VOL. 8—NO. 8

CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, APRIL 18, 1924

8 PAGES

PRICE \$2.00 PER YEAR

## RANGER MIMS GIVES GOOD ADVICE TO THE PUBLIC

Forest protection week has become an annual affair. This year President Coolidge has proclaimed it April 21-27 inclusive. It is a week devoted especially to the consideration of the forests and the protection which they need in order that a future timber supply may be assured. Fire may well be termed the greatest enemy of our forests, wasteful lumbering, erosion and insect infestation come next in line. The U. S. Forest Service has under its jurisdiction within the National Forests approximately 20 per cent of the timber in the United States. It maintains a very complete fire protection organization which ordinarily locates fires when they are small and extinguishes them in a short time. This organization can not be entirely successful without the co-operation of the public, both in preventing and suppressing forest fires. During Forest Protection Week each citizen of Lincoln County and adjoining Counties can be of great assistance in helping to make Forest Protection Week a big success. You reach individuals and communities which the rangers may not be able to see and it behooves you as shareholders in our National Forests to talk Forest Protection during this week. Forest Protection is a National affair and should be regarded as such by every good citizen.

Of the forest fires in New Mexico last year, 62 per cent were caused by lightning and were not preventable; the remaining 38 per cent were preventable for they were caused by the carelessness of man. A carelessly tossed match or cigarette may cause a serious forest fire. It is the duty of everyone who goes into the woods, to be extremely careful with fire. Every forest fire injures and destroys timber, forage, and game. Help to reduce the percentage of man-caused fires in 1924.—Be careful with campfires, matches and tobacco.—J. H. Mims, Forest Ranger, Gallinas District

## Radio Doctor Here

Mr. and Mrs. T. B. Kincheloe and Mrs. A. C. Hynson, mother of Mrs. Kincheloe, were over from Fort Stanton on Tuesday, Mrs. Hynson leaving on No. 4 for her home in Washington, D. C., after a three month's stay with her daughter's family at the Fort. Mr. Kincheloe is agent for several of the best Radios on the market, the particulars of which are set forth in his ad on another page of this paper. He will cheerfully supply Radio fans with desired information. Ask the Radio Doctor.

W. B. Payne, Sam Bigger and school trustee Coffey, were here from Capitan this morning. Mr. Payne has just returned from Texas, where he went a short time ago to bring back his wife, who had been visiting relatives. He gave bonds to the sum of \$3,000 for his appearance before the coming term of court.

J. P. Fendergrass and R. E. McFarland, ranchers from the region near Spindle, were here on Monday. They said that the stock and range were in fine condition in the lower portion of the Paradise Valley where their ranches are situated.

## Capitan News Notes

(By Supt. F. S. Copeland)  
A short time ago, two gentlemen, Messrs. Whitaker and Wright, representing the West Texas Chamber of Commerce, spent several days in this vicinity looking up sites for summer homes in the Lincoln National Forest. A meeting was held at the school house in the evening, attended by about thirty citizens from Capitan and Carrizozo. All seemed to be in favor of advertising and offering inducements for people to spend their summers here and help make this one of the nation's playgrounds. This would result in a large pecuniary reward to citizens of this vicinity.

Trustees Coffey and Brubaker spent some time Monday in making out the budget for the ensuing year. The election on the consolidation of the two adjacent school districts has been called for May 17.

What might be called a community chorus is rehearsing an Easter program to be given at Fort Stanton next Sunday. The morning services will be held at the Amusement Hall, and the evening program in one of the wards. Supt. Robbins of Lincoln has been persuaded to add his lyric tenor to swell the volume of the grand ensemble.

The commencement exercises at the Capitan high school will be held in the assembly room on Friday evening, May 16. An appropriate program will be given. The class this year is composed of eight members, the largest in the history of the school. The following are on the roll: Brooksie Skinner, Ruth Stuart, Lena Werner, Cecil Deason, Wallace Stuart, Ernest Key, Thomas Howard, and Harvey Evans.

A special state agent was in town this week looking after the welfare of poor unfortunates who had neglected to secure their automobile licenses at the proper time.

Several pupils took a second turn at some of the eighth grade examinations this Tuesday and Wednesday, having neglected to pass at the previous trial.

It is worth a trip to the Sunset Ranch to witness the resplendent spectacle of a large apple orchard in full bloom. The fields of green alfalfa, the winding stream, the countless trees, gayly decked in their gorgeous trimmings, surrounded by precipitous mountains, blending into the hazy desert, make a scene that calls for Zane Grey to portray.

"Nothing can salvage the world but education. The masses must be far more intelligent in a democracy than in any other form of government, but there must also always be very advanced training for leaders whose power will be no less than that of monarchs, although it will be the power of knowledge. More important yet for the future of the world is a constant supply of new knowledge giving new power over both Nature and Man's Soul." — G. Stanley Hall.

## Big Dance at the Fort Next Saturday Night

On Saturday night, April 19, 1924, Gus Lemp and his Roswell "Night Owls" are journeying up to Fort Stanton for another big

## San Patricio Locals

(C. Hightower)  
The measles, a "measly" disease, has raged through the valley for some time, making life miserable for the little folks, has about run out of victims.

Mesdames Werner and Mitchell gave a party last Friday evening to which the high school students were invited. A very enjoyable time was had many expressions of appreciation of the nice things to eat and the splendid hospitality of the hostesses, was heard.

Miss Vivian Mauldin, who spent the winter with her brother and attended high school here since last September, left this week for her former home in the eastern part of the state.

Hezekiah McElheny, a youth working at one of the road camps, drew a fifty dollar fine for 30 days in the "hoosgow" in the justice court this week for an assault on a companion with a deadly weapon.

The favorite indoor sport now, is the making of slates.—Political slates, therefore, to be in on the fashion, your correspondent submits the following list for you to think about:

County Commissioners, Bob Brady, Brack Sloan and Frank Richard. Mr. Sloan has been one of the most "safe and sane" officials Lincoln county has ever had. His firm stand for our county schools is a matter that all should applaud. Mr. Richard came within one vote of defeating his democratic opponent, R. G. Taylor at the last election and should he agree to a gain accept the nomination, his election would be assured. Mr. Brady has served the county as a member of the board of education many years and besides having interested himself in political matters for years past, he is well acquainted with the needs of the people. For sheriff, the names of Sam Kelsey, Rumaldo Duran and Porfirio Chavez have been mentioned either of whom would make acceptable candidates for other county offices. For probate judge, Elerdo Chavez could not be defeated.—Let's hear from the other fellow; we don't want to name them all.

## "Of Such is the Kingdom"

The infant son of Mr. and Mrs. Walter C. Burnett, whose illness we made mention of two weeks ago, passed away Wednesday afternoon. The little sufferer lingered for over a month and at no time did his condition give hope to the sorrowing parents. The funeral was held yesterday afternoon from the family residence and conducted by Rev. W. R. McPherson of the Methodist Church, who offered words of Christian consolation to the bereaved parents. Interment was local.

Remember the date is Saturday, April 19. Dancing starts at Eight o'clock!

(Lemp and his "Night Owls" are considered the peerless orchestra of the southwest.)

## Notice

The recent picture "The White Sister" more than filled the Crystal Theatre and many had to be turned away the first night. As a great many people are attending from Carrizozo, seats will be reserved for the first night without cost for the coming entertainment and all future entertainments put on by the Carrizozo Entertainers, until further

## Railroad News

Brakeman H. C. Jones has transferred to El Paso terminus.

Brakeman C. B. Wells took a lay-off for a round trip last Friday and Saturday.

Engineer Bennett Dingwall was on El Paso visitor on Tuesday.

Fireman Frank Abel has returned from El Paso to take up service on the Carrizozo-Duran district.

Albert Malone, who has been absent from roundhouse service for about two weeks on account of sickness, is again at work.

Conductor C. A. McCommer was off duty for two days this week.

Brakeman Ernest Dingwall has returned to service after several days lay-off.

Fireman Dockery is on the Carrizozo-Duran local service with engineer John Ulrey.

Track foreman W. C. Hardin, wife, and baby, spent Sunday with relatives and friends in Alamogordo.

Mrs. Robert Kiel left Monday for Santa Rosa to join her husband, who is stationed at that place with the signal service crew.

This office is in receipt of a letter from Mr. and Mrs. Millard G. Eckford, who were residents of Carrizozo when Eckford was machinist in the local roundhouse several years ago. He is now with the Choctaw R. R. Co., at Bellamy, Ala., doing well and sends regards to his old friends.

Foreman L. T. Bacot spent Tuesday in El Paso, night foreman George Clarke working his Monday night shift, staying on for Tuesday and was relieved Tuesday night by S. O. Sproles.

Fireman Eb K. Jones made his initial trip as engineer last Tuesday on the Capitan "golden route limited." He made the round trip on schedule time in the midst of a violent sandstorm.

## Educational News

(By Louisa H. Coe)  
State Educational Budget Auditor, J. E. Owens will meet with the County Budget Auditors on May 28, to approve the school budgets for the year 1924-25.

We are very grateful to the E. P. & S. W. Railway Company for advancing the second half of their Lincoln County tax.

The second and last State Eighth grade Examination was held on April 15-16. About sixty pupils in this County took this examination.

President Coolidge has claimed April 21 to 27 inclusive as Forest Protection Week, teachers are requested to make proper observation of this week.

Most all of the County schools close on May 16; many of them are preparing Commencement Exercises.

Many Carrizozo folks have been consulted and they willingly have agreed to give right of way the first night to out-of-town folks. Simply write or wire for your reservations sending check for the seats or guarantee payment and they will be held as instructed.

## Easter Cantata

An Easter Cantata, "The Living Christ," will be sung Sunday evening Apr. 20, at 8 p. m., at the Crystal Theatre. The program is as follows:

Invocation Rev. McPherson  
"Let Thy Will Be Done" Choir  
"Christ Has Risen" Choir  
Mrs. R. E. Lemon and Choir  
"This World is Not Thy Goal," Choir  
Two-Minute Talk Rev. Stanley  
"Thou Who Knowest Sorrow" Mrs. Coe and Miss Connell  
"He Knows His Own" Misses Branham, Connell; Mesdames Hoffman, McCammon, Adams, Coe, Lemon  
"Love is the Greatest of All" Mrs. Lemmon and Choir  
"Lo, I am with You Always" Mr. Knoy  
"The Living Christ" Mesras. Cole, Stadtmann, Miss Connell and Mrs. Coe  
"We Came to Thee" Eb Jones  
"Hear Us, Father" Mesdames Lemon, Coe, Miss Connell, Eb Jones and Choir  
Benediction Father Girma

A silver offering will be taken to defray expenses. The public is cordially invited.

## Died at Los Angeles

Yesterday morning on her way to school, Mrs. Harold P. Clarke stopped at the postoffice and received a letter from Los Angeles, where her husband had been at the home of his mother for the past six weeks following his being taken from Hotel Dieu in El Paso to his mother's home.

The letter contained news of encouragement, saying among other good tidings that her husband's condition was greatly improved. She hastened to her school duties and spread the good news, but shortly after the school bell rang, a message came by wire telling her of Mr. Clarke's death. About that time, No. 3 arrived and fortunately for Mrs. Clarke, the engine had to be backed down to the chute to coal up and that delay gave her time to hurriedly prepare and depart. Interment of the remains will be made at Los Angeles.

## Corona Notes

The Corona schools will give a number of plays and programs before the closing of school. On April 25, the eighth grade will give a play, intermingled with musical numbers; on May 2, the high school will give "The Arizona Cowboy"; on May 3, the junior-senior banquet will take place; on May 10, the senior class will give the play, "Whiskers"; on May 11, Rev. N. A. Coxe of Vaughn, will deliver the Baccalaureate Sermon.

During commencement week, we will have a gymnasium exhibition on Monday evening; eighth grade on Tuesday evening; grade exercises on Wednesday evening and high school commencement on Thursday evening. All exercises with the exception of the sermon will occur on the evenings of dates mentioned, but the sermon will occur at 11 o'clock Sunday morning, May 11.

The Freshman Class will give a box supper and dance on the 19th of this month, to which all are invited and a good time assured.

This office is in receipt of a letter from George Ferguson, who was once Carrizozo's gloom-chaser and joy-maker, who now resides at Tucumcari. George still tickles the piano keys, and welcomes the regular visits of his Outlook. More power to him!

J. Bert Luck, Grand Master of the I. O. O. F., will be here on Monday, April 22. — Important.

## PATHFINDERS FOR RELIABILITY CONTEST WERE HERE

H. E. Dustin, manager of the El Paso Herald's automobile reliability and endurance contest, accompanied by John Harms and C. H. Lester, pathfinders, or in other words, the parties who mapped out the route over which the cars will travel in the endurance contest during the month of May, were here last Sunday.

On the 20th of May, the cars, 60 in number will reach Carrizozo, this being their night control for that date. This visit from the contestants will bring 150 and possibly 200 people to our town which calls for a liberal display of hospitality on our part toward the strangers within our gates. President Sweet and Secretary Brownfield of the Carrizozo Commercial Club are now at work on plans for entertaining the visitors. Among other things thought of and which has been decided on is a grand ball at Lutz Hall, where other means of hospitality will be extended to make our guests feel at home during their brief stay. Let us not fail to show them the glad hand and cause them to remember a pleasant reception in Carrizozo.

Chas. Henry Lutz, receiver of the Roswell Land Office spent the major portion of last week with his parents, Mr. and Mrs. Henry Lutz of the Carrizozo Trading Co. and sister, Miss Belle Lutz. He had intended to stay until the last of the week, but left on an unexpected call from the office.

Prof. and Mrs. F. S. Copeland of the Capitan high school, R. E. Robbins of the Lincoln consolidated schools and L. M. Stone of the Nogal school, were the educators here last Saturday.

O. W. Bamberger, now a resident of Amarillo, Texas, spent Saturday and Sunday with the Henry Lutz family. The Bambergers are very much pleased with their new home and little Billy says he wants his grandpa Lutz, to move his house over to Amarillo.

Mrs. Sarah Upatke, whom her many Carrizozo friends will more readily remember as Miss Sarah Spence, is now a resident of Niles, Mich., and conveys her regards to friends through the Outlook, to which she is a regular subscriber in order to keep in touch with the home news.

## Attention Masons

There will be a regular communication of Carrizozo lodge, No. 41, A. F. & A. M., Saturday night, Apr. 19. All Masons are cordially invited.

Messrs. L. M. Stone, A. B. Zumwalt and Frank McDaniel were visitors here from Nogal on Tuesday.

## Card of Thanks

We wish to return our thanks to the many kind friends who offered words of consolation and ministered to us with Christian sympathy and assistance during our recent bereavement in the loss of our darling baby; also for the beautiful floral offerings at the last sad rites.

My and Mrs. Walter Barnett. Henry Lutz was among the El Paso visitors this week.

# Army Flyers Test Out New Devices

## Aviators Guided Above Clouds by Instruments.

Dayton, Ohio.—Lieut. Eugene Barkdale and Bradley Jones, who made the record non-stop flight of 3 hours 45 minutes for the 375 miles from McCook field, Dayton, Ohio, to Mitchell field at Minnea, recently, made their return trip in the army DeHavilland navigation plane.

Mr. Jones is navigator in the flight. He is instrument engineer at McCook field and has devoted much time to the perfection of instruments which will make long-distance flying safer and more accurate.

Mr. Jones said that the flight record was of secondary importance.

### Compass Aids Pilot.

"The real object of the trip was to test on a long flight our two new instruments, the earth inductor compass and the flight indicator," said Mr. Jones. "These instruments have been in process of improvement and testing for about a year by the army aviation staff and they are now deemed satisfactorily perfect to be made for general use in the government aviation service. The only thing lacking is an appropriation to make them."

"The first 450 miles of the journey was above the clouds. That was just what we wanted for the instrument test so as to be cut off from landmarks, such as rivers or railroads. We rose above the clouds at once after leaving Dayton. We practically did not see the land again until after crossing the Susquehanna river in Pennsylvania.

"The purpose of the flight indicator is to show the pilot whether he is on a level course. In making a perfect spiral or turn there is no loss of balance, but it is difficult to tell whether the plane is skidding or slipping off of the true balance except under extreme conditions. The flight indicator shows the pilot whether he is on the true-balance or not. It is worked on the gyroscopic principle. The instrument is about five inches in height by 1 1/2 inches wide and fixed to the dashboard. At the top is a needle which turns to the left and right, showing the direction level. Below that is a glass tube containing a steel ball which stays to the side toward which the plane is tipping.

### Compass Aids Pilot.

"Below the tube is an indicator to show the angle of the downward or upward flight."

The earth inductor compass, which has also been tried out for several months, was used for the first time in a long flight in the recent trip. It is placed on the tail of the machine to

avoid magnetic attraction of the motor and is connected by wires to an indicator on the pilot's dashboard. The compass enables the aviator to keep a straight course without observing landmarks and Mr. Jones said its value was clearly proved on the trip from Dayton as after 450 miles the plane was only eight miles off its exact course when it reached the Susquehanna.

Mr. Jones said that a third instrument, a sextant arranged to give a correct artificial horizon so that the exact location of the plane may be known, similar to the taking of latitude and longitude, also was tested on the flight. The aviator, according to Mr. Jones, never sees the natural horizon, due to the haze and topographical conditions.

## Kentuckian Loses Two Long Races With Death

Harlan, Ky.—Half way across a continent and back again in a losing race with death on both occasions was the experience within a few days of C. W. Williams, prominent business man of Harlan. When Mrs. Herbert Mitchell, Williams' sister, lay at the point of death in Chicago, he received a message calling him there, and started to

# Northern Lights Mystery Is Solved

## Savant Makes Green Line Like Aurora Borealis.

London.—Until now there has been no satisfactory explanation for the phenomenon known as the aurora borealis or the northern lights.

For a long time they were regarded as the spectra of a hypothetical gas, a tenuous mixture of hydrogen and helium, which was assumed to exist in the upper atmosphere. This gas was called geocoronium because the spectrum bore a close resemblance to the spectrum of the sun's corona.

In the winter of 1912 Lars Bégard, professor of physics at the University of Christiania, made a special photographic investigation into the northern lights. He came to the conclusion that the pale blue and violet rays were due to nitrogen that was being bombarded by electric rays emitted by the sun. But the spectrum also had a darker green line for which he was unable to account.

About a year ago he again took up

## Cattle Slaughtered in War on Disease

Spokane, Ore.—W. M. Lytle, state veterinarian, returned home recently from California, where he went recently to assist in the fight against the hoof-and-mouth disease. Doctor Lytle said conditions have improved materially and that the disease has been confined to a few districts.

Doctor Lytle brought with him to Salem a large number of photographs showing how entire herds were slaughtered and buried to avoid spread of the disease. The financial loss to live stock raisers was serious, Doctor Lytle said.

her at once. He reached Chicago a few hours after Mrs. Mitchell had died. Williams returned home and was resting from his hard trip and attendant sorrow when he received a message that his father, W. B. Williams of Lebanon, Va., was critically ill. Williams at once set out for his father's bedside, but a second vain trip resulted, the parent having succumbed a few hours before his son arrived. In the meantime, at Cawood, this county, Pauline Williams, a niece of Mr. Williams, had been burned to death. The three bereavements occurred within five days.

his investigations and received a subsidy from the Norwegian government which enabled him to carry out some very elaborate and expensive research. He succeeded in identifying at least thirty out of thirty-five lines in the spectrum as being due to nitrogen, so that the geocoronium theory could be abandoned.

He found that the green line reached its greatest intensity nearest the earth, but its true nature remained a mystery.

As he could not conceive that nitrogen gas of sufficient density could exist at such a height as to produce a luminosity so brilliant as the aurora borealis, he came to the conclusion that the nitrogen was not present in the form of a gas, but in the form of a fine dust made up of infinitesimally minute crystalline particles that were kept suspended by electric charges.

The temperature one or two hundred miles above the surface of the earth approaches the absolute zero—that is to say —273 degrees C. In such a temperature tenuous nitrogen would condense into crystals such as those imagined by Bégard.

### Went to Leyden.

To find confirmation of his tentative assumptions, Bégard tried to reproduce artificially the conditions on which they were based. He went to Leyden and worked in the famous laboratory of the Dutch scientist, Heike Kamerlingh Onnes, a winner of the Nobel prize, who in the year 1903 succeeded in liquefying helium at a temperature of —271.95 degrees C.

Nitrogen freezes at —210 degrees C. With the help of liquid hydrogen Bégard was able to reach this temperature, and produced a thin plate of solid nitrogen. He subjected this plate to cathode rays of varying swiftness, and found that with a certain swiftness the spectrum was identical with that of the northern lights.

Even the green line, which may now be taken as characteristic of the solid nitrogen spectrum, was present. It would therefore seem that the mystery of the northern lights has been solved at last.

## Keeps Fire With Shoes

Minneapolis.—He picked up an old shoe and placed a lump of coal in the toe. Then he took careful aim, tossed the shoe into a stove, glanced at the blazing fire, and went on about his tasks. "It's an invention," Victor Abrams explained. "The coal lasts twice as long, and makes a better fire. It's the best way to beat the coal man you ever saw. Especially if you happen to have a good supply of old shoes." Abrams operates a shoe repair shop.

## Many Vegetables Injured by Pests

### Diseases and Insects Must Be Fought Until Crops Are Harvested.

(Prepared by the United States Department of Agriculture.)

From the time the seeds of garden crops are put into the ground until the crops are gathered, diseases and insects that must be fought may appear. Vegetable troubles are due to numerous causes, including unfavorable soil conditions, too wet or too dry, too rich or too poor, lack of humus or of lime, whether unsuited to some crops, careless use of fertilizers, or attacks of fungi or other parasites. The adoption of the best horticultural practice—crop rotation, the careful application of fertilizers suited to each crop, adequate cultivation, the planting of all crops in their proper season—is important for the successful growing of garden crops.

### Special Treatment Required.

The control of diseases due to fungi, bacteria, and other enemies requires special additional treatment, as does the damage caused by insects. A new bulletin has just been issued by the United States Department of Agriculture, as Farmers' Bulletin 1371, Diseases and Insects of Garden Vegetables, the purpose of which is to present briefly control measures for the most important insects and fungous and bacterial diseases of the home-garden vegetable crops.

The use of disease-free seed and plants, says the author of the bulletin, is fundamental to all insect and disease control. A modified application of the principle of crop rotation can be made even in the home garden by moving the rows of each vegetable to another place each year. Many diseases and insects live over winter in the soil and will appear on the plants again next season if they are in the same soil. Furthermore, since many of the pests of closely related crops are the same, such vegetables should not be planted in succession. Vine crops, such as cucumbers, melons, etc., should not follow one another, nor should cabbage, cauliflower, or related crops follow one another.

Numerous important diseases are carried in or on the seed and cannot be controlled by seed treatment, such as bean anthracnose, pea pod-spot, and potato leaf-roll and mosaic. It is therefore essential to secure the most disease-free seed obtainable.

### Methods of Control.

In presenting the methods of controlling insects and diseases the bulletin discusses them under two headings, "Treatment" and "Prevention." Under "Treatment" are discussed the methods of control which may be applied after the disease or insects have appeared in the garden, such as the use of poisoned bait for cutworms, the hand picking of insects, and spraying for disease and insect control. Under "Prevention" are included all measures of control applied prior to disease or insect appearance which will tend to hinder or stop the development of diseases and insects or prevent their overwintering to attack the next season's crops, such as planting disease-resistant, disease-free, and weevil-free seed, treatment of seed to kill insects and diseases, or planting crops on parts of the garden free from the pests.

A copy of the bulletin may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

## Great Value of Silage in Wintering Beef Cows

The value of silage feeding is shown forcefully by recent data furnished by the bureau of animal industry, United States Department of Agriculture. In the wintering of mature beef cows in West Virginia it has been shown that corn fed as silage is worth 60 per cent more than shock corn. In growing beef calves in Illinois an acre of corn silage was found to be worth 30 per cent more than an acre of shock corn. This increased utility is attributed to the many advantages of silage. Practically no waste occurs in the feeding of silage and it creates an appetite for cheaper roughages. Then, too, the same crops fed dry are not nearly so palatable and succulent as they are in the form of silage.

## New Legume Is Fine for Pastures in Middle West

A new variety of lespedeza imported recently from Korea by the bureau of plant industry, United States Department of Agriculture, was tried out at Purdue university last year. This variety has a great deal of promise for use in seeding with pasture crops, according to Purdue crop specialists. It grows large and matures seed two weeks earlier than other varieties so can be used in every part of the state. It stays green during dry weather and produces a lot of feed when other crops are dried up. This characteristic together with the fact that it has a tough fibrous root system and the ability to reseed itself and spread over thin pasture lands makes it a valuable legume for the Middle West.

## Good Protein Supplement

Licensed oil meal is slightly more valuable than cottonseed meal as a protein supplement and should be used in place of it if the prices are about the same. A combination of the two feeds is desirable in any proportions and not more than 2 1/2 pounds per 1,000 pounds live weight per day is necessary to balance such a ration.

## Electric Current Is Not Helpful to Seed

### Claims of Increased Yields Not Substantiated.

(Prepared by the United States Department of Agriculture.)

Claims made by some investigators that treating the seed of small grains with electricity increases the yield have not been substantiated by results of experiments by the United States Department of Agriculture. A process patented and brought into use in England in 1917 under the trade name "Wolfryn Electrochemical Process" has been well advertised in that country, Canada, the United States, and Australia. The process consists in subjecting the seed grain to an electric current (DC) passing through a conducting solution in which the seed is immersed. Some reports indicated that this electrochemical treatment increased the yield 20 to 30 per cent and reduced the losses from bunt, rust and wireworms.

The experimental methods adopted by the United States Department of Agriculture to determine the value of such treatment and the results obtained have just been published in Department Circular 305 which is now ready for distribution. The investigators conclude with the statement: "Data obtained from replicated plots of winter wheat harvested at the Arlington Experiment farm in 1921 and 1922 showed no benefit or profit resulting from treating the seed electrochemically by the so-called 'Wolfryn' process. Grain yields from all plots sown with electrochemically treated seed averaged 1.1 bushels per acre less than yields from plots sown with untreated seed. No effect of the treatment on plant growth or disease infection could be observed."

A copy of the circular may be secured, as long as the supply lasts, from the United States Department of Agriculture, Washington, D. C.

## Importance of Oats in One Rotation of Crops

Being engaged as we are in general farming, we find oats play a very important part in our rotation of corn, oats and grass, or clover, because they act as a nurse crop to the hay.

Oats form the main grain ration of most farm animals, being more of a muscle-building than a fattening food, writes Birney Marble in the Michigan Farmer. For years we have fed them ground to the work horses, mixed with corn to the dairy cattle, and with bran and milk to the poultry.

During the winter we feed oat straw with a little timothy to the work horses to "winter them over" when not at work of any kind. The straw that remains uncut is used for bedding, being unexcelled for this purpose as it absorbs liquids easily, readily rots in the manure and has a high fertilizing value.

To put it all in a nutshell, we grow oats because they are a square peg in a square hole, being well adapted to both the Michigan climate and our needs, as we can use both the grain and straw to a better advantage than that of any other grain.

## See Increased Interest in Use of Fertilizers

Among the concrete results of extension work along agricultural lines which may be cited is increased interest on the part of farmers in the work with soils and in the use of commercial fertilizers. During the year 1922, according to the United States Department of Agriculture, 218,000 farmers consulted their county agricultural agents in regard to the use of commercial fertilizers. In addition, farmers conducted 15,235 fertilizer and 4,035 lime demonstrations.

As a result of the activities in connection with lime, 43,000 farmers used 630,000 tons according to the methods advocated by the agents. In addition to the above, 103,000 farmers modified their methods of soil management. In order to maintain and improve soil conditions, 3,750 drainage systems, involving 575,000 acres, and 25,000 pieces of terracing, involving 443,000 acres, were carried out according to the methods outlined by the extension forces.

## Farm Hint

Never begin a garden. Keep it going all the time.

Order plenty of seed, get lettuce and radishes by the ounce.

The field is an expensive germination tester for corn seed.

As never before "The reading farmer is the successful farmer."

If you never grew any of the big winter radishes, try a packet of seed this year. Plant it in June.

And while you are planting don't forget to plant some new thoughts in your mind about better farming.

Early spring is the best time to stop "pulling fodder"—by preparing for ample summer and fall hay crops.

The farm bulletin board is a good method of advertising farm products, but the local newspaper is better still.

Even if frost kills your fruit afterwards, it's better to have sprayed and lost than never to have sprayed at all.

# SPRING TIME IS TONIC TIME

The System Needs "Spring Cleaning" Just as the Home Does. TANLAC Has Been Called the World's Greatest Tonic by Over 100,000 Persons, Who Have Testified That Tanlac Has Helped Them Regain Their Strength and Health.

## DON'T GAMBLE WITH YOUR HEALTH; DEMAND THE BEST

Tanlac Has Benefited Thousands of Persons Suffering From Stomach Trouble, Indigestion, Rheumatism, Nervousness and Kindred Ailments—Tanlac Is for Sale by All Good Druggists—Accept No Substitute—Over Forty Million Bottles Sold.

**Foe of Whistling Fined**  
Angelo Gonzales owns a shoe factory in Mexico City and abhors whistling. When two of his employees forgot this recently and whistled at their work Angelo discharged them. But, according to Mexican papers, the labor commission decided that whistling was not sufficient ground for dismissal, and Senor Gonzales had to pay his employees three months' wages as compensation.—New York Times.

**Cuticura Comforts Baby's Skin**  
When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

**Give "Jazz" Funeral**  
A jazz band played "Yes, We Have No Bananas" and "Ain't We Got Fun," at the funeral of Jules Tanot, theater owner of Amiens, France. M. Tanot's will obliged his heirs to fulfill its conditions of a jazz funeral, with a full brass band, although the good people of Amiens and the surrounding country were shocked.

A man with a black eye is up against the dark side of life.

# Aspirin

Beware of Imitations!

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-three years for

Colds Headache  
Toothache Lumbago  
Neuritis Rheumatism  
Neuralgia Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer, Manufacturer of Monoaceticacidester of Salicylicacid.

Removes Grease, Oil, Dandruff, and all scalp impurities. Keeps Hair Clean and Healthy. Sold in 15c and 25c Bottles. W. N. U. DENVER, CO.

## Answer All Kinds of Odd Questions

Here is the corner of the civil service commission where approximately 2,500 pieces of mail are received daily, many containing such unusual requests as, "Will you please send me a new buffalo nickel?" "Can you help me secure radio equipment I made payment for to an advertiser, who has not come across?" and "Who are the members of the United States Supreme court?" J. H. Walters and J. Fishman, shown in the photograph, are instructed to serve all inquirers to the best of their ability.

## INVENTS NEW ELECTRIC PHOTOGRAPH DEVICE

### Engineer's Odd Machine Is Called Klydonograph.

New York.—Photographs of electrical disturbances can be made in twenty billionths of a second, it was announced. Such photographs can be made without light.

The shell fired by the German "Big Bertha" at Paris could travel but five-thousandths of an inch in twenty-billionths of a second, not fast enough to make the movement visible in that space of time.

In one fifty-millionth part of a second light travels two and a half feet, although it could encircle the globe seven times in one second.

The electrical photography device is called a klydonograph.

turbances may be brought into contact with the sensitized side of the plate. No light is needed. Electrical disturbances can photograph themselves. Little is known of the reason, but it appears to involve a principle somewhat similar to that involved in X-ray.

"When surges occur in transmission lines they photograph themselves," Mr. Peters said. "I have never detected visible light in the camera while photographing a surge. Therefore, impulses must contain some property in themselves that affect the plate."

"The instrument for taking photographs," continued Mr. Peters, "is the only practical device for obtaining data in regard to that type of line disturbance known as surges."

"Photographic plate now gives the characteristics of surges, thus giving engineers data with which to devise line protection. The device is applicable to transmission lines of all kinds and is connected to them by means of an electro-static potentiometer.

"Surges last twenty-billionths of a second or possibly longer. The klydonograph can register them."

## Erects First Church

Plainfield, Wis.—The village of Dexterville, northwest of here, is raising money to build a church. Dexterville was founded in 1848. Last year, when the village school was supplanted by a modern structure the old building was turned over to the Union Sunday school. Now it has been decided to tear it down and use the lumber for a church.

## African Tribe Starving

Johannesburg.—Owing to drought and destruction of grass by locusts, a native tribe in northwestern Transvaal is starving. The tribesmen are eating locusts, caterpillars and ants to keep alive. The tribe, numbering some thousands, owns 2,000 acres.

## Forest Protection

President Coolidge has proclaimed the week of April 21-27, inclusive as Forest Protector Week in order to draw attention to the large annual destruction caused by forest fires and to secure the co-operation of the public in exercising care while in the forests.

Now, that the season approaches for outings of different kinds in the nearby mountains and canyons, the greatest of precaution must be used against the destruction to our forest timber lands. The act of building a fire on a picnic or on a business journey in the forest is a necessity, but the danger occurs from neglecting to put out the fire properly. You may think your fire is entirely out but let a strong wind arise and the smoldering embers will be fanned into life long after you have departed and before you are aware of it the dead grass from the past winter months, works its way to where you are after care of valuable timber land is destroyed.

The New Mexico law stamps the ignoring of forest preservation as a misdemeanor and fixes the penalty at from \$25 to \$500 fine besides imprisonment in the county jail for 15 days. Advice along the way will, if adhered to, not only help, but finally terminate the destruction which has been going on at such an alarming rate. After a jovial outing in the mountains and the merry-makers take their leave, no fire is considered out, if no flames are visible and they depart with little or no thought given to the matter.

On preparing to leave the camp, the fire should be thoroughly extinguished and besides, it should be covered up with dirt, and the ground for a safe distance around the fire-bed dug up, so that if a high wind should arise, sparks might not fly beyond the turned-over ground and this would be a safeguard. Picnic parties should always provide themselves with a shovel or two for this purpose. Treat the forest as though it were your own and do it this thought will not help greatly. If water is handy, thoroughly soak the old fire-bed after throwing loose dirt over it. Protect the forests!

## Walking Tractor

In place of front wheels, a farm tractor invented by a Swedish engineer, has two steel 'legs' that walk in almost human fashion. They are actuated by the motor that drives the two rear wheels and may be fitted with gears of various changes best suited to give the most traction in different kinds of ground. The tractor pulls a plow which is guided by a man walking behind. —Popular Mechanics.

## How's This for Business?

Detroit, Mich., April 8. — Retail deliveries of Ford cars and trucks in the United States during the month of March reached the record-breaking total of two hundred five thousand seven hundred thirty-five, it was announced by the Ford Motor Co. here today. Nothing in the history of the automobile industry compares with this remarkable record.

The significant feature developed during the last ten days of the month when sales averaged 10,804 cars and trucks a day, indicating that the spring buying rush has begun and that under this enormous demand, production of the company will be taxed to the limit in an endeavor to meet the heavy flood of orders.

**MORE TRUTH THAN POETRY**  
In this old world with its steady grind, it is better to be ahead than a little behind.

There is a good deal of truth in that, no matter what you may think of it as "poetry." How can you get ahead? The answer is plain--Save! Unless you do, you will always be a little behind. Save a little, no matter how small your earnings. Then place the savings in a reliable savings bank like ours where it will be safe. No matter how small the amount, you will be the ahead instead of behind to the thing to do. Try it.

This paper pleads guilty to an omission in our last issue, in our failure to announce the revival meetings now in progress at the Methodist Church. No man should begin a great and important undertaking, without first invoking the blessing of the Deity and how this can be done while one nurses an unforfeiting spirit toward his brother's sins of omission, is beyond our understanding. There was no copy brought in for the announcement, only a verbal request, and in the rush in getting the week's news together, the notice was overlooked. We offered to rectify the omission by a certain act of good faith, but it was spurned--therefore, we have no other means of apology. We regret this unfortunate occurrence.

# "Spring-Tide Birds Are Singing"

**Spring-tide Birds Are Singing, Singing**

Copyright 1922 by John Dickinson Oherman

Lo, no mystery of things is veiled  
Behold, Thy tongue speaks  
No confounding, Thy hand  
Writes but one script,  
And it is Truth  
Aye, and I know that the rebirth  
Of earth comes into creation  
Of living things is Thy restoration  
Patience Worth

By JOHN DICKINSON OHERMAN

THE singing of Easter carols is likely to become popular in the United States. Christmas last year was marked by a tremendous revival of the singing of carols all over the country. And if Christmas carols, why not Easter carols? "Spring-tide Birds Are Singing, Singing," is an Easter carol translated from the Greek by Rev. Philipps Onslow. The music was written by Rev. W. Namerode. The second stanza relates how Holy women sought Him weeping, and how the Angels reassured their tears with the greeting, "Christ is risen. He is not here." Succeeding stanzas tell of the Apostles. The sixth and final stanza is this:

Christ is risen, Christ the living,  
All his mourners' tears to stave,  
Christ is risen, Christ forgiving,  
Wipes the stain of sin away,  
Christ is risen, Christ to crown,  
His a long triumph now to wear,  
Christ is risen, Death's dark prison  
Holds His faithful never more.

Musical literature is rich in splendid compositions suitable for Easter caroling. One of the oldest—possibly the oldest—dates from approximately the year 750. It was written originally in Greek by one of the great hymn writers of the Eastern church, John of Damascus. The translation into English was made by John Mason Neale, who did so much to make the treasures of ancient church song accessible and usable for English-speaking people. The first line runs, "Come ye faithful, raise the strain." The melody generally used was written by the late Sir Arthur Sullivan, whose adaptations to various great oratorios and grand operas were quite ignored by the public that knew him primarily as the composer of the inimitable Gilbert and Sullivan light operas, "Pinafore," "Patience," "The Mikado," and the rest.

Another carol, more familiar, has been assigned to the Twelfth century, and was originally written in Latin. Its exact date and authorship are unknown. There have been a number of English translations; the most familiar one being "The strife is o'er, the battle done." The melody is taken from a sixteenth century composer whose name, after going through many metamorphoses, has finally crystallized into Palestrina. His music was of such originality, poetry and power, that his influence quick-dominated ecclesiastical music for centuries, and his style is still regarded by many as the ideal for the purest church music. This carol, with its triumphant, "Alleluia," possesses an unmistakable dignity coupled with serious devotion.

A familiar carol is "Christ the Lord Is Risen Today, Alleluia" by Charles Wesley. The tune for this carol, including the word "Alleluia," comes from an old collection called "Lyra Davidica," published in 1708.

A friend and fellow worker of Charles Wesley was Edward Perronet, the writer of the famous "All Hail the Power of Jesus' Name." This hymn appears in a small collection of Perronet's hymns published by himself, and is there entitled "On the Resurrection." The collection itself, according to its title page, was "published for the instruction and amusement of the candidly serious and religious." Although he belonged to the Church of England, he joined in the Wesleyan movement, and John Wesley's diaries refer to him frequently. One reference to him is, "Edward Perronet was thrown down and rolled in mud and mire. Stones were hurled and windows broken" at Bolton, where they had tried to preach. Two tunes compete for the privilege of use with this hymn. The one most widely used in this country is called "Resurrection." John Wilton wrote a fine hymn, "Welcome, Waggly Morning, Age to Age Shall Sing," based with

## LOST WEDDING HOUSE EGG-ROLLERS

freedom, yet with fidelity of spirit, upon the "Salva festa dies," this hymn, by Venantius Fortunatus (died 609) is even earlier than the one by John of Damascus, and in Ellerton's version, fully as inspiring.

The celebration of Easter comes easy for the average man and woman. And not all who celebrate it do their celebrating in church or with religious rites. For the celebration of the coming of spring is as old as the human race. The religious observances, as established by the churches, are comparatively modern. Christianity took the pagan spring celebrations of the ancient world and remodeled them, which was not only wise but easy.

From the beginning of time man has rejoiced at the turn of the year, when the sun began to come back to him. The winter, of course, was a time of discomfort, of food scarcity, of restricted activities. With the lengthening days, after a and the springing up of the green things, man took on fresh courage and began anew. It is small wonder that practically all the peoples of the ancient world were sun-worshippers. During the winter, man may have been likely to say with Ecclesiastes:

One generation passeth away, and another generation cometh.  
The sun also ariseth and the sun goeth down, and hasteth to his place where he arose.  
The wind goeth toward the south, and turneth about into the north; it whirleth about continually.  
All the rivers run into the sea; the sea is not full; unto the place from whence the rivers come thither they return again. All things are full of labor, man cannot utter it.

But in the spring all is changed. Each man feels a sort of physical resurrection in himself. "I have risen from a world of cold and of gloom and of dead things to a world of warmth and of light and of life things. I renew my strength with the spring. Now for another try with fortune." So says a voice within him. And so man rejoices with the coming of spring and celebrates his Easter, with or without religious rites.

The shroud of winter melts into the past. Blue skies replace the gray. And then, rejuvenated, Spring returns. For this is Nature's way. At Easter when the woods and gardens wake and verdure's voice knoll. The fresh, young voice of Springtime speaks and says:

"So is it with the soul."  
Moreover, deep in the heart of man is planted the wish for immortality and the hope of it. And at Easter this wish and this hope blossom anew. A future life is a matter of faith rather than of scientific proof. If it is a vain hope, it is strange that the faith should be so universal, and so confident, as Tennyson puts it:

Thou wilt not leave us in the dust;  
Thou modest man, thou knowest not why.  
He thinks he was not made to die,  
And thou hast made him. Thou art just.

Some of us hope for a future life because of our dread of separation from those we love. "Etil death doth us part," runs the beautiful marriage service—and even in this age of divorce the words are no empty phrase. And when those we love have already gone before faith in a world to come is a comfort, if not an antidote for grief.

When Easter comes, we kneel beside our graves, where lies such precious dust. And say while strewing fragrant flowers, "Because the Christ arose, ye must!"

This Easter there are many whose thoughts will turn to graves. "Over There," where rest our soldier dead of the World war.

O Mary, weeping now in stricken land!  
Your pleading voice cry, "Where is he laid,  
The young, the strong, the brave, he who obeyed  
His country's call, went forth at her command?"  
But ask it not—he is not where he falls.  
And seek him not among unnumbered dead—  
Whose dust is marked—a cross above each head—  
He may stand close beside thee, who can tell?

Billie Brownie had not finished reading the last copy of Natureland News. He had stopped to have a drink of fresh spring water, and then the Moon had come out and every one had felt like a Moonlight Dance, and so the reading of the news had been put off.

But everyone wanted to hear more that was in the Natureland News and so they all gathered around Billie Brownie so he would read and tell them what else had happened. There were Old Mr. Grant and Witty Witch, Fairy Princess Joy, Fairy Princess Twilight-Bell and all of the others of Fairyland and Brownie and their neighbors and little fairy friends. Billie Brownie took out the birch-bark copy of the News and began to read:

"This," he said, "is the personal column. It tells of different people in Mother Nature's world."  
He cleared his throat as he always did before he began to read and as he often did between stories and items which he read.

"Born to Mr. and Mrs. Robin, at Tree Number Five, Near-the-Old-White-House, Four Lovely Birdlings. Before Mrs. Robin's marriage she was the Robin Belle of Spring Orchard, and her marriage to young Mr. Robin, a splendid, promising young robin, was one of the events of the season."

There was a pause and Billie Brownie continued:  
"From the Ocean, special dispatch to the Natureland News, comes this story of horror and yet of strange, wild strength:  
"A Pair of Killer Whales, though smaller than the Sperm Whales, and small for Whales as it is generally known, attacked and killed a Sperm Whale much larger in size."

And here Billie Brownie waited while all of those listening said:  
"Horror! Horror! Such horrors!"  
Billie Brownie went on reading now in a different tone of voice, for his voice as he had read the last piece of news had been very deep and really quite dreadful.

"The Japanese cherry trees in the City park are very beautiful now, and many are the visitors who stop to admire them."  
"The Pear Trees in some sections of the country where they have been found to grow quite wild are as beautiful as they can be and wish to state that life in the country, growing wild, has not made them wild in their ways."  
"This," Billie Brownie added, "is quite true, too." Then he took another sip of water and after another moment went on reading:

"Dogs and Cats have sent word to the Natureland News asking us to give space to their appeal. The News is only too glad to do so. This is their appeal:  
"People! People who own automobiles! We beg of you to consider us. Do not think it is funny to scare us as you sometimes do by almost, almost running us down. We do not think it is funny to frighten any one. We have seen some of you laugh at our fear and at the crazy frightened way in which we act at times."  
"People! People who own automobiles! Think of what it would be like if you were almost run over or terribly scared and be thoughtful to us."  
"We want to think well of you, people. We do not want to think you are cruel. Signed, Dogs and Cats."

"That's a good appeal and we hope every one will heed it," the Fairyland people said.  
"And here," said He Took Another Sip, Billie Brownie, "is an advertisement:  
"Buy your hats and dresses here. We have the latest styles. Madame Spring Season."  
And they all thought there really was quite a lot of news in the paper.

**A Thorough Job**  
Father was annoyed. His expensive gold watch had failed him. It wouldn't go at all.  
"I can't think what's the matter," he complained, "Maybe it needs cleaning."

"Oh, no, daddy," objected four-year-old Henry. "Cause baby and I had it in the bathroom washing it all day yesterday."

**Because of the Draft**  
Jack—You've got a bad cold, Pete.  
Pete—Yeh.  
Jack—How'd you get it?  
Pete—I slept in a bed last night and some one left the gate open.

## MORE NEWS

Billie Brownie had not finished reading the last copy of Natureland News. He had stopped to have a drink of fresh spring water, and then the Moon had come out and every one had felt like a Moonlight Dance, and so the reading of the news had been put off.

But everyone wanted to hear more that was in the Natureland News and so they all gathered around Billie Brownie so he would read and tell them what else had happened.

There were Old Mr. Grant and Witty Witch, Fairy Princess Joy, Fairy Princess Twilight-Bell and all of the others of Fairyland and Brownie and their neighbors and little fairy friends.

Billie Brownie took out the birch-bark copy of the News and began to read: "This," he said, "is the personal column. It tells of different people in Mother Nature's world."

He cleared his throat as he always did before he began to read and as he often did between stories and items which he read.

"Born to Mr. and Mrs. Robin, at Tree Number Five, Near-the-Old-White-House, Four Lovely Birdlings. Before Mrs. Robin's marriage she was the Robin Belle of Spring Orchard, and her marriage to young Mr. Robin, a splendid, promising young robin, was one of the events of the season."

There was a pause and Billie Brownie continued: "From the Ocean, special dispatch to the Natureland News, comes this story of horror and yet of strange, wild strength:

"A Pair of Killer Whales, though smaller than the Sperm Whales, and small for Whales as it is generally known, attacked and killed a Sperm Whale much larger in size."

And here Billie Brownie waited while all of those listening said: "Horror! Horror! Such horrors!"

Billie Brownie went on reading now in a different tone of voice, for his voice as he had read the last piece of news had been very deep and really quite dreadful.

"The Japanese cherry trees in the City park are very beautiful now, and many are the visitors who stop to admire them."

"The Pear Trees in some sections of the country where they have been found to grow quite wild are as beautiful as they can be and wish to state that life in the country, growing wild, has not made them wild in their ways."

"This," Billie Brownie added, "is quite true, too." Then he took another sip of water and after another moment went on reading: "Dogs and Cats have sent word to the Natureland News asking us to give space to their appeal. The News is only too glad to do so. This is their appeal:

**Grund Dry Cleaning**

"DENVER'S EXPERT DYER"  
If you want satisfactory dyeing and cleaning, send it to "GRUND." Wholesale dyeing. Special 2-day service parcel post. Men's Suits Cleaned and Pressed, \$1.00

**INFORMATION DEPARTMENT**  
Commercial inquiries answered and information gladly furnished without cost. Address any firm above.

**WEALTH OF NATION IS ESTIMATED AT 320 BILLIONS**

Washington, D. C., April 2.—The Department of Commerce announces, for the United States, its preliminary estimate of the value, Dec. 31, 1922, of the principal forms of wealth, the total amounting to \$320,893,862,000, as compared with \$186,299,604,000 in 1912, an increase of 72.2 per cent.

Per capita values increased from \$1,950 to \$2,019, or 49.9 per cent. The total amount of the estimate for 1912 as here shown is less than the amount shown in the report for that year by \$1,489,407,000, due to a revision now made for that year in the value of taxed real property in the state of Oklahoma.

All classes of property increased in value from 1912 to 1922, except live stock, which decreased from \$6,238,389,000 to \$5,807,104,000, or 6.9 per cent. The estimated value of taxed real property and improvements increased from \$96,823,406,000 to \$165,908,625,000, or 60.9 per cent; exempt real property (exclusive of National parks and monuments) from \$12,313,520,000 to \$20,505,810,000, or 66.5 per cent; farm implements and machinery from \$1,368,225,000 to \$2,604,038,000, or 90.4 per cent; manufacturing machinery, tools, and implements from \$6,001,451,000 to \$15,763,260,000, or 160.1 per cent; and railroads and their equipment from \$10,148,532,000 to \$19,950,800,000, or 23.5 per cent.

Privately-owned transportation and transmission enterprises, other than railroads, increased in value from \$9,572,855,000 to \$13,607,570,000, or 42.1 per cent; and stocks of goods, vehicles other than motor, furniture and clothing from \$34,334,291,000 to \$78,083,607,000, or 121.3 per cent. No comparison is possible for the value of motor vehicles, which was estimated in 1922 at \$4,507,407,000, because no separate estimate was made in 1912.

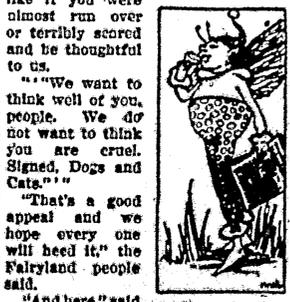

**Boles Paper Wins School Contest**  
Boulder.—The Pepper Box, official publication of the Boles, high schools, was awarded first prize in the makeup contest conducted by the Rocky Mountain Intercollegiate Press. The Holtonian of Holton, Kan., was awarded second prize. The Fort Collins high school publication, Spillover Ink, was given the third award, and fourth prize went to the Spotlight, published by the East Denver High school. The South Denver High school publication was awarded eleventh place.

**Stringent Quarantine Program**  
Salt Lake City, Utah.—Machinery for combating the foot-and-mouth plague, now epidemic in California, went into operation with the departure for their respective states of representative stockmen after a three-day conference here, which resulted in the creation of a stringent quarantine program to prevent the spread of that disease.

**Seventeen Die of Poisoned Drinks**  
Toledo, Ohio.—Meyer Selzman, druggist, will be arraigned on a manslaughter charge for sale of denatured alcohol alleged to have caused the death of several persons here recently. Five more deaths brought the total to seventeen. Death of four others is expected momentarily. Selzman and his two clerks, Harry Porter and Martin Bracker, were arraigned in Federal Court for conspiracy to violate the prohibition law. Selzman and Bracker pleaded not guilty. Manslaughter charges will be placed against the clerks, Prosecutor Christensen intimated.

**Rainmaker Wins \$8,000**  
Fresno, Calif.—Charles M. Hatfield, who claims to be "maker of rain," announced from his rain-making plant in the hills eighteen miles from Coalinga that he had won \$8,000 offered by ranchers of that district for producing more than two inches of rain. The storm of Tuesday brought the average of the five gauges on which his contract is based to 2.2292 inches, he said.

**MRS. WOODROW WILSON BEQUEATHED \$100,000**  
Richmond, Va.—Henry Berghelmer, quaint old Swiss watchmaker and reputed to be one of the most adept of his craft in America, died recently in Washington, leaving a will in which he cut off without a penny his son and daughter and bequeathed to Mrs. Woodrow Wilson his entire estate. The estate, including his life insurance, is said to be valued at almost \$100,000.

**He Took Another Sip**  
Billie Brownie, "is an advertisement:  
"Buy your hats and dresses here. We have the latest styles. Madame Spring Season."  
And they all thought there really was quite a lot of news in the paper.

**A Thorough Job**  
Father was annoyed. His expensive gold watch had failed him. It wouldn't go at all.  
"I can't think what's the matter," he complained, "Maybe it needs cleaning."

"Oh, no, daddy," objected four-year-old Henry. "Cause baby and I had it in the bathroom washing it all day yesterday."

**Because of the Draft**

# ZEN OF THE Y. D.

A Novel of the Foothills

By ROBERT STEAD

Author of "The Cote Pacher"—"The Homesteaders"—"Neighbors," etc.

Copyright by ROBERT STEAD

## LIFE IN THE OPEN

Life in the open through the eyes of an author who is at once a man of affairs and a poet—that's "Zen of the Y. D." by Robert Stead. It's an adventurous life, for the scene is the Canadian West, where the open spaces are wide and the people grow large and individual to fill them. The author was born in Manitoba and has traveled all over that province and Alberta and Saskatchewan selling automobiles, so he knows the country well. Moreover, he's been a newspaper man in several cities of western Canada. And now he's an official of the immigration and colonization department of the Canadian government. But it is as a poet that Mr. Stead is best known; he is the author of "The Empire Builders" and many uncollected poems. Zen of the Y. D. is the girl of the story. The Y. D. ranch is so big and so well known that Y. D. is the only name current in the country round for the ranch, old Y. D. himself and his daughter. There are four men that Zen has to manage—Tranley, dominant and efficient; Linder, substantial, but not self-assertive; Drak, irresponsible and vicious; Grant, erratic, but lovable. And Zen has her troubles doing that managing.

## CHAPTER I

"Chuck at the Y. D. tonight, and a bed under the shingles," shouted Tranley, waving to the procession to be off.

Linder, foreman and head teamster, straightened up from the half load of new hay in which he had been awaiting the final word, tightened the lines, made a clucking sound in his throat, and the horses preceded their shoulders into the collars. Linder glanced back to see each wagon or implement take up the slack with a jerk like the cars of a freight train; the cushioned rumble of wagon wheels on the soft earth, and the noisy chatter of the steel teeth of the hayrakes came up from the rear. Tranley's "outfit" was under way.

Tranley was a contractor; a master of men and of circumstances. Six weeks before, the suspension of a grading order had left him high and dry, with a dozen men and as many teams on his hands and hired for the season. Tranley galloped all that night into the foothills; when he returned next evening he had a contract with the Y. D. to cut all the hay from the ranch buildings to the Fortia. Tranley traded his dump scraper for moving machines, and three days later his outfit was at work in the upper reaches of the Y. D.

The contract had been decidedly profitable. Not an hour of broken weather had interrupted the operations, and today, with two thousand tons of hay in stock, Tranley was moving down to the headquarters of the Y. D. The trail lay along a broad valley, warded on either side by ranges of foothills; hills which in any other country would have been dignified by the name of mountains. From their summits the gray-green up-tilted limestone protruded, whipped clean of soil by the chinooks of centuries. Here and there on their northern slopes hung a beard of scrub timber; sharp gulleys cut into their fastnesses to bring down the turbulent waters of their snows.

Some miles to the left of the trail lay the bed of the Y. D., fringed with poplar and cottonwood and occasional dark green splashes of spruce. Beyond the bed of the Y. D., beyond the foothills that looked down upon it, hung the mountains themselves, their giant crests pitched like mighty tents drawing placidly between earth and heaven. Now their four o'clock veil of blue-purple mist lay flamed about their shoulders, but later they would stand out in bold silhouette cutting into the twilight sky. Everywhere the silences of the eternal, broken only by the muffled noises of Tranley's outfit trailing down to the Y. D.

Linder, foreman and head teamster, cushioned his shoulders against his half load of hay and contemplated the scene with amicable satisfaction. The hay fields of the foothills had been a pleasant change from the railway grades of the plains below. Men and horses had fattened and grown content, and the foreman had reason to know that Tranley's bank account had profited by the sudden shift in his operations. Linder felt in his pocket for pipe and matches; then, with a frown, withdrew his fingers. He himself had laid down the law that there must be no smoking in the hay fields. A carelessly dropped match might in an hour nullify all their labor.

Linder's frown had scarce vanished when hoofbeats sounded by the side of his wagon, and a rider, throwing himself lightly from his horse, dropped beside him in the hay.

"Thought I'd ride with you a spell, Lin. That Pete-horse acts like he was going to see on the off front foot. Chuck at the Y. D. tonight?"

"That's what Tranley says, George, and he knows."

"Wink at at the Y. D.?"

"Wags."

"Know old Y. D.?"

"Only to know his name is good on a check, and they say he still throws a good rope."

George wriggled to a more comfortable position in the hay. He had a feeling that he was approaching a delicate subject with consummate skill. After a considerable silence he continued:

"They say that's quite a girl old Y. D.'s got."

"Oh," said Linder, slowly. The occasion of the soreness in that Pete-horse's off front foot was becoming apparent.

"You better stick to Peter," Linder continued. "Women is most uncertain critters."

"Don't I know it?" chuckled George, poking the foreman's ribs companionably with his elbow. "Don't I know it?" he repeated, as his mind apparently ran back over some reminiscence that verified Linder's remark. It was evident from the pleasant grimaces of George's face that whatever he had suffered from the uncertain sex was forgiven.

"Say, Lin," he resumed after another pause, and this time in a more confidential tone, "do you s'pose Tranley's got a notion that way?"

"Shouldn't wonder. Tranley always knows what he's doing, and why. Y. D. must be worth a million or so, and the girl is all he's got to leave it to. Besides, no doubt she's well worth having on her own account."

"Well, I'm sorry for the boss," George replied, with great soberness. "I allus hate to disappoint the boss."

"Huh!" said Linder. He knew George Drak too well for further comment. After his unlimited pride in and devotion to his horse, George gave his heart unreservedly to womanhood. He suffered from no cramping niceness in his devotions; that would have limited the play of his passion; to him all women were alike—of nearly so. And no number of re-

"Do You Suppose Tranley's Got a Notion That Way?"

buffs could convince George, that he was unpopular with the objects of his democratic affections. Such a conclusion was, to him, too absurd to be entertained, no matter how many experiences might support it. If opportunity offered he doubtless would propose to Y. D.'s daughter that very night—and get a boxed ear for his pains.

The Y. D. creek had crossed its valley, shouldering close against the base of the foothills to the right. Here the current had created a precipitous cutbank, and to avoid it and the stream the trail wound over the side of the hill. As they crested a corner the silver ribbon of the Y. D. was unraveled before them, and half a dozen miles down its course the ranch buildings lay clustered in a grove of cottonwoods and evergreens. All the great valley lay warm and pulsating in a flood of yellow sunshine; the very earth seemed amorous and content, in the embrace of sun and sky. The majesty of the view seized even the unpoetic souls of Linder and Drak, and because they had no other means of expression they swore vaguely and relapsed into silence.

Hoofbeats again sounded by the wagon side. It was Tranley.

"Oh, here you are, Drak. How long do you reckon it would take you to ride down to the Y. D. on that Pete-horse?" Tranley was a leader of men.

Drak's eyes sparkled at the subtle compliment to his horse.

"I tell you, boss," he said, "if there's any jackrabbits in the road they'll get tramped on."

"I bet they will," said Tranley, genially. "Well, you just slide down and tell Y. D. we're coming in. She's going to be later than I figured, but I can't hurry the work horses. You know that, Drak?"

"Sure I do, boss," said Drak, springing into his saddle. "Just watch me lose myself in the dust." Then, to

himself, "Here's where I beat the boss to it."

The sun had fallen behind the mountains, the valley was filled with shadow, the afterglow, mauve and purple and copper, was playing far up the sky when Tranley's outfit reached the Y. D. corral. George Drak had opened the gate and waited beside it.

"Y. D., wants you an' Linder to eat with him at the house," he said as Tranley halted beside him. "The rest of us eat in the bunkhouse." There was something strangely modest in Drak's manner.

"Had yours handed to you already?" Linder managed to banter in a low voice as they swung through the gate.

"H—I!" protested Mr. Drak. "A fellow that ain't a boss or a foreman don't get a look-in. Never even seen her. . . . Come, you Pete-horse!" It was evident George had gone back to his first love.

The wagons drew up in the yard, and there was a fine jingle of harness as the teamsters quickly unhitched. Y. D. himself approached through the dusk; his large frame and confident bearing were unmistakable even in that group of confident, vigorous men.

"Glad to see you, Tranley," he said cordially. "You done well out there. So, Linder! You made a good job of it. Come up to the house—I reckon the missus has supper waitin'. We'll find a room for you up there, too; it's different from bein' under canvas."

So saying, and turning the welfare of the men and the horses over to his foreman, the rancher led Tranley and Linder along a path through a grove of cottonwoods, across a footbridge where from underneath came the babble of water, to "the house," marked by a yellow light which poured through the windows and lost itself in the shadow of the trees.

The nucleus of the house was the log cabin where Y. D. and his wife had lived in their first married years. With the passage of time additions had been built to every side which offered a point of contact, but the log cabin still remained the family center, and into it Tranley and Linder were immediately admitted. The poplar floor had long since worn thin, save at the front, and had been covered with edge-grained fir, but otherwise the cabin stood as it had for twenty years, the whitewashed walls glowing in the light of two bracket lamps and the reflections from a wood fire which burned merrily in the stove. The sissas of a grizzly bear and a timber wolf lay on the floor, and two moose heads looked down from opposite ends of the room. On the walls hung other trophies won by Y. D.'s rifle, along with hand-made bits of harness, lariats, and other insignia of the ranchman's trade.

The rancher took his guests' hats, and motioned each to a seat. "Mother," he said, directing his voice into an adjoining room, "here's the boys."

In a moment "Mother" appeared drying her hands. In her appearance were courage, resourcefulness, energy—fit mate for the man who had made the Y. D. known in every big cattle market of the country. As Linder's eye caught her and her husband in the same glance his mind involuntarily leapt to the suggestion of what the offspring of such a pair must be. The men of the cattle country have a proper appreciation of heredity.

"My wife—Mr. Tranley, Mr. Linder," said the rancher, with a courtliness which sat strangely on his otherwise rough-and-ready speech. "I been tellin' her the fine job you boys has made in the hay fields, an' I reckon she's got a bite of supper waitin' on you."

"Y. D. has been full of your praise," said the woman, as she led them into another room, where a table was set for five. Linder experienced a pang of happy excitement as he noted the number. Linder allowed himself no foolishness about women, but, as he sometimes eagerly remarked to George Drak, you never can tell what might happen. He shot a quick glance at Tranley, but the contractor's face gave no sign. Even as he looked Linder thought what an able face it was. Tranley was not more than twenty-six, but forcefulness, assertion, ability, stood in every line of his clean-cut features. He was such a man as to capture at a blow the heart of old Y. D., perhaps of Y. D.'s daughter.

"Where's Zen?" demanded the rancher.

"She'll be here presently," his wife replied. "We don't have Mr. Tranley and Mr. Linder every night, you know," she added, with a smile.

"Dollin' up," thought Linder. "Trust a woman never to miss a bet."

But at that moment a door opened, and the girl appeared. She did not burst upon them, as Linder had half expected; she slipped quietly and gracefully into their presence. She was dressed in black, in a costume which did not too much conceal the charm of her figure, and the nut-brown jacket of her face and hair played against the sober background of her dress with an effect that was almost dazzling.

"My daughter, Zen," said Y. D. "Mr. Tranley, Mr. Linder."

She shook hands frankly, first with Tranley, then with Linder, as had

been the order of the introduction. She gave the impression of one who has herself, and the situation, in hand.

"We're always glad to have guests at the Y. D." she was saying. "We live so far from everywhere."

Linder thought that a strange peg on which to hang their welcome. But she was continuing:

"And you have been so successful, haven't you? You have made quite a hit with Dad."

"How about Dad's daughter?" asked Tranley. Tranley was a manner of direct and forceful action. These were his first words to her. Linder would not have dared be so precipitate.

"Perhaps," thought Linder to himself, as he turned the incident over in his mind, "perhaps that is why Tranley is boss, and I'm just foreman." The young woman's behavior seemed to support that conclusion. She did not answer Tranley's question, but she gave no evidence of displeasure.

"You boys must be hungry," Y. D. was saying. "Pile-in."

The rancher and his wife sat at the ends of the table; Tranley on the side at Y. D.'s right; Linder at Tranley's right. In the better light Linder noted Y. D.'s face. It was the face of a man of fifty, possibly sixty. Life in the open plays strange tricks with the appearance. Some men it ages before their time; others seem to tap a spring of perpetual youth. Save for the gray mustache and the puckering about the eyes Y. D.'s was still a young man's face. Then, as the rancher turned his head, Linder noted a long scar, as of a burn, almost grown over in the right cheek. . . . Across the table from them sat the girl, impartially dividing her position between the two.

A Chinese boy served soup, and the rancher set the example by "piling in" without formality. Then followed a huge joint of beef, from which Y. D. cut generous slices with swift and dexterous strokes of a great knife, and the Chinese boy added the vegetables from a side table. As the meat disappeared the call of appetite became less insistent.

"She's been a great summer, ain't she?" said the rancher, laying down his knife and fork and lifting the carver. "Tranley, some more meat? Fehaw, you ain't eat enough for a chicken. Linder? That's right, pass up your plate. Powerful dry, though. That's only a small bit; here's a better allec here. Dry summers generally mean open winters, but you can't never tell. Zen, how 'bout you? Old Y. D.'s been too long on the job to take chances. Mother? How much did you say, Tranley? About two thousand tons? Not enough. Don't care if I do"—Helping himself to another piece of beef.

"I think you'll find two thousand tons, good hay and good measurement," said Tranley.

"I'm sure of it," rejoined his host, generously. "I'm carryin' more steers than usual, and I'll maybe run in a bunch of doggies from Manitoba to boot. I got to have more hay."

The Chinese boy served a pudding of some sort, and presently the meal was ended.

"She's been a dry summer—powerful dry," said the rancher, with a wink at his guests. "Zen, I think there's a bit of gopher poison in there yet, ain't there?"

The girl left the room without remark, returning shortly with a jug and glasses, which she placed before her father.

"I suppose you wear a man's size, Tranley," he said, pouring out a big drink of brown liquor, despite Tranley's deprecating hand. "Linder, how many fingers? Two? Well, we'll throw in the thumb, Y. D.? If you please, just a little snifter. All set?"

The rancher rose to his feet, and the company followed his example.

"Here's ho!—and more hay," he said, genially.

"Ho!" said Linder.

"The daughter of the Y. D.!" said Tranley looking across the table at the girl. She met his eyes full; then, with a gleam of white teeth, she raised an empty glass and clinked it against his.

Here's the time-old situation—two eligible men and an attractive heiress. Which one will get her?

(TO BE CONTINUED.)

### Getting New Ones

Major Muggs, retired, was playing his usual 18 holes before lunch, but was a long way below his usual standard, making many bad shots.

In consequence of this his temper, never one of the best, became somewhat ruffled, and his anger increased when he noticed that a man was following from hole to hole. At last the major could stand it no longer.

"What the devil are you looking at?" he burst out.

"Looking, sir," replied the man, "I ain't looking, I'm listening."

## OPERATIONS FOR FEMALE TROUBLES

### Some Are Necessary, Some Are Not These Women Gave Lydia E. Pinkham's Vegetable Compound a Trial First

Fairview, S. Dakota.—"A year ago I was sick in bed for three weeks and the doctor said I would not be any better without an operation. I had bearing-down pains and side headaches, with pains in the back of my neck. I felt tired all the time, down-hearted, and got poor and pale and was scarcely able to do anything at all for some time before I took to my bed. The doctor said one of my organs was out of place and caused all my troubles. I was too weak and run-down to think of an operation and as one of my neighbors told me about Lydia E. Pinkham's Vegetable Compound, I began taking it. I have received great relief from it and recommend it very highly. It cannot be praised too much in cases of female weakness."—Mrs. O. M. Ring, Box 106, Fairview, South Dakota.

### New Jersey Woman Writes

Camden, New Jersey.—"I take great pleasure in writing you this testimonial. I was a great sufferer of woman's ailments and doctors told me 18 years ago that I must have a serious operation to remove some of my organs. I refused to have it done and took a full course of your medicine for six months, then after the full course I took a bottle of Lydia E. Pinkham's Vegetable Compound every week or two, also Lydia E. Pinkham's Blood Medicine every

Spring. I am well and stout and still have my organs where they wanted to remove. It was while I was in the hospital that I heard your medicines praised by other patients there. I have recommended them to my friends and to my own family. You may use this testimonial far and near, from the smallest paper to the largest, and I will gladly answer letters from women who wish to know what the Vegetable Compound has done for me and what it will do for them if they give it a fair trial."—Mrs. J. Rich, 322 N. 40th St., Camden, New Jersey.

Through neglect, some female troubles may reach a stage where an operation is necessary, but most of the common ailments are not surgical ones; they are not caused by growths, although the symptoms may appear the same.

Many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound, after operations have been advised.

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 100,000 replies were received and 98 out of every 100 reported that they had been benefited by its use. This statement is important to every woman. For sale at drug stores everywhere.

### Fighting Boll Weevil

The 933 cotton demonstration farms operated under the supervision of the American Cotton Association for boll-weevil control have shown the most gratifying results. They clearly indicate that the application of the practical methods of culture and poison devised and advocated will result in holding the weevils in check and producing profitable yields of cotton. Nature Magazine.

### SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation, send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing, be sure and mention this paper.—Advertisement.

### Turks Rest on Friday

The Turks have at last effected a compulsory day of rest by setting aside Friday, the Mohammedan Sabbath, as a day when all workaholic factories and commercial houses must close for a period of 24 hours. The law affects cities of 10,000 population or larger.

### WOMEN! DYE FADED THINGS NEW AGAIN

Dye or Tint Any Worn, Shabby Garment or Drapery.

### Diamond Dyes

Each 15-cent package of "Diamond Dyes" contains directions so simple that any woman can dye or tint any old, worn, faded thing new, even if she has never dyed before. Choose any color at drug store.—Advertisement.

### New Saw Attachment

An attachment has been invented by which a circular saw for cutting wood can be mounted on the front of a tractor and operated by its engine.

In keeping a good man down he does two-thirds of it himself.

### In Bunches

Hewitt—"Misfortunes never come singly." Jewett—"I know it; I received two wedding invitations."—Judge.

### SPOHN'S DISTEMPER COMPOUND

Are your horses coughing or running at the nose? If so, give them "SPOHN'S" A valuable remedy for Coughs, Colds, Distemper, Influenza, Pink Eye and Worms among horses and mules. An occasional dose "tones" them up. Sold at all drug stores.

SPOHN MEDICAL CO. GOSHEN, IND. U.S.A.

## LOCALS OF INTEREST TO ALL

F. W. Whitmore of Tucson spent Sunday with Christmas friends.

John Bahari of Three Rivers and Clyde Brannum of Oscura were visitors here Monday.

Mr. and Mrs. Ed L. Sullivan of White Oaks were here last Saturday, returning in the evening.

Mrs. J. V. Tully of Glencoe, was a guest of her sister, Mrs. Paul Mayer for the major portion of last week.

Mr. and Mrs. Reuben Marcus of Mesa, Ariz., stayed over for two days of last week with the J. D. Richardson family while on their way to Tucumcari.

J. E. Whitmore of Tucumcari, 'live wire' agent for the New York Life is selling some of the best goods on the market here this week.

Mrs. Florence Finley of Encinal, Tex., who had been visiting her mother, Mrs. Clarence Spence, brothers and sisters, for the past three weeks, left for home on Tuesday.

Mrs. Helen Ranniger, Mrs. C. E. Thornton, and R. B. Slight, were up from the I Bar X ranch on Monday.

T. R. Harvie, who a number of years ago was located in business in Oscura, is now located in Sussex, New Jersey and welcomes the weekly visits of his Outlook, to get the old home "doin's."

Mr. and Mrs. S. E. Burks and Fred Morgan were visitors from Capitan last Saturday and reported conditions good on the Burks ranch.

R. B. Ewing, forest ranger in the White Mountain district, was a visitor here on Monday. Mr. Ewing is taking extraordinary precautions against forest fires in his district as the time for spring campfires approaches.

Carrizozo Lodge No. 30 and Coalora Lodge No. 16, I. O. O. F., gave another big social season at Odd Fellow's Hall last night. A large crowd was present. A seven-piece augmented orchestra furnished the music for the occasion. The Rebekahs served ice cream and cake at 10 o'clock.

"The Hunchback of Notre Dame" will be shown at For Stanton, Monday, April 21st, at 8 p. m. Don't fail to see this wonderful picture. Admission, 50 cents.

Forest Ranger and Mr. J. E. Minns of the Carrizozo district were here on Tuesday. Mr. Minns attending to some important matters concerning forest protection in which he is deeply interested.

Mr. and Mrs. G. S. Hoover of Capitan were over on Monday evening on a mission concerning the coming Eastertide.

Mrs. H. A. Allen of Beebe, Arkansas, sister of Mrs. Walter Burnett, arrived here last Friday with her little daughter and will be followed in two weeks by Mr. Allen with the fixed purpose of making Carrizozo their future home.

Mrs. G. S. Hoover of Capitan, who has been ill for several weeks, is now able to be up and around.

The Court House yard certainly is showing signs of spring. New trees are being planted, taking the place of the old, dead ones. The heavy winds make the windmill travel at a lively gait, keeping the large tank well filled with water.

The Western Garage has installed a "Cruise Visible" gasoline tank at their up-to-date institution.

B. W. Weber, the genial principal of the Lincoln County High School at Capitan, was a business caller at this office Saturday.

Ziegler Bros., "the universal providers," are now freshening up their building by erecting a new awning.

The Misses Myrtle and Ella Rowland left Tuesday on No. 4 for Waukegan, Ill., to join their brother, John and family, John being an X-Ray Technician and Service Man at that place and where his sisters will make their future home.

Mrs. M. B. Foreman, who has been in El Paso for the past month, will return home as soon as the weather in this part of the country settles.

Messrs. Howard Payne and E. L. Thompson, stockmen of Willard, N. M., were here on Monday to ship 300 head of cattle which they purchased of Mrs. H. P. Clarke of Glencoe. The cattle were loaded at Capitan and shipped to Kansas pastures.

Department of the Interior,  
U. S. General Land Office,  
Washington, D. C., Feb. 1, 1924.  
Registers and Receivers,  
U. S. Land Offices,  
Gentlemen:

At the end of paragraph 27-b of circular No. 541, the following is added:

Nor will a reduction in the area of cultivation, based on the physical conditions of the land, be permitted if, at the date of the application to enter, the land was designated and subject to entry under the stockraising act. In such cases, the homesteader should file application for change of the character of the entry to one under the stockraising act, showing therein the non-adaptability of the land for cultivation; that the land does not contain any water holes, or other body of water needed or used by the public for watering purposes, and his consent to the entry being made subject to the reservation to the United States of all coal and other minerals in the land, together with the right to prospect for, mine, and remove the same. The application of the entryman should be in affidavit form and the showing therein as to the character of the land should be corroborated by the affidavits of two witnesses.

Very respectfully,  
William Spry,  
Commissioner.  
Approved, February 1, 1924.  
E. C. Finney,  
First Assistant Secretary.

Notice for Publication  
E. J. Shultz, No. 27  
R. Burt,  
El Paso & Southwestern Company,  
Garnishee.

In the Justice Court, Precinct No. 14,  
Lincoln County, New Mexico.

To R. Burt, Defendant:—  
You are hereby notified that a writ has been issued against you and your property in the above styled and numbered cause, and that the said El Paso & Southwestern Company has been named as Garnishee in said cause and served with a writ of Garnishment issued in the above styled and numbered cause; and, that unless you appear before E. W. Hulbert, Justice of the Peace of the above Precinct, at his office at the Court House at Carrizozo, Precinct No. 14, Lincoln County, New Mexico, on the 10th day of May, A. D. 1924, at 10 o'clock, a. m., of said day, judgment will be rendered against you, and a judgment will be rendered against said Garnishee, El Paso and Southwestern Company, for the amount found due and owing to you from said Garnishee according to the sworn answer of the Garnishee filed in said cause.

Dated:—Carrizozo, Precinct No. 14,  
Lincoln County, New Mexico, this 26th  
day of March, A. D., 1924.

E. W. Hulbert,  
Justice of the Peace  
of Precinct No. 14  
Lincoln County,  
New Mexico.
