made famous by one of the young Roman girls who endured martyrdom under the Emperor Decius.

There was a St. Marcellus among the Romans. He figured among the warrior set of Venice and had a French namesake called Marcel. The feminine counterpart, Marcella, made its first appearance as the name of a pious widow whose friendship with St. Jerome took the fancy of the French. Though they prefer Marcelle, the other spelling is used by them, and Marcella is extremely popular in England and Ireland.

The topaz is said to be Marcella's [illegible] gem. It will protect her from evil influence and guard her from worry. Sunday is her lucky day and 3 her lucky number.

A LINE O' CHEER

By John Kendrick Bangs

A MODEL ACRE

GIVE me an acre wild and bleak,
That I may call my own,
Where I may dwell and daily seek
Pure beauty to enthrone.
And by my effort lift with grace
Each dry, untruthful weedy space,
And show the world how 'twould appear
If each man tried to lift with cheer
The space about him, as though he
Were laboring at love's tryste.

(© by McClure Newspaper Syndicate.)

Ramon Novarro

In Filmdom's directory, where each player stands for something different, it is Ramon Novarro who stands for Romance—because he is handsome, because he typifies the tender lover, because he seems unsophisticated and human—a Prince Charming of the screen. He has been seen to advantage in some splendid pictures.

The Why of Superstitions

By H. IRVING KING

QUEEN OF THE MAY

THERE is no survival more pretty and pleasing in its modern aspect or derived from a more gruesome ancestry than that of choosing a May queen, a custom now gradually disappearing but which, not so very long ago, was a popular village ceremony of May day. And until comparatively recent times there used to be chosen, also, a king of the May. Many learned antiquaries have written upon the origin of this custom and have clearly traced it back to the days when there was annually chosen a representative of the spirit of vegetation which representative was afterwards sacrificed for the benefit of the crops. In some of these primitive rites only a man was chosen as the representative of the corn-spirit; in others a man and a woman as representing the male and female forces of generation.

There is not space here to go into the subject of the "aging goat" who was sacrificed at harvest time, a custom closely related to, or a part of, the general primitive conception of the spirit of vegetation in its relation to human affairs. Suffice it that the king and queen of the May were originally offered as human sacrifices after having "strutted their little hour upon the stage." Mr. William Aiken, in an article on "The Cave Man in Ourselves," published in Collier's some time ago, says: "For long ages after the actual killing of the May King and queen had ceased into Celtic there persisted a tradition of ill treatment of the reigning pair—a symbolic execution," and the records of an English parish show that as late as 1547 it was necessary to impose a heavy fine upon any one who should refuse the office of May king or May queen when elected to such position. Evidently the custom of their "symbolic execution" had not entirely gone out at that date.

They Don't Shave

Somebody asks if the women of to-day have any [illegible]. They are not wearing them if they have.—Toledo Blade.

Get Back Your Health!

Are you dragging around day after day with a dull backache? Are you tired and have mornings—subject to headaches, dizzy spells and blurry, disturbing urine? Then there's surely something wrong. Probably it's kidney weakness! Don't wait for more serious kidney trouble. Get back your health and keep it. For quick relief get Doan's Pills, a stimulant diuretic to the kidneys. They have helped thousands and should help you. Ask your neighbor!

A Colorado Case

Geo. Bittner, 114 S. Cascade St., Colorado Springs, Colo., says: "Many another colored me through my back. There was a heaviness to my pack, too. At night I had to get up several times to pass the kidneys secretions, which burned and irritated and complained excitement. Doan's Pills drove all these symptoms from me."

DOAN'S PILLS 60c

FOSTER-MILBURN CO., MFG. CHEMS., BUFFALO, N.Y.

LOCAL AND PERSONAL

Inspector Ab Hunter was here from Alamogordo yesterday.

S. M. Cozzens, of the Capitan country, was a Tuesday visitor.

Mr and Mrs. R. C. Sowder returned Sunday from El Paso.

M. B. Paden, who has been in El Paso for several days, thinks of locating there.

Miss Olive Albro was here Tuesday from Capitan attending to some business matters.

The clouds advanced and retreated, but left no moisture. So it has been with every favorable indication.

Stock of all kinds are doing very well, notwithstanding the continued dry weather, but they can't last forever.

Father P. J. Otten is out in the county this week visiting his different charges. He expects to return tomorrow.

Spring is here; the birds sing, the trees bloom and the young folks gambol on the sward—although it's not green.

W. L. Broocke, a well-known citizen of the Little Creek country, was a visitor Monday, and made this office a pleasant call.

Mr. and Mrs. George Spence, Jr., are here visiting their father, Attorney Geo. Spence, and other members of the Spence family.

Sam Coldren was over Sunday from Bonito. He is engaged with some associates in the development of a mineral property in that district.

T. A. Spencer went to Santa Fe Monday, to appear in a hearing there. From Santa Fe he will go to Mexico on a business trip requiring several days.

H. S. Fairbanks, superintendent of the eastern division, was here Wednesday attending to company business. Mr. Fairbanks was trainmaster here for a number of years.

Though the fishing season is somewhat in the distance, yet the disciples of Izaak Walton are beginning to rummage around for the old fishing tackle, these pleasant spring days.

Mrs. Jos. A. Haley went to Alamogordo to visit a few days with her father. Later she went to Cloudcroft, where she will visit her sister, and will probably remain a couple of months.

We have been enjoying ideal spring weather the past two weeks, but that, alone, doesn't make us happy. We need moisture—and that soon—before our cup of happiness will be filled, much less overflow.

Ed Peters was here Saturday from Bonito. He reports a little mining activity in his section, and the prospective development of a claim he has held many years, and on which he recently executed a bond and lease.

W. M. Ferguson was here for a short time Wednesday. He had just finished building a bridge near Lincoln, and, under instructions from the State Highway Board, will soon begin painting the bridges between Capitan and Lincoln.

Rev. and Mrs. McPherson and children have returned from Fort Bayard, and the pastor will fill his regular appointment at the Methodist church Sunday, morning and evening. Rev. McPherson was engaged in a two-weeks' meeting at Fort Bayard.

Frank Maxwell shipped his entire flock of sheep to Wichita, Kansas, this week, to feed them alfalfa and place them on grass pasture. The continued drought here did not portend a good lamb crop, and, indeed, serious misgivings were felt concerning the saving of the ewes. A good lamb crop and better wool, which means better prices, Mr. Maxwell figures, will more than cover the cost.

Mrs. T. J. Rowden, mother of Mrs. W. J. Langston, arrived Sunday from El Paso. She was accompanied by her youngest grand child, and the two will leave the latter part of the week for St. Louis to visit Mrs. Westwood, daughter of Mrs. Rowden.

W. J. Langston returned Saturday from Capitan, where he had been engaged in building operations. He superintended the building of the new post office, which is only awaiting an order from the department for occupancy.

Card of Thanks

We wish to thank our many friends who have been so kind in our recent bereavement.

Mrs. Frank L. Standhardt and family.
Corona, New Mex.

Aviation Dance

The Aviation Committee of the Chamber of Commerce will give a dance at the Lutz Hall tomorrow (Saturday) night. It will be a "chaperone" dance, and the admission will be a $1.50, and includes punch, which will be served by the committee. The proceeds are to be applied upon the building of an airplane landing, which is to be erected here at an early date. All should be interested in this public improvement and give liberal support to this project.

The Prehms Return from a Visit to Europe

Mr. and Mrs. E. O. Prehm and sons, Otto and Ernest, reached home Tuesday morning, after an eight months' visit in Europe. They landed in America some weeks ago, but visited for a period with relatives in Emporia, Kan. They enjoyed their stay in Germany, since last August, and had a most delightful visit with the "Old Folks at Home." Among many interesting things they brought back with them from Germany is a fine Russian wolf hound, on which first class passage had to be paid. All are enjoying the best of health and glad to be home.

Fort Stanton Has Fine Ball Team

MAKES A GOOD START

Fort Stanton has had some good ball players in the past, and their start this season indicates the present one is not below that of the past. Last year they defeated, we believe, every team they met, with the exception of Carrizozo and El Paso, which were about a 50-50 result. As this paper predicted over a month ago, this year's team bids fair to excel its record.

It played its first game this season with the Military Cadets at Roswell, which it won by a score of 5 to 4. The Cadets were given a return game on the Stanton diamond later. The result was the same—5 to 4.

The Cadets, who are good ball players and good sports, as well, acknowledged the superiority of the Stanton team. As the scores indicate, both were slashing good games and were even up to the last inning.

The West Texas Teachers' College team played the Cadets a two-game series, Monday and Tuesday, at Roswell, and the first game went to the Cadets—11 to 1. In the Tuesday game the Cadets again won, 11 to 9. A good team, yes; but twice defeated by by the boys at the San.

The foregoing is given chiefly to show what our neighbors are doing in the sport line, and what they have produced in the way of a team. Anybody who enjoys a ball game derives added pleasure from watching two well matched teams in action on the diamond. To this end we urge the Carrizozo boys to round up their players, whip their team into shape by intensive practice, and arrange a series of games with the Stantons; and, in fact, be ready to meet all comers. We have much excellent timber—some veterans, others new recruits—all of whom are handy with the bat and ball, and an aggregation can be formed that will make the fast-going team at the Fort sit up and take notice—even though the latter is a jump ahead.

Universal Providers. CARRIZOZO, N. M. Established 1886

Charged with Poisoning Cattle

J. A. Adams, a rancher north of the Capitan mountains, was given a preliminary hearing Monday before Justice W. W. Stadtman, on the charge of poisoning cattle. The complaint was made by R. C. Sowder, who had lost a number of head of cattle, and investigation pointed to poison as the cause of death.

The evidence was to the effect that Adams was seen on the Sowder range with salt; that the salt was believed to be poisoned, and that the circumstances and surroundings pointed to Adams as the distributor of the salt. There appears to be no direct evidence connecting Adams with the offense, but witnesses testified to having seen Adams riding over the range, and when an investigation was made along the trail where he was seen to ride, salt was found.

Cattle began to die, and when the dead carcasses were examined, it is said, the intestines and stomach showed that some strong poison had been taken with food, or otherwise, and those examining the carcasses state that the action of the poison resembled potash or lye.

The defense put no witnesses on the stand, and at the conclusion of the prosecution, the defendant's attorney, H. B. Hamilton, moved to dismiss for lack of evidence. This the court declined to do, and the defendant was held to bond in the sum of $1,000, which he has since given and been released. Attorney G. B. Barber appeared for the prosecution.
