CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, JULY 20, 1934

PRICE \$2.00 THE YEAR

NOGAL NOTES (By "CHICO")

Clark Hust of Las Cruces was in Nogal this week. Glad to see you, Clark! What are your predictions? Mr. and Mrs. Edgar Martin and children left Saturday morning for their old home in Fruitland, Idaho. Mr. and Mrs. Jesse May and Mrs. Ethel May were Carrizozo visitors Wednesday. Mrs. Dessie Soll has taken her small son Joe to Albuquerque for medical treatment for mastoid trouble. Mrs. Homer McDaniel and baby are visiting Mrs. McDaniel's daughter, Mrs. Clayton Hust, in Alamogordo this week. R. D. Martin has enrolled in the CCC Camp at High Rolls. A. B. Zumbalt was a Cloudcroft business visitor Tuesday. Mrs. Paul Aguayo, Jack Aguayo and Gladney Zumbalt have returned home from their mines in Arizona. Mr. and Mrs. John McDaniel and children of Las Vegas have moved to the old LeBaron place down on the flats. Mrs. Ethel May is a visitor at the home of Jesse May this week. Clarence Martin visited his parents in Nogal Tuesday. Mr. and Mrs. Chas. LeBaron have moved to Las Cruces. Several families from Nogal spent the Fourth at Fort Stanton and some on the Ruidoso. Jerry Graves has returned from a visit on the Plains in Texas. A. Richardson was in El Paso on business last week. Mr. and Mrs. Rich Hust were called to Oscura by the illness of their son, Marion. Mr. Powell and son of Mesilla Park were through Nogal last Wednesday. Clayton Hust and wife of Alamogordo made a short visit to Nogal Sunday. Le Nora Cochran returned home with them. Mr. and Mrs. Ben Coe and family of Phoenix are visiting at the home of Mrs. Coe's mother, Mrs. Eliza Zumbalt. Mr. and Mrs. Floy Skinner were called to Fort Stanton Saturday on account of the illness of their granddaughter, Mary Anne Cox. She is some better at this writing. Oddfellows Install At the regular meeting of Carrizozo Lodge No. 30, I. O. O. F., Tuesday night at Oddfellows Hall, after the business session, the following regular officers were installed: Noble Grand, F. L. Boughner; Vice Grand, L. P. McClintock; Secretary, Wm. J. Langston; Treasurer, S. B. Bostian. The above named officers were installed by D. G. M., James E. Anderson of Tularosa. After the installation a luncheon was had at Roy's Cafe. A. J. Newsom, Damon L. Shultz, Ernest Staffen and Wm. S. Turner, of Alamogordo were visitors. Earl B. Rountree was here from Capitan Tuesday attending to some business matters and leaving for home in the latter part of the afternoon. Mr. Rountree is the proprietor of the Camp Rountree just at the west approach from Carrizozo to Capitan on the highway. When in need of good service, drop in and give Earl a break.

LYRIC THEATRE R. A. Walker, Owner

Friday-Saturday—"Murder in the Zoo," featuring Chas. Ruggles, Lionel Atwell, Gail Patrick, Randolph Scott and Kathleen Burke. The jungle terror unleashed by a human monster more hideous than the beasts he caged! Comedy: "Sing, Bing, Sing." Sunday - Monday-Tuesday—"I Am Suzanne," featuring Lillian Harvey and Gene Raymond. Leslie Banks' Pedrecca's Piccoli Marionettes. Fun for the whole family. Also "Following Horses" and "Grand Uproar." Thursday-Friday-Saturday—"International House," with Peggy Hopkins Joyce, W. C. Fields, Ruddy Vallee, Stuart Erwin, Col. Stoopnagle & Bud, Cab Calloway and his orchestra, Baby Rose Marie and the Girls in Celophane—More stars than you saw when you fell down the cellar stairs in this musical comedy. Also "Daddy Knows Best."—Don't forget the Lucky Number Night, THURSDAY!

School Notes Ola C. Jones, Co. Supt.

At this time, the members of the Lincoln County Board of Education wish to announce their selection of truck drivers for the 1934-35 school term. They are as follows: Dist. No. 1, Lincoln, route No. 1, Genovevo Griego; route 2, Jno. Kallsen. Dist. 2, San Patricio, George Romero. Dist. 4, Pichacho, Inez Sandoval. Dist. 6, Encinoso, J. O. Shaw. Dist. 8, White Oaks, Laura Sullivan. Dist. 9, Ramon, route 1, R. H. Marshall; route 2, E. C. Prestage. Dist. 11, Nogal, Jesse May. Dist. 14, Jicarilla, N. Alsup. Dist. 15, Alto, J. B. Martin. Dist. 17, Bluewater, Eliseo Gonzales. Dist. 20, Hondo, route 1, Hummins Hedgecok; route 2, Frank Trujillo; route 3, Fred Montes. Dist. 21, Ancho, route 1, E. H. Hall; route 2, Henry Dale; route 3, L. A. Dragon; route 4, Robert Ellison. Dist. 23, Capitan, route 1, Robert L. Hale; route 2, delayed until route can be run out and established; route 3, Roy Copeland; route 4, delayed until route can be run out and established. Dist. 30, Joneta, route 1, O. J. Patrick; route 2, James W. Zinn; route 3, J. J. Kennon; route 4, W. G. Davis; route 5, F. E. Cape. Dist. 32, Arabela, Fermin Pacheco. Dist. 35, Glencoe, Rube Gonzales. Dist. 45, Macho, Lewis L. McInnes.

Women's Missionary Society

The regular meeting of the Women's Missionary Society of the M. E. Church will be held at the Community Hall lawn during the afternoon of July 25. At this meeting, all members should be present to take part in the contest. The topic will be, "Don't tell your guests," and the contest will be centered around daughters and trees of the Bible. Hints will be given out and points scored on the best answers to questions.

Mr. and Mrs. Ernest Rogers of Fort Worth, Texas, who visited for 10 days with the T. E. Kelley family, left last Friday for home. Mrs. Rogers is Mrs. Kelley's niece and a sister to Mrs. W. C. Hendren of Fort Stanton.

FORT STANTON NEWS

Dr. King's mother and niece, Mary Helen King of Dallas are visiting Dr. and Mrs. King. Mrs. Lambert of New Orleans is visiting her sister, Mrs. Jimmy Herbert. A good and much appreciated rain visited the Fort Monday. Mr. and Mrs. Jack O'Malley have returned from their honeymoon on the Ruidoso and are at home to their friends in their new residence in Capitan. Mrs. O'Malley, as Daisy Cotey, was one of the best loved nurses who have been at Stanton. Mrs. Jeanette Taylor of Kansas City and Miss Helen Kistler of Roswell were recent visitors here, visiting Mrs. Taylor's son who is ill in the hospital. Thursday evening, a miscellaneous shower for Mrs. O'Malley was held in the Nurses' Home. The rooms were decorated with daisies and the gifts concealed in a large kettle filled with artificial daisies and as Mrs. O'Malley pulled her favorite flower, she found a gift attached to each stem. Ten new shacks are nearing completion in the hill. Work on the new power house is steadily advancing and the new power line poles make the old ones look very antiquated. The principal outdoor sport at the present time is tennis and the devotees are Mesdames Clarence Porter, C. H. Boyd, Leo Payman and Sam King. Mrs. J. L. Welch of Dawson, who had been visiting her sisters, Charlotte and Helen Rice and mother, Mrs. M. Rice of Lincoln, has returned to her home after a pleasant visit.

DIAMOND DUST

Vaughn sent word Saturday that the team could not be here Sunday as scheduled, so Carrizozo and White Oaks got together and arranged for a doubleheader with the Mesalero Indians. Carrizozo started the fireworks against the Red tribe, and believe us, our boys had to submit to dynamite before they could subdue the warriors. But the boys brought their weapons into action towards the end of the much heated fray, and the Indians were downed by a score of 10 to 3. Manny Ortiz, our hard-hitting left fielder, had the misfortune of spraining his wrist when he slid into second base, but we hope Manny will be all right for the tournament games in El Paso which are now in full swing. Carrizozo plays its first game in El Paso today. The boys will meet with tough opposition in the city, but we are confident that they will be equal to the task. O. K., boys, we are 106% for you! In the nightcap, the Indians took revenge on White Oaks and beat them by a one-sided score of 18 to 4. Zack Wheat called the balls and strikes and we're here to tell you that Zack can sure yell them. The East-Siders were idle again. Mrs. Carl Jones will leave in a few days for Sandusky, Ohio, where she will visit her two sisters and three brothers, after which she will go to New York and join Mr. Jones. His work in the big city being finished by that time, they will return and on the way home, they will visit the Century of Progress.

OSCURA NOTES

Mr. and Mrs. Vance Smith returned from a visit to Vance's parents and also to the Century of Progress. Jim Brown was in from his ranch Monday and reports some good rains and fine grass. Marion Hust and family are up at their ranch this week, doing some work on their tank. Tom Burns is helping Samuel Dillard repair his windmill this week. The people of Oscura are still watching and hoping for rain. Most of the ladies of Oscura are putting up fruit this week. Mr. and Mrs. Sam Dillard visited at the Wooten home last Sunday evening. Eagle Nest Items From Jack's Peak Jasper Phillips is back and living on his homestead again. A. E. Parker received a nice rain last Friday and now he is planting beans. Mrs. Aurelia Porter and daughter Helen have returned from Sunray, Texas, and are making their home with Mrs. Porter's parents, Mr. and Mrs. J. A. Morrow. Richard Lewis and his son Red arrived last week to visit Cal Lewis and wife. Mr. Lewis has returned, but Red remained for a month. Mr. and Mrs. George Fitzgibbons, who arrived a few weeks ago from Kingman, Kansas, are spending a few days in Carrizozo. Bobby, noticing a cow with a small calf by the side of the road—"Mother, the cow we buy must have a trailer, too." Mr. and Mrs. J. A. Morrow, Mr. and Mrs. Milt Jones, Mr. and Mrs. Cal Lewis, Mrs. Porter and Helen and Red Lewis made a trip to the Hondo valley Saturday after some fruit. Paul Mullineax was a dinner guest of R. D. Sterling Saturday, while Mesdames Mullineax and Roy Dyer visited Mrs. Brown at Roswell.

Corporal Maurice Lemon

At the West Point Military Academy recently, out of a class of 300, 62 were made corporals, among whom was our home boy, Maurice Lemon. Maurice stands 23rd on the list of 62 and is second in command of his company. In a letter to his parents, Mr. and Mrs. R. E. Lemon, Maurice expresses himself as being well pleased with the academy, likes the service to the extent that he would not trade places with anyone, the President not excepted. He will have a leave-of-absence next summer, at which time he says, New Mexico will look good to him. More power to you, Corporal! Mr. and Mrs. Howard O'Leary of Borger, Texas, visited the G. F. Pruett family last week. They also visited other relatives at Ancho and Pastura. Mr. O'Leary is a nephew of Mr. Pruett. Edward Penfield of Lincoln, is visiting relatives and friends at Tusumcari this week. Mr. and Mrs. A. O. Parker and son Arvel of Jicarilla, were business visitors here on Wednesday.

OUT-OF-THE ORDINARY

West Patterson, N. J.—Chas. "Mickey" Norman, fair, fat and nearly three, is trying to break the habit of a lifetime—smoking. After two years a cigar smoker, "Mickey" hopes—because his parents wish it—to be down to a few puffs a day by his third birthday, July 28. It's not that they think smoking has done "Mickey" any harm. He is healthy, lively and well-behaved. But since the world first heard a year ago that "Mickey" was a smoker, letters of protest have come by the hundred to the Norman home. Then, too, since his first experiments with cigars, "Mickey" has broadened his activities to include pipes and cigarettes. It is the cigarettes that his parents object to. An attempt to keep a hat from blowing out of the rumble seat of a car at Las Cruces one day this week, caused Joseph Levine to lose his life and brought painful injuries to Joseph Latsosky, both of Brooklyn, N. Y. The accident occurred, when on turning a curve, a hat started to blow out of the rumble seat and both men grabbed for it, when the car swerved and turned over. Just think of it! 400,000 pounds of fish left to die in the bottom of Lake McMillan after it was drained to flood surrounding farms in the southern part of the state. Think of the many fishermen who have worked for days and skinned their knees, barked their shins, blistered their necks, cursed, swore, caught one little three-inch baby fish. Come home wringing wet and lie to their wives about how many big ones they gave away and compare all these efforts with 400,000 fish left for fertilizer. It's awful, boys! Sam Dillard heard a commotion in his chicken coop one evening this week at Oscura, and upon investigation, he found a bull snake had swallowed a baby chick. Only the feet of the chick were in view, and Mr. Dillard forced Mr. Snake to release his hold on Chick. The little fellow ran to his mother's side and at present cackles like if nothing had happened. Needless to say, Senor Snake is past tense now. Tom Hicks, who lives in one of the drouth stricken portions of Nebraska, waited for rain until his wells went dry and he hauled water for a distance of 20 miles. There is a big hill on a part of his land where he noticed a damp spot, which attracted his cat's eye and where they had been pawing. Hicks took a chance. Hiring several men, he put them to work at digging. After working several hours, a large stream of pure water spouted out and ran down the hill. Hicks took another chance. He bought pipe, connected it to the stream and ran it to his house and barn. Hicks now has a plentiful supply of water for his stock and household necessities.

J. A. Brubaker of Capitan and Barney Luck of Alto were here Wednesday attending to some business matters and while here, they made this office a friendly call. They were much pleased with the oiling of our streets and paid fitting compliments to our local activity in general. Thanks, boys, we are certainly bragging about it.

PERSONALS

Mr. and Mrs. A. L. Burke and daughter Rosalind were Tularosa visitors last Sunday. Mary Eleanor Allison of Glencoe, niece of our County School Superintendent, Mrs. O. C. Jones, is a guest of her aunt for this week. O. Fred Arthur, former Forest Supervisor of the Lincoln Forest area, but who is now located at the main offices in Albuquerque, being Regional Supervisor for this section of the state, was a caller at this office Tuesday. We are always pleased with a visit from O. Fred, because he is one of the kind, from whom one will gain new ideas concerning not only things of interest to our forest areas, but facts for the good and welfare to our people in general. Mr. and Mrs. O. W. Bamberger, son Billy, Henry Lutz and daughter Belle visited Tularosa, Alamogordo, Mesalero, Ruidoso and Roswell last Sunday. The L. R. U. Bridge Club members entertained their husbands last Friday evening at the home of Mr. and Mrs. Montie Gardenhire. After bridge, refreshments of waffles with whipped cream, tostadas and coffee were served. Pink and white prevailed in tallies and favors. Miss Dorothy Dozier and Zack Wheat substituted for absent members at the bridge game. Mrs. Albert Roberts, brother, Walter McMillan and Mrs. Montie Gardenhire were El Paso visitors Tuesday and Wednesday, returning Wednesday evening. Mr. and Mrs. V. L. Cruse and son Fred were Alamogordo visitors Sunday, returning home in the evening.

BUSINESS MEN'S CLUB

A party of road boosters left here Wednesday morning for Santa Fe, the forerunner of which trip being announced in our last week's issue. Those leaving here were: R. E. Blaney, chairman; Mayor F. H. Johnson, president; Roy Shafer, Frank English, Otho Lowe, Clint Branum, B. Prior, Jimmy Lee, Carrizozo; J. V. Taylor, L. A. Whitaker, Oscura; Messrs. Kirk and Scroggins, Tularosa; A. J. Atkinson, Frank DuBols, Fred Roberts, Corona; Judge Frenger, Las Cruces. The above delegation, members of Highway No. 3, returned in time to give a report to the Carrizozo Business Men's Club Wednesday evening which follows: Dr. R. E. Blaney reported that the delegation met with the highway commission and presented their claims as was outlined in this paper last week. The department gave the delegation the assurance that work on portions of No. 3 which needed attention the most, would be worked on as soon as possible and promised us needed relief on the entire highway in the near future. Attendance at the club dinner and business meeting was 19, including one visitor, Rev. Edgar Johnson, successor to Rev. J. L. Lawson, who expressed his good will toward the club and offered his assistance to the organization and to Carrizozo in general. He closed with a fitting tribute to Rev. Lawson.

Battle Being Waged to Save "Food of the Gods"

Fungal Disease Threatens Cacao Plantations.

Washington.—The fight being waged to save from a destructive plant disease the famous cacao plantations of Trinidad, West Indies, brings into the news an unusual, two-fold industry, says a bulletin from the Botanical Geographic society.

"Not only does the cacao bean supply the producers of candies and sweetmeats with a unique solid ingredient and flavoring, but it furnishes the makings for a hot beverage, surpassed in world importance only by coffee and tea.

"Cacao was a gift to man's palate from the Western hemisphere," continues the bulletin. "Like tobacco, the potato, and a number of other plant products it was taken back to Europe by explorers soon after Columbus opened the road to the New world, and launched on the way that has led to world markets.

Course of Chocolate.

"In trade circles today three terms are used, chocolate and cocoa, and cacao. The tropical tree which is the source of chocolate is called the cacao. In its leathery, cucumber-like fruit are cacao pods which contain cacao beans. But when the beans are roasted and ground and most of the fat is pressed out the remaining brown substance (ground to a dry powder) is cocoa. If the fat is not pressed out, the darker substance is chocolate.

"Credit for the manufacture of chocolate from the cacao seed of an old prehistoric tree belongs to the original inhabitants of the region. In 1519 when Hernandez Cortez landed the country he discovered that the natives were using a drink called 'chocolate' or 'xocolatl' from which have come the name chocolate and cocoa. It is a drink prepared from chocolate were served by the natives when he entertained Cortez.

"Students of American native customs have estimated that the drink was in use 1,000 years before the arrival of Cortez. According to Mexican mythology the seed of the cacao tree was sent to the New world from the garden of Eden into Mexico by Quetzalcoatl, god of air. The tree, it is said, was a favorite food of the gods. The great Puritich both of the seeds obtained the fruit. The first cacao planting in Greek land of the land.

"Cacao was used as a means of barter and payment of tribute by the Aztecs and Mayas. A cacao wealth was often used by the number of cacao beans he possessed. In Mexico a good cacao bean is purchased for 100 beans.

"The highly concentrated food value, low cost of production and successfulness have led to cacao's cultivation to such an extent that now it is grown in practically all tropical countries.

"As an international commodity, the cacao bean has grown to importance to such an extent that the United States alone in 1933 imported 474,000,000 pounds valued at \$18,720,000. The United States is by far the largest cacao consumer, ranking sixteenth in value on our list of imports. Ger-

manny, Great Britain, and the Netherlands follow in the order named.

"For many years the Spaniards of South America and of some of the West Indies monopolized the cacao industry. Chocolate was introduced into Spain by Cortez and his conquistadores about the beginning of the sixteenth century, but the process of chocolate manufacture was kept a secret for almost 300 years. In 1606, an Italian discovered the method of preparation. Shortly afterwards, monks and travelers spread the news throughout Europe. The seventeenth and eighteenth centuries found the popularity of the drink steadily increasing. Cocoa was established in England, as well as on the continent.

"Chocolate, however, was a luxury which only the rich could afford, since it sold for as much as five dollars a pound. Today, good chocolate can be purchased for a few cents a pound, and is consumed in one form or another by millions of people the world over.

"Modern methods of cacao and chocolate manufacture differ little from those used by primitive people centuries ago. In Mexico, the natives roasted the beans and then ground them between two warm flat stones until a

Profile of Christ Is Found on Cliff

Wichita Falls, Ga.—A camera has revealed something on the wall of a cliff which many see as a stone face in which many see resemblance of some painter's conceptions of Christ.

The photograph was taken quite casually with no thought it would show more than the usual panorama of grayish chert and sheer precipice.

The discovery was made by Judge Ernest C. Koutz, of Atlanta and C. N. Crocker, bridge engineer of the Georgia highway department.

"When the negative was developed," Judge Koutz said, "we found something we had not noticed at the time, a well defined profile closely resembling that of the Savior as we have come to know it through the paintings of the world's greatest artists. One can even find a suggestion of the crown of thorns."

fine paste was obtained. This was sometimes mixed with maize (corn) and flavored with vanilla and spices. The paste was molded into forms desired and allowed to cool. Modern preparation of the commodity is more scientific and thorough, but the principal steps taken are much the same."

Sudan Grass Will Provide Pasture

One Acre Supports Three or More Cows Until Frost; Grows Fast.

By Earl Jones, Extension Specialist in Agronomy, Ohio State University.—WNU

Sudan grass, brought to America from Africa, promises to earn a prominent place in agriculture. A dry weather crop, it furnishes pasture grass when the native blue grass succumbs to drought. One acre of the crop will support three or more cows until frost. It is ready for pasturing five to seven weeks after seeding.

Sudan grass can be depended upon for midsummer pasture for sheep and dairy cattle, and seed cost is not large. It provides pasture during the season that blue grass is in its resting period. Early preparation of the seedbed has proved important, and a seeding should not be delayed longer than is necessary.

Only one serious criticism has been offered of sudan grass. It is sometimes difficult to obtain a perfect stand. This fault can be corrected by shallow covering of the seed, by breaking up the soil crusts before germination, and by using good seed. The grass makes a good growth on unproductive soils, and on rich soils attains a height of six or seven feet if allowed to go ungrazed.

Pasturing may be begun at 12 to 15 inches, a height attained usually five to seven weeks after seeding. Pasturing after frost is not recommended. Reports tell of cattle being poisoned by grazing on frosted sudan grass.

In addition to furnishing pasture, the plant also may be harvested for hay when water high. It has about the same feeding value as good timothy, and presents no special curing problems.

The fertilizer treatment recommended consists of 150 to 200 pounds of a 2-12-6 or 4-12-4 on relatively poor soils at seeding time. Later, 75 to 100 pounds an acre of sulfate of ammonia or other nitrogenous fertilizer is recommended for a top dressing, if growth is slow or the pasture is heavily used.

Black Stem Rust of Wheat Is Being Fought in Ohio

Efforts of crews on the payroll of the Public Works Administration have brought Ohio one step closer to its goal of eliminating black stem rust of wheat.

Workers, under the direction of Harry Atwood, state leader in charge of common barberry eradication, destroyed 19,015 of the bushes responsible for the spread of the disease, since August, 1933.

Spores that cause black stem rust are formed on the common barberry, a plant distinct from the Japanese species used in ornamental plantings.

Practically all of the bushes destroyed were plants that had grown from seed scattered by birds that feed on barberry fruits. Such plants are the most difficult to find.

Sheep as Weed Destroyers

Sheep will eradicate most weeds that infest barn lots, hog pens, lanes and other enclosures near farm buildings, notes a correspondent in the Missouri Farmer. Some of the more noxious weeds commonly found in such places that sheep like are dog fennel, smart weed, and jimson. Dog fennel and smart weeds are eaten rapidly by sheep and, although they show less partiality to jimson, they are fond of the seed pod which grows in the fork of the weed. Weeds of this kind are usually difficult to control owing to the fact that cattle and hogs do not consume them and that pens and lots are frequently rough, small, or otherwise inconvenient to mow. A small flock of sheep will, therefore, by consuming such noxious weeds not only save the farmer labor in fighting weeds and prevent their spreading from this source, but turn a worthless growth of plants into valuable wool and mutton.

Hoing the Garden

Gardeners can save both their backs and their plants by not hoeing too deeply, points out A. E. Hutchins, vegetable specialist, University Farm, St. Paul. Deep garden cultivation injures the roots of the crop, he says, and the dust mulch thereby created is of no value in preserving moisture, as many experiments have shown. The primary purpose of garden cultivation is to kill weeds, and this can be done satisfactorily by merely scraping the surface of the soil with a sharp hoe, thus cutting off the weeds. However, it is usually easier to cultivate the surface soil a little during this operation, and such shallow cultivation is advisable on heavy clay soil. This shallow cultivation should be given after each rain to kill weeds as their seeds germinate and to break up the crust formed when the rain dries off.

Handling Chopped Hay

Since chopping of hay is being done more generally farmers need to take into consideration the fact that a ton of chopped hay takes only about 200 cubic feet of mow room while a ton of long or loose hay takes 600 feet. Because many mows are not built to hold the excess weight which is possible when the hay is chopped, care must be taken not to overload mows. There is also a tendency for chopped hay to heat more than long or loose hay unless it is well cared.

Scientists Uncarth King Solomon's Copper Mines

Philadelphia.—Copper mines worked by King Solomon's slaves have been unearthed in the region between the Dead sea and the Red sea by an expedition of American scientists, according to a report submitted to the American School of Oriental Research at the University of Pennsylvania. Ruins of furnaces and buildings, heaps of slag and open veins of copper mark the site of the ancient mines. The period was fixed by Prof. Nelson Glueck, of the Hebrew Union college, Cincinnati, who heads the expedition, through fragments of pottery excavated in the ruins.

Francis Chisholm to "Come Back" to Marion, Ohio

The prairie chicken, native of the western plains, soon may be hunted as game in Ohio. This possibility arises from a test in this area which indicated that the bird can be propagated in this region.

Here Is Miss Frontier 1934

Miss Lois Crane, born on a Wyoming ranch and who has spent most of her life in the open, was selected as the most typical western girl and will represent as Miss Frontier 1934 over the Frontier Days celebration in Cheyenne beginning on July 23.

Egypt Will Develop Its Home Industry

Machines Will Replace Hand Cotton Looms.

London, Egypt, land of the pyramids, has had the nations which are trying to develop home industry.

In many places the old-fashioned hand looms which have been used from time immemorial to weave Egypt's fine cotton into cloth are being replaced by modern machinery.

COPPER GETS DEGREE

Among those receiving the degree of bachelor of arts at the commencement exercises of New York University was Herman Schwartzberg, a policeman in the city police department since 1927.

The object is to enable Egyptians to supply the type of cotton best suited to Egyptian needs.

In spite of comparatively cheap labor, which can be obtained in Egypt, the government has found it necessary to put a tariff on all imported cotton goods.

This is said not to affect British goods, which because of their grade and price are not suited to the Egyptian market. It is aimed primarily at Japanese competition.

The Japanese, it is stated, can produce exactly the grade of cotton material required by Egypt at a price which, despite the expense of transportation, makes it impossible for ever comparatively cheaply produced local cotton to hold its own. Hence the expansion of the local industry.

Enormous progress in the industry is reported. For the moment efforts are being made merely to make Egypt self-sufficient insofar as her cotton good needs are concerned. Eventually it is hoped to be able to export Egyptian-made cotton to Egypt's neighbors, which are great cotton users.

Palestine, Iraq and Arabia are situated geographically so as to make it more to their advantage economically speaking to buy Egyptian cotton if available. Apart from the fact that the Egyptian cotton has a reputation for unequalled fineness, it is considered that Egyptians are better able to produce the type of goods required by their neighbors than other nations.

Ducks Take Over Hen House

Bluestone Junction, Va.—Two wild ducks have taken charge of the hen house of W. C. Schwugg here and are laying in a hen's nest.

"Irish Sweeps" Easily Greatest of Lotteries

De Valera's controversies with England may be fatal for Ireland, but interest in them is nothing compared with the great national lottery, the Irish hospital sweepstakes. Such is the contention of John J. McCarthy in an article, "The Irish Sweeps," in Harper's Magazine.

"From the standpoint of national prestige," declares the author, "the Sweeps today overshadow politics and Guinness for generations the major industries of Ireland. Every man of substance—as the Irish dub their smart business man—is usually a commissioned Sweeps agent on the side. Every Irishman, rich and poor alike, is a self-appointed, voluntary Sweeps agent, forwarding ticket books to kin overseas and following through on the collections.

"No other lottery can boast of any such voluntary and inexpensive world-wide sales service. It may explain, too, why the Irish Sweeps in the short span of four years have completely eclipsed, so far as the sale of tickets is concerned, the famous Calcutta sweepstakes, the Canadian War Veterans, and other privately conducted lotteries. Even compared to the governmental lotteries in France and Russia, the Irish Sweeps ticket sales are greater."

Arizona "Canaries" Back : An old saying runs that the mole conquered the great Southwest. Mules were the motors that hauled in the granite schooners. Burros bore the prospectors into the mountains and then packed the gold out again. The Arizona canary is being brought back to discover new veins of gold.—Los Angeles Times.

OLD MAN TO BLAME

"So that young couple are at odds so soon. What's the trouble?" "When he married, his father stopped his allowance. Now he talks of suing the old man for alienating his wife's affections."

National Topics Interpreted
by William Bruckart

Washington.—Congress took a formal adjournment a few weeks ago, but I found in roaming about the Capitol and senate and house office buildings the other day, that there are no less than eleven of its committees continuing in session, and that no less than eleven of them are conducting investigations. It is true that only a few members of each of the committees remain in attendance—the others are out campaigning for re-election—but, even so, it appears there is going to be an extraordinary amount of searching after truth, or muddling, through the heat of the summer and the cool of the autumn.

Tax Inquiry Significant

While I am not infallible in my judgment and conclusions, I must confess that I can see a valid reason for only one, just a single one, of those eleven investigations. The ways and means committee of the house has started out to do some surveying of the federal taxation structure, and everywhere I have asked I have found approval of the idea. There can be no doubt of a need for that survey, provided the politicians will accept the results of those who examined the facts, because the American taxation system, both national and state, surely is of the hit-or-miss type.

But there is another significance to the tax inquiry. I reported to you recently that it was going to cost taxpayers a total of almost \$1,150,000,000 a year in interest on the public debt of the national government when that debt reaches the \$31,000,000,000 which President Roosevelt has announced it will reach. Since that information was given you, further inquiries convince me the debt easily may reach \$35,000,000,000 by the winter of 1935-36, and the interest alone will be correspondingly more. This is just the interest, mind you, and makes no provision for retirement of any of the debt, which would have to take extra tax dollars.

Since the national debt is so high, and going higher and the house ways and means committee is making such an intensive study of the tax system, one can not fail to link the two together. The obvious question is: Is the administration becoming concerned over the sources of funds to pay the huge total of debt incurred in spending our way out of the depression?

Concurrently with the house committee's study, Secretary Morgenthau of the treasury, announced the appointment of another brain-trust group to study tax questions for him. Mr. Morgenthau holds that our tax system is full of holes, which undoubtedly it is, and he feels that the general method should be revamped so that the flow of revenue will not be so dependent upon prosperous economic conditions. To that end, the secretary sent part of the number of professors and tax experts selected by him over to England for a study of British taxation methods. British taxes apparently are much higher than ours, and Mr. Morgenthau is desirous of finding out how the British government gets away with it.

So, one hears around Washington a great deal of discussion of what the future holds in the way of tax levies upon the rank and file. Mr. Roosevelt said in his latest radio speech to the country, it will be remembered, that relief was his first consideration, that vast sums had been expended for relief and that further vast sums will be expended. All of which leads back to the observation I made above, namely, that one cannot help linking these several studies together with an undercurrent of fear that, perhaps, we are spending too much money.

While discussing the tax investigation, however, it would be unfair to omit reference to one feature of the house committee investigation that I am told by real tax authorities, can be of much value. The house committee was instructed to look into the double taxation evil that besets the country. It is known to everyone, of course, that there are places and things upon which the federal government levies high taxes and that these taxes fall on top of similar, and sometimes greater, levies by the states. Consequently, the committee inquiry may bring to light how often, and where, this sort of thing is happening.

Double Taxation Evil

For example of double taxation, two or three common illustrations will serve to indicate how severely the burden obtains. Take the tax on gasoline as one. The federal government laid a tax on gasoline two years ago, and that tax although it was small had to be paid by users of "gas" in addition to the state levies which run as high in some states as 7 or 8 cents a gallon, making the tax borne by that commodity aggregate as much as 10 or 11 cents a gallon in some places. The tax on cigarettes is another example, but this commodity was taxed first by the federal government and then the states put their levies on. The result is that in many states the tax on cigarettes amounts to more than the selling price of the package would be if no tax were laid.

Twenty-nine states now collect taxes on incomes of individuals or corporations, and twenty-six of them collect a tax from both. These taxes, of course, are added to the high rates

imposed by congress under federal income tax laws.

These matters naturally constitute subjects for serious investigation. It is the only way by which congress can inform itself and determine a policy. Such, however, unfortunately cannot be said about most of the other investigations that are running through the summer and fall. There is the so-called munitions investigation. Thus far, my searches have yielded little information showing that this investigation can produce anything constructive. It, and several of the other investigations, in my opinion, amount to little more than fishing expeditions, a hope that something will be uncovered so that some members of congress can be "amazed" or duly "dumbfounded" by business practices of firms that have been in business half a century or more. I guess the senators and representatives have to have something to be "amazed" about every so often, but it does occur to me that if congress really wants to economize, it could limit its investigations which roughly will cost close to half a million dollars this summer and fall.

Policies of the last several administrations in Washington have presented many puzzling things.

U. S., Greatest Landlord

For example, the Farm Credit Administration—the FCA of the alphabetical soup—released a statement to the press the other day to the effect that the twelve federal land banks now own outright 22,078 farms and almost own thousands of others on which the loans are in virtual default. I think it can be said, therefore, that Uncle Sam has become the greatest landlord in the world.

While the information is more or less startling that the federal government, through one of its multifarious agencies, now owns so much farm land, the fact gives only an inkling of what has happened in others of the various agencies through which it acts. As I said, one can hardly help inquiring where it all will end. I make no attempt to controvert the policy of federal loans on farm lands or homes; I only can pause and wonder what the future holds if the course is continued.

The farm loan banks have a total of \$82,939,000 tied up in those farms which they hold. The only way that money can be withdrawn is by sale of the lands. If they are sold, the chances are new mortgages in varying amounts will have to be placed on them because most buyers are not in a position to pay the whole sum in cash. Some of them again will default, and the government agency again will own the land. All of which is by way of saying that the idealist who walls and gnashes his teeth about the terrible brute who forecloses has not yet solved the problem of saving homes that were bought on a margin of cash that was too narrow, or a home that was bought by an individual who ran into hard luck.

The point of it is that the federal government is dabbling into everything. It is going beyond what government ought to do.

Astounding Picture

When one examines the whole picture respecting government and its scope these days, it is rather astounding. For instance, the Reconstruction Finance corporation announced the other day that it was willing to help the Baltimore & Ohio railroad refinance its maturing bonds. I do not know what the outcome will be, but it seems to me that refinancing of a railroad by use of government credit is hardly a function of government.

The Reconstruction Finance corporation is making loans continually. It has loaned money to, or has bought stock in nearly 4,500 banks. Proponents of this policy contend soundly enough that unless those loans had been made, the banks which obtained them would have gone on the rocks and the depositors would have suffered. But I am still wondering if it is the proper function of government to protect private activities to the extent of guaranteeing out of the public funds that I shall get my money back on any old investment or what not into which I have put it. Some way, I am inclined to feel that government, as such, ought not be dabbling into things where it is required to insure that people will not be foolish or crooked.

And there are going to be more loans made. The last congress enacted a law providing for loans to industry, the so-called small industries loan legislation. It was called. Business leaders and bankers tell me that the government is going to find itself owing a lot of business wrecks through those loans. The bankers say that if a business has a chance to survive, which means it can pay expenses, it can get money at ordinary banking houses. If the government is going to make loans only to those unable to get bank loans, the conviction I hear most often expressed is that the government had better set up another agency from which it can send supervisors or general managers all over the country to run the property it eventually will own.

New Ideas Expected to Aid Weather Prophets

Air mass analysis, methods, for which have been developed largely during the last decade, is rapidly assuming an important place in forecasting the weather. Greater detail in observational material than is ordinarily available is necessary for such forecasting.

The air-mass analysis method of forecasting calls for the study of two or more conflicting masses of air, usually of widely different origin, and consequently of different characteristics as to temperature and moisture, which come together along what is called a line of discontinuity, a polar front, or a wind shift.

Air over polar regions, of course, is much colder than that over tropical regions. The transition, however, is neither gradual nor regular. Instead, large masses of air in one or the other region become supercooled or superheated. These masses develop into "surges," or "bulges," that meet along an irregular line. Because they differ structurally in temperature and moisture, and therefore density, the masses do not mix in an orderly fashion but tend to preserve their own identities. This results in a battle for supremacy, which forms the ever-changing drama that is our weather.

The air from the polar regions is cold, dry, heavy, and relatively cloudless. That from the tropical regions is warm, moist, relatively light, and cloudy. At the line where they meet, the advancing tropical air, being warm, moist, and therefore lighter, is forced to ascend and flow northward over the wedge of cold air at the surface. This is called the "warm front." The air as it rises is cooled by expansion, and the moisture in it is condensed into clouds from which rain or snow may fall. The amount and duration of this precipitation depend on several factors, including: wind direction, amount of moisture,

slope of air wedges, and rapidity of warm air ascent.

Along the "cold front" the advancing polar, or cold, air forms a wedge or thrust under the warm air, and the precipitation is usually, usually, however, covering only a comparatively small area.

Accompanying these precipitations are marked and sudden changes in temperature and wind, followed by a more or less steady state until the next meeting of conflicting air masses, when the drama is re-enacted.

Now Conquering Auto Ousts the Elephant

How modern transportation is advancing into every part of the world, says Popular Mechanics Magazine, is demonstrated in Ceylon, where the automobile is challenging the elephant. Ceylon's known history begins with the Sixth century before Christ. It is a large island lying 55 miles southeast of the extreme southern point of India in the Indian ocean.

The native inhabitants of Ceylon are the Singalese, who are Buddhists, a gentle and peaceable people. The men have the custom of dressing somewhat like women. There are 600 miles of railroad and excellent automobile roads. Several thousands of elephants roam wild through the island's forests, large numbers being tamed for duties as beasts of burden.

For centuries the elephant has been the principal means of travel in the island, but the introduction of the automobile, the truck, and the filling station, that necessary aid to modern travel, is fast relegating the elephant to a secondary place. Many elephants are still in service, of course, and the great beasts may be seen daily passing gasoline stations located on motor roads.

Qualities That Make Up Success

Many Seem to Achieve It Without Apparent Effort.

Alva Johnston, the world-famous reporter, in writing about the great scientist, Einstein, has this to say: "Einstein's position as first scientist of the world brings him a vast fan mail. And his manner of handling his correspondence illustrates his Olympian quality. All mortals are of the same size to the great scientist. His courtesy is not proportioned to the distinction of the individual. He throws away letters that do not interest him, whether they come from big men or little. But when he received a can of tobacco from an unemployed laborer, he wrote his thank-you note in a verse. He has penned pretty rhymes for children named in his honor, and is tender to crackpots."

Reflecting on this statement, a writer comes to these conclusions: "A man who read that turned to me and said, 'Well, that's the reward of success—to be able to do as you like. A genius can afford to disregard who people are.'"

"I wondered—if that is the reward of being great, or if it is a part of greatness; if sincerity is the privilege of success, or if it is not rather one of the qualities that go to make up success."

"It seems to me that man or woman who is absorbed in an occupation for the love of it, whose aspiration is discovery, accomplishment, rather than getting somewhere, that such a man or woman can always afford sincerity. Those whose satisfaction is in doing, whose expectations are in doing rather than in any benefits they may derive from others, can afford to ignore who persons are in favor of what people are."

"And so often, so very often, we find these people in the coveted

places, elevated, sought after, that it would almost seem the way to get somewhere is not to care about getting anywhere. Take the case of the great scientist, the world's most famous airman—and countless others who become famous in spite of themselves. They seem to have 'got' somewhere by not trying!"

Private Postal System in Germany Long Ago

The first postage stamps for what is now the republic of Germany were those of the house of Thurn and Taxis, a noble family which had operated a postal system for almost 900 years. Early in the Sixteenth century this post reached from the Netherlands through Germany and Austria to Italy, but during a war in the Netherlands had fallen into disuse.

After this war when the counts of Thurn and Taxis again attempted to set up the monopoly, several of the German states which had meanwhile organized postal systems refused to recognize the grand hereditary postmaster. This was the condition of affairs when stamps were put in use to prepay mail matter.

The Thurn and Taxis post office joined the Austro-German Postal union in 1851, and, conforming to the rules of that body, issued stamps. The German states not served by Thurn and Taxis had, generally speaking, issued stamps prior to that time. There were many systems of coinage in use in the various states using the Thurn and Taxis post and it was necessary to group the states in two bodies termed the northern district and the southern district with a series of stamps for each.

Or Something Like That

If Adam had saved up five cents and had put it out to interest at 6 per cent compounded quarterly, the money now would be enough to buy up all the property in the world—unless the bank closed up on him and they told him that the interest had eaten up the principal.

Every Conceivable Force WORKED TO TEAR THESE TIRES TO PIECES

But NOT ONE CORD LOOSENED! NOT ONE TREAD SEPARATED! Not one Blowout!

AS thirty-three speed demons careened and slid around the steep banked curves of the hot brick track, tires shrieked and smoked... break-neck speeds, 150 miles and more down the straightaway—tremendous centrifugal force tugging to rip the tread from the body of the tire. In fact, every conceivable force worked to tear the tire to pieces, but not one cord loosened—not one tread separated—and not a single blowout. What amazing proof of Tire Strength—Safety—Quality and Dependability!

Every one of the thirty-three drivers at the Indianapolis 500-mile sweepstakes chose and bought Firestone High Speed Tires. The fact that not one of the 132 tires failed is your greatest guarantee of the Extra Safety—Strength—and Dependability built into Firestone Tires.

The New Firestone High Speed Tire for 1934 is Safety-Protected on the outside by a wider tread of flatter contour, deeper non-skid, more and tougher rubber, giving you more than 50% longer non-skid mileage—Safety-Protected on the inside by eight additional pounds of pure rubber absorbed by every 100 pounds of cords. This additional rubber surrounds every cotton fiber inside every cord in every ply. This is accomplished by the Firestone patented process of Gum-Dipping.

Greatest Guarantee of All
Get the protection of the Firestone Triple Guarantee — for unequalled performance records — for life against all defects — for twelve months against all road hazards.

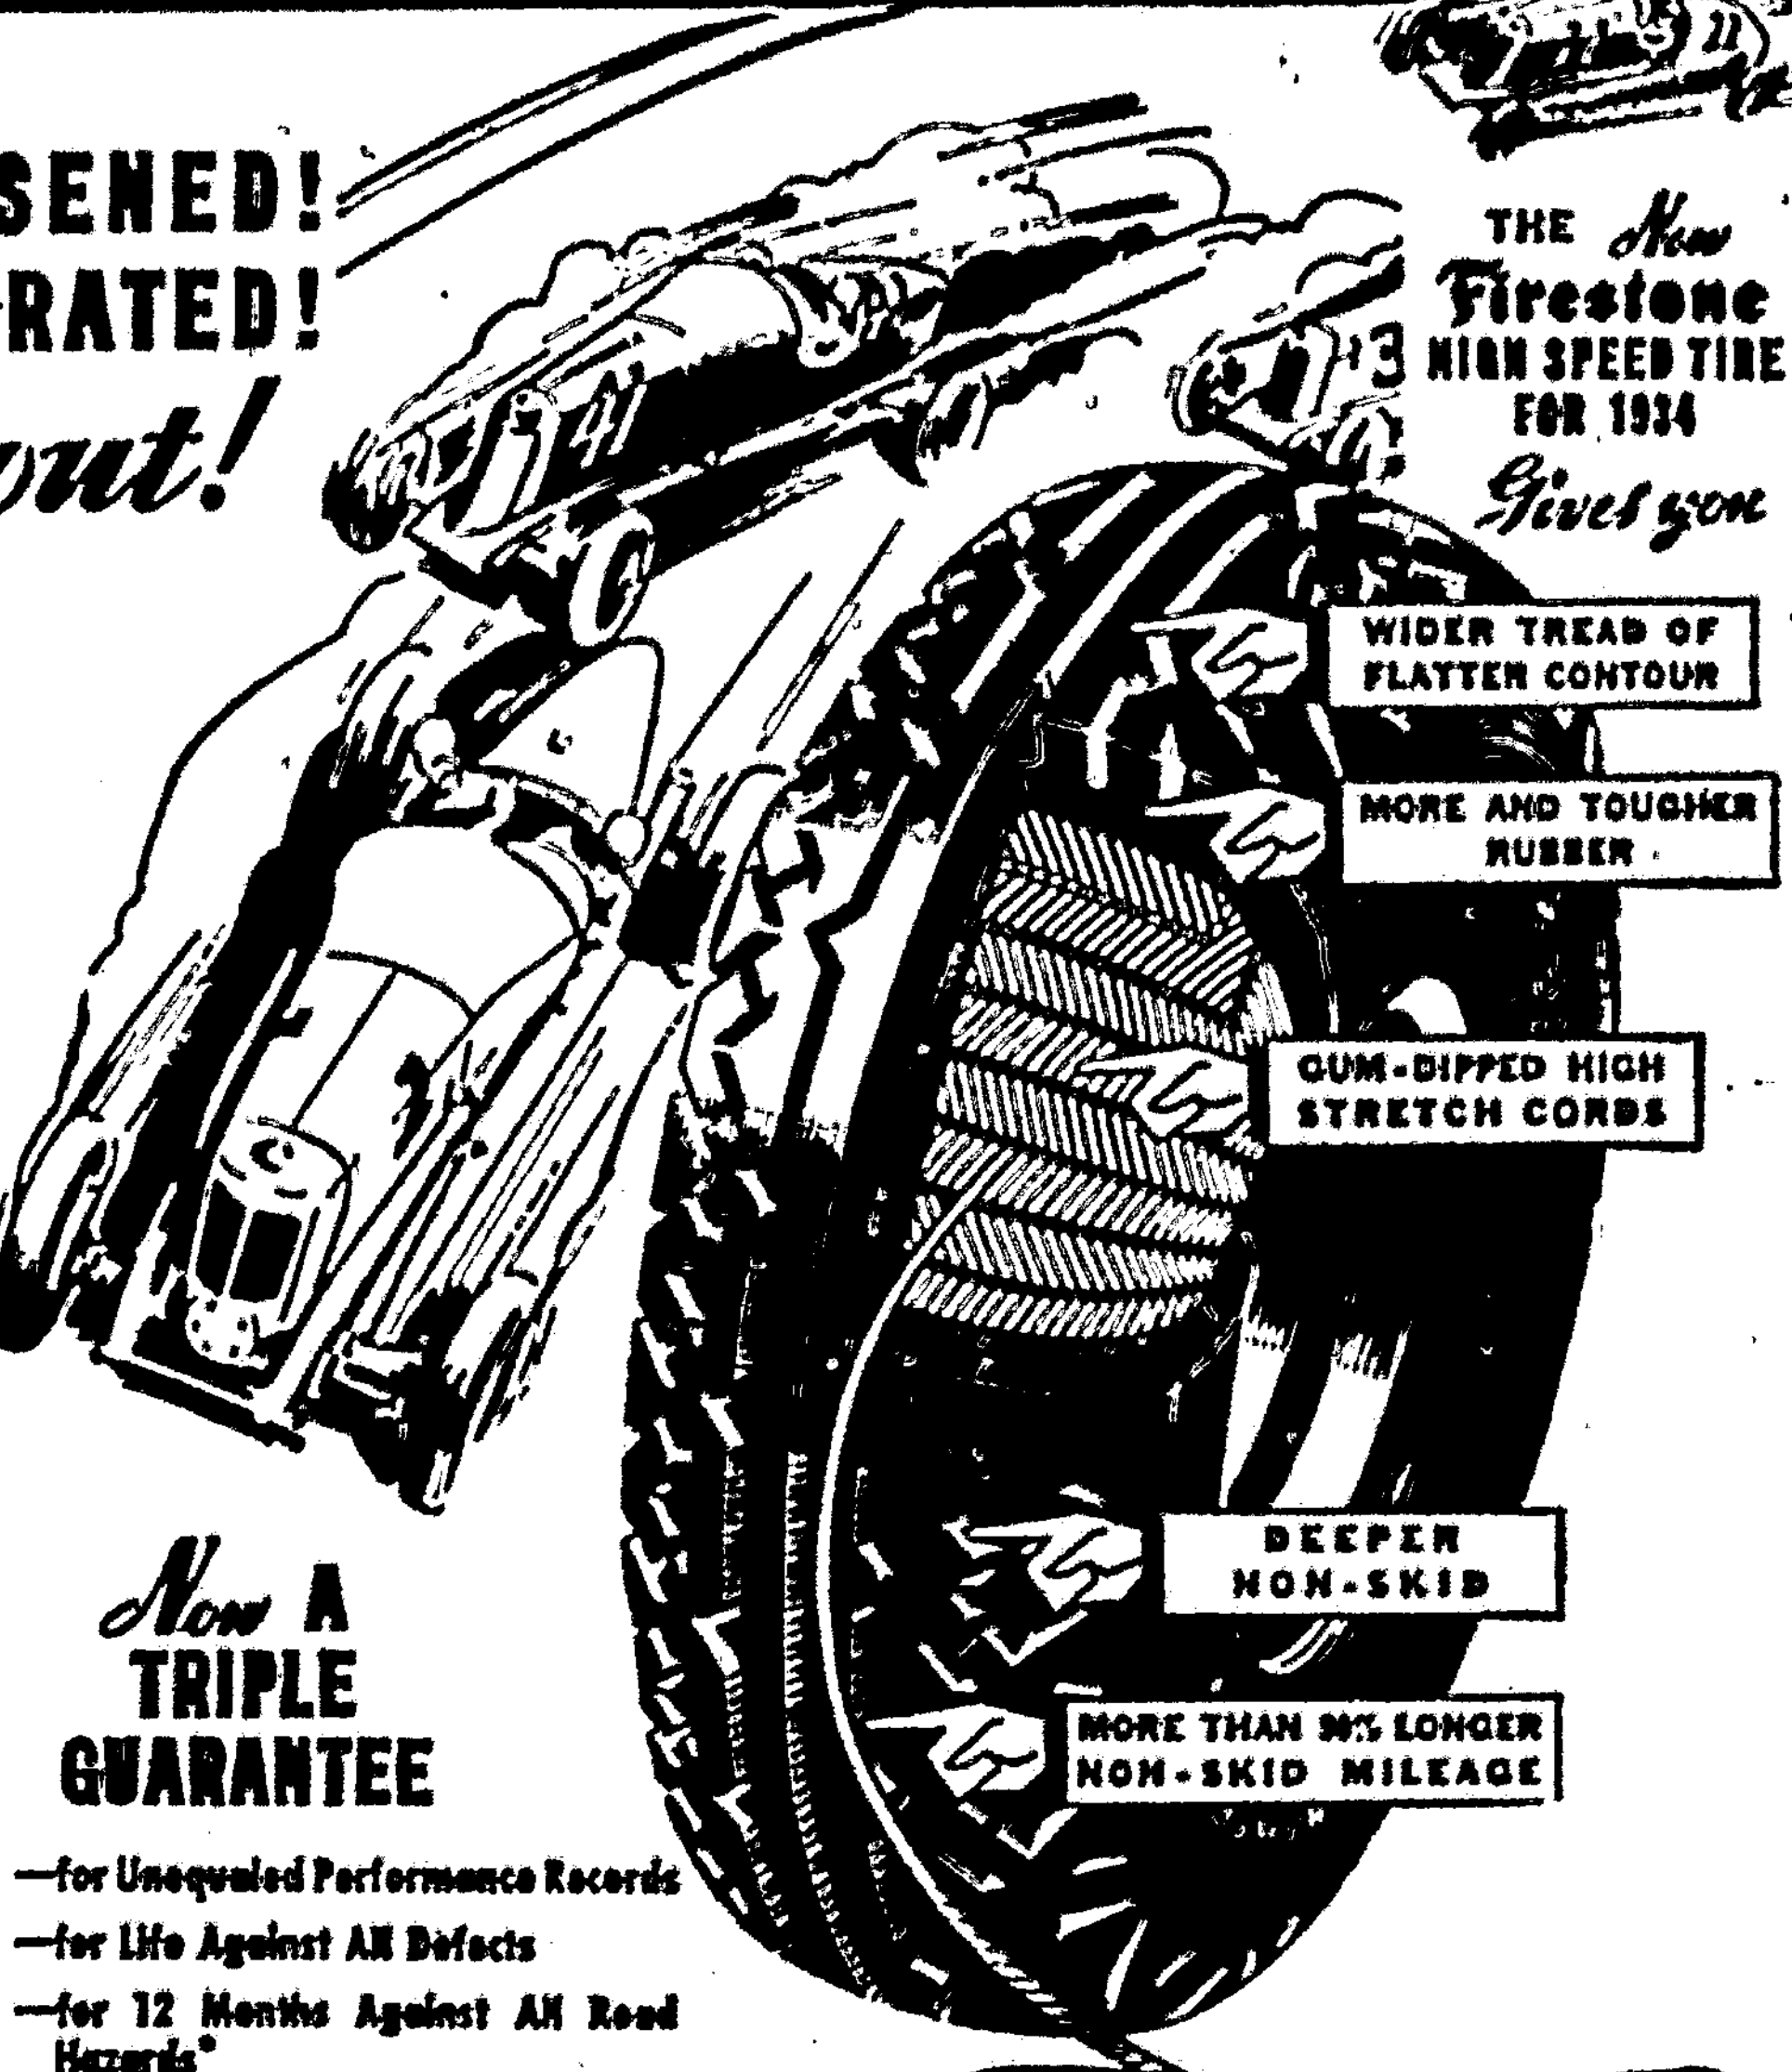

Call on the nearest Firestone Service Dealer or Service Store today and equip your car with the new Firestone High Speed Tires for 1934.

NEW MEXICO PRESS ASSOCIATION
MEMBER 1934

EDITORIAL COLUMN

General Johnson is now convinced, so he says, that in framing the Graphic Arts Code, the wishes of the newspaper men to allow freedom of the press was carried out. But it must be remembered that the president himself, tried to take a fall out of the press, following the blast given out by the General, both of whom uttered ill-tempered and derisive statements against the newspaper men and in favor of throttling the freedom of the press which the profession has enjoyed since the foundation of this Republic. The newspaper men will remember these boquets when influence is thrown to the reading public in the next campaign.

We are always thankful when we are enlightened on anything of public importance. At the recent Democratic executive committee meeting, one of the delegates arose and said: "Ladies and gentlemen. In the great state of New Mexico, there is no north, south, east or west. It is all one state. Now, this should be the means of settling almost any argument you might think of. He also said that he was a Democrat and we would ask for no further evidence after so great a statement as the above was given to the meeting. Wonderful! Wonderful!

At a recent meeting of the Democratic executive committee at Santa Fe, they had to furnish Charley Gilbert of Roswell with an extra-sized cuspidor when he insisted on good Republicans like Dr. Kent of the Agricultural College be thrown out to give place to ward-heeling Democrats regardless of their knowledge of anything except sand-bagging politics. Charley always mixes great big tears and lots of tobacco juice with his appeals for party harmony.

Wonder how Denny and Dave explained to Postmaster General Farley, why the north south-east-west Democratic central committee turned down Senator Bronson Cutting? Boats, saddles and long live the wonderful spoils system!

Postmaster General Farley extended his courtesies to Senator Bronson Cutting in a fitting compliment to that gentleman's achievements. In that, he did what the state Democratic committee failed to do to a deserving statesman. Of course, we understand that to have recognized in any measure, the career of the senator in the good and welfare of the state, would have been to put dimmers on the present Congressman, who is seeking the Senator's place on the long-senate term.

ZANE GREY

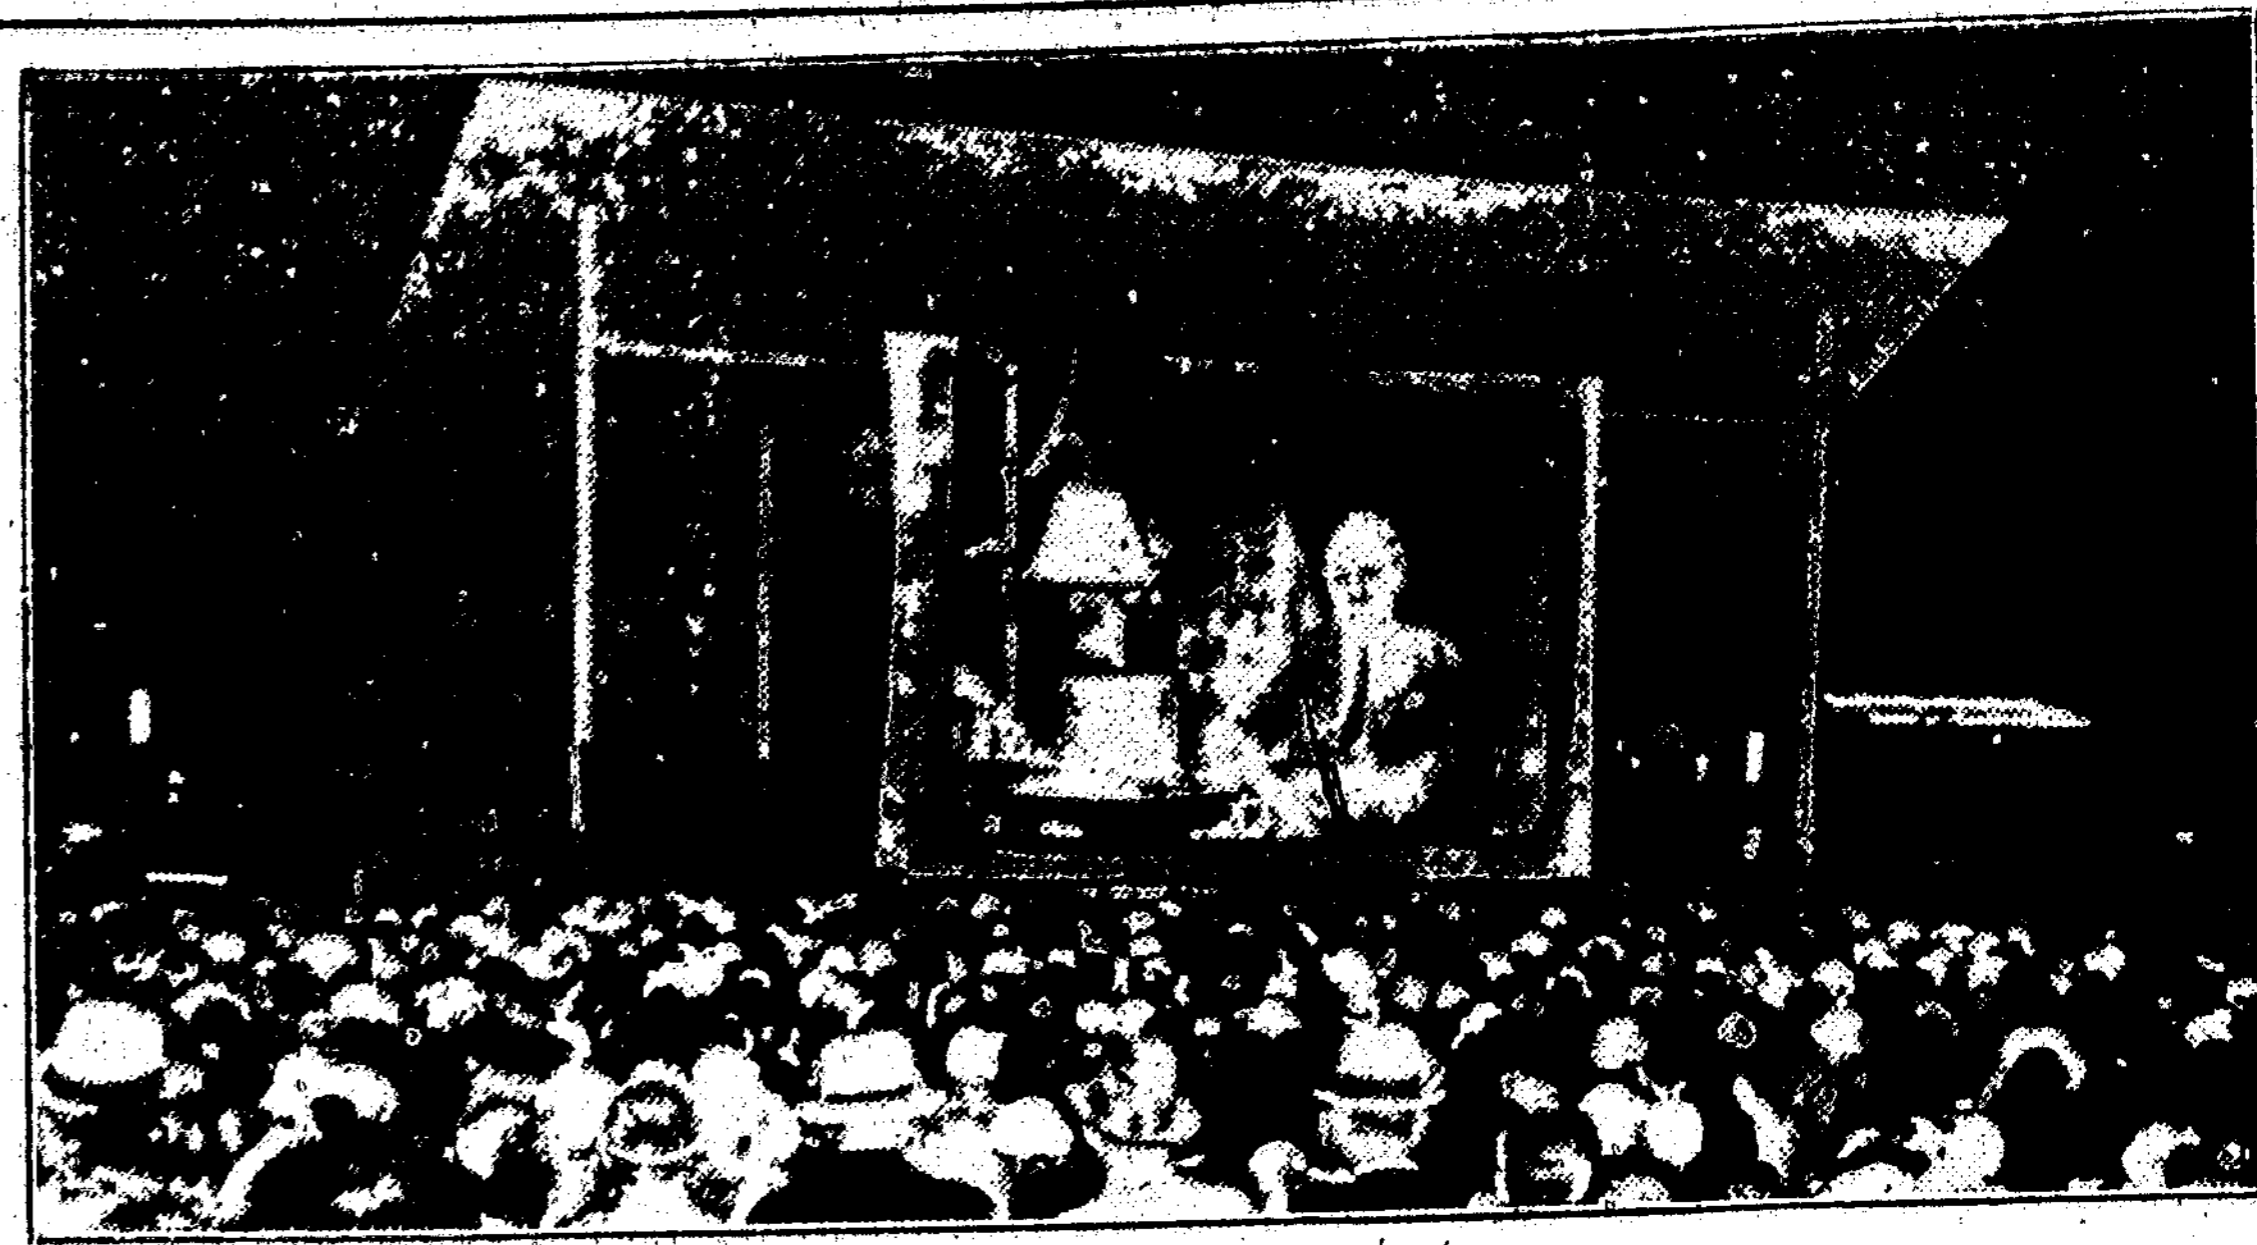

THE immense popularity of the author of "Robbers' Roost," which is to be published serially in this paper, may be attributed partly to the fact that he writes something more than the conventional Western tales. Zane Grey has a more intimate knowledge of the real West than many other authors who write of the land of great open spaces because for many years he has lived the life of which he writes.

Though he was born in Zanesville, Ohio, and spent the early years of his life in the East, practicing dentistry in New York for a time after graduating from the University of Pennsylvania, the urge for a more active outdoor life caused him to abandon his profession and seek a home in the West. For many years he has lived in Arizona.

Mr. Grey began his literary career in 1904, with the publication of a historical novel entitled "Dotty Zane." Since then he has written more than twenty books which have given him world-wide fame as an author of Western and outdoor tales.

It is something of an occasion when a newspaper obtains a Zane Grey story for serial publication and we take pride in offering "Robbers' Roost" to our readers. Do not fail to read it.

Thousands See President Light New World's Fair

Through the medium of a motion picture shown at the Lagoon theater, President Roosevelt turned on the lights of the new World Fair in Chicago for a record opening day crowd to see May 26. Visitors, who thronged in great numbers to the fifteen foreign villages that feature the exposition this summer, were surprised when they found that the Fair was complete in every detail and ready to receive them.

SUCH IS LIFE—Call Out the Militia!

By Charles Sughroe

NEW HEALTH FOOD

The newest health food is seaweed. What's more, it comes across the ocean with a reputation for delicate flavor. A company was recently formed in Swansea, South Wales, to conduct this novel industry. The seaweed used, which is of a special type, is locally known as laverbread. It is gathered off the rocks between tide marks on the coast of South Wales and Cornwall. Purple in color and turning dark green or olive when boiled, it is rich in calcium and iodine, possessing also a percentage of chlorophyll. It is served as a vegetable with lemon juice or vinegar, butter and pepper.

"Great White Way" to Stage Comeback

New York's Famous Playground to Be Restored.

New York.—Broadway and Forty-second street are going to attempt a joint comeback. With their backs against the billboards, so to speak, the dwindling remnant of respectable business men still entrenched along the so-called "bright light" stretches of the two famed thoroughfares have joined forces for a last despairing effort to clean up the district and, if possible, restore it to some semblance of its former glory. They propose to drive out, or, at least, to thin out, the hordes of sidewalk peddlers, fakirs and barkers that have invaded the section from Coney Island, the lower East side and other rag tag ends of the universe during the last few years. They are going to try to discourage by one means and another the numerous "sacrifice sale" shops and other Cheap John stores that have sprung up about them like a growth of rank weeds. They will fight to cut down the acreage of the endless expanse of gaudy signs and shrieking billboards that greet the eye from every other lineal foot of wall and skyline space between Thirty-third and Fifty-ninth streets on Broadway and almost from river to river on Forty-second street. They are out, in short, to try to make the district once more respectable. At any rate they believe that when the drive is over it will be possible to tell a given stretch of the two streets from

either Coney Island or the East side with the naked eye. Drive on Signboards. Preliminary plans for the drive are being mapped out by the Forty-second Street Property Owners' and Merchants' association, headed by Julius G. Kugelmann, president of the Mill Factors' corporation and the Broadway association. One of the first moves of the campaign, according to Mr. Kugelmann, will be directed against signs "which detract from the attractiveness of the streets." The Forty-second street association believes that no sign should extend more than one foot beyond the building line, and it will fight to make its views prevail not only in the altering of present signs which violate this proposed restriction but in the erection of future electrical or metallic signs. Recently, leading officials of the association undertook a survey of the "sign situation" in the Forty-second street section, and as a result of "representations" made to offending merchants some 50 of the most blatant signs have been eliminated—either torn down or "abducted," according to Edward W. Forrest, executive vice president of the association and field marshal of the campaign. Objectionable Dance Halls Close. Two objectionable dance halls have also been persuaded to close their doors, according to the same authority. There are plenty of these "halls" left, particularly along Forty-second street from Fifth avenue west, however, and the association proposes to train some of its heaviest fire upon them in the near future. Within the last year or so some of these "dime-a-dance" places have been crowding "right up to Broadway" on the busy cross street. Mr. Forrest reported progress in the effort to eliminate peddlers and other solicitors on the street and told of the moves made to get the co-operation of magistrates in this work. One man, known as a "king of the razor-blade peddlers," has moved "at least temporarily" to another part of Manhattan after having been fined three times, he announced. Leaders of the "clean-up" campaign make no attempt to disguise the fact that their chief motive is to build up trade to something like the status it enjoyed before the section began to fall into such disrepute.

Youngest Proxy

Dr. Gordon Keith Chalmers, the new president of Rockford college in Rockford, Ill., is the youngest college head in the country, being only thirty years of age. He and his wife, Roberta Teate Swartz Chalmers, a noted writer, have both been members of the English department at Mt. Holyoke college.

Brazilian Bandit Slain After Years of Defiance

Pernambuco, Brazil.—Bandit Lampaco was reported to have been killed by soldiers who had been seeking him for years. His real name was Virgilio Ferreira da Silva. Son of a proud family, he was impelled to outlawry after his sweetheart and his father were killed in a feud resulting from a disagreement with the fiancee's family.

OUR EDUCATED YOUTH

By LEONARD A. BARRETT

Thousands of young people annually are graduated from our universities and colleges. Many of these receive advanced degrees which indicate they have been prepared for specialized lines of activity. The professional schools also have turned out a large number of doctors, engineers, dentists, and many others intent upon different professional careers. It is always a thrilling experience to witness a large group of young people receiving the degree for which they labored from four to six years, and in some cases, even longer. We do not forget the sacrificial devotion of parents who made this opportunity possible for their children. In some cases young people have themselves worked their way through college. They perhaps appreciate their education more than those for whom plenty of money was furnished through the college course. When we work for

Max the Champion

Max Baer of California, the new world's heavyweight champion, is here seen in fighting pose. He won the title by defeating Primo Carnera in a furious battle on Long Island.

something we want, we appreciate it more than if it is given to us without any effort on our part. The question arises, however, what of the future? What will become of all these young people with their diplomas justly earned? Will they find some work to do in their chosen field of activity? Will all the doctors and engineers find jobs waiting for them? A review of the condition of our economic life during the past few years readily convinces us that such is not the case. In one of our large cities, where the CWA was active in furnishing work for the unemployed, could be found men who held degrees from colleges, and in some instances, advanced degrees from foreign universities. A diploma from an accredited college does not guarantee a position. Preparation for a career is one thing, the realization of one's ideals in that career is quite another thing. Many other requisites are essential to success besides a college degree. Doubtless one of the most valuable experiences one learns in college is adaptability and perseverance without which no success is possible. The greatest lesson one learns in college is: how to work; how to adapt one's self to unusual and discouraging environments. The cultural advantage of a college education is most valuable, providing it prepares the student to meet the real issues in life. "Wisdom is the principal thing, therefore get wisdom," said the wise man of long ago. © by Western Newspaper Union.

Keeper Kells Wolves Buenos Aires.—Three circus wolves howled all night here when they couldn't keep a human from their door. Neighbors complained, and police found the keeper, Max Kellman, had received no wages for six months and had stolen the wolves' rations.

The Household

By Lydia Le Baron Walker

IN SUMMERTIME white gloves are popular. This season they come in endless variety, sometimes all white, sometimes combined with color, sometimes with textile ruffs, sometimes in fancy weaves. The openwork weaves which have been out of style so many years have a pronounced vogue this year, which was hinted at a little last season.

In order to have white gloves look right they must be kept of pristine whiteness. If the wearer wants to look well-groomed, she has to keep this in mind. And so the correct way of washing gloves should be remembered, and after each wearing, the pair must be laundered. Fortunately it takes but a moment or two to do the work. If the gloves are of regulation weave, no ironing is required. Gloves should be washed on the hands in lukewarm light soda. Wash them as you would the hands. Take a nail brush with bristles not too stiff, and brush the finger-tips and any parts which are particularly soiled. When clean, remove from the hands and rinse in clear water. Pull the gloves lengthwise, keeping each finger smooth and straight. They will dry quickest if wrung out in a turkish towel. Then put on glove forms, or hang in an air current to dry. If the gloves are silk do not hang in the sun, lest they get yellowed.

Fancy Gloves. Fabric gloves which have a color combined with the white, should have a little salt added to the first wash water. When wrung out be careful not to have the color pressed against the white. Dry as quickly as possible. Beware of ironing to hurry the evaporation of the water. Color will run under steam when it will not crock otherwise. Gloves with plique, organdy, or other textile cuffs, require the cuffs to be ironed. Pique will keep sufficiently stiff without the addition of starch to the rinsing water. Iron cuffs while still damp, and they will not only look their best, but will keep their crispness longer. Be cautious about keeping the rinsing starch water from the glove itself. Put a thin cloth over the cuffs when ironing those which have been starched. Cold starching calls for ironing before the article or starched part gets dry. The heat steams the starch and makes it adhesive.

Dark and White Gloves. When dark gloves with white organdy or other textile cuffs are washed, the cuffs may be laundered without the glove. If there is danger of crocking, run a folded turkish or other towel up through the wrist opening and scrub the white cuff over the towel. Be careful not to let the colored part get wet lest it run. The towel will absorb enough water to aid this if the work is done deftly. © Bell Syndicate.—WNU Service.

Marathon Reader Arrives at "Logic"

Paris.—A bizarre instance of patience and persistence is reported by the American Library of Paris which was established in 1917 for the A. E. F., but now functions for the English-language colonies of a nameless American who evidently has taken a solemn vow to read through the Encyclopaedia Britannica, letter by letter. When last noted, he had arrived at "Logic." When he started nobody can tell but three years ago one of the librarians noticed that he had arrived at "Egypt." Since then, without his knowing it, his progress is being checked by the librarians every week. When he reaches "Zulu" the librarians hope he will start another long-distance reading contest, for his marathon across the Britannica has brought them many extra hours of interesting amusement.

Champion Fiddler Balks at Modern Jazz Music

Macon, Mo.—Henry Taylor, sixty-nine-year-old champion old-time fiddler of Missouri, with a silver lining cup to prove it, will not play jazz. When he used to furnish music for country-side affairs they were old-fashioned square dances and the like. One night he was asked to play for a jazz dance. He didn't know exactly what it was, but he went in and tuned up. Then he saw that "jazz dance was hugging set to music" and he walked out. "I'll never play for an affair to which I can't take my wife and daughters," said the veteran fiddler, "and I sure wouldn't take 'em to a place like that."

Two Women Judges in One Court

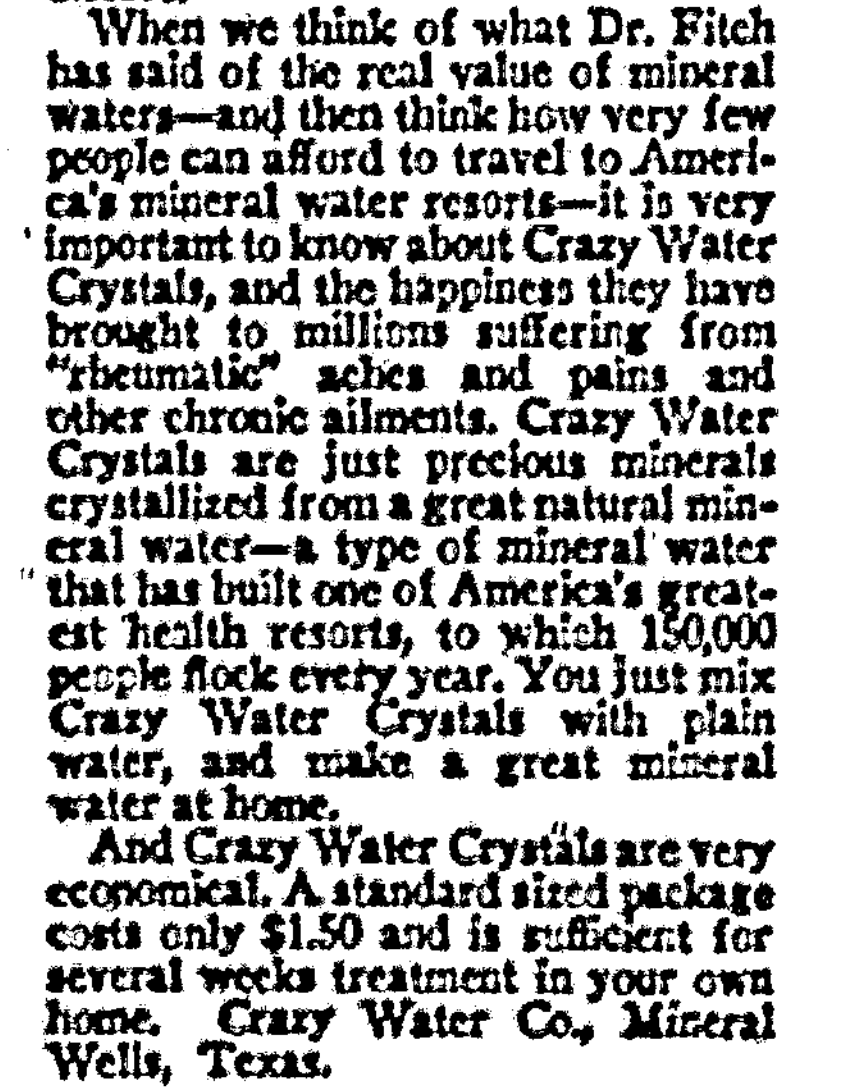

The Allegheny County court in Pennsylvania is the only one in the United States to have two women on its bench. Our illustration shows Judge Sara M. McCall of Pittsburgh (left) welcoming Judge Lois D. McBride, who had just been appointed by Governor Pinchot.

DR. W.E. FITCH TALKS ON MINERAL WATER

Tells Why It Is Often Helpful for "Rheumatic" Aches and Pains

EUROPEAN SCIENTISTS CONFIRM OPINION

Recently William Edward Fitch, M. D., member of the International Society of Medical Hydrology and author of that comprehensive book "Mineral Waters of the United States and American Spas" spoke as follows on a program over the National Broadcasting System: "Drinking a mineral water is not like drinking an ordinary water, for in addition to the virtues and therapeutic value of the water itself, the combined minerals, some of which are in such infinitesimal proportions as almost to defy man's limited power of analysis, produce systemic changes which affect disease profoundly. In Europe, of course, mineral water treatment has been known for thousands of years, and is universally accepted. . . . I am happy to have contributed in a small way to the spread of knowledge of this form of treatment in our own great country, for here we have the same needs as Europe's population—the same diseases, the same suffering, the same problems—and bountiful Nature has provided the same form of treatment—natural American mineral waters sparkling and bubbling from the earth, ready and able to end serious and painful disease." "When we think of what Dr. Fitch has said of the real value of mineral waters—and then think how very few people can afford to travel to America's mineral water resorts—it is very important to know about Crazy Water Crystals, and the happiness they have brought to millions suffering from "rheumatic" aches and pains and other chronic ailments. Crazy Water Crystals are just precious minerals crystallized from a great natural mineral water—a type of mineral water that has built one of America's greatest health resorts, to which 150,000 people flock every year. You just mix Crazy Water Crystals with plain water, and make a great mineral water at home. And Crazy Water Crystals are very economical. A standard sized package costs only \$1.50 and is sufficient for several weeks treatment in your own home. Crazy Water Co., Mineral Wells, Texas.

Crazy Water Crystals are for sale by dealers displaying the red and green Crazy Water Crystals sign. Get a box today.

CUTICURA Relieves Skin Troubles

ODD THINGS AND NEW—By Lane Bode

Advertisement for Bell-less Delfry. Text: 'THE PLENTITUDE OF SPACE—STARS ARE SO SPARSE IN THE UNIVERSE THAT A RAY OF SUNLIGHT TRAVELING INTO SPACE HAS ONLY ONE CHANCE IN TWENTY TRILLION OF STRIKING A STAR. NATURAL PROTECTION—NATURAL FORCES SERVE TO PREVENT 90% OF THE DAMAGE TO AGRICULTURE WHICH INSECTS WOULD DO IF UNCHECKED. BELL-LESS DELFRY—THERE ARE NO BELLS IN THE BELLY OF A RECENT NEW JERSEY TOWER, THE SOUND FROM WHICH METAL RESSO BONGS AMPLIFIED THROUGH A LOUD SPEAKER.'

CHAPTER XI—Continued

Steve Drake was within twenty yards from Kate struck the weapon from Franz's hand; within ten when she struck again with her paddle, was dragging himself through the shallows for the reeds when Franz turned in flight.

Movement hurt him, now. He moaned from the pain and then, a few yards beyond, came a ruffling of the surface. Bubbles. . . Bubbles, coming upward from deep down. . .

A great sigh left Steve's breast and he lurched against the canoe, shoving it sideways through the reeds, all but falling across it. "Good!" he said thickly. "Safe, eh? Listen! . . . Listen, Kate Flynn. He wet his lips and tried to fight back the overwhelming weakness. "Listen, that money's got to be—"

CHAPTER XII

It was a long time before Mary Wolf finished the task of scraping a resting place for her father's body. Then she lowered it gently. For an interval she knelt there on the soft, sweet earth, hands lax at her sides. "I'll ask the sisters to pray," she said aloud as if to end an annoying quandary and began scraping the fresh earth back upon the blanket.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

Lesson for July 22 ELIJAH HEARS GOD'S VOICE

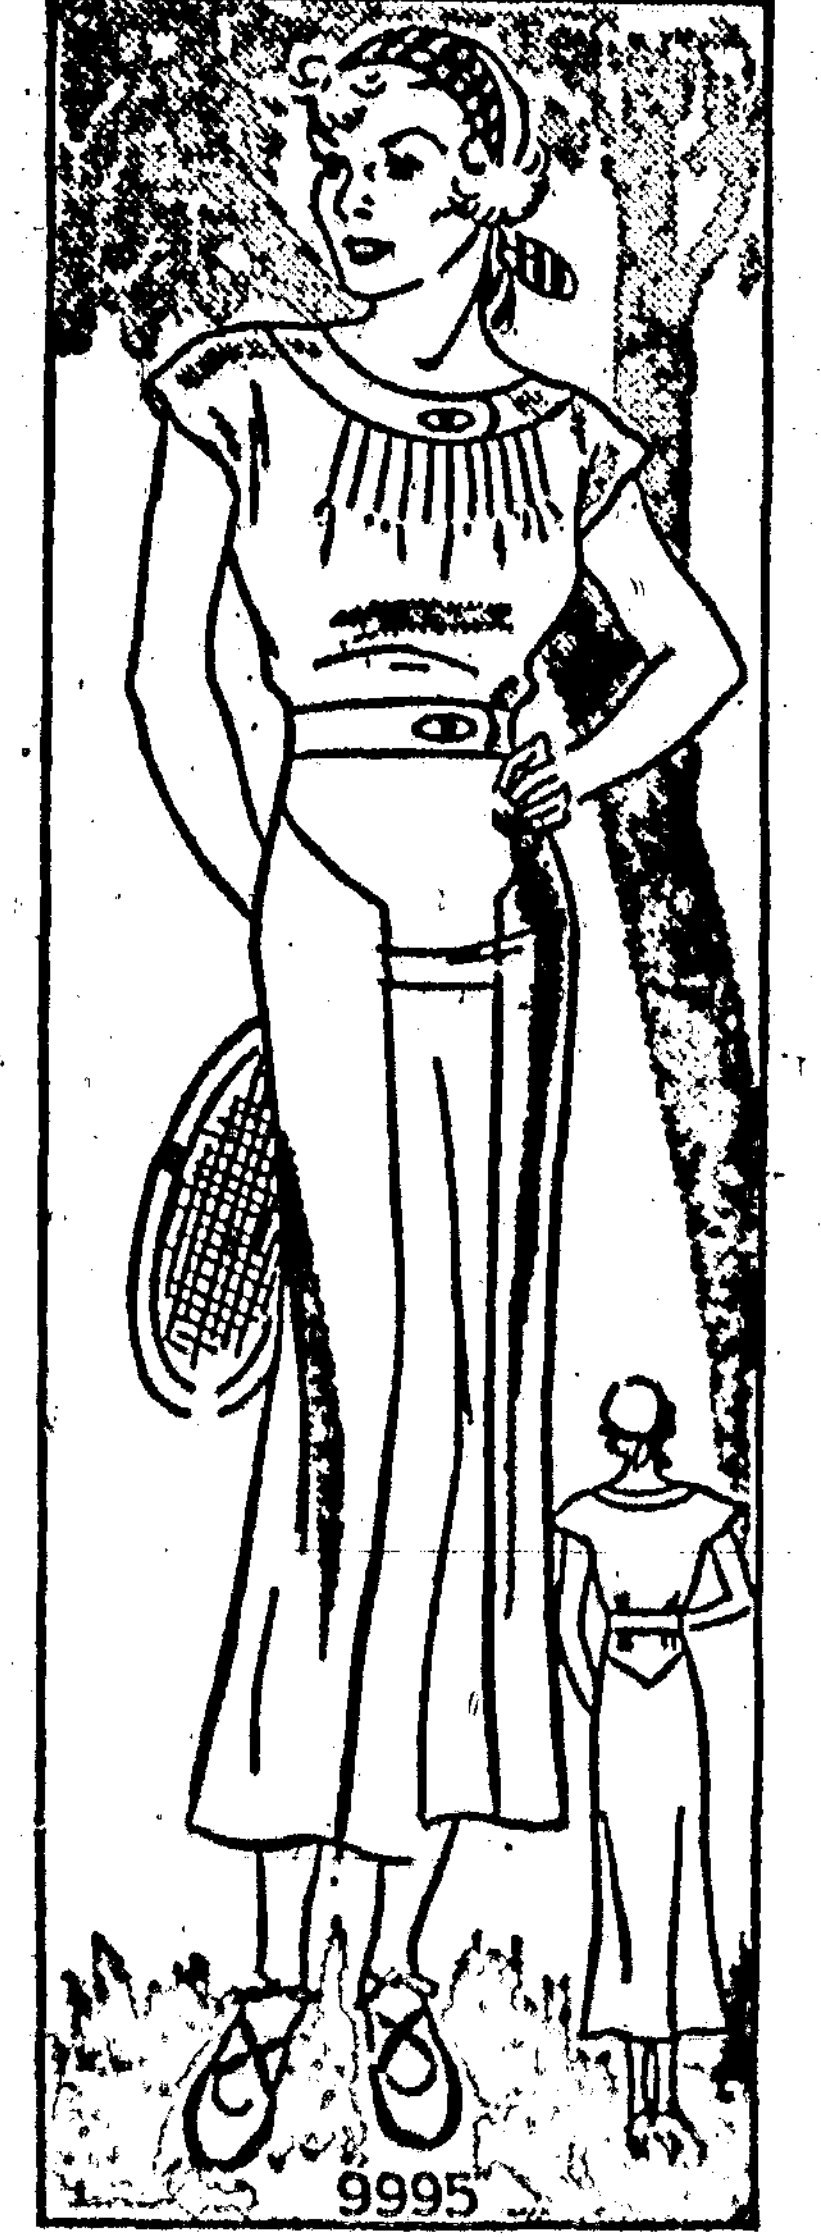

LESSON TEXT—I Kings 19:1-21. GOLDEN TEXT—Therefore Eli said unto Samuel, Go, lie down; and it shall be, if he call thee, that thou shalt say, Speak, Lord; for thy servant heareth. So Samuel went and lay down in his place. I Samuel 3:9. PRIMARY TOPIC—Elijah Listening to God. JUNIOR TOPIC—When Elijah Was Ready to Give Up. INTERMEDIATE AND SENIOR TOPIC—How Does God Speak to Us? YOUNG PEOPLE AND ADULT TOPIC—Hearing and Obeying God.

Southwestern Briefs

July 9 was set for the state Democratic central committee's meeting in Santa Fe, to select a successor to Ed Swope, now warden of McNeil Island federal prison, who resigned May 22. Director William L. Austin of the U. S. bureau of census, announced that Arizona wholesale establishments during 1933 had net sales of \$49,751,900 and disseminated \$3,698,000 in payrolls.

FROCK FOR WEAR ON TENNIS COURT

PATTERN 9995 The girl who wears this frock will score on any court which she graces with her fair presence—even if she isn't the most magnificent player in the world. The gown is so smart it will make up for any shortcomings in her game. Look at the back! And don't you like the little round yoke with the tucks coming in sun-burst fashion from under it? White or pastels are really the nicest colors for such a frock, but

there is nothing to prevent you wearing bright colors. Pattern 9995 may be ordered only in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 42. Size 16 requires 3 1/2 yards 40 inch fabric.

Smiles

NOT BUYING "Did you ever buy votes in an election?" "Not strictly speaking," answered Senator Sorghum. "Out where I come from you can't tell whether the votes you think you are buying are faithfully delivered. The transaction isn't a purchase. It's only a gamble."

Titsworth Co., Inc.

Capitan, N. M.

HEARD ABOUT TOWN

BORN-To Mr. and Mrs. Eddie Johnson, Sunday, July 15th, a boy. Mother and son are doing nicely. "Daddy's all smiles."

Lupe Gabaldon, who has been shearing Blackshere's sheep for the past few days, was in town Saturday on some business.

Mrs. Floyd Stephens, two sons, Bobby and Floyd, Jr., Mrs. Frank Touhill and daughters Isabelle and Annabelle and nephew, Dean Shuler of Wichita, Kansas, spent Friday night here as the guests of Mr. and Mrs. J. C. Turner, on their way to their ranch near Quemado, where they will spend the summer.

Mr. and Mrs. Solomon Sanchez and baby daughter were visitors from the Corona country last Saturday.

Bread - - 8c

Carrizozo Bakery & Supply Co.

The Woman's Missionary Society of the Methodist Church will give an ice cream social on the lawn at the Community Hall from 3 to 7, on the afternoon and evening of Wednesday, July 25.

Oiling of the streets began in earnest Tuesday, the first to receive attention being Fourth street. The work will be pushed to completion as fast as possible.

Mrs. Carl Jones and Mrs. R. E. Lemon were El Paso visitors last Friday.

Rangers Lee Beall and R. V. Galt of the Capitan district were business visitors last Saturday.

Leandro Vega dug a well on the Vega ranch and has installed a gasoline engine to irrigate his alfalfa and bean patch.

Jim and Fred Dale of Ancho were here Tuesday for a load of grain and hay for their work stock, and they reported that but little rain had fallen in that section for several weeks and that the ranges were the poorest in many years.—Fort Sumner Review.

Inez Sandoval, Eustaquio Silva, Hilario Gomez, Severo Gallegos and others were here from the lower valley on business the first part of the week.

R. C. Sowder, Yesso Creek ranchman, was in Saturday for a meeting of the County Board of Commissioners, who were in session to consider the budgetary matter with representatives of the State Tax Commission who were here on their annual round of the state.—Fort Sumner Review.

Jose Lopez is here from Santa Rosa, visiting his parents; Mr. and Mrs. Andres Lopez, at Rabenton.

Ray Sipple and son were here Tuesday from White Oaks, remaining over and returning home late in the afternoon.

Baptist Church

Our Sunday School is showing a very satisfactory growth, both in attendance and interest. Join us next Sunday morning at 10 o'clock. The pastor will preach at Capitan in the morning.

After a song service, beginning at 7:45, the pastor will bring the first of a number of Sunday evening sermons on the general theme of "Songs in the Night."

Under-consumption, and not over-production, is our religious, as well as our economic disease.

Very Best of Accommodations

Dinner Parties Our Specialty

A. L. Burke Notary Public at Carrizozo Outlook

Mrs. Flores of Lincoln gave a surprise tea party on Monday of this week, in honor of Miss Helen Rice. Fourteen guests were present.

Robert Hinchey and daughter, Mrs. Helen Meeks of Lincoln, were business visitors here yesterday and while in town, Mr. Hinchey made the Outlook office a friendly call.

Mrs. Nellie Brandon, daughter, Dolores and son, Bill, came in Tuesday from their home in Putnam, Texas and will visit for several weeks with the Claude Branum family. Mrs. Brandon, is Claude's sister.

This office is in receipt of a nice letter from our old friend and former newspaper man, Sam Bigger of Capitan. They had a nice shower of rain over there one day this week. We had about six big juicy drops here yesterday. Clouds come up every day, but they give us the 'high ball' and pass over.

Messrs. W. C. Hendren and Perry Land were here Tuesday from Fort Stanton and made the Outlook a friendly call. Mr. Land is successor to Mr. Spickelmire, who was lately transferred to another government post.

Mrs. E. W. Vaughan and son Lewis of Dennison, Texas, who had been visiting the Charles Young family for several weeks, left for their home yesterday morning. Mrs. Vaughan is Mrs. Young's mother.

John Kimbrell was a business visitor from Picacho the latter part of last week.

ZANE GREY'S

Great Novel of the West

ROBBERS' ROOST

This gripping story from the pen of the most widely read of all writers of Western fiction will be published serially in these columns. Do not miss a single chapter.

Methodist Church

Sunday School every Sunday at 10:00 a. m.

Preaching Services: First and Third Sundays, 8:00 p. m. All other Sundays, 11 a. m. and 8 p. m.

The church in the community, is, in one sense, a community center, where we may assemble, learn to know, to love, and to appreciate one another.

All are cordially invited. Come.—Edgar H. Johnson, Pastor.

Sat Chavez, Jr., has been assisting in the First National Bank of late.

Mrs. J. E. Compton, daughters Marjorie and Louise, Mrs. Frank Abel and Frank, Jr., are visiting in Alamogordo today.

Mrs. R. L. Willingham and cousin, George Mollineux of Corona were business visitors here yesterday, returning to the ranch in the evening.

Betty Jane Will Entertain

This afternoon from 4:30 to 6, little Betty Jane Corn will entertain 12 little guests, none of whom are over three years of age. The party will be at the home of Mrs. T. A. Spencer and will be in honor of the second birthday of the tiny hostess.

Written invitations have been sent out and been accepted by the wee guests. Refreshments of pink ice cream and angel food cake will be served.

The Carrizozo and White Oaks baseball teams will cross bats at White Oaks next Sunday. Come over and root to your heart's content.
