

CARRIZOZO OUTLOOK

Published Weekly in the Interest of Carrizozo, and Lincoln County

VOL. VII NO. 45

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, AUGUST 22, 1913.

PRICE \$1.50 PER YEAR

FARMERS BULLETINS

Valuable Information Issued by Government for Local Farmers Free

LIST OF BULLETINS GIVEN

Since it is the desire on the part of the Outlook to be of real value to the farmer and the dairyman the Outlook has secured a list of publications that will be sent free upon application. It is not necessary to write your congressman nor is it necessary to inclose any postage. It is hoped that our farmers will keep this paper on file and write for the bulletins desired. The department should not be burdened by being asked to supply the whole list or any of the bulletins that are of no value to this section but if you will select a few of the bulletins that will be of real value to you they will gladly be sent upon application.

Address your letter to Secretary of Agriculture Division of Publications, at Washington, D. C., and ask to have bulletins that you desire sent as

- 22. The Feeding of Farm Animals
- 51. Standard Varieties of Chickens
- 52. The Sugar Beet
- 105. Breeds of Dairy Cattle
- 134. Tree Planting on Rural School Grounds.
- 154. How to Build Small Irrigation Ditches
- 174. Broom Corn
- 205. Pig Management
- 204. The Use of Windmills in Irrigation in the Semi-arid West.
- 428. Testing Farm Seeds in the Home and in the Rural School.
- 505. Benefits of Improved Roads
- 506. The Bulletin given below are up date the last having been issued in July of the year.
- 35. Potato Culture
- 55. The Dairy Herd
- 61. Asparagus Culture
- 62. Marketing Farm Produce
- 64. Ducks and Geese
- 68. Alkali Lands
- 91. Potato Diseases and Their Treatment
- 99. Insect Enemies of Shade Trees
- 101. Millet
- 104. Notes on Frost
- 113. The Apple and How to Grow it
- 120. Insects Affecting Tobacco
- 121. Beans, Peas, and Other Legumes as Food.
- 127. Important Insecticides
- 128. Eggs and Their Uses as Food
- 131. Household Tests for Detection of Oleomargarine and Renovated Butter
- 137. The Angora Goat
- 138. Irrigation in Field and Garden
- 139. Emmet. A Grain for the Semi-arid regions
- 142. Principles of Nutrition and Nutritive Value of Food
- 152. Scabies of Cattle
- 154. The Home Fruit Garden: Preparation and Care
- 155. How Insects Affect Health in Rural Districts
- 157. The Propagation of Plants
- 158. How to Build Small Irrigation Ditches
- 161. Rape as a Forage Crop
- 166. Cheese Making on the Farm.
- 167. Cassava
- 170. Principles of Horse Feeding
- 173. Primer of Forestry. Part 1: The Forest
- 174. Broom corn
- 175. Home Manufacture and Use of Unfermented Grape Juice
- 177. Squash Raising
- 179. Horseshoeing
- 181. Pruning
- 182. Poultry as Food
- 183. Meat on the Farm; Butchering, Curing, and Keeping
- 185. Beautifying the Home Grounds
- 189. Weeds used as medicine
- 192. Barnyard Manure
- 196. Usefulness of the American Toad
- 198. Strawberries
- 200. Turkeys
- 203. Canned Fruits, Preserves, and Jellies
- 204. Cultivation of Mushrooms
- 208. Milk fever and Its Treatment.
- 212. Raspberries
- 218. The School Garden.
- 220. Tomatoes
- 229. The Production of Good Seed Corn
- 232. Oats: Its Culture and Uses

(Continued on Page Four)

ODD FELLOW DOINGS

A large number of the local Odd Fellows went to Capitan Saturday evening where they had been invited by the sister lodge of that place to do some initiatory work. The crowd left Carrizozo about 7 o'clock in the Sam Hale railroad auto outfit of Capitan and reached the little mountain village about 9 o'clock where they were cordially received by a committee and escorted to the lodge hall where work in the Initiatory was begun. After three and one half hours of hard work the Initiatory was finished and all present repaired to Hotel Dawson where a banquet was served to about forty. At one thirty not being through with the work that had been arranged for all returned to the lodge room where they gave the candidates the First and Second degrees, conferring upon them two degrees and the Initiatory, during the evening, this being done by a special dispensation from the grand lodge. The work was not finished until the wee small hours of the morning, and when the crowd reached home old Sol was just peeping over Mount Carrizo. Our boys speak very highly of the manner in which they were entertained by the Capitan members and upon leaving voted their thanks to the lodge and to Sam Hale for his kindness in affording them such a splendid trip. Among those who attended were:

Wm Barnett, Syd Anderson, Allen Johnson, Dr. Robt T. Lucas, J. F. Morse, Chas. A. Stevens, J. L. Street, Miles B. Foreman, A. B. Hamilton, Alexander Adams, (Calvin Carl, Wm Kahler, Jr., J. B. Diswidde and C. W. Bruton.

TREE PRIZES AWARDED

The prizes for the best tree planted and grown by a child outside of the local school grounds were awarded this week on Wednesday after the Judges had carefully inspected the various trees planted by the children. The Judges were Mrs. D. D. Tiffany, Mr. Fred Jones and Mr. John E. Bell. Mrs. H. B. Hamilton had offered awards of \$5.00 for the best tree, \$3.00 for the next best and \$2.00 for the third prize. In addition to these prizes Mrs. Wallace L. Gumm offered five prizes of \$1.00 each for the five best trees grown by the children. The contest has stimulated quite a little activity among the younger folk in tree planting and has done much toward the future beautifying of the town. The prizes awarded were as follows: 1st Prize \$6.00, Kitty Timmon; 2nd prize Beal Foster, \$4.00; 4th prize Don English, \$1.00; 5th prize Kattie Textor, \$1.00.

SPLENDID STREETS

Carrizozo now has several miles of splendid streets. Some time ago the four principal streets of the city were graded and put in fine condition. Now, they have been covered with cinders supplied by the E. P. & S. W. railroad company. The recent rains have made them solid and the driving of autos and vehicles over them made them perfect.

W. F. Lucas of Albuquerque was a business visitor to Carrizozo Thursday and Friday.

Messrs. Lane, Jetty and West from the Alto country came down Thursday on the train and left that night for the Socialists convention which is being held in Mountainair.

S. L. Northlake returned from the hospital at El Paso this week and left on a vacation to his old Indiana home. The injured hand has not as yet sufficiently repaired to enable him to return to duty here.

BASEBALL FANS ACTIVE

Carrizozo Wins Two Contests. One From Capitan; One From Fort Stanton

LAST SATURDAY AND SUNDAY

What many of the spectators termed as the best two baseball games of the season were played last Saturday and Sunday when the Carrizozo Browns met the Capitan team at that town on Saturday and the Fort Stanton team at Stanton Sunday.

The friendly rivalry between the teams had made the contests more than usually interesting and the fact that Carrizozo took away the honors in both contests made the rooting from the county seat merry but not without consideration of the good points shown in the contests by the competing teams.

CAPITAN 3; CARRIZOZO 0.

The game with Capitan opened up last Saturday afternoon with Gid Thorpe in the box for Capitan and Fisher handling the pill for the Browns. Thorpe pitched a very clever game as well as Fisher who comes from El Paso but Thorpe could not hold the Brown boys down when they had their batting clothes on. The Carrizozo boys rapped out about 7 hits and put six scores over the home plate while the Capitan boys were allowed but 3 runs. The third inning was the climax for Thorpe when he let in four runs, largely due to his support. Wm Ferguson umpired the game.

The score by innings is as follows:

Carrizozo	1	2	3	4	5	6	7	8	9
Capitan	0	0	0	2	0	0	0	0	0
The Line Up:	2	1	0	0	0	0	0	0	0

FORT STANTON 4; CARRIZOZO 11

The game Sunday except at the early stages did not appear to be nearly so close a contest although Stantonites were confident of victory when in the first inning the score stood two to one in their favor. Silence soon prevailed among them however, as Carrizozo soon had several more scores with the addition of but two for Stanton. Grumbles for Carrizozo with Van Schoyck behind the bat did the heavy work for the Browns and Grumbles pitched a fine game. Graver Hightower and Willie Norman were the battery for the Fort and played very consistent ball but needed more backing by their team. In the 4th inning eight of Carrizozo's nine men batted and four clean hits were tallied. It is impossible in the space allotted to give the details as we would wish.

The score by innings was as follows:

Carrizozo	1	2	3	4	5	6	7	8	9
Stanton	0	0	4	2	0	2	2	0	11
The Line Up:	0	0	0	0	0	0	0	0	4

NOTES ON THE GAME

Eight auto loads of Carrizozo and White Oaks fans made the trip to Fort Stanton Sunday to witness the game. The rooting was interesting at times.

Willie Norman who plays with both of the teams from over the hill is showing remarkable aptness

for ball playing; he plays a very consistent game at all times.

A number of the players on both teams showed good form and deserve mention of their work.

One of the Carrizozo fans who spent the night at Stanton admits that Stanton players can win at one game at least, it is sometimes called the National game at that.

In both contests the umpires who were native sons picked by the Capitan and Fort Stanton teams themselves were later objected to on points. This feature of the game is always unpleasant and should be avoided.

Carrizozo hopes to entertain both the Capitan and Fort Stanton teams here on the 30th and 31st of this month, or in a week. Definite arrangements have not as yet been made.

Carrizozo now has won five games straight, who is going to break the charm.

RAILROAD RUMBLES

Oscar Clouse, who was on the extra board for some time, went back to Tucumcari last week.

Conductor W. W. Rogers of Tucumcari was in charge of No. 33 yesterday.

Work is progressing nicely on the new bridge that is being put in a few miles east of town.

Alva Tomlinson, who has been spending his honeymoon in Arizona has reported for work at the Carrizozo shops.

Engineer Scotty Bell, who has been on a visit to western Texas for several weeks, is back on his regular run again.

C. J. Terry, who is in charge of the R. R. Club house here, has just returned from a vacation of several weeks spent in Oklahoma and Illinois. He brought Mrs. Terry and daughter with him and they are living in the Tice property opposite the Baptist Church.

CAPITAN CORRESPONDENCE

Mrs. Geo. A. Titsworth has returned from her two months' visit to New Jersey.

Mrs. R. V. Provins has also returned from a few days visit with her mother at Lincoln.

Prof. Charles L. Shreck, Superintendent of the Lincoln County High School, arrived at Capitan Monday, and immediately began work preparatory to commencing school on September the 8th. Repair work on the school building commenced Thursday, and the new recitation seats arrived and were moved into the building Tuesday.

FULL HIGH SCHOOL COURSE

That Carrizozo is to have a full high school course in its regular school course does not seem to be understood by the people of Carrizozo general. The local school directors have requested us to say that the high school courses will be just as before in the Carrizozo school with the addition of several new studies. The fact that Capitan is to have a High School does not prevent Carrizozo from continuing its policy of maintaining a high school out of its regular levy. Prof. McCurdy the new principal and Miss Jewett of Alamogordo will have the High School work in charge and the class this year is assured splendid instruction.

The Carrizozo schools are to open on Monday, September the 8th, and the Board requests that the scholars enroll as early as possible, especially in the high school courses.

LOCAL AND PERSONAL

News of Interest of our Towns People and of Outsiders Visiting in our Midst

GATHERED DURING THE WEEK

Uncle Tom Henley of Nogal was in Carrizozo yesterday on business.

James L. Street of Coyote was in Carrizozo Thursday.

Mrs. G. A. Williams has joined her husband and daughter, from Alamo and will remain here permanently.

J. F. Morse, James N. Gray, Henry West and Calvin Carl are among the recent subscribers to the Outlook.

Mrs. W. P. Tapp has returned to her home in Alamogordo after a several weeks' visit with her daughter, Mrs. Harry B. Dawson.

Frank Pearson who lives six miles east, was in town Wednesday on business, and reports a good rain in his section Monday night.

On Monday the prisoners from the Lincoln jail arrived and are now housed in the new jail. Al Roberts added two prisoners from here to the seven from Lincoln soon after their arrival.

District Attorney Hamilton will leave tomorrow for Las Cruces where Court opens next week. The Hamilton family will winter in El Paso so the boys can attend the schools there.

Will Thornborrow who homesteaded here and is now located in Canton Illinois, returned this week for a twenty day visit which he will spend in doing the annual work on the Easter Sunday claims in the White mountains which he owns.

Calvin Carl left Wednesday evening for his old home at Herndon, Pa., where he will visit his parents whom he has not seen for twenty three years. He expects to be gone about six weeks and will visit relatives in Indiana and Michigan before returning to Carrizozo.

Heston Shaffey of Three Rivers, now White Mountain, filed on an additional 160 acres adjoining his homestead near Three Rivers this week. He was accompanied to Carrizozo by Norman Riggs who will leave shortly for a visit with relatives in Maine, whom he has not seen in several years.

Within a week the County officials will be doing business in the new court house at Carrizozo. The Commissioners will meet about the 10th of September to formally accept the building and soon after that date the Carrizozo Fall Festival will be on for three days when a celebration is scheduled for part of the program.

Col. J. C. Bender of Nogal was in Carrizozo Wednesday en route to El Paso with some fine specimens of ore which he has recently struck in his mine at Nogal. He had several assays in which the ore run in the neighborhood of \$175.00 per ton. He stated that if the ore would run as high as forty dollars per ton that his recent find would make him a rich man.

The people of Carrizozo are very fortunate in being able to secure their vegetables and fruit fresh from the gardens and orchards of the county. From Nogal, Angus and the Bonito country, fresh vegetables are brought to the city every week. These vegetables are of fine quality and Carrizozo housewives are glad of the opportunity to patronize the growers. Fruit is grown in the southern part of the county and is being shipped to Carrizozo.

Money invested in a good vacation is well spent.

Somebody should provide a vaccine for sunburn and freckles.

Duck suits would be better if they were oiled the way ducks wear them.

Even hot weather isn't so bad when you can get plenty of good fresh buttermilk.

It's a poor form of Sunday recreation that requires a week for recuperation.

Paradoxical as it may seem, the heat wave was not invented by a Paris hairdresser.

When Sir Thomas Lipton gets tired of trying to lift that cup, he might try his hand at polo.

The joy ride continues to maintain its reputation as being fully as dangerous as any ride.

Now that aviation has become a business, enthusiasm has quite naturally waned a bit.

Hot weather is good for the crops. And the dispute in the Balkans is good for the Krupps.

Another foreign complication threatens. A Kansas court has decided that a pretzel is not a food.

No other business is quite so important as making the children happy and keeping them healthy.

An eastern court rules that tipping a porter is voluntary. Nevertheless it's an act of self-defense.

They never throw old shoes at a bride in Chicago. A Chicago shoe is classed as a deadly weapon.

We suppose that in a couple of hundred years from now there will be a society of descendants of those who came over in the Imperator.

Boy pupils who detest the decimal system should be reminded that when they grow up it will come in handy in computing the batting averages.

Our old friend Wu Ting-fang may again visit the United States. He will be warmly welcomed, no questions asked, but all answered, as usual.

"Bonsetter" Reese, called to attend a disabled dancer of the tango, left an Elsteddod to do it. However, he was not at work on the Elsteddod.

New York is trying to check drinking by the finger print system. With three fingers to consider in the average case the experts are in for overtime.

Every man knows he could do a better job than the love-making scenes that are put on in the moving picture shows.

A Chicago alienist says that love is a form of lunacy. But Shakespeare said that long before him, so it is no use reviving the discussion at this late day.

People are still taking bichloride of mercury tablets in mistake for headache remedies. This is a case in which it would pay to read the papers.

The meanest man so far has been located in New Jersey. He left his wife without support, giving as his excuse that she was suffering with tuberculosis.

Some people play tennis to keep cool.

The happy medium praised by philosophers is so hard to realize that the bather is too cold while in the water and too hot while on shore.

An American woman has sailed for Italy to find a singing bandit whom she would put in grand opera. He might be unable to keep his eye off the box office.

Though the modern college graduate knows all about everything, he is discreet enough to consult the feet from the crude person to whom he applies for a job.

Collisions between aeroplanes are a new danger of civilization. Apparently, there is not room for similar ambitions even in the boundless space of the atmosphere.

Some of our cabaret dancers should have been present the other day to take a few lessons from that riveter who dropped a hot bolt inside the waterhead of his work pants.

THE CHILDREN

THOUSANDS OF DRAGON FLIES

Queer Sight Witnessed by a French Naturalist While Making a Tour Through Morbihan.

A professor of zoology at Lille, M. Charles Barrios, was making a tour through Morbihan, in France. As he was walking along the road he noticed that a multitude of dragon flies were alighting on the telegraph wires. The singular thing about it was that they all rested at an equal distance from each other, and all occupied the same position, with head turned toward the west.

From all sides the dragon flies arrived and always placed themselves in the same position, and at the same distance from each other. They remained as if glued to the wire, motionless and paralyzed. Each new arrival flew over the fixed bodies of the others and took its place in the line. This chain stretched itself out toward the west, and turned toward the setting sun. Professor Barrios followed the route for a long distance and found the same strange phenomenon. He estimated the number at 60,000, at least. At an abrupt turn of the road to the south, the telegraph line turned also. There not a dragon fly was in sight! The wire was absolutely free from them! With the change of direction it seemed to have lost attraction for them.

Was this chance? Did the electric currents running from the east to the west exercise any influence upon these insects? Was it the solar refraction? Explain it, who can. In any case it would be interesting to know whether this phenomenon be an isolated one or not.

KING'S SIGNPOST IS QUAIN

Surmounted by Device in Oak, Depicting the God Tyr and the Great Mythological Wolf.

The illustration shows a signpost remarkable for its decorative qualities which King George of England has just had erected by the roadside near Wolferton railway station on the Sandringham estate. The post is surmounted by a device in oak, carved, painted, and gilded, depicting the god

Tyr trying to wrench his arm from the jaws of Fenrir, the great mythological wolf of the old Norsemen, after whom, it is supposed, Wolferton was named. The wolf was symbolical of Fate. In the background is a representation of the gilded rooms of Asgard.

RIDDLES.

- Why are fishermen and shepherds like beggars? Because they live by hook or by crook.
- Why is a thief picking a cofee's pocket reminded of a line in Othello? Because "who steals his purse steals trash."
- Why is a speechless like an editor? Because he polishes the understanding of his patrons.
- Why is a whisper like a forged note? Because it is uttered but not aloud (allowed).
- When is a sheep like ink? When you take it up like the pen.
- What is the best way to keep a man's love? Not to return it.
- What is a button? A small event that is always coming off.

NEAT AFTER-DINNER TRICKS

Really Interesting Scientific Experiment Showing How Compressed Air May Be Used.

An apparently empty bottle may be made to blow out a candle. The trick is really an interesting scientific experiment, showing how compressed air, directly the pressure which confines it is removed, tends to assume the normal density of the atmosphere. We take an ordinary bottle and, seeing that it is empty and dry, we place the ball of the thumb over the mouth with just a small aperture uncovered. Then, placing our mouth to this, we blow steadily and continuously into the bottle.

The result is that the air in the bottle is compressed. When we take our mouth away we insure that no air shall escape by instantly closing the whole aperture with the ball of the thumb which is already pressed over part of the opening.

Now we invert the bottle and, placing the mouth against the flame of a lighted candle, we remove so much of our hand as will make an opening sim-

ilar-to-that-into which we blow. The result is that the compressed air, directly the pressure is removed, rushes out and blows upon the flame. It is well to use a small candle, as if we have a large candle with a big flame the pressure may not be sufficient to extinguish the flame. If we perform the trick in front of a number of spectators we must not let them see us blow into the bottle. This part of the performance can be done outside the room, and we can bring the bottle in with our thumb over the opening, keeping it there till the moment when we want to release the air. This can be done in such a way as not to attract notice.

Blowing Out Candle.

METALS DEARER THAN GOLD

Iridium, for instance, is Three Times as Expensive—Osmium is Dearer and Heavier.

Gold is generally looked on as the last word in costliness, but, as a matter of fact, there are more metals dearer than gold than there are cheaper. The number of known metals is about seventy.

Iridium, for instance, of which a big find was made the other day in Austria, is three times as expensive as gold. Gold is worth nearly \$20 an ounce. Iridium is worth some \$62, though the price will probably come down now.

Osmium is another metal much dearer than gold. It costs about \$50 an ounce. It is by far the heaviest of all known substances, being more than 22 times as heavy as water. If pennies were made of osmium it would tax one's strength to carry the change of half a dollar. This metal has the peculiar property of being able to stand without melting the most intense heat known.

Palladium, about \$10 an ounce, is just the reverse. It is quite easy to make palladium vanish in steam. Being of a white, silvery color, and untarnishable, it is used for the division marks on scales and delicate scientific instruments.

VEHICLE SWING IS INVENTED

Mechanical Device Affords Exciting Exercise and Considerable Amusement for All.

The Scientific American is describing a vehicle swing, invented by O. Zimmerman of Los Angeles, Cal. says: The object of the inventor is to provide a mechanical swing arranged to provide an exhilarating exercise and considerable amusement to young and old using the swing, to insure safety in

the use of the vehicle swing and to guard against a tendency of producing discomfort of the neck. For the purpose named, use is made of a suspended seat pivotedly supporting at its lower end a supporting frame provided at one end with wheels and seats, the wheels being adapted to travel on the ground, on the floor, or rails or other suitable support.

HABITS OF BROWN ANT

Injurious Little Insect Found in All Cultivated Lands.

Forms Rather Extensive Settlements in Corn Fields, Mainly in Hills—Cultivator is Not Likely to Tear Up Nests.

(By S. A. FORBES.)

The little brown ant, notorious for its injuries to corn and called, consequently, the corn-field ant, is not by any means limited to corn fields, but is abundant in all cultivated lands, in pastures and meadows, in dense forests, along hard pathways, and in the sandy soil of dry, sunny roads. One sometimes finds it nesting in rotten wood or under bark, logs or stones, and even opening up its underground burrows to the surface between the bricks and sidewalks and pavements. It is distributed "over the whole of North America, except the extreme southern, and southwestern portions, from the tree line of the highest mountains to the sands of the shore."

Its home and habits have been chiefly studied in corn fields, and there it forms rather extensive settlements, mainly centering in the hills of corn. Several adjacent hills so occupied by it being connected by underground channels by way of which members of the same family may pass from hill to hill. This is partly, no doubt, because in corn fields it is usually in possession of plant-lice, which live on the roots of corn and which contribute to the support of the ants the "liquid surplus of their own food, but partly also because in the corn hills it is undisturbed by the cultivator, which is

Various Stages of Corn-Field Ant.

likely to tear up its nests if they are established between the rows.

In the burrows of this ant one may find a rather mixed and varied population, consisting of the eggs, larvae, pupae, males, females and workers of the ants themselves, together with the various species of root-lice harbored by them and certain kinds of mites which share its underground habitations on terms of mutual toleration, if not active friendship. In clover fields it is very likely to have in its nests many mealy-bugs of a species which infest the roots of the clover plant, and these it treats as it does the root-lice of the corn plant—seizing them and carrying them away when its nest is disturbed, just as it hurries out of sight with its own maggot-like larvae, its egg-like pupae, and its minute, spherical white eggs.

Age of Usefulness.

The average hen outlives her usefulness in two years, and is more profitably sent to market. There are at times good hens in the third and even the fourth year, but the average limit is two years. Old hens are more likely to contract disease than younger ones.

Kind to Dispose Of.

When disposing of some of the old stock, pick out the poor layers and oldest specimens. They are just as good for the table, and you can't afford to part with the money-makers.

Harvesting Hay is Science.

Harvesting hay is a science that not all of us have learned. Cut no more grass in a single day than can be taken care of at once.

Noise is Harmful.

Many horses are quite nervous by any unusual noise or confusion about the barn, and this affects their eating. Food will not digest so well.

Injurious to Pigs.

Dirt and litter taken into the stomach along with feed impair digestion and reduce the gain, also affecting the appetite and general health of the pig.

Corn for Hogs.

While ground shelled corn is somewhat more valuable for fattening hogs than is whole corn, it is not, as a rule, economical to grind corn for hogs.

USEFUL DEVICE FOR APIARY

Plan Illustrated for Capturing Swarms of Bees at Height of Twenty to Thirty Feet.

Gleanings in Bee Culture gives the accompanying plan for reaching swarms at a height of 20 to 30 feet. The hook is placed in the loose hole in one end of the pole, so that by extending this end of the pole up near the swarm, the hook can be easily placed over the limb containing the swarm. The pole is then withdrawn, leaving

A Swarm Catcher.

the hook over the limb with a light rope leading to the ground. By reversing the pole one can now bring the swarm-catcher directly under the cluster, and, by pulling on the rope, shake the bees out into it. Use muslin supported by the wire, as shown, to make the basket for the bees.

TASK OF DIGGING POTATOES

Maintained by Some Flavor and Palatability Lost by Washing, Clinging Dirt From Tubers.

Where potatoes are very dirty when taken from the field, some growers wash all the soil off them. Others maintain that it ruins their flavor and palatability. They are certainly far more cleaner and more desirable to handle when the hose has been turned on them, and the clinging, hardened dirt washed off.

If the ground is fairly dry when they are dug, and if they are allowed to take the air and the wind for a while, they will usually be clean enough to do without washing. There is every reason for digging them during such weather conditions.

Potato digging should be made a sort of an odd job, one that can be done at any time when there is nothing more pressing to do. The potato crop should be an important one, and any farmer who is forced to buy potatoes for table use should look upon himself as temporarily disgraced.

Enough potatoes are spoiled every year by careless digging to feed a city of the second class for twelve months. Only in communities where the potato is the main and staple crop is there any real care shown in digging and handling this very important food crop.

Garden Work.

The garden that is properly managed is just now in its prime. Some of the small fruits have come and gone, but many of the vegetables are just at their best, and there are yet at least three crops of sweet corn to be gathered.

Capensizing Hens.

Should your chicks turn out to be mostly roosters and not happen to be early to capture the high prices for spring chicks turn them into capons, the price is good and the market is never supplied.

Hogs and Sheep.

If the farmer is looking for quick returns in live stock and for a large percentage on the money invested, there are no animals on the farm that will beat the sow and the ewe.

Quality of Milk.

The quality of milk—that is, the amount of milk and fat that it contains—is controlled more by the constitutional characteristics of the cow than by the feed.

Shade for Hogs.

Build a shed on the highest point of the farm if possible to which the wind has a clean sweep to provide shade for the hogs. Saves flesh and money.

Dairy Calf Overlooked.

Many dairymen and farmers fail to appreciate the great importance of spending thought and feed in the development of the dairy calf during the first six months of its life.

Decking Lambs.

The lambs should have been decked before this, but if not, the job should be done at once.

THE COST of the BATTLE LUST

THE REAL EXPERIENCES OF A REAL INSURRECTO

FRED VINCENT WILLIAMS

BY RICHARD COE

The battle was lost. Even the most sanguine of Mosby's dare-devils admitted that. So, after the manner of their kind, they broke the firing-line into a hundred pieces and bunched in twos and threes scattered broadcast over the sun-baked, cactus-clad hills—soldiers of fortune, insurrectos of Mexico no longer; merely men, who had broken the laws of a land and were fleeing for their lives.

It had but one object in view—this fighting machine broken into bits, that had taken up the cause of a country other than its own—and that was to cross the American border and there seek the protection of the stars and stripes, under whose folds every mother's son of its soldiery had been born.

My bunkie and I were on the left flank when the crash came. Something hit that left flank and melted it, twisted and distorted it like so much steel put to the flame. I did not realize what it was at the time, but I do now. It was a battery, a living, breathing incarnation of hell in the shape of machine guns, handled by men who knew how to use them.

Our wing of the army melted in its hot breath. Men who had fought standing, kneeling. Men who knelt, lay down; tried to bury myself in the bosom of Mother Earth and, Mother Earth being baked adobe in that particular spot, I took to my heels.

It was the beginning of the end. Everybody was running, so what was the use of remaining? They were ten to one against us, this enemy, and artillery to boot. Besides, our big-fashioned single-loading Springfield was being pitted against repeating rifles of the latest pattern. And the ammunition was running low.

Even thus I reasoned as I ran, pell-mell, for the border, four long miles away. In my fancy there loomed before me the fate of our wounded at Tecate and the bloodletting of the Alamo.

Somebody gripped the toe of my boot and I sprawled headlong into cactus and rocks. It was a wounded comrade, an American like myself, only a boy at that, whose ruddy face I had often seen at our troop mess or over some neighboring campfire of Baja California.

His shoulder had been shot away. A leg was crushed below the knee. There was no hope for his life, but he wanted to be taken away.

"For God's sake, don't leave me, pal!" he cried. "They'll burn me, they'll kill me slow," he moaned.

For a moment I was stunned by the fall, but the boy's pathetic appeal brought me to my senses and burned into my brain where it will forever remain.

I looked around me. There were wounded men, most of them boys, clutching at their fleeing comrades, beseeching them not to leave them to the mercy of the Mexican rurales.

Yet these men whom I had seen cheerfully face death many times, men who had enlisted in a foreign cause unafraid to die in battle, but standing ever in mortal terror of the torture chambers on the battle fields of Mexico.

The Death Rain.

For a moment my manhood returned and the massacre fear left me. I would shoulder this maimed bit of humanity, stagger to the line with my burden, over those cruel, never ending hills which I must scale with my charge before we reached safety.

I staggered to my feet, but the slip of the "dam-dums," those same "dam-dums" that had crippled the boy brought me back to a realization of my peril.

An instant I faltered in hoisting him to my back, but the boy seemed to divine my change of heart. He gripped me again, this time with a dying man's clutch which I could not and would not shake off unless I broke his arm.

So I shouldered the bleeding little figure and labored forward, while he murmured, "Good boy, good boy," and the bullets of the Federals ever hissed and screeched in my ears.

Something rose up in my path. It barred my progress. It was shattered by shot—a human form—scarce recognizable now for the blood that stained it from head to foot. But a voice husky with pain and terror begged me not to leave him.

Fled as From an Enemy. I fled from this dying man as I fled from the enemy. Dodged him as he reached for me. As I passed him from his reach he tottered back on the

ground with a cry of despair that left with me another memory.

My legs were growing numb from the exertion of it all. Ahead of me fled the army, or what was left of it. Behind me echoed the wail of the wounded, the yells of the victorious Federals, the hiss and scream of their bullets. Ever present was the memory of the Alamo and Tecate, where our wounded and those of our fellows taken prisoners had experienced living hells before death relieved them of their torment.

On and on I stumbled, falling now and then, but always my burden. It had ceased to urge me forward, this maimed bit of boyhood, but its lone arm still encircled my neck with a vise-like grip that at times made it almost impossible to breathe.

Sounds of the battle left me now. I no longer saw men. I dared not stop, however, for fear of not being able to rise again, but at last I stumbled and fell with my burden for the last time. For a long time I remained on the ground, breathing heavily and resting.

How sweet that rest was. I cared not for Federal soldiers or rural. Let them come! I would sleep. The weight slipped from my back and I breathed freer. I must have lain there for an hour. When I arose the little figure at my side did not speak. I bent over him. He had cheated the torture chambers. They could not get him now. From his pocket a worn and thumb-marked bit of paper protruded. In the hope of learning his name I read it.

It was a message from a mother to her son. There was no postmark. No address. Nothing to lead to his identity. Just "Jim, come home. Mother needs you. Your little sister and I pray for you every night. We are very lonely with you away. Come home, dear boy."

That was all. Just a good-by message—the last he was ever to receive from that little mother somewhere in the states. If she could see her boy now!

The Price of the Wanderlust.

"And what did he die for?" I asked myself. What would I have died for? Just the battle-lust, that is all. The something inside of us that makes us soldiers of fortune. The wanderlust!

I buried him, in the night, on the side of a hill where the soil was softer

and a little grass grew. A nameless grave with not even a mark to show that a body rested there.

Perhaps the mother may read these lines and recognize in the little soldier of fortune her boy. At least she may console herself with the thought that his flesh was not food for coyotes; his bones not bleaching white in the sun like two hundred others of his comrades who in five short months paid the penalty of the battle-lust in Mexico.

As for myself, I stole like a thief in the night across the border and surrendered to the United States authorities. With ninety-three of my fellows I was penned up in Fort Rosecrans at San Diego for five days, while the government in Mexico we had sought to overthrow pleaded for our possession. Uncle Sam refused to give us up, but he kept our general, dating young Jack Mosby, veteran of five wars, beloved of his men, who is now at the naval disciplinary barracks Puget Sound, for taking French leave of the United States navy when the Mexican war cloud broke.

Of the ninety-three who survived that bloody day which cost us so many men, some are now fighting in the Balkans under different flags, and, if the powers of Europe clash over the division of the spoils, I feel that I must join them, even at the penalty of the cost!

Ugliest Man the Most Married.

Lupungu, chief of the Basong, one of the wealthiest chiefs in the Congo, is a much-married man, for he is the proud possessor of 300 wives, for each of whom he pays a yearly tribute of two francs to the state. This, however, is not his sole claim to distinction, for he has also been dubbed by the officials of the province "the ugliest man on earth." "With some reason," says Vice-Consul Castoux, who describes him as a villainous-looking native possessing but one eye, and a countenance horribly scarred by small-pox.

As a young child, Lupungu was deserted by his father, and afterwards adopted by a sub-chief. In later years, he persuaded the gullible natives that his one eye gave him certain occult powers; he then made friends with a band of Arab traders, and with their assistance made war upon his father whom he conquered and succeeded as chief of the Basong.

PIECED QUILTS COMING BACK.

Old-fashioned women who know how to make pieced quilts are developing a useful industry, particularly in the south and New England, by making silk and cotton quilts to supply the demand of fashionable women who are ready to pay big prices. This picture shows a scene in the home of a southern family.

DRY-FARM LIVE STOCK

Certain Specific Requirements Must Be Observed.

During Growing Period Animal Requires More Protein and Less Carbohydrates—Value of Balanced Ration Explained.

(By DR. W. E. TAYLOR, in Dry Farming.)

To profitably feed live stock certain specific requirements must be observed. Animal growth is based upon science no less exacting than the laws in chemistry. Any radical deviation in either case will defeat the object we are attempting to attain. In chemistry we know that by combining two volumes of hydrogen with one of oxygen, we obtain water, and no other combination of those two elements will make that valuable substance.

Animal growth is made by combining carbohydrates and protein. If the proportions are out of balance the growth is impaired, but if the proportions are in accordance with the laws of growth, the best possible results will be obtained. Carbohydrates provide energy, heat and fat. Protein makes the growth. If, however, one substance is given and the other is absent in the feed, the animal will perish. During the growing period the animal naturally requires more protein and less carbohydrates, and during the fattening period more of the carbohydrates should be given. When the animal is growing, it should have one part of protein to four and one-half or five parts of carbohydrates, and when fat is desired, the ratio should be widened to one part protein to five and one-half or six parts of carbohydrates.

Feeds which contain only a fair amount of protein, but are rich in carbohydrates, are corn, corn and cob meal, hominy feed, oats, barley meal, summer meal, rye meal, rice meal, kafir millo dried beet pulp, timothy hay, redtop hay, Bermuda hay, Johnson grass hay, sorghum fodder, kafir fodder, Hungarian grass, millet hay, millo fodder, corn fodder, corn silage, roots.

Feeds containing a fair quantity of carbohydrates, but rich in protein, are gluten meal, gluten feed, field pea meal, cow pea meal, soybean meal, linseed meal, cottonseed meal, soybean cake meal, dried brewers' grains, dried wheat bran, wheat middlings, rye bran, rye middlings, alfalfa hay, clover hay, cowpea hay, vetch hay, soybean hay, velvet bean hay, beggar weed hay.

To illustrate the value of a balanced ration, or having the right amount of protein and carbohydrates I will cite the following experiments which are in keeping with many other tests along the same lines:

In a test where pigs were fed a ration of three pounds of corn they made a gain of 45 pounds in 80 days.

Another lot were given 2 1/2 pounds of corn together with one pound of soybean meal and made a gain of 101 pounds during the same period.

In other experiments where pigs were given a quarter ration of corn and a soybean pasture they made four times greater gain than when given a full ration of corn alone.

The following results were obtained from both a balanced and an unbalanced ration in feeding steers:

Four steers were fed 104 days on corn and timothy hay and made a gain of 260 pounds. Another bunch of four steers were fed corn and cowpea hay for the same period and made a gain of 624 pounds. In another test four steers were fed 80 days on corn and timothy hay and made a gain of 318 pounds.

If an animal is given any of the concentrates rich in protein and all of the roughages (which are classed as carbohydrates) that they will eat, or vice versa, the ration will be fairly well balanced.

Sheep on Wheat Farm.

"I regard a flock of sheep as the cheapest, best and most efficient agricultural implement a man can have on his farm. It works itself and pays the farmer for allowing it to work. It cleans up the fallow and weeds and fertilizes the land at the rate of about three pounds of liquid and solid manure per day, adding the essential humus to the soil, and, in combination with a proper system of crop rotation, will bring so-called worked out lands to a high state of fertility."—H. V. Sprigg, South Australian Agricultural Bureau.

Chisel From a File.

Take a piece of gas pipe a trifle smaller than the shoulder of a file and one-half inch larger than the handle. Slip over handle and plug up lower end with dough, then pour in molten babbit metal till full. Bevel the file on a grindstone, and you have a good chisel that will hold the edge.

Corn Essentials.

Cultivation with a little moisture makes the corn.

Where it Made a Stir. "That speech did not make as much of an impression as you expected." "No," replied the candid orator. "The only real stir it created was the rattle of the typewriter while it was being dictated."

BADLY BURNED ON BACK

15 North Ash St., Spokane, Wash.—"My baby was sick and I had to give him baths and rub him with alcohol and one evening by mistake in the dark I grabbed the bottle that contained carbolic acid and rubbed some on before I noticed my mistake. Baby was burned on the back from shoulders to the ankles. The skin was red and blistered. He suffered quite a little. A neighbor told me about the Cuticura Ointment, so I purchased a box at once. I just put the Cuticura Ointment on twice a day and the burnt skin all came off and left no scar. It was only two weeks before he was cured." (Signed) Mrs. J. H. Langlot, Mar. 28, 1913.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston."—Adv.

Difficulty.

"How are they getting along with that idea they had of photographing souls?"

"Not at all. They found too many required a microscope to see well."

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 32c a bottle.

Even the miser is willing to share his good opinion of himself with others.

If you wish beautiful, clear white clothes, use Red Cross Bag Blue. At all good grocers. Adv.

Not all women are as bad as they paint themselves.

BLUE AND DISCOURAGED

Mrs. Hamilton Tells How She Finally Found Health in Lydia E. Pinkham's Vegetable Compound.

Warren, Ind.—"I was bothered terribly with female weakness. I had pains and was not regular. My head ached all the time, I had bearing down pains and my back hurt me the biggest part of the time. I was dizzy and had weak feelings when I would stoop over, it hurt me to walk any distance and I felt blue and discouraged."

"I began taking Lydia E. Pinkham's Vegetable Compound and am now in good health. If it had not been for that medicine I would have been in my grave a long time ago."—Mrs. ANNE E. HAMILTON, R. E. D. No. 6, Warren, Ind.

Another Case.

Esmond, R. I.—"I write to tell you how much good your medicine has done me and to let other women know that there is help for them. I suffered with bearing down pains, headache, was irregular and felt blue and depressed all the time. I took Lydia E. Pinkham's Vegetable Compound and commenced to gain in a short time and I am a well woman today. I am on my feet from early morning until late at night running a boarding house and do all my own work. I hope that many suffering women will try your medicine. It makes happier wives and mothers."—Mrs. ANNA HANSEN, Esmond, Rhode Island.

Make the Liver Do its Duty

Nine times in ten when the liver is right the stomach and bowels are right.

CARTER'S LITTLE LIVER PILLS

gently but firmly compel a lazy liver to do its duty.

Cures Constipation, Indigestion, Sick Headache, and Distress After Eating.

SMALL PILL, SMALL DOSE, SMALL PRICE.

FRIDAY, AUGUST 22, 1913

The outcome of the Lind-Huerta proceedings are watched with much interest throughout the world, and the eyes of all Nations are on Mexico. President Wilson's attitude toward the Huerta Government is being upheld by members of the senate, regardless of their political affiliations. Doubtless they remember Sherman's definition of war.

Attorney General Clancy evidently had something to say at the recent meeting of the Bar Association. It would seem from his insinuations that Washington is not the only City in this country where there existed an "insidious" lobby. It looks though, as if the General had the President bested when it comes to the use of adjectives.

The enormous outflow of American citizens and American money to the cheap and fertile lands of Western Canada is one of the important factors that has been strangely overlooked in diagnosing the business stagnation in American real estate in the past two years. The loss of a couple of million American families, carrying with them the price of that many American farms, is in itself enough to account for a very widespread curtailing of trade.

We presume there never was a newspaper in any locality that gave all the local happenings. It is often that someone comes or goes that the editor does not see. It sometimes happens that the family is missed several times. They get the impression that the editor does not care to mention them. This is a mistake. In most country towns the local work is the hardest work connected with a newspaper. A man may be a good editor, but a flat failure in the local work, and vice versa. Editorial material is obtained by study, by reading newspapers, often by using scissors. Personals and local happenings can not be read and clipped from other papers, not by a jugful. It takes physical as well as mental exertion to get out several columns of local news in a town of this size. Most people take the local paper to get the local happenings. Don't be afraid to tell the editor that you have friends visiting you. There are lots of people who are interested in your friends. You owe it as a duty to them to let your friends know of their doings. Perhaps you think the paper shows partiality, but just see if the paper doesn't treat you right if you give it a chance.

LINCOLN COUNTY NOTES

PASONS PICKINGS

W. G. Wells and Sam Howell are doing assessment work for the Iowa Mining Company up Turkey Creek.

Mr. McReynolds went to Capitan the first of the week after grain and supplies.

Dr. T. C. Smith of Fort Stanton and J. R. Thomas were visitors in Parsons Saturday and Sunday.

A number of bears have been seen up in the woods by some of the boys out hunting.

Dr. Laws, wife and children and Dr. Howitz of Roswell were the guests of the Rice family Friday night.

Dr. Wm. Keiller and daughter, Miss Mable, of Galveston, Texas, came up from Fort Stanton Saturday will spend the remainder of the summer here.

Little Willie Jennings while at play during the morning recess last Friday, fell from a small pine tree and while not seriously injured sustained a nervous shock that left him unconscious for several hours. Dr. Laws of Lincoln was called and he made the trip in his auto in quick time, but by the time he reached him Willie had somewhat revived. He is back in school this week and apparently as well as ever.

NOGAL NOTES

Mrs. Dinnie Roberts and children of El Paso are visiting in Nogal this week.

The postoffice inspector is in Nogal to examine applicants for the postoffice under civil service.

T. J. Moore and wife are expected home from the Palomas Springs this week.

Mrs. Latham contemplates leaving for Arizona and Colorado on a visit in a few days.

Cattle are fat here and recent rains have produced a little grass. We hope for still more rain soon.

Cement corner foundations are being installed under the school house here to insure the safety of the building.

Miss Allie Latham has accepted a position in Carrizozo with Mrs. A. J. Rolland and will leave the postoffice, of which she is in charge, in a few days.

We are reliably informed that the new process at the Vera Cruz mine is an absolute success. Your correspondent has been invited to go over and see the plates fill with the gold.

Col. Bender left this week for El Paso, taking a test shipment of ore from his mine to the El Paso smelter for trial run. The assay was \$300 to the ton and the Colonel thought that it was too much.

OSCURO OBSERVING

Jim Gilliland spent two days in Oscurro transacting business this week.

Willie McCallum has about recovered from his injuries caused by a fall last week; he will be entirely recovered in a short time.

Dr. Guido Ranniger, Herbert Edwards and Chas. F. Grey journeyed to the county seat with Mr. and Mrs. Joseph last Saturday.

Dr. R. E. Blaney came down Monday to spend a few days on his place after having spent a month or more in Chicago.

Dr. McCallum arrived in Oscurro from Magdalena, New Mexico Saturday after spending two days with his injured son left for Kansas City.

Herbert Edwards after spending a joyous two weeks in and about Oscurro, left for Maricopa, Arizona, where he will resume his position with the Southern Pacific.

"THE LITTLE BONITO CHILD OF THE SNOW."

This poem was written for my little friend and comrade Mona Lane, and is dedicated to the living and the dead of Fort Stanton, New Mexico.

The Little Bonito is one of those pretty little mountain streams that rise mid the banks of snow in the White Mountains. Hence we call it "Child of the Snow." Fort Stanton is a government Marine Hospital and Sanitarium, and nestles on the banks of the Little Bonito twenty-two miles from the White Mountain. It was a military post from 1857 to 1897. The post now has a large herd of cattle, some horses, and mules, dairy farm and orchards and things too numerous to mention. The entire valley is irrigated from the Little Bonito which is verily the life of the valley.

I spent the 20th and 21st of May in this post. Met many of the officers and people of the Fort. Dr. Smith is commander-in-chief, and at present there are some 200 patients in attendance. Seeing those sick fellows in the reclining chairs, sitting in the warm sun in the afternoons, as they watched in dreamy retrospect the silvery fides of the Little Bonito as they trickled by was the inspiration of this little poem.

THE LITTLE BONITO CHILD OF THE SNOW
Flow on thou Little Bonito,
Scatter gladness where ever you go;
Fresh from thy home in the mountains,
And the beautiful drifts of snow.
Bear your silvery floods to the flowers
That so wildly bloom on the plain,
Be you their sweet soul and comfort,
Be you their sunshine and their rain.

Come trickling down through Ft. Stanton
Among the sleepy villas and trees;
Bless the tired hearts of the patients
That recline in their chairs of ease.
For they shall list in the evening
To your music so soft and low,
And in their hearts they will bless you
Chiceto Mouto, sweet waif of the snow.

Your course is so mild Bonito,
In your flight to the southern sea,
That pilgrims touched with your beauty
Have come to live and die by thee.
They've come from the storm swept ocean,
The dark and heaving restless mane,
They've come to rest from the struggle,
Secure from life's worry, and pain.

Sing to them Sweet Bonito;
Sing of the days so long gone past,
Fore your waves were jarred by the drum,
Or stirring bugle's war-like blast,
Sing again of a day to be,
When wars shall drench no more the sod,
When earth shall be one Brotherhood;
The peaceful home of man and God.

P. G. ZEMMERMAN,
Anson, Texas.

BEST STORIES AT LITTLE COST

The fiction writer is having his inning these days. Good short stories are commanding prices that range from \$75 to \$750 apiece, according to the fame of the author, while the demand grows keener every year. It is an extremely expensive thing to publish a high-class magazine nowadays, filled with the work of the most famous authors and artists. Yet it is exactly such a magazine that The Chicago Record-Herald furnishes as a regular part of its Sunday issue.

The Sunday Magazine of The Record-Herald is a real magazine, beautifully illustrated by the foremost artists of the day and filled with the best stories, articles and serial novels that money can buy. By a clever stroke of enterprise, a year or two ago its editors turned a steady stream of the finest short stories into its columns. We refer to its \$10,000 prize contest. The result of that unique contest has been to raise the Sunday Magazine of The Record-Herald to the top rank as regards short stories and serial novels. It now numbers among its contributors such writers as Conan Doyle, Rider Haggard, Jack London, Rex Beach, Roy Norton, Owen Johnson, Amelle Rives, Molly Elliott Seawell, George Barr McCutcheon, Richard Le Gallienne, Lloyd Osbourne—and so on through a long list of noted names. The illustrations, too, are as fine as the stories, being the work of Flagg, Fisher, Coll and other great artists.

By all odds the best literary and artistic treat offered to newspaper readers today is the Sunday Magazine of The Record-Herald.

BROOKLYN TABERNACLE

ALL THINGS WORK FOR GOOD TO THEM.

Genesis 46:28-47:31—June 18.
"To them that love God all things work together for good."—Romans 8:28.

SO Jacob and all his family left Canaan, the Land of Promise, and at the invitation of Pharaoh through Joseph, they located in the land of Goshen, suitable to their business, which was that of herdsmen and shepherds. Joseph went in his chariot to Goshen, and there met his father Jacob, whom he had not seen for many years; and Joseph wept. Then came the official presentation of Jacob and his family to Pharaoh. Joseph was careful that they should make no mistake. He therefore let the king clearly know that their occupation was that of shepherds and herdsmen; for the Egyptians despised that business, and would keep themselves separate from the Hebrews. Thus the land of Goshen would be almost like a separate country from Egypt.

Jacob at this time was one hundred and thirty years old and quite feeble. Brought into Pharaoh's presence,

Jacob blessed him, in the sense of asking the Divine blessing upon him. Thus the family of Jacob, now called by their new name, Israel, became firmly established in Egypt. Jacob lived seventeen years thereafter, during which Joseph and his people, the Israelites, were in favor with Pharaoh and the Egyptians.

Our lesson relates especially to God's willingness and ability to make all the experiences of His people work out for their good. This naturally suggests that we inquire in what way Jacob's life experiences were to his welfare. The Scriptures declare, "Jacob have I loved; Esau have I hated [loved less]." God's Love should be distinctly seen manifested in some way, in making all things work for good to Jacob and his family. The question is, How? Can we see how Divine favor operated for the welfare of Jacob and his family?

How Did God Bless Israel?

Jacob, having become heir of the great Abrahamic Promise "in thy seed shall all the families of the earth be blessed", straightway seems to have gotten into trouble. He fled from home, leaving everything to Esau. He served his uncle Laban for seven years, that he might have Rachel for his wife. But Providence permitted him to be cheated, and he was obliged to serve seven years more for her. Time and again Laban changed his wages, endeavoring to get the best of him. Thus Jacob was thrown into competition with his uncle, to protect his own interests.

Finally, with the fruit of many years' toil, he returned to Canaan, fearful of Esau, whom he placated with a rich present. Later, he lost his wife and was bereft of Joseph, his beloved son. Then came the famine, the recovery of Joseph, and the incidents of today's lesson. Later on, that very move into Egypt appeared to have been disastrous, for the Egyptians enslaved the Israelites.

NOTICE OF PUBLICATION

Department of the Interior,
United States Land Office,
Roswell, New Mexico,

July 25, 1913.

To Ervin O. Gamet, of Toronto, Canada,
Contestee:

You are hereby notified that Mark M. Duke, who gives Carrizozo, New Mexico, as his post office address, did on June 11, 1913, file in this office his duly corroborated application to contest and secure the cancellation of your Homestead, Entry No. Serial No. made Jan. 25, 1908, for SE 1/4 Section 13, Township 8 S., Range 10 E., N. M. P. Meridian; and as grounds for his contest he alleges that Ervin O. Gamet, has wholly abandoned said above described land and claim, and has been absent therefrom for more than two years last past and is not now residing within the United States;

You are, therefore, further notified that the said allegations will be taken by this office as having been confessed by you, and your said entry will be canceled thereunder without your further right to be heard therein, either before this office or on appeal, if you fail to file in this office within twenty days after the FOURTH publication of this notice, as shown below, your answer, under oath, specifically meeting and responding to these allegations of contest, or if you fail within that time to file in this office due proof that you have served a copy of your answer on the said contestant either in person or by registered mail. If this service is made by the delivery of your answer to the contestant in person, proof of such service must be either the said contestant's written acknowledgment of his receipt of the copy, showing the date of its receipt, or the affidavit of the person by whom the delivery was made stating when and where the copy was delivered; if made by registered mail, proof of such service must consist of the affidavit of the person by whom the copy was mailed stating when and the post office to which it was mailed, and this affidavit must be accompanied by the postmaster's receipt for the letter.

You should state in your answer the name of the post office to which you desire future notices to be sent to you.

NOTICE OF CONTEST

Department of the Interior,
United States Land Office,
Las Cruces, N. M.

July 23, 1913.

To Jones T. Beckman of Oscura, N. M.,
Contestee:

You are hereby notified that Charles F. Grey who gives Oscura, N. M., as his post-office address, did on July 23 1913, file in this office his duly corroborated application to contest and secure the cancellation of your homestead Entry No. 03521, Serial No. 03521 made Sept. 4, 1909, for NW 1/4 Section 1, Township 10-S, Range 8 E, N. M. P. Meridian, and as grounds for his contest he alleges that said Jones T. Beckman did about the month of September 1912 leave this claim, and had not up to the present time been on the place, nor has any one else lived on the place for the last year, nor has there been any improvements put on the land for the past year, and no land put in cultivation.

You are, therefore, further notified that the said allegations will be taken by this office as having been confessed by you, and your said entry will be canceled thereunder without your further right to be heard therein, either before this office or on appeal, if you fail to file in this office within twenty days after the fourth publication of this notice, as shown below, your answer, under oath, specifically meeting and responding to these allegations of contest, or if you fail within that time to file in this office due proof that you have served a copy of your answer on said contestant either in person or by registered mail. If this service is made by the delivery of a copy of your answer to the contestant in person, proof of such service must be either the said contestant's written acknowledgment of his receipt of the copy, showing the date of its receipt, or the affidavit of the person by whom the delivery was made stating when and where the copy was delivered; if made by registered mail, proof of such service must consist of the affidavit of the person by whom the copy was mailed stating when and the post office to which it was mailed, and this affidavit must be accompanied by the postmaster's receipt for the letter.

You should state in your answer the name of the post office to which you desire future notices to be sent to you.

MOLLY McDONALD

A TALE OF THE FRONTIER

By
RANDALL PARRISH
Author of "Keith of the
Border," "My Lady of
Doubt," "My Lady of the
South," etc., etc.

SYNOPSIS.

Major McDonald, commanding an army post near Fort Dodge, seeks a man to intercept his daughter, Molly, who is headed for the post. An Indian outbreak is threatened. "Brick" Hamlin, a sergeant who had just arrived with a mission to McDonald, volunteers for the mission and starts alone. Molly arrives at Fort Ripley two days ahead of schedule. She decides to push on to Fort Dodge by stage in company with "Butler" Bill, Moylan, Gonzalez, a gambler, and also a passenger. Hamlin meets the stage with stories of depredations committed by the Indians. It is decided to return to Ripley. The driver deserts the stage when Indians appear. The Indians are twice repulsed in attacks on the stage by Hamlin, Moylan and Gonzalez. The latter is killed. Moylan is killed in next attack. Indians retire, and Hamlin and Molly wait for the next move.

CHAPTER VII.—Continued.

Certain facts were clear—to remain meant death, torture for him if they were taken alive, and worse than death for her. Perspiration burst out upon his face at the thought. No! Great God! not that; he would kill her himself first. Yet this was the truth, the truth to be faced. The nearest available troops were at Dodge, a company of infantry. If they started at once they could never arrive in time to prevent an attack at daybreak. The Indians undoubtedly knew this, realized the utter helplessness of their victims, and were acting accordingly. Otherwise they would never have lighted that fire nor remained on guard. Moreover if the two of them should succeed in stealing forth from the shelter of the coach, should skulk unseen amid the dense blackness of the overhanging bluff, eluding the watchers, what would it profit in the end? Their trail would be clear; with the first gray of dawn those savage trackers would be at work, and they would be trapped in the open, on foot, utterly helpless even to fight.

The man's hands clenched and unclenched about his rifle-barrel in an agony of indecision, his eyes perceiving the silhouette of the girl against the lighter arc of sky. No, not that! Not that! They must hide their trail, leave behind no faintest trace of passage for those hounds to follow. Yet how could the miracle be accomplished? Out from the mists of tortured memory came, as a faint hope, a dim recollection of that narrow gully cutting straight down across the trail, over which the runaway had crashed in full gallop. That surely could not be far back, and was of sufficient depth to hide them in the darkness. He was uncertain how far it extended, but at some time it had been a water-course and must have reached the river. And the river would hide their trail! A new hope sprang into his eyes. He felt the sudden straightening up of his body.

"What—what is it?" she questioned, startled. "Do you see anything? Are they coming?"

"No, no," almost impatiently. "It is still as death out there, but I almost believe I have discovered a means of escape. Do you remember a gully we ran over while I was on top of the stage?"

"I am not sure; was it when that awful jolt came?"

"Yes, it flung me to the foot-board just when I had untangled the lines. We could not have traveled a dozen yards farther before we struck this bluff—could we?"

"I hardly think so," yet evidently bewildered by his rapid questioning. "Only I was so confused and frightened I can scarcely remember. Why are you so anxious to know?"

"Because," he returned earnestly, bending toward her, "I believe that gash in the earth is going to get us out of here. Anyhow it is the only chance I can figure. If we can creep through to the river, undiscovered, I'll agree to leave Mister Indian guessing as to where we've gone."

The new note of animation in the man's voice aroused her, but she grasped his arm tighter.

"But—but, oh, can we? Won't they be hiding there too?"

"It's a chance, that's all—but better than waiting here for a certainty. See here, Miss McDonald," and he caught her hand in his own, forgetful of all save his own purpose and the necessity of strengthening her to play out the game. "The trail of that gully is to the west; except up here above the bluff it runs too far away for a guard line. The Indians will be lying out here on the open prairie; they will watch as close as all they dare under cover of darkness. I'll bet there are twenty red snakes now within a hundred feet of us—oh, don't shiver and

lose your nerve! They'll not try to close that gap yet; it's too dangerous with us on guard and only one side of the coach exposed. That fellow was trying us out a while ago, and they've kept quiet ever since I let drive at him. They know the limits of the safety zone, and will keep there until just before daylight. That is when they'll try to creep up upon us. Have you got the time?"

She opened her watch, feeling for the hands with her fingers, wondering vaguely at her own calmness. The cool resourcefulness of Hamlin was like a tonic.

"It—it is a little after one o'clock," she said slowly, "although I am not sure my watch is exactly right."

"Near enough; there are signs of daylight at four—three hours left; that ought to be sufficient, but with no darkness to spare. Will you go with me? Will you do exactly as I say?"

She drew a swift breath, holding her hand to her side.

"Oh, yes," her voice catching, "what—what else can I do? I cannot stay here with those dead men!"

"But I want you to go because—well, because you trust me," he urged, a new trace of tenderness in his lowered voice. "Because you know I would give my life to defend you."

He was not sure, but he thought her face was suddenly uplifted, her eyes seeking to see him in the darkness.

"I do," she answered gravely, "you must believe I do; but I have never been in such peril before. In such a situation of horror, and I am all un-nerved. There doesn't seem to be anything left me but—to trust you."

"That is good; all I can ask. I know you are all right, but I want you to keep your nerve. We are going to take a big chance; we've got to do it—a single misstep, a slip of the foot, an incautious breath may cost our lives."

"Are you going to try to get away? To elude the Indians?"

"Yes, and there is but one possibility of success—to creep the length of the gully there, and so reach the river. Here is Gonzalez' belt. Don't be afraid of it; it is not dead men who are going to hurt us. Swing the strap over your shoulder this way, and slip the revolver into the holster. That's right; we'll carry as little as we can, and leave our hands free." He hesitated, staring about in the darkness, swiftly deciding what to take. "Do you happen to know if either of the passengers carried any grub?"

"Grub?"

"Plains' term for food," impatiently, "rations; something for lunch en route."

"Oh, yes, Mr. Moylan did; said he never took chances on having to go hungry. It was in a flat leather pouch."

"Haversack. I have it. That will be enough to carry, with the canteen. Now there is only one thing more before we leave. We must impress those fellows with the notion that we are wide-awake, and on guard yet. See any movement out there?"

"I—I am not sure," she answered doubtfully. "There is a black shadow beyond that dead pony; lean forward here and you can see what I mean—on the ground. I—I imagined it moved just then." She pointed into the darkness. "It is the merest shadow, but seemed to wiggle along, and then stop; it's still now."

Hamlin focused his keen eyes on the spot indicated, shading them with one hand.

"Slide back farther on the seat," he whispered softly, "and let me in next the window."

There was a moment's silence, the only sound the wind. The girl gripped the back of the seat nervously with both hands, holding her breath; the Sergeant, the outline of his face illuminated against the sky, stared motionless into the night without. Suddenly, not making a sound, he lifted the rifle to his shoulder.

CHAPTER VIII.

A Way to the River.

She waited in agony as he sighted carefully, striving to gauge the distance. It seemed an interminable time before his finger pressed the trigger. Then came the report, a flash of flame, and the powder smoke blown back in her face. Startled by the discharge, she yet saw that black shadow leap upright; again the heavy blast, and the dim figure went down. There was a cry—a mad yell of rage—in which scattered voices joined:

spits of fire cleaving the darkness, the barking of guns of different caliber. A bit of flying lead tore through the leather back of the coach with an odd rip; another struck the casing of the door, sending the wooden splinters flying like arrows. Hawk-eyed, Hamlin fired twice more, aiming at the sparks, grimly certain that a responding howl from the left evidenced a hit. Then, as quickly, all was still, intensely black once more. The Sergeant drew back from the window, leaning his gun against the casing.

"That will hold them for a while," he said cheerfully. "Two less out there, I reckon, and the others won't get careless again right away. Now is our time; are you ready?"

There was no response, the stillness so profound he could hear the faint ticking of the girl's watch. He reached out, almost alarmed, and touched her dress.

"What is the trouble?" he questioned anxiously. "Didn't you hear me speak?"

He waited breathless, but there was no movement, no sound, and his hand, trembling, in spite of his iron nerve, groped its way upward. She was lying back against the opposite window, her head bent sideways.

"My God," he thought, "did those devils get her?"

She lifted her slight figure up on one arm, all else blotted out, all other memory vanished through this instant dread. His cheek stung where flying splinters had struck him, but that was nothing. She was warm, her flesh was warm; then his searching fingers felt the moist blood trickling down from the edge of her hair. He let out his breath slowly, the sudden relief almost choking him. It was bad enough surely, but not what he had first feared, not death. She had been struck hard—a flying splinter of wood, perhaps, or a deflected bullet—her hair matted with blood, yet it was no more than a flesh wound, although leaving her unconscious. "If he hesitated it was but for an instant. The entire situation recurred to him in a flash; he must change his plans, but dare waste no time. If they were to escape it must be accomplished now, shadowed by darkness, while savage watchers were safely beyond sound. His lean jaws set with fierce determination, and he grimly hitched his belt forward, one sinewy hand fingering the revolver. He would have to trust to that weapon entirely for defense; he could not carry both the rifle and the girl.

Moving slowly, cautiously, fearful lest some creaking of the old stage might betray his motions to those keen ears below, he backed through the open door. Once feeling the ground firm beneath his feet, and making sure that both canteen and haversack were secure, he reached back into the darkness, grasping the form of the unconscious girl. He stood erect with her held securely in his arms, strands of hair blowing against his cheek, listening intently, striving with keen eyes to penetrate the black curtain. The wind was fortunate,

and farther along a foot slipped on a treacherous stone, but the slight noise died unnoticed in the night. It was farther to the gully than he had supposed; his heart was in his throat fearing he had missed it, half-believing the depression failed to extend to the base of the bluff. Then his foot, exploring blindly, touched the edge of the bank. Carefully he laid his burden down, placing his battered campaign hat beneath her head. He bent over her again, assuring himself that she breathed regularly, and then crept down alone into the shallow ravine.

His nerves were like steel now, his hand steady, his heart beating without an accelerated throb. He knew the work, and rejoiced in it. This was why he was a soldier. Silently, swiftly, he unbuttoned his belt, retastening it across the straps so as to hold canteen and haversack noiseless, and then, revolver in hand, began creeping down under cover of the low banks. He must explore the path first before attempting to bear her along in his arms; must be sure the passage was unguarded. After it swerved to the right there would be little danger, but while it ran straight, some cautious savage might have chosen it to skulk in. To deal with such he needed to be alone, and free.

He must have crawled thus for thirty yards, hands and knees aching horribly, his eyes ever peering over the edge of the bank, his ears tingling to the slightest noise. The tiny glow of the fire far away to the left was alone visible in the intense blackness; the wind brought to him no sound of movement. The stillness was profound, almost uncanny; as he paused and listened he could distinguish the throb of his heart. He was across the trail at last; for he felt and traced the ruts of wheels, and where the banks had been worked down almost to a level with the prairie. He crossed this opening like a snake, and then arose to his knees beyond, where the gully deepened. He remained poised, motionless, scarcely daring to breathe. Surely that was something else—that shapeless blotch of shadow, barely topping the line of bank! Was it ten feet away? Or five? He could not tell. He stared; there was no movement, and yet his eyes began to discern dimly the outlines—the head and shoulders of a man! The Sergeant crept forward—an inch, two inches, a foot. The figure did not stir. Now he was sure the fellow's head was lying flat on the turf, oddly distorted by a feathered war bonnet. The strange posture, the utter lack of movement, seemed proof that the tired warrior had fallen asleep on watch. Like a cat Hamlin crept up slowly toward him, poised for a spring.

Some sense of the wild must have stirred the savage into semi-consciousness. Suddenly he sat up, gripping the gun in his hands. Yet even as his opening eyes saw dimly the Sergeant's menacing shadow, before he could scream his alarm, or spring upright, the revolver butt struck with dull thud, and he went tumbling backward into the ditch, his cry of alarm ending in a hoarse croak. From somewhere, out of the dense darkness in front a voice called, sharp and guttural, as if its owner had been startled by the mysterious sound of the blow. It was the language of the Arapahoes; and out of his vague memory of the tongue, spurred to recollection by the swift emergency, Hamlin growled a hoarse answer, hanging breathlessly above the motionless body until the "ugh!" of the fellow's response proved him without suspicion. He waited, counting the seconds, every muscle strained with expectancy, listening. He had a feeling that some one was crawling over the short grass, wiggling along like a snake, but the faint sound, if sound it was, grew less distinct. Finally he lifted his head above the edge of the bank, but saw nothing, not even a dim shadow.

"They are closing in, I reckon," he thought soberly, "and it isn't likely there will be any more of these gentry as far back as this; looks as though this gully turned west just beyond. Anyhow I've got to risk it."

He returned more rapidly, knowing the passage, yet with no less caution, finding the unconscious girl lying exactly as he had left her. As he clasped her form in his arms, her lips uttered some incoherent words, but otherwise she gave no sign of life.

"Yes, yes," he whispered close to her ear, hoping thus to hold her silent. "It is all right now; only keep still."

(TO BE CONTINUED.)

How Light She Seemed, as Though He Clasped a Child.

blowing steadily across the flat from the river, and they were surely invisible against the background of the overhanging bluff. He did not even feel it necessary to crouch low to avoid discovery. He knew that peril would confront them later, when they ventured out into the open. How light she seemed, as though he clasped a child. Bearing her was going to be easier than he had supposed; the excitement yielded him a new measure of strength, yet he went forward very slowly, feeling along, inch by inch, planting his feet with exceeding care. The earth was hard-packed and would leave little trail; there were no leaves, no dead grass to rustle. Beyond the protection afforded by the stage he felt the full sweep of the wind and permitted her head to rest lower on one arm so that he could look about more clearly. She had not even moved, although he had felt her breath upon his face. Once he stumbled slightly over some fallen earth,

WHEN PREPARING FISH

THREE GOOD RECIPES THAT MAY BE KEPT IN MIND.

Trout, With Appropriate Garnishing, is One of the Best—Baked Cod a Universal Favorite—Proper Sauce to Serve.

Trout, Friers.—Scale and clean a large trout, place in a saucepan and pour over it a cupful of boiling vinegar, which will have the effect of turning the trout blue, and an equal quantity of white wine. If necessary to cover the trout add sufficient water to do so. Add an onion stuck with cloves, a carrot, half a bunch of celery, a few bay leaves, a small bunch of parsley, half a teaspoonful of peppercorns and salt to suit the taste, and boil over the fire for about 15 minutes, having the cover on the saucepan. When done, remove and drain the fish, place on a folded napkin, spread on a dish, garnish with parsley, and serve with oil and vinegar or any favorite fish sauce in a sauceboat.

Flounder, Brussels.—Clean and skin a flounder, sprinkle both sides with pepper and salt, and squeeze over a small quantity of lemon juice. Dip the fish in warmed butter, cover with finely grated breadcrumbs, place on a gridiron and broil over a clear fire, turning to brown both sides equally. Bone the anchovy, put the flesh into a mortar with a small lump of butter, and pound it, then place it in a small saucepan with a wineglassful of white wine and the strained juice of half a lemon, and stir over the fire for a few minutes. When cooked place the flounder on a hot dish, pour the anchovy sauce over it and serve.

Baked Cod, Savory.—Prepare a fresh cod by tying up the head with a string and filling the inside with butter, in which have been mixed two tablespoonfuls of chopped parsley to the quarter of a pound, a little salt and pepper and the juice of two lemons. Put the fish, belly downward, on a buttered drainer in a fish kettle and pour over a mixture made as follows: Melt half a pound of butter in a saucepan, add a pint of chopped mushrooms, a blanched and chopped shallot, a tablespoonful of chopped parsley, the juice of a lemon and a crushed clove of garlic, all of these being partly cooked before being used. Season to taste. Now pour in a pint of white wine and bring the whole quickly to a boil, and allow to cook gently for an hour and a half, basting the fish every ten minutes with the liquor. When the fish is firm put the fish on a dish, pour over half the sauce and put the rest in a sauceboat. This may be accompanied also by any other favorite fish sauce.—Washington Star.

Folding Furniture.

It's for camping. It's for small houses. And it folds up entirely. One may ship it conveniently. Upon arrival there's simply to unfold it.

Folding tables are useful at home or picnicking.

Folding cots and swings are especially designed for carrying off into the wilderness.

Pig in Blankets.

Choose good-sized, plump oysters. Wash, drain and wipe dry. Select some good bacon and cut very thin. Wrap a piece of this about an oyster and fasten each with a toothpick. Drop these into a hot frying pan, turning until crisp on all sides. Season with pepper and serve very hot.

About Hot-Water Bags.

When a hot-water bag starts to leak never throw it away. Heat clean white sand in the oven and pour it into the bag or bottle. The sand is better than the water, as it retains the heat longer.

Pineapple Salad.

Place the shredded fruit into a deep glass dish and pour over it half a pint powdered sugar mixed with one tablespoonful each of orange and lemon juice. This should be done at least three hours before serving, so that the sugar will dissolve.

In Preserving Tins.

When supply of good rubber rings gives out use two old rings on a jar. It is safer than if only one is used. It is better economy, however, to buy new rubber rings every year.

Pepper Relish.

Twelve green tomatoes, four green peppers, two onions; chop together, add two-third cup sugar, two cups vinegar, salt to taste. Mix all together and bottle. This may be kept two years and be as good as when first made.

To Kill an Unpleasant Odor.

A Dried orange peel allowed to smolder on a piece of red-hot iron or on an old shovel will kill any bad odor in a room and leave a fragrant one behind.

Gathered Smiles

ALL HE KNEW.

"That waiter has the most wonderful memory of any man I know," said Jenkins.

"In what way?" asked the friend who was lunching with him.

"You see that row of hats hanging up there? Well, I'll bet you anything you like that when we get up from the table he'll give you your hat, and not mine—although I'm wearing a new one today. I expect he noticed it as soon as I came into the restaurant!"

This prophecy was amply fulfilled. At any rate, the waiter fully apportioned the proper headgear to each of the two men; whereupon Jenkins inquired:

"I say waiter, how on earth do you know that this is my hat?"

"I don't, sir," replied the waiter after he had pocketed his tip. "All I know is that it happens to be the hat you were wearing when you arrived!"—Answers.

Still at it.

"Dobbeday is a great worrier."

"Yes?"

"He worried about his hair till that was gone."

"Yes."

"He worried about his teeth till they were gone."

"Yes."

"He worried about his money till that was gone."

"Yes."

"And having acquired the worrying habit, he worries now because there is nothing particular to worry about."

His Class.

"Your wife gave a beautiful address."

"Yes?" replied Mr. Meekton.

"She said it was woman's especial duty to be kind to dumb animals."

"I heard about it."

"But you don't seem impressed."

"It doesn't seem to be anything that interests me—not unless you are going to put husbands in the dumb animal class."

THOUGHTS OF RACING.

Yachtman—Had to call you three times for breakfast this morning.
His friend—I always thought there was a time allowance on a yacht.

The Result.

The way we figure things out now. And sure, 'tis no lie, is that arithmetic gets mixed. And 'ads' will multiply.

Hard Luck.

"Broke, eh? What became of your 'Seeing London' scheme? Those touring cars work everywhere else."
"Couldn't get any business for three months."

"Are Londoners that slow in taking up a new thing?"
"You don't understand. We struck a long run of foggy days."

Zeke's Boy, Ned.

"How's your boy, Ned, keepin' up at college, Zeke?"

"Not so well, I reckon. He wrote his mother yesterday that if we expected him to go along with the other fellows he was going to have to swap off that old machine of his'n and get one of these sixty-horse power contraptions."

The Difficulty.

"The round of applause the speaker got was not appropriate."
"Why wasn't it?"
"Do you think a round of applause fits in with a square speech?"

Offensive and Defensive.

Patience—I see Manitoba has prohibited the sale of offensive weapons.
Patriot—Do you mean to say that the women have to go out of town to buy their hairpins?

Had Them Applied.

Miss Bee Britte—It is said that eggs have a germ-destroying quality.
Footie Lighte—That's no reason why people should think that all actors have germs.

Spoiled for Ways of Peace. They were holding a racing meet.

"What's the matter with this horse you brought from Juarez?" demanded one of the judges. "The public is burning up its money on him, yet he can't run a little bit. What's wrong?"

"Conditions don't suit him," declared the owner of the plug.

"But we've had all sorts of conditions. We've had mud, a dry track, dust and everything else."

"I know; but that horse can't race unless there's a light musketry fire."

ANOTHER WAITER.

The Waiter—Yes, sir, I have been waiting in this restaurant as man and boy for ten years.

The Guest—Great Scott! and did you order "ham and," too?

Sanitary Spider.

"I won't have you in my parlor," said the spider to the fly.
"For you are covered with vile germs and deadly bacilli!"

Not Real Through.

A story was recently told to exemplify the pride which every man should take in the work by which he makes a living.

Two street sweepers, seated on a curbstone, were discussing a comrade who had died the day before.

"Bill certainly was a good sweeper," said one.

"Ye-e-s," conceded the other, thoughtfully. "But—don't you think he was a little weak around the lamp-posts?"

Economy of Energy.

"You should interest some brilliant orator in the legislative matter in which you are interested."

"I had thought of it," replied Mr. Dustin Stax. "But the trouble is that an orator is likely to take up a whole lot of valuable time that we might be able to utilize better by seeing his auditors on an individual basis."

Defying Gravity.

"The hired man fell off the barn just now."

"Did he hit the ground?" inquired Farmer Gehaw.

"He did."

"Then I have made a miscalculation. I've always had a theory that he was so light he'd go up."

Desperate Case.

Supleigh—Miss Passet refused all the other fellows, but when I proposed she accepted me.

Miss Keen—I'm not surprised. She always said that when she made up her mind to marry she'd stop at nothing.

Makes Her Unhappy.

Yeast—Does your wife ever become dissatisfied?

Crimsonbeak—Oh, yes, she does when she realizes that she can only speak about 200 words a minute."

JUST THE RIGHT SIZE.

Mr. Bug—How do you like that new diamond engagement ring I gave you?
Miss Roach—It just fits me. Isn't it sweet?

Little Slow.

Leaves fall in time and so does rain. When its time comes. But office-seekers wait in vain. For fallow rains.

POLISHED FLOOR NEEDS CARE

Methods by Which It May Be Made to Last Long and Always Appear at Its Best.

The first step in polishing a soft wood floor is to see that it is perfectly smooth and clean. It has been already painted or varnished the stains should be removed with strong ammonia and thorough scraping, when all cracks and dents should be closed with putty and a "filler" applied all over. This can be purchased at most oil and varnish shops, and should either be mixed with a little color or a sufficient quantity of floor stain should be added. The filler should be put on with a flat brush or piece of cloth and worked in one direction with the grain of the wood, while on completion of the process the room should be closed for 24 hours. At the end of that time the boards should be rubbed until they shine, with a long-handled, heavy weighted broom, over which a piece of carpet has been tacked, and this process may be repeated ad libitum. Finally the floor may be polished with boiled linseed oil and turpentine, this mixture being rubbed well in with a cloth and then left for an hour or two to dry, after which it must be again polished with the weighted brush.

Instead of a final touch of this description, the floor may be finished with a coat of varnish or shellac or with some prepared hardwood treatment, both of which should be put on evenly and thinly with a weighted brush or with an old piece of carpet.

In order to keep the floor at its best after the polishing process has been completed, it should never be washed with water, but after all the dust has been removed crude petroleum should be rubbed in and left to dry.

Endives, stewed, make a pleasant change as a vegetable.

Cold sauce or fruit added to junket makes a pleasant change.

To cook macaroni without sticking use a vessel with a sieve bottom.

To clean rusty knitting needles rub with kerosene and polish with pumice.

People who suffer from acidity should eat acid fruit with farinaceous food.

Fires don't come around without being invited and the invitation consists of refuse.

With a steam cooker an entire meal can be cooked over one burner of the gas stove.

In cooking asparagus for salad it should be dropped into cold water when done.

Flowered cretonnes make the best covers for beds on the out-of-doors sleeping porch.

Fruit Frappe With Nuts.

Almost every woman nowadays has her own special frappe combination, with which she delights to mystify her guests. Into the bottom of the frappe glass put a generous spoonful of preserved strawberries, on top of the berries come the ice cream, vanilla in this case, then a spoonful of whipped cream, and on top of the cream a grating of English walnuts. All sorts of fruit combinations are used as foundation for the frappes, and the covering for the whipped cream is variously cocoa, grated macaroons, chopped nuts, a sprinkle of cinnamon or candied rose leaves. Pretty little frappe glasses in the American pressed ware, light and dainty, can now be purchased as low as 30 cents a dozen. In serving, each glass is set on a pretty china plate with a little dolly between the glass and the plate. A spoon, of course, goes with it.

Cantaloupe Glass.

Cantaloupe glass is a delicacy that is truly delicious. Take melons that have been thoroughly chilled, cut in halves and lengthwise, and scrape out the seeds. Fill the hollow of each half with vanilla ice cream, packing it in as firm as possible, leaving a little mound in the center. Place the halves together tightly, thus forcing the cream up into the fruit, causing the melon juice to mingle with the cream. When ready to serve, a knife run between the halves separates the fruit and slices the cream.

Vegetarian Sausages.

One and one-half cups lima beans, two tablespoons butter, one teaspoon salt, a dash tobacco sauce. Soak the beans over night, cook them in salted water until soft, drain perfectly dry and then squeeze the pulp through a potato ricer. Beat in the butter and seasoning. If not moist enough, add one beaten egg or as much of it as required, making the paste so soft that it can be rolled into croquets. Shape like sausage, dip in beaten egg and flour, and fry in butter until brown.

Kindness Appreciated.

The other day I was in a drug store, when a woman came in and handed the druggist a little package, and said:

"Ever so much obliged to you for measuring off those doses of medicine and putting them in these little things."

The druggist looked surprised, wondering when he had ever measured the medicine. On opening the package she had given him, he found it contained empty capsules.—Exchange.

Caused a Spark.

"Your eyes are so bright you look like you had been sparking."

"Well, I did meet an old flame."

ALLEN'S FOOT-EASE,

The Antiseptic powder shakes into the shoe. The Swear-word remedy for the foot for a quarter century 30,000 testimonials. Sold every where, 35c. Sample FREE. Address: Allen S. Omsted, L. E. W. N. The Man who put the E. W. in F. E. N.

PARKER'S HAIR BALM

A toilet preparation of merit. Helps to restore color and beauty to Gray or Faded Hair. 50c. and \$1.00 at Druggists.

W. N. U., DENVER, NO. 31-1913

Don't Poison Baby.

FORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and a FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which is poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. CASTORIA DOES NOT CONTAIN NARCOTICS, it it bears the signature

of Chas. H. Fletcher, Genuine Castoria always bears the signature of *Chas. H. Fletcher*.

Under a Different Court.

Judge Livingston Howland, who was judge of the Marlon common pleas (succeeding Solomon Blair, promoted to the Superior court in 1870), and who succeeded me as judge of the Seventh circuit after the election of 1872, was listening to the argument of George K. Perrin, when he interrupted the attorney, saying: "Mr. Perrin, you have repeated that statement of the law now three times. If you have any other point to discuss I will hear it but no more of that, if you please."

"To which Mr. Perrin replied: 'Why, if it pleases the court, I have repeated the Lord's prayer, I suppose, a thousand times, and the Lord has never rebuked me.'

"Ah, yes," responded the judge, "God is said to be long suffering and kind and may have suffered your vain repetitions, but I am not God; no, not by a long sight."—Case and Comment.

When He Needs Rest.

Bill—A park bench which can only be used when a coin is dropped in a slot is a California man's invention.
Jill—An additional reason for the hobo having to beg.

Evidence.

Tom—I don't know whether she sings or not.
Jack—She doesn't. I've heard her.
—Puck.

Some women acquire social distinction through marriage and some lose it.

It Makes a Difference.

"What do you think of all skirts?"
"On my wife or on yours?"

Afraid of It.

"Truth lies at the bottom of a well."
"I suppose that is the reason why there is so much suspicion of wells."

Specifying.

"Adele has some telling ways."
"Yes, and one of them is that she can't keep a secret."

Red Cross Day Blue makes the laundress happy, makes clothes whiter than snow. All good grocers. Adv.

Horrible Possibility.

"Beauty is in the eye of the beholder."
"Even if the beholder squints?"

Busy Hangman.

"I want you to put up some wall paper I have bought," said the country clergyman, meeting the local man of all works. "When can you do it?"

"Well, sir," he exclaimed, "you see, I'm rather busy just now. I hung Mrs. S— yesterday; I'm hanging your church warden today; but if it's convenient I'll drop around and hang your reverence on Wednesday."

Treat Them to the treat of treats—always welcomed, by all, everywhere—

Sparkling with life—delightfully cooling—supremely wholesome.

Delicious—Refreshing Thirst-Quenching

THE COCA-COLA COMPANY, Atlanta, Ga.

CARRIZOZO TRADING COMPANY

CARRIZOZO NOTES

"The Outlook is always pleased to receive news of the local people and greatly appreciates news items called to our attention. Call 24, or stop into office."

- Messrs. Thornton and Andrews were up last Friday from Oseuro.
- Fred Flingston of Angus was transacting business in Carrizozo this week.
- Rev. A. N. Evans, of Tucumcari, passed thru Carrizozo yesterday on the afternoon train.
- Mrs. D. N. Tinnon of Carrizozo, is spending several weeks with friends in Tucumcari.
- Attorney Ed. Mechem of Alamogordo, was in Carrizozo on business this week.
- Clyde T. Chamberlain went to Capitan to visit George R. Hyde last Sunday.
- Mr. and Mrs. Felton Gray were up from Oseuro twice during the past week.
- Rev. Haywood and wife visited White Oaks on Tuesday and held services that evening, returning Wednesday.
- Sam Frambrough and family were down from their ranch near Ancho on Wednesday transacting business and visiting friends.
- Andrew Padilla, Jr., of Three Rivers filed on 320 acres of land before A. H. Harvey on Wednesday of this week.
- Governor W. C. McDonald spent a few days at the ranch this week and in the county transacting personal business.
- The difference between a man who has a ranch with 100 acres and one who owns 320, is, that one will only have half as much tax to pay as the other.
- Dr. F. S. Randles of the Yellow Jacket mine spent a few days here this week and was later joined by manager C. K. Hartly and both left for Oregrade.
- Miss Kitty Reily and brother, Morgan, will leave shortly for the State Agricultural College where they will take the college course this year.
- L. C. Barlow came up from El Paso and went out to White Oaks Wednesday in the Jim Lee auto. Mr. Barlow is interested in the cyanide plant recently installed at the Oaks.

—Mrs. Julia E. Gurney left this week for a two weeks' visit to friends and relatives in and near Kansas City, Mo. Frank W. Gurney is doing double duty while his mother is away on her well earned vacation

—Paul Mayer and Paul W. Mayer and a number of other White Oaks citizens have been down this week. Since the advent of the numerous automobiles to White Oaks, that town is made quite near to the County seat.

—Gordon Wells of White Oaks was taken sick the first of the week at Deming. His sister, Miss Edith, passed thru here Wednesday on her way to his bed side, where, it is reported, she found her brother seriously ill.

—A ten days' camp meeting is to be held at Nogal commencing on the 26th of August. Charley Robinson who preached there last year will conduct the meetings and everyone is invited to come and camp.—O. P. Humphrey

—The University of New Mexico will open its twenty-second year on Monday, September 18th. It is desirable that all persons thinking of attending the University should be present at that time. 8-22 9-10

—FOR SALE—Thoroughbred Polan China pigs and Duros Jersey pigs and three-fourths bred Poland China pigs. Month to six weeks old. For further information, write G. W. Hages, Alto, New Mexico.
