## Santa Fe Fiesta Will Excel Those Of Former Years

Santa Fe, N. M., Aug. 23.—The stage is all set for the annual riot of color, panorama of picturesque history and spectacular yearly celebration by the Indians of the southwest, known as the Santa Fe Fiesta and Southwest Indian Fair, Sept. 3 to 7 inclusive. Five Pueblos—Santa Clara, Santo Domingo, Tesque, San Juan and San Ildefonso, are to be present in force to put over a score of the most elaborate and thrilling Indian ceremonial dances ever seen in the southwest.

The government has given the Indians time from their village labors to devote to making these dances the most perfect and beautiful ever presented at the Fiesta. The Southwestern Indian Fair will be bigger and better than ever, held with the cooperation of the U. S. Indian Bureau, bringing to Santa Fe the arts and crafts of all American Indians from Dakota to California. Blankets, beadwork, basketry, carving, silverwork, leather, drawing, painting, woodwork and every cunning craft in which the Indians excel.

### "Don't Tell Everything"

The spirit of the outdoors is evident in "Don't Tell Everything," which will be the attraction at the Crystal Theatre next Saturday, Sept. 1. It is a Paramount Picture and is produced with the usual excellence that characterizes these offerings. The notable thing, of course, is the combination of Wallace Reid, Gloria Swanson and Elliott Dexter in the picture which is in itself a superior attraction. But when there is a breezy story, a tangle of good situations enlivened by real acting—it becomes an added interest. Sam Wood directed, Lorna Moon wrote the story and A. Le Vino adapted it. It has to do with two women who love the same man, a self-sacrificing friend who loves one of the women and who helps his friend to win her against his own chances for happiness. There is a spirited polo game and a realistic accident during its progress. It is a real picture with real people in it, and handsomely staged.

### Obituary of Martin May

Martin May, who died at the home of his son, Jesse May in Nogal, Wednesday, Aug. 15, was born in Berryville, Ark., Dec. 20, 1853. At the age of 34, he came to New Mexico, where he resided until his death. After coming here, young May followed mining, following that occupation until his death.

The body was held from Wednesday until Sunday, awaiting the arrival of his other son, Blaine May, who resides in Ontario, Oregon. The funeral services were held at Nogal and the body interred in the Nogal cemetery. He leaves two sons, Jesse and Blaine, one brother, two sisters, seven granddaughters, and three grandsons to mourn his loss.

Mr. May was a kind father, a sociable, and friendly neighbor. He will be missed by his many friends with whom he had lived and labored for many years.

This office wishes to gratefully acknowledge the receipt of a crate of fine cantaloupe presented to us by the Judge S. F. Crews family, of Oscuro.

## Fort Stanton Notes

(FROM "THE BUG")  
BORN—to Mr. and Mrs. Bailey, a girl. Mrs. Bailey was formerly Miss Eloise Bacchus.

Miss Clara Provencio has returned from a visit to her mother at Tularosa, N. M.

Paul A. Thompson and Robt. Courtney arrived from Seattle, Wash., as patients.

Mr. and Mrs. W. J. Achenbach motored to Carrizozo Wednesday with A. M. Oldham.

Dr. and Mrs. Warner will entertain Dr. and Mrs. Anderson, Mrs. J. W. Lane, Mrs. S. L. Anderson and Jack Lane at dinner Wednesday evening.

Mrs. C. S. Brewster and Miss Lois Brewster of Roswell returned to their home on Tuesday after a few days visit with Dr. and Mrs. Nesbit.

The Afternoon Bridge Club met with Mrs. Burl Sears of Captain on Wednesday past. There was a good attendance and a most enjoyable time was had by all.

Mrs. Helen Mahaney, our popular nurse, left on Saturday for a well earned vacation; she will go to Newburyport, Mass.

On Saturday past, Dr. Reid, Miss Kinnan, J. Herbert and Miss Murray motored out for a picnic.

Mrs. T. B. H. Anderson entertained at dinner August 21 for house guests, Mrs. J. W. Lane, Mrs. S. L. Anderson and Mr. Jack Lane. Among those present were Dr. and Mrs. Mann.

Last Wednesday afternoon, Aug. 22, a good picnic was held on the mesa above the Fort. It was truly an old-fashioned affair (with lots of pretty girls!)

One of the most brilliant social events of the season was the occasion of the birthday of Captain Thos. F. Drummond, on Aug. 15, in License Row. A long table, bulging under an abundance of home-made delicacies of all varieties, was set on the lawn amid the bewitching fragrance emanating from gladioli, sweet peas and American beauties, an array of feminine pulchritude—beauty galore!

Capt. Drummond was all smiles—who would not have been? Many distinguished guests attended, among whom were Miss Helen Kinnan, Miss Fuller, Miss Epstein, Miss Murray, Dr. Stewart, Dr. and Mrs. Nesbit, Dr. Lamb, and of course, all of the residents of "License Row."

### Card of Thanks

We wish to thank the many friends for their assistance and loving kindness during the illness and after the death of our father, Martin May. Also for the beautiful flowers at the funeral service.

Jesse and Blaine May.

## Carrizozo-Fort Stanton Return Game Next Sunday

There will be a return game of baseball next Sunday at the local grounds, between Carrizozo and Fort Stanton teams. A fast game is predicted, and the public should turn out in encouragement of the sport.

## Entertainers Make Good

The Carrizozo Entertainers gave a splendid entertainment last night at the Crystal Theatre to a crowded house. Every one on the program was roundly applauded. On the whole, the affair was highly successful. Karma Deane's effective work in drilling the young ladies proved her to be a teacher of extraordinary ability. Her dancing was artistic and graceful as also was the dance performed by the six young ladies whom she trained. Others on the program, collectively, are deserving of much credit and we regret the want of space for individual mention.

### Ladies' Aid Society

The above mentioned society of the M. E. church will meet at the home of Mrs. Roy Skinner on the afternoon of Tuesday, Aug. 28, and the usual good attendance should be increased. Ladies, not members of the society are cordially invited to attend.

On the afternoon of Saturday, Sept. 1, the Ladies will serve ice cream, cake and sherbet in the store room next to the Lincoln State Bank. Here will be a chance to assist a good cause, besides getting excellent service for your money.

### At the Saunders Home

H. S. Jones, representative of the E. J. Wilkins Co., manufacturers of leather goods, of Gloversville, N. Y., is here for a week's visit with the D. A. Saunders family. Mrs. Jones, who is a niece of Mrs. Saunders, has been a guest of her aunt for a short time, awaiting the arrival of her husband who is on his western trip. Mr. Jones will make the remaining portion of this state and a part of Texas, after which he will go into Arizona. Mrs. Jones will return to their home in Spokane, Wash., about Sept. 1st.

### Hotel Arrivals

Arrivals at the Carrizozo Eating House for the past week were: W. J. Millan, S. O. Morgan, J. H. Clements, Joe Ezor-mask, J. W. Chambers and wife, Roswell; R. K. Pickett, Amarillo; J. P. Bengard and wife, Valley Ranch; C. W. Sanders, C. B. Waringe, T. B. Meisenheimer, Geo. Elam, Albuquerque; Mrs. Eva Coldren, T. A. Dolan, Water Canyon; R. D. Jones, Las Vegas; T. A. Robinson, Dallas; M. E. Coleman, Los Angeles; A. W. Oldham, Oklahoma City; A. E. Slicker, Dr. W. F. Stakes, Central, Texas; J. B. Morrison, Hominy, Okla.; C. J. Weir, Sapulpa; S. R. Carter, Ft. Worth; B. C. Evans, Cherokee; H. E. Willies, Topeka; J. A. Whitmore, M. L. Hull, Tucumcari; Dr. O. Nesbit, Richard Chasey, Fort Stanton; T. H. Cunningham and wife, Aztec; Evelyn Miller, Taos, Justiano Baca, Santa Fe; Paul Thomson, Robt. Courtney, H. W. Ball, John Fortnon, Seattle; Carl D. Kelley, M. Mallory, Denver; Mrs. Mary Perry and son, Glencoe; Carl Hammond, Judge Jesse Mechem, Jr., C. S. Reid, Alamogordo; H. O. Savage, Timmie; Jeff Hightower, Clovis; J. T. Johnson, Three Rivers; Burl and Perry Sears, the Misses Clara Peppin and Julia Chaves, Captain; Henry Peppin, Denver; L. C. Boswell and wife, A. W. Hadley, M. W. Clarke, A. Paul, A. E. Lyle, T. H. Simmons, Henry F. Brewer, J. S. Gidding, J. Ellison, J. H. Williams and wife, H. C. Tomlick and wife, Jacob Koerner, Chas. McElly, A. W. Spillyard, C. E. Gains, M. J. Barr, El Paso.

## Will Teach in Maud Dingley-Matthews School of Music

Miss Lorena Sager left Wednesday for Denver, where she will teach in the Maud Dingley-Matthews School of Music. Miss Sager will be sadly missed by lovers of real music in Carrizozo. At all entertainments of a community nature, she has always pleasantly and gladly responded, giving the public the benefit of her natural, perfect, musical talent. The Maud Dingley-Matthews School of Music has made a wise selection in the engagement of Miss Sager, who will be a valuable asset to that institution.

### Educational News

(Louise H. Coe)  
Pupils will be required to enroll in all the County schools on Sept. 3; they will be given the names of books needed, have lessons assigned and be dismissed for the remainder of the day.

Parents will please have children vaccinated before school begins. Teachers are requested to allow no child to attend school who has not complied with the law regarding vaccinations.

Copies of the Compulsory Attendance Law are being posted in the Post Office and other public places in every school district in Lincoln county.

The County Board of Education met on Aug. 20-21, and awarded all school transportation contracts. The contract for the operation of the Jack's Peak school house in District No. 26 was awarded Frank A. English, to Frank A. English, Carrizozo.

Chalk, erasers, and some other school supplies are being bought by the County Board of Education in large quantities at wholesale prices and will be distributed to each teacher in the County schools.

According to law, no substitute teacher can be employed in any school unless he possesses a New Mexico State Certificate.

I have on hand a few copies of the New Mexico School Code, in both Spanish and English which can be had by calling at the office of the County Superintendent of Schools.

The Executive Committee of the Lincoln County Teachers' Association will meet soon and fix the date and arrange the program of the next meeting which will be held some time in October.

## James Cooper Undergoes Operation

James Cooper was taken to Dr. Johnson's hospital on Sunday morning, suffering with abscess of the stomach, and an operation performed by the above named physician, assisted by Dr. Nesbit, of Ft. Stanton.

The operation, which was a difficult one, was successfully performed and the patient was resting as easy as could be expected at last reports.

Mrs. Albert Ziegler left Monday for Seattle, Wash., where she will visit her daughter, Mrs. Chas. Coplin, for about a month. She will also meet her other daughter, Mrs. Gutznacht, of Chicago, who will be at Seattle to visit her sister for the same length of time.

## Nogal News

Aug. 21, 1923

The rains of the past week have been very beneficial to the farmers and stockmen and have been welcome by all, as they were so badly needed.

Mrs. O. C. Davis returned from Tucson, Ariz., where she had been visiting friends and relatives last Monday.

Lawson McDaniel, Mr. and Mrs. Shultz McDaniel and son Raymond of Melrose, N. M., spent the week-end with Mr. and Mrs. J. M. McDaniel.

Martin May, one of our pioneers, who has resided at this place for many years, passed away Wednesday, Aug. 15, at 6 p. m. He had been ill for about one week.

Miss Dessie McDaniel, brother Homer, and family are expected home soon from their visit to various places in Arkansas, and Oklahoma, where they have been visiting relatives and friends for the past three weeks. During Miss Dessie's absence, (who is an efficient postmistress) Miss Velma Davis is taking care of the postoffice.

### The Lincoln Baptist Association

This Association consists of the following churches: Alamogordo, Capitan, Cloudero, Carrizozo, Mayhill, Mountain Park, Pinon, Tularosa and Weed.

There were messengers from these churches together with the general force from the state board that took part in the work of this body.

Miss Aretta Beswick, Secretary of the Women's Missionary Union did her share in making the Association a success. Rev. Geo. Eallam, Secretary of the Baptist Young People's Union, was present and delivered a splendid address on his work. Rev. H. F. Aulick, Enlistment and Stewardship Secretary, brought forward several informing and inspiring addresses on the work he represents. Rev. C. W. Stumph, Corresponding Secretary of the Baptist Convention, presented the facts and figures showing how Baptists had almost doubled in four years in New Mexico, also calling attention to the fact that we have an open field of opportunity like as never before, and declaring this makes our responsibility the more weighty. A. L. Maddox, Educational Evangelist of Montezuma College, showed how this school is getting hold of the hearts of the people, how it is needed to advance New Mexico in Religion, Morals and Education. All told, this was a very successful association.

The local congregation certainly did entertain in a wholesome way, giving their visitors hearty reception into their homes.

Mr. and Mrs. A. J. Gilmore, parents of Mrs. Paul Mayer, were here for two days of the past week, attending the Baptist convention. They returned to Tularosa on Wednesday, accompanied by Mrs. Mayer, who will visit with her parents for a week.

Geo. L. Ulrick, member of the State Tax Commission, is attending a meeting of that body in Santa Fe this week.

## Airplanes Link Coast Cities In 29 Hours

Omaha, Aug. 23.—Postal officials in charge of the 28-hour experimental air mail service from coast to coast tonight were jubilant over the records established in the first 36 hours' operation.

Second Assistant Postmaster General Paul Henderson made the following statement: "From the utilization of night flights between Cheyenne and Chicago, the continent has been traversed by air mail plane in 29 hours and 14 minutes eastbound, San Francisco to New York, and in 34 hours and 24 minutes westbound, New York to San Francisco.

"There is only one through trans-continental train each way daily. Its schedule run is 91 hours, but most of the regular mail between the Atlantic and Pacific oceans requires from 96 to 100 hours for transportation by rail.

"The first air mail night flying experiment therefore has shrunk the transportation time across the United States to less than one-third what it formerly was. Our aim is 28 hours west to east, due to favoring winds, and 30 hours east to west.

"We expect to reach the mark before the end of the week."

### Joined the Invisible Innumerable Throng

Last Saturday morning about 10 o'clock, Dr. Guido Ranniger of Oscuro, aged 75, charter member of Carrizozo Lodge No. 41 A. F. & A. M., of this place, died at the Masonic Hospital in El Paso following an operation for an ailment which had caused him much annoyance and suffering of late.

Dr. Ranniger came to this country 50 years ago from Germany. After graduating from the Rush Medical College at Chicago, he practiced in the city for more than 20 years after which he came to New Mexico, locating at Oscuro, where he resided and practiced until his death.

The funeral services were held on Monday at the Peak-Hagedorn chapel under the auspices of Five Points Lodge No. 1137, A. F. & A. M. of El Paso, the local fraternity administering the sacred rites for Carrizozo Lodge, as is customary in Masonic circles and interment was made in the Masonic plot in Concordia cemetery. He is survived by his wife and one daughter, Mrs. Chas. West of Batavia, Ill., who with her husband Dr. West and two children, were present at the funeral.

Dr. Ranniger had lived in this community so long that he was well known to most of our people and his many friends, especially those of the Masonic household, will sadly miss him. His wise council and fondness for the preference for others, together with his extreme good nature and sound thought at his advanced age were strong characteristics of this eminent gentleman. To the surviving relatives, the sympathy of the community is extended.

Mrs. G. M. Hughes is very ill this week, but an improvement is apparent.

Miss Cora Crews of New York City, who is visiting her parents, Judge and Mrs. Seth F. Crews of Oscuro, was a Carrizozo visitor on Monday.

TWO-PIECE OUTFITS; ON CORRECT CORSETTING

WHEN in the course of fashion events it becomes necessary to declare one's independence of newer modes in order to retain a style that is becoming, comfortable and altogether charming, the designer may well consider those waist-and-skirt, or blouse-and-skirt combinations that are now so popular, and apparently are destined to play a considerable part in later fashions. Certainly these outfits provide a common-sense answer to the desired qualities of simplicity, charm and comfort in summer costumes, and

TWO DISTINCT VARIATIONS OF THE MODE

they permit so many individual treatments that they do not become monotonous. The two outfits shown here represent two distinct variations of this mode. The all-white costume at the left is made in the simple slip-over pattern, with round neck and perfectly plain waist, that extends over the plaited skirt. It is finished at the waist with a belt of the material. A monogram is embroidered below the pocket. Chinese embroideries provide the inspiration for the all-over design shown on the blouse at the right. The pattern is worked out in jade green and light blue against a background of white crepe-de-chino. The straight plaited skirt is of green crepe-de-chino

in the least, they are cool, and elastic, so that they give to the play of muscles while they support the figure correctly.

Cotton and silk brocade, surgical webbing and elastic are the mediums used by corset makers mainly. Corsets for special purposes, as well as regulation styles, are turned out by the manufacturer. For sports and athletic requirements there is the corset and there are girdles of various sorts.

Both the front and back-face corsets have their devotees, with back-lace outnumbering the front-lace fans somewhat. With the modern corset it is necessary to wear a brassiere, and these are made in considerable variety

THE LOW-TOP CORSET

edged with two bands of white. The collar and short sleeves are finished in the same shade of green as that in the skirt.

Hats and accessories are chosen with the idea of being in complete harmony with the costume. The young lady in white has a parasol covered with ribbon petals and wears a close-fitting millan hat trimmed with two large ribbon rosettes posed at the front. The hat at the right is of white crepe de chine trimmed with a band of the same material edged with French knots of green silk.

Whoever doubts the progress of women in artistic sense, and in good common sense, has only to study the history of corsets for the last decade or so. Women have grown discriminating, exacting and sensible in their demands of corset makers and corset making has more than kept pace with them. Their needs are ant-

icipated and provided for. Corsets now must be shapely, comfortable and sanitary—made so that they can be kept clean—and they must add to the comeliness of the figure, without hampering or injuring it. Gradually the low-top corset, like that shown in the illustration, has replaced the old-style model, which extended above the waistline to the bust. The low-top corsets or girdles are in general demand and have everything to recommend them—they do not interfere with one's breathing apparatus

A string of 15 1/2 inch casing is being set in the well of the Spaulding Dome Oil Company, near Fort Sumner, and drilling will soon be resumed. A complete oil burning plant is being installed at the well site.

G. M. Meyers of Whitesboro, had an eye removed at the DeMoss hospital in Lordsburg, as the result of an injury received while digging a well. As he was looking up a stone fell, striking the pupil of the eye.

Julia B. Cottrell

28-1014 Western Newspaper Union

New Mexico State Items

A 200,000 gallon septic tank has been completed by the city of Gallup at the cost of over \$16,000. The tank is one of the largest in the state and suitable for a city of 15,000 people.

Reports of the county agent of San Juan county, state that large quantities of fruit in all parts of the county are rotting. It is said this is due to the lack of proper transportation facilities.

Through the efforts of the Gallup Kiwanis Club, the city will soon have one of the finest play grounds in the state. The site under consideration is at Fort Wingate where thousands of acres are to be made into a park.

An auto stage line has been instituted between Raton and Las Vegas and daily trips will be made each way during the rest of the summer. The cars will leave both cities at 8 in the morning, the trip taking about five hours.

In spite of the fact that Walter Martin, of the Estancia valley, has hauled over 200 barrels of water this summer for the orchard of his farm, all the trees are reported dead. The orchard was planted in 1908 and was one of the best in the valley.

The directors of the northern New Mexico Fair Association, held a meeting at Raton recently to go over the plans for the big fair which is to be held this fall. If the present program is carried out the fair will be bigger and better than ever before.

At big meeting of the farmers and business men, held in Artesia, a new corporation was formed with a capital stock of \$20,000, to erect a new cotton gin in the city. The new building will be started as soon as the materials can be placed on the ground and the plant will be in operation in time to handle the fall crop.

Another big vein of silver ore has been uncovered at the 100 foot level in the Co-operative mine north of Lordsburg, which it is said will run 100 ounces of silver to the ton. Over \$35,000 worth of ore has been shipped from the mine this year and with the new find it is believed that this will soon be developed into one of the biggest silver propositions in the state.

Contractor John Sundt, of the M. M. Sundt company, announced that the exterior of the New Meadows hotel at Las Vegas has been completed. With the completion of the stucco work the entire hostelry is practically completed, the total time for the construction being about one year. The Meadows' new ranks as one of the finest hotels of the kind in the southwest.

Nearly 12,000 high grade calves are being offered for sale by the cattlemen of the state, through the Cattle and Horse Growers' Association, and the listing has been almost completed. Out of this number it is said that about 80 per cent are Herefords, either pure breeds or strong strains. Most of the stock is to be ready for delivery about the middle of October and there is every indication that many buyers from all parts of the west will be interested in the lots that will be offered.

One of the most enthusiastic good road meetings ever held in the state occurred in Springer recently, when the Texas-New Mexico Highway Association met for a two days' session. Many delegates were present from all parts of New Mexico and the western part of Texas. President T. E. Mitchell, presiding. At the close of the meeting a big banquet was given for the delegates by the business men of Springer and a dance was held at the Pastime theater, which was one of the most brilliant social affairs of the season.

A meeting of the board of directors of the Cowboys' Reunion Association was held in Las Vegas recently for the election of the officers for the year of 1924. Those elected were Jim Shoemaker, W. A. Naylor, William Springer, C. W. Jackson, A. J. Wilson, Harry Johnson, Brita Bagley, Perry Brito, Walter B. Schellberger, Burton Brown and R. W. Currie. All of these men have been active workers and promoters of the Reunion, several of them being responsible for the establishment of this wild west show, which has attracted people from many parts of the United States.

M. E. Kirk, president of the Indian Ceremonial Association, believes that at least 10,000 Indians will be in Gallup for the big dance which is to be held September 13 to 15. Besides the vast throngs from the nearby reservations, Mr. Kirk believes that hundreds will come from the various pueblos in all parts of the state. Mr. Kirk has toured most of the state during the past month and says that the governor of all the pueblos will send dances to the big ceremonial, which promises to be the largest of the kind ever held in New Mexico.

MANY ACCESSORIES FOR BEACH APPAREL

Capes, Kerchiefs to Wrap About Head, Caps, Bonnets and Bags.

A kerchief is the prized possession of every bather, for it can be wrapped about the head, spread over the shoulders or tied about the waist—in fact, it can be used in numerous ways to enhance the beauty of the costume as a whole, writes a fashion correspondent in the New York Times. When used for a bathing hat it is tied snugly over the forehead and the hair, with only stray wisps of hair allowed to show underneath. Then the ends, stiff though they may be, are allowed to shoot off in any direction back of one ear, giving to the headpiece a sort of abandon entirely suited to its character.

Caps of rubber are not to be despised, for they come in the most gorgeous of colorings and are particularly charming when worn along with black or dark blue or brown bathing suits. In this way, the mass of the decorative quality of the suit is concentrated on the headwear—a most satisfactory arrangement.

Beach bags are a necessity for carrying specific articles, and they add a decorative touch to the appearance of the costume, so they are considered a requisite of the modern bathing outfit. Those who like the latest word in fashion are carrying bags made in the shape of interesting looking French dolls. Those who have plainer tastes are confining themselves to square bags made of cretonne or oilecloth, though they insist upon having these done in bright and glowing colors. The dolls have ruffled skirts which open conspicuously to disclose the depths of a spacious bag meant to carry the many things that a woman needs at any hour of any day, no matter where she may be spending her time.

Sunbonnets on the beach are a fad just now. The girls don them when they come out of the water or before they go in—at any time, in fact, when they are lolling about in the sun. The bonnets keep the frockles and sunburn away from the face, and this is

much to be desired, as these extra marks of the sun and summer do not help toward the furtherance of beauty. Sunbonnets are made in decorative cretonnes with plain linings that turn back just over the face and form a becoming background for the features. They tie under the chin in regular sunbonnet manner.

Capes are important items in the bathing outfit. They are short or long, the shorter ones being used merely to keep the least degree of sunburn

Rubberized Plaited Cape Protects Shoulders From Sunburn.

The pink crepe or satin underslip with the accordion plaited skirt is a useful addition to any wardrobe. When the summer is over it still has possibilities as a negligee foundation when combined with a jacket of lace or georgette.

The sleeves in some of the newer wraps have a slightly lower armhole, dropped sufficiently to round the shoulder. There is a tendency toward more fullness at the top than at the bottom of the coat.

Late Fashion Notes for Women Who Care

It is only a short time since the scallop-shaped pearl bead made its appearance, and yet this odd ornament is seen today on every sort of gown. Row upon row of these lovely, lustrous beads are used for evening frocks and also to form deep borders on evening cloaks.

An unusual headpiece meant to be worn at a summer evening dance is made up of Egyptian fans—of diminutive size—arranged like a crown. Each fan is headed with colored stones and crystals.

A glance at any fashionable gathering today will prove the popularity of two types of hat. One is the close fitting poke bonnet, so vastly becoming to the right sort of profile and so ugly with the wrong sort of nose. The other is the wide hat with a semi-transparent brim.

Even when shoes are black today, they have fascinating insets of bright red and green. For dancing, the buckle has been somewhat edged out by the tiny skirt of stuffed flowers surrounding a center of stones. Black satin sandals with heels of bright hue have tassels to match the heels.

Plaid and wide stripes are used for travel coats. Very long tassels of silk or jewels are frequently seen on the most expensive frocks. Sometimes the fringe of the tassels is long enough to reach from waistline to hemline.

With the return of the tailored suit is the return of the buttonhole bouquet of colorful French flowers and the courage of violets at the stage capsule. Any of these soften the se-

verity of effect and add a subtle touch of femininity.

The plaited skirt may be supplemented, if the style suits you, with a plaited blouse. Of crepe de chine in white or sand, the blouse is a triumph of plaiting except for the plain and wide neckband and outside straps.

The large hat for summer wear with flower trim, such as is here shown, is quite the rage. Made up of yellow and sand it is a marked favorite.

The large hat for summer wear with flower trim, such as is here shown, is quite the rage. Made up of yellow and sand it is a marked favorite.

Yellow and Sand Hat With Flower Trimming

Ribbon Ornaments to Decorate Voile Suit

The vogue for jaquettes has gone through the phases of woolen, silk and voile. With the advent of the voile jaquette comes the voile suit having a loose-fitting adaptation of the jaquette, which is really nothing but a short loose coat opening in the center front. Down this opening goes a row of small trim-tailored bows of ribbon, and around the bottom of the coat, around the cuffs and forming a collar about the neck may appear six rows of scallop-edged ribbon. The front and back panels of the skirt likewise bear the six rows of scalloped ribbon. A similar treatment may be made with wool pongee. Two of the fashionable new shades of tan and brown are pleasingly combined in a costume of this type.

Make Filet Negligee With Trim of Ribbon

An unusual negligee is made of coarse filet lace over colors with ribbon of many colors laced through the meshes in border patterns.

This is particularly effective if done in narrow Dolly Varden ribbons, many different ribbons being used and each having as its foundation color a distinctive pastel shade. Thus pinks, blues, orchids, yellows, greens and violets appear in pleasing combination. Picot-edged or gilt-edged ribbon is especially desirable, as it adds to the flower-garden-and-sunshine effect of the embroidery. A wider Dolly Varden ribbon may be fastened about a low wide neckline and tied in a large bow on the left shoulder.

Useful Article

The pink crepe or satin underslip with the accordion plaited skirt is a useful addition to any wardrobe. When the summer is over it still has possibilities as a negligee foundation when combined with a jacket of lace or georgette.

Percales Now Show King Tut Influence

Our old friends the percales have gone through a metamorphosis. We know how durable they have always been and how fresh a little soap and water has been able to keep them. These characteristics they have retained. The change has come through the colors used. Up to now these have been confined to black, blue and red. But behold! even the conservative percales have not escaped the influence of King Tut. They are now a mass of all the soft colors of Egypt and of the Orient. Formerly this material was suited to the making of aprons, shirts and simple House dresses only. But now one may add it to the list of those used for household decorative purposes. Bathroom and kitchen windows will certainly look better for it.

Plaited Blouse

The plaited blouse may be supplemented, if the style suits you, with a plaited blouse. Of crepe de chine in white or sand, the blouse is a triumph of plaiting except for the plain and wide neckband and outside straps.

Aspirin

Say "Bayer" and insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for Colds, Toothache, Earache, Neuralgia, Headache, Lumbago, Rheumatism, Pain, Pain.

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Drugists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monacettellcaidester of Salicylicacid.—Advertisement.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription. Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Overnight by Christopher. "I can't get any appropriation for my voyages," complained Christopher Columbus. "You're going about it in the wrong way," confided the accomplished courtier. "Intimate that you will start with a trial trip and a pleasant time will be had by all."

BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years on a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics.—Prover directions are on each package. Physicians recommend it. The genuine bears signature of

Dr. J. C. Fletcher

Won't Change Woman's Dress. Scientist—Some day the earth will become so cold that man will not be able to live upon it.

Fozzleton—Yes, but I suppose the women will go on dressing just about the same as they do now.—New Bedford Evening Standard.

Cuticura for Sore Hands. Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

Matrimonial Amenities. Hub—No man with any sense would allow you to carry on the way you do. Wife—Oh, indeed! And how do you know what a man with sense would do?

The pleasure a woman gets out of a good cry has nothing in common with her sense of humor.

BY THE FLICKERING FLAMES

Pretty Word Painting of a Quiet Evening in the Sanctuary of the Home.

It is evening. Supper is over. We have left the small, cold dining room. We have come back to the sitting room where there is a fire. All is as usual. I am sitting at my writing table, which is placed across a corner so that I am behind it, as it were, and facing the room.

All the paraphernalia, in fact, of an extremely occupied man. My wife, with her little boy on her lap, is in a low chair before the fire. She is about to put him to bed before she clears away the dishes and piles them up in the kitchen for the servant girl tomorrow morning.

Electricity Aids Fishermen

Are you an electrical fisherman? If not, all you need in order to class yourself in this category is the new artificial minnow, which is made luminous by electricity and resembles a wriggling worm when cast into the water.

Is Your Work Hard?

Is your work wearing you out? Are you tortured with aching backache—feel tired, weak and discouraged? Then look to your kidneys! Many occupations tend to weaken the kidneys.

A Colorado Case

J. W. Bolla, 11th St., Denver, Colo., says: "I could hardly bend over on account of the lameness and sharp cutting pains through my back and hips. My kidneys acted too often and I had to get up at night. There was a red, throbbing, aching, and smarting in the secretions. I used Doan's Kidney Pills and my kidneys became strong."

DOAN'S KIDNEY PILLS

The Light of Western Stars

A ROMANCE by ZANE GREY

Copyright by Harper and Brothers

"BUT YOU'RE NO THOROUGHbred, MAJESTY HAMMOND, ADIOS!"

For a moment Madeline sat on her horse with shut eyes. She decided the light. "Now you can't say you've never been kissed," Stewart said. His voice seemed a long way off. "But that was coming to you, so be game. Here!"

She felt something hard and cold and metallic thrust into her hand. He made her fingers close over it, hold it. The feel of the thing revived her. She opened her eyes. Stewart had given her his gun. He stood with his broad breast against her knee, and she looked up to see that old mocking smile on his face.

"Go ahead. Throw my gun on me! Be a thoroughbred!" Madeline did not yet grasp his meaning. "You can put me down in that quiet place on the hill—beside Monty Price."

Madeline dropped the gun with a shuddering cry of horror. The sense of his words, the memory of Monty, the certainty that she would kill Stewart if she held the gun an instant longer, tortured the self-accusing cry from her.

Stewart stopped to pick up the weapon. "You might have saved me a h-l of a lot of trouble," he said, with another flash of the mocking smile. "You're beautiful and sweet and proud, but you're no thoroughbred! Majesty Hammond, adios!"

A bit tempestuous? Well, rather, but it's only one dramatic situation in a red-blooded story of the cattle range near the Mexican border. There are others aplenty. Madeline Hammond owns "Her Majesty's Rancho" and Stewart is her foreman. She is a transplanted Eastern girl who has come to love life under "The Light of the Western Stars."

CHAPTER I

A Gentleman of the Range.

When Madeline Hammond stepped from the train at El Cajon, New Mexico, it was nearly midnight, and her first impression was of a huge dark space of cool, windy emptiness, strange and silent, stretching away under great blinking white stars.

"Miss, there's no one to meet you," said the conductor anxiously. "I wired my brother," she replied. "He will be here presently. But, if he should not come—surely I can find a hotel!"

"There's lodgings to be had. If you'll excuse me—this is no place for a lady like you to be alone at night. It's a rough little town—mostly Mexicans, miners, cowboys. And they carouse a lot. Besides, the revolution across the border has stirred up some excitement along the line. Miss, I guess it's safe enough, if you—"

"Thank you. I am not in the least afraid." As the train started to glide away Miss Hammond walked toward the dimly lighted station. She entered the empty waiting-room. An oil-lamp gave out a thick yellow light. A telegraph instrument clicked faintly.

Madeline Hammond crossed the waiting-room to a window and, holding aside her veil, looked out. At first she could discern only a few dim lights, and these blurred in her sight. As her eyes grew accustomed to the darkness she saw a superbly built horse standing near the window. Beyond was a bare square. Through a hole in the window-glass came a cool breeze, and on it breathed a sound that struck coarsely upon her ear—a discordant mingling of laughter and shout, and the tramp of boots to the hard music of a phonograph.

"Western revelry," mused Miss Hammond, as she left the window. "Now, what to do? I'll wait here. Perhaps the station agent will return soon, or Alfred will come for me."

As she sat down to wait she reviewed the causes which accounted for the remarkable situation in which she found herself. That Madeline Hammond should be alone, at a late hour, in a dingy little western railroad station, was indeed extraordinary.

The close of her debutante year had been marred by the only unhappy experience of her life—the disgrace of her brother and his leaving home. She dated the beginning of a certain thoughtful habit of mind from that time, and a dissatisfaction with the brilliant life society offered her.

There had been months of unrest, of curiously painful wonderment that position, her wealth, her popularity no longer sufficed. She believed she had lived through the dreams and fancies of a girl to become a woman of the world. And she had gone on as before, a part of the glittering show, but no longer blind to the truth—that there was nothing in her luxurious life to make it significant. And at last she knew what she needed—to be alone, to brood for long hours, to gaze out on lonely, silent, star-making stretch, to watch the stars to race her soul, to find her rest.

Then it was she had first thought of visiting the brother who had gone west to cast his fortune with the cattlemen. As it happened, she had friends who were on the eve of starting for California, and she made a quick decision to travel with them.

When she calmly announced her intention of going out west her mother had exclaimed in consternation; and her father, surprised into pathetic memory of the black sheep of the family, had stared at her with glittering eyes. "Why, Madeline! You want to see that wild boy!" Then he had reverted to the anger he still felt for his wayward son, and he had forbidden Madeline to go. Her mother forgot her haughty poise and dignity. Madeline stood her ground, even to reminding them that she was twenty-four and her own mistress. In the end she had prevailed.

Madeline had planned to arrive in El Cajon on October 3, her brother's birthday, and she had succeeded, though her arrival occurred at the twenty-fourth hour. Her train had been several hours late. Whether or not the message had reached Alfred's hands she had no means of telling, and the thing which concerned her now was the fact that she had arrived and he was not there to meet her.

As Madeline sat waiting in the yellow gloom she heard the faint, intermittent click of the telegraph-instrument, the low hum of wires, the occasional stamp of an iron-shod hoof, and a distant vacant laugh rising above the sounds of the dance. She became conscious of a slight quickening of her pulse. Madeline had only a limited knowledge of the West. Like all of her class, she had traveled Europe and had neglected America. She had been astounded at the interminable distance she had traveled, and if there had been anything attractive to look at in all that journey she had passed it in the night.

A faint sound like the ruffling of thin chains diverted Madeline's attention. At first she imagined it was made by the telegraph wires. Then she heard a step. The door swung wide; a tall man entered, and with him came the clinking rattle. She realized then that the sound came from his spurs.

"Will you please direct me to a hotel?" asked Madeline, rising.

The cowboy removed his sombrero, and the sweep he made with it and the accompanying bow, despite their exaggeration, had a kind of rude grace. He took two long strides toward her.

"Lady, are you married?"

"In the past Miss Hammond's sense of humor had often helped her to overlook critical exactions natural to her breeding. She kept silence, and she imagined it was just as well that her veil hid her face at the moment. She had been prepared to find cowboys rather striking, and she had been warned not to laugh at them."

This gentleman of the range deliberately reached down and took up her left hand. Before she recovered from her start of amazement he had stripped off her glove.

"Fine spark, but no wedding ring," he drawled. "Lady, I'm glad to see you're not married."

He released her hand and returned the glove.

women. Bad business for hotels to have married women. Keeps the boys away. You see, this isn't Reno."

Then he laughed rather boyishly, and from that, and the way he slouched on his sombrero, Madeline realized he was half drunk. As she instinctively recoiled she, not only gave him a keener glance, but stepped into a position where a better light shone on his face. It was like red bronze, bold, raw, sharp. Like that of all women whose beauty and charm had brought them much before the world, Miss Hammond's intuition had been developed until she had a delicate and exquisitely sensitive perception of the nature of men and of her effect upon them.

This crude cowboy, under the influence of drink, had affronted her; nevertheless, whatever was in his mind, he meant no insult.

"I shall be greatly obliged to you if you will show me to the hotel," she said.

"Lady, you wait here," he replied, slowly, as if his thought did not come swiftly. "I'll go fetch the porter."

She thanked him, and as he went out, closing the door, she sat down in considerable relief. It occurred to her that she should have mentioned her brother's name. Then she fell to wondering what living with such uncouth cowboys had done to Alfred Hammond, and her faith had scarcely survived the two years of silence.

Waiting there, she again found herself listening to the moan of the wind through the wires. Then Madeline heard a rapid pattering, low at first and growing louder, which presently she recognized as the galloping of horses.

She went to the window, thinking, hoping her brother had arrived. But as the clatter increased to a roar, shadows sped by—lean horses, flying manes and tails, sombreroed riders, all strange and wild in her sight. Recalling what the conductor had said, she was at some pains to quell her uneasiness. Then out of the gloom two figures appeared, one tall, the other slight. The cowboy entered, pulling a disheveled figure—that of a priest, a padre, whose mantle had manifestly been disarranged by the rude grasp of his captor. Plain it was that the padre was extremely terrified.

Madeline Hammond gazed in bewilderment at the little man, so pale and shaken, and a protest trembled upon her lips; but it was never uttered, for this half-drunk cowboy now appeared to be a cool, grim-smiling devil; and stretching out a long arm, he grasped her and swung her back to the bench.

"You stay there!" he ordered. His voice, though neither brutal nor harsh nor cruel, had the unaccountable effect of making her feel powerless to move. No man had ever before addressed her in such a tone. It was the woman in her that obeyed—not the personality of proud Madeline Hammond.

The padre lifted his clasped hands as if supplicating for his life, and began to speak hurriedly in Spanish. Madeline did not understand the language. The cowboy pulled out a huge gun and brandished it in the priest's face. Then he lowered it, apparently to point it at the priest's feet. There was a red flash, and then a thundering report that stunned Madeline. The room filled with smoke and the smell of powder. When she could see distinctly through the smoke she experienced a sensation of immeasurable relief that the cowboy had not shot the padre. But he was still waving the gun, and now appeared to be dragging his victim toward her. What possibly could be the drunken fool's intention? This must be, this surely was a cowboy trick. Madeline no sooner thought of it than she made certain her brother was introducing her to a wild West amusement. She could scarcely believe it, yet it must be true. Probably he stood just outside the door or window laughing at her embarrassment.

Anger checked her panic. She straightened up with what composure this surprise had left her and started for the door. But the cowboy barred her passage—grasped her arms. Then Madeline divined that her brother could not have any knowledge of this indignity. It was no trick. Poise, dignity, culture—all the acquired habits of character—fled before the instinct to fight. She was athletic. She fought. She struggled desperately. But he forced her back with hands of iron. She had never known a man could be so strong.

"What—do you—mean?" she panted.

"Dearie, ease up a little on the bridle," he replied, gaily. Madeline thought she must be dreaming. She could not think clearly. She not only saw this man, but also felt his powerful presence. And the shaking priest, the haze of blue smoke, the smell of powder—these were not unreal.

Then close before her eyes burst another blinding red flash, and close at her ears followed another report. Unable to stand, Madeline slipped down onto the bench. Her drifting faculties refused clearly to record

what transpired during the next few moments; presently, however, as her mind steeled somewhat, she heard, though as in a dream, the voice of the padre hurrying over strange words. It ceased, and then the cowboy's voice stirred her.

"Lady, say Si—Si. Say it—quick! Say it—Si!"

From sheer suggestion, a force irresistible at this moment when her will was clamped by panic, she spoke the word.

"And now, lady—so we can finish this properly—what's your name?"

Still obeying mechanically, she told him.

"What name?" he demanded. "Madeline Hammond. I am Alfred Hammond's sister."

He put his hand up and brushed at an imaginary something before his eyes. "You're not—Majesty Hammond?"

"How strange—stranger than anything that had ever happened to her before—was it to hear that name on the lips of this cowboy! It was a name by which she was familiarly known, though only those nearest and dearest to her had the privilege of using it. And now it revived her dulled faculties, and by an effort she regained control of herself.

"You are Majesty Hammond," and this time he affirmed wonderingly rather than questioned.

Madeline rose and faced him. "Yes, I am."

He slammed his gun back into its holster.

"Well, I reckon we won't go on with it, then."

"With what, sir? And why did you force me to say Si to this priest?"

"I reckon that was a way I took to show him you'd be willing to get married."

"Oh! . . . You—you! . . ." Words faltered here.

This appeared to galvanize the cowboy into action. He grasped the padre and led him toward the door, cursing

She Fought. She Struggled Desperately.

and threatening, no doubt enjoining secrecy. Then he pushed him across the threshold and stood there breathing hard and wrestling with himself.

"Here—wait—wait a minute, Miss Hammond," he said, huskily. "You could fall into worse company than mine—though I reckon you sure think not. I'm pretty drunk, but I'm—all right otherwise. Just wait—a minute."

She stood quivering and blazing with wrath, and watched this savage fight his drunkenness. Madeline saw the dark, damp hair lift from his brows as he held it up to the cool wind.

The cowboy turned and began to talk.

"You see—I was pretty drunk," he labored. "There was a fiesta—and a wedding, I do fool things when I'm drunk. I made a fool bet I'd marry the first girl who came to town. . . . If you hadn't worn that veil—the fellows were joshing me—and Ed Linton was getting married—and everybody always wants to gamble. . . . I must have been pretty drunk."

"Explanations are not necessary," she interrupted. "I am very tired—dressed. The hour is late. Have you the slightest idea what it means to be a gentleman?"

His bronzed face burned a flaming crimson.

"Is my brother here—in town tonight?" Madeline went on. "No. He's at his ranch."

"But I wired him."

"Like as not the message is over in his box at the P. O. He'll be in town tomorrow. He's shipping cattle for Stillwell."

"Meanwhile I must go to a hotel. Will you please—"

If he heard her last words he showed no evidence of it. A noise

outside had attracted his attention. Madeline listened. Low voices of men, the softer liquid tones of a woman, drifted in through the open door. They spoke in Spanish, and the voices grew louder. Then the woman's voice, hurried and broken, rising higher, was eloquent of vain appeal.

The cowboy's demeanor started Madeline into anticipation of something dark and dreadful. She was not deceived. From outside came the sound of a scuffle—a muffled shot, a groan, the thud of a falling body, a woman's low cry, and footsteps padding away in rapid retreat.

Madeline Hammond leaned weakly back in her seat, cold and sick, and for a moment her ears throbbled to the tramp of the dancers across the way and the rhythm of the cheap music. Then into the open door-place

flushed a girl's tragic face, lighted by dark eyes and framed by dusky hair. The girl reached a slim brown hand round the side of the door and held on as if to support herself.

"Senor—Gene!" she exclaimed; and breathless glad recognition made a sudden break in her terror.

"Bonita!" The cowboy leaped to her. "Girl! Are you hurt?"

"No, senor."

"He took hold of her. 'I heard—somebody got shot. Was it Danny?'"

"No, senor."

"Did Danny do the shooting? Tell me, girl."

"No, senor."

"I'm sure glad. I thought Danny was mixed up in that. He had Stillwell's money for the boys—I was afraid. . . . Say, Bonita, but you'll get in trouble. Who was with you? What did you do?"

"Senor—Gene—they Don Carlos vaqueros—they quarrel over me. I only dance a little, smile a little, and they quarrel. I beg they be good—watch out for Sheriff Howe. . . . and now Sheriff Howe put me in jail. I go frighten; he try make little love to Bonita once, and now he hate me like he hate Senor Gene."

"Pat Howe won't put you in jail. Take my horse and hit the Pelonillo trail. Bonita, promise to stay away from El Cajon."

"Si, Senor."

He led her outside. Madeline heard the horse snort and champ his bit. The cowboy spoke low; only a few words were intelligible—"stirrups. . . . wait. . . . out of town. . . . mountain. . . . trail. . . . now ride!"

A moment's silence ensued, and was broken by a pounding of hoofs, a pattering of gravel. Then Madeline saw a big, dark horse run into the wide swept scarf and hair, a little form low down in the saddle. The horse was outlined in black against the line of dim lights. There was something wild and splendid in his flight.

Directly the cowboy appeared again in the doorway.

"Miss Hammond, I reckon we want to rustle out of here. Been bad going-on. And there's a train due."

She hurried into the open air, not daring to look back or to either side. Her guide strode swiftly. She had almost to run to keep up with him.

Suddenly aware that she had been led beyond the line of houses, she spoke:

"Where are you taking me?"

"To Florence Kingsley," he replied. "Who is she?"

"I reckon she's your brother's best friend out here."

Madeline kept pace with the cowboy for a few moments longer, and then she stopped. It was as much from necessity to catch her breath as it was from recurring fear. The cowboy, missing her, came back the few intervening steps. Then he waited, still silent, looming beside her.

"It's so dark, so lonely," she faltered. "How do I know. . . . what warrant can you give me that you—that no harm will befall me if I go farther?"

"None, Miss Hammond, except that I've seen your face."

"I shall not tell my brother of your—your rudeness to me."

(TO BE CONTINUED.)

Shakespeare's Vocabulary Rivalled. Probably no living poet has a more extensive vocabulary than Gabriele d'Annunzio, who is to visit Paris in the spring of this year. "Most people," he once said, "use only 800 words. I employ 15,000, which I culled from different volumes, some taken from an old book on agriculture, some from an old translation of Ovid, others from Machiavelli's works. Old Italian authors are my daily bread."

Women Compared With Clocks. Women are like clocks. Some of them are fairly reliable with but little attention, while others need almost constant care, and it is not always the high-priced, jeweled ones that are most dependable. They may have pretty hands, pretty faces and pretty movements, but they are liable to get out of order, and when they do they are all very hard to regulate.—Oswell Linton French.

**Aliens Should Fit Citizenship**

Washington, Aug. 22, (Capital News Service). — Friends of restricted immigration and Americanization programs in the National Capital are pleased with the publicity given the ringing resolution of the Commonwealth Club of California, adopted after several years exhaustive investigation into the subjects covered therein. It says:

"Resolved, That it is the sense of this club that the immigration question should be determined with reference to citizenship and general welfare, and not by industrial needs only, and that immigration for the sake of a supply of cheap labor should be prohibited."

Speaking of the questions at issue, Henry Pratt Fairchild of New York University, said:

"The melting pot was sadly cracked by the detonations of the war. We are now freed from the shackles of traditions, from the economic obsessions of Adam Smith and the classical school of economists. That capital and wealth must be increased by production is one obsession. Consumption of wealth has been largely ignored as an economic factor in industry. Therein lies the fundamental fallacy of the 12-hour argument in industry."

"Who is demanding more imported labor? The industrialist who believes his life depends on constantly increasing production. He shouts vociferously for more cheap labor; more of the propertyless class to give him smooth sailing through the peak of production and the nation unemployment when the inevitable result comes. We have reached a stage in immigration where any shortage of labor is a shortage of the poor. China proves that mere excess of population does not bring wealth, nor would 1,000,000 additional foreigners enrich this country."

Mr and Mrs. Harry Comrey were here from their ranch near Capitan on Wednesday.

**True Americanism.**

To safeguard America first.  
To stabilize America first.  
To prosper America first.  
To think America first.  
To exalt America first.  
To live for and revere America  
first.

Call it the selfishness of national-  
ity if you will. I think it an  
inspiration to patriotic devotion.  
We may do more than prove  
exemplars to the world of endur-  
ing representative democracy  
where the Constitution and its  
liberties are unshaken. We may  
go on securely to the destined  
fulfillment and make a strong  
and generous nation's contribu-  
tion to human progress, force-  
ful in example, generous in con-  
tribution, helpful in all suffering  
and fearless in all conflicts.

Let the internationalist dream  
and the bolshevist destroy. God  
pity him "for whom no minstrel  
raptures swell." In the spirit  
of the republic we proclaim  
Americanism and acclaim Amer-  
ica.—Warren G. Harding, Janu-  
ary 8, 1923.

The Mutual Improvement Club  
will meet with Mrs. Geo. B. Bar-  
ber Thursday evening, Aug. 30.  
Important meeting. All mem-  
bers are urged to attend.

# Sentinels Along Our Coasts

AMERICAN SERVICE LIGHT STATION, N. Y.

**By ROBERT H. MOULTON**  
**A** STEAMER is tumbling on the storm-swept waters of the Atlantic off the coast of Long Island. Huge waves buffet the craft, which trembles from stem to stern under the terrific impact of the mountains of water catapulted against it. Inky clouds scurry overhead, no low that they seem almost to touch the tops of the masts, and a curtain of driving rain shuts off the view of the eager, straining eyes which seek to penetrate the darkness for some sight which will give the vessel's location.

Suddenly, from a distance, comes the shrill, long-drawn-out call of a siren. Eagerly the captain listens as the sound is repeated at regular intervals. Then his face brightens. It is a voice which he has often heard before and there is no mistaking it. Only the fog signal of the Sandy Hook East beacon gives that eight-second blast every minute. No now the captain knows exactly where he is, orders fly to the engine room, and the ship is headed toward safety.

There are more than six hundred such fog signals in use in the coastal waters of the United States. Not all are of the same type or use the same system in emitting their warnings. There are siren whistles and sirens; air whistles, siren whistles and horns. There are bell buoys operated by clockwork, electrical apparatus, engine, and by hand. And there are submarine bells operated by compressed air and by the sea itself. These signals, however, form only a small part of the elaborate system of aids to navigation which is under the direction of the United States Lighthouse Service. It is rather remarkable that this service, although one of the oldest and most important of all government departments, is very little known to the general public. This is probably due to the fact that the service is performed largely at sea where comparatively few people come into contact with it.

There is an office in Washington, known as the bureau of lighthouses, which is the executive center of the service. The service outside of Washington is divided into 10 lighthouse districts, each of which is under the charge of a lighthouse inspector. A lighthouse depot is conveniently located in each district for carrying on the local work in the matter of storing and distributing supplies and apparatus.

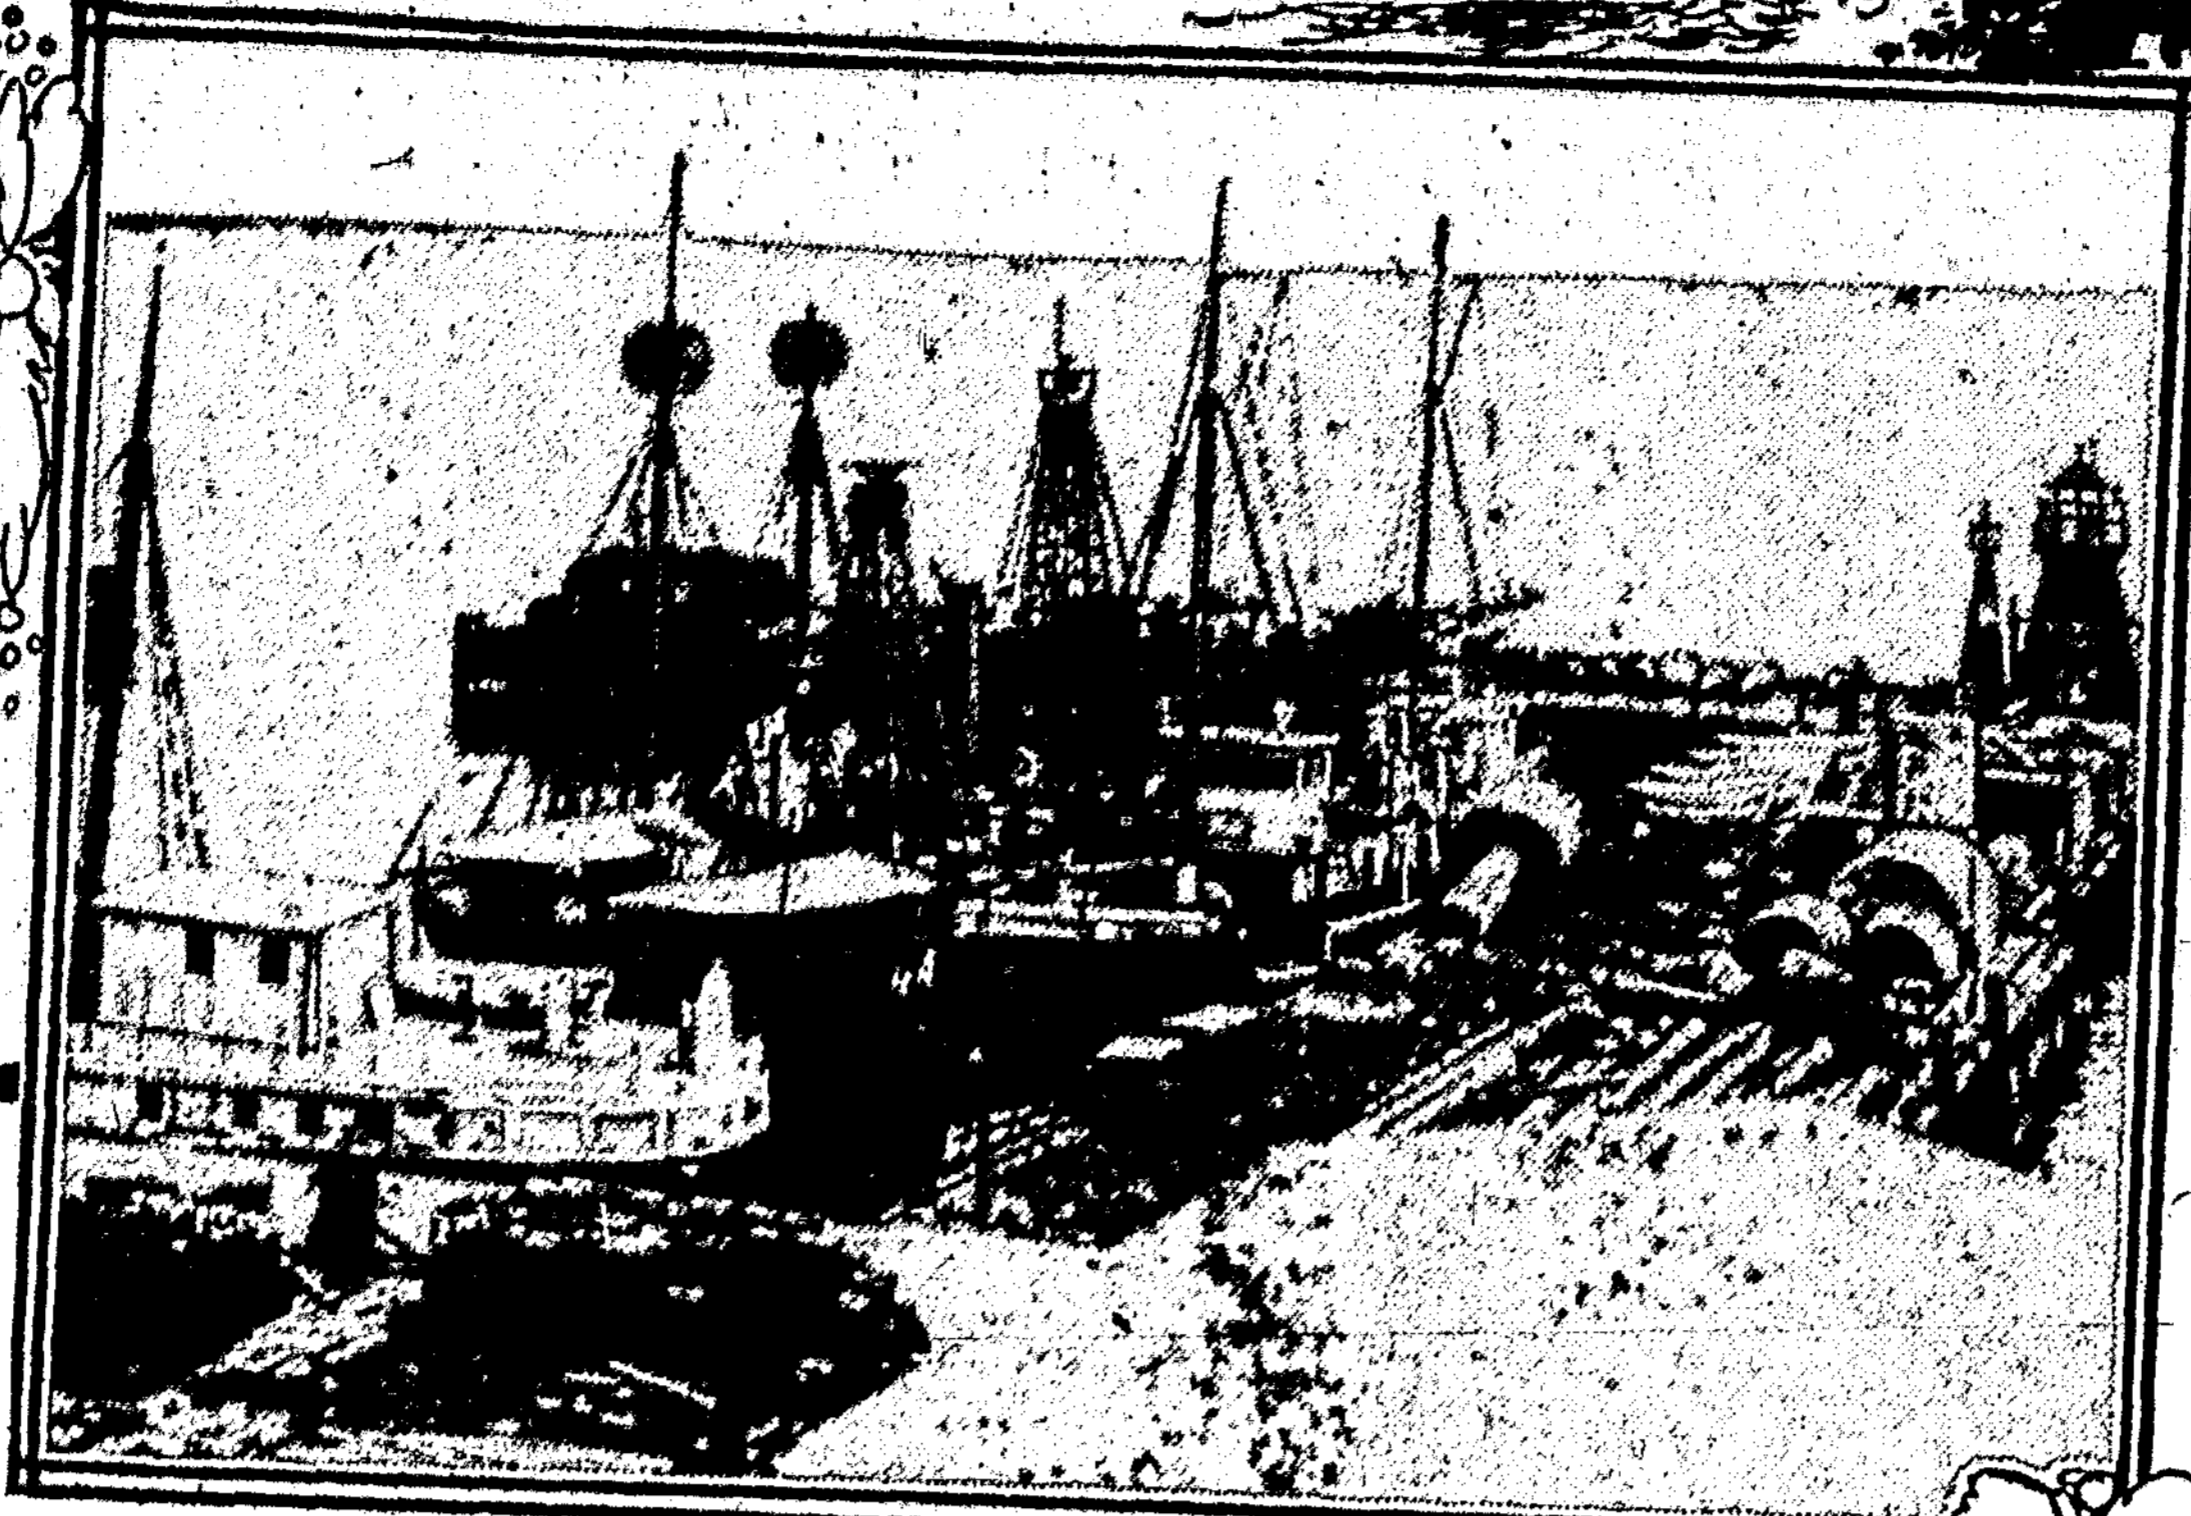

The aids to navigation in the United States today number more than 10,000, of which one-third are lighted aids and the others unlighted—such as fog signals, submarine signals, buoys and beacons. Of the lighted aids, about 800 are major lights, employing range lenses, reflectors and lens lanterns, and requiring the services of one or more keepers. These are the lighthouses. Light vessels are used as a rule to mark offshore dangers, or the approaches to harbors or channels where lighthouses would not be feasible or economical.

The type adopted in each case for lighthouse construction depends largely on the importance of the light and the foundation conditions. A common form frequently used for harbor or lake lights, is a combined tower and dwelling of timber or brick construction. Many lighthouses at the entrance to harbors are built on the end of breakwaters or piers, utilizing, as a rule, such structures as the foundation. In the case of lighthouses on submerged sites the engineering features are important and often present great difficulties both in design and construction.

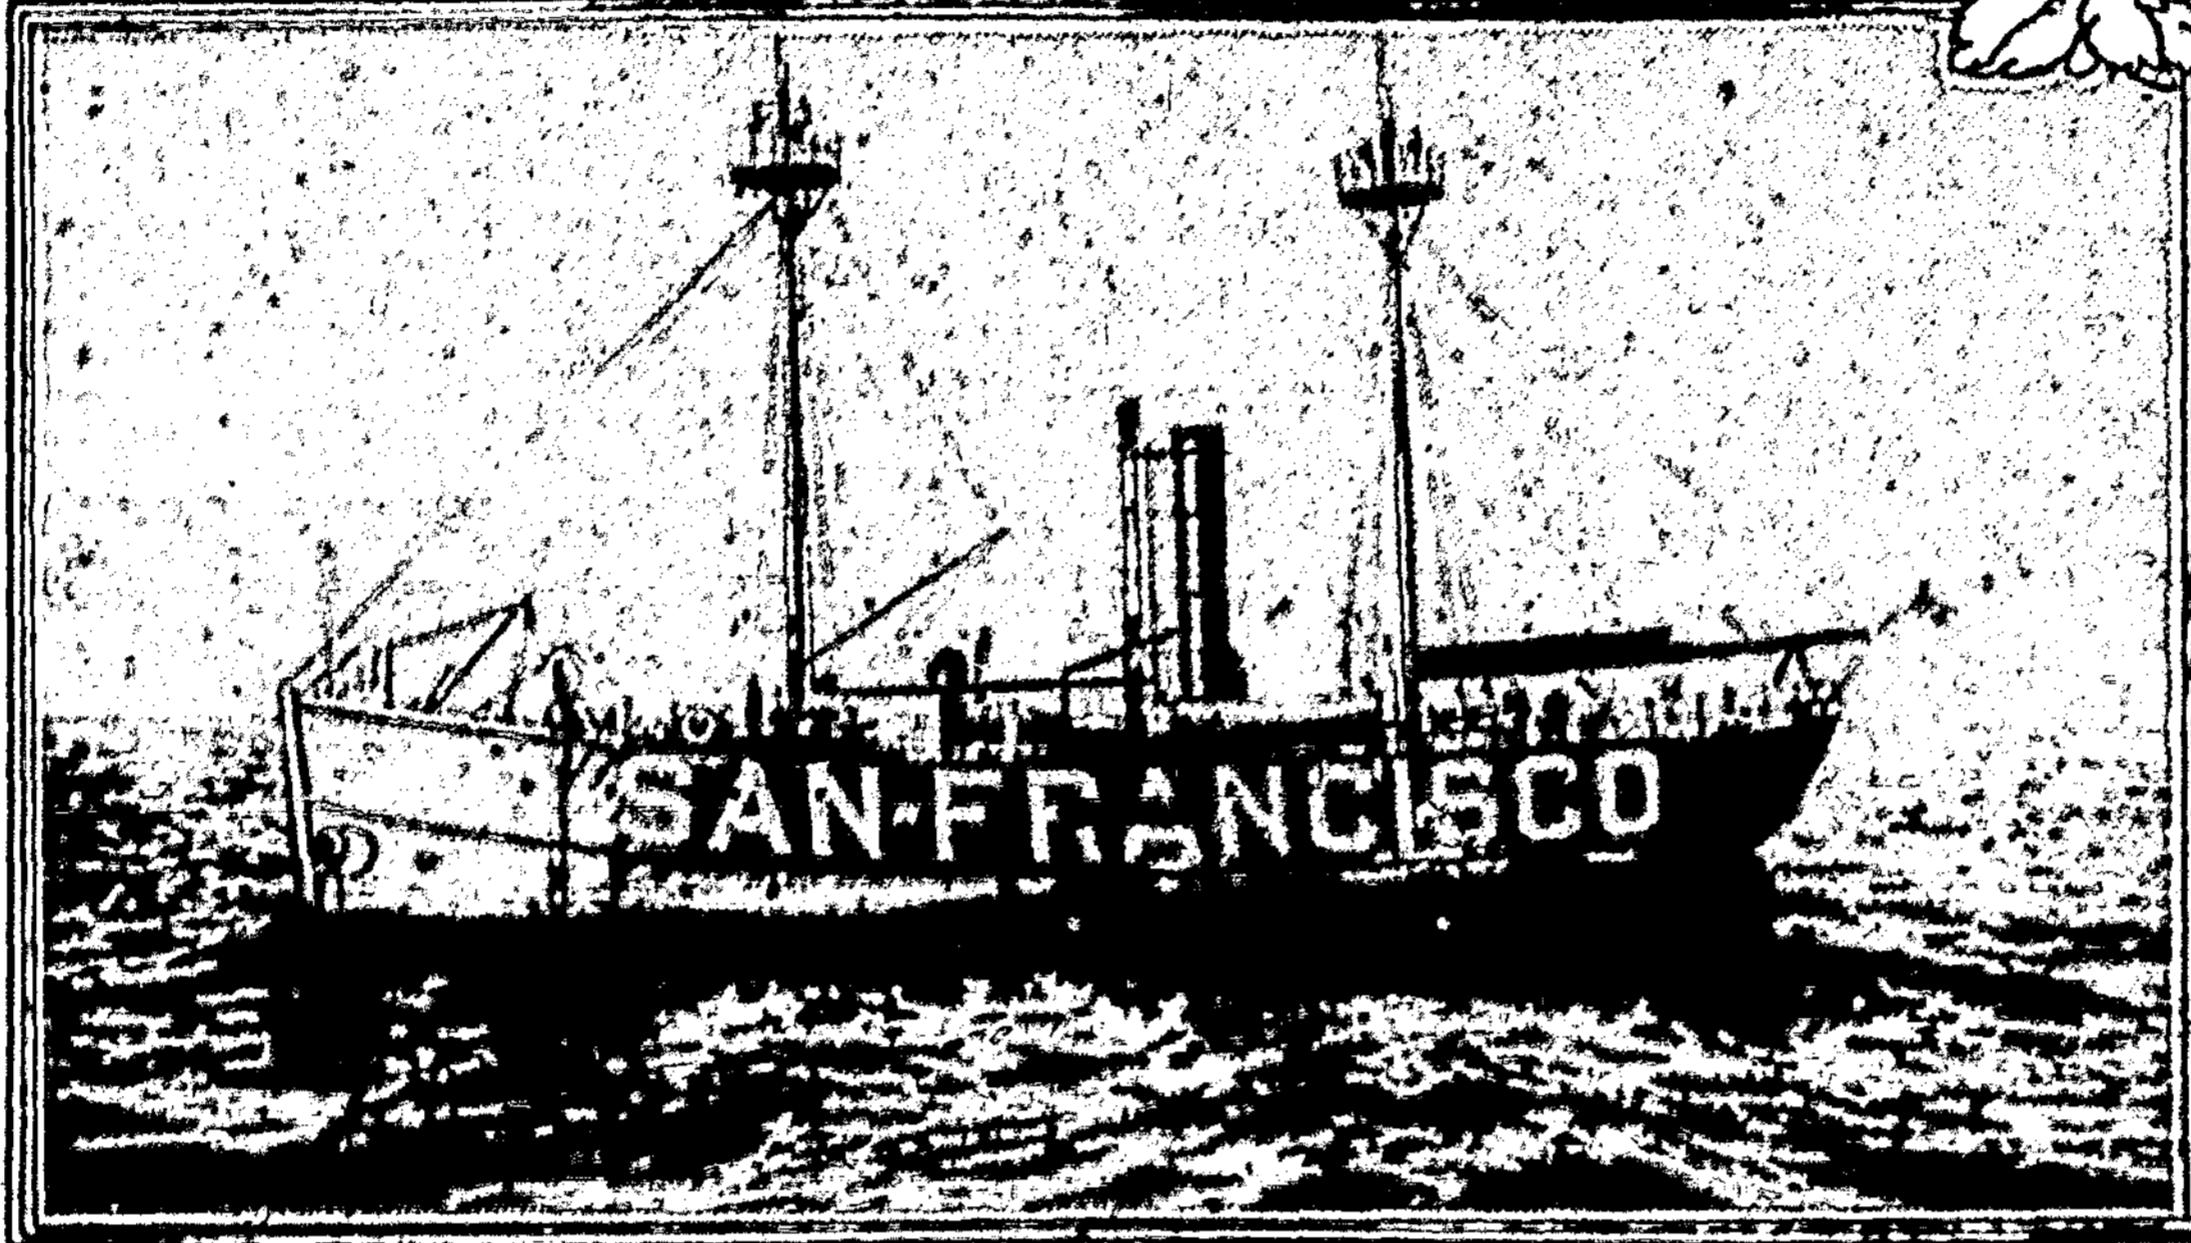

The earliest type of lighting apparatus consisted of an open can of wood fire, with other inflammable materials such as pitch, burned in a brazier, on top of the tower. When Boston light, at the entrance to Boston harbor, and the first lighthouse built on this continent, was established in 1710, the common oil burner of the period was used, inclosed in a lantern consisting of a cylinder of heavy wooden frames, holding small, thick panes of glass. The illuminant was fish or whale oil, burned in spider lamps with wick and suspended by iron chains from the top of the lantern.

Improvements were gradually made until there was evolved the present modern lighthouse with its complex system of revolving lenses, at the focus of which is placed the source of light. The largest lens in use in the lighthouse service at present is that at Makopuu Point, Oahu, Hawaii, the powerful light for vessels bound from the States to the Hawaiian Islands. The inside diameter of this lens is almost nine feet, and it is inclosed in a specially designed lantern of sixteen feet inside diameter. This light is visible at sea from a distance of almost thirty miles.

The brightest light in the service, and generally considered the brightest in the world, is at Navajito, N. J., at the entrance to New York bay. The candle power of this light is estimated at 25,000,000, and its glow has been seen at a distance of 70 miles at sea. This great intensity is produced by a powerful electric arc inclosed in a modern lens of high magnification. In most other important lights the incandescent oil-vapor lamp, which burns vaporized kerosene under an incandescent mantle and gives a very powerful light, is used.

WESTPORT OF GENERAL LIGHTHOUSE DEPOT, SANDY HOOK, N. Y.

SAN FRANCISCO LIGHT VESSEL, 1870

In order to avoid the likelihood of confusion between lights, endeavor is made to give the lights distinct characteristics. As much of the coast was lighted before the introduction of modern light-house apparatus, the original lights were as a rule fixed, but at the more important of these stations apparatus has now been installed to make the lights flashing or occulting. This effect is produced in the case of flashing lights by revolving all or a part of the lens, which is specially constructed with panels of prism for concentrating the rays into beams—in the case of occulting lights by some form of travelling screen or shutter which obscures the light at intervals. In either case the motion is regulated by a clockwork with the necessary governing mechanism to cause light and dark periods in accurate sequence. The terms "flashing" and "occulting" refer to the relative durations of light and darkness, a flash being an interval shorter than the duration of an eclipse, while an occultation is shorter than, or equal to, the duration of light.

The first fog signal in the United States was a cannon, installed at Boston light in 1710, which was fired when necessary to answer the signals of ships in thick weather. Guns of various types were used at other lighthouses, but have now been generally abandoned. Bells were introduced at a comparatively early date. Trumpets were the next improvement, and steam whistles came into use in 1857. Experiments were made with sirens in 1807, and the first siren installation was at Sandy Hook East beacon in 1833. This apparatus has been modified and improved until the present automatic siren, using compressed air instead of steam, was evolved. Practically all fog signals are now installed as a clockwork whereby the cycle is repeated every minute in order to facilitate identification.

Submarine signals, which have been introduced in recent years, have as a rule a more effective and constant range of audibility than signals sounded in air. Such a signal consists essentially of a specially designed bell, submerged sufficiently to avoid wave disturbances, with some form of striking attachment. On light vessels the bell is usually swung over the ship's side on a chain attached to a davit, and the striking device is operated pneumatically to ring a certain set of blows at prescribed intervals.

At light stations the bell is usually supported on a tripod, placed on the sea bottom, a short distance away from the light, and the striking mechanism operated electrically through a cable, with characteristic number of blows at regular intervals. When attached to buoys a swinging vane is provided which is forced up and down as the buoy surges in the sea. The motion of the vane causes a spring to stretch and when it has reached a sufficient tension it is released, the action causing a blow to be struck on the bell. The blows are of equal intensity, this being due to the elongation of the spring, although the interval between them varies with the condition of the sea, and no regular code of blows is therefore practicable.

In order to obtain the best results with submarine bells, a receiving apparatus, somewhat similar to a telephone, has been devised for attachment to a vessel. The sound may be heard also on vessels not equipped with receiving apparatus, by observers below the water line, and particularly in iron or steel ships.

Since 1853 systematic records have been kept of the number of hours of fog or thick weather observed each year at the different light stations. These figures present interesting statistics, and are of considerable value in approximating the prevalence of fog at various localities when proposed new signals are under consideration. The absolute maximum record of fog was at Bogota,

Me., in 1907, when 2,784 hours of fog prevailed during the year.

Buoys, as a rule, are employed to mark shoals or other obstructions and to indicate the approaches to and limits of channels or the fairway passage through a channel. In some cases they indicate anchorage grounds. Buoys originally were either solid wooden spars or built up in various shapes of wooden staves, like barrels. Built-up buoys are now constructed of iron or steel plates. In order to give the proper distinctiveness, buoys are given certain characteristic colors and numbers. They are anchored in their positions by various types of moorings, depending on the character of the bottom and the size and importance of the buoy.

Bell buoys have a hemispherical-shaped hull, built of steel plates, with flat deck, and carry a structural-steel superstructure which supports a bronze bell and usually four iron clappers. The motion of the buoy in the sea causes these clappers to strike the bell, so that the action is entirely automatic.

Whistling buoys are built of steel plates, and consist of a pear-shaped body with the smaller end uppermost, with a long open tube on the lower end. This tube extends throughout the length of the buoy, and is closed at the upper end by a head-plate on which is mounted a check valve and a whistle on the superstructure of the buoy. The sound is produced by the air in the upper portion of the tube being compressed by the falling of the buoy in the waves, its means of escape being through the whistle. A fresh supply of air is drawn through the check valve as the buoy rises again.

Lighted buoys are a modern invention, having come into use within about the last 35 years, and are considered by mariners generally as among the most valuable of recent developments in coast lighting. All of the lighted buoys now in service use compressed gas, either oil gas or acetylene. In the types now in use the gas, at a pressure of about 12 atmospheres, is contained either directly in the body of the buoy or in tanks fitted into compartments of the body and is piped to the lantern at the top of the superstructure. If the light is flashing, as is commonly the case, a small pilot light burns continuously and ignites the main burner as gas is admitted from the flashing chamber. The latter is a regulating compartment in the base of the lantern and is provided with a flexible diaphragm and valves for cutting off and opening the flow of gas at intervals, the operation being due to the pressure of the gas in the reservoirs.

The lighthouse service maintains light vessels on 53 stations, and has for this purpose 60 light vessels, of which 13 are relief vessels. They are generally employed for marking dangers at sea, approaches or entrances to harbors, and at important points in the course of vessels, where a lighthouse is not feasible, and are of particular value in providing both a light and a fog signal which may be approached close to, thus enabling mariners to fix their position at sea with reasonable certainty. In this respect light vessels are superior to lighthouses, as in the case of the latter due allowances must be made for a safe distance in passing. A valuable secondary advantage is the fact that light vessels may be shifted to meet varying conditions of traffic, such as changes in shoals or channels, use of deeper draft vessels, and similar contingencies. Most of these ships are now equipped with a tubular steel mast, containing a ladder, surmounted at the top by a lantern of the type used in lighthouses, containing a regular light-house lens. These lightships are supplied with both the ordinary articles for maintenance and materials for construction or repair by a number of small vessels known as light-house tenders.

### Cotton

Spot cotton prices declined 99 points during the week. New York October futures contracts declined 10 points. Spot cotton prices closed at 22.70 lb. New York October futures at 22.25c.

### DENVER MARKETS

### Cattle

Receipts, 2,226. Quotations were made from \$9 to \$11. Three loads of heavy feeders, averaging above 1,000 pounds, brought the top of the market at \$3, while lighter feeders went at \$7.50. Others sold around \$6. Some grass-fed steers brought \$6.25 and \$8.15. Killing cows sold to packers at \$6.50, while one or two went singly at \$6. Loads sold at \$6.55 and \$6.16. The average grade went at \$7.75 and \$4.60 and some at \$4.75. Poor cows continued to sell at \$3 with canners and cutters from \$2 to \$3. Heifers were light in supply and quality and the best prices were \$5. The prices ranged on down to \$2. Veal calves sold singly at \$9 and some at \$8, while the bulk of sales were made at \$7.75 and downward to \$5.50. Bulls ranged from \$4, which price caught several, down to \$2.50.

### Hogs

Receipts, 998. Choice killing hogs weighing 200 pounds went to a local packer at \$8.25 while the next best grade was at \$8.15 and \$8.10. Bulk of sales ranged from \$7.75 to \$8.30 and smooth sows were also higher, while stags about held their own with last week.

### Sheep

Receipts, 3,793. The entire offering in the sheep division consisted of 14 loads of killing and feeder lambs, including two loads of the latter which sold right up with the bulk at \$11.50 flat. These lambs averaged 76 pounds and were divided between the two large packers. Feeders are in demand in central Colorado where farmers would turn them in on damaged wheat fields. Packers' buyers quoted choice ewes from \$9 to \$6.50 and yearlings from \$9 to \$10 for strictly choice grades. Wethers were quoted from \$7 to \$7.50.

Cane ..... \$3.50

Danville, Ill.—Almost complete steel construction saved the Continental Limited, fastest train on the Wabash railroad, from a terrible wreck, seven miles east of here, when the engine of the eastbound train left the rails in front of the station at State Line, Ind., at a curve where the track it was traveling upon merged with the other track to form a single line. Engine, mail and express cars turned over and the combination baggage and smoker and a chair car came to rest half overturned.

## WRIGLEYS

Take it home to the kids. Have a packet in your pocket for an ever-ready treat.

After Every Meal  
A delicious confessor and an aid to the teeth, appetite, digestion.

Oh, That Funny Feeling. A Sunday-school class of five girls about the age of eight had gone for a "hike" with the teacher. A quarter of a mile failed to satisfy, the youngsters and the "hike" lengthened into one and one-half miles. Then a stop was made for lunch. Each of the hikers had enough "eats" for the party, but all was devoured regardless. The teacher was quaking with fear lest someone be unable to make the return journey, but it was accomplished at last although about midway of the trip one little girl piped: "My stomach feels awful funny."

Praise Too Faint. "Why do you want the press agent discharged? He says you are the greatest singer alive." "It is not enough," coldly rejoined the prima donna. "He should have said I am the greatest singer that ever lived."

## St. Louis smoker moves into second place

With 405 cans to his credit Mr. Thurston smokes his way towards the lead

Mr. Byron Thurston of St. Louis is more than qualified for membership in the Edgeworth Club. But his position in the championship-smoker class is not so well established. Mr. Thurston's interesting letter follows:

Hotel Gard, St. Louis, Mo.  
Larus & Brother Company,  
Richmond, Va.  
Gentlemen:  
I have often heard of great smokers of one kind or tobacco. I have smoked 405 cans of Edgeworth Plug Slice 50c size without changing. Now if you know of any better record I would be glad to hear from you. I smoke one can of tobacco in two days and enjoy every piped!

More than a year ago an Edgeworth smoker from Burlington, Vermont, Mr. E. F. Baldwin, wrote in suggesting that he had smoked more Edgeworth than any other living man. At that time he had smoked over 1000 cans of the same size purchased by Mr. Thurston, distributed over a period of nearly a score of years. So while it appears today that Mr. Thurston is well behind the leader, if he continues smoking a can every two days, it may be only a matter of years before he will be well in advance of the entire field.

Still, it is a big country and there are a lot of Edgeworth smokers. You can never tell when a new record will be hung up to be the envy of all smokers. Edgeworth has something about it that holds smokers. Not that everyone likes Edgeworth, but those who do generally remain steadfast in their loyalty to the tobacco year after year.

If you have never tried Edgeworth, Larus & Brother Company will be glad to send you free samples of both Edgeworth Plug Slice and Ready-Rubbed. Then you can smoke a few pipefuls and judge for yourself whether or not the tobacco is as good as a great many veteran pipe smokers claim it is. Just drop a postcard to Larus & Brother Company, 75 South 21st Street, Richmond, Va., and the free samples will be forwarded to you promptly.

If you will also include the name and address of your regular tobacco dealer, your courtesy will be appreciated. Edgeworth is sold in various sizes to suit the needs and means of all purchasers. Both Edgeworth Plug Slice and Ready-Rubbed come in small, pocket-size packages, in attractive tin humidoras and in handy in-between sizes. To Retail Tobacco Merchants: If your jobber cannot supply you with Edgeworth, Larus & Brother Company will gladly send you prepaid by parcel post a one- or two-down carton of any size of Plug Slice or Ready-Rubbed for the same price you would pay the jobber.

INFORMATION DEPARTMENT Commercial inquiries answered and information gladly furnished without cost.

AGRICULTURAL DEPARTMENT FAVORS CROP INSURANCE

Washington.—General crop insurance is feasible, and is urgently needed for the protection of American agriculture.

So any officials of the U. S. Department of Agriculture who have been studying the question.

Billions of dollars are annually invested in farm crops. So great is the risk in this investment.

It is regarded as absurd that agriculture should continue without adequate insurance facilities.

Mulatto Guilty of Murder Cleveland, O.—Guilty of murder with a recommendation of mercy.

Irish Newspapermen Win Strike Dublin.—For a week recently the public of Ireland was without reports of the proceedings in the Irish parliament.

Man Shot in Labor Riot Springfield, Ill.—One man was shot and seriously wounded and two deputy sheriffs were badly beaten in a labor fight at the plant of the American Zinc Lead and Smelting Company.

Hamburg Comes Back as a Port

Germany's Most Important Commercial City Shows Increase in Shipping Over 1913.

Washington, D. C.—"Though Hamburg, the fourth commercial city of the world before the World war, has been doing more shipping in the first five months of 1915 than it did in the same period of 1913.

"Hamburg has always been a jealous rival of New York, London and Liverpool, the three other great commercial cities at whose ports more vessels dock than visit the German harbor.

"Unlike most of the other great commercial cities of the world, Hamburg does not lie within a stone's throw of the ocean.

"Most of the German railroads ultimately lead to the city, and numerous canals bring their traffic to its portals.

Old Customs and Costumes Cling. "The State and Free City of Hamburg, comprising 108 square miles, is a republic, its constitution bearing the date of January 7, 1921.

proper, made it the most densely populated of all the German states. Its average of more than 6,000 persons to a square mile gave it more than twice the density of the State of Bremen.

"Hamburg streets and market places are typical of those of many German towns. In the markets women may be seen wearing yokes on their shoulders from which hang big wooden buckets filled with milk.

Proved "Manhood" by Attack on Octogenarian

Indianapolis.—It cost Frank Hill \$11 and a six months' sentence to the

Cities of Birds Are Found in Texas

Rookeries of Species Nearly Extinct Discovered in Wild Section of Gulf Coast.

Austin, Tex.—Bird cities of enormous size have been discovered in an isolated and wild part of the Gulf coast region of Texas by Prof. George Finlay Simmons, former instructor in zoology of the University of Texas.

Some of them were not known to exist anywhere in the United States, except in limited numbers perhaps in inaccessible parts of the Everglades of Florida.

Rare White Ibis. "In a remote locality near the mouth of the Guadalupe river where the San Antonio river empties into it I found a rookery of the rare white ibis, with about 2,000 nests," he said.

Whole Meal in Pill Is Scientist's Dream

A good hearty meal, all in a pill that can be carried in a vest pocket, is the dream of scientists of today, according to Hugh S. Cummings, surgeon general of the public health service.

Some day "dish washing and the dinner table will be gone and forgotten. The farthest scientists have progressed, according to Mr. Cummings, is to remove all the water from foods and condense them some 70 per cent.

state penal farm to prove his manhood to the satisfaction of his companion, Ruth Lawrence, by striking William Hayes, aged eighty-two, during a dispute in regard to an automobile parking space in the downtown district here.

"This will cost me \$11," but it will show you I am a man," Hill told his companion, as he launched his attack, according to witnesses, who also testified that the Lawrence girl struck Miss Maude Speck, a bystander, because she remarked that it "seemed such a shame for such a big man to be hitting that little old man."

Motor to Church in Comfort

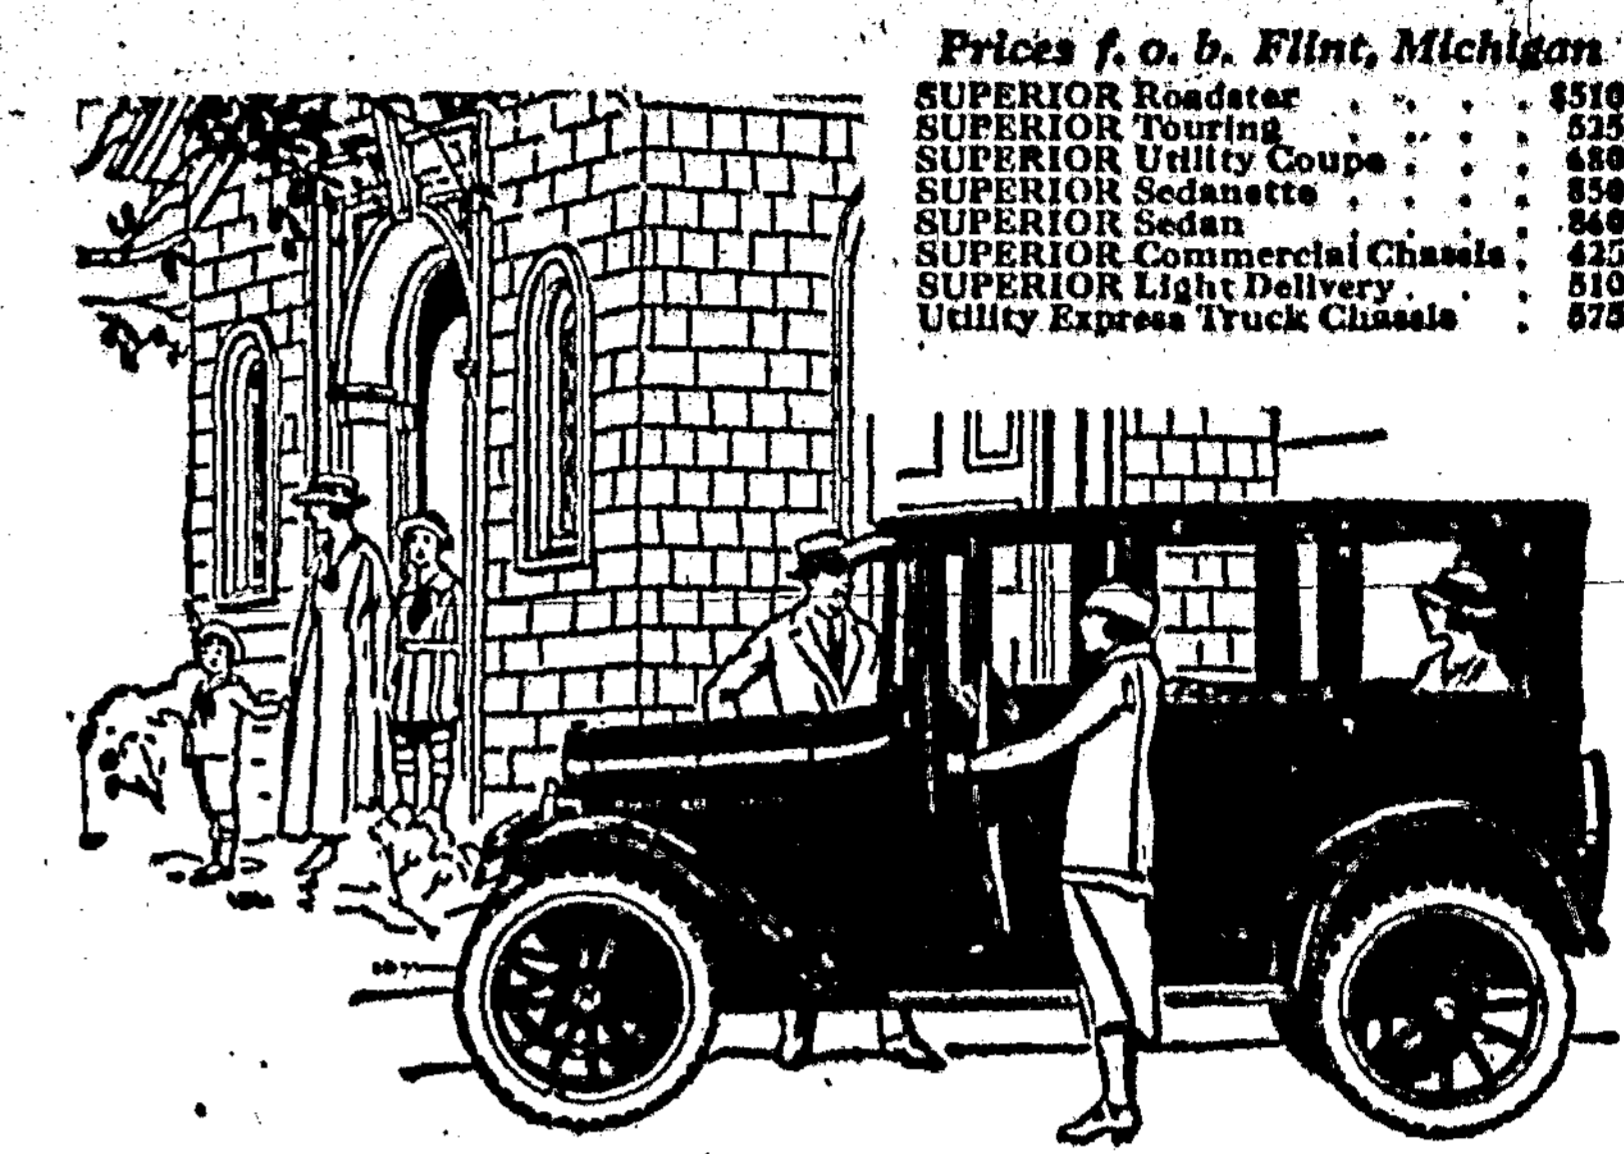

CHEVROLET SUPERIOR 5-Pass. Sedan \$860

f. o. b. Flint, Mich.

The Chevrolet 5-Passenger Sedan is most popular for family use, because it affords comfort, weather protection and the home atmosphere all the year 'round for five people—yet may be economically operated with only one or two passengers.

Its power, reliability and low upkeep appeal to men. Women like its handsome lines, fine upholstery, plate glass windows with Ternstedt regulators, and fine finish.

Everybody appreciates its great value at \$860, f. o. b. Flint, Mich.

Chevrolet Motor Company

Division of General Motors Corporation Detroit, Michigan

Black Alkali. Investigations have been made of the almost complete loss of fertility of from 40,000 to 50,000 acres in the San Luis valley of Colorado, and this condition is attributed to the so-called "black alkali," composed largely of sodium carbonate.

"In this same rookery I found nesting about 100 wood ibis, which is known as the American stork. It is the only nesting place of these birds known in this part of the United States.

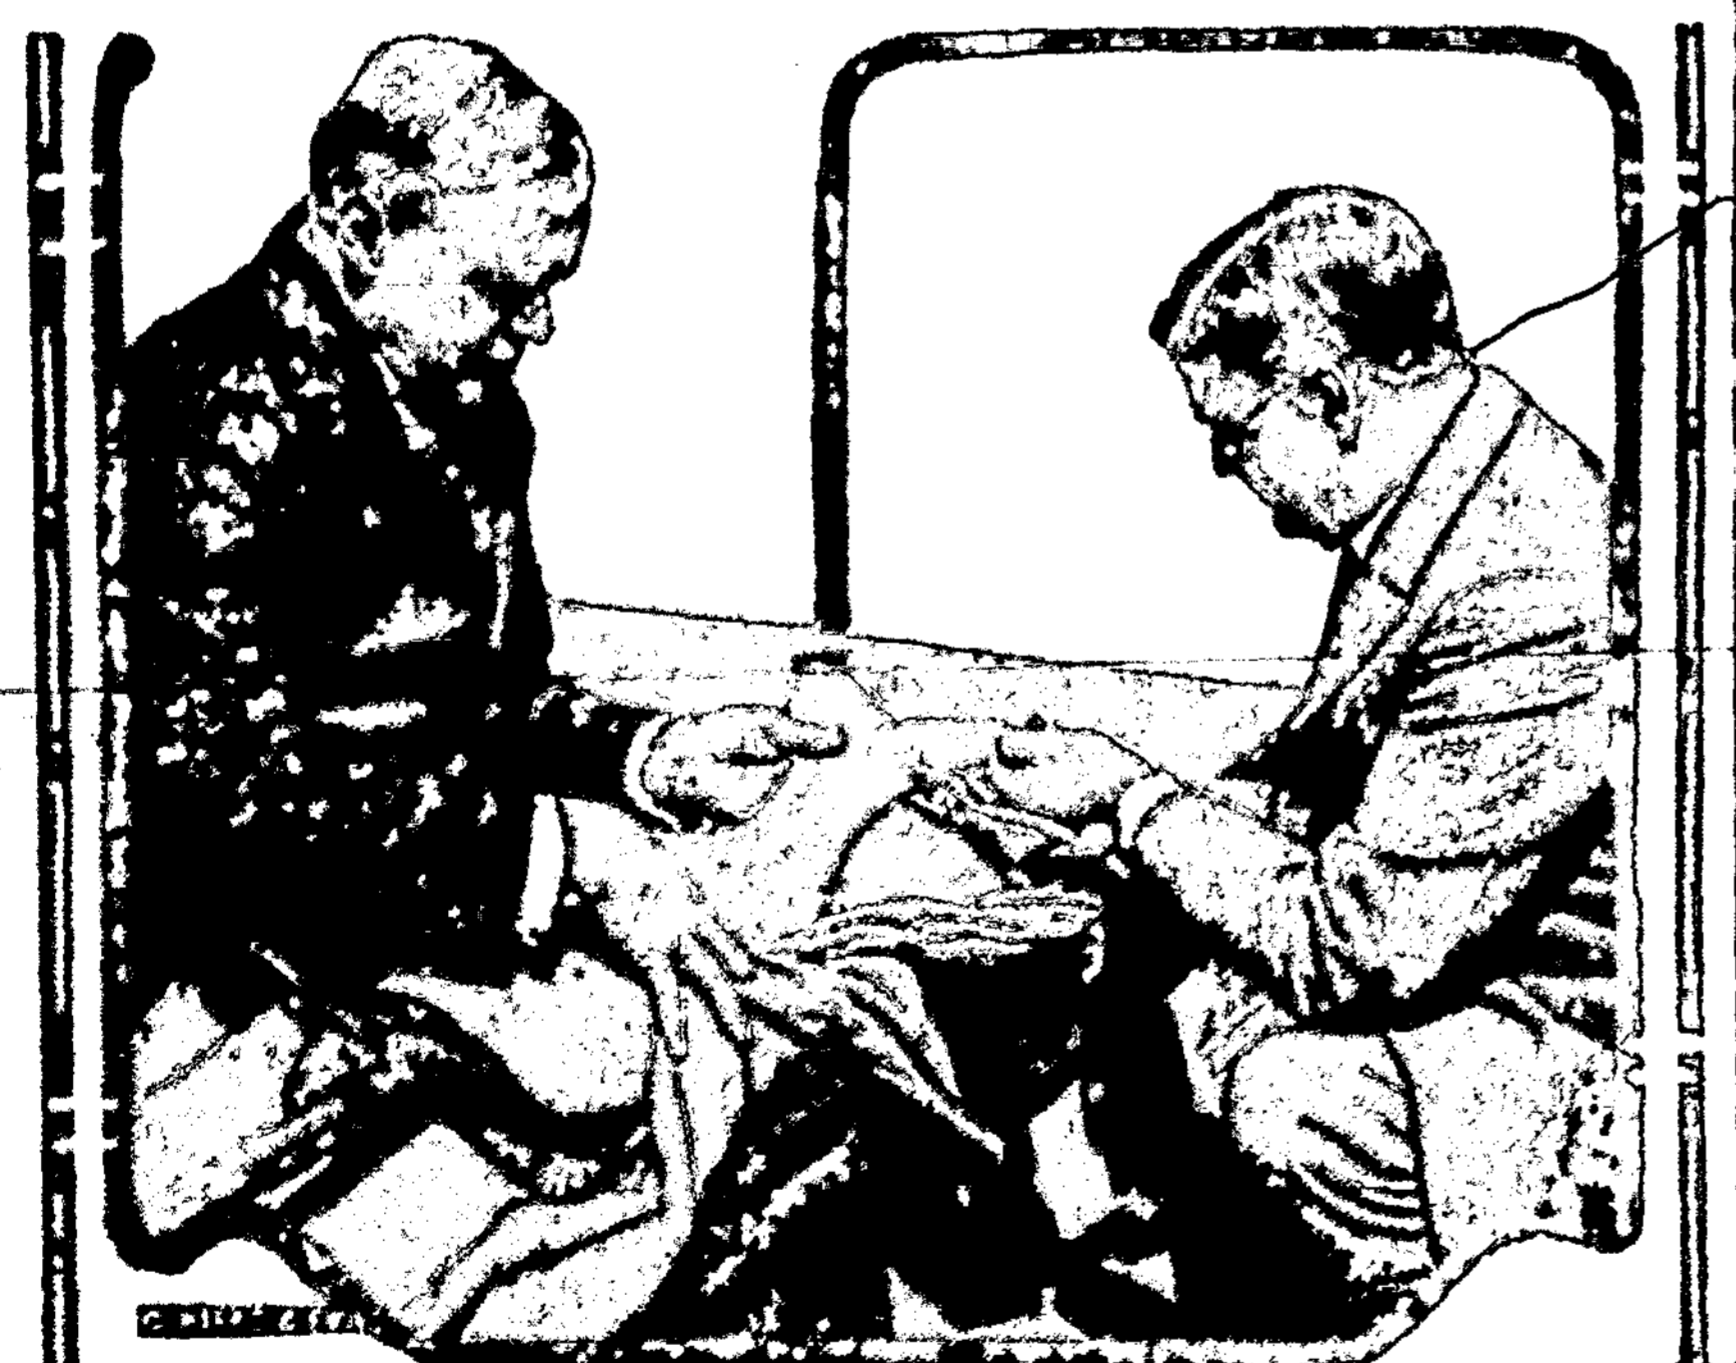

Another Rare Species. "Another remarkable rookery which I found on the trip was that of the white-face glossy ibis, which is the American cousin of the famous sacred ibis of Egypt.

Drab Life. Harold Bell Wright, the successful novelist, was defending, at a dinner in New York, the idealistic as contrasted with the realistic school of fiction.

Crust Words. The wife had been away from home all afternoon, and when she returned wearily into a chair and closed her eyes for a rest when her husband began to ask questions.

Judging from the freckles on the summer girl's face, the open season for sun spots is now on.

Migrations of Fish to Be Traced

Uncle Sam has decided to trace the migration of fish, especially codfish, pollock and haddock. This will be done by tagging the fish.

SOUTH SEA GIRLS CAUSE SAILORS TO DESERT SHIP

Seductive Charms of Native Maidens Prove Irresistible.

Honolulu.—The charms of two young and beautiful native maidens at Futu, Island of Niuafoou, in the South Sea, proved stronger than the call back to civilization for two members of the crew of the schooner Alert, according to the story related by Capt. Daniel McDonald, master of the Alert, who arrived here aboard the Niagara with all members of his crew.

Girl Masquerades as Man for Nine Years

Paris.—Four years ago a young looking tramp called at a farm at Revel asking for work.

Find 10-Ft. Skeleton of Snake 100 Years Old

Monroe, La.—The skeleton of a huge snake measuring ten feet long, well preserved, and believed to have been more than 100 years old when it died, was found recently by a party of engineers and surveyors in a cave near Junction City, on the Louisiana-Arkansas state line.

Establishes Scholarship Fund

Washington.—A traveling scholarship for the study of the fauna of foreign countries was announced by the Smithsonian Institution, which will devote the interest from a bequest of \$50,000 to the project.

Ever stop to think of this?

We are what we eat!

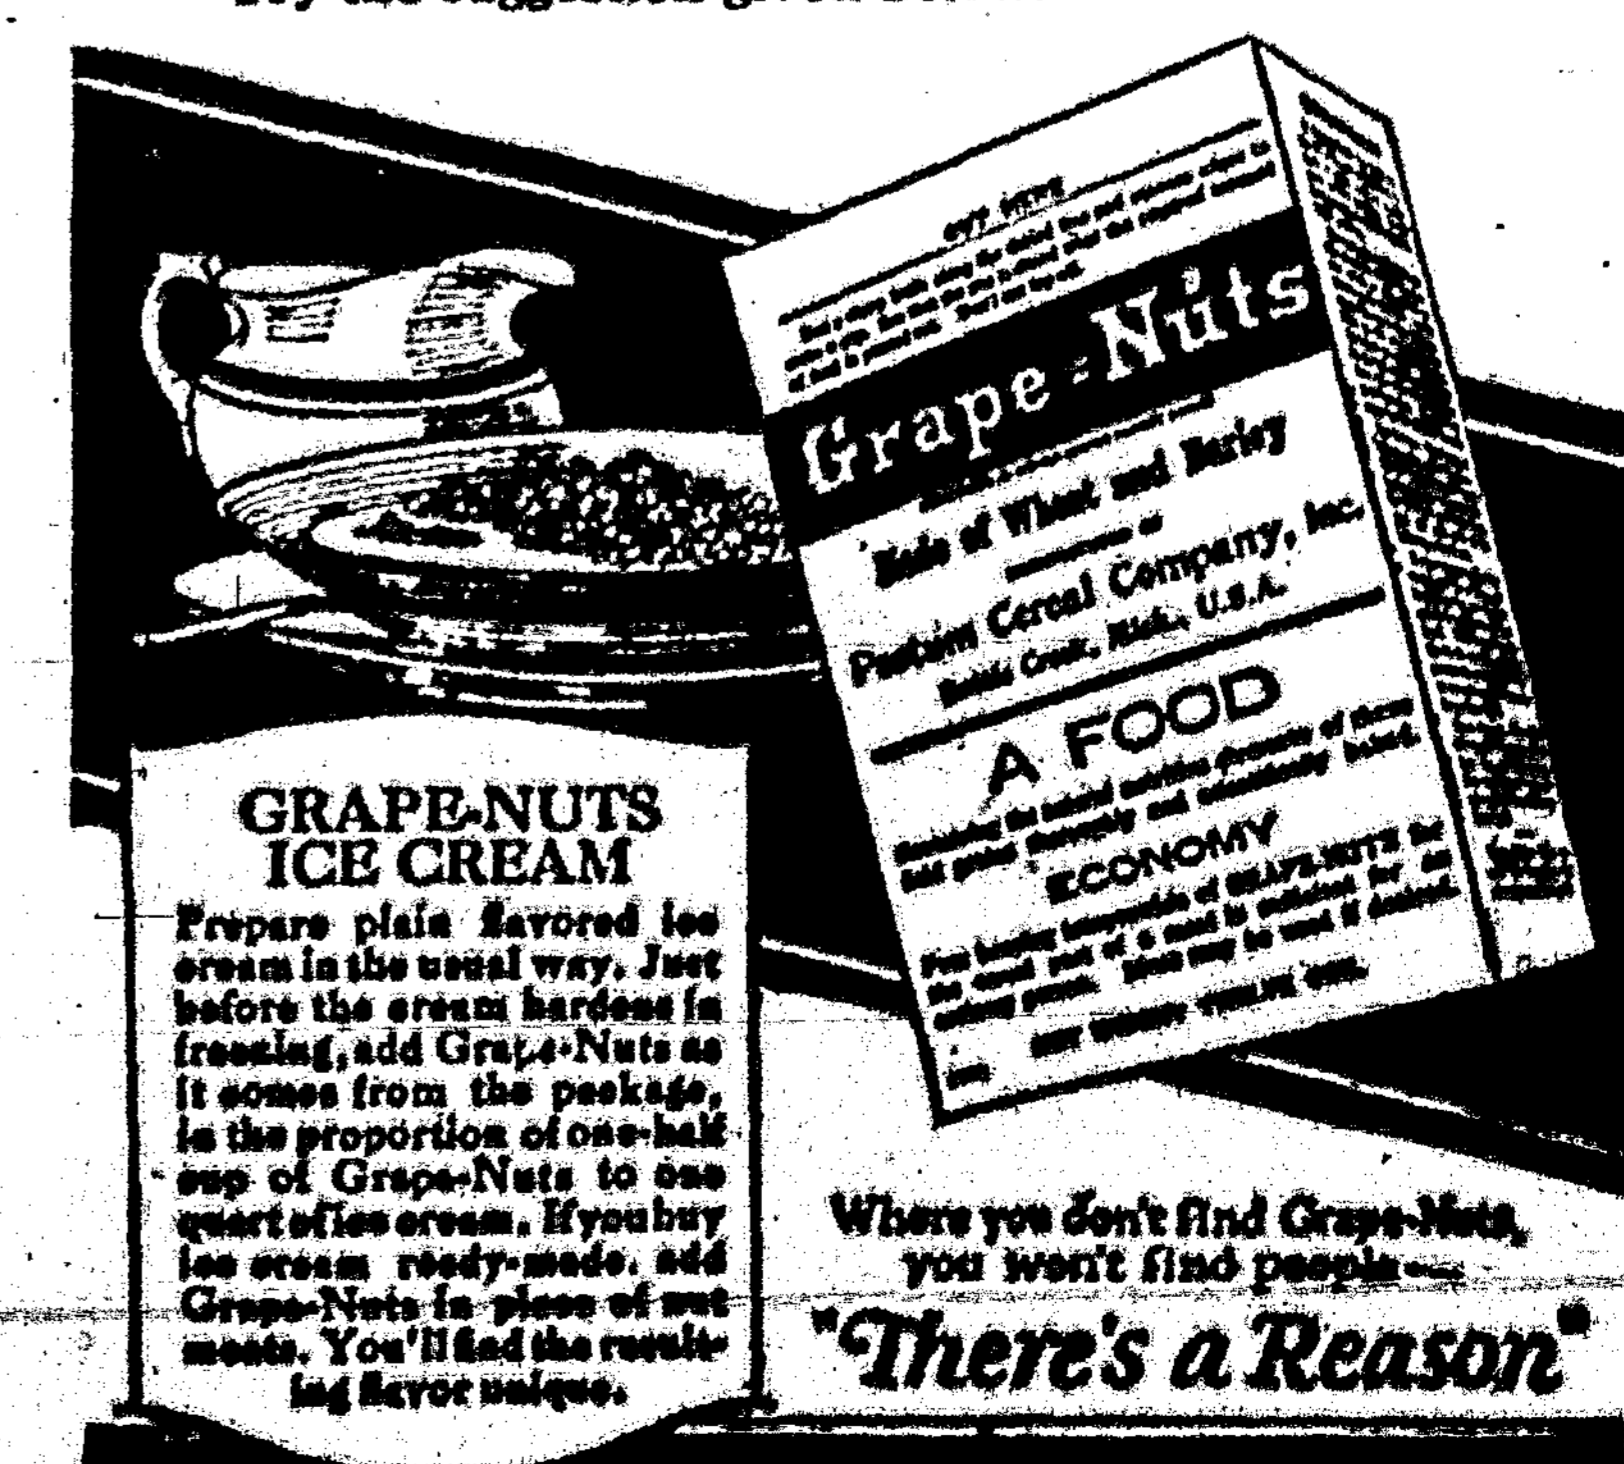

It's a startling fact, yet a simple truth. This is the reason every one should know that his food is really nourishing—not merely filling.

Grape-Nuts—made from wheat and barley—is one of the few cereal foods that includes the vital mineral salts so necessary for supplying proper nourishment for nerve and bone structure.

In Grape-Nuts, too, is retained the important vitamin-B of the wheat.

No food has greater influence in strengthening the body of a growing child than Grape-Nuts. And remember, children need the very best there is in the way of nourishment.

Grape-Nuts is just as delicious as it is healthful, whether served right from the package as a breakfast cereal with milk or cream, with fresh or stewed fruit, or made into an appetizing recipe.

There's a Reason

**LOCAL AND PERSONAL MENTION**

Mrs. H. P. Clarke and sister, Miss Goldye Shrader were Carrizozo visitors from Roswell yesterday. Mrs. Clarke will teach here during the fall school term.

Professor E. C. Koonce left yesterday for El Rito, where he will again superintend the interests of the Spanish-American Normal, of which he is the principal.

Mr. and Mrs. Paul Mayer, of Corona, were down last night, to witness the entertainment at the Crystal Theatre.

The H. M. Bullard family were down from Coyote last night for the entertainment.

Miss Lucille Jones has gone to Bisbee, Ariz., to attend school for the fall and winter term.

Dr. West and E. O. Jones of Oscura were visitors here on Wednesday.

Mrs. J. R. Green and children returned Wednesday from a pleasant visit with friends and relatives at Kansas City and Joplin, Mo.

Mr. and Mrs. D. J. Sager and son, Frank, of Warren, Ohio, stayed over Monday and Tuesday of this week at the F. J. Sager home on a return trip from California. D. J. is a nephew of F. J. Sager of the Exchange Bank.

Conductor A. C. McCammon, wife and daughters have returned from a pleasant vacation, during which time, they visited in and near the city of Madison, Alabama.

Mr. and Mrs. Ira Greer are the proud parents of a bouncing baby boy, born to them Tuesday morning. Mother and son are doing nicely.

A heavy rain visited this section beginning last Saturday and lasting until Sunday evening. An area of 100 miles was covered with an inch of rainfall.

Demecia Garcia and niece, Cuca Garcia, left Sunday for Bisbee, Ariz., where they joined Mr. and Mrs. Joseph Garcia, who have recently located at that place.

Mrs. W. J. Fetter, formerly of Carrizozo, but now residing at Douglas, Ariz., is here with her son John, for a two week's visit with Mrs. Fetter's parents, Mr. and Mrs. J. A. Kennedy, at their ranch home.

T. F. Loughrey, of Ft. Worth, brother of W. P. Loughrey, is visiting at his brother's home for the present week.

Mrs. Orville Smith, who was taken suddenly ill while on her way to Roswell two weeks ago, has returned home much benefited.

Miss Jeanette Johnson has undergone a successful operation for appendicitis at a local hospital, the same having been performed on Monday.

Miss Juell Miller has been granted a free scholarship in the New Mexico University at Albuquerque, she being recommended by Ex-Senator Henry Lutz, of this place.

Mrs. Harold Wilcox, of Vaughn, N. M., was a guest of Mrs. E. O. Prehm for the past week.

Miss Hilary Cooper, who has been visiting relatives in San Antonio for a period of three weeks, returned Saturday, accompanied by her grandparents, Mr. and Mrs. Thos. Park, who will visit for a short while with the Robt. Ransom family. The return trip was made by motor.

R. E. P. Warden, cattleman from Ancho, returned Wednesday morning from Mexico, where he had been to inspect range cattle which he and others from here have on pasture. He found the stock doing nicely.

Miss Minnie Wahl spent last Sunday at Parsons, visiting Mrs. J. H. Fulmer and her house guest, Mrs. Margaret Schwab.

Mr. and Mrs. J. H. Farris and children returned last Sunday from an extended trip through Utah, Colorado and California.

Miss Myrtle Reynolds, sister of Mrs. H. G. Norman, is here from Tucumcari for a visit with her sister's family and will remain about two weeks, at which time, Mrs. Norman and children will accompany her sister home for a return visit.

**NOTICE**

Beginning with September 1st, and continuing thereafter until further notice, no water will be delivered by the water wagon on Tuesday, Wednesday, Thursday and Friday afternoons of each week. Citizens who rely upon this distribution should place orders for water so that the same can be filled under this arrangement.

Village Water Committee,  
Aug. 24, 2t

**NOTICE FOR PUBLICATION**
