ALONG LIFE'S TRAIL

By THOMAS A. CLARK... I HAVE often felt that perhaps flowers have a kind of conscious feeling of their own beauty...

DEATH RATE OF FLAPPERS HIGH SAYS GULBRANSEN

Chicago, Ill., Jan. 25.—Flappers have the highest death rate for their age of any class of the nation's population, declared A. G. Gulbransen, piano manufacturer, in an address here at a health conference...

Auto Accident Near Duran One Killed

Two brothers, J. T. and John Cranford, residing at Portales, left that place last Thursday to attend the funeral of Mrs. Ed Kimmons, who died at a local hospital here and the remains were sent to Duran for interment...

"Back to the Shrine"

Following will be a part of the musical program at the Crystal Theatre Feb. 9 and 10, when "America" is shown: "Home Sweet Home," "Star Spangled Banner," "Trail to Long Ago," "America," "Stars and Stripes Forever," "America the Beautiful," "Long, Long Trail,"

ROSWELL OIL FIELD SHOWS PROMISE OF GREAT DEVELOPMENT IN NEAR FUTURE

Roswell, N. M., Jan. 25.—The third deep test to be drilled in the immediate vicinity of Roswell will be started soon. The well will be 16 miles north of Roswell and the contract calls for a hole 3,000 feet in depth unless oil or gas in commercial quantities is found at a lesser depth...

COLLEGE WARNS AGAINST PECAN TREE PEDDLERS

Extension Service Bulletin: The farmers of the state are warned by the Agricultural College to look out for men who are peddling pecan trees. The College authorities have not received definite information that these particular tree peddlers are planning to enter New Mexico...

DATA ON ECLIPSE OF SATURDAY MAY REQUIRE YEARS OF STUDY

New York, Jan. 26.—General scientific results from the highly favorable conditions of observations of Saturday's marvellous display of the total eclipse, it was said on Saturday by the leading astronomers, will not be known for a long time to come. On some of the comparative data obtained, according to Prof. Shapley, of Harvard College observatory, America's greatest astronomical center, years of compilations will be required.

GERMANY, ARMED OR DISARMED?

According to the headlines in the newspapers, Europe has been reaching a "crossroad" at intervals of perhaps six months since the peace treaty was signed at Versailles. It seemed another on January 10 and found the going rougher than it had hoped for.

U. S. IS WORTH TWO BILLIONS OF DOLLARS; CENSUS SHOWS

A Gain in Wealth of 11 Per Cent Since 1912; Per Capita Wealth is Washington, D. C., Jan. 14.—The United States is worth \$20,893,262,600, the census bureau announced Wednesday on the basis of the 1922 compilation. This is an actual increase of 11 per cent over the wealth of the nation in 1912. The figure itself represents an apparent 72 per cent increase during the 10-year period, but when the 1922 value of the dollar is reduced to its value of 1912 the actual increase is reduced.

LINCOLN FOREST NOTES

Considerable precipitation has been reported throughout the Forest during the past week. Supervisor Arthur left today for Tucson, Arizona where he will confer with District Forest Officials in regard to allotments for the fiscal year ending June 30, 1925.

Loat in the Mogollon Mountains; Dies

Mrs. William Gallacher received word last Friday to the effect that her oldest brother, J. L. Gray, who lived at Alma, in the Mogollon regions had been lost in a snow storm in the dreary wastes of the Mogollon mountains and wandered about until he died before help could reach him. Mr. Gray, it is said, started out to search for some stock he had missed, and the storm coming on, he lost his way by all trails being snow-covered.

Chas. Siegel, Veteran Miner Found Dead

Chas. Siegel, one of the oldest characters in mining circles in these regions, was found dead in his cabin last Saturday morning near Nogal. Mr. and Mrs. C. L. Lumbkins, and Mrs. Harriet Robertson, besides others in that locality, had been caring for the old miner, who continually refused to accept the hospitality of their homes, preferring to live alone. On the morning a boy mentioned, he was visited by Mr. Lumbkins, who found the door locked and peering through a window, saw that the end had come to the aged miner. An inquest was held by Justice of the Peace, Robert Taylor and a verdict rendered that deceased had met his death by old age coupled with a possible attack of acute indigestion. Deceased was 70 years of age, a native of Prussia and has two nieces living in the state of New Jersey. He was a relative of the famous General Franz Siegel of Civil War times. He had been in this locality for 45 years. Interment was at Nogal.

NEW MEXICO HIGH IN RESERVE CORPS STANDING

According to a recent tabulation received by the Executive Officer, 418th Infantry, Roswell, 4th State of New Mexico stands 23rd in the United States for the proportion of Reserve Officers to population. This is considered a very good showing in view of the fact that there are very few centers of population, and these widely scattered. However, an earnest effort is being made to place the state nearer the top of the list before the end of 1925. At present New Mexico has a percentage of 744 Reserve Officers per thousand of population. Colorado is fifth with a percentage of 1,276 officers per thousand, and Arizona is 7th with 1,118 Reserve officers to the thousand.

ALONG LIFE'S TRAIL

By THOMAS A. CLARK... I WAS going off for a motor trip with a very little knowledge of the habits and vagaries of automobiles in general and this one fit particular.

ECONOMIZING GASOLINE

An automobile is apparently not unlike people. Kinney was building a house for me. It was begun in April and was to be finished by September. The work dragged at first and I spoke to him about it.

Fort Stanton News

Prof. Paul Schreiber, Messrs. Deeter and Pulaski, were Carrizozo visitors this week. Dr. Lingo, of the U. S. Animal Industry Bureau, has been inspecting the herd at the Fort for the past two weeks, to insure against incursion of tubercular and other forms of bacilli. He declares it an accredited herd of the highest grade. This was one of the inspections which takes place annually.

WRECKED

SYNOPSIS—Living in the small English village of Darbury, old-fashioned and sedate Miss Barbara Stockley, daughter of a widowed mother, is soon to celebrate her marriage to Hugh Croft, a wealthy and well-connected. Barbara is adventurous, and has planned with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town.

PART ONE—Continued.

She knit puzzled brows, trying to follow his meaning. What keynote could there be to all the jumble of separate entities that make up life? "What keynote the world uses, I suppose, what you want to discover?" he asked.

"Do it! Is that it?" Eagerly she leaned toward him. "Oh, I wonder—What do you think it is?"

He blew out a cloud of smoke; then smiled. "Goodness knows! Perhaps there isn't one. What private ones do we all use? Don't you often wonder, when you meet a number of new people—"

"But I never do meet them! It is quite an event to meet a stranger," she assured him.

"Well, you shall soon meet plenty—of all nationalities. Even natives, in the Philippines."

Barbara came back to practical realities with a start. "Natives! Are they black? I should loathe them."

"Oh, no; surely not. I like them immensely."

She looked at him incredulously. "But why the Philippines?"

"It has to go to Borneo and the Philippines for the firm." He plunged into details of the journey, and she listened enthralled. To flash like a meteor over France, Italy, Egypt, India, with a few days at each landing place, and the detour to the Pacific, exceeded all she had ever dreamed. The world—at last!

Abruptly he broke off.

"But I have not yet discovered, in strange lands and crowded cities, what is wrong with the world! I hope you succeed in your heart's desire. It's a tall order."

A subtle change in his manner gave her the impression that, inwardly, he laughed at her.

"Anyway, it is a wonderful chance. I am grateful to you for giving it to me," she replied, with stilted politeness.

"To me?" he asked, then gave a short laugh. "Oh, not at all. I am merely the pilot!"

She flushed crimson, remembering her own words at the sweets-stall. With a sense of relief, she saw Hugh falling her from the terrace steps.

"Are you fixing on the trip?" he asked, joining them. Placing his hands on the girl's shoulders, he smiled across at Croft. "Look here! Will you please satiate Bab with travel, with sight-seeing, so that she returns fed-up to the teeth? That will insure a peaceful honeymoon, and I shall be eternally obliged!"

Barbara explained:

"Hugh wants to spend his honeymoon in his father's farm yard; and I want to go—"

"Somewhere in the moon," Hugh broke in. "So our only hope of a 'happy issue' as the prayer-book calls it, lies in you."

"Good lord!" laughed the other. "It's a rather curious position! When is the wedding?"

"On December twentieth. Be sure you send her back in time!"

Croft's face grew sober. In his quick, decided fashion, he swung his legs over the parapet and stood up, facing Hugh.

"You are quite willing for her to go, is suppose?"

Both glanced at him, surprised at the earnestness of his tone.

"I know you will take the utmost care of her," Hugh replied.

"Of course."

Suddenly and unexpectedly the younger man held out his hand. Croft took it in a close grip; but Barbara gave an amused laugh.

She struck down lightly with her fingers, and the two hands fell apart.

"You don't regret going, Bab, dear?" she had asked.

Barbara shook her head vigorously. "No! I feel a little depressed over leaving Hugh; that's all. It seems as though something—I don't know what—were ending. I suppose that's natural upon going away for the first time? Is it?" she added anxiously.

"Mrs. Field knew when to keep her thoughts to herself."

"Quite natural," she replied cheerfully. "And—Bab," she went on, hesitating a little, "if you need Alan's friendship for any reason, I think you would find it worth having."

"Oh," the girl said hastily. "I don't think he—we—I shall never quite understand him."

Feeling that to be likely, Mrs. Field said no more. She had sown the seed, if ever it were needed.

Then the next night at home—She had looked around her familiar little room with mixed feelings. When next she slept here, what would she have learned of the things beyond that life-long barrier of hills visible from her window?

With a warm rush of tenderness, she remembered that, upon her return, her new life as Hugh's wife would begin. Taking the large photograph of him from the wall, she placed it carefully within her packed trunk.

And now the moment of departure had come. Croft appeared, looking big and alert in his flying kit, with an air of confidence about him which communicated itself, in some subtle way, to Barbara. Having been detained over a matter of form in the office, he hurried their start.

Hugh followed Barbara into the cabin, where she turned and clung to him. He drew her into his arms and kissed her with more passion than usual.

"We shall be married directly you return, Bab, darling," he said huskily.

"But why the Philippines?"

"It has to go to Borneo and the Philippines for the firm." He plunged into details of the journey, and she listened enthralled. To flash like a meteor over France, Italy, Egypt, India, with a few days at each landing place, and the detour to the Pacific, exceeded all she had ever dreamed. The world—at last!

Abruptly he broke off.

"But I have not yet discovered, in strange lands and crowded cities, what is wrong with the world! I hope you succeed in your heart's desire. It's a tall order."

A subtle change in his manner gave her the impression that, inwardly, he laughed at her.

"Anyway, it is a wonderful chance. I am grateful to you for giving it to me," she replied, with stilted politeness.

"To me?" he asked, then gave a short laugh. "Oh, not at all. I am merely the pilot!"

She flushed crimson, remembering her own words at the sweets-stall. With a sense of relief, she saw Hugh falling her from the terrace steps.

"Are you fixing on the trip?" he asked, joining them. Placing his hands on the girl's shoulders, he smiled across at Croft. "Look here! Will you please satiate Bab with travel, with sight-seeing, so that she returns fed-up to the teeth? That will insure a peaceful honeymoon, and I shall be eternally obliged!"

Barbara explained:

"Hugh wants to spend his honeymoon in his father's farm yard; and I want to go—"

"Somewhere in the moon," Hugh broke in. "So our only hope of a 'happy issue' as the prayer-book calls it, lies in you."

"Good lord!" laughed the other. "It's a rather curious position! When is the wedding?"

"On December twentieth. Be sure you send her back in time!"

Croft's face grew sober. In his quick, decided fashion, he swung his legs over the parapet and stood up, facing Hugh.

"You are quite willing for her to go, is suppose?"

Both glanced at him, surprised at the earnestness of his tone.

"I know you will take the utmost care of her," Hugh replied.

"Of course."

Suddenly and unexpectedly the younger man held out his hand. Croft took it in a close grip; but Barbara gave an amused laugh.

course, she was no favorite with the bishop's descendant.

There is, proverbially, a lull before a storm. Darbury, during those peaceful days of late summer, had no intuition of the most terrible thrill of all, in these days of thrills.

Hugh, especially, was of too bright, and wholesome a nature to have misgivings, when the sun shone and all seemed well.

Returning one day with a friend from a morning's cubbing, it was therefore with no sense of impending disaster that he reined up at Lake Cottage and proposed calling. A small group of people, talking together near the main road, turned and cast wondering looks in his direction.

It was one of those glorious mornings at the end of September in which late summer and early autumn interpenetrate. Hugh glanced round with a pleased sense of appreciation.

Then he rang the bell.

The face of old Martha, who opened the door, was red and swollen with weeping. Her limbs trembled, as if from sudden shock.

For a moment she gazed at him blankly, half in astonishment, half in fear; then, without a word, she burst into hysterical sobs and turned back into the house.

The color ebbed a little from Hugh's face. He looked at his friend in vague apprehension, and they silently followed the woman into the drawing room. Instead of being bright and fragrant with the flowers Barbara loved about her, it seemed strangely cold, gloomy and deserted.

A chill fell on Hugh.

"Where is Mrs. Stockley?" he asked uneasily.

"Upstairs," sobbed Martha. She walked to the little bureau and picked up a telegram. Turning slowly, she half held it toward him, and the filmy paper trembled violently in her hands.

Hugh took the telegram slowly from the woman. For a moment he looked uncertainly at her frightened face, then round the familiar room, as if dreading to read it.

At last, with an obvious effort, he raised the sheet, and turned away.

The telegram fluttered, unheeded, to the floor; and Hugh raised shaking hands to his head, in a vague, uncertain manner. He turned slowly, his face ashen, haggard and old all at once. His lips moved a little, but no sound came; he looked at his friend with the bewildered eye of a dumb animal awakening to some terrible pain of which, as yet, it is not wholly conscious.

Tom Westwoods picked up the telegram.

It was from the London agents of Croft's firm. He read the few bald sentences so fraught with tragic meaning. The airplane, it stated, in characteristic crudeness, was missing. The wireless body of the mechanic had been found in the water, where, it was feared, the rest had perished. Search was in progress, but with small hope of success. A typhoon had swept across the sea, striking upon the Philippine islands. One wireless message of distress had come from the machine.

Then silence fell.

PART TWO
The Rising Orchestras

Dawn broke at last, the first dull lines of gray merging into a myriad pearly flits. Birds awoke in the forest; rustled amid the leaves; shook their wings; then flew forth to hunt for breakfast; their brilliant plumage reflected the sun's rays in a thousand bright hues as they dashed from beneath the shadowy trees.

Upon the sloping shore of a tiny cove, the waters of the lagoon lapped in a gentle, rippling murmur. Farther away, the surf of the open sea boomed like distant thunder against the barrier reef; waves swirled angrily through the gap which formed an inlet.

Partly telescoped upon a jagged promontory jutting inland from the entrance, rising and falling helplessly at the mercy of the tide foaming through, loomed a mass of something dark. It looked strange, shapeless, formlessly tragic, as if flung down by a ruthless hand and forgotten.

Upon the ground of the opposite cove, near a heap of wet coats, little rivulets trickling from her drenched garments, lay the inert form of a girl. A man, likewise sodden from head to foot, knelt beside her, anxiously forcing brandy between her pale lips from a small pocket-flask. Presently he paused, a sudden dread in his heart, and with his head close to her wet blouse, listened.

Then, with renewed energy, he set vigorously to work again.

At last she gave a little quivering sigh. Her hands moved gropingly. Soon, with another longer sigh, she opened her eyes and gazed blankly, as one newly awakened from a troubled dream, into his face. Raising a hand to her head, the vacant gaze changed to one of feeble wonder.

"Why, are you—hurt?" she half whispered.

Until then he had not recognized that the stream trickling down his face was blood. With his fingers he traced what was apparently a long jagged cut streaking from his temple to the left ear; it smarted when touched. "What the wet handkerchief from his pocket, he set back and

gabbled at it with the clumsy movements of a man unused to troubling over personal injuries. His look was still fixed upon the girl's face.

As she gazed round the unfamiliar scene, an expression of bewilderment crept into her eyes. Remembrance slowly returning, this merged into concern, then fear.

Quickly it grew to terror.

Sitting upright, she turned wildly to the man at her side.

"Where are we? Where are we?" he replied quietly. "The last engine gave out."

"But—how—did we get here?"

"I found you in the water, and swam in."

Fearfully she looked toward the dark mass, as if measuring mentally the distance from shore, scarcely understanding the full meaning of this feat. Then she looked about her as if seeking somebody.

Anally turned to him, mutely asking the question her troubling lips dared not frame.

He laid a hand upon her shoulder, instinctively fortifying her for the complete realization of the dread that was dawning in her brain.

She caught his arm in a feverish grip, her eyes wild. "Captain Croft—tell me! The others? . . . Where is Aunt Dolly?"

A look, so full of anguish that it seemed as though the soul behind were in the tortures of hell, was her only answer.

She gazed, awestruck, for a breathless moment, at his haggard eyes and drawn blood-stained face, at the features usually so cloaked with reserve now betraying unbearable agony; then, with a hoarse moaning cry, she collapsed in an abandonment of horror at his feet.

Presently Croft raised his head, and stood up. He gave one long look seaward, to the grave of such unlimited pride and hope; to where, also, those who had risked their lives with him now lay hidden beneath the smiling blue. With a long sigh, he turned away, setting his teeth and squaring his shoulders. . . . then looked at the figure lying face downward at his feet.

Dropping on his knees, he gently raised her, so that she leaned against him.

"Come!" he urged, with forced brightness. "We must buck up, you know, and see what can be done."

"Tell me—first—what happened," she besought. "It seems like a hideous nightmare." Shuddering violently, she hid her face again.

"We had some engine trouble soon after leaving the Philippines, as you know, which obliged us to return here to land," he replied. "We got caught in the center of a typhoon near the coast, and were driven completely out of our course."

"It was awful—awful! That terrible, deafening roar!" She began again to tremble violently.

"We were hurled into an air-pocket which caused us to drop nearly a thousand feet," he continued hurriedly. "That put two more engines out of action and injured the fourth. Only a miracle prevented our being dashed straight into the sea. After a bit I saw land here, and hoped to reach it in time; but she crashed too soon."

He stopped, perceiving the state of her shattered nerves. Standing up, he raised her with him; and she clung convulsively to his arm, every limb shaking as if with ague.

Undressing her hands, he drew her arm through his, turning their steps inland; his own feelings being almost beyond his usual iron-control, he spoke roughly:

"For heaven's sake, don't talk or think about it all, just now! We shall go raving mad if we do!"

The words and tone acted as a tonic. Something of her first feeling of inferiority in his presence returned, causing her to struggle fiercely against the weakness that threatened to overcome her.

"There's generally an opening in a reef opposite a fresh-water river," Croft observed.

"Why?" she inquired, without any interest. To talk of anything, however, was better than the silence which encouraged thought.

"It's supposed that the sediment it contains injures the reef-building polypes, preventing their working opposite. The polypes can't live and work below a certain depth—about twenty fathoms or so. Awfully interesting, coral! Don't you think so?"

She confessed entire ignorance on the subject. This little digression, however, had served its purpose for them both. Drawing her arm free, she proposed bathing their faces in the cool stream. "Revived by this, she became aware of their bedraggled state, of the discomfort of wet clinging garments, and of Croft's ineffectual efforts to staunch the wound on his head."

She went to him where he knelt upon the bank.

The man seems to be so violent and the girl fairly strong. What next?

Just a Little Smile

WHAT'S IN A WORD?

"Rastus, who 's dat solvent looking gentlemun speculatin' up an' down de lales wid de gold 'obstaclear'?"

"Don' yuh organize him?"

"No, Ah don' organize him, Ah's never been induced by him."

"Ise franchised yuh don' organize him. He's de most confiscated man in our whole diaphragm. He's de new pasture at our church."—California Pelican.

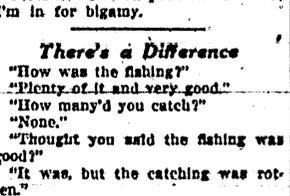

Had Use for the Ten
A South Carolina negro sent a message to an acquaintance in North Carolina, reading: "Sam, I heard you is dead. If you is, telegram me. If you ain't, send me \$10."

The recipient, who had about recovered from recent gunshot wounds, wired back: "I is dead. Your ten will be applied to a coffin."

Dad and Uncle Miss a Date
Johnny (at poultry show)—Ma, let's stay until they let the animals out. Mother—They don't let them out, dear.

Johnny—Yes, they do, ma, 'cause last night I heard pa tell Uncle Bill that they would stick around after the show and pick up some chickens.—Art and Life Magazine.

SAFER IN JAIL

Jail Visitor—Your term's almost up, my poor fellow, and I know you'll be glad to be out and at home again. Prisoner—Not on your life I won't; I'm in for bigamy.

There's a Difference
"How was the fishing?"
"Plenty of it and very good."
"How many'd you catch?"
"None."
"Thought you said the fishing was good?"
"It was, but the catching was rotten."

Brought a Peach
"The stork has brought a little peach!"
The nurse said with an air.
"How glad I am," the father said.
"He didn't bring a peach!"

The Diplomatic Nimrod
Mrs. Longley—Plague take your everlasting gunning. You hunt, hunt, hunt! What did hunting ever get you?
Longley—The dearest little woman in the world! Ah, how sweet you look when you smile. Well, I'll be back in ten days. Bye!

A Whack at the White Way
"You can find anything you want on Broadway," boasted the Yorker. "Great place for rubes to brush up!"
"Meby so," commented Farmer Whitmore. "I've been there, but I never went around-looking for politeness."

NOT HERS THE BLAME

She—Oh, I think they're going to ask me to sign! What shall I do?
Her Dearest Friend—Go ahead and sign—they'll have to take the blame.

Best Read When Red
The book of nature I would read
And get a lesson from each tree.
I always wait, however, till
Kind Nature turns the leaves to red.

Lunatic Escaped
Nurse (at mental asylum)—There's a man outside who wants to know if any of the patients have escaped lately.
Doctor—Why does he ask?
"He says somebody has run off with his wife."

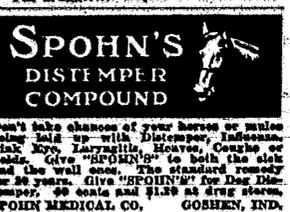

Slightly Modified
He (during their first spat)—I wish the minister who married us was hurr.
She—Jack!

He—Well, I wish I'd hung him up for his fee, anyway.

You Know the Job
Bank President—But why do you think your salary should be raised?
Vice President—Well, my stories get funnier each year, don't they?—American Legion Weekly.

Good Advice for Women

Muskogee, Okla.—I was in miserable condition before I took Dr. Pierce's remedies. I had woman's trouble and often had such an ache in my back that I could not bend over. I fell off my weight to eighty and a half pounds. Finally, my husband decided that I should try Dr. Pierce's Favorite Prescription and the Golden Medical Discovery. I began taking these remedies and started to improve right away. I soon got well and weighed a hundred and thirty-six pounds. I think the world of Dr. Pierce's medicines.—Mrs. J. N. Smith, 607 S. 3d St. All druggists. Liquid or tablet form.

SPOHN'S DISTEMPER COMPOUND
Don't take chances of your horse or mule being held up with Distemper, Indigestion, Colic, or any of the other ailments that cause loss of weight and appetite. Give SPOHN'S to both the stock and the well ones. The standard remedy for 25 years. Give SPOHN'S for Distemper, Colic, 50 cents and \$1.00 at drug stores. SPOHN MEDICAL CO., GOSHEN, IND.

BABIES LOVE MRS. WINSLOW'S SYRUP
The Infants' and Children's Regular Pleasant to give—pleasant to take. Guaranteed purely vegetable and absolutely harmless. It quickly overcomes colic, diarrhoea, indigestion and other like disorders. The open published formula appears on every bottle of Mrs. Winslow's Syrup.

Get Rid of Dandruff By Cuticura Shampoos

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

Correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine Gold Medal.

PISO'S COUGHS

Quick Relief! A pleasant, effective remedy. 15c and 50c bottles. Sold everywhere. PISO'S Coughs and Colds. Solvo, 35c.

"Hysterical Society"

A few days ago, when the Historical society was holding a meeting in Indianapolis, a little granddaughter of one of the members answered the telephone in his absence.

DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.
Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

How to Save Antelopes

In the pioneer days of the West the graceful pronged-horn antelope were more numerous than buffalo, numbering approximately 75,000,000. Now there are only about 22,000 in the whole United States and for this reason a large tract of land in Oregon has been reserved to prevent the threatened extinction of the animal.

Albert of Belgium Not Childish Idea of King

When famous visitors, making the pilgrimage to Oyster Bay, are received by Mrs. Roosevelt (junior) in the trophy room, some of the children are always present. Their impressions are often amusing, as in the case of King Albert of Belgium, who was a great disappointment to Gracie and Teddy (Colonel Roosevelt's children).

Evidently their idea of a king, gleaned from fairy tales and history stories, was that of one arrayed in gorgeous apparel. Gracie, herself, dressed a prince in "a green suit with a purple cloak and a gold belt. He had a golden cap with a long purple feather in it." So of King Albert she remarked sadly that "he was dressed very plainly, and he didn't care to talk about being a king."

But of Marshal Foch she observed, "Oh, he liked us very much!" explaining, "We talked French to him."

One can imagine the delight of the famous Frenchman, in the midst of his visits of respect and ceremony, at finding children who spoke his own tongue.

Pershing she considered "did not look very fierce. I thought a leader of soldiers must look fierce!" But one morning Gracie appeared for school in a state of delicious excitement. "I saw the prince of Wales!" she burst forth. "Did you?" "Oh, yes! At grandmother's!" Then Gracie proved herself a true American girl. "Oh, he was very nice!" she exclaimed. "I liked him!"

Heavenly Beauty

New Boarder—You told me in your letter there were views of heavenly beauty to be seen from this place! Landlady—And so there are! You just wait till tonight and then look up into our sky!

Go to Explore Wilds

Jack Hornby, hermit and explorer, left Edmonton, Alberta, recently for the barren lands in company with Captain Critchell-Ballock and H. A. Glenn for the purpose of taking photographs of the carbon migration across the barrens. The party expects to spend the winter in the Far North. Hornby has received permission from the Canadian government to bring out a pair of wild muskox. He does not know whether he can do this, but he is going to try, and if he succeeds he will endeavor to ascertain what can be done in the way of domesticating these animals.

Sponges for Eating

In Algeria an extensive industry has been developed in the cultivation of what are known as vegetable sponges. The chief market for the product is Paris, although specimens are not uncommon in the United States. They have come into extensive use for the toilet, the bathroom and various domestic purposes.

Prior to maturity, the fruit is edible, but when the stage of ripeness has been passed the fibrous matter becomes separated from the pulp and forms a tough, spongy mass. The material is prepared for the market by being bleached in a weak lime bath.—Grit.

Stimulates Lung Action

Lobelin, an alkaloid isolated from lobelia leaves in German gardens, has proved valuable in stimulating lung action in case of asphyxiation by carbon monoxide, according to the announcement of a Hamburg chemical firm. The preparation proved valuable in rescuing miners overcome by carbon monoxide during a recent mine explosion in Upper Silesia, it is said. Carbon monoxide is an intensely poisonous, but quite odorless gas given off by automobile engines, and many cases of poisoning have occurred in closed garages, tunnels and taxi stations.

What is a Teaspoonful?

Advertisement for CALUMET BAKING POWDER. It depends on the Baking Powder you use. You must use a heaping spoonful of many brands because they don't contain as much leavening strength as CALUMET. THE WORLD'S GREATEST BAKING POWDER. Level spoonfuls are all that are necessary when you use CALUMET—it makes more baking which means a real saving on bake day. Sales 2 1/2 times those of any other brand.

1924 Sees Gifts of Many Millions

By JOHN DICKINSON SHERMAN

AMEN HUCHANAN DUKE of Nonerville, N. J., who has made a great fortune in tobacco and water-power development, and George Eastman of Rochester, N. Y., who has amassed millions in the manufacture of kodaks, have announced the establishment of large funds to aid educational and charitable institutions. Mr. Duke's fund embraces properties now valued at approximately \$4,000,000 and will ultimately amount to \$80,000,000. By Mr. Eastman's plan the beneficiaries will total \$12,500,000. This brings his public gifts to a total of \$92,500,000.

These gifts are interesting and important in themselves and also as they touch various phases of American life.

Both millionaires began life at the bottom of the ladder—which fact again emphasizes the fact that this is a land of equal opportunity, even if all men are not created equal.

Neither millionaire has a college education, yet both have made the bulk of their gifts to colleges—which fact would seem to have a bearing on the much vexed question of the mission and value of the American college in the twentieth century.

Both millionaires have made their gifts while they are alive and can see the results.

Both millionaires have made their fortunes largely through frankly monopolistic methods—which fact raises the question: What has become of the "talented money" issue that bulked so large a few years ago? It looks as if the American people have decided that there is no such money. To be sure, Rev. Dr. John Roach Straton of New York recently declared before the Baptist Bible Union of North America that the Rockefeller money was the greatest curse that rests today upon the Baptist denomination. But other Baptist ministers criticized Doctor Straton severely and declared, "Not since the apostolic age has the world had two greater benefactors than John D. Rockefeller and his son." Anyway, the Rockefeller benefactions now amount to nearly \$300,000,000 and are continuing works.

The Rockefeller foundation, for instance, has just given Yugo-Slavia \$250,000 for educational purposes. The son has just given \$1,000,000 to the Metropolitan Museum of Art in New York. He is also spending several millions in an effort to construct homes in New York city within the incomes of working people.

The Duke and Eastman benefactions top off a long list which brings the total for 1924 in excess of \$150,000,000 and the total for the last ten or twelve years to nearly two billions—which facts seem to indicate that the "inspired American millionaire" is a real rather than an imaginary personage.

One of the most notable gifts of the year was that of J. Pierpont Morgan, who put into the hands of trustees, to be incorporated as a library, the famous collection gathered by his father. Its nominal value is \$8,500,000, but it is literally priceless. George F. Baker, who has been chairman of the board of the First National Bank of New York and at eighty-four is at his desk every day, gave \$5,000,000 to the Harvard Graduate School of Business Administration.

Among the securities set aside by Mr. Duke are about three-fourths of his holdings in the Southern Water Power company, making available an income of about \$2,000,000 a year. Pointing out that he has for years been engaged in developing water-power resources of North and South Carolina, Mr. Duke, in a statement, says that "my ambition is that the revenues of such developments shall administer to the social welfare, as the operation of such development is administering to the economic welfare of the communities which they serve." He then commends to the trustees the securities of the Southern Power company as the prime investment for the funds of the trust and advises the trustees not to change such investments unless urgently necessary.

The Duke trust will be administered by 13 trustees, constituting a self-perpetuating body; he himself is one of them. The trustees are directed and empowered to expend not exceeding \$5,000,000 in acquiring lands and equipping buildings in North Carolina "to be known and operated as Duke university," with this provision: If Trinity college at Durham sees it to change its name to Duke university this sum may be expended in expanding and extending Trinity. (The trustees of Trinity have made the change in name.)

The trust provides that 20 per cent of the income shall be retained each year and added to the principal until a total of approximately \$25,000,000 is reached. The other 80 per cent of the income is to be divided as follows:

Thirty-two per cent to Duke University. Thirty-two per cent for maintaining hospitals in North Carolina and South Carolina, on the plan of giving to the recipient a sum not exceeding \$1 a day for each free bed occupied and in assisting in building and equipping hospitals.

George F. Baker
Manufacturing

Ten per cent for the benefit of white and colored orphans in the Carolinas.

Six per cent for assisting in building Methodist Episcopal churches in the sparsely settled rural districts of North Carolina.

Four per cent for assisting in maintaining Methodist Episcopal churches in the sparsely settled rural districts in South Carolina.

Two per cent for providing supernumerated preachers and widows and orphans of deceased preachers who have served in North Carolina congregations.

Five per cent to Davidson college, Davidson, N. C., a Presbyterian institution.

Five per cent to Wiggins-university, Greenville, S. C., a Baptist institution.

Four per cent to Johnson C. Smith university, Charlotte, formerly known as Biddle university, a negro school.

"I recognize that education, when conducted along sane and practical lines, as opposed to dogmatic and theoretical lines, is, next to religion, the greatest civilizing influence," says Mr. Duke's statement in giving his reasons for creating Duke university. He asks that a faculty assuring the university "a place of real leadership in the educational world" be secured and that courses be arranged primarily for training preachers, teachers, lawyers and physicians.

Hospitals have been selected as another means for distributing the income of the trust, because, according to the statement, they not only minister to the comfort of the sick, but increase the efficiency of mankind and prolong human life.

Mr. Eastman's new gifts of \$12,500,000 follow a recent announcement of a gift of \$2,500,000 to the Greater University of Rochester campaign. Those to benefit under the latest gifts of Mr. Eastman are:

Massachusetts Institute of Technology, \$4,500,000, which is added to a previous gift of \$11,000,000; University of Rochester, \$6,000,000; Hampton Institute, \$1,000,000, and Tuskegee Institute, \$1,000,000.

Of Mr. Eastman's total of \$58,002,000, the sum of \$23,578,500 has been given to the University of Rochester.

Despite the fact that these new gifts mark the disposal of the last large block of his personal stockholdings in the Eastman Kodak company, Mr. Eastman makes it clear that he will continue to direct the affairs of the company and hopes to be as long as he lives.

Gifts made and not announced before are under terms similar to those made to employees. Stock is sold to benefiting institutions for \$12,500,000 less than its actual value. While provision is made that it may be paid for in installments during the life of Mr. Eastman, it is given without any restriction regarding the time for sale. It may be sold at once if the beneficiaries desire to part with it. Explaining the motives actuating his gifts, Mr. Eastman said:

One of the reasons why I welcome this disposition of my kodak stock is that it separates me from money-making for myself and will give me the benefit of a somewhat more detached position in respect to human affairs. I look forward with interest to finding out how much the changed condition will affect my own current affairs.

The reason I selected a limited number of institutions was because I wanted to cover certain kinds of education and felt that I could not result with the institutions named quicker and more directly than if the money was spread. Under the best conditions it takes considerable time, sometimes years, to develop the wise expenditure of money in any line, no matter how well prepared one may be.

I am now upwards of seventy years old and feel that I would like to see results from this money within the natural term of my remaining years.

An early wish to benefit the colored race, to meet the educational needs of students has been directed thus far to the white race, but we have more than 15 per cent negro population in the United States, most of whom are denied education. The only hope of the negro race and the settlement of

Smith." It was not until many millions had been given the institution that a transfer of stock brought out the fact that the donor was Mr. Eastman. The following complete list of his benefactions to date is approximately correct:

University of Rochester, \$23,578,500.

Rochester Dental dispensary, \$2,500,000.

Massachusetts Institute of Technology, \$15,000,000.

Block of Eastman Kodak company to employees (value at date of delivery, July 1, 1924), about \$8,000,000.

Y. W. C. A. and Infants' Summer hospital (Rochester), \$25,000.

Children's society (Rochester), \$25,000.

Stevens Institute of Technology, \$100,000.

Homeopathic hospital (Rochester), \$70,000.

Rochester park, \$104,000.

Hahnemann hospital (Rochester), \$100,000.

State and municipal research bureaus, \$223,050.

War relief, \$25,000.

Red Cross of 1917, \$250,000.

Y. M. C. A., \$340,000.

Tuskegee Institute, \$1,412,000.

Mechanics Institute, \$290,000.

Enlarging Rochester General Hospital, \$500,000.

War chest and community chest, \$1,725,000.

Chamber of Commerce building, \$590,000.

Addition to Chamber of Commerce building, estimated at \$200,000.

Rochester Friendly home, \$50,000.

Hampton Institute, \$1,000,000.

Mr. Eastman was born in 1854 in the town of Waterville, N. Y. He left school to work for \$3 a week and, in later years, attributed his success in part to the fact that he never went into debt, but always managed to save a little capital. He became an amateur photographer and experimenter and perfected a process for making dry plates, his first important invention. In 1859 he began making these plates on a small scale. Later, he made his most important invention, the kodak, and established a plant at Rochester.

Trinity college at Durham, now Duke university, was founded in 1838, has 46 instructors and 1,232 students. Its endowment is \$2,978,470 and the value of its plant and equipment is \$3,832,021. Its president is Dr. William P. Few.

Trinity has been for many years the center of higher education for Methodists of the state. Some of the state Methodist leaders were frankly against the change in acceptance of the Duke gift, saying it would "hang creeps on the door of North Carolina Methodism." The alumni were divided. President Few, however, favored the change. The trustees met, accepted the gift and made the change in name.

James Buchanan Duke was born in 1857 on a little farm near Durham, N. C. His father, Washington Duke, returned from the Confederate ranks after the Civil war to find a ruined farm. The father and his sons, Hodge L., Benjamin N. and James, cured tobacco in a log barn, granulated it by beating it with hails and peddled it about the countryside. In 1870 they established their business in Durham; in 1874 they built a factory 70 by 40 feet. James, at seventeen, was its manager. In 1878 W. Duke Sons & Co. was organized with a capitalization of \$70,000. James established a successful New York factory in 1884. In 1888 he effected a consolidation of five of the largest tobacco concerns in America and incorporated it in New Jersey as the American Tobacco company, with capital stock of \$35,000,000. Following the absorption of the so-called tobacco trust in 1911, Mr. Duke resigned as president.

The Duke bequest incidentally calls attention to the fact that North Carolina of late years has made great strides forward. It now pays more federal taxes than any other state except New York and Pennsylvania. It is first in tobacco, second in hosiery and third in furniture.

The negro problem is through proper education of the Hampton-Tuskegee type. It is stated that there is a condition attached to the gifts to Tuskegee and Hampton. The promoters of the Tuskegee-Hampton Endowment fund are engaged in a 1925 campaign to raise \$5,000,000 and Mr. Eastman's gifts are contingent upon the success of that campaign. Mr. Eastman's gifts are known to total \$38,002,000. He established a school of music in Rochester at a cost of \$2,500,000, and built a theater in which the best musical talent is provided for Rochester's citizens at moderate cost. The Massachusetts Institute of Technology has for a long time been receiving gifts from an "angel" known as "Mr.

Daddy's Evening Fairy Tale

MARY GRAHAM BONNER

MRS. DUCK'S DELIGHT

"Quack, quack, quack-quack," said Mrs. Duck. "I never knew how lucky I was until yesterday. I always thought I was a busy duck. But I find I'm not nearly so busy as little Sadie is. One of Sadie's friends came around to see her yesterday and she said: 'Come on, Sadie, come on out and play.' 'But, Sadie called back and said: 'I can't come for an hour, any way. I've the beds to make and I promised to help wash the dishes.' 'Well, I thought to myself, I'm a lucky duck. I don't have to make beds and I don't have to wash dishes. 'Of course I would have a nice place to wash them in, here in the brook, and I could see pleasant weeds and a dish rag, but still I'm glad I don't bother with all such things.' 'I agree with you, quack, quack, quack-quack,' said Mrs. Duck. 'Ah, yes,' said Mrs. Duck. 'It is so much simpler to have no dishes at all, but just eat as one goes along. 'Now, when a cow is taken to some other place and has to go in a wagon and then on a train in a stupid small place, after having been in the lovely meadow, I say to myself: 'Poor cow. You've known better days.' 'I've seen the trains go by the station at the far end of my brook. 'And I've thought to myself, how lucky I was, not to be a cow. Then it's much nicer to live in a brook than anywhere else—even than in a palace. 'Of course, Bessie, the farmer's old horse is very lucky. You know Bessie is quite old and doesn't have to work any more. 'Bessie is allowed to wander anywhere she likes. 'She is a wonderful horse, for she goes down the paths and the walks, but never steps on the lawn or the grass anywhere except in the meadow. 'The farmer adores her and all the members of the farmer's family adore her. 'But, just the same, I think I'm a very lucky duck. It gives me delight to think how lucky I am. 'Now I must go down to see Miss White Duck at the end of the pond. 'I said I'd have a drink of brook water and a bite of bug with her this afternoon. 'Were you invited?' 'Yes, yes, indeed,' said Mrs. Duck. 'I'd almost forgotten, I was so interested in what you were saying.' 'Ah, you flatter me, but it is most delightful, too. Well, I suppose we must be off.' So the two ducks started for the end of the pond and there Miss White Duck was waiting for them. 'Quack, quack, good-afternoon, Duck ladies,' she said. 'Good-afternoon, quack, quack,' said Mrs. Duck. 'Good-afternoon, quack, quack,' said Miss Duck. 'Horrid weather we've been having lately, quack, quack, is it not so?' said Mrs. White Duck. 'Terrible,' said Mrs. Duck. 'Quack, quack, terrible.' 'Horrible, quack, quack, horrible,' said Mrs. Duck. 'And yet, come to think of it, it hasn't been so very bad,' said Miss White Duck. 'No, come to think of it, it might have been much worse, quack, quack,' said Mrs. Duck. 'True,' said Miss Duck. 'Quack, quack, it might have really been bad.' They had their brook water and several insects apiece, and after they had chatted some more about the water and the insects Mrs. Duck said she'd have to be getting home to her family. 'Such a lovely time as I've had; thank you so much, dear Miss White Duck.' 'I, too, have had a beautiful time,' said Miss Duck. 'And Miss White Duck said: 'Quack, quack, it had been such a pleasure to see you both. Do call soon again. Just drop in any time. Any time at all.' 'Ah, yes,' said Mrs. Duck; as she reached her special home section. 'It is my delight that I am a duck. I have such a ducky time, quack, quack.' 'We Must Be Off.' 'But don't your son rather young to join the army?' 'Well, he is very young, but then you see, he is only going to join the industry.'

WEALTH IN UNITED STATES

TOTALS \$320,803,822,000

Washington.—The wealth of the United States at the end of December, 1923, on the best estimates available of all property classified by the census bureau, was placed at \$320,803,822,000. This was an increase of 72.2 per cent for the decade since in 1912 the census found the nation's wealth to be \$186,200,000,000.

Third on the list was the value of manufactured products on hand and in distribution, placed at \$28,422,848,000, while the next largest item was \$20,505,810,000, representing real property and its improvements listed by the states as exempt from taxation.

The value of railroads and their equipment as demonstrated largely from compilations of Interstate Commerce Commission reports, was estimated at \$19,960,000,000. The machinery, implements and tools of manufacturing industry were found to be worth \$15,758,390,000, while the value of public utility property, including telegraph and telephone systems, electric light and power systems, street railways, canals and irrigation enterprises, was fixed at \$15,414,447,000.

Live stock on farms was valued at \$5,907,104,000, and motor vehicles of all classes were said to be worth \$4,567,407,000, or nearly a billion less than the figure given for agricultural products on hand at the same time, which was \$5,405,700,000. The country's possession of gold and silver came far down on the list of valuations, being \$4,278,155,000.

Cosgrave Will Not Resign

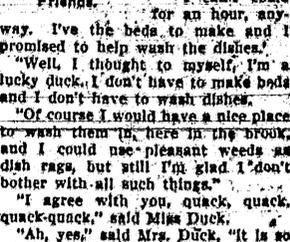

Dublin.—Members of the Free State ministry and friends of William T. Cosgrave, president of the executive council, discounted the rumor published abroad, of his resignation. When asked about it they said they had not heard of any such report.

TUBERCULOSIS REMEDY TO BE TESTED BY HEALTH SERVICE

Washington.—Tests of "sanocrysin," a treatment for tuberculosis discovered by a Dane, now being made on calves under the direction of the national hygienic laboratories of the United States public health service, will be continued several months. Until the treatment has been proved effective with both animals and human beings, public health officials will make no comment on the treatment's value. The test now being made will determine whether the public health service will recommend to the Treasury Department that licenses be issued for sale of the preparation in interstate commerce. "Sanocrysin," according to Dr. A. M. Simpson, under whose department the tests are being conducted, is a combined treatment of a "salt of gold" and a special serum. The chemical compound is said to destroy tubercular bacilli in the body, but in doing so liberates poisons which must be counteracted by the serum.

Printers' Union Has New Home

Indianapolis, Ind.—Stately halls and spacious drawing rooms, west to witness the swank and magnificence of Hooseford's most exclusive society affairs, soon will resound to the clatter of typewriters and adding machines grinding out the business of a leading trade union. It was announced here a few days ago that the substantial Hooseford house in 506 West Street North Madison street district here will become headquarters of the International Typographical Union local 1.

One of Sadie's Friends

"I can't come for an hour, any way. I've the beds to make and I promised to help wash the dishes."

"Well, I thought to myself, I'm a lucky duck. I don't have to make beds and I don't have to wash dishes."

"Of course I would have a nice place to wash them in, here in the brook, and I could see pleasant weeds and a dish rag, but still I'm glad I don't bother with all such things."

"I agree with you, quack, quack, quack-quack," said Mrs. Duck. "Ah, yes," said Mrs. Duck. "It is so much simpler to have no dishes at all, but just eat as one goes along."

"Now, when a cow is taken to some other place and has to go in a wagon and then on a train in a stupid small place, after having been in the lovely meadow, I say to myself: 'Poor cow. You've known better days.'"

"I've seen the trains go by the station at the far end of my brook. 'And I've thought to myself, how lucky I was, not to be a cow. Then it's much nicer to live in a brook than anywhere else—even than in a palace."

"Of course, Bessie, the farmer's old horse is very lucky. You know Bessie is quite old and doesn't have to work any more. 'Bessie is allowed to wander anywhere she likes."

"She is a wonderful horse, for she goes down the paths and the walks, but never steps on the lawn or the grass anywhere except in the meadow. 'The farmer adores her and all the members of the farmer's family adore her."

"But, just the same, I think I'm a very lucky duck. It gives me delight to think how lucky I am. 'Now I must go down to see Miss White Duck at the end of the pond. 'I said I'd have a drink of brook water and a bite of bug with her this afternoon. 'Were you invited?' 'Yes, yes, indeed,' said Mrs. Duck. 'I'd almost forgotten, I was so interested in what you were saying.' 'Ah, you flatter me, but it is most delightful, too. Well, I suppose we must be off.' So the two ducks started for the end of the pond and there Miss White Duck was waiting for them. 'Quack, quack, good-afternoon, Duck ladies,' she said. 'Good-afternoon, quack, quack,' said Mrs. Duck. 'Good-afternoon, quack, quack,' said Miss Duck. 'Horrid weather we've been having lately, quack, quack, is it not so?' said Mrs. White Duck. 'Terrible,' said Mrs. Duck. 'Quack, quack, terrible.' 'Horrible, quack, quack, horrible,' said Mrs. Duck. 'And yet, come to think of it, it hasn't been so very bad,' said Miss White Duck. 'No, come to think of it, it might have been much worse, quack, quack,' said Mrs. Duck. 'True,' said Miss Duck. 'Quack, quack, it might have really been bad.' They had their brook water and several insects apiece, and after they had chatted some more about the water and the insects Mrs. Duck said she'd have to be getting home to her family. 'Such a lovely time as I've had; thank you so much, dear Miss White Duck.' 'I, too, have had a beautiful time,' said Miss Duck. 'And Miss White Duck said: 'Quack, quack, it had been such a pleasure to see you both. Do call soon again. Just drop in any time. Any time at all.' 'Ah, yes,' said Mrs. Duck; as she reached her special home section. 'It is my delight that I am a duck. I have such a ducky time, quack, quack.' 'We Must Be Off.' 'But don't your son rather young to join the army?' 'Well, he is very young, but then you see, he is only going to join the industry.'

COLOR PLAYS PART IN FORMAL FROCKS

Loveliest Shades Are Conspicuous in Daintiest Evening Attire.

Evening, dinner and dance frocks are of interest, both matron and maid coming under their spell. For there is something so alluring, so colorful about these dresses which belong to the electric lighted part of the day that few can withstand them, observes a fashion writer in the Cleveland Plain Dealer.

Perhaps it is best to scrutinize the materials in vogue for evening before we turn our attention to the varied modes. Velvets, both in white and colors are especially good, and they may be plain chiffon weaves, or gorgeous velvet brocaded chiffons and georgettes. Solid-colored and shaded chiffons are especially youthful, while satins, silk brocaded chiffons and laces, gold and silver are also smart.

Color, too, plays an important part in evening attire. The loveliest reds are used, flame, firecracker and castilian with rose, coral and shell pink, glowing yellows and golds for those who can wear them with blues, lavender,

Sweater in Black and White for Spring Wear

Here is shown a trimly tailored black and white sweater for early spring wear. It fastens snugly at the throat and is one of the most popular of present-day styles.

shown recently was of tangerine-colored georgette made with a tight bodice and an extremely wide circular skirt, the sides being a trifle longer than the front or back. The trimming consisted of self-colored flat silk roses about two and a half inches in diameter, set at intervals over the entire skirt.

Knitted Dress Durable, Comfortable and Warm

The knitted dress is a much perfected product today, in comparison with that of only a few years ago, says the Kansas City Star.

As to the definite advantages of the knitted dress, it is, when well made, extremely durable and comfortable, warm and yet light weight. And it doesn't wrinkle! The freedom of movement which the knitted fabric permits makes this costume suitable for sports and for general wear.

If you are not careful to buy a dress that is of good, firm, close knit, and made of first quality yarns, it is quite likely to sag, set or sump and wear out quickly. You must do more than select a garment of excellent material and workmanship, too, to secure a maximum of service and comfort in a knit dress. It is particularly important that you select the correct size for a too-small knit dress, however high grade, will soon stretch and become shapeless. You must be careful not to pile collars or accessories to your knitted costume, since to do so is to invite holes and "runs."

The knitted fabrics you will most commonly see in outer apparel are jersey, silk jersey, tricotee and knitted coatings and suitings. The best grades of knit wool suitings are carefully finished, stretched and shrunken, so that the possibilities of their getting out of shape will be a minimum.

Sometimes you will see goods of this type made with a knitted background and a heavy, napped surface. Or, you may see knit goods in which the face is made of one kind of fiber and the back of another—the "plated" materials. The same term is applied to a knitted fabric with face of one color and back of another color.

Makes Study of Coop Marketing

Success Depends Upon Management, Understanding, Official Says.

Prepared by the United States Department of Agriculture.
The success of co-operation marketing depends more than anything else upon efficient management and a thorough understanding on the part of the membership as to the possibilities and limitations of co-operative marketing, according to Chris L. Christensen, in charge of the division of co-operative marketing in the United States Department of Agriculture, who has just made a three-months tour of the country studying co-operative methods.

Need Business Experience.

The importance of having men with business capacity to head up co-operative organizations cannot be overestimated," Mr. Christensen says. He declares that co-operative organizations are beginning to realize more than ever before that production and marketing are inseparable, and that very often the solution of a marketing problem may be found to originate in production practices. Organizations are also learning that production must be adjusted to meet market demands.

Visited the Northwest.

Mr. Christensen's study included the co-operative marketing methods employed by farmers' organizations for handling fruits and vegetables, dairy products, poultry products, wool and grains. He visited twenty to twenty-five organizations in California, in Oregon he studied the wool marketing associations, and in North Dakota and Minnesota he investigated the business methods and practices of farmers' elevators to determine the factors that enter into the efficient management of the elevators.

Some Important Points About Ducks and Geese

The laying season for ducks and geese usually starts in February. The Pekin duck lays about as many eggs as the average hen, but she lays her entire clutch in seven months, while the hen takes about nine months, says a writer in the Farm Journal. The Runner duck extends its laying over a longer period. The goose averages about thirty eggs.

Geese pair, but a drake will mate with four or more females. The eggs from yearling ducks hatch well, but to show strong fertility geese must be about three years old. Ducks can be profitably bred for four years, but geese will be prolific for three or more times that period. Ducks rarely become broody, but geese are apt to become broody after laying the first clutch.

The goose is a grazing bird, but the duck will thrive on a limited quantity of green food. Geese do not thrive when yarded; ducks do.

The drake is recognized by the curl in the tail feathers, but this curl is not found on the gander.

The average weight of the goose is twice that of the duck.

The older the gander the more vicious he is apt to become during breeding season. The drake seldom shows temper.

Geese cannot be profitably hatched and reared artificially, but incubators and brooders have revolutionized the duck business.

Nowadays geese are replacing turkeys on many festive occasions.

Feeding Milk Goats

"There are no hard and fast rules for feeding goats," says C. A. Leach, Jefferson county, Neb., who has a herd of Nubians.

"One thing you must keep in mind is that the food used should be of a kind to produce a strong body as well as produce milk. We have found that corn, oats and shorts make a very good mixture for the older stock. We mix the feed in the ratio of 64 pounds of oats, 52 pounds of corn and about 15 pounds of shorts. In addition to this we feed all the good alfalfa hay the goats will eat."

Vitamines Are Lacking

Fall pigs suffer more from a lack of vitamins than from anything else. Pigs may have a perfectly balanced ration in so far as protein, carbohydrate and fat are concerned but will not thrive without vitamins, which are present in rye or wheat pasture, alfalfa or sweet clover hay, or fresh milk. When vitamins are added to a well-balanced ration the fall pig will grow and fatten as rapidly and economically as the spring pig.

Fruit Tree Protectors

One can make his own fruit-tree protectors at a comparatively little cost. Simply buy screen wire, 20 or 30 inches wide. Then cut into oblong strips just large enough to go around the tree. If they are then rolled into cylindrical shape, using a broomstick, they will curl around the trunk and hold that position. Galvanized screen wire, while more expensive, will last several seasons.

Keep After the Weeds

Just because the vegetable plants are making a good showing as a result of the favorable showers and sunshine, it must not be forgotten that the weeds, too, are making even greater strides. Unless the weeds are killed within a short time they will get ahead of the vegetable plants and will crowd the latter out, or sap the life from the plant.

Plan Now Repairs to Hotbeds, Cold Frames

Early Attention Saves Worry When Rush Work Begins.

Scarcity of labor and high prices for materials are making it increasingly necessary for vegetable growers to adopt efficient methods.

In the opinion of C. H. Nisley, vegetable specialist at the New Jersey State College of Agriculture, New Brunswick, it is now time to be planning for the repair of hotbed and cold-frame sashes. If this work can be done during the spare time through the winter months, it will save much worry in the spring when rush work begins.

Painting is one of the jobs that might well be started. A linseed oil, white-lead paint will do much to lengthen the life of sashes. An especially thorough job should be done at the mortised joints. Homemade putty made according to the following formula will give very good results and can be made at a saving of money.

The following materials are used: For 4 1/2-pound lots: 5 pints of raw linseed oil, 3 1/2 pounds of white lead, 20 pounds of whiting. For 5 1/2-pound lots: 1 pint of raw linseed oil, 4 pounds of white lead, 4 pounds of whiting. Cost per pound—seven cents, not counting labor. Thoroughly mix the white lead and oil. Stir into this mixture enough whiting to make a stiff dough. Pour this on a board which has been sprinkled with a good layer of whiting to prevent the mixture from sticking to the board. Then knead, adding enough whiting to give it the desired consistency. This putty will stay soft for an indefinite time if kept covered with water.

For those who want them, there are numerous commercial materials on the market to take the place of putty for sash work.

Dried Buttermilk Used in Egg-Laying Rations

Dried buttermilk is comparatively high in price, but its feeding value is also high and can be used to advantage in egg-laying rations. Here is a mash recommended by Iowa State college, which contains dried buttermilk: One hundred pounds finely ground corn, 100 pounds finely ground oats, 100 pounds wheat bran, 100 pounds flour middlings, 30 pounds dried buttermilk, 20 pounds bone meal, 50 pounds 80 per cent tankage, 5 pounds salt. In connection with this mash the college recommends 200 pounds shelled corn and 100 pounds oats for the scratch grain. In fact, that is the scratch grain the college almost always uses for its layers. There are times when wheat bran and flour middlings may be relatively too high in price to make them economical feeds. When that obtains more ground oats may be fed than is recommended in the ration mentioned. For example, 150 pounds ground corn and 250 pounds finely ground oats, together with the dried buttermilk, tankage, bone meal and salt mentioned, would perhaps give equally good results.

Order Chicks Early

The poultryman who desires chicks for next spring delivery should be looking around for a poultry breeder who sells chicks of good quality. Many a man is forced to go without chicks or to accept later hatched chicks than desired because he has been too slow in placing his order. Place your order early and you will receive what you want.

Trees Need Sunlight

Branches headed back a distance from the lateral or stubbed back, will send out a lot of sprouts, covered by summer with leaves, and the tree will be so densely covered that sunlight cannot strike into the tree, hence the bearing area will be much reduced. If you have to take out a whole branch, or practically the whole thing, it is generally good practice to cut clear back to the parent branch.

FARM FACTS

A successful rural leader must be a good farmer.

"In this 'Eat-More-Fruit' campaign, farmers can well set an example.

The potter cannot mold without clay, nor the hen make shells without lime.

The consumer has a peculiar way of avoiding any crop that is consistently inconsistent in quality.

The dropping boards, perches and nests should be treated for mites. The pullets also should be examined for lice.

Too much business independence is sometimes hard on the income. Co-operators are usually less dangerous than competitors.

Using a scrub bull on the herd is like investing money in continental. The quantity is increased and the income curtailed.

One of the staples among the admired flowering vines is the rambling or climbing rose. Almost any variety will produce most satisfactorily if given a chance in a sunny place, in good soil, and with a liberal amount of water in dry weather. They grow well on wire.

Tanlac puts solid flesh on scrawny bones

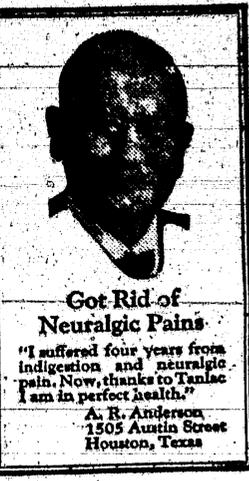

HOW can you expect to get back your health and strength as long as your body is scrawny and underweight? Let Tanlac put some good, solid flesh on your bones, put your stomach in shape, to digest your food, purify your poisoned blood! Then see how much better you feel.

In our files are one hundred thousand glowing letters of thanks from men and women who have been helped back to health and strength by Tanlac. What it has done for these folks it can surely do for you.

Tanlac is Nature's greatest tonic and builder. It is compounded after the famous Tanlac formula from roots, barks and curative herbs. It gets right down to the seat of trouble and makes you feel right from the first dose.

Don't put off taking Tanlac another day. Don't go on dragging your poor, tired-out, sickly body around when this great remedy can bring you quick relief.

In cases of torpid liver, rheumatism, stomach complaint, lowered resistance, indigestion and malnutrition Tanlac will work wonders. Get a bottle this very day and start feeling better tonight.

Got Rid of Neuralgic Pains
"I suffered four years from indigestion and neuralgic pain. Now, thanks to Tanlac I am in perfect health."
A. R. Anderson
1505 Austin Street
Houston, Texas

TANLAC FOR YOUR HEALTH

English Country Folk Cling to Their Ghosts

The country folk of England, who are frequently in the throes of a ghost scare, have another one on their hands now. A mysterious veiled figure is reported to have been seen flitting about the ruins of Lovel castle near Witney, Oxfordshire.

The many old unused castles and abbeys which dot the English provinces furnish ideal visitation places for these nocturnal wanderers and at most seasons there are ghostly appearances some place in the broad land which attract the attention of the country people.

Many years of such happenings, instead of causing the rural folk to become accustomed to them, have sharpened their interest, and now the report of a ghostly visit is sufficient to arouse a whole countryside.

In a few cases these apparitions have been explained but mostly they have either vanished unknown or still reappearing without satisfying anybody's curiosity.

To Have a Clear, Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rub, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Advertisement.

From the Camp

Harvey Firestone was describing to a Plymouth reporter his camping experiences with Thomas A. Edison and Henry Ford.

"Henry," said Mr. Firestone, "loves camping, all except the sleeping part. He's a light, nervous sleeper, you know, and his fellow campers snoring always bothers him.

"Usually he puts up with it—for he's a long-suffering geezer—but I'll never forget one night, about 2 a. m., when he roused the whole outfit of us.

"Here, wake up! Wake up, you fellows!" he said in a despairing kind of voice. "We're all going to go to sleep together."

Love makes the cottage a palace of gold.

A spoonful of success is worth a gallon of failure.

On the Tail of Crime

The detective made his way up the stairs of the office building and presented himself at the door of the music academy.

"Excuse me," he said to the young lady who opened the door, "but I hope you'll give me what information you have and not make a fuss."

"What do you mean?" was the indignant question.

"Why, that little affair—you know," said the detective.

"I don't understand you at all," replied the young lady, frostily.

"Why, we got a tip from the house next door that somebody here has been murdering Wagner and I've been sent along to look into the case."

Boschee's Syrup

Alleviates irritation, soothes and heals throat and lung inflammation. The constant irritation of a cough keeps the delicate mucus membrane of the throat and lungs in a congested condition, which BOSCHIEE'S SYRUP gently and quickly heals. For this reason it has been a favorite household remedy for colds, coughs, bronchitis and especially for lung troubles in millions of homes all over the world for the last fifty-eight years, enabling the patient to obtain a good night's rest, free from coughing with easy expectation in the morning. You can buy BOSCHIEE'S SYRUP wherever medicines are sold.—Adv.

Life Budgets Proposed

Several colleges, looking to modern needs in the curriculum, have included in their new courses one for "life budgeting" which means not only training on how to budget and spend financial income, but also on budgeting time, including leisure, work, reading and other pursuits. This is felt necessary partly because organized labor is getting a gradual reduction in working hours, leaving more and more leisure, a great deal of which, it is said, is now wasted in a way that does as much physical harm as the surcease from too much work does good.

None in Our Street

"To what family does the whale belong?"
"Jimmie—I don't know, teacher; no family in our neighborhood ain't got one!"—Boston Post.

Fur Wraps Should Be Kept in Cold Closet

"This coat is too gorgeous for words. I can't get over it!" And reluctantly the owner of a new fur coat opened the door of the closet in the hall, where her new treasure was to hang.

But her practical aunt rose and peered into the closet suspiciously, even thrusting in an exploring hand.

"My dear child," she ejaculated, "you mustn't dream of keeping your coat in that hot closet! Why, the pipes go right up through it, and the air in there is superheated. That will not do at all. Furs, you know, are cold weather affairs, and were never intended for tropical temperatures. Furs that are overheated lose their crispness and luster just as feathers that are rained on lose their fluffiness and sheen. Don't you know how different a dog's coat looks in winter? In summer it is limp and dull in appearance, but in midwinter, when the air is mappy cold, the hair stands out from his body full of life and shiny with vigor.

"Your fur coat is subject to the same changes. Warmth and lack of fresh air will take all of the pep out of fur that should be bristling with life and sheen. It really should hang out of doors, I suppose, but lacking that we can surely and a cold closet somewhere—the icier the better. Why not that chilly storeroom of the pantry? You can arrange a clean corner for it, and I assure you it will look a hundred times better than if it hung in this furnace-like closet."

The experts say that the reason fur is so warm is that it forms air spaces which keep out the cold. Fur that is kept and live has many more of these

air spaces, whereas artificially heated fur droops and grows limp, preventing the circulation of the air. Waggled for neither look as well nor keeps you as warm as cold fur. You can bring in your coat and warm it slightly before going out in it, if you wish, but it should be kept in a cold place the rest of the time.—Kansas City Star.

Stones in All Colors

The synthetic stones in all the colors of precious stones shown in the catalogs are so large as to be burdensome, but they are having a great vogue, and almost every woman one sees is decked out in glass of some sort. The newest things in crystal quartz beads alternating with smaller beads or disks of bright glass, green, blue or coral, are becoming to almost everyone.

Seen on Newest Wraps

Honeycomb, an old form of English embroidery, now is employed on the newest and most delectable of evening wraps. One such covering is of chiffon velvet of the true honey shade, cut with a long cross-over front but sleeveless, a deep cape taking the place of sleeves. This is honeycombed around the shoulders and hem in half-foot deep bands.

For Bobbed Coiffure

Ingenious and varied have been the devices for keeping bobbed locks demurely dignified for formal evening dances. The latest idea is a bandeau of fine silver wire, studded with crystals and worn low across the ends of the hair from ear to ear.

The experts say that the reason fur is so warm is that it forms air spaces which keep out the cold. Fur that is kept and live has many more of these

For Colds

ASPIRIN

SAY "BAYER ASPIRIN"—Genuine

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians 24 years for

Colds, Headache, Neuralgia, Lumbago
Pain, Toothache, Neuritis, Rheumatism

Safe

Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Drugists.

Aspirin is the trade mark of Bayer Manufacture of Monacochheim, Germany of International.

PERSONALS

LOST—A light-blue Brushed wool scarf. Finder return to Mrs. Wayne Van Schoyck or to the Outlook or News office and receive reward.

Mr. and Mrs. P. R. Phillips came in from their ranch in the Carrizo Draw the latter part of last week with their little daughter, who was ill with an ailment closely resembling pneumonia. They are still here and the baby is reported to be improving.

Used Ford Cars for sale at reasonable prices and on easy terms.—Western Motors.

Mr. and Mrs. L. H. Claunch were in from their ranch near the Gran Quivira last Saturday.

Prof. and Mrs. F. S. Copeland of Capitan were Carrizo visitors last Saturday.

Mrs. Edward McCreary and children of Alamogordo came up from Alamogordo last Friday and were guests of Mr. and Mrs. Joe West for the week-end, returning home on Monday.

Don't experiment—Buy a Ford at the Western Motors.

Mr. and Mrs. Charles Rolland arrived here Sunday from their home in Fenton, Mich. They stayed over with the A. J. Rolland family until Tuesday, after which they were accompanied to Alamogordo by Mr. and Mrs. A. J. Rolland where after a visit with the Frank Rolland family, they continued on their journey to California, where they will visit different places of interest before returning to the Badger State.

County Commissioner Romar Pacheco came in from his ranch near Arabela last Monday. He has been on his ranch for the past three weeks with the exception of the time he spent at the last meeting of the Board last week. He reports an eight-inch fall of snow in that region, which is melting gradually and giving the ground a good soaking.

This snow alone, he claims, will insure good grass for the coming spring.

First-Class Battery Service Station at the Western Motors.

This office is in receipt of a letter from Demetrio Perea, who has now located in Roswell. He sends his regards to his old friends here and says he expects to make Roswell his future home.

Sheriff Kelsey took a trip to the Macho country the first part of the week and returned with Mr. P. M. Johnson, who was taken ill at that place. Home nursing and familiar faces of the home folks, will soon restore him to his normal condition.

Our genial public spirited citizen, Mr. A. J. Rolland, has donated the use of his old building on Fourth street to the Girls' Friendly Club. The Club will meet every Friday evening at 7:30. The Club is non-sectarian and its object is to make Carrizo a better town for girls to live in. The girls need rugs and those who have soiled rugs they might wish to donate, they will be gladly received.

The big meeting of the Commercial Club held last Thursday night was the most enthusiastic held since the consolidation of the Commercial Club and the Woman's Club. Many committees were appointed, and the work of furthering the interests of Carrizo is going ahead with renewed activity. At the close of the meeting, a luncheon was served. The consolidation has proven to be a wise movement.

Conductor Fred Getty has returned from Kentucky, where he went a short time ago on account of the illness of his wife.

John F. Gumm of Silver City, is here this week visiting Postmistress Mrs. Elizabeth Gumm, son, Dean, and old friends both here and at White Oaks.

Chas. W. Walker came over from Capitan the early part of this week to meet Mrs. Walker and son, Chas. Jr., who has been on an extended visit with relatives and friends at Nashville, Tenn., and other places in the south. They arrived on No. 2 Wednesday morning and Charley is happy.

Capitan School Notes
(Superintendent F. S. Copeland)

An excerpt from an article by the late Gene Stratton Porter, appearing in a recent issue of McCall's magazine, might be of interest to the parents that cannot or do not exercise any control over their offspring.

The reason the children of the present day are doing some of the sickening and shocking things they do is because their fathers and mothers did not take time when they were little children to begin a systematic course of education in how to be physically clean, in how to be morally clean, in what their bodies are for and how to use them; did not superintend the books they read, did not take them by the hand and lead them to church and Sabbath school as our fathers and mothers took us by the hand and lead us.

That a child will not love its parents if it is corrected, when it knows it is doing things that it should not do, when it deserves correction, is the veriest tommyrot.

It is utterly impossible to allow children to grow up without hammering it into them that they have got to tell the truth, that they must play square, that they must keep their hands off things that do not belong to them, that they must not abuse their bodies, that they must respect their elders and obey their teachers, that they must go to church and Sabbath school, that they must fit themselves to be men and women who will carry on the government and the business of the land, who will find the homes and become the fathers and mothers of the next generation.

In a recent issue of Good Housekeeping, Dr. Harvey Wiley, one of America's foremost scientists, says that "obedience is the first virtue to be installed into the child's mind, and includes obedience to God, parent, country, teacher, and the rights of others."

The child should be made to obey, not asked to obey, and that training should start at a tender age. Such a course would result in less tears and sentimental twaddle, a smaller number of wrecked lives, and a decreased amount of heartaches from over indulgent parents.

Henry Humphrey and David Saunders, two pupils from the eighth grade of the Carrizo schools, addressed the Capitan schools Monday forenoon on the big Griffith super-production "America" which will be shown at the Crystal on Feb. 9 and 10.

The proceeds will go to the Carrizo Volunteer Firemen.

The boys made splendid talks, gaining an experience that is very valuable training for them.

All the teachers seemed happier Tuesday noon than at the morning hour. Ergo, the pay checks had arrived.

Occasionally a bit of news from the sport world is somewhat refreshing. The new heavyweight "wrestling champion," "Big" Wayne Munn, is an ex-college man, having attended the University of Nebraska several years where he was a noted football tackle and wrestler. So there is one "champ" that has something from the neck up.

Added to that he is clean, morally and straight in his professional dealings. So is Nurm, the phenomenal Finn, who has smashed about a dozen distance running records, has no end of endurance and stamina, and is regarded as unquestionably the greatest middle distance runner the world has yet produced. He eats plain fare, does not take pride in the trusty "cig" between his lips, and stays home at nights.

Genuine Ford Battery 13-plate 6-volt 80 ampere hour, price \$16.50, at the Western Motors.

A car load—of fancy Greeley Colorado potatoes just received at Ziegler Bros.

Mrs. H. E. Kemper and daughter, Hattie, arrived home Wednesday from Bushton, Kansas, where they had been since the holiday season with relatives and friends. Dr. Kemper accompanied his family, but returned the first of January.

Catholic Church

(Rev. P. Otten, Pastor)

First mass, 8 a. m., preaching for English speaking people.

Second mass, 9:30 a. m., for Spanish speaking people.

Sunday School at 2:30 p. m.

Evening services at 7:30 p. m.

Methodist Church

(W. H. McPherson, Pastor)

Sunday School, 9:30 a. m., D. S. Donaldson, Supt.

preaching, 11 a. m.; Epworth League, 6:30 p. m.

Preaching, 7:30 p. m.

Episcopal Church

Rev. H. K. Stanley, Pastor.

Services at the Wetmore building as follows:

Sunday evening, Bible Class at 7:00 p. m. Preaching at 7:30 p. m. Public cordially invited.

Anti-Freeze is cheaper than radiators. Buy your solution and keep it tested with a Freeze-Meter at the Western Motors.

Carrizo School Notes

J. M. Help, Superintendent

Last Saturday, the Alamogordo boys and girls came up to play our teams a return game of basketball. As we had not been notified of their coming, our boys and girls were scattered to the "four corners of the earth," and our coach, Prof. Hester, was beyond the reach of the radio.

The few boys and girls who were in Carrizo, called a council to decide what was best to do. Some of the timid ones suggested that we surrender without a struggle, but one loyal soldier who had passed through many battles and had always lived to tell the story, said: "In the name of Peter Stuyvesant," so long as I have one wooden leg to stand on and one glass eye to watch the enemy, I will never surrender!"

By means of the school bell, the fire alarm, the telephone and the automobiles, the plucky warriors of Carrizo were called home to protect the honors of the school. As it was impossible to reach our coach by any means, a former teacher and coach, Mr. Bryan Cazier, was requested to help us out, which he kindly agreed to do.

At the appointed time, the game between the girls began in quite a spirited way, both sides full of confidence and a determination to win. This game ended in a very satisfactory way; our girls WON. In fact it is always satisfactory and fair when we win.

Then the real battle began between the boys. This was not so satisfactory.—We didn't ask about the score; we didn't feel like it.—Ask Alamo!

Well, the games were good and our boys and girls know how to stand victory as well as to take defeat. We like such folks for neighbors.

Last Sunday-week and last Sunday, we played the Fort Stanton team. They are good sports also. In all the games we have played this year, with Corona, Capitan, Tularosa, Alamogordo and Fort Stanton, the teams have shown a spirit of fairness and courtesy far beyond what we have seen in some other places.

As long as the games can be conducted on such high plane, we feel that athletics is beneficial and worth while to our schools. We hope and feel that such good spirit will continue to exist among our schools.

The boys in the Manuel Training class have been busy for the past week repairing chairs and making doors for a bookcase.

There has been considerable illness among the teachers and pupils during the past week.

Wm. Ferguson, who accompanied his son, Don, and Jack Brazel to California about one month ago, returned this week. He thinks the Sunshine State is good enough for him.

New Spring Goods

Just Received, a NEW SPRING SHIPMENT of KANT-fade Fabrics from New York. Among these are Voiles, Satin, Taffatex Crepe, Knock-About Cloth, etc., in Various Colors and Patterns. With this and our NEW LINE of PICTORIAL PATTERNS, You can Start Your SPRING SEWING EARLY This YEAR
