GOING TO CHURCH

I WAS brought up to go to church. Sometimes we drove three and a half miles from our house to the village; sometimes if the horses were tired or over-worked we walked. The weather made little difference; if it was cold we bundled up; if it rained we crouched under huge cotton umbrellas.

Our shoes were all shined on Saturday night, our Sunday clothes carefully laid out, our bodies made fit and proper for the Sunday service. There was never any discussion as to whether we should or should not go to church. Going to church was like going to school; it was a foregone conclusion, good for our minds, good for our souls. We got the habit, and like most habits of youth, it still persists and the reward is worth while.

Wagner did not go to church last Sunday though it has been his custom to do so regularly at home. He is, in fact, a member of the church and looked upon somewhat as a leader in religious matters in his home community. He explained the omission to himself and to his family in the letter he wrote home by alleging that he was too busy. The unfamiliar and exacting duties of a new life had taken his time and required his attention.

He had in fact, however, been out rather late on Friday night at a party; Saturday afternoon he had gone riding with some friends who had a car in town, and Saturday night he had been at a smoker and later had attended the second show at the Park. It was late when he got to bed and late when he awakened in the morning. After he got up, he sat around half dressed until dinner was ready.

His real reason for not going to church was not that he was busy but that he was a little lazy, and just a little afraid, not knowing the boys in the house, that it might not be the popular thing to do. He waited for someone to make the start; the suggestion and no one did. He did not have quite the courage to admit that he was religious, and unless he develops a little strength of character he will, perhaps, not go to church next Sunday.

Church is a good habit. It turns one's mind away from the daily routine, it calls his attention to higher ideals, it emphasizes his duty to God. It strengthens his character and wards off temptation, and offers an opportunity for service. It is a habit learned early or seldom learned at all.

Play Ball!

We have plenty of material still here with which to form a good baseball team. Shorty Dawson is at work on a mining venture, but will be with us shortly. Pat Dolan will play as usual, Meyer Barnett, Bill Norman, Ernest and Bennett Dingwall, Bryan Casier, Tex Loughrey and several more from the west side, while from the east side, we have Alfredo Lopez, Ben Sanchez, Joe Chavez, Juan Martinez and the Beltran brothers, with this sort of a line-up, we should be able to have a good team. Professor Hester, it is said, is also good in the field. What is to prevent us from having a team? We might not be able to beat the leading professional teams, but for the amusement of the community and at the same time bank on it that we would hold our own with teams of other towns near us. Now is the time to start the movement. LET'S GO!

Aviation Committee Will Give Big Dance

On the night of Saturday, April 18, the Air Committee of the Chamber of Commerce will give a rousing Spring Dance for the benefit of the fund for the purpose of erecting an airplane landing, as Carrizozo will be on the main airline route from Chicago to El Paso. Let there be a big turnout to the dance so that the fund may be swelled for this purpose. Good music will be furnished and refreshments will be served.

War Veteran Found Dead in Cellar Hole

Belmont, Mass., April 6.—State police joined with the authorities of this town today in an effort to solve the mystery of the "gas mask" murder, the victim of which Alexander Buchanan, Nova Scotia carpenter and war veteran, was found on Saturday in an abandoned cellar hole in the woods near the McLean hospital in Waverly.

A gas mask of the type used in the United States navy had been fastened to the man's head and enough chloroform to kill 25 persons, police said, poured into the chemical chamber of the mask. The mask had been inserted so tightly that the man's tongue was split. The strings holding the mask in place were tied with what sailors call "ebb tide" knots. It was believed that the man was carried some distance to the place where the body was found. Search was made for Miss Jessie McKenzie, formerly employed as a maid for a Brooklyn family, whose engagement to Buchanan was broken last November. Miss McKenzie is believed to be residing in Detroit, at present.

Fort Boys Again Victorious

With an enthusiastic crowd yelling themselves hoarse during the final innings of the game, Fort Stanton again emerged victorious over the New Mexico Military Institute on the Stanton field by the score of 5 to 4. It was anybody's game until the final out. While for the Institute and Flores for the locals went the whole route, both pitching remarkable ball for an early season game. Coming from behind in the sixth inning the Institute went into a tie by scoring three runs, but the Fort boys managed to squeeze a run across the plate in their half of the same inning which proved to be enough to win the game. Both teams played snappy ball despite four errors chalked up against each. A good week day crowd attended this first home game of the season played on the remodeled Fort diamond.

The score by innings:

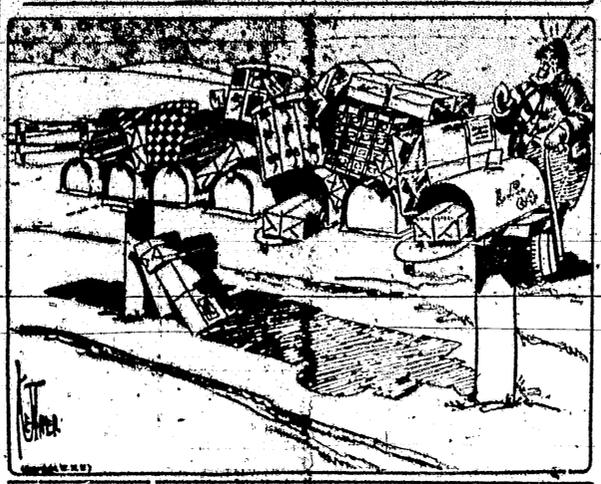

R	H	E
N.M.M.I.	0010030	464
Ft. Stanton	001211x	584
White and Adams,	Flores and Pitts;	Umpires, Rasmussen and Howard.

Naval Airplane To Bridge Arctic Ice

Washington, D. C., April 6.—Naval aircraft will attempt this summer to bridge the vast ice expanse that has so far shut off from human knowledge great regions of the Arctic where a supposed continent has long lurked the tollsome effort of men by sledge without an answer to his guess. In an expedition headed by Donald B. MacMillan, who is returning north on his eighth voyage of exploration next June, naval pilots will bring their craft to the aid of man's struggle to map the mysteries of an area of more than a million square miles between Alaska and the North Pole.

Endorsed by President Although not a government project the plan has been approved by Secretary Wilbur and endorsed by President Coolidge and also will have both the financial and scientific backing of the National Geographic society.

The Easter Tide

Interesting News From Fort Stanton

With two baseball games already played with the Roswell N. M. I. and both closely contested and won by the Fort, the season begins with the best kind of a send-off. Like the man with a reprieve at the last moment before the fatal shot, Dr. Anderson appeared to relieve the situation when our new and skillful first baseman, Mr. Bird, was unfortunately injured in the last game on Monday and helped to make the score of 5-4 in favor of the Fort. It was a dramatic and most welcome incident at the crucial moment of an important game.

Tournaments of Bridge in the homes of Mrs. Anderson, Mrs. Howson, and at number 2 given by Miss Robinson are mentioned as well as a Chess tournament of the patients in which Messrs. P. K. Mahan and W. Hested are leaders at the present with wins of 12 and 9 games respectively to date.

Miss Helen R. McCall from New York has been added to the present splendid group of nurses at the Fort and is welcomed most cordially by all. She succeeds Miss Anna M. Gartman who left with the regret of many friends, last week.

Wedding bells have again sounded at the Fort and happiness is guaranteed by all who know them in the home of Mr. William M. Swope and his new bride, Miss Geneva Coffee who were married in Roswell last Saturday. May all joy attend them.

On Saturday evening, April 11, the Trowell club is planning an Easter program at the Social Club and in ward 10, and on Sunday morning at ten special music, fitting for Easter, is planned. Everyone is invited to both of these.

Many friends are rejoicing at the recovery and return of Miss Virginia Scott who returned to her class room last Monday.

The last dances on Saturday night in the series for funds, for the new community house, was as great a success as others have been and it is hoped those in the future will be as we need a new community house badly. The credit is given generally to Mrs. H. J. Warner for initiating these dances as a means to secure the greatly needed improvement.

To see A. V. Rogers again about the Fort and working is most pleasing. He has been on duty for some time and is rapidly regaining his health.

Special Easter services in Episcopal Church, Sunday April 12th, at 7:30 p. m. in the Wetmore Building, Carrizozo, N. M. Everybody welcome.

Frank Standhardt Passes On

At our last writing, Frank Standhardt, who had undergone two operations at a local hospital was thought to be improving, but complications set in later on and last Saturday night he passed away. The remains were taken to Estancia for interment which was attended by many friends of the family from Corona and Estancia. Mr. Standhardt had been with the Corona Trading Company at Corona for ten years. He was a pleasant gentleman to meet, a kind, loving husband and father and much admired by all who knew him. He leaves a wife, two children and a brother, who resides in Missouri, and who was here during his last hours. The sympathy of the community in general goes to the sorrowing relatives.

For Better Homes

Club women of the New Mexico Federation of Women's Clubs will observe "Better Homes Week," beginning on Mother's Day, May 10, and extending to May 17. The object of the movement is to raise the standard of the American home and to bring wholesome living conditions within the reach of all.

The campaign will include clean up and beautifying activities and programs are scheduled for the study of home improvement, home conveniences, and the value of music and play in the home. The clubs are asked to study their local problems and to plan programs which will meet their local needs.

In several communities the club women will demonstrate a model home, adequate for and within means of families of modest income. One of the most extensive of these demonstrations is being prepared by club women of Albuquerque. They have secured a suitable location and a model house, suitable for a family of five is being constructed. Business houses are co-operating in furnishing of the house, and plumbers, electricians and contractors have offered their services free.

Mrs. Grace T. Bear, president of the state federation, Mrs. Geo. Prichard of Santa Fe, of the American Home Department, and Mrs. Tom Charles of Alamogordo, state chairman of "Better Homes of America" department, are directing the "better homes" work.

The home demonstration department at State College, a branch of the extension service, provides free courses in various phases of home-making and home improvement. 805 women were enrolled in the courses in 1924. The club women are urged to take advantage of the help they can secure from the extension service home specialists.

The Name, Dolan, and the Crossed Wire

Major T. A. Dolan, who carries on a good deal of correspondence with people in the east had one party on his list who had failed to answer an important letter, and last week was about to write again, when he received an answer to his letter, and behold, it bore a Chinese post-mark! It had gone across the sea to Shanghai, where the mistake was discovered and return to this country made. The question now arises: how could a letter addressed to the Major at Carrizozo, go to Shanghai? On investigation, it was found that there is a Major Dolan in the U. S. Army, whom, it is said, was in Shanghai a short time ago, but how the postal authorities could make Shanghai out of Carrizozo, is where the joker comes in.

Nogal Items

By "Bill O'Fare" Billy Ferguson has been busy painting in Carrizozo this week. No, not pictures, houses.

O. C. Davis has suffered a relapse, and has been critically ill the past week, but at this writing is somewhat improved.

There is evidently nothing to Darwin's theory of evolution, for if it worked as Mr. Darwin says, these frogs in New Mexico would be growing wings.

Marion Hust reports the soil on the mesa too dry to sprout seed. Unless it rains in the next few days, planting is going to be pretty late, even in this county. Over in Texas it is now too late to plant.

Scientists say hot air arises—why not place a couple of windy politicians in your orchard these frosty nights? Might keep the fruit from freezing.

The 'weather prophets' around Nogal are still raving on. Better cut it out, fellows, or it will never rain. Jupiter likes best to slip up on us, but when so many are telling us when it will rain they cover the dates on the calendar, consequently Jupiter can't slip in without someone saying, "I told you it would rain today."

Joe Cochran has an optimistic view of the dry weather and the hard times, and lets us in on a little secret of economy. Joe says one good daily newspaper will winter a team of burros even better than alfalfa hay. The only drawback is so much political scandal in the papers makes the burros a trifle more stubborn. Now take the El Paso Herald—why the other day, carrying a big headline about those three tax commissioners up in Santa Fe, who, when told to vacate, refused—and had to be thrown out of office, Joe said he innocently fed the burros that confounded paper and for three days he couldn't get them to eat nor sleep.

Grand Matron Entertained

Comet Chapter No. 28, O. E. S., entertained Wednesday evening at a delicious dinner and enthusiastic reception in honor of the visit of the Grand Matron of the order, Mrs. Anna Chase of Silver City.

The lodge and banquet rooms at Masonic Hall were handsomely decorated for the occasion. The banquet was served at 6 p. m., after which the Chapter was called to order by Mrs. C. P. Huppertz, Grand Matron of the

TALES OF THE OLD FRONTIER

(© 1925, Western Newspaper Union.)

"BIG FOOT" WALLACE, A LONE STAR HERO

TO THE reader of American history it seems that Texas has more than her share of frontier heroes. For what a splendid list it is! Houston, Crockett, Bowie, Travis, Bonham, Ross, Hayes, Capt. Bill McDonald—that is only a few of them, but one more name should be added, "Big Foot" Wallace.

Wallace was a Virginian who came to Texas as a lad to join an older brother, only to find that he had been killed with Pannin's men by the Mexicans at the Goliad massacre. That may account for Wallace's later fame as a fighter of the Mexicans. His nickname of "Big Foot" was not derived from any physical peculiarity but from his sworn feud with Big Foot, a celebrated Comanche chief. Wallace trailed him many times, but never succeeded in killing him. Fate ruled that Shapley Ross, the Texas Ranger leader, was to have that distinction.

One incident in Wallace's life shows well the mettle of the man. He had joined the ill-fated Mier expedition into Mexico in 1842 and was one of the survivors who were taken prisoners to Saltillo. There Santa Ana, the Mexican dictator, ordered that one out of every ten of the Texans should be shot, the victims to be decided by having them draw from a jar filled with white and black beans. The men who drew black beans died.

One of Wallace's companions was a young fellow who had a wife and child waiting for him back in Texas. At the thought of them he broke down and cried as the drawing began. Wallace had just drawn a white bean, but at the sight of the grief-stricken boy he thrust it into the hand of the young man and whispered "Here, take this one. I'm feeling lucky today." Then he plucked his hand into the jar again—and drew another white bean.

One day in Wallace's later years, while riding in the Seven Rivers country, he mounted the top of a hill and saw before him a band of 60 Indian warriors herding before them a bunch of stolen horses. The Indians discovered him at the same instant and raised a whoop of triumph. Wallace's horse was tired and he knew that he would not have any chance in a thousand in a race with the savages.

But the Texan did not stop for an instant. Jamming the spurs into his horse's flanks, he dashed forward and as he charged he waved his hat toward the rear and shouted "Come on, boys! We've got 'em now." His magnificent bluff worked. The Indians fled without even trying to take the horses. Wallace rounded them up and by nightfall had restored them to their rightful owners.

Rare Curio Find

County Commissioner Richard Hust made a rare curio find about two weeks ago while plowing on his farm in the Nogal canyon. His plow share struck a hard flint-like substance and stopping to examine the cause, he found it to be an image of a bear weighing nearly nine pounds. Where the plow share struck the image it made a furrow which revealed the fact that it was made out of gold quartz of a fine quality. Mr. Hust brought the image here this week and same is now at the rooms of the County Commissioners.

Besides this, he found numerous arrow heads, stone axes and several bows, showing that the place where he had been plowing was at one time in the dim past, an Indian graveyard. local Chapter and the Eastern Star degree conferred on Mrs. R. B. Ewing of Capitan.

The Grand Matron, who is on a tour of the state, addressed the local Chapter, giving an account of the work being done over the state and complimented the Chapter on its zeal and progress.

As a fitting finish to the event, Mrs. M. L. Blaney, on behalf of the Chapter, presented the Grand Matron with a beautiful bird lamp. The honor guest is at Tularosa, today, accompanied by a number of the officers of our Chapter.

THE WORLD IN PARAGRAPHS

A BRIEF RECORD OF PASSING EVENTS IN THIS AND FOREIGN COUNTRIES

IN LATE DISPATCHES

DOINGS AND HAPPENINGS THAT MARK THE PROGRESS OF THE AGE

WESTERN

A masked man, single-handed, calmly locked five employees of the Bank of Sparks, at Sparks, Nev., in the bank vault and made his escape with about \$35,000 in cash.

Three distinct earthquake shocks were noted by Southern Pacific station agents in the neighborhood of Summit, Calif., recently. So distinct were the shocks that men were dispatched along the tracks to make certain that no damage had occurred to the tunnels.

Kid McCoy was sentenced in Los Angeles to a prison term of three to thirty-eight years for the shooting of Mrs. Teresa Mora. McCoy's previous sentence of one to ten years for manslaughter in connection with Mrs. Mora's death will be served concurrently with the present sentence.

Judge Harold Lunderback of San Francisco postponed the murder trial of 10-year-old Dorothy Ellington to inquire into the present mental condition of the girl, who is charged with killing her mother in the bedroom of their home last January after a dispute over the girl's pursuit of jazz and joyrides.

Atherstone, valiant son of Marathon out of Billie, won the annual Cofroth handicap, richest all-age stake in America, at Tin Juana, leading all the way and finishing strong. General Thatcher was second and Spic and Span third. The time, 2:07 2/5, was two seconds slower than the track record for the Cofroth, established last year by Itun Star.

Gen. John J. Pershing, commander of the American expeditionary forces in France during the World War, is at Lincoln, Neb., taking a short vacation prior to taking up the duties assigned to him by President Coolidge as head of the commission to supervise the plebiscite growing out of the award in the controversy between Chile and Peru over Tacna and Arica.

Postoffice inspectors of Los Angeles brusquely halted the educational movement designed to fit would-be sleeping and dining car porters for the task of tucking the traveling public into its berth and watching over its meals when they arrested a J. Churchill and his wife, who are president and secretary, respectively, of the Railway Dining and Sleeping Car Training Service, on an indictment charging use of the mails to defraud.

WASHINGTON

President Coolidge was urged by Donald MacMillan, the Arctic explorer, that the American government should make every effort to claim additional territory near the north pole.

President Coolidge will begin his summer vacation at Swamp Scott, Mass., June 13, according to word received from Washington at Swamp, Scott. He will maintain his summer capital at White Court, recently leased by his friend, Frank W. Slocum, and early in June an advance party of White House attaches will arrive in Swamp Scott to prepare for the coming of the President and Mrs. Coolidge.

Customs experts in the treasury have begun a new study of the old question of how standard newspaper paper may be defined to permit its entry free of import duties and yet compel payment of tariff rates on other kinds. The investigation now started resulted from arguments made before Assistant Secretary Moss by paper manufacturers, who sought to have modified a 10 per cent tolerance in the present definition of standard newspaper.

The name of Bear Ribb was bestowed upon President Coolidge by the Indians of the Keweenaw district of North Dakota in recognition of the citizenship rights granted to them. The name is that which was borne by a chief of the Hunkpapa, who was killed when he sought to teach the Indians the white man's way, after peace had first been brought about between the Indians and the white men. "We now know that Bear Ribb was right," the letter from the Keweenaw Indians said, "and because he was a far-seeing, progressive man we now give you the name Bear Ribb, by which you will be known to our tribe."

Postmaster General New has directed the restoration to duty, with demotion, of each of the six postal supervisory officials suspended Jan. 2 for their connection with efforts to influence legislation at the time of consideration of the postal pay increase bill.

Brigadier General William Mitchell, at the termination of this term as assistant chief of the air service on April 27, will be transferred to San Antonio, Texas, as air service officer in the eighth corps area, the War Department announced a few days ago.

FOREIGN

The Prince of Wales sailed from Portsmouth last week for South Africa and South America. The battle cruiser Repulse with the prince and his suite on board was escorted by two destroyers.

A train speeding for Verkh-Udinsk was overwhelmed near Irkutsk, eastern Siberia, by a great avalanche. After several hours of exhaustive efforts, sixteen dead and thirty injured were recovered from the wreckage.

Nearly fifty persons were killed and 100 injured in a head-on collision between the Tashkent express and a Moscow suburban train. The disaster, which was one of the worst in Moscow's history, occurred about a mile from the capital.

Two officers and four privates were wounded and sixty-six men, ten women, and one Spanish priest were arrested, the result of a clash between federal soldiers and worshippers outside the church of San Marcos, in Aguas Calientes, Mexico.

The elections held through Germany in the first popular balloting for president of the republic failed to elect, no candidate having the required majority. Dr. Karl Jarres, the candidate of the combined Nationalist and Conservative bourgeois parties, led the poll with 10,787,000.

Workmen engaged in breaking up a scuttled German destroyer, beached in Mill bay, near Scapa Flow, Orkney Islands, have discovered under a mass of wood which completely concealed them the bodies of five German officers and sailors, who evidently were not warned at the time the fleet was sunk by the German crews.

The Hebrew University of Jerusalem, which is to be opened in Jerusalem by Lord Balfour, who was sent from London especially for this purpose, is the first European institution of its kind, says the university committee's announcement, "to be erected on oriental soil by an eastern people who, after 2,000 years absence, are returning to the east with the culture of the west."

Thirty draft conventions for codification of American international law, designed for discussion by the international commission of jurists which is to meet some time this year in Rio de Janeiro, were made public in Washington by the Pan-American Union. They range from a proposal to outlaw wars of conquest among American republics to the writing of an admiralty code for commercial navigation of the air.

New giant air express, now being built for the Imperial Airways, to ply between London and the continent, will have specially designed wing flaps which can be raised or lowered from the pilot's seat. When the flaps are lowered the machine can get off the ground with a heavy load and alight at a very low speed, while with the flaps raised and the machine in the air, head resistance is lowered and the machine becomes capable of high speed.

GENERAL

The week of April 27 to May 3 has been designated as American Forest week.

The city of Glasgow, Mont., county seat of Valley county, recently experienced extreme flood conditions because of the rise of Milk river.

Will Lawrence of Muskogee, Okla., was found guilty of murder in the first degree and the penalty fixed at death, by a jury in Superior Court at Phoenix, Ariz. Lawrence shot and killed Policeman Eliaz Burch of Phoenix last month.

Wild prairie fires in western South Dakota and along the South Dakota-Nebraska border extinguished, inventory was taken of the loss caused by the flames which raged for virtually two days. Because the country through which the flames spread is sparsely settled, property loss was not as large as at first expected.

With the Connecticut, Merrimac and other larger rivers and their tributaries transformed into raging torrents by a heavy rainfall, northern New England was menaced by the worst flood in years. Property damage in New Hampshire and Vermont already amounts to more than one-quarter million dollars.

Gov. Miriam A. Ferguson of Texas has affixed her signature to the bill passed by the State Legislature granting amnesty to her husband, James M. Ferguson, restoring him the right to hold political offices and removing the record and decree of impeachment entered by the State Senate sitting as a high court of impeachment on Sept. 27, 1917.

The only reason of excuse for the rooster in "to entertain a sensation loving crowd, indifferent to anything except being entertained and, when aroused, a blood-thirsty one," said a statement of E. K. Whitehead of the Colorado bureau of child and animal protection, issued in Chicago by George A. H. Scott, chairman of a committee named by the American Humane Association to study ways and means of eliminating the practice.

The sequel of the prairie fires which destroyed 2 1/2 million acres of rich grass country in Nebraska and South Dakota last week was felt by ranchers in the affected territory, whose cattle, numbering thousands of head, are starving for lack of fodder.

Ja A. Van Patten, whose advertising agency is involved in a wrangle with the Democratic national committee over an advertising deal during the presidential campaign last year, promises that "fireworks" will be produced at the trial of John Ed in New York by both sides.

ASPIRIN

Say "Bayer Aspirin"
INSIST! Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 24 years.

Safe Accept only a Bayer package

which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacturing of Monocetate of Salicylic Acid.

Keep Stomach and Bowels Right
By giving baby the harmless, purely vegetable, infant and children's regulator.

MRS. WISLON'S SYRUP
Infants' stomach, gratifying results in mother baby's stomach. Good food, better sleep, as they should be feeding.

AMERICAN DISPENSARY

HELP FOR MOTHERS OF AILING DAUGHTERS

Mrs. Quigg and Mrs. Betton Tell in the Following Letters What Is Best To Do

with girls who have these troubles."
—Mrs. QUIGG, 210 Main Street, Boyersford, Pa.

Mrs. Betton's Letter
Ridgely, Md.—"I want to tell you how much good your Vegetable Compound has done my daughter. Before she started taking your medicine she was in a nervous, run-down condition, so that she could hardly sleep at night. She always had a pain in her side and sometimes cramps so that she would have to go to bed. She is a school girl and was going to school only half the time because she was so weak and run-down she could not stand it to walk there some days. She was this way for three or four years. She had been reading your advertisements in the different newspapers and she noticed that some of the girls and women had suffered just as she had. So she took Lydia E. Pinkham's Vegetable Compound and is a lot better. With the first bottle everybody could see a big change. She can go to school every day and can eat as much as any one else. When I first she did not have any appetite. We have told others about the medicine, and we are perfectly willing for you to see these facts as a testimonial. We are also willing to answer letters from other women concerning the help my daughter has received from the Vegetable Compound." —Mrs. JOSEPH BETTON, Ridgely, Maryland.

As a Man Thinketh
Life consists in what a man is thinking about all day.—Emerson.

A man deceives himself oftener than he does the other fellow.

Yes, of Course
She—Well, anyhow, I'm right even if we do disagree, as usual. Suppose we should agree some time; what then?
He—Then, of course, you'd be in the right again.

Build your body back to Health

TANLAC is a great natural builder. It revitalizes the blood, stimulates the digestive organs, rejuvenates the liver and pepes up all over.

From the four corners of the earth we gather the roots, herbs and berries that go into Tanlac. We compound them after the famous Tanlac formula that has brought health to millions.

Our files are crammed with testimonials from men and women in every walk of life, who state gratefully that Tanlac has brought them back to vigorous strength.

If you suffer from indigestion, loss of appetite, can't sleep or rest, if your stomach is making life a torture; if your liver is out of order and your body has run down to skin and bones, get a bottle of Tanlac at your druggist's and start taking it right away.

You'll be amazed to note the improvement that comes at once. For the first time in months you'll feel like eating some good solid food. You'll wake up in the morning rested and refreshed, ready for a good day's work. Nothing you know you'll have some color in your cheeks and the sparkle of health back in your eyes.

Don't put off taking Tanlac. Begin

Baptist Minister Frances TANLAC

"I had suffered from stomach trouble and nervous headache for over 30 years until I would hardly attempt the strength necessary to prepare my sermons. The wonder about Tanlac is that I had a head ache, nervousness, and a bad cold, and I had a flat stomach, steady nerves and a changed and improved system. Tanlac has never failed me."

Tuberculosis a Good Stimulus

Good Results Induce People of Michigan Community to Expand Work.

(Prepared by the United States Department of Agriculture.)

The farmers of Ellendale county, Mich., demonstrated their practical foresight when in 1921 they decided to rid the entire county of bovine tuberculosis. It was the first county in the country to be put on this free list, the work being done in co-operation with the United States Department of Agriculture. Instead of sinking into their feather bed of laurels, the people of this community have gone ahead with other improvements, stimulated by the good results of their big venture in disease eradication, which has increased their returns from dairy products and breeding stock.

Once the county had been freed of tuberculosis in its cattle herds, the economic benefits were so satisfactory that the farmers were stimulated to search for other ways of increasing the returns from their live stock. Next to the securing of healthy stock, the improvement in the quality of the animal appealed to them as being a logical step toward the realization of a better live-stock industry. As a result there has been a noticeable increase in the quality of dairy stock through the use of better blood and the elimination of poor producers through keeping production records.

Improve Poultry Flocks.

The most recent move which may be said to have had its origin in the campaign against bovine tuberculosis is a determined effort to improve the poultry flocks by the eradication of the same disease from feathered live stock and by culling out the poor producers.

The work of poultry improvement through these means was started the past summer in one township by a representative of the bureau of animal industry, United States Department of Agriculture, and a poultry expert from the college of agriculture, the county paying all their expenses except salaries. The culling of the first 40 flocks revealed that the average farmer, in spite of the popular impression to the contrary, was losing money on his chickens. It was found that of these flocks a little more than 40 per cent had tuberculosis. This condition is looked upon as a plausible explanation of the fact that 22 per cent of the eggs shipped from the county are found to have the disease, as hogs are particularly susceptible to the avian type of the disease.

Help Poor Results.

At the same time that the prevalence of tuberculosis was disclosed among the poultry flocks, other conditions were revealed which help to account for the poor results obtained. Among them are poor stock or culls, improper feeding, having pullets hatched too late in the spring, and keeping old birds. The conclusion has been reached as a result of this study of conditions that it is advisable to keep the poultry flock fenced in away from contact with other live stock on the farm.

It Pays to Haul Manure From Stable to Field

It costs a farmer 53 cents on every ton of manure he lets accumulate in the barnyard, a 21-year test at the Ohio agricultural experiment station at Wooster shows.

That's why it pays to haul manure directly from the stable to the field, says Earl Jones, soils extension specialist at the Ohio state university.

"Crop yields tell the story of the results of manure storage more clearly than a chemical test," Mr. Jones points out. "In an experiment at the Ohio station manure has, for 21 years, been applied to the clover sod in a three-year rotation of corn, wheat and clover."

"On one series of plots, the manure has been hauled directly from the stall to the field early in the winter. For another series of plots an equal weight of manure has been left in a pile in the barnyard for three months before it was spread on the field."

"Stable manure produced 23 bushels of corn an acre, 10.5 bushels of wheat and 1,563 pounds of hay; manure from the barnyard produced an average of 19.5 bushels of corn, 9 bushels of wheat and 840 pounds of hay. Measured by the average value of crop increase, one ton of yard manure is worth \$2.92, and one ton of stall manure \$3.45."

Before Freshening Cow Should Be Given Rest

During the last six or eight weeks of the lactation period, that is, before freshening, the dairy cow must be given a rest so that she may store up some extra flesh on her body. It is a mistake to think that a dry cow can be neglected so far as feed and care are concerned. Neglect at this time will show itself in a poorer calf and in reduced production during the next lactation period. In regard to the time of calving an effort should be made to have the cows freshen at different periods of the year so as to secure a reasonably even production of milk throughout the entire year. If all dairymen would follow that plan no objection could be raised against it, for the public consumes about as much butter and cheese one time of the year as another, but so long as the great majority of farmers have their cows freshen in the spring, those who are anxious to make the most money possible should reverse that practice and, at least, have most of them freshen in the fall.

Hog Tuberculosis Is Easy to Eradicate

New Poster Tells Farmer How to Improve Swine.

(Prepared by the United States Department of Agriculture.)

Pointing out that tuberculosis of swine is easier to eradicate entirely than to control when present on a farm, a new poster of the United States Department of Agriculture tells what farmers can do to improve health conditions among their hogs, with respect to this disease. The department's recommendations are:

Burn dead hogs and chickens to ashes.

Prevent accumulations of manure and old bedding in hog pens and lots.

Never feed any carcasses to hogs.

Cook all milk products fed to hogs.

Feed no slaughterhouse offal, unless cooked.

Get rid of tuberculous hogs—start with a clean herd.

Heed the first warnings from slaughterhouse reports which show disease in your herd.

The poster shows pictorially how tuberculosis is commonly spread. A typical barnyard scene, containing cattle, hogs and chickens, is accompanied by the explanation that diseased chickens and cattle spread the disease among hogs. Persons who suspect the disease are advised to apply to their state veterinarian or the nearest federal inspector for a slaughterhouse report on their next shipment of swine.

The poster measures 13 by 18 inches and is printed in two colors. It is intended to hasten the progress of tuberculosis eradication conducted by the bureau of animal industry in co-operation with the various states. Copies of the poster, and also of Farmers' Bulletin 781, "Tuberculosis of Hogs," which discusses the subject in detail, may be obtained free on application to the United States Department of Agriculture, Washington.

Farm Without Records Like Handless Clock

Income tax days are hard on the memory.

Many Badger farmers who have not kept a systematic record of their year's business are finding this out. On the other hand scores of them are testifying to the work saved by a simple system of bookkeeping.

John S. Donald, farm management expert of the Wisconsin college of agriculture, has many such testimonials from men who are using the Wisconsin farm account and record book.

"I have used this system of accounts for three years and find it very simple and easy to keep, and yet classified so one can determine the profit and loss in a certain department very easily. They make the income tax report very easy to figure out," says a Hebron (Ill.) farmer.

"I received one of these books as a Christmas present in 1923 and I feel I cannot get along without one now," writes a farmer from Erie, N. D. A Montana farmer wrote for two copies saying that he preferred the Wisconsin book to any he had ever seen.

A Jefferson county farmer said that he tried to get along during 1924 without the account book, but never again. He believes as Donald does that running a farm without accounts and records is like running a clock without hands.

Bridge Grafting Saves Girdled Fruit Trees

Mice and rabbits damaged fruit trees to a very great extent this last winter, according to reports received by fruit-extension specialists of the Pennsylvania State college.

Bridge grafting is recommended for all trees that have been girdled. Where it is possible the grafting work should be done before growth starts. Regardless of when the work is done, the scions should be cut, preferably from one-year-old growth, such as the sucker wood, states R. S. Snyder, extension horticulturist at the college.

"If the bridge grafting cannot be done during the early rush of the spring season, heel in the scions in moist sand until the work is done," he says. "Mound the trees, or, better still, paint them with liquid grafting wax or with white lead mixed with a little linseed oil."

Farm Hints

Carrots, cabbages and sprouted oats help make strong chicks.

Many a good-tempered colt is spoiled by a bad-tempered owner.

To work more horses to the man helps get the most out of man labor.

Coal ashes have very little if any fertilizing value, the beneficial effect is chiefly physical.

We pay for the farm machinery which we need if we do without it; it pays for itself if we buy it.

Good hatches are obtained only when the laying stock has been selected for vigor and made to exercise.

Are the brood sows getting plenty of exercise and not too much fattening feed? Remember that little pig promise to be valuable this year. Save all of yours by careful attention before and at farrowing time.

TO ADD CHARM TO MILADY'S COSTUME

Details of Dress That Will Interest Women Who Like to Be in Style.

Coats for young people are important this season, and they, too, follow lines of extreme simplicity. They are shown in models for spring, in tweed, homespun, velours, silk, satin, what you will, those for the larger girls being almost always trimmed with fur.

All of the little animal furs are popular, and baby leopard carries on with the foxes, dyed squirrels, ferret, fawn and the others.

A faddish trimming is white clipped wool; it has the quality of otter, but is snow white.

The young girl "in the know" refers to her "ensemble," and some of the coats in kasha, charmine, broadcloth or satin are lined with a figured silk or crepe to match the dress.

The last word in extravagance of fashion, and incidentally heralded as the ankle hose. It is a stocking of sheerest chiffon silk, with a single row of rhinestones wound about in serpentine fashion, beginning at the ankle. It is one of those flashy fads, such as the ankle bracelet, that appears from time to time and has popularity, of a sort, though not with women of elegance.

This fancy for over elaborating articles of lingerie is shown in corsets and brassieres made of silk, satin, ribbon or gauze in pale rose and flesh tints, and having a line of rhinestones to finish the top; or in some other fashion to add an artificial note.

Quite fascinating are the latest things in bracelets received from an exclusive Parisian designer. They are fashioned like the flexible and the "love link" bracelets that have been so popular. But they are set in a manner to give them more importance; that is, with semi-precious stones and canoes.

Corals, the old-fashioned Intaglios, like little brooches, are set separately and joined with slender gold links. Finely cut cameos, in white and black, and the two-toned stones, agates and

Straight Lined Beaded Frock Featuring Fringe

Especially youthful in appeal is this charming straight-line beaded frock of peach georgette, which makes a beaded double-fringed overskirt the principal attraction.

Flowers Are Used for Spring and Summer Hats

Trimming appears in plenty on the new millinery for spring and summer. Flowers are especially favored in this model of orchid hennishair and fallie ribbon.

quartz, moonstones, chrysoptase, cat's eyes and innumerable other old-style stones are used in these quaint adornments.

Just as the softer and gentler fabrics associated with the styles for early spring are shown, there are received among the latest novelties the most gorgeous laces and fancy nets in gold and silver.

The latest thing in fans is a superb affair of rose-colored ostrich plumes, one yard long. The feathers are tinted from a rich shade of rose to the palest, and they are uncured, in the natural, not the "willow" form, and are mounted on sticks of beautiful dark tortoise shell.

Flowers as garniture are seen more and more, and now they are used frankly, apparently without any reason 'tween, on plain silk frocks. In a pretty little costume of changeable taffeta, three aprays of silk roses with their silver-crested leaves and flexible stems are added, one at the low line of the bodice on one side, the other diagonally spaced across the front of the skirt.

To Preserve Shoe Leathers

Becawax or mutton suet may be rubbed around boots and shoes in wet weather to keep out the dampness. To preserve kid shoes rub them at night with a little petroleum jelly and polish them in the morning. The same treatment applies to patent leather.

Dinner Dresses Use Lace

Several of the smartest dinner dresses recently seen are made of black lace, with touches of cream or brown lace mounted over flesh-color slips.

Few Are Familiar With Shoes by Common Name

"Ask a customer if she wants oxfords or flats, sandals or pumps, and—simple as it may sound—you'd be surprised how few women can give a definite and helpful answer to the salesman," says a big shoe dealer whose business it is to satisfy scores of perplexed shoppers every day. Shopping after shoes would be a much simpler problem if women took the trouble to familiarize themselves with the different kinds of shoes carried in the shoe department.

Bringing the question straight home to ourselves, did you know, for instance, that oxfords, strictly speaking, are low shoes with three or more eyelets or buttons? And that if they have one or two eyelets they are called "ties"?

A "pump" is a low shoe, with a perfectly plain surface, no fastening of any kind, a thin sole, and, in those for men, a low heel.

Shoes for sports or walking are of the "brogue" type, with low heels and leather or rubber soles. A brogue is a heavy walking shoe, usually on the oxford order, with elaborate perforations, foxing and winged tip.

Bluchers are laced shoes in which the tongue and vamp are in one piece, the quarters extending over the vamp from one-half to one inch.

Colonial pumps are low shoes that have a bare tongue extending out and above the throat of the shoe, and having a buckle across the waist. A "tongue pump" is one that has a small pointed tongue that does not extend much above the throat of the shoe.

"Bis" is an abbreviation of the English term Balmoral, which merely

Semi-Precious Stones Are Used in Bracelets

Surprisingly pretty bracelets are shown in silver and silver gilt, set with semi-precious stones, the Scotch pebbles that imitate so well the real jewels, and with just plain glass. They are dainty in design, due to detail of workmanship and imitate so well the genuine article that the cheap price at which they may be bought is most gratifying.

A bracelet of this type is a slender chain, widening in the middle, where little squares of the metal hold semi-precious stones. Imitation emeralds, amethysts, rubies and the real moonstones, which is very fashionable at the moment, present a variety of these dainty and elegant ornaments.

The Much Abused Tariff

"The protective tariff is about the worst gold brick ever sold to farmers," declared Benjamin C. Marsh, Managing Director of the Farmers' National Council of Washington, D. C., in an address recently before the League for Industrial Democracy.

It is too bad that there is not a better general understanding of the American tariff schedule. Anyone who reads it over can see that practically everything the farmer buys for the operation of his farm is on the free list with no duty charged against it, while the principal things which the farmer raises are protected by reasonable customs duties. In other words, foreign products which the farmer must use, including breeding animals, all kinds of supplies, fertilizers, building materials, oils, farm machinery, etc., are duty-free, while practically everything he raises to sell is protected against unreasonable foreign competition.

The American tariff, whose chief beneficiaries are the American farmer and the American workman, is about the most misunderstood and least understood feature of our government. When it is discussed as a business and not a political issue, it will be removed from the realm of mystery. In the meantime, it saves the American farmer and the American worker from impossible cheap foreign labor competition—The Manufacturer.

Educational Notes

(Mary C. Fitts)

Budget estimate blanks were mailed this week. Do not fail to state on these blanks the amounts needed for the coming year—itemize the equipment, etc., and return to this office at once. Insurance is now a direct charge. J. E. Owens, Budget Auditor will be here April 27.

Owing to the financial crisis no bill will be paid unless the purchase has been previously approved by the County Board of Education.

Richardson, Spindle, and Bethel schools were visited this week.

Mr. and Mrs. L. H. Claunch were business visitors from their ranch in Grant Quivers Wednesday.

Letter Way and a Better Way

THE LETTER WAY was a good way when it was the only way. But the art of letter writing has been lost in the rush of modern business life.

The telephone way—a better way, a more personal way—has taken its place.

More and more, Long Distance is doing the work of the postman and the social and business letters of other decades are being replaced by the social and business telephone calls of today.

The modern business man calls up his family when he is out of town, makes hotel reservations in the next city, insures appointments with his customers and keeps in touch with his business at home—all by Long Distance.

It is the better way—the best way—to meet the needs of communication in business.

One of the advantages of Long Distance service is the station-to-station call. It means calling a number or an address without specifying a particular person. It saves time and money.

To meet the constant demand for more telephones, new plants must be built—at costs much greater than the average of our present plants. To do this we must obtain capital which must be paid adequate returns. Telephone rates are based entirely on the needs of conducting the telephone business—wages for labor, wages for capital, running expenses, depreciation and just enough surplus to protect the service and the investment.

[Station-to-Station Calls] are Quicker and Cost Less

The Heart of the Home

EVERY living-room, to be successful, requires one or more well-defined centers of interest and attraction. It is greatly to be desired that one of these may be a fireplace—not a modern substitute, but a real old-fashioned one with a place away back in it for logs—a fireside where popping corn will accompany merriment; where dreams will burn more brightly than the flames; the only place where ghost stories may be told in the wee, small hours with safety. In a room where the hearth is the chief center, the furniture may be grouped in various ways around it, the main thing to avoid being an arrangement which will give a too formal, unfriendly look. If the woodwork of the room is ivory, ivory enameled window seats on either side of the fireplace with small paneled windows above them form a practical and charming fireside group. Almost any kind or period of furniture will fit into a room of this kind, the essential features to consider in the purchase of the furniture being comfort and finish. Whether a table, a chair or a highboy is walnut, oak or mahogany does not matter so much as whether the articles are well finished so that the wood itself is protected from wear and tear by the application of certain finishes which the manufacturers of good furniture know how to give.

Lincoln School Notes

(Sept. M. I. Hunt)

It was exceedingly unfortunate that April 1st and monthly examination day coincided last week. Standings for the month are determined by averaging daily work with monthly tests.

Those absent lost the opportunity to take the tests. Whether that will be allowed them at the end of the year will depend entirely on the effort of the individual. The following named pupils responded to the call of the bell for work April first: Twelfth Grade; Emilia Salazar, Frances Salazar, Eleventh Grade; Pearl Purcella, Ninth Grade; Edward Penfield, Herbert Traylor, 8th Grade; Esther Dow, Sara Salazar, Sixth Grade; Fronie Hulbert, Emma McCherney, Teresita Salas, Juanita Salas, Esfella Trujillo, Amelia Vigil, Fifth Grade; Eva Fritz, Rafaelita Salazar. Practically all pupils below 5th grade were present. All pupils were present April 2nd. Before beginning the day's program, attention was called to the defection of the previous day, the loss to the pupils, the diminished regard which the public would have of the value of education when so lightly prized by those for whom it is provided, and the failure of the older students to appreciate their responsibility in making the work of the school effective. It was shown that of the four forces which must cooperate to make a strong educational institution, the school authorities, the community, the teachers and the pupils, the last named had collapsed under temptation. The statement frequently made and never disproven that a high school education makes the individual twenty three times as valuable as one with only a common school education, and eighty seven times as valuable as one with no education was quoted, and the conclusion drawn that with added opportunity comes added responsibility. Then came the finest demonstration of proper spirit, correct and ready thinking and clear expression in extemporaneous speaking that the writer has ever observed in high school. A junior asked if he might speak for two minutes. He was given five and he came before the school, said he was one of those who absented themselves, regretted it, the criticism on their conduct was just and deserved, and felt that he expressed the sentiments of all who were with him that it would not be repeated and all would accept very cheerfully any penalty that the authorities saw fit to inflict. Further he wanted to commend those who had the courage and the good sense to heed the call of the bell, and in future years they would have the company of all their classmates in obeying the call of duty.

Mr. Stuart and the Athletic teams are putting forth every effort to have their play ready on scheduled time April 17th.

Capitan School Notes

(Superintendent F. S. Copeland)

A large number of pupils and townspeople attended the ball game at Fort Stanton Monday between the Rowell Military Institute and that team. The game was an exceptionally good one for the second of the season. The Stanton team won by five to four.

The eighth grade are busily engaged in preparing for the state examinations next week. Electricity and Magnetism have been claiming the attention of the general science class for the last two weeks.

Some of the grade rooms enjoyed a hike and picnic last Friday afternoon.

The school election passed off ostensibly without any friction and it is hoped that this is one in which there will be no demurrers, manumissions, ooster proceedings and so forth.

Here's Getting Oil Easily
A pick, shovel, a windlass, and a bucket are the only implements needed to dig for oil in a western field where oil-bearing sand are a few feet below the surface, making high derricks and elaborate drilling machinery unnecessary. A small pump, constructed of timbers, brings the "black gold" to the top when the well has been dug. In some parts of the field, after the hole has been hit for a few days, it becomes partly filled with oil that seeps in from the surrounding strata. Popular Mechanics.

Soothes Steel From Head
Suffering from a continual headache and approaching blindness, the cause of which physicians were unable to determine, Harry M. Hutchinson, an electrician of Philadelphia, this week emerged from his nasal tubes an inch and a half piece of one-fourth inch steel drill, with which he had been stabbed 12 years ago. Hutchinson said he had been stabbed through the bridge of the nose with a drill in a fight with a fellow workman, but did not know the point of the drill had been broken.

STATE OF NEW MEXICO
State Corporation Commission
Certificate of Filing
United States of America)
State of New Mexico)
IT IS HEREBY CERTIFIED, that there was filed for record in the office of the State Corporation Commission of the State of New Mexico, on the twenty-third day of March, A. D., 1925, at 11:25 A. M., by the Kelley & Company, Inc. (No Stockholders' Liability) a corporation organized under the laws of New Mexico, a duly executed consent in writing that said corporation be dissolved; and that this Commission being satisfied that all of the requirements of Section 919, New Mexico Statutes Annotated, Codification of 1915, relating to the voluntary dissolution of corporations have been duly complied with:
NOW, THEREFORE, upon the filing with this Commission of an affidavit showing that this certificate has been published as required by law, the said corporation shall be dissolved.
The principal office of the said corporation in this state is at Carrizozo, N. M., and the name of the agent in charge thereof, and upon whom service may be made is F. E. Hedrick. (No. 11891)
IN TESTIMONY WHEREOF, the State Corporation Commission of the State of New Mexico has caused this certificate to be signed by its Chairman and the seal of said Commission to be affixed at the City of Santa Fe on this 27th day of March, A. D., 1925.
S. Montoya, Chairman.
Filed Back, Clerk.

SHERIFF'S SALE
By virtue of an execution issued out of the District Court for the County of Lincoln, State of New Mexico, in the suit of Paul Mayer against J. F. Thompson and D. L. Spaid, duly attested the 7th day of March, 1925, I have levied on the following described personal property, to wit:
One comparatively new Row Binder, for use in binding, cutting cane, corn stalks, and all other agricultural crops planted and cultivated in rows; together with all tools and appurtenances belonging to said Binder. All of which said personal property is claimed and owned by the said judgment debtor, J. F. Thompson.
Notice is hereby given, that on Tuesday, the 21st day of April, 1925, at the hour of 2 o'clock p. m., of that day and not later than the setting of the sun, and at the front of the ranch dwelling-house situated upon the Thompson ranch about two miles northeast of the town of Ancho, Lincoln County, New Mexico, I will expose to the view of bidders and sell at public auction the above described personal property to the highest bidder for cash.
There will be due plaintiff Paul Mayer on the said day of sale, the principal sum of \$145.52 damages, cost of suit, together with interest thereon at the rate of 10 per cent per annum from September 24th, 1922, also the costs of sale including the cost of this advertisement.
Dated March 26th, 1925.
S. W. KELSEY, Sheriff.
March 27-April 17.

Easter in Jerusalem

Jaffa Gate, Jerusalem International

WHEN the clang of the church-bells breaks over the roofs of Jerusalem at this time of year, Christians, Moslems and Jews have laid aside their tools and thrown themselves into a frenzy of devotion. It is an annual release of the entire community, writes Clair Price in the New York Times, telling of Easter in Jerusalem, such as you and I know, nothing of. Somewhere in the centuries during which our ancestors were moving westward from the Middle East we have lost the gift of it and we have never recaptured it. Yet we are, all of us, gentle and Jew alike, home-comers when we alight today at the little railroad station on the Bethlehem road, which bears the twin names of "El Kud's" in Arabic script and "Jerusalem" in English.

As modern cities go, the physical Jerusalem is small. The population is about 50,000, of whom possibly a third live within the walls. The physical Jerusalem is a tiny stone relic of a town, the most revered relic of three great faiths. It has more physical riches per capita than any other city on earth. It is surrounded by great modern German, Russian, French, Italian and British properties, strong fortress-structures erected on glorious major domo.

Within the walls it is divided into Christian, Armenian, Jewish and Moslem quarters. At this time of the year each quarter observes one of the greatest events on its calendar—the Christian and Armenian quarters their Easter week, the Jewish quarter its Passover, and the Moslem quarter its fasting at the Tomb of Moses, 20 miles east on the stifling shores of the Dead sea.

Before the war the old Ottoman government at Constantinople was accustomed to transfer its Jaffa garrison to Jerusalem to maintain order during the three festivals, and the British today, after having similarly drawn in their forces toward Jerusalem, find the period of the three festivals one of anxious days and sleepless nights.

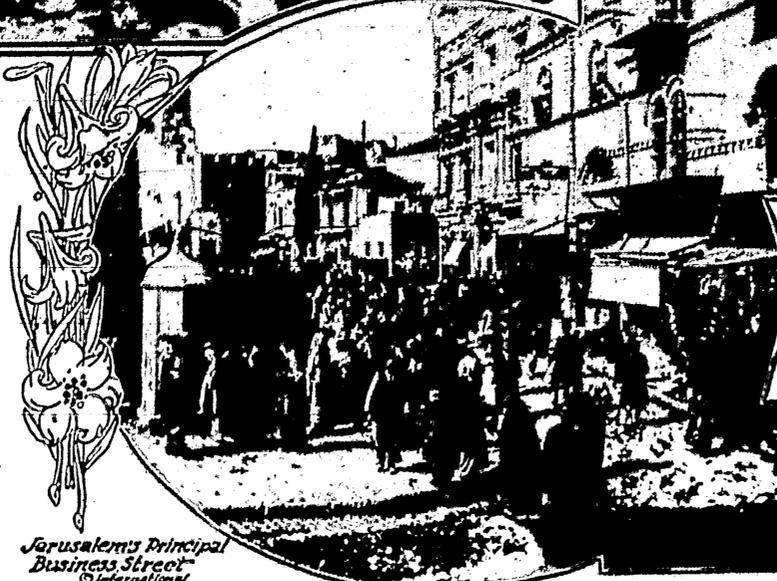

The Passover of the Jews is kept in Jerusalem just as it is kept in American cities. Among the few Samaritans who are left in the world, however, it is kept with differences. There are only about 150 of them, and they are concentrated in their own quarter of Nablus, north of Jerusalem. They observe their Passover week encamped in tents on the summit of Mount Gerizim.

Easter week at the Church of the Holy Sepulcher is observed with less simplicity, for six Christian communities possess rights in the church and each has its own program of observances throughout the week. The orthodox community has 8,000 communicants, the Roman Catholic community 6,000, the Armenians 1,500, the Copts 150, the Syrians 100 and the Abyssinians 50. Two of us whose more immediate ancestry is Protestant have no specified rights in the labyrinth of churches, chapels and monasteries which together make up the Church of the Holy Sepulcher. The rights which each community enjoys in the church are closely defined by centuries of precedent and are embodied in firmans granted for centuries by successive sultans at Constantinople.

As for the Moslem pilgrimage to the Tomb of Moses, its participants come into Jerusalem on the Tuesday before the Christians' Easter week and begin and leave on the following day, marching with banners and bands of music down the Jericho road toward the stark wilderness about the Dead sea. A mile from these hot salt shores lies the fabled Tomb of Moses, one of that line of prophets, including Adam, Noah, Abraham and Jesus, of whom Islam holds Mohammed to be the last. It seems to be generally established that the tomb is not authentic and it is not impossible that Baladin, to whom it was revealed in a vision, was moved by the desirability of mobilizing a Moslem force near Jerusalem during the Christians' Easter in order to prevent the Christians from encroaching on the Haram-ash-Sherif. (The term "haram" in Islam corresponds to "cathedral" among Christians, and the great Haram-ash-Sherif at Jerusalem is, after the Haram at Mecca, the most venerated shrine in Islam.) The tomb is owned by the powerful Hussein family of Jerusalem, which numbers among its members the mayor, the grand mufti or head of the Moslem community, and the head of the anti-Zionist organization.

With 5,000 Moslem pilgrims fasting at the Tomb of Moses, some 25 miles away, Easter week begins at the Church of the Holy Sepulcher. I left the hotel shortly before 8 o'clock on the morning of Monday Thursday. The church is announced, as one hears it, by a transformation in the banners which line the cobbled streets. Oriental women give place to rosettes, crosses, pictures, icons and candles. At length, a gateway opens in an ancient wall and a flight of cobbled steps brings one down to the number overshadowed square which is the forecourt of the church.

Every inch of the small court was crowded. Windows and ledges which looked down upon the scene were jammed with onlookers. Ladders leaning up against the ancient walls were being used to perch still more onlookers to points of vantage. Roads were perilously crowded, and on the high-

Jerusalem's Principal Business Street International

est roof of all a group of Greeks sat with their feet overhanging a 72-foot drop, their leader standing at the edge whirling a pair of broadswords whose blades whirred past the ears of those who sat about his feet. The figure of their sword-wielding leader and the sound of their heavy chant dominated the scene.

Down below in the center of the crowded forecourt was a wooden stand with 12 seats, and a small pulpit had been affixed to the wall before it, overhung with an icon and a branch of olive. Twelve archimandrites, walking two by two, in robes of red and gold brocade, were leaping from the doors of the church. As they filed slowly through the human lane which led to the wooden stand, the Patriarch Damianos followed them from the church, clad in gleaming white brocade and silver; his long beard was snowy white, the sun glinted on the diamond-encrusted cross on his breast. With the church bells clanging their wild jubilee, the archimandrites ascended the stand. At the steps the patriarch paused. His outer robe of white and the jeweled insignia of his office were removed. A fough towel was tied about his waist, another was thrown over his shoulder and a cover and basin of embossed silver and gold were given him.

The crowded court was now silent. Even the bells had ceased their jubilation. In the role of the Twelve Apostles, each man bared one foot, and the patriarch, ascending the stand, re-acted the scene in the upper room. They carried out the Bible story literally even to the reluctance of St. Peter, whose role was played by the Russian archimandrite. The little play was no sooner over than the wild clangor of the bells possessed the scene again, the sword-winger on the roof above led his fellow-pilgrims in a frenzy of excited devotion, and the patriarch, having resumed his heavy splendor, descended from the stand and walked slowly back into the church, the crowds breaking through the line of gendarmes, driven by all the strength of their long-repressed emotion into frantic efforts to approach him, to touch the hem of his gorgeous raiment.

Toward noon I went over to St. Stephen's gate, through which the Jericho road enters Jerusalem, to see the Moslem pilgrims return to the Haram-ash-Sherif from the Tomb of Moses. The wall on both sides of the gate, was rimmed at the top with heads, all of them looking off to where the white undulating Jericho road dipped from sight to the south across the Kidron valley. The rubbish heap which lies to your left as you go out of the gate was rimmed with seated, many-colored figures. A field of yellow-green barley dropped sharply at one's feet and the Jericho road far below was a human lane. Files of orphans in blue and soldiers in British khaki moved like toy figures along the white road to meet the returning pilgrims. A British airplane seemed low and, lifting, trailed its shadow swiftly up Gethsemane and the Mount of Olives.

The crash of a gun outside the gate was followed by a long chattering echo against the Mount of Olives. Others followed until a salute of 11 guns had reached out to greet the incoming pilgrims. A Hebrew mounted gendarme stepped in front of us, faced his horse about, lit a cigarette and waited. The music slowly crescendoed and approached slowly, very slowly. We stood on our chairs as the head of the procession stopped before us, amid the rhythmic thud of Turkish drums and the deafening clang of cymbals. A double line of small pupils in green, bowing heads down and about the Arab fatherland. At the end of every verse they lifted their hands.

Moslem gendarmes leaped from beneath the gate, faced their horses about and waited. More drums and cymbals were approaching. A tinkery-headed old man, clad like Abraham, leaped

slowly from under the arch of the gate. He was the sheik of Hebron; 6,000 men, Hussein Effendi whispered, were in his family; 6,000 men, what you say, like one. After him came more mounted gendarmes, a cluster of green and yellow banners bearing Arabic names and surmounted with brass crescents. A rough circle of chanting men stopped before us and lifted their voices in a long acclamation of the Arab army, every line of which ended with the thrusting high of naked scimitars and walking sticks. Hussein Effendi, in his European clothes, leaped from his chair into the center of them, gave them a vive la for l'armee Arabe and another and another and another, until the perspiration dripped from his forehead and the veins stood out on his neck and the naked scimitars and walking sticks leaped into the air again and again and again. So religion in Jerusalem slips across the shadowy line which divides it from politics.

It took an hour for the rest of the pilgrims to pass us and we finally followed the file and drum corps of the Manchester regiment, which marked their end, to the gate of the Haram-ash-Sherif. Those who know Jerusalem far better than I know it agree that in point of outward physical beauty the city contains nothing which compares, in the spacious majesty of its setting, with the great Haram-ash-Sherif. It consists of one of those great open spaces in which Islam loves to implant its shrines, of the exquisite Dome of the Rock in the center of the area, of the Mosque el-Aksa along its further side, and of minor bits, pulpits, fountains, cypresses, which stand at irregular intervals throughout the rest of the area without marring the effect of space.

By 10 o'clock in the morning, the floor of the rotunda of the church was crowded with the Christians of the Orient. Above, the little galleries on the walls of the rotunda were crowded with foreigners. The din down on the floor was continual. It was not the hum of many voices, but a roughly rhythmic chanting into which the voices involuntarily resolved themselves, an ocean of sound which broke on one's ears—in a heavily stressed measure—La la la, La la La La La.

The tension was now at its height. I remember an anxious vice-consul who had witnessed the scene many times before whispering at my elbow, "Anything can happen in the next five minutes." With a gesture of savage exultance the priest drew from the hole in the side of the sepulcher a flaming torch and, turning, dashed through the opened lane and disappeared out the door, where swift runners were waiting outside to carry the Holy Fire to Bethlehem, Jericho, Nablus and other towns of Palestine. Before the war it was carried also to Jaffa, where ships were waiting to hurry it to Odessa, whence it was used to kindle candles throughout Holy Russia.

One of the two men in white now stood before the hole in the sepulcher lifting a second flaming torch. Toward him the frenzied crowd surged, stretching out their candles to light them at the Holy Fire. Candles by candle jets of flame rushed through the rotunda until the sea of heads was alive with dots of flickering yellow and the air that lay above was heavy with thin blue fallow smoke. Candles were lifted to the balconies by ropes and the heavy lamps above were set flickering with yellow light. The great tall rotunda was set as a park.

The gendarmes gathered closely around as the patriarch staggered out of the sepulcher clutching flaming tapers, and was half carried, struggling and swaying, through the nave of the orthodox cathedral up to the safety of the High Altar. The rotunda was filled with shouting, with the noise of some against a background of dark stone. All that day little groups of eastern Christians stood talking in the streets with burning candles.

Daddy's Evening Fairy Tale

By Mary Graham Bonner

THE FARM'S SPRINGTIME

When everyone was fast asleep in the farm house and on the farm, Miss-tress Springtime waved her spring-times greetings over them all so that when they got up the next morning they all felt that spring was in the air.

On Their Way to School.

"Neigh, neigh!" said the good old horse, "Spring is in the air. I feel it. I must be ready to plow the fields now.

"There is lots that must be done now that the spring has come and I really do feel its gentle influence in the air.

"Somehow it feels like spring today," said the farmer. "I must start my planting."

"I've got lots of ideas for my garden this year," said the farmer's wife. "You know it does feel just like spring today."

The children gathered little blossoms on their way to school and as the soft spring air came in the school windows they found it hard to think of anything else but the woods, and flowers that might be out, and birds that might have arrived for the summer, and walks that would be so lovely, and games to be played out-of-doors now that it seemed so pleasant.

"Spring has come, grunt, grunt," said Grandfather Porky Pig. "I have a good spring appetite."

"So have I, squeal, squeal," said Master Pink Pig.

"I'd enjoy a good meal now," said Porky Pig. "Really the spring is giving me an appetite."

"I'd like a bite myself," said Mrs. Pinky Pig.

"So would I," said Pinky Pig's mother.

"Spring certainly is in the air. I hadn't any appetite for quite a while and now I feel my old self again," said Miss Ham.

"Squeal, squeal, no one could have noticed your lack of appetite, Miss Ham, but they could have noticed mine, squeal, squeal," said Brother Bacon.

"But I think I could eat again now."

"I have a springtime appetite," said Sammy Sausage. "Squeal, squeal, I most certainly have."

"So have I, grunt, grunt," said little Grunter.

"I could eat a morsel of food, too, squeal, squeal," said little Black Squealer.

"Ah, for a nice rest in the mud and a good banquet," said Sir Percival Pork.

"Not a bad idea, not a bad idea," said Sir Benjamin Bacon.

"Cock-a-doodle-do, a pleasant day," said Red Top the Rooster.

"Cackle, cackle," said Mrs. Hen. "A pleasant day indeed, Red Top."

"Quack, quack," said Mrs. Duck. "I feel just like a brook party. I do believe I'll give one."

All the ducks waddled after Mrs. Duck, who led the way down to the pond.

"Ba-a-a-a," said Sir William Goat, otherwise known as Billy Goat. "I must have a walk around the barnyard and see what there is to eat. A walk will help my appetite and make it something of which I may be justly proud."

"Baa, baa, baa," said the little lambs, "we love to play this lovely day."

"Meow-meow," said Jota, the cat. "I must have a nice sleep in the sunshine. It will do me good. Then a cupful of warm milk and all will be well."

"Gobble, gobble," said the turkeys, "the little turkeys are becoming stronger every one of these fine spring days."

"Gobbie, gobbie, they're 'ud 'enjoy a Good Meal Now."

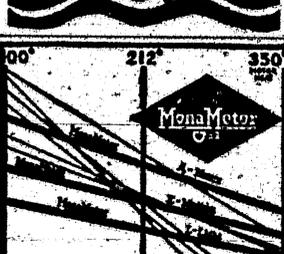

"So, everything and everyone on the farm felt that Springtime had visited them, for though they didn't actually know of her visit to them the night before, they all said that spring was certainly in the air.

PART THREE—Continued.

"My brain has gone round and round like a whirlpool for months! I don't know what I think!"

"Well, think this," he said gently: "Marriage laws and forms vary with every creed, and in every country, to suit temperament and environment. And everywhere, certain conventions are necessary. For God's sake, don't imagine I'm an advocate of loose morality! But you and I are cast off from all rules save those of our own making. Have you considered that? These natives—of Indiana, Turkey, Christians—all have some ideal which they embody in certain marriage rites and laws."

"She hangs upon his words, clasping tightly the hands holding her own. 'Yes?' she breathed, when he paused. 'Well—we are adrift from every one which applies to us. We can't obey them in the letter. We only have them in our hearts.'"

"You mean," she whispered, "you think it would be right to form our own—marriage rites?"

"I do. Before God, Barbara, I do. To me, our wedding would be as sacred and lawful here, with the sea for music, the birds for witness, as in a crowded church. I want you always to remember that."

"The waves echoed faintly upon the shore; the wind stirred the palm leaves in their enclosures; otherwise the whole world seemed waiting, in a stillness like death, for her reply."

"I believe you, Alan," she murmured at last. "I had not thought of it at all in this light. It would be the same to me, in my heart. But—should we be, right? Suppose—afterward—we were rescued?"

"Well? Then we should at once obey the letter. Here we can obey the spirit. But isn't that the greater? In the world it is the reverse, often. The spirit is violated."

"Suppose," she began again, with a shudder, "only one of us were rescued?"

"Don't conjure up imaginary horrors." She drew away, looking around the bay with the same pathetic helplessness that had struck him so poignantly on Christmas eve.

"Oh!" she muttered, "it is a terrible problem! If only there were somebody outside it all, to help! I am so afraid our very love may guide us—wrongly."

"No," he said quickly. "It won't, because it is love—not that other word beginning with the same letter. Besides, it is the motive of the heart which counts, in all problems."

She turned away, covering her face with her hands. "What can we do? What can we do?" The words came brokenly, pathetically, to the other outcast from all laws. He was conscious tonight, more than ever before, of their growing, dominant need of each other. Had he striven in his old arrogance she would not, he knew, have resisted his appeal. But the great keynote was tuning his nature as well as hers. All the chivalry latent in his being rose to his heart, casting out passion. With infinite delicacy he went to her and set his arms about her.

"We are down among the deep chords together, now," he whispered. "But together—always together."

With a choking cry she turned and flung herself upon his breast, clinging to him, the only bulwark of her life.

"I can't decide yet. Oh! I can't—decide; I can't decide— And she burst into a passion of tears."

III

The man, with the divine instinct of understanding now awakened, realized acutely all that the girl was suffering. He held her quivering form close, saying nothing. There was nothing he could say. Her own soul must now fight out this battle between the old instincts of a lifetime and those of a world beyond reach of civilized rule.

Presently, when she grew calmer, he lifted her bodily and carried her into the hut. He placed her upon her bed; then knelt for a moment, and laid his cheek to hers.

"The decision lies in your hands," he whispered. "Come and tell me when you know."

Then he rose to his feet, lingering beside her for a time, a world of almost maternal tenderness in his steady regard. But she made no reply. With a little gesture of helplessness, he turned, and walked back to the lagoon.

Crest, in old days, could not have been called a strongly sexed man. All the vitality of his nature went into other channels. Now, when, for the first time, passion had come to him, it found him bereft of all those other outlets to his abundant energy. It shook him with force intensity. In the past, his whole concentration, every ounce of brain and strength, had been given to his work and his avocations. Now the same splendid force, welling up and overflowing, was concentrated upon woman—a channel half closed against him. Being half closed caused more torture than if it had been entirely shut and barred.

Fate—God—whatever the Unseen Power was called—had buried them, man and woman, together in this isolation. Why, by all that was sacred,

should they resist the law underlying His creation? Must His primal laws be set aside because those made by man, now mere chimeras, were absent? It was absurd, quixotic, unnecessary.

But beneath the velvet glove of nature lies the iron hand; behind her smiling face sits grim severity. These, more than any scruples, caused him to pause. He who had ever scorned obstacles, now faced them appalled. He who had never known fear, was now afraid.

He who had ever seized what he desired, now stood aside and waited. Barbara must decide. To that, amid the turmoil of his spirit, he clung. There must never be coercion; she was no weakling. Not until she saw the path clear before her would she move an inch; that he knew well.

No sign came from the hut. Within its darkness, inert head buried in her outstretched arms, lay the arbiter of his fate and her own. In a great and awful loneliness of soul, such as she had never imagined possible, she faced the greatest question woman can be called upon to answer. The mountains were quite close now; but she approached them without shrinking, only desirous of finding the right path across to her Beloved. She did not blind herself. She had contemplated marriage before, aware of all it meant to a woman in civilization. Now she contemplated it shorn of all but nature's own sublimely terrible forces; contemplated the years ahead, with the possibility of other lives besides their own. . . . Reverberations! Truly, when one irrevocable chord is struck, the reverberations roll on and on, echoing all around, so that God's whole Harmony may be marred or perfected. Can one always tell which it will be?

Both met next day, heavy-eyed from a sleepless night, but each tacitly forborne to allude to the fact. They spoke

quietly. When he returned, she had sunk upon the rock he had vacated. With eyes tragic in their intentness, she watched him approach. He came close to her. With one of his old swift movements he raised her chin with his hand, so that she met the penetration of his gaze.

"Barbara!" he muttered, "this will drive us mad. We are human, not gods."

She drew away, hiding her face in her hand. The very touch of his fingers sent an electric current racing through her veins. To continue like this was becoming daily more impossible.

Presently she rose, not daring to speak, and turned from him into the hut.

Blindly, bewildered, Barbara groped her way, step by step, through a maze of uncertainty. The day with the native children had been a revelation. Never before had she realized the passion of longing which possessed her. . . . And by her own self-revelation she judged the suffering of the man waiting for her decision. The claims of another's need grew insistent, dominating. . . . More and more did the life of previous years seem pale and unreal. . . . The fears for the future, the burden of its responsibilities, grew fainter, assumed new aspects.

There came a night when Alan, after being away all day returned moody, irritable, impatient of all the trivial subjects with which she endeavored to make conversation.

"Have you been working in the plantation?" she asked, after several unsuccessful attempts during supper.

"No."

He ate a banana, and throw away the skin. "What's the good of it all?" he asked impatiently. "It will lead nowhere."

"It's occupation," she faltered. "Occupation? Yes. Occupation for the sake of occupation! Is that all life is to be with? My G—d! What an outlook!"

"This was another of Barbara's fears. How long would the limited interests of the island, shorn of a deeper outlet, suffice for a man of his temperament?"

"You are doing a lot of good among the natives," she suggested, feeble though she knew the remark to be.

"Good?" He gave an impatient laugh. "Lord! Don't credit me with the instincts of a missionary! That's only 'occupation.' One hour, if we left this place, and they would forget it all!"

This bitterness, this dreary desolation of voice and mien, so unlike the old Alan of indomitable resource and optimism, cut Barbara to the heart. For she understood.

"Alan! Alan!" she cried, stretching out a hand. But he shook his head. "No. I can't—I-daren't. I'm only fit for the devil tonight."

She rose, her lips trembling, and went toward him.

"Don't! Alan, don't shut me out! I—understand!"

"Understand? You can't, or—? Suddenly he seized her, almost viciously, dragging her up against him. With shaking hands he pressed back her head, and laid his hot lips upon her neck.

"I—Y!—force you to give in—one day—" he muttered thickly. He did not struggle; but she trembled violently in his grasp. For a long moment his eyes burned into hers. But, among the answering passion they saw there, lay the purity which was the very essence of her being.

As abruptly as he had seized her, he let her go again.

"I—I told you I was only fit for the devil tonight," he said hoarsely. "Let me be. . . . For God's sake, let me be."

She turned, quivering in every limb, and ran into the hut.

For hours she lay, dead and blind to all around, alone with her God. . . .

knowing no other. . . . The conventions of previous years seemed very remote now, very unreal. . . . His point of view was, surely, more common sense. . . . As the day wore on, she fell more and more silent, a terrible aching hunger in her heart.

Must their two natures age here in barren purposelessness? Never he fulfilled? Why? Because far-off rules of society, which could not reach them, would be broken? How trivial such things seemed here, where the world was still in its beginning.

In the evening, the tiny girl, tired after excitement of the day, grew sleepy and fretful. Alan stopped an uproarious game, sat down upon a rock, and lifted her in his arms. She lay there contentedly, her little black head nestled in his shoulder.

A pain that, in its poignancy, was almost physical, gripped Barbara's heart. Great tears welled up suddenly and ran down her cheeks. Moved by an irresistible impulse she darted forward and snatched the child from him. "No, no, no! I can't bear—that! Let them go home. . . . It is time they went home. . . ."

For a moment he gazed at her, bereft, of speech. Then he rose, and called Laalo.

"I will take them home," he said quietly.

When he returned, she had sunk upon the rock he had vacated. With eyes tragic in their intentness, she watched him approach. He came close to her. With one of his old swift movements he raised her chin with his hand, so that she met the penetration of his gaze.

"Barbara!" he muttered, "this will drive us mad. We are human, not gods."

She drew away, hiding her face in her hand. The very touch of his fingers sent an electric current racing through her veins. To continue like this was becoming daily more impossible.

Presently she rose, not daring to speak, and turned from him into the hut.

Blindly, bewildered, Barbara groped her way, step by step, through a maze of uncertainty. The day with the native children had been a revelation. Never before had she realized the passion of longing which possessed her. . . . And by her own self-revelation she judged the suffering of the man waiting for her decision. The claims of another's need grew insistent, dominating. . . . More and more did the life of previous years seem pale and unreal. . . . The fears for the future, the burden of its responsibilities, grew fainter, assumed new aspects.

There came a night when Alan, after being away all day returned moody, irritable, impatient of all the trivial subjects with which she endeavored to make conversation.

"Have you been working in the plantation?" she asked, after several unsuccessful attempts during supper.

"No."

He ate a banana, and throw away the skin. "What's the good of it all?" he asked impatiently. "It will lead nowhere."

"It's occupation," she faltered. "Occupation? Yes. Occupation for the sake of occupation! Is that all life is to be with? My G—d! What an outlook!"

"This was another of Barbara's fears. How long would the limited interests of the island, shorn of a deeper outlet, suffice for a man of his temperament?"

"You are doing a lot of good among the natives," she suggested, feeble though she knew the remark to be.

"Good?" He gave an impatient laugh. "Lord! Don't credit me with the instincts of a missionary! That's only 'occupation.' One hour, if we left this place, and they would forget it all!"

This bitterness, this dreary desolation of voice and mien, so unlike the old Alan of indomitable resource and optimism, cut Barbara to the heart. For she understood.

"Alan! Alan!" she cried, stretching out a hand. But he shook his head. "No. I can't—I-daren't. I'm only fit for the devil tonight."

She rose, her lips trembling, and went toward him.

"Don't! Alan, don't shut me out! I—understand!"

"Understand? You can't, or—? Suddenly he seized her, almost viciously, dragging her up against him. With shaking hands he pressed back her head, and laid his hot lips upon her neck.

"I—Y!—force you to give in—one day—" he muttered thickly. He did not struggle; but she trembled violently in his grasp. For a long moment his eyes burned into hers. But, among the answering passion they saw there, lay the purity which was the very essence of her being.

As abruptly as he had seized her, he let her go again.

"I—I told you I was only fit for the devil tonight," he said hoarsely. "Let me be. . . . For God's sake, let me be."

She turned, quivering in every limb, and ran into the hut.

For hours she lay, dead and blind to all around, alone with her God. . . .

And gradually a great peace stole over her spirit. Imperceptibly, the last mountain rolled slowly away. As one tired out after long, victorious warfare, she lay, motionless, the moonlight falling through the little window upon her white-robed figure.

After a time she rose and looked once more upon the waves she loved so well, a wondrous shining in her eyes. And all the perfumed beauty of the night bled in the tender, passionate craving to be with him who, also, had striven, and suffered, and conquered.

Slipping on her old Japanese wrapper, she passed noiselessly out of her room. He had, she knew, not gone in to bed.

Moved by some instinct, she turned, stumbling over the rough ground, and ascended the eastern slopes, where they had watched the dawn on that Christmas day nearly a year ago.

IV

A group of rough bowlers, moss-covered, commanded a long view over the eastern shore of the island, while forming a shelter from the wind. The girl approached them; then, at a sudden soft sound, stood still, her heart beating rapidly. Noiselessly rounding them, she discovered the man she sought stretched upon the ground, his head thrown back upon clasped arms, his eyes dreaming far away over the softly outlined scene below.

For a moment she fingered the folds of her thin garment, watching him. Then the wind fluttered one of her lock sleeves; and his gaze flashed back from far distances. Turning his head, he saw the figure standing, motionless, by his side.

She stood perfectly still, her hands pressed upon the garment at her breast; the wind waving her cloudy hair, her lips a little parted, her blue eyes darkly shining in the faint light.

Once—twice—she tried to speak, but the words would not come; she could only envelop him, as it were, in the radiant glory of her face.

Suddenly a great wave of understanding broke over him, rendering him for a moment breathless, blinded, bewildered. . . . Then, instinctively, he raised his arms. With a little unarticulate cry the girl allowed him to take her, trembling in her capitulation, clinging to him, submitting, without resistance, to the storm of passion at last set free. His kisses burned into her soft flesh, his arms crushed her well-nigh breathless; she was carried away by the tide of his ardor, responsive, glowing.

Barbara had crossed her Rubicon for all time.

Presently he sat down upon the rocks, still holding her to him.

"You—came to tell me?" he whispered, his face close to hers, his eyes piercing to her very soul.

"Yes," she whispered back.

After a time she raised herself, still in his arms.

"Alan, I—couldn't tell you before; until I felt convinced that all—was right. You understand; don't you? It was because I loved you so, dear heart, not—fear, or coldness—"

"I understand," he murmured, laying his cheek against hers. "I always understood. It was the beastly brute in me that sometimes seemed not to. . . . When, Barbara?"

Her head fell back upon his breast; with a little throbbing sigh, she renounced her will to his.

"Whenever—you like, Alan."

"At dawn?" he whispered. "It will soon be here. When the sun rises over the water it shall witness our—marriage rites?"

The passion had died out of his voice, and a note almost of awe had crept in. They remained, sometimes silent, sometimes discussing, in low tones, their forthcoming bridal, while the moonlight waned, and the wonderful blue-black of the southern night softened and paled.

Presently Alan lowered the hand he held near his cheek and opened the fingers.

"What can we do about a wedding ring?" he asked.

"Oh! Does that matter?"

"I should like to see you wearing one—of mine. Wait!" he continued, searching in the pockets of his frayed breeches. He displayed a collection of keys, a pocket knife, and a pencil, was pended upon a small tin key ring.

"Will this fit? It's better than nothing."

"It looks about the right size, and will do beautifully. Oh, Alan! how I shall love it!"

He smiled, a world of tenderness in his eyes. "Look," he said. "Dawn is breaking."

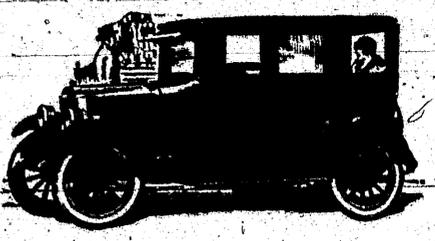

Early birds began to chirp and whistle, away in the forest; the dancing waves turned a steely gray. The wind had dropped, leaving a great silence. It seemed as if nature were holding her breath, waiting for the dawn not far off. . . . When at last the sun's first long shaft of gold quivered across the water, the man rose and set the girl gently upon her feet. The hand in his trembled a little; but she met his eyes bravely, smilingly.

(TO BE CONTINUED.)

Women and Courtship
Man views it as a great jealousy to his prowess at amour to yield up his liberty, his property and his soul to the first woman who, in despair of finding better game, turns her appealing eyes upon him. But if you want to hear a mirthless laugh, just present this masculine theory to a bridegroom at a wedding, particularly after alcohol and crocodile tears have done their disarming work upon her. That is to say, just first to her that the bride harbored no notion of marriage with someone into consequence by the momentary and impetuous bridegroom.—E. L. Mankin, in "The Deeds of Women."

Low-cost Transportation

Star Cars

THE STAR 4-DOOR SEDAN

The incomparable Star chassis, the Million-Dollar Star Motor and the modern roomy and comfortable body of the Star 4-door Sedan offer a total value per dollar of cost that warrants first consideration by all of the millions who seek up-to-date, low-cost transportation.

2292 Star owners report an average cost of 1/4 cent per mile for mechanical repairs and replacements.

2292 owners report an average of 23.8/10 miles per gallon of gas.

2292 owners report an average of 9817 miles per set of tires.

To drive their cars it cost these owners on the average of 2 1/10 cents per mile for gasoline, oil, tires and mechanical repairs and replacements.

This sort of low cost transportation is of vital interest to any man or woman who travels. Ask the nearest Star Car Dealer to give you more detailed facts.

Auto Pound Profitable

Poundmasters did not disappear with the banishment of the horse and wagon in favor of the automobile and truck. In San Antonio, Texas, there is an automobile poundmaster to look after forgotten and abandoned automobiles found on the city streets. In 1924 the pound made a profit of \$2,002 after all expenses were paid, largely through payment made by automobile owners who had parked too long in some restricted streets.

Waterspout Chased Ship

The 147 passengers of the Bermuda liner Port Victoria experienced the thrill of being chased by a waterspout on the trip up the Atlantic recently. The waterspout came within 150 feet of the ship, which was followed by several schools of porpoises which accompanied the vessel for several miles. There were at least 1,000 porpoises around the ship at times. The waterspout was about 250 feet high.

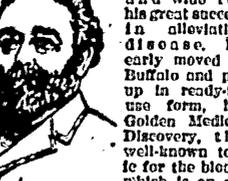

Leaves Ribs Intact
 A new instrument makes it possible for surgeons to perform operations on the surface of the lungs without first removing a section of rib.

Brought up on a Farm

As a young man Dr. Pierce practiced medicine in a rural district and was known far and wide for his great success in alleviating disease. He early moved to Buffalo and put up in ready-to-use form, his Golden Medical Discovery, the well-known tonic for the blood, which is an extract of native roots. This "Discovery" of Dr. Pierce's clears away pimples and annoying eruptions, tends to keep the complexion fresh and clear. It corrects the disordered conditions in a sick stomach, aids digestion, acts as a tonic and enriches the blood. Vlm is sure to follow its use. All dealers. Tablets or liquid.

A calf is a cute little creature—until you try to load it in a wagon.

Sometimes, if a family hasn't a rich relative, it will invent one.

Children Cry for

Fletcher's CASTORIA

MOTHER: Fletcher's Castoria is a pleasant, harmless substitute for Castor Oil, Paragoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher* Extra directions on each package. Physicians everywhere recommend it.

PERSONALS

The school election was held Tuesday, with the result that the candidates on the ticket, Mrs. W. C. Pittman, Messrs. E. M. Brickley and R. E. Lemon were elected. This leaves the board with three ladies and two gentlemen, namely: Mesdames L. A. McCall, W. W. Stadtman, W. C. Pittman; Messrs. Brickley and Lemon.

Mr. and Mrs. A. M. Reily arrived Monday evening by motor from their home in El Paso and will remain here as guests of the Wm. Reily and F. E. Hedrick families until the latter part of the week, until Morgan completes his work as agent for the American Tobacco Co., after which he will continue on his territory on which Mrs. Reily will accompany him.

W. B. Payne was here Wednesday from his claim about forty miles north of Capitan.

Mr. and Mrs. Doyle Rentfrow were over from their ranch across the Malpais Tuesday.

Jack Price of the Sunshine Pharmacy at Capitan was here with his family last Saturday. Jack is now a member of the State Pharmacy Board, having lately received his appointment from the present Governor.

Mr. and Mrs. Fred Burch and children were in from their ranch at the head of the Malpais Monday, returning home in the afternoon.

Mrs. R. R. Sale was an El Paso visitor for a few days this week.

Carrizozo Lodge No. 41, A. F. & A. M., held an interesting and well-attended meeting last Saturday night at Masonic hall. J. A. Brubaker and S. G. Hoover were here from Capitan, Messrs. Wunsch, Anderson and Scotty, from Fort Stanton. There will be several special meetings in the near future for conferring the second and third degrees.

Bert Bonnell was here from Glencoe last Saturday and said that his locality needed moisture as badly as we do, but was hopeful of having rain shortly.

Ready to Take Wings

Haunted by a guilty conscience, Jasper Dugan, 84, of Pawnee, Okla., sent A. J. Peebler of Wichita, Kansas a check for \$70.00 and in a note pinned to the check, he said: "It was I who shot your pig in 1872 and I have always felt that I should pay you. The pig was worth about \$10. and please accept the balance as interest."

Old, but Still in the Ring

Phillip Orm of Bellmore, New Jersey and Anton Knippler of Hammonton, are the two oldest Odd Fellows in the world. Orm is 91 and his friendly rival has reached the modest age of 90. Orm has been a member of the order for sixty-one years while Knippler has been in the same good standing for 60 years. Knippler is a musician and in his young days studied under Professor Luce in Heidelberg, Germany. Both attend all concerts, the movies and are making the best of what they can see and seem to enjoy pleasures equal to the young.

Cancer Cannot Be Cured
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Can- cers in a blood or constitutional disease, and in order to cure it you must take internal remedies. **HALL'S CATARRH CURE** is a safe, internal, and sure remedy, using the blood and mucous surfaces. **HALL'S CATARRH CURE** is not a cancer medicine. It was prescribed by the best medical authorities in this country for years and is a cancer prevention. It is compared to the best cancer known, a cancer which has been cured by the use of this medicine. **HALL'S CATARRH CURE** is a safe, internal, and sure remedy, using the blood and mucous surfaces. **HALL'S CATARRH CURE** is not a cancer medicine. 'Out Where the Dust Begins'

(By 'Bill Hilly')

Talkin' 'bout dogs, I seen by th' eastern papers, that a dog has lately bin brought over from France named "Hooch" and they say wares shoes t' keep his sweet little feet from gettin' wet. I wish they would bring 'im t' New Mexico, for here, he would need no shoes t' keep his feet from getting wet, 'cause we aint got enough moisture in this part of th' state t' wet them. And it would tickle us t' see him lined up alongside of one of our brindle, old fashioned tumbledweed dogs, that aint had a meal in two weeks, and carries enuf ticks and sandfleas t' fill a Ford truck—he would soon be a real dog.

I seen by another paper that blew in on the wings of a sandstorm, that a certain Justice of Peace in Oregon was arrested on a charge of moonshinin' and when his house was searched, a life size still was found and enuf good corn whiskey t' keep a regiment of soldiers in good humor for a month. When they arrest'd him, his wife broak a 10 gallon jug of the preshus liquid over the sheriff's head. Now wh't do yew think of that?

I seen by another paper that I found stuck t' a rumbleweed, that a feller in the east wants t' marry a Indian maid out here. I guess he has her pictured out as he seen her in th' movies, but th' Indian maid in "fact," he wou'd find with a skillet in 1 hand, a jack rabbit in t' other, and a cobe pipe in her mouth.

The Value of Cottonseed Hulls for Cattle Feeding

The value of cottonseed hulls as compared with cottonseed cake or meal and whole cottonseed as a feed for cattle, is a matter of considerable interest to farmers, says J. Lantow of the New Mexico Agricultural College. When cottonseed is hulled, the kernels crushed and the oil pressed out, the remainder is known as cottonseed cake. This cake is usually in the size of a pea or a walnut. If it is ground fine it is known as meal. Cottonseed cake is high in protein because the fiber and oil have been removed to a large extent. It is generally conceded that 1 75 pounds of whole seed are equal to one pound of cake in a feeding ration. Consequently, the prices should vary accordingly.

The hulls are high in fiber and do not have nearly as high feeding value as some of our hays. Experiments show that hulls and corn stover are about equal in value, but rate less as a feed than our sorghum hays, such as cane hay. Hulls may be used profitably only when the relative prices justify using them.—Santa Fe New Mexican.

for sale at the
Outlook Art & Gift Shop

The bazaar and baked sale given by the Ladies' Aid Society last Saturday afternoon, was a decided success. At the hour of 4 o'clock, everything on the bazaar counters was sold, the baked goods having gone at an hour earlier.

Mrs. Albert Ziegler left Tuesday evening for an extended visit with her daughters. She will spend six weeks with Mrs. John Gutknecht at Chicago a t' e r which she will go, to Seattle to visit for a like portion of time with her other daughter, Mrs. Charles Coplin. Mrs. Ziegler expects to return about June 1st.

Major J. H. Warner, wife, children, Mrs. T. B. H. Anderson and daughter, Virginia, were visitors from Fort Stanton on Monday.

Mr. and Mrs. Chas. Thornton and Judge Seth F. Crews of Oacuro were Carrizozo visitors this week.

P. G. Peters of Capitan was a business visitor Tuesday.

Judge Norton of Jicarilla spent several days here this week, attending "Rosita" at the local theatre on Tuesday night.

Mesdames J. M. Beck and F. A. English spent the week-end in El Paso.

The Misses Katherine Taulbee and Pawnee McCall, nurses from the Fort, were visitors here Tuesday.

Attend the big Aviation Dance at Lutz Hall April 18.

Miss Charlotte Rice of Lincoln was a Carrizozo visitor Monday.

Mr. and Mrs. Guy Morris were in from their ranch near Ancho Monday, Mr. Morris filing his intention to make proof on his homestead while Mrs. Morris did some shopping with our business houses.

Mrs. S. M. Johnson and son, R. P. Johnson, are again at home at the White Mountain Inn on the Ruidoso, after the winter's stay in North Carolina. Mr. Johnson will remodel the Inn for the summer season and will furnish additional attractions for pleasure lovers who will frequent that resort. R. P. was down on Wednesday and says that at that high altitude, fruit trees in his orchard are beginning to bloom and prospects for a good fruit yield were never better. He anticipates no loss from light frosts which will fall within the next few weeks.

Store to Supply the Better Modes and the Better Values.
\$5.00 to \$12.50
Are the prices of these Summer Dresses.

Come in to see them and note the careful way in which they are finished, their neat trimming and fashion correctness, you'll be enthused over the values.

All of these dresses are fashioned along the desirable straight lines --- styles that are quickly slipped into and easily laundered.

ZIEGLER BROTHERS.

"Universal Providers" Carrizozo, N. M., Established in 1886

Rairoad News of the S.P.

The subject of instruction in Safety in the public schools is being urged by the Rock Island Lines in a campaign now being conducted in the Middle West through the railroad's Safety Department. Within the last month, L. F. Shedd, Superintendent of Safety, and his staff have addressed more than 12,000 children in the public schools of Iowa, Minnesota, Illinois, Kansas and Arkansas, telling the children how to prevent accidents. "The idea of these school safety lectures," says Mr. Shedd, is to inculcate safety principles in the minds of boys and girls, at an age when such information will make lasting impressions. We fit the managements of the schools readily co-operate with us in this important work, as they recognize the value of this campaign, in its object to save life and limb. In fact, superintendents of schools in many places have arranged for our lecturers to address groups of teachers and also talk to meetings of Parent-Teachers' Associations. Our campaign to date has received most encouraging co-operation and its effects will be far-reaching. Assisting Mr. Shedd in the campaign are G. M. Stonebraker and F. P. Wilson, Safety Supervisors of the Rock Island Lines.

E. G. Benford, the new trainmaster's clerk and Mrs. Benford are here and have become permanent residents. We welcome the Benfords to Carrizozo.

Fireman and Mrs. Bryan Cazier have returned from a pleasant visit with Mr. Cazier's parents in Roswell and Bryan is running out of El Paso, but Mrs. will remain here for the present.

New brakemen are here from Tucumcari, as follows: Wm. S. Lempert, Thomas Rogers Hart, Chas. Evans Wright and J. H. Hampton.

Firemen Louis Adams and Mike Barnett are running out of El Paso.

Misrepresentation—
By "Bill O' Fare"

Lincoln County, like all other counties, has been hit by the price depression in cattle and live stock in general. The dry weather has hurt even worse than price depression; but these things are conditions, and cannot be blamed on politics, fake promotions or misrepresentations. Independent of these stumbling blocks, we have what we might call a precarious condition in the mining industry. Why is this? This is a difficult question to answer, but we are going to give, briefly, a few of the more common reasons. First, and heading the list, is misrepresentation of mining properties; false statements concerning the value of ore. This is an evil which has existed since the days of '49' It originated at Sutter's Mills. In all walks of life there are a few who stoop to evil methods of obtaining easy wealth; but in the mining business it has been more prevalent, than in any other industry. Oil ventures probably draw a close second. Not so many days past I heard a man make a false statement about the value of ore in a certain mine, to an engineer, who was preparing to go down in the mine. He made the trip and found the statement made by this man to be utterly false.

Did this 'nit-wit' think that a mining man of many year's experience, would not discover the falsity of the statement? Remember, boys, every occurrence like this is one thrust at the very industry which stands out like a beacon light in your county.

The men of today who place money in any form of venture do not rely on the statement of the owner or promoter — there must be a tangible value in plain sight. Why not write and make public such things? When you consult a doctor about your health, you want the truth; same with your county. You may try to hide these things but they will come out sometime. I could give many instances where false statements and the crude practice of 'salting' mines and

other methods of chicanery have been used to lure the victim to his doom. On the other hand, there are men among us who are straightforward, honest and wouldn't be involved in a fake mining proposition for a few paltry dollars. There are many good mines in this county. Surface indications are excellent and we have the opinions of some of the best mining men in the west, who say: "Your surface indications and prospects in general are good." There is something wrong and we believe it is just as stated above: "Misrepresentation."

Not long ago, a certain man was asked to place a valuation on a mine in this county and in order to derive a personal benefit, gave an erroneous valuation which would have assented the mining interests in general. Another dart at the mining industry. This practice, if continued, will ruin the already weakened mining business in this county. At some future time, I intend to write of another practice; that of making false reports. In conclusion let me say: "If the shoe fits, wear it!" Boosting is the tonic the old county needs right now.

School Situation

Nothing at this time but progress can be reported by the local board of education. As yet the audit and report of the state comptroller has not reached here.

Poll taxes are coming in slowly. They MUST BE PAID or the Board will Enter SUIT!

Board of Education
School District No. 7
Carrizozo, N. M.

Mesdames Van Scoyck, Barber and Zimmerman were visitors here Tuesday evening from White Oaks.

Mr. and Mrs. J. F. Fleming and daughter, Nettie, of Santa Rita, are visiting the J. M. Craves family in the Water Canyon this week.
