CAPITANS BIG MEET.

Good Roads Convention and Racing Tournament Were Well Attended.

MANY GO FROM CARRIZOZO.

The Good Roads Convention and Racing Tournament held at Capitan last Monday, Labor Day, turned out to be very successful. And while rain threatened to mar the sports of the day all the events were carried out as per schedule.

Carrizozo was Probably the best represented place, the regular train having been held until 9:30 here before leaving and about sixty persons filled the regular car and the caboose, which it was found necessary to attach to accommodate the crowd. Other parts of the county also furnished a good attendance and the town of Capitan was hardly able to accommodate the crowds.

The main race of the day was between Old Capitan, who has made quite a record in the state, owned by Sebe Gray, and W. M. Hughes, a horse owned by Lon Jenkins of Capitan. Capitan won the race with ease, going the half mile in fine shape. Many other races took place duting the afternoon, while the good roads convention was in session at the school house.

The minutes of the good roads meeting given below fully describe the events which took place at that convention. The meeting was very enthusiastic for good roads.

MINUTES OF MEETING.

The meeting was called to order by Hon. J. V. Tully, who, after stating the purpose of the convention, was unanimously elected chairman, and A. H. Harvey was elected secretary.

Upon motion duly seconded and carried the chairman appointed the following committees:

On Credentials—Dr. J. W. Laws, Precinct No. 1; W. E. Blanchard, Precinct No. 6; Dr. D S. Scott, Precinct No. 9; S M. Johnson, Precinct No. 10; Henry Emerson, Precinct No. 11; P. L. Krouse, Precinct No. 12: Lon Jenkins, Precinct No. 13; A. T. Roberts, Precinct No. 14, and Lee B. Chase, Precinct No. 15. The other precincts of the county not being represented as no delegates from those precincts were present.

On Permanent Organization and Order of Business—J M. Penfield, Precinct 1; W. E. Blanchard, Precinct 6; E. O. Johnson, Precinct 9; J. L. Poole, Precinct 10; Henry Emerson, Precinct 11; Fred Pfingsten, Precinct 12; G. C. Clements, Precinct 13; Charles A Stevens, Precinct 14; Lee B. Chase, Precinct 15.

Upon motion duly seconded and carried, the convention, after having considered and adopted the reports of committees, proceeded to elect nine men for recommendation to the Governor, from which to select three county road commissioners.

The following were duly elected:

First District, comprising Precincts 1, 2, 3, 4 and 6, Dr. J. W. Laws, Dr. T. W. Watson and Martin Chavez.

Second District comprising Precincts 5, 7, 8, 13 and 16, Lon Jenkins, T. M. Dubois and Paul Mayer.

Third District, comprising Precincts 9, 10, 11, 12, 14 and 15, H. S, Campbell, W. G Wells and Clement Hightower.

The following resolution was unanimously adopted by the convention:

Whereas, The proposition of bond issues for the building of good roads is a new proposition; and

Whereas, The appointment of a good roads commission will, naturally, more or less result in placing men in charge of the building of roads who have had little experience in general road building; and

Whereas, A proposition to vote on the issue of $500,000 by the state is now before the people and no doubt be adopted by a magnificent majority, which, it is understood, will give Lincoln county about $18,000 to be applied on roads; and

Whereas Our county levy for roads will give Lincoln county the additional sum of $10,000 to $12,000, making in the aggregate for the purpose of road building, in round numbers, $30,000;

Therefore, Be it Resolved by the Lincoln County Good Roads Association, in convention assembled, that it is the sense of this meeting that the County of Lincoln should not at this time consider the proposition of an issue of bonds to further augment the funds heretofore mentioned, but rather to await the expenditure of the funds that will most likely be derived from the State bond issue and the county road and bridge levy, aforesaid, and ascertain what results are to obtained from the expenditure of said sums of money.

Adjourned sine die.

J. V. TULLY,
Chairman.

A. H. HARVEY,
Secretary

Dated at Capitan, N. M., Sept. 3, 1912

PROBATE COURT IN SESSION.

Doroteo Lucero, probate judge of Lincoln county, with A. H. Harvey as clerk, held three days' session of Probate Court here commencing Tuesday. Several probate matters were disposed of before the judge.

SOMETHING FOR NOTHING IS WORTH WHILE—$8.00 worth of ware for nothing is worth your time to investigate. See our big add in this paper.

KELLEY & SONS.

COMMISSIONERS IN SESSION.

The Board of Commissioner met this week and have been examining the tax rolls of the county prepared by Assessor Henry Corn for acceptance. Mr Orvis Nye had a contract for much of the clerical work. The Commissioners accepted the rolls as prepared after careful examination.

HOME MISSION BAZAAR.

The Ladies of the Home Mission Society will hold a sale of 'Cooked Foods' in Carrizozo, Saturday, September 14th.

Does the word REPUTATION mean anything to you? Stop and think and figure and you will know why the MAJETTIC RANGE HAS THE REPUTATION of being not only the BEST but the LEAST EXPENSIVE. Let the MAN FROM THE FACTORY show you. See our big add in this paper.

KELLEY & SONS.

COMMENCED TUESDAY

Fair Enrollment first Days of School; the Fall Term is Now in Progress.

START NEW SCHOOL PAPER

The Carrizozo School opened in its various branches on Tuesday morning of this week, and the fall term has now settled down to steady work under a competent staff of instructors.

Professor Schreck who was principal last year is again in charge, having been employed by the School Board consisting of Messrs. Perry, Peters and Clarence Spence. The enrollment so far is 173 pupils and more are expected to enroll in the near future.

The enrollement by grades is as follows:

1st Grade, Miss Covington	30
2nd and 3rd Grade, Mrs. Massie	44
4th and 5th Grade, Miss Humphrey	42
6th and 7th Grade, Miss Carson	31
8th Grade and High School, Prof. Schreck and Miss Spellman	20
Total	173

NEW SCHOOL PAPER

A six page, three column school paper, known as the Lincoln County School Review has made its initial appearance this week from the press of the Outlook. The paper is at this time edited by Prof. Schreck and Mrs Wallace Gumm, superintendent of county schools, and Miss Mildred Peters is attending to the advertising end of the proposition. The paper is to be published monthly in the interest of all the schools of the county and the work of organizing a general staff from throughout the county is in progress. It is hoped that all those interested in the schools throughout the county will take a hand and make the paper a success.

CAPITAN LOCALS.

The Democratic convention was in session here last Saturday, which was attended by a number of persons from throughout the country.

Heavy rains fell here last Saturday evening

School opened for the year on Tuesday morning, September 2nd, with good attendance.

Ernest Burrell has been seriously ill but is improving daily.

Mrs. Craddock and mother of the Baca settlement have moved to town. Mrs. Craddock will assist Professor James in teaching here this year.

Mrs. Viola May has been on the sick list.

Rev. Price is on the sick list.

CIVIC LEAGUE MEETING.

The Ladies of the Civic League will hold a special business session next Tuesday at 2 o'clock sharp. The meeting is of especial importance owing to a complication arising over the buying of the several lights the ladies intend installing throughout the town. Every member is urgently requested to be present.

REPUBLICAN CONVENTION

The republican county convention will convene in Capitan tomorrow to name eight delegates to represent this county at the State convention which is to be held at Albuquerque on the 12th of September, when a nomination will be made for congressman and for three presidential electors.

The Carrizozo primary held Saturday evening named Geo. Spence, Chas. Stevens, H B Hamilton and Arthhur Holland as delegates from this precinct.

PLAN BIG TOURNAMENT.

The people of Carrizozo are perfecting plans for a two days carnival to be held in this city the later part of September. The dates Friday and Saturday, 27 and 28, have been suggested but not officially agreed upon. It is proposed to raise several hundred dollars for prizes for horse races, foot races and contests. Two base ball games will be scheduled to beplayed one on the morning of each day. The baseball grounds, with the grand stand are suggested as the place for the holding of all of the games and a dance will be given each evening at the Peoples Building. On Saturday a big Barbecue will be donated and several have all ready agreed to donate beef for that occasion. The plans for the affair have not been perfected but will be made public soon.

THREE RIVERS LOCALS

H. S Scheffey left Saturday on a business trip to High Rolls.

J. O. Nabours, Jr. left Sat for Mesilla Park where he will continue his school work in the State Colleg

William Durbrow, Jr., was up from High Rolls the latter part of last weak and was accompanied on his return trip by W. S. Rohn who spent a few days, returning Monday.

Mrs. Adilee Calfee of the I-X ranch entertained a few friends Thursday evening in honor of Mrs. Margaret Givens of El Paso who is visiting her. Those in attendance from here were: Miss Rachel Harper, Messrs James and David Harper, Lee Goats and Edward Swarts.

F. M. Gooden came over from Oscuro Monday returning the same day. Mr. and Mrs. Goodin have just returned from a months visit in California.

School opened Monday at Salinas with Miss Fredrica Greenburg as teacher.

CARRIZOZO TRADING CO.

SOLOMON LUNA DIES.

Rancher Who Was Richest Man in New Mexico, Found Dead.

BODY FOUND IN DIPPING VAT.

Solomon Luna, for sixteen years past Republican National Committeeman from New Mexico, the largest individual owner of sheep in the Southwest, and the State's richest citizen, was found dead at 6 o'clock last Friday morning at his ranch on the St Augustine plains, seventy five miles west of Magdalena, Socorro county. The body was discovered in a sheep dipping vat and was so badly burned in the lime solution as to be almost unrecognizable. The coroner's inquest showed Mr. Luna's death to have been purely accidental.

In Mr. Luna's death the state loses its most prominent citizen and the Republican party a strong leader. He was born October 18 1858, at Las Lunas, being a descendant of the famous Luna family of Spain. He was universally respected.

PROCEEDINGS OF THE BOARD

Of County Commissioners of Lincoln County, New Mexico, at a special meeting held in the temporary Court House in the Exchange Bank building, Carrizozo, N. M., Sept. 3, 1912,

Convened at 9 o'clock a. m. with the following present: Hon. Melvin Franks, Chairman; R A Duran and W. M. Ferguson, members. A. T. Roberts, deputy sheriff; A. H. Harvey, clerk.

The following appointments of of Registration Boards were made:

Precinct No 1—L. H. Dow, E. W. Hulbert, Sam Farmer,

Precinct No. 2—Leopoldo Gonzales, Robert Brady, Doyle Murray.

Precinct No. 3—Joe Long, Leopoldo Pacheco, Higinio Sanchez.

Precinct No. 4—Geo. Kimbrell, P. D Southworth, Joe Tully.

Precinct No 5—Felix Perea, Apolonia Romero, Augustin Chavez.

Precinct No. 6—Jas. Lafferty, Daniel Vigil, Higinio Samora.

Precinct No. 7—C. L. Kennedy, M D. Guebara, Ed Haskins.

Precinct No 8—R. H. Taylor, Paul Mayer, Bautista Telles.

Precinct No. 9—Henry Silva, Clement Hightower, Robert Haney.

Precinct No. 10—A J. Gilmore, George Coe, Jose M. Montoya.

Precinct No. 11—W R. White, R. C Skinner, Tom Henley.

Precinct No. 12—T. J. Grafton, Fred Pfingsten, John Stewart.

Precinct No. 13—B. F. Adams, T. M. Du Bois, H Herring.

Precinct No. 14—Jose Lopez, Brent Paden, T. E. Kelley.

Precinct No. 15—Joseph Ashford, A. S. Mayes, John H. Boyd.

Precinct No. 16—Sam Wood, J. E. Wilson, Ed F. Conroy.

In the matter of the petition of certain citizens of Precinct No. 3, the Board having considered same, approves said petition and appoints E. E. Johnson constable for Precinct No. 3, to fill the vacancy made by the resignation of Manuel Romero.

The County Assessor, Henry M. Corn, appeared before the Board and submitted the tax rolls for Lincoln County for the year 1912, and the Board after having considered the said tax rolls, approved the same.

"Cut out this coupon and present it at the CARRIZOZO TRADING COMPANY STORE and they will exchange it for 25 votes in the $400 Piano contest."

CARRIZOZO OUTLOOK

Lee B. Chase, Editor and Publisher.

CARRIZOZO - NEW MEXICO

Switch your order to buttermilk and keep cool.

The demon of the air is busy these days reaping his gruesome harvest.

The man who doesn't worry is generally a man with nothing to worry about.

This season's most popular song seems to be just as inane as its predecessors.

Notwithstanding their heavy fur coats, the bears are active on the stock exchange.

This would be a happy, happy world if garden truck could be raised as easily as dandelions.

If thy tight collar grievously afflicteth thy neck, take it off. Why should the spirit of mortal be proud?

During the heated term, however, it is perfectly safe to indulge in light exercise, such as swatting flies.

New York is booming itself as a summer resort and here and there we understand people are falling for it.

The new flag of forty-eight stars points with pride, confounding superstition, to the fact that it started with thirteen.

Excitable people should not talk politics during the hot weather. There will be cool days for that sort of thing presently.

Newport lately had a lobster famine, from which it appears that the rich also have their share of the sufferings of life.

Speaking of family tangles, the Ohio man who married his son's widow now knows how it feels to be his wife's father-in-law.

Perhaps Rudyard Kipling's latest magazine story was worth a dollar a word, but personally we would rather have the $5,000.

A medical authority informs us that there are only 146 lepers in the United States, but in the matter of leprosy, a little goes a long way.

A historian breaks into print with the claim that the liberty bell is a fake. All of which goes to show how easy it is to break into print.

The New York police department has been enlisted in the fly-swatting campaign. Now every member of the force can boast that he is a fly cop.

A foreign count now visiting this country says that he has found only one real gentleman in the United States. How much does he owe him?

Burglars broke into a London jail and stole the warden's money from his office desk. After this, it is not quite fair to say the British have no sense of humor.

The death rate of New York has been reduced one-half since 1866. But then most of the visitors in New York manage to get back home before they die.

People who have waited to buy a flag until all the stars were on may spend their money without hesitation now. The 1912 model is likely to stand for a good many years.

A man in Germany was sent to jail for turning the face of a bust of the emperor to the wall. The lese majeste business, which languished for awhile, must be looking up.

Why go away for the summer when there is a perfectly good one at home?

What is the connection between holidays and accidents? Is it that things are rushed or because the holiday spirit is a reckless one?

A modern Trilby breaks into print with the claim that she can be hypnotized into singing like a grand opera star. Why not make her debut before an audience of marines?

One professional aviator has given up his dangerous pursuit to win a bride. Naturally enough, his prospective wife did not like the idea of a husband always up in the air.

The pedestrian may be weary and worn with the heat, but the motor car pursues him with all its old time ferocity. We yearn for the sight of a motor car overcome by a sunstroke.

A fisherman claims that he has caught a catfish 121 years old in the Mississippi. Ordinary fishermen procrastinate about the weight of their catch, but this angler has originality.

GOOD JOKES

REAL OPTIMISM.

"What a grand old world this is! Have you ever seen a more perfect day than this?"

"Has your salary been raised?"

"No."

"New boy at your house?"

"Oh, no, nothing like that."

"Perhaps you have received word that you are heir to a fortune?"

"Nothing of that kind has happened to me."

"Perhaps you have written a play that somebody has accepted for production?"

"I'm not a writer. Why do you make such a suggestion?"

"I'm just trying to figure out why you think the world is so grand and the day so beautiful."

"Oh, you're one of those who can't understand why one may be optimistic without having some material reason for it, eh? By the way, I've just sold my house for $2,500 more than I paid for it eight months ago."

Explanatory.

"Mrs. Twickham can read one of the most learned papers before her literary society you ever heard."

"Pshaw! Everybody knows Mrs. Twickham hasn't a thimbleful of brains."

"I'm not talking about her brains. I said she could read a very learned paper before her literary society, and so she can. Professor Twickham writes all her essays."

A Lifter.

"Of course," said the energetic campaigner, "you understand that I am for the uplift of the people."

"Yes," replied the blunt citizen. "But I'm not sure you don't regard the people somewhat as you do the elevator man. He is always going back and forth to uplift somebody, but he never gets a chance to get off anywhere on his own account."

SLIGHT MISTAKE.

Guest (in cheap restaurant)—Here, waiter, this napkin is dirty.

Waiter—Beg pardon, sir. It merely got folded the wrong way, sir.

Ma Goose Revised.

Jack Spratt could fry no fat
When the convention met.
His friends agree 'tis likely he
Will not an office get.

Further Instructions.

Judge (to jury)——Have you agreed upon a verdict? Is the prisoner guilty or not guilty of theft, as charged the indictment?

Foreman—We have not yet reached a verdict, your honor. I missed my pocketbook in the night and I would respectfully ask that each juror be searched.

That's So!

"All the tramps that come into this town are arrested."

"Then they are like bees."

"Where's the comparison? Bees are industrious."

"They are like bees because they fill cells."

Three Are Costly.

Griggs—So you're going in for yachting this summer because it's not so expensive as automobiling.

Briggs—Yes; a yacht can stand on a tack and there's no tire punctured.

Just One Guess.

"It seems to me that the man who permits himself to think baseball and talk baseball all the time must be weak minded."

"The team that's representin' your home town this year is makin' a poor showin', eh?"

Its Fundamental Weakness.

"I wonder if the country will entertain this idea of a third party?"

"Well, as far as entertaining goes, you know the old saying—two's a company, three's a crowd."

Tried 'Em All.

The busy housewife who believes that plenty of hard work never hurts anybody was laid up with a bad cold when her maid left, so she asked her husband to go down to the registry office about another.

He started at ten o'clock in the morning and returned at three worn and tired.

"What's the matter, my love?" asked the wife solicitously as he sank into a chair beside her bed. "Were there no servants at the office?"

"Yes, heaps of 'em," replied he, with a groan; "but, unfortunately, they'd all worked for us before!"—Answers.

THE REASON FOR IT.

He—It's strange you members of the Vassar alumnae don't hold class reunions.

She—Not at all. You may as well ask a woman her age as to ask her to acknowledge what year she graduated in.

Leader of the Never Worrys.

At a railway station an anxious woman, encumbered with numerous bags and packages, made so many inquiries of one of the officials that he turned to the ticket agent with the question:

"Who is that woman who has bothered me twenty times in the last five minutes for fear her train will get away without her?"

"She's heading a party of delegates going to a meeting of the American League of Never Worry Clubs," replied the ticket man.

The C. G.

The chorus girl
"Works" every night
And has an awful
Appetite.

He Didn't Like Either.

"John, we must go back home instantly."

"There you go. Can't we start for a couple of days in the country without you worrying?"

"But we have come off and left the cat and the parrot with nothing to eat."

"Don't let that bother you. Maybe the cat will eat the parrot."

A Natural Mistake.

"What a magnificent row of chrysanthemums just above the hedge yonder."

"Laws, ma, them's the heads of the football players sitting just back of the hedge on a bench."

Halting at a Formality.

"Is your wife going into active politics?"

"I don't think so," replied Mr. Meekton. "I don't believe anything could induce her to take that new $50 hat of hers and throw it into the ring."

He Is Not Sure.

"John, am I all right for the theater?"

"My dear, I hardly know what you consider all right. You have a dab of powder on each ear, but none on the top of your nose."

Some Scruples Left.

His Kinsman—So you uns are goin' into the next state where the law can't touch yer, hey?

The Outlaw—Yep! But understand, we ain't goin' t' incorporate over there. We ain't that crooked!—Puck.

A Wide Brim.

The lady wasn't what you would call pretty.

"Why do you think this hat is becoming?" she demanded.

"Well, my dear," responded her diplomatic husband, "it covers up most of your face."

A Mistake.

"Don't tell that amateur detective that your wife has a soft, low voice."

"Great Scott! Why not?"

"Because he will begin to suspect there is a speak-easy in the house."

WARM WEATHER FOOD

LIGHT, APPETIZING REPASTS FOR THE HOT DAYS.

All Kinds of Delicious Salads That May Be Easily Prepared and Are Inexpensive—Stuffing for the Tomatoes.

As soon as the really warm weather comes in housekeepers are on the watch for anything that will be a change, or tend to tempt the appetites of those in her family.

Elaborate dishes requiring time and skill, to say nothing of their cost, she will pass by, but simple, inexpensive additions to the daily menu are sure to be welcomed, writes Elizabeth Lee in the Chicago Daily News. For instance, a salad made from toast and hard boiled eggs is not as well known as it should be.

To prepare it stale bread is toasted a light brown. The crusts are cut away and the square cut diagonally. One-half is piled with the grated yolk of egg, the other with the white finely chopped. The two are placed together and laid upon them may be boned sardine, a little salmon, lobster, or any fish at hand, covering with mayonnaise. The toast is transferred to a crisp leaf of lettuce.

As most housekeepers keep mayonnaise on hand this dish is quickly prepared, and at very little cost, too. For lunch this makes quite a substantial meal. Those who like peppers will find a sprinkling of the green shells both attractive and tasty.

Another inexpensive salad quickly prepared is made by mixing two ten-cent squares of cream cheese with enough cream or milk to form a paste. To this is added a small onion chopped fine, a half cup of any kind of nuts chopped, and salt to taste. This is piled upon lettuce leaves, each one garnished with a sprig of parsley.

In making chicken salad if one runs short of the meat a nice way of helping out is to inclose the salad in a ring of ham jelly. You make just a plain jelly with the gelatin slightly salt, and when almost cold beat in a little cream or the white of an egg and a half-cup of potted ham. Place in ring shape upon the dish and fill with the chicken salad, when you will have a most delicious and attractive looking salad.

Any bits of food left over in the ice box can be used up to make a stuffing of tomatoes. The insides of the tomato is taken out and mixed with almost anything at hand. I have tasted the combination of rice, a few nuts, a hard boiled egg, a sprig of parsley, and a tablespoonful of chopped parsley as a filling and found it very appetizing. Salt and pepper to taste are added and then the tomatoes are filled. They can be baked in the oven or put on the ice to chill just as one prefers the raw or cooked food. Both ways taste good.

Hominy Drop Cakes.

One pint of fresh boiled hominy (cold may be used and, if the latter, break into grains as lightly as possible, with a fork and heat in a double boiler without adding water); one tablespoon of water, two eggs, whites and yolks beaten separately. Stir the yolks into the hominy first, then the whites; add a teaspoon of salt, if not already salted; if so, half the amount. Drop by spoonfuls on well buttered tin sheets or pan and bake to a good brown in a quick oven.

Artichokes a la Polvrade.

Take 4 or 5 young artichokes, trim them, remove the chokes, cut off the lower leaves, divide the artichokes into fours, throw them in vinegar and cold water to preserve the color. When wanted drain them from the vinegar and water, put them into a dish and serve like radishes. Pepper, salt, oil and vinegar should be sent to table with them, sufficient for a small side dish.

Green Peas Waffles.

Boil the peas until tender or use left over peas; drain until very dry, then mash the pulp through a strainer; pour a cup of boiling milk into a cup of strained peas, adding a generous tablespoon of butter, one of sugar and a half a teaspoon of salt. When the mixture cools add two eggs, yolks and whites beaten separately; two teaspoons baking powder, sifted with a full cup of flour. If too thin add more flour. Bake in buttered waffle irons; sprinkle with powdered sugar and serve hot with maple syrup.

Sugar Pie.

One teacup sweet milk, one and one-half cups sugar, not quite half-cup flour or cornstarch, one teaspoonful of vanilla flavoring. This will make filling for one pie baked in large pie tin. Bake without top crust.

Blueberry Pudding.

Place slices of buttered bread in pudding dish, pour over hot stewed berries, sweetened, and have plenty of the sauce, as the bread will absorb. Let get cold, and dot top with whipped cream.

MEAL time—Eager children! Hungry grown-ups—Keen appetites to be appeased — And Libby's Sliced Dried Beef.

Creamed or plain it makes a dandy dish. It's easy to prepare—supreme in quality, and costs no more than ordinary kinds.

BEYOND LIMIT OF PATIENCE

Uses of the Telephone Will Be Apt to Condone Mr. Busiman's Brief Loss of Temper.

He was just about exasperated with the telephone, was Mr. Busiman.

Ten times that morning he had tried to get on to a number, and each time something had prevented him from speaking. Either it was "number engaged," or the person he wanted to speak to was out, or else he had been suddenly cut off. At last he got through.

"Hallo!" said he. "Is Mr. X. there?"

"Yes," replied a voice. "Do you want to speak to him?"

That was the last straw. Back came the reply in icy tones:

"Oh, no! Nothing of the sort. I merely rung up to hand him a cigar!"

Rare Books for Harvard.

Harry Elkins Widener, who was lost on the Titanic, had a very, valuable collection of books, and these will go to Harvard university. His grandfather, P. A. B. Widener, will provide a building in which the books will be adequately housed. The collection includes a first folio Shakespeare, a copy of Shakespeare's poems in the original binding, and what is described as the finest collection in the world of Robert Louis Stevenson's works.

Education should give the child more capacity for doing work and helping itself to the good things of life. too many try to help themselves without performing any useful labor.

To The Last Mouthful

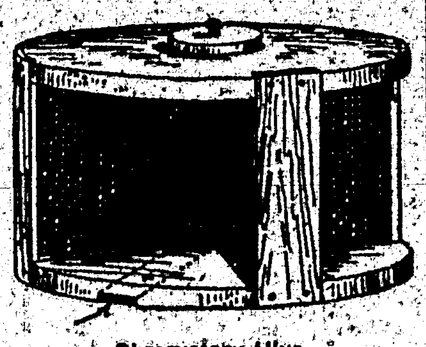
FARM AND BEE

OBSERVATORY HIVE IS NEW

All the Doings of Bees and Queen Can Be Watched—Found Quite Handy and Is Inexpensive.

My observatory hive consists of two circles of inch wood made exactly the same size, and with a three-inch hole cut out of the center of each, writes Walter Chitty in the Gleanings in Bee Culture. At the bottom of one of the circles a bee entrance is made which reaches as far as the center hole. The bees can run



Observatory Hive.

along to the center, and then ascend. Four pieces of wood, about three inches wide, are firmly fastened with screws, as shown, and three grooves are cut in each of these pieces, and corresponding grooves in the two large circles. The center grooves are for foundation, and the other grooves for glass. The foundation could be wired if desired; but if good thick foundation is used I find wiring is not necessary.

The hole at the top may be used for feeding or supering. Special supers could easily be made, another hive of the same sort put on top, or a bell-glass, as fancy dictates. I find this a very useful and handy hive for observation purposes, and the making and material are not at all expensive.

All the doings of the bees and queen can be seen; and to keep them in the dark I merely put corrugated paper around it, and keep the paper in its place with a piece of elastic. In winter time, three or four folds of paper could be used to keep the bees warm. These hives would do well for indoor observation, or in a beehouse.

MANY FAKES WITH BEES

Nonswarming Hives Are Delusion, Pure and Simple—"Shook Swarm" Plan Is Described.

Most of the so-called nonswarming hives are fakes pure and simple. The very last word on the subject is that of the "shook swarm" plan, that enables the beekeeper to swarm each hive artificially at his convenience and not that of the bees. This is the best method in vogue and is really very simple. Dr. D. Everett Lyon explains the process in the Farm and Home: When a hive gives evidence that it is thinking about swarming, as seen in the bees clustering on the outside of the hive and the presence of queen cells started in the brood nest, it is time to shake them.

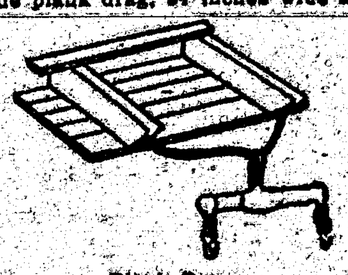
Take an empty hive with lid and bottom board in place and with the frames of the hive containing strips of foundation wax in place as full combs. Place the empty hive alongside the one about to swarm and then, lifting the brood frames from the old hive, shake off from each frame almost all the bees until all the frames have been so shaken in front of the new hive, being sure to shake the queen along with the bees.

Then set the old hive with its brood nest off some distance and put the new hive with the bees in its place.

COVERING ALFALFA IN CORN

Home-Made Device Shown in Illustration Found Quite Convenient in Southeastern Ohio.

Sometimes farmers obtain good results from sowing alfalfa between the rows of standing corn. Where this is done it is often a puzzle to get the seed properly covered. The accompanying illustration is a home-made plank drag, 24 inches wide and



Plank Drag.

12 inches long, that is used for a purpose on a small alfalfa and truck farm in southeastern Ohio, where the Ohio station has experimented in determining practical methods in small farming.

FIGHTING PESTS IN GARDENS

Larger Squash Bugs Found Harder to Control Than Other Insects—Treatment Differs.

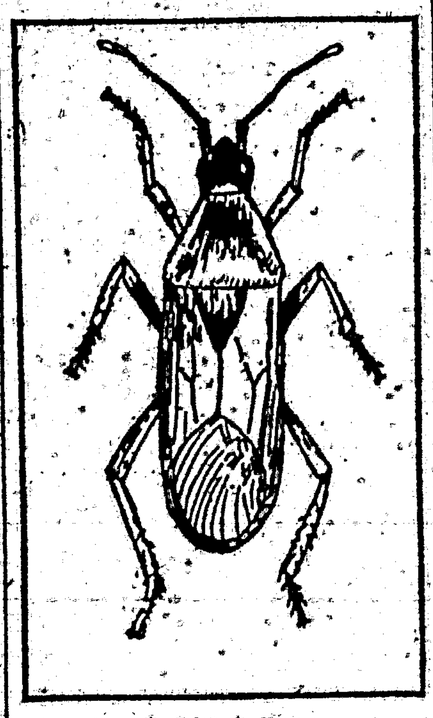
All of us are bothered more or less with injurious insect pests in the garden, and with dealing with them the first thing to be determined is whether they are chewing or sucking insects, whether they eat the leaf or extract its sap. There must be entirely different treatment employed in the two cases.

The chewing insects are comparatively easy to get rid of, unless they are working on the foliage, which will be injured by the application of a poison strong enough to kill the insects.

The sucking insects insert their bills through the skin of the leaf or stem that they are feeding on, so as to extract the juice, therefore no matter how much poison is applied to the surface, the insects get none of it.

For the striped beetle, which is destructive to squash, cucumber and melon vines, a slight application of lime, tobacco dust, plaster, or ashes, will be found a good preventive, and will also drive away those which may have already appeared. Sometimes, however, the ashes will burn the foliage if rain falls soon after they are applied, so on the whole lime, and plaster, or tobacco dust are better for the purpose, says a writer in the Farm Progress. Some keep a healthy bunch of onions growing in each hill, bruising the leaves occasionally, so as to hide the smell of the vines from the beetles.

The larger squash bugs have been the most troublesome and the hardest to deal with in our garden. They are sap suckers, and there is nothing



A Squash Bug.

we have found that will kill them which would not at the same time be injurious to the plants, so hand picking seems the only remedy. It makes quite a difference in the amount of work done whether hand picking is commenced early in the season or not until the new crop of bugs appear.

Bees and Farm Notes

To keep lawns in good condition, practice weekly mowing.

Thousands of bushels of grain are spoiled every year by poor stacking.

Alfalfa is ready to cut when the crowns begin to send up new shoots.

Train up the tomato plants, it will give them size and they will bear better.

Don't forget to take water to the field for the horses during these hot days.

It is a well known fact that alfalfa does not do well upon an impervious subsoil.

The humus content of the soil is important in the orchard.

"Too little phosphorus" is the cause of many of the low yields on corn belt soils.

There seems to be a good deal of prejudice against millet because it exhausts the soil.

The yellow condition of the alfalfa indicates that it has not received sufficient nitrogen.

Sand and hairy vetch compare very favorably with alfalfa and clover hay as a feed for milch cows.

It is estimated that ten years of single cropping will wear out any but the very richest of soil.

Use the hoe in the garden a little every day. It will give good returns for all the time you put in that way.

Baling corn fodder is a new idea, but if it works out well it will save a good deal of hard and disagreeable work.

It is always a good plan to use plenty of seed in planting cucumbers, cantaloupes, melons, etc. The hills may be thinned out later.

Oats and peas should be cut for hay when the oats are in the milk stage and the advance pea pods contain reasonably good sized peas.

HOLD SOIL MOISTURE

Summerfallow Is Best and Practically Only Method.

In Sections Where Rainfall Is Rather Light Conservation of Such Is of Utmost Importance—Solution of Weed Problem.

It is generally agreed, I think, that as the west is usually subject to only a rather light rainfall which means briefly "A lack of moisture," the conservation of such is of the utmost importance. Experiences have found that the summerfallow is the best and practically the only method by which we can hold the surplus moisture of one season over for the benefit of a crop in the following season. One might liken the fallow unto a reservoir; the water-holding capacity of which is determined only by just that amount of work and tillage it may receive, and also by doing this work just at the proper times.

Such a fallow will provide at least seed and bread in the driest of seasons that we have experienced in the past twenty-five years. It has been said that our western system of constant fallowing is as hard on the soil as if it had been continually cropped. Nevertheless many old fields through the province which have been worked under this system are showing up good today, says a writer in the Winnipeg Farmer's Advocate. No one can hardly dispute the fact that our older soils are lacking in fiber, and are also lacking a certain amount of fertility, at the same time the summerfallowing system sets free fertility. Just how long this may continue without the addition of manure and fertilizers is a question which will probably be only answered by actual test and demonstration. We know that soils of different localities differ, that some lands will stand crop bearing for a longer period than others, but commonsense, which is founded on fact and practice and not a simple matter of theory, tells us that the day must come, when our lands must be replenished; in the meantime so long as the fallowing system brings forth the yield it should we would consider that we have no better method, unless we have a revolution in climatic conditions.

I use all the manure available and am seeding down to grass my oldest land and intend that all the land will take its turn under this system, but I am not going to drop the fallow unless it drops me. The system of summerfallowing, combined with spring and fall cultivation, is the most practical method at the present time of controlling the weed problem, which goes hand-in-hand with the conservation of moisture. One cannot grow weeds and conserve moisture at the same time. Probably weeds and plants are more fatal than the sun and wind toward depleting an area of the moisture contents, for we can prevent evaporation to a very great extent by a mulched surface or dust blanket but weeds are working above and below the surface and keep up a continuous pumping on the moisture supply until their maturity. The summerfallow is conducted for the purpose of exterminating these plants and also for the purpose of coaxing the seeds which lie in the soil to germinate, that they may be killed off by the cultivation; the latter purpose being perhaps the more important of the two to consider when we are discussing the advisability of summerfallowing.

Many of our noxious weed seeds have an abominable habit of lying dormant in the soil for all manner of periods until conditions are just suitable to their particular whims, the lack of moisture and heat no doubt having much to do with this; yet among wild oats, buckwheat and some of the mustards a goodly proportion of these seeds seem to ignore any condition and lie over for a season.

Bacteria for Alfalfa Soil.

Alfalfa needs a certain kind of bacteria in the soil to give the best results. These bacteria live on the roots of the plants, and give off as a by-product the nitrogen which the plant needs. This is an example of co-operation in nature.

In the soils where sweet clover has grown these bacteria are usually present. If they are not, it is sometimes necessary to get soil from some field where alfalfa is growing, or some sweet clover soil, and scatter it over the alfalfa patch. This is called "inoculating the soil."

Economy of Silage.

It is claimed that two acres planted to corn and made into silage will feed eight cows or fatten eight steers for a longer period than the same two acres could feed one cow if pastured.

Dependable Cow.

It is the cow that is always ready and eager for food at each feeding time that can be depended upon to give a like amount of milk each day for a long period of time.

LATE PLANTING OF ALFALFA

No Record of Failure to Obtain Stand Where Sowing Was Done Early in the Season.

(By E. R. PARSONS.)

Last year many of my friends requested an opinion from me as to the late planting of alfalfa. At that time I had only my own experience to profit by, which is that early planting is much the best.

In the meantime, however, I have been able to accumulate some data from all over the dry states, and I find that the percentage of successful planting after July is only about 25, while that of early planting—about April and May—is about 75 or 80, and with deep plowing probably 100 per cent; in fact, I have no record of any failure to obtain a stand where the plowing was eight inches or more and the alfalfa sowed before June.

The best average date for the planting of this legume seems to center around the 20th of April, and when the ground is wet down to a depth of two feet or more and plowed deep, there is little or no risk of failure. Alfalfa is peculiar in this respect; it requires plenty of moisture at the start, but once established, no drought can kill it out. The top may dry, but it will bud again from the root.

If the ground is plowed deeply enough, the roots go down very quickly, and as soon as it has acquired a ten-inch root, it is practically out of danger.

When planted in the fall on summer fallowed land, it will sometimes succeed if the season is right, but it is very easily exterminated by cold and drought when young and not thoroughly established. A stand of alfalfa secured by shallow plowing and a wet season for some reason or other often peters out after a year or two.

The young plants in the seed leaf will stand a temperature of about 20 Fahrenheit if they are covered with snow. Without snow, the danger point is about 26 degrees. The lower the altitude the more cold they will stand, and since we find that lack of air pressure, increases the bursting power of frozen sap, this rule applies not only to alfalfa, but to all vegetation.

As far as the different varieties of alfalfa are concerned, it is a good idea to try them all. On my ranch I find the ordinary variety does as well as any, and usually costs less.

Some farmers are afraid to plant alfalfa because they think their soil is not right, but there is absolutely no way of testing this, except to try it.

It can, with the help of a little manure, be raised even on a sand bar, and will ultimately convert it into good soil. For this reason, we need never have any abandoned farms in the west, if we plant them to alfalfa before it is too late.

In fertilizing weak or sandy land for this crop, the manure should be harrowed in on the surface, after plowing and before planting. This darkens the color of the surface and diminishes the glare from the sun, which will sometimes dry up the young plants on very light colored soil by scalding the leaves, even when there is plenty of moisture down below.

Alfalfa will often do better in rich hill soil than on a weak sandy bottom. It will sometimes reach water at 20 feet in three or four years, and then, of course, will yield as much per acre as irrigated alfalfa.

GENERAL FARM NOTES

Teach the colt to eat grain and hay.

Place the roosts for poultry on a level.

Always approach a strange horse at the shoulder.

A good gardener will not be content with raising one crop a year.

Wheat and wheat screenings have both been used to fatten lambs.

Corn easily heads the list as the best single grain for fattening lambs.

Where the dropping boards are made of matched lumber the job of cleaning them is easier.

One pound of cotton seed meal may be fed daily to a horse, but it should be mixed with other feeds.

Wild strawberries have the most delicious flavor. They are easily transplanted to the garden.

This is a good time to put a square of tar paper in the bottom of each nest box for the benefit of lice.

If your horse is troubled with indigestion have the animal clipped and its teeth attended to by a veterinarian.

Thin the vegetables just as soon as they come up. Why give room to plants not needed any more than the weeds?

Keep the poultry buildings and yards properly disinfected. One pint of carbolic acid in eight gallons of water makes an excellent disinfectant.

A garden should have perfect drainage, for there are depressions which will hold water; the ground occupied by them will be almost entirely wasted.

Paw Knew.

Willie—Paw, what is a telling situation?

Paw—Any occasion when two or more women meet.

Stag and Doe.

"Why do so many of the fellows go to the big dances stag?"

"On account of the scarcity of doe, perhaps."

Getting Back at Him.

This one is told about an East end dancing class. There was a young woman who taught a good deal about ancestry and descent, and there was a young man who thought that all such stuff was slobbish. The two sat out a dance together, and the girl mounted her hobby almost at once.

"What was your father?" interrupted the young man.

"Father was a gentleman."

"But what did he do for a living?"

The young man thought that smart but the girl came right back.

"What was your father?" she asked.

"My father raised hogs."

"I see he did. But what did he do for a living?"

Subtlety Does It.

J. Ogden Armour, apropos of leap year, said at a luncheon at the Auditorium in Chicago:

"A girl can take advantage of leap year without being at all unmaidenly. There are subtle and delicate ways of doing things, and such ways are just as efficacious as brutal, knock-me-down ones.

"There's a girl named Jones, who, having been engaged altogether too long, took advantage of leap year to hurry on her wedding. But she accomplished this delicately. She just signed a letter to her fiancé, 'As always, Edith Jones,' and she underscored 'always' and 'Jones' very heavily.

"The marriage in consequence was celebrated next month."

His Good Name.

William Dean Howells, the famous novelist, enjoys the public confidence in an unusual degree. It was doubtless on this account that a New York promotor recently offered Mr. Howells the presidency of a new mining company at a salary of $25,000 a year.

"But sir," Mr. Howells protested, "I know nothing about mining or finances."

"Oh, that makes no difference," the promotor replied. "We won't expect you to do any work. We only want to use your name, you know."

But Mr. Howells shook his head.

"No," he said, "no, I must decline. If my name is so well worth using it must be equally well worth protecting."

Appearances Deceptive.

The sign on Farmer Jones' place, "No hunting or fishing allowed here," didn't keep little Tommy Lewis from crawling under the fence.

Tommy sneaked along the ravine, fishing pole in one hand an a can of bait in another. Finally he came to a place where a large cottonwood tree was growing. After casting an eye in every direction and satisfying himself that the farmer was not in sight, he began to unravel his line. He was just baiting his hook when the farmer appeared.

"Didn't you read that sign on the fence?" the farmer asked.

"Sure, I did," said Tommy, "and I ain't fishin'; I'm just learning this little worm to swim."

Hunger of a Prince.

An English actor was a member of a company snowbound in the Sierras while en route from California to the East, so that they all had a magnificent hunger when the train reached a small station at which there was a restaurant, and the Englishman was the first to find a seat at a table.

"Bring me in a hurry," he said to the landlord, a burly Western man, "a porterhouse steak, some devilled kidneys, a brace of chops, plenty of vegetables and two bottles of Bass's bitter beer."

The landlord stuck his head out of the dining room and yelled to somebody in the rear apartment:

"Say, Bill! tell the band to play 'Rule, Britania;' the Prince of Wales has come."

Too Easy.

Parson White's precautionary measure of protecting his chicken coop with chilled steel bars was futile, for that very night four more of his choice Leghorns disappeared, leaving the severed bars as the only visible evidence of the theft. However, his suspicions pointed toward his next-door neighbor, whom he had seen prowling around in his yard that day, and accordingly he had his suspect up in the police court the next morning.

"If the prisoner can file an alibi I'll let him off with a suspended sentence," announced the judge at the end of the evidence. "Can you file an alibi, Ham?"

"I guess I can," eagerly rejoined the suspect, "if it ain't any harder den Pahson White's chicken coop, bars."

HOBBIES.

The cheapest thing to ride is a hobby. It eats no oats, it uses up no gasoline, and it calls for no ticket. And it is safest.

There is no objection to the riding of a hobby, so long as it is not ridden over people's rights

Many have a mania for talking of their ailments. One question about their health will tilt over on you the great reservoir of their complaints.

Some have turned into temperance monomaniacs. They have dwelt upon the one evil until others are submerged, forgetful of the fact that the only decent thing about thousands of men is that they do not drink, and that they might do that if they were not too stingy.

The fresh air crank sits with doors and windows open, and while his family's teeth are chattering with the cold, descants on the bracing weather.

Witticism is the hobby of another. Admirable is the power to amuse. We cannot always have the corners of our mouths drawn down. Neither can we always have the corners of our mouths drawn up. We want information, facts, realities, as well as fun. Theodore Hook and Charles Lamb grinned themselves into melancholy. Crows are apt to be hypochondriacs.

Harsh criticism is the main mood of some. They spend their lives in hunting for something to shew up—goats browsing on morning glories. He who, finding within him powers of satire, gives himself up to that might as well be a wasp stinging the bare feet of children.

Pride of ancestry is with others the chief mania. They go through life with their faces turned backward. They feel sorry for Adam because he had no grandfather. We all get tired and wish their precious ancestors had been children.

All our faculties were made for use. He who is always on one them cannot give full play to judgment, imagination, fancy, reason, wit and feeling.

We want harmony of intellect—if the parts carried, treble, alto-tenor and bass, accompanied by full orchestra, violin, cello, cornet, drum, flute and cymbals.

He who goes through life using one faculty to extreme on one foot, instead of taking the strong, smooth gait of the healthy walker.

THE STATE FAIR.

That the management of the first State Fair in New Mexico to be held in Albuquerque October 7th to 12th did wisely in increasing the appropriation for the products exposition to $3000.00 has been plainly shown by the vastly increased interest in the agricultural, horticultural and live stock end of the big annual carnival which is being shown in the various counties of the State. In practically every county the farmers and business men are working harder than ever before for the county fair, with the plan of sending the pick of the county exhibits to the State Fair. Prof. J. D. Tinsley, agricultural demonstrator for the Santa Fe, who has been placed in full charge of the plans for the products exposition, is highly enthusiastic over the prospects for big displays from the various countries Torrance County is giving a good example of the right way to do it. Various farmers' institutes are being held or planned at various towns in the county and at each institute the farmers of that district will bring the best samples of their products. These will be taken to the county fair at Willard, and will be in shape to be sent directly from Willard to Albuquerque for the State Fair A similar plan is being followed in other counties and the live, active interest being taken by the farmers everywhere assures that the first State Fair held under the State government will be a fair in every sense of the word—a comprehensive and statewide display of the products of the Sunshine State

PUBLIC NOTICE.

Of recent date many complaints have been received at the Sheriff's office in effect that numerous persons in Lincoln county who are engaged in business, are in the habit of keeping their respective places of business open on the Sabbath day of the week, and do business on that day, in violation of the Sunday law of the state; while others, who have no particular place of business, are in the habit of doing work and labor on that day that is not work of charity or necessity, in violation of said law.

It is the duty of the Sheriff to report all violators of said Sunday law that may come to his knowledge to the District Court for indictment by the Grand Jury or information by the District Attorney, and while such duty is a disagreeable one, public notice is hereby given that the names of all persons violating said law in Lincoln county, that come to the notice of the undersigned Sheriff of Lincoln county, will be reported to the Court for its action at the coming October. 1912, term of the Court.

PORFIRIO CHAVEZ,
Sheriff.

Dated Lincoln, N. M., August 13, 1912

PEOPLE WHO KNOW are going to buy a MAJESTIC RANGE during our DEMONSTRATION Week. YOU would too if you KNEW. Read our big add in this paper.

OSCURO ITEMS.

Mrs. Byfield narrowly escaped an accident last Friday. The recent rains have so flooded the Mal Pais country that the roads are almost impassable. Mrs. Byfield started out and got stuck in the mud, and by chance a young man on horse back met her, rode into Oscuro, secured help and succeeded in getting Mrs Byfield on solid ground.

Mr. Lacy passed thru here last Friday inspecting the telephone line west of Oscuro.

John Pitts made a business trip to Tularosa Monday.

Tom Moody arrived from Tularosa on train No. 34 Monday.

Miss Margaret Humphrey of Carrizozo, came down last Saturday on business.

Mrs. Robt. Young was transacting business and calling on friends in Carrizozo last Thursday.

The contract for the school building has been let to Mr. English of Carrizozo and Mr. Corwin of Oscuro. It is to be a frame one room building with cloak rooms modern ventilation and sufficient light and blackboards.

We appreciate the fine rains we are having now, but cannot help regretting they were not earlier.

Capitan and Mrs Roberts of Estey are visiting friends in Oscuro this week.

DON'T ask us to give you the $8.00 worth of ware with a MAJESTIC RANGE after our demonstration week, as that special offer applied to that week ONLY September 9th, 1912

KELLEY & SONS.

FORT STANTON FLASHES

A number of young people attended the Capitan races Monday afternoon. All report a good time

One of the Stanton boys, Elbert Brown came out ahead on the foot race at Capitan Monday.

The Stanton dance given Monday evening was well attended. It is "said" to be the best of the season.

H. A Freedlander, the Ft. Stanton postmaster, who has been away on a two months vacation, will return Thursday of this week.

Mrs. C. B. Layne returned to Alto this week, after a few day's visit in Stanton.

J. J. Hollem made a trip to Alto Sunday

Capt. J L. Van Yant made a business trip to Cloudcroft this week.

All are glad to welcome Miss Jane Brockway home again.

DON'T buy "unsight unseen." Let the man who knows show you all about RANGES—at our store one week September 9th, 1912

KELLEY & SONS.

$8.00 WORTH OF WARE will be given away FREE with every MAJESTIC RANGE sold at our DEMONSTRATION one week only September 9th, 1912.

KELLEY & SONS.

LINCOLN COUNTY
NEWS NOTES.

PARSONS NEWS.

Dr F O. Ballard, who has been visiting friends here for the past month, has returned to his home in Indianapolis.

Mr. and Mrs Luther Jennings and their five youngest children drove to Alamogordo to visit relatives this week. They will return by way of Three Rivers and Carrizozo.

There has been so much rain in this section the past few weeks that ranchers have been unable to put up their hay. Hay cut two weeks ago is still on the ground.

Mr. Anderson was called to Capitan on business Saturday, and Mrs Anderson spent the day with Mrs J M. Rice.

Last Thursday the Misses Rice gave a family dinner party in honor of their mother's birthday and of their sister, Mrs. Welch's, tenth wedding day anniversay. After the late dinner Alice Irene, the infant daughter of Mr. and Mrs W. L Wehr, was baptized by Dr. Ballard of the Memorial Presbyterian Church of Indianapolis, Ind. After th e ceremony Dr. Ballard presented the baby with a copy of the smallest complete Bible in existence.

OSCURO ITEMS.

[Too late for last week.]

Mr and Mrs. Frank Goodin and family returned last Thursday from an extended trip to Long Beach, Cal.

Mrs. Givens and sons of El Paso are guests at the I—X Ranch.

Mr. H Scheffy of Three Rivers was a business visitor Monday.

Misses Margaret Chase and Belle Lutz were in Oscuro last week, the guests of Mrs. R. E. Blaney.

Carol Belknap left Sunday for St. Johns, Arizona, where he has accepted a position as principal of the schools.

Dr. and Mrs. Ranniger gave an informal dancing party Saturday evening, the honor guests being Misses Chase and Lutz and Lee B. Chase.

Mrs. Capt. Roberts of Estey is visiting friends in Alamogordo.

Mrs Charles Belknap left Wednesday for a week's visit at Capitan.

Miss Lillie Black entertained the Misses Chase and Lutz at luncheon Saturday.

The Oscuro school opens Sept. 9.

J. H. Boyd is making arrangements to move into his new store building, where he will put in a larger stock of goods.

Mrs Harvey and Mrs Massie of Carrizozo spent Wednesday in Oscuro, the guests of Mrs Blaney.

JICARILLA HAPPENINGS

There have been quite a number of capitalist from Oklahoma here during the last few days looking over the camp.

Wm. A. Franklin is hauling up some ore from the Revenue property for shipment.

R. P. Brooklin has gone to the Mogollon to work in the mines of that camp.

E E. Wilson was in camp last week with a load of fine vegetables from his ranch.

School closed at this place Aug. 30, after a five months' term under Prof. Burnett. There was quite a number of people up from Ancho to take in the final exercises. The following program was rendered:

Opening Address, Professor Burnett
Welcome Recitation, Willie Hayes
Recitation, Lorane Wilson
Recitation, Dorothy Fox
Dialogue, "The Housekeeper's Trials"
Song, by the School
Music by the Orchestra
Dialogue, "Reading the News"
Reading, Miss Berna Perkins
Song, Miss Tickner
Music by the Orchestra
Song by the School
Story, William A. Franklin
Dialogue, Disturbance in Family
Recitation, Betty Hayes
Solo, Mrs. Wm. Franklin
Music, Orchestra
Charade, Mrs. Talbert and School
Recitation, May McBrayer
Music, Orchestra

Prof. Burnett has gone to Ancho to open school for a term of six months, commencing Sept. 1.

Theo. Thompkins visited White Oaks last Sunday to be the guest of Mr. Jackson and wife for a few days

E H Talbert and L M. Stubbs have located homesteads east of Jack's Peak. They are endeavoring to sink wells on their places.

EDUCATION consists in knowing things—KNOW how a range is made inside and outside. CALL at our store during our SPECIAL MAJESTIC RANGE DEMONSTRATION—Week of September 9th,
KELLEY & SONS.

—Remember that Harvey and Chase can insure you against loss by fire in the best companies in existance. All Company's rates are the same so why not enjoy protection from an absolutely sound company such as the Hartford, Queen, Royal, Aetna, German American, Springfield Palatine or North American.

YOUR NEIGHBOR KNOWS his MAJESTIC RANGE uses little fuel—bakes perfect—heats abundance f water good and hot and costs practically nothing for repairs. LET US SHOW YOU WHY. CALL during our DEMONSTRATION WEEK September 9th, 1912.
KELLEY & SONS

—FOR SALE- A two room house partially furnished, also a 4 room house in Carrizozo completely and nicely furnished. Will sell at reasonable prices. Tom Chant, Carrizozo.

For this week only

ALL LADIES SUMMER GOODS AT REDUCED PRICES.

MEN'S STRAW HATS CHOICE 50 CENTS.

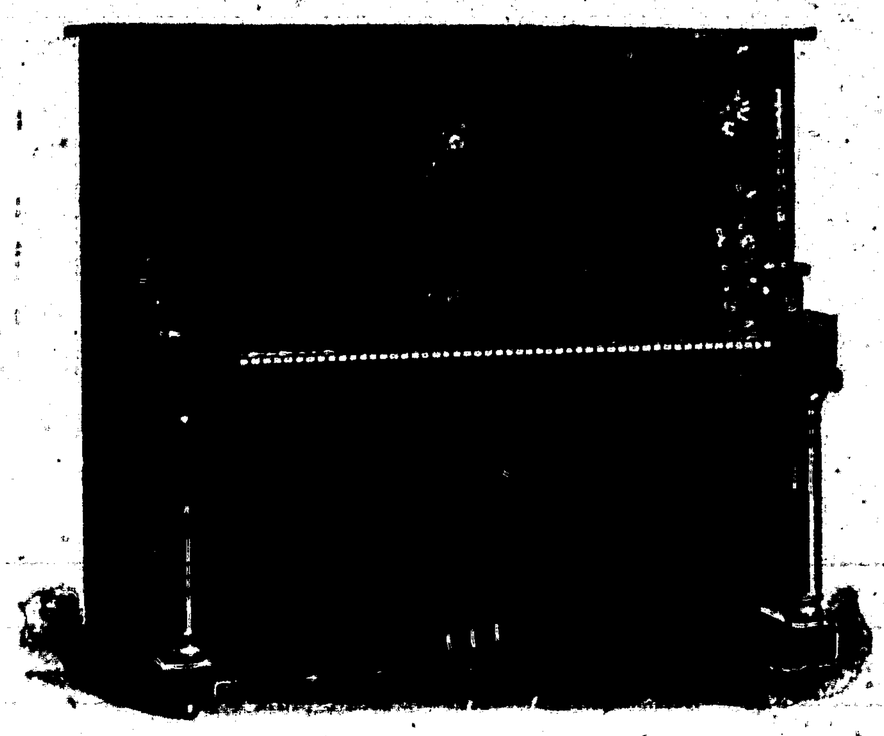
JUST ARRIVED:---New and up-to-date line of Ladies cloaks and suits. Men's tailor-made suits and overcoats.

COMPLETE STOCK OF FANCY AND STAPLE GROCERIES ALWAYS ON HAND. FREE DELIVERY.

CARRIZOZO TRADING COMPANY.

This is the Piano we Give away on January 24, 1913.

VALUE $400.00.



What seems to us to be a question is now a gratifying success. It pays to be liberal with our trade.

Since we first announced that we should give away this beautiful Upton Piano to some one of our customers business has shown an increase in every department. BE SURE AND ASK FOR YOUR PIANO VOTES WITH PURCHASE.

RULES OF CONTEST.

1. Name of contestant will not be known.
2. Name of contestant will not be published.
3. Every contestant is credited with 2,000 votes to start with.
4. Every contestant gets a number.
5. Standing of contestants numbers published weekly.
6. All votes must be brought in for recording on Wednesday.
8. Tie votes in packages with contestants number and the amount on top slip only.
9. Color of votes will change and must be recorded weekly.
10. Votes are transferably only before recording
11. Contestant having the largest number of votes on January 24th 1913 wins the piano.
12. Candidates not bringing in personal votes will be dropped

Steel Lined SHOT SHELLS

The Remington Cube cut into a good one.

Each and Every One a Speed Shell

The speed that breaks your targets nearer the trap. That's why *Remington-UMC* Steel Lined Shells have won 13 out of the 15 Handicaps held in the last three years.

The speed that gets that mile-a-minute "duck" with a shorter lead—that's why it takes over 50,000 dealers to handle the demand for *Remington-UMC* Steel Lined Shells.

The Shooting fraternity are speed wise. They know loose smokeless powder won't drive shot. They know that the drive depends on the compression.

The powder charge in *Remington-UMC* shells is gripped in steel. This lining is designed to give the exact compression necessary to send the load to the mark quickest. It insures speed—the same speed in every shell.

The steel lining is moisture proof—no dampness can get through. Jar proof—no powder can get out. Waste proof—no energy is lost.

Shoot *Remington-UMC* Arrow and Nitro Club Steel Lined Expert factory loaded shells for Speed plus Pattern in any make of shotgun

SPECIAL DEMONSTRATION AND SALE ON

GREAT MAJESTIC RANGES

ONE WEEK ONLY

SEPTEMBER 9 TO 14th,

ONE WEEK ONLY

SET OF WARE FREE

SAVE $8.00

As a special inducement during our demonstration week only, with every MAJESTIC Range sold (prices always the same) we will give free one handsome set of ware as illustrated here.

Every piece of this ware is the best of its kind. Not a piece that is not needed in every kitchen. It cannot possibly be bought for less than $8 00. This ware is on exhibition at our store. DON'T FAIL TO SEE IT.

SPECIAL

All during this week a special demonstrator direct from the MAJESTIC FACTORY will be glad to show you "ALL ABOUT RANGES"—SHOW YOU why the MAJESTIC is the best range on earth at any price.

Come, if you intend to Buy or Not.

EDUCATION lies in KNOWING THINGS—KNOW why the oven of a range is heated—know how the water is heated HOW the top is heated WHY the MAJESTIC uses so little fuel—know how a range is made inside and outside: This edueation may serve you in the future. Don't OVERLOOK a chance to KNOW THINGS shown by one who knows. COME.

Which Shall IT BE?

Do you intend to continue laboring, burning valuable fuel and destroying high priced food with that old worn-out cook stove?

You know that old stove eats up a lot of fuel each year.

You know you have trouble in getting it to bake just right, in fact, spoil a batch of bread every once in a while—you know it costs considerable for yearly repairs.

Stop and think and figure.

Wouldn't it pay you to buy a good range—a range with a reputation.

THE GREAT MAJESTIC Malleable and Charcoal IRON RANGE?

You make no mistake in having the GREAT MAJESTIC—it's the range with THE REPUTATION—ask your neighbors Then, too, it's made just right and of the right kind of material—MALLEABLE & CHARCOAL IRON—riveted together practically air tight lined with pure asbestos board—parts being malleable can't break—has a movable reservoir and an oven that don't warp—that's why the MAJESTIC uses so little fuel, bakes just right every day in the year (browns bread just right all over without turning), heats 15 gallons of water while breakfast is cooking—properly handled lasts a lifetime, and costs practically nothing for repairs.

Don't buy the range you expect to last a lifetime "unsight unseen" you'll be sure to be disappointed Come to our Store during demonstration week, see the GREAT MAJESTIC, have its many exclusive features explained—find out why the MAJESTIC is 300 per cent stronger than other ranges where most ranges are weakest.

DON'T OVERLOOK THE DATE

THIS IS A SPLENDID INVITATION TO YOU

AND YOUR FRIENDS AND NEIGHBORS.

KELLEY & SONS.

Carrizozo, N. M.

FORT STANTON REPORT

(Continued from Last week.)

THE FARM

The farm or ranch has been carried on at a slight loss during the past year. It should be noted that this sanatorium is entirely dependent upon its own resources for its milk supply as this is not a dairy country. The production of milk averaged 442 quarts daily, the maximum and minimum for the year being 576 and 356 quarts respectively. The dairy herd is almost pure bred Jersey, numbering 132 head All have been tuberculin tested with negative results The milk is cooled immediately upon being drawn and bottled for all table uses by modern machinery. Pint bottles are served patients at table. The cost of production of this milk, reckoning forage and labor only, was $0 1823 per gallon during the past year. It is difficult to estimate what milk of this quality would cost if purchased at the station, but practically it would be unobtainable.

The range herd of Herefords, number now about 2,000 head, including at this date, July 1, 1912, one hundred and ninety three year-old steers which will furnish all beef needed for the next fiscal year. It is probable that after this year it will be necessary to sell surplus stock from time to time

The labor loaned from farm to sanatorium is recorded as a farm credit although both are under the same management. Work is accomplished in this way which would otherwise have to be done by contract and the farm force of eighteen men kept employed during the winter. Alternate Sunday relief is partially afforded the sanatorium attendants from the farm force and many emergencies of station life met with its aid.

NEEDS OF THE SANATORIUM

A new infirmary and nurses' home are needed at an estimated cost of $75,000. This will require an appropriation by the Congress, recommendation for which has recently been made to the Bureau. If proposed legislation should become law the benefits of this Service may be extended to veterans of the Spanish-American war and, perhaps, to certaid employes in the classified civil service. In that event additional appropriations to the amount of about $45,000 will be needed for additions to dining rooms, construction of sleeping quarters, etc. The allotment for maintenance would also have to be appropriately increased.

Among the minor needs may be mentioned that of bound volumes for the patients' reading room The station library now contains 2625 books, which have been donated from time to time. By a special ruling from the Postmaster-General books may be franked to this address if delivered to an officer of the Public Health and Marine-Hospital Service.

—Ask for certificates at the Carrizozo Trading Co Piano certificate going fast

—Would you like a piano? Get wise. They all say the 'piano' is fine. The piano retails for $400.00 cash. Remember it is a genuine Upton parlor grand. The Trading Co. will give it away. One vote with every cent of your purchas, at The Trading Co. Who gets the piano.

—Come hear the Tone of the $400 piano we are giving away. This piano will be given away absolutely free. Always ask for your piano votes at our store. Trading Co.

The ELECTRICAL WORLD

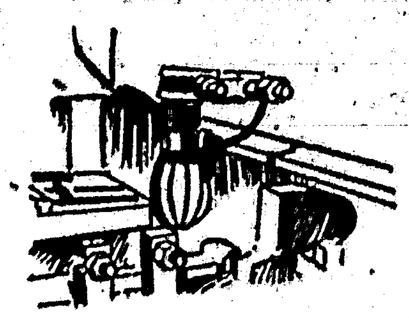
STICKS WHEREVER IT IS PUT

Lamp Socket Is Quite Useful Where Concentrated Light on Machine Work Is Desired.

A lighting device, by means of which the light can be directed on the tool or the work from the top, side or any other point, the change of position being instantly accomplished, has been developed and is shown in the illustration.

This is a portable electric lamp using the ordinary incandescent bulb, but possessing magnetic power so that when placed on any mass of iron or steel, smooth or rough, even or uneven, painted or unpainted, it sticks and holds itself in the position placed with a pull of scores of pounds.

The lamp can be placed with equal facility on machine tools, girders, bars, castings, automobile frames, engines, locomotives, rails,



Portable Lamp Socket.

vault frames, safes, pipes or any structure that is entirely or partly composed of iron or steel. It stays wherever put, as if it were cemented to or formed a part of the surface to which it is held by its own adhering power.

It hangs vertically from a surface above or extends sidewise just as rigidly as to a surface on top of which it may be placed. Its position can be instantly changed and heat, cold, jar or vibration does not affect its grip.

Direct current is necessary for the proper operation of this lamp, as it is impossible to produce the magnetic power with alternating current.

ELECTRICITY IS GREAT AID

Makes Country Home More Comfortable Than Those of City—Furnishes Light and Power.

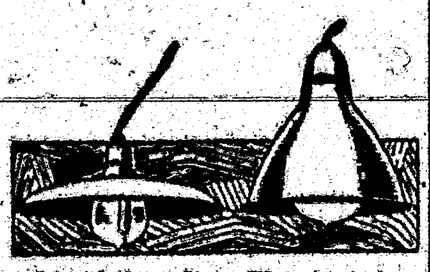
But for the magic influence of electricity the back country districts would be well nigh uninhabitable. There would be no communication, no connection with the outside world, except a desultory mail service. The people would be isolated, lonely, without entertainment or the comforts of life.

Electricity has changed all this within the last few years. The electric roads are running up and down the distant valleys where the railroads could not hope to build, affording an easy and comfortable means of visiting the town or villages, the neighbors or relatives. The telephone lines extend from house to house, from town to town, from city to city, and at a very small cost one can visit with friends or transact business miles and miles away. Electricity in the shape of light and power, makes the country home even more comfortable than those of the city. It furnishes the water supply, it does the hard work about the house and the premises and a hundred other things undreamed of a few years ago.

NEW ELECTRIC-LAMP FIXTURE

Two Shapes of Ingenious Combination Shown in Illustration—Several Parts Eliminated.

Two shapes of an ingenious combination electric lamp fixture, designed for offices and factories, are shown in the accompany illustration, says the Popular Mechanics. Each is a com-



A bowl shape in the combination type of fixture.

The dome-shape combination socket and reflector fixture.

bination socket, shade-holder, insulating joint and reflector, and, being all in one unit, eliminates the several separate parts required in building up a successful lighting unit.

Operate by Wind Power.

Several wireless stations in the West Indies are operated by wind power.

TIMEPIECE TO RUN FOREVER

Perpetual Motion Is Almost Solved by Pennsylvania Man Who Also Discovered Telephone.

The only piece of machinery in the world to be operated entirely by electricity drawn from mother earth is now running at Camp Hill, near Carlisle, Pa. It has been in continuous operation since 1870, except for short periods due to its transfers to several different localities.

In the late sixties Daniel Drawbaugh, to whom every one in that locality gives credit for inventing the telephone, and who also constructed hundreds of ingenious mechanical and electrical devices, conceived the idea that he could make a perfect clock operate under the guidance of latent electrical forces in the earth. Time has shown that Drawbaugh has come closer to perpetual motion than any other inventor.

In the Drawbaugh timepiece, which stands about six feet high and is unlike all other clocks, the pendulum is the motor. It is suspended on an edged pivot of hardened steel, the friction thus being reduced to a minimum. The pendulum weighs about 45 pounds. Its central rod terminates midway between the ball and the point of suspension, where there is an ordinary, permanent magnet. Fastened against the back part of the clock case, at right angles to the permanent magnet, is an electro magnet, the wire of which runs into the ground, the earth becoming the battery feeding the electro magnet.

When the pendulum is swung away from the perpendicular the opposite pole of the magnets first attract and then repel, thus keeping up the oscillation.

A remarkable feature of the clock is that there are only four bearings that are subjected to friction.

Drawbaugh said that his clock would run for hundreds of years before any part would have to be renewed.

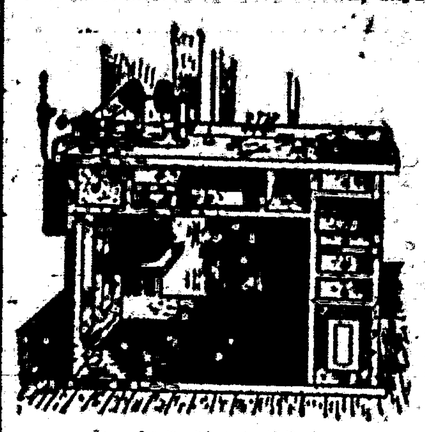
In making the clock ready for work it is necessary to dig a hole in the earth about three feet in diameter and six feet in depth. Metal plates are placed so that moisture cannot enter into the mechanism of the clock, and the timepiece can be so run that it will not gain or lose two seconds in a year.

The clock is now running in the office of Charles H. Drawbaugh, the inventor's son, at Camp Hill, where many visitors marvel at its simplicity and ingenuity.

MOTOR POWER FOR JEWELER

Three Switches Used for Starting, Stopping and Reversing Current as Is Desired.

The foot wheel of the jeweler and watch repairman is being replaced by the electric motor. The installation of such a motor is here shown, says



Jeweler's Power Motor.

the Popular Electricity. The first of the three switches on the bench starts and stops the motor, the second provides for three different speeds and the third instantly reverses the motor, even though it is running.

ELECTRICAL NOTES

By a new system of machine telegraphy 300 words a minute can be sent.

There is an electric light for every inhabitant of the Manhattan section of New York city.

The export of electrical apparatus in 1911 reached the enormous figure of $19,255,536, considerably in excess of other figures in recent years.

All vessels carrying passengers to and from the ports of Uruguay are required by law to be equipped with wireless telegraph apparatus.

The engine of a motor-driven street sprinkler in England also is used to operate one pump to fill its tank and another to help scatter the water.

For measuring the resistance to the electrical current of poorly bonded rail joints is the purpose of a device invented by an ingenious Frenchman.

Because of its high melting point tungsten is being used in an experimental way in the place of platinum on the contact points of induction and spark coils.

PROPER CARE OF MATTING

Its Days of Usefulness May Be Considerably Extended by a Little Forethought.

For sweeping, a hair broom should be rather gently plied, always in the same direction, since stiff bristles, undue vigor and brushing across instead of along the mesh result in a frayed surface, which ruins the appearance and harbors dirt. A scattering of damp Indian meal, scraps of newspaper or common salt—on no account tea leaves or newly mown grass, of which a stray shred accidentally stepped on creates an ugly stain—simultaneously attracts the flying particles and enhances brightness, while a final rub over with a soft dry cloth, though not absolutely necessary, imparts a pleasing gloss.

Although plain water and soap, or, worse still, soda, invariably turn matting yellow, a periodical washing with bran water or brine is very beneficial, provided sloppiness is strictly avoided and the surface is not left wet. The latter should be gone over piecemeal, first with a large cloth, squeezed out in the chosen liquid, next with a second similarly wrung out in fresh cold water and lastly with a dry rubber. If the matting cannot be taken up and hung in a shady spot in the open air, windows and doors should be thrown wide for at least a couple of hours after this washing and sunlight meantime excluded.

HANGINGS FOR THE WINDOWS

Pretty Materials That Will Suit Almost Any Style of Furnishings Are Offered in Profusion.

For bedroom windows and doors there is an endless variety of good things to select from, in all colorings and materials, and suited to any style of furnishing. The domestic cretonnes may be used for the less important rooms, but the colors are not as permanent as the imported ones, so that it is often cheaper in the long run to spend more on the material.

Some of the materials are partly covered with birds and butterflies, or trees yielding roses, peonies or fruit on the same branch. And there are pastoral effects on cretonnes, much used for bedroom windows. It is well to touch on the necessity of restraint, not only in coloring, but in pattern. Assuming that one has much elaborate detail in the carpet and chair coverings, curtains in such rooms should be in plain, simple colors.

With a plain carpet and wall paper a good background can be formed for chintz coverings to chairs and similar materials for curtains. The successful drapery or curtain should combine the quiet and gay in such a way that unity, harmony and variety are attained.

For Measuring Shirts.

What woman of enforced economies has not been worried almost ill over the measuring of a skirt? But relief is in sight, for in Europe they are selling a device consisting of a frame which may be attached to the edge of almost any table, and to this frame is hinged a pair of semi-elliptical wings, shaped to conform to a curvature of a skirt's lower edge. Loosely attached to one of these wings is a tape measure which slides along the skirt as a guide to mark its length. The other wing has a linen cover, which may be pinned to the waistband of the skirt to facilitate the marking of the latter.

Baked Lobster.

Take all the meat from two large lobsters that have been boiled, chop not very fine. Into the meat stir a little bechamel sauce, some fresh mushrooms cut in small pieces, salt and white pepper to taste and two tablespoons of melted butter. Cleanse thoroughly the body shells of the lobsters, fill them with the mixture, sprinkle buttered bread crumbs over and brown in a moderate oven.

Indian Tomatoes.

Cut half a dozen ripe tomatoes in halves, take out the seeds and turn them, cut side downward, on a dish on the ice. Make a rich curry sauce, adding cream and lemon juice, partly freeze the sauce, then mix in half its volume of minced anchovies, gherkins, olives and shrimps, finish the freezing process and with it fill the tomatoes, bringing the cream to a point, form a handle with a green stalk of parsley and dish them on a bed of watercress.

Chiffonade Dressing.

This is extremely good to serve on lettuce, romaine, or any green salad. Into a glass jar put one hard boiled egg, finely chopped, one teaspoon finely cut chives, one tablespoon each chopped red and green pepper, one teaspoon salt, one-fourth teaspoon paprika and one-eighth teaspoon pepper, one-half cup olive oil, three tablespoons vinegar and one teaspoon tarragon vinegar. Allow it to become very cold, and just before serving shake the contents of the jar thoroughly.

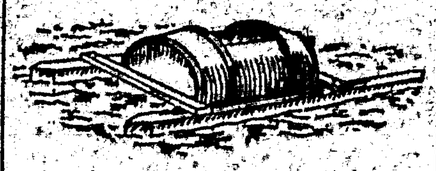
SOMETHING for the LITTLE ONES

EASY TO MAKE BARREL BOAT

Timbers Attached Prevent Capsizing and May Be Constructed by Any Handy Boy.

A boat that any handy boy can easily make is constructed of a barrel which is kept with the opening cut in one side up by two 4 by 6-in. timbers and two tie pieces, 2 by 4, says the Popular Mechanics. The lengths of these pieces will depend on the size of the barrel.

A good watertight barrel should be selected and an opening cut in the center between the hoops, of such a size as to allow the body of the occupant room for handling an oar. The timbers are attached to the barrel with iron straps—pieces of old hoops



A Barrel Boat.

will do. The two tie pieces are put across the timbers at the ends of the barrel and spiked in place.

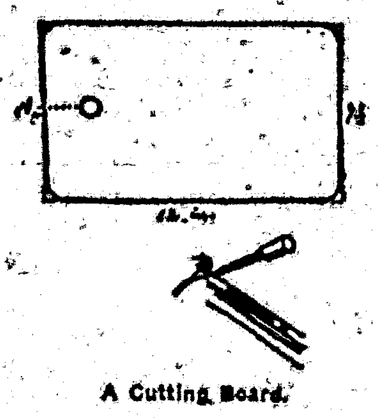
The boat is to be propelled with a single, double-end paddle. There is no danger of the boat capsizing or the water splashing into the barrel.

CUTTING BOARD QUITE HANDY

Convenient Article for Use in Any Play Room May Be Made of Ordinary Piece of Pine.

Use pine three-quarters of an inch thick. You should have a piece 7½ inches by 12 inches for a cutting board.

Round the corners by making them one-quarter of a circle whose radius is three-quarters of an inch. Round with the grain of the wood, as shown



A Cutting Board.

in the figure. Do not go quite to the line with the chisel, and finish with the plane.

Next drill the hole. Drill until the point of the drill begins to come through the wood and then take it out and put the point in on the other side of the board. When the hole is finished, plane the sides of the board and finish it with sandpaper.

LIFE OF CHINESE STUDENTS

Exercise Is Not Given Attention It Should Receive in Far East Colleges —Much Superstition.

The life of the Chinese college student is different in many ways from that of students in our own universities. The Chinese student is not very strong physically. He has stooped shoulders and a pale complexion. His life is not wholesome, for he sleeps in a small room which is not ventilated, and he does not eat very wholesome food.

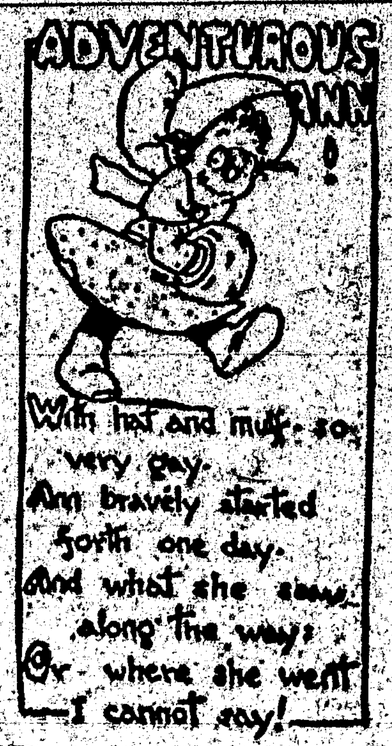
Exercise is not given the attention it should have in the Chinese college. The intercollegiate sports include a 100-yard dash, the high jump, pole vault, 300-yard run and a football game. In the Imperial university at Pekin the teachers are gathered from all parts of the world. The Chinese believe that topics that are foreign to them should be taught by foreigners. The students accept practically all of the foreign teachings except medicine. The medicine which is taught is largely Chinese and is made up of many superstitions. The Chinese believe that a man has nine pulses and two hearts. They do not believe in cutting up dead human bodies for the purpose of studying their parts, as we do. They would not do this because they think the disembodied spirit might return to punish them through torture.

Wanted His Cream Spanked.

"Mamma," said four-year-old Bobby, "what is that white stuff on my berries?"

"That is what we call whipped cream," answered his mother.

A few days later Bobby dined at a neighbors and, being offered some ordinary cream, he asked: "Haven't you got any whipped cream?"



FEW OLD ENGLISH PASTIMES

Truckling the Trencher Is Played by Children Sitting or Kneeling on Floor in Ring.

Truckling the trencher—this is an old English game. The children sit on the floor or kneel in a ring. A person in the center holds the trencher (a pie tin will serve) and when all are ready he truckles, or spins it, at the same time calling the name of some one in the ring. The one named must spring quickly and try to catch the plate between both hands before it stops spinning. If he succeeds, he takes the place in the center, and the first truckler goes in the ring. If he does not catch the plate between both hands before it stops spinning he pays a forfeit and is counted out.

Then there is the play of "Twos and threes." The company is grouped in twos and threes, usually only one odd one, and the fun consists in not being caught as the third. This keeps each child looking over her shoulder, for when two are behind the foremost must slip away and find another place to be tapped.

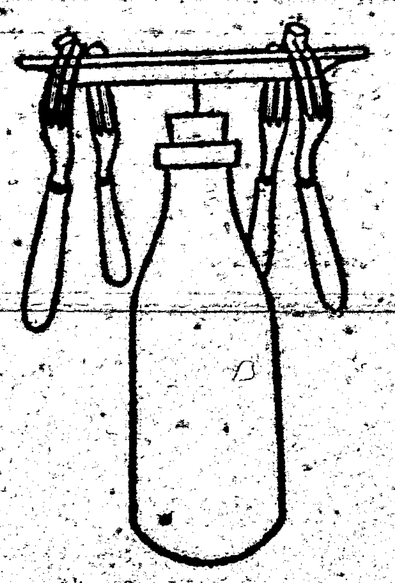
After a stand-up game, a rather funny game, where all the company may sit, is to have one person chosen to call and the rest to repeat: One good fat hen; two ducks; three plump partridges; four squawking wild geese; five delicious oysters; six pairs of Roman-striped hose; seven thousand Spanish soldiers; eight cages of Heliogabulus paroquets; nine sympathetic, apathetic, didactic, propositions; eleven superstitious astronomers viewing Venus in Venice; twelve European dancing masters teaching Egyptian mummies to dance at Hercules' wedding. If any one laughs in the course of this he must pay a forfeit. The one who repeats most smoothly and solemnly must be the caller out and begin gibberish over again.

BALANCING A PLATE AND PIN

Trick Is Comparatively Easy of Execution If Instructions Given Are Followed.

Can you balance a dinner plate on a pin?

Easy enough, if you do it this way: Drive a pin into a cork in a bottle. Take four forks and four other corks



The Plate and the Pin.

and stick each fork into a cork, near its end. Then, by hanging the forks about the edge of the plate as shown in the picture you can balance the plate on the pin.

No Relation.

"Mamma," queried three-year-old Ethel as she watched the servant washing the windows, "is Jane my stepmother?" "Of course not, dear," replied her mother. "What made you think she was?" "'Cause," replied Ethel, "she's always climbing around on a stepladder."

Little Bra—I wonder what the twinkling stars really are?

Little Olga—Oh, I guess they are good little night lamps that have died and gone to heaven.

EXCUSE ME!

By RUPERT HUGHES

NOVELIZED FROM THE COMEDY OF THE SAME NAME.

ILLUSTRATED FROM PHOTOGRAPHS OF THE PLAY AS PRODUCED BY HENRY W. SAVAGE.

COPYRIGHT 1911 BY H.K. FLY CO.

SYNOPSIS.

Lieut. Harry Mallory is ordered to the Philippines. He and Marjorie Newton decide to elope, but wreck of taxicab prevents their seeing minister on the way to the train. Transcontinental train is taking on passengers. Porter has a lively time with an Englishman and Ira Lathrop, a Yankee business man. The elopers have an exciting time getting to the train. "Little Jimmie" Wellington, bound for Reno to get a divorce, boards train in maudlin condition. Later Mrs. Jimmie appears. She is also bound for Reno with same object. Likewise Mrs. Sammy Whitcomb. Latter blames Mrs. Jimmie for her marital troubles. Classmates of Mallory decorate bridal berth.

CHAPTER VI—(Continued).

Then Ashton intervened like a dog in the manger and dragged her off to her seat, leaving the young man to exclaim:

"Some tamarind, that!"

Another young man behind him growled: "Cut out the tamarinds and get to business. Mallory will be here any minute."

"I hate to think what he'll do to us when he sees what we've done to him."

"Oh, he won't dare to fight in the presence of his little bridey-widey. Do you see the porter in there?"

"Yes, suppose he objects."

"Well, we have the tickets. We'll claim it's our section till Mallory and Mrs. Mallory come."

They moved on into the car, where the porter confronted them. When he saw that they were loaded with bundles of all shapes and sizes, he waved them away with scorn:

"The emigrant sleeps runs only Toosdays and Thursdays."

From behind the first mask of packages came a brisk military answer:

"You black hound! About face—forward march! Section number one."

The porter retreated down the aisle, apologizing glibly. "'Scuse me for questioning you, but you-all's baggage looked kind o' eccentric at first."

The two young men dumped their parcels on the seats and began to unwrap them hastily.

"If Mallory catches us, he'll kill us," said Lieutenant Shaw. Lieutenant Hudson only laughed and drew out a long streamer of white satin ribbon, its glimmer, and the glimmering eyes of the young man excited Mrs. Whitcomb so much that after a little hesitance she moved forward, followed by the jealous Ashton.

"Oh, what's up?" she ventured. "It looks like something bridal."

"Talk about womanly intuition!" said Lieutenant Hudson, with an ingratiating salaam.

And then they explained to her that their classmate at West Point, being ordered suddenly to the Philippines, had arranged to elope with his beloved Marjorie Newton; had asked them to get the tickets and check the baggage while he stopped at a minister's to 'get spliced and hike for Manila by this train."

Having recounted this plan in the full belief that it was even at that moment being carried out successfully, Lieutenant Hudson, with a ghoulish smile, explained:

"Being old friends of the bride and groom, we want to fix their section up in style and make them truly comfortable."

"Delicious!" gushed Mrs. Whitcomb. "But you ought to have some rice and old shoes."

"Here's the rice," said Hudson.

"Here's the old shoes," said Shaw.

"Lovely!" cried Mrs. Whitcomb, but then she grew sobered. "I should think, though, that they—the young couple—would have preferred a stateroom."

"Of course," said Hudson, almost blushing, "but it was taken. This was the best we could do for them."

"That's why we want to make it nice and bride-like," said Shaw. "Perhaps you could help us—a woman's touch—"

"Oh, I'd love to," she glowed, hastening into the section among the young men and the bundles. The unusual stir attracted the porter's suspicions. He came forward with a look of authority:

"'Scuse me, but wha—what's all this?"

"Vanish—get out," said Hudson, poking a coin at him. As he turned to obey, Mrs. Whitcomb checked him with: "Oh, Porter, could you get us a hammer and some nails?"

The porter almost blanched: "Good Lawd, Miss, you ain't allowin' to drive nails in that woodwork, is you?" That woodwork was to him what the altar is to the priest.

But Hudson, resorting to heroic measures, hypnotized him with a two-dollar bill: "Here, take this and see nothing, hear nothing, say nothing." The porter caressed it and chuckled: "I'm blind, deaf and speechless." He turned away, only to come back at once with a timid "'Scuse me!"

"You here yet?" growled Hudson.

Anxiously the porter pleaded: "I just want to ast one question. Is you all fixin' up for a bridal couple?"

"Foolish question, number eight million, forty-three," said Shaw. "Answer, no, we are."

The porter's face glistened like fresh stove polish as he gloated over the prospect. "I tell you, it'll be mighty refreshin' to have a bridal couple on bode! This dog-on Reno train don't carry nothin' much but divorcees. I'm just nachally hongry for a bridal couple."

"Brile coup-hic-le?" came a voice, like an echo that had somehow become intoxicated in transit. It was Little Jimmie Wellington, looking for more sympathy. "Whass sis about brile couple?"

"Why, here's Little Buttercup!" sang out young Hudson, looking at him in amazed amusement.

"Did I un'stan' somebody say you're preparing for brile coupl'?"

Lieutenant Shaw grinned. "I don't know what you understood, but that's what we're doing."

Immediately Wellington's great face began to churn and work like a big eddy in a river. Suddenly he was weeping. "Excuse these tears, gentlemen, but I once—I was once a b-b-bride myself."

"He looks like a whole wedding party," was Ashton's only comment on the copious grief. It was poor Wellington's fate to hunt as vainly for sympathy as Diogenes for honesty. The decorators either ignored him or shunted him aside. They were interested in a strange contrivance of ribbons and a box that Shaw produced.

"That," Hudson explained, "is a little tie grip. We hang that up there and when the bridal couple sit down—zing! a shower of rice all over them. It's bad, eh?"

Everybody agreed that it was a happy thought, and even Jimmie Wellington, like a great baby, bounding from tears to laughter on the instant, was chortling: "A rishe trap! That's absolootly splendid—greatest 'vension modern times. I must stick around and see her when she hops." And then he lurched forward like a too-obliging elephant. "Let me help you."

Mrs. Whitcomb, who had, now mounted a step ladder and poised herself as gracefully as possible, shrieked with alarm, as she saw Wellington's bulk rolling toward her frail support.

"If Hudson and Shaw had not been football veterans at West Point and had not known just what to do when the center rush comes bucking the line, they could never have blocked that flying wedge. But they checked him and impelled him backward through his own curtains into his own berth.

Finding himself on his back, he decided to remain there. And there he remained, oblivious of the carnival preparations going on just outside his canopy.

CHAPTER VII.

The Masked Minister.

Being an angel must have this great advantage at least, that one may sit in the grandstand overlooking the earth and enjoy the ludicrous blunder of that great blind man's buff we call life.

This night, if any angels were watching Chicago, the Mallory mix-up must have given them a good laugh, or a good cry—according to their natures.

Here were Mallory and Marjorie, still merely engaged, bitterly regretting their inability to get married and to continue their journey together. There in the car were the giggling conspirators preparing a bridal mockery for their sweet confusion.

Then the angels might have nudged one another and said:

"Oh, it's all right now. There goes the minister hurrying to their very car. Mallory has the license in his pocket, and here comes the parson. Hooray!"

And then the angelic cheer must have died out as the one great hurrah of a crowded ball-ground is quenched in air when the home team's vitally needed home run swerves outside the line and drops useless as a stupid foul ball.

In a shabby old hack, were two of the happiest runaways that ever sought a train. They were not miserable like the young couple in the taxicab. They were white-haired both. They had been married for thirty years. Yet this was their real honeymoon, their real elopement.

The little woman in the timid gray bonnet clapped her hands and tittered like a schoolgirl.

"Oh, Walter, I can't believe we're really going to leave Ypsilanti for a while. Oh, but you've earned it after thirty years of being a preacher."

"Hush. Don't let me hear you say the awful word," said the little old man in the little black hat and the close-fitting black bib. "I'm so tired of it, Sally, I don't want anybody on the train to know it."

"They can't help guessing it, with your collar buttoned behind."

And then the amazing minister actually dared to say, "Here's where I change it around." What's more, he actually did it. Actually took off his collar and buttoned it in the front. The old carriage seemed almost to rock with the earthquake of the deed.

"Why, Walter Temple!" his wife exclaimed. "What would they say in Ypsilanti?"

"They'll never know," he answered, defiantly.

"But your bib!" she said.

"I've thought of that, too," he cried, as he whipped it off and stuffed it into a handbag. "Look, what I've bought." And he dangled before her startled eyes a long affair which the sudden light from a passing lamp-post revealed to be nothing less than a flaming red tie.

The old lady touched it to make sure she was not dreaming it. Then, emitting further parley with fate, she snatched it away, put it round his neck, and, since her arms were embracing him, kissed him twice before she knotted the ribbon into a flaming bow. She sat back and regarded the vision a moment, then flung her arms round him and hugged him till he gasped:

"Watch out—watch out. Don't crush my cigars."

"Cigars! Cigars!" she echoed, in a daze.

And then the astounding husband produced them in proof.

"Genuine Lillian Russells—five cents straight."

"But I never saw you smoke."

"Haven't taken a puff since I was a young fellow," he grinned, wagging his head. "But now it's my vacation, and I'm going to smoke up."

She squeezed his hand with an earlier ardor: "Now you're the old Walter Temple I used to know."

"Sally," he said, "I've been traveling through life on a half-fare ticket. Now I'm going to have my little fling. And you brace up, too, and be the old mischievous Sally I used to know. Aren't you glad to be away from those sewing circles and gossip-bees, and —"

"Ugh! Don't ever mention them," she shuddered. Then she, too, felt a tinge of recurring springtide. "If you start to smoking, I think I'll take up flirting once more."

He pinched her cheek and laughed. "As the saying is, go as far as you desire and I'll leave the coast clear."

He kept his promise, too, for they were no sooner on the train and snugly bestowed in section five, than he was up and off.

"Where are you going?" she asked.

"To the smoking-room," he swaggered, brandishing a dangerous looking cigar.

"Oh, Walter," she snickered, "I feel like a young runaway."

"You look like one. Be careful not to let anybody know that you're a"—he lowered his voice—"an old preacher's wife."

"I'm as ashamed of it as you are," she whispered. Then he threw her a kiss and a wink. She threw him a kiss and winked too. And he went along the aisle eyeing his cigar gloatingly. As he entered the smoking-room, lighted the weed and blew out a great puff with a sigh of rapture, who could have taken him, with his feet cocked up, and his red tie rakishly askew, for a minister?

And Sally herself was busy disguising herself, loosening up her hair coquettishly, smiling the primness out of the set corners of her mouth and even—let the truth be told at all costs—even passing a pink-powdered puff over her pale cheeks with guilty surreptition.

Thus arrayed she was soon joining the conspirators bedecking the bower for the expected bride and groom. She was the youngest and most mischievous of the lot. She felt herself a bride again, and vowed to protect this timid little wife to come from too much hilarity at the hands of the conspirators.

(TO BE CONTINUED.)

REV. TEMPLE'S FIRST CIGAR.

BLIND MAN'S SIGHT RESTORED

Piece of Cornea From Dead Animal Transplanted, Is Hailed as Triumph of Surgery.

The French Academy of Sciences announces the success of an operation on a blind man, performed seven months ago and watched carefully ever since.

A workman had an eye burned by quicklime, so that the cornea had become opaque. It has long been the dream of scientists to transplant the cornea from animals to man, but so far this has been tried without success.

This transparent cornea is one of the most delicate parts of the human organism. Very soon after death, or after the removal of the eye from a living person, for that matter, it becomes opaque and begins to break up.

But M. Magitot has found a way to preserve its transparency. In the case in question it had been kept a week before a piece of it was fitted into the depression made by removing a quarter-inch square section of the cornea of the blind man's eye.

Now, after seven months' observation by the surgeon, the eye is pronounced well, and he can see with it—dimly, it is true, but still he sees.

Was Ill and Didn't Know It.

John Wilson, a naval pensioner who has died at Benhill, Sussex, aged 102, did not know that he was a centenarian. His true age was only discovered after his death, when his naval service papers were examined. Previously his age had been estimated from the date of his baptism at 99.—London Daily Mail.

Cheerful Philosopher.

Fontenelle, the French writer, was always cheerful, and this is perhaps why he lived to be one hundred years old. He used to say: "Without cheerfulness what is philosophy worth?" When about to die, he said: "I do not suffer, my friend; I only feel a certain difficulty in living."

A smooth man is liable to be slippery.

Don't be misled. Ask for Red Cross Ball Blue. Makes beautiful white clothes. At all good grocers.

A Dare.

To the Editor—Why do the most worthless men often get the best wives?

Answer—I don't know. Ask your husband.—Smart Set.

Important to Mothers.
Examine carefully every bottle of CASTORIA, a safe and sure remedy for Infants and children, and see that it
Bears the Signature of Chas. H. Fletcher
In Use For Over 30 Years.
Children Cry for Fletcher's Castoria

Different.

Daughter—Since it is your wish, dear parents, that I should marry the rich old brewer, I consent, although he is seventy years old.

Mother—But he is only sixty.

Daughter—Sixty! Tell him to ask me again in ten years.—Meggendorfer Blaetter.

Congratulated.

Prize Fighter (entering school with his son)—You give this boy o' mine a thrashin' yesterday, didn't you?

Schoolmaster (very nervous)—Well—I—er—perhaps—

Prize Fighter—Well, give us your hand; you're a champion. I can't do nothin' with 'im myself.—Punch.

The New Sport.

"These here New Yorkers is bound to have their sports, I see," said Uncle Silas.

"In what way?" asked the boarder.

"Why," said Uncle Silas, "sence they give up hoss-racin' they've gone in heavy for the turkey trot. Don't seem to me's if that could be very excitin'."—Harper's Weekly.

Red Cross Seals Being Printed.

Seventy-five million Red Cross seals are now being printed for the holiday sale of these anti-tuberculosis stickers for 1912. The National Association for the Study and Prevention of Tuberculosis, which in co-operation with the American Red Cross will conduct the sale, makes this announcement and states further that the outlook this year is bright for a higher sale than ever before.

The seal this year is said to be the best of its kind that the Red Cross has ever issued. The design is in three colors, red, green and gray. A Santa Claus head in the three colors is shown in the center surrounded by holly wreaths. In each corner is a small red cross. The seal bears the greeting, "Merry Christmas, Happy New Year, American Red Cross, 1912."

FAMILY RUNT

Kansas Man Says Coffee Made Him That.

"Coffee has been used in our family of eleven—father, mother, five sons and four daughters—for thirty years. I am the eldest of the boys and have always been considered the runt of the family and a coffee loper.

"I continued to drink it for years until I grew to be a man, and then I found I had stomach trouble, nervous headaches, poor circulation, was unable to do a full day's work, took medicine for this, that and the other thing, without the least benefit. In fact I only weighed 116 when I was 28.

"Then I changed from coffee to Postum, being the first one in our family to do so. I noticed, as did the rest of the family, that I was surely gaining strength and flesh. Shortly after I was visiting my cousin who said, 'You look so much better—you're getting fat.'

"At breakfast his wife passed me a cup of coffee, as she knew I was always much a coffee drinker, but I said, 'No, thank you.'

"'What!' said my cousin, 'you quit coffee? What do you drink?'

"'Postum,' I said, 'or water, and I am well.' They did not know what Postum was, but my cousin had stomach trouble and could not sleep at night from drinking coffee three times a day. He was glad to learn about Postum, but said he never knew coffee would hurt anyone." (Tea is just as injurious as coffee because it contains caffeine, the same drug found in coffee.)

"After understanding my condition and how I got well he knew what to do for himself. He discovered that coffee was the cause of his trouble as he never used tobacco or anything else of the kind. You should see the change in him now. We both believe that if persons who suffer from coffee drinking would stop and use Postum they could build back to health and happiness." Name given by Postum Co., Battle Creek, Mich.

"There's a reason." Read the little book, "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Queen Candace's City in the Soudan

THE TEMPLE OF AMMON

AT the conclusion of three seasons' excavation we are now able to trace the growth and realize the general appearance of Meroe, once the capital of ancient Ethiopia, in the Sudan, between Atbara and Khartoum. The whole site included several distinct portions. Near the river was the Royal City with its palaces; beyond that a large area forming the township, in which were the dwellings of artisans, and doubtless of the soldiery; while, interspersed, there rose here and there great temples and public buildings. Further still towards the east (about three-quarters of a mile from the river bank, and just on the further side of the modern railway) on the outskirts of the desert, is a vast Necropolis, extending two or three miles to the north and south, containing thousands of ancient tombs and burying places. Still further in the desert, the Sun Temple stands alone; and beyond that again, some distance to the northeast, are the well known pyramids. North and south of the central area there are now extensive woods of stunted mimosa, so that the limits of the township are not yet determined; but in the former considerable buildings containing baths and yielding Meroitic inscriptions have been found in a clearing more than a mile from the city.

COMING TO LIGHT

THE VENUS OF MEROE

That which we call the Royal City is a four-sided enclosure, 1,000 feet by 500, surrounded by a stone wall, about fifteen feet in thickness, built of splendid ashlar. The height of this wall must have been originally, we may suppose, thirty or forty feet: at one point it is still preserved to half that height. There are two main entrances in the middle of the eastern walls, which are its longest sides; and two posterns, one to the north and one to the south. In the southern part of the enclosure are the royal palaces, built, like the walls of this citadel, in the age of the Ethiopian King Aspelut, or just before in the seventh or eight century B. C.

Naturally, we have not yet been able to penetrate to the bottom all over this area, for many later buildings nearer the surface must be examined first. The original plan of the whole city is thus not yet clear; but several of the earliest buildings have already been examined in the northern portion: amongst these are several columned halls. It was under the threshold of one of these that, last year, we found the Bronze Head of Augustus, which had seemingly been carefully buried out of sight. In one of the Royal Palaces we also had the good fortune last year to be able to locate the ancient treasury, and though this had been completely ransacked and its walls destroyed, two pots, full of gold, and containing what was more important for us, inscribed jewels were found hidden under the foundation of neighboring walls. By the side of this palace, the past season's excavations have brought to light the Royal Baths, decorated with colonnades, frescoes, glazed tiles, and remarkable statues based on classical models, as will be seen from the accompanying photographs. Outside the city wall, to the east, is the great Temple of Ammon, the axis of which, from door to altar, is about 450 feet in length. The central avenue, with its columned halls and sanctuaries, has now been excavated, so that you may walk along its original pavements, see where animals were sacrificed, where the great swinging door closed off the sanctuaries from the public hall, and finally, reach the high altar, which remains in its original position. It is of black stone, decorated with carvings in relief; and at the foot of it, during our excavations, we found actually the last votive offering which had been placed upon it.

Passing then, still eastward, through the Temple of Ammon, there is found a decorative kiosque, outside its main entrance; and to the south is a great building, recently found, which we have not yet completely excavated, though we have determined that it contains more than forty chambers. It was probably the official palace in the early centuries A. D.

To the north of these greater buildings is the great area to which we have alluded, wherein were the dwellings and workshops of workers in metal; and, beyond these, extensive pottery kilns, in which the last embers of the fires remain, with innumerable vases and fragments thrown around.

Passing still eastward, we see the tombs, marked on the surface of the desert either by a low mound or a ring of stones. Their chambers are gained generally by a short slope from the east. Inside, the dead lay upon their beds or upon mats; great storage vessels for water and other drinks occupied the northern end of the chamber; while smaller objects, baskets, vessels, and dishes of better quality were commonly arranged around the head at the southern end. In obedience to primitive instincts, a warrior was buried with his weapons, which were of iron (namely, sword, dagger, spear, and knives); and the huntsman with his bow. In one case even the hounds of the huntsman had been immolated and buried with him.

In the broadest of the green valleys that lead down from the deserts, the Sun Temple is found rising up in a series of terraces, surrounded by a beautifully designed cloister, its sanctuary gained by a flight of steps leading upwards from the east. This chamber was paved and walled with glazed tiles, many of which remain in their original position. It contained an obelisk or altar dedicated to the sun, and other emblems of the cult, including a large solar disc.

The outer walls of this building are decorated with scenes representing the royal progress after victory. Amongst these scenes are those which indicate the torture and sacrifice of captives; and in a small chamber attached to the southern wall of the temple there was found, buried, a quantity of jars filled with charcoal and what seemed like cremated human remains.

Such, in brief, is the general outline of the city, but there are a hundred features of detail which could not be visited in a day, nor described within the scope of this short article.

Love Not Severed By Death

Instances, Not Too Well Authenticated, Where Affection Has Existed Beyond the Tomb.

Each year during the month of May, a number of romantic persons, usually lovers, visit the grave of Abelard and Heloise, in the cemetery of Pere la Chaise, Paris and place on it a tribute of flowers. The bodies of these noted unhappy lovers were originally buried at Tours, and were removed to Pere la Chaise in 1800. Heloise survived Abelard 21 years, and the Chronicle of Tours reports that when the tomb of Abelard was opened for the body of Heloise, Abelard held out his hand to welcome her. This legend has been approved by a French author, who gives other like instances, one of a senator at Dijon, who, having been buried 25 years, opened his arms to embrace his wife when she was lowered into the same tomb. The politeness of French husbands, their tender conjugal civilities, have been conceived by everyone, but they must not be permitted to carry off these posthumous honors as a monopoly, nor must the sex feminine for an affection that extends beyond death. It is related that Queen Margaret of Scotland, many years after death, when it was found necessary to remove her body from Dunfermline abbey, where it lay beside her husband, King Malcolm, refused to budge. The body was so heavy there was no moving it. The monks were at a loss what to do; when one of them suggested that the queen refused to be moved without her husband. Malcolm was then raised and immediately the body of the queen resumed its ordinary levity and the removal was made.

Life is short and we have never too much time for gladdening the hearts of those who are traveling the dark journey with us. O! be swift to love, make haste to be kind.—Amiel.

Firing an Aero Bomb

Highly satisfactory results have just been obtained in the series of experiments carried out to test several methods of dropping bombs from aeroplanes on a given spot. Though they are far from having reached perfection, two appliances invented by the Farman brothers, have already given great satisfaction to army experts. Details of their mechanism are, of course, kept secret, but as regards one of them, it is known that the method employed is that of, first of all, locating the target by dropping a dummy bomb, which on exploding spreads out a white powder easily visible to the pilot. This bomb once dropped, the machine is turned back, and the pilot, knowing his height by his barograph and the speed at which he is flying, can by means of an aiming apparatus and the ordinary principles of gunnery locate his next shot to a nicety. The other apparatus, much more complicated, requires to be handled by an experienced officer, and therefore, can only be employed in two-seated aeroplanes, carrying besides a pilot, a bomb-dropping specialist.—Leslie's.

PROOF ENOUGH.

Mrs. Love—Yes, Frod's love is cooling.

Mrs. Dove—What makes you think so?

Mrs. Love—When we were on our honeymoon he broke two teeth trying to eat my biscuits. Now he soaks them in hot tea for half an hour.

RED, ROUGH HANDS MADE SOFT AND WHITE

For red, rough, chapped and bleeding hands, dry, fissured, itching, burning palms, and painful finger-ends, with shapeless nails, a one-night Cuticura treatment works wonders. Directions: Soak the hands, on retiring, in hot water and Cuticura Soap. Dry, anoint with Cuticura Ointment, and wear soft bandages or old, loose gloves during the night. These pure, sweet and gentle emollients preserve the hands, prevent redness, roughness and chapping, and impart in a single night that velvety softness and whiteness so much desired by women. For those whose occupations tend to injure the hands, Cuticura Soap and Cuticura Ointment are wonderful.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston."

Too Sleepy.

Physician—What can I do for you?

Patient—My foot gets asleep often and I want something to give it insomnia.

Paxtine Antiseptic sprayed into the nasal passages is a surprisingly successful remedy for catarrh. At druggists, 25c a box or sent postpaid on receipt of price by The Paxton Toilet Co., Boston, Mass.

Eph Wiley says he has noticed that the man with a long chin is the one most likely to accentuate it by wearing whiskers.

Makes the laundress happy—that's Red Cross Ball Blue. Makes beautiful, clear white clothes. All good grocers.

And many a father loses all interest in the prohibition movement when the baby cries for water at 2:00 a. m.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

In the eyes of a silly girl clothes make a mighty poor specimen of a man look like the real thing.

Sharp Pains In the Back

Point to Hidden Kidney Trouble.

Have you a lame back, aching day and night?

Do you feel a sharp pain after bending over?

When the kidneys seem sore and the action irregular, use Doan's Kidney Pills, which have cured thousands.

A Colorado Case

John T. Scantling, Trinidad, Colo., says: "I was confined to bed so helpless I had to be fed. Nothing helped me until I used Doan's Kidney Pills, and they did me a world of good. I have never missed a day's work since."

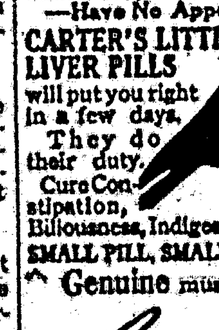
WHERE DOCTORS FAILED TO HELP

Lydia E. Pinkham's Vegetable Compound Restored Mrs. Green's Health—Her Own Statement.

Covington, Mo.—"Your medicine has done me more good than all the doctor's medicines. At every monthly period I had to stay in bed four days because of hemorrhages, and my back was so weak I could hardly walk. I have been taking Lydia E. Pinkham's Vegetable Compound and now I can stay up and do my work. I think it is the best medicine on earth for women."—Mrs. JENNIE GREEN, Covington, Mo.



How Mrs. Cline Avoided Operation.

Brownsville, Ind.—"I can say that Lydia E. Pinkham's Vegetable Compound has done me more good than anything else. One doctor said I must be operated upon for a serious female trouble and that nothing could help me but an operation.

"I had hemorrhages and at times could not get any medicine to stop them. I got in such a weak condition that I would have died if I had not got relief soon.

"Several women who had taken your Compound, told me to try it and I did, and found it to be the right medicine to build up the system and overcome female troubles.

"I am now in great deal better health than I ever expected to be, so I think I ought to thank you for it."—Mrs. O. M. CLINE, S. Main St., Brownsville, Ind.
