ISSUES IN COUNTY CAMPAIGN

Oscuro, N. M., Sept. 8th, 1911

Mr. Editor:- I have been approached recently by several gentlemen who have solicited me personally, and by letter, for my support in their candidacies for the various positions of trust and profit to be filled in Lincoln County at the coming election in November.

These offices, both County and State, belong to the people, and as a member of the body politic in Lincon County, I feel like upon this occasion, the body politic should be informed in unmistakable terms just where each candidate stands on every issue before us for settlement or adjustment.

There is always the general issues in every campaign for county and precinct officers, of the qualifications, honesty, and economy in the expenditure of public money; but in this campaign there are two vital and absorbing issues upon which every voter should be fully posted as to the standing of the candidates, who are offering themselves on their country's altar? viz: The county seat issue, and the amendment issue.

The first is the most important to us as citizens and tax-payers of Lincoln County, while the other is only important to us as citizens and tax-payers, of the new State, just being launched upon the sea of political experiment.

As for myself, I can speak only, authoritatively, but, I feel pretty sure that I voice the expression of the sentiments of at least two-thirds of the voters of Lincoln County, when I say that I propose to vote against any man on any ticket, who favors the continuance of the present litigation over the location of the County Seat, and the County records. After the decision of the highest tribunal in the United States, (the people), the decision of every court of record in Lincoln County and the Territory of New Mexico, the man must be hardened indeed who would have the gall to ask the people of the county to vote for him for office, if he aproved the policy which has been pursued for the past year and a half of a deliberate, willful attempt to thwart the will of the majority of the people of Lincoln County.

Personally, I will not vote for any man, who does not express an earnest sincere desire to dismiss all the suits and counter suits now pending, and be ready and willing to remove his official headquarters and records of his office to the county seat, as selected by the people at the ballot box; and in expressing this deep conviction I am morally certain that I express the views and sentiments of at least two thirds of the voters of Lincoln County. Boys, smoke 'em out; make them tell just "where they get on at."

As to the proposed amendment to our organic law; the proposition is so simple, the reasons for adopting the amendment so supreme, that no voter should stop, his efforts to have it carried until the polls close on the day of the election. The principle of the rule of the majority has been proven so distinctly a measure and a rule in the interest of the people that the propositions embodied in this amendmendment seem to be clearly a duty we owe ourselves and our children to vote and work for its adoption.

JNO H. BOYD.

CHURCH UNION

Carrizozo is meeting some problems in her own way, and the church question is one of them. In the very beginning of the town it was recognized that to multiply churches in a village would be to divide religion and most likely destroy real spiritual power Other small towns have tried various plans with rather indifferent success.

Practically, Carrizozo put the proposition up to the highest bidder. The Methodist church bid $2200 for church and parsonage with the probability of making it $2700. This is from the Methodists outside of Carrizozo. In addition to this as near as possible, all demoninations to be represented on the Board of Stewarts who are really the governing power of the local church. That too, without in anyway severing their connection with their own church. This Board for the new conference year was elected last Monday night and is as follows: F J. Sager, A. W. Adams, Sam. Miller, Prof. C. L. Schreck, W. E. Baskin and C. R. McCalmont. Of these, three are Methodists, three are Presbyterians and one a Disciple. Then the trustees elected for life are Paul Bently, Dr. R. C. Burton, A. W. Adams, F. J. Sager and F. W. Jones.

Of these three are Methodists, one a Disciple and one a non-church member.

Excepting possibly the Pastor only, the most important office is the Supt. of Snnday School, now held by a Deciple.

It is thus that Carrizozo is settling one of the real problems of the small American towns.

As Pastor of this United Church, I desire the hearty co-operation of all. More than this, I want suggestions from every one as to how we may make this organization a real success. We have Sunday School at 10 A M. Preaching at 11 A. M.—7:30 P. M. each Sunday. Come and find a hearty welcome.

B. W. Allen, Pastor.

PRECINCT NOTICE

Notice is hereby given that the Republican Primary for the purpose of selecting eleven delegates to the County Convention to be held in the School House at Capitan New Mexico, on Wednesday, September 20th. 1911, for the purpose of electing nine delegates to the State Convention, to be held in Las Vegas, New Mexico, on Sept. 18th., 1911, will be held in the office of H. B. Hamilton, in Carrizozo, New Mexico on Saturday September 16th. 1911, at 7:30 P. M.

All Republicans of the Precinct and all others desiring to affiliate with the Republican Party, are cordially invited to be present.

A. H. HARVEY,
Committeeman Precinct No. 14, Lincoln County, New Mexico.

WILL PAY CONTRACTOR

Contractor and Architect Will be Paid For Court House Work Today

SPECIAL MEETING OF BOARD

The County Commissioners will hold a special session this morning at which they intend to issue warrants to Contractor Bechtel and Architect Goetz for money due them for work already done on the Court house and Jail buildings at Carrizozo. The board met yesterday afternoon but adjourned to wait the coming of Mr. Goetz.

Chairman White when asked about the payment of the money due the contractors stated that,—warrants would be issued at the meeting today to pay for the work already done and approved. When asked about the authority of the board to do so he stated that no thing would be made public at this time as to it and that it might appear that the action of the board was purely done on their "muscle"

Of course conjecture has it that the action has something to do with the recent decision of the Territorial Supreme Court affirming Carrizozo's points under the quo warranto. Developments in the next few days will doubtless reveal the facts.

DEVELOPING COAL

The Willow Spring Coal Mine has again begun operations after being closed for nearly three years. This mine is located five miles south of town and was operated during the year of 1908 by C H. McIvers at which time nearly all the coal that was used in Carrizozo was furnished by that mine. On account of the death of Mr. McIvers at about that time the mine suspended operation. Mr. McIvers being one of the chief stockholders of the company The company has now been re organized by Mrs. McIvers, J. J. Ayers, W. H. and H. B. Rodgers, Mrs. McIvers and Mr. Ayers holding the majority of the Stock.

Work has already started on a six room building which will be used as an office and living apartments for officers of the company, bunk houses are being put up for the accomodation of the laborers; all of the buildings are located at or near the mine. J. J. Ayers is superintending the erection of these buildings.

The old tunnel is in to a depth of 150 feet where they have a six foot vein of coal.

The Omega coal mine which is being operated by T. F. Weatherby of El Paso is in the same district and about a mile distant from Willow Spring mine. The company expects to be able to furnish Carrizozo with coal by the middle of October.

NOTICE TO CATHOLICS

My monthly visitation to Carrizozo will be Sept 22nd and 23rd. Mass at 9 A. M. on Saturday, Sept. 23rd. Preaching in English and Spanish.

Rev. J. H. Girma, Rector.

JICARILLA HAPPENINGS.

The weather is beautiful here for this time of year.

Albert Ross came near loseing a horse by its falling into a placer hole last week.

Mrs. Oderbelt and daughter of Carrizozu were out to the camp on a visit to Mrs. Oderbelt's father Mr T. W. Stoneroad

A H. Norton returned Monday from a meeting of the Democratic Central Committee at Capitan.

Andy Mayes of Oscuro was a visitor one day last week.

Mr. Dawson discovered that his house was on fire last week but was fortunate enough to have plenty of water at hand and the water proved of the 'best' at that time

Phil Reasoner, as an intensified farmer, has proven a success this summer. He has a very fine crop cabbage

Two daughters of Mrs. Eve are expected to arrive in camp from Colorado.

It is reported that Miss St. John the assistant postmaster here will leave for home at Carrizozo the last of the week.

John Dale of this place is drilling a well on the south side of Jacks Peak.

One of Mr. Mace's boys had the misfortune to be thrown from a burro and was pretty badly injured about his head but no bones were broken.

There will be preaching here on the first and third Sundays of each month the rest of the year by the Rev. Perkins of Ancho.

Messers. Bruce and Hayes have returned from the Capitan mountains where they have been working on a trail for Uncle Sam in the Forest Reserve

OSCURO OBSERVINGS

John P Murray and Joe Ashford made a trip to Three Rivers Sunday.

E. B. Willson has returned to his homestead from a business trip in the East.

George Castle left for Chicago Sunday.

Robert Young and Family accompanied a party from the I—X ranch on a trip to the White Mountains last Sunday.

Lawrence Olsen was a business visitor to Three Rivers the first of the week.

Miss Latham who has been visiting her sister, Mrs Perrot, returned to her home, Monday.

Justice of the Peace Thornton was a business visitor in Carrizozo Monday.

DEMOCRATIC MEETING

The Democratic Central Committee held a called meeting at Capitan last Saturday afternoon. The meeting was very harmonious and arrangement were made for the holding of the county convention on September 26th at Lincoln. This convention will elect delegates to the State Convention of the Democratic Party which will be held at Santa Fe, October 3rd.

—A pumping outfit is being installed at the Phillips-Gumm well at the head of the Mal Pais.

LOCAL SCHOOL OPENED

Enrollment at the Carrizozo Public School Is Large Employ 5 Teachers

START HIGH SCHOOL COURSE

The Carrizozo Public School opened Monday of this week with a very gratifying attendance. The total enrollment is 165. The eighth grade and high schdol department which are under the immediate charge of Principal Schreck and Miss Lorinda Spellman have a combined enrollment of 27.

In the sixth and seventh grades the enrollment is twenty-seven, these two grades are in charge of Miss Jane Brockway. The fourth and fifth grades have been assigned to Mrs. Nora Massie. The enrollment in these grades are, 4th grade 21, in the 5th, 39. Miss Lella Laws has an enrollment of 16 in the 3rd grade and 40 in the 2nd grade.

In the first grade the pupils have not been so prompt in enrolling Mrs. Gumm who has charge of this room has enrolled but 32, but there are many others who should attend this grade and will doubtless enter in a few days. The enrollment in this room will probably be over fifty in a short time.

Classes have been organized covering the first two years of a high school course. Especial attention is being given to commercial branches in the high school department. A class in Spanish has been organized and is under the the efficient charge of Miss Brockway who is well qualified to instruct in this language, having had a special course in at the New Mexico University.

CAPITAN SUNDAY SCHOOL

Last Thursday night, Sept. 7th, nearly fifty of the older young people of Capitan met at the Sunday School room for a good time and to consider definite plans for an adult Bible Class. After about two hours of fun; refreshments were served. Then the Bible study work in organized classes was presented by the Supt. of the Sunday School. Twenty three of those present enrolled as members of the class. After Sunday School, next Sunday, Sept. 17th, the class will elect officers, and further perfect the organization. All members and others wishing to join are requested to be present. We already have twenty five enrolled members in this one class. Come and join us.

The attendance of the Capitan Sunday School last Sunday reached of fifty-five. There were ten new scholars. It is beleived that every one in Capitan will come into the Sunday School in time. The adults adopted a badge for their class

—Frank Canning left Wednesday day evening for another year at Notre Dame college in Indiana after which he will finish up at Yale University.

—Roy Coleman representing the Amarilla Life Insurance Company is in the city and will make this his headquarters hereafter. He was employed by the railroad here a number of years ago.

Lee B. Chase, Editor and ...
CARRIZOZO, ... NEW M...

VERSATILITY IN THE ARMY.

Is there anything that cannot be done by officers of the United States army? And done exceptionally well? There is nothing. For example, take Colonel Goethals and watch him construct the Panama Canal with ease and grace after various civilians had tried their hands at the job without achieving any glittering success. Then take the five bachelor lieutenants at Fort Scriven, Georgia, who gave a chafing-dish party, the particulars of which we find in the Army and Navy Journal. It was a surprise party. It was given in the Bachelors' Club. The service publication which makes known the achievements of these heroes justly remarks that "a great deal of praise is due the bachelors for having given such an elaborate party without the assistance of the ladies of the post," says the Chicago News. For example: "The dining-room and den, in themselves very handsome, were lavishly decorated with carnations and ferns. The beautiful pale pink flowers were massed in profusion on the mantel and library table in the den. In the dining-room a large vase, filled with the same gorgeous flowers adorned the table. As a souvenir of the occasion a large bouquet, tied with pink tulle, was presented to each of the young ladies present. A delightful Welsh rabbit was served with dainty sandwiches, and a mild punch was served during the evening." Is it not plain that these bachelors are artists and poets as well as warriors? What bachelor outside the service could tie a bow of pink tulle around a bouquet? Doubtless, also, any one of the five, like Cyrano, could compose a ballade while preparing to transfix an enemy on the point of his service sword. Gentlemen, a toast, standing, to the army men who can concoct a Welsh rabbit which will not kill either at close or long range.

"A little harmless flirting with nice people with whom you are acquainted will do much to rest the tired mind after the arduous duties of the schoolroom." This is one of the suggestions to young women schoolteachers made by an elderly lady on relinquishing her position as teacher in the Boston public schools after 49 years' service. "Be a live wire every minute, and don't eat too much," is another bit of advice. This kind of advice from a learned and experienced school "marm" will make most people "sit up and take notice," for in our opinion it is much worse than indiscreet, to say the least, says the New Orleans Picayune. As a cure for brain fag, flirting is entirely new to us, though some years ago we heard it highly recommended for other ailments, and we thought it pleasant to "take." Wonder how this teacher held her job for 49 years? She must have had a strangle hold on it.

A Hindu philosopher and scholar who has been visiting this country declares we have all the heathens we can manage at home, and that the money sent abroad to make converts is wasted and could be better spent in missionary work among the "Greeks at our own doors." He also made some caustic comments on practical Christianity in the United States. Sometimes the oriental mind displays unexpected but comprehensive accuracy of observation of Western superiority.

The object of the organization which calls itself the Non-Smokers of America is to secure the enforcement of laws, ordinances, regulations and rules against smoking in public places in the United States. The man who endeavored to incorporate it in New York include several distinguished educators. However, they were careless in drawing up their application. There was no statement from the would-be incorporators that they had not made application for incorporation before. For this reason, Judge Gleger ish denied the application. But the non-smokers can begin over if they choose.

A Brooklyn woman refused to obey an order of the Supreme court to allow her divorced husband to visit their baby, and the justice whose authority was thus defied called: "What are we coming to in this country?" Being a jurist [illegible]

Build a Permanent Camp

BY WARREN H. MILLER

THERE are all sorts of camps, from the hasty voyageur bivouac of the big-game hunter to the serene summer retreat when one invites his soul to ease in Nature's Lotus-land—that "place where it seemed always afternoon." Indeed, I think that the quintessence of camping is reached when one knows the game thoroughly enough to be able to draw from Nature alone all the comforts that civilization affords, in addition to the thousand joys which no civilization can give. It is far easier to do this than one would suppose, for the reason that most of the drawbacks of camp life come from neglect of simple cleanliness and ordinary bodily comforts, such as homo sapiens has become accustomed to from his cradle.

The subject of camping is really so vast that it cannot be even approached in a single article. It strikes at the very roots of life. At its best it holds up a mirror to us all, showing how far civilization and overpopulation have combined to separate us from the easy formula of life which the Creator intended; how they have driven thousands to starvation within a stone's throw of the fabulously rich, whereas Nature gave every man the equal strength of his own two hands, which were once ample to win him livelihood and happiness.

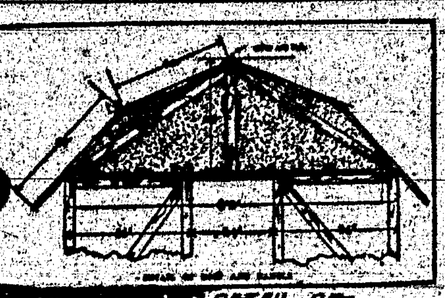
When one is after traveling game, or on a canoe trip, or such nomadic camp life, the less of everything taken along the better. A good sleeping bag is preferable to a tent; a single skillet will provide the utensil to cook with; and rifle, hatchet and knife are really all the necessities that can be mentioned. I even once went on a camp where I took nothing along, except a notebook and two sheets of blank music paper. A bully tramp over the mountains it was, too, and I slept in piles of leaves raked up in dry ravines that were already filled a solid foot deep with dry leaves. I had on a canvas hunting suit, slouch hat, and gaiters. In the shooting-coat pockets were a Dutch weinerwurst, half a dozen hardtacks, three potatoes, and a hunk of bacon. In the ditty-bag, without which I never take any trip, were little primer-boxes filled with butter, salt, tea and sugar, and there were also a variety of hooks and lines, a steel 'possom hook and a pickerel hook for frogging. It was the only tramp in which I had no itinerary, hadn't any idea of getting anywhere, and could stop whenever and as long as I pleased. I think I was all one afternoon going two miles around the flank of one mountain, down into a ravine and up the brook to the spring, where I camped for the night. I was gone two days; bagged most of the species of trees of the middle states east of the Appalachians in the notebook, and scrawled the music-sheets so full of wriggly black notes that the publisher got cross-eyed trying to read the copy. Such a camp-tramp cannot last more than two days, or you are apt to spend the night hugging a tree, while the rain deluges everything throughout the woods.

For the light week-end camps, or fishing trips not lasting over ten days, I always take a small tent.

But the acme of camp life is to arrange to spend the whole summer out of doors, beside some favorite lake or river. To most of us this must be somewhere within commuting distance of some large city. To a few it is given to be able to live thus in a good game country, leaving the business cares for the winter months. It is this kind of camp of which I wish particularly to speak, for it is an ideal life.

As a matter of fact, the bungalow in the woods should be the cleaner and prettier of the two. If you can get a board floor, so much the better; but be very sure that none of the boards reach out under the walls of the tent, so that the water can follow them inside. The best way is to rent your ground, or buy it outright with as much of the surrounding woods as you can afford, and buy or build a small bungalow. If you have the homing instinct you will get to love that little shack like you do your boyhood town, and will put in all sorts of spare hours and rainy days in improving it and making it more comfortable. The cheapest one I knew of is to take a half dozen rolls of roofing and some 2-by 4-inch hemlock joist into the woods and then build the shack yourself. It is surprising how far into the backwoods you can get with this stuff, given a couple of canoes and a day or two. [illegible]

A PERMANENT CAMP IN THE ADIRONDACK MTS.



DETAIL OF ROOF AND PANELS OF HUNTING LODGE

A HUNTING LODGE THAT CAN BE BROUGHT IN ON A CANOE

a rocky slope or steep turn in the mountainside with a southerly outlook. You will find that the eight or ten feet back of the house, between it and the wall, will soon grow into valuable "timber," and may some day afford possibility of a field-stone chimney when you have the time and a canoe load of quicklime brought out from the clearings. The frame panels will work out much as the sketch. They are of the width of the roofing, 36 inches, and 7 feet high, diagonaled, as shown, to make them rigid; and the roofing is nailed to the backs of them.

A floor space of 8 by 14 feet is ample for a bungalow of this kind, with a gambrel roof as shown in the illustration. It will have a door in each end, a window at each side; doors and windows made of gauze tacked on the same framing as the main panels, canvas awnings and porches over windows and doors, and a stone and concrete floor. To built it complete you will have to bring out into the woods six rolls of Indurold or Rubberoid roofing, costing 2½ cents a square foot, 100 square feet to the roll; 800 running feet of dressed No. 1 southern pine, soft maple or hemlock, ⅞ by 2½ inches; 8 yards of bobbinet or gauze, 5 yards of 8-ounce duck canvas, and one-half sack of Portland cement. Not a very heavy layout of either money or material, say, $25 all told, and yet it will give you a start for a permanent bungalow that you can always come back to with increasing affection. On arriving at your site, the first thing to do is to pitch your tents, select the very best site your ground affords for the shack, clear a little space to make panels in, and saw your pine up into the right lengths. You will need 12 panels 7 feet by 36 inches for the sides, and four panels 16 feet by 36 inches for the roof. Get out the walls first. They are quickly and strongly joined by driving in half-inch corrugated iron fasteners, which are driven across the joints with a hammer, sinking them flush with the surface of the wood. In this way the whole 12 can be quickly and strongly knocked together.

Having the 12 panels to hand, the next step will be to nail a strip of pine 14 feet long to the top and bottom of each four panels, making two sides of four panels each, with a 2-foot window space in the middle of each. In the same way the two ends are assembled with strips of pine eight feet long, nailed to top and bottom of two panels with a 2-foot door space in between. They are now ready to raise up, but first a foundation must be prepared, and the simplest thing in the woods is to drive in four 2-inch stakes about three feet long around all four sides, having two stakes at each corner. Saw them all off flat to a string run all around and leveled at, say eight inches above the soil. On these the panels can be set up and hooked at the corners, nails being driven down through the footstrip into the posts. To make the corners staunch and tight, three cleats should be nailed to one of the panels, giving something for the hooks to pull against. There will be cracks at the corners and joints, and to protect these from the weather and at the same time guard against the inevitable warping of the joist in the weather you had best [illegible] inside. The roof panels come next, 16 feet long by approximately 36 inches wide, a lap being left over as shown in the detail of the roof-joints, so as to leave no place for the rain to work in. There are 12 hinges, four at each joint, and the frame is diagonaled as with the wall panels. To get the roof on, lift it up on the walls, raise the ridge until about a foot of eave overhangs at the sides, and nail light saplings to the ends to hold the gambrel in its proper position while the gable ends are measured and made. After putting them in position, the saplings can be knocked away and the weight of the roof allowed to come on the gables. Hooks will be needed at the eaves to utilize the top wall-strip as a tie.

The doors are made just enough smaller than the opening to permit a sill and lintel of hemlock to be nailed in the doorway. They are covered on the inside with gauze or bobbinet, tacked to the frames with galvanized tacks. The windows are made in the same fashion except that the lower three feet is filled in with a solid panel of roofing material and a similar piece let in up above to permit the window to swing clear of the eaves. After swinging the door and window awnings with "rustic" frames cut in the woods, the house is ready for occupancy except for the floor. It is worth while to take along a can of the powder of some good cold-water paint, so as to finish off the woodwork of the panels.

The easiest floor to make in the woods is to choose some lazy afternoon when everyone is tired of fishing and floor the whole of it with flat stones taken from the natural rock of the forest.

Though the three-foot window wainscot permits four cots to be arranged along the sides of the shack, I prefer this space for living room, and sky the beds Pullman car fashion, just a little under the roof. The easiest way to do it is to cut two straight four-inch hemlocks, trim, and gain to posts set upright from the floor to ceiling against the front and rear walls. They thus make a sort of rustic inside doorjamb, so do not take any useful room, while the berths can be made in the space behind the four-inch log by tacking across ten-ounce duck with 20-ounce galvanized iron tacks, spaced three inches apart. A spreader is let in at the middle, thus making two six-foot berths on a side. They are filled with several inches of balsam browse and are then ready for the sleeping bags. The whole floor space is, by this arrangement of sleeping accommodations, available for living room, canvas camp chairs, log tables, etc., can be put in and one has a comfortable lounging and eating room (in bad weather).

The beauty of making some sort of a beginning for a forest home is that each year it gets better and more serviceable as you return to it year after year, for your summer outing and keep on fixing and improving it. It is one of the cheapest solutions of an all summer home and the [illegible]

QUEER DISEASE IS IN UNITED STATES

Many Here Afflicted With Odd Ailment, Says Prof. Munyon.

GREWSOME CREATURES VERY COMMON, FINDS EXPERT.

Many people in the United States are afflicted with a queer disease, according to a statement yesterday by Professor James M. Munyon. He made the following remarkable and rather grewsome statement:

"Many persons who come and write to my headquarters at 53d and Jefferson Sts., Philadelphia, Pa., think they are suffering from a simple stomach trouble, when in reality they are the victims of an entirely different disease—that of tape worm. These tape worms are huge internal parasites, which locate in the upper bowel and consume a large percentage of the nutriment in undigested food. They sometimes grow to a length of forty to sixty feet. One may have a tape worm for years and never know the cause of his or her ill health.

"Persons who are suffering from one of these creatures become nervous, weak and irritable, and tire at the least exertion. The tape worms rob one of ambition and vitality and strength, but they are rarely fatal.

"The victim of this disease is apt to believe that he is suffering from chronic stomach trouble, and doctors for years without relief. This is not the fault of the physicians he consults, for there is no absolute diagnosis that will tell positively that one is not a victim of tape worm.

"The most common symptom of this trouble is an abnormal appetite. At times the person is ravenously hungry and cannot get enough to eat. At other times the very sight of food is loathsome. There is a gnawing, faint sensation at the pit of the stomach, and the victim has headaches, fits of dizziness and nausea. He cannot sleep at night and often thinks he is suffering from nervous prostration.

"I have a treatment which has had wonderful success in eliminating these great creatures from the system. In the course of its regular action in aiding digestion, and ridding the blood, kidneys and liver of impurities it has proven fatal to these great worms. If one has a tape worm, this treatment will, in nine cases out of ten, stupefy and pass it away, but if not, the treatment will rebuild the run-down person, who is probably suffering from stomach trouble and a general anaemic condition. My doctors report marvelous success here with this treatment. Fully a dozen persons have passed these worms, but they are naturally reticent about discussing them, and of course we cannot violate their confidence by giving their names to the public."

Letters addressed to Professor James M. Munyon, 53d and Jefferson Streets, Philadelphia, Pa., will receive as careful attention as though the patient called in person. Medical advice and consultation absolutely free. Not a penny to pay.

AS A RULE.

"What is an income tax, pa?"
"A wife, my son."

TO KEEP THE SKIN CLEAR

For more than a generation, Cuticura Soap and Cuticura Ointment have done more for pimples, blackheads and other unsightly conditions of the complexion, red, rough, chapped hands, dandruff, itching, scaly scalps, and dry, thin and falling hair than any other method. They do even more for skin-tortured and disfigured infants and children. Although Cuticura Soap and Ointment are sold by druggists and dealers throughout the world, a liberal sample of each, with 32-page book on the care of the skin and hair will be sent post-free, on application to "Cuticura," Dept. 22 L, Boston.

Cruel Disappointment.

Jugend tells this story: "In the lower court of a small town in Saxony William had served faithfully and well as attendant to the presiding judge for many years without ever having received any reward aside from his legal stipend. On the day of adjournment for the season, when visitors had retired, the judge, who was also about to leave, asked: 'William, do you smoke?' Seeing a square box under the judge's arm, he answered respectfully: 'Yes, your honor.' 'I knew it by the smell of your coat,' said the judge, as he walked out."

Better Go On, Boys.

Belshazzar saw the writing on the wall.

"It means your wife will be home on the 9:22 and you had better begin to wash up all the dishes," advised [illegible]

THE BOUDOIR

Dame Fashion's Diary

TRULY CHARMING HAT

MODEL ONE OF THE BEST STYLES OF THE SEASON.

Various Distinctive Points About It Are of Importance—Also Excellent Investment as a Matter of Economy.

This very fine model is one of this season's shapes having a moderately high sloping crown. A wide net top lace with dainty floral pattern, serves to face the brim. A cascade across the front is held by a long buckle made of a double row of small June roses in pink. The moss sole variety is the best choice for this purpose.

This is a charming hat and both the shape and the lace will stand more than one season's wear. A good leghorn hat and a fair quality of net lace make an excellent investment for those who buy good looking and economical millinery.

JULIA BOTTOMLEY.

SLIPS ON OVER THE HEAD

Dress That Is a Decided Novelty and Also Has Much to Recommend It for the Summer.

The "slip-on" dress; a gown of white serge, surah silk, or marquisette, is one of the decided novelties of the summer season. It slips on over the head, and doesn't have to be hooked or buttoned. One of the prettiest of these frocks is made of plain white surah silk, trimmed with white silk, striped at one-inch intervals with navy blue and green alternating. This striped material forms the yoke applied beneath the low-cut round neck. This yoke opens about three inches in front, and is laced with a blue cord. A fine net yoke, gathered on a cord, fills in the low-cut neck.

Both bodice and skirt are cut in one piece, the fullness being adjusted by a draw-string at the waist-line. A belt of the material is worn over this shirring. A twenty-inch flounce of the striped material finishes the bottom of the skirt.—Harper's Bazar.

Picture Gown.

On every side one sees the revival of picture frocks that are most suitable for young girls and even for certain types of older women. That quaint old color known as forget-me-not blue is again in fashion and is used for such gowns as well as floral taffeta which has scattered bouquets over the surface or single flowers.

One gown made of the former fabric had a short skirt, was high-waisted and was draped with eyelet embroidered batiste in a strong ivory tone. Yards of fringed ruching made of the taffeta was used as trimming, and the drapery of the top of the tunic was held in at the left side of the waist with a bunch of forget-me-nots made of blue velvet.

Hair Stripe Lawn.

The woman of refined taste is enjoying this summer the lawns with a fine hair stripe, in black and white, or in any color with white. These lawns trimmed with the English eyelet work are charming; and, while any amount of the embroidery can be used, the amount can be regulated by the number of flounces one uses. Also [illegible] the bands around the skirt, [illegible] make the [illegible] look

WHITE FLOWERS ARE LIKED

Paris Has Set Its Seal of Approval on This Color for Forms of Ornamentation.

White flowers are perhaps the most important in the new favorites. In Paris there is a furore over the dead-white flowers that are of velvet or muslin. These are placed in white hats, that in their all-white glory are giving the new, fresh touches to the bright costumes worn at afternoon parties, receptions, etc.

Flowers formed of mousseline de soie are used to decorate sash ends. These are usually lily-shaped, with narrow pointed petals gathered into a yellow center of bright streamers.

Tiger lilies are giving the touch of brilliant orange to summer dresses. One large one will be used on the girdle, a bunch of them will weight down a chiffon sash; a cluster will decorate a hat.

Hydrangeas in the shaded pinks and lavenders are mixed with white on large garden hats or formed into upstanding bunches at the side of white net lingerie hats.

The old-fashioned phlox, sweet williams, hollyhocks, candytuft, mignonette, heliotrope, with geraniums and nasturtiums, are very much in evidence. Indeed, the old-fashioned gardens are here again, in our millinery world.

Lilacs in white and purple are here to form entire crowns on large hats. They also fashion the bunch at the side.

There seems to be no choice between the stiff flowers and the graceful ones. Any one will do, and no time limitation is placed on them, the new American beauties being just as popular as grandmother's favorites.

FOR A SIMPLE, USEFUL BAG

Easily Made in Any Size Desired and Does Not Call for Use of Much Material.

This is a very useful, easily made bag, that may be copied in any size from quite a small one to hold small pieces of crochet to one of larger size for the household mending. It needs a square of material, which for the small size should be of silk; cretonne, chintz or casement cloth for a large one.

Fold the square in half, and sew the ends together, about two-thirds

the length; hem the open edges, then turn down the top over a ring of some sort—a brass curtain ring will answer, and at most fancy-work shops suitable rings of all sizes can be purchased; the material must be hemmed over the ring loosely, so that it may be easily pulled up. A bow of ribbon is sewn to each side.

Suit Styles in Favor.

Buyers now in the market are showing their confidence in suits made with a 32 or 30-inch coat, says the Dry-goods Economist, although a few longer and some shorter lengths are being ordered by merchants who carry large stocks and who have to cater to all classes of trade. While a large business is being done in coats that are cut off at the waistline and have a fitted skirt or peplum attached, as well as coats that show some odd cutting of the seams, there is also a big call for the straight semi-fitted or seven-eighths fitted coat, particularly in the medium and popular-priced goods.

Novelty for Summer Wear.

White cotton marquisette, yellow wool, coarse linen lace and white porcelain beads, have been combined to produce a novel parasol with bag to match. The parasol of marquisette is bordered with the lace, fringed with loops of the wool, on each one of which is stringing a white bead, and the [illegible] with a few large yellow wool flowers and clusters of small yellow wool [illegible]

GUIDE TO ENGINEER

EXPLANATION OF SYSTEM OF RAILROAD "FIREWORKS."

Torpedoes and Fusees Used as Signals to the Ear and Eye—One of the Best Protections Yet Devised.

"'Pop, pop,' or perhaps a single 'pop,' sharp and distinct, like that of a giant firecracker, heard not only on the Fourth of July, but on every day in the year, Sundays included—what did it mean?" writes a correspondent of St. Nicholas. "And on almost any night as I look out of my window I see the edge of the wood or the fields lighted up by red or yellow fireworks. Why this strange illumination?

"As all these queer happenings took place on the railroad a few rods from my house I made inquiries of the railroad officials, and here are some interesting facts about the use of these curious 'fireworks.' General Superintendent B. R. Pollock of the New York, New Haven & Hartford railroad explained as follows:

"'Our rules provide for the use of detonators (commonly known as torpedoes) as audible signals and of fuses as visible signals. These torpedoes are attached to the top of the rail on the engineer's side of the track by two small flexible metal straps, which are easily bent around the ball of the rail and hold the topedoes securely in place until exploded by the first train passing over the track.

"'The explosion of one torpedo is a signal to stop, the explosion of two to reduced speed and look out for a stop signal. The fusees are of similar construction to the well known roman candle used for fireworks celebration except that they burn a steady flame without explosions. A sharp iron spike at the bottom end will usually stick in the ground or in the crossties when thrown from the rear of a train and holds the fusee in an upright position, where it is more plainly visible.

"'A fusee must be lighted and left by the flagman whenever a train is running on the time of another train or behind its own time and under circumstances which call for such protection. A fusee on or near the track burning red must not be passed. When burning yellow the train may proceed with caution when the way is seen and known to be clear. Standard fusees burn red for three minutes, and yellow for seven minutes, and can be seen for quite a distance.

"You will gather from the above explanation that the red glare of a flaming fusee on or near the track warns the approaching engineer that a preceding train has passed over his track less than three minutes ahead of him, and under no circumstances must he pass a fusee while it is burning red. When the flame turns to yellow, he may proceed with caution, only as the way is seen and known to be clear, keeping in mind that when the fusee changed from red to yellow he was exactly three minutes behind a preceding train which may have stopped within a short distance, or may be proceeding at an unusually slow rate of speed.'"

Few Wills Broken.

Between four thousand and five thousand wills are filed for probate each year. While many are contested, but few are rejected. It is very difficult to break a will. The records in this (New York) county show that during the last few years but a very small percentage of the will contests have succeeded.—New York Sun.

Simplifide Speling.

Spel enny way yu plez. This is the declarashun of brander mathuze, professer in a univercity, a noted critik and lekshurer, a member of the simplifide speling bord and a few other things. Wot cares he that ecksentrick speling is like the mule—without pride of ancestry or hope of posterity? It matters not to brander that there is a rite and a rong about speling as much as there is a rite and a rong about pronuncing. Frinstance, we mite express the opinyun that brander is a beest of a professor and spel it butt, which wud be panefully inakurate, not to say misleading. Go to, brander; we like not yure go-as-yu-plez speling. It makes us tired and we fear it maiks the linecotips man speke evil thawts.—Pittsburg Sun.

Flower of Fluorescein.

A few grains of fluorescein, a substance derived from coal tar, will produce a distinct fluorescence, shining with a yellowish green light when strongly illuminated, in a hundred tons of water. To produce this result the fluorescein must be divided into [illegible] [illegible]

TO PREVENT TRAIN FIRES

Illuminating Gas Light Is Rapidly Being Replaced by Electricity.

In the last few years there has been a marked effort on the part of the railroads to light more trains by electricity. Explosions of illuminating gas and fires caused by dripping oil lamps were the direct cause of this movement toward electric lighting.

The chief dangers of gas and oil for train lighting exist in time of serious wrecks. Time and time again the old oil lamps have overturned, scattering inflammable oil about and setting the train on fire. In cases where the cars are overturned and twisted about the gas tubes and pipes have broken, causing serious explosions, and the fires started by the gas lamps quickly follow the trail of leaking gas throughout the train.

A leading western railroad has equipped all its through trains with electric lighting, sixty-seven of the best locomotives being equipped with Curtis turbo-generators. These little steam turbines, which whirl small but powerful electric generators, are mounted on top of the locomotive boiler and take up so little room that they are hardly noticeable. Each turbine gets its steam from the main boiler. As all the coaches are wired and fitted for electric lights, all that is necessary in making up the train is to lock the cable connections between the engine and the first coach, an operation that takes only a second or two.

ELECTRIC WAGONS FOR ROAD

Innovation Is of German Origin and Not at Present Thoroughly Understood Here.

An electric train of six road wagons coupled with and preceded by its own self-propelled traveling power plant is illustrated and described in a German contemporary, although no information is given as to whether the system has actually been employed in practice by any firm of carriers for the transport of freight by road.

The power-generating wagon is equipped with two dynamos driven by gasoline engines, and an electric motor is provided for driving each of the two axles. The six trailing wagons have a capacity of from five to five and one-half tons each, or a total of from 30 to 33 tons, and the speed of the train is given at from seven and one-half to nine and three-quarters miles an hour. Each of these wagons has also two driving motors, one for each axle, so that all of the axles throughout the train are electrically operated. The tires of the vehicles are very broad so as to enable the train to travel over practically any kind of road, and the cost of operation is said to be very low. The train is steered from the driver's wagon.—Popular Mechanics.

Only Woman Train Despatcher.

The unusual distinction of being the only woman to handle trains in this country belongs to Mrs. Jennie Connor of Melrose Highlands, a suburb of Boston. She is employed by the Boston and Maine and is well known to thousands of railroad employes throughout the four states in which the road operates.

Not only is she a good train despatcher, but she also knows the complete construction of the locomotives in use today. It is believed by the four hundred and more engineers who report to her that she knows more about the construction of the big engines than do most of the men who assisted in their construction.

Mrs. Connor has charge of all the engines used on the northern division of the road, and this has led her to take up the study of the moguls, with a result that has been amazing.

Mrs. Connor believes that work for women is a great preventive for divorce and nervous prostration.

The Proper Countenance.

The auctioneer—morbid and forbidding.
The bridge fiend—wistful.
The waiter—tipsy.
The lumberman—bored.
The glazier—with a pained expression.
The manicure—handsome.
The bucketshop manager—pale.
The bride—well groomed.
The police court judge—dire.
The night watchman—mournful.
The bootblack—with a shining countenance.
The poker player—winsome.
The rah-rah boy—cheerful.
The marble cutter—with a stony stare.
The tobacconist—puffed up.
The confectioner—sweet.
The paperhanger—wall eyed.
The carpenter—chipper; you never saw one plain.—Lippincott's Magazine.

Reminders.

"Reminders upon clothes may be removed by placing a clean damp cloth upon the material and pressing with a [illegible]

NEW STRENGTH FOR BAD BACKS.

Those who suffer with backache, headache, dizziness and that constant, dull, tired feeling will find comfort in the advice of Mrs. C. S. Tyler, Cando, N. Dak., who says: "My back became terribly sore and lame. I was tired and restless and would arise so exhausted I could scarcely dress. The kidney secretions were terribly annoying and my feet became so swollen I could not wear my shoes. Nothing helped me until I began using Doan's Kidney Pills. They gave me prompt relief and in a short time I was entirely cured."

Remember the name—Doan's.

For sale by druggists and general storekeepers everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

SURE.

Man in the Big Hat—I've always made money out of politics.

Man in Small Hat—Are you a political orator?

Man in Big Hat—No; I'm the leader of a brass band. The musicians always get paid, but the orators are expected to talk for nothing.

Serenity.

"The true religious man, amid all the ills of time, keeps a serene forehead and entertains a peaceful heart. This, going out and coming in amid all the trials of the city, the agony of the plague, the horrors of the thirsty tyrants, the fierce democracy abroad, the fiercer ill at home—the saint, the sage of Athens, was still the same. Such a one can endure hardness; can stand alone and be content; a rock amid the waves—lonely, but not moved. Around him the few or many may scream, calumniate, blaspheme. What is all to him but the cawing of the seabird about that solitary, deep-rooted stone?"—Theodore Parker.

To Be a Good Cook.

"To be a good cook means the knowledge of all fruits, herbs, balms and spices; and of all that is healing and sweet in fields and groves, savory in meats; it means carefulness, inventiveness, watchfulness, willingness and readiness of appliance; it means the economy of your great-grandmothers and the science of modern chemists; it means much tasting and no wasting; it means English thoroughness, French art and Arabian hospitality; it means, in fine, that you are to be perfectly and always ladies (loaf-givers), and you are to see that everybody has something nice to eat."—Ruskin.

AT THE PARSONAGE.

Coffee Runs Riot No Longer.

"Wife and I had a serious time of it while we were coffee drinkers.

"She had gastritis, headaches, belching and would have periods of sickness, while I secured a daily headache that became chronic.

"We naturally sought relief by drugs without avail, for it is now plain enough that no drug will cure the diseases another drug (coffee) sets up, particularly, so long as the drug which causes the trouble is continued.

"Finally we thought we would try leaving off coffee and using Postum. I noticed that my headaches disappeared like magic, and my old 'trembly' nervousness left. One day wife said, 'Do you know my gastritis has gone?'

"One can hardly realize what Postum has done for us.

"Then we began to talk to others. Wife's father and mother were both coffee drinkers and sufferers. Their headaches left entirely a short time after they changed from coffee to Postum.

"I began to enquire among my parishioners and found to my astonishment that numbers of them use Postum in place of coffee. Many of the ministers who have visited our parsonage have become enthusiastic champions of Postum." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

CLEMENT HIGHTOWER

For Commissioner, 3rd. District

I hereby announce myself a candidate for the office of Commissioner to represent the third district of Lincoln County, pending the action of the Republican Convention.

H. CONSBRUSH

For Superintendent of Schools

I hereby announce as a candidate for the office of Superintendent of Schools of Lincoln County, subject to the action of the Republican primaries and nominating convention.

SAMUEL KELSEY

I hereby announce myself as a candidate for the office of Superintendent of Schools of Lincoln County, pending the action of the Republican nominating convention.

CHAS. L. KENNEDY

WHILE passing we might mention our thanks to the many new readers who have added their names to our subscription lists increasing the circulation of the Outlook until at the present time its circulation is one-half more than its nearest competitor and has by far the largest circulation of any paper in or entering the county. The Outlook is about to close its second year under the present management and if success may be judged from the increase in circulation; we have been successful. The present circulation is more than 100 per cent more than it was at the inception of the present management. This circulation has been without solicitation or the lure of premiums; the paper being put purely on its merits. This is a fine paragraph of ego but no one else has volunteered to "Toot our horn" for us, so its up to us to do so ourselves. We thank you.

INDICATIONS would have it that this section of New Mexico will have an opportunity to be represented by prominent citizens from this section in the National capitol. Ex-Governor George Curry of Tularosa, a native of this county, a favorite son, and well known to most every man in the county is prominently mentioned for the nomination on the Republican ticket for one of the Congressmen and Judge A. B. Hall of Three Rivers also an old timer and a large ranchman just a few miles from Carrizozo is mentioned as a possible United States Senator. There are also many other conjectures and rumors but none that have reached definite proportions as yet.

IN the matter of announcements of candidates for offices in the county and state, which may appear in the Outlook; it must be understood that our columns are open to the advertisements of all candidates regardless of affiliations and the fact of their appearance in this paper has nothing to do with our support or non-support of any candidate. The charge for the space used is nominal and is purely a business transaction, the merits of the various persons announcing will be outlined in the paper so that our readers may become familiar with the men who may be nominated.

THE republicans of Lincoln County held a very harmonious meeting at Capitan last Wednesday and the general feeling among all was 'to get together'; to compromise on the county seat strife; and to put a ticket in the field that would be representative of all parts of the county and made up of material that would win. The older heads figure that the matter of the county seat will be an incident of the past within the year, while the officers elected on Nov. 7th, 1911 will hold their office for five years—hence the desire to eliminate the Lincoln-Carrizozo fight.

FROM now until the present campaign is over, at least, the columns of The Outlook will be open to our readers for the expression of their opinion under the heading, "The Forum". We will publish such expressions as long as they are printable, no matter how strongly we may oppose the principles or the opinions set forth. Our columns are open to our readers for communications. Let 'em come.

CALL FOR THE REPUBLICAN COUNTY CONVENTION

A Convention of the Republican Party of Lincoln County is hereby called to meet at the school house at Capitan at 10 A M. Wednesday, September 20th. for the purpose of nominating 9 delegates to represent the County of Lincoln at the First State Republican Convention to be held in the city of Las Vegas on the 28th day of September, to nominate a state Republican ticket.

The bases of representation for each precinct in the county shall be for every ten votes or fractions of five or over cast at the last general election for the Hon. W. H Andrews, one delegate.

The various precincts are entitled to the following number of delegates

No	Precinct	Delegates
1	Lincoln	10
2	San Patricio	11
3	Los Palos	5
4	Picacho	2
5	Reventon	4
6	Richardson	2
7	Jicarilla	5
8	White Oaks	5
9	Capitan	7
10	Ruidoso	4
11	Nogal	3
12	Bonito	3
13	Corona	5
14	Carrizozo	11
15	Oscuro	2
16	Ancho	2

Total 81 delegates

Precinct Chairmen are requested to call their precinct primaries on Saturday September 16 at whatever hour they consider the most convenient.

Proxies will be only recognized when in writing and when held by resident of the precinct where issued.

All Republicans, and all those believing in the principles of the Republican party are cordially invited to attend and take part in the primaries and convention.

H. B. Hamilton, Chairman
Lincoln County Republican Central Committee.

J. H. Canning, Secretary

WHITE OAKS WHIFFS

Mrs D. S McDonald and children returned Sunday from an extended visit to their former home in Michigan.

Allen Lane who was laid up for several days, with a sprained ankle is again able to get around.

School opened Monday with Prof Sam Kelsey principal, and Miss F. Greenberg assistant.

Henry Corn has moved to town from his ranch for the benefit of sending his children to school this winter.

Miss Sara de Aguaya left Monday to visit a few days with relatives and friends in Alamogordo and El Paso.

A. H. Norton came down from Jicarilla Friday, for supplies.

L. C. Barlow from El Paso was a visitor in town this week.

Mr. and Mrs. Art Roland and baby, and Mis Frances McDonald were up from Carrizozo Friday.

Mr. and Mrs Ralph Treat spent Sunday at Antone Vega's ranch They brought home some "really fish" from Anton's pond, some weighing two pounds

Sam Kelsey has moved his family from Carrizozo, and they are occuping the McDonald residence on North side.

RUIDOSA RIPPLES

We are having some fine rains and everything is looking green hereabouts

Considerable hay is being put up and bailed by the farmers of the lower Ruidosa.

Mrs. S, M. Johnson and children have gone to Roswell for the benefit of the schools.

Merel Wingfield made a business trip so Alto Saturday.

Pete Phillips was a visitor on the Ruidosa Saturday.

Lula Phillips was on the 'Dosa Sunday.

Miss Lula Wingfield and Miss Wingfield made a business trip to Angus Sunday.

NOGAL NOTES

Mrs. Buxton and daughter Mrs. DeNission have moved to Nogal from their ranch on the Carrizozo flat to send Mrs DeNission's daughter to school.

School is progressing here nicely under the management of S R. Moss.

Levi L. Davis is contracting with L, R Hust of Nogal to cut and bale two hundred tons of wild hay near what is known as Goose Lake, in this county.

Mrs. Gertrude Dillard, niece of Mrs. A. E. Moore is here from Arizona

T. J. Moore was called by wire to join his wife who recently went to Las Vegas to consult an eminent doctor.

MADERO LABORING TO RESTORE PEACE

ADDRESSING A TURBULENT CROWD

PHOTO COPYRIGHT BY UNDERWOOD & UNDERWOOD

HAVING conducted successfully the Mexican revolution by which Diaz was driven from the country, Francisco I. Madero, Jr., now finds that it is not easy to put an end to the fighting. Bands of Maderists in various parts of the republic still are in arms, and Madero is traveling about trying to pacify them and to restore peace among his countrymen.

METTLE OF FILIPINO

Tossed About on Open Sea for Forty-Eight Hours.

He Had Been Maddened by Fear of Sharks and by the Last Chances of Rescue—He Had Done Best He Could.

Manila, P. I.—When the ship Polsat went down off Malabon, Philippine Islands, recently Alejandro Lorenzo jumped clear of the wreck. After an hour's swimming he found a hatch cover on which he rested. Then he started toward San Nicholas, pushing the hatch cover ahead of him. He was nearly successful and was just reaching shallow water when the tide carried him out to sea again. As night came the wind increased and the waves tossed him and his hatch cover back and forth until he thought it would be impossible for him to hold his support, but toward midnight he found that he was being washed toward the Cavite shore. Just as his hope was strong the tide wind carried him to sea again. He struggled against them, but was swept out. Something brushed against his leg.

"It did not touch me again or I should have gone mad."

The water was cold, the night dark and the rain beat down on him. He heard a cry in the darkness and pushed his hatch cover in the direction from which it sounded. Toward morning he found a Filipino boy, another survivor of the wreck, clinging to an oil box. They drifted together. When daylight came they could see boats and they shouted until they were exhausted, but could not make themselves heard or seen. They were tortured by thirst. Salt water got into their mouths. They drifted all day. Night came again and shortly after dark they saw the lights of a breakwater, and with new hope noted that they grew larger and more distinct. They were being washed in again. The boy was taken with cramps, lost his hold on the oil box and went down.

The man was washed toward the middle of the bay and drifted during the night. At dawn he was almost ready to give up, but the wind and waves headed him for the east shore and he took heart. Then he saw boats and used his last strength in trying to reach them. The boatmen saw him, and were able to get him in time, and picked him out of the water. There was not much of the man left, and he was shrieking for water as he collapsed in the boat. He had been 48 hours on a rough sea in a bad storm with a hatch cover for support. He had been maddened by fear of sharks and by the lost chances of rescue. As he lay on a pallet after he found himself able to talk again, his rescuers spoke of his wonderful endurance. He said, of course, he had done the best he could. He wanted to live, he said.

RADIUM AND IODINE TO CURE

Remarkable Results With Consumption Are Claimed for Preparation of Hungarian Doctor.

Paris.—A new treatment for tuberculosis, for which is claimed unusual efficiency, was described to the International Tuberculosis society and Therapeutic society here by the eminent tuberculosis specialists, Bernhein and Dieupart.

The specific employed is a preparation of radio-active menthol and iodine. It was discovered by Doctor Dessendeffy at Budapest. The composition of the preparation is peptonized iodine, 0.05 centigrams, and of radium bariumchloride, one-tenth of a drop, in a gallon of ether.

Experiments on animals were so encouraging that careful experiments on humans were tried. After ten injections, in one case, almost all the distressing symptoms ceased. Bernheim and Dieupart detail 75 cases.

Grizzlies Flee From Fire

Grazing District of Oregon Overrun By Bears Driven From Homes by Last Year's Fires.

Portland, Ore.—One effect of the forest fires which swept great areas last year has been to drive a lot of grizzly bears from their former feeding grounds and make them a menace to stock. Many reports have been received here recently of the depredations of these big animals on the east slope of the Cascade mountains, and preparations are being made to hunt them down.

The Cascade mountains have never been known as the haunt of the grizzlies. In the Blue mountains, about 260 miles to the east, however, the animals have been known to be fairly plentiful.

Great areas of the Blue mountains and near-by ridges were burned over in the great forest fires of last year, and so that spring the grizzlies did not find the supplies of food to which they had been accustomed. It is believed that they then wandered across the valleys to the range nearer the crest. Here they also found insufficient supplies, and so they have turned on the stock which ranges the east slope of the Cascades.

Berry Hickson, an old-time woodsman of the Upper McKenzie river, had a great surprise recently when he set out on an expedition into the Cascades. In the middle of one night several bears brought down one of his pack mules and ate it. He had to guard the others on succeeding nights, and with difficulty got out of the country with any of them. He has also suffered losses in stock, and will join with other hunters in going after this big game.

Percy—Does Algy's new suit fit him? Chollie—No, bah Jove! The trousers pockets are too small to hold his hands.—Harper's Bazar.

Bass Killing Off Salmon

Fish Imported Into Pacific Ocean Waters Threaten Great Canning Industry—Feast on Young.

Seattle, Wash.—Men engaged in the salmon industry in this state and Oregon are vastly excited over the discovery that their livelihood is threatened by the ravages of bass. There is a demand that immediate measures be taken to exterminate the latter fish.

It was only a few years ago when in response to the agitation of sportsmen and others who wanted more variety in fish, bass fry were imported in large quantities and were planted in various inland waters and the rivers. It appears that they have multiplied at an astonishing rate and at the beginning of the season they were reported to be very plentiful. Recently the salmon men made the discovery that bass devoured them. The bass [illegible]

John M. Crawford, superintendent of the fish hatcheries of Washington state, tells of the ravages he has observed. The hatcheries he conducts are of great importance to the industry. They were started because it was discovered that the trout played havoc with the young salmon. In big ponds the fry are hatched and millions of salmon are guarded until they are about three inches long, a size sufficient to permit them to escape the trout. This plan has proved effective for years.

"We can rear the salmon large enough to get away from the trout," says Mr. Crawford, "but not the bass. When you think that a bass can eat a salmon four inches long or even larger you can see how utterly impossible it is to keep the fish in the ponds until they are of sufficient size to care for themselves against the [illegible] into the Kalama river, from which they make their way down to the Columbia. We have found that the bass are lying in wait for them and gobbling them as they appear."

He advocates the prohibition by law under heavy penalties of any further planting of bass in the waters of the state, an open season for this fish all the year round and stringent measures to destroy them. Unless something is done he thinks it will be only a few years before the salmon industry will be seriously crippled. He would also bar pickerel, pike and perch.

New Customs Tangle.

New York.—The stork visited James Croft's Pomeranian spaniel on the dock and customs inspectors promptly assessed an import tax on the pups. Craft appealed and there's a new customs tangle.

WIN'S HAYMAKING

By BELLE MANIATES

(Copyright, 1911, by Associated Literary Press.)

It was twilight when Win drove down to the station to see Katherine off. They had been playmates, schoolmates, sweethearts, and this was their first separation. Katherine was going to pay a visit to some rich relatives in the city, and Win was manfully struggling to sympathize with her feeling of joy at "getting out of her shell and seeing the world."

The raucous voice of the conductor shouted the "all aboard," the bell clanged like a knell on Win's ears, and then the train pulled out with Katherine waving a cheery farewell.

He drove home by the light of the harvest moon, the reins listlessly sagging on the broad back of the farm-horse. When he had unharnessed, he went to his old favorite haunt on the river bank in the woods, his "thinking out" place.

Katherine was bright and progressive. He must try to keep pace. He would bridge over the coming six months by going away to study new methods of farming that he might put under scientific culture the 80 acres his grandfather had left him. He put this plan into immediate execution, and went to an agricultural college for a short special course.

Then, when his next holidays came, he could not resist a flying visit to the city where Katherine was visiting. Without notifying her of his coming he appeared suddenly and unannounced before her as she sat, beautiful and bewitching, the center of a coterie of admirers in a fashionable drawing room.

She had not been communicative in her letters which had revealed to him no conception of her environment. He felt ill at ease and tongue-tied when he was ushered into this maze of brilliance.

"Oh, Win!" cried Katherine, more in astonishment, he thought, than in pleasure. She quickly rose to the occasion, presenting him to her aunt and friends, as "The man from home."

They were languid and politely patronizing, and Win replied in constrained monosyllables to their overtures. Katherine did not come to his rescue, but addressed her conversation for the most part to the others. His call was not prolonged. When he rose to depart, she went with him to the door.

A Soft Footfall.

"Come again, Win—tomorrow," she said in a low tone.

But he went from the house to the station and returned to college to plunge deeper into the study of farming.

Soon there came a little note from Katherine reproaching him for not having called again. In his delayed answer he made no reference to his call. Their letters grew shorter and of less frequent duration until they ceased altogether.

He returned home in time for spring planting and sought solace in plow and furrows. Katherine did not return until haying time. The next day after her arrival there was a country picnic given to welcome her home.

Win's father, mother and sisters went in the old carryall, waving a merry though quizzical farewell to the tall, lithe young farmer standing alone on the porch. He had offered as an excuse for his non-attendance that he feared he would not get his hay in before it rained.

"Rain out of a clear sky!" scoffed his youngest sister.

"That is when it is most liable to come," he replied.

They all laughed as they drove away, but the mother-heart was wise and understanding. She gave a yearning, backward glance at her favorite [illegible]

turned to the field and worked dispiritedly until he could endure no longer the sweet memories that came with the upturning of the new-mown hay. He went back to the house, ate the cold luncheon laid out for him, and then sought his old retreat on the river bank. How many battles he had fought in this spot! How often had Katherine come here with him and to him!

He told himself fiercely that it was time to crush out these old memories. A soft footfall—he looked up and saw her standing before him.

"And if the rain could come," she said archly, "out of a clear, blue sky, as it always does, what would become of the hay?"

"This is my noon hour. I was just going back to the fields," he said lamely.

She sat down on the big stone where she had been wont to sit. He made a swift, comprehensive survey of her. She looked younger than she had looked when he saw her in the city.

"I came here," she said, "for a glimpse of the old house."

This was the longest way to the house. He advised her, if she had come by the river, to row a little farther to the next bend where she could have an unobstructed view.

"You seem anxious to be rid of me," she said deprecatingly, "but then you always did prefer to be alone—in this place."

"You know better," he cried. "You know how we came here together, and that is why the place is so dear to me—or was until you went away and changed everything."

"Win," she said gently after a moment's pause, "in the old days when we came here, we never quarrelled. If there was a misunderstanding, we talked it over."

"Well," he said, the words coming with an effort, "what is your side?"

"Win, do you remember, I wonder, what friends we were, and how I told you over and over that this visit of mine was to make no difference in me—in us?"

"Yes, I remember," he admitted sullenly.

"When I came home last night I looked in vain for you. Everyone I used to know came to my picnic save you—you who stayed at home 'to get in hay!' Do you think that was nice?"

His lips made a straight line. "Is it my turn now?" he asked.

"Just one question, Win: why didn't you come to see me last winter in the city?"

"Then you have forgotten that I did call?"

"That call!" she said disdainfully. "In a drawingroom filled with artificial people, and my aunt burning with curiosity to learn our relations, and every one watching. Did that count? That was why I asked you to come again when we would be alone."

His mask of constraint lifted.

"Oh, no!" she cried at the thought in his eyes. "You couldn't have thought that! That I had forgotten—that I didn't care! How could I be natural before them all! I was overcome by the thought of old times when you appeared so unexpectedly and I was scarcely conscious what I said. I thought you understood and would call again. I was afraid I would let them all see that—"

His heart was doubling its beats, his thoughts running riot.

"You say, Kathie—you would let them all know—what, dear?"

"Win," she said tremulously, "you must not make me say it first."

"Katherine, I have said it all my life. You know I love you?"

"And I knew that night when you came in among them all that I loved you—and Win, I never could write a letter."

America's Baptism.

The world now will take it for granted that the United States officially acknowledges the claims of St. Die, France, to its important part in the honor of naming America. Much has been written of St. Die's boast of this distinction. The romantic story long has been heralded before the world and always with a glamor that is more or less associated with fanciful tradition. The fete which was planned long in advance by the enthusiastic French people attracted world-wide attention. Its celebration with the American ambassador and the French minister of the colonies as the honor guests added to the dignity of St. Die's claims. It was made the occasion for reciprocal felicitations between America and France and the old-time friendliness between the two nations was recalled while the world was given to understand that St. Die [illegible]

CALL FOR REPUBLICAN STATE CONVENTION

Whereas, pursuant to the provisions of the Enabling Act and the resolution admitting New Mexico into the Sisterhood of States, the Governor of New Mexico has issued his proclamation ordering an election to be held on Tuesday, November 7, 1911, for the purpose of electing the various congressional legislative, judicial and county officers authorized by the constitution heretofore adopted by the people of New Mexico;

Now, Therefore, pursuant to and in accordance with resolutions adopted by the Republican Central Committee of New Mexico in convention assembled at Santa Fe, New Mexico, on Tuesday, September 5, 1911, a Call is hereby issued for the holding of the first Republican State Conventian in the City of Las Vegas, New Mexico, at 10 o'clock in the forenoon of Thursday, the 28th day September, A. D. 1911, for the purpose of nominating candidates for the various congressional and state offices created and authorized by law; and the Republican Central Committees of the various counties of the new State, except otherwise by this committee ordered, are requested to issue Call for the holding, upon such notice and date as they may deem expedient, county conventions for the purpose of electing delegates to said State Convention, at which the basis of representation shall be 1 delegate for each 100, or fraction thereof of 50 or more, of the votes cast for the Republican Candidate for delegate to Congress at the election of 1908, and 1 delegate at large from each county now in existence; upon which basis the representation at said State Convention from the several counties of New Mexico shall be as follows:

Bernalillo	25
Chaves	10
Colfax	17
Curry	5
Dona Ana	13
Eddy	4
Grant	10
Guadalupe	11
Lincoln	9
Luna	3
McKinley	5
Mora	15
Otero	7
Quay	11
Rio Arriba	16
Roosevelt	7
Sandoval	10
San Juan	6
San Miguel	30
Santa Fe	17
Sierra	5
Socorro	17
Taos	13
Torrance	8
Union	14
Valencia	15
Total	303

It is recomended that in event the same delegates are not elected delegates to the judicial and legislative district conventions that the same basis be used in the election of such district delegates and that such conventions shall be called and held, after the State Convention, at such time and place as may be agreed upon by the Chairmen of the Central Committees of the several counties composing the respective districts mentioned, or in default of agreement by a majority of the delegates elect to such district convention.

It is further recomended that the Republican County Conventions in and for the several counties, for the nomination of county officers, be held after the State Convention.

H. O. BURSUM, Chairman
JOSE D. SENA, Secretary.

LEGAL NOTICE

In the Matter of the Estate of Adrian D. Albro, Deceased }

TO ALL PERSONS WHOM IT MAY CONCERN, GREETING:

You and each of you are hereby notified that George A. Titsworth, has filed his Final Report as Administrator of the Estate of Adrian D. Albro with the Clerk of this Court, and that said Court has fixed the day for the passing on said report for the 13th day of November, A. D. 1911, at 2 o'clock p. m., of said day the same being at the regular November, A. D. 1911, Term of the Probate Court within and for Lincoln County New Mexico.

Now Therefore, You and each of you are hereby notified that any and all protests against the Final Report of George A. Titsworth, as Administrator of the Estate of Adrian D. Albro, deceased, must be filed with the Clerk of this Court on or before the 13th day of November, A. D. 1911, at 2 o'clock p. m., of said day the same being at the regular November A. D. 1911. Term of the Probate Court of Lincoln County, New Mexico, or the same will be barred, as the Court will take up and pass on and discharge said George A. Titsworth, as Administrator of said Estate on that date if no objection appears.

In Witness Whereof, I have hereunto set my hand and affixed the official Seal of the Probate Court of Lincoln County, New Mexico, this 6th day of September, A. D. 1911.

[SEAL] J. G. RIGGLE,
Clerk of the Probate Court, Lincoln County, New Mexico.
By O. T. Nye, Deputy.

LEGAL NOTICE

Proof of last will and Testament of Pas Torres, deceased.

To whom it may concern.:

Notice is hereby given that a paper purporting to be the last will and testament of Pas Torres, late of Lincoln County, New Mexico, deceased has been filed in the Probate Court of said County and that the same will be proven at the next regular term of said Court to be begun and held on the 13th day of November, in Carrizozo, New Mexico.

All persons having objections to the probating of said will and testament wil be heard at such time and place.

Given under my hand and the seal of the Probate Court of Lincoln County, New Mexico this Sixth day of September, 1911.

J. G. RIGGLE,
(SEAL) Probate Clerk,
By O. T. Nye, Deputy.
9-8-11

NOTICE

Department of the Territorial Engineer
No. of Application 592
Santa Fe, N. M., Aug. 3rd 1911.

NOTICE is hereby given that on the 3rd day of August 1911 in accordance with Section 20, Irrigation Law of 1907, ANTON BOROVANSKY of Oscura, County of Lincoln, Territory of New Mexico, made an application to the Territorial Engineer of New Mexico for a permit to appropriate from the Public Waters of the Territory of New Mexico.

Such appropriation is to be made from an Arroyo, not a stream, at a point in NW¼, S. 9, T. 10 S., R. 9 E. N. M. P. M. by means of diversion and .12 cu. ft. per sec. and or .12 acre feet is to be conveyed to Sec. 9, T. 10 S., R. 9 E., by means of storage works and canal and there used for irrigation of 25 acres.

The Territorial Engineer will take this application up for consideration on the 1st of November 1911, and all persons who may oppose the granting of the above application must file their objections substantiated with affidavits with the Territorial Engineer and copy with applicant on or before that date.

CHAS D. MILLER,
11-8-11t Territorial Engineer.

Good Jokes

A Qualified Acquaintance.

The fattest man in Manayunk was weighing himself a few days ago in the big market house in the suburb. A crowd of small boys gathered a short distance away from the scales and gazed at his girth with wondering eyes.

The fat man didn't like to be the center of interest, evidently, for he turned and said, grumpy:

"Hope you know me when you see me again."

As the boys took to their heels one of them hurled the parting shot:

"We will, mister, if some one doesn't stick a pin in you before we see you."

HE PROVED IT.

Casey—Whin I was passing your shanty last now that goat of yours nearly knocked the loife out o' me. Sure, he's not well bred.

Doolon—Maybe not, Casey, but he's a good butter, all right.

Unless Rechristened.

"Limburger cheese deodorized,"
Or if it hasn't been it will;
But limburger deodorized
It seems would be limburger still.

Properly Diagnosed.

Stranger—Doctor, I ache all over.

Doctor—Malaria, probably.

Stranger—And my head is all stuffed up and I have a tearing cough.

Doctor—A little cold along with it, I see. Take—

Stranger—And I just feel as if this world was a fraud and I'd like to throw that old moon at the sun and stuff all the stars down somebody's throat.

Doctor—You've got the grip.

With Emphasis.

Mistress (hastily sticking a finger into either ear)—"Kittie, for heaven's sake! What does that frightful noise and profanity in the kitchen mean?"

Kittie—"Oh, that's nothin', ma'am! It's only cook rejectin' a propos'l av marrij from the ashman!"

Poor Forethought.

Silicus—They met on a railroad train quite by accident, and in less than two months they were married.

Cynicus—That's what comes of neglecting to take out an accident policy.

Had No Warning.

Gibbs—Did you know your wife's first husband?

Dibs (with a sigh)—Yes; but he never put me onto his domestic affairs, confound him.

Drawing the Line.

"A woman should have a gentle, confiding nature."

"Yes, but it shouldn't be so great as to lead her to play bridge whist with strangers at a summer hotel."

Inclined to Be Formal.

"Madame, do you know that you nearly put my eye out with your umbrella?"

"How dare you speak to me, sir, without an introduction?"

Running Down Rumors.

"Do you think women would improve politics?"

"Well," replied Mr. Growser, "after listening to the conversation on the front porch I'll say this for them: If they ever start an investigation they'll find out something."

Intelligent.

Captain—Do you know anything about ships?

Raggy—Oh, yes! I've been a shipping clerk in a dry goods store for years.

Worse.

Ulysses—"The anarchists are planning a big demonstration down our way. Can't you spare us some cops?"

Chief—"Not a one. This is the night for the freshmen-sophomore banquet up at the college."

His Reason.

"You should have told him that he ... told a thief and dared ...

Unconventionalities.

"Well, I'll have to be going, Mrs Leeder; I'm tired of seeing you hold that sore-eyed poodle in your lap."

"I wish I had known that you have a flat in this apartment, Paxley, before it was too late for me to back out."

"Mr. Swearington, I'll have to recall that dinner invitation; we don't need you to make the fourteenth, after all."

"Yes, I was at home when you called the other day, Mrs. Whiggins, but I was reading and interesting book."

"I know well enough, old chap, that I am not lending you this money; I am just giving it to you."

"The moment you entered the room, Mrs. Akers, I knew you had been eating onions."

"No, Rivers, I don't read your stuff in the paper; I'm always tired out before I get around to it."

"Mr. Squibb, don't you think you have stayed about long enough for an evening call?"

A Delicate Position.

"Would you believe that I once took a prize which was offered for the most beautifully formed woman in the world, Mr. Smitherton?"

"Your question is rather embarrassing, Mrs. Gabbsley. If I told you that I believed you once won such a prize I should perhaps let it be understood that I had devoted special study to your outlines, and if, on the other hand, I were to say I did not believe you could ever have won a prize in a fine-shape contest you would doubtless regard me with disfavor. May I be permitted to avail myself of the scientist's privilege and answer yes or no?"

Looking Ahead.

"I see every man named George in England has chipped in to give a present to King George. There being so many Georges, they have raised a large sum.

"That makes me think," said Pa Hopload "Hadn't we better go slow about naming the baby Montmorency?"—Exchange.

HIS OPPORTUNITY.

Mr. Henpeck—You ought to be a landscape artist.

Mrs. Henpeck—Why?

Mr. Henpeck—You show such an aptness for making mountains out of molehills.

Men and Girls.

"Are men as black," she queried,
"As they are painted, do you think?"
In Yankee style I answered her:
"Are girls," I asked, "as pink?"

Waste of Time.

"Do you read the magazines?"

"No. I already have a safety razor and I can't afford to buy a motor car."

Not to Be Thought Of.

"What is the trouble, dear?"

"Charley Watson has just asked me to marry him."

"Well! Surely that isn't what makes you sad?"

"Oh, no! But I can't be a June bride now unless I wait a whole year, and if I asked Charley to do that he might die."

Exceptions.

"Soft words always please."

"Yet the average man is tickled to death if you call him a brick."

Suspicious Circumstances.

"The cashier of our bank sings in a church choir."

"Does he sing very loud?"

"Louder than anybody else."

"We'd better have his books examined at once."

Not Quite the Same.

"Cheer up," said the friend, condolingly, to the young M. D. on his first ...

VALUE OF DUST MULCH

Many Crops in Time of Drought Saved by Method.

Fertility of Soil, Although Absolutely Necessary, Is Not a Bit More Needed Than the Proper Amount of Moisture.

Ordinarily when one thinks of the conditions that are imperative to insure the production of a farm crop of any kind that may be grown, he thinks of the fertile soil as the most important of all. And it is, of course, absolutely necessary that a soil with abundant plant food be planted on to get a crop.

But the soil, or rather the plant food, although absolutely necessary, it is not a bit more so than the needed amount of moisture, says a writer in the Farm Progress.

Fortunately water is in sufficient supply, as a rule to make the ordinary crops on most of the arable land. Of course, in the arid regions the water supply is obtained from streams created mainly by melting snows, and as a rule, the irrigation companies know just about what water can be supplied, and the man who has a farm on which he can put water from an irrigation plant is far more certain of results than one who gets his water supply by the acts of Providence.

The irrigation farmer is therefore far more certain as to the outcome of his crops than those in the rain belt, who get little or much water, according to the rainfall.

The water supply is therefore the most uncertain and most important in the greater portion of the arable lands of this country. This is so well known that no farmer who has farmed on irrigated land, having an abundance of water, is willing to go back to the old method and put his dependence on "Providence."

It is a most important point to known whether, under normal conditions, farming in any humid section can be as safe, free from risk, and profitable as the business can be made when one can turn on the water as he needs without reference to rainfall.

I think that all farmers who have studied the water question in connection with crop making, will agree with me, that a great deal can be done to conserve the moisture from all natural sources, and that often a fairly good crop can be made by proper management.

It is hardly safe to say that the rainfall that is usual in the spring is sufficient to make a crop without more rain, but all observant men have learned that the rational conservation of moisture can often make good crops, when by the neglect of this, they will be certain to cause a failure.

This is a very important point, and in some seasons it is absolutely vital to the making of a fair crop. There is no mystery about this; the point to keep in mind is to prevent evaporation of the water from the soil.

It cannot be done entirely; much water will evaporate in spite of us, and much will go on down below the reach of plant roots; but in seasons or only ordinary drought it is possible to conserve enough moisture to make a fair crop of corn, tobacco, potatoes and other hoed crops.

The "dust mulch," or blanket of finely pulverized soil on the surface, say three to four inches deep, will stop the waste of water almost entirely. In fact, if the soil is kept stirred on the surface quite often, it may be truthfully said that all the moisture may be kept in the ground for the use of the crops.

Of course, we can never tell at the beginning of the season whether it is going to be a wet season or a dry one, but if a man cultivates with reference to keeping the moisture in the soil, it will be all the better in case of a very wet season, and it may be the salvation of the crop in case of severe drought. So it is wise to keep this in mind.

It is therefore very important for one to plant no more land than he can cultivate perfectly, and always in a dry season to keep the soil stirred to a depth of two or three inches. No matter whether the cultivation is actually needed or not, stirring as often as possible a few inches of the surface will stop the escape as absolutely as a cover of sheet iron.

Those who doubt this method of saving crops from suffering by drought should try this method thoroughly. It takes labor, but it may save the crops. I know from experience.

BARE FALLOW IN ARID REAS

Experiments at Indian Head Show Possible Yields That May Be Obtained on Fallow Land.

The experiments conducted at Indian Head, Sask., at the government experiment station, show in a very striking manner the possible yields that may be obtained from growing wheat on fallow land under dry conditions. The figures submitted below cover a period of 20 years. They are field returns, which are always smaller than returns from plats.

The period covered begins with 1891 and ends with 1910. The average yield of red fife spring wheat for the said period was 22.95 bushels. The average precipitation during the entire period was 13.09 inches annually. This, however, does not include the snowfall, hence so far the record is incomplete. But the snow fall at Indian Head is usually light.

In 1892 on a rainfall of 6.92 inches the yield was 28.20 bushels. In 1894 on a rainfall of 3.9 inches it was 17.5 bushels, and in 1899 on a rainfall of 9.44 inches the yield was 33.20 bushels.

During the same years the oat crop on summer fallowed land gave an average of 82.33 bushels per acre. During three of those years it went over the one hundred bushel mark. In 1903, on a rainfall of 15.55 inches, it was 119.2 bushels per acre. These facts are very striking. They show what may be expected in dry areas of the semi-arid northwest where the best of cultivation is given to the land. In 1892, on a rainfall of 6.92 inches, the yield was 51.6 bushels. In 1894 on a rainfall of 3.9 inches it was 24 bushels, and in 1899 on a rainfall of 9.44 inches it was 84 bushels.

It should be stated, however, that the returns in wheat were not exactly proportionate to the precipitation. In 1900, for instance, with a precipitation of 17.74 inches the yield of wheat was only 17.49 bushels, and in 1907 with a rainfall of 13.17 inches the yield was 18 bushels per acre. Other factors, therefore, play an important part in determining yields in dry areas.

It should also be borne in mind that the yields given relate to crops grown on summer fallow land. This would mean that a return of 16.48 bushels was the return for each year in wheat, and that 41.16 bushels was the return in oats. The one crop grown in two years would involve considerably less labor than two crops grown in the same period. The summer fallowing of the land also prevents it from becoming foul with weeds.

Cold Water to Replace Ice.

Where you have no ice for the dairy make liberal use of cold water from the well for cooling the milk. Milk should be cooled as quickly as possible after being drawn from the cow and then held at a low temperature.

Cutting Out the Old Wood.

The old fruiting wood on raspberries and blackberries should be cut out and burned immediately after harvest.

PREVENT LOSS OF MOISTURE

Evaporation in Month From Bare Stubble Fields Is Equal to Five Inches of Rainfall.

Loss of moisture from stubble fields left bare after harvest is each month equal to five inches of rainfall so long as there is moisture left to evaporate. Plowed ground left loose, neither harrowed nor packed will, in hot, windy weather, lose in 24 hours sufficient moisture to equal one inch of rainfall. Take Professor Tan Erok's experiences in the efficiency of moisture. The loss in a month from bare stubble fields of moisture is equal to five inches of rainfall and is a loss capable of producing ten bushels of wheat.

Stubble fields often lay bare two or three months after harvest, many growers thus losing each season sufficient moisture to double their yield of wheat.

Following the binder with the disk ... soil that checks evaporation. Made immediately after the grain is cut, there is no loss of moisture at all. Farmers short of teams can wait until the grain is cut and then can disk the ground around the shocks, or in the stubble following the header. This not only stops evaporation, but puts the ground in fine condition for plowing later on.

Moisture goes rapidly out of freshly plowed ground, left loose. Harrow attachments are made for the plows which pulverize the furrow as soon as it is made, creating a mulch on the freshly plowed surface that stops much of the evaporation. Some farmers take one section of a harrow, tie an extra horse to the plow team and let him draw the harrow over the fresh turned furrows. This is an economical method and the land gets harrowed two to four times. Other wheat growers unhitch from the plow before noon and then harrow what has been plowed, say up to 11 o'clock; following the same plan in the afternoon, so that each day's plowing ...

Plenty of Stability.

A western mining prospector was paying his first visit to New York.

"What do you think of it?" asked the proud Gothamite as he pointed out the skyscrapers.

"Well," replied the miner, "it looks like a permanent camp all right."—Success Magazine.

Important to Mothers.

THAT AWFUL BACKACHE

Cured by Lydia E. Pinkham's Vegetable Compound

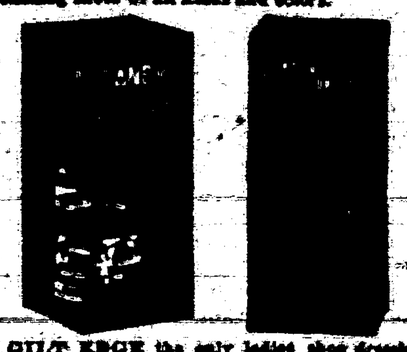
Morton's Gap, Kentucky.—"I suffered two years with female disorders, my health was very bad and I had a continual backache which was simply awful. I could not stand on my feet long enough to cook a meal's victuals without my back nearly killing me, and I would have such dragging sensations I could hardly bear it. I had soreness in each side, could not stand tight clothing, and was irregular. I was completely run down. On advice I took Lydia E. Pinkham's Vegetable Compound and Liver Pills and am enjoying good health. It is now more than two years and I have not had an ache or pain since. I do all my own work, washing and everything, and never have the backache any more. I think your medicine is grand and I praise it to all my neighbors. If you think my testimony will help others you may publish it."—Mrs. Ollie Woodall, Morton's Gap, Kentucky.

Backache is a symptom of organic weakness or derangement. If you have backache don't neglect it. To get permanent relief you must reach the root of the trouble. Nothing we know of will do this so surely as Lydia E. Pinkham's Compound.

Write to Mrs. Pinkham, at Lynn, Mass., for special advice. Your letter will be absolutely confidential, and the advice free.

Whittemore's Shoe Polishes

Finest in Quality. Largest in Variety. They meet every requirement for cleaning and polishing shoes of all kinds and colors.



GILT EDGE the only ladies' shoe dressing that positively contains Oil. Blacks and Polishes ladies' and children's boots and shoes, shines without rubbing. 25c. "French Gloss." 10c.

PASTE combination for cleaning and polishing all kinds of russet or tan shoes. 25c. "Star" size, 10c.

QUICK WHITE, makes dirty canvas shoes clean and white. In liquid form so it can be quickly and neatly applied. A sponge in every package, so always ready for use. Two sizes, 15 and 25 cents.

If your dealer does not keep the kind you want, send us his address and the price in stamps for a full size package.

Brentwood

Whittier Brought to Date.

Maud Muller had just refused the Judge.

"Marry a fellow who may lose his job any moment on the recall?" she sniffed. "Not much."

Herewith she smiled on a farmer instead.

What He Represented.

Mayor Gaynor, at a dinner in New York, was discussing a divorce commission that had been appointed in a neighboring state.

"But, sir," said a reformer, "I note a bachelor on this commission. What is the good of a bachelor on a divorce commission?"

"Oh," said Mayor Gaynor, smiling, "he represents the co-respondents."

Disagreeable.

"You don't get along very well with your mother-in-law, I hear," said a friend of a young husband.

"No, I don't," answered the bridegroom. "Nobody can. Even the food she eats doesn't agree with her. When she comes into the room everybody shuts up. The other day she got into a folding bed and the bed shut up."—Ladies Home Journal.

A Pleasure Trip.

Biliter (at servants) agency)—"Have you got a cook who will go to the country?"

Manager (calling out to girls in next room—"Is there anyone here who would like to spend a day in the country?"—Life.

A series of nine striking Rocky Mountain views in colors, put up in convenient folder form, with descriptions of some of the wonder places of the West, has just been issued by the Denver & Rio Grande Railroad. It bears the title, "Panoramic Views," and is printed on good paper with stipple effect, which reproduces most effectively the original water color paintings from which the illustrations were made.

Hard to Please.

Old Mr. Batch—What are you worrying about?

Young Mr. Nubride—A little question that came up at home. My wife wants to know if I'd marry again in case of her death, and if I say "Certainly not" she'll think I'm longing for my freedom, and if I say "Sure thing," she'll think I have her successor picked out.

HOMESEEKERS EXCURSION RATES TO TEXAS AND NEW MEXICO POINTS DURING 1911.

POULTRY

START WITH BUFF LEGHORNS

Much Easier and More Satisfactory Than Few Years Ago—Get Quality Rather Than Quantity.

Starting with Buff Leghorns now is much easier and more satisfactory than it was a few years ago. Now prominent breeders are getting as large a proportion of exhibition specimens from their matings as are the breeders of any variety and customers who are buying eggs get good value for the money they invest. Of course, one must be careful to buy from breeders who are producing fine birds, for breeders who are not breeding the quality that is winning at our prominent shows cannot supply it to their customers. After getting the eggs and hatching the chicks be sure to mark them all according to the breeding pen in which the eggs were laid; then when the chicks mature you will know their breeding.

When you pick out those which you are going to keep for your foundation stock, if you have only one male and one female that suit you, you had better use only those for the first year's breeding. It is not quantity that the beginner wants—it is quality. Next season select your best pullet and mate back to the old male and mate the yearling hen and the choicest one of the season's cockrels. These matings are reasonably sure to produce plenty of quality, if you buy the eggs from a breeder who has line bred his stock properly.

FOLDING COOP FOR CHICKENS

Ends and Sides Turn Down When Not Being Used—Of Great Convenience in Shipping to Market.

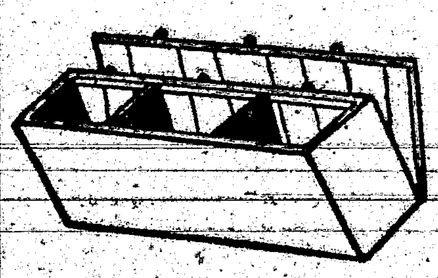
Now comes the collapsible chicken coop, designed by a Wisconsin man, and in view of the present mania for raising chickens it will probably interest a great many people. The sides and ends of the coop are hinged beneath the ends. When the receptacle is extended the sides form a support to the ends, and all are held firmly in the extended position by clips at the four corners. When the coop is collapsed, pins lock the folding parts and keeps them down. As will be readily understood, a coop of this kind will be a great convenience to the poultry farmer who ships his chickens to market or to a poultry store. After the live fowls have been disposed of a dozen of these improved receptacles can be folded up, tied in one bundle and shipped back to the place where they came from at small expense and no trouble. They are equally handy on the chicken farm.

Folding Chicken Coop.

DUMPING NESTS ARE HANDY

Bottom Arranged with Hinges So That It Will Drop and Contents Fall to the Floor.

A good way to build hens' nests is to have the bottom attached with hinges and fastened at the front with small hooks and staples. When the nests are to be cleaned the bottom



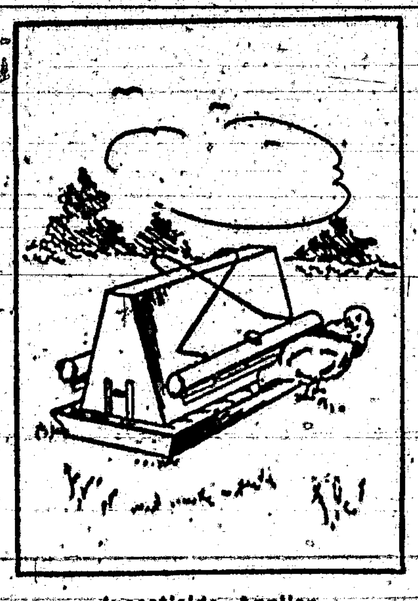
Dumping Hens' Nest.

can be dropped and all the contents will fall out. The nests should be at least twelve inches square, and for the large breed broods fifteen inches will be better.

USEFUL INSECTICIDE APPLIER

Apparatus Arranged to Make Application Automatic as Chicken Helps Itself to Water.

One of the most ingenious of the many sanitary appliances for use on poultry farms is the insecticide applying device shown in the illustration. It was designed by an Ohio man. On a large farm it is practically impossible to apply insect-destroying preparations for every fowl. The apparatus here makes this application automatically as the chicken drinks. A central support is placed in the water pan and two tubes are



Insecticide Applier.

suspended from the sides. A strip of flexible percolating material hangs down from each tube to a point close to the water. The tube is filled with liquid insecticide, which keeps this strip continually saturated. When a chicken wants a drink it has to push its head under the flap and both in this motion and by the action of withdrawing its head, the feathers on head and neck become soaked with the solution. As every fowl has to drink, none is missed in this treatment.

TO FORCE EARLY MOULTING

Fowls Should Be Confined for About Ten Days and Given About One-Quarter of Usual Ration.

To bring about early moulting, confine the fowls in their various quarters about August 1, and for ten days only allow them one-fourth of their usual rations. During this time they lose flesh and stop laying.

Then liberate and feed them all the corn, oats, peas, sunflower seed and wheat they will eat. This causes a rapid moult and the new feathers start at once. The hens soon recover from the process and begin to lay regularly about October 1.

The ration for laying hens should not be too heavy, but should be varied at frequent intervals. With your grain ration animal food such as ground flesh meat and bones, is essential. Some green food too must be given. Experiments at the New York station showed that the product of eggs from hens fed on corn meal was from 28 to 57 per cent. greater than from hens kept on a more nitrogenous ration.

POULTRY NOTES

Let the chicks have plenty of free range.

The young chicks should be kept growing.

To make chicks grow first give plenty of good fresh air; don't allow them to crowd.

Keep plenty of water fresh and clean for your poultry, and fight for lice and mites.

Much loss is suffered by poulterers from a failure to properly fatten their stock for market.

Fine gravel is not the proper grit for poultry. They want a sharp material with which to grind their feed.

Charcoal pounded fine and kept in the drinking pans will keep the young and old birds in good condition.

To keep a hen in good health she needs nearly seven times more fresh air in proportion to her size than does the horse.

Swelling of the head is frequently caused by a sharp draft on the fowl, from some small knothole or crack.

Grit must be provided for fowls, but the substance should be sharp and of size for poultry as for man or animals.

If the hens are expected to lay heavily during the winter, they must be cared for every month of the year, and fed more heavily as the fall months come on.

If you are in the thoroughbred poultry business, do not sell your cull stock alive. Dress it and see that the culls are not worked onto the market.

On Second Washing.

"I've just washed out a suit for my little boy—and now it seems too tight for him."

"He'll fit it all right, if you'll wash the boy."—Meggendorfer Blaetter.

The World's Favorite

LIPTON'S TEA

MINOR MENTION

—A. J Rolland, Carrizozo's popular druggist was in El Paso Sunday.

—A party of young men went to Red Lake Sun lay after Ducks

—Olden Norton was up from Oscuro with a load of fruit Tuesday.

Mr and Mrs. J. F. Kimbell went to El Paso Tuesday evening.

—L. E. Lumbley of Tularosa was here this week on business.

—Mounted Policeman Collier was in the city Wednesday evening.

—E. Gorden, master mechanic for the Southwestern, was here Wednesday.

—Attorney Hudspeth was down from White Oaks Wednesday evening

—F. B Shields, telephone assistant at Roswell, spent several day in the city this week.

—Joe Morgan, the Alamogordo stock man spent a couple days in the city this week.

—Mrs. J J Hollom of Alto was a visitor to the city early in the week.

—H. B. Hamilton spent a part of the week with his family in El Paso.

—Lincoln County still has 2,048,040 acres of land subject to entry under homestead and Desert, land acts.

—Joe Phillips of Alto has accepted a position with The Outlook and will also attend school in Carrizozo this winter.

—C. A. Martin, News-Editor of the El Paso Herald spent Tuesday in the city and was a pleasant caller at the Outlook office.

—L. C. Barlow of El Paso was in the city from Saturday until Wednesday, visiting White Oaks while here.

—The new lighting system at the Methodist Church will be used for the first time Sunday evening, all are invited to attend.

—Mrs. Lois McDonald and children of White Oaks returned Saturday evening from Michigan, they also visited New Orleans enroute home.

—Commissioner White was down Wednesday arranging for a special meeting of the Board which was held yesterday.

—A J. Rolland and George Spence returned Tuesday from the Jicarilla mountains where they had been doing assessment work on some iron claims.

—Dr. Guido Ranniger, Capt. D W. Roberts and A S Mayes, all of Oscuro were up Saturday and went over to the democratic central committee meeting that day at Capitan.

—Numerous improvements are being made to the interior arrangements of the Carrizozo Trading Company building which add greatly to the appearance of the store.

—A. D. Graham and John Rice of Parsons were in the city Monday transacting business and returned to their home by the way of White Oaks

—H. S. Campbell, with his family who have been in the east visiting relatives in Wisconsin and Illinois, returned to the city last Friday. Mr. Campbell was accompanied by a brother who will remain here.

—It is stated with authority that the next term of District Court for Lincoln County will be held in the middle of November. It will be the last term ever held with New Mexico as a territory.

—John H Canning was an Alamogordo business visitor Saturday and Sunday.—Public announcement has been made that he has been elected to the Presidentcy of the National Bank of Alamogorgo, taking the place of the late T. H. Anderson. Mr. Canning will not take active charge of the banks affairs until after October 1st, at the earlist.

—The Conventeon of the Republicans at Canitan next Wednesday will nominate Nine delegates to the State convention only. The convention to nominate county officers will take place early in October at the time and place set by the Central Committee which will meet after the Convention next Wednesday.

—LOST-Gold chain with cross attached, engraved "Julia" 1901. Liberal reward if returned to the Carrizozo Eating House.
