

FORT STANTON NEWS

Dr. Harry B. Elarbee, our new surgeon and wife, arrived from Chicago last Saturday.

Miss Teresa McGowan of Chicago, is the latest addition to the staff of charming nurses.

Stanley Bannash narrowly escaped death when a team of horses he was driving, stampeded, hurling him underneath the wagon, which passed over him with two wheels. Percy Parker, who happened nearby, heroically, with risk of his own life, stopped the frightened animals in their mad rush towards destruction. Bannash was taken, in an unconscious state, to the surgery, where he received immediate treatment. In spite of a bad gash in the scalp and other injuries, he got over it rapidly and is now able to work again.

Our skilled surgeon, Dr. Haire, received an emergency call from Ruidoso, late at night some time ago. When speeding through the dark on his race against death, over which he victoriously triumphed, his car hit a huge bump in the road, which caused the top of the car to come down and hit him on the head, knocking him into a state of dizziness, from which he has not yet entirely recovered.

Our fisher of men, Rev. Smith, takes great pride in the beautiful flower and cactus garden surrounding the community house, on which he has worked like a mule since last spring.

A few thrifty patients have greatly succeeded in relieving the business depression at the Fort by establishing themselves in business. While Korbach and O'Connor are prospering in the tailor and barber business, Jules Hokanson, a scientific expert on shoes, has opened the Fort Shoe Hospital and already acquired a large patronage. Mr. Hokanson has devoted most of his life in the study of footwear and is the inventor of numerous articles in connection therewith, a hydraulic arch support and a pneumatic rubber heel being his latest (patent pending.) The Southwestern Fresh Air Taxicab Co., Inc., with B. Edison as president and Arvo Mahla as chauffeur and junior partner, succeeds the late Jack Rainer in the taxi business.

The ball team won Sunday's game from the Joyce Pruett's 7 to 4. A little world series will be held here Aug. 30, 31 and Sept. 1, with a strong semi-professional team from Texas. This will bring the season to a close and the boys are out to make a clean sweep of the series. The boys have had hard luck this year, several having been injured and two have been operated on for appendicitis. In spite of all, they have won 18 games and lost 5. The goal has been set at 21 for the season.

Mrs. L. W. Stewart

formerly of White Oaks, but now of Arizona, is the guest of Mrs. Albert Ziegler for a few days, after which she will visit friends and old neighbors at White Oaks. Mrs. Stewart is on her way to Chicago and New York, where she will pay a visit to her sisters.

Little Bob Skinner

who had his arm broken by falling from a horse last week, is

CORONA GLEANINGS

Mr. C. O. Douglas came in Sunday night for a few days visit with his family. He returned to the hospital Tuesday to be gone several weeks.

Mr. and Mrs. Ed Kimmons and baby daughter of Alamogordo spent the week-end with Mr. Kimmons' parents.

Miss Gertrude and Naoma Davidson of Lubbock, Texas, spent Sunday with their cousin, Allen Davidson. They were enroute to Ruidoso where they will remain for the remainder of their vacation.

Mrs. Nan J. Stone and Miss Bertha Butler made a business trip to Tucumcari this week.

Mrs. Ruth Ware left Thursday for Vaughn where she has taken a position as operator.

Mrs. O. M. Downing went to Vaughn Saturday to be the guest of Mrs. Ed Williams.

The Corona ball team takes this means to ask the Carrizozo Club for the use of their diamond Sunday, August 31, if arrangements can be made with Fort Stanton for a game on that date. That will probably be our last open date for the season.

Perhaps the best ball game that Corona has played this year, was with Mountainair on the home diamond last Sunday, with Corona winning 3 to 2. There were no scores after the 4th inning, so that it was a thrilling game all the way.

Mr. and Mrs. Clint Brooks are in Albuquerque for the First American.

Mrs. R. R. Green and daughter Jane McFadden returned Monday from a three weeks' visit with friends and relatives in Tulsa, Okla. They now have as their guests, Mr. and Mrs. Asbury of Sentinel, Arizona.

T. W. Allen left Tuesday for Kentucky. A nephew, who is a practicing physician, came through for a visit, and Mr. Allen is returning with him.

Miss Eliza Holmes is working for the Southern Pacific here.

Mr. and Mrs. F. J. Sager

and daughter, Lorena, left this morning for Santa Fe, where Miss Lorena will open her school of music for the fall term and the Sagers will visit for a week the Chas. Spence family. The Spence children, Virginia and Chas. Jr., who spent their vacation with their grandparents, left Tuesday in order to be ready for school.

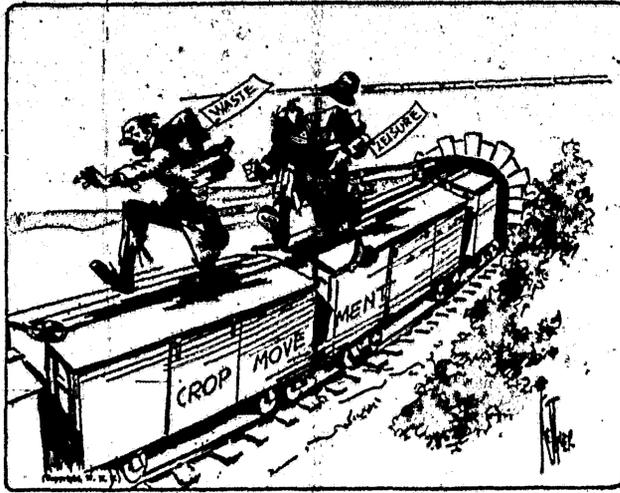

"Frigidaire Frank" English

and daughter, Glenneth, went trout fishing up the Three Rivers Canyon last Sunday and in ascending the trail, a large bear hopped along in front of them, finally turned, eyed the intruders curiously and disappeared in the "clefts of the mountain". Frank won't admit that he was a bit scared, and Glenneth says that the sight was thrilling!

Mr. and Mrs. C. B. Wells

have moved to Carrizozo from El Paso and have rented an apartment from Mrs. T. E. Armstrong at the Wetmore Apart-

Low Bridge

Call for Republican County Convention

A Delegate Convention of the Republicans of Lincoln County is hereby called to meet at the school house in the Town of Capitan, New Mexico, on Saturday, the 18th day of September, 1930, at the hour of 11 o'clock a. m., for the purpose of selecting 30 delegates for the State Convention to be held at Albuquerque, N. M., in the National Guard Armory, on September 22nd, at 10 o'clock a. m., which said State Convention is to nominate Congressional, Senatorial, Judicial, District and State Republican Candidates to be voted for at the general election on November 4th, 1930, and for such other matters as may come before said Convention.

The several precincts of Lincoln County will be entitled to representation in said Convention on the basis of one delegate for every 10 votes and major fraction thereof based on the vote cast for Herbert Hoover for President at the election held in November, 1928. On the above basis the precincts in Lincoln County are entitled to delegates as follows:

Precinct No.	Name of Precinct	Votes For Hoover	Delegates
1	Lincoln	163	16
2	Hondo	194	19
3	Arabela	93	9
4	Picacho	55	5
5	Rabenton	36	4
6	Encinosa	46	5
7	Jicarilla	26	3
8	White Oaks	25	2
9	Capitan	188	14
10	Glencoe	117	12
11	Nogal	26	3
12	Bonito	31	3
13	Corona	160	16
14	Carrizozo	263	26
15	Oscuro	10	1
16	Ancho	69	7
17	Spindle	9	1
18	Joneta	23	2

148

The chairman of the several precincts are hereby requested and instructed to call Precinct Primaries for the 6th day of September, 1930, the hour to be selected by the Precinct Chairman as will best suit the convenience of the voters of his precinct.

PROXIES: No proxies will be accepted in said Convention unless held by a resident of the precinct in which the regularly selected delegate resides.

DONE at Carrizozo, N. M., this the 18th day of August, 1930.

Attest: S. W. KELSEY, Sec'y

J. V. TULLY, Chairman

Lawrence Rowland

who has been in the S. P. Hospital in San Francisco where he was operated on for hernia, is here visiting his mother, Mrs. Espey, on his return trip from Frisco to his home in Tucumcari, where he will resume his duties shortly as fireman for the S. P.

Mayor McQuillen

has returned from his vacation spent in California, where he visited his daughters and met many old Carrizozo friends. The Mayor had a pleasant time and looks rather refreshed from his trip.

CRYSTAL THEATRE

T. J. Pittman, Mgr.

Friday - Saturday - "Montana Moon," with Joan Crawford, John Mack Brown, Dorothy Sebastian, Benny Rubin and Cliff Edwards. Reported as being one of Joan Crawford's best.

Monday-Tuesday-Wednesday - The Four Marx Brothers and Mary Eaton in "The Cocoanuts," Paramount Special. More laughs to the square inch than you have ever had.

After September 1st, we will show three programs a week.

ODDFELLOWS

Will Confer First Degree at Carlsbad Cavern

The following is the substance of a letter sent out by the Grand Master and Grand Secretary of the I. O. O. F. of New Mexico, and has just been received by the Secretary of the Carrizozo lodge, Wm. J. Langston—

Artesia, N. M., Aug. 15, 1930.

To all OddFellows in New Mexico, Dear Brothers:

Due to the untiring efforts of the Carlsbad OddFellows, the United States government has consented to allow the exemplification of the First Degree in the Big Room of the Carlsbad Cavern at 7:30 p. m., Wednesday, October 15, 1930. Past Grand Master Leck's splendid degree team has already begun work on the floor of the Big Room and are practising regularly upon this degree so that we may be able to witness some of the best work ever put on in the Southwest, as this team is considered by those who know to be one of the best in the order.

What an opportunity this offers to OddFellowship. What an innovation it will be to the membership of the order. What a distinction to the candidate, who is fortunate in receiving this degree in the most unique place imaginable and in the greatest Cavern in the world.

What an incentive to the members of the order to get to work on new material, that this event may be the most outstanding in the history of the order, anywhere.

We must have at least 100 candidates in this class and there is sufficient space in the Big Room for 1000, so get busy right now, elect your candidates, confer the Initiatory Degree with the promise that the First Degree will be conferred in the Carlsbad Cavern, where no other man has ever received a degree, nor any lodge or fraternity conferred a degree upon any man with such a signal honor and distinction. Officers of the Sovereign Grand Lodge of the United States and Grand Lodge of New Mexico, will attend. Every lodge in the state, without an exception, should furnish a goodly number of candidates and many have already begun to get together big classes for this novel, sacred and interesting event. It is planned that those attending the Grand Lodge, Rebekahs and Grand Encampment, will be taken through the Carlsbad Cavern on Wednesday afternoon and will emerge therefrom just before the time specified for the work of the degree to begin, and don't forget that Past Grand Master Leck will have a big supper served to all candidates for the First Degree in the party. The letter is signed by Grand Master D. D. Monroe and Grand Secretary C. Bert Smith of the I. O. O. F., of New Mexico.

Scott-Taylor

Mr. Duncan Scott, Jr., and Miss Dolores Taylor were united in marriage in the home of the bride on the I - X Ranch, Tuesday afternoon, Aug. 19, with the Rev. John L. Lawson officiating. The ceremony was witnessed by Misses Ed Hogan, Nora Broussard and members of the immediate family. The bride is the daughter of Mr. and Mrs. J. V. Taylor, and the groom is on the staff of the Des Moines Register, Des Moines, Iowa.

NOGAL NOTES

By "Canyon Cal"

Mrs. Charles Terrell, daughter, Elgiva and the new baby, two months old, arrived here last Saturday and are visiting at the home of Mrs. Terrell's mother, Mrs. A. R. Duggar at their ranch in the Tortolita Canyon and will remain until the heated period of the summer is over, after which they will return to their home in El Paso.

The men working on the Bonito Dam make frequent trips to Nogal after their mail and one thing and another.

The Keen-Spitters contest was staged one night this week, seven being in the contest. Honors were about even between Jim "Rooster" Gatewood and Rich Hust, when Jim took the lead by killing a fly a distance of fifteen feet.

Three more weeks of dry weather and the beans will be ready to cut.

Chas. LeBaron has a large amount of extra fine pears on his lower place.

Tom Snell and family were visitors of Walter Snell last week, returning to their home in Dumas, Texas, this week.

Mrs. F. W. Butler and daughter Julia from Floydada, Tex., Mr. and Mrs. Jesse Lym and children from Reidsville, Ga., and his brother, Walter Lym from Collins, Ga., were guests of Mr. and Mrs. Lee Self from Friday until Tuesday. They all had a wonderful time Sunday, going to the Bonito for dinner, then to Ruidoso and on to the Indian Reservation.

Bowen Zumwalt, daughter Irene, sons Jack and the baby returned Friday from Los Angeles, leaving Mrs. Zumwalt much improved.

There will be a community singing at Rich Hust's home next Wednesday night and everyone has a special invitation.

There was a mistake in announcing a dance for last Saturday. Mr. May assures every body that the "Boomers" will be on hand tomorrow night.

Lincoln County Schools

open Monday, Sept. 1.

The Brown schoolhouse was struck by lightning and burned to the ground. Mrs. French, Supt., and Melvin Franks, Vice-Pres. of the County Board visited the district and plans are already under way for re-building.

Mrs. French is making a round of the schools, supervising repair work in many of the different school districts.

The new school building at Ramon is about completed and will be in readiness for the opening of school September 1st.

The Ancho school rooms are being kalsomined and repairs made to the roof.

An extra three room building has been rented at Hondo which is being kalsomined and put in first class condition for school purposes.

A number of other schools in the county are also being put in readiness for the opening of school.

Mrs. French visited the Escondida, Rabenton, Joneta, San Patricio and Hondo schools this week.

1—Thousands of Communists in Union square, New York city, listening to a Chinese orator the day after they had staged a big riot there. 2—Yacht Gem, 85 feet long, offered by Jeremiah Milbank of New York to President Hoover to take the place temporarily of the Mayflower. 3—Thomas A. Edison congratulating Arthur O. Williams, Jr., of Rhode Island, winner of the annual Edison technical scholarship for high school boys.

South West NEWS ITEMS

Arizona holds the honor of showing the greatest increase in population of any of the eight Rocky Mountain states. Census figures gave Arizona a percentage increase of 23.7 per cent during the last decade.

Six Arizona gold star mothers will visit the graves of their sons in France, leaving Phoenix Aug. 21 and returning the latter part of October. They will make the trip on the U. S. America.

H. A. Morgan, register at the United States land office in Phoenix, stated recently that the government will begin steps soon to prevent vandalism in areas set aside in Arizona for preservation of pre-historic objects.

Herbert C. Stewart of Mesilla Park has been added to the force of the New Mexico A. and M. College at Las Cruces as a full time specialist in horticulture, according to Dr. H. L. Kent, president of the institution. Stewart is a graduate of the New Mexico College.

Gallup, N. M., suffered great damage by flood waters that covered a large area of the city after a cloudburst. Basements of business houses were flooded, damaging stocks of merchandise. Although there was no loss of life, the flood was the most serious in the history of Gallup.

Voters of Lordsburg, N. M., defeated by 131 to 15 a proposal to grant a natural gas franchise to the Southern Union Gas Company. The opposition was the Western Gas Company which has completed a survey from El Paso to Douglas via Lordsburg which is expected to apply for a Lordsburg franchise.

The Citizens' State Bank of Phoenix failed to open its doors a few days ago. A report to the State Banking Department at the close of business June 30, listed total resources of \$1,213,074.73. The bank is capitalized at \$100,000. The last report showed deposits of \$1,022,309.18, and surplus and undivided profits of \$7,365.55.

Recommendation that both major political parties in New Mexico make a division of offices between Spanish-Americans and Anglos in the coming campaign, the executive committee of El Club Político Independiente, recently announced in Santa Fe the offices demanded by Spanish-Americans. The club has a voting strength of around 3,000.

Creation of five new scholarships amounting to \$500 each was announced in Albuquerque at a meeting of the board of regents of the University of New Mexico. The scholarships are for teachers in connection with the San Jose training school, recently established by the general education board and U. S. Senator Bronson M. Cutting.

The United States forest service at Alamogordo, N. M., reports thirty-seven forest fires in the Lincoln forest so far this year and of this number fourteen were man caused. Rains throughout the forest have relieved the fire situation and a number of fire guards have been laid off although several are still on duty in the Sacramento and Weed districts.

The state board of health bulletin, issued in Phoenix, shows Arizona births in 1923 exceeded deaths by 2,740. There were 6,781 deaths from all causes last year, compared to 9,521 births. White children born during the year numbered 4,754; Mexican, 3,706; Indian, 605; other races, 204, including negro, and 223 mixed percentage. Boys numbered 4,976, and girls 4,545.

Reworking of one of the oldest cyanide ore mines in Arizona has been started on a commercial scale with the installation of a 100-ton cyanide mill on the Turkey Creek property of the International Consolidated Mining Company near Prescott, Ariz. The mine was first located in 1876. Approximately 100,000 tons have already been surveyed. The ore assays more than \$14 a ton.

Four Nogales, Arizona, youths, lost for more than twenty-six hours in the chasms of Crystal Cave, a rendezvous for warlike Apache Indians in the early days, were brought to safety. M. E. Hughey of Yuma and David Coughanour, Clay Coughanour, and Paul MacGregor of Nogales had groped through the treacherous passageways of the former Indian hangout for two days seeking the entrance of the cave.

There are 4,803 acres of crops growing on the Storrie project land leased by the Las Vegas Grant Board and 407 acres on other than leased land, according to a report made public in Las Vegas, N. M., by A. C. Hield and D. A. Stewart, committee for the board. The largest acreage is in beans with 1,869 acres. Alfalfa is next with 1,672 acres and there are 811 acres of oats. The crops are all in good condition, it is said.

G. A. Pearson, of Flagstaff has been named director of the forest and range experiment station to be established at the University of Arizona in Tucson in September.

Two new courses for students preparing for the teaching profession will be offered this fall at the New Mexico University in the college of education. Dr. E. P. Nausajaks, dean of the college, has announced that curricula have been prepared and will be offered in public school music, and for both men and women students preparing to be school teachers.

Reason for Alteration

In Name of New Baby

On the very last day of the census, a baby was born at the Good Samaritan hospital and the proud father told the enumerator about it. "And what is the baby's name?" asked the census taker, polishing his pencil. "Why, it hasn't any name yet; it was born just about two hours ago." "Can't very well list it without a name," protested the statistician. "Well, I'd like to have it in the count to make Los Angeles a little bigger," said the husband, and he and the enumerator went into conference as to a suitable name. They finally decided on Henry, and the husband called up the hospital to get his wife's approval. "She can't talk now," stated the nurse over the phone, "but she says if you've decided on Henry, it's all right with her, except that you'll have to make it Henrietta."—Los Angeles Times.

Skeptical Public

Brian Jewett, grand exalted goot of his well-known Goot club, couldn't sell \$5 gold pieces in Congress street, Portland, Maine, for \$4 each. About five o'clock he emerged from a bank with ten new gold pieces. He started in with a sales talk something like this: "I say, here is a \$5 gold piece and I need some ready money. Will you purchase it for \$4?" Most of the replies he got were ha, ha, ha! One man, however, a foreigner, took a look at one of the gold pieces, bit on it sharply and passed over \$4 with no hesitation. And one other was in on the purchase; but Jewett could not sell the other eight, though hundreds of passersby stopped to listen.—Indianapolis News.

Busy New York

In New York city a child is born every four minutes. Nine million persons scramble daily for subway seats. Fourteen persons are married every hour. On the average for a year, 23 new buildings are put up every day and six torn down. New Yorkers and their guests eat 7,000,000 eggs a day. And how the human family loves amusement! There are 800 theaters in New York city.

Shocked

Perry Greer, one of the veterans of Automobile row, had an experience the other day that had him hanging over a barrel. "I'll pay cash for this car," a customer stated. "Cash?" stammered Greer, "really, this is so unusual that I'm afraid you'll have to give us a reference or two."—Exchange.

There is nothing more satisfactory

after a day of hard work than a line full of snowy-white clothes. For such results use Red Cross Ball Blue, Adv.

Idea for "Movies"

A psychologist suggests that the superfilm of the future may be accompanied by a sequence of scents wafted through the theater, to bring the audience more completely into the atmosphere of the forest, the apple orchard, the farmhouse kitchen, or other scenes of the story.

Eternal Feminine

"How are you going to vote?" "As my best judgment dictates," answered Miss Cayenne. "Will you vote for a woman?" "Yes. Every woman feels like voting for another woman in an election, but never in a beauty contest."

Biggest Hotel for London

London's new Thames house is to be the largest hotel in Europe and the biggest commercial building in the world outside America. It will have 2,000 rooms with baths, the number of baths being another innovation for hostleries in Europe.

Retort Sarcastic

First Blues Singer—Did you see the mail I got on that act? Fifty letters, no less. Second Blues Singer—Yeh—I wish I could afford \$1 worth of stamps every time I sing.

Not Musical at All

Doctor—Have you any organic trouble? Patient—No, Doc, I can't even carry a tune.—Grit.

Love may be blind, but lovers' families are not.

WE can never be sure just what makes an infant restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as Baby has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

Frank A census taker had a hard time getting into an apartment. He finally went up to the roof, and down a fire escape to get in, but once he had identified himself, the pretty young matron willingly gave him full information. "You've been so frank about answering my questions, that I'm wondering why it was that you wouldn't let me in," the enumerator remarked as he folded up his blanks. "I thought you were my husband," replied the girl apologetically.

Willing Giver

Collector—Have you anything to give us that would do for home for aged females? "Yes, take my mother-in-law."—Berlin Lustige Blaetter.

Disposing of Estate

A will may be simply stated as a disposition of your life insurance, of your general estate and of personal keepsakes. The administration of the will is the other weighty problem. The choice of executor is of great importance.

Nothing leads to good which is not natural.—Schiller.

Man is nature's sole mistake.—Gilbert.

Wants All the World to Know

"About ten years ago I got so weak and rundown that I felt miserable all over. One day my husband said, 'Why don't you take Lydia E. Pinkham's Vegetable Compound?' When I had taken two bottles I felt better so I kept on. My little daughter was born when I had been married twelve years. Even my doctor said, 'It's wonderful stuff.' You may publish this letter for I want all the world to know how this medicine has helped me."—Mrs. Horton Jones, 208 48th Street, Union City, N. J.

Lydia E. Pinkham's Vegetable Compound

NEWS REVIEW OF CURRENT EVENTS

Huge Crop Losses Due to Drought Boost Prices and Rouse Government.

By EDWARD W. PICKARD

PROTRACTED drought and excessively hot weather brought to the farmers of the United States a mixture of good and evil and aroused the administration to the consideration of relief measures beyond those contemplated by the act creating the federal farm board.

Both government and private crop reports led to estimates that the new corn crop had been damaged to the extent of at least 600,000,000 bushels, and the rains that fell throughout much of the corn belt during the week were said to have come too late to have much influence on the yield since pollination had failed.

Private reports by one of the leading experts of the Middle West indicated that a large part of the crop was beyond any material recovery. In Ohio the corn was deteriorating rapidly, and in southern Indiana it was badly damaged. In Illinois the situation was at its worst in the southern part of the state. The crop in northern and western Kentucky was said to be entirely ruined, and the condition in Missouri and Iowa was not much better. Throughout the whole drought region, also, pasturage and all fodder crops were burned up to an alarming extent.

On the other hand, there had crop prospects led to a sensational rise in the prices of grain on the exchanges, and within a few days there was an estimated increase of about \$50,000,000 in the theoretical value of farmers' products. The market in Chicago went wild and corn led in the swift advance, followed by wheat and the other grains. For the first time in five years the public came in on a big scale, and there were heavy buying orders from foreign countries. It was believed there would be a heavy substitution of wheat, oats, rye and barley for corn as live stock feed, and consequently the demand for those grains was large. Also the estimates of the Canadian wheat crop were slashed as a result of damage by drought, heat and black rust. The yield of rye in Europe, exclusive of Russia, will be far below normal, and the Prussian oats crop is greatly reduced.

PRESIDENT HOOVER conferred with Secretary of Agriculture Hyde on plans for a government program to aid the farmers threatened with ruin by the drought, and he asked both Mr. Hyde and Chairman Legge of the farm board to make recommendations within a few days. It was stated at the White House that the President had received prompt and favorable response to his appeal to railroad executives for co-operation in reducing rail rates for the emergency movement of live stock and feed to the stricken areas.

The farm loan board said it was willing to do all possible to extend credit through the intermediate credit banks, the farm land banks and joint stock land banks. From congressional quarters came many requests for help, and to those was added the offer of Senator Robinson of Arkansas, the Democratic leader, to undertake a refund by congress to the farm board if the latter would divert all its available funds to drought relief.

"The measures of assistance that the farm board and the other agencies of the federal government can and should undertake are being determined," said Mr. Hoover. "It is too early to determine the precise character of relief; much depends upon the further spread of the drought; but no stone will be left unturned by the federal government in giving assistance to local authorities."

IN OTHER ways the drought had serious results. There were numerous destructive forest fires in both the West and the East; the milk shortage in many regions was serious; and the water in the

Mississippi river was so low that barges and towboats were stuck on sandbars and mud flats all along the Father of Waters. At the same time the levels of Lakes Michigan, Superior and Huron were higher; which led commentators on the lake diversion controversy to think that the policy of the government has resulted in giving the citizens who use the Great Lakes more water than they need, at the same time depriving the manufacturers and farmers of the Mississippi valley of sufficient water to float their cargoes to the sea.

WHEAT prices and drought did not have much effect on the Republican primaries in Kansas as many persons had expected. Gov. Clyde M. Reed, who sought to champion the cause of the farmers and severely criticized the policies of the federal farm board, was defeated for renomination by Frank Haucke, farmer, World war veteran, and former state commander of the American Legion. Senator Henry J. Allen, who was appointed by Governor Reed and is a staunch supporter of the Hoover administration, was nominated for the senate term ending in 1933, and Senator Capper was unopposed for renomination for the long term.

On the Democratic ticket Harry H. Woodring will oppose Haucke for the governorship, and Jonathan M. Davis, former governor, will try to defeat Senator Capper.

SOUTHERNERS who voted for Hoover in 1928, through Horace Mann, formally announced their rebellion against the administration of southern federal patronage and political affairs generally by Postmaster Walter H. Brown. Mr. Mann's statement, which was issued on the eve of a meeting of the Republican national executive committee in Washington, outlined plans adopted by a group of prominent southern Hoovers to incorporate in "all-southern" Republican organization and throw off the yoke of northern "patronage carpet-baggers" as well as of "designing political hijackers."

Hoovercrats representing ten southern states had met in conference in Savannah and adopted resolutions expressing resentment at the refusal of the administration to recognize Mann's services and leadership. They agreed to meet again in Atlanta on August 15 to perfect their organization. Because of the heavy Hoover vote in the South in 1928, the ten states represented in the Savannah conference will be entitled to 267 delegates in the 1932 Republican convention, 100 more than they were allowed in the Kansas City convention.

The Republican executive committee accepted the resignation of Claudius M. Huston as national chairman and elected Senator Fess as his successor. Robert H. Lucas was made executive director, and he quits his post as internal revenue commissioner to give his full time to the work.

GREAT interest was felt in a conference which Gov. Franklin D. Roosevelt of New York held with John J. Raskob, former Gov. of Smith and other party leaders. It was understood that Mr. Roosevelt would seek re-election on a "dripping-wet" platform and would make a leading issue of public electricity rates. The belief was that Mr. Smith would place Mr. Roosevelt in nomination at the state convention.

Republicans of New York state seem badly split as to the liquor question. The wet, led by former Senator James W. Wadsworth, insist upon a declaration for repeal of the Eighteenth amendment, declaring they will accept no compromise. The dries, on the other hand, are as firm in their stand and threaten to form a new dry party if the wet plank is adopted.

BEFORE a crowd of 5,000 persons, two negroes were lynched by a mob in Marion, Ind. They had been arrested for murdering a white man and attacking his girl companion, and were said to have confessed. The sheriff, police and fire department tried in vain to scatter the lynchers with tear bombs and fire hose streams.

PRESIDENT HOOVER announced the appointment of Maj. Gen. Douglas MacArthur to be chief of staff of the army to succeed Maj. Gen.

C. P. Summerall when the latter retires in November. General MacArthur, who is head of the army department in the Philippines, is now on temporary duty in China. He is fifty years old, the youngest army officer of his rank in active service, and was advanced over the heads of several older officers, the President said, because he is the senior major general whose age would permit him to serve the full four-year term as chief of staff. He graduated from West Point in 1903 and his career, especially in the World war, was brilliant.

At the same time the President appointed Brig. Gen. Ben H. Fuller to be commandant of the marine corps to fill the vacancy left by the death of General Neville.

REAL foreign intervention in China may soon result from the bloody doings of the Chinese Communists in Hunan province, if it is not already in effect. The British are leading the way, sending a considerable number of soldiers up the Yangtze to Hankow, which was threatened by the Reds. The troops were to be placed on a cruiser ready to be landed if necessary to protect British property. The American gunboat Tutuila left for upriver to reinforce the Palos, and the flagship Pittsburg of the Asiatic fleet, with a destroyer division, was on the way from Tsingtao to Shanghai; Japan also was in action, sending a number of destroyers with landing parties of marines to Hankow, Klukiang and other river ports threatened by Communist invasion.

The Nationalist government had admitted its inability to guarantee protection for foreign residents of Hankow, though it was sending additional troops to that region and had re-occupied Changsha. The Communists were still entrenched in the hills about the city and were continuing their sanguinary course, having already slain two thousand Chinese residents of the place and captured four thousand. Outrages against British Nationals included the sending of a severed finger of Miss Edith Nettleton, missionary, with a demand for \$50,000 ransom for herself and Miss Edith Harrison, held captive a month, to the British legation.

UNEMPLOYMENT in Great Britain has reached the highest point since July, 1921, the number registered as out of work being 2,011,467. Last week hundreds of rallyway employees were laid off because of the falling off in traffic. Official reports show that unemployment in Germany is decreasing slightly, in France is negligible, and has decreased in Denmark, Sweden, Holland, Italy and Austria.

In the United States the situation was brightened somewhat by resumption of work in the automobile factories of the Detroit area and other places and by several of the biggest railway shops. The Chicago region saw good prospects for a revival of the building industry.

JOHN HENRY MEARS and his pilot, H. J. Brown, who intended to make a record-breaking airplane flight around the world, have had to postpone it, for their plane was wrecked as it was leaving the runway at Harbor Grace, Newfoundland.

The German aviators, Hirth and Weller, who were on their way from Berlin to Chicago by way of Iceland and Greenland, reached Reykjavik, Iceland, safely, but abandoned their project for want of a suitable landing place in Greenland and because their supply of gas did not arrive.

Capt. Frank Hawks set a new record for flight from New York to Los Angeles, making the distance in a swift little monoplane in 14 hours, 50 minutes and 43 seconds, with five stops for refueling. His average speed was about 170 miles an hour.

OFFICIAL but unrevised census figures give the total population of continental United States as 122,720,472. The outlying possessions bring the grand total to 137,501,561, this including an estimate for the Philippine islands where an enumeration has not been made for several years. The proportions of population east and west of the Mississippi have shifted less than one-half of 1 per cent in ten years, being respectively 62.8 per cent and 37.2 per cent.

SCENIC PLAYGROUNDS OF AMERICA
By G. M. KILBOURN

Chief Mountain

IF BENJAMIN FRANKLIN were still alive and could bring his kite and key and wet silk thread to some convention of modern electricians, the contrast of ages represented would probably get a good share of the newspaper headlines. But in Glacier national park, Montana, there is just that sort of a contrast—with mountains rather than men in this drama of inconceivable age.

At least eighty million years ago, according to the geologists, a group of rock strata totalling sometimes 11,000 feet in thickness was formed in that region by sediment slowly settling to some now long-vanished ocean's bottom. All this 11,000-foot cross-section is now known as "Algonkian" strata; and on the very bottom of it was a 1,600-foot layer of "Allyn limestone," originally a faint blue in color, but weathering to a yellow.

These Algonkian rocks also occur in the Grand canyon, and might never have been revealed there except for the fact that the Colorado river picked that particular spot to dig the world's biggest hole. But in the Glacier park region there was a perhaps still stranger circumstance: a bulging and cracking of the whole Algonkian section, with as a climax an overlapping, now called the Lewis Overthrust. This overlapping—whatever the reason or exact details of such behavior—placed the Allyn limestone, the lowest and therefore presumably the oldest of the whole eighty-million-year-old Algonkian family, on top of much newer, "younger" rock that had just previously been the surface of the earth.

With erosion by wind and temperature changes, as well as by water or grinding glacier, the front of the overlapping layer is slowly but constantly retreating, until the aged yellow bottom layer may now be seen high on the cliffs along the eastern edge of the park, as well as underfoot at Many Glacier, Two Medicine, and other points nearer the divide. But the strangest erosion has been that which wore a gap in the yellow layer to the northeastward and left Chief mountain's 1,500-foot silhouette there alone—a sullen, unflinching sentinel of the year 80,000,000 B. C.—or—thereabouts, sitting astride the "young" 7,500-foot plateau formed speck by speck by a patient ocean through thousands of later centuries.

Chief is a tooth shaped, precipitous yellow monster guarding the northeastern corner of the park. It may be seen by every Many Glacier visitor

Chief Mountain.

from the highway near Lower St. Mary lake or Babb, and those riding from Babb to the Canadian boundary get many views of it. Or it may even be glimpsed by west-bound passengers of the Great Northern railway a few miles before the Glacier park station is reached.

Another interesting feature of the Glacier mountains is that many of them wear a unique black stripe. This is a diorite layer from 50 to 100 feet thick, which tells a story of some ancient lava intrusion into the sedimentary rock. Sometimes the adjacent layers are whitened as if burned to ash by the lava.

Wave and ripple marks of some prehistoric sea are also frequently encountered on the Glacier park mountain sides.

(© 1929, Western Newspaper Union.)

Paper Money

There is no silver in our paper money. The notes are printed on a special kind of silk-fibered paper, which is made at the Crane mills, in Dalton, Mass., especially for the government. Its manufacture is a closely guarded secret, and the law forbids possession by others of any such paper or its imitation. The paper is received at the bureau of engraving and printing in Washington in packages of 1,000 sheets, this count being maintained throughout every department of the bureau until the notes reach the treasury.

First American Oil Well

In 1859, Edwin L. Drake, a conductor on the New York, New Haven & Hartford railroad, organized a company and drilled the first American oil well near Titusville, Pa., writes E. H. Hamilton in Popular Science Monthly. Petroleum was struck at 69 feet. It was pumped from the well at the rate of 25 barrels a day. By the end of the year, this had dwindled to 18. But the modern oil industry

COL. JAKE RUPPERT FOR TIGHT HURLING

Yankee Owner Would Like to See Tariff Taken Off.

Col. Jake Ruppert, owner of the New York Yankees, would like to see the tariff on pitching taken off. The colonel favors tighter pitching, and to get that tighter pitching he would remove some of the restrictions that now restrain the pitcher.

"I should like to see the ball restored, and what was known as the emery ball, too, in so far as its scruffing from the contact with concrete is concerned," says Colonel Ruppert. "I do not think players should be permitted to use sandpaper in their gloves or belt to rough a new ball.

Col. Jake Ruppert.

But balls should not be thrown out on every pretext. There is too much run making now.

"Take the restrictions off pitching and we will have real pitchers again. And with real pitching restored the home run will come back into its old-time prestige. I think most of the fans consider it too common today."

Like the bridge player who was dealt 13 hearts but didn't get the bid, a golfer shot a hole-in-one and it didn't count.

Barry Scobee of Fort Davis, Texas, was the unfortunate one. He had been playing around and when he reached the eighth hole he made such a poor tee shot that he teed up another ball and tried it again.

For a time Scobee thought he had lost the ball, but after a search he found it resting nicely in the cup.

The hitting of Alex Metzler since he migrated from the White Sox to St. Louis by the valuer route gives rise to the belief that the Browns grabbed off a big bargain.

Macdonald Smith would have won the two open tournaments this year with a bit more luck. Not another entry made as few bad shots as Smith. He stayed on the line. He had all the distance he needed and he coupled distance with accuracy. His strokes were lost on the greens.

As long as he lives Macdonald Smith will have in his mind pictures of putts hanging on the lips of Interlachen cups and pictures of putts rimming Interlachen pins. Always up and rarely in was his fate. Probably no golfer in history ever had so many putts of two inches or less in tournament rounds as Macdonald Smith had at Interlachen.

Dispelling the popular notion that kings of swat must all be big, beefy and broad-shouldered men, Connie Mack, veteran baseball manager, writing in the current issue of Boys' Life, claims that "the smaller, lighter man may have the better eye or the quicker co-ordination, and where he may not have the shoulders to pole out home runs, he will have the speed to beat out short hits and bunts. I do not think that it takes a broad-shouldered giant like Babe Ruth to make a good batter. There are lots of light men in the leagues today who have high batting averages." Batting ability, according to Mack, consists of combining "the snap of the wrist along with the use of the forearm into a smooth, free swing in which one should get shoulders, hips, and most of the body into the clout. The result is a good, strong, heavy hit that is as likely to be a home run as it is to be a single."

Dutch Ruether, former major league left-hander, who is pitching for Seattle in the Pacific Coast league, defeated San Francisco 4 to 3 in 12 innings the other day and was fined \$25. The fine, imposed by Manager Ernie Johnson, however, was not for winning the game but for failing to cover first base in the ninth inning when a convention of players was held about the ball after it bounded from the pitcher's glove.

J. C. Griffiths, who has maintained a breeding nursery at Griffithwood farm near Baltimore, and a small racing stable which included such good horses a few years ago as Single Foot and Canter, will sell his holdings and retire.

Plans are being made to dispose of Canter and 36 head of mares and yearlings early next fall. Harry Rites is his trainer and farm manager.

There are now two world's champion heavyweights. Refusing to recognize Max Schmeling as world's champion, the British boxing board announced that it would recognize Young Stribling as the titleholder as the result of his victory over Phil Scott.

Lesson for September 7

JOSIAH, A ROYAL REFORMER

LESSON TEXT—II Kings 22:1-8; 23:1-25.

GOLDEN TEXT—Thy word is a lamp unto my feet and a light unto my path.

PRIMARY TOPIC—Josiah Finds God's Book.

JUNIOR TOPIC—Josiah's Rare Find.

INTERMEDIATE AND SENIOR TOPIC—Getting Help from the Bible.

YOUNG PEOPLE AND ADULT TOPIC—The World's Debt to Reformers.

I. Josiah a Godly Young King (22:1, 2).

He did that which was right in the sight of the Lord and turned not aside to the right hand or to the left. About one hundred years elapsed between the reformation under Hezekiah and that of Josiah. Sometime during this period the book of God's law had been lost. Two wicked kings had reigned in the interval. "The Lord had given to Hezekiah much wealth. His son, Manasseh, coming into possession of his father's property and being ungodly would naturally neglect the Bible, if not purposely try to put it from sight. Those who do not obey the word of God are usually interested in putting it out of sight.

II. Finding the Book of the Law (22:8-10).

1. The occasion (vv. 8-8).

It was while restoring the temple during Josiah's reformation that the law was discovered. In clearing out the dark corners to make repairs and to find a place to store the subscriptions made by the people, many things which had been lost were found, among which was the law.

2. The Book read before the king (vv. 9, 10).

Upon making a report of the work to the king Shaphan informed him of the finding of the book of the law of the Lord, and the book was read by Shaphan before the king.

III. The Effect of the Reading of the Law (vv. 11-20).

1. The king rent his clothes (v. 11).

As the law was read before him he was led to realize the awful extent of the nation's departure from God. He knew that sin merited punishment. The reading of the royal robes indicated the king's penitence and sorrow.

2. The king sent a deputation to make inquiry of the Lord (vv. 12-20).

He included himself in the guilt before God (v. 13). His sense of sin was so keen that he sent to inquire of the Lord as to whether there was any means of diverting the divine judgments. Instinctively the human heart turns from God's threatening judgments to a means of escape.

3. The message of Huldah, the prophetess (vv. 15-20).

(1) Confirmation of what the law said (vv. 15-17).

She said that all the curses written in the law must follow, for the sins had been so flagrant that God's wrath could not be restrained. It was not too late, however, upon repentance to obtain mercy from God, but the outward consequences of sin must be realized.

(2) Acceptance of Josiah's repentance (vv. 18-20).

Because of his tenderness of heart and deep penitence, the Lord said he should be gathered to his grave in peace and should not see all the evil brought on Jerusalem and its people. What Huldah said was true though Josiah died in battle (II Chron. 35:22-25).

IV. Reforms instituted (23:1-25).

1. The king read the law (vv. 1, 2).

He gathered together the inhabitants of Jerusalem, including the priests, Levites, and elders, and read unto them the law.

2. The king made a covenant before the Lord (v. 3).

In this covenant he pledged himself.

(1) "To walk before the Lord." This meant that he would get personally right with God.

(2) "To keep God's commandments and his testimonies and his statutes." This obedience was of the heart.

(3) "To perform the words of the covenant which were written in this book."

The king not only entered into this sincerely, but caused all that were present to "stand to" it.

3. The king took away the abominations (vv. 4-20).

He not only broke down the places of idolatrous worship, but slew the priests who officiated at the altar.

4. Passover kept (vv. 21-23).

So fully and heartily did they enter into this reformation that this Passover was unlike any that had been held since the days of the Judges.

5. Workers of the occult driven out (vv. 24, 25).

All the days of the king they departed not from following after the Lord.

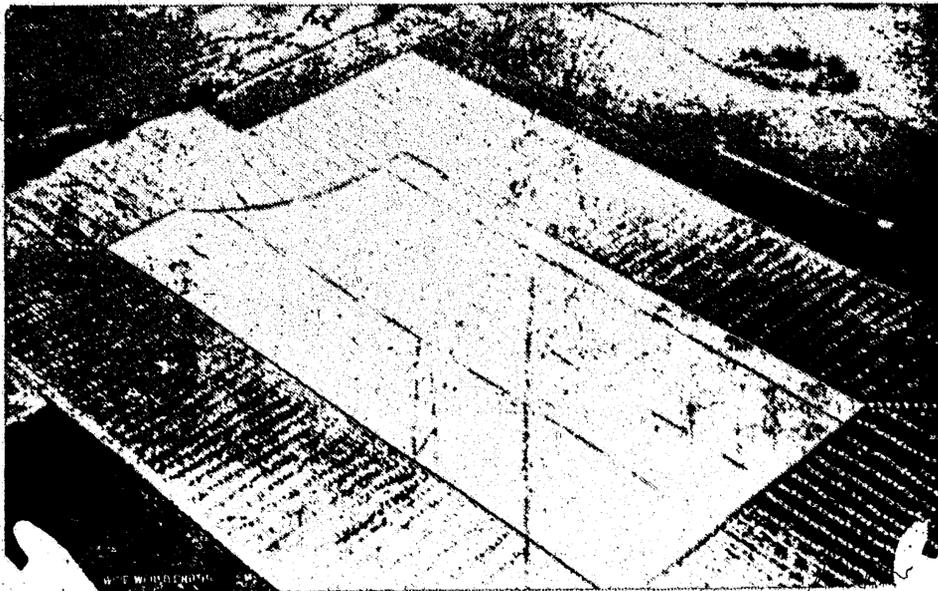

Must Follow in His Steps

Sincere we must be, some sacrifices we must make, and for the rest we must follow in the steps of the Lord till we grow into his likeness. It is a splendid endeavor, and in its very difficulties and elevation lie its greatness and its success.—John Watson.

Prayer

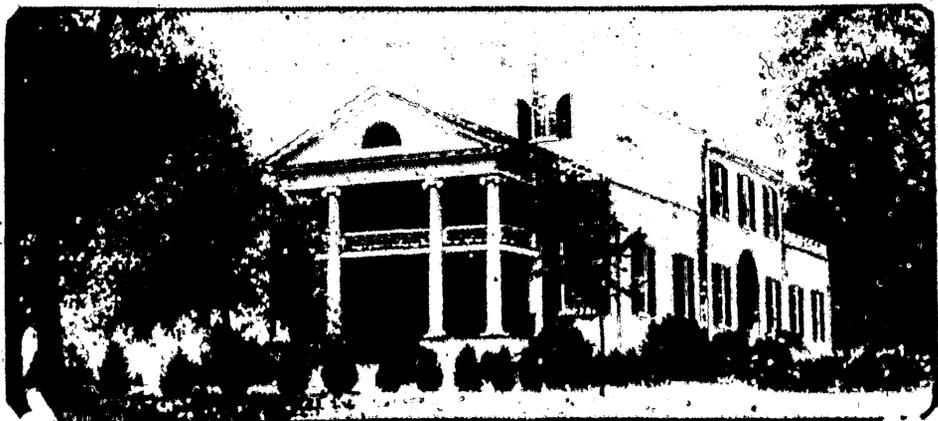

Prayer is the pulse of the renewed soul and the compass of its beat in the test and measure of the spiritual life.—Octavius Winslow.

"Iowa Gold Mine" Photographed From Plane

Prospectors of the air found and photographed this "Iowa gold mine" just a few miles from Des Moines, during a recent harvest. It is a field of fine wheat partly reaped, the shocks appearing all around the center portion that is still uncut.

Mellon Buys Old Estate for His Daughter

A glimpse of beautiful "Oak Hill," the historic Virginia estate which Secretary of the Treasury Andrew W. Mellon purchased for his daughter, Mrs. David K. Estes Bruce, James Monroe, fifth President of the United States, was one of the first occupants of the mansion, which is more than 100 years old. The 1,200 acres of land lie about 40 miles from Washington.

Scene in Quake-Ruined Melfi

Wide World Photo

What the recent earthquake did to the cities and towns of central southern Italy may be judged by this view of the ruins of Melfi. This town, situated almost on the lip of an old volcano, was practically destroyed.

Called America's Healthiest Girl

Florence Smock, eighteen, of East's, Fla., who was adjudged the healthiest girl in the United States by the National Congress of 4-11 clubs. Florence believes in beauty unadorned. She uses no rouge or lipstick and advises health seekers not to reduce if they want health.

BEAT CHINESE REDS

Lieut. Com. R. D. Tisdale, in command of the American gunboat Palos which was attacked by Communist troops at Chungking, China, and dispersed the Reds, killing about fifty of them.

MISS UNITED STATES

As "Miss United States," Miss Beatrice Lee of Salt Lake City will represent this country in the International Beauty contest to be held in Rio de Janeiro, Brazil, September 7, 1930. The winner will receive the title of "Miss Universe," the honor of being chosen the world's most beautiful girl, and a \$10,000 cash prize.

Justices' Franking Privileges

The Justices of the United States Supreme court enjoy the franking privilege when writing on official business. The clerk of the court handles most of the correspondence, and his office is supported by fees paid by litigants, and most of his correspondence is to litigants about their cases. The fees of the clerk are paid by litigants, and if the government were to grant the franking privilege on such matters it would amount to paying postage on private cases.—Washington Star.

EDITORIAL COLUMN

How Free Trade Works

One of the best illustrations of the way in which free trade may be used by international interests to injure prosperity and employment in the United States is had in the effect of the successful fight made by these interests to prevent the imposition of a tariff on crude oil or oil products.

During the first six months of 1930 our imports of gasoline increased over the same period of 1929, 140%, while our exports decreased 40%. During the same period our imports of crude oil and all oil products increased about 50%, while our exports decreased 25%.

This happened in the country which leads the world in potential oil production. While importing vast quantities of crude oil our own oil fields were operating under limitations of output, encouraged by the national and state governments and by associations of oil producers, in order not to disastrously increase the surplus of crude oil and oil products. A decreasing amount of money came into the country for the purchase of our products, while we greatly increased our purchases of commodities of which we had a surplus that could not find a market.

As a result of this many thousands of oil field workers, refinery employes and others whose employment is affected by the oil industry, were rendered jobless. American farmers lost much money they otherwise would have had from oil royalties. All this worked no benefit to consumers of crude oil or oil products.

Still Senator Swanson of Virginia says that the way to increase the prosperity of the United States is to buy more of the products of foreign cheap labor displacing the similar output of American workers receiving a higher rate of wages.

St. Peter to rich miser arriving at the Pearly Gate: "You must first set forth your merits before we can give you a pass." Miser: "I once gave an orphan 5 cents; a starving man 5c, and a bedridden old lady 5c." St. Peter to Orderly: "Give this man back his 15 cents and tell him to go to h—?"

IT'S WISE TO **CHEVROLET** CHOOSE A SIX

Announcing a new production record

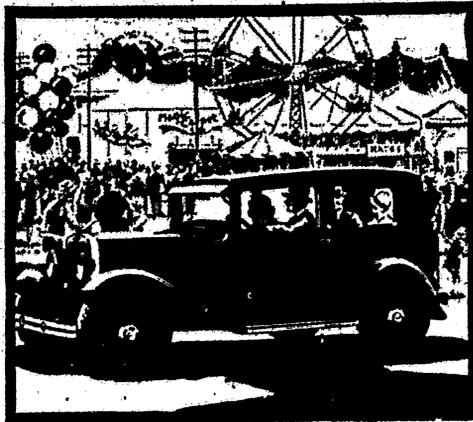

2,000,000 Chevrolet Sixes now on the road

Since January, 1929, Chevrolet has produced and sold over 2,000,000 six-cylinder automobiles—nearly five times as many as any other manufacturer has ever built in an equal length of time.

These 2,000,000 buyers have chosen Chevrolet because it offers many desirable qualities not obtainable in any other car so low in price—

—the smoothness, silence and flexibility of a modern six-cylinder engine—the comfort and roadability of a modern, full-length chassis—and the style, safety and distinction of bodies by Fisher.

Yet, despite these fine car advantages, the Chevrolet Six is unusually economical. Its gas, oil, tire and upkeep economy is unsurpassed. And

The Coach, 1934, J. C. B. Flint factory

any model can be bought for a small down payment and easy monthly terms! Come in today. Learn for yourself why two million buyers have agreed—"it's wise to choose a Six."

Some Distinguishing Features

50-horsepower six-cylinder motor . . . 48-pound crankshaft . . . full-length frame . . . four semi-elliptic springs . . . fully-enclosed four-wheel brakes . . . four Lovejoy hydraulic shock absorbers . . . dash gasoline gauge . . . Fisher hardwood-and-steel body . . . adjustable driver's seat . . . safety gasoline tank in the rear . . . non-glare VV windshield . . . and, for your protection, a new and liberal service policy.

Modern production methods assure high quality

Sport Roadster . . . \$515	Club Sedan . . . \$625	Roadster or Phaeton	Sedan Delivery . . . \$595	1 1/2 Ton Chassis . . . \$520
Coach . . . \$585	Sedan . . . \$675	\$495	Light Delivery Chassis . . . \$385	With Cab . . . \$625

LEGAL ADVERTISEMENTS

OFFICE OF THE COMMISSIONER OF PUBLIC LANDS SANTA FE, NEW MEXICO

STATE TIMBER SALE LINCOLN COUNTY Sale No. 2424

Notice is hereby given that pursuant to the provisions of law and the regulations of the State Land Office, the Commissioner of Public Lands, will on the 2nd day of September, 1930, at 9 o'clock a. m., at the front door of the Court House in the town of Carrizozo, county seat of Lincoln County, New Mexico, offer for sale to the highest and best bidder all of the merchantable dead timber, standing and down, and all of the live timber marked for cutting on the S $\frac{1}{2}$ Section 36, Township 10 South, Range 13 East, Lincoln County, New Mexico, estimated to be ninety-five thousand (95,000) feet, board measure, available for cutting. No bid will be accepted for less than \$3.50 per thousand feet, board measure, and the successful bidder at time of sale will be required to pay the expenses of sale and to deposit on the purchase price not less than One Hundred and Fifty Dollars (\$150.00). The balance of the purchase price will be payable as the cutting proceeds and as called for by the Commissioner of Public Lands.

Cutting will be required to be completed on or before July 1st, 1931, unless extension be granted for good cause shown. All operations under this sale will be conducted in conformity with a written contract to be entered into with the State of New Mexico, by the successful bidder, a copy of which will be furnished upon application and the sale will be administered by the United States Forest Service, in accordance with the existing co-operative agreement. Austin D. Grile, Commissioner of Public Lands. Dated at Santa Fe, N. M., June 14, 1930. First Publication, June 20. Last Publication, Aug. 29, 11 times.

NOTICE FOR PUBLICATION STATE LAND SALE LINCOLN COUNTY OFFICE OF COMMISSIONER OF PUBLIC LANDS SANTA FE, NEW MEXICO

Notice is hereby given that pursuant to the provisions of the Act of Congress, Approved June 20, 1910, the laws of the State of New Mexico and the rules and regulations of the State Land Office, the Commissioner of Public Lands will offer at public sale to the highest and best bidder, at 10 o'clock, a. m., on Tuesday, September 16th, 1930, at the front door of the court house in the town of Carrizozo, county seat of Lincoln County, New Mexico, the following described tract of land to-wit:

SALE NO. 2425

NE $\frac{1}{4}$ Sec. 33, Twp. 10 S., Rge. 10 E., N.M.P.M., containing 80.00 acres. Improvements consist of barns, stables, corrals and other improvements valued at \$1600.00.

No bid will be accepted on the above described land for less than Five (\$5.00) Dollars per acre and the successful bidder will be required to pay at the time of sale five per cent (5%) of the amount of his bid, the value of the improvements and the cost of sale. The balance of the price offered will be payable at any time within thirty (30) years, with interest on all deferred payments at the rate of four per cent per (4%) annum, in accordance with the terms of the contract to be entered into by the successful bidder, form of which will be furnished upon application.

All minerals on the said land are reserved to the State and the Commissioner reserves the right to reject any and all bids.

Dated at Santa Fe, New Mexico, this 14th day of June, 1930.

Santa Fe, New Mexico Notice is hereby given that pursuant to the provisions of the Act of Congress approved June 20th, 1910, the laws of the State of New Mexico and the rules and regulations of the State Land Office, the Commissioner of Public Lands will offer at public sale to the highest and best bidder, at 10 o'clock a. m., on Friday, October 24th, 1930, at the front door of the court house in the town of Carrizozo, county seat of Lincoln County, New Mexico, the following described tract of land, to-wit:

Sale No. 2425

NE $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 5, Twp. 6 S., Rge. 11 E., containing 40.00 acres, N. M. P. M. Improvements consist of a small store building, adobe house, barn, corrals, well, windmill, tank and other improvements, valued at \$1091.00.

No bid will be accepted for less than Three Dollars (\$3.00) per acre and the successful bidder will be required to pay at the time of sale five percent (5%) of the amount of his bid, the value of improvements and the costs of sale. The balance of the price offered will be payable at any time within thirty (30) years with interest on all deferred payments at the rate of four percent (4 percent) per annum, in accordance with the terms of the contract to be entered into by the successful bidder, form of which will be furnished upon application.

All minerals on the said land are reserved to the state and the Commissioner reserves the right to reject any and all bids.

Dated at Santa Fe, New Mexico, this 24th day of July, 1930. A1-010 Austin D. Grile, Commissioner of Public Lands.

LONG MILES in SHORT SECONDS

BEFORE starting on a trip, other than for a vacation, of course, consider for a minute whether a telephone call might save you the time and expense.

Telephoning is a round trip, the miles there and back are just a matter of seconds, and complete discussion is as easy and satisfactory as being there in person. Friendly telephone visits with friends in other cities are also becoming as commonplace as business calls. Just give the operator the out-of-town number—if you don't know it, the name and street address. The call is generally completed like a local call—while you hold the line. When the operator gives you the number before completing the call, jot it down for future reference.

Here are a few samples of day rates when you do not ask for a particular person at the other telephone:

- Phoenix.....\$1.70
- Dallas, Tex..... 2.15
- Denver..... 1.85
- Chicago..... 4.25

The rate to any point you wish to call can be secured by asking the Long Distance operator

Knitted Cotton for Children

By JULIA BOTTOMLEY

that they do. It is a knitted dress not of wool, for children draw the line at wearing wool, not of silk for silk is far too dressy for ordinary wear, but guess what. Give up? Well, the answer is beautiful sturdy and at the same time soft-to-the-touch cotton, durable cotton, if you please. Durable cotton is really mercerized cotton, the fiber being treated in a way to bring out a subtle luster, and best of all to withstand intensive wear and endless laundering.

These practical fashions of knitted cotton which children's specialty shops and departments are displaying with such pride are not beset with frills and furbelows (another point in their favor), but they are charmingly colorful, coming in a range of beguiling pastel shades. The little two-piece school frock illustrated is in an adorable shade of blue.

Youngsters with a desire for gay color can have many kinds of both underwear and outerwear in this sturdy knitted pastel cotton such as fine-mesh durenne shirts, panties, union suits, sun suits and cunning costumes with smartly styled skirts and clever cardigans and sleeveless sweaters.

The typical undergarment for infants has been serviceable and unimaginative for years. It is only just recently that stylists have interested themselves in fashion appeal as well as that of service, and so it is that emphasis is now being placed on pastel colors for "young" underwear as well as upon outer apparel.

Evening Story for the Children

By MARY GRAHAM BONNER

The ducks had just said they had noticed the pelican children, but had not said they thought they were handsome.

"They'll soon be able to fly as well as we can," said Mrs. Pelican with pride.

"We are having lessons every day," said Mr. Pelican. "They are too old for the nest now—yes, they are much too old."

"What good times we did have then," said Mrs. Pelican. "It was such fun to find fish and take them home delicious bits—feeding them right in the nest."

"You mean right in the beaks and thence to their good pouches," said Mr. Pelican.

"Well," said Mrs. Pelican, "I meant to say that I was in the nest and they were in the nest when I fed them."

"Of course, the food didn't stay in the nest."

"It did in a way," said Mr. Pelican. "The little ones weren't going out, and the food went into them."

"They were in the nest."

"Oh, dear, oh dear," said Mrs. Pelican. "Will I ever learn to speak correctly?"

"Mr. Pelican is such a very particular creature about his speech and about my speech."

"So it seems," said the ducks. "Well, quacking is good enough for us, and we don't just care what we say when we quack."

"It's as easy to be right as wrong," said Mr. Pelican in a haughty tone, and he smiled in a kind way at Mrs. Pelican.

"You'll get learn, my love."

"Ah, thank you," said Mrs. Pelican, sweetly.

"I suppose," said Mrs. White Duck, "that it is extremely useful to have those pouches that hang down under your beaks."

"Indeed it is extremely useful," said Mrs. Pelican. "We can eat so much more in that way."

"Yes, ever so much more."

"Of course that is a great advantage," Mr. Pelican added, in a tone as though he were telling the ducks that he owned the best part of the world.

"When they can fly they will forget they have web feet, for even though their legs are short, as ours are," said

Home-Grown Products Are Valuable

(Prepared by the United States Department of Agriculture.)

In counting up the advantages of living on a farm the things supplied to the family table from the kitchen garden, the orchard, poultry and other live stock, are an important consideration. Again, most farms furnish firewood and often ice.

The farm homemaker's budget and household accounts do not give a true picture of the economic status of the family unless these home-grown products are recorded and evaluated. Most farm women also can or store a good part of their garden surplus, put up jams, jellies, and pickles, and "put down" eggs. When they take these preserved foods from the shelf and put them on the table they do not always stop to think that if they lived in the city each glass of jam or can of string beans would have to be paid for in cash. They are sometimes richer than they had thought they were. Some of the farm woman's products are sold—butter and eggs, young broilers, hens that have outlived their usefulness, vegetables, both fresh and canned, and various other things. Whether the income from such sales is looked on as belonging personally to the homemaker or is pooled with the family cash, one certainly should know what it amounts to, in order to judge which activities pay and which do not.

"But," complains the average farm homemaker, "it's too complicated to keep track of every basket of vegetables I bring in the house, or every jar of pickles I put away. I never had a head for figures, anyway."

The bureau of home economics of the United States Department of Agriculture had this objection in mind when Farmers' Bulletin 1553-F, "Planning and Recording Family Expenditures" was written, and in devising a practical loose-leaf household account book. The first suggestion made is that a pad or large card be kept hanging in the kitchen. Whenever anything is brought in for household use the kind and quantity can be entered at once. Materials for home canning can be written down when they are gathered, and then they will not need to be recorded at the time of use. With a little care the person who does the recording—and it is best for one person, usually the homemaker, to attend to this entirely—can avoid the mistake of entering materials more than once.

At the end of a week or a month, the entries on the pad or card can be transferred to a special page in the account book headed "Products furnished by the farm for family use."

Foods That Are Needed for Good Teeth

A large amount of sugar and certain bacteria cause an acid condition which dissolves the enamel of the teeth. Calcium, phosphorus and vitamin D are essential for good teeth. The health of the teeth is quite dependent upon vitamin C found in tomatoes, oranges, grapefruit and raw vegetables. The two former are found in milk, the latter in cod liver oil, liver, egg yolks and chicken fat. Contrary to popular opinion, there is a great amount of circulation in a tooth.

"Oh, I say... is there no end to this?"

IT'S Sir Walter speaking. What, Sir Walter Raleigh? The same.

Some months ago he offered pipe lovers a free booklet on "How to take care of your pipe." And the poor chap's been buried under requests ever since.

However, we've succeeded in engaging two of Queen Elizabeth's ladies-in-waiting to help the old boy out with his mail—so don't hesitate to send for your copy. It tells you how to break in a new pipe—how to keep it sweet and mellow—how to make an old pipe smoke smoother and better—the proper way to clean a pipe—and a lot of worth-while hints on pipe hygiene.

If you're a pipe smoker, you'll want to read this booklet. It's free. Just write to the Brown & Williamson Tobacco Corporation, Louisville, Ky.

TUNE IN on "The Raleigh Revue" every Friday, 10:00 to 11:00 p. m. (New York Time), over the WEAF coast-to-coast network of N.B.C.

Makes Life Sweeter

Children's stomachs sour, and need an anti-acid. Keep their systems sweet with Phillips Milk of Magnesia!

When tongue or breath tells of acid condition—correct it with a spoonful of Phillips. Most men and women have been comforted by this universal sweetener—more mothers should invoke its aid for their children. It is a pleasant thing to take, yet neutralizes more acid than the harsher things too often employed for the purpose. No household should be without it.

Phillips is the genuine, prescription product physicians endorse for general use; the name is important. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1874.

PHILLIPS Milk of Magnesia

W. N. U. CHERRY, NO. 22-1928

How to Cope With the Ant Nuisance

(Prepared by the United States Department of Agriculture.)

There are a number of common species of ants which get into houses from time to time and cause annoyance by appearing on foods, especially sugar, cakes, candies and other sweets, and cooked foods of animal origin. An ant having once gained access to foods of these sorts, reports the discovery to the colony, and in an incredibly short time the premises may be swarming with these unwelcome visitors.

According to the bureau of entomology of the United States Department of Agriculture, both house and garden ants at times become a pest in the pantry and kitchen. The species that live entirely within doors nest in woodwork, masonry or articles of furniture. They are often very difficult to eradicate because of their inaccessibility. If the nest can be located by following the trail of the workers back to the point of their disappearance, the inmates of the nest may sometimes be reached and destroyed by injecting a little carbon disulphide, kerosene or gasoline into the opening, by means of an oil can or small syringe. In the use of these substances, precautions should be taken to see that no fire is present, as they are all inflammable.

The removal of attracting substances from their reach should be the first step. Keep food supplies which are likely to attract ants in tight containers or in the refrigerator, and sweep up promptly any crumbs of cake or bread scattered by children. Find and destroy the nest as soon as possible. It ought not to be necessary to take up the flooring to get at it, for poison baits can be used to kill the queens and the brood. Almost any of the common garden or lawn ants which build their little crater nests in the soil about houses may become temporarily house pests in their search for food substances. When ants are found swarming up

trees they may be caught in large numbers by putting up poisoned bait, consisting of a sugar syrup to which sodium arsenite, hexachloro of soda and tartaric acid are added. Precautions should be taken to safeguard human beings and domestic animals when poisoned sirups are being prepared or

Poisoned Bait in a Paraffined Paper Bag Being Nailed to a Tree.

kept on hand. Bait of this kind is put into a paraffined paper bag with one side folded down to admit the ants. It is nailed on the tree as shown, out of reach of little children. Small lawns may be sprayed with kerosene emulsion, or a very strong soap solution, to destroy ants. Dissolve half a pound of any common laundry soap in one gallon of water for use in this way.

"It Did in a Way."

Mrs. Pelican, "their wings will be strong."

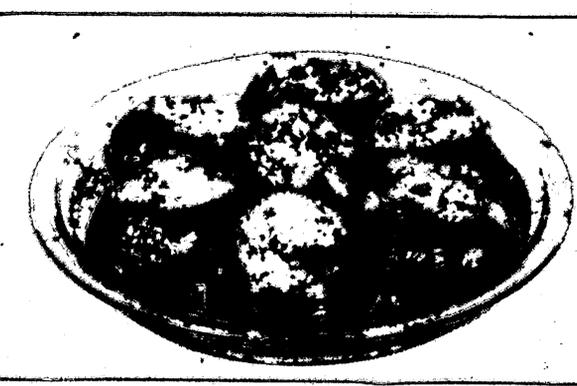

"Every one knows how the pelicans can fly."

While Mrs. White Duck and Mrs. Tan-and-White Duck are listening, they were feeling unhappy.

They could not fly nearly so well as the pelicans could, and their feet were just as bad.

The pelicans noticed that they had

Serve Foods in the Baking Dishes

Stuffed Tomatoes Served in a Pie Plate.

(Prepared by the United States Department of Agriculture.)

When foods can be served in the same dishes in which they were cooked, there is considerable saving in time and trouble for the homemaker. Glass and earthenware casseroles, pie plates, and dishes of other shapes are all attractive enough to be put on the table, and as foods baked in them almost always have a pleasing color of browned crumbs or a pastry top, they appeal immediately to the eye as well as to the palate.

Stuffed tomatoes, served in a shallow baking dish or pie plate are a good example of colorful, flavorful food prepared with a minimum of effort. There is either no cooking pan, or no serving dish—whichever way you look at it—to be washed. One utensil at least eliminated. The bureau of home economics of the United States Department of Agriculture gives these directions for stuffing tomatoes:

- 1 large firm tomato, cut in halves.
1/2 cup celery seed.
2 strips bacon, 1/2 tsp. salt.
2 tablespoons chopped parsley.
1 tsp. pepper.
1 lb. chopped onion.
1/2 cup buttered bread crumbs.
1 cup dry bread

Wash the tomatoes, remove a thin slice from the stem end, and carefully scoop out the pulp so that the tomato shells will not be broken. Dry the stems until crisp, remove from the

pan, and break the bacon into small pieces. Add the parsley and onion to the fat, cook for a few minutes, add the cup of dry bread crumbs, celery seed, salt, pepper, crisped bacon and tomato pulp. Stir until well mixed and add more salt if necessary. Fill the tomato cups with this mixture, cover the top with the buttered crumbs, place in a shallow baking dish, and bake in a moderate oven for 45 to 60 minutes, or until the tomatoes are tender and the crumbs are brown. Serve from the baking dish.

SOME HOUSEHOLD HINTS

Overcrowding the refrigerator prevents circulation of cool air and cuts down its efficiency.

Milk and fruit drinks in hot weather are not only refreshing but contain valuable food materials.

A tempting appearance adds to the success of a vegetable dinner. Color, attractive arrangement of food on the plate and daintiness all count.

Careful mothers remember that picnic meals for the children should be as well balanced and as thoroughly supervised as regular meals at home.

Food for the Family Table

By NELLIE MAXWELL

The foundation of education consists of training a child to work, to love work, to put the energy of his entire being into work; to do that work which develops his body, mind and soul; to do that work most needed for the elevation of mankind.—Parkes.

A simple dessert well made and daintily served gives just the finishing touch to a plain dinner. Here are a few desserts that may be helpful in planning a luncheon and the dinner menus:

On baking day when the oven is not too well occupied, prepare and bake a pastry shell or two, or bake the shells on petty tins for individual pies. These will keep well for a few days and it will be found most helpful to put in a filling of lemon, cover with a meringue and have a dessert in a very few minutes. These shells may be filled with crushed fruit, topped with whipped cream, or they may be

filled with a butterscotch filling of chocolate, thus having any kind that seems desirable or is well liked.

The following will be another filling that takes but a few moments to prepare:

Marshmallow and Fruit Pudding.—Soak one-fourth of a cupful of candied cherries and pineapple cut into pieces either in the pineapple juice or any fruit juice either canned or fresh, for an hour or more. Use marshmallows and their own syrup if preferred. Cut one-half pound of marshmallows into six pieces each. Beat one cupful of whipping cream until stiff, add three tablespoonfuls of confectioner's sugar gradually, then a half teaspoonful of almond with a few drops of vanilla. Mix the marshmallows with one-half cupful of pecan meats broken into pieces and fold all together. Chill and serve in the pastry cups.

A Safety Luncheon Dessert.—Spread the round butter crackers with marshmallow cream and in the center of each place a teaspoonful of pineapple

or orange marmalade. Beat the whites of two eggs until stiff and dry, add one-fourth cupful of powdered sugar and with a pastry tube pipe this meringue around the edge of the cracker, then set a rose of meringue in the center. Sprinkle with granulated sugar and brown lightly in oven.

Spice Cake.—Sift two and one-half cupfuls of pastry flour with one-half teaspoonful of soda, one teaspoonful of baking powder, one-fourth teaspoonful of allspice, nutmeg, mace and one-half teaspoonful of cinnamon. Sift three times. Cream one-half cupful of butter, add two cupfuls of sifted brown sugar and cream together until light and fluffy. Add two eggs well beaten and the flour mixture alternately with one cupful of sour milk. Beat well after each addition and bake in a greased tin eight by eight inches. Bake 45 minutes.

Cooked minced carrot may be added in the same way. Beans, peas, onion or cabbage used in the same proportion will give variety.

(C. 1920, Western Newspaper Union)

The Mazaroff Mystery

—By—
J. S. FLETCHER

Illustrations by IRWIN MYERS
(© by Alfred A. Knopf, Inc.)
W. N. U. Service

THE STORY

Mervyn Holt is engaged by a man calling himself Mazaroff as a traveling companion. After a short tour they put up at the Woodcock Inn on Murradale moor. They meet, casually, Mrs. Elphinstone and Sheila Merchison. Mazaroff tells Holt they are his wife and daughter and that his real name is Merchison. That night Mazaroff fails to return to the inn and his disappearance is unexplained. Holt meets Sheila and tells her of Mazaroff's disappearance. Holt is questioned by Police Sergeant Manners and a reporter, Bonnas. Mazaroff's murdered body is found. Crole, Mazaroff's lawyer, and Maythorne, private detective, arrive. Valuable diamonds that Mazaroff usually carried are missing. A gun, stolen from Murradale, is found at the scene of the murder. Evidence at the inquest proves Mazaroff was Merchison. His will leaves all to Holt. Herman Kloop, close friend of Mazaroff, is in London. From him it is learned that Mazaroff possessed two remarkable diamonds, which he had offered for sale to Lord and Lady Locke. Locke says Mazaroff had one of the stones and his agent, Armintrade, the other.

CHAPTER V—Continued

"There you are," he said. "James Mallison, no occupation, Park lane—which seems to argue that Mr. Mallison lives with his aunt and his uncle-in-law. But perhaps Cottingley knows Cottingley knows a lot! Do you know anything about Mallison, Cottingley?"

"Very little! Young man about town. A bit—foppish. Sporty—in a way. Lives with Sir Samuel and Lady Locke. They say this Mallison will come in for Sir Samuel's money."

"And that's all you know, Cottingley?"

"All!"

Maythorne threw the scrapbook on the table.

"Well, that's that!" he said. "We know a bit more now about Mallison. Doubtless he's the man Mazaroff spoke to at Huntingdon and at York. Now, there's nothing much in that, but it seems that Mallison was going north. And what I'd like to know is this—did he and Mazaroff ever meet again? What we want to get at is the relationship of Mazaroff's murder to the fact that Mazaroff had Blue Diamond Number Two on him when he was murdered. How many people know that he had? Well, from all we can make out, here was a man—Mallison—who certainly knew it. Mallison had seen the blue diamond—Number Two—in Mazaroff's possession. Probably, when they encountered at Huntingdon and at York, the blue diamond deal with Sir Samuel Locke was the subject of their conversation. We'll have to get and talk with Mallison, certainly. And—Armintrade? That man has got to be seen, too—he knows more than he's told; in fact, he's told nothing. And in the meantime, he must be carefully watched. Holt—is that man you left at the Woodcock, the chauffeur, Webster, a man of good intelligence?"

"Webster's a sharp, clever chap," I answered. "Smart—trusty."

"Give me some telegraph forms, Cottingley," said Maythorne. "Holt, I'm going to send Webster a wire in your name, telling him of certain things I want him to do there as regards keeping an eye on High Cap lodge. We shall have to go back there, I expect, but it mayn't be tomorrow. As for tomorrow, will you two come here at ten o'clock in the morning?"

Crole and I went away, leaving Maythorne concealing his telegram to Webster.

I bought the evening newspapers and went off to Jermyn street, resolved on going to bed at exactly nine o'clock. I should have kept my resolution, if, just as I was about to make the definite move backward, Maythorne had not turned up.

"I've seen Sir Samuel Locke, again, Holt," he said. "I've found out a certain fact that may or may not be relevant. About this chap Mallison, of course."

"Yes?" I said.

"Mallison," continued Maythorne, "went up north just about the time you and Mazaroff did. Old Locke wants to rent a shooting next year—grouse moor, you know—and he thought it would be a good notion if Mallison went and inspected some shooting while guns were actually at work. From what he told me, I'm pretty dead certain that Mallison was in the immediate neighborhood of Murradale at the very time you and Mazaroff reached the Woodcock Inn. Eh?"

I saw that he expected me to make some comment. I had no comment to make; all I could say was that I had never seen anything of Mallison in these regions. He smiled.

"Why, no!" he answered. "Of course you didn't—or, I might say, wouldn't, if—but still, that's all in the clouds. Yet—Mallison was certainly there or Murradale."

"I wonder if we shall ever find out all about it?" I said.

He gave me a queer, knowing look. "We shall find out all about it, Holt," he replied. "And—when we do, there'll be a big surprise! Look here!

Do you remember that when we were at Reiver's den I picked up something close by where Mazaroff's body was found? You do? Well, now—"

He broke off short. Somebody was knocking, gently but persistently, at my outer door. I walked out of the room, across the little hall, and opened the door—to stand back amazed. Sheila stood there—alone!

CHAPTER VI

How Was It Got?

Her name sprang to my lips involuntarily as I stood there, staring at her. She laughed, half shyly, as I let it out, but she was more collected than I, and she stepped into the hall as readily as if there were nothing strange in this—to me—surprising visit. I had left the door of the sitting room open; she glanced through and saw Maythorne, and her first words were businesslike enough.

"You've Mr. Maythorne here? That's better!" she said. "Well—"

I followed her into the room and closed the door. Maythorne had jumped to his feet; for a second or two

"Yes," She Answered, "I Know a Lot More Than That."

the three of us stood gazing at each other. As for myself, I felt utterly at a loss: Maythorne was quite calm. He drew a chair in front of the fire, silently motioning Sheila to sit.

"Miss Merchison is here because—something has happened," he said. "Exactly!"

She thrust her hand into some inner pocket and drew out a folded paper. As quietly as if she were giving me an ordinary letter to read she held it out to me.

"Mr. Maythorne is right," she said. "Something has happened. That's the will! I brought it to you—myself!"

I gave one glance at the signature at its foot—here, without doubt, was the will, made at York, of which Postlethwaite had spoken at the inquest. I handed it across to Maythorne.

"Where did you get this, Miss Merchison?" he asked.

The answer came promptly and sharply—with a certain hardness of tone.

"Stole it!"

"Stole it? From—whom?"

"No use beating about the bush, now! I stole it from my own mother!"

Maythorne and I exchanged glances: Sheila looked from one to the other.

"I dare say you've heard, perhaps known, of cases where daughters have had to tell the truth about their own mothers, Mr. Maythorne?" she said.

"Well—whether it's wrong or not, I'm going to tell the truth about mine. I stole that will from her this morning, because I knew she'd no right whatever to be in possession of it, and when I'd got it, I jumped on my bicycle and made off to Black Gill Junction, and caught the next train going south—to hand it over! If I hadn't, who knows what would have become of it?"

"Yes?" said Maythorne. "Exactly. But—you know a lot more than that, Miss Merchison. And—we three are alone."

She put her fingers together in her lap—I noticed they trembled—a little.

"Yes," she answered. "I know a lot more than that. Let me tell you, for it's no use denying it, that my mother is one of those women who love money—money, to her, means all sorts of things—never mind what. I saw from the beginning that as soon as it was put into her mind that Mazaroff was really Merchison, the idea of getting hold of his fortune began to shape itself.

women who are ill and I was surprised that she should take so much trouble in this particular instance. I tell you both I suspected something then, but I didn't know what! Could I help it?"

"Go on," said Maythorne, quietly. "Tell us everything."

"Well, last night, the same thing occurred again," continued Sheila. "She went out, on the same excuse, and she was away still longer. I heard her come in—I went to see if there was anything I could do for her. And it was then I made a discovery. She was in the inner library. I saw her through the curtains that shut it off from the big library. There was a small lamp on the table in the center; she stood by it examining a sheet of paper. And—I don't know if it was intuition, or what—it flashed across me that what she was looking at was the missing will! So—well, then I watched her—I'll confess it. She read the paper through, folded it up, looked round, and then went over to one of the bookcases, and slipped the paper into a big volume in a corner. Then I went off—and I didn't sleep. I knew there was mischief. I was certain—dead certain—that paper was the will, wherever and however she had got it. And in the middle of the night I got up, and went down, and got the paper out in the dark, and then just struck a match—and of course one glance was enough. I put it back, and went back to bed. And then there was no sleep. I felt—oh, I don't know what I felt! There was devilry somewhere—close at hand. My own mother or not—what business had she with that will? Where did she get it? By what means? Was she mixed up with it—but I didn't dare to think about what she might be mixed up with. What I did realize was this—the probability was that if the will remained in her possession, she'd destroy it, and then—well then, all sorts of things would happen that I didn't want to happen. And so I determined to take matters into my own hands. I got up early. I took the will, got on my bicycle, and set off for Black Gill Junction—it was still dark when I set out. I got down to Carlisle—and then, of course, it was plain sailing up to town. And—you've got the will!"

"You're a good plucked 'un!" Maythorne said, with obvious admiration. "You know at any rate how to act without hesitation. Well!—this is a queer tale, Holt. How does it strike you?"

"It may be," I answered, "that Mrs. Elphinstone could give a perfectly proper and valid explanation as to how she became possessed of the will."

Sheila turned on me like a flash.

"Mervyn!" she exclaimed, "I believe you think I should have asked her that before I stole the will and ran off with it—to you!"

"No—no!" I protested. "I—"

"I believe you do—I believe you do!" she exclaimed. "A pretty fool I should have been if I'd as much as let her know that I knew it was there! I know what would have happened if I'd told her that I knew what was hidden in the book! She'd have burned it before my very eyes. I know! No!—knowing what I did, there was only one thing to do, and that was to place it in safety."

"Miss Merchison's right," said Maythorne. "That was the only thing to do. And here it is, and tomorrow morning I'll hand it over to Crole. Mind you, Miss Merchison, your mother, as Holt suggests, may have a perfectly good explanation as to how she got the will. But, under the circumstances, you took the best step you could."

Sheila jumped up, suddenly, and began to button her coat.

"Then that's all right," she said. "I've done my bit, anyway—and now I'm off—I'll sleep tonight."

"Where are you going?" I asked as Maythorne and I rose. "Wherever it is, you must let me see you there, safely?"

"Oh, you can do that," she answered, half-carelessly. "I'm going to my old school friend, Rhoda Apperley. She lives in a flat of her own in Ashington mansions, in Malda Vale. I'm all right—but you can get me a taxi and ride there with me if you like."

"And tomorrow—in the morning," said Maythorne, "let Holt call for you and bring you to my office. And by-the-bye, before we go out, I've got something in my pocket, Miss Merchison, that I'd like to show you. Come to the light."

Suddenly, from some inner pocket, he produced and laid on the table in the full glare of the lamp, an old-fashioned, cat-gorm brooch, set in fine, much-worn silver. He looked closely at Sheila.

"Have you ever seen that before?" he asked. "Think!"

"No!" replied Sheila. "Never! Whose is it?—What is it?"

Maythorne picked up the brooch, and began to fidget it. Turning it over, he pointed to the pin at the back, which was considerably worn, and fitted loosely to its socket.

"It would easily slip out of any woman's gown," he said. "And—I picked it up at Reiver's den, close to the spot where Mazaroff's dead body was found."

She turned on him a quick, questioning glance that shifted from him to the brooch, and he picked up the brooch again, and restored it to his pocket.

"So—to the best of your recollection—you've never seen it before?" he said.

"Never!" she repeated. "Never!"

Presently we all three went downstairs, and into the street. I got a taxicab, and Sheila and I got into it. Maythorne said good-night and went off; we, too, set out on our ride to Malda Vale. She suddenly laughed shyly.

"Mervyn!" she said. "Were—were you glad to see me?"

"Will it be an answer," said I, "if I tell you that I'd been thinking about you all the evening?"

"That's a nice answer," she laughed. "Oh, well—now don't let's talk—we'll talk tomorrow, or next day, or some other day. But you can hold my hand, if you like, till we get to the end of the ride."

We held each other's hands—in silence—all the way to Malda Vale. I saw her safely in charge of her friend, and went back home in the same cab. Wondering, of course—wondering . . . what next?

CHAPTER VII

The Missing Man

I was back at Ashington mansions soon after nine o'clock on the following morning, and by half past Sheila and I were walking down Edgware road on our way to Maythorne's office. Amidst the crowded London streets, we were alone in a sense in which we could not have been alone in the solitudes of Murradale, and the sensation was as novel as it was delightful. Yet I knew it could not last, and we had not been walking far when Sheila voiced exactly what I was feeling.

"Mervyn!—I'll have to go back, you know!" she said. "I've done what I came for—given you the will—and now I'll have to go home—soon, anyway—and face the music. Of course, my mother has guessed long since what's happened. And—there'll be a nice row! I shall have the liveliest quarter of an hour I ever had in my life. And I shall only have one resort to make—not a nice one to make to one's own mother—and that's to ask her what she was doing with that will and how she got it? And, if I know her, she won't say."

"There may be developments before it comes to that," I remarked. "The fact is, we none of us know where we are. I don't, anyhow! I feel as if I didn't know what on earth's going to turn up next."

"Anything may," said Sheila. "I suppose the thing is, in these cases, to be ready for anything and surprised at nothing."

And at that very moment a surprise was within touching distance of us. Suddenly Sheila stopped dead and clutched my arm; turning sharply on her, I saw that she was staring as if fascinated at the open door of a tobacconist's shop, a few yards ahead of us.

(TO BE CONTINUED)

Hard to Grasp Facts of the Stellar System

At first the brain reels a little in the attempt to grasp the facts of the stellar system, even explained with the lucidity and exactness of which Sir James Jeans is a master. From the vast extensions of the sky he carries us into the inmost recesses of the atom, where the electron whirls around its perpetual circuit several thousand million times every second. These numbers, says the London Spectator, are but dazzling painting, and it is simpler to say that the electron travels as far in a second as our latest seaplane travels in an hour. Sir James Jeans has a happy fertility

He Knew the Law
The late Hanley Fiske of insurance fame told this story at an insurance men's banquet in New York. "An American company," he said, "opened a branch in eastern Europe and was soon doing well. A rich peasant visited the main office one day, insured his farm, and then said to the manager: 'Now, then, sir, I must have everything plain and clear before I go. Exactly what would I get if my house and barn were to burn down tonight?' 'Not more than ten years and not less than three,' said the manager

in such comparisons, and forcibly strikes the imagination when he tells us that if the carbon atom were magnified to the size of Waterloo station, its electrons would be represented by six wasps flying round in the vast vacuity. All the rest is emptiness; and so in the celestial spaces it is immense odds against any given spot being occupied. "We live in a gossamer universe; pattern, plan and design are there in abundance, but solid substance is rare."

Put Health First
The views of students as to what makes life happy are revealed by a ballot competition conducted by the National Union of Students throughout the universities of England and Wales, says the London Observer. The following was the order of importance voted for the various attributes conducive to a happy life: A sound constitution; a sense of humor; a congenial occupation; an assured future; a charming wife (or husband); a blameless reputation; £400 a year; a brilliant career; a thick skin; a good cook; a persuasive manner; a library and a poker face (equal); an artistic temperament; a scholastic complexion.

Now Comes Cuticura Shaving Cream

A New Cuticura Product

MEN who like a smooth, agreeable shave should try it. Containing, in a modified form, the emollient properties of Cuticura, it makes shaving easy and at the same time is soothing and cooling. It leaves the skin fresh and clear, free from any tense dry feeling.

Sells for 35c. a tube.

Sold by druggists or mailed on receipt of price, by
Potter Drug & Chemical Corporation, Sole Proprietors
Malden, Mass.

Happy Woman Tells How She Lost 19 Pounds of Fat in 27 Days

During October a woman in Montana wrote: "My first bottle of Kruschen Salts lasted almost 4 weeks and during that time I lost 19 pounds of fat—Kruschen is all you claim for it—I feel better than I have for years."

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one half teaspoonful of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "it's the little daily dose that takes off the fat."—Don't miss a morning. The Kruschen habit means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts are carried to every organ, gland, nerve and fibre of the body and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

If you want to lose fat with speed get an 85c bottle of Kruschen Salts from any live druggist anywhere in America with the distinct understanding that you must be satisfied with results or money back.

Let time that makes you homely, make you sage.—Parnell.

Naturalist Will Study Creatures of the Sea

Dr. William Beebe, a famous naturalist, has gone to Nonesuch Island, Bermuda, to study the strange creatures that live in the sea. He is to live with them, but will pursue his studies in a special under water apparatus fitted with thick glass windows. Doctor Beebe hopes to reach a depth of nearly 1,700 feet and to discover many new kinds of marine life. The ordinary diving apparatus consists of a helmet with glass "eyes" secured to a waterproof dress which covers the whole body except the hands, a flexible tube connected with a pump which provides air, a 40-pound weight for the chest, a similar weight for the back, boots soled with 10 pounds of lead, and a life-line, in which in most cases telephone wires are embedded. A diving suit of metal is used by divers when they work at great depths.

SCIATICA?

Here is a never-failing form of relief from sciatic pain.

Take Bayer Aspirin tablets and avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They do relieve; they don't do any harm. Just make sure it is genuine.

BAYER ASPIRIN

DAISY FLY KILLER

Flies, gnats, mosquitos, house flies, and all other annoying insects. Kills all them. Works clean, economical, guaranteed and safe. Made of natural, can't melt or slip over. Use hot or cold water. Guaranteed. Sold by all druggists, grocers, and dealers.

for Stomach and LIVER TROUBLES

Cooled tongue, bad breath, constipation, biliousness, nausea, indigestion, dizziness, jaundice result from acid stomach. Avoid serious illness by taking August Flower at once. Get at any good druggist. Relieves promptly—sweetens stomach, invigorates liver, aids digestion, cleans out poisons. You feel fine, eat anything, will.

AUGUST FLOWER

BLACK FLAG

PERSONALS

Mrs. W. E. Reynolds
who has been visiting her sister in Chicago, has returned and the family now resides at Tucumcari, where Bill is trainman, having a run from Tucum to Dawson.

Maurice Lemon
came in Sunday from Los Angeles, where he had been visiting his uncle and aunt, Mr. and Mrs. Ed Queen. Maurice says he had the time of his life in the Golden State.

Mr. and Mrs. Wm. Gallacher
and children are visiting for the week at the home of Mrs. Grey at Alma, N. M., and expect to be home the first of the coming week.

Mr. and Mrs. Roy Stimmel
and children came in Monday from California where Roy has a position with the Standard Oil Company and the family's on their yearly vacation. They will visit for the week at the home of Roy's parents, Mr. and Mrs. B. L. Stimmel.

Mr. and Mrs. Isaac Marquez
of Tucumcari went through here Friday night on their way to Tularosa, where Mrs. Marquez remained, visiting with her sister, Mrs. Aristeo Salcido, and Mr. Marquez returned to Tucumcari on Sunday. On her return trip Wednesday, Mrs. Marquez stopped over here for a visit with the Saturnino, Joe Chavez, Pablo Tellez and Fred Baldonado families and other relatives.

John W. Harkey
and son Fay made a business trip to El Paso Tuesday, and returned in the evening.

Miss Dolores Taylor
of the I-X Ranch was here Tuesday, accompanied by Mr. Duncan Scott of Des Moines, Iowa, who is a guest at the Taylor home, being here to spend a part of his vacation. Mrs. Nora Broussard, mother of Mrs. Taylor, and Mrs. Ed Hogan, Mrs. Taylor's sister, both of whom are from Beaumont, Texas, are also guests of the Taylors. The visitors are all well pleased with this part of the Sunshine State.

Mrs. Henry Silva, Sr.
of the Tucson mountains was a week-end guest of the Gregorio Pino and Benigno Gallegos families. Mr. and Mrs. Jose Padilla of the Manzano country, were also visitors at the Pino and Gallegos homes last week.

Harry Gallacher
was in from the lower ranch Monday to have his car looked over and also to file notice of intention to make final proof on his homestead. Harry is rapidly recovering from his injuries received about six weeks ago, when he fell from a windmill which he was in the act of repairing. He has even improved to the extent that he can ride the range to a small degree.

Miss Elizabeth Green
came up from Alamogordo last Saturday and remained until Sunday as a guest of Miss Gleneth English. She left in order to be in El Paso Monday to attend the El Paso Business College.

Mrs. D. D. Tiffany
left Monday morning for Upton, N. Y., to pay a visit to her brother, who has been ill of late. After her brother's recovery, which it is hoped will be speedy, she will visit at other places over

George Elmgren
of Fort Stanton, recently painted a large sign 40x12 feet, which directs tourists to go to California by way of the Carlsbad-Grand Canyon Highway, which crosses the Malpais or lava beds at Carrizozo. The sign is located at the intersection of the two highways, the one to El Paso and the Carlsbad-Grand Canyon. Good work, George.

Vicente Gutierrez
arrived here Monday morning from Arizona, to join his wife and children, who have been visiting here for several weeks. Vicente was head chef at the Eating House for several years, and left here about two years ago, but is glad to get back to Carrizozo and announces his intention of remaining here.

Doom of Jazz Dancing Foreseen
New York — The doom of jazz dancing is foreseen by Thomas M. Sheehy, president of the dancing masters of America, who are in convention assembled. He expects that classic and conservative steps will be popular and that bathing suits with victorian frills will replace the sun-tan style.

Miss Mary Bell
who had been here visiting her sister, Miss Ella Bell of the First National Bank, left Tuesday on No. 12 for her home in Tucumcari.

There will be no service in the Methodist Church next Sunday, Sunday School as usual. The pastor is in a revival meeting at Capitan.

Mrs. Roy Shafer
and children returned Monday from Carlsbad where they visited for about one week with their many Carlsbad friends.

Representatives
from the I. O. O. F. and Rebekah lodges paid a visit to Rev. J. H. Skinner Tuesday and took with them a beautiful bouquet of flowers fresh from the gardens of Mrs. A. C. Climer, as a token of their love and esteem. The reverend gentleman is cheerful and the short visit was much enjoyed by the visitors and Rev. Skinner himself, who receives his many friends with gladness.

Mr. and Mrs. Allen Lane
of White Oaks, were Carrizozo visitors Tuesday, attending to some business and returned home in the afternoon.

Mr. and Mrs. G. T. Gaines
were business visitors Tuesday from their ranch about 50 miles from here.

E. V. Abeyta
of the Titaworth Company, Capitan, was a Carrizozo business visitor Wednesday of this week

Fred Sandoval
is here this week from Clovis, visiting his wife and children, who have been here for the past month. On his return trip, he will stop at Picacho for a short stay with his parents, Mr. and Mrs. Perfecto Sandoval and other relatives.

A Novel Pet
When Mrs. George Strauss and children returned from California last week, she brought home one of the strangest pets we have ever seen in this part of the country, and we dare say, in the country, as a whole, as out of all that have been brought to this country so far, have died, except the one referred to.

Mrs. Strauss' brother, G. L. Latham, is Quarantine Inspector at San Francisco and had the little animal sent to him from South America when it was real small. The name of the animal is the "Kinkajou" and known in the animal kingdom, in our language as the "Honey Bear" and derives its name from its intense appetite for sweets of all kinds, on which it survives, and without sweets, it would cease to exist. Its body is about 12 inches long from the head to the hips and its tail is nearly twice that length, which it uses pretty much like the monkey. Its legs are short and nimble; its claws are very sharp and it uses them oftentimes in the same manner as the South American sloth, crawling underneath the limb of a tree instead on the top as most animals do.

"Kink" is a friendly little fellow and shows his affection much like a pet dog by licking the hand of anyone who has shown him an act of kindness. His small, bead-like eyes shine with merriment as he scampers up on a person's arm or hang by his long tail and play pranks like a monkey. Mr. Latham made his sister a present of the little fellow and he has a good home.

J. M. Frame
of Ancho, was a Carrizozo visitor Wednesday.

Frank Maxwell
and son Warden, who is here from Wardensville, W. Va., for his vacation, have just returned from a fishing trip to different parts of Colorado. Warden, like his dad, is a great lover of hunting and fishing and their trip was a means of great pleasure to both father and son. Warden will be here for about two more weeks, after which he will return to Wardensville for the fall school term.
