WORLD WAR AND GREAT DESTROYER HOBSON'S SUBJECT

"Hero of the Merrimac" Delivers Rousing Speech at the Court House on Preparedness

Captain Hobson spoke to a large and appreciative audience at the Court House Wednesday night, his subject being "The World War and the Great Destroyer." The captain's speech dealt with the conquest of the air, of the sea, and said that when America heard the cry of humanity and entered the war, she found herself unprepared.

In speaking further on this important point, he said:

"There is no folly like the folly of the foolish virgin. This very fact makes it imperative that every patriotic American citizen should co-operate and redouble his efforts to raise the nation quickly to the highest point of national efficiency.

"A firing squad on the range fired 100 shots at a target and made 30 hits. The soldiers were then given one litre of mild beer each, and 30 minutes later were put on the range and fired 100 shots at the same target, believing they were making a record. They made four hits instead of 80. In manufacturing centers where munitions and war materials are produced, it is often found that the plants do not reach full efficiency before the middle of the week, as a result of drinking on Saturday night and Sunday. It is estimated that the producing efficiency of the industrial nations is cut down to about half by liquor.

"In a long grueling war, like the present one, the morale that sustains nations and armies and brings victory in the end, proceeds from the upper part of men's brains, the seat of character, the part that distinguishes man from the brute. It is just this part of the brain that ethyl alcohol attacks the most. It is the high motives springing from this part of the brain that impel America."

He said the young men in the trenches are not subject to as much danger as they would be exposed to the ravages of the liquor traffic in the camps in this country and abroad. He said the same conscript act makes it a crime for liquor to be sold for the use of soldiers and sailors. I am informed that the whole spirit of this law has been nullified with our soldiers abroad, the War Department secretly giving its sanction to the practice of supplying a litre of wine per day to our soldiers in France.

The greatest question of the day, he said, was to cut the millstone of degeneracy from the neck of the human race, thus in-

(Continued on Third Page)

Red Cross Activity

On April 22nd a Red Cross room was opened at the Court house; the ladies were all very responsive, and the garments for the next shipment were finished and ready. The last order placed is several weeks overdue, but there is still work on hand to be done. Material has been purchased at the local stores and the garments are being made of this material pending the arrival of goods from headquarters. The following ladies were on hand to sew last week; Monday, Mesdames Sager, French and Anderson. Tuesday, Mesdames Squier, Grey, Brannum and Stidham. Wednesday, Mesdames Hooper, Wells, Forrest, Jones, Brannum and Lovelace. Thursday, Mesdames Stidham, McCall, Stevens, and Squier.

Completed garments were turned in last week by the following ladies: Mrs. Branum, 1 pair socks; Mrs. Stidham, one bed shirt; Mrs. Jones, 1 bed shirt; Mrs. Tucker, 2 bed shirts; Mrs. Brazil, 2 bed shirts; Mrs. Lovelace, 4 bed shirts; Mrs. Place, 1 sweater; Mrs. Elliott, 2 bed-shirts; Mrs. French, 1 pair socks; Mrs. Leon, 2 pair socks; Mrs. Hutchens, 4 pair socks; Miss Ethel Hoffman, 4 pair socks; Mrs. Elliott, 1 sweater, 1 pair wristlets; Lupe Romero, 1 shawl.

On April 19th, a shipment of 100 garments were finished and shipped to Denver. They were turned in from the following sources and given credit for each in turn, they were: Ancho, 10 bed shirts; Encinosa, 15 bed shirts; Glencoe, 15 bed shirts; Alto, 5 bed shirts; Fort Stanton, 10 bed shirts; Carrizozo, 45 bed shirts.

Mrs. Campbell Returns

Mrs. H. S. Campbell who lately underwent the sad experience of losing her mother at Bristol, Indiana, returned Thursday after paying a brief visit to her brother, N. N. Argo of Chicago.

Card of Thanks

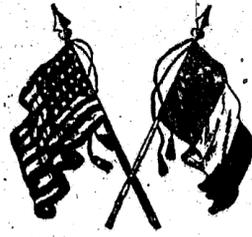

We wish to acknowledge our thanks to our many friends for their kindness during our recent bereavement in the loss of our wife and mother. The expressions of sympathy and acts of kindness, will be forever appreciated.

L. H. Claunch and family.

Mrs. Myler at Rest

Mrs. George Myler died at Coyote last Monday and the remains were taken to Jicarilla for burial, which occurred on Tuesday at 11 o'clock, with Rev. Lewelling of Carrizozo performing the last sad rites. Mrs. Myler was a daughter of Mr. and Mrs. McBride of Jicarilla, and leaves a husband and two small children.

The infant daughter of Mr. and Mrs. E. J. Hey is very low with whooping cough.

Halt! Lift up your eyes!
Salute that Star!
It tells that a MAN has gone to war!
It tells of a mother's love and tears!
It tells of a father's hope—his fears!
It tells of a sister's broken heart!
It tells of a brother doing his part!
It tells of a sweetheart's sacrifice!
It tells of Hell and Paradise!
It tells that a MAN has gone to war!
Halt! Lift up your eyes!
Salute that Star!

Service Flag Galley

The Outlook hereby issues a call to all those having relatives in the service, to raise the Service Flag in honor of the fact, that your son, brother or husband, as the case may be, is defending his country's cause and flag. We are beginning with this issue, a "Service Galley" and all those who have already run up the service flag will do us a favor by sending in their names to put in the Galley. Those who have relatives in the service and have not raised the flag, will you do so at your earliest convenience and send in your names for the Galley. The names will remain standing in the Galley as a lasting tribute to your loved one at his post of duty.

Flag No. 1. — Bearing three stars—In honor of Eb, Ralph and Lewis Jones, at the residence of R. R. Sale, brothers of Mrs. Sale and Miss Grace Jones.

Flag No. 2. — Bearing two stars—In honor of Ralph R. and George B. Barber, Jr., at the Barber residence.

Flag No. 3. — Bearing the single star—In honor of Lieut. Chas. H. Lutz, at the residence of Mr. and Mrs. Henry Lutz, their son.

Flag No. 4. — Bearing the single star—In honor of Morgan Reily, at the residence of Mr. and Mrs. Wm. Reily, their son.

Flag No. 5. — Bearing two stars—In honor of Thomas F. Wright and David T. Beals, sent by the bank; at the First National Bank.

Baby Leona May Coplin is ill with a fever at the Ziegler home.

Boy—Born to Mr. and Mrs. J. P. Foster, April 22nd. Was named Ralph. Mother and boy doing well.

Hobson Banquetted

Wednesday at five P. M. the business men of Carrizozo and Council of Defence, gave a banquet at the Carrizozo Eating House in honor of Capt. Richard Hobson, the "Hero of the Merrimac."

The dining room of the Eating House was decorated with flags and patriotic emblems, being the handiwork of Mesdames French, Kimbell and Sager. The ladies are deserving of much credit for their painstaking. Place cards were neatly arranged at every plate, and it goes without saying, that the hospitality displayed by the management of the Carrizozo Eating House was up to its usual standard—the very best.

A bounteous five-course dinner was served, after which Prof. Conway, Supt. of the Carrizozo schools, made a few remarks in which he thanked the ladies committee for their thoughtful patriotic decorations, also thanked the hotel management, and concluded by introducing Captain Hobson, who spoke for about thirty minutes, during which time he said many nice things about Carrizozo, and its good people.

Mr. J. E. Farley was next introduced, and gave a short talk on the growing sentiment for Nation wide Prohibition. The affair in general, was productive of much good, all present not only enjoyed the occasion, but became better acquainted, and the meeting served as a good forerunner for the evening speaking at the Court house.

Notes of the Banquet

The red and white carnations contributed by the Ladies' Committee were ordered by them from El Paso, and aside from being very beautiful, were highly appreciated. Thanks, ladies.

The efficient service rendered by the Carrizozo Eating House under the supervision of Mrs. Gurney was a subject for much appreciative comment.

Prof. Conway's voice seemed stronger at the close of the banquet than it did at the beginning. We wonder why?

A newspaper representative was assigned to a position of safety. His seat was directly between that of our District Attorney and the local Methodist minister. He was between the law and the gospel.

Little Miller French Ill

Little Miller French has been denied the pleasure of the playground for the past week on account of being afflicted with tonsillitis. His condition is improving however, and he will soon be out again.

School Children's Salute

We pledge allegiance to our flag and to the Republic for which it stands—one nation indivisible with liberty and justice for all.

BAG ONE OF KAISER'S SUBS AT NIGHT IN FRENCH WATERS

Ralph Jones' Boat Sights Sub at Twilight and Sends "Big Baby" Shell Into "Kraut Eater."

Somewhere in France, March 27, 1918.

Dear Folks:
I just received all of your letters in one bunch, and maybe you think that I wasn't pleased. I had no trouble getting them, because the mail orderly is one of my chums, and he brought them right over to me. All of the fellows envied me on account of the size of the letters. Some of them even called them "newspapers" and wanted to look at the comic section. I haven't finished reading them yet, and the Outlooks were a treat. I read in one of the Outlooks where Grace had opened her office for business in the Lutz building as a public stenographer although you did not say much about it in your letters. Well, here's wishing it a prosperous outcome.

I have put a notch on my gun, as my boat landed a sub a few days ago. We had been out on the trail of one that had been seen, and had been out for some time and were coming in on account of darkness, when the sub was sighted. The conning tower and periscope were all that we could see, so we proceeded to go after him. It was just a few minutes from the time that it was sighted until we were on the spot and began work, and made short work of it at that. What made me so mad was, as soon as general quarters sounded, I made a run up on top-side to see all the fun and was enjoying myself fine when they told me to go below in the fire rooms and go to work, so I had to go where I couldn't see a thing. I could feel and hear the shots plainly. They made us all stay below for about twenty-five minutes, for that is

as long as it lasted, and then when I did come up there was nothing to see. Mad! I only hope that we have that luck every trip out. Then the sub question will be solved. Just a few days before this, one of the other boats that was with us had the good luck to get one, but we did not see it. The subs are a thing of the past—instead of being the hunters, they are the hunted, and they are scared of us, although they do get a boat now and then.

It is quite a shock to hear of all the kids at home getting hooked by Dan Cupid. Oh, well such is life.

I bet Carrizozo is going to be some little burg yet. The only drawback is the wind and dust, but just the same I would give a

(Continued on Third Page)

The Deep Sea Peril

By VICTOR ROUSSEAU

CHAPTER XV—Continued.

She ran unchallenged through the destroyer flotilla and came alongside the rear-admiral's flagship, a monster cruiser armed with a powerful battery, on which he had hoisted his pennant. A few minutes later Davies and Ida clambered aboard, leaving Clouts in charge of the submarine—and of the queen of the swarms.

Half an hour later Clouts received the command to take the F55 to London as best he could. Davies' interview with the rear-admiral had decided the latter to open hostilities immediately. The squadron spread out and approached the Dogger fanwise, to encircle the monsters.

MacBeard, who had just awakened aboard the motorboat, saw in terror the great shells dropping all about him. He thought this was the end of all his plans. It seemed impossible to escape.

But the monsters, terrified by the vibration, dashed wildly in all directions, and, finding themselves ringed in, churned up the water madly. The man in the chains on the flagship looked at his lead incredulously. It marked 12 fathoms, where it should have marked 25. It marked ten, seven, four—and suddenly the sea seemed to open. Half the vessels in the attacking squadron grounded. They lay on their sides in the North sea sand, one set of guns pointing heavenward, the other toward the bowels of the earth.

Then a huge, agitated wave, radiating outward from the still vortex in which the motorboat reeled dizzily, lashed them and buffeted them about. Beyond control, the dismantled, fleeing squadron drove under the pounding waves in all directions.

Out of the vapor chugged a motorboat. Slowly, as the haze subsided, she drew alongside. In her stood MacBeard, triumphant in this display of his power.

Five minutes later he stood in the presence of the rear admiral, Davies and Ida, as well as of the junior officers.

"You see, we are unconquerable," he said grimly. "But I have come to offer you terms."

As a public enemy, many afterward said that he should have been hanged then and there, in spite of his envoyship. But the rear admiral refused to violate the traditions of the sea—or perhaps he realized that MacBeard dead, he could hope for no means of subduing his unchained devils.

"What are they?" he inquired courteously.

"First," said MacBeard, "personal indemnity."

"In return for what?"

"In return for the destruction of this menace. I pledge my word that it shall disappear forever."

"But how?"

MacBeard hesitated. Eager as he now was to destroy the herd, he was not overanxious to reveal his plans. However, he yielded the point.

"As you have observed," he said, "they are completely under my control. I will take them into Skjold fjord, on the Norwegian coast. As you know, it is a huge body of water, surrounded by cliffs of high basalt, and having an entrance barely large enough to admit a small steamship. Once they are there, the entrance can be blockaded until they are dead of famine. In return I demand possession of—" and he looked toward Ida.

He did not know her name, but it did not strike him as peculiar.

A glance at Ida's horror-stricken face was sufficient to enable the admiral to decide.

"We refuse," he said.

But Ida stepped forward and laid her hand on the admiral's arm.

"I cannot let you refuse," she said. "I am nothing."

"No!" cried Davies. "You shall not accept his terms!"

"Yes," answered the girl, facing him quietly. "It is only myself, and there is the whole world at stake. Wouldn't Donald do as much for me?"

And Davies was silent. For Donald had said very much the same thing when he thought Ida dead on Fair Island.

Ida turned to MacBeard. "You wish me to be your wife?" she asked.

"Yes—if you like to call it so," he stammered in answer.

"I will go with you," she said. The admiral interposed.

"My third and last demand is—fifty gallons of gasoline."

CHAPTER XVI.

The Queen's Call. It would be difficult to estimate the mingled rage and horror that swept over London that night when the news came of the admiral's treaty.

The admiral felt that he had rid the world of a dangerous menace for a bagatelle. But the feeling in the Admiralty was one of humiliation and vindictiveness.

"The scoundrel!" muttered the second sea lord, clenching his fists. "Who knows that he will fulfill his pact?"

"He must," said Donald.

"Why, sir?"

"Because the moderation of his terms shows that MacBeard has no ulterior motive. I think," he added, "that the admiral did perfectly right."

"And Miss Kennedy?" inquired the sea lord.

"Sacrificed herself for her country—as others have done," Donald replied. "But the second sea lord did not understand."

The news of the expected arrival of the F55 having become public, Donald sent a wireless message, to a patrol ship, ordering her to intercept the vessel and bid it anchor off the Nore, where he could go aboard without publicity. When he arrived early the same morning the first person who welcomed him from the deck was Davies.

"Do you know, sir," he said, "I think we shall checkmate that scoundrel yet."

"It isn't possible," groaned Donald. "We have pledged our faith."

"I wonder if there may not be human beings under the sea, sir, who rule those devils. I wonder whether that fish-girl Clouts has got in the messroom may not have some power over them if—we give her her head. I wonder if we couldn't use her to outwit MacBeard."

"Absurd!" said Donald curtly. "But let me have another look at her."

"Clouts!" called Davies down the engine room tube.

A minute later Clouts appeared, hurriedly pocketing his mouth organ and wiping his lips. "Aye, sir!" he said.

"Captain Paget wants to see your friend, Clouts."

Donald entered alone and stood looking across the messroom toward the phantom shape at the further end.

The queen shrank back against the wall and stared at Donald with her mournful eyes. The face was wavering, half-visible; but the eyes were fixed on his intently, and there was the pathos of a soul struggling for life in them, such as we see in the eyes of suffering beasts.

She came to him and put her arms about him. Her face lay for one instant against his own. And to his amazement, to his horror, Donald seemed to know that Ida was nothing, and that this woman was all.

A soft murmur came from the queen's throat. It rose and fell, and rose again until it seemed to fill the entire submarine with sound. It was the swarming call. It was the call of the queen when she has found her mate and leads forth her army to new land, new conquest, new dominion.

From the east shores and from the Baltic, from the Thames Estuary, the channel and the Seine, the monsters came. They knew that swarming call, though they had only heard it once before, and that cut short.

Sam Clouts burst open the door. Donald was lying upon the floor within, and, standing beside him, was the queen. He heard the call die on her lips.

Shaking with terror, the sailor dragged Donald outside and locked the door. He carried his captain up on deck. In a few moments Donald opened his eyes.

"What happened, Clouts?" he asked.

"You fainted, sir. Excuse me, sir, but you oughtn't never to have gone in there. She's a devil, sir, one of them vampires like that we used to hear about when we were children. Mrs. Clouts—"

Donald staggered toward Davies, who was running out of the conning tower.

"You were right, Davies," he said. "We've got him. You heard that call?"

"Listen, Davies! If I'm not mistaken that call will bring the monsters to us. Let's make for the deepest part of the sea, first, so that we won't drive on a sand bank when the water evaporates. And then—where was it MacBeard had gone?"

"Skjold fjord. I was there on my first cruise, sir. It's a deep, almost land-locked harbor in a wild part of

the Norwegian coast. The whole herd could disappear themselves in there—and it would be easy to block the entrance, as MacBeard said."

"Never mind that, Davies. Don't you see that this releases us from our faith toward him? He'll be making for Skjold fjord with Miss Kennedy, and as many of the monsters as he has been able to gather together by means of that tuning-fork sound, which resembles the call we heard about as much as— Well, never mind that. The point is, MacBeard is not to be undeviled."

Davies looked at Donald strangely. He did not understand his sudden high spirits; he could not yet see, altogether, at what his chief was driving.

"The herd will accompany us, but we'll keep near MacBeard and—why, let him think that it's following him. He mustn't see us till we're within the harbor. Understand? And then—there are still two torpedoes left, aren't there? Well, then, we'll blow his craft to pieces, and—"

"And save Miss Kennedy somehow first," said Davies.

Already the horizon was black with vapor on the three seaward sides. The shore lay about two miles to port. The anchor was hoisted, and soon the F-55 was making rapid surface headway in the direction of the Belgian coast.

"It's blowing up pretty thick, sir," said Davies, looking out through the port at the dense clouds of murky hydrogen that rolled under the cumulus clouds.

"Davies!" cried Donald. He snatched his glasses and put them to his eyes. "Look, Davies!" he cried.

In the distance, a tiny point amid the rolling clouds, they saw the motorboat.

The submarine began to dip. The water covered her bow, her stern. Donald went to the mirror of the periscope, which, fixed because there was no one to start the motor, afforded him a vision of less than a right angle.

But he saw only the thickening clouds, and presently these blotted everything out. The mirror was black as ink. He turned away. A groan escaped his lips. He clenched his hands and prayed that the plan might not miscarry.

CHAPTER XVII.

The Pursuit.

Within the conning tower Donald could hear distinctly the chugging of the engines of MacBeard's motorboat. Had he risen to the surface both vessels would have been invisible in the hydrogen gloom; but when he might have lost his quarry. Under water he could hear the sound greatly increased in volume, and could better determine its direction.

He surmised correctly that MacBeard, having followed the swarm, would attempt to lead it northward by means of his tuning-fork. And the swarm, sensing the presence of the queen, would accompany the F55, while MacBeard believed that he had himself mustered them.

With the tip of her periscope just submerged, Donald steered the F55. Never had he followed so shrewdly upon an enemy's track. Now to port, now to starboard, he followed the sound of the gasoline engines, while Clouts watched them and Davies, in the diving station, sent up an occasional cheery message.

Night fell and passed. Dawn came up, although not a vestige of light could have been seen, even aloft. A sooty column, hydrogen surcharged with atmospheric dust, was passing up the Norwegian coast.

At noon Davies, whose duties had not been constant enough, to prevent him from enjoying a short slumber, begged to take Donald's place. But Donald refused.

As he ran the boat his brain hammered out the clear outlines of his plan. He would lead the herd into Skjold fjord, leave Davies in charge, kill MacBeard and rescue Ida. Then he would send her overland southward with Clouts, and remain until a ship could arrive with materials to block the passage.

The high, precipitous cliffs of the fjord would effectively bar in the monsters. For a few days or weeks the world's menace would writhe there like a wounded snake. Then it would pass. Donald had no doubt of his plan.

But he did not dare to dream of Ida; only he set himself resolutely to the pursuit.

So they drove on up the Norwegian coast all day, and when night fell they were still hard on the chase.

Davies called through the engine-room tube.

"There isn't much power in the batteries, sir," he said. "That salt water cut our running reserve in half, and we've been using it pretty freely. The dynamo coil was injured by the sea water."

"Go on, full speed," said Donald. "MacBeard must have been running slowly, sir, to save his gasoline. If he puts on a spurt we're done."

"Drive till the electrics fail," then we'll come up and use the petrol motors."

Donald could see by the chart that they were within twenty miles of their destination when the speed of the F55

began to fall. She dropped to nine knots, to eight. The sounds of the gasoline engine were growing fainter. Donald called down the tube.

"Bring her up!" he shouted.

"Aye, aye, sir!" Clouts called back. And the F55, climbing out of the water like a sea otter, seemed to shake the drops from her, and continued under the moon.

Far in the distance Donald could see the dense column of fog, as it disappeared toward the Norwegian shore. That smoky devil MacBeard had wrapped himself in obscurity to his own undoing. He did not dream of the Nemesis upon his heels.

"He's sporting for Skjold fjord," said Davies.

(TO BE CONTINUED.)

MULE MISSED HER TOBACCO

Temperamental Mountain Canary Not Blamed for Planting Hoofs in Back of Her Only Friend.

Thinking the animal made a mistake in not knowing whom she was kicking or it was his fault because he forgot to give her the usual chew of tobacco, Fred Wales of Grass Valley, Cal., who carried his arm in a sling for some time as the result of a kick from Bessie, excuses his partner of fourteen years for injuring him.

The mule is known to every employee of the mine, 450 in all, and while there is no affection for her among 449 of them, they all have a wholesome respect for her in spite of her contrary disposition. It is a mine classic that she kicks the airpipe two feet above her for exercise.

With Fred Wales, however, it is different. He has worked with Bessie for fourteen years and has become attached to the animal. He excuses her vagaries as an indulgent mother condones the actions of a spoiled child.

It is merely a matter of temperament, he says, and the other men do not understand her. His faith was shaken temporarily, but not for long.

In the physician's office he took offense at a suggestion that the mule should be killed on account of her viciousness and rushed to her defense.

"It was perhaps my fault; it certainly was not hers. Bessie either did not know who it was when she kicked or I had forgotten to give her the usual chew of tobacco. I am willing to take all the blame."

Ancient English Tree.

There grows in the beautiful garden of the dowager counties of Derby, in England, an ancient oak tree which is said to be the oldest one in England.

The size of the trunk of this venerable oak testifies to its antiquity, but on a stone seat by its side is more direct evidence. The seat bears a tablet recording that Wilberforce wrote in his diary in 1788 that he well remembered, after a conversation with Pitt, and before descending into the Vale of Keston, sitting at the foot of "an old tree" and resolving to give notice in the house of commons that he would move the abolition of the slave trade.

The tree in question, which was therefore a good age 130 years ago, is carefully preserved with zinc plates where the damp might gather, and the branches are held up with iron bars, but it bears a goodly crop of leaves, and seems good for many years of life.

Being One's Self.

We owe it to mankind to give ourselves as we are to earth's aggregate of attainment and experience. We are indeed to raise ourselves to our Nth power of existence and achievement, but that highest power must still be our own, individually expressed. Even though our best be poorer than some one else's indifferent medium, it will be a thousand times better for us and for all, that humanity get each undivided and incommunicable self rather than that it receive an imperfect and disappointing duplicate of another.

And let us remember, also, both for our comfort and our inspiration, that he who gives his utmost is at the last analysis rendering a greater service than he who, though seemingly bestowing much, gives but a fraction of his possible being and doing to his fellow men.—Philip Burroughs Strong.

New Use for Motorcycles.

That new uses for motorcycles are still being discovered is shown by the fact that a Californian with a big lawn to care for drives his mower with the aid of his powered cycle. After several unsuccessful attempts he devised satisfactory means of attaching the grass cutter to the front forks of his machine, and now he asserts that he can trim the lawn in about one-tenth the time formerly required. The only consideration that limits his speed apparently is the fact that the mower must be oiled frequently.—Popular Mechanics Magazine.

Not Out of Date.

Says an old proverb: Some wives can throw more out the back door with a teaspoon than their husbands can bring in with a scoop shovel at the front door.

Finger Marks.

Sweet oil will remove finger marks from varnished furniture and kerseose from oiled furniture.

NERVES GAVE OUT

Serious Kidney Trouble Had Made Life Miserable, But Doan's Removed All the Trouble. Hasn't Suffered Since.

"I had such severe pains in my back," says Mrs. Albert Akroyd, 304 W. Indiana Avenue, Philadelphia, Pa., "that they almost doubled me up. Many a day I could not do my housework and at every move it seemed as if my back would break in two. My feet and ankles swelled until I had to wear large-sized slippers, and sometimes I couldn't stand up."

"I had dizzy spells and dreadful headaches and a fiery flush passed before my eyes. Had a heavy weight been resting on my head, the pain could not have been more distressing. The least noise startled me. I was so nervous, I couldn't control the kidney secretions and the pain in passage was awful."

"It began to look as though my case was beyond the reach of medicine until I used Doan's Kidney Pills. The first box benefited me and four boxes cured all the troubles. I have had no further cause for complaint."

Sworn to before me. Thos. H. Walters, Notary Public.

Red Cross Bag Blue, much better, goes farther than liquid blue. Get from any grocer. Adv.

Marriage is a lottery in which the blanks are husbands—so says a wife who takes in washing.

Many a persuasive woman has made a dumb waiter answer.

Red-blooded men of courage are on the firing line—and there are many anemic, weak, discouraged men and women left at home.

At this time of the year most people suffer from a condition often called Spring Fever. They feel tired, worn out, before the day is half thru. They may have frequent headaches and sometimes "pimply" or pale skin.

Bloodless people, thin, anemic people, those with pale cheeks and lips, who have a poor appetite and feel that tired, worn or feverish condition in the springtime of the year, should try the refreshing tonic powers of a good alternative and blood purifier. Such a one is extracted from Blood root, Golden Seal and Stone root, Queen's root and Oregon Grape root; made up with chemically pure glycerine and without the use of alcohol. This can be obtained in ready-to-use tablet form in sixty-cent vials, as druggists have sold it for fifty years as Doctor Pierce's Golden Medical Discovery. It is a standard remedy that can be obtained in tablet or liquid form.

A good purge should be taken once a week even by persons who have a movement daily, in order to eliminate matter which may remain and cause a condition of auto-intoxication, poisoning the whole system. To clean the system at least once a week is to practice health measures. There is nothing so good for this purpose as tiny pills made up of the May-apple, leaves of aloe and jalap, and sold by almost all druggists in this country as Doctor Pierce's Pleasant Pellets, sugar-coated, easy to take.

Absolutely Nothing Better than Cuticura for Baby's Tender Skin. Soap 25c. Ointment 25 and 50c.

WORLD WAR AND GREAT DESTROYER HOBSON'S SUBJECT

(Continued from Front Page)

...suring the ushering in of a new heaven and a new earth. The captain concluded with uttering the following words in patriotic manner. He said:

"Do you stay at home? Be a better man, a better citizen than you have ever been before—less selfish—do every duty—gladly bear the taxation—meet the liberty loans—sustain the government in all its activities for conserving and mobilizing the nation's strength; sustain the Red Cross, the Y. M. C. A., the Y. W. C. A., the Recreation Fund, the Bible Society, and all the other manifold agencies for the efficiency of our armies and of the nation. Join me in the high resolve, that, with God's help, each one of us, regardless of cost, will do his whole duty."

Captain Hobson distributed cards with pencils attached, the amounts stated on them ranging from 33 cents to \$100—these contributions to be donated for the benefit of the nation-wide prohibition movement, but up to the time of going to press, The Outlook had not learned the amount of the donations.

A country worth fighting for is worth saving for. Buy Liberty Loan Bonds.

MILES MEDICAL CO., Elkhart, Ind.

BIDDY HAS NERVOUS SYSTEM

Hens Producing Valuable Eggs and Queens of All They Survey, Require Outdoor Exercise.

The nervous system of the high-producing hen is not a thing to be regarded lightly when eggs are 60 cents per dozen. Plenty of range and outdoor exercise undoubtedly results in strong, vigorous stock, capable of digesting much food and laying many eggs, but it would seem, observes an authority, that with the yards covered with several inches of snow that exercise could be obtained in a dry open-front house by judicious feeding of scratch grain in deep clean litter with more satisfactory results in good egg production. For three or four months during the winter season fowls will accustom themselves to such conditions and will not suffer much in vitality and will surely lay more eggs, particularly if the winter is unusually severe.

All these things are true as applied to pullets that are being kept primarily for egg production, but in the case of yearling hens or early hatched pullets that will be used for breeding stock next spring vitality is of tremendous importance and egg production is secondary, and everything that can be done to increase the vigor and hardiness in such birds will be reflected in the hatching power of their eggs and the vitality of the chickens which are hatched from them.

LIKE FATHER, LIKE DAUGHTER

Lady Mackworth is Regarded as Lord Rhondda's Right-Hand Assistant in Wales' Management.

One of the most remarkable women of the day is the daughter of a remarkable man, for Lady Mackworth, director of national service for Wales, says London Answers, is the daughter of the food controller, the great Welsh coal operator, Lord Rhondda, one of the outstanding figures of Mr. Lloyd-George's "business government."

"Like father, like daughter" is true in this case, for Lady Mackworth is a director of more than a score of big businesses, and actually chairman of several. She certainly proves that women are not devoid of business acumen, as some would argue, and that they are capable of doing big things in the business world.

With her, business, like charity, begins at home, and it was in connection with her father's great business concerns that she first learned the ropes and got to know her way about the intricate channels of business life.

SAVED LIFE OF KORNILOFF

Private Soldier Who Aided Russian General to Escape From Austrians is Tenderly Remembered.

General Korniloff, the Russian general recently accused of treason, is not without sentiment or gratitude. This was shown by his actions regarding a private soldier, Mranak by name, who aided him in his escape from the Austrians, writes a Russian correspondent.

The gratitude to Mranak was shown by Korniloff's order to Company A, First regiment, Czecho-Slovak brigade. It was Mranak's wish that he escape from the Germans to join that fighting unit of the Russian army. Korniloff in that prison camp in Bohemia had promised him that when they reached the land of the new freedom his wish should come true. It was not given to Mranak to live until that day, but his memory and his name sticks in the roster of the company and the regiment. Korniloff ordered, and his order was fulfilled, that at roll call Mranak's name should be called, and when it is called a soldier in the ranks answers:

"Shot by order of a Hungarian court-martial at Pressburg for saving General Korniloff from death."

BAG ONE OF KAISER'S SUBS AT NIGHT IN FRENCH WATERS

(Continued from Front Page)

whole month's pay for just one good lung full of it. I know now what it is that draws everyone back there after they are away for awhile. After this war is over it is going to draw me back too. I see that the people there are strong for the Red Cross. I am glad to see it because it is a great thing, and if every one could know, we men over here ought to. I believe the greatest thing that the people over in the States ever did for a good cause was the Y. M. C. A. I don't know what we would do without it. I am taking advantage of one of its best parts, and that is the writing tables. But at that, this pen I have is sure on the blink, but I guess you can read this.

This is all so wonderful to me that I can't express my admiration for it in a letter. The scenery is all so picturesque—such old and curious customs. I know that the people here think that the Americans are all crazy, but still everything that we do seems to please them fine. There is only one thing that gets me, and that is the French kids. They will swarm around us in droves and beg us for pennies. The reason for that is, that the pennies they give us are about the size of a half dollar, and worth about half a cent of our money, and rather than carry them around in their small pockets, the sailors will give them to the kids, and they all have an idea that we are all worth up in the millions. An American soldier or sailor, if he sees anything that he wants, is going to buy it, regardless of price, and it sets the French people wondering. Say, you can't imagine just how many men our government has landed here safely. You can see Americans everywhere. My only hope is that we will be able to see them in Berlin before very long, and I hope, too, that we have the kaiser eating Boston beans about the same time, too. I am going to write to Eb, Lewis and Carl tonight and hope that I get an answer real soon from all of you. So please write often, as that is about all of the real pleasure we get over here. I am stopping this for today because I will have to charter a special boat to get it over.

Love and best wishes to all.
From Ralph.

U. S. S. Smith.
Care of Postmaster, N. Y. city.

More than Worthy of Mention

On April 24th, as Secretary of the County Board of Education E. M. Brickley, went to Capitan and arranged with the teachers there to close the schools on Liberty Day and devote the entire day to the sale of liberty bonds. He gave them some literature, and some valuable suggestions as to how to proceed.

Their efforts surpassed all expectations; they took hold of the proposition and sold 39 bonds with a total subscription of \$2350. This effort on the part of Mr. Brickley responded to with such vim, and brought to such a successful conclusion

DESTROY FRENCH FOOD SOURCES

FRUIT TREES OF NORTHERN FRANCE DESTROYED BY RETREATING GERMANS

WHEN the Germans retreated from long held positions in Northern France they girdled every fruit tree that time permitted. Here is such a tree, hacked beyond chance of the tree's surviving unless first aid measures were quickly adopted. In many cases the advancing French troops brought the first aid material and sometimes succeeded in saving the trees. Where the tree was absolutely cut down—as hundreds were—there was, of course, no relief measure to employ. Members of the U. S. Food Administration brought this picture to America. Early in the war the German government introduced a policy of strict food conservation at home and has endeavored to curtail in every possible manner the French and English supply. U boat warfare and destruction of farming property are parts of the same campaign.

CHERRY TREE

America is today the great larder of the allied nations. Out of our food stocks we must have enough to feed our European associates in this war.

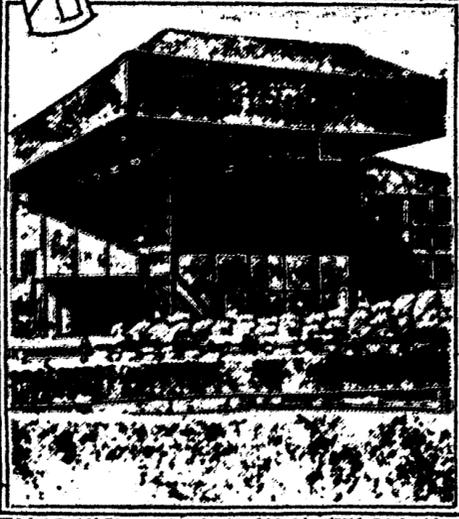

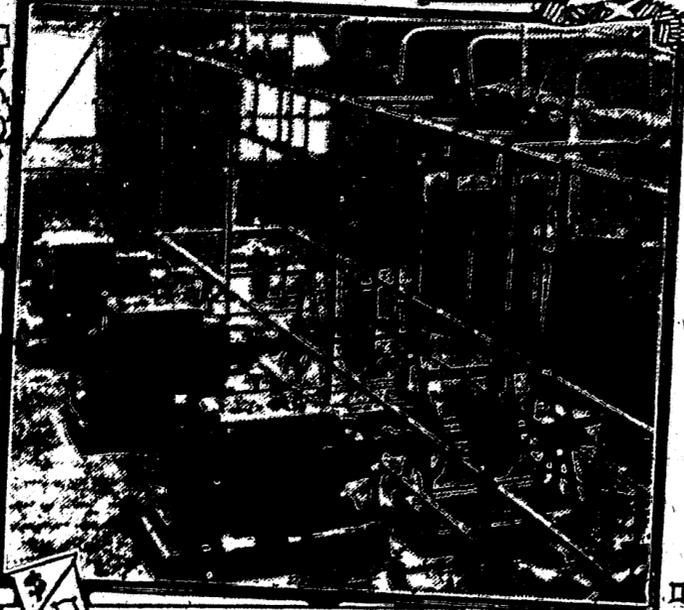

DR. FREDERICK G. COTTRELL

TURNING SMOKE and DUST INTO MONEY

Robert H. Moulton

Scientist Has Discovered Way to Stop Enormous Waste of Fuel

COTTRELL APPARATUS USED IN CALIFORNIA SMELTER

AMERICA sends billions "up in smoke" yearly because of the enormous waste in the fuel used by our industries. On the other hand, there is a man in Washington who has discovered how to turn smoke into money and he is now busily engaged teaching the rest of the country how to perform the same trick. He does this by means of devices which, through electrical precipitation, not only reclaim vast wealth from the smoke, dust and fumes of smelters and other plants, but at the same time redeem thousands of acres of nearby land. As a matter of fact, the curb which he has put upon the smoke and dust nuisance—his original aim—now actually bids fair to be, in some directions, the primary reason for the running of certain of our industries. The smoke wizard who has accomplished these remarkable things is Dr. Frederick G. Cottrell, chief metallurgist of the bureau of mines.

Doctor Cottrell's experiments began several years ago when, as a member of the staff of the University of California, he was called upon to solve the problem of helping a smelter located on San Francisco bay. The waste gases and vapors from this smelter, resulting from the sulphuric acid parting process used in treating gold and silver bullion, were declared a nuisance by neighboring farmers and seemed likely to provoke costly litigation and possibly lead to a shutdown of the plant.

The gases discharged into the air amounted to substantially 5,000 cubic feet per minute and held in suspension an important proportion of sulphuric acid in the form of a fine mist. The corrosive action of the sulphuric acid was shown throughout the entire zone swept broadcast by the shifting winds, and both the agriculturists and the people generally had ample reason for complaint. The smelter was a profitable one and the management was anxious to find some way to abate a nuisance that was both a menace to health and harmful to vegetation.

Laboratory Meets Industry.
Doctor Cottrell's preliminary work brought up some puzzling situations. Up to a certain stage matters went well enough on the miniature scale of the investigational tests, but beyond this was the question of meeting the practical situation presented by a large commercial smelter. A big part of Doctor Cottrell's achievement lay in spanning the gap between the laboratory and the industrial plant and in finding ways to control the enormous pressures of the necessary electric current, amounting up to 100,000 volts.

The problem was solved, however, and so well was the precipitator installed at this smelter designed that it has been doing its work satisfactorily ever since. Further, by mere chance Doctor Cottrell attacked at that plant what is commonly admitted to be the most difficult of all problems of smoke or fume abatement, viz., the precipitation of acid mist.

The good results obtained in this first instance soon became widely known and a new line of application was opened a few years later when the great copper smelter at Bakula, Cal., was threatened with fume litigation by the United States forestry service. "Fume," or fine particles in the form of smoke, and sulphur dioxide gas, invisible to the eye, given off from the stacks of the smelter, had swept the neighboring country bare of vegetation for miles, and it was a case of either a shutdown or a suppression of these destructive discharges.

A full-sized plant of the Cottrell type was, accordingly, installed. The volume of the gases treated averaged

TRAFFIC POTASH RECOVERED AT CEMENT PLANT
between 200,000 and 300,000 cubic feet per minute, and during the filtration tests made of the gases throughout a period of nine months it was found that the electrical precipitator recovered between 80 and 90 per cent of the suspended matter. With improvements in detail of construction, the efficiency later was raised well up into the nineties.

Great Wastage in Smelts.
The general public has only the faintest notion of the wastage represented in the fumes and smokes from belching stacks quite apart from the beneficent economies following from their abatement where the nature of these outpourings is harmful to man and vegetation. In the smelting of lead the fume contains anywhere from 3 to 10 per cent of the volatilized metal in the form of lead oxide and lead sulphide, with compounds of arsenic and antimony. This percentage is well worth recovering. Doctor Cottrell is authority for the statement that not less than 26 valuable substances are found in fumes which, if not collected, would be lost during the smelting and refining of various ores, etc.

At Great Falls, Mont., there was at one time a daily loss in dust from the stacks of one of the large smelters of 2,775 pounds of copper, 108 ounces of silver, and 0.71 ounces of gold. By an adequate provision for dust recovery, this smelter was able to save in the course of a single year metallic values amounting to \$120,263.

The blighting gas, sulphur dioxide, given off from the stacks of copper smelters can be transformed into useful substances by turning the gas into sulphuric acid or sulphur. Sulphuric acid is largely made here by treating pyrites, and we now consume annually in the neighborhood of 6,250,000 tons of 50 per cent sulphuric acid. To a great extent this corrosive fluid is a prime constituent in the preparation of fertilizers, especially where phosphate rock is treated for this purpose. It is also used in converting the ammonia by-products of cooking ovens into ammonia sulphate. Sulphuric acid is in great demand by explosive factories, oil refiners, steel mills and varied industries engaged in the making of heavy chemicals. Sulphuric acid is likewise extensively employed by smelters and the latter are paying as high as \$80 a ton today for the stuff. Sulphur dioxide is used in the preparation of wood pulp for paper making, both as a disintegrating and bleaching agent.

tionable gases, not necessarily harmful a new aspect of precipitation arises. The electrical treater can handle only fluids or substances in the shape of particles and cannot cause the precipitation of gases, per se. But these gases can be made to condense upon mists in the form of steam or finely sprayed water or upon extremely fine powder or dust purposely thrown in to the sweep of the gases to effect this. In this way it is possible to deal with varied conditions and

to abate nuisances that bid fair to cause the shutdown or removal of costly plants.

In dealing with dust alone, the first direct effort along this line had to do with a Portland plant near Riverside, Cal. An electrical treater was installed there a few years ago by way of experiment, and a couple of years later was collecting something like a hundred tons of dust daily. Prior to that the dust had been scattered broadcast and settled upon the groves of adjacent orange growers, leading to extensive litigation. Analysis of the recovered dust disclosed the presence of an appreciable percentage of potash, but this attracted no marked attention at the time. Since then, particularly now that it is no longer possible for us to get potash from our prime source, Germany, this element so essential to a balanced plantfood is in great demand.

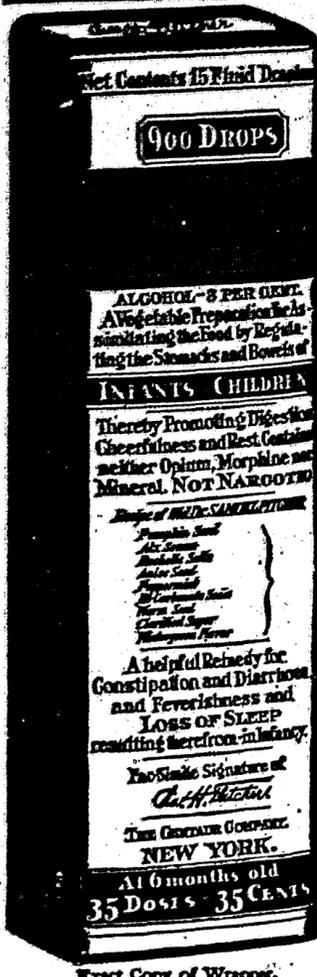

Last year the plant at Riverside started full blast to actually create dust as its first concern in order to recover the potash which previously had been only a by-product in the manufacture of cement.

Cement Becomes By-Product.

This is certainly a romantic development of modern industry, where an apparatus installed for the purpose of saving the life of the factory turns out to be the center of operations around which the entire plant is adjusted. In other words, the cement becomes for the once the by-product and the profits on the potash furnish an apple revenue, while the cement is just so much additional gain.

Anyone at all familiar with the average cement plant and the gray powdered appearance of the nearby territory can realize the boon that would be conferred by the general adoption of electrical precipitators not only in preventing the escape of the dust but in saving the potash which is so much desired.

Perhaps the most interesting part of the whole story of Doctor Cottrell's success is the fact that he has presented to Smithsonian Institute at Washington all of his valuable patents relating to the electrical precipitation of dust, smoke and fumes. The purpose of this munificence on his part was that any profits resulting from the practical application of the patents should go to the upbuilding of a fund to aid in the advancement of scientific research. In short, to help genius and to develop inventions where the needful financial aid might otherwise be lacking.

No Prizefights Go

One feels like congratulating Gov. Lindsey on his prompt and emphatic refusal, sent to the persons who sought to stage the Willard-Fulton prize fight in New Mexico on Independence day.

The idea of two big, husky citizens engaged in a prize fight for money on Independence day is utterly repugnant, even to those of us who admit enjoying a good boxing match in peace times.

The state which permits this fight to take place within its borders, on Independence day, or on any other day while the nation is at war, will be disgraced.

Let these fighters go and do some real fighting, so as to earn the right to call themselves Americans and rake in the American dollars. If they will go over and prove up, and if, perchance, they come back, we will honor them and let them stage their performances at will. But we want none of them now.—Albuquerque Herald.

Mark Twain on Advertising

Mark Twain was a firm believer in ad running. At a dinner he said: "When I was editing the Virginia City Enterprise, writing copy one day and and mining the next, I tried in many ways to drive home the fact that advertising pays. One day I received a letter from a subscriber saying that he found a spider pressed between the pages of his paper. He wanted to know whether this signified good or bad luck. I replied "The finding of a spider in your copy of The Enterprise was neither good luck nor bad luck. The spider was simply looking over our pages to find out what merchant was not advertising in them, so that he could spin his web across his door and lead a free and undisturbed existence forever after."

First moth—Oh, I'm so tired this morning.

Second moth—Up late last night?

First moth—Yes, I was at a camphor ball.—Ex.

Lady of the House—Why don't you work for a living?

Lazy Luke—Well, lady, I want to give every'ting else a fair chanst first.—X.

The War Lecturer—These are not my figures, ladies and gentlemen; they are the figures of a man that knows what he is talking about.

Extremely Unfortunate

Roy Textor, who is a son of J. G. Textor of Carrizozo, was taken to Hotel Dieu about three weeks ago, suffering with typhoid fever. His condition became so alarming that his father hastened to his bedside last week, and since that time has been constantly near him.

To add to this unfortunate circumstance, Roy's little daughter, aged twelve months, was taken ill about one week ago with spinal meningitis, and died at noon Monday, according to a message received that afternoon by Mrs. O. T. Gillett, who is a sister to Roy. These unfortunate occurrences are beyond power of mortal tongue to explain, but as the wind rides the troubled wave, so our bark of what we call life, breasts the storm of adversity, and sooner or later we find ourselves under peaceful skies. The grief stricken family have the sympathy of their Carrizozo friends.

Deserved Better Attendance

Tuesday night Mr. Sam Gillett of El Paso delivered a splendid address at the Court House, on the present necessity of loyally supporting the Government in its fight against tyranny, autocracy and brutish force which the (k)aiser is trying to establish. He said that England was slow, she should not be criticised, for once she would get the kaiser by the back of the neck, she will never let go.

Mr. Gillett said the critical hour of Allies is at hand; that the Government needed money, and that the people should give until it hurt and then keep on giving until it quit hurting. There was no tone of sympathy in his words for German spies. He said that they should be arrested at sundown, tried at midnight, and shot at sunrise.

Mr. Gillett spoke for about an hour and it is to be regretted that every individual in the county did not hear him. In conclusion, he expressed hope that every man and woman would renew their efforts to support our boys in the trenches and our country in its darkest hours. He ended the speech with these words:

"Lord God of hosts be with us yet,

Least we forget; lest we forget."

Look! Look! Look! Look!

SNAPPY THOUGHTS

From Liberty Loan Speeches.

"Gentlemen, I never made a speech in my life and 'aint goin' to now, all I say is—we're in it—let's win it."

"Don't say you got no money. If you 'aint got none, go borrow some."

"We are going to try William Hohenzollern for murder in this Church next Wednesday. You are summoned on the jury and there will be a heavy penalty if you do not attend."

"A Chinaman went to one of our banks last week and said, 'Mawboy, Libby, Bond. What you want to buy one for, John?' said the Cashier, just to make conversation. 'Why no buy?' said John."

"There is only one reason why every man in America should buy Liberty Bonds—should go in rags to do it—should starve himself, if necessary to do it. And that is because it is the right thing to do. What is the difference whether Liberty Bonds pay four and one-quarter per cent. interest or no interest at all? It is the duty of every American to buy them."

"Defeat would mean ruin to the farmer; it would mean taxation to a point which would mean slavery to German masters."

"The war is a Family Affair. The boys who are fighting for us have earned the affection and protection that is due to a son. They have earned the right to the title of 'Our Boys.'"

Something You Should Know

Resolutions of Teachers' at Association Meeting

The following resolutions adopted at the recent meeting of the Teacher's Association, was omitted last week for want of space. We publish them in full below.

We, the committee on resolutions, resolve:

First; To extend our congratulations to the program committee, T. W. Conway, J. E. Koonce, Mrs. M. L. Blaney, and Miss Nannie Ditty, for the excellent program which they planned and which has proven to be such a success in every way.

Second; That we extend Mrs. W. L. Gumm, president of the Teachers' Association, our thanks for so ably conducting the meetings, and for her untiring efforts in all phases of the work.

Third; That this body extend its thanks to State Supt. Wagner, Pres. David R. Boyd of the State University, Pres. Frank H. H. Roberts of the Normal University, Prof. Elnoe of Silver City Normal, Profs. Fox and Conway of the A. M. College, for their able patriotic and professional addresses.

Fourth; We wish to thank the people of Carrizozo who have so hospitably opened their doors to us at this time.

Fifth; We, the teachers of Lincoln County Association, wish to express our appreciation for the excellent music furnished by the Junior Orchestra, the High School Chorus and the excellent vocal and instrumental selections rendered by others.

Sixth; Resolved, that we extend our appreciation to the business men of Carrizozo for the dinner which they served to members of the Association.

Seventh; Resolved, that we extend our thanks to Supt. J. F. Koonce, T. W. Conway and J. A. Haley for the assistance they have rendered in making the meeting of this Association a success.

Eighth; Resolved, that we, the teachers of this Lincoln County Association, assembled, do hereby request our Senators and Representatives in Congress to use their efforts in the appeal of the law regarding postage by zones of second class mail matter. Also, the secretary of this Association is authorized to send a copy of these resolutions to each Senator and Representative.

Ninth; Resolved, that we, the teachers of his home county, express our deep sorrow on account of the death of Ex-Gov. W. C. McDonald, long a leading, progressive and honored citizen of Lincoln County. We express our sympathy for the family in their bereavement.

Respectfully submitted,

E. F. Funk, Chr.,
Miss Mahal Smith,
Miss Cook,

HIS BACK TO THE WALL; HELP HIM!

Today Uncle Sam's boys are on the fighting line—right in the midst of the blood and carnage. At this moment good American youths are facing the power-crazed German hordes. Perhaps today a score of our brave lads were killed or wounded. Hundreds we know are facing privations and suffering. Shall we at home limit our interest to pity for them? No—they do not ask or want it. The boys in khaki have gone to their task willingly, most of them enthusiastically. Many of them are volunteers; all of them awaited the call with a ready spirit. The American soldier realizes he is doing a stern duty, and he does it with a will, as he does everything else. When his sense of duty drives him to extra effort, and inspires him to supreme courage, he doesn't give his bit, HE GIVES ALL.

The American soldier, like all red-blooded Americans, hates a traitor, pities a coward, and despises a slacker. Of all our troops now in France, and the millions that are to follow, there will be no cowards or slackers. From the reports of Gen. Pershing we have yet to learn from "over there," of the first deliberate slacker. And now, with all these things in view, it is unthinkable that we, with every energy and every dollar at our command, shall even for a moment hesitate to back the brave boys, many of them personally known to us, to the extreme limit. Liberty and freedom gave us the opportunity to be prosperous and comfortable, and now with our boys at the front, giving their all to preserve to us these privileges, in the name of reason, shall we hesitate to back them, not with a few dollars, given grudgingly, but with our financial life-blood, if necessary? Don't stop to argue and debate about the cause of the war, and how we might have stayed out of it, and listen to pacifists, but look the grim truth in the face: THERE IS A MAD DOG RUNNING AMUCK, AND IT MUST BE KILLED. This rabid-infected animal is being kept in your neighbor and his children at present, but it can be kept in a week if we take it by the tail. TAKE THE GERMAN FLEET BUT ONE WEEK TO REACH THESE SHORES.

Mr. Adams Changes Business Policy
Carrizozo, N. M.,
April 22, 1918.

To my friends and customers:
Owing to the present conditions which has disturbed the markets, I have decided to place my grocery business on a cash basis after the first of May. By doing this, it is my aim to reduce my expenses so as to enable me to sell my goods cheaper and thereby give the benefit of this saving to my customers in the cash transaction. Thanking you for past favors and in advance for a liberal share of your patronage in the future.
I am, yours very truly,
A. W. Adams.

"Little Sunshine" Ill
Little Sarah Osborn is ill with scarlet fever, but with proper medical attention, coupled with careful nursing she is doing nicely, and will soon be out among her playmates again. Her many friends wish her speedy recovery.

Nye Family Will Have Pleasant Reunion
Mrs. O. T. Nye and children, Mary, Thomas and William who are now at Bryant, Ark., visiting relatives will soon leave for Knoxville, Ia., where their father, O. T. Nye will join them in a general reunion at the home of Mr. Jasper Nye, the father of our genial County Clerk.

Tom Johnson Critically Ill
Tom Johnson - son of P. M. Johnson, is critically ill at a local hospital in El Paso, suffering from an injury received from an unmanageable horse recently.

The Password for Tires:

CHALLENGE every tire before you buy. Make it give the watchword of tire quality, Tested. Make it show the countersign of tire supremacy, the Goodrich trademark. If a tire answers "Goodrich Tested," buy it. It is a friend.

It will give you full and lasting service because its service, put to the nation-wide road test of Goodrich Test Car Fleets, has measured up to the Goodrich standard of tires, the Tested of—

GOODRICH TESTED TIRES

There is no risk with the tire that can give the password "TESTED," for no weakness, no structural failing, could hide itself during the month-to-month, season to season, testing of the Test Car Fleets.

SILVERTOWN CORDS, and BLACK SAFETY TREADS, challenged America's roads, and under light and heavy cars fought sand, gravel, and rock, in rain, mud, snow, and slush, and defeated them. The spiral-wrapped, cable-cord tire body stood staunch against the hammering of mountain trails. The close-clutch, cross-barred, non-skid black safety tread, baffled the teeth of desert and prairie paths.

Demand this password of all tires before you buy, and you will get the durability, dependability, and economy of the tires which the roads of every region of our land proclaim, "America's Tested Tires."

YOUR FLAG AND MY FLAG

ARE YOU AN AMERICAN OR JUST LIVING HERE?

Of course you're an American. You always applauded when the flag is flashed on the screen at the movie theater. You stand up when the national airs are played. You have been known to contribute a dollar to the Red Cross, and right now you have the Taped Red Cross emblem hanging in the front window of your home, that all who pass that way might know how loyal you are. All this is very well, but what about winning the war? Right now in this country of which you claim to be so proud and to which you are so loyal, needs just two things—MEN and MONEY. Men are being selected by draft. The money is expected to be volunteered.

The United States—your country—the only nation on earth that stands for—and back of—every hope that you have for future. For the future of your children and your children's children wants to BORROW YOUR MONEY. The nation offers good security and good interest. Ultimate defeat of the Allies comes in the only thing that would reduce the par value of the bond. And if the Allies ever lose, your money will swell your pocket or nothing.

If you do not buy bonds of the Third Liberty Loan your business judgment is open to serious question. Are you an American or just living here?

Wagon of Sheep
Wagoner has just closed a deal with W. R. Loveless for ten carloads of sheep. Wagoner was busy all day Sunday and a portion of Monday loading the sheep, and they were started on the road to Cadillac, Mich., Monday evening. Mr. Wagoner will personally oversee the shipment to its destination.

Local Feed Choppers
"Local Feed Choppers." The greatest feed ever invented. It is safe and ready for use. Sold by F. O. B. Downing, N. M. Agent of Messrs. F. Grey, Ottawa, Ill.

You Food Producers

YOU MEN, AND WOMEN, AND CHILDREN—You Americans of the countryside—You, who love peace—You, on whom a self-sainted, self-styled agent of Heaven has laid an interdict against the use of the seas—You, for whom the war was first hard to understand because no armed forces pillaged the United States and made the night skies red with burning farmsteads—You, whom the "sabre rattlers of Potsdam" proposed to make their slaves to provide sustenance for the housings of their hellish hordes—Uncle Sam is appealing to you at a moment of opportunity when the fiendish assaults of our foes have been checked—and the striking point for victory has come.

He does not seek a donation or a gift from you. He wants to borrow your money, and in return he offers the very peak of security—Liberty Bonds—first mortgages on the resources of the most resourceful country of the world.

The moment is a critical one; never has the world been so sorely threatened with such a danger. Germany appears not yet defeated, and our duty is to remove every doubt, making her defeat decisive. We must defeat her, for unless we win this war the world is lost, and our history as a nation-in-servitude begins. We must withhold nothing from the support of the war; we must bring forth food in abundance, multiplying our own labor to that end. We must give into the Treasury of the United States every cent we can spare, and our limit of what we can spare must be based upon how much we value Liberty.

A just burden of this summer's campaign—a substantial portion of the Third Liberty Loan—is up to you. As you inscribe your name upon an application blank for Liberty Bonds, yours is the unseen hand that writes upon the wall before our enemies, "The United States has never been defeated—AND SHALL NOT BE DEFEATED NOW."

These Thoughts Patriotically Offered By

The Exchange Bank

LEMONS DO MAKE THE SKIN WHITE

HOW TO MAKE A CREAMY LEMON BEAUTY LOTION AT HOME FOR A FEW CENTS.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness and roughness disappear and how smooth, soft and white the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.—Adv.

Those Dear Girls. "Jack says there isn't another girl in town with a complexion like mine." "And you still speak to him?"

BOSCHEE'S GERMAN SYRUP

Why use ordinary cough remedies, when Boschee's German Syrup has been used so successfully for fifty-one years in all parts of the United States for coughs, bronchitis, colds settled in the throat, especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectoration in the morning, gives nature a chance to soothe the inflamed parts, throw off the disease, helping the patient to regain his health. Made in America and sold for more than half a century.—Adv.

The world moves, and if a man has the grit to hang on, he will be pulled out of many a bad hole.

\$100 Reward, \$100

Catarh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assisting nature in doing its work. \$100.00 for any case of Catarh that HALL'S CATARRH MEDICINE fails to cure. Druggists &c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

When a man begins to feel less of humanity, he's ready for deportation back to the jungle.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots

There's no longer the slightest need of feeling ashamed of your freckles as the prescription othino—double strength—is guaranteed to remove these homely spots. Simply get an ounce of othino—double strength—from your druggist, and apply a little of it night and morning, and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion. Be sure to ask for the double strength othino, as this is sold under guarantee of money back if it fails to remove freckles.—Adv.

Married Life. As a girl pictures it: A novel, a rocking chair and a box of candy. As it really is: A wash tub, a cook stove and a sewing machine.—Louisville Courier-Journal.

RELIABLE PRESCRIPTION FOR THE KIDNEYS

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Dependence. Knicker—"Have you anyone dependent on you?" Rastus—"Yassah, mah wife depends on supportin' me, sah."

Dr. Pierce's Pleasant Pellets are the original little liver pills put up 40 years ago. They regulate liver and bowels. Ad.

He Was Complimentary. "If I give you one kiss will you be satisfied?" "No. I expect the sample to assy better than that."

An Obstacle. "What's going to keep me from kissing you?" "My goodness!"—Harvard Lampoon.

Permanent Structure of Sunlit Type Found Profitable Investment.

LIGHTING THROUGH THE ROOF

Partitions Should Be on Hinges So That They May Be Swung Up, Permitting Pens to Be Turned Together.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose three-cent stamp for reply.

By WILLIAM A. RADFORD. Too much importance cannot be paid to the construction of your hoghouse, and observation has no doubt convinced you that "permanency pays" in this type of building perhaps more than in any other.

A hoghouse built like a daylight factory is as important to your bank account as to the ultimate consumer of your ham and lard.

By far the most effective means of lighting a hoghouse is shown in the accompanying illustration. It is through the roof, and by using the greenhouse type of sash laid flush with the roof. In this way the sun shines down more directly upon the glass and less of the germ-killing rays are deflected.

It is a well-known fact, that practically no germs can exist in direct sunlight, and therefore you should make use of this cheapest and best disinfectant on the market to do your share in reducing the enormous loss from disease in western hogs.

The 6 by 8 or 8 by 7 foot-pen with the 6-foot way along the passageway has proven to be the most economical size in the straight-side hoghouse and an

is partly on account of no forms required and partly because of the saving of wall above the footing. In laying the hollow tile below the ground level, it has been found that nothing in the way of strength or ability to serve its purpose is sacrificed by leaving out the joints between the ends of the tile, and a great deal of time, of course, is saved in laying.

Experiments and experience have proven that the only really satisfactory way of building a hoghouse floor is to use hollow tile or fake floor of boards or some other means of securing dead air spaces immediately under the hogs. This is well secured by using a second-class tile in 4 or 5-inch thickness with a 1-inch top coat of 1 to 4-cement and sand spread on top of this course of tile.

The proper changing of the air in a hoghouse is of the greatest importance, for in order to do it properly, it is necessary to have control at all times and yet have no drafts directly on the hogs.

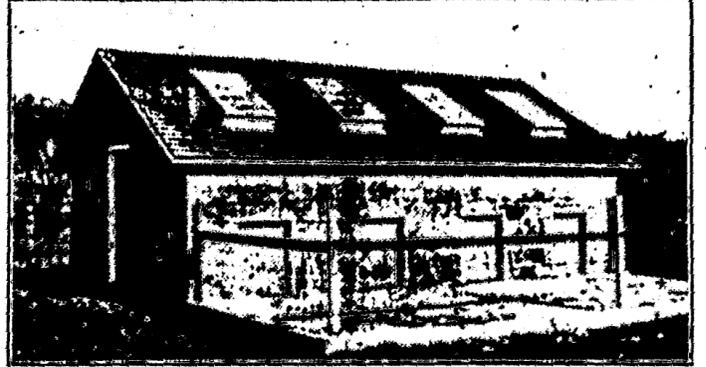

For letting the air in, openings should be left just under the eaves on each side of any type of hoghouse, and it is found that a 5 by 12 opening about every six feet is very close to being right. This is easily secured by leaving out a 5 by 8 by 12 tile if this size is used.

The exit of the air, the ridge-roll type of ventilator which we have developed, is by far the cheapest and fully as effective as any of the more fancy types. For a few cents, a ridge-roll ventilator will provide as much ventilation as an equivalent number of dollars invested in some of the more elaborate types. These ventilators should be placed from six to eight feet apart, depending upon the exposure of the building.

A very common mistake is made in providing means for the air getting out with no way for it to get in.

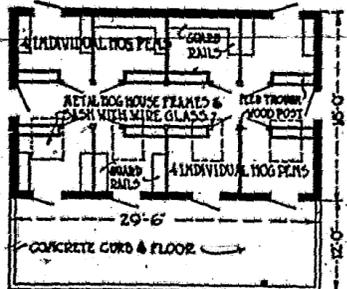

Of course, the openings under the eaves should be provided with small doors or other means for shutting off part of the air in extremely cold weather. Sliding doors all connected together by a light rod may be easily made so that the whole side of the building may be regulated at one time.

How Man Fights Nature's Forces. Life is a fight. From cradle to grave man is engaged in a struggle against nature's forces. With our first breath we begin to counter these forces, and continue from our first

equivalent number of square feet floor space should be used for each pen in the round hoghouse.

Experience and observation have convinced the writer that the partitions between the pens should be on hinges, so as to swing up. Thus all pens may be turned together. The partitions along the passageway should slide up and be so made that they can be fastened about nine inches above the floor. By having the partitions along the passageway so that they may be raised partly up in this way,

Floor Plan.

it is possible to feed young pigs stimulating and conditioning foods before they are weaned.

Some general details that apply to all types of permanent hoghouses will be interesting. Hollow tile foundations when laid on a hollow tile or concrete footing to get the proper amount of bearing on the ground, are as strong as the wall itself, which, of course, is all that is necessary. It is only a waste of material to put in a 12 to 16-inch concrete foundation to the floor line when the footing 30 to 36 inches below the ground line can be easily made the proper width, and the wall really started at this point.

It has been demonstrated that in building the foundation in this way to the floor line, fully 50 per cent is saved when a solid concrete foundation is taken into consideration. This

breath to our last, says Charles M. Horton, in Industrial Management. Individually we are compelled gradually to give way to these forces—to decay. It is the law. Nature dictates. And all life recognizes it. From earliest dawn of history mankind has instinctively resisted this law, actively and passively. Humanity's first thought—self-preservation—is the one big active agent, and as an agent it came to mankind as an outgrowth of primitive man's own endless fight against decay.

Only Plea He Could Put Up. Two young girls watched the "nutty young Cuthbert" pass along the street. "Did he appeal for exemption?" said May. "Yes," said Ray. "You might have known he would." "On what grounds?" "I don't know," replied Ray, "unless it was upon the grounds that if he went to war his wife's father would have no son-in-law to support."

Social Structure and Criminal. It is a herculean task to bring about reform in the administration of the criminal law. But the dawn of a better day is at hand. It is becoming more generally understood that the criminal is one of the by-products of an evil social system, and that in the improvement of our social structure will be found the solution of the problem of the criminal.—Alexander Karlin in the Humanitarian.

Salt as Royal Tribute. Among the many items of tribute furnished by different cities for the royal revenue, is mentioned "2,000 loaves of very white salt, refined in the shape of a mold, for the consumption of the lords of Mexico." Among some excerpts from the royal account book, of yearly expenditures, extracted by Torquemada, appear 1,800 baskets of salt.—Medicine and Surgery.

Barcelona has an American chamber of commerce for Spain.

WRIGLEYS

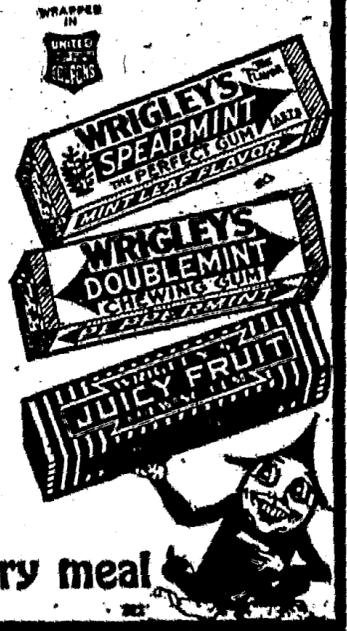

Helps teeth, breath, appetite, digestion.

"Give it to me, please. Granddaddy."

"Why Bobby, if you wait a bit for it you'll have it to enjoy longer!"

"Poo-poo! That's no argument with WRIGLEYS 'cause the flavor lasts, anyway!"

—After every meal

A golden mirror makes a homely girl's face a thing of beauty.

It is a good thing to ask ourselves once in a while whether or not we are useful citizens.

Smile on wash day. That's when you use Red Cross Bag Blue. Clothes whiter than snow. All grocers. Adv.

The people must school themselves to endure the horrors of war—even the lecturers.

Our home, our birthplace, our native land.—Southey.

W. N. U., DENVER, NO. 16-1918.

Win the War by Preparing the Land Sowing the Seed and Producing Bigger Crops

Work in Joint Effort the Soil of the United States and Canada CO-OPERATIVE FARMING IN MAN POWER NECESSARY TO WIN THE BATTLE FOR LIBERTY

The Food Controllers of the United States and Canada are asking for greater food production. Scarcely 100,000,000 bushels of wheat are available to be sent to the allies overseas before the crop harvest. Upon the efforts of the United States and Canada rests the burden of supply.

Every Available Tillable Acre Must Contribute; Every Available Farmer and Farm Hand Must Assist

Western Canada has an enormous acreage to be seeded, but man power is short, and an appeal to the United States allies is for more men for seeding operation.

Canada's Wheat Production Last Year was 225,000,000 Bushels; the Demand From Canada Alone for 1918 is 400,000,000 Bushels

To secure this she must have assistance. She has the land but needs the men. The Government of the United States wants every man who can effectively help, to do farm work this year. It wants the land in the United States developed first of course; but it also wants to help Canada. Whenever we find a man we can spare to Canada's fields after ours are supplied, we want to direct him there.

Apply to our Employment Service, and we will tell you where you can best serve the combined interests.

Western Canada's help will be required not later than May 5th. Wages to competent help, \$50.00 a month and up, board and lodging.

Those who respond to this appeal will get a warm welcome, good wages, good board and find comfortable homes. They will get a rate of one cent a mile from Canadian boundary points to destination and return.

For particulars as to routes and places where employment may be had apply, ap:

APRIL 15, 1918

Owing to the unusual and very unsettled conditions affecting the automo-
bile field, brought about by the war, we are compelled to put our business
on a cash basis, beginning April 15, 1918. Dealers and supply houses are
demanding their money upon the delivery of goods, forcing us in turn to
ask for cash from our customers.

This departure from the credit system is being introduced by garages
throughout the country and we feel that the public will heartily co-operate
with us.

Western Garage

Mentioned Date.

**WOMEN OF AMERICA
MUST HELP WIN WAR**

"Why should we American
women be shielded and kept
from doing the work that
French and English women
have done?" This is the ques-
tion being asked by Miss Grace
Parker, who was sent to Europe
to investigate woman's war
work on the other side of the
Atlantic. Miss Parker points
out that one million English
women are making ammunition,
that several hundreds of thou-
sands are working on the farms,
that they are performing every
kind of labor needed to build a
battle ship; that ten thousand
are working in France behind
the firing line; that twelve
thousand are acting as motor
drivers; that within ten days of
the declaration of war sixty
thousand nurses were enlisted.

At her meeting in Dallas re-
cently Miss Parker's question
was applauded vehemently.
This was to be expected of
Southern womanhood.

There is a work into which
the woman of the Southwest
can throw all those energies
which they would gladly ex-
pend in more arduous and dan-
gerous tasks. They can secure
for the Government a huge
over-subscription to the Liberty
Loan. This will send food and
ammunition to our soldiers and
to our Allies. Will build ships,
help to crush Germany and so
achieve the object of every true
American woman. Do the duty
that arises clearly defined be-
fore you, and the same credit
will be due as to the over-alled,
dirt-stained sister on the other
side. In the army of Democ-
racy some must go "over the
top"—some must engage in the
prosaic work of mule driving—
some making ammunition—oth-
ers again must provide the
money. All are necessary. Do
your part and you will share
equally in that glorious tri-
umph which must one day be
ours. Women of the South-
west, we look to our men to
subscribe the Liberty Loan ques-
ta. We look to you to double it.

"Mother, I believe Mamie is
a pro-German. She's got 25c
and won't buy a war stamp."
These are the actual words of
a five-year-old Hills county
child. The man who has not
subscribed to the Liberty Loan
er has not purchased his full
quota, should realize that his
action is subject to the criti-
cisms of even the children.

At a Liberty Loan meeting
held in a Louisiana parish the
speaker drew such a vivid pic-
ture of the duty we owe to our
boys in France and pleaded so
earnestly for economy and sac-
rifice that a prominent citizen
of the community drew
off his \$500 diamond ring,
handed it to the speaker, say-
ing, "It would burn my fingers
now. Sell it and invest the
money in Liberty Bonds."

Our Part in Feeding the Nation

(Special Information Service, United States Department of Agriculture.)

THE NATION NEEDS ANOTHER BIG CORN CROP

Two-Row Corn Planters Do More Work With Less Labor—This One Opens Two Furrows and Plants Them at One Operation.

GROW A BIG CROP WITH LESS LABOR

Federal Specialists Make Suggestions on Economizing With Man Power.

INCREASE CORN PRODUCTION

Tractors and Larger Implements Will Help Farmers—Machine Harvesters Rather Than Hand Cutters Are Advisable.

Another big corn crop is needed. Last year's planting of 120,000,000 acres yielded the largest crop ever harvested—3,150,494,000 bushels. There seems to be every reason to believe, in the opinion of officials of the United States department of agriculture, that our own welfare and that of the allies, as well as neutral nations, make desirable an even greater production of corn in 1918 on an acreage approximately equal to that planted in 1917.

Increased production may be accomplished in a number of ways, and in a recent publication of the United States department of agriculture, "The Agricultural Situation for 1918, Part VIII, Corn," specialists of the department make suggestions regarding better methods. The more extensive use of labor-saving implements will make it easier this year to approximate the record-breaking acreage of last year, especially when employed in sections where corn is now grown profitably but on a more limited scale, than is desirable, because present methods require a large amount of man labor. The more general use of recently developed and improved tractors that are adapted to the uses of the small farm as well as the large farm would tend to increase the acreage and to effect a saving in labor. The use of larger plows, harrows and other instruments used in fitting the land would make it possible to accomplish more work per man. Similarly the substitution of two-row planters and two-row double cultivators in place of smaller and less efficient implements would make it possible to do the same amount of work with less expenditure of labor.

Replant Missing Hills.

In some corn-growing sections it is the practice to replant missing hills as soon as the corn is up to a stand. Frequently this is done by dropping kernels by hand and covering with a hoe. A labor-saving and quicker method would be the use of small hand planters. These could be used to advantage for the first planting also in sections where comparatively small areas are planted and where it is at present the custom to drop the corn by hand and cover with the hoe.

It is the practice in some localities to plant a much larger number of kernels than the number of stalks desired and to thin to the desired stand when the corn plants are about six to eight inches tall. This method may be satisfactory where plenty of labor is available, but where it is desirable to economize labor it would be advisable to plant tested seed at about the same rate as the stand desired and do no thinning.

A more general use of efficient harvesting machinery would permit a more economical use of labor. A corn binder with an attachment for elevating the bundles of corn into a wagon should be used much more extensively than it is for harvesting ensilage corn. There is also on the market a machine that converts the corn into ensilage

in the field, elevating it into a wagon, from which it is sucked or lifted into the silo. The use of either of these machines, especially the latter, would do away with the necessity of much laborious work.

Work Done by Hand.

A large percentage of the cutting and shocking of corn is done by hand labor. In some sections, because of unfavorable topography or other reasons, it is not practicable to use machine cutters. However, the greater part of the corn that is now cut by hand labor could be harvested by machinery, economizing labor and doing the work in a less laborious manner.

Much of the corn that is now husked from the shocks could be handled more economically and with a saving in feed value of stover by substituting machine huskers and shredders for hand labor. The use of corn pickers would accomplish similar results in the case of corn husked from the standing stalks. Unloading and elevating machinery at the crib should be introduced and more generally used in many sections where it is now unknown or not commonly used. Where such facilities are not available cribs should be constructed in such a manner that they can be filled and emptied with the least possible labor. For level ground double cribs with an elevated driveway and approaches that will enable the loads to be driven through the cribs and dumped or scooped out of the wagons without any high pitching are very satisfactory.

CALL FOR MORE CORN

Wheat excepted, corn is the most valuable and indispensable of the world's grain crops. It holds a commanding position in the agriculture of the United States. Its vast acreage and heavy yields are responsible to no small extent for the success of agriculture. The department of agriculture, in its program issued early in February, which re-emphasized and amplified the food production program for 1918 published by the department in August, 1917, recommended that an acreage of corn approximately equal to that of 1917, which was the largest on record, should be planted in 1918, with possibly slight reductions in certain sections to free areas for spring wheat. In 1917 the acreage devoted to corn was approximately 119,755,000 acres, compared with 105,972,000 acres, the average for 1911-15, and with 107,083,000 acres for 1912 and 106,197,000 acres for 1915.

It is not too late in most sections to test seed corn. Five or six days are ample for the test. Never before has it been of such importance to determine the germination of seed corn before planting. Because of unusual conditions last season, much of the seed held over will not be fit to plant, at least at the regular rate of seeding. The germination test will show how much of the seed will grow. Let the rag doll tester make this determination for you. Your county agent or your agricultural college or, if you have time to write to Washington, the department of agriculture, will describe the use of this simple device. It will be well, specialists of the department of agriculture say, to retain all ears showing a germination of 80 per cent or more. The poorer germinating ears will have to be used if the supply of seed germinating 80 per cent or better is not sufficient. Keep the poorer seed separate and if it must be used plant it thicker than the rest.

WHERE FARMING IS PROFITABLE

The Future of Great Possibilities.

Some idea of the great wealth that the Western Canada farmer had in view a few years ago is now being realized. The amount received from the sale of wheat, oats, barley, flax and rye in 1917 was \$270,000,000, while the sales of live stock at Winnipeg alone netted \$40,000,000 additional. Of this sum hogs alone gave over eleven million dollars. The increases at Calgary and Edmonton were over 6 1/2 million dollars.

This money, so easily earned, is being spent in improvements in farm property, purchasing additional land, buying tractors, automobiles, and improving home conditions, providing electric light, steam heat, new furniture, pianos, buying Victory bonds, paying up old debts, etc.

Over five hundred tractors were sold in Southern Alberta in 1917. One implement agent reports that the increase in his business in 1917, over that of 1916, was equal to the total business in 1915. It is the same story all over the country. And it is not this evidence alone which proves the advancement and growth of the three prairie provinces, but the large increase in the number of settlers; the improvement in the extent of the cultivated areas and agricultural production; the increase in value of which over 1916 was \$77,000,000.

This wonderful progress that has been made in agriculture in Western Canada is but the beginning which marks the future of the greatest agricultural country on the continent, showing a future of great possibilities. There are millions of acres yet uncultivated, and of land as good as any of that which is now giving its owners a return of from twenty to thirty dollars an acre, figures that in many cases represent the cost of the land, with all cultivation costs included. It is true that the cost of production has increased during the past few years, but the price of the product has also increased to a figure which leaves a large balance to the credit of the producer.

The following table shows how this works out.

	1913	1917
	Price	Price
FARM NEEDS.	in bus.	in bus.
Machinery—	wheat	wheat
Self binder	100	100
Mower	70	38
C. H. P. gas engine.....	250	112
Seed drill	122	60
Cream separator	87	39
Building—		
Bathroom, sink and septic tank	300	127
Pressure tank system.....	156	118
Steel shingles, per 100 sq. ft.	7	4
Lumber, per 1,000 ft.		
Hemlock	28	17
Pine	47	32
Bricks, per M.....	16	8
Cement, per 350 lbs.....	2.5	1.2
Steel fence, 40 rods.....	15	10
Paint, per 10 gals.....	25	19
Pianos	440	215
Clothing and Food—		
Sugar, per cwt.....	6.2	4.9
Cottonseed, per ton.....	50	24
Linsed, per ton.....	50	25
Blue serge suit.....	31	17

Percentage increases are shown too in another way, leading to the same conclusion, from consultation of the Department of Labor's review of prices. Taking 100 as the index number of normal production in the decade from 1890 to 1900, the increases in prices of farm products have slightly outdistanced the increases in his needs.

	1913	1916	1917	Inc.
Grains and fodder.....	138	200	250	103
Animals and meats.....	176	213	293	66
Dairy produce	145	184	229	59
Bldg. materials	143	170	229	58
House' fur'sh'gs.....	126	163	205	64
Implements	105	139	199	90

WOMEN MUST HELP RAISE WAR FUNDS

Lovers of Home and Country Called to the Colors.

ALL CAN BUY LIBERTY BONDS

Wives, Sisters, Mothers, Sweethearts—Never Before Called Upon to Play Such a Vastly Important Part.—Lend Your Money.

(By DOROTHY DIX.)

Buy a Liberty bond, ladies. No matter how many you have bought before, stretch a point and buy another.

You can't shoulder a gun and go off and fight for your country, as the men are doing. You can't put on a nurse's uniform and go and nurse wounded soldiers or drive an ambulance or work in a munition factory, as many other women are doing, but you can do your bit by backing up these other men and women, who are risking their lives to defend you with your money.

Without guns and munitions, without food and clothes, without hospital supplies, the army in France is just so many sheep led to the slaughter; if we let them die for the lack of the things that money buys, their blood is on our heads, and our crime against them will be blacker than the Boches, because they trusted us.

It takes money, money, money and yet more money to carry on war, and this war is to be the war of the longest pocketbook. It is the last ton of bombs, the last load of shrapnel, and the last big gun that will thunder out victory. Therefore, if we want to win this war, we must find more money, and it is particularly up to us women, who can fight with our hands, to fight with our dollars, and pour them like water at Uncle Sam's feet.

Women's Greatest Sacrifices.

In no war in all history have women been called upon to play such a tremendous part as in this war. Never before have women had to give so many of their husbands and sons and brothers to be cannon fodder. Never have women before gone into the trenches and fought side by side with men. Never have they gone into factories to make munitions of war with their own hands. Never have they had to take upon their shoulders the heavy burdens of hard physical labor that men laid down when they went forth to battle. And never before did their country call on women to make such sacrifices as they are called on to make now.

It is because this war touches women more nearly in every way than any other war has ever done, because more women's hearts have been broken by it, more women impoverished and made homeless, more mothers have seen their babes slain before their eyes, more mothers have beheld their young daughters ravished, that women must use their utmost effort to put an end to war.

Women must see to it that there is never another war to lay waste to the world and drench it with women's tears, and this can only be accomplished by our winning this war.

And to do that we must have money. So, let every woman who has some loved one at the front buy a Liberty bond. Let every woman who has a hearthstone that she would keep safe buy a Liberty bond. Let every woman who has a babe that she loves, or a young daughter, whose purity she would guard, buy a Liberty bond.

Reasons Are Numerous.

Let every woman who has a particle of sympathy in her soul for the forlorn women and children of Belgium and France buy a Liberty bond. Let every woman who believes in justice, and freedom, and right buy a Liberty bond. Let every woman who hates war and craves for peace buy a Liberty bond.

The trip that you had planned, the new frock you were going to get, how pitifully small is the sacrifice of these for the sake of those who are sacrificing their lives to protect you and yours.

Buy all the Liberty bonds you can, and then go in debt for some more, so shall you prove yourself a worthy daughter of Uncle Sam.

This is a time when money talks and tells the kind of a patriot you are. The woman who hasn't a bunch of Liberty bonds if she's rich, or who isn't paying on a Liberty bond if she's poor, is a traitor to her country and should hang her head in shame every time she passes a man in khaki or feels the fold of the red, white, and blue floating over her unworthy head.

The Badge of Citizenship.

The Liberty Bond button is no longer a mark of liberality or even of patriotism; it is the badge of citizenship. Are you wearing one?

WOMAN WORKS 15 HOURS A DAY

Marvelous Story of Woman's Change from Weakness to Strength by Taking Druggist's Advice.

Peru, Ind.—"I suffered from a displacement with backache and dragging

down pains so badly that at times I could not be on my feet and it did not seem as though I could stand it. I tried different medicines without any benefit and several doctors told me nothing but an operation would do me any good. My druggist told me of Lydia E. Pinkham's Vegetable Compound. I took it with the result that I am now well and strong. I get up in the morning at four o'clock, do my housework, then go to a factory and work all day, come home and get supper and feel good. I don't know how many of my friends I have told what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. ANNA METERIANO, 86 West 10th St., Peru, Ind.

Women who suffer from any such ailments should not fail to try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

SCORE ONE FOR DIPLOMACY

Henry's Remarks Rather Stirred Things Up, but He Got Out of It Quite Neatly.

When the grocery man had taken his order and gone, Mrs. Umson said to her husband:

"Mr. Sindseller has a pleasant face, hasn't he?"
"It is always the case," Mr. Umson replied.

"What is always the case?"
"Whenever you see a man like that you can gamble that his wife is some diled up little weazel with a sour face."

"Oh, I don't know."
"It's a fact."
"Well, I can tell you another thing."
"What's that?"

"Whenever you see a pleasant little woman you can bet your last button she is tied up to some grouch of a man."

"Think so?"
"Yes, I do, so there!"
"Then I'm thankful for one thing."
"What's that?"

"That there are still left on the earth a few couples that are perfectly matched, like you and I."

"Henry, you are a wonder!"—Youngstown Telegram.

Never get the idea that the brave old eagle fights better with his wings clipped.

One of the poorest excuses we know of is "the woman tempted me."

APRIL 15, 1918

Owing to the unusual and very unsettled conditions affecting the automo-
bile field, brought about by the war, we are compelled to put our business
on a cash basis, beginning April 15, 1918. Dealers and supply houses are
demanding their money upon the delivery of goods, forcing us in turn to
ask for cash from our customers.

This departure from the credit system is being introduced by garages
throughout the country and we feel that the public will heartily co-operate
with us.

Western Garage

N. B.—Please Do Not Ask for Credit After the Above
Mentioned Date.

**WOMEN OF AMERICA
MUST HELP WIN WAR**

"Why should we American
women be shielded and kept
from doing the work that
French and English women
have done?" This is the ques-
tion being asked by Miss Grace
Parker, who was sent to Europe
to investigate woman's war
work on the other side of the
Atlantic. Miss Parker points
out that one million English
women are making ammunition,
that several hundreds of thou-
sands are working on the farm,
that they are performing every
kind of labor needed to build a
battle ship; that ten thousand
are working in France behind
the firing line; that twelve
thousand are acting as motor
drivers; that within ten days of
the declaration of war sixty
thousand nurses were enlisted.

At her meeting in Dallas re-
cently Miss Parker's question
was applauded vehemently.
This was to be expected of
Southern womanhood.

There is a work into which
the woman of the Southwest
can throw all those energies
which they would gladly ex-
pend in more arduous and dan-
gerous tasks. They can secure
for the Government a huge
over-subscription to the Liberty
Loan. This will send food and
ammunition to our soldiers and
to our Allies. Will build ships,
help to crush Germany and so
achieve the object of every true
American woman. Do the duty
that arises clearly defined be-
fore you, and the same credit
will be due as to the over-alled,
dirt-stained sister on the other
side. In the army of Democ-
racy some must go "over the
top"—some must engage in the
prosaic work of mule driving—
some making ammunition—oth-
ers again must provide the
money. All are necessary. Do
your part and you will share
equally in that glorious tri-
umph which must one day be-
ours. Women of the South-
west, we look to our men to
subscribe the Liberty Loan quo-
ta. We look to you to double it.

"Mother, I believe Mamie is
a pro-German. She's got 25c,
and won't buy a war stamp."
These are the actual words of
a five-year-old Miss county
child. The man who has not
subscribed to the Liberty Loan,
or has not purchased his full
quota, should realize that his
action is subject to the criti-
cism of even the children.

At a Liberty Loan meeting
held in a Louisiana parish the
speaker drew such a vivid pic-
ture of the duty we owe to our
boys in France and pleaded so
earnestly for economy and sac-
rifice that a prominent citizen
of the community drew
off his \$500 diamond ring,
handed it to the speaker, say-
ing, "It would burk my fingers
now. Sell it and invest the
money in Liberty Bonds."

Our Part in Feeding the Nation

(Special Information Service, United States Department of Agriculture.)

THE NATION NEEDS ANOTHER BIG CORN CROP

Two-Row Corn Planters Do More Work With Less Labor—This One Opens Two Furrows and Plants Them at One Operation.

GROW A BIG CROP WITH LESS LABOR

Federal Specialists Make Suggestions on Economizing With Man Power.

INCREASE CORN PRODUCTION

Tractors and Larger Implements Will Help Farmers—Machine Harvesters Rather Than Hand Cutters Are Advisable.

Another big corn crop is needed. Last year's planting of 120,000,000 acres yielded the largest crop ever harvested—3,150,494,000 bushels. There seems to be every reason to believe, in the opinion of officials of the United States department of agriculture, that our own welfare and that of the allies, as well as neutral nations, make desirable an even greater production of corn in 1918 on an acreage approximately equal to that planted in 1917.

Increased production may be accomplished in a number of ways, and in a recent publication of the United States department of agriculture, "The Agricultural Situation for 1918: Part VIII, Corn," specialists of the department make suggestions regarding better methods. The more extensive use of labor-saving implements will make it easier this year to approximate the record-breaking acreage of last year, especially when employed in sections where corn is now grown profitably but on a more limited scale, than is desirable, because present methods require a large amount of man labor. The more general use of recently developed and improved tractors that are adapted to the uses of the small farm as well as the large farm would tend to increase the acreage and to effect a saving in labor. The use of larger plows, harrows and other instruments used in fitting the land would make it possible to accomplish more work per man. Similarly the substitution of two-row planters and two-row double cultivators in place of smaller and less efficient implements would make it possible to do the same amount of work with less expenditure of labor.

Replant Missing Hills.
In some corn-growing sections it is the practice to replant missing hills as soon as the corn is up to a stand. Frequently this is done by dropping kernels by hand and covering with a hoe. A labor-saving and quicker method would be the use of small hand planters. These could be used to advantage for the first planting also in sections where comparatively small areas are planted and where it is at present the custom to drop the corn by hand and cover with the hoe.

It is the practice in some localities to plant a much larger number of kernels than the number of stalks desired and to thin to the desired stand when the corn plants are about six to eight inches tall. This method may be satisfactory where plenty of labor is available, but where it is desirable to economize labor it would be advisable to plant tested seed at about the same rate as the stand desired and do no thinning.

A more general use of efficient harvesting machinery would permit a more economical use of labor. A corn blower with an attachment for elevating the bundles of corn into a wagon should be used much more extensively than it is for harvesting ensilage corn. There is also on the market a machine that converts the corn into ensilage

in the field, elevating it into a wagon, from which it is sucked or lifted into the silo. The use of either of these machines, especially the latter, would do away with the necessity of much laborious work.

Work Done by Hand.

A large percentage of the cutting and shocking of corn is done by hand labor. In some sections, because of unfavorable topography or other reasons, it is not practicable to use machine cutters. However, the greater part of the corn that is now cut by hand labor could be harvested by machinery, economizing labor and doing the work in a less laborious manner.

Much of the corn that is now husked from the shocks could be handled more economically and with a saving in feed value of stover by substituting machine huskers and shredders for hand labor. The use of corn pickers would accomplish similar results in the case of corn husked from the standing stalks. Unloading and elevating machinery at the crib should be introduced and more generally used in many sections where it is now unknown or not commonly used. Where such facilities are not available cribs should be constructed in such a manner that they can be filled and emptied with the least possible labor. For level ground double cribs with an elevated driveway and approaches that will enable the loads to be driven through the cribs and dumped or scooped out of the wagons without any high pitching are very satisfactory.

CALL FOR MORE CORN

Wheat excepted, corn is the most valuable and indispensable of the world's grain crops. It holds a commanding position in the agriculture of the United States. Its vast acreage and heavy yields are responsible to no small extent for the success of agriculture. The department of agriculture, in its program issued early in February, which re-emphasized and amplified the food production program for 1918 published by the department in August, 1917, recommended that an acreage of corn approximately equal to that of 1917, which was the largest on record, should be planted in 1918, with possibly slight reductions in certain sections to free areas for spring wheat. In 1917 the acreage devoted to corn was approximately 119,755,000 acres, compared with 105,672,000 acres, the average for 1911-15; and with 107,083,000 acres for 1912 and 106,197,000 acres for 1915.

It is not too late in most sections to test seed corn. Five or six days are ample for the test. Never before has it been of such importance to determine the germination of seed corn before planting. Because of unusual conditions last season, much of the seed held over will not be fit to plant, at least at the regular rate of seeding. The germination test will show how much of the seed will grow. Let the rag doll tester make this determination for you. Your county agent, or your agricultural college or, if you have time to write to Washington, the department of agriculture, will describe the use of this simple device. It will be well, specialists of the department of agriculture say, to retain all ears showing a germination of 60 per cent or more. The poorer germinating ears will have to be used if the supply of seed germinating 60 per cent or better is not sufficient. Keep the poorer seed separate and if it must be used plant it thicker than the rest.

WHERE FARMING IS PROFITABLE

The Future of Great Possibilities.

Some idea of the great wealth that the Western Canada farmer had in view a few years ago is now being realized. The amount received from the sale of wheat, oats, barley, flax and rye in 1917 was \$270,000,000, while the sales of live stock at Winnipeg alone netted \$40,000,000 additional. Of this sum hogs alone gave over eleven million dollars. The increases at Calgary and Edmonton were over 6% million dollars.

This money, so easily earned, is being spent in improvements in farm property, purchasing additional land, buying tractors, automobiles, and improving home conditions, providing electric light, steam heat, new furniture, pianos, buying Victory bonds, paying up old debts, etc.

Over five hundred tractors were sold in Southern Alberta in 1917. One implement agent reports that the increase in his business in 1917, over that of 1916, was equal to the total business in 1915. It is the same story all over the country. And it is not this evidence alone which proves the advancement and growth of the three prairie provinces, but the large increase in the number of settlers; the improvement in the extent of the cultivated areas and agricultural production; the increase in value of which over 1916 was \$77,000,000.

This wonderful progress that has been made in agriculture in Western Canada is but the beginning which marks the future of the greatest agricultural country on the continent, showing a future of great possibilities. There are millions of acres yet unutilized, and of land as good as any of that which is now giving its owners a return of from twenty to thirty dollars an acre, figures that in many cases represent the cost of the land, with all cultivation costs included. It is true that the cost of production has increased during the past few years, but the price of the product has also increased to a figure which leaves a large balance to the credit of the producer.

The following table shows how this works out.

	1913	1917
	Price	Price
	In bus.	In bus.
FARM NEEDS.		
Machinery—	wheat	wheat
Self bluder	160	100
Mower	70	38
G. H. P. gas engine	250	112
Seed drill	122	60
Cream separator	37	38
Building—		
Bathroom, sink and septic tank	300	127
Pressure tank system	150	118
Steel shingles, per 100 sq. ft.	7	4
Lumber, per 1,000 ft.	23	17
Henlock	28	17
Pine	47	32
Bricks, per M.	16	8
Cement, per 350 lbs.	2.5	1.2
Steel fence, 40 rods.	15	10
Paint, per 10 gals.	25	19
Planos	440	215
Clothing and Food—		
Sugar, per cwt.	6.2	4.0
Cottonseed, per ton.	50	24
Unseed, per ton.	50	25
Blue serge suit.	31	17

Percentage increases are shown too in another way, leading to the same conclusion, from consultation of the Department of Labor's review of prices. Taking 100 as the index number of normal production in the decade from 1890 to 1900, the increases in prices of farm products have slightly outdistanced the increases in his needs.

	1913	1916	1917	Inc.
Grains and fodder.	138	200	250	103
Animals and meats.	176	213	293	68
Dairy produce	145	181	229	58
Bldg. materials	143	179	229	58
Household furn'gs.	126	163	205	64
Implements	105	139	199	90

WOMEN MUST HELP RAISE WAR FUNDS

Lovers of Home and Country Called to the Colors.

ALL CAN BUY LIBERTY BONDS

Wives, Sisters, Mothers, Sweethearts Never Before Called Upon to Play Such a Vastly Important Part. —Lend Your Money.

(By DOROTHY DIX.)

Buy a Liberty bond, ladies. No matter how many you have bought before, stretch a point and buy another.

You can't shoulder a gun and go off and fight for your country, as the men are doing. You can't put on a nurse's uniform and go and nurse wounded soldiers or drive an ambulance or work in a munition factory, as many other women are doing, but you can do your bit by backing up these other men and women, who are risking their lives to defend you with your money.

Without guns and munitions, without food and clothes, without hospital supplies, the army in France is just so many sheep led to the slaughter; if we let them die for the lack of the things that money buys, their blood is on our heads, and our crime against them will be blacker than the Boches, because they trusted us.

It takes money, money, money and yet more money to carry on war, and this war is to be the war of the longest pocketbook. It is the last ton of bombs, the last load of shrapnel, and the last big gun that will thunder out victory. Therefore, if we want to win this war, we must find more money, and it is particularly up to us women, who can fight with our hands, to fight with our dollars, and pour them like water at Uncle Sam's feet.

Women's Greatest Sacrifices.

In no war in all history have women been called upon to play such a tremendous part as in this war. Never before have women had to give so many of their husbands and sons and brothers to be cannon fodder. Never have women before gone into the trenches and fought side by side with men. Never have they gone into factories to make munitions of war with their own hands. Never have they had to take upon their shoulders the heavy burdens of hard physical labor that men laid down when they went forth to battle. And never before did their country call on women to make such sacrifices as they are called on to make now.

It is because this war touches women more nearly in every way than any other war has ever done, because more women's hearts have been broken by it, more women impoverished and made homeless, more mothers have seen their babes slain before their eyes, more mothers have beheld their young daughters ravished, that women must use their utmost effort to put an end to war.

Women must see to it that there is never another war to lay waste to the world and drench it with women's tears, and this can only be accomplished by our winning this war.

And to do that we must have money. So, let every woman who has some loved one at the front buy a Liberty bond. Let every woman who has a hearthstone that she would keep safe buy a Liberty bond. Let every woman who has a babe that she loves, or a young daughter, whose purity she would guard, buy a Liberty bond.

Reasons Are Numerous.

Let every woman who has a particle of sympathy in her soul for the forlorn women and children of Belgium and France buy a Liberty bond. Let every woman who believes in justice, and freedom, and right buy a Liberty bond. Let every woman who hates war and craves for peace buy a Liberty bond.

The trip that you had planned, the new frock you were going to get, how pitifully small is the sacrifice of these for the sake of those who are sacrificing their lives to protect you and yours.

Buy all the Liberty bonds you can, and then go in debt for some more, so shall you prove yourself a worthy daughter of Uncle Sam.

This is a time when money talks and tells the kind of a patriot you are. The woman who hasn't a bunch of Liberty bonds if she's rich, or who isn't paying on a Liberty bond if she's poor, is a traitor to her country and should hang her head in shame every time she passes a man in khaki or feels the fold of the red, white, and blue floating over her unworthy head.

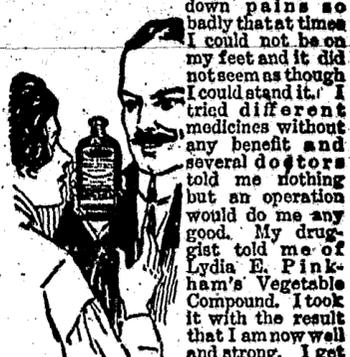

The Badge of Citizenship.

The Liberty Bond button is no longer a mark of liberality or even of patriotism; it is the badge of citizenship. Are you wearing one?

WOMAN WORKS 15 HOURS A DAY

Marvelous Story of Woman's Change from Weakness to Strength by Taking Druggist's Advice.

Peru, Ind.—"I suffered from a displacement with backache and dragging

down pains so badly that at times I could not be on my feet and it did not seem as though I could stand it. I tried different medicines without any benefit and several doctors told me nothing but an operation would do me any good. My druggist told me of Lydia E. Pinkham's Vegetable Compound. I took it with the result that I am now well and strong. I get up in the morning at four o'clock, do my housework, then go to a factory and work all day, come home and get supper and feel good. I don't know how many of my friends I have told what Lydia E. Pinkham's Vegetable Compound has done for me."—Mrs. ANNA METERIANO, 86 West 10th St., Peru, Ind.

Women who suffer from any such ailments should not fail to try this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

SCORE ONE FOR DIPLOMACY

Henry's Remarks Rather Stirred Things Up, but He Got Out of It Quite Neatly.

When the grocery man had taken his order and gone, Mrs. Umson said to her husband:

"Mr. Sandseller has a pleasant face, hasn't he?"

"It is always the case," Mr. Umson replied.

"What is always the case?"

"Whenever you see a man like that you can gamble that his wife is some diled up little weazel with a sour face."

"Oh, I don't know."

"It's a fact."

"Well, I can tell you another thing."

"What's that?"

"Whenever you see a pleasant little woman you can bet your last button she is tied up to some grouch of a man."

"Think so?"

"Yes, I do, so there!"

"Then I'm thankful for one thing."

"What's that?"

"That there are still left on the earth a few couples that are perfectly matched, like you and I."

"Henry, you are a wonder."—Youngstown Telegram.

Never get the idea that the brave old eagle fights better with his wings clipped.

One of the poorest excuses we know of is "the woman tempted me."

When Coffee Disagrees

There's always a safe and pleasant cup to take its place

INSTANT POSTUM

is now used regularly by thousands of former coffee drinkers who live better and feel better because of the change.

Men Ordered for

Military Duty

The following list of men are ordered to report at Carrizozo May 10th for military duty at Fort McDowell, San Francisco: James A. Harleson, McCurtain, Okla.; Juan E. Chaves, Tinnie; Santiago C. Torres, Corona; Towns Taylor, Corona; Jack Cassibone, Roswell; Manuel Trujillo, Capitan; Henry B. Deveton, Carrizozo; Elbert J. Strawbridge, Jicarilla; Antonio Gonzales, Arabela; William H. Kimbell, Floydada; Jose Portio, Raidoso; Charles S. Straley, Ancho; Juan Macz, Pichaco; Robert M. Hicks, Corona; Lewin D. Perry, Glenco; Gabriel Najar, Picacho; Ramon Ortaga, Capitan; Lloyd S. Gipson, Glenco; Jose Baca, Lincoln; Sabina Montoyo, Carrizozo.

PUNISHMENTS IN ENGLAND.

Although the stocks, like the pillory and the ducking-stool, have been done away with, many punishments, notes a writer, survive in England which are every bit as medieval. The most ludicrous of these exist in the army and navy, which were renowned in the past for the cruelties practiced in the name of justice: "Keel-hauling," as carried out in the navy, used, of course, to amount to execution by drowning, while in the army "running the gantlet" was a popular way of punishing troublesome soldiers.

BRINE BATHS TO CURE SHOCK

British Soldiers Suffering From Ailments Contracted in Trenches Yield to New Treatment.

Many officers and men are returning to England suffering severely from shell shock and other ailments contracted in the trenches. The peculiar nervous condition in which these men find themselves is difficult to treat. At Droitwich, England, are some remarkable natural brine baths, which have done much to restore these unfortunate victims of the war to their normal state, says the Popular Science Monthly.

The treatment consists of a number of baths such as douche, needle and spray. Men who are able to swim are encouraged to use the swimming baths. In cases of rheumatism and frost-bite much relief has been obtained through the use of a brine spray and massage. The attendant has a hose attached to his arm so that he can massage and spray the patients at the same time. This hose is used to spray the more delicate portions of the body. At the same time a stronger spray from a wall-shower keeps the entire body well doused. At first the brine spray is applied warm. The invigorating effect is soon felt, however, and after a few treatments the patient is able to stand a cooler temperature.

Win Victoria Crosses.

Since the Victoria Cross was first instituted, sixty-odd years ago, as a reward for conspicuous valor in the Crimea, the bestowals have not amounted to a thousand. Five hundred and twenty-two was the number of the recipients before the beginning of the present war, and during the last three years 317 men have won the most coveted of all decorations.

REMEMBER

That we have every facility for turning out neat printing of all kinds. Letter heads, bill heads, office stationery, etc., furnished at the lowest prices first class work will permit.
