

Baseball Notes of Interest to Our Local Fans

Carrizozo 4 - Willard 2

Last Sunday's ball game at Willard resulted in a score of 4 to 2 in favor of Carrizozo. Up to the 5th inning neither team had scored, but in that inning Willard made the only two runs she had when the curtain was rung down. The battery work of Dolan and Billy Norman was the principal feature of the game.

In the 7th inning Carrizozo, made two runs, and two more in the 9th made it 4 to 2. Gallacher made a three-base hit that would have been a home run on any grounds in this country except those of our neighbors. Harry Norman made a spectacular unassisted double play at second, nailing a fly and getting a runner coming from first. It was one of the most interesting games of the season.

East Carrizozo 0 Fort Stanton 19

The game on the local grounds last Sunday afternoon resulted disastrously for the East Carrizozo team. It happened in this manner:

Fort Stanton made one run in the first, and from that on to the fifth none were made by either side. At this point East Carrizozo's pitcher, who had suffered a sprained ankle a few days before, was compelled to call for help, and a substitute was put in.

Fort Stanton then began a marathon stunt, and the way the game ended would lead one to think they may be still running!

A return game (or race) was agreed on to take place at the Fort on Sunday, July 29th.

Salve For East Carrizozo

Carrizozo was not the only place where the white-washing process was applied last Sunday. At Albuquerque, the Grays defeated Vaughn by 20 to a goose egg, making it just one more in the winners' favor above what Fort Stanton had. Harold Wilcox, a former Carrizozo player, was the only member of the Vaughn team who made a showing and Harold always does that. If Vaughn had even a few men like Wilcox, they need have no fear of any team in the state.

The "Gold Ball" Dance a Big Hit.

The "Gold Ball" dance given by the railroad and business men last Saturday night at Lutz Hall was a social success. From the hour of beginning to the closing number, the promoters gave the dancers one of the most pleasing entertainments in this line they had experienced for some time. The orchestra, whose names have been mentioned repeatedly in these columns, and who compose what is called the "Fidgety Four" rendered splendid music, and the affair, on the whole, was in every way one which more than lived up to the expectations of the patrons.

Mr. and Mrs. R. W. Dozier, daughters, Gladys and Dorothy, returned last night from a ten day's fishing trip on the Upper-Bonito.

W. T. Peck Passes Away At Kingman, Arizona

Last Saturday night at Kingman, Arizona, W. T. Peck, aged 76, father of Mrs. George Rustin, passed away from an acute attack of stomach trouble. Mrs. Rustin prepared to start on No. 2 for Kingman Sunday morning, but missed the train. With a knowledge of this, Sheriff Harris took her to Willard by motor, where she arrived in time to catch a Santa Fe train and by that means, she arrived at her destination as soon as if she had caught No. 2.

Mr. Peck had been in apparent good health of late, but the attack was so violent and his age so advanced, that medical aid was of no avail. The remains were interred at Kingman. The surviving relatives have the sympathy of our community.

Leaving For Old Mexico

Mrs. I. D. Baker and children are leaving today for their home in Nacazorri, Mexico, after a six-week's stay with Mrs. Baker's parents, Mr. and Mrs. J. E. Farley.

At Cedar Falls, Iowa

Mrs. C. P. Huppertz and daughter, Helen Frances, left last Saturday for Cedar Falls, Iowa, where they are visiting at the home of Mrs. Huppertz's parents, Mr. and Mrs. J. P. Pollock. They will remain until the latter part of next month, and will return in time for the opening of school.

Masonic Lodge to Organize In Jerusalem

A Masonic lodge under the supervision of England will shortly be organized in Jerusalem, of which it is hoped Sir Gilbert Clayton, Chief Secretary of Palestine, and District Grand Warden of Egypt and the Sudan, will be the first Worshipful Master.—Scottish Rite Service.

Club House Manager

B. L. Stimmel is the present manager of the E. P. & S. W. Club House during the vacation of F. F. Mudge, who is now in California. Mr. Stimmel assumed charge on July 4, and has given the best of satisfaction to all concerned. He is courteous, obliging, always on the alert for the interest of the company and comfort of the employees. Mr. Mudge, it is said, will return about August 1.

Angora Goat Shipment

Oscar Pramberg shipped two car loads of fine Angora goats to Kansas City last week. The goats were in a splendid condition for the market, sold at sight and brought a good price. Mr. Pramberg returned home on Tuesday of this week.

Here From Farmington

David Wightman Stewart, son of D. R. Stewart, of the Western Lumber Co., is here for a week's visit with his parents and sister, Miss Lucille. Mr. Stewart is an oil well driller, and has lately been working on the "Four Corners" well, in the Farmington district, where the states of Utah, Arizona and Colorado form with New Mexico in a four corner intersection.

Fort Stanton News

On July 10th Mrs. H. J. Warner entertained the Fort Stanton Musical Club. The following guests were present: Mrs. Sarah Mann, Mrs. S. L. Anderson, Mrs. J. W. Lane, Mrs. Coover, Dr. and Mrs. T. B. H. Anderson, Mrs. Taulbe, Mrs. Gensler, Miss Kendrick, Miss Kinkannan, Mr. and Mrs. Wunsch; Mr. Coolidge, Miss Schutze, Miss Louise Kirtz, Mr. McNeff, Mr. Hendrin and Dr. Lamb.

Mrs. Robert Stewart entertained the Fort Stanton Afternoon Bridge Club Wednesday afternoon. Covers were laid for twelve. After refreshments, a pleasant hour was spent at bridge. Those present were: Mesdames Warner, Mann, Besse, Anderson, Wunsch, Titaworth, Kersey, Fagan, Sears, Mahaney; Misses Dorothy Bowditch and May Murray.

Mrs. Fagan held high score for the afternoon.

Mrs. S. J. Mann was hostess at a six o'clock dinner on Thursday, in honor of her guest, Mrs. J. D. Mann, mother of Dr. Mann, who is spending the summer months with her son's family. Covers were laid for seven, and after delicious refreshments, a social hour was spent, interspersed with musical selections from the different guests.

Messrs Henry Lutz and A. L. Burke, of Carrizozo, were Fort visitors on Tuesday.

On the afternoon of July 11th Miss Dorothy Bowditch entertained the Fort Stanton Bridge Club. The following members were present: Mesdames H. J. Warner, T. B. H. Anderson, S. J. Mann, R. J. Stewart, J. R. Besse, Richard Fagan, Wunsch, Kersey, George Titaworth, Burl Sears, and Miss May Murray.

An enjoyable afternoon was spent, and Mrs. Anderson carried off the honors.

Mrs. S. L. Anderson, Mrs. J. W. Lane and Master Jack Lane, of Charlottesville, Va., are visiting at the home of Dr. T. B. H. Anderson.

Miss Epstein is making an extended trip through the Canadian northwest, and the Rocky Mountain and Coast states. She will return to the Fort about July 30th.

Miss Fuller, with her sister, Mrs. Scott, of Little Rock, Ark., is spending a month in California.

Everyone was most happy to welcome Father Souby to Fort Stanton once again.

Miss Helen Rice, of Lincoln, was visiting friends at the post on Wednesday.

Dr. R. J. Stewart and his small son Sam are visiting relatives in Topeka, Kansas.

The many friends of Mr. F. C. Berry are delighted at the marked recovery he has made in the past few weeks.

Mrs. Warner and Mrs. Anderson entertained at dinner on Friday, the twentieth, in honor of their husbands' birthdays.

On Thursday afternoon Mrs. F. C. Berry entertained at bridge in honor of her house guest, Mrs. H. D. Leach, of Cleveland, Ohio. The players were: Mesdames Warner, Anderson, Mann, Stewart, Wunsch, Fagan, Leach

Industrial Activity Means Prosperity

Speaking in New York recently, Frederick J. H. Kracke, U. S. Appraiser, said that the U. S. Treasury will collect this fiscal year over a half billion dollars in customs duties, which is the largest sum ever collected by the Federal Government.

We will import close to three billion dollars worth of raw materials in twelve months, which means that we will have spent three billions in foreign countries, which, Mr. Kracke says, is the greatest act of economic reconstruction performed by any one country since the armistice.

Our nation wide demand for raw materials and finished goods has been so great that foreign manufacturers and producers have been able to share with the people of this country the period of industrial and commercial prosperity.

This shows that our prosperity is laying the foundation for an era of international prosperity which only international political uncertainties can disturb.

Also it shows that a reasonable tariff does not kill trade with foreign countries. If tax-free foreign goods could be dumped on the American market, to the ruin of our own industries, the American workman and the American people would not have the money to buy foreign products, to the great benefit of foreign nations, in any such quantities as they are now purchasing. By maintaining American industries on a prosperous basis, we not only help ourselves but foreign countries.

Gallachers and Gleghorns Were Here on Monday

Mr. and Mrs. Harry Gallacher and Mr. and Mrs. Jack Gleghorn were in from their ranches near White Oaks on Monday. They said their stock was in good condition and young grass springing up nicely as a result of the late rains.

Prof. Koonce Here For His Vacation

Professor E. C. Koonce, who has been teaching at the Spanish-American Normal in El Rito for the past three years, is now at Captain for his vacation, during which time he will supervise the finishing touches on his new residence which was started last fall. The Professor, who was once County School Superintendent of Schools of Lincoln County, has a warm spot in his heart for this section and pays us a visit every summer, much to the pleasure of his many friends.

Home From the Coast

The Misses Margie and Allie Branum returned Sunday morning from a six week's trip through California, spending the major portion of the time with Mr. and Mrs. Rufus Branum at Los Angeles.

and Kersey. At four o'clock, Mesdames S. L. Anderson, J. W. Lane, Sarah Mann, Coover and Miss Schutze joined the party and delightful refreshments were served.

Dr. Warner and family and Dr. Anderson and family are leaving Sunday for a motor trip through New Mexico, to Albuquerque, Santa Fe and other points of interest.

Educational News

(Louise H. Coe)

The Budgets for the Lincoln County schools have been passed upon by the State Tax Commissioners, and with a few exceptions were approved as recommended by the County Budget Commissioners. I was in Santa Fe when these budgets were approved. I think the citizens of Lincoln County should be very grateful to the State Tax Commission for the consideration given the schools of this county.

The requests granted were: one teacher for each of the following schools: Mountain View, Jack's Peak, Brown, Spindle, Lincoln, and an emergency teacher for Picacho, to be employed in case Picacho has an attendance of 63 or more when school begins.

The requests that were not granted were: one teacher for Corona (District No. 13); Hondo High School and one teacher for district No. 44. We are asking the State Tax Commission to allow a transfer of funds in order that district No. 44 may regain its teacher.

The Lincoln County High School was budgeted for the same number of teachers as were employed in this school last year. An unusually capable faculty has been secured for the year 1923-24. The five high school teachers, including the superintendent, have degrees from some of the best Universities of the country. This High School is accredited by the New Mexico State Board of Education and the North Central Association.

I attended the National Educational Association held in Oakland - San Francisco, July 1-6. It is estimated that twenty thousand educators from the United States and Territories attended this meeting. It was my pleasure to be present at some of the meetings of the First World Conference on Education, held in San Francisco June 28 July 6. Thirty-two National Groups and sixty-two governmental countries were represented at this conference.

There will be a meeting of the County Board of Education in the office of the County School Superintendent July 23. Clerks of school districts who have not yet recommended teachers for their schools, are requested to send in recommended applications at once, that the County Board may approve them at this meeting.

Teachers' examinations will be given in this office on July 23rd, 24th and 25th.

Visiting Home Folks

Mrs. J. R. Green and children left on Tuesday for Joplin, Mo., where they will visit for the balance of the vacation period with Mrs. Green's mother and other relatives.

Left For Jonestown

Mrs. J. C. Bender left Wednesday for Jonestown, Pa., where she will, in all probability, make her future home. Jonestown was the home of Colonel Bender in former years, and is where his remains were interred. There, Mrs. Bender will be among old friends and familiar faces.

Here From Roswell

Mr. and Mrs. George Clements, Jr. arrived here on Wednesday from the Penasco Ranch, near Roswell, where they had been for the past three weeks. They left the same night for their home in Corona.

Ancient City Under Gran Quivera Ruins

Incoming ranchmen from the Gran Quivera country are telling about a force of workmen, mainly Indians who are clearing the grounds on which the ruins are visible of what most people think is all that remains of a once prosperous and happy place of human habitation. But is this all? Let us review some of the things that have been said here this week by reliable people who came direct from the scene of activity.

Jefferson Claunch, who has extensive ranch holdings near these ancient ruins says, that a certain eminent Government Geologist with an able corps of assistants is on the ground and after sounding and locating the ruins and vicinity, found that another city lies directly under the visible ruins which is ancient by innumerable centuries to what we call "Gran Quivera" which the Professor says, is not more than 400 years old. The buried city, according to the Professor, existed thousands of years ago and was destroyed by the volcano, the crater and charred lava beds, being the only remaining evidences of that horrible event. As a partial proof of this, he has already located its graveyard and exhumed mummies that were embalmed and buried by primitive Egyptian methods. These mummies are not small, as some would think; they would measure as much as six feet in height and were found in sitting positions with knees under their chins, which is characteristic of the Egyptian manner in burial of the dead. The Professor, who is conducting the work of excavation, has had some twenty-five years of experience in this line, fifteen of which he put in at the head of excavating parties in Egypt says, that discoveries in this work will prove the ruins of the buried city to be more ancient than those he unearthed across the seas.

Workers have already uncovered a portion of the wall which surrounded the city and will shortly begin to descend to where they expect to find entrances to the city which for centuries has slept undiscovered and wrapped in undisturbed silence. The Gran Quivera ruins will not be destroyed, but preserved. The old cathedral will be remodeled to as near to what the Professor thinks it was when worshippers gathered there. There will be four roads constructed as entrances to the place. These roads, said Mr. Claunch, will be graded, graveled and rolled to make it strong and durable. The work in general will continue until cold weather sets in and will be resumed as soon as possible next spring. In the meantime, we may expect some remarkable developments as the work proceeds.

In From Jicarilla

Mr. and Mrs. V. K. Fair and Miss Mildred Shrader were in from Jicarilla last Saturday and met Mr. and Mrs. R. C. Pitts who were here on account of the "Gold Ball" Dance. Mr. Pitts being a member of the "Fidgety Four" orchestra which played for the dance.

PACIFIC ACCORD IS ACCEPTED

FRENCH SENATE APPROVES THE TREATY FOR NAVY SCRAPPING

FRANCE RATIFIES PACT

DEPOSIT OF SIGNATURES WITH AMERICA IS ONE REMAINING STEP

Paris.—The French parliament completed ratification of the Washington naval limitation treaty and the four-power Pacific accord by overwhelming votes in the Senate.

The vote was passed largely by proxy as the stifling heat kept most of the senators away. The French objections to any restriction were voiced but the trend of the discussion was that France was financially unable to build even up to the limit of the capital ship program during the life of the Washington agreement...

The report of the Senate naval commission was the strongest feature of the opposition. Reporter Lemery objecting to what he termed the capitalization of France's after-war naval weakness, with the control of the seas given to Great Britain, America and Japan.

The Senate's approval has been accepted as little more than a formality, particularly as the government was able to hurry these principal treaties through the Chamber of Deputies with little pronounced opposition.

Washington.—The French Senate's ratification of the Washington naval treaty and the four-power pacts completes the steps necessary to put the agreements into force except for the deposits of ratifications by all the signatories in Washington.

Various provisions of the treaty take effect at prescribed periods of time calculated from the date of the deposit of ratifications. Vessels of war to be scrapped must be rendered incapable of further warlike service within six months...

Mixed Jury Falls to Agree - Bakersfield, Calif.—The jury of four women and eight men in the trial of Jesus Medina, charged with murder in connection with the death of four men in an Atchison, Topeka & Santa Fe passenger train wreck here last December, were discharged without having reached a verdict.

Lightning Kills Three Guardsmen - Baltimore, Md.—Three members of the fifth regiment, Maryland National Guard, in camp at Saunders range in Anne Arundel county, were killed when a bolt of lightning struck in a group of men. Ten soldiers were reported injured.

New Mexico State Items

A big deposit of manganese ore is reported to have been discovered on the Gila river near Red Rock and some of the samples which have been assayed will run over 62 per cent manganese.

The Dona Ana County Fair Association is making plans to stage a big fair during the latter part of 1924. If the present plans of the executives of the organization are carried out the fair will be one of the best ever held in the state.

At a meeting of the school board of Batoon contracts were let for big additions to both the North and East Side schools. The work will be started at once and it is estimated that the job will cost over \$50,000 by the time it is completed.

Some of the streets of Albuquerque were turned into rivers when Miss Ruby Lovitzki driving a new automobile uprooted a city fire hydrant, when she ran into the plug. The young woman was taken to the Police Court, but was released when she offered to buy a new hydrant.

Twenty-two hundred candidates for the citizens military training camps for Texas, Oklahoma, Colorado, New Mexico and Arkansas, comprising the Eighth Corps Area of the army, have been accepted by examining boards and are now preparing to attend the camps that will open on July 28.

Fuel shortage in Colorado and New Mexico is threatened during the coming winter, according to F. W. Wadleigh, National Fuel Distributor at Washington, D. C. The statement is to the effect that most of the mines are only working one or two days a week, and that the supply on hand will not be sufficient to supplement the supply mined next fall when the rush orders start.

Ethel Clark, 4, daughter of Mr. and Mrs. George Clark, died in a Vaughn hospital as the result of burns received at her father's farm, four miles east of Vaughn. She was playing with matches in the chicken house when her dress caught fire.

The famous railroad paintings of the Navajos have been preserved for posterity, and the old Indian prophecy of "The Holy Ones," that when all the sand paintings are forgotten and all religious chants die out, the end of the world will come, can be laid aside in the minds of those who believe in it, for the time being at least.

A party of forty teachers and students of the State College made the saddle trip to Hurley to view the pueblo excavations being made under the direction of Wesley Bradford, of Santa Fe. The big pueblo consists of over 150 rooms only a few having been unearthed so far.

The water in the streams in the vicinity of Carrizozo is nearly gone and the mountains are reported to be as dry as tinder. The drought is said to be the worst in this section of the state in many years.

Extensive experiments, to ascertain the best conditions for the growth and reproduction of Douglas fir, are being conducted in the Lincoln forest. A number of sample plots have been arranged and forest officials are watching the experiments closely.

A 3,000-barrel flow of water per day is reported by the drillers in the oil well of the Midwest Refining Company on the Hogback structure near Farmington. The flow is said to have a pressure of 780 pounds at the rock and would flow 250 feet above the surface.

If the present plans of the Roswell Merchants' Association are carried out all the meetings of the months of July and August will be held in the country. The Florida oil well, near Deming, is now down to the depth of 1,295 feet. The oil is still showing good and the balance of the hole is to be sunk with an eight-inch casing.

MRS. LINDQUIST TELLS WOMEN OF MIDDLE AGE

What Lydia E. Pinkham's Vegetable Compound Did for Her

Kansas City, Mo.—"I was left in a very serious condition after childbirth and no one thought I could ever be any better. Then came the 'Change of Life' and I was not prepared for what I had to suffer. I had to go to bed at times to be perfectly quiet as I could not even stoop down to pick anything from the floor. I did not suffer any pain, but I was decidedly nervous and could not sleep. For nearly two years I was this way, and the doctor was frank enough to tell me that he could do no more for me. Shortly after this I happened to see in a newspaper an advertisement of Lydia E. Pinkham's Vegetable Compound. In a few days the medicine was in the house and I had begun its use and I took it regularly until I was well. I recommend the Vegetable Compound to others when I have the opportunity."—Mrs. MAY LINDQUIST, 2314 Independence Ave., Kansas City, Mo.

Safety First for Raymond. When Raymond took his school report home to his father he was very angry, and scolded his small son for being at the bottom of the class. "But there's no need to worry, daddy," Raymond said calmly. "I think it's the best place, because you're safe there. You can't get any lower."

WHY TAKE LAXATIVES?

Discovery by Science Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent medical authority. Science has found a newer, better way—a means as simple as Nature itself.

In perfect health a natural lubricant keeps the food waste soft and moving. But when constipation exists this natural lubricant is not sufficient. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication. As Nujol is not a medicine or laxative, it cannot gripe and, like pure water, it is harmless and pleasant.

Nujol is used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

Map Sea Floor in Contour. The first successful contour map of a deep sea zone has just been completed by hydrographers of the United States government. It shows the submerged hills, valleys and cliffs over 84,000 square miles of the bed of the Pacific ocean.

Too Expensive. "Does your wife object to your smoking?" "Yes; she says we can't both afford to do it."

Sure Relief FOR INDIGESTION - BELLANS - 6 BELLANS Hot water Sure Relief - 25¢ AND 75¢ PACKAGES EVERYWHERE

FRECKLES

Don't Hide Them With a Veil; Remove Them With Othine—Double Strength. This preparation for the treatment of freckles is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold under guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of Othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely.

Be sure to ask the druggist for the double-strength Othine; it is this that is sold on the money-back guarantee.

16799 DIED

In New York City alone from kidney trouble last year. Don't allow yourself to become a victim by neglecting pains and aches. Guard against trouble by taking LATHROP'S GOLD MEDAL HAARLEM OIL. The world's standard remedy for kidney trouble, bladder and uric acid troubles. Food's natural remedy since 1896. All druggists, three sizes. Guaranteed. Look for the name Gold Medal on every box and accept no imitation.

Transjordania, New Arab State

Amman, Its Capital, Once Philadelphia, Ancestor of All Modern Philadelphias.

Washington.—"Whether the newest Arab state to have its independence recognized be called by its Western title of Transjordan or by its Eastern name, Kerak, it seems hopelessly out of touch with things American," says a bulletin from the Washington headquarters of the National Geographic society, in regard to the land immediately east of the River Jordan over which Emir Abdullah rules.

"Perhaps it will bring the newly independent but very old country closer," continues the bulletin, "to realize that its capital, now Amman, was once Philadelphia—the great-great-grandfather of the half-dozen or more Philadelphias, great and small, that are to be found in our postal guides.

Seventy-five years ago the foreign commerce of New York and of New Orleans was practically the same.

When Transjordan is described as stretching from the Jordan and the Dead Sea toward the interior of Arabia, one is likely to call up the picture of a hopeless desert. But much of the region is steppe land, a high plain supporting some flocks and even capable of tillage. Nomadism has long held the region in its grip, however, and it is as a sort of "chief of nomads" that Abdullah Ibn Hussein finds it necessary to rule. He holds his "court" not in a palace but in a group of tents which he moves with the seasons.

This land, now given over largely to nomads, is capable of development along stable lines, as is shown by its past importance. After Alexander's Eastern conquests the cities to the east of the Jordan became Hellenized and the seats of prosperity and culture. In the second century before Christ, Ptolemy Philadelphus built in the city which was given his name an extensive acropolis which, in the Amman of today, is only a mass of fallen columns and ruined walls.

Rome's sway over Philadelphia is shown in Amman by the ruins of a

huge amphitheater which seated 7,000 spectators. In the sleepy Eastern town of today goats browse among the foundations of temples and public buildings, Arabian coffee shops lean against once-prond walls, and the Eastern species of the village lounge sits on overturned marble pillars. Emir Abdullah is showing some interest in the ancient structures of his capital, however, and is having the fairly well-preserved amphitheater cleared of debris.

"Amman is not inaccessible. Five hours by automobile over reasonably good roads through the sizzling valley of the Jordan suffice for the trip from Jerusalem to the capital. The Jordan forms the boundary line, and across it is an iron bridge. Amman is only about thirty miles from the river and, as the crow flies, is hardly more than sixty miles from Jerusalem. The Hedjaz railway, connecting Damascus and Medina, runs through the town."

Seventy-five years ago the foreign commerce of New York and of New Orleans was practically the same.

Death Penalty for Cannibals

France Issues Orders Intended to Extirpate Practice in African Possessions.

Paris.—Albert Sarraut, French minister of colonies, who was one of France's representatives at the Washington naval armament limitation and pacific conference, has just signed two decrees intended to extirpate the practice of cannibalism in the French African possessions. The death penalty is imposed on any one killing or trying to kill human beings for the purpose of eating their flesh. Imprisonment of from one to ten years and a fine of from 100 to 1,000 francs are to be the punishment for complicity in such crimes or for eating human flesh. Cannibalism survives, M. Sarraut says, principally under the form of ritual rites or acts of sorcery.

Discussing this subject in Le Journal, M. Fernand Hauser writes: "Doctor Cureau, formerly a colonial governor, assured us some years ago in a work on the primitive peoples of equatorial Africa that cannibalism, as

LAST YANK TO RETURN

Louis P. Von der Heide of Chicago, who just arrived home from the Rhine and has taken up the work he left a good many months ago to help Uncle Sam. He is a machinist. Von der Heide married a German Red Cross nurse while in the service. He is the last American soldier to arrive home from overseas service.

Japan has a virtual monopoly of the coral industry.

Prepare Soil for Fall-Sown Alfalfa

Late July or Early August Is Best Time, According to Federal Experts.

(Prepared by the United States Department of Agriculture.)
Preparation of the seed bed for fall sowing of alfalfa should begin in late July or early August, in the opinion of experts of the United States Department of Agriculture. In the eastern alfalfa region from Pennsylvania south, September is a common time for fall alfalfa sowing, the date varying with local conditions. To get the soil settled it should be plowed not later than early August. Then just before seeding time it should be loosened up for a depth of about 2 inches. If the subsurface is not well packed the conditions will not be favorable for the young alfalfa plants.

Alfalfa needs lime. If the soil is deficient, put on at least a ton of the best of air-slaked or its equivalent in other pulverized forms. This can be applied at plowing time or later, before the first harrowing, bearing in mind that lime must be well incorporated with the soil to be effective. Arrange early for the seed. Domestic-grown seed is better than imported, which is likely to be of the Turkestan variety. Domestic-grown common alfalfa seed such as is raised in Kansas or is grown under similar conditions is advised except for the northern part of the Eastern states, where Grimm or some other hardy variety should be used.

Inoculation of Soil. Do not forget to inoculate the soil. Directions and the addresses of sources from which bacteria can be obtained will be furnished by the Department of Agriculture or your state experiment station, or can be obtained through your county agent. Do not try to see how little seed you can use and still obtain a satisfactory stand. On the other hand, more than 20 pounds to the acre is unnecessary. If the sowing is done in September and conditions are favorable the young plants should reach a height of 12 inches or more before winter. The crop should not be cut, but allowed to go through the winter to permit successful survival of the freezing months.

Circulars giving specific directions for growing alfalfa under various local conditions may be obtained from the department on request.

Cost of Feed Biggest Item in Stock Farming

The cost of feed is the biggest item in stock farming. To produce a cheap ration is therefore one of the most important factors in the business, and the stock farmer who wishes to be successful must learn how to reduce his feed bill.

The Missouri experiment station recently issued a bulletin on the cost of crop production, showing the cost of putting up hay to be \$3.38 per ton. They did not say whether this hay was put up in stack or mow, but the figures indicate that modern labor-saving tools were used and that the hay was well housed either in stack or shed. It costs from 85 cents to \$1.25 per ton to put corn in the silo; thus we find that silage, on a ton basis, can be put up at from one-third to one-quarter the cost of hay. The quality of silage can be controlled, while the quality of hay depends on the weather.

Imported Currant Worm Reduces Yield of Fruit

Currents and gooseberries have suffered severely from the depredation of the imported currant worm in the last few years and this year we may look for even greater infestation. These worms can in a few days strip the bushes of leaves. This naturally reduces the yield of fruit and if repeated for several consecutive years, may kill the bushes.

Now is the time to put a stop to the ravages of this insect. The most effective treatment is spraying with lead arsenate at the rate of two or three tablespoonsful to a gallon of water. Lead arsenate has the desirable quality of adhering to the leaves for a long time and retaining its strength throughout that time. For these reasons it is much preferred to white hellebore, the old-fashioned currant worm remedy.

Sweet Clover Bloat Is Troublesome to Cattle

Sweet clover bloat is believed to be only very occasionally responsible for bloat in cattle. Sometimes if the clover is in bloom the fermentation of honey in the blossoms develops sufficient gas to form severe bloat. At other times, especially when the clover is wet with dew or rain, it ferments rapidly in the first compartment of the stomach, and there the resulting development of gas is also responsible for bloat. Prevention is quite difficult.

Potatoes Fed to Dairy Cows With Fair Results

Potatoes can be fed to dairy cows with fair results. They give better results when fed in connection with clover or alfalfa than when fed in connection with wild hay, timothy or fodder corn. In comparison with corn, it requires from six to eight pounds of potatoes to equal a pound of ground corn in milk production.

Quantities of Milk to Feed Young Calf

Underfeeding at Start Is Better Than Overfeeding.

(Prepared by the United States Department of Agriculture.)

The United States Department of Agriculture gives some figures on the quantities of milk that may be fed to calves at different ages. At birth a 50-pound calf needs about 8 pounds a day, while a 100-pound calf will use 12 pounds. Underfeeding at the start, says the department, is better than overfeeding. Some beginners make the mistake of giving the calf all it wants. This would probably be a good practice if the calf were fed every 2 or 3 hours, as is the case when it runs with the cow. However, when a young calf has been without feed for from 8 to 12 hours, there is danger that it will gorge itself if allowed to consume all it wants, which may cause digestive trouble.

A uniform temperature of about 90 degrees F. is necessary if the milk is to agree with the calf and produce the best results. Some feeders attempt to make up for any lack in quality of the milk by increasing the quantity. For instance, they will feed much more skim milk than whole milk in the belief that the increased quantity will make up for the lack of butterfat. This is wrong, as the same rule about overfeeding holds good with skim milk as with whole milk.

If on account of age, souring, or dirt, the quality of the milk is poor, the quantity should be reduced rather than increased. The calf will not lose so much in development through a reduction in feed as he would from digestive disorders. A calf often can take a relatively small quantity of bad milk for long periods and hold its own and even make small gains, when a larger portion would cause digestive trouble and even endanger the animal's life.

Destroying Army Worms by Use of Paris Green

The army worm is a smooth, striped caterpillar about an inch and a quarter long and a quarter of an inch in diameter. It is rather dark in appearance. While normally it feeds by night and hides by day, not being generally noticed, as soon as it has increased to such numbers that its food supply falls short it starts to travel, and, becoming bolder, feeds during both day and night.

How worms may be destroyed: If the worms have not yet attacked a field, the most practicable way to keep them out is to plow furrows in front of them, throwing the furrow in the direction toward which they are traveling. The worms will fall into the furrow, and when this is full they may be killed either by dragging a log back and forth in the furrow, or by destroying the worms in holes previously dug at intervals of twenty feet in the bottom of the furrow. Kerosene poured on them in the holes will destroy them. If the worms are already in the field, the following mixture, which will attract the worms and destroy them, should be spread about. One pound of paris green (poisonous), fifty pounds of wheat bran and the juice of one-half dozen oranges.

Bring this mixture to a stiff dough by the use of diluted molasses, and scatter it amongst the worms. Care should be taken to keep this dough from children or domestic animals.

Raspberry Cane-Borer Is Cause of Great Damage

The raspberry has several insects and diseases that reduce the crop very greatly. The cane-borer is one that works so quietly that it is not usually noticed by the novice. The adult beetles feed on the leaves and do some damage in this way.

The most damage is caused by the young worms feeding just under the bark and causing the cane to form a gall. Later the worms go inside and bore into the pith where they remain over winter. When spring opens they change to adults.

Spraying does not control them. The best method of control is to examine the canes in the early spring and cut out close to the ground those that are found infested. These are readily found on account of the galls and swellings.

The infested canes must be burned before the beetles come out. Dumping them in a brush pile only keeps the beetles from finding new shoots for a short time. Burning is the best remedy.

Cleaning Up Is Needed When Disease Appears

A real cleaning up is needed when disease has appeared in the chicken flock. Not just sweeping out from under the roosts, and a sweeping off of the droppings board; not merely cleaning around the nest boxes, but taking out every bit of removable furnishings (the furniture of a chicken house should all be removable), burning the litter, and following the thorough sweeping of walls, ceiling and floors with a good disinfectant. Any good commercial dip will do. It is best applied in a one-to-fifty dilution in hot water, using a force sprayer.

After the house is dried, apply a good coating of whitewash in which is a little carbolic acid or other good disinfectant.

Before returning the chickens to a cleaned house, treat them for lice.

CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 50 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural, sleep without opiates. The genuine bears signature

Charles H. Fletcher

APPEALED TO MAN'S VANITY

Brightly Colored Beads, in Some Shapes, Have Been Popular in All Ages and Countries.

Beads are one of the oldest witnesses to the vanity of mankind.

The oldest beads were simply stones with holes through them, which, owing to their bright color or peculiar shape, took the fancy of the finder, who threaded them on a strip of hide or fiber. Later, when we became more civilized, beads made of wood carved into fantastic shapes were in favor. Some beautiful examples of both kinds can be seen in the British museum.

Uncivilized races have a passion for stringing together various objects as beads. Human teeth, brightly colored insects, seeds and even whales' teeth, are worn in this way.

The word bead comes from "bede," the old English word for prayer. It has an interesting origin. In olden times, as a person repeated his prayers they were counted by ticking off one by one a string of small pierced balls which were threaded together, and in time these balls came to be called beads.

Growing Weary. "Looky here!" sternly chided Constable Slackpitter of Petunia. "I've been shuddering you for three, four days now, and hain't found out a single thing against you."

"Yes," replied the stranger. "I have observed you doing so."

"Well—got-ram it—do something pretty quick, or hanged if I don't arrest you, anyhow! I'm getting tired of your foolishness."—Kansas City Star.

Often the Way. "Everybody tries to kiss that girl." "She doesn't seem so attractive. Why?" "She won't let you."—Louisville Courier-Journal.

Instant relief from CORNS without risk of infection

Easy! You ease and the pain of corns, in one minute. Dr. Scholl's Zino-pads will do it for you! They remove the cause—friction-pressure, and heal the irritation. They are made of soft, elastic, virgin prairie land, near railways and towns, at \$15 to \$20 an acre—long terms if desired. What crop last year the biggest in history; carrying and bogs pay well; mixed farming rapidly increasing.

Dr. Scholl's Zino-pads

Made in the laboratories of The Scholl Mfg. Co., makers of Dr. Scholl's Foot Comforts, Apparatus, and Supports, etc.

Put one on—the pain is gone!

Opportunity Calls from CANADA

Visit Canada this summer—see for yourself the opportunities which Canada offers to both labor and capital—rich, fertile, virgin prairie land, near railways and towns, at \$15 to \$20 an acre—long terms if desired. What crop last year the biggest in history; carrying and bogs pay well; mixed farming rapidly increasing.

Homesteaders' Rates on Canadian Railroads

If you wish to look over the country with a view to taking up land, send an order from the nearest Canadian Government Agent for special rates on Canadian railroads. Make this your summer outing—Canada welcomes tourists—and passports required—have a great trip and see with your own eyes the opportunities that await you.

SLAYS GIANT GRIZZLY, NOTORIOUS CATTLE THIEF

Oklahoma Hunter Kills Bear That Ruled Range for Years.

Oklahoma City, Okla.—"Old One Toe," king of the grizzlies, killed yearlings on the cattle ranges of northwest Wyoming for twenty years. From now on, however, his stuffed pelt will stand lifelike in the natural history museum at the University of Oklahoma, at Norman, and silently assert his claim to the title, "biggest of all bears."

The greatest of them all, "Old One Toe," measures 8½ feet from nose-tip to tail-tip, and weighed between 1,200 and 1,300 pounds. The bear, which lost the other four toes on his right hind foot in a trap in 1902, fell before the automatic rifle of Arch A. Campbell, contractor, of this city, who spends his annual vacation hunting big game

and catching rainbow trout in the vicinity of Dubois, Wyo.

His conquest of "Old One Toe" was unplanned up to the moment that Campbell stumbled on the tyrant of the cattle range, ravenously devouring the carcass of a calf. From the first encounter to the kill was twenty-four hours.

"Old One Toe," made wary by his settie with a steel trap and grown gray in the two decades he had outmaneuvered cattle men, was a foe worthy of any hunter. Campbell trailed him all day, after the first shot, before he was able to come up with him for the fatal battle, which was of short duration.

Campbell's progress out of the woods was a triumphal march, as all the cattle men wanted to see the carcass of the bear which had caused them heavy losses.

Spot check isn't always system.

Spurned Love Causes Boys to Turn Pirates

Ten boys, led by a youth fifteen years old, captured by the police of Chicago in a "pirate" cave along the lake front, admitted they had committed four recent robberies netting them nearly \$10,000 in money and merchandise, part of which was recovered.

The leader of the band turned "pirate," he said, after his "best girl" threw him down.

Others in the gang also admitted unfortunate "love affairs."

OFFICE PHONE NUMBER 24

"Indefensible Act of a Tyrannical Minority."

UNDER the above caption the Sacramento Bee of April 30, printed the following editorial:

"After having been for several years a source of inspiration and comfort to thousands of people, the summer Sunday afternoon concerts at the Berkeley Greek Theatre are to be discontinued.

"President Barrows, of the University of California, first approved a plan for continuance of these affairs during the coming summer, but a group of Berkeley ministers objected to them as a desecration of the Sabbath, and the president yielded to the ministerial importunity.

"The contention of the ministers is that these concerts are a 'commercialization' of the Sabbath, the point being made that not only is admission charged, but the performers themselves are paid for their work.

"As far as the contention of commercialism goes, the ministerial argument, to be logical, will have to be given much greater extension. It will have to contend that no one should work for hire on the Sabbath, no matter who he may be.

"In that case, what would become of the ministers themselves, and the flock of organists, soloists, lecturers, and other people who draw money for their Sunday labors?"

"Of course, the principle will not be so extended, but if it is not, it is worthless as a principle.

"Moreover, a great many of the musicians who have been accustomed to play at these Berkeley concerts undoubtedly need the employment so given them.

"It is not as if musicians were regular workers for six days of the week, and either needed or could afford the Sunday rest which by this action they are compelled to take.

"And there is also the delicate, but still fairly debatable question of whether music of the sort which Alfred Herz has been in the habit of furnishing at these concerts is or is not spiritual influence of no mean value to the communities adjacent to the bay.

"The majority of people seem to think so, and they have a right to be considered, even if they are not heard.

"On the whole, the Bee regards this procedure as an indefensible bit of tyranny, completely outside the spirit of true Americanism.

"It is one more example of the power which can be exercised by an organized minority, regardless of either the opinion of the majority or of the question of abstract justice.

"It is to be wondered how much longer the people of California will continue to endure such senseless infringements of their rights. Surely it will not be forever."

Take an Interest in Mining

Every western state feels the
added impulse of increased min-
ing activity.

Copper and lead are the met-
als responsible for the greatest
employment of labor. Silver
might be called a by-product in
many of the larger mines, but a
satisfactory price for it under
the Pitman act enabled mines to
operate and keep labor employed
when they would have otherwise
had to close during the depres-
sion in the mining industry.

It would seem as if there
could be some plan worked out
whereby a permanently satis-
factory price for silver could be
established, especially as there
is not enough gold in existence
to guarantee the credit of paper
money.

Every westerner is interested
in the mining industry because
it means bread and butter to
thousands, and for that reason
should interest himself in pol-
icies which will stabilize this im-
portant branch of industrial ac-
tivity.

Above everything else, reas-
onable taxation must be main-
tained if mines operate success-
fully and pay high wages.

Punish the Guilty
The forest fire season is here.
Punishment for campers, tour-
ists or regular residents who
leave smoldering fires or throw
cigars or matches into grass or
underbrush, should be speedy
and severe.
Lumbering is one of the west's
greatest industries, and its
future as well as the prosperity
of thousands of men it employs
should be jealously guarded by
all.
Let us co-operate to cut down
the terrific annual forest fire
waste which we have suffered
for many years. It is more nec-
essary now than ever, as so
many people are going through
our forests.

To Push U.S. Reclamation Projects

DR. HUBERT WORK

HENRY C. WALLACE

DODSON DAM, MILK RIVER PROJECT

Work and Wallace, Personal Friends, Likely to Co-operate

By JOHN DICKINSON SHERMAN

DECLARATION of arid lands by the federal government is now twenty years old. The approval by President Roosevelt of the reclamation act June 17, 1902, marked an expansion of the homestead policy of the nation and its adaptation to new conditions. Much has been written in praise and in blame of what has been done. The present year is the first of what appears to be greater activities and changed methods.

In this reclamation of arid land, say the experts, considerably more than \$100,000,000 have been expended. A very considerable sum has been repaid. The works erected are many of them of monumental character. In the main the settlers under these projects have been prosperous and successful, but a series of low prices and high freight rates have created a condition under which many of the settlers find it temporarily impossible to meet their payments. With a view of remedying this condition an act extending the time of certain payments under carefully guarded conditions was enacted. It is realized by all that the time has now arrived when there should be a general study of conditions on the reclamation projects and a readjustment of payments in the light of present conditions in a manner to enable the industrious and well-meaning settler to meet his obligations at all times and to place these enterprises on a basis of permanent prosperity.

According to the experts we have long needed a federal law providing for the organization of irrigation districts on projects under the national reclamation law in order to make it possible for the federal authorities to deal with the settlers and water users collectively instead of individually. This is now made possible by the act of May 15, 1922. This act also provides for the conditions under which farm lands can be made on lands on reclamation projects, thus meeting a long-felt want on the part of settlers on such projects.

Dr. Hubert Work is now secretary of the interior. He is a Colorado man and has had personal experience with irrigation. In a recent address delivered by Secretary Work at the Agricultural department motion picture show, he set forth the need of co-operation between the Department of Agriculture and the interior. In one place he said this:

"The interior department and the Department of Agriculture are units of a great government, not miniature governments in themselves, and therefore both departments are obligated to contribute through mutual co-operation to the successful administration of the government as a whole. The least motion and time expenditure incident to duplication or overlapping does not make for intensive organization, the lack of which is a weakness of the government service. One department should not be dependent on another for an incidental service because not prepared to do it alone. That service should be the responsibility of the department best equipped to render it." In another place he said this:

"Farmers must compete in the markets precisely as other industries do, and the question of transportation is a fundamental factor in the marketing of farm products. These are questions the two departments must study together, for they have to do with the food supply not of this year and our own people alone but for many years in the future and for other nations as well. There is no longer any frontier in the United States. We are all one people, having a common interest and obligation to the government, and I shall ask the secretary of agriculture to lend the good offices of his most scientific, practical, and effective department to appraise soil fertility and markets in advance of our reclamation commitments and to aid our settlers in profitable farming." He concluded thus:

"I have not had opportunity to consult with the secretary of agriculture on these lines I have been discussing with you. I am now to my department while he has been in the far West for several

weeks, where, incidentally, he has missions to perform for my department, but we are long-time personal friends; I know the trend of his mind and feel assured that we will not be far apart in our conclusions bearing on the important services our respective home-making departments should render to the government."

This will be good news for many who would benefit by co-operation, since these two departments have been for a long time at feud over several questions—such, for example, as the proposed transfer of the control of the national forests to the interior department; the efforts of the Agricultural department to get control of the national parks, and the proposed turning over of Alaska to the interior department's administration.

At any rate, Secretary Work has begun his activities by appointing Miles Cannon, former commissioner of agriculture of Idaho, to the position of field reclamation commissioner, headquarters to be established later in one of the reclamation states. In his letter to Director A. P. Davis of the reclamation service and to managers of the several reclamation projects Dr. Work says in part:

"Mr. Cannon is the direct representative of the secretary of the interior in a work which I have undertaken for the improvement of government reclamation projects along business and agricultural lines. His work is not to conflict with or duplicate the engineering work now being carried on by existing reclamation forces, nor with the work of other bureaus or departments, but is to be, so far as same touches your work or that of others, in co-operation in producing beneficial results.

Briefly, it is the purpose to co-ordinate various agricultural activities, aid the farmers in raising better and more diversified crops, in applying modern methods in handling, marketing, and realizing upon crops produced, to effect economies wherever possible, and to in every way improve not only the condition of the water users on the projects but the administration of the projects by this department."

Incidentally, Commissioner Cannon, Director Davis and Special Assistant Secretary D. W. Davis are at this writing making a visit of inspection to the principal reclamation projects.

There are 30 reclamation projects in various states. The total investment of the United States is approximately \$172,000,000; the reimbursements and credits approximately \$40,000,000. The net investment is therefore about \$132,000,000. Senator Ashurst of Arizona, in a recent senate debate, gave these general figures:

"Since federal irrigation began, 3,000,000 acres of theretofore practically worthless desert land have been made productive by government irrigation. The value of the crops produced thereon now amounts to \$50,000,000 annually. The increase in value of the irrigated acreage amounts to \$300,000,000, and since the government began the delivery of irrigation water the crops produced on the reclaimed lands today aggregate \$400,000,000 in value. Nor does this sum of \$400,000,000 include the value or expansion of production of live stock or stock products; in other words, the figures (\$400,000,000) as to the aggregate crop value are limited to vegetable, fruit, and grain values at the farm, for which government reclamation furnishes the sole supply of water. All the moneys disbursed by the government to the various irrigation projects will ultimately be repaid.

"At the outset let it be remembered that the full importance of national irrigation cannot be measured in dollars, for it has an intangible value not to be estimated in tonnage tables nor trans-

portation rates. In building new commonwealths in the arid lands of the West the government is utilizing undeveloped resources and creating opportunities for its citizens. One of the primary purposes of the reclamation law was to create homes, and this purpose has been richly fulfilled. Viewed from this standpoint alone, national reclamation has amply justified all for which its advocates hoped.

"Since 1902 the reclamation service has constructed the irrigation systems to supply abundant water to 2,000,000 acres of land, and the capacious storage reservoirs of the government are furnishing a supplemental supply of stored water to a million additional acres in other projects, or a grand total of 3,000,000 acres. On these irrigated lands are now profitably employed and satisfactorily housed approximately 500,000 persons.

On the government-project lands are 50,000 families in independent homes. The population in cities, towns and villages in these government projects has been increased by an equal number of families."

In the Reclamation Record are given the following figures concerning the Yuma project, Arizona-California, which may or may not be typical of conditions among the projects:

Values Created.
Value of farm lands and improvements on project at close of 1921 \$10,240,000
Value of live stock 603,000
Value of farm equipment 450,000
\$11,293,000

Assessed Valuations.
Towns \$ 4,000,000
Farms 1,185,000
Public utilities 4,615,000
\$10,800,000

Value of Crops Produced in 1921.
Alfalfa hay \$ 430,000
Alfalfa seed 478,000
Cotton 793,000
Cotton seed 90,000
Miscellaneous 332,000
\$2,093,000

Value of crops produced since 1916 \$23,000,000
Shipments of Agricultural Products, 1921.
Carloads.

Hay 621
Cotton 425
Cotton seed, cottonseed oil and cake .. 208
Manure 137
Cattle 121
Alfalfa seed 63
Honey 13
Miscellaneous 38

Total amount shipment 1,623
Wholesale Purchases of Manufacturers in 1921.
Dry goods, clothing, shoes \$ 890,000
Lumber 875,000
Automobiles, trucks, etc. 153,000
Groceries 2,150,000
Hardware 820,000
Coal, feed, flour, bags, etc. 225,000
Farm implements 205,000
Mechanical and supplies 175,000
Electrical supplies 105,000
Jewelry and miscellaneous instruments 50,000
Drugs and sundries 265,000
Cigars, etc. 104,000
Furniture 124,000
Other merchandise 300,000
Total \$ 5,411,000

INFORMATION DEPARTMENT
Commercial inquiries answered and information gladly furnished without cost. Address any firm above.

New Grading System for Vegetables and Fruits to Start July 27
Denver.—Agreement on a joint state and federal inspection service for fruits and vegetables, was announced here a few days ago by Joseph Passonneau, state director of markets.

District Supervisors will be named in Greeley, Carbondale, Grand Junction and the San Luis valley.
Grants of \$5,000 from the bureau of markets and \$2,000 from the State Agricultural College have been obtained to finance the service.

The arrangement will enable shippers to prevent commission merchants arbitrarily fixing low grades, a practice which has cost Colorado farmers huge sums in the past. The federal inspection certificate stands as prima facie evidence in any court.

\$500,000 Scattered in Collision
San Francisco.—A taxicab carrying \$500,000 in currency, coin and notes from the Bank of Italy to the Federal Reserve bank smashed into a street car here, scattering the money and notes over the street and slightly injuring Police Detective Fred Pearl, who was in the taxicab as a guard.

Several bystanders offered to pick up the money and notes, but Pearl drew his pistol and advised them that the two bank messengers who accompanied him would attend to that little detail.

Machine Guns Halt Masked Strikers
Sydney, N. S.—Machine guns manned by 200 soldiers succeeded in turning back a mob of 4,000 masked strikers, who in a three-hour battle stoned police stationed about the plant of the British Empire Steel Company here. Calls for additional troops, were sent out.

\$500,000 Loss in Oil Well Fire
Long Beach, Calif.—A fire in the Signal Hill oil fields, north of here, destroyed two derricks and caused a loss estimated at \$500,000. The Union Oil Company of Southern California and the Petroleum Midway Company lost their derricks, tools and riggings. Property of the Marine Oil Corporation and the Henderson Petroleum Company was saved by oil workers risking their lives in bringing the blaze under control. The fire, which was started by oil escaping from a broken line, becoming ignited under a boiler, burned for two hours.

No Retrial in Croker Will Case
Dublin.—There will be no retrial of the suit brought by Richard Croker, Jr., contesting the will of his father, one time Tammany hall chieftain. The time for serving notice of an appeal for an application for a new trial expired a few days ago. No such notice or application had been served. Thus the verdict recently returned in favor of Mrs. Julia Croker, the widow, is upheld.

New Road for Lower California
Mexicali, Lower California.—Bids for the construction of 150 miles of railroad through lower California by the national railways of Mexico were opened recently, according to an announcement of Jose L. Lugo, military governor of the northern district of Lower California. The construction of this railroad, government officials state, will make available more than 2,000,000 acres of farming lands, particularly adapted to cotton, for which water can be obtained from the abundant flow of the Colorado river.

"In a Magnificent Fashion"
He enjoyed singing in the Frog Glee club, which in the olden days he had been too proud to do. Oh yes, Georgie Green Frog was a splendid frog, and that night, following the day when Georgie had been around to see all of them, they decided to have a Frog Parade in his honor. They sang and they croaked and the Frog band played, and one frog acted as Drum Major and carried a splendid stick which he tossed up in the air in a magnificent fashion. And oh, how delighted Georgie Green Frog was when the parade came and stood outside his stump and said:

"We've come to honor our Frog Leader, Georgie Green Frog is our leader. He's a frog very well worth while. He's a frog with an ever-ready smile, 'Goo-g-a-roo, goo-g-a-roo, goo-g-a-roo.' We've come to honor our Frog Leader."

CHAPTER XVIII—Continued.

Sandy went to the door and hailed Sam and Mormon. They came to the office escorting Blake, whose fox-face moved from side to side with furtive eyes as if he smelled a trap.

"We want the list of the folks you unloaded Molly stock to," said Sandy. Blake looked at his employer who sat glowering at his cigar end, licked his lips and said nothing.

"Tell him, you d-d fool!" grunted Keith.

"The stubs are in the car at Hereford depot," said Blake. "In the safe."

"Money there, too? I suppose you cashed the checks?"

"I deposited them to my own account," said Keith. "Come on, let's get this over with since you are determined to throw away your own and your partners' good money, to say nothing of the girls'. She could bring suit against you, Bourke, with a good chance of winning."

He glanced hopefully at Mormon and Sam. They kept on grinning.

"Round up that chauffeur, Sam, will you?" asked Sandy. "Tell him we're startin' for Hereford right off."

Kate Nicholson and Miranda Bailey were on the ranch-house veranda.

"Could I ask you to mail these letters, Mr. Keith? Two of Molly's and one of my own." Kate Nicholson advanced toward him, the letters in hand. With a spurt of fury Keith snatched at the letters and threw them on the ground.

"To h—l with you!" he shouted, his face empurpled. "You're fired!" All of his polish stripped from him like peeling veneer, he appeared merely a coarse bully.

Sam came up the veranda in two jumps and a final leap that left him with his hands entwined in Keith's coal collar. He whirled that astounded person half around and slammed him up against the wall of the ranch-house, rumbled, gasping, with trembling hands that lifted before the menace of Sam's gun.

"I oughter shoot the tongue out of you befo' I put a slug through yore head," said Sam, standing in front of the promoter, tense as a jaguar crouched for a spring, his eyes glittering, his voice packed with venom. "You git down on yo' knees, you ringle-tailed skunk, an' apologize to this lady. Crook yo' knees, you stinkin' polecat, an' crawl. I'll make you lick her shoes. Down with you or I'll send you straight to judgment!"

"No, Sam, Mr. Manning—it isn't necessary," protested Kate Nicholson. "Please . . ."

Sam looked at her cold-eyed.

"This is my party," he said. "I'll do him good. I'll let him off lickin' yo' shoes, he might split the leather. But he'll git them letters he chucked away, git 'em on all-fours, like the sneakin', alinkin', double-crossin' coyote he is. Crook yo' knees first an' apologize!"

Sam fired a shot and the promoter jumped galvanically as the bullet tore

face was rosy; both were embarrassed.

"Thank you, Mr. Manning," she said. "Please let him get up, and put away your pistol."

"Git up," said Sam, "an' go pick up them letters."

Keith gathered up the envelopes and presented them, with a bow, to the governess. He had recovered partial poise and his face was pale as wax, his eyes evil.

"I'll mail them, Miss Nicholson," said Sandy. "Let's go." He took Sam aside as the car swung round and up to the porch. "Sammy, Sandy's eyes twinkled, "I didn't saba you an' Miss Nicholson was so well acquainted."

Same looked his partner in the eyes and used almost the same words for which he had just tamed Keith. But he said them with a smile.

"You go, plumb to h—l!"

Creel, president of the Hereford National bank, a banker keen at a bargain, shot out his underlip when Keith, with Sandy in attendance, tendered him the money for all shares of the Molly mine sold in Hereford, including his own.

"You say the mine has petered out?" he asked Keith, with palpable suspicion. Keith glanced swiftly at Sandy sitting across the table from him in the little directors' room back of the bank proper. Sandy sat sphinx-like. As if by accident, his hands were on his hips, the fingers resting on his gun butts.

"That is the news from my superintendent," said Keith. "I wish I could doubt it. Under the circumstances, consulting with Mr. Bourke, who represents the majority stock, we concluded there was no other action for us to take but to recall the shares, although the money had actually passed."

"Humph!" Keith's suavity did not appear entirely to smooth down Creel's chagrin at losing what he had considered a good thing. He smelt a mouse somewhere. "There are only two reasons for repurchasing such stock," he said crisply. "The course you take is rarely honorable and suggests great credit. The second reason would be a strike of rich ore rather than a failure."

"I will guarantee the failure, Creel," said Sandy. "If, at any time, a strike is made in the Molly, I shall be glad to transfer to you personally the same amount of shares from my own holdin's. I'll put that in writin' if you prefer it."

"No," said Creel. "It ain't necessary." He glumly made the retransfer. Sandy visced Keith's accounts and took Keith's check for the balance, placing it to a personal account for Molly. The check was on the Hereford bank and it practically exhausted Keith's local resources.

Keith's powerful car made nothing of the few miles between Hereford and the Three Star and it was only mid-afternoon when they arrived. Molly and Donald Keith were still absent, there was no sign of Brandon.

Keith stayed in his car, smoking, ignoring the very existence of the ranch and its people. The afternoon wore on with the sun dropping gradually toward the last quarter of the day's march. At four o'clock one of the Three Star riders came in at a gallop, carrying double. Behind him, clinging tight, was Donald Keith, weebegone, almost exhausted, his trim riding clothes snagged and soiled, his shining puttees scuffed and scratched. He staggered as he slid out of the saddle and clung to the cannie, head sunk on arms until Sandy took him by the arm. Keith sprang from his car and came over. Sam and Mormon hurried up.

"What's this?" demanded Keith angrily, suspicion rife in his voice.

"I picked him up three miles' back, hoo'n' it. He was headin' for Bitter Flats but he wanted the ranch," said the cowboy to Sandy, ignoring Keith. "We burned wind an' leather comin' in, see'n Jim Pimmsol an' some of his gang have made off with Miss Molly!"

"Where'd this happen?" demanded Sandy. "Sam, go git Pronto fo' me an' saddle up."

"That's the h—l of it," said the rider. "The pore d—n fool don't know. Plumb locol. Seared to death. Been wanderin' round sence afore noon."

Donald Keith sagged suddenly and Sandy picked the lad up in his arms, strode with him to the car and laid him on the cushions.

"Git some water," he ordered Keith. "We've got no flicker on this ranch."

Keith bent, opened a shallow drawer beneath the seat and produced a silver flask. He unscrewed the top and poured some liquor into it. Sandy raised the boy's head and lifted the whisky to his pallid lips, gray as his face where the flesh matched the powdery alkali that covered it.

"The cordal tricked down and Donald's eyes opened. Almost immediately color came back into his cheeks and lips and he tried to sit up. Sandy helped him.

"Now, sonny," he said. "Tell us about it. Where did you leave Molly?"

"I don't know just where. I wasn't noticing just which way we rode. She did the leading. I don't know how I ever got back."

"Didn't she tell you where you were makin' fo'?"

"She didn't name it. It was a little lake in some canyon where Molly said there used to be beavers."

"Beaver Dam canyon," said Sandy exultantly. "You left here 'bout seven. How fast did you trail?"

"We walked the horses most of the time. It was all uphill. And I looked at my watch a little before it happened. It was a quarter of eleven. We saw some men ahead of us. Molly wondered who they could be. Then they disappeared. We were riding in a pass and two of them showed again, coming out of the trees ahead of us. One of them, on a big black horse, held up his hand."

"Jim Pimmsol!"

"Yes. Molly recognized him and spoke to him to get out of the trail. Grit was trailing us. Pimmsol wouldn't move. I heard more horses back of us and I turned to look. Two more men were coming up behind. Molly spurred Blaze on and cut at Pimmsol with her quirt. He grabbed her hand with his left. Grit sprang up at him and he got out his gun from the shoulder sling and shot him."

"Shot the dawg? Hit him?"

"Yes, in the leg. He fired at him again, but Grit got into the brush."

"Jest what were you doin' all the time?" Sandy knew the lad was a tenderfoot. knew he would have been small use on such an occasion, but the thought of Grit rising to the rescue, falling back shot, brought the taunt.

"The two men behind told me to throw up my hands," said young Keith, his face reddening. "What could I do?"

"Nothin', son. You c'dn't have done a thing. Go on."

"Pimmsol twisted Molly's wrist so that the quirt fell to the ground. The man who was with him tossed his rope over her and they twisted it round her arms. I had the muzzle of a rifle poked into my ribs. They made me walk back along the trail. They fired bullets each side of me and laughed at me when I dodged." Donald's eyes were filled with tears of helplessness and the remembrance of his self-pity and the remembrance of his helplessness. "I didn't know what to do. I couldn't rescue Molly without a horse. I only had a revolver against their rifles and I'm not much of a shot. I tried to get back here but it was hard to find the way. I was all in when your man found me."

"All right, my son. Keith, I'm goin' to borrow that flask of yore. Might need it."

He jumped from the car, flask in hand, and ran to the ranch house. Kate Nicholson met him as he entered. "Has anything happened to Molly?" she gasped.

"That's what I'm goin' to find out," Sandy answered. "Mormon, git me my cartridge belt an' some extra shells fo' my rifle."

"You ain't takin' Sam?" asked Mormon, returning with the cartridge belt, Sandy's rifle and a box of shells.

"Sam ain't comin'," said Sandy, filling his rifle magazine and breech, stowing away extra clips. "I'm goin' in alone. Mo'n one 'ud be likely to spoil sige. Mormon, mo'n one is likely to advertise we're comin'. They're liable to leave a lookout. Pimmsol's clear'n' out of the country an' I'm trailin' him clear through h—l if I have to. Ef he's harmed Molly, I'll stake him out with a green hide wrapped around him an' his eyelids sliced off. I'll sit in the shade an' watch him frizzle an' yell when the hide shrinks in the sun. This is my private play, Mormon. You an' Sam can back it up, but I'm handlin' the cards."

He left the room and they saw him covering the ground in a wolf trot to where Sam, astride his own favorite mount, held Pronto ready saddled. They saw Sam's protest, Sandy's vigorous overruling of it, and then Sandy was up-saddle and away at a brisk lope with Sam gazing after him disconsolately. Keith's car was turning for the trip to Hereford, spurning the dust of the Three Star ranch forever—and not lamented.

Sandy, his eyes like the mica flakes that show in gray granite, his humorous mouth a stern line, little bunches of muscles at the junction of his jaws, held the pinto to a steady lope that ate up the ground, drifting straight and fast across country for the opening in the mesa that he had marked as the short-cut to the spot described by Donald Keith. Every now and then he talked his thoughts aloud, as the lonely rider will and, if the pinto could not understand, he listened with pricked ears.

"Grit must have been hurt pretty bad, I'm afraid. Wonder who the three were with Pimmsol? They're none to the hideout an' we got to find it, H! H! H! Some job, I reckon. But Pimmsol's goin' to be mighty sorry fo' missin' bats' long."

Sandy was a crucible filled with glowing white fury. Thoughts of what Pimmsol might achieve in insult and injury to Molly could not be kept out of his mind and they but added fuel. It was not Sandy Bourke of the Three Star, riding his favorite pinto, but a desperate man on a horse infected with the same grim determination, a man with a face that, despite the fiery heat within, blazing from his eyes, would have chilled the blood of any meeting him.

The place it had taken Molly and young Keith nearly three hours to reach in leisurely fashion, Sandy gained in one, splashing through the shallows of Willow creek at the ford below the big bend and giving Pronto the chance to cool his fetlocks and rinse out his mouth in the cold water.

Ahead lay the chimney ravine that led around into Beaver Dam canyon, in which Molly and the boy had been attacked. Sandy rode on down the narrow trail. Once in a while he broke a branch and left it swinging as a guide to Sam when he should follow with the riders from the ranch.

The tracks of Molly's Blaze and the

horse Donald had been riding were plain as print to Sandy. He even noticed the slot of Grit's pads here and there in softer soil.

The place of the struggle was plain. The brush was trampled. To one side of the trail there was a clot of blood, almost black, with flies buzzing attention to it. It must have come from Grit.

"I'll score one fo' you, Grit, while I'm about it," muttered Sandy as he dismounted and carefully surveyed the sign. Six horses had gone on, one led.

Sandy swung up the heavy stirrups and tied them above the saddle seat. He stripped the reins from the bridle and pulled down Pronto's wise head. "Hit the back-trail fo' home, H! H! H!" he said. "If I need me a mount to git back I'll borrow one. I got to go belly-trailin' pritty soon."

He gave the pinto a cautious slap on the flank and Pronto started off down the trail. So far Sandy believed he had not been seen. If he had, a rifle-shot would have been the first warning.

A buzzard hung in the early evening sky, circling high and then suddenly dropping in a swoop.

"Looks like Grit's cashed in," thought Sandy. "That bird was late comin' at that."

But it was not Grit.

The ravine curved, forked. One way led to Beaver Dam lake, the other lifted deep through rocky outcrop, leading to the Waterline range. The boundary fence crossed it. Two posts had been broken out, the wire flattened. Through the gap led the sign that Sandy followed. The clouds were assembling for sunset overhead, the moon 'jest topped the eastern cliffs, beginning to send out a measure of reflected light. A beam struck a little cylinder, the emptied shell of a thirty-thirty rifle. There was another close by. And scanty soil was marked with more hoof. Sandy halted, wondering the key to the puzzle. Did it mean a quarrel between Pimmsol's men? Altogether he figured there had been a dozen horses over the ground. It was only a swift guess but he knew it close to the mark. Had Pimmsol been joined or attacked? And . . . ?

Walking cat-footed, he made no sound but suddenly three buzzards rose on heavy wings and he went swiftly to where they had been squatting. A dead man lay up against the cliff, a saddle blanket thrown over his face. This had held off the canyon birds. The body was limp and still warm, it had been a corpse only a short time. Sandy took off the blanket.

It was Wyatt! A bullet had made a small hole in his skull by the right temple and crashed out through the back of his head in a bloody gey!

(TO BE CONTINUED.)

Sam fired a shot and the promoter jumped galvanically as the bullet tore through the planking.

through the planking of the ranch house between his trembling knees.

"I regret, Miss Nicholson," he commenced huskily, "that I let my temper get the better of me. I was greatly upset. In the matter of your services I was—er—doubtless hasty. It can be arranged."

He shrank at the tap of Sam's gun on his shoulder, willing to his knees.

"She w'udn't work fo' you fo' the time it takes a rabbit to dodge a rattler," said Sam. "She never did work fo' you. It was Molly's money paid her. Kate's goin' to stay right here as long as she chooses an' I . . ."

Catching Kate Nicholson's gaze, the admiring look of a woman who has never before been championed, conscious of the fact that he had blurted out her Christian name and disclosed the secret of that touch of intimacy between them, Sam grew crimson through his tan. Kate Nicholson's

KEELER, AT 80, GOES TO WORK

After fourteen years of enforced idleness because of ill health, J. H. Keeler, widely-known Maryland citizen, has gained forty pounds at the age of eighty years and gone back to work every day. Mr. Keeler, who resides at 3708 Thirty-Second St., Mt. Rainier, Md., gives entire credit for his extraordinary rehabilitation to Tanalac.

"My stomach was in such terrible condition I could hardly digest a thing," says Mr. Keeler. "It would swell to nearly twice its normal size and I would have frightful pains through my stomach and back. I felt so weak, dizzy and miserable work was out of the question. In fact, my friends gave me up on three or four occasions."

"Five months ago I began taking Tanalac and improved from the very first bottle. I now eat anything on the table, have gained forty pounds, and am back at work every day. Actually, I feel like a boy again. It would be ungrateful of me not to praise Tanalac."

Tanalac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanalac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.—Advertisement.

Keep Off the Grass. "Mose, Ah's done got me a good job now."

"What at?"

"Ah's got de job bein' professor ob pathology to de college."

"How cum? Yo' can't read nor write."

"Seem like yo' doesn't know wa'n't a perferer of pathology is. Lemme 'tuudent. A professor of pathology is de p'fessor what shows de folks how to go in and out of de college grounds."—Paris Stylus.

A FEELING OF SECURITY

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything. It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Not So Long. "How long has it been since you read de Bible?"

"Lemsee. Lemme sigger. I ain't never read it all. How long is 'at?"—Nashville Tennessean.

What the dairyman needs is a milk strainer which will leave in a few of the dollars for him.

Wrong One Landed. My best gentleman friend had called and, as I was not yet "dressed up," I asked my little sister to entertain him for a few minutes. As I was descending the stairs I distinctly heard her say, "Sister says if she lands you she's going to ask you to take her to California on a honeymoon trip. Will you take me along?"

I was so shocked I did not half look to see where I was going and fell headlong down the few remaining steps. My friend picked me up and said, "Twas you instead of me who was landed."—Chicago Tribune.

What He Needed. Smithy—I'm trying my best to get ahead.

Bruce—That's fine. You need one.

The Quality Car

SUPERIOR 5-Pass. Sedan \$860 f.o.b. Flint, Mich.

See Chevrolet First

Not alone for every-day utility does Chevrolet represent the world's lowest-priced quality car. It also meets the requirements of particular people for those social and sport occasions when artistic proportion, high-grade coach work, and handsome finish are in harmony with the time and place.

You can be proud of your Chevrolet, combining, as it does, a high degree of engineering efficiency with modern quality features that appeal to the experienced and the discriminating.

Call at our showrooms and discover the astonishing values made possible by the exceptional volume of Chevrolet sales.
