CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, AUGUST 18, 1911

PRICE \$1.50 THE YEAR

## PAST YEARS' PROGRESS

**A Brief Review of Advancement Made in Carrizozo District in Last Year**

### MINING INDUSTRY PICKING UP

Although Carrizozo is but four years old its development has been rapid and permanent. At the present time its prospects are brighter than at any time since its inception. The beginning of the year saw the completion of the new \$20,000 high school building and this month the new Methodist church was completed at a cost of \$6,000.

There has been much activity in the mining industry in this vicinity during the past year. The Economic Mining and Milling Company have spent a large sum developing their property which is six miles south of town. The property is a silver-lead and copper proposition and several rich strikes have been made on the property during the year. The tunnel they have been driving in the mountain is now almost completed to connect with the shaft and they will begin shipping ore to the smelter at an early date. Enough ore is already in sight and blocked out to justify installing a concentrator.

At White Oaks more men are employed in the mines at the present time than have been for a number of years. The best producing mine at the present time is the North Hometake which is operated by the Wild Cat Leasing Company who ship thousands of dollars worth of gold every month to the mint at San Francisco, and the mine has already produced comfortable fortunes for the lessees.

A company has been formed to operate the Omega coal mine which is located three and a half miles south of town. A tunnel has been driven at the mine 150 feet and the vein at that distance has widened out to the extent of four feet. Equipment has been secured and the mine will be operated this fall to furnish coal for Carrizozo and vicinity. T. F. Weatherby a mining engineer from El Paso is here this month doing preliminary work on the property.

A good deal of development work has been done by R. B. Thomas on his iron property this year which is located in the Osuro mountains 18 miles west of here. The property now shows a vein of iron ore more than ten miles in length.

The Jicarilla district has had considerable development work in progress during the past year as well. The Littell Metal Mining and Reduction Company are running a plant and employing a number of men and several other companies are at work on their properties as well as are the placer workings being operated as formerly.

The Western Clay and Gypsum Products Company who operate the large cement and plaster works at Ancho have re-incorporated during the past year and have doubled their output. More men are at present at work at the company's plant than ever before.

HELLO JIM - WHO LET YOU IN?

CATCHER KING OF ALAMO ADDRESSING THE GRAND STAND

### THERE IS STILL CHANCE FOR STATEHOOD

Although President Taft has emphatically returned the Flood resolution to Congress with a veto message, friends of statehood in Washington still have hopes of getting a resolution through, this session of congress, admitting New Mexico and Arizona to the Union. Both the house and senate have appointed committees to confer and form some agreement for the passage of a bill before adjournment which is scheduled for August 24th. Chairman Smith of the Senate Committee on territories introduced a resolution immediately after the receipt of the veto message from the president, this resolution provides for the elimination of the objectionable recall in the Arizona constitution and is said to be favored by the President. The sentiment in the house is to pass the Flood resolution over the President's veto but it is conceded that it would not be possible to do this also in the Senate and it will be necessary to take quick action on whatever resolution agreed upon by the two committees.

The President did not spare words in his condemnation of the Recall feature of the Arizona instrument, which he said "would compel judges to make their decisions under legalized terrorism". The recall in its application to county and state judges, seems to me so pernicious in its effect, so destructive of independence in judiciary, so likely to subject the rights of the individual to the possible tyranny of a popular majority and therefore to be so injurious to the cause of free government, I must disapprove a constitution containing it.

Could there be a system more ingeniously devised to subject judges to momentary gusts of popular passion than this?

In regard to New Mexico he said, "I have approved the constitution of New Mexico and so did the house of representatives of the 61st Congress. The senate however, failed to take action upon it."

### School Commences September 11

Mr. Perry Chairman of the Board of School Trustees for this district announces that school will open for the district on the second Monday in September the date being September 11th.

Dean Sherry of Alamogordo who came up with the Alamo baseball team Saturday evening and played here Sunday, left that night for Santa Fe where he will take the examination for admittance to the New Mexico Bar.

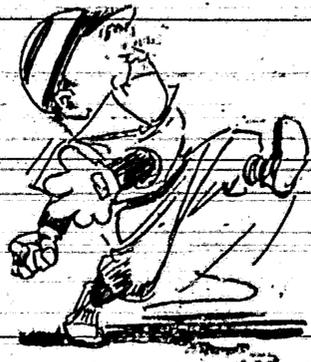

## ALAMOS LOST 2 GAMES

Both White-Oaks and Carrizozo Won in Sunday Ball Game with Alamo

### BROWNS VS. STANTON SUNDAY

The Alamogordo baseball team with a bunch of Alamogordo fans were the guests of the Carrizozo team last Saturday evening and Sunday afternoon the "Alamos" met defeat on the local diamond at the hands of both the Carrizozo Browns and the White Oaks team. From Saturday evening on, the city was alive with a spirit of good fellowship and all those participating in the fun had

an exceptionally good time. A splendid dance was given at Real's Hall Saturday night, the Alamo boys arrived a little late but were the guests of honor and the hall was filled to overflowing and the light fantastic was tripped until the midnight hour. Sunday afternoon the baseball games began soon after two o'clock and both contests were witnessed by a full grand stand of enthusiastic rooters. The first game was Alamogordo versus Carrizozo resulting in a score of 7 to 6 in favor of the Browns and the second contest of seven innings was played by White Oaks and Alamogordo which also resulted in a victory for a Lincoln County team; the score being 3 to 1. After the games the Alamo-

WILLIE GALLACHER WAS THERE WITH THE WING

gordo boys were the guests of the male population at a smoker given at Real's Hall and an effort was made to return the favors shown two weeks before when the Carrizozo boys played in Alamogordo. The test of feeling exists between the two towns and all seemed to have a jolly time.

### ALAMOGORDO-CARRIZOZO.

Fisher of El Paso went in the box for Alamogordo and was caught by King also of El Paso. Carrizozo put Robertson in the box and Captain Bennett Dingwall did the catching for the home team. The game was more or less of a slugging match both Robertson and Fisher allowing a number of hits. Van Schoyok the second man up made a run in the first inning and in the second inning B. Dingwall made a sensational home run bringing in two runs. Two more runs were made in the fifth inning and two in the seventh by the Browns. The Alamos rallied in the fifth and sent over two runs and followed them in the next two innings by four more and had the advantage in the seven-

LADIES AND GENTLEMEN, THE BATTERIES, IS AS FOLLOWS -

CHARLEY MC CALMONT-DISTINGUISHED HIMSELF AS AN UMPIRE

th by one score but John Gallacher and Dingwall saved the day in this inning when Carrizozo came to bat by knocking out one and two baggers respectively and both were brought in by a timely hit by Willie Dingwall giving the Browns an advantage of one run. The next two innings passed without either team scoring, making the final score 7 to 6. The game was hard fought by both aggregations and it was anybody's game until the close.

### THE LINE UP

Alamogordo	Carrizozo
Hammond 3d b.	W. Gallacher
King c.	B. Dingwall
Fisher p.	Robertson
D. Sherry 2d b.	Ferguson
Saleberry 1. f.	Loughrey
C. Baldwin 1. b.	J. Gallacher
Pelphrey c. f.	Van Schoyok
J. Sherry c. f.	W. Dingwall
D. Baldwin 1. f.	Rolly-Grumbles
Umpires: McCalmont and McLean	

### WHITE OAKS-ALAMOGORDO.

White Oaks put a strong bunch into the field and the second game was a lively contest from the start. Willie Gallacher did the pitching for the White Oaks boys and Van Schoyok was back stop. Pelphrey, Captain of the "Alamos," handled the sphere for that team and King of El Paso did the catching. The pitching of Gallacher was the feature of the game for a time, he made a record of eight "strike-outs," out of the first nine men up to bat.

In the second inning Willie Dingwall made a home run off of a two-base hit fumbled by Alamo, and brought in Thorpe who had knocked out a one bagger. Kelt hit Fisher for a one sacker in the first inning and was brought in on a clean hit by W. Gallacher. These three runs were the only ones tallied by White Oaks. Alamogordo failed to score until the sixth inning but then succeeded in getting Hammond and Buck over home plate. They failed, however, to work over a third score and the game ended after the seventh inning by previous agreement, in White Oaks favor.

### THE LINE UP

Alamogordo	White Oaks
Hammond 3. f.	Mayor
King c.	Van Schoyok
Fisher 3d b.	Taylor
D. Sherry 2d b.	Kelt
Saleberry 1. f.	W. Dingwall
C. Baldwin 1. b.	J. Gallacher
Pelphrey p.	W. Gallacher
J. Sherry-Beecher c. f.	J. Lee
Buck c. f.	Thorpe
Umpires: McCalmont and McLean	

Miss Helen Canning was pleasantly surprised by a number of her friends at a party last Saturday evening. The occasion being her birthday.

Judge McDougal is the guest of old time friends in this county.

## BIG REAL ESTATE DEAL

Carrizozo Townsite Co. This Week Closed Deal For 8 Local Store Buildings

### WILL BUILD NEW POST OFFICE

A large real estate deal came to a close this week that may mean much for the future prosperity of Carrizozo. The Carrizozo Townsite Company thru its President Ira O. Wetmore closed a deal with W. D. Latta of the firm of Happer and Latta of El Paso by which Mr. Latta acquires possession of eight business lots in the heart of Carrizozo with their improvements. The property purchased includes the Post-Office building, the Carrizozo Bar, the Wetmore Block of three stores, and three other store buildings. The deal was for cash and the property is estimated to be valued at about \$25,000 dollars, the consideration, is not made public however. A part of the agreement between Mr. Latta and Mr. Wetmore provides that a two-story brick postoffice building shall be erected at once on the site now occupied by the frame Post-Office building and the agreement also stipulates that cement sidewalks shall be placed in front of all the stores involved in the transaction. Mr. Wetmore has also agreed to put in a cement walk around the Peoples Building which he still retains.

Mr. Latta is a well known and prominent El Paso business man and in making this purchase has in view a number of needed improvements for this city. His idea from the start will be to boost Carrizozo town and the result of the sale cannot help but be a great benefit to the community.

### Entertain At Loughrey Home

Mrs. W. P. Loughrey and Miss Myrtle Tinnon entertained last Friday evening at the home of the former in honor of the Misses Crist of Duran. The evening was spent at music and cards. Refreshments were served after the games and those present acknowledge having a very good time.

### Big Time At Fort Stanton

There is to be a big time at the Fort Stanton next Saturday evening and Sunday all day. A dance and supper being given Saturday night with a moving picture show wedged in the evening somewhere. The dance is announced as the biggest of the season at the Fort and the Carrizozo Baseball team who will play Fort Stanton the following day are to be the guests of honor. A number of Carrizozo people besides the baseball team anticipate taking in the good time.

### Capitan Saturday: Stanton Sunday

The Carrizozo Browns will not play ball at home next Saturday or Sunday but instead will go to Capitan Saturday morning and play a game with the Capitan team that afternoon. In the evening the team is to be the guests of honor at a dance given at Fort Stanton and the next afternoon, Sunday they will meet the Fort Stanton team on the Stanton diamond.

Mrs. Robert Blaney passed thru the city Thursday on the limited enroute to Oacuro where she will have charge of the school this year.

CARRIZO, NEW MEXICO

## ALAS FOR THE PETITE.

Like English women, French women are growing taller—at least, in Paris. The results of the "careful and minute measurement of 255 Parisiennes, aged from twenty-one to fifty-five years," have been communicated to the Academy of Sciences, says the Pall Mall Gazette. It was found that the average height of the Parisian woman has increased from 5 feet 6-100 inches to 5 feet 1 28-100 inches. They are taller by almost 1 1/2 inches than the women of the rest of France. At the same time we are told that in 1909 1,379 English mothers and daughters were similarly measured, and the results communicated there. The average height for the mothers was found to be 5 feet 8-100 inches, and for the daughters 5 feet 2 2-5 inches. English women had thus grown just over 1 1/4 inches in a generation. Whether the 255 Parisians measured were mothers or daughters, or both, is not stated. The only conclusion to be derived from the statistics in this connection, accordingly, is that the Parisienne of 1911 in height comes between the English mother and the English daughter of 1911. But she is not half an inch taller than the former, and has still much to grow before she reaches the contemporary English girl.

The more one reflects on the good old spelling bee, the more enthusiastic one becomes. There were spellers, you know, in the days when our parents and grandparents stood up in opposing rows in the little red schoolhouse and were bowled over, one after another, by "phthisic" and "caoutchouc" and "abecedarian" and "gauge," and when much fame was acquired by those master intellects that always knew whether it was "niece" or "neice," "dying" or "dyeing," "judgment" or "judgement," and "judgship" or "judgshp."

One of the kleptomaniacs has decided to submit to a surgical examination for the purpose of trying to be cured of the desire to take things that do not belong to him. Some of the Wall street financiers will regard it as a very dangerous experiment and pernicious precedent.

The new president of the Chicago Stock exchange once was a horse-shoer. Cheer up. You may some day amount to something, even if you are merely writing epics or painting pictures that shall many years from now be included among the works of old masters.

Owing to the decrease in the amount of cloth required for women's dresses since the advent of the hobble skirt, it has been necessary to close some of the mills in Rhode Island and other eastern states. Has anybody noticed a decrease in the price of his wife's clothes?

People who returned on the steamship Celtic from Europe the other day report that they saw a sea serpent that had wings. Even the sea serpents appear to recognize the necessity of keeping right up in the line of progress.

Balkan brigands are holding a German scientist for a ransom of \$50,000. If he ever lets loose at them with a few volleys of the philosophy that he undoubtedly has stored up with him, they will be glad to let him go.

An English physician tells us that singing a song will promote one's appetite, but it is likely to kill the appetite of one's neighbor. A good many prefer that a neighbor's singing be done mentally.

The building inspector of Allentown, Pa., has been injured by the exploding of his glass eye. This may explain why one of the prisoners in the Camorrist trial threw his glass eye at the judge.

A Chicago man died from the effects of tight shoes, and a Yorker, N. Y., man was choked to death by a high collar. Life continues to be full of dangers.

# World's Pearls from the Mississippi Valley

**T**he bodies of four pearl hunters were found swinging to a tree limb recently in a west Kentucky county. They had been robbed by the sheriff that follows in the trail of the pearl fisher who strikes into a new country of rich finds. Pearls have recently been found in large numbers in the rivers that wander through the flat lands of the west Kentucky counties. The pearl fleets are moving into the river bottoms in both Kentucky and Tennessee.

The Mississippi valley is now supplying the bulk of these pale gems that encircle the white throats of the world's famous beauties. American heiresses, princesses of the old reigning houses of Europe, Indian rajahs and the jewel fanciers of all the world buy and wear the mussel-born pearls that are scooped from the boiled flesh of the fresh-water bivalve.

Thousands of men and women are engaged in the work of pearl fishing among the rivers of the great central valley. It has become one of the accepted ways of making an easy living, and in some cases the fortunate fisherman becomes wealthy through a few lucky finds. Many fishermen have thrown away their nets and tackle and rigged their flat-bottomed boats for the work of gathering up the denizens of the mussel beds.

Their fleets of dingy boats move lazily up and down the streams that are tributary to the Mississippi. They lift tons of shells from the mussel beds in the oozy bottoms of muddy rivers. The working up of the shells into pearl buttons has become an industry of great importance to many of the valley communities. Millions of these grimy shells are taken from the rivers each month. Great heaps of them lie along the rivers, memorials of the first years of the pearling craze in the west.

There are big fleets of the pearl fishermen's boats on the Illinois. Hundreds of them patrol the waters of the Wabash and the Little Wabash. The Arkansas, the Red, the Des

Moines, the Rock and scores of other streams have numerous camps of pearl fishermen. Many of the rivers have been practically scraped clean of the mussels and the fishermen have moved on to other and less worked areas. Beardstown, Ill.; Muscatine, Iowa; Vincennes, Ind., and numerous villages in Arkansas have long been the haunt of the foreign and the American pearl buyer.

### World's Finest Pearls.

The big finds of late in Kentucky and Tennessee have stirred the interest of the professional and amateur hunter. For years many of the world's finest pearls have been coming out of the lower valley. Buy a pearl in the United States and there are nine chances in ten that the lustrous gem came originally from the grimy hand of some pearl hunter along the Wabash or the Illinois.

Visit the jewel shops of Paris, Vienna or London, select a pearl of the first quality, and five times out of ten it is a jewel that was picked out of a mussel shell somewhere in the new world.

Half the pearls sold in the markets of the old world as sea pearls are known by experts to be the products of the big and little streams that are the haunt of the American pearl fisherman. It is now the source of supply from which the markets of the world draw their pale and lustrous gems.

For some mysterious reason the pearl fisheries of the far east are declining in importance. The sun-browned expert divers of the Persian gulf are still dipping into the hot seas and gulfs of Asia, but their finds become less valuable every year. The pearl buyers of Europe long since turned to America for the gems that are loved of women.

Pearl fishing is enough of a gamble to appeal to the reckless tastes of the man who likes to make it all on a single throw of the dice. A pearl fisherman may find a prize in the first shell that he opens, or he may spend a year opening shells without any

particular results. It can be made hard work, this business of dragging the river bottoms with myriad hooks that grapple with the slimy shells of the pearl-bearing mussel. Up and down the streams the little flat-bottomed craft drift and pull, and if the owner is lucky and careful there may be a pearl worth anywhere from \$5 to \$1,500 somewhere in the day's catch. It is all chance, but the harder you work the more chance you have.

### Every Shell Examined.

With a large load of shells the hunter comes ashore and boils the mussels in deep vats that he half buries in the ground. This is usually done at a half-permanent camp. The women and the children of the pearling camps aid in this part of the work, as every separate shell must be looked over carefully, that no lustrous pearl may be thrown away as useless.

Buyers from the great jewelry firms of London, Vienna, St. Petersburg and Paris spend the year in the middle of the pearling districts of the valley. Frenchmen, Belgians, Russians, representatives of the jewel-loving races of the earth, keep an eye on all the big finds that are made in various parts of the valley. They must compete with the special buyers sent out by New York and other Eastern cities.

Many experts profess to believe that the pearl supply of the central states is rapidly becoming exhausted.

There are others who claim that the supply is practically inexhaustible, as long as the number of fishermen and boats in the business is not greatly increased. They believe that there are many streams that would repay working that have thus far never been dredged or dragged by the pearl fleets. It is these rivers that they look to for the supply of the future, when the present beds are more nearly exhausted. Miles and miles of the Illinois river have been scraped clean of the mussels. The Des Moines river, home of the pearl-button industry in America, is giving up less of pearls and shells than it did in the earlier days, when pearling was new in the middle west.

Near Mt. Carmel, Ill., a little more than a year ago, a lucky fisherman picked up a pearl that was afterward sold for \$1,300. Farmers' sons and town lads out for a day's fishing on the river have stumbled upon finds worth anywhere from \$100 to \$500. As soon as news of this sort becomes known in the neighborhood there is usually a rush of the amateur and the professional pearler to that section of the stream. It is something like a stampede to a new gold diggings, but on a miniature scale.

### Found a \$1,200 Pearl.

One summer afternoon a party of fishermen on the Wabash river were fishing in an unrequented part of the river. Their luck was anything but good, and one or two of the party began to playfully open a few mussels that the low stage of the river had bared. One of the party was tearing open the shells in a listless sort of way. He felt something round and hard in the tissues of the half-dead mussel. He squeezed it through the clammy flesh and a beautiful pear-shaped pearl dropped through his fingers. Two more pearls—smaller, but still valuable enough to bring \$100 each—were found in the same stranded group of mussels. The pear-shaped pearl sold for \$1,200 by the time half a dozen frenzied buyers were through bidding upon it.

### Queer Cure for Consumption.

Some of the English papers announce the accidental discovery of what appeared to be a cure for consumption by means of the ammoniated gases generated in the production of maggots for fish bait in an establishment near Bradford, in the United States consul at Bradford, in a report to Washington, says: "While engaged in this work, it is said certain persons known to be suffering from tuberculosis have regained their health."

you had? the old fellow was asked. "I was cook, sah, for a Confederate regiment in sixty-four," he answered. "That is, sah, I had the job of cook, but, to tell the truth, I didn't work at it." "Why not?" "There wasn't nothing to cook, sah."

### Protected Against Bored.

To save himself from loss of time caused by callers who are a long while in coming to the point, a Paris functionary has put on his office table a card bearing the words: "Be so good as to abstain from speaking of my health or the weather or of the Bourne quotations, three subjects with which I am perfectly well acquainted. Start at once on the matter that brings you here."

Forehanded and intelligent. Storekeeper—Well, my little man, what can I do for you?

The Kid—Say, when I comes in here this afternoon with a lady and asks me for a dollar's worth of your best

## METALLIC HEELS AND COUNTERS

### Insure Your Shoes!

Miners, Quarrymen, Farmers, and Outside Workers

can do the wear of their shoes by getting shoes fitted with metallic heels. These heels are lighter than leather, support the counter, save shoe money by doubling wear. Sold by shoe dealers ready fitted, or fitted to any shoe by your cobbler. If your dealer isn't supplied, write us. Your inquiry brings a booklet.

UNITED SHOE MACHINERY CO., BOSTON, MASS.

SMALL INVESTORS can earn 5% to 10% on their money in an exclusive California Manufacturing Company. Guaranteed security, interest paid monthly. Money back when wanted. Full particulars, F. J. GIBBS, 1814 Market St., San Francisco, Cal.

Black looks are wasted on people who are color blind.

Mrs. Winslow's Soothing Syrup for Children teething softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

### Indefinite.

"Did you have fun taking his candy away from the baby?"

"Fun? My dear boy, it was a scream!"

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletcher* In Use For Over 30 Years. Children Cry for Fletcher's Castoria

### Thinnest Man West.

The thinnest man in the world was married recently by Municipal Judge John R. Newcomer at the city hall. "I had to look three times to see him," said the judge. The man is Arthur Atherton, twenty-four years old. Though six feet high, he weighs only thirty-eight pounds. He married Blanche Buckley, nineteen years old, who weighs 136 pounds. Chicago Daily News.

### HOW IT HAPPENED.

Tom—Was it case of love at first sight?

Harry—No—first call. She was a telephone girl, and he was taken with her voice when he first heard it.

## A Triumph Of Cookery—

## Post Toasties

Many delicious dishes have been made from Indian Corn by the skill and ingenuity of the expert cook.

But none of these creations excels Post Toasties in tempting the palate.

"Toasties" are a luxury that make a delightful hot-weather economy.

The first package tells its own story.

### "The Memory Lingers"

Sold by Grocers

BOSTON CEREAL CO., Ltd.

## Future of Moving Pictures

Edison Tells of the Possibilities in This Field That Soon May Be Developed.

An interview with Thomas A. Edison in the New York Dramatic Mirror quotes the great inventor as saying that the future of the motion picture is almost unlimited. He calls attention to the obvious educational value of pictures in connection with work in the elementary schools such as the teaching of history, geography and literature. He is sure that the future of the motion pictures in the amusement world is a great one and he concludes the subject with the following comment upon the development of moving pictures in regard to the work of the great actors:

"That will be only another development of the art. At the present time the works of the greatest players are indelibly recorded in photograph and talking machines, and the possibilities

sible for all music lovers to enjoy good music. They will undoubtedly cultivate a higher musical taste in this country. The same thing is true of the motion picture, and especially when it is effectively combined with the phonograph. The great actors and actresses are able in their short lives to reach only a fraction of the public. If their gestures and words are recorded by moving pictures and the phonograph, they can be seen, heard and appreciated by every man, woman and child in the country, not only now, but for 100 years to come."

### Nothing to Work On.

Gen. Horatio C. King, secretary of the Society of the Army of the Potomac, was narrating his memories of the Civil war. "We suffered many hardships on both sides," said General King, "but the Confederates suffered more."

# DAIRY

## "FLY-TIME" AMONG THE COWS

Some Individual Animals Seem to Suffer More Than Others—Various Remedies Suggested.

(By WALTER E. LEUTZ.)  
Midsummer is known as "fly time" in the dairyman's calendar. The marked falling off in the milk flow of the dairy cows at this season of the year is looked upon as unavoidable, and is attributed by many to the worry of the stock by flies. The failure to provide an abundance of succulent forage to supplement the parched pastures seems a trifling contributory cause of the lessening milk secretion, compared with the activity of the pesky, ubiquitous fly, especially at milking time.

The flies that are most numerous about cattle are known by their common names of the stable fly and the horn fly.

The stable fly resembles the house fly very much in appearance, but differs in having the mouth parts fitted for piercing the skin and sucking the blood of animals. The eggs of the stable fly are usually laid in horse manure, the female laying from 125 to 150 in a season. The period of development from egg to adult fly is about 15 days.

The horn fly is a new pest and was first noticed in this country about 1886. The first appearance of this fly was the cause of considerable alarm among the cattle men, and the experiment stations of the various states were appealed to for information in regard to the origin and life history of this insect and for suggestions as to agencies for repelling it.

The horn fly is a small, gray fly, very much like the house fly, but smaller, measuring about three-sixteenths of an inch in length. They have the strange habit of settling in great numbers about the base of a horn, which they sometimes completely cover, a habit which gives them their common name. They confine their attention to cattle. They burrow in the hair about the shoulder, the roots of the tail and other portions of the body where they are not easily dislodged. The injury done by the horn fly is by stinging, much like the mosquito. By means of a fine lancet they pierce the skin and suck the blood through the tube or sheath.

Some individual animals suffer more than others and dark colored animals more than light colored. These flies follow cattle to the barn at night and remain with them all the time.

Various remedies have been suggested by good authorities.

Destruction of larvae in the droppings by application of lime or the immediate spreading and drying of the same.

Application of tobacco powder to destroy the flies.

Application of one of the following repellants: Ten to fifteen per cent kerosene in water.

Fish oil with small mixture of carbolic acid. Cottonseed oil, two parts and pine tar one part.

Butter for Market.

When preparing butter for market always bear in mind that an attractive package will more quickly win a buyer.

Water Hauled to Cows.

The usual method of watering in Denmark is to haul the water in a tank on a low-wheeled, one-horse wagon twice a day to the tethered cows. Doors are placed in the top of this tank at either end, and by proceeding directly across the field along the line of tethered cows, stopping the horse midway between the tether stakes, two cows can drink at the same time, making the task of watering easy. Some take the cows to the stable to be milked three times a day, and in this case the watering is done there.

Handling Cows in Summer.

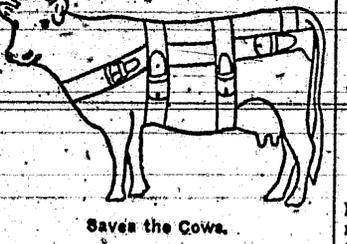

There is a tradition that cows will do better in warm weather than in cold weather, but experience has disproved this fact. It is often easier to reproduce summer conditions in the winter stable than it is to thoroughly protect the stock from the pests that make them go dry in summer.

This is the proper time of the year to consider the dairy ration to be used.

## SAVES MANY VALUABLE COWS

Harness Arrangement Will Prove of Greatest Aid to Animals During Calving Time.

Many valuable cows have been lost by the womb or calf-bed following the calf. In large herds a harness, as shown, will almost always keep in the bed when there is any danger. This must be kept on for 24 hours after calving, after which time there is not much danger. The part under the tail should be extra wide and so arranged that a clean, sanitary cloth can be put next to the cow's skin. A dangerous subject—very often, when lying down in the stall before calving.

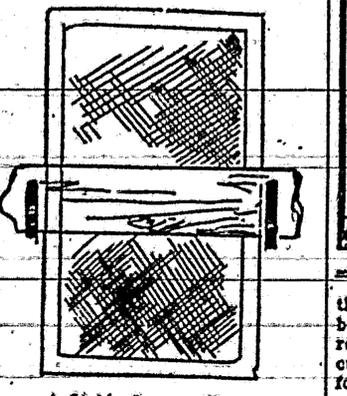

will show an inch or so of the uterus, says a writer in the Country Gentleman. She should be carefully watched at calving, and as soon as she has calved put on the harness, which must be tightly strapped on, and then in an hour or so loosen it up to let away the after-birth or renew the sanitary cloth. It almost always happens that once a cow throws her bed she will do it again. In desperate cases two stitches can be made with a darning needle and fine white tape and left in for two days, giving sloppy drinks with a little opium in them. Raise the cow's hind end higher than her front end with inclined floor.

## GOOD STABLE SCREEN DOOR

If Made of Strong Material It Can Be Secured by Wide Board to Drop into Brackets.

If the screen door for the cow stable is made of strong material it can be secured by a wide board to drop into brackets.

A Stable Screen Door.

brackets on each side. This protects the door and is easily made at home. One end of the board should be bolted loosely to the barn, so that it may act as a pivot and the boards be raised up when the door is opened.

## Food for the Growing Calf.

Growing calves should have such food as insures growth. Fat is not needed in the dairy calf. Keep the calves comfortable, summer and winter, and growth will follow as a natural result.

## Equipment for Dairy Farm.

The cream separator, the silo and the manure spreader should find a place in the equipment of every dairy farm.

## Best Milk Producer.

Dairy farmers should not raise or buy timothy hay for cows. Clover or alfalfa is much better as a milk producer.

## DAIRY NOTES

A cross bred cow is a mistake. Each cow's udder should be thoroughly cleansed before milking.

Bloody milk or that from a sick cow should never be mixed with wholesome milk.

The uncovered cans of milk should be kept in cold water until they are delivered to the creamery.

The use of muslin in dairy windows instead of glass is said to lessen the danger from disease germs.

# The HOME DEPARTMENT

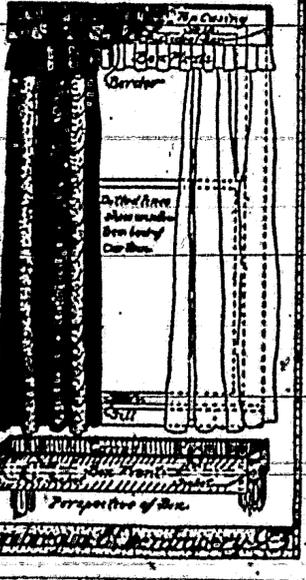

## DRESSING THE WINDOW

SCHEME FOR DECORATION THAT WILL APPEAL TO HOUSEWIFE.

Anyone With Least Bit of Artistic Sense Can Follow These Simple Directions—Very Few Materials Are Required.

As windows vary in size, you will have to study the illustration and measure your window accordingly before making your purchases. Three pieces of light wood, a few nails, a pole, a few yards of heavy olive-green cloth, thread and gimp tacks, are all the materials necessary.

To ascertain the quantity of goods for the curtains measure your window as follows: Place yardstick at center of top of window casing. Find

Her Collar.

Less in evidence just now is the stiff embroidered linen collar, which for several seasons, reigned supreme.

In its place has come the soft stock or collar attached to the shirtwaist, and of the same texture as the blouse itself. This has several advantages, most of which are very obvious. Our necks are less apt to be disfigured with yellow lines and ugly wrinkles. Then the soft collar is usually more becoming—and this is an advantage indeed! And lastly, though by no means least, is the lessening of one's laundry bill, for the soft collars, of course, are done up along with the blouses they finish and cost no more than blouses men's collars.

## HOW STAINS CAN BE REMOVED

Fruit Stains Should Be Treated at Once With Soap and Salt and Water.

Fruit stains should be treated at once. Rub the stain with soft soap or good yellow soap, well wetted, and then cover it with a paste of salt and water.

If the fingers are stained from walnuts dip them in strong tea, rubbing the nails well with it, with a nail brush and wash the hands at once in warm water and the stains will disappear.

If grass stains are rubbed with pure alcohol they will disappear, but this should be done at once. For planet stains soak the cloth at once in skim-milk and wash out in cold water.

White stains on polished wood caused by upsetting any spirit or by overhot dishes or plates may be removed by applying to these spots a feather dipped in spirits of camphor. This must be used very sparingly and the furniture rubbed well with a cloth dipped in sweet oil, repeating the process if necessary. When the stain is completely removed polish well with beeswax and turpentine or any good furniture polish. To clean ivory rub the stains with lemon juice, then with whiting made into a soft paste with lemon juice; allow this to dry on and when perfectly dry rub off with a soft cloth.

## A French Novelty.

Some months ago there was imported from Paris a delightful little novelty in the form of a miniature gold chasing dish, a few inches in height, in which perfume might be burned. It may be found nowadays complete, with two special bottles of French perfume for burning and a jar for the water.

## CURE THAT SORE THROAT

Sore throat is inflammation of the mucous membrane of the throat, and if this membrane happens to be at all sensitive a predisposition to sore throat will exist.

Paxline Toleit Antiseptic is both a preventative and a cure for sore throat because it possesses extraordinary cleansing, healing and germicidal qualities. Just a little in a glass of water, used as a gargle, will quickly relieve all soreness and strengthen the mucous membrane of the throat, and thus overcome all tendency to sore throat.

Paxline is far superior to liquid antiseptics or Peroxide for all toilet and hygienic uses.

Paxline may be obtained at any drug store, 25 and 50c a box, or sent postpaid upon receipt of price by The Paxton Toleit Co., Boston, Mass. Send for a free sample.

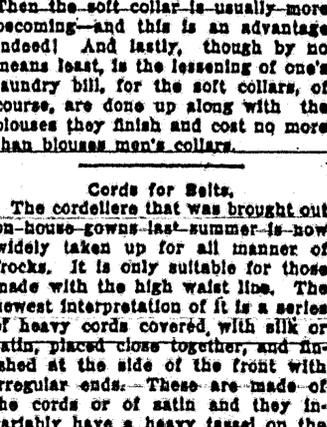

Impossible.  
"George acts like a fool."  
"No. An actor could never come as close to nature as that."—Variety Life.

## THE TRUTH ABOUT BLUING.

Talk No. 9.  
This common article fools many. Think of it, large bottle, little pinch of blue, fill it up with water. There you are. Does it look good to you? Buy RED CROSS BAG BLUE, a pure blue. Makes beautiful, clear, white clothes. You will like it. Large package 5 cents. ASK YOUR GROCER.

"Boy Scout" Movement Spreads.  
The "boy scouts" movement has reached the Malay peninsula, and Singapore is to have a fine organization under the patronage of the governor and chief justice. It is a good thing in many ways, aside from the military training, and bids fair to become one of the permanent and most popular institutions of the peninsula. All through the British colonies "boy scout" organizations are being formed.

## THERE ARE OTHERS.

Caller—I thought you said your baby would talk.  
Young Mother—So he can, but I'm the only one who can understand him.

## FALSE HUNGER

A Symptom of Stomach Trouble Corrected by Good Food.

There is, with some forms of stomach trouble, an abnormal craving for food which is frequently mistaken for a "good appetite." A lady teacher writes from Carthage, Mo., to explain how with good food she dealt with this sort of hurtful hunger.

"I have taught school for fifteen years, and up to nine years ago had good, average health. Nine years ago, however, my health began to fail, and continued to grow worse steadily, in spite of doctor's prescriptions, and everything I could do. During all this time my appetite continued good, only the more I ate the more I wanted to eat—I was always hungry.

"The first symptoms of my breakdown were a distressing nervousness and a loss of flesh. The nervousness grew so bad that finally it amounted to actual prostration. Then came stomach troubles, which were very painful, constipation which brought on piles, dyspepsia and severe nervous headaches.

"The doctors seemed powerless to help me, said I was overworked, and at last urged me to give up teaching, if I wished to save my life.

"But this I could not do. I kept on at it as well as I could, each day growing more wretched, my will-power alone keeping me up, till at last a good angel suggested that I try a diet of Grape-Nuts food, and from that day to this I have found it delicious, always appetizing and satisfying.

"I owe my restoration to health to Grape-Nuts. My weight has returned and for more than two years I have been free from the nervousness, constipation, piles, headaches, and all the ailments that used to punish me so, and have been able to work freely and easily." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in page, "There's a Reason," never read the above letter. A new one appeared from the Postum Co. They are interested in you, and will be glad to answer your questions.

## DRESS FOR A GIRL

This style is for a girl of 8 to 10 years, and is in plain and striped zephyr. The dress itself is of the plain; the wide straps that form trimming are of the stripe out on the cross. The yoke and short undersleeves are of thick piece lace.

Material required: Two and one-half yards 40 inches wide, one yard stripe 40 inches wide, three-quarters yard lace 18 inches wide.

**THE VETO** message of President Taft which denies statehood to both Arizona and New Mexico as long as the Recall provision remains in the Arizona constitution is a strong document and is "straight from the shoulder" as the President promised. But we fail to see the justice of the act in denying New Mexico her just deserts because of the Arizona freak constitution. New Mexico has no connection with Arizona morally, physically or in any way and because of the objection of the president to one should not withhold the other.

The President's action is in contrast to that of a large number of senators holding convictions equally as sturdy and deep rooted as the president, but who have been big enough and broad enough to subordinate their opinions to the rights of a sovereign state.

If the house of representatives by almost unanimous vote and the senate, by two-thirds, holds that the national government cannot dictate to a state, the opinion of the United States congress should carry just as much weight as the opinion of William H. Taft. The president has seen fit to sacrifice statehood for the territories for the sake of a personal vindication of his views; and whatever the outcome, the people will probably remember that he was willing to deprive the states of the fruits of their half century fight, to "save his face."

To repeat, it does not show large caliber statesmanship: Mr. Taft could have made his position no less strong and uncompromising and at the same time recognized the fact that it was neither right nor proper to dictate to the citizenship of Arizona what it should and what it should not put in its fundamental law; recognizing that once in the union the futility of such attempted dictation would be manifest.

Judging from the expressions of members of Congress we believe the prospects of the Smith resolution which has been introduced and eliminates the Recall has a very good chance of passing Congress at this session and that it will not be necessary to wait until next spring for New Mexico to come into the union automatically.

**THE SUPREME** Court of the Territory convened at Santa Fe Tuesday and among the important cases to be considered will be the six cases against the Lincoln County officials who have failed to maintain offices at Carrizozo in an effort to remove them from office and also the hearing of the appeal in the quo warranto suit appealed from the district court by Lincoln people to show by what right the county seat was moved to Carrizozo. There is a possibility of a termination of the county seat litigation in the hearing of this case and internal troubles may thereby come to a resting place.

IT IS astonishing the amount of

support that is coming from the Republican regulars of the rank and file on the proposition of Congressman Berger, the Milwaukee socialist who has a bill in the House to abolish the Senate of the United States. "About every time the 'unholy alliance' has gotten together there has been always some one ready to arise and remark that Mr. Berger is about the only one who has suggested a proper solution of Senate conditions.

### PAST YEARS' PROGRESS

[Continued From First Page]

A new \$30,000 court-house and Jail was started in Carrizozo this year and is completed except for the roof and interior work. The building is now being delayed by pending court proceedings, which will come to issue this month in the Supreme Court of the Territory. The famous old Nogal Mining District has had some development work going on by individuals during the past few months which may develop into something of great value in the near future.

The stock business, the largest industry in the county, has had an average year and the large increase this spring with the splendid range available will make a prosperous year for the stockmen.

Much work of a permanent nature has been done the past year on the public highways the most needed and costly being on the Pecacho and Nogal Hills. The grade on the Nogal hill was reduced from an 11 per cent to a 3 per cent, grade and the entire road put in excellent condition. This road is a part of the excellent Carrizozo-Capitan-Roswell road and is completed and in good condition all the way to Roswell.

Dry farming has proven successful in this vicinity for several years but the present season has been the most favorable and all those who planted a crop this year are almost sure to get a good return. The farmers here are becoming more conversant with the successful methods of dry farming and one may see several fine fields of corn in this vicinity that are up to the standard of the corn grown in the corn belt of the middle west.

The Carrizozo Valley is in the shallow water belt an abundance of water is procurable at a depth that will warrant irrigation by pumping. Several wells have been tested for quality and quantity of the water and the results have been satisfactory. This is still a virgin field,

however, for irrigation by pumping as little has been done along that line yet except one or two orchards that are irrigated by windmills. There is also a great possibility here for sub-irrigation.

The fruit crop this year is exceptionally large and quite a quantity of all kinds of native fruit is being shipped to other markets as well as supplying the local demand.

While the Carrizozo district has not exactly been on the boom the past year it has not retrograded and is holding its own and but for the unforeseen climatical conditions a greater advancement might have been made.

A recent letter from the Immigration department of the Rook Island System states that railroads will direct immigration this way in the fall.

### CAPITAN CORRESPONDENCE

A Sunday School organization has been perfected in our town and Mr. B. K. Glasser, of the Capitan Mercantile Company elected as Superintendent, Services were held

BILLY FERGUSON FUMBLE TWO AT SECOND SUNDAY

last Sunday at which Mr. R. L. York, presided, the attendance was very good, there being seventeen children besides a large number of older persons. Regular services will be held every Sunday henceforth.

Mr. R. D. Haynie of the Capitan Mercantile Company, accompanied by his family, returned from the Palomas Hot Springs last Saturday after a sojourn of a couple of weeks. Mr. Haynie's "rheumatiz" has about succumbed to the curative effects of the famous waters of the springs.

The disastrous "dry spell" that has prevailed in this section for the past three weeks shows signs of terminating. Cloudy weather and occasional light showers has cooled the air to some extent and revived the hopes of the farmers and ranchmen.

Sheriff Stevens passed through a few days ago to levy upon the goods and chattles of two Lincoln County citizens who were left to "hold the sack" on a forfeited bond.

The County school fund was enriched last week to the extent of \$45, by fines imposed upon a couple of our citizens who became too hilarious and pugnacious while taking a social drink in the booze emporium.

Supervisor Kinney made an extended tour of inspection through the eastern part of the Lincoln National Forest this week. Mr. Kinney says that the range and crops have suffered greatly in that part of the county from the effects of the hot, dry weather.

## County News--Letters

### JICARILLA HAPPENINGS.

Wm. Littell of the Littell Mining and Reduction Company of Colorado Springs has arrived here to take charge of the company's work during the absence of his brother Ira Littell who has been in charge. Ira Littell has left for a short business trip to Canon City, Colo.

Charley Lemmons, the hide inspector, passed thru here this week on his way to the north end of the county, he reports crops suffering from the heat and drought but states that grass is good throughout the county.

John Dale is installing a pump at what is known as the Hinton place, where Mr. Dale believes he can get plenty of water for his cattle.

John Gallacher has tested the well recently drilled for the Gallacher Bros. and reports plenty of water at 215 feet. The boys expect to move their sheep to the new ranch shortly.

The weather here for the past week has been about as hot and dry as ever known. The average temperature is reported as 96 degrees but relief is now in sight.

Mr. J. Wilson of near Ancho has had to cut his crop of corn on the account of the dryness of the weather, he thus saved his fodder.

### PARSONS PICKUPS

R. E. Wingfield was over on the Bonito last week and reports that section badly in need of rain.

Sheriff C. A. Stevens was a business visitor to the Bonito last Sunday.

Miss Helen Rice has gone to Dawson where she will visit her sister Mrs. Joe Welch.

A. C. Austin and family were visitors to Parsons this week at the Rica home.

Little Newton Robinson has been sick the last few days.

Luke Jennings made a trip to Carrizozo this week with a load of cabbage.

### NOGAL NOTES

A wedding is announced on the Bonito but the parties refuse to allow their names to be published.

L. R. Hust and Henry Emerson have been marketing their fruit and vegetables in Carrizozo.

Dr. Jno. Laws of Lincoln was called to the May's home last Saturday, Mrs. M. B. May being very ill.

Many parties are passing through Nogal enroute to the Bonito and Ruidosa for outings.

Miss Marshall is now installed at the hotel under the new management.

The small amount of work necessary to repair the Nogal Hill road was finished last Saturday.

### LINCOLN LOCALS

W. O. Norman is buying up a large herd of fine Angora goats that he will run on his ranch east of town.

Chas. Stevens and Judge Dye of Roswell, drove to Parsons Sat. to look over some mining property.

Mrs. J. G. Riggle and children and Mary Walters visited friends in Capitan, Sunday.

H. B. Hamilton and family with Louis Bozarth as driver came over Wednesday, returning Thursday, accompanied by Rose Lutz who will visit in Carrizozo with Miss Grace Spence.

Gladys Riggle entertained about twenty of her friends, Monday afternoon.

Attorneys Hervey and O'Brien of Roswell were in town Wed.

W. S. Brady drove to Roswell on business last Saturday. He was accompanied by Willie Norman, Geo. Sisneros and Bony Bartlett who will work for G. H. Copeland during the fruit season in the Pecos valley.

If you wear Tailor Made clothes see H. E. Alexander, your home tailor he will guarantee you satisfaction in quality and price at the Elite Tailoring Parlor.

WANTED—A middle aged woman as housekeeper and companion for a crippled, elderly woman. A country woman preferred to live with me for a permanent home. Address—Mrs. N. Palmer, Ancho, New Mex.

# NEW NEWS OF YESTERDAY

By E. J. Edwards

## John Van Buren's Bad Break

Chauncey Depew's Interesting Story of Horatio Seymour and the Campaign in New York State in 1865.

In the year 1865 there was to be a very important election in New York state, important partly because it would be the first to occur after the close of the Civil war, and, second, because it was thought that the election would have an important bearing upon presidential politics, which would be at their height two and one-half years later. Chauncey M. Depew had been elected secretary of state in 1862, the only popular elective office he ever held. He was not a candidate for re-nomination in 1865, and so there came a spontaneous demand from all over the state for the nomination of Gen. Francis C. Barlow as the successor of Mr. Depew as secretary of state. General Barlow was a popular hero at that time; very dramatic stories were told of the manner in which he had fought at Antietam, Chancellorsville, Gettysburg and Spotsylvania, and the skill with which he had conducted the more important of the strategic moves by which General Grant changed his base in the summer of 1864 from the Rapidan to the James River. Moreover, everybody in the state knew that General Barlow had twice been dangerously wounded, and was once picked up for dead. He had another qualification which appealed to voters, and that was that he was one of the youngest generals in the whole Union army.

The Democrats named as their candidate for attorney general "Prince" John Van Buren, the very brilliant but intellectually somewhat erratic son of Martin Van Buren. Then the party leaders sought out Horatio Seymour, who had been elected governor of New York in 1862, and who was already regarded as a most available candidate of the Democracy for the presidency in 1868; for it was held that a Democrat who had been popular enough to carry New York state in the second year of the Civil war surely had very strong presidential qualifications.

Said the Democratic leaders to Governor Seymour: "Will you go upon the stump for the Democratic state ticket? If you will, we are sure that we can carry the state."

"In any way in which I can serve my party, I will do it," Governor Seymour replied. And he began straightway what was expected to be a state

wide stumping tour. Then, all of a sudden something happened which caused Horatio Seymour abruptly to abandon the canvass. But what it was very few persons have ever known, and one of the few is Senator Depew.

"When the campaign was getting under way, I was a passenger upon a steamboat from Albany to New York," said Mr. Depew to me at a time when he felt free to tell the reason why Governor Seymour had abandoned the Democratic candidacy. "I found a fellow passenger upon the steamboat in 'Prince' John Van Buren; we were old friends, although he was much older than I. We talked freely and confidentially, as men of opposing parties who are friends are accustomed to do. I spoke my mind about some Republicans and some Republican politics, but had I known 'Prince' John a little better, I should have been careful as to what I said, for he made a speech soon after in which he quoted much that I had said, in the expectation undoubtedly that this would do damage to the Republican party.

"I could not deny the accuracy of

his report; I had said the things he reported me as having said. But I could, at least, counter upon 'Prince' John, and I did it. I wrote a letter to a personal friend, in which I said that 'Prince' John had reported me accurately, but that he had not told all of our conversation; for, in the course of it, while we were speaking of Governor Seymour and the campaign he was making in the state, 'Prince' John interrupted me with: 'Seymour—Horatio Seymour? Why, he is a d— fool!'

"Just as I expected, my report of what 'Prince' John had said reached Horatio Seymour's ears. He was naturally very indignant, and he immediately wrote to the Democratic state committee saying that, for reasons of which members of the committee had been informed privately, he desired to cancel all his engagements to speak, and to withdraw from the canvass.

"It was of course speedily and publicly reported that Governor Seymour had withdrawn from the canvass," concluded Mr. Depew, "and that announcement made it absolutely certain that the Republican state ticket would win, and that Gen. Francis C. Barlow would become secretary of state."

## No. One First to Volunteer

Gen. Joseph R. Hawley Found Hundreds Put Their Names on the Enrollment Rolls at Practically the Same Moment.

The late Joseph R. Hawley, who became governor of Connecticut in 1888, chairman of the Republican national committee in the first Grant campaign, member of the national house of representatives in 1872 and United States senator in 1881, holding that office until his death in 1900, recruited the first company of volunteers for the Civil war raised in the state of Connecticut—Company A of the First Connecticut regiment.

As its captain, Hawley led the company he had recruited through the first Bull Run fight. Then he became a lieutenant colonel, took part in the Fort Royal expedition, was present at the siege of Charleston and the capture of Fort Wagner, took part in the siege of Petersburg, was made a brigadier general of volunteers, campaigned with Sherman in the Carolinas, and was mustered out of service at the end of the struggle as a brevet major general.

Sixteen years after peace had come, and just after General Hawley had been elected United States senator, he met his old friend, the late Colonel George Bliss of New York. During the war Colonel Bliss had served on the military staff of New York's great war governor, E. D. Morgan, who, that he might the better carry out the wishes of the federal administration, was made a major general in command of the military district of New York state. Under Governor Morgan's administration more than 223,000 volunteers were enlisted in the Union army, and as a member of Major General Morgan's staff Colonel Bliss helped to see to it that the New York volunteers were properly clothed, properly fed and otherwise properly cared for until they were mustered into the service of the United States.

"From the day I began to have a part in enlisting volunteers for the war I had a curious desire to know who was the first man to respond to Lincoln's first call for volunteers," said Colonel Bliss, "and knowing that Senator Hawley had recruited the first volunteer company in the state of Connecticut, I asked if, by chance, he was the first man in the north to respond to Lincoln's call for volunteers after it had become known in Washington that Fort Sumter had been fired upon."

"Not until at least ten years after the war was over was I able to answer the question you have just put to me," was General Hawley's reply. "For a time I prided myself upon having gained the distinction of being the first volunteer. I got up early on the morning that the proclamation was published, read it in the paper, slipped out of the house, and hurried away to a convenient room and opened a recruiting office, putting my name at the head of the enrollment list. And so I came to believe that I was the first man to volunteer."

"It was in the second year of the war that I happened incidentally to mention the incident to Gen. Alfred H. Terry, with whom I had been long acquainted, and who, like myself, had been before the war a lawyer and a newspaper writer. What, therefore, was my surprise when the hero of Fort Fisher told me that he had volunteered in much the same fashion at about the same hour that I was putting my name at the head of the list of recruits in Hartford."

"Later I learned that a young dry goods clerk named Chester, who lived in the eastern part of Connecticut, as soon as he had read Lincoln's proclamation—and he had got up early, too, to go about his business—went out of his store and opened up a recruiting office upon an upturned box before most of the town was sitting down to breakfast."

"So, from time to time, I learned of this or that man who had put his name, much after my fashion, to an enlistment roll bright and early on the morning of the day of the appearance of the proclamation. This thing was done all over the north, as my information made plain, and so at last I made up my mind—and this is my conviction today—that there wasn't any one first volunteer—there were hundreds of them, all over the north, enlisting at practically the same moment."

## Ended Sunday Mail Delivery

Postmaster Jewell's Compromise After One Day's Trial in Big Cities Had Aroused Opposition of the Religious People.

One day in the early summer of 1871 Postmaster General Marshall Jewell ushered himself into the office of the postmaster of New York city. He brought with him that abundance of physical vitality, the high spirits and the smile to which was due so much of his success as a politician, and which were characteristic of him.

"Mr. Postmaster," he said, as he seated himself, "why is it that we don't have our delivery of mails on Sundays, at least in the larger cities?"

"I suppose it is because the postmaster general at Washington has never directed post officers to deliver mail by carrier on Sunday," was the reply.

"Well, I believe that I will order it to be done," the postmaster general answered. "I think it is as much of a necessity as running railway trains or horse cars. What do you think, Mr. Postmaster?"

"I think you'll have trouble if you issue an order of that kind. It will run counter to the moral convictions of religious people. They will oppose you bitterly, because opposition which is based upon moral principle is always persistent and strong. The people who would be benefited by a Sunday delivery do not care enough about it to make a strike for it."

"I think you are mistaken," said the postmaster general. "I am going to issue an order directing that there be one Sunday delivery by carrier from all post offices of the first class."

The postmaster general went back to Washington and within a day or two issued the order. It occasioned a great deal of comment, although the opposition to it was not apparently as strong as was expected.

Early in the week following the first Sunday delivery in New York city by carrier the postmaster of New York was visited by a committee of which the distinguished philanthropist, William E. Dodge, was the spokesman.

"Mr. Postmaster," said Mr. Dodge, "I cannot express my amazement, regret and astonishment that you should have issued an order which is virtually a command to break the Lord's day. I have come to ask you the reason."

"The reason is very simple, Mr. Dodge," was the reply. "I was directed by the postmaster general to do it. Here is his order."

Mr. Dodge read the order signed by the postmaster general and turned to the committee. "I will attend to this immediately," he said, and departed with his companions.

He certainly did attend to it. In fact he must have got into instant telegraphic communication with Jewell, for before the close of the business day the postmaster of New York and probably of other large cities affected by the order received a telegram practically in these words: "The moral sentiment of the people is against the Sunday delivery of letters by carriers. If we insist upon it there will be war between us and the good people of the United States. We want to avoid that. Therefore I request that you make arrangements immediately to hedge by establishing a carrier delivery at a late hour of Saturday night."

The following Saturday night came the late delivery; and many persons wondered how it happened that a Sunday delivery by carrier was tried in the large cities just once, and that a late Saturday night delivery, which has continued to this day, was adopted. The explanation is now given for the first time. It was all the result of a request, tantamount to an order, of the postmaster general to hedge.

## USE OF THE ODD WAIST

FASHION DICTATES CERTAIN RULES TO BE FOLLOWED.

Garment Has Important Place in the Modern Wardrobe—Blouse Styles for Light Purposes and Home Dressmaking.

The province of the odd waist is an important one this season, yet, somehow fashion decrees that a light bodice shall not be worn with a dark skirt unless it is covered with a coat. The reason of this objection is obvious enough to those who study the harmonious effect of the whole. However beautiful the white or pale bodice may be, when worn alone with a skirt in a dark color the sharp contrast cuts the figure in two, shortening thereby the length of limb required for grace and making the torso seem dumpy. So the all-white or delicately-colored blouse is confined to the coat suit, and even then the ensemble is better if the costume matches.

that latterly goes with it, it seems always jaunty and youthful.

Our illustration presents the bodice cut young girls admire, but which may be worn by any woman whose throat is good enough to bear the low line of the sailor collar. It is in one-piece kimono style, with a back fastening, kimono sleeves and a Y cut of the neck to accommodate the points of the square back collar. The lower view of the cut displays how the neck may be made high if this arrangement is liked.

Such a waist style has unnumbered uses. The bodice may be made of a thin lawn, pin tucked all over and

With all-white materials, in the best instances Irish lace is employed, though it is more often put with a bit of other dentelle than used alone. The narrow tuck known as the "pin" is more frequently used than wider ones, and although the front frill that goes from the neck to the belt has its adherents since it involves a front opening and the back fastening is more popular, it gives something of a staid look with the high stock that accompanies it.

Only the mannish shirt has long sleeves, the shirt that has a stiff collar, or one that turns over in this manner. The sleeves of all the rest are three-quarter length and the majority in kimono style. Some day, we are constantly told, Dame Fashion means to call in the pratty and becoming models which go under the names of kimono, peasant and mandarin, but waists, frocks and coats—even nighties, chemises and corset bodices—still show the sleeve and sides in one. In fact, such sleeves as are put in at the armhole must even pay tribute to the kimono styles with a top flatness and scantness that suggest the genuine cut. When a fashion is recognized as becoming it is hard to oust it, and surely we have had no style this long while so becoming to the shoulders, arm and general lines of the figure as the kimono sleeves. It is one of the devices for obtaining the straight up and down silhouette now so much admired, and with the short waist line

trimmed with a deep collar and cuffs of the same, edged with a simple embroidery. It could be of tucked chiffon, of marquisette, net, thin silk, and so on. As part of a thin marquisette or yelling dress, indeed, this waist style would be very pretty. Three yards of material 27 inches wide are required for the medium figure.

*Mary Dean*

Drooping Shoulders.

The new bodices show a decided droop to the shoulder line. This is done with and without a seam. The sleeve is put in three inches below the top of arm. It is joined to the shoulder with a heavy cord, which is covered with the material or with satin or silk.

## TO HOLD FEATHER BRUSH

Pretty and Ornamental Little Affairs Can Easily Be Made by Skillful Fingers.

A feather brush is a very necessary little article that should always be handy in almost every room, and as a rule it finds a place upon a nail by the side of the fireplace. But pretty

silk cord carried into three loops at each point, the center loop at the top being a little longer than the others, as it is by this loop that the holder is suspended from a nail in the wall. A band of ribbon is sewn across the center and finished off with a smart bow on either side. Under this band the handle of the brush may be easily slipped and the brush held in its place in the way shown.

To make the holder successful, in selecting the colors of the silk, the cord and the ribbon, the color of the wall paper on which it is to hang should be taken into consideration.

and ornamental little holders can be made for these brushes, and we give a sketch of a dainty little article of this kind.

It is made of a diamond-shaped piece of stout cardboard, measuring eight inches across, and smoothly covered with silk and then edged with

## CHEAP FINERY IS CAUSE

Women of Poorer Classes Gradually Falling into Untidiness and General Bad Dressing.

We see hats covered with broderis Anglaise and trimmed with aligrettes, also applique lace on fine straws and some tulle and muslin hats, while lingerie sunshades will appear in hundreds, and it will be difficult to prevent them from becoming common.

The only thing to do is to have good embroidery, because, even if imitations do intrude, the real thing always keeps its little note of aloofness and distinction, just as do the really good lingerie chemisettes and jabots.

The love of cheap finery is gradually but surely weaning the women of the poorer classes to untidiness and general bad dressing, whereas in the old days they were dainty and neat, as it is possible to be when life is all hard work and very small wages. It also affects women in a higher grade of life, for nowadays the woman of a little means has two or three where she used to have but one and she is none the better dressed for her new fashions.

### Dry Farmers Have Organized

At the New Mexico Resources Day Conference in Mountainair, on August 5th, one of the most important actions was the organization of a New Mexico section of the International Dry Farming Congress, which this year meets close to our doors; in Colorado Springs, Colo., the meeting coming the third week in October. This organization was effected by practical dry farmers coming chiefly from the central counties of New Mexico, five counties being represented. Dr. W. E. Garrison, President of the New Mexico Agricultural College and himself a thorough student of dry farming methods and results was elected president; Mr. Earl Scott, a well known banker and owner of dry farming lands at Estancia, Torrance county, was elected secretary and treasurer. The executive board includes such well known men as J. D. Tinsley, agricultural expert of the Santa Fe railroad; John Corbett, practical farmer and land owner of Mountainair, D. T. Hoskins, a prominent banker of East Las Vegas and himself a practical dry farmer, and others in the various counties of the same class. The organization starts with a good membership and its immediate purpose is to enlist the support and co-operation and secure the membership of every practical dry farmer in New Mexico. The only cost of membership, which includes also membership in the International organization, is a fee of \$1.00 which should be paid to Mr. Earl Scott, Secretary-Treasurer, Estancia, N. M. This membership entitles the member to every publication of the international organization, including the weekly bulletin which is now a thoroughly edited dry farming magazine published each week. This magazine contains not only authoritative articles by dry farmers showing successful methods, and failures, but gives to each member the privilege of asking questions which may puzzle him and which will be answered by men such as Prof. W. M. Jardine, agronomist of the Kansas Agricultural College, whose splendid address at Mountainair was immediately responsible for the organization.

Governor Mills and the members of the Bureau of Immigration have given the New Mexico organization most cordial support and have been elected members thereof, believing that this organization will prove one of the most effective influences and the most effective means of speedily lifting our dry farming industry to the state which it has reached in Colorado, Montana, Wyoming and other western states under conditions even less favorable than those which have been encountered in New Mexico during the past three years. Every man who is farming on dry farming land in New Mexico should join the New Mexico organization and do so immediately. This is not only equivalent to joining the international organization, but it will mean ready money in the pockets of every farmer who thus enables himself to take advantage of this expert information which will be furnished him. We believe that the farmers of this district can do nothing better to advance their own interests and the interests of this district than by sending the trifling sum of \$1.00 with a membership today to Mr. Earl Scott, Secretary-Treasurer, Estancia, N. M.

I handle the celebrated Detmer Woolen Company's samples, the best line ever displayed in Carrizozo. Call and see them before you buy your fall and winter suit. H. E. Alexander, Tailor.

### CURTISS KIND OF AVIATORS.

Visitors to the New Mexico State Fair in Albuquerque, to be held October 9 to 14, are now positively assured by the Fair Association that they will witness airplane flights by either Glenn H. Curtiss or one or more of his five associate aviators, the agents into the higher altitudes to be made in the latest type Curtiss biplanes. A contract for successful flights more than five hundred feet into the air, on Wednesday, Thursday and Friday of fair week was signed Wednesday in New York City by P. F. McCanna, Chairman of the Advisory Board of the Fair Association, and Glenn H. Curtiss, of the Curtiss exhibition company. Mr. Curtiss is the king of aviators in America and the Curtiss flights will be the biggest feature at the fair.

### MARION HARLAND AND DAME CURTSEY.

For more than half a century Marion Harland has been writing on housewifely themes and answering the questions of women in a clear and kindly way that has made her name beloved from one end of the land to the other. Many who read her cheery and helpful page every week in THE SUNDAY CHICAGO RECORD-HERALD have no idea that she is 78 years old, for she still writes with all the vigor and discernment of a woman of half her years. Huge as the task may seem, she gives her personal attention to the vast correspondence that her position of expert adviser on household topics involves, and every question is answered directly by her. No other department of THE SUNDAY RECORD-HERALD is more universally popular than hers.

Another department that pushes it closely, however, is Dame Curtsey's "Novelties in Entertainment," which has been hailed with joy by thousands of hostesses who feel the need of new ideas. Dame Curtsey, whose real name is Ellye Howell Glover, seems to have a genius for inventing fresh schemes for dinners, menus, games and all the details that lend zest to dinners and entertainments. She also answers questions pertaining to etiquette and good taste, and otherwise furnishes just the information so often sought vainly by women. When it is added that the Sunday Magazine of THE RECORD-HERALD is full of good stories and articles as interesting to women as to men, it is easy to see why that paper is the favorite among women.

### NOTICE

Department of the Territorial Engineer  
No. of Application 592  
Santa Fe, N. M., Aug. 3rd 1911.

NOTICE is hereby given that on the 3rd day of August 1911 in accordance with Section 26, Irrigation Law of 1907, ANTON BOROVANSKY of Oscura, County of Lincoln, Territory of New Mexico, made an application to the Territorial Engineer of New Mexico for a permit to appropriate from the Public Waters of the Territory of New Mexico.

Such appropriation is to be made from an Arroyo, not a stream, at a point in NW 1/4, S. 9, T. 10 S., R. 9 E. N. M. P. M. by means of diversion and 12 cu. ft. per sec. and or 12 acre feet is to be conveyed to Sec. 9, T. 10 S., R. 9 E., by means of storage works and canal and there used for irrigation of 25 acres.

The Territorial Engineer will take this application up for consideration on the 1st of November 1911, and all persons who may oppose the granting of the above application must file their objections substantiated with affidavits with the Territorial Engineer and copy with applicant on or before that date.

CHAS. D. MILLER,  
Territorial Engineer.

D. SWIFT & CO.  
PATENT LAWYERS,  
808 Seventh St., Washington, D. C.

Depending on the Milkman.  
"Mary," said Mrs. Gillyflap, "I want you to leave this note for the milkman where he will be sure to get it when he comes tomorrow morning."  
"Yes, ma'am. Ain't the milk satisfactory, ma'am?"  
"Oh, yes, the milk is all right, but I want him to bring it earlier."  
"But he brings it two hours before any of us get up now, ma'am."  
"I know. You see, my husband always gets in just about the time the milk comes, and I thought I might be able to get him home earlier if the milkman would be willing to make this one of the first stopping places."

A Fraudulent Polity.  
"I have always," he said with a show of pride, "voted the straight ticket of my party, as my father did before me."  
"Yet I heard you say a moment ago that you carried life insurance."  
"I do, but what has that got to do with politics?"  
"When a man gets life insurance he has to show that he doesn't inherit insanity, doesn't he?"

Setting It Straight.  
First Councillor—Have you received your invitation to the pageant of empire?  
Second Councillor—Yes; and what's more, I ain't going. What with Hempipe this and Hemptire that, nowadays it's Hemptire with a big hatch!—Everybody's.

Fairly Caught.  
"What's the matter with you two girls? You were good friends in town."  
"Oh, yes."  
"Then why this coolness since you met on the farm?"  
"Well, we both said we were going to London for the summer."

Illuminating.  
Dentist (after examination)—And will you have gas, madam?  
Nervous Patient—You don't suppose I'm going to let you tinker with my teeth in the dark, do you?—Tattler.

NOT WORTH WHILE.  
Dora—Does he keep his word?  
Clara—No; it's not worth keeping.

A Good Riddance.  
He rocked the boat  
And quickly drowned;  
Our grief, you'll note,  
Is not profound.

Not Happy.  
Bill—And you say Jack and Tom threw dice to see which should marry the girl?  
Jill—Yes, and Jack won.  
Bill—And was he happy?  
Jill—No. After the marriage he accused Tom of working loaded dice.—Yonkers Statesman.

Very Particular.  
Wagg—That thunder and lightning scene in your set won't go in a reduced show.  
Tagg—Why not?  
Wagg—Because the thunder is too lead and the lightning is apt to be too striking.

His Style.  
"Mrs. Gump, you should introduce correct diction into your family life. For instance, does your husband eat pie with avidity?"  
"No; he eats it with his knife."

Some Nerve.  
"That man De Boose has an awful lot of nerve."  
"How so?"  
"He asked me to let him have ten dollars—said he needed it right away, I only had a \$20 bill and showed it to him, and he handed out a bunch of money and gave me the change."

The Difference.  
Frank—What's the difference between a man and a woman?

No Question of Ability.  
"Saunders," said an American, "did you ever read the history of America?"  
"Aweel, I canna say I hev," Saunders replied.  
"Then I'll lend you the book," said the American. "I'd like you to read about George Washington."  
"What about him?" Saunders inquired coldly.  
"George Washington," said the American, "was celebrated in history as the boy who could not tell a lie."  
"Could he not?" said Saunders. "Man, there's no muckle to boast about in that. He couldna lie, ye say? Noo we Scots has a higher standard o' veracity. We can lie, but we won't."

ONLY A RESEMBLANCE.  
M'Swatters (handing M'Swithers his case)—There, old man, you'll find that something like a cigar.  
M'Swithers (puffing)—Hem! most remarkable resemblance. What is it?  
The Result.  
Jack and Jill went up the hill.  
At clip o'er things to hurley.  
They tried to take a six-foot wall.  
And then their ear turned turtle.

Certainly Not.  
"If I may occupy your attention a few moments," said the caller, laying a manuscript before him, "I should like to have you read this. It is an attempt to write a new national hymn."  
The head of the publishing house read it through.  
"Well, sir, it isn't half bad," was his verdict. "The music has been written for it, I presume?"  
"Music for it? Of course not. What use have we for any national air? This is intended to be sung to the tune of 'Die Wacht am Rhein.'"

Horrible.  
"Weary, wake up," said Limping Lem, shaking his fellow traveler's shoulder. "Wake up! Wo's de matter wit you?"  
"Huht!" asked Weary, half opening his eyes.  
"Wo's de matter wit you? You been havin' de nightmare?"  
"Geel I guess I did. It was horrible. I was dreamin' dat I was a boy again and me mudder was gittin' ready to give me a bath."

Never Said It.  
"I hear you have been saying you would take great delight in attending my funeral."  
"I have never said anything of the kind."  
"I think I should prefer to believe the man who told me."  
"Very well; believe him, if you like; but I never said it. I should not think of permitting myself to be seen at your funeral."

Even Then.  
Prehistoric Man (in the background)—What's the joke down there? Can you make out?  
His Pal—Oh, the boys are kidding Stonehenge again, I guess. Probably he has cut himself shaving with his safety razor.—Puck.

A Traitor.  
"Watch that man on third base, Clara. I believe he's going to steal home."  
"He ought to be ashamed to think of deserting his team before the game is over."

Experienced Opinion.  
"What do you think of this universal peace proposition? Do you believe human beings will ever give up fighting with each other?"  
"Of course, I don't believe it. Ain't I married?"

Strange.  
"I find that I never save money unless I'm in debt."  
"You must be saying a good deal." "Not very much."  
"That's strange. I've heard a number of people say you were head over heels in debt."

In Degree.  
Mrs. Brown—Are you planning an excursion?

## HORSE RACED ENGINE ATOP THE FREIGHT TRAIN

### HOW THE ANIMAL WON AGAINST AN EARLY LOCOMOTIVE.

Machine Built and Driven by Peter Cooper Slipped a Bolt—No Brakes or Whistles in the Old Days.

In 1822 the first charter was obtained for a railroad in the United States. It was for a line from Philadelphia to a point on the Susquehanna river, but was never built. On the announcement of the project some one asked one of the Baltimore newspapers: "What is a railroad anyhow?" The editor was forced to reply that he did not know, but that "perhaps some other correspondent can tell."

Seven years later on the little wooden track along the Lackawanna creek the first locomotive had its trial. The experiment was far from successful, and for a number of years afterward the trains on most of the railroads continued to be drawn by horses. The first locomotive on the Baltimore & Ohio had rails attached. So did the cars. These rails were hoisted when the wind was in the right direction so as to help the locomotive. The rivalry between the railroads using locomotives and those using horses was very bitter. In August, 1820, an actual trial of speed was held between a horse and one of the pioneer locomotives, which did not result in favor of the locomotive. The race was on the Baltimore & Ohio, the locomotive being one built by Peter Cooper, who also acted as engine driver.

The horse, a gallant gray, was in the habit of pulling a car on a track parallel to that used by the locomotive. At first the gray had the better of the race, but when he was a quarter of a mile ahead Mr. Cooper succeeded in getting up enough steam to pass the horse amid terrific applause.

At that moment a bolt slipped from a pulley, and though Mr. Cooper accelerated his hands trying to replace it the engine stopped, the horse passed it and came in winner.

As there were no brakes on the early trains, they used to stop and to start with jolts that threw the passengers across the car. The coupling was with chains, having two or three feet of slack, which the engine took up with a series of fierce jerks.

There were no whistles in the old days. Signals were given by pushing up the valve on the dome by hand and letting the steam escape with a loud hissing noise. On the New Castle and Frenchtown railroad when the signal was heard the slaves around the station would rush to the arriving train, seize hold of it and pull back with all their might while the agent stuck a piece of wood through a wheel.

There were so many collisions and explosions that some southern railroads introduced what they called a barrier car between the locomotive and the passenger coaches of the train. This barrier car consisted of a platform on wheels upon which were piled six bales of cotton, and it was claimed it would safeguard the passengers in two ways—it would protect them from the blowing up of the locomotive and would form a soft cushion upon which the passengers could land in the event of a collision.

There is no record of how this experiment worked out.—American Cultivator.

Longest Straight Railway.  
Egypt has a desert railway which runs 45 miles in a straight line, but the longest straight piece of railway line in the world is said to be from Nyngan to Bourke in New South Wales. This railway runs 126 miles on a level in a dead straight line.

DEVICE NOT YET PERFECT.  
Many Automatic Stokers Have Been Tried Out on the Railroads of America.

Locomotive mechanical stokers are of two general types, the overhead and the underfeed. Of the former, which was the first developed, the greatest number have been tried out. Of the latter, but two have been attempted and but one of these developed.

The first automatic stoker was invented a dozen years ago by an engineer on the Chesapeake & Ohio, where it had been found next to impossible to keep up steam in the hundred-ton locomotives to enable them to haul their full tonnage over long divisions. The original stoker was worked by hand at first, then a steam motor was applied. It did very well but was unpopular with the firemen, just as all improvements were at first.

When the considerable improve-

Walking the Cars is a Hair-Raising Experience, the Novice Finds Out.

There came over me as I sat in the caboose that evening a wild desire to ride with the engineer in the cab. Planning to slip ahead along the hall mile or so of train at the first stop I made known my desire to our conductor over that part of the run.

"They'll be glad to see you," he told me. "You won't have any trouble gettin' there. It's a mild evening." He swung open the window of the lookout and called to his rear brakeman, "Jimmie, run along with this here party." Jimmie pulled me through the window of the lookout before I clearly realized the entire plan.

It was a slippery path over the roofs of 60 cars to the big engine that was pulling us, and the wind that swept in from the shores of the loch-bound lake, along which the tracks ran for many miles, snapped sharply over those car roofs. Jimmie hung onto his lantern with one hand, to his convoy with the other. Long miles over those slippery car roofs had taught him to regard it as no very serious business.

"This ain't nothin'," was his assurance. "It sometimes gets nasty when we get down to zero and a blizzard comes a-rippin' from off over the lake. Sometimes you have to get down and crawl on all fours. It wouldn't be much fun to be swept off the tops of those cars."

There was no disputing that, nor that the three lengthwise planks at the gable of the car roofs were not wide promenades. You jump from one to another to cross from car to car, and a man has got to have something of a gymnastic training and some circus as well as railroad blood in his veins to do it many times without dropping into one of the hideous dark abysses between them.

A hand out of the dark slapped me in the face. "Drop," said Jimmie, and, fearing possibly that I might not obey, he pulled me flat down upon the car roof.

"That was a tall tale," he explained, and before I could ask further we were in a short reach of a tunnel, and I understood. We were whirled through that tunnel like a package in a tube, and if we had raised our arms we could have touched the flying roof of the bore. The smoke lay heavy in the place. It filled our eyes and nostrils.

"Not real nice," said Jimmie cheerily. "But no danger in the holes, save now and then, an icicle gets a crack at your nut. You see, there ain't much use in arguin' the matter after that tall tale strikes you."—Edward Hungerford in Harper's.

Made to Climb Himalayas.  
The Darjeeling-Himalayan railway is one of the most curious in the world. It is of two-foot gage, and on account of the steepness is full of loops, curves and spirals, many of the curves having only 70 feet radius. Some of the gradients are as high as one foot in 28. A special type of locomotive, the "Garratt," had to be made for it at Manchester. This locomotive was required by the specifications to be able to travel on reserve curves not exceeding 60 feet radius, with only 20 feet length of tangent between the curves. The engine consists of a frame supported at each end by four-wheeled bogies, each of which is described as a miniature locomotive without boiler. The boiler is carried on the frame between the bogies.

Longest Straight Railway.  
Egypt has a desert railway which runs 45 miles in a straight line, but the longest straight piece of railway line in the world is said to be from Nyngan to Bourke in New South Wales. This railway runs 126 miles on a level in a dead straight line.

It All Depends.  
Sunday School Teacher—What is the chief end of man?  
Willie—I asked pa that, and he said if the man was a writer, 'twas his head, but if he ran errands, 'twas his feet.

The Reason.  
"How effusively sweet that Mrs. Blonday is to you, Jonesey," said Witherell. "What's up. Any tender little romance there?"  
"No, indeed; why, that woman hates me," said Jonesey.  
"She doesn't show it?" said Witherell.  
"No, but she knows I know how old she is—we were both born on the same day," said Jonesey, "and she's afraid I'll tell somebody."

Well to Be Prepared.  
Smitherson went home one evening after a bad day at the gambling table. "Wife," he said, "have you anything to eat?"  
"Yes; lots of things."  
"Well, cook up everything in the house—everything."  
"Gracious! Are you so hungry?"  
"No," answered Smitherson with finality. "I'm going to sell the stove."

Was Getting Old.  
Cholly—While I was calling on your daughter last evening, Mr. Butts, your dog growled at me.  
Old Butts—Did he bite you?  
Cholly—Oh, no—only growled.  
Old Butts—I'll have to get rid of him and get another.

Never Said It.  
"I hear you have been saying you would take a great delight in attending my funeral."  
"I have never said anything of the kind."  
"I think I should prefer to believe the man who told me."  
"Very well; believe him, if you like; but I never said it. I should not think of permitting myself to be seen at your funeral."

Turn About Fair Play.  
Attorney General Wickersham was describing an unfair law.  
"The people under this law," he said, "are very much in the position of a young Washington attacke."  
"As the attacke was breakfasting the other morning, his servant said to him:  
"You are out of whisky, sir. Shall I get a bottle?"  
"Yes, I think you might, James," the master replied. "It's your turn."

YIMEDIA—Eugene J. Reinhardt, M.D., 499 Central B. Bldg., Denver, Colo.

His Invention.  
Dr. Arthur William White of Yale delights in telling of his experience with an inventor of the unlettered type who came to the professor with a model of a perpetual motion machine.  
"H'm; looks plausible," observed Dr. White, "but it won't work. What are you going to do about gravity?"  
"Gravity!" said the visitor scornfully. "I'll wile' gravity; we'll use plenty o' grease."

## MAKING A STUDY OF EUROPEAN WARSHIPS

THREE rear admirals of the United States navy who were sent to England to attend the British naval meeting, will put in considerable time studying European warships and their equipment. The admirals are Watts and Capps, chief constructors, and Cone, chief of the bureau of steam engineering.

## SOLVES BIRD SECRET

### Prof. Michelson Discovers Cause of Metallic Colors.

Brilliance of Plumage, as Well as Insects' Luster, is Due to Light Absorption—Prof. Cutler on Arid Problem.

Chicago.—Peacocks and pigeons, butterflies and beetles—the gayest of the bird and insect tribes—have yielded the secret of their brilliant attire to Prof. Albert A. Michelson, head of the department of physics of the University of Chicago, who has discovered in his laboratory the real cause of the metallic colors observed in his feathered and "buggy" specimens.

Prof. Michelson, who won the Nobel prize in 1909 for his achievements in optics, announced his latest find in a paper read at the annual conference of the Illinois State Academy of Science, in the botany building of the University of Chicago. The professor's experiments prove that the colors studied are the result of light absorption due to the shape of the surfaces and are not caused by the pigment cells or any means that the amateur naturalist might imagine.

The discovery, according to the scientists at the meeting, furnishes scholars with a new theory for important color phenomena. It overturns the position held by many distinguished investigators that the iridescent glitter of beetles and the tints of the humming birds are the result of ordinary "interference" and "diffraction."

"The total number of specimens which have been examined," said the investigator, "is perhaps not so large as it should be to draw general conclusions, and it is clearly desirable that it should be extended, but so far as the evidence for surface films as the effecting source of the metallic colors in birds and insects is entirely conclusive."

Prof. John M. Coulter, head of the University of Chicago botany department, said:

"Practical plant breeding is now on a practical basis and botany has at last attacked the fundamental problems and may be of some practical service, for it includes plant breeding."

Of the possibilities of converting arid

land into wheat and corn lands Prof. Coulter said:

"Attempts are being made to secure a combination of hardness to drought which we desire and quality of grain which we possess. I see no reason why the vision should not be realized, but you need not invest in arid land for immediate use as wheat fields. In the case of corn, as of wheat, we are not breeding it for drought resistance alone, and it will take many plant generations of the highest type of scientific plant breeding to determine whether we can combine this drought resistant structure with the high-grade quality and yield we have already obtained in our cultures."

### FUN BY BARONET AND WIFE

Disguise Themselves as "Poor Musicians" and Go on Tour—Friends Drive Them Away.

London.—An escapade in which figure a well-known baronet, his wife, a cavalry officer, the heir of another baronet and a street organ is reported from Warwickshire.

The incident, which took place a few miles from Nuneaton, has caused much amusement among those connected with the Atherstone hunt.

Having hired a piano-organ from some traveling foreigners, the baronet and his wife disguised themselves as Italian musicians. The former wore a slouch hat and old clothes which had done duty in amateur theatrical performances; the latter wore old garments and bound her head with a colored silk handkerchief.

Accompanied by a kinsman of the baronet, they set out to the neighboring mansion occupied by the son of a baronet well-known in London.

No sooner had they begun to reel off popular music hall airs than the gentleman appeared upon the scene and, in a peremptory manner, ordered their instant withdrawal under threat of calling in the police.

When, after a time, they made themselves known, he joined them in a peregrination of the village, and eventually the "adventurers" reached the seat of a country magnate, a leading justice of the peace.

Here the butler was sent to tell them to leave the grounds immediately, and it was not until the irate squire himself appeared on the scene that the quartet retired.

The climax was reached when the party arrived at another country residence. The family were away from home, but the servants in a body descended upon the "poor musicians."

But the party reached home with their disguise unpenetrated, and a few days later details of the "joke" leaked out, and were discussed and greatly enjoyed by the field that met the Atherstone hounds near the village where the escapade was planned.

### GERMANY HAS NEW WARSHIP

Series of Experiments Results in Cutting Down Coal and Increases Speed of Big Vessels.

London.—Semi-official information has reached London from Berlin that the German ministry of marine has just completed a series of experiments upon which it has been engaged for some months, with a new model for the hull of warships and other vessels of great size. The experiments are said to have proved a complete success and a report upon them has been laid before the kaiser.

The closest guard is being kept upon the details of the invention, but it is stated that it aims at an economy of from 25 to 33 per cent. in the engine power required for an agreed speed, and achieves this result by a new adjustment of the propellers and a reduction of the water's resistance to the hull.

### FIGHT WITH BIG COPPERHEAD

Pennsylvania Sign Painter Frightened at First, Returns and Dispatches Reptiles.

Allentown, Pa.—Eugene Carl, an Allentown sign painter, is laid up with twitching nerves as a result of a battle with a monster copperhead. He was walking across the meadow at Dorney park to paint a sign, when he heard a hissing noise and saw the reptile coiled to strike.

He fought the snake off as best he could by striking it with his paint brush and kettle, but the reptile was as skillful as a boxer, and finally reached him; but, fortunately, its fangs were only imbedded in his trousers and did not strike the skin. Carl's cries brought to his help Calvin Nyce, who killed the snake with a stick. It was 5½ feet long.

After thinking over the matter over night Nyce went to the spot again and found the snake's companion, a female, with 34 young ones, which were dispatched.

### SAYS ONE CHILD IS ENOUGH

So Declares Olive Schreiner in Her New Book—Hard Work Would Make Woman Much Happier.

Cambridge, Mass.—"One child is enough for the Twentieth century family," says Olive Schreiner in her new book, "Woman and Labor."

"The woman who doesn't earn her own living is therefore a parasite, except for that small portion of her time when she is engaged in propagating the species, but for that time she should be paid."

"Wherever in the history of a nation great numbers of its women have become parasite, that nation is on the road to downfall and decay. America is, therefore, on the road to degeneration, unless its women of leisure can be allowed or induced to exchange their vanities for hard labor."

"The human female parasite," the book states further, "whether in modern Paris or New York, or in ancient Greece, Rome or Assyria, is the woman who, relieved of manual labor by the property of her husband or nation,

or by the invention of labor-saving machinery, will trade on her unused potentialities of motherhood for her support. Unless she can or will enter the industrial field or some other line of productive activity she has no right to live on the labors of the male, except in the primitive or decadent nations, where the duties of motherhood extend over a greater period than the half dozen years now necessary out of her three score years and ten."

"The woman of leisure today," she says, "like the hot-house specimen so notorious before the downfall of Rome, who seeks madly by pursuit of pleasure to fill the void left by the lack of honorable activity, would be far happier if she had plenty of hard work to do, and the race would be correspondingly healthier and more efficient."

Owl Puts Out Man's Eye. Washington, Pa.—Philip Crusan of West Alexander has lost the sight of one eye as the result of an attack by a hood owl. The bird flew at Crusan while he was sitting at a table

and before he could defend himself had pecked out an eye and severely scratched his face and hands. The bird was killed.

Famous Topi Suit of Armor. London.—It is stated on reliable authority that the famous Topi suit of armor of the Earl of Chesterfield, sold for \$25,000, goes either to the Metropolitan museum or into the private art collection of a J. Pierpont Morgan. The Topi armor is inlaid with gold and is said to have been made for Lord Chesterfield's ancestor by Jacob Topi, armorer to Queen Elizabeth.

Ship Whale Grass Plot. South Manchester, Conn.—A grass plot on the estate of the late James B. Alcott, in caring for which he spent a great part of his life, has been taken up and shipped to Philadelphia, together with 100 wagon loads of soil. The grass was grown from specimens of grass Mr. Alcott gathered from different parts of the world in his travels.

Making It Legal.  
"We don't know what to do about Plute Pete," said the Crimson Gulch citizen. "He was a real good feller, but he would be careless about shootin' up the populace."  
"Did you straighten out the matter?"  
"To some extent. We elected him sheriff, thereby makin' it look a little more legal."

### DISFIGURED WITH CRUSTS

"Some time ago I was taken with eczema from the top of my head to my waist. It began with scales on my body. I suffered untold itching and burning, and could not sleep. I was greatly disfigured with scales and crusts. My ears looked as if they had been most cut off with a razor, and my neck was perfectly raw. I suffered untold agony and pain. I tried two doctors who said I had eczema in its fullest stage, and that it could not be cured. I then tried other remedies to no avail. At last, I tried a set of the genuine Cuticura Remedies, which cured me of eczema when all else had failed, therefore I cannot praise them too highly."

"I suffered with eczema about ten months, but am now entirely cured, and I believe Cuticura Remedies are the best skin cure there is." (Signed) Miss Mattie J. Shaffer, R. F. D. 1, Box 3, Dancy, Miss., Oct. 27, 1910.

"I had suffered from eczema about four years when boils began to break out on different parts of my body. It started with a fine red rash. My back was affected first, when it also spread over my face. The itching was almost unbearable at times. I tried different soaps and salves, but nothing seemed to help me until I began to use the Cuticura Soap and Ointment. One box of them cured me entirely. I recommended them to my sister for her baby who was troubled with tooth eczema, and they completely cured her baby." (Signed) Mrs. F. L. Marberger, Drexelville, Pa., Sept. 6, 1910.

Although Cuticura Soap and Ointment are sold everywhere, a sample of free, with 32-page book, will be mailed free on application to "Cuticura," Dept. 4 L, Boston.

Many a man enjoys having his wife's relatives visit them so he can be detained downtown till midnight on business.

SHAKE INTO YOUR SHOES  
Allen's Foot-Powder, the Antiseptic powder for tired, aching, swollen, nervous feet. Gives rest and comfort. Makes walking a delight. Sold everywhere. Do. Don't accept any substitutes. For FREE sample, address: Allen S. Cramer, Le Roy, N. Y.

**MINOR MENTION**

—Wm. Kahler has returned from a short trip to Roswell.  
—Treasurer Watson spent Wednesday in the city.  
—Mr. and Mrs. Geo. Castle of Oscura were here Wednesday.  
—G. A. Hyde of Tularosa was here on business Tuesday.  
—R. B. Thomas came in Tuesday from White Oaks.  
—Chas. McMasters returned from Oscura Saturday evening.  
—Mrs. J. Cooper of Ancho was in the city Monday.  
—Operator Davis and roadmaster Taylor were among the visitors Sunday.  
—Paul Mayer, was among the visitors who witnessed the baseball game Sunday.  
—G. F. Thorpe of Fort Stanton was here Sunday to participate in the baseball game.  
—Mrs. C. R. McCalmont and little son of Alamogordo spent Sunday with her husband here.  
—G. A. Bush of Ancho spent several days in the city early this week looking into coal property near here.  
—John H. Canning and family left Monday afternoon for a fishing trip on Eagle Creek and the Ruidosa.  
—Mrs. R. E. Stedham and children have returned after a two months visit in Texas.  
—Miss Bell Lutz of Lincoln has been the guest of Miss Grace Spence for several days.  
—Special Officer Fred Higgins of Roswell was here Wednesday acting as master in a sheriff's sale.  
—A new Buick automobile arrived this week and has been put into service by W. C. McDonald.  
—Miss Andie Crist of Duran spent the week end with Mrs. W.P. Loughrey, taking in the ball games and meeting old friends.  
—Mrs. J. H. Fish has returned to Carrizozo after spending a month visiting friends and relatives in Iowa and Missouri.  
—H. A. Oawley of St. Louis was shaking hands with his many friends in the county and interviewing his hardware customers.  
—J. J. Ayers and W. H. and J. B. Rogers returned from Jicarilla Saturday and went up to Nogal Monday on business.  
—Mrs. W. C. McDonald and daughter Francis returned last Thursday evening from a month-outing spent at the sea shore in California.

**NURSE WISHES** Engagements—Maternity cases a specialty. Write or address, Mrs. J. H. Fish, Carrizozo.

—Allen Barrett, editor of the Esencia Daily Herald, spent several days in the city in the interest of the Yeoman organization.  
—Miss Blanch Garvin returned to her home in El Paso Sunday evening accompanied by Miss Mildred Peters who will visit her there.  
—E. W. Pope, now with the El Paso Herald, but formerly of Fort Stanton was here Tuesday and will spend some time in the mountains near here on a vacation.  
—A. B. Graham of Parsons came in Friday and was accompanied by Miss Charlotte Rice who left that night for Dawson where she is visiting her sister Mrs. Welch.  
—Postmaster Joe Ashford, John P. Murray, Lawrence Olsen and Austin Fuller all of Oscura were among the visitors to the city witnessing the "double header" baseball contest Sunday.  
—Richard Warren and wife of El Paso, the former being Traveling Passenger Agent for the E. P. & S. W. who had been to Capitan on business returned Friday evening to their home in El Paso.  
—Mrs. C. W. Givens of El Paso, guest of Mrs. Adilee Calfee of Oscura, came up Saturday evening with her host to attend the dance given in honor of the visiting baseball team.  
—Dr. E. B. Walker reports that the water in the shallow wells about town should not be used for drinking purposes as several cases of typhoid fever have developed from this cause. The Bonito water is reported as O. K., however.  
—Contractor Tennis has taken a contract to remodel the storerooms of the Carrizozo Trading Company. The two main store rooms will be made into one large room with a main entrance in the center and the two former entrances will be eliminated.

**ANCHO NOTES**

—K. G. Bush left for El Paso the latter part of last week to be gone several weeks on his annual vacation.  
—Mr and Mrs. Walter McMillian who went to Oklahoma to seek a farming location failed to find what they desired and returned to our town again, Friday evening.  
—A camping party consisting of the families of T. J. Thompson, Walter McMillian and Mrs. Crawford left by team for the Bonito Monday.  
—Messers Williams and French unloaded a new Whitman hay bailer for use on their ranch at the head of the Mal Pais, Tuesday.

G. A. Bush spent several days last week in the lower end of county. Richard Knibb returned Tuesday evening from a visit of several days with his family at Alamogordo. Rev. A. G. Burlingame preached at the school house Sunday morning and evening and Monday evening, he promised to return soon and give an illustrated lecture.
