## Fire Fighters Commended For Faithful Work

Alamogordo, N. M., July 5.—S. Forest Ranger Vance Thomas and a crew of ten fire fighters from Alamogordo are receiving the commendations of S. Forest officials of the headquarters office here for faithful work in a serious fire adjoining the Mesquero Indian reservation. They were on active duty for 41 hours, having only three hours rest from Monday when the fire was discovered until late Wednesday when the flames were under control. The three our relief was made possible by the arrival of an additional crew of ten men from Tularosa. Regardless of the relief crew the Alamogordo men returned to work after a three hour rest. The fire was started by lightning in an almost inaccessible area in "Potato Patch" canyon. It was in a blow down area of yellow pine and consumed 100 acres of dense forest growth before the flames were controlled. The crew of fire fighters who assisted Ranger Thomas in the fire were Jesus Marquez, R Sanchez, Tomas Dravado, Pedro Ortega, Pedro and Dadio Moreno, Ricardo Morales, Cruz Morales, Robert D'Helele an Indian from the reservation and Juan Camacho, foreman of the crew.

## Amateur Night at the Crystal Theatre

Tuesday night was Amateur Night at the Crystal Theatre and a good sized audience greeted the local talent. Those who appeared on the program Miss Annie Bert Hall in a reading, Little Miss Ruth Kelley in a pianologue, Helene Titsworth of Captain in a dance and reading, Miss Hilary Cooper in a vocal solo; Miss Lorene Brazel in a vocal solo, Little Miss Ruth Brickley in a humorous reading, the mixed quartette, Misses Alice, Marjorie, Messrs. Linza and Clinton Branum, the dance by Miss Jane Spencer, the black face act by Saratoga Slim, whoever he, or she was, and last but not least, the sparring match between Masters Bud Peckham and Freddie Geer, won an abundance of applause from the audience. The boxing match which was for the championship of Alamogordo avenue, after three rounds of vicious slugging, with seconds, Mike and Meyer Barnett and refereed by Frank Daly, was declared a draw. This last number furnished an exciting finale to the good local program and was the topic for discussion on the streets after the show. The "Zozo Five" furnished the music for the evening.

## Pirates and Senators on Top in Contests For 1925 Pennants

New York, July 5. (AP).—Deft pitching hands shuffled the major league decks in a new deal last week which tonight found Pittsburgh and Washington on top. For the most part the expert fingers were those of veteran players. In the case of the champion Senators in the American league, honors fell to the credit of the 38 year-old Walter Johnson, the battle-scarred Dutch Reuther, the veteran Stanley Coveleskie, and the ancient Vean Gregg, as well as the New York Yankee heroes, Shawkey and Penneck.

## Bitten by Huge Rattlesnake

Monday morning about ten o'clock, Lenoir Hinnard, son of Mrs. T. L. Hinnard, who resides about five miles east of Rabenton, was bitten by a huge rattlesnake while hunting for some cows in company with his eight-year old brother. In attempting to kill the monster, it flew at the child, striking him between the first and second toes of the right foot. The older brother searched for a string to tie around his ankle, but finding none, he hurried the little fellow home which was but one-half mile away, after killing the snake. Mrs. Hinnard hailed a passing car and the child was brought here to the Paden hospital where by the time he reached the hospital considering the twelve mile distance and the intense heat, his right leg was badly swollen, but with timely treatment and careful nursing, the little fellow was pronounced out of danger Tuesday morning.

## 20,000 People Visit Lincoln National Forest

Alamogordo, N. M., July 7.—Business men here estimate the number of visitors in the Lincoln National Forest over July 4th to be fully 20,000 people. Automobiles, estimated at 2,000, carrying an average of five people streamed through Alamogordo from Friday morning until late Saturday, and a like number entered the forest from the Carrizozo and Roswell routes. Service stations here were kept busy all night Thursday night. For miles around in the Ruidoso area, where the El Paso L. O. O. F. dedicated their recreational area, and where the Navajo lodge held a celebration and rodeo, there was hardly a parking room. A heavy rain there on Thursday and again on Friday did not seem to dampen the spirits of the campers and brought joy to the hearts of the fire fighting force of the Lincoln forest. With such a crowd, fire would have been unavoidable had the forest been dry. Although there was no special celebration at Clouderoff, that resort claimed its share of the visitors. A heavy rain is also reported from that section.

## Crystal Theatre

—Carrizozo Entertainers—  
Friday 10—"King of Wild Horses" greatest horse picture ever made. 5th number "Idaho"  
Saturday 11—"Dixie Handicap" featuring Claire Windsor, Horse racing picture and one of the very best.  
Tuesday and Wednesday 14-15—"Janice Meredith" a Revolutionary War picture featuring Marion Davies.—Those who see this picture will never forget the crossing of the Delaware by Washington and the Attack on Trenton.  
Friday 17—"Pleasure Mad" starring Huntley Gordon and Norma Shearer.

Walter LaFleur, Jr., arrived home the latter part of last week from the West Texas Military Academy at San Antonio, Tex., to spend his vacation. Walter will be a senior when the fall term begins and the coming term will be his last at the Academy.

## Card of Thanks

We wish to express our thanks to the neighbors and friends for their kindness and help during the illness of our husband and son, and the graceful tribute finally accorded him.

Mrs. D. A. Smith,  
P.G. Peters, and family. Nogal vs Carrizozo, Sunday 12.

## Objection Sustained

## Nogal Items By "Bill O'Fare"

Did you ever hear "Bill" Bryan talk? We did, and have believed in the Darwin theory ever since.

If it continues raining our corn will make about three gallons to the acre; two gallons better than last year.

If Dick Wick Hall will bring that frog over from Salome, Arizona, we can probably scrape up enough water to learn him how to swim.

The Nogal White Stockings will cross bats with the Carrizozo Wild Cats next Sunday, July 12th, on the Carrizozo diamond. This promises to be a good game.

Cattle are looking fine in the mountains, and there is a good calf crop. Most of the calves that will be shipped out this fall will go right to the packer as fat veal.

Most of the Nogal citizens attended the Fourth of July celebration at Fort Stanton and report a good time. The field events and the rodeo were very interesting, also the ball game. In the evening Jupiter dropped a few sprinkles as is his custom on the Fourth of July. The dance was well attended and the music was splendid. The fireworks in the evening made a beautiful display and were very interesting.

The Nogal Golfers have not been able to make the round the last few days on account of the rains. Joe Cochran was initiated into the club the other day and is growing quite enthusiastic. From all appearances, Joe will probably cop the championship from O. C. Davis. E. M. Tabor and Tom Zumwalt Sr. have been employed as special caddies, and will be on duty from nine-thirty in the morning until four in the afternoon.

In traveling on the desert it is sometimes rather difficult to distinguish a mirage from a lake of real water, that is, from a distance. So here are three rules that will help in determining one from the other. First, a mirage usually quivers a good deal and changes its shape if you watch it; a real lake seldom does this even when looked at from a distance of many miles. Second, you can nearly always see a band of dark-colored vegetation around a real lake. Third, there are almost always birds flying near a real lake and above it.

## Fort Stanton News

In the Fourth field events and horse races, Miss Rasmussen won and was, in the pictures taken, seen riding like an experienced jockey. In the cow milking contests the team headed by Correlli won. There were other event too numerous to mention.

The ball games at the Fort on the Fourth and the Sunday following both went to the Fort in spite of the great repute accredited to the El Paso twirlers. The scores were respectively 11-3 and 11-9. Both games were interesting, especially the last one. Cavanaugh's home run with the bases full brought the crowd to their feet. The S. P. team was leading at this time.

On Sunday, June 28, Bishop Howden of the Episcopal Church held services in Carrizozo, Capitan, Lincoln and the Fort, all of which were well attended. At Capitan Rev. Thompson held the dedication ceremonies of new Nazarene Church, but asked his congregation to remain for the Bishop's services in the afternoon. The singing at each place was exceptionally beautiful.

The new County Board of Education met Monday morning in the County Commissioners' quarters and made appointments of teachers and transacted other matters of business. The County Commissioners also convened and in deference to the new Board of Education allowed it to use the Commissioners' room, holding their first session in the room adjoining the Assessor's office.

Carrizozo Lodge No. 41 A. F. & A. M. held a well attended meeting last Saturday night, in spite of the fact that none but Carrizozo members were present. It was the Fourth of July, but this meant nothing towards preventing a good meeting. Considerable business was transacted and many reports of an encouraging nature were turned in.

Mrs. D. D. Tiffany, who left here June 28 for Delphi, New York, after receiving a message to the effect that her sister, Mrs. Wm. Glendening of that place was seriously ill, found on her arrival that no hopes were entertained for her sister's recovery. A letter to this effect was received by Mr. Tiffany from his wife the first part of this week.

Attorney Geo. Spence arrived here from Jemez Springs Monday morning, after spending several weeks at that resort with Mrs. Spence and daughter, Mrs. Jack Callahan. Mrs. Spence has been ill of late, but at the time of his departure for this place, she was recovering nicely. After transacting some legal business, he expects to return to the springs.

## Ball Team is Certain

A petition was circulated this week for subscriptions to a baseball club and the business men readily and gladly signed up.

We have, time and again, urged the people to this movement and now that we have it started, let's go! If you say we haven't the players here, you are mistaken; we have them and although a little late in starting, we will make good. We have the players, the mettle, the diamond and now, with the proper amount subscribed, we'll be all right. "Good Nuff!"—PLAY BALL!—A game will be played with Nogal Sunday, 12, on the east-side diamond. Come out and help the boys get started.

## Making a Difference in the Children

In another article on this page, you may read of a sad case of suicide of a fifteen year-old girl in Denver, who was denied the right to attend Sunday school, and was kept at home to wash dishes, when her sisters and brothers were being dressed for the service. The mother gave as an excuse for the girl's act that she had a high temper and always insisted on having her own way in everything.

If the girl had a high temper, she came by it honestly, for 'like produces like.' Either the mother or the father had a like temperament. Laying all arguments aside, the question would naturally arise, what about the four brothers and sisters helping with the work in order that the sister might be present with them at the service, especially when it was her desire to do so?

In view of the facts, a vast difference was made between the children and the elder was made in a sense, a "beast of burden," while the others were allowed to rest easy in seeing the sister work. Parents should be careful not to make a difference in their children and see that each receives its share of love and attention, and last of all to teach them to bear each other's burdens.

## Denver Girl Ends Life by Drinking Poison

Denver, Colo., July 6. — Declared to have been disappointed because she had to do household chores and so could not go to Sunday school, 15-year-old Alice Hines committed suicide by swallowing poison at her home in Denver this morning.

The girl died a short while after taking the poison at the general hospital.

When the chimes in the belfry rang out, Alice is declared, the police say, to have told her mother, Mrs. Oney Hines, that she wanted to go to Sunday school with her four younger brothers and sisters, who were then being dressed for the service.

Mrs. Hines asked her to stay at home and help with the breakfast dishes. Alice made no scene but went into the kitchen, found a bottle of poison in the cupboard and drank it, the police asserted.

Mrs. Hines declared Alice had a high temper and had always insisted on having her own way in everything, according to the police.

Don't fail to come to the ball game Sunday, and root for the local boys. COME!

## Pacific Isles Wrecked by Recent Quakes

Avalon, Santa Catalina Island, Calif., July 7.—(AP)—While last Monday's earthquake was toppling buildings in Santa Barbara, it was ripping great fissures in Santa Cruz and San Miguel Islands just off the coast lines into the sea and revealing old Indian burial places whose existence was not even suspected by archaeologists. A report of the tremors was brought here yesterday by Capt. Arthur Sanger of the Schooner Dreamer on the vessel's return from anchorage off Santa Cruz Island with a party of scientists from Los Angeles museum of science and art. "Cliffs toppled into the sea before us," Sanger said. "We gazed awe-struck at what seemed to be the end of the world. From San Miguel Island to the west of us, a rose great clouds of dust, indicating that there too, the cliffs were crashing. After the shocks subsided we went ashore and found that great fissures, opened by the quake, had uncovered ancient burial places of Indians."

## Apaches and Navajos Celebrate at Mescalero

Mescalero, N. M., July 7.—The annual celebration and four-day feast of the Mescalero Apache Indians, from July 1 to 5, brought together not only the Indians of the Mescalero reservation, but also the Navajos from northern New Mexico and Apaches from Oklahoma. Navajos in full regalia, put on special dances and a group live families of the Apaches joined in the ceremonies.

There was also a Defense Day program in connection with the tribal festivities. Lieut. C. L. McDaniels representing the commanding officer at Fort Bliss signed up 350 Mescalero Indians as members of the national defense force. This is approximately 100 per cent. Airplanes from Fort Bliss flew over the tent city and more than 200 younger Indians formed a Defense Day parade. Besides the 650 Indians in the festivities, between 1,500 and 2,000 people witnessed the ceremonies.

The Mescalero celebration and feast is an old custom here and is in the nature of a "coming out" party for the young maidens, fourteen and fifteen years of age. The affair is sponsored by parents having girls of debutante ages and the expenses amounting to hundreds of dollars is borne by these families. The musicians of the tribe furnish the music for the weird dancing which extends all through the night. It is customary to shower the debutantes and musicians with valuable gifts. Asa Dykaluga, prominent figure in the Mescalero band was master of ceremonies this year.

The town was almost deserted on the fourth. Many attended the picnic on the Ruidoso, while others took in the ball game at Fort Stanton, a goodly number staying over for the dance which was one of the best attended of any given at the Fort for a long time. Earle Creek also had its share of attendance, and on the whole, wherever they went, everybody enjoyed themselves. Those who remained at home and those who returned after the ball game, amused themselves at the golf grounds. This course is in an ideal location and promises to become one of the finest in the state.

A survey of financial returns on 15,109 farms made public by the Department of Agriculture, disclosed an average favorable margin last year of \$1,084 between cash receipts and cash expenses, which, with increased inventories amounting to \$181, brought the average return to \$2,265 for the use of \$17,260 of capital and the labor of the farmer and his family...

The judge advocate general of the navy has been asked by Secretary Willbur if the prosecution presented all available evidence in the recent court-martial in Washington of two women navy nurses on charges of bringing liquor into the United States. The secretary said he was under the impression that certain written "confessions" had not been offered in evidence. The defendants were promptly acquitted...

Deputy collectors of internal revenue throughout the country conducted \$2,035 tax investigations in May, the internal revenue commission disclosed a few days ago, and the government recovered \$4,435,373 as a result of their work. The investigators levied additional taxes of \$5,390,770 and took appropriate steps to protect the government's interest in such amount not immediately collected. They reported finding 23,228 firms and individuals who never had filed returns, although they were alleged to owe taxes...

FOREIGN

Nine men, the whole crew of the tugboat Ocean King, were drowned when the schooner went down in the St. Lawrence river near Quebec when rammed by the Canadian Pacific liner Marloch.

The French army of the Rhine has begun preliminary preparations for the French evacuation of the Ruhr, which the Painleve government recently announced would be completed by Aug. 15.

Three hundred Riflian dead were counted on the field after the offensive against the French had ended in the upper Leben valley, it was announced from Rabat, French Morocco, a few days ago.

Count Michimasa Seyeshima, member of the Japanese house of peers and owner of two Japanese newspapers, while in Chicago, Ill., last week, reiterated his prediction that Japan will go to war with Soviet Russia within ten years unless the Bolsheviks cease their present tactics of spreading Red propaganda.

The Greek cabinet, headed by Premier Michalakopoulos, has resigned and former Premier Papanastasiou has agreed to attempt to form a government, offering cabinet portfolios to the leaders of the revolution, General Pangalos and Admiral Hadjikirakos. General Pangalos is the complete master of the situation in Greece.

Japanese nationalists in Tokio held an unexciting meeting with the purpose of keeping alive the agitation against the American immigration act excluding Japanese, which went into effect July 1, 1924. Numerous police observers attended the meeting and there was no disorder. Speeches made were of inflammatory character. No resolutions were adopted.

A French official communication issued at Rabat, French Morocco, says that Colonel Freydonburg's forces, continuing their operations in the region of Taroul, reached Ain Bou Aissa without difficulty. "The group operating in the center met with lively enemy resistance in the Bob Taz region. Its advance pushed back the enemy and established their liaison at Douhalla."

A motion of censure moved by Ramsay MacDonald, the labor leader, against the government for failure to solve the unemployment problem was voted down in the House of Commons, 373 to 143. The motion declared that the government, "after a lengthy period of industrial depression and confronted by an alarming growth in the number of unemployed, has failed to take measures to deal with a situation of unprecedented gravity."

GENERAL

Bids for air mail service on eight routes to be used as feeders to the present transcontinental service have been invited by Postmaster General New.

"God or gorilla" has become the rallying cry of the Tennessee fundamentalists as the trial of J. T. Scopes, for violating the antevolution law, approaches in Nashville, Tenn.

Ronowal of South Dakota's gasoline war against private oil corporations in every county, where "unreasonable" prices prevail, has been decided upon by Governor Gunderson's administration.

Proposed rules to prevent unlimited debate in the Senate were described in a speech made at Indianapolis by former Senator Albert J. Beveridge of Indiana as "an assault upon the theory and nature of American institutions."

New York creditors of Miss Clara Kimball Young, screen and stage star, were given opportunity in Los Angeles to take advantage of a court imposed economy program placed on Miss Young, when an order was issued directing that \$1,400 of her \$1,500 weekly salary must be set aside for the benefit of creditors while she is in California.

Charles C. Fatman, indicted in Chicago with William Darling Shepherd for the murder of Shepherd's millionaire wife, William Nelson McClintock, was freed when the charge was stricken off the record with leave to reinstatement at the request of Robert E. Crowe, state's attorney.

Present indications point to the belief in Washington, D. C., that both in Wisconsin and North Dakota the senatorial elections to fill the vacancies caused by the death of La Follette and Ladd will not take place until November. Because of agricultural conditions, all political factions believe it would be dangerous to have a special primary or election before the harvest problems are disposed of.

Federal Judge W. E. Baker, at Elkins, W. Va., filed a memorandum denying, because of lack of jurisdiction, the application of the Mineral State Coal Company and eighteen other companies for a preliminary injunction against John L. Lewis, president of the United Mine Workers of America, certain district officials and others. A temporary restraining order in this case was granted June 3, which had been continued in force pending Judge Baker's decision.

William D. Shepherd, who was acquitted in Chicago by a jury of the charge that he murdered his foster son, William N. McClintock, the orphan millionaire, was accused the second murder charge, that he killed McClintock's mother, would not be pressed by State's Attorney Crowe. "There is no evidence that Mrs. McClintock was murdered," State's Attorney Crowe said.

One body was recovered from the ruins of the Glavin theater building at Kansas City, Mo., which was destroyed by explosion and fire.

Latest Market Quotations

FURNISHED BY U. S. DEPARTMENT OF AGRICULTURE. Distributed from Kansas City, Missouri.

Chicago.—Increasing receipts of winter wheat together with favorable conditions for the new spring crop led to a sharp downturn in breadstuffs prices. On some transactions, there was an extreme decline of 5 1/2¢ a bushel on wheat and 3 1/2¢ on rye. The wheat market closed heavy, 30 to 45¢ lower. July 31.44¢ to 31.45¢ and 1 1/2¢ to 2 1/2¢ on rye, with corn and provisions varying from unchanged figures to a setback of 25 cents.

Arrivals of new wheat in one day totaled more than 500 carloads at four Kansas interior markets alone. Other reports indicated that the wheat market was moving freely in the southwest. The depressing effect on prices here was emphasized by knowledge that the United States visible supply yet totaled more than 29,000,000 bushels of wheat at the end of the old crop season, and that the carryover into next season was estimated at fully 75,000,000 bushels. As against this showing, an agreement that the domestic visible supply had decreased to 120 to 130 off in the last week had a virtually no influence on the market.

Corn and oats were carried down by a few cents, with the latter down 1 cent. Corn went below \$1 a bushel both for July delivery and September. Provisions reflected the decline of grain and of hogs as well.

Grain fed steers and yearlings scarce, moderately active, fully steady. Bulk, \$10 to \$11; top yearlings averaging \$12 to \$13; 1 1/2 to 2 yearlings, medium weights and heavier, \$11; practically no early sales straight grassers or lower; sheep steady to 10¢ to 11¢; lower; grass fat cows, \$4 to \$5.50; grain beefers, \$5.50 to \$7.50; canners and \$7.50; calves, \$4 to \$5; lower; practical top yearlings, \$10; bulls steady; holokeys, \$4.50 to \$5; stockers and feeders fairly active, fully steady.

Sheep—Lamb and yearling prices lower. Top native and foreign grades mostly \$11.25 to \$12.75; odd lots sheep steady.

DENVER MARKETS

Cattle—One of the packs paid \$10.80 for two loads of good steers which averaged 1,200 pounds and another load averaging 1,100 pounds landed at \$12.50. Choice steers, \$12 to \$13; good steers, \$10 to \$11; and from \$9 to \$9.75 was paid for small lots. Two loads of good steers, \$11.50 to \$12.50; heavy hollers scaled at \$10.25. A load of fed hollers reached \$10.25 and averaged \$10.25. A few hollers with a load of beefier cow sold at \$9.75. Good hollers reached \$7.75 for one load and odd head sold lower.

Hogs—Three loads of medium weight hollers and a few drivings set the price for hollers at \$11.50 to \$12.45. From \$13 to \$12.50 was paid for meat of the drive. A few steady, \$12.50 and good fat hinds sold within a range of \$11 to \$11.75. Meat packing hogs were weighed up at \$11.

Copper Metals—Silver, London and New York, 70 1/2¢; copper, per lb., 13 1/2¢; zinc, per unit, 10.00; tin, per unit, 10.00.

Wheat and Grain—Denver dealers are paying the following prices for various varieties and grades of hay: No. 1 South Park, \$17.00; No. 2 South Park, \$16.00; No. 1 prairie hay, \$18.00; No. 1 alfalfa, \$18.00; No. 1 North Park, \$15.00.

Grain Quotations—No buying on the Denver market. Denver Sugar (By the Great Western Sugar Co.) Manufacturers' price, 10.00; Retailers' price, 10.50.

Mrs. Rogers Wins Race for Congress—Lowell, Mass.—The voters of the Fifth Congressional district at a special election held here, overwhelmingly elected Mrs. Edith Nourse Rogers to represent them in Congress. Mrs. Rogers, a Republican, is the widow of the late congressman from the district. John Jacob Rogers, who died last March, and she will be the first woman from New England to sit in Congress. Mrs. Rogers' margin over Eugene N. Foss, a Democrat, former governor of the state, was in excess of two and a half to one.

BRITAIN SENDS NOTE REQUESTS PAYMENT

GREAT BRITAIN STATES THAT TIME IS RIPE FOR SETTLEMENT OF WAR DEBTS

FRANCE TOLD TO MAKE OFFER

EQUAL FOOTING WITH UNITED STATES IS DEMAND MADE UPON FRANCE

Paris.—Austen Chamberlain, British secretary for foreign affairs, has delivered to M. de Fleurbaey, the French ambassador to Great Britain, a new memorandum suggesting that the time is ripe for France to make an offer for the settlement of her debt to England, even if it is only a provisional one.

After summing up what has gone before Mr. Chamberlain states that the British government has no desire to interfere in negotiations which France might consider right to initiate with other creditor powers—by which the United States evidently is meant—but feels it necessary to lay down the principle that it is entitled to be treated on an equal footing.

The memorandum which is couched in the friendliest terms, recalls the correspondence between Winston Churchill, British chancellor of the exchequer, and M. Clementel, former French finance minister, and the British note of Feb. 7, resulting in exports of the French ministry of finance being sent to London to study the problem with British treasury experts.

Should France sign with the United States an arrangement whereby she would pay any part of her debt to the United States, Great Britain would expect a proportionate payment of the same due Great Britain.

The problems of the interrelated debt settlement has been one of the principal preoccupations of the Painleve government ever since it took office, and M. Briand and M. Caillaux had been commissioned to initiate negotiations with that end in view.

The British memorandum serves further to strengthen the government in its resolve, and pending the dispatch of additional instructions to M. Doeschner, the French ambassador, at Washington, the government asked him to inform Secretary of State Kellogg that France was disposed to send a commission to Washington to discuss the question.

Quake Incident of Nature's San Francisco.—The Santa Barbara earthquake, instead of being a thing of terror and mystery only, was merely an incident in nature's mighty task of forming a continent from the sea. Capt. T. J. J. See, U. S. N., scientist and government astronomer at Mare Island, Calif., said in a statement here.

"There is no occasion for further anxiety at Santa Barbara," he said. "The sea coast places recently disturbed are for a time the safest. The main thing is to build safe houses on good foundations and not to worry."

Bishop Salzes Cathedral—New York.—Possession of the Cathedral of St. Nicholas, the principal church of the Russian orthodox Greek Catholic church in this country, passed from the control of Metropolitan Platon, too of the Soviet, into the hands of Archbishop Adam Philpovsky, whose leadership of the church was recently confirmed by the courts. Police, accompanied by Archbishop Philpovsky and his followers, forced their way into a basement door of the cathedral, armed with the court order.

Treasury Surplus is \$250,000,000—Washington.—The story of the fiscal year 1925 was told by the treasury in a review of its operations during the twelve months which ended June 30, showing total ordinary receipts of \$3,780,148,834.43 and total expenditures of \$3,529,643,446.00, with the resulting surplus of \$250,505,388.43. Part of the review declared that plans for reorganization of prohibition enforcement were rapidly approaching completion, and told of the work done in this connection in the coast guard, customs division and prohibition unit of the treasury.

Evolution Trial Not for Publicity—Dayton, Tenn.—The town of Dayton was agog over a published charge of "publicity seeking" and its repudiation in connection with the trial of John T. Scopes, teacher, to test the Tennessee antevolution law. Dr. George W. Rappleyea, original prosecutor of Scopes, declared to the Associated Press that a published report which said that he had instigated the evolution charges for publicity purposes was without foundation of truth.

Pullman Named for Port of Chicago.—For the first time in its history the Pullman Company has named one of its cars after a porter. The porter was Oscar J. Daniels of Chicago, who lost his life in an effort to save the lives of passengers on his car when a train carrying German-American excursionists from Chicago to New York was wrecked near Rockport, N. J., June 12. The sleeping car wrecked will bear the name Daniels when it emerges from the repair shops.

NEW MEXICO STATE ITEMS

Harry Hart, son of Max Hart of Rancho de Taos, was accidentally killed by a gunshot wound near Taos. A. R. Tillman, of Las Vegas, has received notice of his appointment as safety supervisor of the western lines of the Santa Fe, with headquarters in Las Vegas.

Checks totalling nearly \$49,000 have been sent depositors of the Santa Fe bank by Mayor Nathan Jaffe. This is a 10 per cent dividend, the second paid since the bank closed.

Fire, which broke out in the business district of Clovis last week, destroyed the business blocks of the Miller and Crawford Tailoring establishment, and the Murray Confectionery and the buildings will be a total loss.

M. R. Wells, agricultural statistician of the Phoenix, Ariz., office of the United States Bureau of Agricultural Economics is in Las Cruces, N. M., to take up livestock estimate work there during the time that the statistician from New Mexico is on his vacation.

Thirty tons of Kafir head, 600 bushels of corn and 25,000 bundles of cape were destroyed by fire on the Gurley ranch near Clovis. It is believed that the fire was started by a bolt of lightning. The loss will run into several thousand dollars and is partly covered with insurance.

B. M. Irwin, rancher of the Burro Clonaga district, about 16 miles north of Separ, is dead and Pierce Rice is in the county jail at Silver City charged with murder as the culmination of bad feelings between the two men, neighboring ranchers, which has been brewing for some time.

Each sheep grower are shearing as fast as possible now, probably half of them having already delivered their wool. A good clip is reported in most cases so far reported running close to ten pounds per head. Some had contracted the clip at prices close to forty cents per pound but those delivering now are getting slightly less than thirty cents for the clip.

Definite steps toward the reorganization and opening of the Socorro State Bank, which closed or failed to open its doors on Monday, June 8, were taken last week, when petitions were sent out asking the signatures of depositors in an effort to deter, or prolong the regular time in which a receiver might be appointed by Judge Owen to take charge of the bank.

Santos Ore-Guenda, charged with the murder of Jose Chavez during a drunken brawl at Santa Rita, last April, pleaded guilty to murder in the second degree before District Attorney Fielder, at Silver City, and was sentenced to serve from 20 to 40 years in the penitentiary. Sentence was pronounced by Judge Owen, who is sitting for Judge Ryan, now in California.

Wool shipments from Farmington are moving. The total shipments from Farmington this year will reach 500,000 pounds. Of the shipments moving some were sold outright at 30 cents per pound and some were consigned with a cash advance on it. The big shippers are The Progressive Mercantile Co., Willis Martin, Fruitland Trading Co., R. T. F. Simpson and Bob Martin.

Captain Bower, of the 410th Infantry, stationed at Roswell, received word last week that the entire set of instruments for the regimental band, had been shipped from Philadelphia and arrive in Roswell soon. The enlisted personnel of the band is nearly completed and the final organization will begin immediately upon the arrival of the equipment. Captain Jack Fletcher will be the director.

Uncle Sam is spending \$25,000 in improving the U. S. Indian Industrial School at Santa Fe. The plan calls for a new gymnasium and a new dining room. The work is being done by local carpenters assisted by the Indian boys, under the direction of the carpenter employed by the government. The plans have been sent out from Washington. The U. S. Indian School now has several fine buildings, and the additions have become necessary by the steady growth of the school.

With the selling of \$100,000 worth of bonds, tested some time ago, Silver City is now making plans to take over the water system and extend it to all parts of the town. Of the \$100,000 received \$60,000 will be paid to the owners of the plant and the balance of \$40,000 will be used in developing an adequate supply of water for the city for years to come. When all the work is completed it is believed that the new system will be one of the finest of the kind in the state. The fact that nine bids were received, all at a premium, show that outsiders believe in the resources of the city and its sound financial condition.

The \$20,000 bond issue for the addition to the high school building, in Clovis, was sold last week and the money will be available soon for the work. The contract is to be let at once and the additional rooms will be ready for occupancy by the first of October.

The annual convention of the New Mexico Bankers' Association will be held in Las Cruces September 21 and 22, it has been announced. It has been reported that some eastern financial men will address the convention.

Hugh Williams Will Lead New Mexico Republicans

On Tuesday, July 2, in the city of Santa Fe, the Republican Central Committee selected its state chairman, one who has never wavered from the ranks; never shirked a duty; never faltered in the party's direst need. There was no contest and the honor came by a unanimous vote of the committee, which was a token of the high esteem in which his party holds him.

Hugh Williams has made more speeches from public platforms, amused more people with his peculiar manner of jesting, made more friends among the people in general, than any one individual in the state of New Mexico. As a member of the state Corporation Commission, he served with the same zeal with which he has always served his party. Hugh makes no effort at display nor bigotry, but in his manner of doing and thinking, is in a class to himself. There is no fuss and feathers about him; he is just human and a man, every inch of him.

Under his leadership the Republican party in this state will be victorious; his generalship will bring about this desired result. As an evidence of how he underestimated himself, we quote his words after being escorted to the meeting, when he said: "I am surprised to think you Republicans would pick a lizard like me to lead you for the next few years." He admonished leaders against taking the attitude, "I'm the whole cheese and you can go away back and sit down," or "sulking in the tent" because everything don't go their way.

Those to whom he addressed the above remarks, knew that Hugh Williams was never the man to take a back step after his duty was made plain. The Republican Central Committee did a wise thing when it selected him as its leader. He has no enemies in the party, has kept himself aloof from being entangled in the meshes of party factions, broils and bickerings. The Outlook commends the committee on the wisdom of its selection and congratulates Mr. Williams on his appointment.

Notice of Special Master's Sale Under Foreclosure

Notice is hereby given that by virtue of a final decree of foreclosure and order of sale, made on the 6th day of April, A. D., 1925, and entered on the 7th day of April, A. D., 1925, in the District Court of the Third Judicial District, in and for the County of Lincoln, State of New Mexico, in Cause No. 3495, on the civil docket of said Court, wherein A. D. Brownfield, Receiver of the Lincoln State Bank of Carrizozo, New Mexico, is plaintiff, and Mrs. Martha J. Taylor, Robert H. Taylor, Leora E. Taylor, Julian M. Taylor, Gussita Taylor, Mildred A. White, N. B. Taylor & Sons, and also M. W. Clarke and T. E. Kelley, Receivers of N. B. Taylor & Sons, and L. B. Gregg, Receiver, and A. D. Brownfield, Co-Receiver, of Exchange Bank, of Carrizozo, New Mexico, are defendants, the undersigned special master designated in said final decree and order of sale, will offer for sale and sell to the highest bidder for cash, at the front door of the courthouse in Carrizozo, County of Lincoln, State of New Mexico, at ten o'clock a. m., on Tuesday, the 21st day of July, A. D., 1925, all of the following real property, lying, being and situate in the County of Lincoln, State of New Mexico, to wit:

Tract No. 1: Lots twenty-three, twenty-four, twenty-five and twenty-six, in block twenty-one, of the town of Carrizozo, as shown by the plat of said town on file in the office of the County Clerk of said County of Lincoln.

Tract No. 2: Lots 11 and 12, block 3, Mountain View Addition to the town of Carrizozo, as shown by the plat of said addition on file in the office of the County Clerk of Lincoln County.

Tract No. 3: Lots 1, 2, 3, 4, 5, and 6, in block 10, Mountain View Addition to the town of Carrizozo, as shown by the plat of said addition on file in the office of the County Clerk of Lincoln County.

Tract No. 4: Lot 10, in block 21, of the town of Carrizozo, as shown by the plat of said town on file in the office of the County Clerk of Lincoln County.

Tract No. 5: Lots 16, 17 and 18, in block 23, of McDonald's Addition to the town of Carrizozo, as shown by the plat of said addition on file in the office of the County Clerk of the County of Lincoln.

Tract No. 6: An irregular tract of land, containing about one acre, more or less, described as follows, to wit: Beginning at a point 1452 feet north of a point 42.43 feet north 45 degrees west of the center of the SE 1/4 of section 3, township 30 south, range 10 east; thence north 145.2 feet; thence west 200 feet; thence south 145.2 feet; thence east 300 feet to the place of beginning.

Tract No. 7: E 1/2 of lot 4, in block 8, of the town of White Oaks.

Tract No. 8: Lot 2, in block 54, of the town of White Oaks.

Tract No. 9: Lot 5, in block 9, of the town of White Oaks.

Together with all improvements thereon and the appurtenances thereto. Notice is further given that the amounts to be realized from said sale, according to the terms of said decree, are as follows:

First lien of L. B. Gregg, Receiver, and A. D. Brownfield, Co-Receiver of Exchange Bank, on tract No. 8, under mortgage recorded in Book A-5, of Lincoln County Mortgage Records, at Page 203, judgment \$1600.00, and interest thereon to date of sale, \$48.42, \$1708.42

Keep an eye on this paper for information.

**The Clue to His Door-Mat**

By JAMES F. DWYER

WNU Service

IT WAS midnight. In Fifth avenue there were few pedestrians, and a fat man in evening dress, hurrying northward, attracted attention. Six night birds, who thought his actions mysterious, followed a few paces in the rear.

At Thirty-second street a policeman, dozing on the opposite side of the road, straightened himself, as he saw the hurrying group coming towards him. Swinging his night stick he crossed over and waited the approach of the little procession.

The Law was a trifle astonished. As he stood looking after the leader of the hurrying squad, he was felled by the inquisitive ones following, and he became annoyed. He grabbed a straw-hatted youth by the shoulder and questioned him.

"What's the matter?" he cried. "Search me," answered the questioned one. "Come on; I want to see what the ole guy is up to."

The policeman lost his temper. He was being treated with disrespect. A festive citizen was running a fool procession over his beat without giving him the least explanation! So he let go of the youth's shoulder and dashed madly after the man in evening dress. "Here, what's the game?" he panted. "What sort of a stunt are you up to, anyhow?"

The fat man shook off the grip of the Law and ran faster than ever, his outstretched hands circling round each other like the arms of a windmill in a gale.

"Stop down and I'll tell you," he cried, as the officer made another effort to restrain him.

"Been doin' that all the way from Twenty-eighth street," gasped the early followers, proud in the possession of that much information. "He's told the cop a joke, an' now the hickory wielder is hittin' the trail with him."

At Forty-eighth street the policeman met the officer on the adjoining beat, and hoking him by the arm he whispered into his ear as he kept pace with the fat man. The new policeman guffawed loudly, and again the angry crowd looked vainly for the humor that seemed apparent to the two guardians of the peace. The first policeman slackened speed, called out a friendly "Good luck" to the fat man, and then returned to his own beat, while his comrade trotted swiftly in his place.

The fat man swung east, down Fifty-third street, and new recruits joined the procession at every yard. But all thirsted vainly for information. Questions put by the newcomers were met with the one answer: "Don't know; look at his hands. Been twisting them round, and round all the way from Twenty-eighth street."

Crossing Third avenue the fat man halted suddenly. He knelt down upon the car tracks, and the officer stopped beside him. The crowd pressed round till the swiftly-swung nightstick swept them back. The man in evening dress crawled across the tracks and raked the ground with his fingers.

Presently he leaped to his feet and yelled out excitedly: "It's all right, officer," he cried, and once again his hands started to revolve round each other as he dashed towards the water.

Just here a third policeman was spotted into the mystery that was troubling the crowd, and with a merry laugh he took up a position by the side of the fat man. The crowd cursed collectively. Here was a mystery that had been explained three times to bulky policemen, yet they were kept in ignorance. It wasn't fair. They had a right to know why the man in evening dress was doing the windmill performance with his hands, and why that stunt amused the policeman. Much of their breath was exhausted in strange phrases denouncing the secrecy of the police, but they were deterred to see the end.

Near Second avenue a man standing on the sidewalk turned when he heard the noise of the charging squad and contemplated the runners. Then he stepped into the street and croaked over. The fat man chuckled. He whispered to the policeman at his right hand, and the officer dashed ahead. The man in front started to run, but his pursuer overhauled him in a dozen strides, and they rolled on the pavement.

"Wot's the matter?" gasped the captured one. "Wot are yer scrummin' me for?"

"This gentleman wants his rubber door-mat," murmured the policeman, relieving his captive of the parcel he carried beneath his arm.

"Hully Gee!" exclaimed the prisoner, rubbing his eyes and staring round him at the crowd. "Where did yer get the mob, an' how did yer know I had it, anyhow?"

"I had you on a string," explained the fat man, holding up a black thread in the light of the street lamp. "I've caught five men who have tried to steal that mat. It's attached to a thousand yards of strong thread, and as they generally grab it when the streets are quiet, the trail is always clear."

There was a gathering of the Burch family on the Fourth, when Mrs. Burch and son, John, came over from their ranch and spent the day at the Fred Burch ranch. Plenty of good things to eat were served during the day and at night Fred lit up the head of the Malpais with a display of fire works.

Marshall St. John of Belen, and Mr. and Mrs. Max Romero of Albuquerque, came in by motor last Friday to spend the Fourth with relatives. The Romeros left for their home Monday, while Marshall remained here to spend his two weeks vacation with his folks. Miss Placida Sanchez accompanied them on the trip.

Ex-County Commissioner Lloyd Hulbert, L. C. Hulbert, Fred Pfingsten, Porfirio Chavez and Wm. Norman of Lincoln, Clem Hightower of Hondo, Geo. Titsworth, J. A. Brubaker and L. L. Beard of Capitan were here Monday, on matters of importance connected with the Board of Education and County Commissioners.

Guests of the E. H. Sweet family for the Fourth, were: Mr. and Mrs. Wm. Eaton, son and daughter, C. C. York and daughter, Dr. and Mrs. S. G. Duncan, Socorro; Mr. and Mrs. G. C. Rowe and daughter, Tokay. In the afternoon, the guests were motored up to the Eagle Creek club grounds where they spent the time in viewing the beauties of our mountain resort.

**New Ways To Serve Tuna Fish**

**WHAT** do you know about tuna fish except that it comes in cans and makes an excellent salad? Do you know that in flavor it is first cousin to the tender spring chicken, and is known as "the chicken of the sea," and can be added to chicken salad, so that even you would never recognize it if you had not mixed it with your own hands? Try this sometime when you are serving chicken salad and extra guests arrive. The flavor of tuna fish by itself when used for a salad or creamed with evaporated milk and baked with bread crumbs is delicate and delicious. In serving it as a salad it should be placed on lettuce leaves with a little salad dressing, garnished with sliced lemon, a sprig of parsley and strips of green peppers, or with pimientos and green peppers or olives.

THE FARM SITUATION IS DESPERATE

WORTH LESS, BECAUSE THERE'S LOTS OF IT

## The American Farm On the Junk Heap

By FRANK O. LOWDEN

**O**ur agriculture is decaying. Farm bankruptcies in recent years have increased more than 500 per cent. According to the Department of Agriculture, the average farmer could have obtained a larger income than he had in 1923 if he had hired himself out as a farmhand in considerable portions of the agricultural area farms cannot be sold for the value of the improvements alone. Farm improvement everywhere has practically ceased.

And though the attendance in other courses in our universities and colleges has largely increased since the war, the number of students in agricultural courses has decreased about a third. Abandoned farms, which in the New England states excited so much comment a few years ago, are now found in considerable and increasing number in every state of the Union.

And yet despite these facts, which are gathered from the records, there has been a persistent effort during all these years of farm distress to minimize the seriousness of the agricultural situation. Interviews from prominent financiers, articles in magazines are going so far, I recall, as to characterize the agricultural depression a myth—have appeared with astonishing regularity during all this time, denying that there has been a serious situation upon the farm, or announcing confidently that the farmer's troubles were over and that the future was assured.

Whatever may be the popular opinion in the cities upon the subject, the ablest farm economists generally agree that the farm situation is desperate. They think that the great disparity between the prices of the things the farmer has to sell and the prices of the things he has to buy. They can see no permanent relief until this disparity is removed. They think that it may take from fifteen to twenty years to effect this adjustment if nothing is consciously done to help the situation. They expect this to be brought about by the natural increase in our population and by the running down of the great farm plant of America.

At the end of that time they tell us there will be another readjustment of prices, but this time in favor of the farmer, with a great and wholesome increase in the cost of living to the so-called consuming classes, with its attendant distress.

A few months ago the Department of Agriculture issued its statement of the estimated value of farm crops for the last year. This was heralded as another proof that agriculture had come into its own. For it found that the total value of the farm crops for the year was three-quarters of a billion dollars in excess of the value of the crops of the year before. This, of course, was welcome news. The report, however, disclosed some very perplexing facts. To illustrate, the corn crop was about 30 per cent smaller than the crop of the preceding year. The total value, however, exceeded that of the preceding crop by almost \$300,000,000. And every one knows that the quality of this year's crop was far below the quality of the preceding crop. And yet, under a marketing system which it is claimed is one of the most noteworthy achievements of this commercial age, the smaller crop of inferior corn was worth more in the market than the large and superior crop of the year before.

The cause of this lesser and inferior crop was a cold, wet summer. It was a summer disastrous for corn, but very favorable to the growth of grasses in meadow and pastures. There was, therefore, an increase in the production of milk, with the result that something like 100,000,000 pounds more of butter was produced in 1924 than in the year before. This was but about 5 per cent of the total annual production of butter in the United States. It created a surplus, however, as against increased domestic consumption of only about 50,000,000 pounds, or 2 1/2 per cent, as compared with the surplus of the year before. This relatively small increase, due to the same wet days and cold nights which so seriously injured the corn crop, resulted in a decrease of the price of butter from 30 to 25 per cent.

Now suppose that the corn growers and milk producers had been completely organized during these years, so you believe that this depressing and appalling condition would have come about? It is safe to say that the larger part of the bumper corn crop of 1923 was sold at a price which did not cover the cost of production. If corn growers had been organized and found that the market would not receive their corn at what it cost them to produce it they would not have dumped the larger part of the crop upon the market in a few brief months. They would have sold sparingly. They would have stored the remainder, knowing full well that seasons of low production are always followed by seasons of low production, and that at no distant day they would receive a profitable price for their corn. As it was, only a few of the corn farmers were able to hold their corn for the higher prices which they had rightly anticipated and which were later received.

Of course, even if organized, they could not have expected to receive as much per bushel for a 3,000,000,000-bushel crop as for a 2,400,000,000-bushel crop. They would doubtless have asked a somewhat smaller price, but they certainly would have asked a price—and have received it—which would have made the 3,000,000,000 bushels of corn worth more to them than the very next year 2,400,000,000 bushels of poor corn actually brought in the market.

In other words, the corn farmers, if organized, would have adjusted the supply to the actual demand. And they would have made this adjustment before the price became demoralized. In fact, the adjustment was made later, but only after the great bulk of the crop had left the farmers' hands. It cannot too often be stated that the supply of any commodity which affects the price is not the entire stock of the commodity in existence, but only that portion of it which is offered for sale at a given price.

And so, if the dairy farmers had some way by which they could have taken last year the incubus of 50,000,000, or at the outside 100,000,000, pounds of butter off the market, it is almost certain, in the opinion of experts, that this depression in the great dairy industry would not have occurred. If, in other words, this added 50,000,000—or, if you please, 100,000,000—pounds of butter had been purchased at a cost, say, of \$30,000,000 and stored by the farmers themselves, awaiting a season of less luscious grasses, the dairy farmers of America would have received as a return upon their large investment and their labor many million dollars more than they actually did receive.

And so I say this report from the Department of Agriculture discloses very perplexing facts. Now, I produce both corn and milk upon my farm. I feel the larger part of my corn in the form of silage to my cows. I sell it, therefore, in the form of milk. I receive considerably less for it than I did a year ago. And so these glowing figures of the increased value of the corn crop over which the financial writers of the great metropolitan dailies gleam do not comfort me much. I am indeed puzzled to know what to do. I have been taught that to produce 60 bushels of corn to the acre is a finer achievement than to produce 45. I like to see the milk pail brimming full with sweet, pure milk. But when I see 45 bushels of corn worth more than 60 bushels of corn, and when I see the milk pail but two-thirds full worth more than the brimming pail of another year, I become confused and hardly know what to do.

Last summer the cotton crop, particularly in the Southwest, was suffering severely for lack of rain. And then one day the heavens opened and the rains descended. As a result, the government, which before had estimated the crop at 12,400,000 bales, increased the estimate to 13,000,000 bales. This was an increase of less than 5 per cent in the yield, and yet, because of this estimated increase, the price declined in the market 20 per cent. This meant that the total crop of the larger estimate was worth less in the market by \$300,000,000 than the crop by the lesser estimate. And yet at that very time the world needed cotton as it had not needed it before since the Civil war. And this paradox was the result of a timely rain.

Now, there is no music sweeter to my ears than the patter of raindrops upon the roof breaking a drought in the summer time, and yet, to save my life, I cannot tell whether that rain is a sweet and fragrant breeze of a benefit—or bankruptcy. When the hot summer winds scorch the fields, I do not know whether to pray for rain or to thank the Almighty for the unbroken drought.

Something is wrong with our methods of marketing when the aggregate money value of a larger crop of a prime necessity is smaller than the value of a smaller crop. There are untold thousands of men and women and children who need more cotton in their clothes than is produced in the world today. To say, therefore, that 12,400,000 bales of cotton are worth more than 13,000,000 bales is to condemn a system of marketing which is necessary values.

Our agricultural colleges and our Department of Agriculture have constantly urged larger production. They have assumed, and naturally I think, that the more wheat and corn we raise the fewer hungry mouths there will be and that the more cotton we produce the fewer people will be obliged to go naked or but half clothed. For whatever economists may say as to surplus we know that there really has never been too much of food or too much of clothing for a needy world. And of course it follows that the larger the production per unit, the cheaper will the product be. But when large production is used to drive prices down so as to make large production less profitable than small production, large production will not continue, and the world will therefore have to pay more for the necessities of life. This therefore is the consumer's problem as well as the producer's.

It has been shown again and again that competition, when it goes to the extent of forcing prices below the cost of production, in the end is as disastrous to the consumer as to the producer himself. The demoralization of an industry which inevitably follows results in an increased cost of production which the consumers finally must meet. Organization is a most powerful factor in human progress. The economist as long ago as Adam Smith found in organization the key to industrial growth. Organization means the difference between the mob and a highly organized progressive society.

In the modern world, the farmer alone has been the last to realize the value of organization for its own sake. And therefore it happens that when the farmers in any community organize for any purpose, they soon find that there are other benefits derived in addition to the one that was their special aim. A finer community life, a widening of sympathies with their neighbors and associates, a broadening of their outlook upon the world, a new sense of the dignity and worth of their calling, an elevation of the ablest and worthiest among them to places of leadership, are among the by-products of farmers' organizations.

Agriculture has emerged from its primitive state. It must therefore conform to those practices which have been found necessary to the success of other great industries. In all other fields of commerce, unrestricted, free and open competition in the marketing of products has been gradually disappearing.

Agriculture, therefore, finds itself with its millions of members freely competing among themselves while it is obliged to sell its products in a highly organized industrial and commercial world. Now, if the farmers are to put themselves upon terms of equality with the great industries of the country they, too, must organize. It is not desirable that they should imitate the great industries, adopt the corporate form of organization and operate their farms through corporate management.

It would weaken our whole social structure if our millions of farmers were to surrender their individualism in this way. Nor is it necessary. While men improved efficiency in production is still possible, the farmers have made and are making constant progress in this respect. The problems which press hardest upon him today are concerned with the marketing of his products at a price which will enable him to live and to go on producing. He must find some way to restore the proper relationship between the prices he receives for his products and the prices he pays for other commodities.

Those who oppose the principle seem to think that in some sort of way the co-operative associations are seeking to avoid the operation of the law of supply and demand. Quite the reverse is true. Those who advocate this form of marketing are seeking only to create conditions by which that law will operate fully as between the seller and the buyer of farm products. At present it does not.

Farmers' co-operative marketing associations, however, are making real progress. Some have failed. Doubtless others still will fail. The mortality among them, however, has been no greater than among new business organizations of any other kind of which I know. We have been gathering a large fund of experience which will enable not only those already organized, but new ones yet to be, to avoid largely the errors of the past. They are destined one day to occupy the entire field, for there is no other way out. Just when that happy day shall come no man can tell. It depends largely upon the farmers themselves.

This is not the problem of agriculture alone. It is the problem of all. Because there can be no enduring prosperity unless all the principal industries which go to make up the commercial world keep step with one another, shall march abreast.

## RECALL CLASH OF DANE AND BRITON

### Old Coins Have Stirred Historical Memories.

There has been a great to-do among archaeologists and historians since the discovery of some coins last autumn in the Peakland caves in England. These coins were of no known denomination. They bore the name "Burgred," but who he was it has taken a great many learned polemics to decide.

There is no doubt that this is the same unhappy Burgred, or, more properly, Burfred, who in 854 A. D. gave the Wolyerly portion of Kidderminster to "Aethun, bishop of Worcester," and also endowed that historic see with Hartlebury castle, which it holds to this day.

Poor Burgred! He had indeed a wretched time of it. In the year 852 he was chosen by the Witan to succeed Beorhtwulf on the throne of Mercia, one of the weakest of the Anglo-Saxon kingdoms. Scarcely was he crowned when the Welsh under Roderic Mawr revolted from Mercian overlordship. Burfred called upon his own liege, Aethelwulf, king of the West Saxons, and between them they subdued Lloyd George's ancestors after a bloody war. To celebrate the victory and cement further relations Burfred married Aethelswith, the daughter of Aethelwulf, and peace seemed once more insured to Britain.

But in 888 came the Danes in never-ending flood, and soon they had entrenched themselves in Nottingham, a menace to all the island. Burfred sought the help of his brother-in-law, Aethelred, then reigning over the West Saxons, who together with his younger brother, afterward the great Alfred, sped to Mercian aid. The Saxon army advanced against the might of Denmark, then serene behind the stone walls of Nottingham. Neither feint nor siege could dislodge the enemy, so presently the British made peace and reluctantly turned home. In after years King Alfred must have bitterly regretted that he did not prevail upon his elders to sit before Nottingham until its defenders were starved out, for he had many a hard-fought battle before him as a result of Danish occupation.

At all events, one may be sure poor Burgred rued the decision, for six years later the wily horsemen, seizing a favorable moment, overran the helpless Mercians and forced their king to fly for his life.

Reaching the continent, he made his way to Rome and there, already forgotten at home, he died and was buried in the St. Mary's chamber of the English school.

Thus the ashes of King Alfred's brother-in-law rest by the Thier instead of the Mersey. Long time has he slept since these coins of his realm were found by a modern Briton in the cave where once they had been hidden from the oncoming Dane.—Washington Post.

### Old-Time Religion-Will-Do

The bishop of London, preaching at Christ church, Marylebone, in connection with its centenary celebrations, said that, looking at the strife of nations and what happened in the translation of President Wilson's self-determination principle in Ireland and India, and the strife between white and colored races, they were forced to the conclusion that the teaching of Christ and the introduction of "team spirit" were the only solution of the problem of crowding upon the earth, says the London Daily Telegram in a recent issue.

The same applied to the industrial world. Not a new religion, but a new heart and new attitude toward the old religion were required, and he had no hesitation in declaring that the old religion was adequate to the new age. The old church still treasured the Christian truth unswayed and unspilled and retained the confidence of the Anglo-Saxon people. The Church of England was never on such friendly terms with the other churches of Christendom as it was today, and they were also in closer accord and understanding with the great nonconformist bodies.

### Food From Airplanes

In future warfare it will be impossible for an army to lay effective siege to a city or a column of troops. Directly food and drink run short in the beleaguered garrison, formations of airplanes will sweep overhead, and a rain of provisions attached to parachutes will fall.

A new provision-dropping parachute and container has recently been ordered by the British air ministry. The containers are cylindrical, and are made of metal with a dome or "percussion cap" at one end. Parachutes are designed to fall at two alternative rates of descent: one 22 feet per second and one 14 feet per second, and the percussion caps absorb the shock of landing. The combined ammunition and provision container is 36 inches long and 10 1/2 inches in diameter. It is attached to an ordinary airplane bomb rack, and the pilot drops it by operating the usual bomb-release lever.

### A Puzzle

Glady—Mummy, daddy takes number twelve in school because he has big feet, doesn't he?  
Mummy—Yes, dear.  
Glady—And you take two because you have little feet?  
Mummy—Yes, darling.  
Glady—Then why does daddy have huge handkerchiefs and you tiny ones, mummy?

## A Little Bit Humorous

### BEFORE THE ALDERMEN

Alderman—I desire to present a petition.  
Presiding Officer—The clerk will read.

Clerk—To the honorable board of aldermen, a petition from the inmates of the almshouse, asking the board to provide parking space for their automobiles.

### Acts the Same Now

"Do you act toward your wife as you did before you married her?"  
"Exactly. I remember how I used to act when I first fell in love with her. I used to lean over the fence in front of her house and gaze at her shadow on the curtain, afraid to go in. And I act just the same way now when I go home late."

### Too Much Money

"You can always tell the newly married folks," said the postmaster. "Here comes a recent bride now."  
"How do you know?" demanded the traveling man curiously.  
"See, she has a \$5 bill to buy a few 2-cent stamps with," returned the knowing postmaster.

### NECKING?

He—Grace and I entered an endless contest in dancing.  
She—How'd you come out?  
He—Neck and neck.

### Much Better

One reason I like the movies—when dad and an actor fall, he can't revive amid applause. And take six curtain calls.

### A Hint to Epicures

Wife—Have you really told the cook that she and her sweetheart are to dine with us? Is that quite the thing?  
Husband—No. It isn't the thing, but I'm getting tired of his always having the best of it: the food—the Vikings, Oslo.

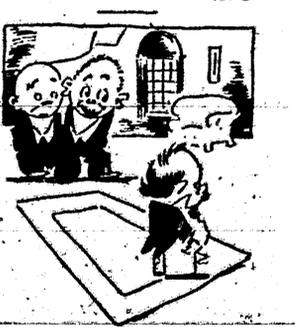

### Travel

Homebody—This last time I saw the great Mr. Multitox was in Venice.  
Benebroad—G'wan! You've never been in Venice.  
Homebody—I know it, but I've been to the movies.

### Unique Idea

Flora—Bob told me last night that I was the most wonderful girl in the world.  
Nora—My! He ought to patent that before it gets known.—Stray Stories

### JUST FALL IN PERHAPS

"He's a man of open mind."  
"That explains how the ideas of so many other people get into it, I suppose."

### Causes Summer Madness?

I bring the swatter down  
And then I swear;  
I find the pecky fly  
Has gone from there.

### Value Received

"Here's a quarter for you."  
"Thanks," said the fortune teller.  
"You will soon inherit \$20,000."  
"Is that all?"  
"That is all I can afford to prophesy for 25 cents."

### The Last Word

Wife—Don't you dare speak to me again for a month.  
Husband—If you think you've dashed all you want to say by that! —Fooling Show (London).

## SPORTS ENSEMBLE FOR YOUNGER SET

An Outfit That Is Complete and Very Latest Mode for Season.

An innovation in ensembles that will be popular with the younger set is a sports outfit that is in every sense up-to-date and complete. It consists of a separate skirt, a short box coat, a one-piece dress, a long coat, skirt and sweater. One among the several styles in these ensembles, writes a correspondent in the New York Times, is made particularly chic with the use of plaids and checks with plain material. A plaid skirt is made of bright Scotch plaid, with which is to be worn a jacket of plain red cloth.

Another suit in which a blue and green tartan is used for the coat, narrow bands of green leather are added for trimming, the skirt being of plain green kaslin in a wrap-around model. The long coat is made to match or to harmonize with the dress, being, in one attractive example, of castor whipcord. The frock itself is most attractive, made after the latest straight silhouette style, with high neck and straight, comfortable collar, which is narrow and upstanding, somewhat after the "turtle" design. The sleeves are plain and long, and the conspicuous attraction of the dress is in the four pockets. They are put on the outside of the front, one on each side of the bodice, and directly under these, two on the skirt, to hold golf balls, handkerchiefs and other accessories. The long coat designed to accompany this dress is of the same shade in whipcord, lined with twill silk to match.

A great variety of sweaters is offered. Most of them of the slip-on model. There are gay stripes, plaids, checks, zig-zag and cubist patterns. There are knitted sweaters in geometric and conventionalized floral patterns, usually in wools. Others are in finest sephyr mixed with silk, or all silk have hand-embroidered motifs scattered over the surface, or as a single decoration motif.

Laced boots for hiking; common-sense oxfords for general outing wear are shown in the new light colors, single or in effective combinations. Beige, tan, doekskin and brown are popular and white shoes trimmed

### Sheer Chiffon Alpaca Sweater for Summer

The striking stripes of the sweater blazer are most effective for sports wear. Knitted of sheer chiffon alpaca, the sweater is light enough for the hottest summer weather.

### Practical and Smart Are Duds for Travel

Few things offer more conclusive proof that in simplicity lies the secret of chic than the costumes chosen by smart women for wear when traveling. Practical and smart, comfortable and graceful, with nothing in the way of unnecessary details of trimming to mar their lines, the suits and topcoats worn either on board ship or when traveling by motor are in their way as perfect as the most formal frock for evening.

Much of this is due to the beauty of texture and coloring which distinguishes materials of the present day; much depends upon the cut and finish. Fabrics that will stand hard wear, lines that are not distracting, colors that are subtle rather than conspicuous are some of the points to be looked for when selecting clothes for the trip abroad or for the cross-country motor trip which each summer becomes more and more popular.

### Huge Garden Hats Are Trimmed With Flowers

Some of the loveliest of the huge garden hats, one might say the majority, are trimmed with one very large flower, stems and foliage. And the type of wearer must decide the position of the flower. Some of them are placed directly in front on the crown with stems and leaves arched flat and twisting around the crown. This same high trim is made by big satin bows. And it is, of course, a big hat for one with a rather large face and some height.

Remember girls who are either short

### Practical Frock for Girls' Vacation Days

Here is a practical frock in a practical color—rust brown—a model in crepe canton. The shirt collar and cuffs, narrow belt and string tie, the pockets and buttons indicate that the rust brown dress will be popular with the outdoor girl.

with black or colored leather are considered especially smart. Sports hose is a particularly picturesque item in the costume, this season, all the snappy patterns of every description, from polka dots to Egyptian hieroglyphics.

Scarfs are, of course, most engaging, being for sports dress more like a man's muffler. They have for this reason a tailored look, they are made in every conceivable color and design. Heavy silk scarfs are fashionable, particularly in the brightly contrasting colors and are worn by some women who prefer the touch of silk about the neck.

Sports hats for the younger woman who shines most brightly in this type of dress are uncommonly chic this season. The soft felt cloche, descended from the original cloche "cigarette" hat, is a favorite all-around chaparral.

All of the fabric hats are much in demand for sports ensemble, the close shapes formed of rows of ribbon sewed together with floss fagoting, French knots or the herringbone stitch, hats of dull silk or crepe, or, late from Paris, of velvet.

Sports gloves are invariably of the heavy doekskin, buckskin suede or castor, in the tans; grays, mode, yellow or white and fabric gloves are being more generally worn.

### New Fabrics for Summer

A lovely new fabric which has recently been brought out is a glorified edition of linen damask. It comes in all the soft pastel shades of mauve blue, recamer pink, citron yellow and tarragon green and is admirably adapted to the two-piece jumper frocks that are so much in vogue.

or tall wear hats whose crowns are somewhat high, but the flower or the bow must be rather flat on the brim or between the crown and the brim, so this is not overpowering and top-heavy looking in the wide-brimmed hat.

There are, of course, very natural-looking single roses, in exaggerated size, used on the garden hat. But the tendency is rather toward flowers that could never have grown in a garden. The flowers which have slender, feathery petals, like the chrysanthemum, are much used. Sometimes they are much larger than the average chrysanthemum and the fact that they bear little resemblance to any chrysanthemum in color does not daunt the milliner or the wearer. One peach-colored garden hat of fine neapolitan was mounted by a huge willow silver chrysanthemum.

In most cases the flowers match the hat instead of showing a contrast. It only goes to bear out the season's idea of having things to match.

### Cushions Easily Made

Odd pieces of linen left over from summer frocks may be used to make small cushions oblong, oval or square in shape. These are decorated with colored linen tape which forms geometrical designs.

Many Shades Used Many shades of blue are combined in one frock this season, the light Alice blue and midnight blue being the extremes.

## Hogging Down Soy Beans Is Favored

Meeting a Hearty Reception by Those Who Have Given Them Trial.

The Iowa Agricultural Experiment Association, Ames, Iowa, has soy beans in small lots for trial purposes by growers interested.

It is a well recognized fact that soy beans particularly suited for one purpose such as seed production or hogging down may not be so well adapted to growing for hay or in corn for silage in that particular locality. The practice of growing soy beans in corn for hogging down has met a very hearty reception by the majority of those who have given them a trial.

Pure Beans for Seed. Other growers are particularly interested in having good pure beans to try for seed production purposes. The association has a few one-bushel lots of hand-picked Manchou soy beans, which they propose to let growers have who want to get a start of pure Manchou beans to try for seed production. The Manchou lots, either for seed or for hogging down, together with bag and inoculating material, will be supplied for a fee of \$3.

Peking soy beans are a later, somewhat ranker growing variety. They stand up well, making them quite suitable for silage purposes. One-bushel lots of these are available for that purpose.

Soy beans have also been grown for hay the past few seasons. Peking soy beans lend themselves readily to that purpose. A few one-bushel lots of the Peking will be supplied for this purpose to those wishing to give them a trial. A fee of \$4 must necessarily accompany the application for a bushel of Peking soy beans. This covers the cost of the beans, bag, and inoculating material.

### Dunfield Is New Variety

The Dunfield soy bean is a new variety of soy beans, giving much promise as a seed producer and a profitable bean for hogging down in southern Iowa. The seed supply is very limited, and will be sent to growers in two-pound lots so long as the supply lasts. A fee of 50 cents should accompany the application to cover cost of seed, bag, inoculating material and postage. All questions or applications for any of the different lots of soy beans should be sent to the Iowa Agricultural Experiment Association, Ames, Iowa.

### Cucumber Beetles Cause Trouble in Home Garden

Among the most troublesome insects that we have in the home garden are the cucumber beetles, both the striped and the spotted types. The adult beetles are usually waiting for the young "cukes" or melon plants to come through the ground, and in 24 hours the prospective crop is ruined. For years investigators have been trying to find a really effective method of controlling these pests, but with only partial success. All sorts of evil-smelling substances, such as turpentine, tobacco, and camphor balls have been used to "chase" the beetles, and poisons such as arsenate of lead and paris green have been added also. Protectors for the young plants used to be commonly utilized but have apparently not been so popular in late years.

The most recent control material used for cucumber beetles, and apparently the most effective to date, has been a 2 per cent nicotine dust, applied near midday in a clear, quiet, sunny weather. Even this material has not been entirely satisfactory, many cucumber growers complaining that although the dust did kill many beetles and drove the rest away temporarily, they were back in "droves" within a day or two. Others, however, have had good results with the nicotine dust.

### Shippers Should Avoid Oversupplied Markets

When marketing hay avoid a glutted market, advise marketing experts. Unlike wheat and other grains hay cannot be stored in great quantities at the central markets. If it reaches an oversupplied market it becomes a drag and sells for what it will bring. The only remedy is to watch the quotations carefully and avoid shipping when receipts are unusually heavy or the demand slow.

Ship the kind of hay the market wants. Kansas City is fortunately located to supply the demand for hay in the south. Kansas City is the largest primary hay market in the world and it is mainly a distributing market. Much of this is coarse stemmy hay which is ground for alfalfa meal or goes into the South for horses and mules in the cotton section. Accurate knowledge on the part of the shipper, of grades and receipts, will enable him to sell his high-class hay at a good margin above average prices.

### Destroy Melon Louse

For the melon louse which is a small green or blackish plant louse, spray with nicotine sulphate 1 to 800 with cheap laundry soap added at the rate of 4 pounds to 50 gallons of spray. The spray outfit must be provided with an angle near the tip of the rod so that the spray can be made to reach the undersides of the leaves. For the striped cucumber apply a wet mixture of 1 pound calcium arsenate and 20 pounds gypsum or lead sludge.

## Fill Ordinary Silo Most Economically

Have Sufficient Help on Hand to Keep Going.

In filling an ordinary silo it has generally been found that it is most economical to have a sufficient number of men on hand to keep the silo filled in pretty constant operation, says Howard's Dairyman. There can be some saving in labor if the corn binder is started, say, the evening before cutting and is kept going before filling starts in the morning. In this way one may possibly cut down enough corn and release the man on the binder to work with the machine.

With a small cutter it is usually sufficient to have one man in the silo, one man to operate the engine and cutter, three men and teams to haul the corn, with possibly two men loading in the field. The number of teams and men will depend to some extent upon the distance the corn is to be hauled. It may also be necessary to keep one man operating the binder or cutting the corn in another manner.

Corn will make the best silage when it is cut just as the kernels are denting and glazing and before the lower leaves have commenced to dry up badly. This will usually mean from ten days to two weeks before the corn would be cut for grain. In the early day, corn was cut when in the roasting-ear stage and this made a very sour silage. From this extreme, there has been a tendency of going to the other extreme of allowing the corn to become too ripe, with the result that the ensiled material is not quite so palatable and does not keep quite as well. The idea is to get the corn into the silo when it contains a sufficient amount of moisture so that it will commence to heat at once and will pack thoroughly. It is desirable to avoid either of the extremes mentioned above.

### Alfalfa Plants Injured by Maturing Nurse Crop

Many a good stand of spring-sown alfalfa is ruined by allowing the nurse crop of oats or barley to mature for grain.

"The young alfalfa plants are literally choked to death for want of water," says George W. Musgrave, agronomist at the New Jersey agricultural experiment station. The ripening grain, he explains, draws an enormous amount of water from the soil, thus famishing the feeble young alfalfa plants.

Though this moisture robbery is the chief objection to letting the nurse crop mature for grain, it is not the only one, according to Professor Musgrave. There is also the possibility of fatal injury to the alfalfa, through lodging of the ripening grain.

Successful alfalfa growers cut the grain for hay just as soon as it heads out. Not only may a satisfactory quality of grain be secured at this time, but the crowding effect on the alfalfa seedling is removed and the alfalfa is given the opportunity to develop properly. The main object in planting the grain is to secure a successful alfalfa stand; one should take no chances on losing his investment in inoculation, seed, and labor, through losing sight of this fact. It is mighty poor economy to try to use the oats or barley as a grain crop as well as a nurse crop.

### Buttermilk for Swine

Buttermilk has the same feeding value for swine as does skim milk, and its value is measured in the same way. The simplest method of valuing buttermilk is to compare it with corn on the basis that 100 pounds of buttermilk that has not been diluted with water is equal in feeding value to one-half bushel of corn. That is, when corn is worth \$1 a bushel, buttermilk is worth 50 cents a hundred for feeding swine. This applies, however, only in those cases where the buttermilk is not fed in excess of three pounds of buttermilk to one pound of grain.

### Farm Hints

Don't kill two birds with one stone. Don't kill one bird with two stones.

Alfalfa is the material from which good dairy cows like to grind out profits.

It's too bad somebody can't start a fight between the gypsy moth and the Japanese beetle.

Cabbage maggot is a common pest of farm gardens. Use corrosive sublimate at the rate of one ounce to eight or ten gallons of water.

When in doubt plant a bean. The bean is the great garden filler, and the one crop you can grow on poor soil. String beans mature in from 60 to 75 days.

Removing cows from pasture four to seven hours before milking time will eliminate grassy and weedy flavors in milk. The longer period is necessary only in the case of leeks and garlic.

The striped cucumber beetle spreads the bacterial wilt of cucumbers. Control the beetle and thereby prevent the wilt. Spraying the plants frequently with Bordeaux mixture, 4-5-75, plus two pounds of arsenate of lead powder as soon as the plants are making leaves and until the worms are several feet long will greatly reduce losses.

### Little Corn Wasted

Remarkable progress in utilizing the waste products of the corn crop, such as corn cobs, stalks and leaves, has been made during the last few years, says the Des Moines Register. A list of products made from corn, published by the United States Department of Agriculture, reads like an industrial catalogue. The list contains 148 commodities, including such items as axle grease and face powder, shoe heels and chair cushions, cigarette holders and gun powder, incense and punks, photograph records and shaving soap, shoe horns and varnish. The list of commodities ranges from absorbents for nitro-glycerin in the manufacture of dynamite to xylose, a kind of sugar.

Don't Forget Cuticura Talcum. When adding to your toilet requisites, an exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum), 25c each everywhere.—Advertisement.

### Elastic Shoe Laces

Shoe strings made of a rubber composition, recently introduced by an English manufacturer, are said to stretch so easily that shoes can be taken off or put on without unlacing them. The strings are fastened at the top on the inside, thus eliminating the need for tying or knotting. They cannot work loose. In games or on hikes the elastic laces are said to relieve the pressure of the shoe on the foot. They are made in different colors.—Popular Mechanics Magazine.

All spirits are enslaved which serve things evil.

## TWICE IN THIS WOMAN'S LIFE

Lydia E. Pinkham's Vegetable Compound Helped Her from Sickness to Health

Ellensburg, Washington. — "When I was first coming into womanhood I suffered terribly every month. My mother did everything she could think of, so she took me to several doctors and they only helped me a little. Mother was talking to another lady about my condition and she told mother of Lydia E. Pinkham's Vegetable Compound. Mother got me six bottles and at the end of the first month I was much better, so I kept on taking it until I had no more pains. When I got married and had my first child I was in terrible pain so that it was impossible for me to do my housework. I thought of how the Vegetable Compound had been of so much benefit to me when I was a girl, so I went to Parker's Drug Store and got six bottles. It sure did help me and I still take it. I am a well woman today and I can't say too much about Lydia E. Pinkham's Vegetable Compound. I will answer any letter that comes to me to answer about what your medicine has done for me." — Mrs. WILLIAM CARVER, R. F. D. No. 2, Ellensburg, Washington.

Gentleness is revealed in the last analysis of greatness. The blusterer is always weak.

## Children Cry for

To avoid imitations, always look for the signature of *Wm. D. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

### Large Sum for Old New York Newspaper

The George D. Smith Book company got a Poe rarity for \$500. In a copy of the New York Mirror of February 8, 1843, which printed "The Raven" by permission and in advance of the American Review, the magazine that had bought the verses from the author. This item occurred in a sale of the libraries of Carlotta Russell Lowell and others, in the galleries of the American Art association. The Rosenbach company bought two Poe letters for \$400. Another rare item, which E. H. Wells got for \$900, was James Russell Lowell's ode in commemoration of living and dead soldiers of Harvard, recited by him at Harvard July 21, 1865, of which only 50 copies were printed, for presentation to friends. The inscription in the copy sold shows the author gave it to Mrs. Effie Shaw in September, 1865.—New York World.

### Horse Carries Tail Light

Camden, N. J., has a police horse that carries a tail light. The horse is used by a mounted patrolman, and has been bruised several times by being struck by machines whose drivers did not see the animal. Determined to protect himself and his mount, the patrolman attached a red reflector to the tail of his horse. The reflector flashes red when the lights from a motor strike it, and the driver instinctively steers clear of the danger signal.

### Diamond Production

It has been estimated that the production of all diamond mines from their discovery to the present time is 113,810,000 carats. The productions of the individual fields are given as follows: India, 2,000,000 carats; Brazil, 15,000,000; south Africa, 90,000,000; southwest Africa, 5,000,000; Congo, 1,200,000; Angola, 200,000; British Guiana, 200,000; scattering, 150,000.

There are moments in life that are worth purchasing with worlds.

And So Indefinitely "What is the modern girl coming to?" commented Mrs. Oldford. "Slowly, but surely," replied Mr. Oldford. "In that period of life when she will ask that very same question." Judge.

**Sure Relief FOR INDIGESTION**

**BELLANS**

6 BELLANS Hot Water Sure Relief

25c AND 75c PACKAGES EVERYWHERE

**BATHE TIRED EYES**

With Dr. Thompson's Eye Lotion. Buy at your druggist or 1200 River, Troy, N. Y., Boston.
