

LOCAL MENTION

Mr. and Mrs. S. S. Gillespie and baby daughter are spending several days in El Paso this week, visiting relatives and friends. On Monday, they acted as best man and bridesmaid at the wedding of Mrs. Gillespie's brother, L. C. Smith, Jr., and Miss Marjan Appleton, both of El Paso, with the Rev. Hunter Lewis of the Episcopal Church performing the ceremony. The same reverend gentleman christened Mr. and Mrs. Gillespie's infant daughter, Daisy May. The Gillespies and the Smiths came to Carrizozo and left yesterday for Ruidoso where they will spend a short time and the Smiths will go on to the Carlsbad Cavern and other places of interest on their honeymoon trip.

Straws That Show the Wind. The time is close at hand when candidates on each county ticket must let the facts be known, and here, we understand it, are a few of them: S. W. Kelsey will be a candidate for the nomination on the Republican ticket for Assessor; Rinaldo A. Duran for Treasurer; S. E. (Ben) Greisen for Clerk; John E. Brady for Sheriff; Mrs. Alice French for School Supt.; Mrs. Ina Mayer for Treasurer, and Elerdo Chavez for Probate Judge.

This is the situation, we understand, thus far. Thus, does the political pot begin to perk up and boil.

Robt. and Bernice Cardwell nephew and niece of trainmaster T. W. Cardwell left last Friday for their home in Oakland, Calif., after a pleasant visit of two weeks with their aunt and uncle. They were accompanied as far as El Paso by Mrs. Cardwell, who returned home that evening.

Miller French has been ordered to report at San Francisco by the Federal Bureau of Construction and from that city he will go to Alaska on an engineering project for the government. This information his parents received this week and Miller will leave Albuquerque tonight on his long trip. No doubt, his parents feel a sense of regret at losing him for a time on such a long trip, but how many young men would be doubly delighted to be recognized by a government department. This is a big plume in Miller's hat and we congratulate him.

Mr. and Mrs. Walker White and children and Mrs. Charles LeBaron came down to Carrizozo yesterday afternoon. Mr. White leaving on train No. 12 for the east as traveling agent for a large wholesale drug house. We wish to offer a correction in last week's notes regarding Mrs. White's trip to the east. She traveled over 6,000 miles, and the error was where the mileage stated 1,000.

Fight for Child's Custody. El Paso Post: A fight over the guardianship of Lizzie Ellen Ayres, 3, whose parents are dead, was to be heard in county court Thursday. The child was adopted by an aunt, Lizzie Ayres, but her maternal grandmother, Mrs. Nellie Brannum of Carrizozo is seeking to be appointed guardian.

CRYSTAL THEATRE

T. J. Pittman, Mgr.

Friday-Saturday--Wm. Haines in "The Girl Said No."

Sunday-Monday--Program of short subjects. Chapter 10 of 'Ace of Scotland Yard'; 'Steeple Chace' (Sporting Youth) 'Sweethearts' (Rooneys) 'Amateur Night' (Oswald) and 'The Actor' (Benny Rubin).

Tuesday - Wednesday--Retty Compson in "The Medicine Man."

Thursday-Friday-Saturday--Joan Crawford and Jno. Mack Brown in "Montana Moon."

Murder at Fort Stanton

Near the hour of 8 o'clock Wednesday night, a patient by the name of Santiago Martinez shot and killed another patient by the name of Manuel Garcia. The cause of the shooting, as told by people about the Fort is that Garcia and two other patients had been in the habit of tormenting Martinez, with small matters and as he was very ill and no hopes were held out for his recovery, he became sullen and brooded over his ailment and the more he brooded, the more he became enraged at his tormentors, until Wednesday night, he crept up to Garcia's cabin and shot him in the back of the head. He then went to one of the doctors and told him of the shooting, but thinking it only a hallucination, the physician kindly instructed him to go to bed, which he did. At 9 o'clock when the lights were ordered out, Garcia's light still burned, which caused an investigation and the body was found on the floor. Martinez was brought to Carrizozo and lodged in jail, where he now awaits the action of the court, but according to those more acquainted with the case, he will probably never come to trial, as he has not long to live, at his best. The two other patients escaped by being at the Seamen's Social Club when the assassin hunted for them after killing Garcia.

Bewhiskered Firemen Latest Albuquerque Craze. According to the Albuquerque Tribune, the firemen of that city are determined to raise whiskers and Mayor Clyde Tingley has ordered them to "hoe the weeds." What for? Haven't the firemen the right to go back to na-chur the same as women have? From the bobbed hair to short skirts -- and from short skirts to bare legs is going back to nature with a vengeance, then why pick on the firemen for going into the business of raising spinach? Be merciful, Clyde!

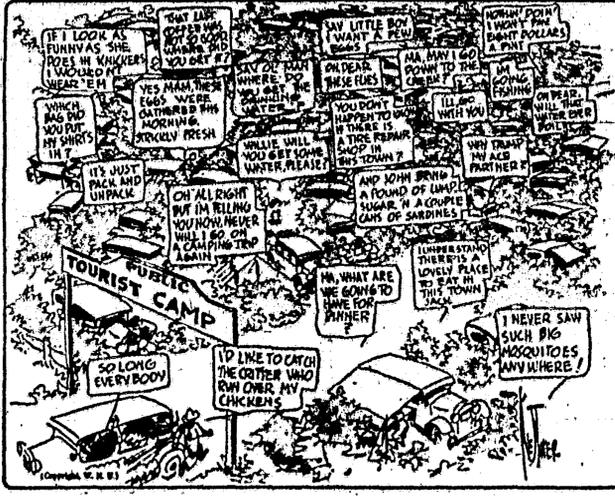

Bewhiskered Firemen Latest Albuquerque Craze

Eric L. R. Williams and Alden Lowie were over from Fort Stanton Thursday of this week. Eric having some work done on his car at the City Garage, after which they motored back to the Fort in the afternoon.

Lupe Gabaldon

came in from Claunch, N. M., the latter part of last week and returned with a new school truck which he will use to take the children to and from school during the coming term.

Tourist Camps Are Buzzing

The Local Schools

will open Monday, Sept. 1. The teachers will be in their rooms Monday morning by 9 o'clock, ready to greet and enroll the pupils. Children should not buy books until they have been enrolled. At that time the teachers will make a list of the books needed. If any children have second-hand books to sell, if they will bring them to school the teachers will help dispose of them.

Children who have not already been vaccinated should be so before entering school. The Supt. will be in his office at the high school building on Friday and Saturday before the opening of school to enroll the high school pupils and to advise with them as to the subjects which they should take this year. There will be a meeting of all the Carrizozo teachers at the high school building on Saturday, Aug. 30, at 3 p. m.—J. M. Helm, Supt.

OddFellows Have Big Meeting

Carrizozo Lodge No. 30, I. O. O. F., held an interesting meeting Tuesday night at their hall in the Masonic Temple, at which meeting, officers for the ensuing term of six months were installed as follows—Noble Grand, J. W. Harkey; Vice Grand, S. E. (Ben) Greisen; Sec'y-Treasurer, Wm. J. Langston; R. S. N. G., R. A. Walker; L. S. N. G., Clark Hust; B. S. V. G., Joe West; L. S. V. G., Herman Kelt; Guardian, Lewis A. Burke; Chaplain, A. L. Burke; Warden, M. J. Barnett.

The lodge is beginning a campaign for the late summer and fall as is other lodges in this jurisdiction, and good results are already being accomplished.

Plans for a big get-together meeting of the three lodges, Alamo, Tularosa and Carrizozo are maturing nicely.

Revival at Capitan

Revival meeting will begin at Capitan Sunday morning. Plan to be at the first service and at every service if possible. There is a "sound of going to the tops of the mulberry bushes." Let us remember that we are laborers together with God, and pray, boost and attend. No service at Carrizozo Sunday night.

Jno. L. Lawson, pastor.

Mmes. Belknap and Kenyon

of Ancho were Carrizozo visitors Wednesday and reported some heavy rains in that locality which were badly needed and which is making the stockmen 'perk up' and wear broad smiles.

Car Turns Over

Last Saturday night, Andres Lueras, Jr., accompanied by Esperidion Jauregui and Rafael Lopez, drove out towards Nogal for a little joy ride and on the return back, in attempting to round the curve after driving at a high speed over the railroad crossing, Andres, who was piloting the car, could not control the same and it turned over three times. The boys suffered only from the shock and a few minor scratches, but the car was badly torn up.

Mr. and Mrs. C. S. Rockwell

daughter Edith and sons Warren and Lewis were here last Saturday on their way to Capitan, after spending several days with friends at Socorro.

Mrs. Riley McPherson

entertained sixteen little guests at her home Monday afternoon, in honor of the eleventh birthday of her son, Jobie Albert. Games were played and general merry-making was the order of the time from 2 to 6, after which, refreshments were served.

L. N. Bell and Sister Oleta

returned last week from Miami, Arizona, where they visited their father, M. C. Bell for about two weeks. They said that the range in certain parts of Arizona is badly in need of rain, but moisture has perhaps fallen by this time.

Mrs. J. P. Phillips

and daughter Dorothy of Roswell are here for a week's visit at the Riley McPherson home, the Meadames being sisters.

Mr. and Mrs. T. E. Kelley

arose early yesterday morning and met Mrs. Hannah Luster of Los Angeles, who with her husband, Thos. E. Luster, once edited this paper. Mrs. Luster was on her return trip from Murphysboro, Ill., where she attended the funeral of her father and remaining in the east longer than she expected prevented her from stopping over for a visit with her old Carrizozo friends. She informed Mr. and Mrs. Kelley that she had time to stop over at Kansas City, where she paid a short visit to Dr. and Mrs. R. T. Lucas and Miss Rosalind Burke.

J. R. Sanchez

has returned to his position at the Kudner ranch, after a week's visit with his brother, A. P. Sanchez in El Paso.

ANCHO NOTES

The A. W. Drake family is making a trip to their former home, Wellington, Tex.

Miss Edith Dale is visiting friends in El Paso.

Mrs. Land of Gran Quivera was an Ancho visitor this week, being the guest of Mrs. Cooper Hightower.

Mr. and Mrs. L. P. Hall are the parents of a baby daughter, Martha Lou, born last week in Carrizozo.

The Misses Maudie and Mary Pickett Warden are home after having spent their vacation in El Paso.

Messrs. Tommy McConnell and Pat Stephens left on a visit to Houston, Texas, accompanying Howard Kenyon, Jr., on his return home.

Mmes. S. J. Pruett and Marton Pruett, accompanied by their children, left Monday night for an extended visit in El Paso.

The Walter and R. G. Hobbs families have as their guests, Mr. and Mrs. C. E. Daniels, Mr. and Mrs. O. L. Bundick, Miss Billie Bundick and Mr. Frost, of San Antonio, Texas. A lawn party, complimenting the guests is being planned for the near future by Mr. and Mrs. Walter Hobbs.

Mr. and Mrs. R. N. Storey entertained a group of friends Saturday, Aug. 9. Dancing was the main diversion of the evening. Dainty refreshments were served to thirty people.

Mr. and Mrs. Joe Devine are now residents of Ancho, Mr. Devine having relieved Miss Alesa Holmes on second trick at the S. P. depot. Miss Holmes goes to Corona to relieve Mrs. Ruth Ware on the 3rd trick at that place.

Mrs. R. M. Jones of El Paso, arrived Friday to visit her mother, Mrs. R. E. P. Warden, and with the Warden family went up to the Ruidoso for a few days' vacation.

The ice cream social sponsored by the Woman's Club, was a tremendous success, netting a sufficient sum to put finishing touches on the shelter house. The club held its regular meeting at the home of Mrs. L. L. Peters, Aug. 9. The rooms were attractively decorated with lovely garden flowers. Mesdames Martin and Kenyon were special guests. A delicious salad course was served. The club library is steadily increasing, the White House of El Paso, Mesdames Frances and Ethel Melton and LeMaster having donated several volumes. At this meeting, one of the most delightful surprises was given for Mrs. T. J. Straley, whose birthday was near at hand. She was the recipient of several dainty handkerchiefs, a prettily decorated cake and a beautiful bouquet of flowers.

Next meeting will be with Mrs. S. J. Pruett, August 23rd.

Mrs. J. A. McPherson

and daughter Clara Belle of the Neighbauer ranch, are visiting relatives and friends in Roswell this week.

NOGAL NOTES

By "Canyon Cal"

Mr. and Mrs. Champ Ferguson were Carrizozo visitors from their farm on the Nogal-Mesa Wednesday. They are highly elated over the nice rains they have had which insures their crop they have worked so faithfully in order to bring about the desired results.

Ed Comrey, tenor singer in the Nogal Boosters' Quartet, was a business visitor at Carrizozo Wednesday. Ed is not joking when he speaks of his fine yield of plums and other things in the fruit line, for he has certainly the choicest he has raised for many years.

Mr. and Mrs. Floy Skinner

and daughter, Mrs. Sam Cox of Fort Stanton, were in Carrizozo Thursday, visiting relatives and friends.

Wm. Ferguson of the Nogal-Mesa was a visitor at Carrizozo Wednesday. Billy, like his son Champ, is much enthused over the amount of moisture they have had on the mesa. Billy is anxiously awaiting for the Nogal Boosters' Quartet to make its appearance, but says we left out a prominent soloist, Ed Peters, who has an exquisite "barrel-tone" voice. Beg your pardon, suh.

Homer McDaniel and daughter Lois returned Monday from a week's visit with his brother at Las Vegas.

Mrs. Claude Sheffield is spending the week-end at the Aguayo ranch.

A. B. Zumwalt left Sunday for Los Angeles on account of Mrs. Zumwalt's serious illness.

Miss Beatrice Treat, who has been spending her vacation at the Aguayo ranch, was called to El Paso Sunday on account of her aunt's illness.

Messrs. Peacock and Carl McDaniel were business visitors at Roswell this week.

Jim Greer spent Tuesday night with his family at the Rich Hust home. Mr. Greer's folks will remain at the Hust home during the canning of fruit.

The "Mountain Boomers" will play for a dance here Saturday.

Mr. and Mrs. L. P. McClintock

were guests of Mr. and Mrs. Roy Bogle at a fried chicken dinner Tuesday evening.

James A. Travis

who has a string of cabins at Ruidoso for summer tourists, was a business visitor here today, and while in town, paid this office a pleasant call.

Mr. and Mrs. Wayne Van Schoyck

and children of White Oaks and Mrs. Brumguard and small son of El Paso, were Carrizozo visitors last Saturday. Mrs. Brumguard is Mrs. Van Schoyck's sister, and is their guest for a short time at their home in White Oaks.

Mrs. A. J. Atkinson

and Dudie Sultemeir were visitors here from their homes in Corona on Monday of this week.

1—Statue of George Washington being replaced in Union square, New York, after remodeling of the park. 2—Scene in Santa Monica, Calif., during the Pioneer Day parade that was part of the celebration of the Centenary of the Covered Wagon. 3—New United States submarine V-5, declared to be the safest fighting craft afloat, being given its preliminary test off Provincetown, Mass.

# NEWS REVIEW OF CURRENT EVENTS

## Dirigible R-100 Makes Safe Flight From Britain to Montreal, Canada.

By EDWARD W. PICKARD

THE R-100, made a successful and uneventful crossing of the Atlantic ocean, taking off from Cardington, Wales, and reaching Montreal about 76 hours later. There, at St. Hubert airport, she was tied up to the mooring mast that had been built for the purpose, and her passengers landed, well pleased with the trip.

Until the dirigible reached the vicinity of Newfoundland she maintained a speed of between 50 and 70 knots, but the ever-present fog then forced a slowing down until she got well into the Gulf of St. Lawrence, having passed over the Belle Isle straits. While passing over Quebec the dirigible sustained some damage to the fabric covering one of the fins, and the motors were shut off until repairs had been made. This delayed the arrival at Montreal somewhat and prevented the tying up of the ship to the mooring mast until early Friday morning. Throughout the voyage radio communication was kept up with bases in England and Canada and with ocean liners. The northerly route was taken, following the great circle by way of north Ireland to a point south of Cape Farewell, Greenland, then to Belle Isle and along the St. Lawrence river to Montreal.

Squadron Leader R. S. Booth was in command, with four officers and a civilian crew of 39 men. Among the few passengers were Lieut. Com. Charles Dennistoun Burney, managing director of the firm that built the R-100; Lieut. Com. R. St. John Prentice of the British aircraft carrier Courageous, and Maj. G. H. Scott, famous British airship commander.

CANADA'S parliamentary elections were watched with great interest because the results are likely to be important to the United States as well as to the Dominion. The Liberal government, headed by Mackenzie King, was decisively defeated by the Conservatives, and Richard B. Bennett, Conservative chief, will be the new premier. Mr. King himself was re-elected to parliament, but many members of his cabinet lost out, these including Finance Minister Charles A. Dunning, who drew up the budget increasing tariffs against the United States and lowering them to Great Britain, which constituted the main issue of the campaign.

A quick call to a session of the Canadian parliament is considered one certain result of the political upset.

Canada's extension of tariff preferences to Great Britain, without exacting tariff preferences in return, can be expected to be withdrawn or modified as the result of the election. The electors turned it down in defeating the government candidates, Canada, in other words, will make its trade treaties with the world, irrespective of empires and sentiment.

The St. Lawrence seaway plan is once more thrown in the realm of political controversy and uncertainty. Higher tariffs against the United States, in the absence of a Canadian-American trade agreement, are to be expected under a Bennett premiership.

STARTLING news came from China. A large Communist army took possession of Changsha, capital of Hunan province, the government troops retiring without making any defense, and the city of half a million inhabitants, a commercial, political and educational metropolis, was looted and partly destroyed by the Reds. Ten government buildings were burned, as were numerous foreign properties and the Japanese consulate, and the offices of the Standard and Texas Oil companies were robbed. Wealthy residents who were unable to escape were tortured to death. The Red invaders proclaimed a Soviet republic. The burning and looting, says a dispatch from Shanghai, was carried on in a systematic manner. The city

was divided into 50 wards, each administered by a Communist leader with a group of riflemen. All power was centered in a supreme Soviet committee. Gangs of Communists, headed by squads of Red troops, surrounded buildings marked off by the supreme command for depredation.

Orators proclaimed the Communist purpose "to distribute the surplus wealth," and selected followers entered the buildings and transported furniture and valuables to the street, where they were auctioned off.

The proceeds were pocketed, after which the coolies and town riffraff were invited to enter and complete the looting. After this the places were burned and the crowd moved on to the next building scheduled for destruction.

More than 200 foreigners, 20 of them Americans, were at the summer resort at Kuling, near Kluding, and were considered to be in grave danger. On Wednesday the American gunboat Palos, which was approaching Changsha, was fired upon by Communists and five of her crew wounded. The Palos returned the fire, using machine guns and three-inch rifles at close range, and finally dispersed the Reds. The Palos had previously helped evacuate foreigners from Changsha and was returning to survey the ruins of the city. Two American missionaries, Rev. William Lingle of Salisbury, N. C., and Rev. Allen Cameron of Lawrence, Kan., remained in Changsha because they had conscientious objections against accepting protection from gunboats.

UNDER the guidance of Prohibition Director Amos W. W. Woodcock, dry enforcement is to be carried out in a manner that will not be so likely to arouse the rage of the citizenry. Mr. Woodcock proposes to have the dry law agents trained "to act always as gentlemen" and to resort to the use of firearms only in self-defense. He called the administrators and special agents all in to Washington and laid before them a statement of his policies which was said to have been approved by President Hoover and Attorney General Mitchell. Schools will be set up to teach the agents "to use their brains rather than their brawn in discharging their duties," to train them in methods of gathering evidence, in knowledge of the law and in habits of discipline.

Five major points were emphasized in the Woodcock statement aside from the proposal to maintain high personal standards for agents. These were: (1) Establishment of a system of daily reports to Washington by deputy administrators; (2) scientific research into such problems as drunkenness statistics, alcoholism deaths, and hop and corn sugar production; (3) efforts to obtain more state aid in dry law enforcement; (4) efforts to secure more uniform sentences for violators; and (5) concentration upon the commercial liquor traffic rather than upon "pitiful, plebeian, non-commercial cases."

Supervisors of industrial alcohol permits also met in Washington and, with their chief, James M. Doran, considered how they might best combine their efforts with those of the prohibition enforcement unit.

President Hoover's law enforcement commission will issue a second formal report of its work this fall. Arrangements for formulation of the document will be completed at a meeting here early in October.

Leaders of nearly all the dry organizations in the country issued a signed declaration of policy which was looked upon by many as a recognition of the growing antagonism to prohibition enforcement as it has been carried on in the past. In it they repudiate all enforcement policies that do not regard and safeguard every personal right guaranteed by the Constitution, and pledge themselves to a campaign of education. The declaration states it is the paramount purpose of the Eighteenth amendment to destroy traffic in intoxicating beverages, and that the enemies of prohibition try to make this appear as offensive empty-tummy legislation.

OUT of the welter of Democratic aspirants for the gubernatorial nomination in Texas, "Ma" Ferguson, former governor, and Ross S. Sterling, wealthy Houston publisher, emerged in the lead, and the victor will be determined in a run-off primary, since

neither of them had a majority. State Senator Love, who led the successful bolt in Texas from Al Smith in 1923, was among those badly beaten. United States Senator Morris Sheppard was renominated.

There will have to be a run-off election in Oklahoma also. The leaders in the Democratic race for governor were "Alfalfa Bill" Murray and Frank Futtram; and for United States senator, Thomas P. Gore, the blind former senator, and Charles J. Wrightman.

WITH virtually no opposition the London naval treaty was passed by both houses of the British parliament and then was made effective so far as Great Britain is concerned by receiving the formal approval of King George under quaint procedure instituted during the reign of Henry VIII. Senator Hiram Johnson of California, leader of the opposition to the treaty in the United States, declared that the alacrity with which parliament ratified the pact was proof that the British were only too eager to seal a bargain perpetuating their control of the seas.

IN LINE with the Hoover program helping business, representatives of the various branches of the building industry and allied agencies of finance met in Chicago and created a permanent national conference on construction. Julius H. Barnes, chairman of the national building survey conference last fall, presided and was made head of a committee to complete arrangements for the organization of the conference. A statement issued said:

"The meeting was held for the purpose of reviewing the principal intergroup problems of the construction industry and to determine the practicability of developing a continuing organization to assist in the solution of such problems.

"Aspects of realty finance, including problems of legislation, appraisals of property, methods of home financing and credit practices were discussed. Possible means of securing greater stabilization of the construction industry, a number of aspects of taxation and practical methods of introducing economies in the building and financing of residences and income properties, were considered."

PRESIDENT HOOVER has created a commission to study the question of unemployment statistics and has invited labor, business and economic groups to select its members. Ethelbert Stewart, commissioner of labor statistics of the Department of Labor; William M. Stewart, director of the bureau of census for the Department of Commerce, and a representative of the Department of Agriculture will be ex officio members.

In announcing the appointment of this commission the President defended his practice of naming such investigating bodies, and added: "As we need the best brains of the country to assist in government and in the coordination of public efforts I shall appoint others."

RUSSIAN goods will not be kept out of this country merely because they come from a Soviet state. This in a sentence was the stand taken by President Hoover, and consequently Assistant Secretary of the Treasury Lowman had to reconsider his decision denying the entry of two shipments of Russian wood pulp at New York imported by the Amtorg Trading corporation. Any action barring Soviet goods the President held must be based solely on the law applicable to all nations and designed to exclude convict-made goods and prevent "dumping" practices on the part of countries competing in American trade.

IF THE Wafdists of nationalists of Egypt succeed in their campaign against King Fuad, Abbas Hilmi, former khedive who was deposed by the British, may be restored to the throne. The British government is said to be disposed to accept this result, though both Italy and France have declared their opposition. "The Wafdists assert that so long as Fuad is on the throne there will be no peace in Egypt and no possibility of settling disputes with Great Britain.

# South West NEWS ITEMS

The Columbia Cattle Company of Tucson recently filed articles of re-incorporation with the Arizona State Corporation Commission in Phoenix.

Under an emergency proclamation issued by Governor J. C. Phillips, the Arizona State Commission of Agriculture and Horticulture has \$21,000 additional funds to be used in cleanup work in the pink boll worm infested cotton district near Gilbert, Ariz.

Joseph A. Tahlhelmer, for the past five years head of the journalism department of the Union High school in Phoenix, has been elected director of publications at the University of Arkansas and will take up his new work at the beginning of the fall term.

A final tabulation of census figures for Arizona, made public in Phoenix by Orme Lewis, supervisor of Maricopa and Yuma counties, places the state's population at 421,641, including 27,134 Indians. This leaves a white population of 394,507, an increase of 18 per cent over 1920.

A coroner's jury in Tucson held Pedro Sandoval, alleged hit-and-run driver, responsible for the death of 5-year-old Gregario Hooper. The Hooper child died as result of an accident, when an automobile operated by Sandoval struck the child, according to testimony offered to the coroner.

The Rev. Dr. B. Wrenn Webb, synodical executive of the board of national missions, of Tucson, Ariz., is moderator of the Arizona synod of the Presbyterian church, succeeding the Rev. C. A. Dugger of Superior, Ariz. Dr. Webb was elected in Los Angeles at the first day's session of three synods.

A large amount of wool will be shipped from Magdalena, N. M., this year. The clip is usually heavy and the quality especially good. For many years the average shipments from here have reached or passed one million pounds annually and this year is expected to be considerably above that figure.

Arizona will spend during the ensuing fiscal year, 59 per cent of all money collected by direct taxation for state purposes on education, according to a statement released in Phoenix by Ana Frohmiller, state auditor. Of each \$100 collected \$49.18 will be expended for educational purposes, the state auditor's statement said.

Carmel Duran was sentenced to serve from seven and one-half to ten years in the New Mexico penitentiary, and Teresita Ferguson was sentenced from four to six years by District Judge H. A. Kiker at Raton, N. M., following their conviction in connection with the robbery of the John Young-Hunter home at Taos, N. M.

A U. S. employment bureau will be located in Albuquerque, effective August 16, it was announced recently by Congressman Albert Simms, after a two-day conference in Albuquerque with Francis I. Jones, director general of the United States employment service. Jay W. Jones of Albuquerque has been selected as superintendent of the bureau. The bureau will serve the states of New Mexico and Arizona.

"The First American," one of the greatest Indian shows in the world, will be given for the third successive year in Albuquerque, N. M., August 19, 20, 21 and 22. The fame of this gigantic spectacle of Indian life has spread from coast to coast, and visitors will soon be heading for New Mexico from all parts of the United States. Reservations for hotel accommodations in Albuquerque this year far exceed those of the past two years.

"Portrait Study," a painting by Louis Norton, Tucson, was awarded first prize in the Northern Arizona museum art exhibit, held in Flagstaff. Second place prize was awarded to Jean Morrison, Phoenix, for her painting, "November in the Orchard." Honorable mention was given paintings by Lucy Marlow, Tucson, and Marjorie Thomas, Phoenix. "Where Aspens Grow," a painting in water colors, by C. D. Phillips of Prescott, was awarded honorable mention.

Commencing August 1st, 2,000 directional, informational and city road signs will be erected by the New Mexico Highway Department's sign division in the ensuing sixty days, it was announced at the highway office in Santa Fe. Of these signs, 1,100 are directional signs, which will be placed at road junctions and other necessary points. The remaining 900 are informational signs, giving the names of interesting points and mileage from or off the road to the point named. The city signs are placed at the limits of each town or city and gives the place name.

New Mexico had 133,000 acres of cotton under cultivation on July 1, 1930, according to the report of the Department of Agriculture bureau at Las Cruces. This figure shows an increase of 1,000 acres over 1929.

The range country comprising southwestern New Mexico and southeastern Arizona, taking in a part of the head waters of the Gila river, is now in the grip of a band of cattle rustlers. The sheriff's departments of both McKinley and Catron counties are supplying deputies with Indian scouts to run down the rustlers.

# Progress in Forestry

## Making Rapid Strides

A quarter of a century has brought an extraordinary change in the forestry policies of the government, marking notable progress in conservation, says World's Work. In 1905, when the forest service was created, there were 60 reserves, with an area of 50,000,000 acres. The area today is 160,000,000 acres, embraced in 150 national forests.

The physical development of the forests has progressed continuously in the last 25 years. In 1905 there were no fire towers or lookout stations; today 831 are maintained. As many as 1,188 public camp grounds have been improved during the period. Since 1907 the mileage of national forest roads has been extended from 330 to 10,730. Forest trails have increased from 6,044 to 47,175 miles. Mileage of telephone lines built for fire protection and administration purposes has increased from 539 to 35,026.

Receipts of the forest reserves in 1905 amounted to \$85,000, all for timber sold. Receipts last year totaled \$6,299,802. Of this amount more than \$4,000,000 came from the sale of timber, cut under forest service supervision on a sustained or continuous "crop" basis.

## Here's Latest Addition to "Pet Snake" Stories

For his own particular pet Alec Milne of Mount Vernon, N. H., prefers a snake, and for an excellent reason. Most people select pets for companionship or because of a fondness for a particular species. Not so with Mr. Milne; he says he likes his pet snake because it performs a good day's work and asks nothing in return. Mr. Milne is a truck farmer and is hampered in his work by a leg injury, which makes it impossible for him to reach down to remove grubs, worms and insects which destroy plants. So every morning the three-foot striped snake starts out with his master and follows him along through rows of vegetables. The snake enjoys itself immensely, removing the pests and eating them, says the Boston Globe. At the end of the day the "pet" returns to its haunts in a nearby pile of rocks to rest for the night.

## New Berry Resists Drought

Fruit growers are interested in a wild variety of black raspberry which was found in the Oregon woods. It thrived during a not dry season when domestic kinds languished, did not die down in winter and even produced berries in the late fall.

It is believed the specimen is a hybrid of the black raspberry with some species of blackberry. Its leaves and growing habits are much the same as those of the latter. Experts are examining the fruit to determine if it is suited to commercial shipping and canning.—Popular Mechanics Magazine.

## "Evil Spirit" Kills Seven

Superstition has gripped the people of Altun Kara Hissar, in Central Anatolia, following the deaths of seven Turkish women in a ravine. The side of the ravine caved in burying the unfortunates under tons of stone and earth. They were part of a party who were collecting lime to beautify the walls of their homes in preparation of the festival of Kourban Bairam, and as similar accidents happened in 1836 and 1923, the villagers are convinced that an evil spirit dwells in the ravine and at times demands women as victims to appease its anger.

## His Business

Archibald, visiting his aunt, who lives on a public highway, was conversing with a pedestrian loitering near the farm. The aunt growing suspicious of the stranger, called the lad into the house and said:

"What is the business of the young man you were talking with?" "Hitch-hiking," replied the animated lad.

## Paris "Reforesting"

During 1930 about 1,000,000 francs will be spent in reforesting the boulevards of Paris, harder varieties replacing the familiar chestnut trees in some localities.

## And Me So Tired

"Does your watch tell time?" "No, you have to look at it."—Chicago Post.

# Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need, in cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

Steady Work—Convict—It's much more pleasant working in prison than outside. "More pleasant? How so?" "Because you're not always being threatened with dismissal."—Lustige Kolner Zeitung.

# TOOK IT TO BUILD HER UP

Strengthened by Lydia E. Pinkham's Vegetable Compound

La Junta, Colo.—"After my little daughter was born, one of my neighbors persuaded me to try Lydia E. Pinkham's Vegetable Compound to build me up. The first bottle made quite a change in me. I got an appetite and I could sleep much better. I am not so nervous as I was. I have six children and do all my own work. I can do so much more now than I could when I began taking the Vegetable Compound and I shall certainly recommend your medicine whenever I have an opportunity."—Mrs. JOHN OSBORN, R. 2, Box 216, La Junta, Colorado.

Pat to Real Use—Author—May I have some further details about this magnificent estate you offer for sale? Agent—Do you wish to buy it? "No, but I think I can use your glowing description of it in my new novel."—Stray Stories.

For true blue, use Red Cross Ball Blue. Snowy-white clothes will be the result. Try it and you will always use it. All good grocers have it.—Adv.

Knew What He Meant—The late Jim Pound had a woman witness on the stand complaining about her husband's persistent refusal to give her money. "The last time you asked him, did he refuse?" asked the attorney. "Well, not exactly. I told him I had to have some and he turned around and knocked me cold without saying a word, but I knew right away what he meant."—Detroit News.

## Literally True

The shipwrecked sailor found himself left high and dry on the sandy shore. "I'm through," he said, "washed up!"

## In Polite Terms

Little Boy—"Dad, what is kleptomaniac?" Father—"Society's stainless steal."—Stray Stories.

Doing one's duty ought to be praised. It's hard enough as it is.

Dignity is not to be made fun of. Everybody ought to have some.

# The Mazaroff Mystery

By J. S. FLETCHER  
W. N. U. Service

Illustrations by IRWIN MYERS  
(© by Alfred A. Knopf, Inc.)

## THE STORY

Mervyn Holt is engaged by a man calling himself Mazaroff as a traveling companion. After a short tour they put up at the Woodcock inn on Marradale moor. They meet, casually, Mrs. Epphinstone and Sheila Merchlison. Mazaroff tells Holt they are his wife and daughter and that his real name is Merchlison. That night Mazaroff falls to return to the inn and his disappearance is unexplained. Holt meets Sheila and tells her of Mazaroff's disappearance. Holt is questioned by Police Sergeant Mannors and a reporter, Bowans. Mazaroff's murdered body is found. Crole, Mazaroff's lawyer, and Maythorne, private detective, arrive. Valuable diamonds that Mazaroff usually carried are missing. A gun, stolen from Musgrave, is found at the scene of the murder. Evidence at the inquest proves Mazaroff was Merchlison. His will leaves all to Holt. Herman Kloop, close friend of Mazaroff is in London. From him it is learned that Mazaroff possessed two remarkable diamonds.

## CHAPTER V—Continued

"Well, about a month or five weeks ago, I was called to the telephone one afternoon, and found Sir Samuel speaking to me. He wanted me to go round to Park lane there and then, to look at and estimate the value of a diamond that had been offered to him. I found Sir Samuel and Lady Locke in their library; they had with them a stranger whose appearance, as I recollect it, corresponds with the description of Mazaroff given in the newspapers—I particularly remember the cast in the left eye. He was not introduced to me by name. It appeared that the stranger was one who was interested in diamonds in a large way, had heard of Sir Samuel and his wife as possible buyers, and was willing to sell them something of very special value; to wit, a remarkable pair of blue diamonds, of which he had one in his pocket. It was this that I was asked to see. He told me that it was one of a pair—the other was equally fine. He further said that he had been in the diamond trade for some years, in South Africa, had now retired, and this would be his last deal. What the Lockes wanted to get at was—what were the two diamonds worth? The would-be vendor and myself had a good deal of talk about the matter. He was very fair and reasonable, and he and I eventually came to a decision as to a proper price for the pair."

"And what might that be?" asked Crole, eagerly.

"Well," answered Frobenius, "we agreed that a fair price would be a hundred and sixty thousand pounds." Crole let out an exclamation of astonishment.

"One hundred and sixty thousand pounds!—for a couple of diamonds!" he said. "Whew!—that's a bit exceptional, isn't it?"

"You have to bear in mind that the diamonds are exceptional," answered Frobenius. "The sum we agreed upon was a reasonable price—not an extravagant one."

"And what happened?" asked Maythorne. "Was the deal carried out?"

"That I do not know," replied Frobenius. "I perceived that after having agreed with the seller as to what would be a fair price, my part was played, and I left seller and buyer talking the matter over."

"You've heard nothing since?" inquired Crole.

"Nothing. I haven't seen Sir Samuel Locke, nor Lady Locke, since that afternoon," said the jeweler. "And of course I haven't seen the blue diamond man. But I feel sure that he was the man who is referred to in the newspapers as Mazaroff."

"I don't think there's much doubt about that," assented Crole. "Well, now, we'd better get in touch with these Locke people," he continued, glancing at me and Maythorne. "Park lane, you said?"

Mr. Frobenius gave us the exact address of Sir Samuel Locke and left us. Crole and I, as if by common impulse, looked at our companion.

"Well?" said Crole. "What's Maythorne asking himself?"

Maythorne looked up from a pattern which he was mechanically tracing on the tablecloth.

"Only one thing to ask—at present," he said. "Did Mazaroff sell those diamonds to Sir Samuel Locke? If he didn't—"

"Well?" demanded Crole.

"Then, in that case, Armintrade's got them—in my opinion. And the job will be to prove that he has! Where have we got the slightest clue to what we want to establish—that he and Mazaroff met on that first day after Mazaroff and Holt arrived at the Woodcock? But we're getting at something—and it all points to Armintrade. Now let's see this Sir Samuel man and get a step further."

We chartered a taxicab and were driven to Park lane, where we pulled up in front of an imposing mansion, at the door of which we were encountered by footmen whose liveries were rather more gorgeous than the usual

run of things in that way. The room into which we were ushered after we had sent in our cards looked as if some very high-class upholsterer had been given carte blanche to wreak his own will and fancy on it. A little, apple-cheeked, rotund man, who wore mutton-chop whiskers and a ready smile came bustling in, a big half-smoked cigar in one pudgy hand.

"I know what you chaps have come for!" he exclaimed, beaming from one to the other of us. "This Mazaroff affair—I've read it all in the papers, and your names, too; same as what I see on your cards—just so. Now then, what's it all about, gentlemen? It's a queer business, I think—what?"

"You're aware of it, then, Sir Samuel?" suggested Crole. "Well up in things as far as they've gone?"

"Who isn't?" exclaimed Sir Samuel. "Been plenty in the papers, anyway. Of course me and her ladyship's read all we could set our eyes to. It was only this morning she says to me, 'Sam! she says, 'as sure as fate some-body'll be coming to us about this here affair! And—there you are! But I'll tell you what—come this way, gentlemen, and then her ladyship can hear all you've got to say.'"

We followed Sir Samuel out of the cold grandeur of our first haven into the less formal and more comfortable harbor of another and smaller room, where we found Lady Locke. She was as rotund as her husband; her dress was of the latest fashion, and she had many rings on her fingers, and it struck me that she was somewhat sharper of intellect than Sir Samuel, not quite so open, and infinitely more watchful.

"Of course I know we should have inquiries made here," she observed, in a slightly affected tone. "I said so, this morning, to Sir Samuel."

"As I've just told 'em," said Sir Samuel. "Though, to be sure, I've no idea as yet as to how they got here. Nobody knows about our transactions with Mazaroff outside ourselves—so far as I know. Of course, Mazaroff may have talked. But now—how did you come to hear of us?"

"My dear Sir Samuel," replied Crole, solemnly, "there are mysteries within mysteries! A man of your position, and your knowledge of the world will understand me when I say that is a big thing. You've already read a good deal about it—now, to be brief, what can you tell us?"

Sir Samuel settled himself in a chair.

"Well," he said, with a glance at Lady Locke. This Mr. Mazaroff called here one day—just as you've done—and introduced himself as a man that had had big dealings in diamonds and the like in South Africa. He'd heard, so he told us, of Lady Locke as a likely purchaser of something exceptional in diamonds, and he'd thought she'd like to see a particularly fine bit of property that he'd got in that line of goods. Then he told me it was a pair of very fine and rare blue diamonds, and he produced 'em."

"Only one?" inquired Maythorne.

"Only one. The other," continued Sir Samuel, "he said was in the possession of his agent, a Mr. Armintrade, of Courthope's bank, who was just then away holiday making in Northumberland. He said he should be seeing Mr. Armintrade very soon, and he would get the fellow diamond from him—"

"Unless!" interrupted Lady Locke. "There was an 'unless' about it."

"So there was," admitted Sir Samuel. "Yes—unless Armintrade had got a definite offer from some other cus-

tomers—Armintrade, he said, had had the first blue diamond in his possession for some months and might have found an advantageous customer for the pair."

"Then you didn't buy?" asked Maythorne.

"No—we didn't buy," replied Sir Samuel. "What we did was this—I telephoned our regular jeweler, Frobenius, and got him to come here and examine the diamond that Mazaroff had with him. They agreed that a reasonable price for such a pair of blue diamonds would be a hundred and sixty thousand pounds. After Frobenius had gone, Mazaroff and I came to this agreement—if his agent, Armintrade, hadn't got a better offer, or made some arrangement to which they were committed, Mazaroff was to get the second blue diamond from Armintrade, and, on his return to London,

"Unless!" interrupted Lady Locke. "There was an 'Unless' about it."

show me and her ladyship the pair. If then we decided to buy, we were to have the pair at the price I've just mentioned to you. And of course, that's where it ended. We've never seen the diamonds since."

"Did you ever see Mazaroff after that first call?" asked Maythorne.

"Oh, yes, we did," answered Sir Samuel, readily enough. "He was a very friendly, sociable pleasant sort of man, and we asked him to come and dine with us."

"Had you any other guests, Sir Samuel?" Maythorne asked.

"No, we hadn't, that night," replied Sir Samuel. "Leastwise, there was her ladyship's nephew, young Jim Mallison—but we don't reckon him a guest. Nobody else."

"And you never saw him again after that?" asked Maythorne. "Never met him anywhere about London?"

"No—never saw nor heard of him again," replied Sir Samuel. "Until we saw all this in the papers."

"Your nephew, Mr. James Mallison, I think you said," remarked Maythorne. "Did you ever hear him mention seeing Mazaroff in town—after that dinner?"

Sir Samuel looked at his wife.

"I never heard Jim mention that," he answered. "To be sure, Jim knocks about a good deal in fashionable places, and so on—he's away just now,

or he could tell you himself. But I never heard him speak of meeting Mazaroff again—did you, Maria?"

"No—I never heard him say anything of that," replied Lady Locke.

We had a little more conversation with this worthy couple, and then left them. I was anxious to get out of the house; I had an announcement to make which I could not make before.

"I say!" I exclaimed, seizing my companion's elbow. "You remember that—this morning—I spoke of seeing Mazaroff in conversation with a man who was a stranger to me, but whom Mazaroff evidently knew? Well—there's a photograph of that man—the very man!—on Lady Locke's mantelpiece!"

The two men stopped, staring at me—Crole with an ordinary glare of surprise, but Maythorne with a sudden flash of the eye and an alertness that I had never noticed before in him: it was as if my remark had acted as an illumination.

"That's the man I saw talking to Mazaroff at Huntingdon and again at York," I asserted. "I recognized the photograph instantly."

"The probability is that that's the nephew we heard about—Mallison," said Maythorne. "Let's see—he was referred to as Lady Locke's nephew and Sir Samuel spoke of him as knowing his way about town pretty well. Now then, where are you? Mallison, according to what we've just heard, met Mazaroff at Locke's house. Mallison heard about, and saw, one of the blue diamonds. If the photograph is that of Mallison, as you assert, Holt, Mallison is the man to whom you saw Mazaroff talking first at Huntingdon and then at York. So—does Mallison know anything about this affair? That's to find out—when we can come across Mallison."

He paused for a moment in the middle of the sidewalk, hands plunged in his trousers pockets, eyes staring at the pavement. Suddenly he looked up, signaled to a passing taxicab, and motioned us to follow him into it.

"Come to my office," he said. "I've a chap there—my confidential clerk—who possesses one of the sharpest brains and most retentive memories in Europe. He'll know!"

Maythorne's office was in Conduit street, so we were there in a few minutes. At each end of the room we entered stood a table-desk; at that at the further end sat, when we walked in, a young man who would have attracted my attention wherever I had met him. He was a smallish-sized chap, and his thinish person was arrayed in a tweed suit of very large checks; he wore a hunting stock instead of an ordinary collar, and its folds were gathered together by a gold horseshoe pin; he might, indeed, have been a head stable boy as far as this sort of thing went. But he had the sharpest and queerest pair of blue eyes I have ever seen; the most inquisitive nose, and the straightest line of lip above the squarest and most obstinate of chins—and yet these things were not, severally or collectively, the most remarkable of his features. The thing that one's eye went to first was the fellow's red hair—absolutely, genuinely red, a veritable flame of color. I don't know what Crole thought of him—he had doubtless seen him before, perhaps often—but my own mind immediately crystallized its impressions into a word at sight of the vivid poll, the sharp nose, the general aspect of ready watchfulness: Ferret!

"Cottingley!" Maythorne said, going straight to the subject without preface. "Do we know the name Mallison?"

I saw a swift flash of light in the red-headed one's queer eyes—it was as if a lamp had suddenly been lighted somewhere behind them.

"We do! Mallison, James Mallison."

The creature's voice was as odd as his appearance. It was a sort of subdued falsetto—piping. Maythorne nodded.

"I thought you'd remember, Cottingley. In what connection, now?"

"Welmuster square affair. No direct connection—with him. One of our clients was in it, though. Mallison—his name was in the list. Memorized it. James Mallison—no occupation. Address—Park lane. Lady Locke's nephew—that's who Mallison is."

"And that Welmuster square affair, Cottingley? Gambling business wasn't it?"

"Police said in a private gambling house in Welmuster square. About three or four months ago. Thirty or forty arrests. Mallison was one of the men on the premises. If you remember, one of our clients was there—came to you in a blue funk. Nothing! Like the scrapbook?"

Maythorne nodded his head and held out a hand, and the clerk, turning to a big table that stood in the center of the room, took up a solidly bound volume which proved to contain newspaper cuttings, and with almost uncanny celerity found a page and handed the book over. Maythorne glanced at the extract, and then twisted the volume toward Crole and me.

(TO BE CONTINUED)

## HOME STUDY BEING OVERDONE

By LOUISE STRACHAN, National Child Health Director.

**E**XCESSIVE home study and gainful occupation for children outside of school hours are partly responsible for deaths from tuberculosis and heart disease among high-school pupils. The death rate from tuberculosis and heart disease in children between the ages of fifteen and twenty is greater than it is at any other age level.

In the last decade this group has shown less decrease in morbidity and mortality from these two diseases than has any other five-year-age group. This is singularly true in the case of cardiac conditions.

One of the great problems which has given rise to this condition is outside employment of school children. All persons must have rest and the adolescent at school is especially in need of it. Another problem is excessive home study assignments. There is a decided need for a central authority in the assignment of home lessons. Teachers must have knowledge of the home conditions and consider the child as an individual, so that if he has to work after school hours he need not be burdened with too much home study.

At the present time the American child suffers from too much home work. Most assignments given to high school children require one to two hours and with several teachers assigning work the tasks may require six to eight hours. This cannot be permitted if good health is to be maintained. A central authority in assignment of home tasks would moderate these tasks in proportion to the ability of the child and his home conditions.

## CARING FOR THE UNEMPLOYED

By GOVERNOR ROOSEVELT, New York.

Shorter working days and shorter working weeks, better planning of work to prevent periods of unemployment, increased public workers, while they may relieve unemployment, will not eliminate it. Unemployment insurance we shall come to in this country just as certainly as we have come to workmen's compensation for industrial injury.

Ninety per cent of unemployment is wholly without the fault of the worker. Other nations and governments have undertaken various systems which insure their workers when unemployment comes. Why should we fear to undertake the task?

I warn against the possibility of old-age insurance becoming a mere dolo, and also against a national tendency to pay the cost of unemployment insurance out of current revenues of government.

Unemployment insurance should be upon an actuarial basis, with the workers themselves contributing to its support. The old-age security law passed this year in New York may be characterized as one short step in the right direction, and the real solution would create a fund, not contributed by state and county governments alone, but which would be raised in part by workers and possibly by the employers.

## WORLD NEED OF BROTHERHOOD

By DAVID LLOYD GEORGE, Former British Premier.

Every country of the world is preparing for war and there are more men trained for war in Europe, Asia and America than before the catastrophe of 1914. I speak from personal experience when I say that although I have gone to live in a quiet place in Surrey, I hear every day the rattle of machine guns in one camp, the hoarse roar of cannon in another, and, carried by the westerly breeze, I hear the boom of naval artillery from the direction of Portsmouth, and the drone of airplanes.

That is going on in every civilized land on earth. It is really time the churches took this thing in hand. The international situation is bad. We are building up barriers against each other, putting up fences against each other. We are blockading each other, and we are trying to starve each other. Trade is treated as if it were contraband. The atmosphere is poisoned with suspicion and mistrust.

Let us have brotherhood. It is only the Christian churches that can do it.

## INJUSTICE IN EXCLUSION ACT

By JANE ADDAMS, Pioneer Social Worker, Chicago.

The present immigration exclusion act is a dead hand on the future. Wives or husbands who come on a visit to their families and overstay their permits are deported and the family can never be reunited in this country. Students who may change the school they are attending here to one which is not on the accredited list of the Department of Labor are ejected and can never return. Such hard-and-fast exclusion provisions, regardless of the effect on the persons regulated, cannot possibly work to the advantage of America.

The total number of deportations shows an enormous increase during the last ten years. From a rate which approximated several thousand a year at the time the drives were instituted, the number increased to 9,495 in the year after the passage of the immigration act of 1924; to 10,904 in 1926; 11,662 in 1927; 11,625 in 1928; and 12,908 in 1929.

There is anguish in the family groups where such experiences take place. To make an old mistake indelible is always of doubtful value.

## TRADE HAMPERED BY LAWS

By MATTHEW WOLL, Vice President A. F. of L.

I would scrap the Sherman anti-trust law and allow employers to exchange cost and price data as the best means of stabilizing the textile industry. The restrictions imposed today by law are a relic of a business era long since gone, but these restrictions penalize every social force by the tremendous waste of unintelligent production.

America has outlived the era of competitive philosophy. Limited manufacture and the subsequent rivalry for business are working to the detriment of all classes. The only way we can improve the situation is by allowing manufacturers, in co-operation with their employees, to adjust their output to consumer needs.

I believe an increase in consuming power would result from a repeal of these laws, because employers would be able to stabilize their wage cost without the anarchistic, blind, cut-throat tactics used in present business conditions.

### Tariff Facts vs. Falsehoods

#### National Republic:

THE American people have been treated to an avalanche of falsehoods about the new tariff, uttered by the same journalists and politicians who, when the increased tariffs of the 1922 law were put into effect, declared that they would kill our foreign trade, create unemployment, reduce wages and increase the cost of living—every one of which predictions has been given the lie by events.

Here are a few facts which should be more generally known. Of the 3,295 items in the old tariff law, 2,170 were left unchanged.

Duties were increased on only 890 articles—decreases were made in 235 items.

Duties collected on all items in the tariff schedules, both dutiable and free, will not average 16%, as compared with nearly 14% under the old tariff law, 23% under the McKinley law, 21% under the Wilson law, 26% under the Dingley law, and 19% under the Payne-Aldrich law.

No tariff laws passed in forty years have had a lower average tariff rates except the Underwood law and the Fordney-McCumber law.

The percentage of our imports entering free of duty will be the same under the new law as under the law it succeeded, about 64 per cent. Of our total imports in 1929, valued at \$4,400,000,000, commodities to the value of \$2,668,400,000 came in duty free. These imports have recently declined owing to unemployment in the United States. They will expand with the restoration of employment in competitive industries in this country our new tariff is intended to help. The Bureau of Business Conditions, a branch of the Alexander Hamilton Institute, a non-partisan institution, from which all the above figures are obtained, therefore says: "There is consequently little danger that the export trade of the United States will suffer materially from the new law."

A study of our exports shows that the world in general is buying from us now only what it is necessary to buy, and that our exports already go over many tariff walls, and are subjected to some 50 varieties of discriminations as compared with domestic production in this country.

The heavy outcry against the new tariff law is due to the fact that American international financiers and industrialists have built or acquired some two thousand factories in foreign cheap labor markets and object to having competitive conditions in the United States equalized by tariffs to the extent of the difference in labor costs. Foreign cheap labor importations account for all the unemployment existing in the United States today. The new tariff law represents an

effort to correct that condition in the interests of the American farmer and wage earner and the American producer generally.

## CONGRESS HAS A LARGE SWITCHBOARD TO CARE FOR ITS TELEPHONE NEEDS

Desk of Mrs. Daley, Chief Operator

The Private Branch Exchange Switchboard at the U.S. Capitol

A daily average of 27,000 calls handled at big P.B.X. Board, at nation's Capitol.

By JOHN B. O'BRIEN

A TELEPHONE switchboard, large enough to serve a fair-sized city, is required to take care of the most important body of men in this country, the United States Congress.

While Congress is in session, a daily average of 27,000 telephone calls is handled. There are times, however, when the number of calls greatly exceeds this figure, as on days when an important bill is up for discussion, or a vote is to be taken on a measure which is commanding nationwide attention. At such a time the girls who take care of the Congressional switchboard have little leisure time, but they do their bit cheerfully, realizing the great importance of the many calls, both local and Long Distance, of which latter class there are a great many.

The first switchboard was installed in the Capitol in 1858. It was a small affair as compared with the board of today, but it was ample for its purpose at that time. About the year 1900 the Senate and House switchboards were combined, and the system has been enlarged and replaced from time to time until, in 1926, a new 19 position board, requiring the services of twenty-seven operators, was installed.

#### How the Board is Arranged

Position 1 on this board handles the Long Distance calls which are originated by members of the Senate and the House. At times, however, this business becomes too heavy for one operator to handle. Then the girl who occupies position 2 comes to her rescue, this being a combination position equipped for

either local or Long Distance service. Positions 3, 4 and 5 on the board are for incoming calls, many of which originate in other government departments, although a large number come from the central office in Washington. Five positions on the board are used for serving the members of the Senate, and six for the members of the House, while three positions are in reserve for future growth.

The Congressional switchboard has 1,700 stations in use plus 400 extension stations, to serve a Congress which is composed of 96 Senators and 435 Representatives. Each Congressman has from one to three clerks, stenographers or secretaries, and in addition, there are certain general employees who have to be served from this exchange.

From this switchboard 39 tie lines run directly to the White House and to other departments of the government, while 23 trunk lines connect with the central offices of the city.

The operators who serve the Congressional switchboard are veritable information bureaus. They are called upon to answer all sorts of questions, to tell who is serving on this or that committee, who is the Representative from such a district in such a state, what new committees have been appointed, etc. In fact, they are almost as well informed on certain matters as are the corps of Washington newspaper correspondents. There are 20 standing committees in both the House and the Senate, and, in addition, as new subjects are introduced, other temporary committees are appointed. The telephone operators have posted a complete list of

all such committees, together with their membership, which is arranged in alphabetical order, and, therefore, it is an easy task to refer to them.

#### Chief Operator

The chief operator of the Congressional switchboard is Mrs. Harriet G. Daley. She has served on the Congressional switchboard since 1898. When the first switchboard was installed, it was a 1 position board of only 51 stations and served only the members of the House of Representatives. She had no stated hours, but she stayed as long as she felt she was needed and on many occasions she remained all night when the House was having a night session. This was in the exciting days of the Spanish-American War, and although there were only 185 Representatives at the time, the telephone proved invaluable to them, although this was a time when telephone service was only just beginning to come into general use.

In fact, many of the members of the House and Senate who came to Washington in those days had had little or no experience with a telephone, and some of them had never used one until they came to Congress. It is said that even "Uncle Joe" Cannon had such a dislike for the instrument in those days that he could hardly be induced to talk over one, and that when he did, he became so excited that the results were far from satisfactory. However, such a state of affairs lasted only a comparatively short time, and today the members of the House and Senate find the telephone of great assistance in carrying on their work.

## WHAT EDITORS SAY OF TELEPHONE

One of the finest Most Reliable traditions in the world telephone business is the high type of loyalty and devotion of telephone employees. Hardly a day passes but that some telephone employee demonstrates this devotion in the highest ideals of duty and obligation. And it is partly due to this effort to give telephone service at all times and under all conditions that makes the telephone service of the United States the most reliable in the world.—Brainerd (Minn.) Dispatch.

The telephone important Service has developed amazingly and has become an essential and integral part of the social and economic life of this country. Telephone calls run into the billions annually, and the whole structure of trade, industry and social intercourse rests very largely upon ready communication by telephone. The service thus given is tremendously important in every locality in the land. One appreciates how much one depends upon the telephone when one's telephone gets out of working order, even for a brief period.—Petaluma (Cal.) Courier.

There is no inanimate agency which brings you in contact with the human element more than the telephone. And as the old saying goes, whatever you say into the transmitter mirrors your personality. With the almost unbelievable number of conversations held over the telephone every day, in the interest of business and social relations, would it not be well to guard the style of speech because the listener can so easily put another construction on your manner of expression, especially if conveyed over a wire.—Revere (Mass.) Journal.

One of the most important persons in any business office is the one who answers the telephone calls. Whoever that individual may be, if they are fortunate in having a well modulated voice, if they know how to transact business, if they are prepared to know enough about the business which employs them, to explain matters over the telephone in a clear and comprehensive manner, a telephone girl or man can do very much to make the business that employs her popular with the public who deals with that firm.—Sterling (Ill.) Daily Gazette.

So great was the interest in London in the selection of the winner of the Edison scholarship that the London Sunday Express interviewed Wilbur B. Huston, the youth who won the scholarship, 3,000 miles away in East Orange, N. J., over the transatlantic telephone service.

**LEGAL ADVERTISEMENTS**

**OFFICE OF THE COMMISSIONER OF PUBLIC LANDS SANTA FE, NEW MEXICO**

**STATE TIMBER-SALE LINCOLN COUNTY Sale No. 2424**

Notice is hereby given that pursuant to the provisions of law and the regulations of the State Land Office, the Commissioner of Public Lands, will on the 2nd day of September, 1930, at 9 o'clock a. m., at the front door of the Court House in the town of Carrizozo, county seat of Lincoln County, New Mexico, offer for sale to the highest and best bidder all of the merchantable dead timber, standing and down, and all of the live timber marked for cutting on the S<sub>1</sub> Section 36, Township 10 South, Range 13 East, Lincoln County, New Mexico, estimated to be ninety-five thousand (95,000) feet; board measure, available for cutting. No bid will be accepted for less than \$2.50 per thousand feet, board measure, and the successful bidder at time of sale will be required to pay the expenses of sale and to deposit on the purchase price not less than One Hundred and Fifty Dollars (\$150.00). The balance of the purchase price will be payable as the cutting proceeds and as called for by the Commissioner of Public Lands.

Cutting will be required to be completed on or before July 1st, 1931, unless extension be granted for good cause shown. All operations under this sale will be conducted in conformity with a written contract to be entered into with the State of New Mexico, by the successful bidder, a copy of which will be furnished upon application and the sale will be administered by the United States Forest Service, in accordance with the existing co-operative agreement.

Austin D. Crile, Commissioner of Public Lands. Dated at Santa Fe, N. M., June 14, 1930. First Publication, June 20. Last Publication, Aug. 29. 11 times.

**NOTICE FOR PUBLICATION STATE LAND SALE LINCOLN COUNTY OFFICE OF COMMISSIONER OF PUBLIC LANDS SANTA FE, NEW MEXICO**

Notice is hereby given that pursuant to the provisions of the Act of Congress, Approved June 20, 1910, the laws of the State of New Mexico and the rules and regulations of the State Land Office, the Commissioner of Public Lands will offer at public sale to the highest and best bidder, at 10 o'clock a. m., on Tuesday, September 16th, 1930, at the front door of the court house in the town of Carrizozo, county seat of Lincoln County, New Mexico, the following described tract of land to-wit:

**SALE NO. 2425**  
N<sub>1</sub>SE<sub>4</sub> Sec. 25, Twp. 10 S., Rge. 10 E., N.M.P.M., containing 80.00 acres; Improvements consist of barn, stables, corrals and other improvements valued at \$1500.00.

No bid will be accepted on the above described land for less than Five (\$5.00) Dollars per acre and the successful bidder will be required to pay at the time of sale five per cent (5%) of the amount of his bid, the value of the improvements and the cost of sale. The balance of the price offered will be payable at any time within thirty (30) years, with interest on all deferred payments at the rate of four per cent per (4%) annum, in accordance with the terms of the contract to be entered into by the successful bidder, form of which will be furnished upon application.

All minerals on the said land are reserved to the State and the Commissioner reserves the right to reject any and all bids.

Dated at Santa Fe, New Mexico, this 19th day of June, 1930.

# Pajamas Are Liked by the Wee Tots

By JULIA BOTTOMLEY

WIDE WORLD PHOTO

very prettily with a narrow scarf which is tied in a soft bow over one shoulder.

In all children's style displays nowadays particular attention is called to pajama fashions. Just now the chief attraction is beach pajamas and overalls. A pert little model for beach wear boasts an Eton jacket. The material for this cunning outfit has a red background with huge pink, blue, black and white polka dots floating over its surface like so many toy balloons. The jacket is sleeveless, worn over a sleeveless white dimity blouse. The trousers are very full and finish at the waistline with a picturesque troyador ash.

Overalls are frequently made of gay as gay can be prints. These are for the most part trimmed with a solid color. It is said that pajama suits for children from seven to fourteen are far outselling nightgowns.

(©, 1920, Western Newspaper Union)

## HELPS FOR HOUSEKEEPERS

Goloshes and rubbers should fit the child's shoes but should be large enough for the child to put on and take off.

Let the baby be comfortable in hot weather by dressing him only in the kind of clothing his elders would like to wear.

Children need as much sleep in summer as in winter. Sleeping hours and naptimes should not be shortened by long hours of daylight.

To keep berries, cherries or other small fruit fresh in hot weather, pick them over and spread them out in the refrigerator on a shallow plate or flat wire sieve.

The pockets are adequate to store the trinkets which children take such joy in carrying about with them during play hours. The neckline is finished

If there's one place more than another where pajama costumes seem to fit into their environment becomingly, that place is in the children's realm. Bless their dear hearts, how entrancing they look sitting about in their little trouser and blouse outfits, and with what enthusiasm designers are creating pajama styles for wee folks. There are so many kinds of pajama styles for fashionable youngsters as there are for grownups, ranging from lounging to beach types.

For the making of juvenile pajama costumes shantung is proving a most adaptable material. It has so many arguments in its favor, first among which is the fact of its perfect insulating qualities. Then too the lovely colors of shantung fit charmingly into the happy scenes of the lilliputian world.

Shantung in a delightfully cool looking light green was the choice of the designer who styled the attractive and very practical suit illustrated. Borderings of white shantung make a pretty trimming. A unique feature is the group of tucks down the front, the blouse buttoning at the shoulders.

# Sun Suits Are Easily Made

(Prepared by the United States Department of Agriculture.)

A sun suit, after all, is only an abbreviated form of rompers, with certain features about its construction which expose as much skin surface

especially in front, and the legs short. At the back the neck is not cut down too much or the suit will tend to slide off the shoulders.

A mother can make a sun suit very easily by adapting a plain romper pattern, if she is adapting a romper pattern, it should be of the fold-in-crotch or "French panty" style, with a drop seat. The main proportions should not be changed. The length from shoulder to crotch and the width through the trunk should be ample enough to permit all normal activity, such as running, jumping, climbing, squatting or swinging.

In a girl's tailored ensemble, the sun suit takes the place of underwear or bloomers. Light blue chambray is used for both the overdress and the panties, which are attached flat to an open mesh top of matching marquisette. The latter can usually be bought among curtain goods. Plain soft cream scrim or net might be used for the top. The shoulder straps are planned to let out for growth. They are tacked at shoulder level and held down with a button sewed through both thicknesses of goods and stayed with a small piece of tape, since a stay button might scratch.

The long front opening finished with a flat band and three medium sized flat buttons makes it easy for the child to learn to put the sun suit on without help. The buttons are the five-eighths inch size. A pocket for a "hanky" is placed on the panties.

The Under Part of an Ensemble is a Sun Suit.

as possible to the health giving rays of sunshine. The armholes are large and loose, the neck is rounded down,

## Handy Self-Starter on Washer Big Help

With the many labor saving devices that are constantly coming on the market the housewife is getting a good share that will help her in her household duties. The power washer has done a great deal to give the homemaker more time to do some of the things she likes to do.

One of the latest conveniences to come to our attention is an electric self-starter for gasoline-powered washing machines. This works just like the starter on your automobile. A touch on the starter sets the engine going.

Heved that they were ghosts dancing in the heavens, but we must hurry now, for you have an important engagement and I know you're going to be pleased when I tell you about it.

"With the Moon?"

"Right! With the Moon."

"Have you thought how I'm going to be able to talk to the Moon or hear anything?"

"Yes, indeed. As a matter of fact that was planned before we started. You'll see—and you'll also hear!"

(©, 1920, Western Newspaper Union.)

### No Limit Here

If Napoleon could make the finest soldiers out of human mud and marshals of France sprang up at his bidding from the file, what ought to be our bearing in this America of unequaled democracy and opportunity?—American Magazine.

### Length of Fassion Play

The Fassion play begins at eight o'clock in the morning, and, with a two-hour interval for lunch, continues until six o'clock in the evening.

## SCENIC PLAYGROUNDS OF AMERICA

By G. M. MILBOURN

### Creek That Flows to Both Oceans

A GOOD many scenario writers, probably, have had Old Jim Bridger in the movies already, as "atmosphere" for their western thrillers. But some day a drama both entertaining and powerful will be built around Old Jim as a principal figure—and the "theme song" of the picture, if the theme song habit still lives, will be something like, "Well, I'll Be Darned!"

Jim Bridger probably ejaculated that phrase or some more picturesque equivalent as often as any man who ever lived. He was credited by many of his contemporaries with having the most imaginative tongue that ever talked; but if men could not believe Jim's tongue, it was mostly Mother Nature's fault, because there was many a moment when the old trapper could scarcely believe his own eyes, either. Born in Richmond, Va., in 1804, Bridger wandered out to the Rockies so early that at thirty years

Two Ocean Pass.

of age he was already "The Old Man of the Mountains," and with the possible exception of the greatest American question-asker, Benjamin Franklin, probably no man in our national history has been the discoverer of as many interesting and amazing facts as was Jim Bridger. He discovered Bridger pass and the Great Salt lake, built the historic Fort Bridger on the Green river, and could make a map of any section of the West, according to the many who engaged him as a guide or scout, with a piece of charcoal and a buffalo skin. Probably only a few rangers today know the Yellowstone region as thoroughly as Jim Bridger did eighty or ninety years ago; but he told the truth with such dramatic exaggeration that the world would heed neither truth nor fiction from him.

One of the discoveries which must have made Old Jim scratch his eyes the longest, however, came when he decided to follow a queer little creek high on the plateau in western Wyoming. Jim was approaching the continental divide at a point just south of the present Yellowstone National park boundary; but the creek, which should have dwindled away to nothing at all as he neared the divide, remained just as energetic a young torrent as ever. Finally it turned slyly into the woods to the north, and the old scout thought he saw the whole story—a steep wooded canyon in a towering mountain to the north. But as he stalked through the trees, there was a sudden babble of rushing water on the other side of him, too. Sufferin' cats, this creek was twin! For there, right in front of him, the creek started down across a little delta of rock and split in two, as if to just go around a little island. But Jim was standing on that island, and he hadn't crossed any water getting on it. Then the truth dawned on him. This creek ran to both oceans; the island, instead of being a little one, got wider and wider, finally reaching from the Mississippi river to the Pacific ocean!

Jim had discovered Two-Ocean pass. Half of Two-Ocean creek flows into the Missouri river via the Yellowstone, and the other half into the Columbia through the Snake. People thought the story that the oceans meet—in Wyoming!—just another one of "Old Jim Bridger's lies," but fortunately the old scout lived until 1881, long enough to have this as well as the Yellowstone geyser facts confirmed by abundant authority, and to be honored with profuse apologies from his former doubters.

Two-Ocean pass is in the heart of the Teton ranch country, and is visited by summer vacationists as part of a seven-day horse trip from Brooks Lake, Wyo. (reached via the Lander gateway, from the Chicago and North Western railway) to Lewis lake within the park. It may also be reached from Moran, Wyo., in the Teton country. The pass may be annexed to the park in the near future if a recent proposal to include the drainage area of the upper Yellowstone, now barely excluded, finds favor.

(©, 1920, Western Newspaper Union.)

Flood of Books  
More books were published throughout the world last year than ever before. In England, for instance, the number of new books and new editions was 22,800, an increase of 580 over the previous year.

# Evening Story for the Children

By MARY GRAHAM BONNER

Harry, who was adventuring through the sky, had been hearing about comets.

"Well, you might go through the tail of a comet sometime and not know it," Cosmo announced.

"Really? I'll tell that to everyone when I get back to the Earth."

"I'll say."

"Look here, at this very moment you may be going through the tail of a comet!"

Cosmo laughed. "Maybe you'd like to know how they got their name."

"The word comes from the Greek word Kometes meaning the long-haired."

"They're very erratic. Some comets have had as many as six tails, and they won't let people find out much about them."

"They have their own ways and they live their own lives."

"Yet they may let us go through their tails and never say anything

The Aurora Borealis.

would be used to give him a trip through the sky.

There were some bright lights ahead, like arches of fiery clouds in the sky. There were beams and streamers of light going across the heavens from east to west.

"The aurora borealis or northern lights," Cosmo pointed out. "We wanted you to see them so put on a special performance for your benefit."

"I've seen those in the winter," Harry said.

"Yes, they're at their best in the winter and at their best far north. They have their own electrical displays and there are many stories connected with them."

"Sometimes they have been called the Merry Dancers. The Eskimos think that they are boys playing football and that the movements of the lights are the players struggling with each other."

"They say that if the aurora fades away and you whistle it will come back again as though to show that they know you like their football game."

"Then some Indian tribes have be-

# Some Food Hints

By NELLIE MAXWELL

Who does his duty is a question too complex to be solved by me! But he, I venture the suggestion does part of two, that plants a tree.

Some of these salads are more adapted for entertaining than for every day's use:

**Butterfly Salad.**—Split a small banana into halves and dip into lemon juice to keep it from discoloring. On either side of the banana, placed on lettuce, put half slices of pineapple to form the wings of the banana body, the rounded edge toward the banana. Garnish the wing with red and yellow apples or fruit gelatins. Garnish the banana with chopped ripe olives and capers. Serve with french dressing after being well chilled.

**Beach Club Salad.**—Fill a scalloped grapefruit shell with shredded lettuce and diced grapefruit which have been well mixed with mayonnaise. Decorate the top with halved cherries. Serve on lettuce leaves.

**Cheese Salad.**—Arrange a nest of shredded lettuce and place on it finely shredded celery, apples and radishes all cut into small shicstrings. Mix with creamy mayonnaise, using two tablespoons of mayonnaise to a half cupful of whipped cream. Decorate with rings of olives in the center of which has been piped a rose of cream cheese. Serve with french dressing.

A dainty dessert and one easy to prepare is always popular with all housewives. Here is one:

**Marshmallow Dessert.**—Cut into small bits a cupful of more or less marshmallows, add a handful of blanched and shredded almonds, cover with a cupful of whipped cream and at serving time serve in sherbet glasses topped with shredded pineapple.

**Fruit Salad.**—Prepare a bed of shredded lettuce. Place a slice of canned pineapple upon it. Fill one-half of a sauced pear with diced banana and celery mixed with mayonnaise dressing. Lay on top of the pineapple. Garnish with strips of

green pepper. Serve with french dressing.

A potato salad is one of the easiest salads to make and one which is often the porport. Potatoes are tasteless when cold and should always be marinated with a french dressing for two or three hours before the mayonnaise is added.

**Carrot, Coconut and Pineapple Salad.**—Take one can of crushed pineapple, two cupfuls of grated raw carrots. One-half cupful of shredded coconut, mix with mayonnaise and serve on lettuce. Sprinkle the top of each with coconut.

# Use Judgment in Choosing Food

(Prepared by the United States Department of Agriculture.)

The thoroughly modern girl—and boy, too—wants to know something about good diet. Whether the main concern is choosing meals at a cafeteria or lunch room, or helping with meals at home, it is clearly important to everybody to know what to eat to keep well and store up energy, and what food combinations are suitable together. The older boys and girls in many families can be of great help if they can from time to time relieve their mothers of the task of planning and preparing meals.

What a real "day off" a mother might have if the meals on Saturdays, for example, could be attended to entirely by one of her daughters, leaving her free to go shopping, visit her friends, attend a club meeting, make a trip to another town, or get caught up on other things! And the daughter would not only enjoy the change from books and lessons, although she would actually be learning something of permanent use to her, but she would have the satisfaction of relieving her mother for a few hours from her daily routine.

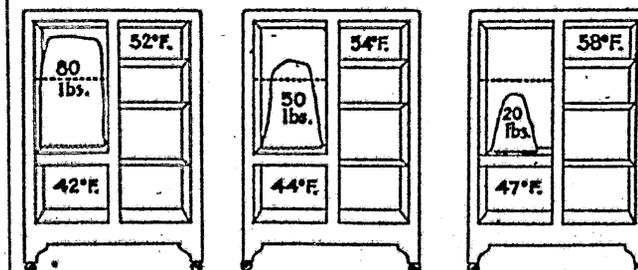

A girl of eleven or twelve is not too young to try planning and assembling a simple dinner without help. After she has gained confidence in handling food materials and the kitchen range, she might do this regularly

when school work permits. Perhaps her brother would find it interesting to help her, too, and at the same time learn why there should be more spinach than pie in his menus, and why fried potatoes and doughnuts at the same meal would be a poor combination.

The bureau of home economics of the United States Department of Agriculture, a few years ago, prepared a brief circular on the subject of meal planning, which is just what the beginner in this field needs. It was intended especially for the use of 4-H club members, and is written in simple, readable form, easily followed. Both boys and girls belong to these clubs, and as many of them have to take part in the farm home activities, food selection and meal planning is one of the regular projects in club work. The circular describes each of the five food groups, tells which foods belong in each group, and makes a number of interesting suggestions about combining foods in menus. It points out too that attractive appearance and texture in the foods served at a meal is important as a stimulus to good appetite.

This publication can be obtained free by writing to the United States Department of Agriculture, as long as the supply for free distribution is available.

## Fill Ice Chamber to Capacity

Lower Temperatures Result From a Well-Filled Ice Chamber.

(Prepared by the United States Department of Agriculture.)

A well-filled ice chamber in a good refrigerator soon chills the entire box to temperatures at which the more perishable foods can be safely kept. It is important therefore, not to allow the temperatures to rise very much after the box is once properly chilled. The next time the ice man calls he should be asked to fill the ice chamber to capacity again, and continue to keep it filled.

If the first large piece of ice that is put in is allowed to melt away until it is half gone or more before another piece is put in, or if only 25 or 35 pounds of ice are added when 50 pounds are needed to bring it up to capacity, the temperatures in the refrigerator will rise above a safe point. Then the new piece of ice will be melted faster to chill the box again below 45 degrees Fahrenheit than if the box were colder when refilled.

The chart, which was made by the bureau of home economics of the United States Department of Agriculture, shows that a box made to hold 80-100 pounds of ice, when filled, will have a temperature of about 42 degrees Fahrenheit in the coldest part directly under the ice compartment when the room is 78 degrees Fahrenheit. It is here that milk, meat, and

other perishable food should be kept. The top shelf may be 10 degrees higher, but this temperature will be satisfactory for storing vegetables or fruits. The dotted line represents a temperature of 45 degrees Fahrenheit, which is considered the maximum for safe holding of milk and meats.

When the ice has melted down to 50 pounds in this box the danger line is almost reached. Both lower and upper shelves will be two degrees higher than they were and the box needs refilling to capacity at the earliest possible moment. In this case a 25 pound piece might do but a 35 pound piece will maintain a steady low temperature better, and last relatively longer.

If the ice is allowed to melt down to 20 pounds before refilling, the lower shelf temperature will rise three degrees more and the upper, four degrees. The addition of 25 or even 35 pounds of ice then will not be adequate, as so much of the ice will be melted in chilling the box that there will not be enough left to keep the box steadily cold until the next delivery. The temperature will begin to rise much sooner than in the other instance, and in the long run more ice will be bought with less satisfactory results.

## Suppressing the Nationalist Rioters in Cairo

Native troops and civil police in Cairo, Egypt, trying to disperse a rioting crowd of Wafdists, followers of Nahaas Pasha, former premier, who are trying to overthrow the government of King Fuad.

## "Captain's Well" in Amesbury Is Rededicated

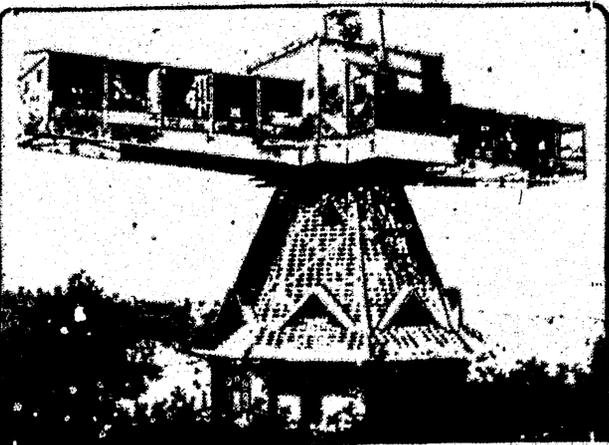

Scene at the rededication of the famous old "Captain's Well" in Amesbury, Mass., after it had been rebuilt and presented to the town by Senator and Mrs. James H. Walker (center). The well was built by Capt. Valentine Bagley, who was shipwrecked on the African coast and suffered tortures of thirst in the desert and who made a pledge that should he live he would build a well on his return home.

## Looking Down on the Cruiser Chester

An odd view of the new 10,000-ton cruiser U. S. S. Chester, latest addition to the fleet, at the Philadelphia navy yard just before it left on a cruise that will take it to 21 European ports.

## Revolving Sunshine House in France

This revolving house at Aix les Bains, France, is a new type of solarium built for patients who need sunshine throughout the entire day.

## MOTHER AT TWELVE

The stork has paid its first visit to Mrs. Ralph Moody, near York, Pa., at the age of twelve. The birth of a son to the child-mother has given directors of the Warrington township school district something to ponder over. The school code compels children between six and sixteen years to attend school regularly, but motherhood apparently was not considered when legislators framed this law.

## PICKED AS CHAIRMAN

New portrait of Senator Simeon D. Fess of Ohio, who is slated to succeed Claudius Huston as chairman of the Republican national committee.

### Lesson for August 17

#### SAUL, A MAN OF GREAT POSSIBILITIES WHO FAILED

LESSON TEXT—1 Samuel 9:15-17, 25-27; 10:1; 19:9-11; 31:1-4.  
GOLDEN TEXT—Wherefore let him that thinketh he standeth take heed lest he fall.  
PRIMARY TOPIC—A King That Disobeyed.  
JUNIOR TOPIC—A King Who Failed.  
INTERMEDIATE AND SENIOR TOPIC—How to Avoid Failure.  
YOUNG PEOPLE AND ADULT TOPIC—How to Profit from Failure.

The sad failure of Saul should be a warning to every young man. Few men in history had greater advantages.

1. Saul's Advantages.
  - (1) A worthy inheritance (9:1).
  - His father was "a mighty man of power." One's inheritance is a strong factor in determining his success or failure in life.
  - His natural gifts (9:2).
  - He was a "choice young man."
  - (1) He was humble (10:22).
  - When facing the responsibility of national leadership, he hid himself.
  - (2) He was considerate of his father (9:3).
- Not being successful in the mission committed unto him by his father and thinking that his father would be concerned about him, he proposed to go back.
- (3) The grace of God was upon him (10:5-7).
- God visited him with his grace to enable him to see the divine choice.
- (4) The Holy Spirit came upon him (10:10).

Acceptable service can be rendered only in the energy of the Holy Spirit.

- (5) He was zealous for God (11:4-15).
- As the leader of his people, he performed service because of his zeal for God.
- The friendship of Samuel (16:35).
- So strong was Samuel's attachment for Saul that he greatly mourned his death.

11. Saul Made King (1 Sam. 8:10).

- (1) The demand of the people (8:1-22).
- The reason for this demand was threefold:
  - (1) Samuel was incapacitated by old age (v. 5).
  - (2) His sons were unfaithful (v. 5).
  - Samuel, though a good man, greatly blundered in the appointment of his sons as Judges of Israel.
  - (3) Desire to be like other nations (v. 5).

The surrounding nations had strong leaders as rulers. Therefore, it was but natural that the Israelites should desire such leadership. Samuel protested against their action and took the matter to the Lord in prayer. The Lord directed him to point out to the people the meaning of their petition.

2. Saul chosen to be king (9:1-11). While Saul was on an errand for his father Samuel found him and anointed him. (1 Sam. 10:1-16). In due time the divine choice was confirmed by the people at Mizpah.

3. Saul displays leadership (1 Sam. 11).

He displayed his military genius in effecting a great victory at Jabez over the Ammonites.

111. Saul's Failure (ch. 15).

1. The command to Saul (vv. 1-3). He was commanded utterly to destroy the Amalekites. The reason assigned was their evil treatment of Israel after they came out of Egypt. (Ex. 17:8; Deut. 25:17).

2. Saul's disobedience (vv. 4-9). The command was only partially carried out. Agag, the king, was spared and the best of the goods appropriated.

3. Saul rejected by God (vv. 10-25). (1) Samuel cried to God (v. 11). The news of this disgraceful affair greatly disturbed Samuel, moving him to pray to God day and night.

(2) Saul's hypocritical pretense (vv. 15, 16).

This pretense carried a lie upon its face.

(3) Samuel rehearses before Saul God's dealing with him (vv. 17-23).

God is more concerned with having his commands obeyed than he is to have sacrifices offered unto him.

IV. The Divine Judgment Falls (15:26-35).

1. The loss of his kingdom. For the presumptuous offering of sacrifice the dynasty passed from Saul's house.

2. Under control of the evil spirit (19:9-11). When allegiance to God is refused Satan takes control.

3. His shameful death (31:1-4). Samuel forsook him, leaving him alone to suffer in disgrace.

What Mortal Man Can Do  
But what can mortal man do to secure his own salvation? Mortal man can do just what God bids him do. He can repent and believe. He can arise and follow Christ as Matthew did.—W. Gladden.

The Star  
Like the star that shines afar, without haste, and without rest, let each man wheel with steady sway round the tasks that rule the day and do his best.—Goethe.

## BLACK FLAG LIQUID DOOMS INSECT PESTS—because "IT PENETRATES"

Black Flag Liquid kills flies, mosquitoes, moths, roaches, ants, bedbugs, fleas—quicker! It penetrates their tiny breathing tubes. Not one escapes. Always costs less than other well-known brands. Money back if not satisfied.

### Conquering Diphtheria

Modern publicity methods allied with the application on a vast scale of the latest principles of public health administration, were so effectively used against diphtheria in New York last year that the disease is expected to be extinct here within five years. Such was the purport of the first annual report of the diphtheria commission concerning its work in 1920 under Dr. Shirley W. Wynne, commissioner of health, which pointed out that a half century ago one out of every two contracting the disease died of it.

Just say to your grocer Red Cross Ball Blue when buying bluing. You will be more than repaid by the results. Once tried always used.—Adv.

### No Time

First Executive—Let's go in this joint and try their business men's lunch.  
Second—Better not. I gotta be back at the office in three hours.

Only actions give to life its strength, as moderation gives it its charm.—Nichter.

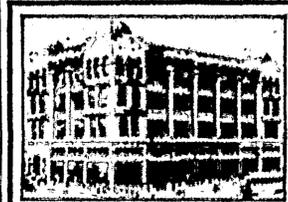

## Summer COLDS

Almost everybody knows how Bayer Aspirin breaks up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

### Streamline in Warfare

The streamline projectile was developed and first perfected by an Englishman, Sir Joseph Whitworth, in 1836. The French have used the streamline projectile since 1893. It was used by this country during the World war.

## Polytechnic College of Engineering

115 and Madison Sts., Oakland, California

### The Great Engineering School of the West

Established in 1874—Over \$200,000 Plant

Chartered to grant degrees in 1916

All non-essential subjects omitted. Includes: Electrical, Mechanical, Civil, Mining, Architectural & Structural Engineering. New courses in Aeronautical and Aviation Engineering. Special courses in Airplane Mechanics, Auto Mechanics, Machine Shop, Electric Shop, Ignition, Battery, etc.

Complete Electrical, Hydraulic, Steam and Heating Laboratories.

Saves about two years time

Students assisted in financing their course. Write for free catalog.

W. E. GIBSON — V. J. WOOD  
President Registrar

Removes Dandruff, Stops Hair Falling, Imparts Color and Beauty to Gray and Faded Hair. Sold at 15¢ at Druggists. Write Parker Bros., 237 N. W. 1st St., Denver, Colo.

FLORESTON SHAMPOO—Ideal for use in connection with Parker's Hair Balm. Makes the hair soft and fluffy. 50 cents by mail or at druggists. Write Chemical Works, Patheberg, N. Y.

W. N. U., DENVER, NO 32-1930.

## Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take.

Any drug store has the genuine, prescriptional product.

## PHILLIPS Milk of Magnesia

## How One Woman Lost 20 Pounds of Fat

Lost Her Double Chin  
Lost Her Prominent Hips  
Lost Her Sluggishness  
Gained Physical Vigor  
Gained in Vivaciousness  
Gained a Shapely Figure

If you're fat—remove the cause! KRUSCHEN SALTS contain the 6 mineral salts your body organs, glands and nerves must have to function properly.

When your vital organs fail to perform their work correctly—your bowels and kidneys can't throw off that waste material—before you realize it—you're growing hideously fat!

Take half a teaspoonful of KRUSCHEN SALTS in a glass of hot water every morning—do not overeat and— in 3 weeks get on the scales, and note how many pounds of fat have vanished. Notice also that you have gained in energy—your skin is clearer—your eyes sparkle with glorious health—you feel younger in body—kicker in mind. KRUSCHEN will give any fat person a joyous surprise.

Get an 8½c. bottle of KRUSCHEN SALTS (lasts 4 weeks). If even this first bottle doesn't convince you this is the easiest, safest and surest way to lose fat—if you don't feel a superb improvement in health—so gloriously energetic—vigorously alive—your money gladly returned. Leading druggists all over the world are selling lots of Kruschen Salts.

## Use Cuticura

A household preparation for over half a century.

Those who know the secret of skin health and beauty use Cuticura Soap and Ointment regularly to keep the skin and scalp in good condition.

They also find Cuticura Talcum

ideal for every member of the family.

Soap 25c, Ointment 50c, and 10c. Talcum 50c. Proprietors: Patent Drug & Chemical Corporation, Malden, Mass.

**PERSONALS**

**Sam Bigger**

of Capitan, old-time printer, formerly of the Capitan Mountain-er, was a business visitor on Monday of this week.

**FOR RENT**--Furnished Houses, 2 rooms -- 3 rooms. It M. Doering.

**Mr. and Mrs. T. M. DuBois**

of Corona, were Carrizozo business visitors on Monday of this week, and while here, attended "College Love" at the Crystal Theatre.

**W. H. Broadus**

Optical Specialist, will be in Carrizozo Wednesday, August 20, at the office of Dr. Shaver. Glasses fitted. 8-15

**H. E. Decker**

of Fort Stanton, was a Carrizozo visitor Monday.

**FOR RENT**--Furnished rooms with bath. One, two or three rooms, as you like.--Mrs. J. S. Ross, East Alamogordo Avenue.

**Miss Zelfa Dishman**

and Miss Edna Atkinson were Carrizozo visitors from Corona last Monday.

**Wanted to Trade**--1000 10-lb. shearing ewes with ages ranging from 2 to 6 years, about an equal number of each age. Will trade two ewes for three lambs. If interested, write the Outlook office or box 150, Carrizozo, N. M. of

**Male Help Wanted**

Reliable Man Wanted to run McNess Business in Lincoln County. Make \$8 to \$15 daily. No experience or capital needed. Write today.--McNess Co., Dept. H, Freeport, Ill.

**FOR SALE**--A fine Violin with a very rich tone, with case. A bargain for those anticipating taking up violin this year.--Inquire at the Outlook office.

**John Harkoy**

has moved his plumbing shop to the lower floor of his residence better known as the old Harry Humphrey building, where John will be pleased to meet his old customers as well as new ones. Phone 105--Don't forget!

**FOR SALE**

**OR RENT**--One two-room house, furnished; also one four-room house, unfurnished, close to school.--Apply at the Outlook office.

**Mrs. F. E. Hedrick**

and son Raymond Lackland spent last Sunday, visiting relatives and friends in El Paso.

**Mr. and Mrs. Jack Callahan**

daughter Helen and Judge Geo. Spence, who have been here for about two weeks, will leave today for El Paso where after attending to some business matters, they will go to Anthony, N. M., and thence to Arizona, where they will spend the fall and winter.

**Rev. J. H. Skinner**

was visited this week by the officers of Carrizozo Lodge No. 80, I. O. O. F., of which he is an honored and much loved member. He is remarkably cheerful in his illness and glad to meet his many old friends.

Mr. Barnum, Special Officer for the S. P., left for the San Francisco R. R. Hospital to be treated for neuritis, by order of Dr. Johnson. Mrs. Barnum accompanied him.

**Zumwalt-Hobbs**

At Alamogordo, last Monday, Mrs. Bonnie Hobbs and Wayne Zumwalt, both of Carrizozo, were united in marriage and in having the nuptial knot tied in our neighboring town, sprung a complete surprise on their home friends, who were not aware of the marriage until they returned to Carrizozo.

The bride is the daughter of Mr. and Mrs. H. W. McMillan of White Oaks. She is well known in White Oaks as well as here, and has many friends in both places. The groom is the son of Mr. and Mrs. A. B. Zumwalt of Nogal and like his new bride has many friends at Nogal and Carrizozo. He is assistant cashier of the First National Bank, which position he has held for several years.

The newlyweds have already settled down to home life in one of the twin residences belonging to Vincent Reil across the City Garage, where they will be at home to their friends, who are extending their best wishes for future welfare and happiness.

**Herman Consbruch**

of Parsons was a visitor here for several days this week, meeting his many old friends.

**Walter McPherson**

brother of Riley McPherson, came in last Saturday from Amarillo, Texas, and will remain here for several weeks.

**R. A. Hunnicut**

old-time stockman of the Capitan country, was a Carrizozo business visitor Wednesday and Thursday of this week. He is very much elated over the recent rainfalls that they have had in his locality.

**R. C. Skinner**

of Malaga, N. M. and niece, Mrs. R. R. Hubbard of Carlsbad came in last Saturday and left the following day after visiting at the home of Mr. Skinner's parents, Rev. and Mrs. J. H. Skinner. Mrs. Hubbard is the daughter of the late Lute Skinner of Malaga, who passed away about one year ago at that place. R. C. reported that his valley farm would make the best yield in years. He also raises a nice crop of cotton every year.

**Roy Baird**

Mrs. Baird, daughter Betty and Mrs. Husband; Mrs. Baird's mother, came in Tuesday from their home in San Antonio, Texas and after seeing many of Roy's old Carrizozo friends, left yesterday for the carnival at Ruidoso, after which they will visit the Carlsbad Cavern and go on to San Antonio. Roy wishes to convey his regards to those of his acquaintance whom he failed to meet during his short stay. He is the owner of the Broadway Pharmacy in his home town and it is the largest of any pharmacy in the big city.

**New Mexico Normal University**

As shown by the fall bulletin of the New Mexico Normal University which has just been published, the Normal University here is looking forward to 1930-31 as the most successful year in its 36 years of history as a college of higher learning.

With eight major departments of them headed by Ph. D.'s, a considerably enlarged faculty and the finest prospect for a victorious athletic season, the Normal U is expecting a record enrollment when the college opens Sept. 16.

Three new instructors have been added to the faculty for the next year. Dr. F. W. Emerson will head the biographical sciences. S. J. Wanous, M. A., is to be the head of the department of commerce; Wanous is planning to make his department one of the finest in the state, having added several new courses to completely modernize it.

Miss Buck, A. B., has been elected temporary head of the Spanish department. She is exceptionally able in her field.

Miss Frances Cronin, A. B., B. of M. E., will direct the musical activities of the college next year. She replaces Inez Donaldson, resigned.

The Normal has prospects for a football team which will lead the intercollegiate field this fall. Eight letter men from 1929 will return.

**Mrs. Gavino Herrera**

Word was received here Tuesday morning from Albuquerque, to the effect that the above named lady had passed away in a local hospital. She underwent an operation two weeks ago and from the beginning no hopes were held for her recovery. Mrs. Herrera was born and reared in Lincoln county and leaves to mourn her death, a husband, her mother, Mrs. Juan Herrera, two sisters, Mrs. Joe Chavez of this place and Paula of Albuquerque and also three brothers of that place, Salvador, Ray and Hijinio Warner, to all of whom the sympathy of the community is extended.

Notice for Publication Department of the Interior U.S. Land Office at Las Cruces, N. M., July 22, 1930.

Notice is hereby given that Mattie B. Brown, of Corona, N. M., who, on Jan. 27, 1927, made homestead entry, No. 032839, for N $\frac{1}{2}$  W $\frac{1}{2}$  SW $\frac{1}{4}$ , E $\frac{1}{2}$  SE $\frac{1}{4}$  Sec. 22, NE $\frac{1}{4}$  Sec. 35, Township 2 S., Range 14 E., N. M. P. Meridian, has filed notice of intention to make 3-year Proof to establish claim to the land above described, before Mary C. DuBois, U. S. Commissioner, at Corona, N. M., on September 27, 1930. Claimant names as witnesses: F. H. Armstrong, Alton Hillman, John Bernnard, Roy Owen, all of Corona, N. M.

Passes On

Monday morning about five o'clock, at his home on the east side, Gabriel Moreno passed away after being a sufferer for the past two years. Mr. Moreno's parents were among the early settlers of the Tularosa country, he coming to White Oaks several years ago, where he was employed as a miner up until the time that he was taken ill. The remains were interred in the local cemetery Tuesday morning. Of a family of nine brothers, he was the only survivor, the one preceding him to the great beyond, being killed in the White Oaks coal mine a few years ago. His wife and his father, who is past 90 years of age, survive him and to whom their friends offer their sympathy.

**FOR SALE**--Child's bed with mattress in first-class condition.
