WE REACH THE HOME In Defense of Our Free Institutions

Published Weekly in the Interest of Carrizozo and Lincoln County

VOL. X—NO. 28 CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, AUGUST 22, 1924 PRICE \$2.00 THE YEAR 8 PAGES

TALES OF THE OLD FRONTIER... THEY SHOWED HOW A CHEYENNE WARRIOR CAN DIE... IN THE summer of 1890 Head Chief and Young Mule...

D. L. Byron is in receipt of an encouraging letter from his son, Roy, who is confined in the Letterman U. S. Hospital at San Francisco...

Scientists Will Harken Rest of Week for Possible Signals by Wireless.

Buenos Aires, Aug. 20—Scientists in the United States are "listening in" from Thursday to Saturday of this week for possible wireless signals from the theoretical inhabitants of Mars...

Fort Stanton News... Among the recent new arrivals of patients: Leon C. Winn from El Paso; Raymond Clancy from Chicago; Rycardo Flores, Alfonso Mosa and Andrew Burgo from San Francisco.

Patient J. C. Rolly received his discharge last week and returned to his home in Philadelphia.

Ft. Stanton plays the Vaughn ball team at the Fort on Saturday and Sunday, Aug. 23 and 24. The games are called for 2:15 p. m.

An interesting series of two ball games is scheduled for Aug. 31 and Sept. 1, Sunday and Monday, with the El Paso "Mustangs" to be played at Fort Stanton.

The Mescalero ball team met defeat at the hands of Ft. Stanton, 15 to 3, at the agency last Sunday.

Summer vacations being about over, visitors are less at the Fort which is a showing that fall is coming.

On Tuesday afternoon, a delightful picnic was held for the patients on the Bonito under the direction of Miss Taulbe, chief nurse, and Miss Weick, hill nurse.

One of the best signs of energy is the sound of hammers and nails on the hill. Many of the tents are being prepared for the coming winter.

Funeral of Little Mary Bogle

The funeral of little Mary, beloved infant daughter of Mr. and Mrs. O. B. Bogle, who died from injuries received about one week ago by a pot of hot tea turning over and scalding her, was held at the home in Coyote on Monday and the remains interred at the White Oaks cemetery.

Railroad News... Engineer R. W. Dozier and family are enjoying a pleasant outing in the mountains.

Fireman Joe Phillips has relieved fireman F. M. Dockery on the Ancho work train and Doc. went out on the Duran local Tuesday morning.

Dispatcher S. L. Northlane left last Sunday for a visit with his daughter in New York and will be absent 30 days.

Fireman E. K. Jones is visiting friends in Columbia, Mo., and will be absent about two weeks.

Engineer Jim Handibe is on a 30 day vacation.

Engineer St Ramsdale is on the sick list this week.

Engineer Cab Rines, who has been taking treatment at Hot Springs, N. M., for a temporary illness, is recuperating nicely and will soon be able to resume service.

Mrs. Farley, wife of foreman J. E. Farley, who has been visiting relatives in several different states, is now visiting her mother, Mrs. Lindberg, at her home in Denver.

Brakeman Ernest Dingwall is on the lay-off list this week.

Conductors F. E. Hedrick and A. R. Jones were off duty for short periods this week.

Conductor D. D. Tiffany holds the belt for steady service during the hot weather, while many are on vacations in the mountains.

Agent G. S. Hoover at Capitan says the fruit yield in the valleys has far exceeded that of last year which will make shipping heavier from this point.

The familiar face of engineer George Benson was seen here on Wednesday. He piloted No. 1 from Tucumcari and returned on 4, with Bert Holland as his fireman.

Mrs. Ocia Adkins has returned to her home in San Antonio, after visiting with Mrs. N. A. Smith of Duran, who is here with yardmaster Smith at the Swearingen home.

Fireman and Mrs. L. J. Adams are still enjoying their vacation at the home of Mrs. Adams' parents, Mr. and Mrs. Lindsay, at Bernie, Mo.

Conductor and Mrs. C. A. McCammon and daughters will leave tomorrow on 4 for an extended trip through the east and will return in time for the opening of school.

The Essays are Fine and the Writer is Great

"Along Life's Trail" is the title for a series of articles written by Thomas Arkle Clark, Dean of Men of the University of Illinois which will be published in an early issue of this paper.

Indictments Off Against Alamo, Bank Officers

The score of indictments against officers of the First State Bank of Alamogordo, except those charging D. H. Henry and R. C. Pitts with receiving deposits while the bank was insolvent, were knocked out by Judge C. R. Brice of the district court.

Jens Jensen, who was at the Fort some years ago and went away again too early according to the advice of physicians in charge returned recently and on Tuesday morning at ten o'clock, died.

Mrs. W. C. Merchant accompanied her mother, Mrs. H. C. Bagley, as far as Vaughn, on her return trip to her home in Blackwater, Texas, after visiting her daughter's family.

There Are Many Just Like You, Jim

Tularosa Tribune: We haven't yet taken our stand as to party affiliations in the fall election, but we do say that the nasty personal remarks concerning our President by muck-raker Walsh at Helena, Montana, on Aug. 16, will be likely to help Mr. Coolidge.

Mining Deal at Silver City

Silver City, Aug. 21.—A mining deal was consummated here L. Richard, geologist and engineer of Santa Monica, Calif., representing eastern capitalists acquired by purchase, a group of four claims near Vanadium in the Santa Rita district.

On a Long Motor Trip

Frank Maxwell, son, Warden, and sister-in-law, Mrs. R. V. Lancaster, left yesterday by motor for Wardsville, West Virginia, the home of the Warden family, where they will be joined by Mr. Maxwell's little daughter, Mary, who has been with her grandparents since her mother's death last April.

THE OATH OF A RANGER

BACK in the days when Arizona was "cow country" two men rode the range together for one of the big cattle outfits and, although totally different in temperament, Bill Smith and Carlos Tafolla were pals whose friendship had been cemented by years of hardship and danger.

WOMEN OUT TO BEAT 1920 VOTE

Women are getting down to the business of voting. Statistics show that approximately 25 per cent of the women eligible to vote, actually voted in 1920.

VACATION

It seems to me I'd like to go Where the bells don't ring nor whistles blow, Nor the clocks don't strike or gongs don't sound.

Watch for our new serial, "Josselyn's Wife" by Kathleen Norris which deals with entirely new problems and situations.

"JUST TWENTY-ONE" One of the important factors in the election of the man who is to be the next President of the United States, will be the young men and women who are just old enough to vote.

COOLIDGE CHOICE OF WOMEN VOTERS

Mrs. A. T. Hert Praises Child Labor Policy. "What the future holds for the wage earner and the wage earner's family, is of vital interest to the women of this country."

14,000 KILLED BY FLOODS

MILLIONS AFFECTED BY DISASTER THROUGHOUT EASTERN EMPIRE

CHINA SUFFERS FAMINE

HUNAN PROVINCE IS NEARLY WIPED OUT BY TERRIBLE RENTIAL FLOODS

Peking.—From 13,000 to 14,000 dead and nearly 14,000,000 affected by famine is the latest estimate of the relief commission of the victims of the floods which have been almost general throughout China.

The metropolitan area, which includes twelve counties from Peking southward in Chihli province, with a population of 4,000,000, has 800,000 persons who need relief, according to the commission.

Checking province is also reported to have suffered but no detailed reports have been received from there.

There have been no refugees except a few hundreds who have arrived in Peking. In the affected districts, the people are mostly camping on the dykes and higher ground.

Former Canon City Convict Shot. Taylorville.—The bank handle shot down a few days ago at Taylorville, Ill., as he attempted to escape with \$18,500 currency in a traveling bag, has been identified as James Dinwoodie, alias James McDonald.

Three Idaho Banks Closed. Boise.—Three southern Idaho banks, all small institutions and located at Montpelier, Ririe and Rexburg, have closed their doors.

Posse Kills Desperado. Seattle.—Sheriff Matt Starwich and six deputies shot and killed J. Brown when Brown and two others attempted to rob the Snoqualmie Valley bank at Tolt, Washington.

Three Killed in Crash. East Lansing.—Professor Frank A. Spragg of the farm crops department of the Michigan Agricultural College, his wife and 10-year-old son were instantly killed at Okemos when their automobile was crushed by a Pere Marquette railroad train.

Mother Hangs Children. Lindsay.—Bernice and Louis Fanning, aged 7 and 8 years, were strangled to death on an improvised gallows by their mother, Mrs. George Fanning, 28, who then cut her throat in an attempt to end her life on a farm nine miles south of Lindsay, Okla.

\$1,000,000 Fire Near Detroit. Detroit.—Fire wiped out the plant of the Dwight Lumber Company at River Rouge, a suburb, and did damage estimated at more than \$1,000,000.

Guy Bolton Accused of Plagiarism. New York.—Guy Bolton, author of the play "Polly Preferred," now on a London stage, was accused of plagiarizing by Cecil Lynton in a suit against Bolton, S. Ray Comstock and Morris Gest, producers for \$100,000 to \$500,000 for alleged infringement of copyright.

New Mexico State Items

The executive committee of the Farmer-Labor party of New Mexico designated Clovis as the city for the state convention and fixed the date of the meeting as August 28.

Joe Hannon, aged 50 years and one of the best known Indian traders in the Southwest, dropped dead in the hotel at Thoreau. Mr. Hannon was of German descent and had no relatives in this country.

Fifty crates of the new head lettuce crop from the big Storrie project near Las Vegas were shipped to the market in Denver recently. The packing was done under the direction of County Agent Jones.

The Metropolitan Oil Company, of Aztec, reports its well on the Beautiful Mountain structure down to the depth of 210 feet with the casing to the bottom of the hole and a slight showing of oil in the first sand.

Reports from the Canulla section, near Raton, are that the crops this year are the best in the history of the district. It is estimated that the wheat crop will be over 150,000 bushels.

For the first time in history entrance to the Northern New Mexico Fair, to be held this fall at Raton, will be free.

Two sheep herders were struck by lightning on the Héringa ranch near Clayton, while they were in their camp. One of the men was killed instantly and the other is expected to recover although most of his clothing was burned from his body.

Plans are under way for the erection of a large apartment house in Las Cruces, which will be one of the finest of the kind in the southern part of the state.

The dates for the annual Cotton Carnival, to be held in Roswell, have been set for October 9, 10 and 11 and plans for the big celebration are nearly completed.

The Roy branch of the Texas Wheat Growers' Association has taken over the farmers elevator in Roy and will be in shape to receive the crop of this district.

According to the U. S. Department of Labor, employment conditions in New Mexico are normal in all lines with the exception of railway shops, which are operating on temporarily reduced time schedules.

With active drilling going ahead steadily on three locations in Colfax county, there is now every promise of the development of one of the largest single oil domes in the west in the next few years.

HOW THIS WOMAN GOT STRENGTH

Put Up 300 Quarts Fruit, 500 Glasses Jelly and Took Care of Four Children

Norwalk, Iowa.—"I have been meaning for some time to write and tell you how much good your medicine has done me. When I started to take it I was almost bed fast and would have been in bed all the time if I had not had any one to care for my children. There was so much swelling and pain that I could hardly take a step. I took seven bottles of Lydia E. Pinkham's Vegetable Compound and used Lydia E. Pinkham's Sanative Wash, and found that so healing. I am not entirely well yet for I was in bed shape when I started your medicine, but I am so much better that I am not afraid to recommend it, and I think if I have done my work all alone this summer, caring for four children, and made 500 glasses of jelly, so you see I must be better. I feel pretty good all the time and I am glad to tell others about the medicine."—Mrs. C. J. WENNER-MARK, Box 141, Norwalk, Iowa.

Lydia E. Pinkham's Vegetable Compound and used Lydia E. Pinkham's Sanative Wash, and found that so healing. I am not entirely well yet for I was in bed shape when I started your medicine, but I am so much better that I am not afraid to recommend it, and I think if I have done my work all alone this summer, caring for four children, and made 500 glasses of jelly, so you see I must be better.

Women can depend upon Lydia E. Pinkham's Vegetable Compound to relieve them from female troubles. For sale by druggists everywhere.

Western African Fish. One of the latest additions to the University museum at Philadelphia is a curious wooden statue bristling with many nails and sharp metal points.

Ducked, of Course. "When the doctor struck at Jim for calling him a quack, what did Jim do?" "Ducked."—Exchange.

Summer Find You Miserable? It's hard to do one's work when every day brings morning yawning, throbbing headache, and a dull, tired feeling.

A Colorado Case. J. W. Bollen, 1421 E. River St., Canon City, Colo., says: "I could hardly head over on account of neuralgia and cutting pains through my back and hips. My kidneys acted too often and I had to get up at night. I used Doan's Pills and my kidneys became strong."

ZEN OF THE Y. D.

A Novel of the Foothills

By ROBERT STEAD

Author of "The Cow Puncher"—"The Homesteaders"—"Neighbors," etc.

Copyright by ROBERT STEAD

CHAPTER XVI—Continued.

The name of Phyllis Bruce came to him with almost a shock. He had been so occupied with his farm and with Zen that he had thought but little of her of late. As he turned the matter over in his mind now he felt that he had used Phyllis rather shabbily. Grant lit a cigar and sat down to smoke and think. The matter of Phyllis needed prompt settlement. It afforded a means to burn his bridges behind him, and Grant felt that it would be just as well to cut off all possibility of retreat. Fortunately the situation was one that could be explained—to Phyllis.

He had told himself, back in those days in the East, that it would not be fair to marry Phyllis Bruce while his heart was another's. He had believed that then; now he knew the real reason was that he had allowed himself to hope, against all reason, that Zen Transley might yet be his. He had harbored an unworthy desire, and called it a virtue. Well—the die was cast. He had definitely given Zen up. He would tell Phyllis everything. That is, everything she needed to know.

It would be best to settle it at once—the sooner the better. He went to his desk and took out writing paper. He addressed a note to Phyllis, pondered a minute in a great hush in the storm, and wrote: "I am sure now. May I come? Den- nison."

This done he turned to the tele- phone, hurrying as one who fears for the duration of his good resolutions. He gave the number of Linder's rooms in town; it was likely Linder had remained in town, but it was a question whether the telephone bell would waken him. He had recollections of Linder as a sound sleeper. But even as this possibility entered his mind he heard Linder's phlegmatic voice in his ear.

"Oh, Linder! I'm so glad I got you. I've a message I want delivered to Miss Bruce. . . . Linder? . . . Linder!"

There was no answer. Nothing but a hollow echo on the wire, as though it led merely into the universe in general. He tried to call the operator, but without success. The wire was down.

He turned from it with a sense of acute impatience. Was this an omen of obstacles to bar him now from Phyllis Bruce?

Suddenly came a quick knock at the door; the handle turned, and a drenched, hatless figure, with disheveled, wet hair, and white, drawn face burst in upon him. It was Zen, Transley.

CHAPTER XVII

"Zen!"

"How is he—how is Wilson?" she demanded, breathlessly.

"Sound as a bell," he answered, alarmed by her manner. The self-assured Zen was far from self-assurance now. "Come, see, he is asleep."

He led her into the white-room and turned up the lamp. The bed was sleeping soundly, his teddy bear clasped in his arms, his little pink and white face serene under the magic skies of slumberland. Grant expected that Zen would throw herself upon the child in her agitation, but she did not. She drew her fingers gently across his brow, then, turning to Grant:

"Rather an unceremonious way to break into your house," she said, with a little laugh. "I hope you will pardon me. . . . I was uneasy about Wilson."

"But tell me—how—where did you come from?"

"From town. Let me stand in your kitchen, or somewhere."

"You're wet through. I can't offer you much change."

"Not as wet as when you first met me, Dennison," she said, with a smile. "I have a good waterproof, but my hat blew off. It's somewhere on the road. I couldn't see through the windshield, so I put my head out, and away it went."

"The hat?"

"Then both laughed, and an atmosphere that had been tense began to settle back to normal. Grant led her out to the living room, removed her coat, and sat down at a table.

They sat in silence for some time, and presently they became aware of a gray light displacing the yellow glow from the lamp and the ruddy reflections of the fire. "It is morning," said Grant. "I believe the storm has cleared."

He stood beside her chair and took her hand in his. "Let us watch the dawn break on the mountains," he said, and together they moved to the windows that overlooked the valley and the grim ranges beyond. Already shafts of crimson light were firing the scattered drift of clouds far over- head.

"Dennison," she said at length, turning her face to his, "I hope you will understand, but—I have thought it all over. I have not hidden my heart from you. For the boy's sake, and for your sake, and for the sake of a scrap of paper—that was what the war was over, wasn't it?"

"I know," he whispered. "I know." "Then you have been thinking too? . . . I am so glad!" In the glowing light he could see the moisture in her bright eyes glisten, and it seemed to him that wild, dancing laughter of the hills had never been lovelier

than in this moment of confession and of high resolve.

"I shall remember with chastened memory, but I shall never forget," he said at length. "I shall never forget Zen of the Y. D. And you—what will you do?"

"I have the boy. I did not realize how much I had until tonight. Suddenly it came upon me that he was everything. You won't understand, Dennison, but as we grow older our hearts wrap up around our children with a love quite different from that which expresses itself in marriage. This love gives—gives—gives, lavishly, unselfishly, asking nothing in return."

"I think I understand," he said again. "I think I do."

They turned their eyes to the mountains, and as they looked the first shafts of sunlight fell on the white peaks and set them dazzling like mighty diamond-points against the blue bosom of the West.

"It is morning on the mountains—and on you!" Grant exclaimed. "Zen, you are very, very beautiful." He raised her hand and pressed her fingers to his lips.

As they stood watching the sunlight pour into the valley a sharp knock sounded on the door. "Come," said Dennison, and the next moment it swung open and Phyllis Bruce entered, followed immediately by Linder. A question leapt into her eyes at the remarkable situation which greeted them, and she paused in embarrassment.

"Phyllis!" Grant exclaimed. "You here!"

"It would seem that I was not expected."

"It is all very simple," Grant explained, with a laugh. "Little Willie Transley was my guest overnight. On account of the storm his mother became alarmed, and drove out from the city early this morning for him. Mrs. Transley, let me introduce Miss Bruce—Phyllis Bruce, of whom I have told you."

Zen's cordial handshake did more to reassure Phyllis than any amount of explanation, and Linder's timely observation that he knew Wilson was there and was wondering about him himself had valuable corroborative effect.

"But now—your explanations?" said Grant. "How comes it, Linder?"

"Simple enough, from our side. When I got your telephone call all I could catch was the fact that you were mighty glad to get me, and had some urgent message for Miss Bruce. Then the connection broke."

"I see. And you, of course, assured Miss Bruce that I was being murdered, or meeting some such happy and effective ending, out here in the wilderness!"

"Not exactly that, but I reported what I could, and Miss Bruce insisted upon coming out at once. The roads were dreadful, but we had daylight. Also, we have a trophy."

Linder went out and returned in a moment with a sadly bedraggled hat.

"My poor hat!" Zen exclaimed. "I lost it on the way."

"It is the best kind of evidence that you had but recently come over the road," said Linder, significantly.

"I think no more evidence need be called," said Phyllis. "May I lay off my things?"

"Certainly—certainly," Grant apologized. "But I must introduce one more exhibit." He handed her the note he had written during the night.

"That is the message I wanted Linder to rush to you," he said, and as she read it he saw the color deepen in her cheeks.

"I'm going to make breakfast, Mr. Grant," Zen announced, with a sudden burst of energy. "Everybody keep out of the kitchen."

"Guess I'll feed up for you this morning, old chap," said Linder, knowingly. At the door he glanced back.

"I think Miss Bruce has something to say to you," he added, mysteriously.

They were alone—Phyllis and Dennison. He caught her hand in his and led her to the French windows. The sun was filling the valley with a flood of silver, and there was sunshine, too, in the heart of Dennison Grant. He had drunk his cup of renunciation, but he had not dreamed that at the bottom could lie a pearl so beautiful.

"Phyllis—Phyllis," he breathed. He reached out to take her in his arms, but she held him gently away; when he looked in her eyes they shone back at him through tears.

"Oh, Denny, you mustn't! I'm so sorry. You know what you have been to me. But you were so long, so long! Yesterday I promised Linder."

In the days that followed, Dennison Grant drank his cup of renunciation anew. He worked his fields early and late; he noted the tiny spirals of smoke ascending like incense from Zen's cottage; but he went so near the Transley home that the end of his furrow. He had handed back Transley's wife from the edge of the abyss; he

had made up his mind; that much was settled.

He now centered about Linder and Phyllis Bruce. When he had recovered from the first shock of Phyllis' revelation and was able to think sanely he was sure that her heart might still be his if he went after it—and took it. It was another case of a man being worth his salt. But Linder was not Transley. He had spared Transley; could he be less generous with Linder? And what of Phyllis? Would she be happy with Linder?

Then Truth stood up before him in the furrow, as he plowed its slow length one lazy summer afternoon, and called him a hypocrite. He heard the voice as clearly as the champing of his horses on their bits. "Hypocrite!" cried Truth to him. "You make a great virtue of your generosity to Linder. Easy generosity that, while you continue to love—Zen Transley!"

Down by the river a spiral of smoke wound upwards from the Transley chimney, and even as Grant looked he saw an automobile trailing dust about the shoulder of his hill. It was Transley returning to his home.

Transley's wife had fortified her good resolutions behind an outburst of activity.

But there were times when the craving to be quite alone, where she could re-survey her life and bask for a moment in the luxury of old imaginings, became irresistible. On such occasions she would follow the road that skirted the cliffs of the river bank to a point where it turned in the basin of a now deserted quarry. The old quarry lay on the edge of the hills like a cup from which a slide had broken and fallen into the river which boiled in a green foam a hundred feet below. The only access to this cup was by the road, no longer frequented, which Zen had chosen for her solitary rambles. Once inside the quarry she was isolated from the world; here her vision could sweep the sloping bluffs across

the valley, or the circle of blue sky above, and her thoughts could rove at will without prospect of being interrupted. The road by which she entered the cup was the road by which any intruder must enter it. It was also, as Zen was suddenly to discover, the only road by which one could escape.

It was upon the afternoon when Truth confronted Dennison Grant in his furrow that Zen made that discovery. Her self-imposed tasks completed for the day, she scoured the fruit stains from her hands, changed her frock, and took the now familiar trail up to the quarry. "I'll be back in an hour," she told Sarah; "I'm going to the quarry just to loaf and invite my soul." The quotation was lost upon Sarah, who took refuge in her gift of silence.

At a point where the road rose high enough to command a view of the surrounding valley she stopped and swung a slow, half-guilty glance to the southward. There, sure enough, was the plow team of Dennison Grant, warping its slow shuttle back and forth across the broad prairie. For a long minute she fed her eyes and her heart; then resumed her slow course to the quarry.

Inside the great cup she was conscious of a sense of security.

Zen seated herself in a half-reclining position on a great slab of rock and fell into a day-dream, watching the while with unseeing eyes the procession of white clouds which drove across the disc of blue sky above her.

Perhaps it was because of the position which she had taken, or her unconscious study of the sky, that she caught no hint of the presence of a man at the point where the road entered the quarry. From an ambush of willow scrub he had seen her stop and survey the fields where Dennison Grant was at work, and had followed her stealthily down the trail which led to her trap. Now he had her.

"How do, Zen?" he said, suddenly

stepping into the open. "Ain't you glad to see me?"

The girl sprang to her feet and turned startled eyes toward the road—the only exit from this stone dungeon.

"Who are you? What do you want? Go away! I don't know you at all." The offensive smile broadened. "That is where I have the advantage from, Mrs. Transley. I have chased you."

"I admit, but you—you are as beautiful as ever."

"How dare you speak to me in such a way! You have learned my name. It is true, but I do not know you at all. Now will you go, or must I call my husbands to throw you into the river?"

"That would be some shout, seeing that your husband isn't at home, and hasn't been for two weeks. You see, I may be a stranger, but I know some things. And even if he was at home, wouldn't you be more likely to call Dennison Grant?"

The man had gradually advanced, but still kept himself well between Zen and her only avenue of escape.

"Who are you?" she demanded again. "Why do you follow me here?"

"An old friend, Zen; just an old friend, come to collect an old account. Pay up quietly and there'll be no trouble, but raise a fuss and I'll throw you into the river. That wouldn't leave much evidence, would it? It's wonderful how a person who has been drowned disappears and is soon forgotten."

Zen's eyes had gone targe and her limbs were shaking. "Drak!" she exclaimed.

"Right enough; your old friend, George Drak." He came up close to her and extended his hand. "Ain't you goin' to shake hands with your old friend, Zen?" he smirked before her.

"You were no friend of mine—never," she faced back, while her brain was hunting wildly for some plan of escape. "I thought I had killed you. And I was sorry I had done it. Now I'm sorry I didn't."

"Well, now, Zen, that's too bad. I was willin' to forgive you, and hopin' we'd be friends. Don't you think it would be better to be friendly-like, Zen?"

There was a menace under his oily words that gripped her in terror. She decided to play for time. Perhaps Sarah—perhaps Denny— if only Dennison Grant would come!

"Sit down, George, and tell me about it," she said. "I suppose I owe you an apology. Tell me how you got away, and where you have been all this time."

"That's better. We're goin' to be good friends, eh, Zen? The best of friends, eh, Zen? You and George 'll just sit down and talk it over."

She led him to the rock where she had been seated, and let him sit down beside her. He seized one of her hands in his; she would have withdrawn it, but he held it tighter.

"No, we're goin' to be good friends," he reminded her. "The best of friends."

"Yes, but first tell me about yourself. How did you get out of the river that day?"

"Oh, I drifted ashore. Can't kill George Drak. I was pretty full of water, and I lay on the bank for quite a while, but I came around in time. Then I seen what had happened about the fire, and I reckoned this was a good time to make my getaway. So I heat it right out of the country, and nobody bothered followin'."

"Yes, yes, go on," she urged, eager to keep him absorbed in his story. "That was very clever of you. And then what did you do after you got out of the country?"

"Got a job. No trouble for George Drak to get a job. Then when the war came I tried to get on, but somehow they wouldn't have me. Said I'd be more useful at home. So I stayed on and had some pretty good jobs and some pretty nice girls, Zen, but I never got you quite out of my head and I kept sayin' to myself, 'Some-time I'll go back and make it up with Zen.' And here I am. Ain't you glad, Zen?"

"Yes—in a way I am." (Oh, will nobody ever come?) "But—how did you find me? You know I've been married since then?"

(TO BE CONTINUED.)

Living in the Dark

Pit ponies are not the only creatures that live in coal mines, seldom seeing the light of day. Miners are often troubled with rats, mice, flies, and even frogs and toads.

The presence of mice spells danger. They have been known to gnaw cables, causing electric wires to fuse and vapor to be exploded in gassy pits. Their food consists of scraps from the miners' meals, and they have a strange liking for oil, which they lick from the lubricated parts of machinery in the mine. Whenever their diet, however, the mice never grow very big, because the entire absence of light has a dwarfing effect.

Flies seem to thrive underground, and are a great nuisance to the miners, especially at meal-times. Other minute forms of insect life which inhabit the mines explain why frogs and toads are frequently found there, looking fit and well-fed.

Measured in Eighths

In measuring land located in that part of the South once under French rule it was common practice to express fractions of an inch in eighths, not in tenths as now is usual.

Use Combinations to Get New Ideas

Materials Considered Out of Fashion Picture Are Given Tryout.

The newest prank of fashion, writes an authority, is to use combinations which are more or less considered out of season or are very unusual. For instance, black satin was used for an afternoon frock where organdie and summer ermine shared the trimming honors. The organdie was white and embroidered. It formed a deep hem effect on the skirt. The edges of the organdie were scalloped and the scallops were applied to the fur. Although the combination sounds most charming, the effect was nevertheless curious.

The vogue of the tunic overblouse is being enthusiastically adapted by a great number of women as the most logical solution to the blouse and skirt problem. We believe there isn't any woman who either looks well dressed or feels well dressed in a separate skirt and blouse, but let her don one of those new unbelted tunic blouses which come well down over the knees and are made of such attractive silks, and we are sure she will be agreeably surprised at the truly smart appearance its simple lines will give her. Besides improving one's appearance, there is economy in possessing several of these tunics, for they can be worn with the skirt of an old suit. The skirt of last year's suit which has become shiny in the back or slightly worn can be brought out of one's wardrobe and put to very good use in this way.

In Paris they are wearing these tunics very long, only two or three inches of the skirt being visible in some instances. The skirts are short, very narrow, sometimes plaited and sometimes plain.

Flounces and tiers cut to accentuate rather than detract from the much-devised slim-line occupy such an impor-

Serviceable Frock for Little Girl of Seven

Here is a very serviceable frock for a young girl. The one on the right can be worn indoors and the one on the left uses for outdoors. The little jumper is made separately so that it can easily be slipped on or off at will.

Chic Frock for Girls.

The frock is made of cloth. The upper part is quite long, well below the hips. The short skirt is plaited. A little stitching in colored wool finishes the armholes and neck of this almost sleeveless frock. The jumper can be made of thin silk and lined, or of a heavy, unlined silk or velvet. A wide band of embroidery in bright colors is sewed to the bottom of the jumper. Folds of silk of a color that will harmonize with the colors in the embroidery finish the wide neck and armholes.

tant position in the mode that one cannot pass them by without some recognition. The cut of tiers is invariably circular, for in this way any fullness or bunchiness can be avoided as they can be applied without fullness. Criss-cross tunics which look like one layer of fabric were wrapped about the figure in one direction, and another layer lapped in the opposite direction is another oddity that has been seen several times.

Flannel coats in white, powder blue and all the high shades without any linings in them and very simply tailored are being worn at smart resorts with sports frocks of crepe de chine. Some are braided-bound, some are piped with contrasting flannel, while others depend entirely upon their unrelieved simplicity for smartness. One of the two models being worn most is the wrap-around, which is devoid of fastening and is held in position by the wearer.

Afternoon Frock That Will Interest Women

Crystal plaited chiffon, beneath all-over embroidery in gold color, is used to make this charming afternoon gown, ornamented with girdle and rosette of white beads.

Powder-Puff Bags Are in Form of Tiny Doll

A novelty in powder-puff bags has appeared. It is in the form of a tiny doll, a clown with jolly face, its trousers tied at the ankles. In each of the trousers legs is a little powder puff, one for white and one for rouge, and through an opening at the back of the little clown one finds a compact containing a reserve cosmetic supply. In some of the smartest shops in New York are shown lipstick containers, lovely bits of French enamel, coral, jade, onyx, gold and platinum, banded and circled with rhinestones just the size of a cigarette holder. They are dainty jeweled trifles to carry in one's porte-monnaie or pocket.

To Dress and Look Cool on Sultry Summer Days

Life nowadays is altogether too much fussed-up. We all admit it. But you have no idea how, taking your courage in hand, you can pull off the silly old outer coverings, and get at something tolerably simple. Just for one example, observes a writer in the Woman's Home Companion: If your hair is hot and heavy on your head and hard to keep in order, cut some of it out. Don't be afraid. Maybe your husband does admire it. He doesn't have to take care of it.

The first thing to do if you have long heavy hair is to shorten it. What's the use of carrying around a lot of old hair, anyway? It just washes up in a bunch on your head and acts like a warming pan. But if your hair grows thickly on your head, shortening doesn't cool you off very much. My suggestion then is that you have some one thin it out for you carefully, much as you'd thin out the carrot row in the early summer. Cut small pieces off close to the scalp in several places, being careful to take it from underneath where the cut-out regions will be well concealed by your coiffure. Don't cut the hair that grows low on the neck.

Delightfully refreshing for hot weather, too, are the so-called hair lotions which have all the cooling virtues of toilet water but are especially adapted for the hair. A few drops on your scalp around the edges of the hair seem to take away that hot, damp feeling.

Baths are one thing that you can't very well cut down in hot weather. But any day, you know, you can wave someth' nuffering or worry time for

one good bath. And what a boon a bathtub is in hot weather—a bathtub filled without skimping, and smelling like a lemon meringue on an account of a handful of vervelone bath salts. Filling a tub, however, one can still be cool. A hand basin of water, an ordinary wash cloth, and a spoonful of toilet water makes a sponge bath that takes off several degrees of heat. And just an ordinary air bath, sans clothes, is a wonderful freshener. It's a very good thing, especially in summer, to remove your clothes for a little while each day, and let your pores get a good, deep breath of air.

Chinese Novelties Are Featured in City Shops

Many of the engaging novelties are of the Chinese type, and as the appreciation of them grows more and more beautiful things are shown. In an exclusive shop is a dazzling display of chains, pendants and earrings in crystals, clear and tinted, and cut in delicate flower-like designs. A garland of blossoms made of jade, turquoise, pearl and coral, taken from a Chinese hairpin, is attached to a pendant to a slender gold neck chain.

Another shop, long known as a bazaar of genuine oriental antiques, has among its finest bits curious and lovely old buckles, one of rose quartz, pale green jade and dull gold. There is a buckle, too, of white jade with a crystal tinted like frozen emeralds and traced with gold. These and other interesting pieces have greatly increased the vogue of jade, which is especially charming with summer dress.

Have You Entertained Our Distinguished Visitor?

Last night, one of the most distinguished visitors we have had for the past 120 years, shone with fiery brilliancy in the eastern skies at the distance of 36,000,000 miles, the nearest the big brother planet has been to us in over a century and at that immediate hour, the strongest and most effective telescopes known to the inventive genius was trained on the heavenly visitor for the purpose of ascertaining if life really exists on our nearest neighbor.

Our scientists claim to be well prepared by the use of these telescopes and the radio, with which the planet can be reached in the space of three minutes, to establish beyond a doubt and to solve the world mystery as to whether or not Mars is inhabited. Few there be of us outside of the realms of science, who realize what importance is connected with these investigations. If our scientists find life existing on Mars and can establish communication with its beings; if the people of Mars with their advancement and enlightenment could impart even a portion of their knowledge to the people on this lesser sphere, who knows but that, as one of our prominent scientists has said, we would be pushed ahead thousands of years toward scientific perfection.

In the Jungfrau observatory 14000 feet up in the Alps mountains, the most accurate demonstrations will be made and in this direction the eyes of the world are turned. In the meantime, we must be content with watching our mysterious visitor as it plows its fiery way through boundless space and await developments.

Announcement to the Public

I hereby announce myself as a candidate for the office of Sheriff, subject to the action of the Republican County Convention.

In case I am selected as the nominee of the Republican party and a majority of the electors see fit to support me, I pledge myself to perform the duties of the office impartially—to have no favorites among law violators—to observe the strict letter of the law personally and see that such deputies as are needed observe the same policy.

S. W. KELSEY.

Concrete—Lumber

Light concrete that can be sawed, planed and nailed has been developed by a Swedish architect. It is made with cement and shale lime, together with a small amount of aluminum or zinc powder, which develops hydrogen when water is added, making the concrete porous. When set, it weighs 40 to 50 pounds per cubic foot, or about one-third as much as ordinary concrete. The material is resistant to weather and fire in a satisfactory degree for use in walls but not in chimneys, and has been approved by the building authorities in Stockholm for one or two story dwellings.

Republican Women Start National Campaign

Mrs. Alvin T. Hert, vice chairman of the Republican National committee, has just announced the opening of the National headquarters of the women's bureau of the campaign on the second floor of the Wrigley building, Chicago. Eastern headquarters have been opened in New York city.

The Women Voters Speak

The voices of the women of America are making themselves heard. From Maine to California, with a union which is infectious, they are saying, "We want Coolidge and Daves."
 In the weeks which have elapsed since the Republican party nominated its standard bearers, the women have been weighing these candidates and their respect has gone out to those men, who represent the best qualities in American manhood.
 All signs show that the women of the country have been weighing the Republican platform and that its pledges have won their support.
 Women know that the running of the nation's business is simply house-keeping on a national scale. They know that there is nothing mysterious about it. They want the government to be managed as simply and as inexpensively as they manage their own homes. The women have heartily approved the budget system which the Republicans have established at Washington. They were quick to endorse the reduction of taxes by \$1,250,000,000 per annum and the curtailment of public expenditures without in the slightest disturbing business. When the Republicans stated:
 "We pledge ourselves to the progressive reduction of taxes of ALL THE PEOPLE as rapidly as may be done with due regard for the essential expenditures of the government administered with rigid economy," the women knew that the country would be safe if Republican candidates were elected to office.
 The platform's promise to continue the party's solicitude for all those suffering any disability as a result of service to the United States in time of war was particularly appealing to the women.
 Pledges of law enforcement, the quest to the states to promptly consider the Child Labor amendment, the declaration for high standards of wages, working and living conditions for women workers, and a score of other progressive planks have won the support of the women.
 Their minds at rest about the program of the Republican party if elected to run the government for the next four years, the women have started their campaign. They want Coolidge and Daves and they are working to get a record-breaking number of women to the polls next November.

John W. Davis, giving reasons why farmers should vote for him, says he will "readjust freight rates." To help farmers, freight rates must go lower. You say: "That must terrify the great financial powers, from J. P. Morgan, to Kuhn, Loeb, and from Kuhn, Loeb to the Rockefellers, that sit within the shadow, hounding most of them."

But wait. Mr. Davis is going to "readjust freight rates" and do it without "hurting the roads."
 This doesn't mean that he will chloroform the roads while the taxes are reduced. They would feel the pain, coming out of the chloroform. He has some other plan and the farmers wait to know what it is. Will he, perhaps, say to the railroads, "You must cut charges for hauling grain and livestock, but you may increase rates for hauling the two-legged livestock that votes?"
 —Arthur Brisbane.

Cow Brings Home Fawn and Calf

St. Helens, Ore., Aug. 20.—N. J. Beven, a farmer near here, has an addition to his stock today. When his cow returned from pasture, she had not only brought back her calf, but had a three weeks' old deer in tow. According to Beven, the deer comes in for as much devotion as the calf.

Sea Power Plant to Rival Niagara

By harnessing the tides in the Bay of Fundy between Nova Scotia and New Brunswick, approximately 500,000 horsepower will be developed. It is estimated by engineers who have made preliminary surveys of the project. It is planned to construct a series of dams, five miles long, which will hold the water in an upper and lower reservoir at the change of the tides. The power plant is to be located between the levels, and gates in the dams will allow the water to flow through the power-developing station at a volume estimated greater than that of Niagara.

H. FORD II LAUNCHES SHIP BY TELEPHONE

When the Henry Ford II, the first vessel built by the Ford Motor Company for iron ore and coal traffic on the Great Lakes, was recently launched at Lorain, Ohio, it was the telephone that played a leading role in the affair.
 Henry Ford II, the recent grandson of the automobile manufacturer, was to have been present at the launching, but due to illness, he gave the command by telephone from Detroit to the chief engineer at the Lorain shipyard, which set in motion the heavy masses of the hull that cut the waters of the ship. With the telephone receiver to his ear, the chief was able to hear the cheers and the whistle of the tug as the ship slid into the water.
 The Coolidge speech from end to end shows confidence that can't be mistaken. His statement about finances cannot be brushed away with any argument worth while. The Democratic party in 1921 had piled up a gigantic debt, more than 24 billions—billions of it short-term obligations, which would have puzzled anybody but Mellon.
 —Arthur Brisbane.

Portable Ice Plant

Having no moving parts, a small machine designed for making ice on automobile camping or touring trips, has been placed on the market. It consists of two cylinders, one a generator and the other a freezer, connected by a metal tube that also serves as a handle. The generator is heated on a kitchen range, gas stove or camp fire, a sliding signal moving up and down when the refrigerant is driven to the receiver or freezer. The generator is then immersed in water and cooled by coils. It now acts as an absorber, a partial vacuum being created in the generator which causes the refrigerant to be sucked back from the freezer into the absorber. The machine is sealed and welded so that the vacuum is maintained and the refrigerant sealed in the chamber. Because there are no valves, gauges or other moving parts to cause trouble and no power, refilling or charging is necessary, it is claimed that the device can be operated in any place at small cost.

You Owe Yourself—
 a profit on every dollar you receive for your efforts.
 A dollar in itself is only one hundred cents—but the man who regularly lays some of his income aside in an INTEREST-BEARING BANK ACCOUNT adds materially to his earnings—those dollars saved becoming tireless workers for him.
 Why not open an account with this institution and let your Bank Book show your faith in the value of self-denial and perseverance?
 Saving money is largely a matter of self-control and the sooner you get started the more you will save and the more genuinely satisfactory service you will get out of life.

COOLIDGE ACCEPTS WITH CONFIDENCE

Has Abiding Faith in Judgment of People on Accomplishments and Purposes.

SEEKS PEACE AND THRIFT

Wants Opportunity for All, No Government Monopolies, Independent But Helpful Foreign Policy.

Washington, Aug. 14.—No single question vital to the people of the United States was dodged by President Coolidge in the first great speech of the political campaign—his speech accepting the nomination as President offered him by the Republican party and delivered in Washington the evening of August 14.

After outlining the sound foundation of the party system of government, the President said: "Party means political co-operation, not as an end in itself, but a means, an instrument of government. If founded upon a great moral principle and directed with scrupulous regard for its integrity, it cannot fail to sweep onward and upward, advancing always steadily and surely, a mighty constructive force, a glorious bearer of progress."

"That is what the Republican party always has been and is today. In full faith that such it will continue to be, deeply conscious of the high honor it confers and the responsibility it imposes, I accept its nomination for President of the United States."

"In the history of our country is recorded the public services rendered by our party for more than the three-score years. That is secure, I pass on to the recent past and the present."

Progress of Four Years.

The President pointed out the condition of the nation in March, 1921, when the Republicans resumed the reins of government after a lapse of eight years. Though more than two years had passed since the armistice, the nation was still technically in a state of war. No diplomatic relations existed with Turkey, Greece, Russia, Colombia or Mexico, the Far East situation caused "grave apprehensions." Because of the war, "a reckless extravagance had come to characterize the administration of public affairs and was all too prevalent in private life." The national debt had risen to the staggering total of \$24,000,000,000, more than \$7,000,000,000 of it in short-time obligations without provision for payment. Government bonds were below par. High war taxes burdened the people. Demobilization and liquidation were incomplete. Huge railroad accounts remained unsettled. Transportation was crippled. Unliquidated foreign debts amounted to \$11,000,000,000. Banks were filled with frozen assets. Interest was high, capital scarce, and financial distress acute. About 5,000,000 were without employment. No adequate provision had been made for relieving disabled veterans and their dependents. The great powers continued to burden their peoples by building competitive armaments. An avalanche of war-worn people and cheapened merchandise impended upon America from foreign lands, the President pointed out.

Turning to the settlement of these vast problems since the start of the Republican regime, the President pointed out that treaties of world-wide importance have been ratified with Germany, Austria, Hungary, Colombia and Mexico, that 42 other treaties have met with the approval of the senate, while 6 still await action. Friendly intercourse with Greece and Turkey has been resumed. Peace and American rights have been assured in the Far East and the Pacific.

Turning to finance, the President called attention to the enactment of the budget system, and the resultant tremendous savings.

"For the fiscal year ending June 30, 1921," President Coolidge said, "our expenditures were \$5,538,000,000 and our surplus was \$96,000,000. For the year just closed our expenditures were \$4,497,000,000, and our surplus exceeded \$600,000,000. This was a reduction in the annual cost of government of \$2,041,000,000. The public debt now stands at about \$21,250,000,000, which is a reduction in three years of about \$2,750,000,000 and means an annual saving in interest of more than \$120,000,000. The \$7,000,000,000 of short-time obligations have all been quietly refunded or paid. The internal revenue taxes have been reduced twice, and many of them repealed, so that during the present fiscal year the tax receipts show a saving to the people of approximately \$8,000,000,000 a day compared with 1921. One government bond has sold well over 105."

The President pointed out that more than 40 per cent of the debt due us from foreign nations has been liquidated, providing funds for liquidating about \$19,000,000,000 of the national debt during a 62-year term.

"The finances of this nation have been managed with a genius and a success unmatched since the days of Hamilton," Mr. Coolidge declared.

"A great revival of industry took place which is spreading to agriculture. Complaint of unemployment has ceased, wages have increased. Capital has become plentiful at a low rate of interest," Mr. Coolidge declared, "and the banks of our country, as a whole, show a high percentage of liquid assets."

Grand Master I. O. O. F. Visits Tucumcari

Tucumcari American:
Grand Master J. Bert C. Leck of Carlisbad paid Tucumcari lodge No. 18 a visit Thursday night and addressed a large attendance of both Odd Fellows and Rebekahs. At the close of the regular business session, the Rebekahs invaded the Subordinate and gave a musical program and supper in honor of the Master's visit. The Grand Master spoke on the subject, "Odd Fellowship in Early Days" and traced the origin of the order back to 57 A. D. Following the address, a quartet composed of Mesdames A. F. Howard, J. M. Messrs. E. M. Higday and Thomas Lawson, sang, "He's an Odd Fellow." This ended the program after which the meeting was turned over to the Rebekahs who served refreshments of sandwiches, coffee and cake.

The meeting was attended by a large percentage of the membership of the lodges and showed a come-back of interest that was pleasing to the recently installed new officers.

Uncle Sam's Mail

NEW MAIL TERMINAL BUILDING, CHICAGO

Problems of the Postoffice Department are Many

By JOHN DICKINSON SHERMAN

HAVE you seen one of Uncle Sam's railway mail clerks in his nice new gas mask? Well, he isn't pretty, but he has to wear it nowadays to keep up with the times. You see, in that big train robbery not long ago near Chicago the robbers not only had an airplane and four automobiles, nitroglycerine, dynamite, sawed-off shotguns and automatic pistols but also gas masks and gas bombs. So ten or a dozen robbers had an easy time in holding up the 50 mail clerks on a solid mail and express train on the St. Paul and getting away with registered mail containing two millions of dollars. It was the gas bombs and gas masks that did the business.

To be sure Uncle Sam has caught most of the robbers and got back most of the money, but such things make lots of trouble. And Uncle Sam has plenty of mail troubles as it is.

Just look at the size of his mail business. He's got something like 60,000 post offices—and more being established every day of the year, except Sundays and legal holidays. There are nearly 350,000 workers in the Post Office department and they handle \$5,000,000,000 every year. And Uncle Sam, not being in the business to make money, has all kinds of trouble in making both ends meet. In the fiscal year of 1923, for example, it cost him over \$55,000,000 and he took in only about \$332,000,000.

And think of the things he has to attend to—stamps and envelopes; newspaper wrappers and postal cards; money orders, foreign and domestic; postal savings banks; first, second and third-class matter and parcel post; airplane, railway, carrier and rural route service and so on. Why, Postmaster General New has just been receiving bids for 11,000,000,000 stamped envelopes and newspaper wrappers. The postal savings banks have about \$150,000,000 to the credit of depositors. There are 45,000 rural routes and more than 10,000 star mail routes, the latter involving an aggregate annual travel by automobile and wagon of 85,000,000 miles. Little things like these give a hint of some of Uncle Sam's mail troubles.

A thing that keeps Uncle Sam on the jump every minute in his mail business is our increase in population. That was from about 92,000,000 to 100,000,000 in the ten years 1910-20. And an estimate by the census bureau puts our population on July 1, 1924, at 112,054,611, an increase of about 1,000,000 in the last four years. And that with restricted immigration. This means more towns, more post offices, more letters—more everything.

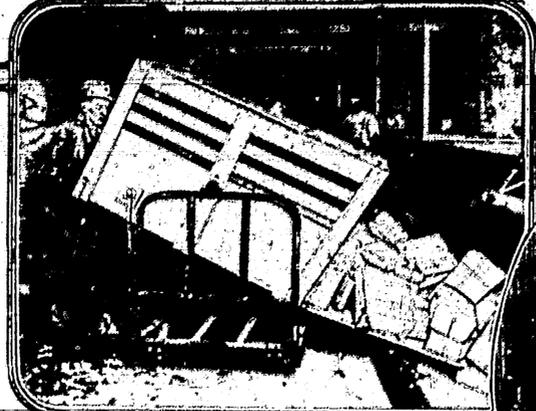

This new estimate of the population also shows that there are now 79 cities having a population of 100,000 or more, as compared with 63 last year. This means that Uncle Sam is hard put to it to keep up with the procession in the large cities. His post office facilities have a way of becoming inadequate over night. Here's an illustration. Years ago he built the great federal building in Chicago, occupying a whole block in the loop. It was to be the last word in post offices—and the massive pile was out of date before it was completed. In other words, Chicago's mail business grew faster than Uncle Sam built. Congressmen from Illinois will introduce a bill at the next session of congress to sell the building and site for approximately \$22,000,000 and use the money for two modern post offices, one on the South side and one on the West side.

Another thing that keeps Uncle Sam awake nights is the incessant, over-increasing demand for speed and more speed. Time is money, says the sage. It comes pretty near being literally true in the mails. The experts have calculated that the new transcontinental air mail service saves anywhere from \$5,000 to \$20,000 a day, representing interest on money transported across the country. Congressman M. Clyde Kelly of Pennsylvania goes so far as to hold that the service, by saving three days, increases our available cash reserve by \$100,000,000 each day. He is therefore sponsoring a bill in congress greatly increasing its scope. In the meantime requests for air mail service are pouring in on Second Assistant Postmaster General Henderson for air service. Even Alaska wants it.

It is no wonder that the Chicago post office was out of date before finished. As the railroads supplanted the stage and pony express in the transportation of the mails, Chicago—because it soon came to be the railroad center of the country—came to be the mail center. Through it now moves the mightiest mass of mail matter that is centralized anywhere on earth.

Mail operations quickly outgrew facilities. The situation got so bad in 1910 that a committee of the railway mail service made a thorough study of the operations at Chicago. As a result of this study, the necessary facilities were figured out and a comprehensive scheme of terminal operation was adopted. The plan called for a site conveniently located for both railway mail cars and auto trucks; a building of adequate dimensions and design in which to handle the mail economically; and an extensive application of mechanical apparatus.

The result of all this is that there has been

TITLING TRUCKS AND CONVEYORS

completed, as a part of the new Chicago Union station project, a railway mail terminal building which is unique among such structures. It is not only the largest existing building of its sort, being 680 feet long by 75 feet in width, with a height of 6 stories above basement, track level and sub-basement, but contains mechanical conveyors and transportation equipment without an equal in the world. This equipment is capable of handling 3,000 tons of mail each 24 hours. A further idea of the magnitude of the operations carried on in this terminal will be gained from the fact that more than 1,000 clerks and porters are employed in the railway mail terminal department alone.

Robert H. Moulton, a Chicago writer, thus describes the workings of the new plant, which was visited by mail men from all over the world who are in search of efficiency and speed:

The mail terminal building extends from Van Buren to Harrison street, between Canal street on the west and the Chicago river on the east, with a private driveway along the full length on the east side. The building is of the latest fireproof design of steel and concrete, and is furnished throughout with factory-type steel sash to provide the maximum light and ventilation. Its floor capacity is 500,000 square feet. It is of the two-level type and is served by platform tracks on the lower level and a trolleyway on the street level, the private driveway referred to affording 580 feet of clear roadway space, or enough for 60 street vehicles at one time. The track level has platform lengths adequate to serve 61 cars, while the basement affords communication, by means of tunnels, with cars at Union station platforms remote from the mail terminal.

Perhaps the most notable feature of this terminal is the system of belt conveyors employed in the building. According to the resident engineer who has been in charge of the installation of the mail handling equipment, this system is the largest installation of its kind in the world. It consists of 71 belt conveyors, requiring the use of approximately eight miles of belt; 400 tilting trucks of a special design; 1,500 balanced type trucks of a standard type; and a sufficient number of tractors to handle the trucks effectively throughout the building. In addition to these facilities there are 15 freight elevators, approximately 5 by 14 feet each.

The terminal has a variety of functions. One of the most important is the handling of mail received from and delivered to trains at the Union station. This consists primarily of the transfer of mail sacks from street vehicles to mail cars and vice versa. A great part of the operations of the terminal, however, consists in the receipt, classification and dispatch of all papers, catalogues and parcel post mail originating in Chicago, as well as mail of three classes passing through the city. While the bulk of the material is received in the terminal already weighed and with the postage canceled, a portion of it has not undergone these operations, and to take care of the latter a post office has been provided in the building.

Classified mail reaching the terminal from the street is received along the middle portion of the private driveway space; that from trains, on the basement or track level. From these two points of receipt it is delivered to the upper floors of the building for the necessary work of classification.

Formerly parcel post mail originating in Chicago was sacked and loaded into trucks at business houses and transported to the mail station. From 23 to 30 minutes were required to load a truck and a similar length of time needed to unload it. Under the new system the same work is done in from three to five minutes at each end of the line, thus effecting a saving of close to an hour on each motor truck load.

The first step in the system begins at the large business houses or mail order concerns. The mail is loaded into six or eight of the small tilting trucks and the latter are conveyed by a large motor truck to the mail terminal building. Arrived there the tilting trucks are pulled out of the motor truck, coupled together in trains and attached to an electric tractor, which hauls them to a trough or pit, 30 feet long and 48 inches wide, in the floor. A hopper at one side of the pit marks the route for the train of tilting trucks and prevents it from slipping into the pit. As the train passes along, employees tilt each truck and the contents slide to the feed belt there being three feet of space each for 40 mag-

below. The belt is traveling in the opposite direction from that of the train, and thus it clears each truckload in time to receive the next load. The conveyors are from 50 to 100 feet in length. They travel 40 feet a minute and carry all the precanceled mail going through the building. The width of the belt is 32 inches and it has a carrying capacity of 15 pounds per square foot. This would amount to approximately 25,000 pounds, or 12½ tons per hour. Two main conveyors deliver to inclined conveyors which in turn deliver to two primary separation units on the second and third floors.

The separation unit on the third floor, which is 130 feet long, takes care of the mail for the states of Iowa, Indiana, Michigan, Wisconsin, Illinois and Ohio. The sorting clerks stand on a platform extending between the two tiers of belt conveyors.

They pick from the feed belt the packages intended for the different states, and throw them onto the various belts specified for those states. Canvas flares at the sides of the belts prevent packages from going onto the floor, at the same time deflecting packages to belts and breaking their fall. A separation unit on the fourth floor takes care of the belts assigned to the states of Missouri, New York, Kentucky, etc. The primary separation system on this floor has the same number of belts as the system on the third floor, the only difference being that the fourth floor system is 90 feet long whereas the third floor system is 120 feet in length.

The final separation and classification of all mail handled by the terminal forces is made at tables on the second, third, fourth and fifth floors, where the mail is placed in sacks and properly marked ready for delivery to the Union station forces on the track floor or the basement, or to the street vehicles on the street floor for delivery to various parts of the city or to other railway stations. Such mail, in sacks, is handled by means of tractor trains which take the sacks direct to mail cars.

UP-TO-DATE MAIL CLERK

The movement of the sacked mail from the floors mentioned to the track or street floor is accomplished by carrying the sacks, on balanced type trucks, to holes in the floor leading to longitudinal ceiling conveyors, five to a floor, which extend practically the entire length of the building. The mail is dropped onto the ceiling conveyors through openings, or chutes, in the floors. There are 60 of these chutes, 24 to 30 inches in size, to a floor and they are uniformly spaced. Since it is not desirable to have the mail sacks drop the full vertical distance of 4 feet from the floor level to the ceiling conveyors, the chutes are each given a quarter turn, an arrangement which permits the sacks to slide within three feet of the belts. Each of the 20 ceiling conveyor belts is also connected with one of 5 double spiral chutes placed in different parts of the building.

The belting forming the conveyors is made of four thicknesses of canvas, weighing two pounds to the square yard. In splicing the belts flexible metal lacing is used. The ends of the belts are pulled together by means of clamps and the teeth meshed together with a strip of metal inserted to keep them from pulling apart. The belts travel on rollers of cold-drawn seamless steel tubes which range from 3¼ to 5 inches in diameter. This tubing is spot-welded to pressed steel heads that support turned steel shafts ¼ inch in diameter. The shafts are fitted with renewable steel races and there are two roller bearings to each roller. This method of installation has been estimated to save some \$15,000 a year.

Operation of the belts is by means of motor-driven double-drive pulleys, the main pulley being 30 inches in diameter and provided with an automatic gravity take-up. The 71 separate conveyor belts are driven by an equal number of motors. Every motor has a control, there being six control boards in all, or 2 to each of three floors. There are lock buttons at every motor, and every 100 feet there are start and stop push buttons. The latter feature is provided in order to prevent the piling up of mail should a section of the train of conveying equipment in advance be shut off. The cost of this system of belt-conveyor transportation alone was half a million dollars.

It is the belief of postal authorities that aircraft will soon occupy as important a place in the transmission of mail as railroads and motor trucks. With this idea in mind, provision has been made by which the roof of the new terminal building can be converted into a landing and starting place for airplanes and possibly even dirigibles. A number of foreign governments interested in the possibilities of aerial mail have already requested from the United States full information on this feature of the new station, while others are studying the station as a whole with the idea of installing similar parcel post facilities in their countries.

Great Value of Stock Exhibits

Breeder Gains More Than Just Ribbons or Prize Money He May Win.

A live stock breeder gains more from exhibiting his stock than just the ribbons or prize money he may be fortunate enough to win. Few breeders win enough prize money to pay all expenses of showing. This is just as true with unfitted animals driven to local fairs to compete for \$2 prizes as it is with high fitted animals and shipped hundreds of miles to compete for \$25 and \$50 prizes at the larger stock shows. This fact should not discourage the exhibitor, however, as there are other benefits of considerable importance.

Educational Value. The educational value of the stock show cannot be overestimated. The show ring is the greatest educational institution for teaching animal form and type. Types sometimes change materially in a very few years. Breeders discover the defects in their own animals when they see them lined up in competition by an efficient judge. Few men become really good judges until they have exhibited stock in competition. Until a man is a good judge he is rarely a successful stock-breeder.

Advertising Counts. Probably the greatest return from showing live stock is in the advertising one gets for his stock. The man who exhibits live stock, whether it be good or medium in quality, gets his name before people in a way hardly equaled by other forms of advertising. This is more especially true if animals are prize-winners and have been shown in attractive condition. With a well-fitted herd on exhibition and the name of the breeder properly displayed on signs or placards, a most effective impression is made on the minds of spectators and prospective buyers. Those who are most successful financially in breeding and selling live stock, consider the exhibition of their stock as a highly important and necessary form of advertising.

Charles I. Bray in Colorado Extension Bulletin, "Fitting Live Stock for Show."

Renovating Strawberry Patch After Harvesting

The strawberry patch which has borne one crop should be renovated soon after harvest. This is done by plowing out the plants on either one or both sides of the row, leaving a strip only about four inches wide. The soil of the plowed land is thoroughly cultivated and, if a spike-toothed harrow is used, cross-cultivation may be practiced so that a good bed is made for the new runner plants. Under good soil conditions these will start to grow within a short time and will make a row of new plants 12 to 16 inches wide by early fall. The new plants are confined to the proper width by continuing cultivation until they cease to grow.

Usually it does not pay to renovate a commercial strawberry patch that has already produced two crops, although a home patch, under very favorable conditions, may be allowed to yield three and sometimes four crops.

Handling Broody Hens

How to handle the broody hen in the general purpose flock is a problem that confronts stock owners every summer. If there are such things as plagues in the poultry business the broody hen is perhaps the worst one. A good way to overcome the broody instinct is to confine the hens in slatted cages, suspended in the shade. Confine them the first evening they remain on their nests, but feed and water abundantly the same as you do the non-broody hens.

Proper Temperature Is Important in Churning

No factor in the efficient churning of cream is more important than the proper temperature. The temperature will vary between the limits of 50 degrees in summer and 65 degrees in winter. For a minimum loss of fat in the buttermilk and a good firm butter the churning process should take from 30 to 45 minutes. When churning is accomplished in 10 or 15 minutes the butter always comes soft and there is a great loss of fat in the buttermilk.

Kill Gophers by Poison

Gophers can best be killed by placing poison in their burrows, according to C. E. Mickel, of the University of Minnesota. He recommends a mixture of one-eighth ounce of powdered strychnia alkaloid, one-eighth ounce of baking soda, and one-eighth ounce of saccharin. These amounts are sufficient to poison four quarts of vegetable bait. Potatoes, carrots, parsnips, beets and turnips make especially good bait, covered with the poison.

Best Garden Fertilizer

White baryard manure is the best fertilizer for the garden, still the best fertilizer that comes in bags is a good substitute and has at times advantages of its own. Now that automobiles and motor trucks are taking the place of horses there will be less horse manure and though cow manure can be substituted the results are not so satisfactory as when old-time manure consisting of both horse and cow manure was used.

Alfalfa Pasture Is Superior for Swine

Has No Equal in Palatability and Protein

"In palatability and in production of protein alfalfa has no equal as pasture crop for hogs. Alfalfa hay is a profitable hog feed during the winter months," says E. G. Eiling, animal husbandryman, Kansas State Agricultural College.

After spring litters have been weaned, brood sows will do well on alfalfa pasture and a light grain ration. A hog raiser will find it profitable to feed corn liberally to his spring litters while on alfalfa pasture. They will then be ready for the fall market, which is usually higher than the winter market, according to Eiling.

At the Kansas experiment station 50-pound pigs which were fed corn with alfalfa pasture gained three times as much per day as hogs receiving corn alone in a dry lot. The first group required only 4.5 pounds of corn to make a pound of gain, whereas the second group required 13.25 pounds. Even when a well balanced ration was fed, the pigs on the alfalfa gained 44 per cent more per day than pigs fed the same grain ration in a dry lot. The first of these groups required 3.5 pounds of grain to produce a pound of gain while the second group required 4.5 pounds.

Alfalfa pasture should not be grazed too closely. It is better to have a large acreage so that it can be cut about twice and yield one-fourth or one-half a crop of hay. This acreage will, of course, vary with the rainfall.

Production of Combs Is Big Asset for Beekeeper

A good stock of drawn combs is the most valuable asset that a beekeeper can have, especially if one is a producer of extracted honey. They are of particular value in a season when the honey crop is light, because they enable the bees to store what little nectar is available instead of using it for the building of new comb. Every beekeeper should endeavor to have a number of new combs drawn during a good season to replace any that may become damaged or broken.

A good comb is one that is straight and containing as few drone cells as possible. It must also be firmly attached to the frame on all four sides and strongly supported in the frame by means of wire. To produce such combs, the frames must first be tightly wired; No. 23 tinned wire is most commonly used. Full-depth Langstroth frames should have at least four horizontal wires; larger frames will need more.

When extracting the honey from new combs, first take only part of the honey from one side, reverse the comb and empty the other side; again turn the comb and finish the extracting; this will prevent breakage. If all the honey is extracted from one side without removing any from the other, the weight of honey on the inner surface of the comb will crack, or even break out the whole center.

Silo Needs No Drainage

It is not necessary to make any provision for drainage in a silo. If there is excess moisture the most of it will seep through the walls of the silo, and if you have drainage at the bottom, air will enter and some of the silage will spoil. Green corn contains just about a sufficient amount of moisture so that there will be no excess moisture and no seepage. When dry stalks are ensiled water must be added, and there is little danger of getting too much.

Pasturing Sweet Clover

Stock can go onto sweet clover in April and it may be pastured hard clear up to August 15. The harder it is pastured early in the spring the better, for this induces new shoots and it keeps down stems which light pasturing would allow to become woody. Early pasturing keeps the plants tender and nutritious. With new seeding do not turn in the stock until about July 1, and then it won't do to pasture it as hard as the two-year-old field.

Farm Hints

The man who buys cheap clover seed gets just what.

Rats are enemies of the harvest—let the youngsters and the dogs loose upon them.

Uncle Ah says that many a time it's better to do a thing than to be an expert on how it ought to be done.

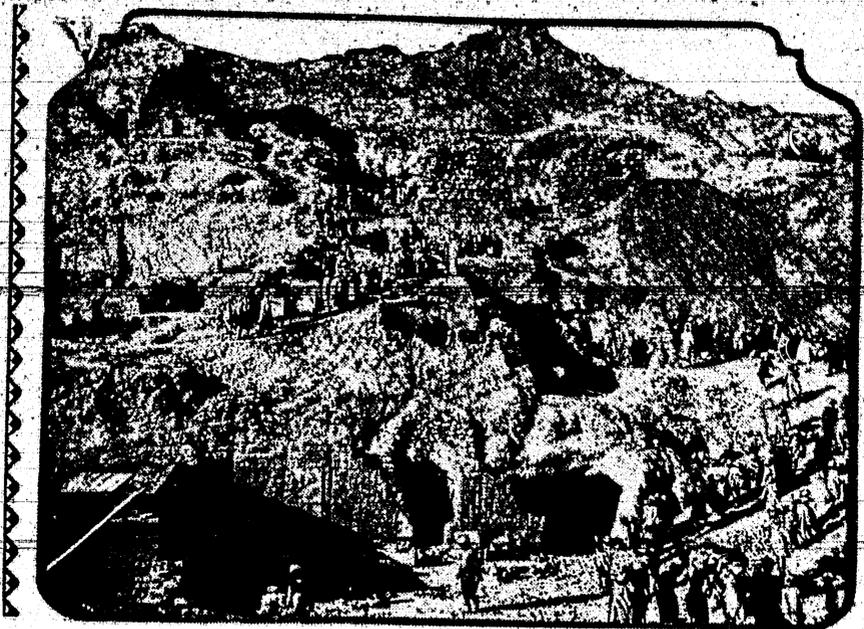

What is true of early spring vegetables bringing the highest price is also very largely true of fall vegetables.

Farmers must be prosperous or the nation will not be prosperous. That is why everybody is vitally interested in farming.

If the drivers and owners of horses could experience some of the pains which these animals must endure, there would be fewer sore shiners.

A great deal of farm butter has a strong undesirable buttermilk flavor. Such butter does not keep well. Every effort should be made to remove as much buttermilk as possible.

Digging in Egyptian Royal Cemetery

This photograph, which has just been received in this country, shows the progress of the work being carried out under the direction of Dr. Clarence S. Fisher, the noted archeologist, in the royal cemetery at Thebes, Egypt.

Geography of the Electoral College

Practice of Medieval Holy Roman Empire.

Washington.—Choosing a President, the next event on United States' political calendar, brings into the limelight the history of the electoral college, a practice of the medieval Holy Roman empire and Maryland's contribution to the Constitution.

"Red wine, roast pork, chicken, pigeon, goose, rabbit, cakes and sweetmeats were part of the business of the electoral college in its earliest, lusty, German youth," says a bulletin of the National Geographic society from its headquarters at Washington, D. C. "Nothing as prosaic as a curtained closet would do for a Rhinish craftsman engaged in choosing an executive. The electoral college first appears growing out of well-dined sessions of medieval 'Rotary' clubs in such trade centers as Cologne and Mainz along the Rhine.

"The appearance of organized towns in central Europe following the leaving influence of the crusades, set the stage for a battle. That new figure, the merchant, began to refuse obedience to the extravagant, fighting princelings. With the aid of leaders of medieval unions or guilds, the merchants won freedom for their towns. To select the town administrators peaceably, guilds and merchants sent electors to an election dinner party. Under the benign influence of much-splendored food-officers were elected and announced to the waiting populace. Election day was a holiday within the town.

"Out of the town 'Rotary' club elections grew the imperial electoral college which proclaimed the head of the Holy Roman empire. At Mainz, and later at Frankfurt, the bishops of Cologne and Mainz and a few nobles of larger German states met after the death of an emperor to elect his successor. Maryland's electoral college and the present American electoral college are direct descendants of this Holy Roman empire institution.

Now Electors Never Meet.
"The electoral college for which millions of citizens will vote in November, will never meet. In each of the forty-eight states certain little groups will gather and mail an envelope in Washington. The contents of this envelope will be counted by two tellers of the house of representatives and read by the president of the senate and the members of the electoral college will have been graduated until another four years.

"Difficulties of American parties in selecting candidates for Presidential elections fade against deadlocks in the electoral college of cardinals at Rome. Undue delays led early to the present custom of forced seclusion during the voting for a pope. The cardinals' income was cut off during the conclave, they were allowed one servant apiece, and they lived a common life without separate cells. Their food was passed through a guarded window. It consisted of only one dish after the first three days and bread and water after the fifth. When these measures brought no results in 1268, the roof of the episcopal palace was taken off, and the cardinals seemed to have camped under the sky for nearly three years before they chose a pontiff.

"France has a \$100,000,000 convention hall for its electoral college. This auditorium, which cost the Reign of Terror, was surprised in the midst of its regular seven-year sleep recently, when the august senators and the afflicted deputies trooped out twelve miles from Paris to elect M. Doumergue President of France.

Elections in Palaces and Clubs.
"Versailles, whose mirrors have reflected world moving events from the machinations of Madame de Maintenon to the signing of the World War treaty

In 1912, is less often recognized as the official capital of France.

"Although the senate and chamber of deputies of France convene in Paris now, they must meet jointly at Versailles to elect a President. This officer ordinarily lives for seven years in the Palais de l'Elysee and performs duties similar to those of the British king; he speaks at patriotic gatherings, unveils monuments and calls in new premiers to replace defeated executives. Millerand, under pressure of the French legislature, resigned before his term ended. That is why the \$100,000,000 home of Louis XIV, a glorious monument to monarchy uncheeked, awoke out of its seven-year sleep to find a heavy guard thrown about its marble court while French legislators rolled up to the south wing in automobiles.

"Cologne's early Rathaus, where burghers dined and voted, finds a counterpart today in some of London's famous political clubs. Many English premiers are elected in the Carlton club and similar institutions on Pall Mall, under the shadow of Buckingham palace and a few blocks from the parliament buildings. Selection by the king is merely an approval of a decision by leaders made in a leading 'Conservative' or 'Liberal' or 'Labor' club."

Adhesive Tape Replaces Corset to Mold Body

Paris.—Adhesive tape bound tightly over the body is a substitute for corsets to obtain a slim silhouette, which is the latest fashion. Even rubber ceintures and girdles fail to give the suppleness necessary, so society women now mold themselves into fashionable form, using swathes of absorbent cotton and stretching adhesive tape tightly over it from the hips to the bust.

The west Virginia carries eight six-teen-inch guns, the largest ever mounted on a battleship.

One of Boy Scout Activities

Among the many things that boy scouts are taught in camp is wood carving. The picture shows a boy scout carving the head of an Indian, which will be used as a challenge shield in one of their games.

INVESTIGATORS FIND DOUGLAS FIR IS SOURCE OF WHITE SUGAR

British Columbia Indian Made High Quality Sweet.

Vancouver, B. C.—Recent exhaustive investigations by Prof. John Davidson, botanist of the University of British Columbia, have revealed that long before the coming of the white man to Canada the Indians of British Columbia made a white sugar of high quality which they derived from the Douglas fir of that territory. This source of sugar supply seems to have escaped entirely the attention of white traders, explorers, surveyors, missionaries and other pioneers, and remains today an untapped and unutilized resource. Professor Davidson's investigations of this subject are described in an article by Francis Dickie, of Merlot Bay, B. C.

This sugar appears in white masses of different sizes, ranging from a quarter of an inch to two inches in diameter. The smaller masses form like white drops at tips of the single leaves of the fir and also at times several of the leaf tips are imbedded in a larger drop. Masses of greater size scatter over

the leaves and branches. When placed in the mouth the sugar is found to be exceedingly sweet, with a flavor comparable to the highest class of the manufactured article. For a moment it passes into a pasty consistency, but quickly becomes entirely soluble.

The investigation proved that this sugar is the result of natural exudation from the tips of the needles of the fir. It crystallizes in some instances, cementing the twigs and leaves together, but a slight rain quickly dissolves it from the branches and it is to be found recrystallized at the base of the tree.

Exposure to sun and a long succession of sunny days are necessary to produce the sugar and it is not generally found where the first stand densely, so that a regular harvest of any size could not be depended upon. The deposits are, nevertheless, of considerable value. While the fir sugar will never play a part as a food supply like the product of the cane and the beet, the mass from the Douglas fir contains about 50 per cent of a sugar known as melastose, which in small quantities is selling at \$66 a pound.

Daddy's Evening Fairy Tale

MARY GRAHAM BONNER

AT MOSS POND

In the deep woods was a pond. It was surrounded by moss and Moss Pond was its name.

"Let us have a swimming party," said the Queen of the Fairies.
"Oh, let us have a swimming party," said Fairy Princess Joy.
"Yes, let us have a swimming party," said Fairy Princess Twilight-Bell.
"That would be such fun," said Fairy Ybab.

A Funny One Peter Fairy Woodriva Gnome Had Made.

"Let us ask everyone to join us," said the Queen of the Fairies.
So the Breeze Brothers, those good little messengers for the Fairyland people, took around the invitations and asked everyone to come that very afternoon.

They invited Edie Elf and all of the Elves.
They invited Billie Brownie and his brother Bennie Brownie and all of the other Brownies, too.

Of course, Old Mr. Giant was invited and Witty Witch was invited, too.
The members of the Bogey family and Ollie-Oaf and his family were all invited.

Peter Gnome and his family were invited and word was sent to the Pond Fairy to try to get back on time.

She had been off calling on some friends of hers near a pond some distance away.

She came back in time for the party and all the other guests arrived on time.

Oh, how deliciously the water did feel on that hot summer afternoon and how nice the cool, soft bottom of the pond felt where there was nice, mossy, soft ground and pleasant weeds, too.

Everyone did fancy strokes and played and laughed and blew bubbles.

At times the whole pond seemed to be one mass of bubbles and as they blew bubbles they sang this song:

Blowing bubbles is such fun,
Just take a look at this fine one!

Then they pointed to a beautiful one the Fairy Queen had just made.

Blowing bubbles takes some skill,
They often turn out as they will.

Then they looked at a funny one Peter Gnome had made.

Blowing bubbles with Fairyland soap gives us all a great deal of hope.

And it did seem, just then, as though all the bubbles were really quite perfect.

Blowing bubbles we all adore,
Bubbles you can't buy at a store.

"No," said Billie Brownie. "Everyone must blow their bubbles, some with ordinary soap, but we blow with Fairyland soap, which only the Queen of the Fairies has."

Blowing bubbles is fine and gay,
It is a glorious game to play.

The bubbles were all becoming better all the time.

Blowing bubbles is simply great,
We blow them at a good old rate.

They were blowing them

Blowing bubbles gives appetite
When we see the food is sight.

For at that moment the Fairy Queen, who had hurried away for a few moments, was seen carrying a splendid tray filled with woodland supper food, and behind her were many other little Fairies carrying trays.

So they stopped swimming and playing and blowing bubbles and sat around the end of the pond, with their feet dangling in the water, and ate of the delicious Fairyland repast.

A Milkmaid's Nails
The new baby had not yet been christened.

"I wish you'd call her Serchie, mamma," said little Elsie.
"Serchie? I never heard of any such name, dear," said her mother.
"Why, mamma, surely you haven't forgotten the song: 'I'm Going A-Milking, Serchie Said!'"

Bobbie's Interpretation
Little Bobbie's mother, who was very fond of singing "God Save the Queen," was horrified one day to hear the little fellow shouting: "God save the milk!" and took him to task about it.

SUFFERED TWELVE YEARS WITH STOMACH TROUBLE

"My recovery has been a surprise to myself and all my friends," recently declared Jacob Ferdinand, R. F. D. 2, Road Du Lac, Wis., a prominent citizen of this city, in relating his remarkable experience with Taniae.
"The suffering I went through from stomach trouble for 12 or 13 years simply can't be described. In my efforts to find relief I spent over one thousand dollars, but kept getting worse instead of better. A large part of two years I was laid up in bed and for four months of that time I couldn't get up at all.

"Finally I sent my daughter for a bottle of Taniae with the result that I found immediate relief, and seven bottles made a well and happy man of me. I will gladly talk to anyone personally and answer all letters regarding my experience with Taniae. It proved a godsend to me."
Taniae is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Taniae Vegetable Pills, for constipation, made and recommended by the manufacturers of TANIAE.

Mystery Present

"And how did my precious like the little present I made him with my very own hands?" cooed the sweet young thing to the object of her affections.

"It was lovely," replied the young man. "But there was one thing I should very much like to know, dear."

"And what is that, pet?"
"I want to know what your present was intended for," he answered, tactlessly. "My sister said it was a cushion. Mother thought it was a tobacco pouch, while I'm using it for a pen-wiper."

Now there's a coolness between them which no explanation can set right. — Pittsburgh Chronicle-Telegraph.

Amazing Mental Feats

An Indian student who visited London recently is a human calculating machine. He performs the most intricate sums without resorting to pencil and paper, and can name immediately the day of the week for any date in the past or future.

At a test, two numbers, each of forty figures, were chalked on a blackboard. The Indian was told to multiply one by the other. After less than half an hour's mental arithmetic he gave the correct answer.

Important to All Women Readers of This Paper

Swamp-Root a Fine Medicine

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition. Poor health makes you nervous, irritable and may be dependent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by parcel post. You can purchase medium and large size bottles at all drug stores.—Advertisement.

Takes Time to Read Bible
Thirty students at Seattle, Wash., read the whole Bible without stopping, and found that it required 59 hours and 20 minutes for a cover-to-cover careful out-loud enunciation of it with no stop-over to eat or sleep. The experimenters worked in relays, two at a time, one reading a chapter, the other the next without a pause. Each kept at it two hours, then was relieved.

Cuticura for Sore Hands.
Soak hands on retiring in the hot steam of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus ointment with tannic paper. This is only one of the things Cuticura will do for you. Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

Tripping the Philosopher
"I don't think your philosophy logical."

"Why not?"
"You say that every man is sent into the world for a purpose—that he has certain work to do."

"Yes, that I believe."
"And then you go right on and say that there is no man here that the world can't get along without."—Detroit Free Press.

Luck's Companions
Good luck is the willing handmaid of upright, energetic character and conscientious pursuance of duty.—Lowell.

Don't check if you get your substitute when an advertised product is called for. Maybe your customer will never come back.
—E. M. Maltby, Jr.

Omission Explained
"Father," said little Timmy O'Brien, "why didn't St. Patrick sign the Declaration of Independence?" Didn't they ask him?"

"Shure they did, me bhoy; but ye see he thought the man that brought it to him was wicked o' him; an' ye craft hunters, an' he kicked him out o' the house."—Boston Transcript.

Exactly the Opposite
Blif—"I hear you can't meet your creditors." Bob—"Can't meet 'em! Why, I can't dodge them!"

Children Cry for

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrup, prepared for Infants in Arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher* on each package. Physicians everywhere recommend it.

J. H. Palmer came home this morning from the east where he had been for the past several months attending to business matters connected with projects in which he is interested in this locality.

Contractor Wm. Langston, who has been at Eagle Creek for the past ten days building a cabin for Dr. and Mrs. R. E. Blaney, besides repair and improvement work for other people, came down on Wednesday.

Donald McLean is here this week from Eagle Creek, where the folks are enjoying an outing. They now reside in El Paso.

Mr. and Mrs. J. M. Penfield, the Misses Charlotte and Helen Rice of Lincoln, will be week-end guests of Mr. and Mrs. Wilbur E. Coe at their home near San Patricio.

Mr. and Mrs. Brack Sloan and son, Mark, were Carrizozo visitors on Monday, returning to their ranch above Ancho in the evening.

W. C. Hendren, the genial base ball enthusiast of Fort Stanton, was a caller at this office on Monday.

John Scharf of Three Rivers was a visitor here on Monday.

Mr. and Mrs. Thomas M. Carr are the proud parents of a ten-pound baby girl born to them Sunday evening at 9:30. Mrs. Carr and daughter are doing nicely and 'Tommy' answers questions at the ticket office window so loud that he can be heard as far as the Eating House. There is even a substantial increase in the speed of his car.

Mr. and Mrs. C. A. Snow and children arrived home last Sunday from a motor trip to Texas, where they visited Mr. Snow's parents at Stephenville and brother, O. J. Snow and family at Lubbeck. Mr. Snow says that those who are contemplating this trip need have no fear of holes in their tires, as he is quite confident that he picked up all there were along the road.

Miss Lorena Sager will be the week-end guest of Mrs. Ellen V. Crutcher at Capitan.

The Misses Audrey Miller and Rosalind Burke were week-end guests of Mr. and Mrs. Wilbur E. Coe at their San Patricio home.

Mr. and Mrs. M. B. Paden spent the week-end in El Paso in remembrance of Mr. Paden's birthday.

Don't You Think?

The Democratic candidate for the presidency, Mr. Davis of West Virginia, says he has thoroughly 'digested' the La Follette platform. Don't you think he must have wonderfully strong machinery in the digestive line if he has made a thorough job of the Senator's platform?—Tucumcari American.

To the above let us add that if John has really digested the Senator's platform, he would be of the same opinion of that platform that Hambone was of watermelons when he said: "Dey is a heap 'o fill-fulment about 'em."

Mr. Kelsey's Announcement

Mr. Samuel Kelsey, whose announcement will be found on page 4 of this issue, needs no introduction to the people of Lincoln County, therefore, to dwell at length on the good merits of this well known gentleman would be nothing new to the masses of the people whom he addresses. He is a man, who will, if nominated and elected, make one of the best Sheriffs this county has ever had. We could print pages in words of praise for Mr. Kelsey, but this would be nothing beyond what is already well known. Just read his announcement.

The Ferguson boys from the Nogal Mesa met with an accident last Saturday night while returning from Oscuro after attending the dance given by "Ding's Diablos." Their car ran into a ditch five miles this side of Oscuro, completely wrecking the Buick and giving the boys some ugly bruises, but fortunately, none were seriously injured. Road foreman Billy Ferguson has a force of men at work engaged in building a much needed bridge at that place.

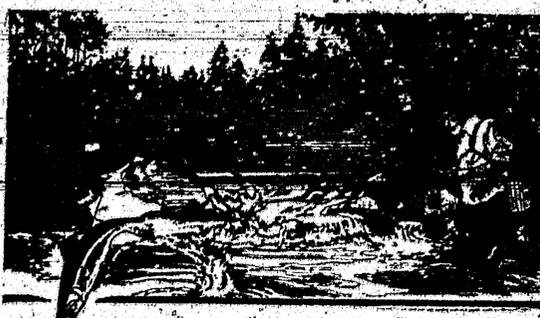

Woman's Missionary Society

The Woman's Missionary Society of the M. E. Church met at the home of Mrs. J. M. Beck last Tuesday evening and formulated plans for a baked sale to be held at the Wetmore building on Saturday, (tomorrow) Sept. 23. The sale will last through the afternoon and the early portion of the evening, to which the public is cordially invited.

The dates of meetings of the society have been changed from Tuesdays to Wednesdays and the next meeting will be held at the home of Mrs. Chas. Terrall on the afternoon of Wednesday, September 3. Members of the society are urged to attend and friends of the movement are cordially invited.

Judge Hewitt was, as usual, a welcome Carrizozo visitor the week.

Camping Outfits

CAMP LIFE is wonderful if you are properly equipped with everything necessary to enjoy it.

You CAN come here and find a liberal selection of modern Camp Equipment reasonably priced.

Bags and Trunks

There is nothing that will add more to the enjoyment of your Vacation Trip than to know that your wearables and sports equipment are packed safely and conveniently in a substantially built Bag or Trunk.

Corset Grace

Bon Ton Round U Fashioned from firm, elastic and pink brocade, these corsets are supporting and confining, yet impart to the figure the much desired corsetless appearance.

Undermuslins

A New Line of Princess Slips Just Received

A varied collection of the finer articles of Underthings for Women's wear.

New Linoleum Patterns

Latest Designs—sold by the Yard at attractive prices; dependable, sanitary and has exceptional durability.

Summer Hardware Economically Priced

YOU WILL FIND a number of articles in this store that will add to the enjoyment of both work and play during the summer months. It will be well worth your while to drop in and look them over. The prices are within your means, permitting buying everything you need.

Summer Clothes for Men

COOL, COMFORTABLE SUITS of light weight materials that will add much to your Vacation pleasure. And a very important feature is the high-grade tailoring, which insures them holding their shape and appearance. Let us slip one on you.

New Congoleum Rugs

All Sizes and Patterns which will make your floor one of beauty and everlasting wear. Needs no vacuum cleaning, no beating, no hard sweeping, easily cleaned with a damp cloth. It is moth-proof, spot-proof, long-lasting and lies flat without fastening.

Come in and look them over

NEW FALL SUITS for MEN

The Line with the Finest Tailoring

"Beyond Criticism" --

is what those appraising eyes are saying of the happy man who's purchased one of our new CLOTHCRAFT or MARX & HAAS SUITS for Fall.

Because

They are unfailingly neat, dignified and perfectly suitable for any occasion;

Because

They are made in styles that appeal to both men and young men;

Because

They are constructed of excellent Worsed Materials that are guaranteed to give you the best wear and service. You'll be surprised when you've examined these models in Gray, Blue or Brown—that the price is so attractively moderate,

"UNIVERSAL PROVIDERS" **ZIEGLER BROS.** ESTABLISHED IN 1886

NOTICE FOR PUBLICATION

Tom W. Jones, Plaintiff, vs. Martina Garcia, All the Unknown heirs of Martina Mares de Garcia, Deceased, the Said Martina Mares de Garcia, Deceased, being the First Wife of Gregoria Garcia, Deceased, all the Unknown heirs of Elias Garcia, Deceased, all Unknown persons or Claimants who claim any interest in or title adverse to Plaintiff in and to the herein after described premises Defendants.

In the District Court of Lincoln County, New Mexico.

The above named defendants, and each of them, are hereby notified that there has been filed against them the above styled and numbered cause by said above named plaintiff in the above mentioned court, the nature of which action is for the purpose of quieting the title in the above named plaintiff and debarring, estopping and enjoining said above named defendants, and each of them, from asserting any claim whatever in and to the following described real estate, situate, lying and being in Lincoln County, New Mexico, as follows:

All of the South one-half of the southeast 1/4 of Section Six (6) and the South half of the southwest quarter 1/4 of Section (3) all in Township 11(11) South of Range Fifteen (15) East New Mexico Principal Meridian not heretofore conveyed to Roberto Chavez (26) acres and to Reyes Mirabal (26) acres and one certain tract of 160 yards in circumference, surrounding the chapel which is granted to the church (See deed of record). The tract granted by this deed comprising only 110 acres more or less

all water rights in the Rio de los Rios comprising two ditches, known as the "Old Gregorio Garcia ditch" one on the North side of the river and on the South side. The Ditch on the South side owned equally interest by Robert Chavez. The road to

the church to remain where now established and to be not more than 10 ft. wide.

The description of the dividing line between this land and Roberto Chavez land.

Beginning at a white Oak Tree 12 inches diameter situate on the south side of the main road 75 (Seventy-five) feet east of dam in Rio Turdoso; thence South to a point on the south bank of river about 50 feet, thence following west bank of river to a group of three white oak trees about 6" in diameter; thence along line of fence to a stone marked R C at point

J P V of intersection with fence running east and west, thence due south to the south line of section 5 Tp. 10 S. R. 15 E.

And said defendants, and each of them, are hereby notified that unless they enter their appearance and plead in said cause on or before the 8th day of October, 1924, judgment as prayed for in said complaint will be granted.

The names of the attorney for plaintiff is H. B. Hamilton, and his post office and business address is Carrizozo, New Mexico.

Dated this 21st day of August, A. D., 1924.

R. M. TREAT, County Clerk.

Awful Ignorant Chap

Matt Tolliver is an assistant fireman for a college in Dixie. His mountain origin betrays itself in many a quaint accent and idiom. Bill Street and Daly Morgan are "belp" in the same institution. Although both of the latter are illiterate, their flat-woods rearing gives them a feeling of superiority.

"Bill, Matt's an awful ignorant feller, ain't he?" Daly remarked to his friend Street one day. "D'ye ever notice the way he talks? Like for instance he meets the president, he'll say, 'Howdy, Fessah? He don't never say Per-fesser at all.' Every-body's Magazine.

Trainload of Silk

A bale of raw silk is valued at about \$1,500. It weighs nearly 120 pounds and as 250 bales go into an ordinary freight car a carload has a value of about \$400,000. It is usually transported from the Pacific coast to the New York market in rabs of from five to thirty-five cars to the train.

Mrs. Eugene Myers left Tuesday on No. 4 for Corona to join her husband, who is employed on the E. P. & S. W. water service and for the period of time he is employed in that locality, they will make Corona their home.

Pete Johnson was in from the Spence ranch this week and returned for a short time before starting for Mexico which he expects to do about Sept. 1.

Mr. and Mrs. Elmer Zumwalt who were residents of Carrizozo for many years past, are now located in Bisbee, Arizona, where Mr. Zumwalt is engaged in the garage business and doing well.

Department of the Interior United States Land Office Roswell, New Mexico, August 18, 1924.

Notice is hereby given that the State of New Mexico, by virtue of Acts of Congress, has selected, through this office, the following lands:

- Serial 062381, List No. 9005
- Serial 062384, List No. 9006
- Serial 062386, List No. 9008
- W1-2 SE1-4, Sec. 6, N1-2 N
- E1-4, NE1-4 NW1-4, SE1-4 NW
- 1-4 Sec. 7, Lots 1-2, W1-2 NE1-4, NW1-4, W1-2 SW1-4 Sec. 1, NW
- 1-4 Sec. 12, E1-2 NE1-4, NE1-4 NW1-4 Sec. 8, NW1-4 Sec. 9, All in Township 5-S, Range 14-E, N. M. P. Meridian.

Protests or contests against any or all of such selections may be filed in this office at any time before approval. Jaffa Miller, Register.

Aug. 22-29, Sept. 5, 12, 19.

Pink P. Roberts, for several years employed at Rolland's Drug Store, is now in Stockton, Cal., and doing nicely. There are several more Carrizozo boys in Stockton, Ben Stummel, Jr., Ben Lujan and Manuel Padillo, all of whom seem to be enjoying prosperity.
