PRICE \$2.00 THE YEAR

ALONG LIFE'S TRAIL

By THOMAS ARKLE CLARK

ROSES AND SWEET HONEYSUCKLE

WHEN grandmother was a young girl she lived in England...

When she and grandfather came to America in 1840 they bought a little farm...

It was grandmother who looked after the flower garden. There were clumps of iris and fragrant lilacs...

I passed the old place this summer. The winding road is overgrown with weeds...

"The evil that men do lives after them," Shakespeare says...

Perhaps, but sweetness and beauty and goodness seem to me as persistent as evil...

Judge Edwin Mechem Has Resigned

ALAMOGORDO, N. M., June 30.—Edwin Mechem, judge of the Third judicial district...

Mrs. Bessie Portwood of Los Angeles, sister of Mrs. M. U. Finley, arrived here Wednesday...

Miss Evelyn French is visiting in Nashville, Tenn., since the close of the University of Tennessee...

Mr. and Mrs. Charles Thornton were here from Oscura on Wednesday, accompanied by their daughter, Gladys...

Those wishing choice flowers for funerals or decorative purposes may have their orders filled promptly at the Sunset Farm, Alamogordo.

We are in receipt of a nice letter from our old friends, Mr. and Mrs. George A. Dowdle...

Masons Meet And Work

Wednesday night, one of the largest gatherings of Masons ever seen at Masonic Hall was had...

After the dinner, degree work was commenced and the finish occurred near the hour of "Low Twelve."

Capt. Stadman Leaves

Captain Claude Stadman, brother of W. W. Stadman, clerk of the Town Council...

Bank Statement

On another page of this paper will be seen, a report of the condition of the First National Bank of Carrizozo...

Mrs. Claire Johnson and little son of Trenton, Mo., who have been here on a visit with the J. R. Adams family...

Mrs. T. L. Wilder of Reserve, N. M., is visiting her sisters, Mrs. Maggie Espey and Mrs. J. V. Hobbie.

Those wishing choice flowers for funerals or decorative purposes may have their orders filled promptly at the Sunset Farm, Alamogordo.

Miss Faith Whittingham and brother William of El Paso were here this week and are guests of the W. O. Holcomb family.

Foolish Season Is Here

Fore! By "Dad Gum"

A city guy to, the country went. He told his friends he was golfing bent...

And just the way To pound the ball To get more distance than them all...

Two weeks he stayed away from home On country courses he did roam...

And of his prowess for to learn, But when they asked him how it went...

And raved and cussed and tore his hair No more to the country he did go...

That the boys from the Country Ain't So Slow!

A Birdie says a True Optimist is a guy who knocks 'em in the Rough, Slices, Tops, and does every other 'Ain't' there is in Golf...

Other day two hardy souls lit out to Brave the Dangers of the Golf Course, namely the Weeds!

Rumor hath it that we have another Jess Sweetster in our midst. Here last month of our most ardent fans, hopped off and got married.

Today's Shortest Story It ain't the game I care about, it's the exercise I'm after!

How the 4th was Spent

A big crowd attended the Normal Community picnic last Saturday. A good program was carried out consisting of horse racing, goat roping and other sports.

Miss Faith Whittingham and brother William of El Paso were here this week and are guests of the W. O. Holcomb family.

Eating House Notes

(By S. L. Northlane)

The Misses Lorraine Hunt and Effie Crabtree of Socorro, are guests of the Misses Margarite and Louise Sweet for the week...

W. D. Crabtree and W. D. Newcomb of Socorro were guests of the Sweet family over the 4th...

Arrivals for the first part of the week were: El Paso: B. Walker and wife, J. Beecher, wife and son, John Littell, Mrs. Clara Sparks, W. Florian and wife...

Mrs. Elizabeth Gumm, local postmistress, left the first of the week for El Paso, where, after a visit with her sisters, Mesdames Laws and Stevens...

Mr. and Mrs. S. O. Sproles have one of the finest gardens one might wish to visit. The garden is but three years old...

Mrs. J. E. Farley will leave this evening for Denver, to pay a visit to her mother, Mrs. Lindberg, and will be absent about four weeks.

Ft. Stanton News

(Fort Stanton Correspondent)

The Fourth celebration on the fifth was partially interfered by rain but not so much as was feared. A large crowd enjoyed the morning and the barbecue till 12:30...

A very large number from the Fort spent the three days' holiday away and many attended the dance at Navajo Lodge where the Fort Orchestra played.

On Wednesday, Messrs. Leidgriter and Steele went to Chicago and Jensen to El Paso for a week or so. On the same day, Miss Broderick returned from her trip home in Wyoming much refreshed and looking fine.

In the wards are seen flowers from gardens at the Fort, from friends from Roswell and from the Sunset Farm of Professor and Mrs. Hunt at Alamogordo, both teachers in this county.

The services in the Amusement Hall at which Mr. Goble, one of the patients, officiated, in the fortnightly absence of the Chaplain were well attended.

The dance given by the Roswell "Night Owls" last Saturday night was a rousing success from the fact that there was the largest attendance at Lutz Hall that has been for many months.

Mrs. Frazer Charles entertained in honor of the tenth birthday of her little daughter Frances, Tuesday afternoon from 2 to 5. In keeping with the age of the little Miss, there were ten guests...

Night Owls' Dance a Success

The dance given by the Roswell "Night Owls" last Saturday night was a rousing success from the fact that there was the largest attendance at Lutz Hall that has been for many months.

Mrs. Maggie Wetmore returned Monday from the Mescalero Indian Agency, where she attended the Indian ceremonies on July 4th. She said that there were more people in attendance this year than ever before.

ELMO SCOTT WATSON

Morgan's Only Rival

If a pirate is to be reckoned by the amount of damage he does and the number of ships he takes, there can be no doubt that Capt. Bartholomew Roberts should be placed at the very head of his profession...

The new leader immediately sailed for Brazil, and there in the bay of Bahia found a fleet of 42 Portuguese ships, loaded and ready to sail. With unprecedented boldness, the pirate sailed in among them to the heaviest laden, which he attacked, boarded and sailed out of the harbor.

In April, 1721, he was back on the Guinea coast robbing and burning. On one occasion he captured a minister whom he tried to persuade to become his chaplain, explaining that all he would have to do would be to say prayers and make punch.

Fire!

A small blaze in the west part of town Tuesday afternoon, was answered by the fire department and the same was found to be an old barn at one time belonging to Sherwood Corn. The fire was started by some small children, one of the little ones being left behind after the flames had gained headway.

Mrs. Frazer Charles entertained in honor of the tenth birthday of her little daughter Frances, Tuesday afternoon from 2 to 5. In keeping with the age of the little Miss, there were ten guests, all of whom were as near her age as was possible to select them.

Division Superintendent C. M. Murphy and Mrs. Murphy of El Paso, were Carrizozo visitors on Monday, remaining over for the day and leaving in the Superintendent's private car in the evening.

All business houses with the exception of hotels and restaurants were closed Monday in observance of the Fourth. A big crowd from here attended the celebration and dance at Fort Stanton and returned ready for business Tuesday morning.

The Water Bearer

THE PICNIC

SYNOPSIS—Idly fishing Hermans creek, in California, Caleb Warner, civil engineer and a New Englander, is witness of the end of a coyote pulled down by two wolfhounds, urged on by a girl rider. Admiring the hounds, he introduces himself, and learns her name is Clinton. With western hospitality she invites him to the ranch to meet her father. At the Clinton home Warner learns his new friend's name is Betty. He is welcomed by her father, Southern Civil war veteran and owner of Hermans valley. He tells them something of his ambitions and his feeling that he is destined to be a "Water-Bearer." In the town of Golden Warner shares an apartment with his old Columbia college chum, Ted Baxter, barista and somewhat dissipated youth, only child of his widowed mother, who controls the family fortune. At a club luncheon Baxter introduces Caleb to Wilbur Cox, leading business man and president of the water company which supplies the needs of Golden. He gives Cox an inkling of his ambitions, and Cox, impressed, invites him to dinner that night. During dinner Cox asks Caleb to call at his office next day. He does so and Cox arranges a meeting between Caleb and Hinckley, the water company's chief engineer. Baxter tells Caleb he is in difficulties with a girl, Mary Moran, Cox's stenographer, who insists he must marry her. With Hinckley, Caleb looks over the water company's source of supply, the Crystal springs, in Hermans valley. Prospecting in Hermans valley, Caleb meets a man, Evans, who boasts of his ability, through "divining rods," to locate water without boring.

CHAPTER VI—Continued

"But it ain't no good," he said, suddenly disconsolate. "Cause why? What's the good of water 'less you can use it? The sile here ain't thick enough to put dirt in yer fingernails. It wouldn't grow a radish. An' the wells wouldn't be artesian. They'd have to have windmills to work 'em. And, as I said, they ain't no sile. Seems like a plumb bit of foolishness to put water where it ain't no manner o' use, don't it?"

"Have another cigar," said Caleb. "Where do you suppose all the water comes from?"

The Welshman looked at him pityingly.

"You fish that stream on 'you'll see. This in California sink. The stream runs into it like dishwater goes down the drain. Wish you tuck, mister. An' thanks for the smokes. Some day, if you come this way, an' I'm feelin' better, I'll give you a demonstration. I'll be glad to see you any time. Bunder lonesome here in this 'even, but it's baking me back to health."

Caleb went on upstream in a maze. It seemed, though his Yankee mind affected to scoff at the suggestion while it considered it, as if he had come into close touch with mystery. He fingered the emblem on his seal and smiled. Had the sign of the zodiac, Aquarius, really charged him with destiny, leading him along the trail to be the Water Bearer to the frontier city of the sands?

Half a mile up the canyon from where the gravel road branched off, an arroyo entered from the east through a bench that was thick-furred with underbrush of desert species. Only a trickle of water was in the almost dry watercourse, barely tasting to mingle with Hermans creek.

The place was wild enough, and silent. A grass-grown road chose either bank at random, fording the creek at frequent intervals. He found stones to keep his feet dry as he crossed.

Up the road he began to come across evidences of an abandoned rancheria. There was little left but the roots and a scattering of tentative tendrils, scantily leaved. He passed a corral, no longer tenable, a lean-to shed without a roof, a leaking flume, a tumble-down wall of stone, and then he became aware that he was walking through what had been once a garden, a stately garden, still with a certain dignity.

The garden had attracted him unconsciously and he had left the half-battered road. He did not go back to it but wandered on to the house that rose above the cypress guard. Caleb's footsteps rang hollowly as he passed over the flags and glanced in through where a door had failed as a wardrobe. He was beginning to people the place with such ghosts as he imagined should represent the former occupants when he heard the high, clear sound of laughter at the very instant that his nostrils conveyed to his nerves of smell, thence to palate and to stomach—so that his mouth watered and his appetite proclaimed itself with no uncertainty—the smell of broiling meat.

His hope of something from a ranch larder, a glass of milk, a piece of cake or pie, if nothing more substantial, had died with slight of the deserted house. The tracks he had been trailing must lead too far for him to follow uncertainty. And now he had blundered on to a picnic—a California picnic—which means a barbecue.

Caleb's stomach yearned, rose in revolt against his misadventures and so far won that he ventured to the outer door of the arch and peered through.

The laughter had ended but he could hear the chatter of young voices, men and women, hidden somewhere down by the stream that had wheeled to flow in front of the old house and marked through the interstices of a

tail, thick mantle of wild-grape, hung over the arms of the trees.

In front, between house and stream, there was a smoking pit straddled by an iron grid on which two swarthy men were turning joints of meat from which came the smell that had lured all the spigots of Caleb's gastric economy. One of them looked up. Caleb had no time to disappear. No wish, once the mutual recognition had been made. The cook, el cocinero, was Luis Padilla.

The swinging screen of grapevine parted and two people came through, Betty Clinton in her riding togs and an, upstanding young man in riding breeches, puttees and a shirt of silken tan, with a tan-colored stock about his neck. A tall, good-looking chap with a clipped yellow mustache and brown eyes, good teeth displayed in a hearty laugh, generally genial and eminently well pleased with things in general.

The girl was laughing, too, laughing so heartily in silvery carillons that she stopped from sheer lack of breath and then, regaining somewhat of gravity and lung power, called to Luis: "What is it, Luis?"

"Senorita, get eez el Senor Warner."

"Discussed, upstage, center, peering through the postern," said Caleb as he came out in response to the girl's instant and cordial greeting.

"You are just in time. Did you come on foot? How did you know we were here? Mr. Warner, Mr. Thurston."

The two shook hands while Warner explained the accidental happening of his arrival. Betty Clinton was giving some directions to Padilla and his assistant.

"Come on," she said, "and meet the rest. Dad's here. This is my annual picnic and barbecue. Birthday festivity, you know."

She Took Possession of Him.

She took possession of him. The man named Thurston lagged behind as they broke through the vines and looked down upon a level bank of turf, fringed with ferns, just above the level of the creek. Two girls and an older woman were aiding and directing the laying of a table by two men. Clinton himself sat apart, back to the bole of a tree, smoking. He rose as Caleb came into view and the rest looked up.

"I'll make the introduction general," said Betty Clinton. "You can all make it personal later. This is Mr. Caleb Warner. I think I've mentioned him to all of you. And these are—Carmen Wilson"—she indicated a girl with black eyes, in a white dress, wearing a scarlet beret so vivid that its outline was fuzzy with radiance; "Mrs. Henry Vedder, Henry Vedder and George Brompton. The meat is barbecued. The enchiladas are at the height of their excellence. Be seated. Dad, you at the other end. Mr. Warner, next to me, at my right. All right, Padilla, bring on the carne. I hope you brought an appetite with you, Mr. Warner. Carmen, pass the enchiladas. Frijoles, if you like them better. They are our substitute for Boston beans, you know. And the salsa, Mr. Brompton."

The meal was all animation. Good viands, good nature and a general bubbling over of high spirits.

Decries All Fear of Athletic Heart

College students need no longer fear that four years of hard football or track work will leave them with a shaky "athletic heart" in middle age. Experiments by Dr. Burgess Gordon of the Boston Peter Bent Brigham hospital on men and animals revealed that the heart, instead of enlarging after strenuous exercise, actually shrinks. Furthermore, no enlargement of the heart resulted after prolonged athletic training.

Dr. Gordon made his observations on Boston marathon runners, and rabbits with normal and abnormal hearts. The rabbits were exercised to exhaustion, and X-ray pictures taken immediately afterward revealed a shrinkage which took time to

disappear. The strabbed hearts of marathon runners also got smaller, Doctor Gordon said, and did not return to normal for several hours. Athletes were studied to note any permanent enlargement of the heart which could be blamed on the exercise, but it was found that the most prolonged vigorous efforts did not produce the much dreaded hypertrophy of the heart.

Thurston had been a bank clerk, losing his position in the merger of banking interests. But he had possessed sound commercial faculties and, backed to some extent by his uncle, he had started raising growing in the Fresno valley. Now he owned hundreds of acres and was rated almost a millionaire—soon to pass that mark.

Henry Vedder was editor of the Pioneer, a weekly published in Golden, of recognized literary merit. His wife had a leaning toward modern esthetics, extending to her gown and, her mode of hairdressing. She apparently saw nothing except through the medium of her husband and she hung on his every word in the attitude of one who eagerly waits the opportunity to encore the performance of a favorite dramatist.

George Brompton was an artist who specialized in mural work. He was the most diffident of all the company, with an especial shyness toward Carmen Wilson, which that vivacious personage did not appear to regard as the kind of tribute to her charms that she preferred.

Thurston and Betty Clinton had ridden down Hermans canyon to the picnic on horseback. The rest had come in a hackboard, by the longer road, a wagon preceding with the materials for the barbecue. Luis Padilla had come mounted. The vehicles and the horses were stowed in the old barn. The whole party was returning to El Nido in the early evening, where Maria was now preparing a fitting dinner for the festa of her young senorita's birthday.

"You are to come, too," she insisted to Caleb. "And stay over tomorrow. I am not to be denied anything today and I make that an order. You need not feel that you are crowding or were not included in the original invitation. There is lots of room."

"You have made it an order," said Caleb. "That settles it."

Here again was a different side to the girl, he thought, as he listened to her lighthearted talk, admiring her quick wit. He caught himself watching her closely whenever she laughed. The inside of her mouth was as pink as a kitten's and she laughed without reserve, so that one caught a glimpse of even rows of teeth that needed no dentist, backed by the rosy glow of health.

Caleb enjoyed himself thoroughly, the food, the company, the talk and the shady spot beside the stream.

After the meal, Betty Clinton proposed an excursion. Vedder claimed to have had an inspiration for a poem and said that he was going to try to put it on paper in the old garden. His wife was no more to be detached from him than a lunge trap a rock. Clinton himself made the excuse that he was not feeling especially energetic.

"Then Mr. Brompton must stay to keep you company," announced Carmen. "You and Mr. Clinton can discuss that pioneer panel, Mr. Brompton," she went on to Caleb, while Brompton smilingly acquiesced in the arrangement, though the smile was as wan and lacking in warmth as a winter sun, "is working on a set of panels for Judge Fleming's new house. They are to represent California, past, present and future. And Mr. Clinton is brim full of pioneer lore, aren't you, Mr. Clinton?"

It was obvious that Carmen Wilson intended to make the trip to the lookout a foursome. Clinton smothered a smile. Brompton seemed to be used to this sort of thing and the four started.

They were less than half way when Betty Clinton suddenly missed her camera.

"I have been intending to take a photograph of that view for two years," she exclaimed. "The light is wonderful. Wendell, you'll get it for me, won't you? We'll wait here. It's in the hackboard under the seat."

Thurston went swinging off on his errand and the three sat down to be comfortable until his return. The change of scene seemed to have put Betty Clinton in more serious mood.

"Have you found your opening yet?" she asked Caleb.

It looks as if Carmen Wilson intends to capture Caleb. Does Betty care?

(TO BE CONTINUED.)

WEEKLY South-West NEWS ITEMS

The Arizona Good Roads Association held their mid-summer meeting at Flagstaff.

A dozen states were represented at the Clifton-Springville highway opening at Hannagan's Meadows, near Clifton, Ariz.

At the regular meeting of the commissioners of Otero county, New Mexico, the sum of \$1,500 was put up for the Alamo-Cruces road.

According to word received from Washington, Las Vegas, N. M., is on the list for a new federal building, to cost over \$140,000, the work to be started during the present year.

After being out for five hours, the petit jury at Las Vegas returned a verdict of guilty of manslaughter in the case of Claude Edward Bartino, charged with the murder of Jim Bell.

A terrific blast from some unknown cause, followed by fire, destroyed three buildings in the heart of Roswell's business district and caused damage estimated at from \$20,000 to \$30,000.

The sheep in New Mexico, as a whole, have wintered splendidly, with practically no losses; the lambing is almost 100 per cent, and the sheep business, like that of raising cattle, is on the upward trend.

The Mohawk valley irrigation district has been authorized by the Arizona State Certification Board to proceed with its project of erecting flood control levees along the Gila river. The cost of the work is estimated at \$140,000.

With Albuquerque fellow citizens of Carl Magee, editor of the State Tribune, saying, "It couldn't have happened any other way," and with hundreds of messages pouring in, congratulating him on the outcome of his trial on a charge of manslaughter, the editor is back on his job.

A crop survey of the Rincon and Mesilla valleys, including that part of Texas included in the Mesilla valley, shows a total acreage signed up for water of 87,541 acres, including 11,423 acres in the Rincon valley, 65,749 in the Mesilla valley and 10,369 in the Texas part of the Mesilla valley.

Felipe Roos, 18-year-old Mexican youth, who holds the record for effecting escapes from county and state institutions, was sentenced at Prescott to serve a term of not less than three years or more than five in the state penitentiary, having been found guilty of automobile theft.

The Arizona Historical Pageant, to be held November 6-7 and 13-14 at the Casa Grande ruins, has chosen for its device a mystic emblematic design found only on the walls of the ruins and on ancient coins unearthed on the Island of Crote, legendary home of King Minos and his man-eating Minotaur.

Clyde Tingley, mayor of Albuquerque, joined in a hostile altercation at Las Vegas with Mike Jaramillo of the state comptroller's office, which resulted in the arraignment of both men in the Police Court. They pleaded guilty to speeding and disturbing the peace and were fined \$25 each by Police Magistrate C. N. Douglas.

Adequate flood protection for Hatch, N. M., and many acres of farm property is now assured with the signing of the right of way contract by the last property owner on the prospective route. Subscription money has been raised to put this project over in a safe and adequate manner.

The "Visitors Welcome" sign will be hung out this summer at Pueblo Bonito, Chaco Canyon, New Mexico. Dr. Neil M. Judd, leader of the National Geographic Society Expedition to Chaco Canyon, made this announcement on the eve of his departure from Washington for his sixth and probably last year of work at Pueblo Bonito.

Almee Temple McPherson, evangelist of the church of the Four Square Gospel, and pastor of Angelus temple of Los Angeles, whose followers had given her up for dead, was, to use her own words, "resurrected from the dead" at Douglas, Ariz., when she escaped the clutches of her captors, who had held her prisoner since May 15.

The governor of the state of Arizona cannot parole prisoners from the state penitentiary, the Supreme Court ruled in the case of the State and Robert Sims, former prison warden, against the Maricopa County Superior Court, Judge M. T. Phelps and Clerk Claude Berryman. This power is vested solely in the State Board of Pardons and Paroles, the tribunal opined.

Arizona stockmen, owning more than a million head of sheep, will save on both ends of their annual spring "drive" from the deserts of southern Arizona to the high mountain plateaus of the north because of the unprecedented spring rains this year.

The most unique of all Indian ceremonies will be observed at Gallup on August 25, 26 and 27 by fourteen tribes of Indians, as they appear in more than two dozen different dances depicting their supplications to the Great Spirit.

Community Building

Schedule of Odd Jobs Will Help Home Owner

It is a good thing to have a month-by-month schedule of repairs for the home, so that the various odd jobs can be anticipated and done in the proper season. A midwinter blizzard is no time to patch a leaking roof, nor is the fly period suitable for repairing screens. There is also the point of service and economy in buying equipment, as a heating plant in the off-season, and likewise in hiring certain work to be done.

The following schedule of odd jobs and repairs for the summer and fall, which may be modified to suit local conditions, is recommended by John R. McMahon, a national authority on home ownership, in Popular Science Monthly.

July: Make thorough repairs on the roof. Replace all missing or rotted shingles and stop leaks. Inspect gutters and leaders for patching, painting or replacement.

August: A good time for excavations of any kind. If foundations or cellar walls need tarring or cement plaster, do it now. All kinds of general building can be done without much need for weather protection.

September: If a new heating plant is needed install it now. Apply weather stripping. Renew floors. Fix up the coal bin and put in a supply of winter fuel.

October: Get the heating plant ready to fire up. Clean chimney from the roof down. Point up loose bricks with cement. Connect furnace smoke pipe with new if required.

November: Take down screens and screen doors. Rake up leaves around the house. Start furnace.

Mistakes in Building One's Home Are Costly

All normal men and women plan, some day, to have a home of their own—a place with trees, flowers, a garden; a home for the children. But most people building their first house usually make mistakes that can be avoided. An architect, in an article on home-building in Liberty Magazine, says: "Most architects make a mess of the first house they build for themselves. I made one of mine. I was joshed about it so much that I decided to let a few of the wife's wishes prevail in my next one—there was bound to be a next one, for the mistakes in the first were too accusing. "Instead of going at the job from a running jump the next time, I'd take counsel with my wife all the way through. No building again in a valley, with its wet mornings when the hill tops were bathed in sunlight. No western exposures, with their sun-baked rooms. No more scourge of mosquitoes. No laboring uphill through snow and slush on my way to work—that was a job in itself. No, in our new home we'd eliminate most of these bugbears. We'd live on a hill!"

Standardized Cities

Fifty years from now the traveler in America will be impressed with the similarity in general plan and appearance of American cities. This has been made certain by the passage of zoning ordinances in practically every important center of population in the United States. Latest figures by the Department of Commerce indicate more than half of the urban population live in zoned cities and towns. In 1910 only a tenth resided in communities where zoning ordinances governed building activities and city development. The number of zoned cities increased from 6 in 1910 to 73 in 1921, 265 in 1923 and 425 in 1925. Grouped according to population, 47 of the 68 largest cities in the United States having over 100,000 population and 150 of the 257 cities and towns having over 25,000 population have zoning ordinances in effect.—Lincoln Star.

Rose-Trellis Worth While

An alluring little rose-trellis is a fascinating adjunct to any country or suburban home, or, in fact, any home that is not cramped for space. Even the amateur carpenter can construct an arch like this, since it is little more than an arch over a seat. The arch is made of lattice work so that a climbing vine may find a firm hold. A back of open wood-work for the seat is in keeping with the airy nature of the trellis. The whole should be painted either white or green. White is the more effective as a background for the greenery of the vines and the bright color of the pink or red roses. A comparatively small space will provide room for this bower.

Cities With Zoning Laws

Half the urban population of the United States live in cities that have been laid out or rebuilt to comply with modern principles of zoning, according to a communication from the United States Department of Commerce. The number of cities zoned at the present time is 486, the communication states. In 1915 only six cities of the country had zoning laws or ordinances. Cleveland is one of the cities in which the zoning and planning commission is working out a specific program.

ROAD BUILDING

HARD SURFACED ROADS GROWING

Like motorists who ride over them, hard-surfaced roads get "tired" and require periods of rest that they may recuperate. Prof. S. S. Steinberg of the University of Maryland, assistant director of the highway research board of the national research council, has discovered:

"Considerable attention is being given to determining the causes of cracking in hard roads," said Professor Steinberg. "The extent of cracks in a slab is dependent on the underlying soil, the quality of the material used and the loads the pavement must bear. When a vehicle passes over a pavement the slab is deflected. The result is that under traffic the road is subjected to a wave action, the slab rising and falling with each passage of a wheel. On roads under heavy traffic at high speeds this motion may be repeated many hundred times an hour.

"Experiments simulating these field conditions result in the discovery that the material is subject to fatigue, which, in many respects, is similar to muscular fatigue in human beings. After continued rapid application of load the normal elastic properties are overcome and the fatigue limit is reached. The result is a break and the appearance of a crack in the road. "The similarity to muscular fatigue is further evidenced by the fact that if before failure it is permitted to have long periods of rest it recovers its ability to resist the applied forces, and the fatigue limit, or life of the slab, is extended."

A recent improvement described by Professor Steinberg is a new kind of cement which gives greater strength in 24 hours than is developed by the ordinary cement in 28 days. This opens up remarkable possibilities in hurrying road construction.

Money Spent for Roads Excellent Investment

We of Minnesota are still jangling over the bankrupting sums of money that are being apportioned for highway construction—that is, some of us are, says the Hibbing News. Others realize the fact that money spent for good roads is like laying money away in the bank—only that good roads pay interest that would soon bankrupt the strongest bank on earth. And at that, this great, rich, glorious state of Minnesota is spending but a tithe of what some states are putting into new and better highways. We get up on our hind legs and fairly screech when a twenty million dollar road bond issue is proposed, while the fifth rate state of Florida thinks nothing of spending two hundred and twenty million dollars for road building. Minnesota can better afford to spend a sum like that than Florida can, and it more than either Florida or Minnesota really need to keep a highway system even with the times. Give Minnesota a hundred millions to spend on roads and it will get more real value out of it than Florida can out of five times that amount. Today Minnesota stands third in the number of tourists received in a season, even with its lack of roads. But that cannot be accepted as an excuse for not spending in full keeping with the wealth and importance of the state.

Federal Aid Restricted

Federal aid in road building is bound by two considerations: First, that the type of road to be constructed with government aid must meet with the approval of the director of the bureau of roads; and second, that help can be given only on such roads as have been designated interstate. The same rule in purpose holds with respect to state aid to counties. Only intercounty roads receive state aid or are built by the state outright.

Good Roads Hints

It is said by research workers that motorists save annually \$1,630,000,000 by the use of 290,000 miles of gravel and hard-surfaced roads in this country.

If it were not for schools and highways it wouldn't cost much to run the state, but if it were not for schools and highways, it wouldn't be worth running.

Our highway program seems to be well stabilized at approximately \$1,000,000,000 a year. It is the largest public works job the world has ever known—and the freest from corruption.

Kansas will have 8,640 miles of paved highway in 1940, according to Walter Van Buck, state highway engineer.

The state of Alagoas, Brazil, is building the most important automobile highway it has attempted in recent years.

Canadian highway development last year cost \$150,000,000. There are about 400,000 miles of highway in the Dominion, 85 per cent of which are unimproved earth, 10 per cent gravel.

RADIO

Dr. C. B. Joffe of the Radio Laboratory of the Bureau of Standards. With a 250-Watt and a Type "N" Electron Tube.

By DR. ALFRED N. GOLDSMITH
The quality of reproduction of music in the home depends on many elements at the transmitting and receiving stations. Acoustic synchronizing, or the accurate re-creation in the home of the sound waves produced in the studio, is the determining factor in the enjoyment of radio programs. Few people realize the very important part played by vacuum tubes in the receiving set.

From the standpoint of securing real musical results in the home tubes must meet a number of difficult specifications. While high-grade tubes do, as a matter of fact, meet such specifications, it is by no means uncommon to see the entire circle of broadcast transmission and reception broken and tone quality ruined by the use of unsuitable or unreliable vacuum tubes.

Considering, first, some of the electrical constants of the tubes and without going into the technical details of the matter, vacuum tubes have a certain characteristic which is known as the amplification factor. If the amplification of the tubes used in the receiver is too small, weak and unnatural sounding signals will result. If, on the other hand, the amplification is too great in its relation to the design of the receiving set, the receiver may "oscillate" or produce squealing or howling notes which cannot be conveniently eliminated or controlled.

Internal Impedance.
Another important constant is what is known as the "internal impedance" of the tube. Roughly speaking, this is a measure of the opposition of the tube to the flow of plate current through it. It is the factor which limits the current drawn from the "B" battery. If the internal impedance is too small there will be an excessive drain on the plate batteries without corresponding advantage and plate battery renewals will be uncomfortably frequent. On the other hand, if the internal impedance is too high, weak signals of unsatisfactory character will be produced and tone quality on the average loud speaker will be distinctly unsatisfactory. Accordingly, internal impedance of vacuum tubes must also be held within carefully considered limits.

The elements inside of modern vacuum tubes are close together, and they, in conjunction with the wires leading from them to the contact pins in the base of the tube, constitute what are known as electrical capacitors. In other words, there are miniature condensers formed by the filament, grid and plate, the capacities of such condensers residing inside of the tube. It is a fact that in many highly efficient circuits these internal tube capacities definitely influence the electrical behavior of the set. Receivers which are "neutralized" or "balanced" against tendency toward oscillation (howling) are necessarily so balanced for a particular tube. If the internal capacity of tubes varies too far receivers which would otherwise properly function will begin to produce uncontrollable noises, generally of a buzzing or whistling nature, whereupon the musical enjoyment of the audience is destroyed.

The Filament.
Inside the vacuum tube is a glowing element called the filament. It is a sort of reservoir from which streams a current of electricity in the form of a myriad of tiny electrical charges called electrons. These pass from the filament to the plate inside of the tube and their flow is definitely controlled by the grid element between the filament and the plate, which acts as a sort of electric valve, turning on and off the flow of current through the tube and presumably in accordance with the shape of the sound originally produced in the broadcast studio. This, in general terms, is the process whereby the original signal is reproduced in the home. It is clear that an essential portion of this process is the emission of a sufficiently copious stream of electrons from the filament. If the stream is reduced to a mere trickle the signals will become weak and distorted. In this case, even for a low volume of sound in the home,

there will be rattles and distortions in tone quality.

Vacuum tubes used as amplifiers require a high vacuum. Unusual and apparently extravagant precautions must be taken to extract gases from the bulb and even from the metallic elements inside the tube and the very glass itself. The presence of gas in the tubes shortens its life and causes it to be "noisy."

The delicate elements inside of a vacuum tube, if jarred, will vibrate. Some makes of tubes are peculiarly sensitive to mechanical disturbance and easily produce a "ringing note" if the receiving set is touched or tapped. Particularly in this case if the tube sockets are not effectively cushioned and elastically supported. Vacuum tubes which produce a loud and prolonged ringing note when tapped will not give the same satisfaction as "non-microphonic tubes" which are free from this defect. In any case the vacuum tube mounting should be appropriate.

Suitable Batteries.
A brief mention of the importance of suitable batteries in good condition in their relation to tone quality is pertinent. When the "A" or filament batteries of a receiver run too low the tubes will not light up fully and the signals, besides being weak, are frequently distorted or scratchy in quality. A run-down condition of the "B" or plate batteries similarly causes a noisy, or weak signal with distorted quality, or may even give rise to disagreeable howling sounds. The "C" or grid battery also plays a great part in the production of high-quality music.

The best rule is to select reliable tubes, each suited for the particular purpose to which it is to be put in the receiver, and then not overwork these tubes nor neglect the upkeep of the batteries feeding the tubes.

RADIO WAVES

Place the heated soldering iron in an asbestos-lined preserving jar to keep it hot when working on your aerial.

To space turns evenly on coil tubes, guide the wires with a comb, being careful not to strip the insulation.

Antenna and ground leads to the set should be as far apart as possible. Keep one at right angles to the other if you can.

When the batteries are fully charged and the volume gives out, have tubes tested. They may need re-vivifying or replacing.

Ammonia or soda water, quickly applied, will prevent damage from acid dropped while taking a hydrometer reading of the "A" battery.

If your two-step amplifier as a whole causes distortion, try a .001 mfd. fixed condenser across the plate and grid of the last transformer or use a power tube in the last stage.

When the sealings wax at one of the binding post clips on a "B" battery does not afford full coverage, melt a little of a stick of the wax to make the whole "B" battery envelope airtight.

Shielding of sensitive sets increases selectivity. Line the cabinet with copper or brass sheeting to keep unwanted energy from coils, but keep the shield out of the field of the radio-frequency instruments.

When your set won't tune to the short wave-lengths, try disconnecting the aerial at the point where it enters the house and using as an antenna the piece remaining. This cuts the fundamental wave-length of the antenna system, which also includes the ground.

Winding of Coils

To space wires on coils the correct distance, start the coil with thread and wire, at the same time applying considerably more tension to the wire than when no thread is used. After the coil is wound and the end of the wire fastened, the thread may be removed.

ETIQUETTE CODE FOR CAR DRIVER

Many Forget Golden Rule While Operating Auto Along Highways.

Good manners in motoring should be given consideration by thousands of drivers who pride themselves on their etiquette at home, in offices and while visiting but who forget the Golden Rule while operating a motor vehicle, suggests David Van Schaack, vice president of the National Safety Council, who advises:

Motorists should make allowances for both other drivers and pedestrians. The driver, who splashes water or mud on other people has a peculiar sense of humor. "Automobilists should give proper warning, not only to other motorists and pedestrians but even to animals, which are valued by their owners.

Use Horn for Safety.

The horn shouldn't be used for anything save safety purposes. Don't signal thusly to attract the attention of people inside houses. Remember, some folks sleep at all hours of the day, some are sick or nervous and your honking may annoy them. Your headlights should receive the proper attention so they won't cause inconvenience and danger to other people.

Brakes that squeak annoy people living along the streets through which you are driving. Have your brakes tested and adjusted regularly.

Trying to steal a few feet of space, instead of remaining in the proper position, not only annoys and inconveniences other folks, but is dangerous.

Don't try to hog the road. Other motorists have just as much right to our streets and highways as you.

Concentrate on your driving. Look where you are going. Stay in line.

Eschew One-Arm Driving.

It is poor etiquette and reckless driving to be a "one-arm motorist." Save your demonstrations of affection for a more appropriate time and place.

It is bad taste to try to flirt while motoring. Don't think that because you are in an automobile you are privileged to attempt to vamp every pretty girl who passes your machine.

Retain your poise even if you get into an accident. Of course, the other fellow always is to blame. Swearing at the other party is not only decidedly poor etiquette but bad judgment. Both of you may get hurt or land up in a police cell.

Being a bluffer in a poker game may sometimes win the pot, but trying to bluff the other driver into thinking you have the right-of-way and are going to beat him across the street, may result in an accident. He, too, may be a bluffer.

When riding in somebody else's car, don't be a back-seat driver. Give him a chance to drive.

In the old days children were seen but not heard. Give them a chance to cross the street or they may be neither seen nor heard.

It is not good taste to engage in a dispute with a driver of a commercial vehicle. His vocabulary of cuss words is often used while out driving and in extreme cases his strong-arm methods may result in convincing you that it is best to always be a gentleman.

Proper Way to Keep Gas Tank Cap When Filling

There appears to be no good reason why a motorist should stop for gasoline at a filling station, then drive away leaving the fuel tank cap to topple off the running board, trunk rack or wherever he happens to have laid it. The first thing the average car owner does when he removes the cap is to put it where he is likely to forget it. Sometimes he leaves this for the attendant to do.

Why not make a habit of putting the cap in a coat pocket?

If mildlady happens to be driving, and has no pocket, why not lay it on the floor of the car?

It is excusable to forget to put the cap back on the tank, but not to lose it.

Carburetor Easily Hurt by Using Cotton Waste

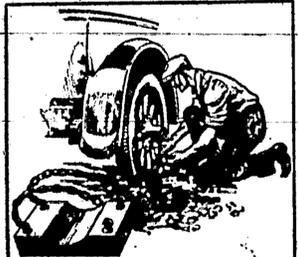

In cleaning your engine, it is a wise policy not to use waste. Very often the lint of cotton waste sticks to the various engine parts and when the engine hood is put down is sucked into the carburetor. When this occurs, the flow of fuel is made irregular and sometimes stopped altogether. On many occasions the cause is not readily found and much time is wasted in blowing out the fuel line only to find the trouble in the needle valve of the carburetor.

Instead of waste, it is much better to use some clean piece of old cloth which has a soft finish and does not give off the lint that is so objectionable in the case of waste.

What holds true in the case of waste lint is also true with road dust and dirt. Under ordinary conditions the engine hood and the engine underpan serve to keep a great majority of the dust and dirt out of the air intake to the carburetor. Sometimes drivers are prone to raise their engine hoods in hot weather because of the belief that permitting a free exit of air through the sides of the hood will prevent the engine from overheating.

Easy to Pull Out of Mudhole

Two blocks of wood, some short pieces of chain, and a few eyebolts will supply you with material to build yourself a sure cure for getting stuck in mudholes. As shown in Fig. 1, the wood blocks are cut as large as possible and yet clear the mud guards.

Attaching Wooden Blocks to Rear Wheels to Aid in Getting Out of a Mudhole.

and then the eyebolts are fitted at each corner. The chains can be fitted at one end with snap hooks. At each revolution of the rear wheels, the back of the car is raised up about eight inches and moved along about two feet, finally getting the car clear of the mud.—Popular Science Monthly.

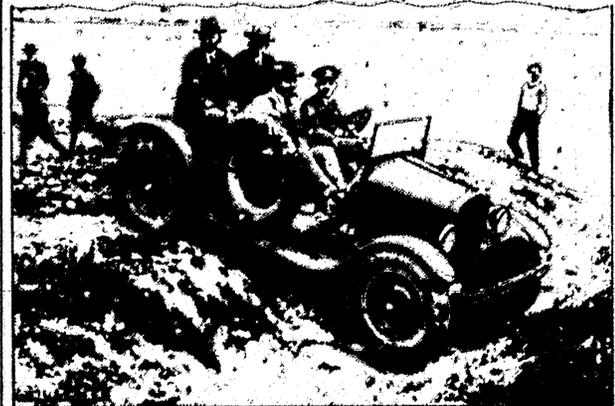

More Attention Should Be Paid to the Magneto

Do not think because the magneto gives you such faithful service that it never has troubles of its own. You probably give it a drop of oil in each oil lead once a week. But the distributor should be cleaned occasionally, using a brush or a piece of cloth dipped in gasoline. The dust which accumulates on it will soon short-circuit it, causing the engine to miss explosions. Dust sometimes accumulates inside the distributor, which must be removed for cleaning. Another trouble is pitting the platinum points of the circuit breaker. When this occurs no current can run at all. If this trouble is suspected run a strip of fine (not coarse) emery cloth between the points a few times. Do not attempt to file them. If circuit-breaker gap is out of adjustment, do not attempt to remedy it yourself.

Height of Chassis Over Road Is Very Important

Hanging a chassis at a height to give an all-over road clearance of ten inches is most satisfactory on the greatest possible variety of road conditions, engineers declare as a result of prolonged tests. The roadability of any car depends to a great extent of the distance of the weight center from the road surface. If the car is set too high, this elevation of the body weight makes it top-heavy and taking sharp turns is hazardous while handling the car is harder. If the car is too low to the ground axles and other projecting points strike the higher road elevations and are a handicap in deep snow or ruts.

SECRETARY INSPECTS CROSS COUNTRY CAR

The Ordnance department, in conjunction with the equipment boards of the infantry, field artillery, cavalry and corps of engineers, have erected this type of cross-country car, to provide light vehicles with a high degree of mobility. The service test of this type of car is sufficiently advanced to permit its standardization by the War department for issue to organizations heretofore equipped with motor cycles and light trucks. In the front seat can be seen Secretary of War Dwight F. Davis, and in the rear Maj. Gen. John L. Hines, chief of staff, and Maj. Gen. Fox Connor, deputy chief of staff. The demonstration was made in Potomac park over very rough ground.

Lesson for July 11

THE CHILDHOOD AND EDUCATION OF MOSES

LESSON TEXT—Exodus 2:1-10; Acts 7:22.

GOLDEN TEXT—Train up a child in the way he should go and when he is old he will not depart from it.—Prov. 22:6.

PRIMARY TOPIC—The Baby Moses. **JUNIOR TOPIC**—A Little Girl Helps. **INTERMEDIATE AND SENIOR TOPIC**—Training for Life's Work. **YOUNG PEOPLE AND ADULT TOPIC**—The Blessing of a Religious Home.

I. Moses' Parentage (v. 1).
Both father and mother were of Levitical stock. Being from the same tribe, they had a common bond of interest and sympathy. Amram had the good judgment to choose for a wife a woman who possessed sympathies and ambitions in harmony with his own.

II. Moses' Birth (v. 2).
Two children were born to Amram and Jochebed before Moses—Aaron and Miriam. However, Moses was the first one that his mother was assured was to be the deliverer of the chosen people. There was something striking about this child which caused her to believe that it was sent of God. She saw that he was a "goodly child." In Stephen's speech (Acts 7:20) he asserts that the child was "exceeding fair," or fair to God. No doubt his mother believed him to be the deliverer of his people and instilled that truth in his mind from childhood. Because of this belief she had confidence that somehow God would save him from the cruel hand of the king.

III. Moses' Preservation (vv. 3-8).
Though Pharaoh's edict was in force, his mother's faith was such as to cause her to ignore it and hide Moses for three months. The hiding of the child was not because of fear, but because of faith (Heb. 11:23). It was her faith which made her brave to ignore the king's edict. Though Moses' mother had faith, she did not ignore the proper use of means. Pharaoh's plan was that every male child should be destroyed, but God had planned otherwise for this child. Perhaps the story of how Noah and his family were saved in the ark suggested to his mother the expediency used, namely, the ark of bulrushes. Doubtless she was familiar with the place where Pharaoh's daughter came to bathe, and believed that somehow through her the child would be saved. She placed the ark at the particular place where it would attract attention. It is interesting to note the steps as pointed out by another, by which God's plan was carried out.

1. The mother's wit.
She placed the baby at the proper place and at the opportune time. Then, too, Miriam was no doubt stationed as a watch to aid in the affair (v. 4).

2. A faithful sister (v. 7).
Had Miriam not been faithful, humanly speaking, Moses' life would not have been preserved and properly nursed and educated at the proper time. This should be a worthy example for every sister, causing her to exercise watch and care over her brother.

3. A woman's curiosity (v. 5).
This strange object among the flags attracted the attention of Pharaoh's daughter and she directed her maids to bring it to her.

4. A woman's compassion (v. 6).
When the ark was brought and opened the baby wept. That woman has lost her feminine instinct who is unmoved with compassion at the cry of a lonely, motherless baby.

5. The baby's tears (v. 9).
The tears aroused her womanly instinct, and at the suggestion of Miriam the baby's mother was hired to nurse her own child. No one can nurse a child so well as its own mother.

IV. Moses' Education (v. 10).
1. Moses was first educated at his mother's knee.

During this time his character took form. Here his mind was filled with the Word of God and he was made acquainted with the Jewish hopes and prospects. In these early years no doubt the indomitable purpose was fixed to suffer affliction with the people of God rather than to enjoy the pleasures of sin for a season (Heb. 11:24-26). Seeing by faith the destiny of her child, Jochebed made good use of her time.

2. At the Egyptian court (v. 10).
It was here that he became acquainted with all the wisdom of the Egyptians (Acts 7:22). This was of great importance. It peculiarly qualified him to be the lawgiver and historian of his people.

Our Present Lot
Of nothing may we be more sure than this: If we cannot sanctify our present lot, we could sanctify no other. Our heaven and our Almighty Father are there or nowhere.—D. Martineau.

Purity
If a man is so pure-minded that he will not have anything to do with people who are not pure-minded his purity takes him out of the category of humanity.—Henry Ward Beecher.

ATTRACTIVE WOMEN

If You Would Be Attractive You Must Be Healthy

A beautiful woman is always admired. There are many types of beauty. But no woman can be truly beautiful unless she is healthy. Radiant vitality is always attractive however plain a woman's features may be.

Many a woman has found her health improved thru the use of Lydia E. Pinkham's Vegetable Compound. Weakness, loss of weight, and a pale complexion were a few of the things of which Mrs. J. C. Taylor of Box 211, Tallahassee, Florida, complained before she started taking Lydia E. Pinkham's Vegetable Compound. "I could not even sit down and talk to a friend for any length of time," she states, "I would forget what I was talking about and felt so blue." Mrs. Taylor is so pleased with the work of the Vegetable Compound that she keeps a bottle of it in the house at all times—and when it is empty, her husband makes sure that she has a new bottle. "I have regained my strength," Mrs. Taylor writes. "I can do all my housework now and I feel just fine."

Lydia E. Pinkham's Vegetable Compound is made from roots and herbs and has been growing in popularity among women for over fifty years.

BEAUTY FACE CREAMS

LADIES, RETAIN YOUR YOUTH & BEAUTY! It is your right and duty to make yourself attractive. We will send you over 90 of the best recipes, formulas and beauty secrets, used by noted beauty specialists of this and foreign countries. Booklet No. Money back if not as represented. Full particulars on request.

Peter N. Haan, 241 Crest Ave., Ann Arbor, Mich.

Healthy, Happy Babies

The best way to keep baby in crowing, contented health is Mrs. Winslow's Syrup. This safe, pleasant, effective remedy regulates the bowels and quickly overcomes diarrhoea, colic, flatulency, constipation, and teething troubles.

MRS. WINSLOW'S SYRUP

The Infants' and Children's Register is best for baby. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Open formula over everywhere.

OFFICE PHONE NUMBER 21

The Little Red School

A few days ago a nation-wide spelling contest in Washington was won by a Kentucky Miss who has secured all of her education up to this time in a one room schoolhouse. The fact of the one-room schoolhouse was regarded as so noteworthy that most of the newspapers who told about the spelling contest featured it in the headlines.

And yet there is nothing so remarkable about this after all. Up until recently the great majority of our public men acknowledged the one-room schoolhouse as their starting point, and there are still many in active life, successful in one way or another, who harken back to the same kind of an educational beginning.

Now of course we are building schoolhouses a great deal more modern in outline. In addition to the class rooms, there are assembly rooms, laboratories, gymnasiums, etc., not only in the cities and towns but out in the rural districts too.

This is all well enough, and we ought to pride ourselves on our interest in education. At the same time, it must be remembered that artistic buildings, with all modern equipment, will not take the place of brains, character, and individual effort. The youngster who doesn't want to learn, who has no ambition to become a useful citizen will fail in a modern classroom as easily as in a log schoolhouse and the ambitious youngster will not be defeated by lack of all modern conveniences.

This does not mean that we ought to give up our modern sanitary buildings and go back to hewn log desks. But we ought not to lose sight of the fact that something besides modern equipment is necessary. The value of schooling does not lie entirely in the assimilation of facts. Discipline and character building ought to be developed as well as scientific knowledge. This is of course in part up to the teachers too. If they are earnest, patriotic, practical Americans, then the pupils will get the right sort of training. But if they are infected with the virus of socialism, either pink or red, the youngsters are apt to get the wrong start in life, and spacious assembly halls and modern laboratories will not save them.

And we can be thankful that nearly all of our common and high school teachers are of the real American kind.

In the meantime the success of the bright little Kentucky miss in the Washington contest is proof of the fact that the little red schoolhouse on the side of the hill has not been entirely distanced.

Primaries and Bossism

One of the arguments used by so-called reformers in putting over the primary election system was the party bosses. Yet subsequent elections, under the primary have shown that the primary itself is especially adapted to the party boss. The selecting of candidates by primaries is the people's business, and the old saying still holds true to the ef-

The Best Drug Store ROLLAND BROTHERS

fect, that what is everybody's business is no one's business.

The result is that the boss with his machine well oiled, is better able to function than ever before. In the old days the boss was a party boss, amenable to party discipline, and the convention, whether boss-controlled or not, usually selected a list of candidates which would appeal to the people, because the first purpose was to win the election and this could be done only with a strong ticket.

The bosses under the primary, nevertheless, are not partisan, but personal bosses, and they rule quite as ruthlessly as any boss of the old days. And in addition to acting as the big chief, the boss is often a demagogue as well, for the simple reason that it is the demagogue who usually votes in the primary. Then the voters themselves get disgusted with the way things are run, and as a result the vote falls off year after year and we wonder what is the matter. Party responsibility has given way to political anarchy and personal bossism, and nobody is better off except the demagogues who rule through the minority party. As the Cincinnati Enquirer well puts it:

"In the broad view, the Republican and Democratic National Committees are impotent today. The party discipline men once feared and respected is no more. The primary radically has modified political conditions. The primary system effectively and effectually undermined party authority in the United States. With its coming, the big men in the national political life disappeared. Acclaimed as a democratic method of fairness and efficiency, it, in reality, operates as a force for the destruction of the two-party system in America. If this is what the people of the United States desire, they have departed far from the theories of Jefferson and Lincoln.—National Republic.

Astonishing Revelation in Frigidaire

Electric refrigeration is the outstanding industrial development of the present decade says J. W. Cooper who has just returned from Dayton, Ohio, where he had a part in ground breaking for a new \$30,000,000 Frigidaire expansion project. Mr. J. W. Cooper is the local Frigidaire distributor.

of General Motors and E. G. Biechler, president and general manager of the Delco - Light company, a subsidiary of General Motors and makers of Frigidaire, turned the first sod. Sixty-five Frigidaire distributors, with nickled shovels then took their turn.

The new Frigidaire factory will be one mile long. It will be in production early in 1927 and will have an annual output of 600,000 electric refrigerator units. Upon Mr. J. W. Cooper and the other distributors and dealers will fall the easy task of finding a market for this output.

"We expect to sell two or three times as many Frigidaires in this territory in 1927 as we will dispose of in 1926" said Mr. Cooper. There is a tremendous demand for electric refrigeration and this demand is growing steadily week by week.

"General Motors regards Frigidaire as one of the most promising members of its great industrial family and is ready to back it all the money necessary to enable it to command the field. It gives the household something new in the way of service and fits perfectly into the American scheme of living. General Motors expects the electric refrigerator to follow the

PUBLIC LAND SALE LINCOLN COUNTY Office of the Commissioner of Public Lands, Santa Fe, N. M.

Notice is hereby given that pursuant to the provisions of an Act of Congress, approved June 20th, 1910, the laws of the State of New Mexico, and rules and regulations of the State Land Office, the Commissioner of Public Land, will offer at public sale to the highest bidder at 9 o'clock A. M., Saturday, August 23rd, 1926, in the town of Carrizozo, County of Lincoln, State of New Mexico, in front of the court house therein, the following tracts of land, viz:

Sale No. 2220. The N1/2, Sec. 29; SW1/4, Sec. 20, Twp. 1 S., Range 10 E., N. M. P. M., containing 120 acres. The improvements consist of five houses, three corrals, well, windmill and tower, fencing, storage tank and shearing plant, value \$11,650.00.

No bid will be accepted for less than Three dollars (\$3.00) per acre. The successful bidder will be required to pay at the time of sale five percent of the amount bid, the cost of advertising and other costs incidental to the sale.

A copy of the form of contract will be furnished on application. All mineral rights in the above described lands are reserved by the State. The Commissioner of Public Lands, reserves the right to reject any or all bids offered at this sale.

E. B. Swops, Commissioner of Public Lands, State of New Mexico, June 11-August 20-11 weeks.

NOTICE FOR PUBLICATION Department of the Interior U. S. Land Office at Las Cruces, N. M.

June 9, 1926

Notice is hereby given that Henry F. Stephenson of Gran Quivera, New Mexico, who, on March 22nd, 1926, made Homestead Entry SR No. 029260, Roswell 052074, for All of Section 25, Township 1 South, Range 9 East, N. M. P. Meridian, has filed notice of intention to make final three year proof, to establish claim to the land above described, before Louis De Wolf, U. S. Commissioner, at Cedarvale, New Mex., on Aug. 4, 1926.

K. D. Stoes, Register J 18-July 16

NOTICE FOR PUBLICATION DEPARTMENT OF THE INTERIOR U. S. Land Office, Las Cruces, N. M. Serial No. 032345

Notice is hereby given that on the 29th day of May, 1926, the Santa Fe Pacific Railroad Company, by Howell Jones, its Land Commissioner, made application at the United States Land Office at Las Cruces, N. M. to select under the Act of March 4, 1913 (37 Stats., 1007), as extended, the following described lands, to-wit:

NE 1/4, Sec. 21, Twp. 4-S., Rge. 10 E., N. M. P. M. The purpose of this notice is to allow all persons claiming the land adversely, or desiring to show it to be mineral in character, an opportunity to file objection to such location or selection with the local officers for the land district in which the land is situated, to-wit, at the land office aforesaid, and to establish their interests therein, or the mineral character thereof.

Tariff for Protection

Many years ago, when the United States bought its steel from Europe, Abraham Lincoln said: "If we buy steel in a foreign country, you get the steel and the foreign country gets the money, but if you buy steel at home, you have in your own country both steel and money." Here is a truth as simple as two plus two equals four. It is a statement that a six-year old child could understand and appreciate. Building its economic structure on this policy, the United States has become the greatest and richest nation in the world. Even England, for ages incurably addicted to free trade, is at last getting tired of being the dumping ground of the world, for protection sentiment in England is growing by leaps and bounds. More than fifty countries have raised their tariffs in recent years.—St. Louis Times.

AGENT WANTED in Carrizozo Territory. Sworn proof of \$75 per week. \$1.50 an hour for spare time. Introducing Finest Guaranteed Hosiery. 126 styles and colors. Low prices. Auto furnished. No capital or experience necessary. Wilknet Hosiery Company, Dept. 41, Greenfield, Ohio.

We were told of a wizard who recently played ten games of chess and twenty-eight of checkers at the same time. A man that can keep all that in his head should be able to remember to mail his wife's letters.—Los Angeles Times.

Bughouse Foibles: An Umbrella mender in New Mexico.

The First National Bank of El Paso, Texas, with interest calculated to date of sale \$470.67 Special Master's fee 15.00 Accrued court costs, 23.00 Total \$508.67 together with all costs of sale. The further terms of this sale are that the purchaser must pay cash at the time the property is struck off to him. GRACE M. JONES, Special Master July 2-Aug. 23

Young At 60, Or Old At 40? Diet Decides

Women are as old or as young as their state of health. A woman may be young at sixty years or old at forty. It all depends on her physical well-being. Youth and beauty have a foundation in sound health. And food is easily the most important item in health. In giving consideration to the subjects of diet and beauty, women should not forget the food essentials that make for the preservation of teeth, hair, figure and complexion. Blame for round shoulders, flat chest and poor teeth among women is due in large measure to faulty diet, or, specifically, to a lack of lime and phosphorus. Milk, or evaporated milk, which is simply cow's milk with 60 per cent of the water taken away, is especially rich in lime. Because of the concentration of evaporated milk, which is regulated by government standards, it is of double the richness of ordinary market milk, as is shown in the following table:

Table comparing Ordinary Milk and Evaporated Milk with nutritional values for Fat, Sugar, Proteins, and Minerals.

A quart of milk a day for adults is recommended by doctors not only because of its high mineral content, but for the reasons that it helps keep the digestive tract in proper condition, strengthens the body to resist disease, and gives proper balance to the diet. Salads also play an important part in the dietary. Some sort of a salad, lettuce, tomato, fresh fruit, cabbage or vegetable, should be eaten at least once a day. Neither is the daily menu complete without a generous quantity of coarse, leafy vegetables, valuable for their high vitamin content. Fruit juices also have very beneficial properties. If a woman follows out the rules of diet, birthdays to her will be nothing more than an excuse for a celebration.

Who remembers the good old days when a girl who wore silk hose on week days was accused of being stage-struck?

Hoboes—1926 Models

FREE AUTO CAMP
1 Mile

circled the globe on twenty-six dollars. "Four of us traveled from coast to coast on fifteen dollars."

"We left for Florida with fifty dollars and came back with ninety."

Statements similar to these are heard frequently nowadays. Every one is traveling. It matters little, it seems, whether you can afford to travel. Just set out and Providence will take care of you, seems to be the formula.

At least, this was true until recently. Now, it appears, "bumming" one's way is becoming increasingly difficult. Interviews with recent adventurers who had set out with a burning desire and a five-dollar bill to see the world, all indicate that the world is becoming hard boiled and has grown tired of lending its co-operation to ambitious but practically bankrupt "bummers."

This is thrown in here at the beginning as a bit of precautionary information for those who, reading this, may find in it the spark which would set off that urge present in most of us at some time, to break with our surroundings and go. Five years ago you might have made a success of it, but today it's different. Too many have played the game. The sympathy of the world toward such enterprises is nearly exhausted. Ask those who have had recent experiences.

The hobo of yesterday was a clown character. He was more laughed at than pitied. Prudential men of one kind or another, he found the open road an avenue of escape from his burdens. It was a life of danger to which was mixed adventure and hardship, hungry days and hellish nights, and even jail and the reformatory.

The "blanket stiff," the most romantic of the hoboes, followed the early trails westward and crowded the frontier to the ocean. With the coat of the pioneer the "blanket stiff" has all but vanished. By his brown railroad, he built, and in turn, this thing he created served only to spell his doom, and create in his stead the train-riding hobo.

The Motor Tramp Arrives.
The paved highway and the automobile today is hastening the passing of the train-riding generation. The day of the motor tramp is here, and, across the face of the old school, it's a soft life. Train-riding was a man's game, and only men played it. If women ventured on the road they went carefully disguised.

But the automobile, invading hobo-land, changed things. Life is so attractive and easy that it may be followed by women and even by children. If the old hobo was a burden on society, he was a social problem merely because he was a transient and homeless man. A few meals and a short job would see him on his way. Few took him seriously. But the automobile gives us entire hobo families, resulting in any number of social and economic problems.

On the roads today are two classes:

the "hitch hikers" without cars of their own, and the car owners. There is a wide range of types in both classes, from the penniless, jobless family to the carefree hitch-hiker with money in his pocket.

The ranks of the hitch-hikers are made up chiefly of young folk, klunked, with packs on their backs. Equipped for hiking, they hike but little, once they have acquired the knack of gaining the sympathetic motorist's good will. Among them you will find the modern young woman out for experience, the college graduate spending his vacation before buckling down to work, and even high school boys wearing their first long trousers.

Young married couples too poor to own a car and too energetic to stay at home find this means to break with convention, to absorb a bit of worldly wisdom, and to enjoy the thrill never encountered in their years of humdrum existence in drab homes. For many the open road is indeed an avenue of escape.

They Play and Work.
Occasionally your hitch-hiker is forced to work. Here and there he or she will wrestle dishes in a restaurant, perhaps wash windows, mow lawns, or take any odd job that presents itself. For emergencies most of them have resources upon which they can draw. This is a wise precaution, for at times the labor supply in the odd-job market exceeds the demand.

Society may be just a bit bored by these hitch-hiking hoboes, with their flair for "self-expression" and the "new freedom." They are tolerated, however, for they present no considerable social problem. Generally they know where they are going and how they are going to get there.

The second class of modern hoboes—the "auto gypsy," the "silver family"—has become a pest to the towns and a trial to the cities in many sections of the country. From all indications their number is on the increase. They are most troublesome in the West, particularly along the Pacific coast, where food is plentiful, fuel is cheap, and the climate pleasant.

The hobo of the old school was a colorful gent who begged and pilfered as he went. While his exploits were spectacular, the social problems involved were not difficult. They could be jalled or driven out of town, bring women and children into the picture and such methods cannot be applied. The wandering family cannot be driven and they must not be sent away.

"Cheese it, de cops!" would scatter a campfire gathering of old-time hoboes. But other methods must be found in handling the auto gypsies.

Unleashed For Windfall
Once upon a time—say a dozen years ago—there was a man in Hyannis, Mass., relates the Boston Globe, who owed another man some money. It was only \$2.75, but since he didn't have the cash, he gave his creditor a deed to some wild land he owned way

who left the camps and parking grounds so generously provided in towns and cities.

A Bee-Line for Charity.
Arriving in town, the auto gypsy and his family seek out the nearest charitable organization. If there is no such body, he approaches the town officials. He wants work, he says. Meanwhile, his family throw themselves upon the charity of the townspeople.

If no work is found, the usual procedure is to stock the car with rations for a few days, fill the gas tank, and hurry them away. It's the easiest way out of an unfortunate situation. Both sides win: the town has rid itself of another charge, and the family has prolonged its miserable existence.

And a miserable existence it is—from the point of view of the individual who loves his home. Here is a hobo plus his family. Instead of leaving them and wandering alone, he takes his family along. The old train-riding hobo frequently was a family deserter, but in the new order of the family stick together. All their worldly possessions are in or strapped to their decrepit vehicle.

What happens to the children reared under such circumstances? What of their education? Will they, too, grow up to be hoboes? This is the gravest aspect of the many social problems arising from life on the open road. Pauperism breeds pauperism. True, the child learns many tricks, but they will be of little use in the ordinary walks of life.

The Country Has Been Kind.
As the family travels the education of the road child is interrupted again and again. Absence from school as long as an entire year is not uncommon. Already steps have been taken for reaching the truant child of the auto gypsy. Several counties in California have truant officers on motorcycles. Patrolling the highways, they are ever alert for these dodgers of the three R's.

Good roads, cheap cars and fuel make it easy for the auto gypsy. Until recently the country has been kind to his tribe. Enjoying the prestige afforded by possession of an automobile, he and his family have been regarded in the past as an exceptional case. "These poor folks have been unfortunate," thought the townspeople, touched deeply by the sight of a woman and her children, poorly clothed, dusty, tired, hungry. And so they helped them.

But as their tribe increased, and "these poor folks" came to be regarded as just another hobo family, sentiment began to change. "It's a hobo game, this 'bumming' your way about the country," say the exasperated people of town and countryside.

Inland to square the account. The new owner tucked the deed away among his papers and proceeded to forget all about it. Recently he ran across it and found he held title to some 10 acres of land that is easily worth, at the regular market price, \$100 an acre.

His Idea of It

THE KITCHEN CABINET

(By 1926, Western Newspaper Union.)
"Is it rainy, little flower?
Be glad of rain;
Too much sun would wither thee,
'Twill shine again;
The clouds are very thick, 'tis true;
But just behind them smiles the blue."

EVERYDAY GOOD THINGS

A new roll much in vogue at present is prepared just as one does Parker house rolls, and when folding the rolls add a small section of orange freed from membrane and seeds. Place in the tins to rise and just before going into the oven pour over a mixture of orange juice and powdered sugar. Bake until brown.

Hermits.—Take three-fourths of a cupful of sweet fat, add one-half cupful of sugar, two well-beaten eggs, one teaspoonful of soda dissolved in a tablespoonful of sour milk, one teaspoonful each of cinnamon, cloves and nutmeg and one cupful of currants. Mix well with flour to roll; sugar well before cutting into cookies.

Oatmeal Cookies.—Take three cupfuls of oatmeal which has been ground and toasted until slightly brown, add one-half cupful of sugar, one cupful of water or cold coffee and one cupful of shortening, one-half teaspoonful of salt and flour to roll. Bake in a quick oven.

Sugar Cookies.—Take two cupfuls of sugar, one cupful of shortening, one teaspoonful of soda and two teaspoonfuls of baking powder sifted into one quart of flour, four well-beaten eggs and a teaspoonful of vanilla. Roll, cut out and bake quickly.

Coconut Cookies.—Take one cupful of shortening, one and one-half cupfuls of sugar, two eggs, one cupful of grated coconut, one-half cupful of sweet milk, one-half teaspoonful of soda, one teaspoonful of cream of tartar, one teaspoonful of vanilla, two eggs and one cupful of coconut. Roll and cut, bake in a quick oven; use as little flour as possible.

Coconut Macaroons.—Cream one tablespoonful of butter with one-half cupful of sugar, add one beaten egg, one and one-half cupfuls of browned and ground oatmeal and one-half cupful of coconut. Drop by spoonfuls on a buttered sheet and bake in a hot oven. This recipe makes twenty-four.

Pies and puddings should cool slightly before covering with a meringue; if put in hot the meringue will be covered with dots of liquid.

The Balanced Nation

To know the relative value of different foods and different dishes, will keep one from serving one day a menu in which all dishes are high in food value and the next day a menu altogether of the less nutritive dishes.

It is preferable to take the day as a unit in planning menus rather than a single meal, for in this way it is easier to keep the fuel standard about the same each day. Concentrated foods which are mostly in the protein and fat groups, should be combined with the starchy foods. One part protein to three parts starchy foods is the most common proportion.

Cheese, a highly concentrated food without waste, when combined with rice, macaroni or potatoes, makes a good main dish and is highly nourishing.

Sugar in the form of candy is another concentrated food—and should not be eaten on an empty stomach as it is sufficiently satisfying to spoil the appetite for a meal. Eaten at the close of a meal when we enjoy a little sweet we are not likely to overeat.

Soups having stimulating properties put the stomach into better condition to digest the food which follows. A cream soup is best to precede a light meal. A clear soup which has little nutrition but is an appetizer is good for a heavy dinner.

There is no limit to the variety which a little planning may produce in the line of cocktails. Left-over fruit juice of various kinds, hotted down to a thick slurrp, adds flavor. Lemon, ice, bits of banana and pineapple with a few grapes for a garnish makes an especially well-flavored one.

The average grown person who is normal would feel and be much better to cut down on the food consumed at least one-third. To spend more time in masticating the food, so that the digestive apparatus need not overwork, would be another great advance in keeping the body fit.

One of the finest breakfast foods for young and old is the clean whole wheat right from the granary. Soak it overnight, then cook slowly on the back of the stove for several hours until the grain bursts and is surrounded by the soft jellylike substance, which indicates that it has been well cooked.

Salads and vegetables should always have place in the dinner and luncheon menus, and in the spring and summer are especially important.

Crisp, tender vegetables stimulate the appetite by their crispness and tenderness.

Nellie Maxwell

Colorful Dresses for Summer Wear

Gayest Flowers Adorn Mlady's Apparel; Cottons Show Prints.

Gayest than a field of California poppies, summer frocks are making their appearance upon the streets. You simply can't get them too colorful. Great splashy designs in the most vivid of effects. Glowing blossoms more exotic than any which ever grew in tropical forests. Bakat at his best outdoors, and Greenwich Village batiks pushed in the background, declares a fashion writer in the Philadelphia Record.

But with it all they are never garish. They never shock the eye. With all their riot of color they are somehow soft and altogether lovely. Perhaps it is the exquisite texture of the fabrics used which accounts for much of this softness in effect.

At last the tight little felt hat has met its Waterloo. One simply cannot wear a tiny dark-colored felt with one of these frivolous blossom-strewn chiffons. So felts have widened and taken on pastel shades. They refuse to be beaten. Wide felts in such luscious shades as gladiol pink, golden wheat, raspberry glaze and lovebird green are among them, simply trimmed with a band of twisted velvet. There is also the dashing phantom red, which appears in larger felts, but more often in hemp or tagal straw.

How the Color Was Named.
By the way, did you know how this very bright red came to be called "phantom"? It would seem to be anything but a phantom with all its vivid color. But it got its name because Lon Chaney wore it in a thrilling "moyie." By such things as this are colors born and made. Everybody went to Florida to win a fortune, and Florida gold, coral sands, Miami rose and palmetto green became leading colors. The astute lady has only to study the daily news to know what color is to be next in favor.

Perhaps that is why we have all colors just now strewn over our pretty frocks. There is no event of importance happening, so, fashion smiles upon them all, just to be on the safe side.

Printed crepes are quite as popular as the flimsier materials. These are shown in small Dolly Varden and English chintz patterns or in extremely bold design. Patou sponsors a printed crepe which is being used a great deal for sports and morning dresses in this country. They are made up on simple lines, frequently with a jabot of plain color. Some of these prints are plain at the top and patterned in large designs below the waist.

The jabot is an excellent idea of the printed model. A number feature a most distinctive jabot. It appears to be really a sort of collar, coming from the back of the neck and spreading out, reverselike, at either side of the front. Usually, it borders a Y piece at the front and meets in a point at the center of the very low waistline.

Accents by Plain Colors.
Printed crepes and georgettes are accented a great deal by plain colors. This must be done with much artistry or the whole thing is spoiled. It is so easy to make a lovely flowered frock look common if too much plain material is used or if it is applied the wrong way. Models which are simply

Smart Ensemble, Featuring Polka Dot, the Popular Mode.

trimmed with a half-inch of material in the predominating shade achieve much distinction. This band may outline the apron front, the lower edge of the skirt, the bottom of the jabot or the panels.

Agala lace is seen as the note of contrast. A charming afternoon frock of flowered chiffon in tones of red, green, blue and cream had a very full skirt edged with two inches of black elaboly lace. The black brought out the colorings most delightfully.

One of the outstanding prints of the season is the polka dot. And in these red undoubtedly leads. Red polka dots were introduced by Lanvin very early in the season. Tan on navy is a conservative choice for the older woman, and red on white for her smart daughter. Marcial et Armand created a co-

time called "Four les Petits Pois." It is a coat of ottoman worn over a white crepe polka-dotted frock.
Black coin dots on white is another favorite, and in this season of black and white, smartness they are seen a great deal. A white crepe, with large black dots showing on the lower part of the puff sleeves; as a band on the skirt, and as a dashing tie, is very smart. Ties which are little less than scarfs sometimes furnish the printed note with no other aid.

Black and white in huge flower patterns is another silk greatly the vogue. An overskirt of plaited material open at the front is a pleasing finish. Black and white is never anything else but distinguished wherever it is seen. And the older woman is showing her knowledge of the mode by adding a collar, cuffs and trimming bands of polka-dotted silk. Black dots in varying sizes are also seen a great deal on a white ground. These range in

An Attractive Sport Dress of White Silk Crepe, With Scarf.

size from a quarter to a French pea. The French pea is considered a good size for dots in many of the newest models. There are fewer combinations of colorings shown than last season, but many exclusive shops have sports frocks dotted in several colors. Very striking, and one might suppose very bizarre, is the frock which uses three-cornered designs in all sorts of colors. These, completely cover the ground and seem to merge one into the other, although each is sharply defined. But extreme as they are, they are both smart and good to look at.

For Morning Dresses.
Even cottons are showing prints, and the most adorable little morning frocks of printed dimities and cotton crepes and English broadcloths are shown. As a rule these are at their best in tiny flower prints or in wee designs of exceptional quaintness.

Many smart women at Cannes and various other resorts are introducing the fashion of a printed top with a plain skirt. The skirt may be plaited and separate or it may be attached and plain.

There are several French houses featuring the suit with the blouse of printed silk, which makes a coat suit much more elaborate than a plain blouse. Here, too, the skirt may be separate or attached. Many of them are very trim little one-piece frocks when the coat is removed. Two bands of the skirt material across the printed blouse relate the two and completely save that cut-off appearance which so many coat suits have when seen without the coat.

Goupy, which is one of the newer houses, is especially fond of the suit worn with a printed blouse. One suit of heavy crepe in powder blue has a blouse of georgette printed in a blue, mauve and yellow pansy design. The powder blue of the skirt is repeated in collar, ties and cuffs, which also tie.

Madeleine Vionnet, who aims at youthful effects, has done some enchanting things this season, all with that certain subtle simplicity that is her chief characteristic and charm. One particularly beautiful wedding gown is made of crepe georgette cut from shoulder to hem in repeated Y lines, creating in the skirt bias panels that flare and drop to different points around the bottom and form large, irregular scallops. The interesting lines in the gown are marked with strass beads and there is no other trimming. The veil of fine silk net has an edge of point d'Alencon and falls to the end of the train of crepe, that is lined with satin.

An original and extremely graceful wedding gown from Cherulit is cut all in large godets, with a simple, half high bodice, long sleeves and with both the train and veil made of the same material as the dress, lace, soft chiffon. Lace is used a great deal, some wedding gowns being made entirely of sheer blond lace. Chantilly or any of the novelty laces over taffeta, crepe or satin, and some have lace Rosettes added to the skirt. It is very newfangled at the moment to gather lace quite full in two or three sources straight around the skirt, and to trim the edge of the veil with the same lace.

The Sandman Story

by Martha Martin

A CURIOUS CREATURE

MOTHER PERIPATUS was talking to her child. Now a peripatus is a curious creature, as might almost be imagined by her name. With such a name as that she should not really be an ordinary creature. "I am something like a worm," she told her child, "and yet I have breathing tubes which make me something like an insect. I have a nice soft body, and am of a nice color. I have little legs, which make me look something like a centipede, and I like to live in an old log. I'm not a daytime creature. Night time is the time for me and for you, too, my child. I live here, far away in this tropical sec-

"We're Not Fond of Cold Countries," She Said.

tion of the country. When anyone touches me I squirt forth a funny kind of juice. "Not a very polite habit, perhaps, but it is my way! We, as a family like it where it is warm. In fact, we will be found only in warm, warm countries. Now, you are very smart, my child. Soon after you were born you were able to creep about. You knew enough to hide when danger was near, and now you have become so wise and so smart and so independent that you hide under the bark of the log just

as the older members of our family do.

"There is something about our coloring which helps to protect us. We are smart in having such ways. But, my child, some people who are here studying the ways of curious animals were talking the other day.

"It seems they were down here before and they took photographs and moving pictures, and they showed these before a great audience when they went up to their own country last year.

"They have been talking about it, and they have said many things which showed how interesting it was to others to see pictures of curious animals and their ways and of the scenery around these parts.

"They showed a picture they had taken of a Mother Peripatus and her young, and everyone, it seemed, whispered to each other and said, 'What in the world is a peripatus?'

"First they showed some pictures of our part of the country here. They showed the tropical scenery. Then they had a moving picture of a sloth, and of a Capuchin Monkey swimming along a river which, they explained, was a mile wide and which was haunted by crocodiles and by carib fishes, which the people had never heard of before. At least many of them had not.

"Then they showed pictures of Mother Sloth and her baby climbing and they were much amused to see the upside-down way in which she climbed.

"There were moving pictures shown of wild animals of America, wild moose, caribou, mountain sheep, goats and elk, as well as the mule deer.

"Next they had pictures of sea lions, bears and birds and of a play-fight between a keeper and a kangaroo which were made to move so slowly that it was very curious, they said, to see just what actions were made. Oh, they laughed at that and at the pictures which went so slowly of the sea lions, showing each little movement they made. But it was the picture of Mother Peripatus and her child which was the really big event of the evening for most of the audience learned about a creature they had never heard of before."

Claire Windsor

Charming Claire Windsor, the "movie" star, called the "best dressed woman in motion pictures," was born in Cawker City, Kan. Her blonde beauty and wonderful talent made her a prime favorite in pictures. This is from one of her latest photographs in a winsome, summery outfit, "picture hat" and all.

THE WHY of SUPERSTITIONS

By H. IRVING KING

WANTING TO SNEEZE

IF YOU want to sneeze and can't sneeze, it is a sure sign that some one loves you and does not dare to tell you so. This universal superstition is a clear case of sympathetic or imitative magic, combined with that idea of the magical sanctity of the sneeze held by primitive man from the days of him who first told the story of Prometheus down. The sneeze is a manifestation of the life, the intellect. A young man's love for a woman is a part of his spiritual being and when the bashful lover represses it within himself instead of letting it manifest itself in words to his adored one, this repression acts by sympathetic magic upon the object of his affections and she can't manifest her vital ego by sneezing—though she feels that she would like to, just as he feels that he would like awfully well to tell his love. The basic idea of the superstition is the false symbolism of primitive magic—things associated in thought are associated in fact.

AN ABBREVIATED STORY

ALICIA POTPOURRI

"WINONA," said Alicia Potpourri, "I've come to get your advice. Jack Linotype, who hasn't a cent or anything except his good looks, but whom I love devotedly, and Chesboro Midge, who has a quarter of a million dollars in spite of his bald head, have both asked me to marry them. What shall I do, Winona?—I want your candid opinion."

"Follow the dictates of your heart, Alicia—you never make a mistake when you marry for love," responded Winona Tumblers.

"Thanks, Winona—it's so hard to make up one's mind," said Alicia.

And she went to Camisola Stitcheam and begged for her candid opinion.

"Marry Jack—marry for love—true happiness lies that way only," said Camisola.

"It's so hard to know just what to do," sighed Alicia. And she appealed to Claudine Sifton for her candid opinion.

"Cop the guy with money," counseled Claudine. "Love's all right in its way, but it don't weight like money."

"Claudine, you darling!" cried Alicia—"it's so refreshing to get a real friend's candid opinion."

And she accepted Chesboro Midge and seldom regretted it.

(© by George Matthew Adams.)

What's the Use?

The stall-fed philosopher agrees with the fellow who says that it is bad enough to make a blunder, but it really peevish more to find out he is so unimportant that nobody has noticed the blunder. It is like "busting" a tire, swearing a whole lot about it, and then by looking around find there was not a soul near to hear your choice assortment of emphatics. Gee-whis, heck—flimby crickets, what's the use?—Logansport Pharos-Tribune.

Expense Systematized

A "budget machine" has been invented by Mrs. Annie P. Kenny, head of the home economics division of a large bank in Chicago. Given the income and the size of a family, she can tell instantly from her machine just what the family may spend for food, clothes, rent, welfare and for luxuries.

Great Personages of the Bible

By REV. LEONARD A. BARRETT

Mary the Virgin

MARY THE VIRGIN was of royal descent from David. She was also a blood relative of Elizabeth, who was the wife of Zacharias, the priest. It was an unwritten law that only members of the royal families were permitted to unite in marriage with the priests. Though of royal blood, she was poor. Evidence for this is seen in that Joseph was a carpenter, which trade did not bring large financial returns; and also from the value of the gift Mary and Joseph offered as a sacrifice when they brought Jesus into the temple. The sacrifice consisted of a pair of turtle doves and two young pigeons, a small gift as compared with those of the wealthier class of her day.

One of the most interesting experiences in the biography of Mary was her attitude of mind and heart when she was informed by the shepherds of the important place her son would occupy in the future history of her nation. To her the information came as a great mystery. She could not comprehend why she should be regarded with such special favor. The writer of her biography informs us that instead of giving expression to her feeling in wild excitement and overstrained nervous tension, she remained eloquently silent. "Mary kept all these sayings, pondering them in her heart." No one but a mother knows the secrets which she hides away in the sanctuary of her heart.

Not only was the prophecy concerning Jesus locked up in Mary's heart; she also treasured there the mystery which surrounded her child Jesus. She could not altogether adjust herself to His dual nature. Truly He was her son, but He was also the Son of God. Pathetic is the incident for Mary when she discovered that after leaving the temple she had lost her son. She sought for Him diligently, but nowhere could He be found. Upon returning to the temple, hoping that she might find Him in the crowd, imagine her consternation when she discovered that Jesus, though but thirteen years of age, was occupying a distinguished place in the temple. He was arguing with the intellectual men of His day upon matters of the law. Even more mysterious was the reply of Jesus when Mary spoke to Him about His absence. "Knew ye not that I must be in My Father's house." After this incident, He returns to the humble home in Nazareth, but Mary, perplexed and bewildered, "kept all these things in her heart."

A mother's pride and confidence in her son is beautifully portrayed through an incident which occurred in Cana. The occasion is a wedding feast and the refreshments which were furnished for the feast had given out. Mary interceded with Jesus in behalf of the guests and the embarrassment was relieved by the first miracle which Jesus performed. The confidence which Mary had in her son is expressed in her command to the servants, "Whatever He saith unto you, do it."

Upon another occasion Mary, mother-like, desired to speak with Jesus doubtless upon a subject of vital concern to herself, but which Jesus felt was not as important as the work of preaching and healing. While Jesus was speaking to the crowds of people, Mary stood outside waiting for an opportunity to speak with Him. When Jesus was informed of her wish, He made a reply to His followers which was a frank declaration of His spiritual mission. Mother-like, Mary again "kept all this in her heart."

At the crucifixion, the concern which Jesus had for His mother is very beautiful and tender. He provides for her future care and gives her a parting assurance of His love and devotion. But Jesus, her son, whom she perhaps never did thoroughly understand, was being crucified. Again, the only place where Mary could safely hide her sorrow and her pain was in the sanctuary of her heart.

This attitude of Mary, of hiding things in her heart, stands out as a very unique characteristic of her nature. The only safe place of sure retreat is the human heart.

The wisdom of the heart is many times more valuable than the wisdom of the mind. "Out of the heart are the issues of life." The lamps of courage, sympathy, and strength are lit within the temple of the heart. The real man is always, "the hidden man of the heart."

King Honors Proofreader

In recognition of his fifty years' work as proofreader and stereotyper at the British National Institute for the Blind, John Andrew Ford, who has been blind since youth, has received a message of greeting from King George. To Mr. Ford belongs the proud record of having written the whole of the Bible in Braille by hand—a task which involved some 21,000,000 blows with a hammer.

Made High Grade

The teacher in the Franklin (N. H.) kindergarten asked one of her young pupils what the eyes were for and was promptly answered "To see with." Another was asked what the nose was for and the answer was correctly given. Then she asked the little daughter of Mr. and Mrs. Paul Watts, "What are your ears for?" The child replied, "To keep clean." She got a 100 mark.—Boston Globe.

Flies and mosquitoes love campers

WHY allow these aggravating, filthy pests to ruin your outings? In camp or at home Flit will free you from the nuisance.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

STANDARD OIL CO. (NEW JERSEY)

First Homestead in Country Now Marked

A Nebraska state historical monument has been erected and dedicated at the site of the original home on the Daniel Freeman estate, known as the first homestead entry filed under the homestead law in the United States, on land still in the possession of children of Freeman, 10 miles northwest of Wymore, or five miles west of Beatrice. The monument is formed from stone taken from the dismantled state capitol at Lincoln and hauled to the farmstead, and contains an appropriate bronze tablet.

Daniel Freeman was a young man at Brownville, oldest town in Nebraska, when the homestead law became effective January 1, 1863. Freeman secured entry No. 1, and on horseback he rode at night to locate on the section 95 miles to the west, where he lived until his death eight years ago, and where the widow still lives, and six children live in the vicinity.

Children Cry for

MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food, giving natural sleep.

To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

SOMETHING TO THINK ABOUT

By F. A. WALKER

FILLING THE RANKS

IF IN the exuberant spirit of youth you are just stepping on the threshold of human activities, equipped with talents which should permit you to take a leading part in the stirring scenes, but for some reason you are unable to participate, hold your patience and bide your time.

If opportunity does not call today, he may knock at your door tomorrow. To every human comes the time of entrance and the period of exit. The tide of life is ever moving.

Somewhere in the waters is being cast on the rocks; somebody is drifting out to sea; somebody is being sucked under.

The old, the worn and the incompetent are being swept ruthlessly aside by the currents and whirlpools.

It is the natural trend of things.

Those who occupy the high places today, conspicuous for ability and wisdom, must in the cosmos order of things yield the right of way to fresh recruits, as must the decrepit in all the great armies of men.

Every day somewhere there is a vacancy.

Every hour there is a call for young men and women of sterling worth to step up to the front and help bear the world's burdens.

The vacant chairs and the broken ranks must be filled.

Art, science, industry and business must move forward.

The black smoke must curl from the factory chimney; the shuttles must dart to and fro; the forge must ring with steel upon steel; trains must move and ships must sail, else the world and the peoples of earth would retrograde and perish.

While waiting for Opportunity, the thing for young men and women to do is to improve themselves, even though they may hold university diplomas, mere tickets certifying that they have paid first-class fare on a through train, but not designating destinations.

When the old conductor shouts: "All tickets, please!" where will you tell him you are going?

Are you on your way to uplift humanity, or work for human good—to do things and not merely talk about them?

If you are willing to work, willing to bear the knocks and rubs, willing to sacrifice, to love and to stand the true test, there is a place waiting for you in the depleted ranks, where by giving much you will receive much, trock hand and heart.

(© by McClure Newspaper Syndicate.)

Mushrooms appear to spring up overnight, but they really have a long period of growth underground before they come to light.

The Hotel Stenographer

"YOU don't look so good this morning," said the House Detective.

"Since when has it been your duty to tell me I am looking tough?" demanded the Hotel Stenographer. "If you want to fatten your batting average around this desk, Kelly, come here with good news and peddle your craps some place else."

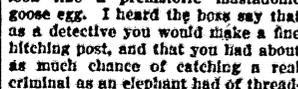

"If you can't see any little thing about me that you can compliment or admire, park yourself at the other end of the hall where that bunch of old sports sits around and listen to their arteries harden as they talk about their symptoms."

"I am not sure you will be popular there, either. Mighty few in this world who don't like to be complimented. Kelly, a man happily married woman serves a lot of underdone chops and overdone toast and gets by with it because there is no such thing as an underdone or overdone compliment, and the dame who feeds her husband enough flattery can get away with murder."

"Take yourself, for instance. You are getting so fat that if somebody cut off your arms and legs you would look like a prehistoric mastadonic goose egg. I heard the boss say that as a detective you would make a fine hitching post, and that you had about as much chance of catching a real criminal as an elephant had of threading a cambric needle, and that if you did not get busy around here he would get a derrick and a two-ton truck and fire you out of the hotel."

"Did I tell you these things? I did not. I am a diplomat. If I cannot pay a compliment I keep my lip buttoned. Nobody can accuse me of peddling sadness. If I cannot say something pleasant, I just keep still, for bad news comes anyhow, and there isn't any use to hurry to a person with it. I know I look bad this morning, Kelly, and I feel worse than I look, but you need not remind me of it."

(© by the McNaught Syndicate, Inc.)

Highway Service Station

A. H. Harvey, Dealer, Carrizozo, N. M.

Jack Brazel came in last Saturday and after spending the Fourth with the home folks, returned to Pecos, N. M., where he is employed by the Highway Service. Seaborn Gray had decided to accompany Jack, but pressing business matters detained him. He sends regrets to his mother, Mrs. Sarah C. Gray, and sent a picture of young James Fitzgerald, his 14 months' old son, who is certainly a buxom lad, and a fine addition to the Gray family.

The Misses Edina and Nellie Shaver left the first of the week for Vaughn, where they will visit relatives and friends. They were followed by Mrs. P. M. Shaver on Thursday, who, after spending the week-end will return with her daughters on Sunday or Monday.

FOR RENT—Four - room furnished house. Apply to Mrs. J. B. French.

Mr. and Mrs. Lon Jenkins were business visitors from Corona Monday and Tuesday of this week.

Fixit Shop

Gun - smith, tin - smith, repair work of all kinds. Expert soldering and radiator work, furniture repairing, etc. and fix anything.

S. H. Nickles

Judge John Y. Hewitt was in town on Tuesday from White Oaks. He attributes his longevity to keeping regular hours.

Union Made "Ironall" Overalls and Jumpers, \$2.00 each. Other first-class Overalls, \$1.50.
C. D. Mayer.

John West, San Patricio merchant, was a business visitor in the interest of his local school district on Tuesday before the County Board of Education. Mr. West reports business improving.

No. 1 can Van Camp's Pork and Beans, 10 cents.
No. 2 can Van Camp's Pork and Beans, 13c, or 2 for 25 cents.
No. 3 can Van Camp's Pork and Beans, 25 cents.
C. D. Mayer.

CAUTION—One A. B. Rose is using my name to check. These checks are forgeries and must not be accepted.
Signed, Geo. W. McGhee.

Genuine \$1 Bills given away with certain sales.
DOERING'S VARIETY STORE

Fred Pfingsten, member of the Board of Education attended a meeting of that body on Tuesday. Fred reports conditions the very best in his locality near Lincoln, the prospect for fruit being exceptionally good.

Mrs. Thomas Straley came in last Friday from Lordsburg, N. M., where Mr. Straley has been stationed with the Southern Pacific since they left here about six months ago. Tom has been transferred to El Paso and after visiting with the Straley family at Ancho for a week, she will go to El Paso to join her husband. While here, Mrs. Straley has been the guest of Mrs. Ralph Dow.

Louis and Albert Lalone of Sierra Madre, Calif., left Wednesday morning on their return trip, after spending the Fourth with relatives and friends in this locality. They made good use of the time spent here, being sure to not overlook any of their friends of the olden times.

John Fageros was in town Tuesday from the Indian Agency where with the Warden family and others from Ancho, he attended the Nogal picnic, and afterwards the celebration at Fort Stanton and the Mesaleros.

R. B. Slight and daughter Katherine were in from the I Bar X Ranch Tuesday, returning home late in the afternoon.

Mrs. Chloe White of Mon Jo Park, is visiting relatives here this week, and is a guest of her sister, Mrs. J. H. Skinner.

Mrs. Chloe Fisher and nephew, Robert Hale, of Capitan, were visitors here on Tuesday.

Flowers! for funerals and other occasions, apply to Mrs. M. I. Hunt, Sunset Farm, Alamogordo, N. M. Wires or special delivery letters will insure prompt service.

Miss Eva Rentfrow, sister of Doyle Rentfrow, came in Friday evening from Las Cruces to visit for a month while on her vacation. She will divide her stay with her parents, and brother's family at their home at the ranch across the Malpais.

FOR SALE—Good Typewriter, standard keyboard, \$18; also large bath tub, \$12. Inquire of S. H. Nickles, Carrizozo, N. M.

Mr. and Mrs. David Finley left Tuesday for Roswell, where after a short stay they will go to Clovis, to visit Mr. and Mrs. Harry Lyman and the new baby, Tiny Aileen. They will then go to Amarillo, Texas, where they expect to make their future home.

Miss Aileen Haley spent a portion of the week here with relatives and friends, returning to El Paso on Monday.

Mrs. B. L. Stimmel and daughter, Lorens, left the latter part of last week for Los Angeles, where they will visit with Mrs. Stimmel's three sons, Ben, Lee and Charles, for two months and return in time for the opening of the fall school term.

Houston Bingham was here from Pastura, where he is employed by the S. P. water service. He attended the picnic at Nogal and returned to his work on Sunday.

Miss Helen Shulds is here from El Paso to spend a portion of her vacation with her father, E. J. and sister, Rue Shulds.

Jesse May was in from his farm on the Nogal Mesa last week and will soon begin to market a fine line of vegetables for which his truck farm is noted.

Joe Romero and brother, Adolfo, who is visiting here from Los Angeles, were visitors in Roswell last Sunday, returning home on Monday morning. Joe said that they encountered a big wash out at Pecos, caused by a heavy downpour of rain.
