LaFollette of Wisconsin by Jo Davidson, to be put in the Capitol hall of fame. 2—Pedestrians in New York's theatrical quarter being forced to observe Commissioner Whalen's new traffic rules. 3—President-Elect Hoover and Mrs. Hoover on the lawn of their vacation residence at Miami Beach, Fla.

NEWS REVIEW OF CURRENT EVENTS

Cruiser Bill Fight Nears the End; Supply Measures for Army and Navy.

By EDWARD W. PICKARD

Brought to time by threats of night sessions made by Senator Hale, chairman of the naval affairs committee, the senators opposing the fifteen cruiser bill abandoned their filibuster tactics and consented to limitation of debate on the measure. This was to take effect at noon on February 4 and the prospect was that a vote would be reached by the middle of the week. If the pacifists succeed in attaching amendments to the house bill making necessary the appointment of a conference committee, there might be a final filibuster against the conference report. One amendment was favored by President Coolidge—the elimination of the clause fixing dates for commencement of the construction of the cruisers. It was made known at the White House that if the bill passed even without the time clause, the President will ask for an appropriation for an immediate start in the building program.

Representative Britton of Illinois, urging passage of the bill, said early in the week that he was "sure the time limit will be pleasing to President Hoover." But that gentleman immediately telegraphed to President Coolidge that he had made no public or private statement upon this question, and added: "As you know, I warmly support your views and you may so inform them if you wish to do so." This telegram was handed to Senator Hale, who read it to the senate, and at the same time, he read a message from Paul V. McNutt, national commander of the American Legion, urging passage of the bill with the time clause, on behalf of the Legion.

Senators Borah and Walsh both spoke in favor of elimination of the time clause, arguing that such action was proper as a preliminary to another disarmament proposal. Senator Reed of Missouri, who retired to private life on March 4, delivered what will be one of his last speeches, exercising his great powers of ridicule and sarcasm against the pacifists and arguing strongly for preparedness.

RESPONDING to the appeals of Secretary of the Navy Willbur the appropriations committee of the house reported a naval supply bill calling for approximately \$251,000,000 and providing funds for the addition of 500 enlisted men to the naval establishment. This would bring the navy personnel up to 84,500. The recommendations of the budget being thus exceeded, the committee, in order to make up the deficit, advised the de-commissioning of older ships and the transfer of their crews to newer vessels. The bill's total is about \$15,000,000 less than was appropriated for the current fiscal year and \$70,000,000 less than the estimates submitted to Secretary Willbur by the heads of the naval bureaus.

The War department supply bill, which had been passed by the house, was reported to the senate by its appropriations committee with an addition of \$5,000,000, for purely military activities, made to the \$447,000,000 total of the house measure. Of the funds added by the senate committee, approximately \$3,000,000 will go for the purchase of new bombing, pursuit and training planes for the air corps, \$200,000 for the National Guard maintenance, new construction and an increase in the ration allowance, and approximately \$1,000,000 will be turned over to the organized reserves. Other senate changes included the addition of two items providing \$31,000 for storage for 1,000 horses owned by army officers and \$32,500 for the purchase of 500 additional horses for the cavalry, engineers and artillery. Both items were approved by the budget, but had been stricken out by the house.

PRESIDENT COOLIDGE, delivering his farewell address at the semi-annual meeting of the business organ-

ization of the government, dwelt upon the extraordinary prosperity which the nation is enjoying, but warned the country that this can be continued only by the exercise of rigid economy in federal, state and local expenditures. While admitting that as a result of the expansion of the country federal expenditures show a tendency to rise, Mr. Coolidge warned that the greatest menace to continued prosperity now lies in the rapidly mounting costs of local and state governments. This heavy drain on the earnings of the people, he said, "is a real and serious warning of the danger of depression and a repetition of the disaster that overtook the country in the closing days of 1920."

The President warmly defended his policy of drastic economy in federal expenditures, and was seconded in this by Director of the Budget Lord.

RECEIVING few political visitors and devoting part of each week to fishing, Herbert Hoover is having a fine time down in Florida. Most interesting of his callers last week was Al Smith, who was stopping in Coral Gables. With John J. Rascob and W. F. Kenney, the recent Democratic standard bearer drove over to Belle Island and spent half an hour chatting with the man who defeated him. Later he said to the newspaper men: "I found Mr. Hoover very friendly and affable. We told each other some of the funny things that happened during the campaign to each of us, but did not talk of anything important. I can't go into that any more."

Thursday Mr. Hoover, still eager to catch a sailfish, went to Long Key on the yacht Saunterer. His guests were Justice and Mrs. Harlan F. Stone, Verne Marshall of Cedar Rapids, Iowa, and Mr. and Mrs. Mark Sullivan.

Correspondents at Miami Beach now believe that Mr. Hoover has decided on his cabinet but will not announce his selections until immediately after his inauguration. They are satisfied that neither Ambassador Morrow nor Ambassador Fletcher will be secretary of state. There was a report that that portfolio or the attorney generalship might be offered to Thomas Nelson Perkins, the Boston lawyer who is one of the American alternates in the reparations conference of experts. It was believed Mr. Hoover wanted a New Englander in the cabinet.

Mr. Coolidge also was in Florida last week, but only for a brief period. Accompanied by Mrs. Coolidge and a few others, he ran down to Mountain Lake and on Friday delivered an address at the dedication of the bird sanctuary and singing tower established by Edward W. Bok. After a dinner and brief rest at Mr. Bok's home, the party returned to Washington, arriving Saturday evening.

FOR the time being Gen. Bramwell Booth is winner in his fight to retain his personal control of the Salvation Army. But the high council hasn't given up yet. The chancery court in London decided that the council's action ousting the aged general was void because the commander's legal representatives were not permitted to plead his cause before the council voted against him. Therefore the council had to start its proceedings all over again. One of the leading members said that the position of the reform element had been consolidated by the legal proceedings, and that there was no doubt the council would reiterate its previous decision and proceed to elect a new general without further parley. It was said the outstanding candidate for the position was Evangeline Booth, sister of the general and commander of the Army in the United States.

UNDER proclamation by the Nationalist government all China celebrated "Customs Autonomy day" on Friday because Japan, the last of the powers to hold out, has finally recognized the new Chinese tariff and thus admitted China has the right to regulate its own customs rates. As the proclamation says, China "is at last able to throw off the economic yoke imposed eighty years ago by European imperialists."

The proclamation points out the benefits expected to accrue to China as the result of customs autonomy, the first of which is the enhancement of China's position in the family of nations. Second, it opens a new chapter in China's foreign diplomatic relations; third, marks the downfall of

foreign imperialists, and fourth, opens the way to Chinese national economic development, enabling China to enter the world's markets on an equal footing. Lastly, the change is declared to mark the definite passing of unequal treaties, including the abolition of extraterritoriality, the rendition of foreign concessions, as well as the termination of foreigners' rights to navigation in Chinese inland waterways.

SPAIN had another of her abortive rebellions last week. In Ciudad Real, a hundred miles south of Madrid, a body of artillery revolted and ran their guns out into the streets ready to shoot up the city; and in some other places there were ineffectual uprisings. The government troops were sent into action promptly, and promises of immunity to all privates and noncommissioned officers induced the mutineers to return to their barracks. Their officers were all arrested for trial by court-martial, and Sanchez Guerra, former Conservative party leader, was seized at Valencia.

WALDEMAR, dictator of Lithuania, said he had uncovered a plot against his regime by men who were acting with the knowledge of President Smolton, and he caused the arrest of the chief of staff of the army and eighteen high officers of the Kovno garrison. The dictator's opponents declare he has been supporting the Soviet policies against Poland.

LEON TROTZKY, that thorn in the side of the Russian Soviet government which he helped to create, has escaped the reward for his continuous plotting against it. He was taken from his place of involuntary retirement in southeastern Russia and doomed to exile. At first no country could be found that would receive him, but finally Turkey consented to let him be sent there. So he, at latest reports, was on his way to Angora. His friends in Berlin and elsewhere, believed he would be assassinated on the way, and there was a rumor that the murder already had been committed.

IN THE case of Glen Jennings, coast guard charged with the fatal shooting of J. D. Hanson, secretary of the Niagara Falls lodge of Elks, the jury could not agree on a verdict and was discharged. Jennings will be tried again, probably in May. The jury deliberated for twenty hours and at one time stood 11 to 1 for conviction.

ELINOR SMITH, the "flying flapper" who is only seventeen years old, went up from Mitchell field in an open cockpit plane in extremely cold weather and established an endurance record for women of 13 hours, 10 minutes and 45 seconds. This broke by one hour, 5 minutes and 45 seconds the record made recently by Miss Bobby Trout of California.

OSCAR UNDERWOOD, former United States senator from Alabama and for years one of the ablest leaders of the Democratic party, who died at his country home in Woodlawn, Va., was buried at Birmingham, Ala., with simple but impressive rites. Mr. Underwood was the last survivor of the big figures of the Democratic convention of 1912 at Baltimore. In that convention and again in 1924 in New York he was an active candidate for the Presidential nomination. His service in congress was long and distinguished. He retired voluntarily from the senate in 1927.

Ogden Mills, New York financier and father of Ogden L. Mills, under secretary of the treasury; George J. Charlton of Chicago, passenger traffic manager of the Alton railway; Alexander T. Brown of Syracuse, N. Y., inventor of shotguns and typewriters, and Robert L. Slagle, president of the University of South Dakota, were among others who died last week.

GOV. HENRY S. JOHNSTON of Oklahoma pleaded not guilty to eight impeachment articles voted by the lower house of the state legislature, and announced he was ready for immediate trial before the senate court. The case was set for February 11. Members of the state supreme court also are under fire, grave charges against them being made by witnesses before a legislative subcommittee that is making a general investigation.

South West PARAGRAPHS

Losses aggregating \$35,000 were sustained in Roswell recently in an epidemic of fire.

Cotton led all products in the Mesilla valley in New Mexico during 1923 with 23,726,587 pounds being sold at an average price of 19 cents a pound, according to a survey just completed of Mesilla valley farmers. The cotton brought \$4,503,810.

L. A. Watkins of the Love & Sutton firm of St. Louis announced that the construction of the airport and depot at Onada, about five miles from Las Vegas, for the Transcontinental Air Craft Company will start shortly at a cost of about \$125,000.

Tucumcari bear grass plant, to be financed entirely by St. Louis financial interests, will be under construction at Tucumcari, N. M., soon. Plans for construction of a \$25,000 main building have been completed and bids from contractors are now being received.

Plans for creation of a New Mexico livestock finance association for the rehabilitation of livestock in New Mexico, Senator Oliver Lee stated in Santa Fe, are going forward, and with continued success it is likely that the association will be functioning within the next few months.

A rate of \$2 a ton on ore valued at \$15 from Clarkdale to Hayden, has been extended for another year, it was announced in Phoenix by the Arizona corporation commission. The rate was to have expired Feb. 13, 1929. The Santa Fe railroad applied to have it extended for another year.

An offer of \$45,000 cash for the Tombstone municipal light and power plant made by the Arizona Edison Company was rejected by the Tombstone City Council, members of the council stated the rejection was made when they felt the amount offered was several thousand dollars too low.

Rachel Jensen, representing the office of Indian affairs at Washington, is in Arizona for the purpose of taking a census of Papago and Pima Indians. Miss Jensen recently completed a census of the Navajos and the office of Indian affairs is anxious to have a complete record of the major Indian tribes in Arizona.

A bill to authorize a survey of land claimed and held by Zuni Pueblo Indians in New Mexico was introduced in the House of Representatives at Washington by Chairman Leavitt of the House Indian affairs committee. The measure also would authorize the secretary of the interior to issue patents to Indians covering the land surveyed.

New Mexico delinquent tax collections turned in \$2,542,885.20 in delinquent taxes for the period from April 1, 1927, to Dec. 31, 1928. J. Frank Burns, special tax attorney, stated in Santa Fe, and for that work they received \$159,409.50. Mr. Burns said the amount paid for collection was 6.27 per cent of the total amount collected. For maintenance of the special tax attorney's office \$18,250.62 or .72 per cent was needed.

"A blunder, but not a crime," was the report of the New Mexico legislative committee which investigated the death of Helen Haackow, 18-year-old inmate of the Girl's Welfare Home, Albuquerque. The report was submitted to Gov. R. C. Dillon by the committee. The report stated that the girl died from the failure of home officials to give her pure water and warm food, and from the administration of twilight sleep as a disciplinary measure. The report said the injection of twilight sleep "may have been a blunder."

Complete revision of the license fee schedule for hunting and fishing in Arizona, extension of the trout season to forty days, deer season to be fifteen days later, a 25-pound bag limit on fish taken in one day, creation of a game commission with broad discretionary powers, and for the first time protecting bear, porcupine and squirrels, will be some of the changes in the state game laws if a tentative bill drawn by officials of the Arizona Game Protective Association and adopted by the ninth legislature, as outlined to the fish and game committee.

Phoenix, Miami and Tucson will open the Arizona Baseball League season April 11 on their home lots with a four-game series, according to the schedule submitted and adopted at the meeting of club officials in Tucson. Globe's Bears, one of the league's new entries, will journey to the home of the Phoenix Solons for the game that will hit the lid in the state league diamond play; Mesa Jewels will cavort on the home sand of the Miami Miners; and southern teams will concentrate their activities at home with Bluebe meeting the Cowboys of Tucson in the Old Pueblo. Each team will play ninety games during the season.

The Kheh Sameth Sorority has been granted a tract of land at State College, N. M., by the New Mexico A. and M. board of regents on which to erect a sorority home.

Wesley Campbell was acquitted in Albuquerque of the charge of murder for the death of W. R. Batt. The trouble between the two men who lived in James canyon started over a trade in which Campbell traded Batt a horse for a mule and a tarpaulin. Campbell had testified that he shot and killed Batt, when he believed Batt had started to get his own rifle.

(By REV. F. H. FITZWATER, D.D., Dean Moody Bible Institute of Chicago.)
(©, 1929, Western Newspaper Union.)

Lesson for February 17

PRAYER

LESSON TEXT—Matt. 6:5-13; Luke 18:1-14; 1 John 5:14, 15
GOLDEN TEXT—If ye abide in me, and my words abide in you, ask whatsoever ye will, and it shall be done unto you.

PRIMARY TOPIC—Talking With God.
JUNIOR TOPIC—Talking With God.
IMMEDIATE AND SENIOR TOPIC—Why Should We Pray?
YOUNG PEOPLE AND ADULT TOPIC—The Christian's Prayer Life.

I. False Prayer (Matt. 6:5-7). This consists in
1. Praying to be seen and heard of men (v. 5). Many prayers uttered in a public sanctuary are false for there is more consideration given to what the people think than to what God thinks.

2. In using vain repetitions (vv. 7, 8). This does not mean that we should ask but once for the thing desired, for we have examples of both Christ and Paul praying three times for the same thing (Matt. 26:39-40, 1 Cor. 12:7, 8), but rather, it means the use of meaningless repetitions.

II. True Prayer (Matt. 6:8). Since true prayer is a definite transaction of the soul with God, the communion of the human personality with the divine personality, there should be a real desire for fellowship with God, and then a going to Him in secret. God will abundantly reward those who thus seek His fellowship. We should have our closet prayers when all the world and its cares and pleasures are shut out, and we are shut in with God. We should meet with God's children and pray together.

III. The Model Prayer (Matt. 6:9-13).
1. A right relationship (v. 9). "Our Father,"

Only those who have become children of God by faith in Jesus Christ can pray aright (Gal. 3:26). One must be a child of God before he can have communion with God.
2. A right attitude (vv. 9, 10). "Hallowed be Thy name."

When one realizes that he has been delivered from the power of darkness and translated into the kingdom of His dear Son (Col. 1:13), he cannot help pouring out his soul in gratitude and praise, intensely longing for the righteous rule of Christ on earth.

3. A right spirit (vv. 11-13).
(1) That of faith, which looks to God for the supply of daily bread. We are dependent upon Him for our daily food.

(2) That of love, which results in forgiveness of others. God will not listen to the prayers of one who has an unforgiving spirit.

(3) That of holiness which moves one to pray not to be led into temptation, and longs to be delivered from the evil one.

IV. The Proper Attitude of Soul in Prayer (Luke 18:9-14). This is illustrated in the prayer of the Pharisee in contrast with the prayer of the publican. Observe

1. The prayer of the proud Pharisee (vv. 9-12).
He took a striking attitude (v. 11). He was self-righteous and trusted in himself. He congratulated himself upon his morality. He thanked God that he was not as other men. He congratulated himself for his religious merits (v. 12). He fasted twice a week and gave tithes of all he possessed. He thus informed God that he did more than what was required, implying that God was under obligation to him.

2. The prayer of the humble publican (v. 13).
In striking contrast with the Pharisee, the publican was too ashamed of his sins to even lift his eyes to heaven. He bent upon his breast as a sign of soul anguish and cried out to God to be merciful to him, a sinner. Christ declared that the publican went away justified, rather than the Pharisee.

V. Confidence in Prayer (1 John 5:14, 15).
1. Its basis (v. 13).
Only those who have knowledge of the reality of salvation can pray with confidence. If one has assurance that he is God's child and possesses eternal life, he will come into the presence of his Father with boldness.

2. The scope of his prayer (v. 14). "Anything according to His will."
The believer has a right to bring to God in prayer anything within the scope of the divine will.

3. The biggest issue of the believer's prayer (v. 15).
"We know that we have the petition that we desired of Him." God's child dreads coming to Him for that which is included in His will can be assured of receiving the things needed.

VI. False Security of the Wicked
And your covenant with death shall be dissolved, and your agreement with hell shall not stand; when the overflowing scourge shall pass through, then ye shall be trodden down by it.—Isa. 29:18.

Faith
Out of suffering comes the serious mind; out of salvation, the grateful heart; out of endurance, the attitude of deliverance, faith.—Modern Painters (Ruskin).

OLD FOLKS SAY DR. CALDWELL WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. BB, Monticello, Illinois, for free trial bottle.

A Perpetual Motion Clock

Since 1914 a clock in Dayton, Ohio, has been running without being wound. It is equipped with a thermal motor, consisting of a gallon tank filled with alcohol, a one-half-inch cylinder and piston with a ten-inch stroke. A rise in the temperature expands the alcohol, pushing the piston up with a series of weights weighing sixty pounds. A fall in temperature allows the weights to descend, winding the springs in the clock movement.

—Popular Mechanics Magazine.

Falling to Pieces

The intractable Joseph was playing among his dilapidated toys after a joyous Christmas of introspection. Mother, viewing the wreckage, said despairingly: "It makes me sorry, Joseph, to see your gifts go to pieces."

"Your new bird is falling apart, too, mother. His fur is all over the cage," replied the calculating four-year-old.

One who says it with flowers will pretty soon say it orally.

"Before My Baby Came"

"Lydia E. Pinkham's Vegetable Compound puts new life into me and makes my work in the store and in the house easier. I took several bottles before my baby came and am always singing its praises to my friends. I recommend it for girls and women of all ages. It makes me feel like life is worth living, my nerves are better and I have gained pep and feel well and strong."—Mrs. A. R. Smith, 808 S. Lansing Street, St. Johns, Michigan.

Lydia E. Pinkham's Vegetable Compound

THREE PLANTS, BULBS, ETC. Order direct, Catalog free. No agents. FORT MORGAN NURSERY, Ft. Morgan, Colo.

Garfield Tea Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned, herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

The Argonaut Hotel

Location most desirable, facing the beautiful Capitol grounds and Civic Center. Five minutes walk to business center. Rates \$1.50 up without bath, \$1.75 up with bath. O. Henry Eckhardt, Manager. Corridor at Grand St., Denver, Colo. Phone 2-1111.

W. N. U., DENVER, NO. 8-1929.

Annual Auction of Dogs in Virginia Town

In Fredericksburg, Va., since 1898, dogs which fall into the hands of the law or are no longer desired by their owners may be auctioned off at the dog curb, which is an annual feature. Above is a general view of the auction.

Rome Flooded by the Waters of the Tiber

Parts of Rome were inundated recently by a rising of the Tiber river. The photograph shows a scene in the flooded district, with the partly destroyed Palatine bridge.

Largest Searchlight in World

This is the largest searchlight in the world, which has just been completed in London for fortress use. The light is nearly 7 feet in diameter and has a candle power of 3,500,000. A light such as is thrown by this searchlight could be visible for hundreds of miles if the limitations of the horizon could be overcome.

Getting Closer to the Stars

Astronomers at work in the outdoor observatory on the extremely cold heights of Jungfrau in the Bernese Oberland, Switzerland. The instruments, located 11,500 feet above sea level, are among the most powerful in the world.

L'ENFANT MEMORIAL

The model of the central figure in the proposed memorial to Maj. Pierre, Charles L'Enfant, an engineer on General Washington's staff and chief designer of the city of Washington. THAT the memory of Major L'Enfant be perpetuated in marble and bronze is the desire of fourteen of the more important patriotic societies in America and they have joined together to erect the memorial.

BEAUTY SHOW HOSTESS

Miriam Stuart, Broadway actress has been chosen from over one hundred candidates as hostess of the National Beauty show which will be held at the Grand Central palace, New York, from March 27 to April 5. Miss Stuart is a petite, vivacious brunette with large blue eyes.

Fourth Estate Enormous Factor in Development of Modern Business

By FREDERICK DICKINSON, Advertising Director.

VERY few individuals excepting those immediately connected with the craft, are conscious of the tremendous part played by the Fourth Estate in the development of modern business. Few readers have any conception of the vast amount of labor and intelligence necessary to write, print, distribute and sell a newspaper or a magazine. That so much effort is concentrated in any printed medium obtainable at such slight individual cost, is to me at least, one of the marvels of our period.

There is not a single large scale business that I can think of which does not in some measure owe its importance and success to printed information. It may be advertising space or news, or both, that has provided this information. Nevertheless, the information has been there for public consumption. Radio would be a ridiculously small industry today were it not for published information about this wonder of science.

Every scientific, labor-saving, comfort and convenience device which has been introduced within the past twenty-five years has depended primarily upon newspapers or magazines for its success. On the other hand, each publication has enriched its news and advertising columns from such sources of information. And the public, those who make the Fourth Estate and business an enjoyable and profitable occupation, has learned and learned and learned.

I am convinced that so long as these three adjuncts of modern civilization correlate their ideas and co-ordinate their efforts, progress is assured.

Girl of Today Needs Guidance Rather Than Submission to Rigid Rules

By MRS. JOHN M. HANNA, President Y. W. C. A. of America

The girl of today becomes an independent thinker and an individual citizen at ten or twelve years old instead of at seventeen or eighteen, as she used to. Early development comes as a result of changing conditions, which push her out into the world and on her own resources several years sooner than she used to go.

And she doesn't want a preachment, either. She wants to form her own opinions, which she should do. The Y. W. C. A. organization seeks to help her choose wisely and form convictions she can depend upon.

The Y. W. C. A., with 600,000 members in this country, must move steadily along, in its concepts as well as in its achievements, if it is to keep pace with the times. The organization is a sort of outpost seeking to reach the girls who may be touched by no other Christian organization. Because of this and the changing times, we must be ready to make concessions.

Girls today desire personal liberty. No organization can hope to appeal to them if it sets too rigid rules. It cannot accomplish its purpose in the widest possible sphere if it is thought of as a "goody-goody" group.

Modern City Life Chiefly to Blame for the Loosening of Home Ties

By PROF. W. F. OGBURN, University of Chicago.

In primitive days and in the historical period there were seven ties which bound families together—affection, economics, religion, protection, recreation, education and family status. The last six ties have gradually loosened with the development of civilization. Women are economically independent, children are more or less educated and protected by the state. In my opinion these bonds will never return as important factors in married life.

The only remaining tie is affection—and that is not as strong as it used to be. The world in general and psychologists in particular should work on some means to strengthen the bond of affection in order to hold families together.

After an intensive study of statistics in regard to changing family life, here are some of my findings:

City life discourages marriage about 10 per cent.
Of the marriages contracted in 1928 nearly one in five will end in divorce.

One out of every eleven married women is working for pay outside the home.

Modern Demand for Comfort and Entertainment Good Thing in Every Way

By ADOLPH LEWISOHN, Noted Philanthropist.

Americans have not gone pleasure mad. Our people are quite rationally acquiring the comforts, even the luxuries of life.

To destroy the urge for material satisfactions means the impoverishment of individual initiative, or the striking down of the very fundamentals of prosperity. If people do not want any comforts or entertainment they have no ambition. I think it is a good thing for them to have ambition to improve themselves. The world is more entertaining for larger numbers of people than it was when I was a young man. I think that is a good thing.

Do away with all that—I include motion pictures, theaters, athletic spectacles—let people be just satisfied to stay at home and not do anything, and there would not be any ambition. We could not have any reason to be desirous of improvement, of making money, or earning it. We would stagnate if we did not have prosperity.

National Prosperity Largely Due to Harmony Between Capital and Labor

By JAMES J. DAVIS, Secretary of Labor.

In connection with the country's sound industrial conditions, one of the most pleasing features, which I am confident has firmly impressed itself on American industry, is the spirit of good will and understanding which now exists generally between employers and employees. In the present era of full production and good business, nothing has contributed more to our industrial stability.

With the purchasing power of our wage earners growing more and more vital to our national well being, and this being more widely understood than heretofore, I can see no reason why we should not have an even better industrial and business success in the new year. The signs point that way.

Makes Life Sweeter

Children's stomachs sour, and need an anti-acid. Keep their systems sweet with Phillips Milk of Magnesia! When tongue or breath tells of acid condition—correct it with a spoonful of Phillips. Most men and women have been comforted by this universal sweetener—more mothers should invoke its aid for their children. It is a pleasant thing to take, yet neutralizes more acid than the harsher things too often employed for the purpose. No household should be without it. Phillips is the genuine, prescriptional product physicians endorse for general use; the name is important. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

PHILLIPS Milk of Magnesia

Planes Without Pilots
Airplanes without pilots have been made to loop the loop by wireless control from the ground. Many other difficult performances have been made possible by a delicate new system within the plane, operated by wireless waves.

A receiving set in the plane, designed to interpret and act upon impulses transmitted from a ground control station, acts as the mechanical pilot's "brain." The controls are operated by compressed air motors actuated by the wireless set.

"Lucile is the Happiest Girl"

So many mothers nowadays talk about giving their children fruit juices, as if this were a new discovery. As a matter of fact, for over fifty years, mothers have been accomplishing results far surpassing anything you can secure from home prepared fruit juices, by using pure, wholesome California Fig Syrup, which is prepared under the most exacting laboratory supervision from ripe California Figs, richest of all fruits in laxative and nourishing properties.

It's marvelous to see how bilious, weak, feverish, sallow, constipated, under-nourished children respond to its gentle influence; how their breath clears up, color flames in their cheeks, and they become sturdy, playful, energetic again. A Western mother, Mrs. H. J. Stoll, Valley P. O., Nebraska, says: "My little daughter, Roma Lucile, was constipated from babyhood. I became worried about her and decided to give her some California Fig Syrup. It stopped her constipation quick; and the way it improved her color and made her plump up made me realize how run-down she had been. She is so sturdy and well now, and always in such good humor that neighbors say she's the happiest girl in the West."

Like all good things, California Fig Syrup is limited, but you can always get the genuine by looking for the name "California" on the carton.

No Home Cooking Then
Hewitt—I suppose you give your wife the idea that when she is out of town you miss her very much. I suppose you take on when she goes away.
Jewett—Yes, I take on flesh, I eat at a restaurant.

Some people seem to live in the air and every time they touch earth they get into trouble.

Constipated?

Take **NR**—NATURE'S REMEDY—straight. Your eliminative organs will be functioning properly by morning and your constipation will end with a bowel action as free and easy as nature at her best—no pain, no griping. Try it!
Mild, safe, purely vegetable—

EDITORIAL COLUMN

Ex-Governor Hinkle Imitates Hannett in Talk

Now comes ex-governor James Hinkle with a tale of woe and emerges from his shell with a long face and longer whiskers in a piece of advice, which he says, was solicited to the present legislature.

He attacks the slight advance in taxes and as a means of lessening the present rate, he advises us to return to the territorial days, when assessors would receive their salaries on the percentage plan for their labors. Under the return to the territorial methods, assessors would put in most of their time in running over the counties making assessments and as a side issue, pick rags, old-iron and any thing else they might see fit to do in order to complete a means of livelihood. In the same manner, he advises that treasurers should be paid on the percentage plan on such taxes as are collected. He then makes an assault on our road improvements and says we should stop making appropriations for that purpose.

If the ex-governor was invited to give such advice to the legislature, we presume that the request was made by his co-worker and successor, ex-governor Arthur T. Hannett, who, we presume, made such request, at any rate, the present legislature can attend to its own business without the help or advice from the source which this came.

In the first place, we might as well return to the days of the ex-territorial ways of doing things. He says that the population in our state has not increased since that time. Santa Fe, Albuquerque, Clovis, Raton, Las Cruces, his home town of Roswell and everywhere over the state, please take notice.

As to his advice to stop the appropriations for road building, perhaps he was thinking of how, during his administration, he left Lincoln County stuck in the mud to the extent that most of his former followers here and elsewhere over the county condemned him for ignoring us and leaving us with nothing but trails to guide us to places where money was spent on road improvements. He refers to lesser taxation in years gone by, and reading between the lines, we see that it was during the time of "my" administration, when little was done except fishing.

We are willing to pay more taxes, when we see results such as we see today. We accept the present conditions, which gives us good roads and is bringing more and more people into our state, to a return to territorial days; but the attack made by Mr. Hinkle is purely one of politics and nothing can suit him that a Republican administration could do. Another thing is, "I" would very much like to again be a candidate for governor. Oh, for a column in one of our papers—don't all speak at once.

EL PASO AVENUE CARRIZOZO, N. M.

There are many reasons
for the ease of steering
the new Ford

THE new Ford is exceptionally easy to steer because of the well-proportioned weight of the car, the steel-spoke wheels, the co-ordinated design of springs and shock absorbers, the size and design of the steering wheel, and the simple mechanical construction of the steering gear.

The Ford steering gear is of the worm and sector type used on high-priced cars and is three-quarter irreversible.

In simple, non-technical language, this means that the car responds easily and quickly to the steering wheel, yet there is no danger of the wheel being jerked from the hands of the driver by ruts or bumps in the road. A light touch guides the car, yet you always have that necessary feel-of-the-road so essential to good driving.

Strength of materials and careful workmanship give unusual stability to the Ford steering gear and housing.

The steering worm, for instance, is splined to the steering worm shaft and is stronger, of course, than if a single key were used to hold

the shaft and worm together. The steering worm sector is forged and machined in the same piece with its shaft.

The housing of the steering gear mechanism is made of three steel forgings, electrically welded together. This housing is then electrically welded to the steering column. Such a one-piece steel unit is naturally much sturdier than if several parts were used and bolted or riveted together.

Throughout, the new Ford steering mechanism is so simple in design and so carefully made that it requires practically no attention.

The only thing for you to do is to have the front steering spindles, spindle connecting rods, and drag link lubricated every 500 miles and the steering gear lubricated every 2000 miles.

For this work, you will find it best to consult the Ford dealer. He has been specially trained and equipped to help you get the greatest possible use from your car over the longest period of time at a minimum of trouble and expense.

LEGAL ADVERTISEMENTS

Notice for Publication Department of the Interior U. S. Land Office at Santa Fe, N. M. Jan. 18, 1929

Notice is hereby given that Joneta M. Bagley, deserted wife of James O. Bagley, of Vernon, Texas, who, on Jan. 9, 1922, made Hd. Fort Sumner 020635, now Santa Fe No. 051085, for all of Section 35, T. 1-S., R. 17-E., N. M. P. Meridian, has filed notice of intention to make three year Proof, to establish claim to the land above described claimant before District Judge Robert Cole, Vernon, Texas, and witnesses before U. S. Commissioner, at Ft. Sumner, N. M., on Feb. 25, 1929. The entryman, James O. Bagley is notified that, by submission of said proof, his wife, Joneta M. Bagley seeks to obtain patent for the land in her own name.

Claimant names as witnesses: John L. Hicks, A. P. Alexander, Clint Brooks, Robert Hicks, all of Vaughn, N. M. A. M. Bergere, Register 126 F22

Notice for Publication Department of the Interior United States Land Office Las Cruces, N. M., Jan. 16, 1929

Notice is hereby given that the State of New Mexico has filed in this office Indemnity School Land List 9247, Serial No. 036906, for the following land— Lots 2 & 3; SW 1/4 NE 1/4; SE 1/4 NW 1/4 & N 1/2 SE 1/4 Sec. 5, T. 12 S., R. 18 E. NE 1/4 SE 1/4 & SW 1/4 SE 1/4 Sec. 18, T. 11 S., R. 18 E. Oil and gas is reserved to the United States, under Act of July 17, 1914, in lot 2, SW 1-4 NE 1-4 & N 1-2 SE 1-4 Sec. 5, T. 12 S., R. 18 E.

The purpose of this notice is to allow all persons claiming the land adversely, or desiring to show it to be mineral in character, an opportunity to file their objections to the selection.

The New Ford Engine

The engine of the new model A Ford car represents one of the most remarkable engineering accomplishments in the history of automotive development. While not radically new in principle or design, it represents a new combination of engineering principles which has produced the best tested performance features of the older types of automobile engines with the most important features of the new-er types.

Without abandoning entirely the principles of the old low-compression, low-speed motors, in favor of the extremely high-speed, high-compression types, Ford engineers have developed a medium-speed, medium-compression motor that has proved itself much better adapted to the needs of a light car.

A wide variety of uses under all sorts of road conditions and in widely-varying climates are thus served satisfactorily than would be possible with a radically high-speed, high-compression motor.

Its power, smoothness and flexibility are remarkable for its size and weight. The model A motor develops 40 brake horsepower at 2200 revolutions per minute. In accounting for his performance, credit must be given to the following improvements—an induction system which permits a better and more uniform flow of air and fuel to the combustion chamber; re-designed valve and combustion chambers which give higher and more uniform power impulses; lighter but stronger reciprocating parts and increased bearing size which result in sturdier construction and consequently smoother operation; newly-designed hot-spot manifold gives unusually efficient carburetion and there is also improved timing.

The combination of these features has produced a motor that gives unusual speed and power for its size and weight and at the same time one that is long-wearing, economical in fuel consumption and simple to operate and maintain. Because of its comparatively low speed, it does not work the self-destruction that comes as a natural result of wear when moving parts are operated at the higher rate of speed, and yet it has considerably more power, speed, smoothness and flexibility than the low-speed motors.

The Carrizozo Woman's Club

will meet with Mrs. J. R. Green, who will be the hostess to the Club, Feb. 15. Mesdames Ludlow Rowland and Stadtman have charge of the program; Roll Call, "Bible Quotations."

From General Motors comes the announcement of the Cold Control

Offered only on Frigidaire. Gives automatic regulation of temperature in freezing compartment. Speeds freezing of ice cubes. Makes dozens of new desserts possible.

COLD Control is a simple dial that enables you to regulate the time required to make sparkling ice cubes... unusual frozen salads... delicious new ices and desserts.

If it's afternoon, you can have ice cubes for the dinner table... perhaps a delicious new frozen dessert. Simply set the lever at "colder... the point that's 'colder than cold'... fill the ice trays with water... put the material for your dessert in another freezing tray. Sparkling full-sized ice cubes... the frozen dessert... all will be ready.

Such exclusive features as these

have made Frigidaire the choice of more people than all other makes of electric refrigerators combined.

Frigidaire prices today are so small and its savings so great that it starts paying its entire cost the day it is installed. A small deposit will put Frigidaire in your home tomorrow. Stop in at our display room.

With the High School Classics

By MARGARET BOYD

(© by Margaret Boyd.)

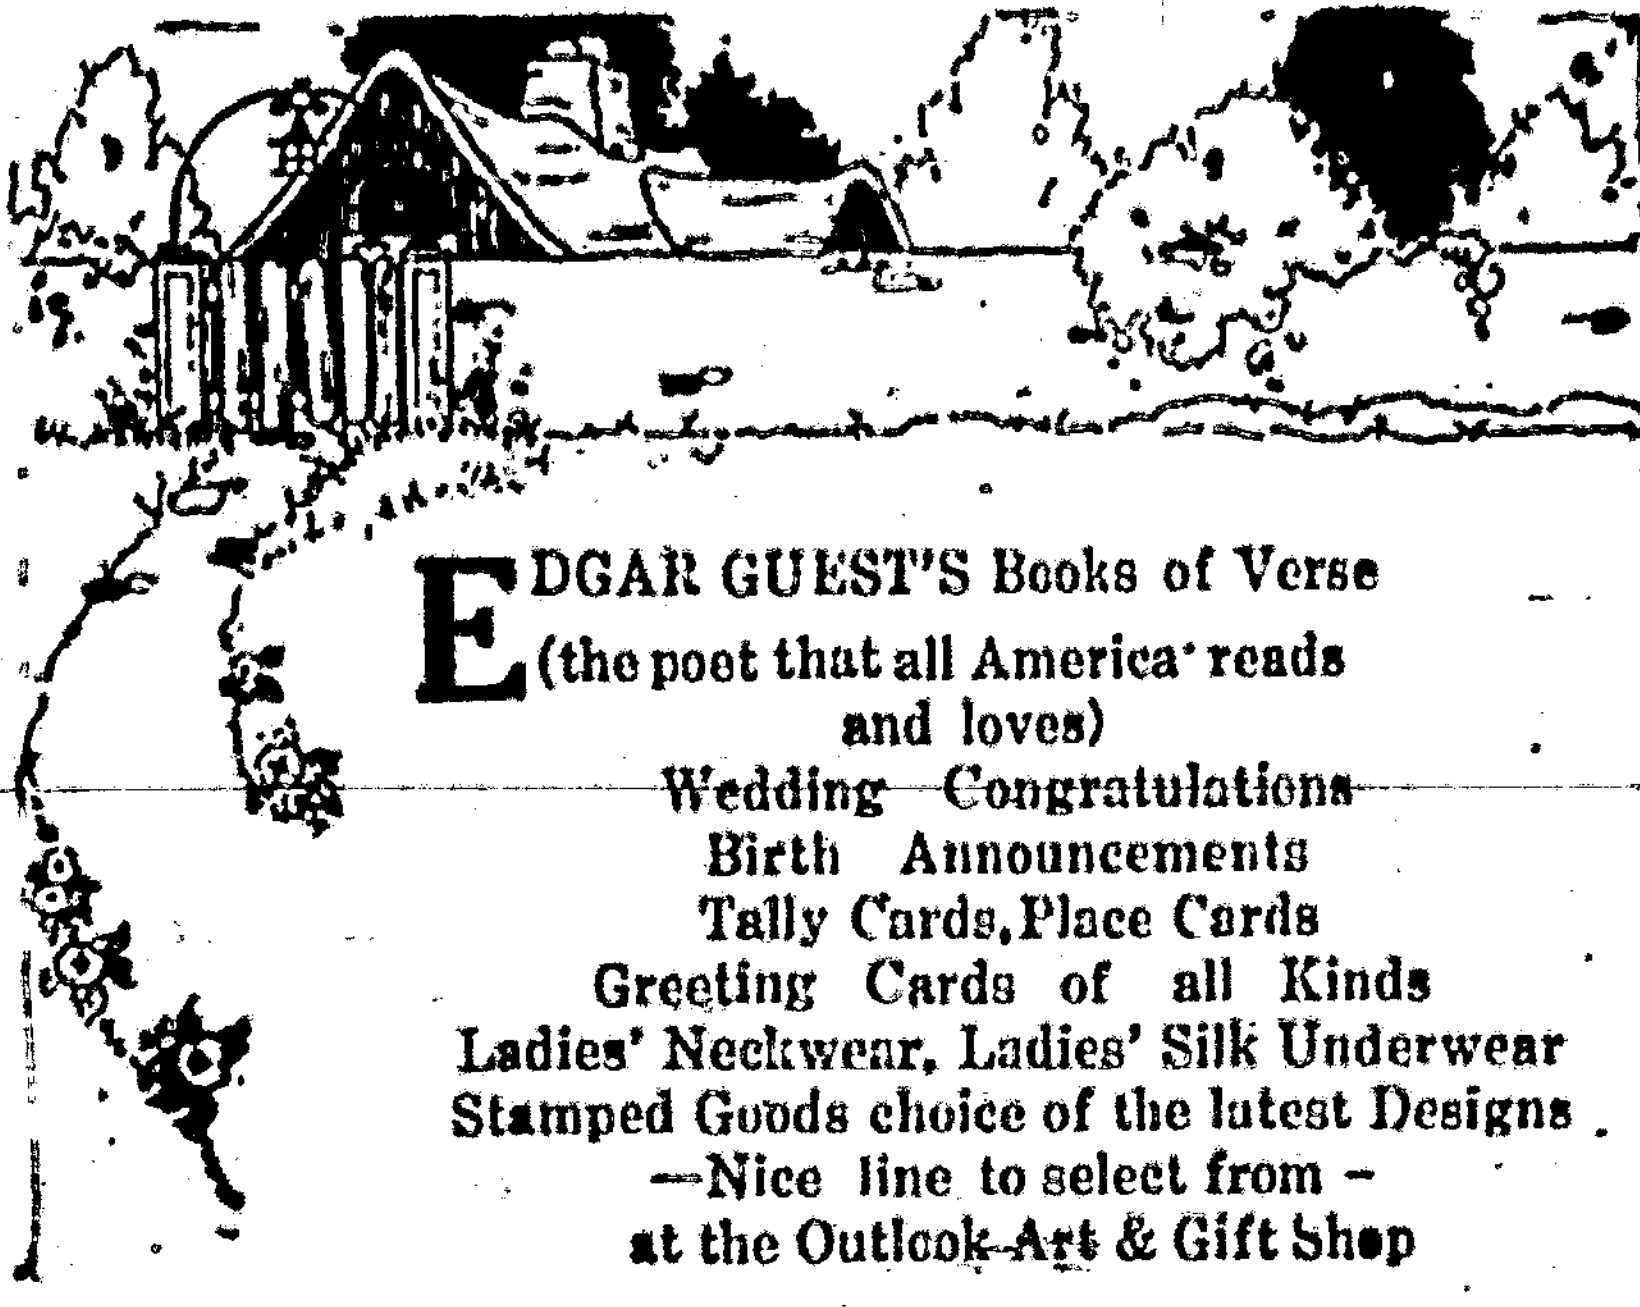

"When could they say I'll new, that talked of Rome, That her wide walls encompassed but one man?"

—Julius Caesar.

Caesar dominated Rome to the extent that he seemed the only man in it, and Cassius, in this conversation with Brutus is trying to arrive at the secret of Caesar's dominant personality.

It is given to few of us to study a personality of the first rank at close hand as Cassius had done. The nearest approach we can make to it is to study the personality of those who can dominate an audience from a theater or opera stage.

The secret of personality is as hidden as the secret of the nature of life—volume upon volume has been written on both subjects, but they get us nowhere in our study. When scientists find out whether life itself is a matter of chemicals, of ferments, or of radio-activity, then they will probably be in a position to show why one man has a dominant personality and another is a cipher. If life is proved to be a chemical function, as Lavoisier thought it, then personality will probably be proved to be a matter of excess or lack of certain chemicals in the system.

Bows on Wash Dresses

By JULIA BOTTOMLEY

weaves. There's plenty of inspiration for the home dressmaker in these new materials. Considering that the making of even the simplest wash dresses involves so much detail, it might be wise to begin the sewing campaign earlier than usual. It is not a bit too early to start at this moment.

In choosing materials and patterns or in selecting the ready-made frock, keep your eyes open for bows, for bows, you know, are entering into the scheme of design for washable frocks as conspicuously as in that of evening frocks. Not just bows which tie for convenience sake, but bows which are purely ornamental. Note how bows play their part in even that of each of the three dresses in this picture. Attention is especially called to the "fussy" pretty frock to the left in the background as it demonstrates most intriguingly the use of figured with plain material in combine. Organdie is charmingly worked into a ruffled panel for this dress, also for other details. The vogue for large bows at the hip which has been so pronounced for evening wear, is finding its way into washable daytime modes.

(©, 1929, Western Newspaper Union.)

ultra styling which is accomplished through intricate detailing.

A theme much exploited in advance wash frock displays is that of using contrasting materials—plique with gingham, heavy linen with handkerchief linen, printed satens, gabardines, rayons, dimities, yokes, percales, crepes and the like with solid color and so on and so on.

When a plain and a print cotton or linen is used together, the gates of opportunity are thrown wide open for the designer. Which accounts for the fascinating, flattering frocks that abound in the wash dress sections this season, and so reasonable in price. Likewise the woman who makes her own clothes finds that many of the new patterns call for two materials, usually a print and a plain. And such prints! There never was such a galaxy of beautiful patternings and materials as are offered today. Printed broadcloth, saten, plique, rayon and innumerable equally as attractive

sentiment has completely changed within the last several seasons in regard to washable daytime frocks. Ordinary workaday house dresses have gone entirely out of date. Nowadays the style element is considered as important in the fashioning of cottons and other washable weaves as it is in that of dreater materials. The new modes for 1929 especially exploit that

Cauliflower au Gratin

Almost any vegetable that is good with white or cream sauce may be still further enhanced by being served "au gratin", with grated cheese and buttered crumbs sprinkled over the top and delicately browned just before the dish is sent to the table. Cauliflower is especially good prepared in this way. The bureau of home economics tells how to do it.

- 1 cauliflower, med.
- 1 cup fine bread crumbs
- 1 cup milk
- 1/2 cup butter
- 1/2 cup grated cheese
- 1/2 tsp. salt

Select a close white head of cauliflower. Remove the green leaves, and retain the most tender ones to cook with the cauliflower. Break the head into flowers and wash thoroughly in cold water. Drop the cauliflower into enough lightly salted boiling water to cover, and cook until tender, about 15 minutes.

Prepare a cream sauce of the flour, 2 tablespoonsful of the butter, the milk, and the salt. The remaining butter should be melted and mixed with

the bread crumbs. Place the cooked cauliflower in a greased baking dish, pour over it the cream sauce, cover with the grated cheese and the bread crumbs on top. Bake until the crumbs are golden brown. Serve from the dish in which it was baked.

Fried Bananas With Meat Course

Fried bananas are usually served with the meat course. As they contain considerable starch, potatoes or other starchy vegetables may be omitted, but cabbage, spinach, or some other leafy vegetable should be included as usual. The directions for preparing fried bananas are from the bureau of home economics.

- 4 ripe bananas
- 1 egg
- 1/2 cup flour
- 1/4 cup milk
- 1/2 tsp. salt
- 1 lbs. sugar
- Dried sifted bread crumbs
- Lemon juice

Select ripe bananas, remove the skin, scrape off the stringy portions, and cut the bananas in half lengthwise. Dip the pieces of banana into the batter made from the flour, milk, sugar, egg, and salt, and then roll them in the bread crumbs. Fry the bananas until a golden brown in shallow fat, and drain on paper to remove excess fat. Serve hot and squeeze lemon juice over the bananas.

Don't Rush Cooking

Whenever you are cooking custards or any mixture in which eggs are the main ingredients, a low temperature is most satisfactory.

Recipes That Will Please

By NELLIE MAXWELL

I heard the proud strawberry saying "Only look what a ruby I've made"

It forgot how the bees in their flying had brought it the sugar to its trade.

During the cold weather the body is not to handle foods that are rich or not so easily digested; the body burns the food more rapidly if one is in the open air and exercising.

Steamed Chocolate Pudding.—Cream one-fourth cupful of butter add one-half cupful of sugar, gradually, add one egg beaten light. Sift together two and one-fourth cupfuls of flour with four teaspoonfuls of baking powder and one-fourth teaspoonful of salt. Add to the first mixture, after sifting with one cupful of milk, one cupful of boiling water and two squares of melted chocolate and one teaspoonful of vanilla. Beat thoroughly, turn

into buttered mold and steam two hours. Serve hot with marshmallow sauce.

Queen of Puddings.—Cut toasted bread into half-inch cubes and fill one cup; beat the yolks of three eggs and the whites of one, add one-fourth of a cupful of sugar and one teaspoonful of vanilla; continue beating, add two cupfuls of milk and heat until the sugar is dissolved. Pour this custard over bread and bake in a moderate oven until firm; remove from the oven and cover with one cupful of stewed apples. Make a meringue of the remaining whites and one-fourth of a cupful of granulated sugar; add a bit of vanilla and brown delicately. Serve hot with a hard sauce.

Spanish Sandwich Filling.—Chop one small can of red peppers, two hard cooked eggs, one-fourth pound of cheese and one and one-fourth cupfuls of pecan meats or other nuts. Cream one tablespoonful of butter, add one beaten egg, one tablespoonful of sugar, three tablespoonfuls of vinegar, one and one-half teaspoonfuls of salt and a dash of paprika. Cook and set aside to cool. Add to the

first mixture and use with a leaf of lettuce as a sandwich filling.

This is the season of the year when steamed puddings and richer desserts are enjoyed. Here is an old-fashioned one.

German Fig Pudding.—Take one cupful of cornmeal, one cupful of molasses, six cupfuls of milk or four of milk and two of cream, one cupful of chopped figs, two eggs and one teaspoonful of salt. Cook the cornmeal in four cupfuls of hot milk, add the figs and salt and cook for half an hour. Cool and beat the eggs and pour into a greased baking dish and bake three hours. When partly cooked add the remainder of the cream or milk, with out stirring.

Scrapie which is so well liked by nearly everybody is so simple to prepare. Cook corn meal mush for at least an hour, then add a cupful of scraps or crackings. Pour into a small bread pan to mold.

HOW TO PREPARE SWEET POTATOES

(Prepared by the United States Department of Agriculture.)

Sweet potatoes appear so often in the winter menus that it is pleasant to vary the way of preparing them occasionally. Here are two suggestions from the bureau of home economics:

- Sweet Potatoes and Pineapple.
- 2 medium sized sweet potatoes, ter.
- 1 can crushed pineapple.
- 4 lbs. melted butter.
- 1/2 tsp. salt.

Select a dry mealy variety of sweet potato and cook in the skins in water to cover. When tender, cut in slices or rounds of uniform thickness, and place on a flat buttered baking dish. Pour the pineapple over the potato, sprinkle with salt, and add the butter. Bake in a medium oven until light brown on the surface and the sirup of the pineapple has thickened. Serve from the baking dish.

- Baked Sweet Potato With Raisins.
- 6 medium sized sweet potatoes, ter.
- 1 tsp. salt.
- 1/4 cup seedless raisins, plumped.
- 1/2 cup top milk
- 2 lbs. melted butter.

Wash and cook the potatoes in their skins. When tender, scrape off the skins and mash the potatoes or force them through a potato ricer. Mix the milk, melted butter, and salt with the potato and beat until light. Pour hot

water over the raisins, and let them stand for a few minutes until plumped; then drain, and add to the sweet potato. Grease a baking dish and pile the potato lightly into the dish. Put in a medium oven to heat through and brown lightly over the top. Serve from the baking dish.

HOUSEHOLD HINTS

To prevent backaches, adjust sinks and washtrubs to the right heights.

Use raglan sleeves in dresses for the little girl to permit growth and chest expansion.

Use raw, chopped vegetables such as lettuce, cabbage, or carrots in sandwiches for the little child.

To rejuvenate last year's fur coats or collars, brush them well to remove the dust and beat them gently with a round, smooth, pliable stick to lift the fur and make it fluffy.

To prevent melted snow from overflowing gutters, running down the side of the building, and freezing on steps and walks, remove leaves and dirt from eaves troughs and gutters.

Fairy Tale for the Children

By MARY GRAHAM BONNER

The day was Dolly's day. It was to be her day from the moment she awoke in the morning until she went to bed at night.

Of course, it might be that other people, throughout the great, huge world, might be considering it their day, too. They might be doing most important things that day.

Then, too, it might be, quite, quite easily, and in fact, absolutely surely,

A Rainbow.

the birthday belonging to many, many other people in the world, too.

No one could have one of the three hundred and sixty-five days in the year all, all to himself or herself. But that didn't make any difference.

Dolly didn't mind. She didn't mind how much other people claimed the day for their own.

She was glad if there were other happy people in the world that day.

But as far as she, herself, was concerned, and as far as her family were concerned, the day was wholly and completely and utterly and entirely Dolly's day.

Yes, it was her birthday, and many had been the whispered secrets about that day before it had arrived.

Dolly had made a list of the presents she would like to have given to her.

It had not been such a very large list. Dolly was not, in the least greedy or grasping. But of course the members of her family wanted it to be a fairly good sized list. Then if they couldn't find some of the things Dolly wanted, or if some of the presents were impossible to get, there would be other presents from which to choose.

No one knew whether the sun would shine or not on Dolly's birthday.

No one knew whether it would pour on Dolly's birthday.

No one knew whether perhaps it might rain and the sun might come out at the same time.

Some of them rather hoped that would happen, for then there would be a rainbow, and Dolly dearly loved a rainbow.

But no one really cared what it would do that day. The weather could do just as it liked so far as they were concerned, and of course that was just as well for the weather would do just what it liked anyway. That was a habit the weather had.

And the weather was too old, much too old, to get out of a lifetime habit. That was far too much to expect.

On Dolly's day everyone would be so happy that it wouldn't matter in the least what the weather did.

At last Dolly's day came. It was cloudy in the morning. Then some blue appeared in the sky—quite a good deal of blue sky. And then it began to cloud up again.

But no one minded. Everyone was so excited wishing Dolly, Many Happy Returns of the Day, fixing her birthday table, writing birthday messages on little pieces of paper, getting out the old candles for the cake, that it really didn't make a scrap of difference whether the blue stayed in the sky or let the clouds cover it all over.

The birthday presents were just what Dolly wanted.

And then, just after the presents had been opened, it began to shower very hard, and then it seemed to look very bright.

Dolly looked out at the weather. The weather looked back at Dolly. The weather seemed to be laughing now, laughing gay, merry, musical laughter as the bright light gleamed in the big, glistening raindrops.

And then suddenly it came!

Dolly cried out with delight.

"A rainbow, and on my birthday, too!"

For a rainbow touched the trees over the far hills beyond, spread across the sky and reached over to the lake nearby Dolly's house.

The rainbow fairies had come to wish Dolly Many Happy Returns of the Day. They knew it was her day!

POSTURE WHILE MOPPING OR SWEEPING

Good and Bad Posture While Mopping or Sweeping Floor.

(Prepared by the United States Department of Agriculture.)

How do you stand when you mop or sweep or oil a floor? Erect and square on your feet, with your back straight, bending, if at all, from the hips, your head in a normal easy position for inspecting your work? That's the correct posture for mopping or working with any long-handled implement on a floor. The picture shows a farm woman demonstrating good working posture to other members of her club in Hampshire county, Mass. The subject of good and bad posture in doing various household tasks was introduced at a home demonstration meeting by the county extension agent, and followed by a series of interesting poses illustrating good and bad positions at several sorts of household work, such as washing dishes, handling food at the oven, and sitting to peel vegetables, as well

as the job of mopping or sweeping.

It is being more and more widely recognized that there is an important connection between good posture and avoidance of fatigue in doing any sustained piece of work. Poor posture strains the muscles of the neck and back, hinders the circulation, cramps the chest, and often forces the abdominal organs out of place, and after a time may result not only in fatigue but in poor body condition. Farm women are especially interested in whatever knowledge can be applied to their problems to make their work easier and their possessions and enjoyment of leisure greater. Compare the good posture in mopping with the bad one, in which the hips and abdomen are thrust forward in such a way that the shoulders are hunched and the head is out of line with the body and the neck muscles are stretched.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhea checked. A vegetable product; a baby remedy meant for young folks, Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

For Piles, Corns, Bunions, Chilblains, etc.

WATERBURY'S BALM OF MYRRH

Money back for first bottle if not cured. All dealers.

PISO'S Coughs

Quick Relief! A pleasant, effective remedy for Coughs, Croup, Whooping Cough, Sore Throat, and all other ailments of the Throat and Lungs.

PARKER'S HAIR BALM

Removes Dandruff, Itchiness, Redness, and restores Color and Shine to Gray and Faded Hair.

WATERBURY'S BALM OF MYRRH

WOLF COYOTE FOX AND SKUNK EXTERMINATOR

Scandinavian Color

Other states may have their Browns, their Joneses and their Smiths, but Minnesota has its Andersons, Johnsons and Petersons. Taking St. Paul, the capital of the state, as a representative Minnesota city, it is learned there are 2,570 Johnsons, as compared to 1,650 Browns; 2,350 Petersons, compared to 630 Smiths, and 1,570 Andersons, compared to 250 Joneses. Other Scandinavian names predominate in St. Paul, as is shown from the following figures obtained from the city directory: Carlsons, 770; Ericksons, 890; Jensens, 400. The population of St. Paul is about 250,000.

Cold Need Cause No Inconvenience

Singers can't always keep from catching cold, but they can get the best of any cold in a few hours—and so can you. Get Pape's Cold Compound that comes in pleasant-tasting tablets, one of which will break up a cold so quickly you'll be astonished.—Adv.

Not Exactly

Blinks—I always count ten before I speak when I am angry.
Jinks—That's commendable.
Blinks—No, hardly; you see, I use the time it takes it think up meaner things to say than I could if I spoke right out.—Cincinnati Enquirer.

Don't indulge in irony except with intelligent people; they are the only ones who will understand.

A Bad Wreck

of the constitution may follow in the track of a disordered system, impair blood or inactive liver. Don't run the risk! Dr. Pierce's Golden Medical Discovery is an alternative extract of herbs and roots that drives out impurities and acts on the liver. When you're debilitated, and your weight is below a healthy standard, you regain health and strength by using the "Discovery." It builds up the body. Mrs. E. H. King of St. Louis, Mo., writes: "I was afflicted with Dr. Pierce's Golden Medical Discovery for the blood and stomach. 'Discovery' cannot be overpraised." Sold in tablet or fluid form. If your dealer does not have it, send 65 cents for the tablets to Dr. Pierce's Invalids Hotel, Buffalo, N. Y.

The Settling of the Sage

By HAL G. EVARTS

Copyright by Hal G. Everts WNU Service

WHAT HAS GONE BEFORE

At the Warren ranch, the "Three Bar," a stranger applied for work as a rider. Williamette Ann Warren—known to all as "Billie"—is the owner of the ranch. The girl's father, Cal Warren, has been the original owner. The newcomer has put to work, Cattle "rustlers" have been troubling the ranch owners. The new hand gives his name as Cal Harris. By his announcement in favor of "squatters" he incurs the enmity of a rider known as Morrow. The will made by Cal Warren stipulated that half the property should go to the son of his old friend, William Harris, under certain conditions. The new arrival is the man, and he discloses the fact to Billie, Slade, a ranchman with an unruly reputation, visits Billie, Slade, endeavoring to embrace Billie is interrupted by Harris. While the riders are at their evening meal, far out on the range, six outsiders join them. Billie knows them as "rustlers." To test Harris' courage the girl appoints him temporary foreman, suggesting that he order the visitors to leave. Somewhat to her surprise he does so. The men depart, making threats. Billie makes Harris permanent foreman. Catching Morrow leaving cattle were they can be stolen. Harris discharges him, riding with Billie. A man, presumably Morrow, shoots at Harris. Three Bar riders start in pursuit of Morrow. One of them, Bangs, is ambushed and killed.

CHAPTER V—Continued

-10-

The old man was gloomy and silent. His face set in sorrowful lines as he went about his work, and it was evident that he was continually brooding over the fate of the youth he had loved.

Billie could not shake off the remembrance of the boy's adoring gaze as his eyes had followed every move she made and in some vague way she felt that she was responsible for the accident. She often rode near Billie Foster, knowing what was in his mind. He spoke but little and in common with the rest, he never once mentioned Bangs.

At the end of a week Slade rode up to the wagon as the men were working the cows gathered in the second circle of the day. He jerked his head to draw her aside out of range of Waddles' ears.

"How's the Three Bar showing up this spring?" he asked abruptly.

"Better than ever," she retorted and he caught a note of defiance in her voice.

"You're lying, Billie," he asserted calmly. "The Three Bar will show another shrinkage this year."

"How do you know?" she flashed; and the distrust of him that Harris had roused in her, lately submerged beneath the troubling thoughts of Bangs, was suddenly quickened and thrown uppermost in her mind.

"I know," he asserted. "It's my business to know everything that goes on anywhere near my range. You say you want to run the Three Bar brand yourself. There's not a acre in this country that would touch a Three Bar cow if you was hooked up with me."

"And then the Three Bar would be only one out of a dozen or more Slade brands," she said.

For no reason at all she was suddenly convinced of the truth of Harris' suspicions concerning Slade. She noted that his eyes traveled from one man to the next till he had scrutinized every one that worked the herd.

"Are you looking for Morrow?" she demanded, and instantly regretted her remark. Slade's face did not change by so much as the bat of an eye and he failed to reply for a space—too long a space, she reflected—then turned to her.

"Morrow—who's he?" he asked.

"And why should I look for him?"

"He rode for you last year," she said.

"Oh! That fellow. I recall him now. Bleak-looking citizen," he said.

"And what about him?"

"You tell me," she countered.

"That new foreman of yours—the fellow that was scouting round alone for a few months—has been talking with his mouth," Slade said. "If he keeps that up I'll have to ask him to speak right out what's on his mind."

"He'll tell you," she prophesied.

"What then?"

"Then I'll kill him," the man stated. The girl motioned to Lanky Evans and he rode across to them.

"Lanky, I want you to remember this," she said. "Slade has just promised to kill Harris. And if he does I'll spend every dollar I own seeing that he's hung for it," she turned to Slade. "You might repeat what you just told me," she suggested.

Slade looked at her steadily.

"You misunderstood me," he stated.

"I don't recall any remark to that of-

fect or even to mentioning the name of Harris. Who is he, anyhow?"

Evans slouched easily in the saddle and twisted a smoke.

"Now let's get this straight what I'm to remember," he said. "Mr. Slade was saying that he planned to down Cal Harris the first time he caught him out alone. I heard him remark to that effect." He turned and grinned cheerfully at Slade. "That's his very words—and I'd swear to it as long as my breath held out. I'll sort of repeat it over to myself so that I can give it to the judge word for word when the time comes."

Slade favored him with a long stare which Lanky bore with unconcern, smiling back at him pleasantly.

"I've got my little piece memorized," Evans said; "and in parting let me remark that Cal Harris will prove a new sort of a victim—for you to work on. If you tie into him he'll tear down your meat-house." He turned his horse and rode back to the herd.

"I'll play your own game," the girl told Slade. "If anything happens to another man who is riding for me and I have any reason to even suspect you were at the bottom of it I'll swear that I saw you do the thing yourself. The Three Bar is the only outfit with a clean enough record to drag any thing up for an airing before the courts without taking a chance. This rule of every man for himself won't hold good with me."

She moved toward the wagon and Slade kept pace with her, leading his horse.

"You're a real woman, Billie," he said. "You better throw in with a-

Harris Sat on a Rock and Reviewed the Plans He Had Formulated.

real man—me—and we'll own this country. I'll run the Three Bar on ten thousand head whenever you say the word."

"I'd rather see it on half as many through my own efforts," she said.

"And some day I will."

"Some day you'll see it my way," he prophesied. "I know you better than any other man. You want an outfit of your own—and if the Three Bar gets crowded out you'll go to the man that can give you one in its place. That will be me. Some day we'll trade."

"Some day—right soon—you'll trade your present holdings for a nice little range in hell," a voice said in Slade's ear and at the same instant two huge paws were thrust from the little window of the cook-wagon and clamped on his arms above the crook of his elbows. Slade was a powerful man but he was an infant in the grip of the two great hands that raised him clear of the ground and shook him before he was slammed down on his face ten feet away by a straight-arm thrust. His deadly temper flared and the swift move for his gun was simultaneous with the twist which brought him to his feet, but his hand fell away from the butt of it as he looked into the twin muzzles of a sawed-off shotgun which menaced him from the window. The face behind the gun was the face of Waddles.

"I'm about to touch off a pound of shot if you go acting up," Waddles said. "Any more talk like you was just handing out and you'll get smeared here and there."

"Are you running the Three Bar?" Slade asked.

"Only at times, when the notion strikes me," Waddles said. "And this-

decoratively—had become a fixed mode, too. Staring life as a cravat, and a broad cue, it has thinned down to a slim four-in-hand and sometimes it expresses itself in a bow.—Irene Kuhn in Liberty Magazine.

Business Disaster

Robert, seven years old, out riding with his parents, passed the local drug store, which had just changed hands.

"What has happened to Mr. Brown?" he was asked.

"Oh," replied Robert casually, "he's out of business; he went bank-robbed."

The Car Is First

Mansfield, England, recently sent a 20-pound gooseberry pie to Mansfield Mass., a token of good will

is one. Whenever you've got any specific business to transact with us why come right along over and transact it—and then move on out."

Billie Warren laughed suddenly, a gurgle of sheer amusement at the sight of the most dreaded man, within a hundred miles standing there under the muzzle of a shotgun, receiving instructions from the mouth of the Three Bar cook. For Slade was helpless and knew it.

"Waddles, you win," he said. "I'll be going before you change your mind."

As the man walked toward his horse which had stilled a few steps away the big cook gazed after him and fingered the riot gun regretfully.

The wagon did not move on when the men had finished working the herd, as the rest of the day had been set aside for kill-time. An hour after Slade's departure the hands were rolling in for a sleep. The girl saw Billie Foster draw apart from the rest and sit with his back against a rock. He was regarding some small object held in his hand. As he turned it around she recognized it as a boot heel and the reason for Billie's absence was clear to her. He had back-tracked the blue horse to the scene of the mishap.

She was half asleep when a voice some distance from the teepee roused her by speaking the name of Bangs.

"I've a pretty elastic conscience myself," the voice went on. "I'm not above lifting a few calves for the brand I'm riding for or any little thing like that, but this deal sort of gorges up in me. They'll never cinch it on to any man—they never do. Old Billie is brooding over it. He'll likely run amuck. One way or another he'll try to break even for Bangs."

Billie recognized the voice as Moore's and knew that one of her men, at least, had not forgotten Bangs. It was the first time an intimation that the affair was other than an accident had reached her ears.

The calf round-up was nearing the end. Two weeks would see the finish and supply the final tally. Harris sat on a rock and reviewed the plans he had formulated for the salvation of the Three Bar brand, realizing the weak spots and mopping out some special line of defense that might serve to strengthen them. In the seclusion of the wagon Waddles was carefully rereading a much-thumbed document for perhaps the hundredth time. A man had come in at daylight with the mail from Brill's and Billie Warren was within her teepee poring over her share of it. The men had finished their and were sleeping.

The girl read first the four letters in the same handwriting, one to mark each week she had been on the round-up. The fifth was from Judge Colton, her father's old friend, to whose hands all his affairs had been entrusted. After scanning this she read again the other four. Very soon now, in the course of a few months at the outside, she and the writer would meet away from his native environment and in the midst of her own. Always before this had been reversed and her association with Carlos Deane had held a background of his own setting—a setting in startling contrast to her log house nestling in a desert of sage. The Deane house was a wonderful old-fashioned mansion set in a grove of century-old elms and oaks. She knew his life and now he would see her in her natural surroundings.

In a hazy sort of way she felt that some day she would listen to the plea that, in some fashion or other, was woven into every letter; but not till the Three Bar was booming and no longer required her supervision. Everything else in the world was secondary to her love for her father's brand and the anxiety of the past two years of its decline eclipsed all other issues.

Her reflections were interrupted by Harris' voice just outside her teepee.

"Asleep, Billie?" he asked softly.

"No," she said. "What is it?"

"I've thrown your saddle on Pa-pouse," he said. "Let's have a look around."

She assented and they rode off up the left-hand slope of the valley. A mile or so from the wagon Harris dismounted on a high point.

"Let's have a medicine chat," he offered. "I've got considerable on my mind."

She leaned against a rock and he sat cross-legged on the ground, facing her and twisting a cigarette as an aid to thought. Her head was tilted back against the rock, her eyes half-closed.

(TO BE CONTINUED.)

Original Necktie Was More Than Ornament

The neckties men wear today were evolved from lace handkerchiefs that were worn, back in the days when men's imagination let them in for rainbow hued silk and velvet clothes, to keep the neckband of the shirt together.

What men wore in those days in lieu of a tie was called a Jabot or kerchief. It was not all lace, for it was a sneeze catcher as well.

After the neckerchief had done double duty in the names of decoration and utility, a few of the more sensitive of the young bloods who were

hit fever was particularly bad revolted. They began carrying these kerchiefs in their hands. The custom became popular and in no time at all the cambric and lace what-it became a handkerchief.

When the handkerchief was finally transferred permanently from the hand to the pocket, the tie around the neck, with a single mission—to blind

decoratively—had become a fixed mode, too. Staring life as a cravat, and a broad cue, it has thinned down to a slim four-in-hand and sometimes it expresses itself in a bow.—Irene Kuhn in Liberty Magazine.

HOW TO LIVE LONGER

By JOHN CLARENCE FUNK A POOR SERVITOR

WHEN parts of a machine intended for action are permitted to remain inactive, neither the machine nor the parts are benefited. Most things made for use must be used if an approach to satisfactory efficiency is to be expected. This law is so generally recognized that to mention it appears trite.

Why then state the obvious? For the sufficient reason that people who are willing to recognize this principle respecting everything else, are not willing to admit that it applies in a very particular and important way to their own bodies.

Unfortunately the luxury and ease in present-day civilization is not all roses. There are penalties too. And those leading a sedentary and inactive life are particularly susceptible to one of the most general of them.

Consider for a moment the amount of assistance the alimentary tract receives in its functioning by the muscular action involved in sawing wood, digging ditches, plowing fields or any other kind of physical labor that makes more than drawing-room demands upon the body.

Indeed, when our forefathers actually made their living by the sweat of their brow sluggishness in the process of eliminating waste body products was reduced to a minimum. There was too much natural action to permit such a condition to develop.

But in these days it is quite different. Food is taken in, and the machine is not put into action. Consequently the alimentary canal cannot perform its vitally important duty. It more or less goes to sleep. Constipation results.

Advice on this subject already covers volumes. But when the whole problem is reduced to its bare facts only three factors are worth serious thought. Number one, exercising the body so as to arouse the sluggish colon; number two, the formation of regular habits by training the body to respond at a definite time; number three, the daily consumption of roughage such as bran, spinach, string beans, cabbage and other fibrous vegetables. Above all else, do not become a taxative fiend. It is not nature's way. Consequently it is harmful, even dangerous sometimes.

One can afford to be a fanatic on this subject, for if the alimentary system is put in smooth running order and kept there many of the more important-of-life-shortening processes will be eliminated. And that's what you are after, aren't you?

NATURE'S OWN

THERE are few, if any, foods that are so perfectly qualified to be food as is milk. Of all sources of nutrition this product is the only one designed by nature for the sole and express purpose of creating and maintaining energy in animal life.

Time was when the use of plain milk was largely limited to infants and invalids. Of course one's weekly plate of ice cream in the summer time, and its employment in cooking, gave it a certain by-product standing. But as a distinct and separate food factor it was very weak indeed. Today, either alone or as used in ice cream or milk shake, millions of gallons of this life-giving and most important food are being consumed by the American public. And much to their advantage.

Fat people of course do not need much milk. But the majority of grownups cannot make any mistake by using a pint of milk daily in some form. If one is fond of drinking it straight, then do so. If this is not particularly appetizing then bury it in soups, puddings and ice cream. The main thing to remember in this connection is to get it, even if it tends to add somewhat to one's weight. To overcome this, cut down slightly on the starch foods.

However, milk is not all there is to the question. To do one good the milk must be good and pure and fresh raw milk from tuberculin tested cows that are milked under proper sanitary conditions is excellent. Properly pasteurized is also good and is perfectly safe.

It is well however to consider the plant from which you purchase your milk. Pick a safe dairy. All milk looks alike—good, indifferent and deadly. Appearances therefore mean nothing. It is your local health officer on this important point. He knows the conditions of the respective plants and will inform you if you ask him.

Carelessness on your part should not be permitted—the price for it may be disease. A good rule to follow is to use as much care in selecting the milk supply for yourself as you would for an infant. Then drink to and for your health!

(© 1924 Western Newspaper Union)

The Great Failure

There are many kinds of failure. Perhaps there is none more serious, more fundamental than the failure to assume the leadership of which you are capable. Until indifference and mental laziness are eradicated, the human being is hardly worth the room he occupies.—Grove Patterson, in the Mobil Register.

Great Power Aggregation

The total capacity of prime movers, that is, water wheels, steam engines and turbines and internal combustion engines in public utility plants, factories, mines and quarries in the United States on January 1 of this year was 60,500,000 horsepower. This total does not include railroad locomotives, motor vehicles or water craft.

The History of John J. Doherty's Case

"Three years ago I took a severe cold, putting me directly to bed. After a month's treatment for pleurisy my physician was baffled by the action of my fever or temperature, which was high one day and low the next, and while he tried different prescriptions, I didn't improve any, but slowly became weaker.

"The doctor finally decided to tap me by running a needle-like instrument into the left side of my back and between the ribs, to ascertain if pus was forming in my left lung. The tapping resulted in the withdrawal of a small quantity of pus and the doctor said it was forming so fast that I must have an operation to extract and draw out the pus. At the time my heart pained me terribly because it was three inches out of place, due to the pressure of the fast-accumulating pus.

"I was ordered to the hospital for an immediate operation or I would be a dead man in 20 hours. The next morning the surgeon removed one inch of two ribs in the back, forming a square cavity, to remove the pus, which squirted eight feet from the table. About two quarts was removed. A rubber tube was then inserted in the cavity to the lung for a drain, which took about three weeks to perfectly drain and heal the cavity.

"The doctors told me that I had to take all precautions possible, as I was subject to easily capturing tubercular germs, due to the weakness of my lungs. For one whole year I used several kinds of tonic and lung medicines and didn't improve much from weakness.

"Then I began the use of Milk Emulsion and after a month's trial I found myself with increasing appetite and gaining strength, and today I have regained my natural weight and strength and feel completely myself. And the joy of it is, after using all of the Milk Emulsion that I did, it didn't form a habit. I haven't used any for a month now and I feel at my best. I am 48 years of age and weigh 150 pounds.

"I want to thank you from the bottom of my heart for your wonderful preparation." Yours truly, JOHN J. DOHERTY, Odanah, Wis.

"So the poker game ended in a fight?" "Yes every man had a chip on his shoulder."

For Colds -

How many people you know end their colds with Bayer Aspirin! And how often you've heard of its prompt relief of sore throat or tonsillitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have told you Bayer Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is the trade mark of Bayer Manufacture of Monacofabrikdestler of Salicylsäure

Plan to Restore Old English Yarn Market

For some time past the ancient yarn market at Dunster, West Somerset, England, has been in an extremely dilapidated and decayed condition. It has now been decided to renovate the building. Everything possible will be done to preserve the original features of the structure. An expert has already examined the building and materials in keeping with the period will be used in the renovation.

Standing in the middle of Dunster's historic main street, and facing the castle, the home of the Luttrell family, the yarn market dates from the sixteenth century, and is now the sole remaining relic of the days when the village was famous as the mart for the noted Dunster home-spun and broncolths. Here the West Somerset weavers once flocked to offer their wares to cloth merchants who came from all parts of Europe to purchase the finely woven cloths for which the district was famed.

Simple Radio Outfit

Maine can match the achievement of a California woman in receiving a radio concert from a saucer on her electric range. A farmer living in Greenwood at the junction of two roads, with the telephone wires making a Y, a prong of the letter running each side of his house, gets free radio in that way. He has a hole about the size of a plate cut in the door of his cottage, covered with a wooden patch for use when not "receiving." Evenings the patch opens the door and through the aperture floats all sorts of entertainment. While he is denied the power of selection, he is never troubled with static.

Color Picture by Wire

Successful transmission of a colored picture by wire from New York to San Francisco is one of the latest developments of the wire-transmission process, says Popular Mechanics Magazine. The feat was accomplished by using three negatives, a red, a blue and a yellow, each being sent separately and then put together at the receiving end. The entire picture was transmitted in 30 minutes.

Would Investigate Further

Professor Y (writing to his wife and daughter sojourning at fashionable watering place)—Dear Maizie: You inform me that you have engaged our Luete to an elegant and dashing young chap. My eventual blessing and a very capable detective are now on the way to you.

Capitol Press Gallery

At the session of the forty-fifth congress, in 1877, there were only 112 newspaper men in the press galleries of the capitol. Today, half a century later, there are 400 men credited to the press galleries.

Answer Was, Anyway!

Louise had just read her composition, and her teacher said: "That is good, Louise. Is it original?"

"No, I made it up."—Charleston News and Courier.

A woman is never mis-understood after she gets married.

DERIVED from DAILY USE of the

Cuticura PREPARATIONS

THE Soap, pure and fragrant, to cleanse the skin; the Ointment, antiseptic and healing, to remove pimples, rashes and irritations; and finally the Talcum, smooth and pure, to impart a pleasing fragrance to the skin.

Soap 25c. Ointment 25c. and 50c. Talcum 25c. Sample each free.

Address: Cuticura Dept. B5, Malden, Mass. 02148. Cuticura Showing Skin Care.

PERSONALS

G. S. Brown came up from La Luz last week-end to visit relatives and friends. (Sephus) is in the employ of the Highway Department.

Mrs. Young Moves

John W. Harkey finished remodeling the building formerly occupied by the Lincoln Abstract & Investment Trust, which business was conducted by W. W. Stadman for several years, but recently sold to Miss Grace Jones, last week. Upon completion of the shelling and other repairs which have been going on this week, Mrs. George Young moved in her Style Shoppe, where she will have a full stock of goods for her patrons. Mrs. Young will conduct her Beauty Parlor in connection with the Style Shoppe.

A. D. Brownfield's Father Dies

Will Ed Harris, A. D. Brownfield left Monday night for Brownfield, Texas, upon receipt of a message to the effect that Mr. A. D. Brownfield's father had died at his home at Brownfield, Texas, which town was founded by the deceased several years ago. Mr. Brownfield was one of the wealthiest stockman of that region. Messrs. Brownfield and Harris will return the latter part of the week.

Ben Greisen

Let us in on this one tother day: Teacher—"I have went. That's wrong, isn't it?" Little Johnny—"Yes, mam." Teacher—"Why is it wrong?" Little Johnny—"Because you ain't went yet."

Girl Scout Notes

The Girl Scouts met at the home of Johnny and Frances Green Tuesday evening. The Captain being absent, Mrs. Ludlow had charge of the meeting. Lahoma Bigelow was temporary chairman. After the regular business session, a program was given, followed by delicious refreshments. The girls then adjourned to meet with Lois Stadman next Tuesday at the regular hour.

And Thereby Hangs a Tale

L. A. Whitaker, Manager of the Western Motors, thinks he can go Art Rolland one better—he craves your attention just a moment while he recites—"A Scotchman was presented with a pair of Spats, and what do you think he did with them?," Whit shouted, "he had them h-a-l-l-soled!"

To Geo. Roberts, Corona, N. M.

Pardon us, but we heard from rather unreliable authority, that it was "75" degrees below zero in Corona tother night. Of course we thought that was really 'chilly.' It won't be long now before the birdies begin to sing, let us hope.

Open Land in Chavez County

Washington—The Interior department has announced that approximately 15,700 acres of unreserved and unappropriated public lands in Chavez county, New Mexico, would be open to homestead and desert land entry on March 4 at the land office at Las Cruces, N. M.

Rev. Dean Sherrin

will conduct Episcopal Church services at the Kelley Chapel next Sunday. Morning service at 11 o'clock; evening service at 7:30. The public is cordially invited. Come.

Judge A. H. Norton our old friend from Jicarilla, came to town last Sunday to remain here until the recent cold spell is over. Judge looks better than ever before since the cold weather set in, we are glad to say.

Rooms! Rooms!

Next door to the City Garage. Mrs. Mary Forsyth, Proprietress.

"Amazing"

"Amazing" is the only word to describe adequately the engineering progress reflected in new Frigidaire products, shown at the organization's convention in Fort Worth, Texas, according to F. A. English, local dealer, who has returned from the meeting.

"The electric room cooler exhibited at the convention, indicates that refrigeration will ultimately rank with heat in its importance to the welfare and comfort of the human race," he declared. This cooler in tests has lowered the temperature of an average size room 10 degrees in 30 minutes and at the same time reduced the humidity 10%.

"Personally, I was most interested in the new Cold Control for household models, which was also displayed. This is a small dial, with 6 notches. Simply by turning this dial, the housewife is able to get any one of the six freezing speeds in the dessert and ice trays. The freezing time of ice cubes is cut nearly in half. Ice cream now keeps perfectly, with this device attached. The convention went wild with enthusiasm when informed that the cold control has been made so that it can easily be attached to the models now in use."

A new household model, selling at the lowest price in Frigidaire history also was announced, Mr. English said.

C. H. S. Basketball News

The two C. H. S. teams played the return games with Alamo-gordo Friday evening on their court. The Alamo girls got a lead at the start of the game and although our girls played well, the score at the half was 3-13 in favor of Alamo. The C. H. S. six played a good game but were unable to overcome the large Alamo lead. The final score was 29-14 in favor of Alamo.

The boys' game looked at the start like another Alamo victory, their five scoring the first six points. Our boys were not discouraged and with Fay Harkey making the first field goal, we began to gain on our opponents. Carrizozo was in the lead the rest of the game and were victorious by a final score of 22-17. Both of these games were exciting and there were a number of Carrizozo rooters present.

Both Carrizozo teams will play the Corona teams on the home court Friday, February 22 and Capitan Saturday, February 23, at Capitan. Don't miss these two games.

Edward Brigham

from Steinway Hall, New York City, will give a song and dramatic Recital at the High School Auditorium on Tuesday evening, March 5. Mr. Brigham gave several concerts in this state last year and everywhere he went he was praised most highly for his wonderful bass voice and his unusual ability as a dramatic reader. His readings of Poe's works are tremendously effective. This musical artist will be the first to visit us in our new high school auditorium. The concert will be under the auspices of the High School Orchestra.
