### BOURNE-HIGHTOWER

Married at high noon on Wednesday, May 6, in the hotel parlor at Nogal N. M., Thos. A. Hightower of Carrizozo to Mrs. Annie B. Bourne of Nogal, J. E. Koonce officiating. Immediately after the ceremony dinner was announced, and all present partook of a very fine repast. About 2 P. M., the couple left amid a shower of rice and shoes for Carrizozo where they will make their future home. Wednesday night they were visited by friends with musical instruments of various kinds and celebrated in the usual noisy manner, after which refreshments were served and the guests departed extending hearty congratulations.

### WHITE SOX WON BOTH GAMES

The Tobin White Sox won both games from the Carrizozo boys by easy scores. The Carrizozo team failed to come up to its standard of ball playing. The White Sox are in good condition and played fast ball. The Carrizozo boys have not had the practice and did not put up first class games.

The boys hope to be able to win back the honors when the White Sox come up here which will be May 15th and 16th.

### BALL GAME SATURDAY

A base ball game is scheduled to be pulled off tomorrow which will afford great amusement for all who witness it. The business men from the east and west sides of town have organized teams and a fast game will be played on the local diamond. Although there are some old time ball players on both teams, they are out of practice and can not be expected to play such a scientific game. It will be great sport as well as a recreation and as the teams are evenly matched it doubtless will end with a good score.

# THE OUTLOOK

If not paid within six months ..... \$1.50

The prospects of a great future for Carrizozo are very good, and if the people continue to take advantage of the opportunities that present themselves as they have done, there will be a great change in the near future. Carrizozo is the largest and best town in Lincoln county. It is situated on the main line of the Rock Island railroad and in direct connection with the important commercial points of the southwest. It is located in a large fertile valley which is being settled by experienced agricultural people who are certain to make farming in the valley a success. Its mining resources are good, there being several valuable, well paying mines in the surrounding country, many of which are now in operation and others which are expected to be opened soon. Carrizozo being on a main line has many advantages over the other towns of the county in a commercial way, and the railroad business is of great importance to our little city. The business men of Carrizozo are energetic and prosperous and are all working for the development and prosperity of the surrounding country. Carrizozo will undoubtedly be the county seat of Lincoln county in the near future, and with a steady immigration of settlers and development of agricultural resources, and a steady increase in mining and railroad business, together with the livestock industry are sure to put it among the leading towns of the territory. Our climate is ideal and the weather perfect with the exception of a few weeks of windy weather in the spring which is soon forgotten when the fine weather is at hand. Our school facilities are unsurpassed in any section of the country and are unequalled by any other town in the county. There is an increase and bright prospects in every line of business. The surrounding country is being settled up by intelligent, industrious people who are of vast importance to the future of the country. The people of Carrizozo and vicinity have done their part so far and if they will continue to do so, will be rewarded for their strenuous efforts by seeing Carrizozo one of the leading towns of New Mexico.

Ex President Roosevelt has started off very successfully with his hunt in Africa. He has succeeded in capturing several lions and other game of less importance. His son is also coming up with his share of the honors.

The great slaughtering in Turkey still continues with increasing horror and shame.

**RUBBER WEED CAUSES SHEEPMEN OF SOUTH-WEST HEAVY LOSSES**

Albuquerque, N. M., May—For several years past the sheepmen of the southwest have suffered serious losses from a disease known among the Mexican herders as "pingue."

"Pingue" is popularly supposed to be caused by eating either the leaves or roots of a plant which has in the last few years been quite prominent in the public eye as the "rubber plant" or "rubberweed."

Whether this plant is a true rubber plant or not is a matter which does not interest the sheepmen so much as some remedy for the sickness that follows its eating by their sheep. On the Carson National Forest in New Mexico, Forest Ranger Bert Phillips, in whose district a great many sheep had recently died from pingue, after making a study of the sickness, suggested to the sheepmen whose animals were dying with it, that drenches of hot water and salt might prove efficacious.

The materials for the remedy were so quickly obtained and the remedy so easily administered, that several of the owners gave the plant a trial. The sick sheep were drenched every hour with liberal doses of the mixture with the result that animals which before drenching were unable to stand were inside of twenty-four hours, eating and running around with the rest of the herd apparently as well as ever.

While the government experts have not yet made a study of this disease or given the suggested remedy official sanction the remedy itself is apparently harmless and unobjectionable, that considering the results obtained by its use there seems to be no possible danger in giving it more extended publicity. The sheepmen can, in this manner, give it more extended trials and possibly save themselves from the serious losses which the eating of this weed by stock has heretofore caused.

The disease will be carefully studied and the results of administering this remedy watched with a view to correcting any errors in its use should it not prove of as great value as is expected. Meantime, every sheepman whose sheep are sick or dying from pingue will, no doubt, be only too eager to give this simple remedy of hot water and salt drenches, every hour, a trial, because the annual losses have been serious ones for the flock masters of the Southwest where the disease or sickness appears to be most prevalent at the present time.
