

FORT STANTON NEWS

We had a fine rain Tuesday and if Old Jupiter Pluvius will only play a few return engagements things will begin to pick up.

Mrs. Penfield of Lincoln was here Monday registering voters. Mmes. Purdy and Halley of Carlsbad visited here last week.

Mr. and Mrs. Phil Laramie of Lincoln were guests of Mrs. Boyd last Friday.

Mrs. Ed Barrett and daughter are here from San Francisco to join Mr. Barrett on the Ruidoso.

Father O'Hara left Wednesday for New York to be with his parents on their 50th wedding anniversary.

Mrs. Wright and Miss Squiers were hostesses at a birthday surprise party for Joe Macarie Tuesday evening at the nurses' home. Miss Squiers left Wednesday on a vacation trip to Fort Collins, Colorado.

Mmes. Berry and Dappen spent the week end on the Ruidoso. A party of nurses visited them on Sunday.

Mr. and Mrs. Tommy Tucker, Mr. Tucker's sister and brother motored to the Grand Canyon and Petrified forest. They returned by way of Phoenix and the Apache Trail and reported a hot time.

Mr. and Mrs. Sellers and daughter of Santa Fe are visiting relatives and friends here and at the Cavanaugh ranch.

The construction work is progressing every day. New concrete sidewalks are being laid.

The Fort string ensemble entertained with an informal concert in the amusement hall Wednesday evening. All enjoyed it.

Morrison and party went fishing Tuesday and came home with several nice trout. They also caught a good drenching in the rainstorm.

A small plague of mosquitoes have struck here recently due to the pools of water in the river from recent rains.

Miss Teresa McGowan, who left here a short time ago, is planning to make her home in Lincoln.

Last Thursday "Frenchie" Massie dozed off in his saddle, letting the horse go along as he wished. He woke up suddenly to find himself in the ditch. Picking himself up he seized the bridle: "S a y!" he accused, you've been associating with them automobiles, ain't you?"

Charles "Spik e" O'Donnell has been confined to the hospital for a few days with a very annoying case of shingles.

Glencoe Specials

The ladies of the Stetson P. T. A. met with Mrs. Elzy Perry Monday afternoon and made up 5 or 6 kits, their allotment of school medical kits. Refreshments of cake and ice cream were served. These kits will be sent to Carrizozo for distribution.

Glencoe had a good rain Tuesday afternoon and water again ran cheerfully down the Ruidoso to the delight of the public.

Miss Nan Hillery Harrison, writer of Geo. W. Coe's story, "Frontier Fighter," is up from Austin, Texas, visiting the Geo. Coe family. The book was released in June by Houghton-Mifflin, New York and Boston and is being favorably received.

LYRIC THEATRE

R. A. Walker, Owner

Thursday is Lucky Number Night.

Friday-Saturday—"Her First Mate," featuring Slim Summer-ville and Zasu Pitts, Una Merkel and Henry Armetta. You'll get an eyeful—and an earful—and a mouthful of laughs when Zasu opens up on Slim. Also "Pin Feathers" and "Strange As It Seems." Don't forget your tickets for Thursday night.

Sunday - Monday - Tuesday—"Ever Since Eve," featuring George O'Brien, Mary Brian and Herbert Mundin. Three crusty old gold miners trying to protect their foster son against a gold-digger's charms. What chance has a mere man had . . . ever since Eve? Also "Fannie's Wedding Day" and "Scouring the Seven Seas."

DIAMOND DUST

Standing of Teams:

Team	Games won	Games Lost
Carrizozo	15	6
East-Siders	6	6
Sluggers	6	0

The Carrizozo and White Oaks teams journeyed to Mescalero Sunday and gave the Indians a double trouncing.

The East-Siders went to San Antonio last Sunday for a game of baseball with the boys from across the Rio Grande and our boys returned home with the bacon by a score of 8 to 3. Andres Lueras and Manuel Chavez of the Carrizozo team went along with the boys and helped them win.

Carrizozo will cross bats with an Alamogordo team on the local diamond next Sunday.

ATTENTION!

Comet Chapter No. 29, O. E. S., will hold its annual picnic Sunday, Aug. 26, at the Stearns Ranch in Nogal Canyon. The Chapter extends a cordial invitation to Masons and their families and Stars and their families. Dinner will be served at 12:30 p. m. Coffee will be furnished by the chapter. Bring your baskets and enjoy a day with your neighbors and friends. The picnic is in honor of the birth of Robert Morris, founder of the Order of Eastern Star.

Those who are desirous of attending and have no means of conveyance and those who will have room in their cars for such members, will please notify the committee composed of Mmes. F. A. English, R. E. Lemon and Miss Frances Aguayo.

Notice! Notice!

You have only TWO MORE DAYS to register, August 18th and 25th. See that your names are on the books, or you can't vote at the coming election. Those who were not of age to vote in the 1932 election and have reached 21 years of age, must register. There are also many young men and young women who will not become of voting age until after the last registration date and before election time. These must go to the proper authorities and be registered by affidavit.

OSCURA NOTES

Jim Brown and John LaMay came in from Mr. Brown's ranch in the Ocuras Monday and report plenty of rain and good grass. Jim must be "paying the preacher."

Linson Hinnard was here from Polly flats last week visiting friends.

Buck Dillard went to Hot Springs Tuesday to visit his wife, who is there for the benefit of the baths.

A man from California is here looking things over. He expects to do some work here to boost Oscura, he says.

Mack Brazel went to Three Rivers Tuesday after having spent a day or two with his family at the Loudon ranch.

Margaret Was Just Sixteen

Mrs. Roy Shafer entertained Wednesday at a noon-day luncheon in honor of the sixteenth birthday of her daughter, Margaret. The guests were school-mates and close chums of the honor guest.

Republicans Met at Capitan

In accordance with the call in our last issue by Mrs. M. L. Blaney, Vice chairman of the Republican Central Committee, a goodly number of Republicans, most of whom were precinct committeemen, met at the gymnasium in Capitan Tuesday night. The purpose of the meeting was to urge the different precinct committeemen and others of the party to get in touch with all who are not registered and see that their names were on the books. Committeemen from over the county made talks and gave an outline of the work and the reports were gratifying. The meeting was open to everybody. Capitan should thank the Republicans for holding the meeting, for while we were in session, it really rained. What do you think of that? There were about 40 present.

Ernest Key

In this issue of the Outlook will be found, the announcement of Ernest Key, County Clerk, who is announcing himself for the nomination to succeed himself to the same office, subject to the decision of the coming county convention. Mr. Key has served the county in that capacity for the past term and has been one of the best public servants of the people in that office the county has ever had and his record as to honesty, painstaking efforts in behalf of the people, is an open book. Now, at the nearing of his term, he again requests the nomination at the Republican County Convention and if nominated and elected, he can only promise to render the same good service in which he has been such an efficient public servant in the past. Mr. Key, according to political custom, should be nominated without opposition and in recognition of his faithful duties in the office, he should be returned at the fall election.

Mr. and Mrs. John E. Carleson of Jicarilla were business visitors here on Wednesday and while in town, they made out office a friendly call.

NOGAL NOTES

(By "CHICO")

Mrs. Eva Emerson, children and Carl McDaniel of Nogal and Mrs. Finkle Skinner of Carrizozo left Monday morning for Las Vegas. They expect to be gone several days.

Mr. and Mrs. Frank Abel and Frank, Jr. were Nogal visitors last Sunday.

Mrs. Claude Smith was an El Paso visitor this week. She was accompanied as far as Alamogordo by her mother, Mrs. Bennett.

Mr. and Mrs. Sam Johnson and son of Hagerman spent the week-end with their daughter, Mrs. Frankie Peacock.

Mr. and Mrs. Wayne Zumwalt and son were Nogal visitors last Sunday.

Mr. and Mrs. Will Hunt from the Nogal-Mesa were Carrizozo visitors Thursday.

Mr. and Mrs. Frank Trainer and daughter of Belen were week end guests of the Albert May family.

Mr. and Mrs. J. B. Martin, baby and Joe Maynard of Alto spent Sunday with the R. M. Martin family.

A number of people enjoyed dancing at the Homer McDaniel home Friday night and at Mr. Helm's on Saturday night.

Will Hale was in Nogal this week from Ruidoso and while here he was a visitor at the Albert May home.

Work is expected to begin on the Nogal Canyon road soon.

Mrs. Jesse May received word of the serious illness of her son, Edgar Martin, at Fruitland, Idaho.

We have had good showers the past week and things look better.

Eagle Nest Items From Jack's Peak

Mrs. Crayton Richard is visiting her parents near Lincoln.

J. A. Morrow and Milt Jones are in Texas on business.

Paul Fitzgibbons arrived from Wichita, Kansas, Sunday for a visit with Mr. and Mrs. George Fitzgibbons, Jr.

The A. E. Parker and Fitzgibbons families were dinner guests of the A. O. Parkers Sunday.

Woodrow and W. B. Payne and J. A. Morrow were business visitors in Carrizozo Thursday.

The Lewises were dinner guests of the Morrrows Sunday.

Paul Mullineaux was a visitor in Ancho Saturday.

The A. O. and A. E. Parkers were business visitors in Lincoln last week.

Cal and Red Lewis attended the rodeo at the Dude Ranch Saturday. They report a good time and plenty of free beer.

One of the largest crowds of the season assembled for Woody's and Damon Payne's farewell dance at the W. B. Payne home last week. Ice cream was served to a few intimate friends before the dance. The entire second floor of the Payne residence was cleared for dancing, and the iced lemonade which made its appearance about thirty was given a hearty welcome. Cake and coffee were served downstairs at midnight. Some of the old dances in evidence after supper were—New Shoe, Paul Jones, Pop goes the Weasel and the Schottische. It was long after 8 when the last of the dancers left. Mr. and Mrs.

OUT-OF-THE ORDINARY

Kansas birds hold the record for resourcefulness. After using the hose to sprinkle his lawn at the courthouse in Columbus, caretaker George Buchanan shut off the flow of water at the nozzle, after which a flock of birds sensing water available, flew away and returned with a woodpecker. He promptly drilled a hole in the hose and furnished drinks for the whole crowd.

Lightning left a freak trail at the home of Ernest Blackington at Groton, Conn., one day last week. Striking a tree, it dug a ditch to the porch, pushed a cart 15 feet, split the kitchen linoleum, smashed a door casing, followed a water pipe to the sink, twisted a water pipe near a faucet, tore a moulding on a screen door, knocked all the plastering from the ceiling, departed through the roof, tore two large holes in the shingles and knocked down two chimneys.

Little Billy Boy Cundiff of Springfield, Mo., 8 years old, can identify by sight, any one of the phonograph records in the family musical album. His kindergarten teacher, Dora Kennicke, says she believes he accomplishes the trick by a keen sense of observation, because he cannot read a single word. All you have to do is to hold up any record and he will name it at a glance.

In Chestertown, Md., Wilbur Stewart, patient in a hospital at Easton, 30 miles from the above named place, was discharged and when ready to be sent home, the ambulance was out of commission and he decided to go in the hearse. Seeing the hearse being sent for, the negro family and friends gathered to mourn the loss of Wilbur. As the hearse drew up and the mourners stood with bowed heads, Wilbur jumped from the hearse clad in white hospital suit. In a few seconds, Wilbur had the whole neighborhood to himself. One darkey went through a hooked screen door and two jumped out of a second story window. It took several hours to convince the negroes that Wilbur was not a ghost.

At Winnipeg this week, little Florence Spence, who was lost in the northern woods for 5 days without food, was rescued by a diamond drill setter by the name of Martin Blair. After seeing bear tracks in the vicinity of the baby's mysterious disappearance searchers all gave up except Blair, a great friend of Mr. Spence, who following the direction revealed to him in a dream, and as the parents and neighbors were bemoaning the fate of little Florence, Blair came in sight, with the baby on his shoulder, eating an apple.

Our town was deserted last Friday, when the biggest part of the populace repaired to the O—O Ranch for a day of enjoyment. Those present report a very good time. There was plenty to eat and drink and all enjoyed themselves in dancing, swimming and other sports.

Payne are always the perfect host and hostess.

Mr. and Mrs. Hendrex entertained Tuesday with a birthday dinner for J. A. Morrow. About 35 were present.

PERSONALS

Mrs. C. W. Coe, daughter Verda and Evelyn Norman of Tularosa are visiting the Sam Wells and L. E. Hunt families at White Oaks this week.

Mr. and Mrs. Robert Keil and children passed through here the latter part of the week on their way to DuBois, Pa., to visit relatives. While here they visited the Sherwood Corn, Rolla Ward and Cooper Hightower families.

Mrs. J. A. Callahan and daughter Dorothy of Bristol, Va., Mrs. James Stapp and daughter Mary Jo Ann of Birmingham are here this week as guests of the S. O. Sproles and Frank Abel families.

Mrs. Lena E. Ayres of El Paso is here this week visiting at the homes of Mmes. S. O. Sproles and Frank Abel.

Mrs. A. O. Parker, daughters, Bernice and Mrs. Fitzgibbons were here from the Jicarilla country Wednesday.

Elmer (Red) Eaker at Rolland's wants to know who remembers the old fashioned groceryman who used to blow into a paper bag in order to open it?

Last Saturday, J. V. Hobbie, local roundhouse employe, came home ill and after an examination he was found to have a ruptured appendix and he was taken to El Paso, accompanied by Mrs. Hobbie and an operation performed. Being assured of no apparent danger, Mrs. Hobbie came home, but returned Tuesday accompanied by her daughter Eliza and found J. V. gaining ground. Attending physicians say he will be able to come home in two weeks.

Mrs. Don English and son Frank Charles left yesterday for Tucumcari to visit with relatives for a few days. This is baby Frank's first train ride and "Daddy" Don will remind him of that fact some day.

Attention, Stars

A call is hereby issued to all members of Comet Chapter No. 29 O. E. S., to attend the funeral of our beloved sister, Lottie A. Rice, at Angus, Saturday afternoon, Aug. 18, at 3:30.

Gussie Titworth, W. M., Maude L. Blaney, Secretary.

White Oaks Notes

Mrs. L. E. Hunt entertained with a bridge party Wednesday afternoon at her country home near White Oaks in honor of her sister, Mrs. C. W. Coe and her niece, Miss Verda Coe of Tularosa. During the afternoon delicious punch was served; after rounds of bridge were played the hostess served ice cream and angel food cake. Those present were Mmes. Walter Boynton, Charles Gilbert, Clyde Collier, Jack Cleghorn, Barney Ward, Florence Ward, Julia Cook, Leonard Whitwell, Phelps Walker, Donald Queen, Misses Ida Cleghorn and Betty Lynn Boynton. The hostesses and her guest High score went to Clyde Collier and consolation to Mrs. Dona Queen.

Mr. and Mrs. Ben Burgette of children of Dennison, Tex., were guests of Mr. and Mrs. W. Kelt for a few days this week. Mrs. Burgette is the former R. Kelt. Her mother, Mrs. Griff returned home with them.

Beating Around Cape Horn in a 25-Foot Boat

Explorer Tells of Exciting Experiences at Sea.

Washington.—Seals, playing on the rocks, threw back their heads and gargled sea water with a noise like calves bawling, as we beat around stormy Cape Horn. For 50 days after leaving Magallanes, on the Straits of Tierra del Fuego, we saw not a single human being except a few wild Alacajur Indians on Burnt Island. They looked so fierce, running along their cold, lonely beach and shouting at us, that we sailed on past them.

So says Amos Burg, in a report to the National Geographic society, under whose auspices he is exploring the southernmost tip of the western hemisphere, which is nearest the South pole of all continental lands.

Many Stormy Days.

"Such storms are known to rage for three weeks. One year had 800 stormy days. On Navarin Island we found a man named Ken Williams, an otter hunter, and took him aboard; that made three, in our 25-foot power boat, bound for the islands of the Horn. Crossing the open sea from Nassau bay to Cape Horn, on Grey Island, the full fury of the gales hit us. I feared being blown out to sea, for our propeller was fouled with kelp. So much salt water blew through the air that bareheaded Ken Williams' hair looked as if it had been lathered.

"Even when the storms were at their worst, and it seemed we must surely swamp, Ken Williams would suddenly stand up and point to some rocky peak, and about above the wind's roar, 'I shot an otter over there once!'

"His father was a pioneer missionary among the Yaghan Indians, and Williams himself, besides being a hunter, owns sheep that range some of these islands. He is therefore the most southerly sheep herder in the western hemisphere.

"Away down here at the bottom of the western world, even separated from the tip of South America itself

by weeks of stormy seas, and dependent wholly on a tiny lifeboat that I bought at a sale from the United States coast guard and shipped here, I can't help thinking—especially when it storms—about how far it is back to Portland, Ore. In a calm spell we got ashore at Bally Island, and from a peak we saw the big Cloven cliff on Horn Island itself, and also the Wollaston and Hermite groups that mark the very last land before the jump-off into cold waters that stretch to the Antarctic regions.

Make Lonely Landings.

"The American ship carpenters who built our 25-foot boat, the 'Dorjun,' of course, never dreamed that she would one day make this historic voyage. But how proud they would be, could they have seen her rounding Cape Horn, through seas that filled even Drake, Cavendish and Magellan himself with dismay; seas, in fact, often so rough that in early days many Portuguese and Spanish sailors gave up the fight, and went back up the coast, and found happiness in the lotus life of pioneer Brazil.

"Hundreds of landings we made, at strange, lonely nooks on rocky shores where barking seals, otters, and birds only make man's absence more impressive. In the broken surf on the outer side of the Horn itself a lot of Em-

Home Gold Valued at Over Half Billion

New York.—The value of old gold lying idle in American homes is believed to surpass the output of all the gold mines in the world for an entire year.

A drive to recover old gold, carried on in Britain some time ago, brought to light over half a billion dollars worth of the precious metal. America is believed to have an even greater store.

Peror Penguins are Colonized.

"Glad we were, and weary, back once more in the town of Magallanes, which used to be called Punta Arenas. To you, it's just a name; a name for a far-away sheep town stuck somewhere below Patagonia, on the Straits of Tierra del Fuego. To us, after cold, wet, dangerous weeks on end, it was civilization again. What if its people are mostly Slavs, Austrians and Italians, who speak tongues that are strange to us, and who paint the roofs in bright colors, and build tight board fences around their gardens so the gales will not blow all the dirt away! Or what if the gales from Patagonia do bring clouds of dust, filled with grass seeds from distant pampas, and then tear across the straits, lifting sheets of water into the air and threshing them about till all the sea has the aspect of smoking prairie grass? It's still Magallanes, a city, a place of streets, stores, mail from home, dry clothes, and a wireless station."

First Air Photograph of Mount Fuji

This picture, taken from a plane flying near Mount Fuji, Japan, shows a passenger plane outlined against the heavy clouds hovering near the summit of Nippon's venerated peak. Below may be seen one of the many beautiful lakes which abound in the region.

Will Restore Smyrna to Previous Beauty

Lottery Funds to Be Used for Improvements.

Ismir, Smyrna, Smyrna, "Turkey's eye on the Mediterranean" is to be restored to its previous beauty.

The city, an port and trading place of Turkey, second only in importance to Istanbul, was almost completely wrecked by the great fire of 1922, when Mustafa Kemal's troops ejected the Greeks, and it is still partly in ruins now.

Under the leadership of Dr. Behcet Sabit Bey, reconstruction of the city which, incidentally, has the best claim of being Homer's birthplace, will be undertaken.

The city holds vast areas of which it took control after the expulsion of Greeks and Armenians, who had formed about half of the city's total population before the Greco-Turkish war.

On these grounds building lots in residential quarters will be sold at low installment payments and, under certain conditions, even given free of charge.

In the workmen's districts about nine square feet will sell at 20 cents per foot and the city will furnish the building material gratis provided its model plan is adopted.

Two new main avenues will divide the city into four sections. One will lead straight up from the port to the famous ancient fortress on Mount

Pagus and thus open up a magnificent view.

Under this plan 500 homes so far have been constructed, of which each has a bathroom and is surrounded by a small garden.

To defray first costs a lottery, expected to yield 400,000 Turkish pounds, is being organized by Ismir's magistrate.

Ancient Shark Would Measure Over 40 Feet

New York.—Remains of a 50,000,000-year-old giant shark, from North Carolina, on view at the American Museum of Natural History, present weighty and conclusive evidence that sea monsters were in existence prior to man's appearance on this earth. Before even the Neolithic man started faking flint implements, these prehistoric giants were roving the seas.

"This particular shark, which is estimated as having been 40 feet in length, has teeth averaging five inches in height and completely dwarfs any of the modern shark family. According to Francesca R. La Monte, associate curator at the museum, the 40 foot approximation is conservative. "It would be no exaggeration," she explains, "to say that this prehistoric shark was, in life, 60 feet long."

Referring to the current sea serpent monomania, Miss La Monte points out that "fish do not move in the horizontal caterpillar undulations, as inaccurately described by those people who claim to have seen recent sea serpents. Fish move laterally." Illustrative of this is the sideway darting of goldfish.

Cliff Ruins 800 Years Old Found in Arizona

Kayenta, Ariz.—The discovery of cliff ruins dating back to 1150 and 1250 A. D. was reported from the Rainbow Bridge-Monument Valley expedition.

Prof. Gerald E. Marsh, of the University of California, made the find. Located on Skeleton Mesa, in a cave 8,000 feet high, the ruins included four rooms. Pottery found in the dwelling enabled Marsh to date the probable time of its occupancy. The mummified bodies of two adults and two dogs were found in the cave.

Clever Coyotes Finally Killed by U. S. Hunters

La Jara, Colo.—The depredations among live stock of "Macbeth" and "Lady Macbeth," bloodthirsty coyotes of the San Luis valley, have been brought to an end by hunters and trappers of the predatory animal division of the United States biological survey.

uncanny cleverness in evading capture. They gained their names, the federal hunters said, from the fact, that the male coyote was not as dangerous as his mate and was goaded by her to most of his killings.

Carrriages Bugaboo in 1808 Safety First Verse

Philadelphia.—Safety first campaigns did not start with the advent of the automobile. They were old stuff in 1808, as revealed in one of a collection of children's books recently exhibited here.

The old book published in that year contains several "cautionary stories in verse." One example was:

"Miss Helen was always too giddy to heed
What her mother had told her to shun,
For frequently over the street in full speed
She would cross where the carriages run."

The moral, of course, was reached in the final verse when the child who disobeyed her mother was struck by one of the many carriages.

Jersey Township Passes Law to Scare Nudists

Camden, N. J.—Nudists, if any, in Haddon township, near here, now have something else to worry about besides cold weather.

For the township is prepared to meet nudists more than half way—with a fine of \$200 or an alternative of 90 days in jail.

"For 70 years the township has gotten along without this law, but there have been rumors of nudists starting a camp in this neighborhood, and it's always best to be prepared," said Edward Marker, chairman of the township commissioners. In explaining why such an ordinance was passed recently.

Scenic Mountain Road in Colorado Nearly Ready

Trinidad, Colo.—The Cordova Pass road, at one point nearly 12,000 feet above sea level, will be opened some time this summer. It has been announced by the state highway department. The highway traverses the beautiful Spanish peaks country, considered to be one of the most scenic sections in the Rocky mountains.

Life Dangerous in 1830
Boston.—Life was almost as dangerous in Boston in automobiles 1830 as in 1930, statistics show. The death rate in 1830 was 71.7 per 100,000 and 100 years later it was 74.4. Drawings took the heaviest toll in 1830.

Find Phosphorus Test Worth While

Reveals Great Variation in the Makeup of Soils to Grow Legumes.

By C. M. Linzey, Soils Extension Specialist, University of Illinois—WHL Service.

Vast changes now being made in cropping systems on farms will be less risky if farmers test their soils for available phosphorus, as well as for limestone, before seeding legumes and other crops.

Tests made on thousands of acres of farm land throughout the state have shown that soils vary tremendously in their available phosphorus content, as well as in acidity. Consequently, there is a great variation in the ability of soils to produce legumes, since these crops have definite phosphorus requirements as well as certain lime needs.

It has been estimated that some 1,800,000 acres of Illinois land is being taken out of grain production and that a large proportion of this acreage is being seeded to legumes. The only sound basis for making such adjustments is to use the phosphorus test along with the soil acidity test.

These two tests together will show: (1) what legume is best adapted to a given piece of land; (2) what land might be best suited to grow a certain kind of legume; and (3) whether any phosphorus or limestone need be applied for the successful growing of legumes.

The test described was developed four years ago by the experiment station of the agricultural college, and it is coming into new prominence now because of the widespread shifts in production.

All that is required for making the test is the phosphorus testing solution and a tin rod, together with a set of vials with corks and a rack to hold them. A small sample of the soil is shaken up in a vial of the solution, and if the soil is low in available phosphorus, the solution remains uncolored. As the phosphorus content of the soil increases, the color of the solution changes to blue of different shades, depending upon the amount of phosphorus present.

Sterilize Soils, Control Weeds, Using Electricity

Sterilizing soils by use of electricity, to render them disease and weed free, in the opinion of engineers in the department of agricultural engineering at the Ohio State university, promises to supplant older methods employed by greenhouse men in sterilizing soils for propagating benches, potwork, in hotbeds and cold frames.

Up to now, chemical and steam and dry heat have been employed. Two ways of using electricity have been devised. One uses electrical heating elements buried in the soil. Soil itself, in the other, is the conductor. The electricity, passing through the soil, heats the soil moisture to steam, which does the sterilizing.

About one kilowatt-hour of electricity is required to sterilize a cubic foot of soil. A sterilizer holding five cubic feet of soil can be built at a small cost for materials.

Selecting a Horse

With the demand for horses increasing the following points which might prove valuable to the buyer are offered. It is not the condition of the horse alone that should be considered. True enough it is well to be sure he has no blemishes and that his build, etc., indicate he is well fitted for work, endurance and long life. But even more important than this is whether or not he is fitted for the particular type of work you will want him to do.

On the farm the different jobs for the horse vary a great deal in nature, and therefore the animal best fitted for all is the one to be chosen. The large horse weighing around a ton may be very good for jobs where a great amount of strength is required but the extra weight might slow him up enough so that he will not be efficient for numerous other lighter tasks. The medium-sized, well-proportioned horse, provided he has a show of energy and willingness, usually proves to be the best fitted for general farm work.—Pathfinder Magazine.

Cutting Hay Crops

Alfalfa, clovers and other hay crops should be cut at the usual stages of maturity this year, even though the drought in many sections has stunted the growth of the plants, says A. C. Army, field crops specialist, University Farm, St. Paul. There is nothing to be gained by delaying the first cutting, as any additional growth can be harvested in later cuttings and the quality of the first crop will be better if harvested at the usual stage. Alfalfa should be cut when one-fourth of the plants are in bloom; clover when the first heads are turning brown, and timothy right after blossoming.

The Sugarcane Crop

The great hazard in growing sugarcane in this country is an early frost. Harvesting a sugarcane crop is always a race against time, since present varieties must have approximately nine months between the last spring frost and the first frost of winter. A cross developed in India is said to mature in six months, which is approximately the goal of experiments here. Juice of the Indian cross is reported to be high in sugar and low in impurities.

Southwestern Briefs

The stored water supply of the San Carlos project in Arizona is being increased by heavy rains in the upper Gila river drainage area.

All protests against the Arizona state corporation commission's order closing the Southern Pacific Company's station at Patagonia, have been withdrawn.

After nineteen hours' deliberation, a jury acquitted Carsey, Louis and Bee Bohanan, brothers charged with the fatal shooting of Vernon Tate in Clovis, N. M., last February.

Carless visitors to national forests in Arizona, says T. T. Swift, supervisor of the Tonto National Forest, have been responsible for 151 of 604 fires reported since January 1.

Forty-two per cent of the population of San Miguel county, New Mexico, is either directly or indirectly on the relief rolls. During July the quota for direct relief was \$11,000.

With carloadings cut in half by retrenchment in the government's purchases, Arizona drought-stricken cattle are being held in pens awaiting their turn for shipment to slaughter houses in daily allotments.

After half-day hearing, at the start of which the demurrer of the Maricopa board of supervisors was overruled, in Phoenix, the suit to prevent purchase of forty-five automatic voting machines was dismissed.

More than 400 United States Indian service school heads and instructors will convene at the Burke Navajo Vocational School at Fort Wingate, N. M., for a Navajo educational conference Aug. 26 to Sept. 1.

Gov. B. B. Moeur told delegates to the Arizona state tax conference that "with continuation of the sales, luxury and income taxes, and further reduction in the cost of state government, it will be possible to abolish the ad valorem property tax for state purposes."

The name of George W. Frenger has been recommended by a group of Las Cruces, N. M., citizens to Gov. A. W. Hockenfull as successor to P. L. Raploch on the state highway commission. Raploch, progressive-Republican state chairman, has tendered his resignation.

The Las Vegas city council, meeting in called session, passed a resolution demanding that the Agua Pura Co., holders of the Las Vegas water franchise, show immediate action in living up to the terms of the franchise which provide that the company furnish the city with an adequate supply of pure, wholesome water at all times.

Adopting a resolution requesting that the present status of the public domain in the state of New Mexico be maintained until the Taylor grazing law has been put into effect, livestockmen and others interested in the public domain left the task of making recommendations for administration of the law up to a committee.

Robert Fechner, national director of emergency conservation work, predicted at Flagstaff that the civilian conservation corps would become a permanent institution. In times of prosperity it will be maintained as a skeleton organization, he thinks, and in times of depression it will be expanded to at least its present numbers, of 330,000.

On July 10, 1934, the offices of Sidney P. Osborn, collector of internal revenue for the district of Arizona, were moved from 340 West Washington Street to 128-132 South Central Avenue, Phoenix, Arizona. The new quarters, which are air-cooled, are located on the ground floor of the Industrial Building and are south and across the alley from the Luhrs Building.

Blaming lack of foresight for mistakes in the past, Gov. A. W. Hockenfull of New Mexico urged a conference of educators at Albuquerque from over the state to discuss the problem of financing public schools, to evolve some concrete plan and follow that plan through to realization. More economy and greater efficiency in the educational system was also urged by the governor.

Nominating petitions were filed recently by Gov. B. B. Moeur and Mrs. Isabella Greenway, congresswoman from Arizona, each seeking the Democratic nomination for re-election. Tom C. Foeter, state mine inspector, seeking re-election, also filed his nominating petitions. Governor Moeur's petitions bore 7,523 signatures from fourteen counties. Mrs. Greenway's petitions contained 7,113 signatures from the fourteen counties.

Killer of seventy-seven rattlesnakes in four hours, Mrs. James B. Reidy of Tucson, Ariz., claims the title of being the Southwest's greatest reptile hunter. Starting out at dawn before the heat of a scorching sun drove the rattlesnakes back into their holes, Mrs. Reidy cornered, in quick succession, one nest after another of the serpents until she had seventy-seven rattlers in her hands. She was armed with only an ordinary fishing pole.

Through a PWA grant of \$50,000, the Navajo Indians of Arizona and New Mexico are going to get electric lights, steam heat and all other modern conveniences for their adobe hogan. The principal idea of the Indian project is the building of a central council house for the amalgamation of six local governing agencies. Here the big chief and the elders may hold their pow-wows and smoke peace-pipelines to the great White Father. Some of the money will be used for a water system and some for a health generator for the Navajo capital.

MEDICAL ADVICE THAT BORDERS ON THE SARCASTIC

Our doctors are always telling us not to do things we must do and to do things we cannot do; to eat this when they know or should know that we don't like it and not to eat that when they should know with equal certainty that the thing denied us is our pet hobby in the way of food.

Now they come along, or at least the public health committee of the Wisconsin State Medical society comes along, and tell us to take a midday nap and live longer. When in all conscience they should know that we have a hard enough time as it is in parlaying of a too-hasty lunch and getting back to work while the eye of the boss retains what we accept as its look of friendliness. Most of us are willing enough to take this latest advice, but the economic set up won't permit us the time to carry it out.

The advising committee, too, tells us how the instructions should be carried out. That is, the details after we have arranged the matter of time. And, again, there is the same old note of opposition to our natural desires. They say we should not nap very long and even tell us if we are inclined to overdo this nap we can't find time to take we should have a bunch of keys or some such object in our hands as we doze off, that we will drop the keys before sound sleep overtakes us and be awakened by the resulting crash when we just dozed off and want to finish our nap.

And if we can't find time for the nap, we should take sufficient time for lunch to forget business and loiter around for a time after the coffee. But what is the use? We have no more time to loiter than we have to nap. And coffee probably would be out, anyway when the doctor finds out we like it.—St. Louis Globe-Democrat.

Household Hint
A narrow shelf over the sink to hold dish washing supplies saves many steps. Paring knives and other utensils used at the sink may be hung underneath.

Pimples on Face Never Could Shave

Healed by Cuticura

"Three years ago my face and arms broke out with a skin eruption that was followed by large, red pimples. They festered and went all over my face and arms. They itched and burned and I could never shave. I lost much rest at night with them. "Nothing I tried helped very much. Then I saw an advertisement for Cuticura Soap and Ointment and purchased them. I used about four cakes of Cuticura Soap and one and a half boxes of Cuticura Ointment and now I feel like a new man. I am completely healed." (Signed) Harry R. Hall, 8958 14th Ave., Birmingham, Ala., Jan. 26, 1934.

Midsummer Night Formal Fashions

By **CHERIE NICHOLAS**

IT IS fashionable to look taller by night than by day. At least that is actually what happens when you doff your happy-go-lucky, carefree and sporty-looking clothes (they are certainly all that this summer) and come forth, when falls the shades of night, in the long-skirted dresses which fashion decrees for formal evening wear.

All party frocks are now styled with floor-length skirts which often as not flaunt trains, making even the younger set take on an aspect of dignity and poise. There is something stately about these slim-cut form-fitting lengthened skirts which manage to make you look inches and inches taller than you really are.

A feature which especially commends these lengthened, sleek, form-suggesting skirts is that no matter how snug-fitting they may be about the hips (which they are almost to an exaggerated degree) when they arrive at the knees they are given an accommodating flare which affords perfect freedom of motion. In the advance fall showings, in some instances the skirts have knee-depth insets of sunburst pleatings (usually of soft chiffon). Sometimes the pleating flares all around, making the top of the skirt appear slimmer than ever by way of contrast.

The interesting part about this program of costume design which places such stress on a styling which is dignified and sophisticated is, that even the simplest of materials are being worked up in this way. Indeed, many of the smartest numbers in the formal evening fashion parade are made of inexpensive organdies, volles, nets

and other sheer cottons. Even more amazing and highly intriguing is the fact that the very leaders among the haute couture are creating some of their most successful party dresses of plique and even the once-humble seersucker and gingham are daring to play a formal role in the evening mode.

Speaking of inexpensive cottons as made up in pretentious evening gowns, the model to the right in the group demonstrates the idea perfectly. It is fashioned of a simple cotton rattice which is patterned in a pretty cross-bar motif. It is in that soft dusky shade of pink which is such a favorite with smart Parisiennes this summer. The roses at the waistline carry the same pink tone. Of course it has a matching jacket.

The dinner jacket of white organdie which tops the stunning evening gown to the left in the picture is a very important accessory. Organdie jackets such as this one, also organdie wraps fashioned on the long, loose swagger lines, are quite the rage. As to the dress itself, a pink crepe with black printings fashions it. It seems after all that prints are again triumphing in the summer mode, especially those in striking effects.

The long-sleeve dinner gown remains a favorite. As for lace as a medium for the formal costume, its prestige is assured. The beige lace frock with its colored jewel clasps and belt buckle as shown centered in this trio of attractive night fashions should prove of special interest to the matron. They are so lovely, these pastel colored or chalk white lace frocks.

VELVET TOPS LACE

By **CHERIE NICHOLAS**

A richly colorful lace dress accompanied with a velvet wrap is an ideal combination for this time of year when autumn begins to send hints of its coming. From Paris comes the report that at all outdoor fetes the velvet wrap remains first choice. Often the girle which elaborates the dress is of velvet which matches the coat. Which is true of the model pictured. The dress is done in plum color lace. The bow-tied girle is of the identical velveteen (has a grained crepe-like weave) which fashions the wide cape-sleeved wrap.

Floss Fringe

As an amusing change from ostrich capes for evening wear, Schiaparelli has introduced an imitation of feathers, made of bright artificial floss.

NEW LACE EFFECTS SEEN IN LINGERIE

Newest additions to lingerie collections show fresh treatments of the embroidered and appliqued lace decoration which is worked to contribute a "different" appearance by reason of the posing of two layers of net. In addition to giving much greater sturdiness to this delicate form of trimming, the use of the two layers gives a flower-like background which is not achieved by the single layer. Through this the flower appliques are worked or embroidered posed, or the lace appliqued.

Washable Satins Hit New

Note in Spectator Frocks
Pastel satins, washable, of course, in delectable shades of frappe pink and ice blue, strike a new note in spectator frocks and give promise of a big fall season for this popular fabric. Spanish and Mexican plaids and hot-country colors hold sway in new beach skirts, sweeping wide, but cut short at the knee. With these are worn halter tops, big-brimmed hats with a Spanish or Mexican sweep, and colorful scarfs or sashes.

Cottons and linens score for the simple, play-time frock, with linen shantung and Chinese damask a bit newer than gingham and seersucker. Funky shoulder bows, square necklines, reversible collars that can be worn either front or back, concealed pleats, and a maximum of buttons lend charming variety. Potter's blue, lettuce green and sunny yellows give verve to the plain-color frock which is rivaling stripes, plaids and checks in importance.

Popular Costumes

Belts are the smartest thing you can wear for luncheons and afternoon affairs up to the dinner hour when a softer line is favored.

"Back Fine" on Gown

"Back fine" is a feature of a stunning new negligee in heavy satin of soft blue. They are accented by bands of bright coral.

ROBBERS' ROOST

by **Zane Grey**

Copyright—WNU Service.

SYNOPSIS

Jim Wall, young cowpuncher from Wyoming, in the early days of the cattle industry, seeks a new field in Utah. He meets Hank Hays.

CHAPTER I—Continued

"Wal, friend, the string is that I want to locate you. Bend over here, so I can get your ear," went on Hays, confidentially, and when Wall had complied he said: "I run true to form today when I held up that stranger. But it was a blunder, considerin' the iron I have in the fire. Now, listen. Lately I've got in with a rancher over here in the Henry mountains. He's an Englishman with more money than sense. Bought ten thousand head of cattle an' a lot of hosses. There's some tough cowboy outfits over there, an' more'n one real rustler outfit. Wal, this Englishman—his name is Herrick—got the idee of hirin' all the hands available, cowpunchers, range-riders, gun-toters an' plain out-an'-out bad men. An' to throw this select outfit agin the whole country. What do you think of that idee?"

"Original, to say the least. But not practical, unless he can reform bad men," replied Wall, much interested.

"Wal, exactly. But I'm not concerned with the practicality of it. Herrick took a shine to me, made me what he calls his superintendent, an' sent me all over lookin' for hard-shootin', hard-ridin' men. An' that's how you happened to run into me. I call it good luck for us both."

"You've taken me for one of the hard-shootin', hard-ridin' kind, eh?"

"Wal, I want you in my outfit," resumed Hays. "Brad didn't cotton to you, I seen first off. But he's a gun-thrower himself. All the same he's in my outfit an' I reckon you might get along. It's Hecsesman who sticks in my craw."

"Hecsesman. Who is he?"

"Hecsesman is the rustler of Dragon Canyon. None of the ranchers over round here know that, but I know it. He's got a small outfit, but shore enough bad. An' in some way he got wind of Herrick's scheme. Darned if he didn't pack over to the Henrys with his outfit an' start ridin' for him."

"Hecsesman saw the same opportunity as you?" queried Wall, quietly.

"Wal, yes. I was comin' to that," resumed Hays, gruffly. "I got the upper hand, though, an' I'll be the boss. That'll lead to friction. There'll be two factions sooner or later, an' the sooner that fight comes off the better."

"I see. Less of a division of spoils."

"Wall, I'm no rustler," snapped Hays.

"Excuse me. If it isn't impertinent, may I ask just what you are?"

"Ever hear of Henry Plummer?"

"Can't remember if I did."

"Wal, Plummer flourished some ten an' more years ago, first in Montana an' later in Idaho. He was the greatest robber the West ever developed. Educated man of good family, born in the East. But the gold fever called an' he was not the kind of a man to dig. He operated on the placer mines. Was an officer of the law while he was head of the biggest robber gang the frontier ever knew. From Bannock to Lewiston he kept the miners, the stages, the Wells Fargo in terror for years. . . . Wal, I seen Plummer hanged. I was one of his gang, a young man then in years."

"Thanks for the confidence, Hays," returned Wall, in surprise. "You must have strong interest in me to tell that."

"Shore I have. But I don't care to be classed as a rustler."

"Too low down, eh?"

"It certainly ain't any two-bit cattle stealin'. . . . However, that's not the point between you an' me. What I want to know is, will you take a job in my outfit?"

"That depends, Hays," returned Wall.

"Any scruples about it? Remember, I come clean with you."

"No. I broke jail in Cheyenne."

"What was you in for?"

"Shot a man. They were goin' to hang me."

"Ahuh. Was that square?"

"I didn't think so. . . . Had to kill the jailer to get out."

"When was all this, Wall?"

"Some years ago."

"An' since then?"

"Been shootin' my way out of one jam after another."

"Much obliged," replied Hays, feelingly. "Wal, you're a hunted man. You're broke. It's about where you cross the divide."

"One more question. What 'bout this Herrick's faculty?"

"Wal, he ain't got any," rejoined Hays. "We heard somethin' about a mister comin' out, but she never turned up."

"Hecsesman? It'd be a h— of a note if she did."

"Wal, this shore ain't no country for women."

It seemed to Jim Wall that this sally completed a definitely conscious feeling in his mind toward the self-confessed robber. If it had not been dislike and disgust, before, it certainly fixed at that now. Wall sensed a gathering interest in the situation he had happened upon.

Hays called for drinks and insisted on a handshake which he executed solemnly, as if it were a compact which implied honor even among thieves. Shortly afterwards the saloon gradually began to fill with loud-voiced, heavily booted men.

Among them were Happy Jack, Lincoln and a giant of a man with a russet beard, whom Hays introduced as Montana. Then a man, undoubtedly a trapper, entered. He wore buckskin and seemed out of place in that crowd. The bartender, Red, did a thriving business.

"Seems to be no lack of money," observed Wall to the watchful Hays.

"Where do they get it?"

"Wal, you're surprised, I see. So was I. This burg here is a stage stop for points in Utah an' west. Lots of travel. But there's big cattle ranges off toward the Henrys."

"I see. But at that bar there are half a dozen men who are not travelers or ranchers or riders."

"Wal, for that matter, all men in these diggin's have got to be riders."

"Sister? It'd Be a H— of a Note if She Did."

It's a long way from one waterin' place to another. But you hit into things, at that. There's four or five fellows I never seen before."

"Who's the tall one, with his hat pulled down, so you can only see his black, pointed beard?"

"That's Morley. Claims to be a rancher. But if he ain't the boss of the Black Dragon outfit, I'll eat him."

"And the loud feller—the one with the plaid vest?"

"His name is Stud somethin' or other. Seen him before an' ain't crazy about him."

"Let's play poker."

"Shore, but not just among ourselves."

"Got any money, Hank?" asked Happy Jack.

"Did you ever see me broke? Brad, go dig up some suckers. But not that hombre they call Stud. He didn't get that name playin' solitaire."

There were only two large gaming tables, one of which was in use. Lincoln went among the men to solicit players, returning with Morley and the russet-bearded giant, Montana. There was no formality or greeting between Hays and these men. It was dog eat dog, Wall grasped.

"Make it six-handed. Come an' set in, Wal," said Hays. "Friendly little game of draw. Sky limit."

Wall laughed. "I couldn't play penny ante."

"Wal, I'll stake you."

"No, thanks. I'd rather watch."

"Excuse me, sir, but we don't care for watchers," interposed Morley.

No sooner had they seated themselves than the man Hays had called Stud strode up.

"Am I bein' left out of this on purpose?" he demanded, and evidently he addressed Hays.

"Lincoln got up the game," replied Hays, coolly.

"You ask my friends to set in, an' not me."

"Wal, if you're so keen about it, why set in with us," went on Hays, fingering a deck of cards. "But if you want to know bad, I'm not stuck on playin' with you."

"Mean that to insult me?" Stud queried, sharply, his right hand rising to the lapel of his open vest. If Wall had not observed the bulge of two guns inside this vest he would have divined from Stud's action that there was one at least.

"Not at all," replied Hays, leaning back in his chair. That significant movement of Stud's had not been lost upon him. A little cold glint appeared in his pale eyes. "Reckon you're too slick a poker player for Hank Hays. I want a run for my money."

"Slick, eh? Wal, I don't mind bein' called that. It's a compliment. I've yet to see the gambler who wouldn't be slick if he could. But when you ask my pardners to play an' not me—that's different."

"Set in, Stud," rejoined Hays civilly, as he began to shuffle the cards. "I feel lucky tonight. Last time you had it all your way."

The game began then with Happy Jack and Wall looking on. Morley made rather a pointed move and re-

mark anent Wall's standing behind him.

"Shore I'll change seats with you," replied Hays, obligingly, but it was plain he felt irritated.

"Never mind, Hays," interposed Wall, deliberately. "The gentleman evidently fears I'll tip off his cards. So I'll stand behind you, if I may."

CHAPTER II

From the very first deal Hays was lucky. Morley stayed about even. Brad Lincoln lost more than he won. The giant Montana was a close, wary gambler, playing only when he had good cards. Stud was undoubtedly a player who required the stimulation and zest of opposition. But he could not wait for luck to change. He had to be in every hand. Moreover, he was not adept enough with the cards to deal himself a good hand when his turn came. He grew so sullen that Wall left off watching and returned to the fireside.

But presently he had cause to attend more keenly than ever to this card game. The drift of conversation wore toward an inevitable fight. These men were vicious characters. Wall knew that life out here was raw. There was no law except that of the six-shooter.

While he bent a more penetrating gaze upon Stud, to whom his attention gravitated, Wall saw him perform a trick with the cards that was pretty clever, and could not have been discerned except from Wall's position.

Nevertheless, sickle fortune most certainly had picked on Stud. He bet this hand to the limit of his cash, and then, such was his confidence, he borrowed from Morley. Still he could not force Hays to call. He fell from elation to consternation, then to doubt, from doubt to dismay, and from this to a gathering impotent rage, all of which proved how poor a gambler he was. When at last he rasped out:

"Wal, I call! Here's mine."

He slammed down an ace full. Hays had drawn three cards.

"Stud, I hate to show you this hand," drawled Hays.

"Yes, you do! Lay it down. I called you."

Whereupon Hays gently spread out four ten spots, and then with greedy hands raked in the stakes.

Stud stared with burning eyes. "Three-card draw! . . . You come in with a pair of tens!"

"None. I held up one ten an' the ace," replied Hays, nonchalantly. "I had a hunch, Stud."

"You'd steal coppers off a dead man's eyes."

"Haw! Haw!" bawled the victorious gambler. But he was the only one of the six players who seemed to see anything funny in the situation. That dawned upon him. "Stud, I was takin' that crack of yours humorous."

"Was you?" snapped Stud.

"Shore I was," returned Hays, with congealing voice.

"Wal, I didn't mean it humorous," Stud retorted.

"Ahuh. Come to look at you I see you ain't feelin' gay. Suppose you say just what you did mean."

"I meant what I said."

"Shore, I'm not so awful thick. But apply that crack to this here card game an' my playin'."

"Hays, you palmed them three ten-spots," declared Stud hotly.

Then there was quick action and the rasp of scraping chairs, and the tumbling over of a box seat. Stud and Hays were left alone at the table.

"You're a liar!" hissed Hays, suddenly black in the face.

Here Jim Wall thought it was time to intervene. He read the glint in Stud's eyes. Hays was at a disadvantage, so far as drawing a gun was concerned. And Wall saw that Stud could and would kill him.

"Hold on there," called Wall, in a voice that made both men freeze.

Hays did not turn to Wall, but he spoke: "Pard, lay off. I can handle this feller."

"Take care, stranger," warned Stud, who appeared to be able to watch both Hays and Wall at once. They were, however, almost in line. "This ain't any of your mix."

"I just wanted to tell Hays I saw you slip an ace from the bottom of the deck," said Wall. He might as well have told of Hays' irregularities.

"Wot! He filled his ace full that way?" roared Hays.

"He most certainly did."

"All right let it go at that," replied Stud, deadly cold. "If you can say honest that you haven't pulled any tricks—go for your gun. Otherwise keep your shirt on."

That unexpected sally exemplified the peculiar conception of honor among thieves. It silenced Hays. The little gambler knew his man and shifted his deadly intent to a more doubtful issue.

"Jim Wall, eh?" he queried, insolently.

"At your service," retorted Wall. He divined the workings of the little gambler's mind. Stud needed to have more time, for the thing that made decision hard to reach was the quality of this stranger. His motive was more deadly than his will, or his power to execute. All this Jim Wall knew. It was the difference between the two men.

"I'm admittin' I cheated," said Stud, harshly. "But I ain't standin' to be tipped off by a stranger."

"Well, what're you going to do about it?" asked Wall, while the spectators of the drama almost held their breath.

Stud's lean, dark, little hands lifted quivering from the table.

"Don't draw!" yelled Wall. "The man doesn't live who can sit at a table and beat me to a gun."

TO BE CONTINUED.

FROCK BETTY-LOU WILL REMEMBER

PATTERN 1918

Not every mother keeps in mind all the time quite how important a little girl's frocks are. Of course she should look pretty every day of her young life . . . that goes without saying! But don't you remember your "little girl" frocks? Well, Betty-Lou is going to do the same thing. Here is a charming thing for her to recall. Epaullets that flare crisply over youthful shoulders and turn into a little cap in the back . . . neat, trim pleats which look smart and permit a girl to play to her heart's content. Lovely in swiss or dainty or volle.

Pattern 1918 is available in sizes 6, 8, 10, 12, and 14. Size 8 takes 2 3/4 yards 56-inch fabric and 3 3/4 yards edging. Illustrated step-by-step sewing instructions included.

Send FIFTEEN CENTS (15c) in coins or stamps (coins preferred) for this pattern. Write plainly name, address and style number. BE SURE TO STATE SIZE.

Address orders to Sewing Circle Pattern Department, 243 West Seventeenth Street, New York City.

Smiles

A WORSE AILMENT

Auntie—Tommy, won't you have another piece of this shortcake?
Tommy—No, I thank you.
Auntie—You seem to be suffering from loss of appetite.
Tommy—It ain't loss of appetite. What I'm suffering from is politeness.

Round Them Out

Lady of the House—Yes, I have an old pair of my husband's trousers, but I'm afraid they're too large round the waist for you.
Tramp—Well, couldn't you gimme a dinner that would make 'em fit?—London Opinion.

Big Business

"We had a large party to supper last night."
"Business acquaintances?"
"No; just the wife's mother."—London Tit-Bits.

Location

Lady—Oh, fireman, save my Bot-tle!!!
Fireman—Yes, lady—which is his bedroom?

EDITORIAL COLUMN

Rising Food Prices

Albuquerque Journal:

An increase in the price of milk that is to be considered Monday by the dairy industry is a forecast of what may be expected generally, in the food line in the wake of the most severe drouth the country has experienced. The department of agriculture's crop estimate, based on conditions on August 1, forecast the smallest corn crop in 52 years and with other crops and forage being almost as short.

Conditions since that time have not improved, but have grown worse each day. Cattle are being slaughtered, sheep are to be disposed of in the same manner and while Secretary of Agriculture Wallace denies that there is to be a food shortage, he readily admits that prices will be higher. The situation is critical.

The government officials are taking steps to prevent profiteering in food, but they will be unable to control the "natural" tendencies and these higher prices will cut sharply into the meagre wages of millions who are now struggling to feed their families.

The situation cannot help but cause the American public to wonder and criticize more sharply, the policy of the AAA, in reduction of surpluses of agricultural commodities, destruction of crops, and all the unnatural steps that were taken when we had an overabundance of everything with millions of people out of work and needy.

Prof. Tugwell said in a recent speech to a gathering of farmers that he could remember that when plowing in his boyhood, he would always get his boots muddy, which caused one of the ladies to remark: "Ain't he wonderful; he can remember when there was mud!" A farmer sitting close by, said: "Any 'guff' who would try to plow when it was muddy, ought to be sent to a house of correction."—Ex.

Whenever Gen. Johnson makes a mistake, he always gets mad at everybody.—Tucumcari News.

The AAA, seeing the handwriting on the wall, has now turned its tune and is planning to adopt the ancient method of Joseph & Pharaoh, stopping the destruction of livestock and crops and will turn its attention to conserving against future calamities like the drouth. Is that a part of the New Deal?

Let's see: Whose Outlook did you see it in? Remember, thou shalt not act the kleptomaniac with thy neighbor's wife, his ox, his burro nor his newspaper.

The FIRESIDE PHILOSOPHER

By ALFRED SIGGS

Tricksters can't face a steady eye.
Harsh words always hurt the speaker.
Adverse criticism often is merely jealousy.
Mean people always expect most generosity.
Some folk find happiness in being unhappy.
No man ever realized fully his potentialities.
It is easier to excuse our bad habits than to overcome them.

SUCH IS LIFE—He's Trying!

By Charles Sughroe

Demand for Liquor Not What Expected

Consumption Is Not a Half That of Pre-Dry Era.

Washington—Either the American thirst for liquor is not what it used to be or the bootlegger is doing a better business than his legal competitor. Whatever the cause, it now appears that the consumption of legal liquor in the first year of repeal will be considerably less than half the amount consumed in a normal year of the pre-prohibition era.

The legal liquor industry that sprang up almost overnight after 13 years of dryness in finding its dream of quick profits only a dream, and heavy losses are threatening to close down distilleries and retail establishments throughout the country. Imported wines and liquors are lying in warehouses and there is more than ample liquor now on hand to satisfy even an unprecedented demand.

In short, figures issued by the Treasury department and by the code authority for the distilling industry indicate a surprising failure on the part of the drinking public to consume the amount of liquor it had been expected to consume on the basis of past performances.

Blame Bootleggers. Spokenmen for both the government and the distilling industry were inclined to attribute this failure to the continued competition of illicit liquor, rather than to any loss of appetite on the part of drinking Americans. They blamed the high price of legal liquor

and representatives of the industry went further to blame the high prices on high taxes.

What with federal taxes of \$2 a gallon, state taxes ranging even higher in some places, and heavy licensing fees in nearly every locality, members of the industry argue, prices of legal liquor cannot be low enough to compete with the prices of illegal liquor on which no tax is paid at all.

Moreover, according to the industry's spokesmen, repeal did not completely change the drinking habits developed during the thirteen years' reign of the bootlegger. The illicit dealer is still highly patronized, they declare, and in one quarter it was estimated that for every gallon of legal, tax paid liquor consumed, two gallons of illicit, untaxed liquor has been distributed.

During prohibition, it is estimated, some 100,000,000 gallons of bootleg liquor were consumed each year, and the legal liquor industry argues that because of high prices, which they blame on high taxes, much of this huge illicit traffic still exists.

Dr. James M. Doran, chairman of the Distilled Spirits Institute, distillers' code authority, estimates that more than 30,000,000 gallons of legal liquor will be consumed this year on the basis of consumption up to June. This, he pointed out, is just about half the amount of liquor consumed in even the leanest pre-prohibition years. Annual normal consumption prior to the dry era, according to Doctor Doran, was about 84,000,000 gallons a year.

Imports Are Down.

While the domestic industry is confronting a serious problem due to the unexpectedly low demand for legal spirits, the foreign producer and importer is likewise faring badly in the American market, figures compiled by the Treasury department authorities show.

Since repeal became a reality on December 5, the treasury disclosed, imports of liquor have totaled 8,204,227 gallons. Prior to that date, some 40,111 gallons were on hand in bonded warehouses, bringing the total supplies of foreign liquor in this country up to June 30 to 8,504,333 gallons.

Only 3,743,819 gallons have been withdrawn, however, leaving 4,500,520 gallons of imported whiskies and spirits still unused in the warehouses. Allowing for present stocks on retail shelves, the treasury's figures would indicate that less than 3,700,000 gallons of foreign liquor have been consumed in this country in the eight months since prohibition ended.

At the same time the lack of demand has caused importers to fall far short of the amount of foreign liquor they expected to bring to American shores after prohibition ended. Imports have amounted to only two-fifths of the quotas allowed by the control board for the period between December 5 and April 30. Only about one-fifth of the December-April quota, moreover, has moved into consumptive channels.

A TRIBUTE TO MARIE CURIE

By LEONARD A. BARRETT

No discovery has contributed more to alleviate human suffering than the research work of Mme. Curie in the field of radium. What Paderewski does for music, Mme. Curie accomplished for science. Both were born in the little country of Poland. The same spirit of perseverance permeated both of these Polish subjects, and the same altruistic passion motivated their tireless work.

Paderewski continues to interpret to the world the finest in music, while the work of Mme. Curie came to an end in her recent death at the early age of sixty-six.

"With pernicious anemia sapping her vitality, the little Polish woman did not have sufficient strength to overcome," so read the press dispatches; but, from the French scientists come the words, "A long accumulation of radiations during her career as a scientist was a contributing factor to her death."

Marie Curie was born at Warsaw in Russian Poland in 1867. Although the

"Absolute Leader"

Hubert Schnuch, testifying before the congressional committee investigating un-American activities, described himself as "absolute leader" of the Friends of New Germany in the United States, a pro-Nazi organization. He was elected to the post at a national convention held in New York on July 1, he revealed.

wife of a celebrated French chemist, Pierre Curie, who won distinction in her own name. Among the most notable honors conferred upon her was the Nobel prize, which was given to her on two occasions, the only person who was ever thus favored. After the death of her distinguished husband she continued her research work at the Sorbonne in France.

It is very frequently argued that a career for a woman is incompatible with the responsibility of being a wife and mother. Not so with Mme. Curie. Between her husband and herself there was a bond of great love and admiration. She was her husband's helpmate in his professional work as well as the mistress of his home and mother of his child, for Mme. Curie did have a child, a daughter, who married a scientist. Rumor has it that the daughter and her husband will now continue the work of her celebrated parents.

The disease which has baffled the skill of physicians has been cancer. With the discovery of radium an important advance has been made in effecting a cure. When this dreaded disease is finally conquered, humanity will owe much to the name of Curie. Simplicity is characteristic of genius. The request of Mme. Curie was that no display take place at her funeral. Observing this request her frail body was laid to rest in a little cemetery in Paris. It is beyond reason to think that either France or Poland will ever let the world forget its great debt to the discoverer of radium.

Old Army Game. Jed Tankins says it's the old Army game for a man to act proud and haughty when you ask him a question, the object being to conceal the fact that he doesn't know the answer.

The Household

By Lydia Le Baron Walker

Interesting Examples of Platted Plaid Trimming on Frocks, Sofa Cushions, and Draperies.

PLATTED plaids are novel. They form attractive ornamentations for useful and fancy articles and for frocks. The plaids are open showing the foundation material as a background. They are of the simplest construction. They require either a very accurate eye—or a ruler. The latter is advised, as with it the work is made very easy. Rule the lines straight with a pencil. They will be concealed entirely by the material sewed over them.

This material may be very narrow folds of a contrasting textile, of rickrack braid, of ribbon, fancy braids, etc. Rickrack is a favorite medium for making these platted plaids. One color alone may be used or two or three, each different from the color of the foundation, as well as from each other. Narrow ribbon is another medium ready to use, and so also are trimming braids.

Textiles can be made into narrow strips for plating by cutting strips from 1/2 to 1 inch wide and sewing the lengthwise edges together. This can be done without basting if edges are even and are pinned together at intervals. Run a small safety pin through one end of a strip and shut it securely. Push it down through the tubing and when it comes out at the other end of the strip the tubing will be turned right side out and all raw edges be concealed.

Ruling the Lines.

Rule lines in parallel rows on the material to be ornamented. Cross these lines with equally spaced lines extending over the first ones at right angles. Just what this distance shall be is determined by the width of the braid, ribbon, or textile strands. When using rickrack it must be reckoned as wide as the distance between tips

on one edge and the other. The braid is undulating, and so, while narrow in itself, this waving line spreads to two or three times the actual width of the braid.

The braid or textile strands, etc., when basted to the foundation must weave alternately over and under the crossing strands, leaving the openwork spacing. Narrow strands can be attached by machine—through the lengthwise center. Rickrack is generally so sewed on. When strands are wide enough to curl when sewed down so, have each edge stitched down.

The trimming is delightfully effective in corners of sofa cushions and table covers with two or three of the middle strands running straight and uncrossed between the corner pieces. Or the plating can be in triangular form across opposite ends of a square sofa cushion cover, with an untrimmed diagonal section through the center. A row of platted plaid makes a smart finish or border around the lower part of a blouse, down shoulder seams and for cuffs.

Hay Fever Caused

by Russian Thistle

Salt Lake City, Utah.—The Russian thistle is the greatest single source of hay fever in America, Dr. Ray M. Balyeat of the University of Oklahoma told physicians from western states gathered here in their annual convention. The female cottonwood tree, also a prolific source of the ailment, should be banned by law, he declared. Cedars and elms likewise spread irritating pollen, he said.

First "New Deal" Cabinet Baby

Little Marcus Woodring, son of Assistant Secretary of War and Mrs. Harry Woodring, has the honor of being the first baby born in the Roosevelt cabinet. The photograph shows the boy with his parents at their estate near Oklaton, Md.

Sets World Record

It has been officially announced that Sgt. A. M. Stanwix of Troop G, New York state troopers, made a new world's pistol record at Albany by scoring 45 bulls-eyes out of 45 shots, firing the army dismounted course with a .25 caliber revolver. Careful investigation showed this perfect score was without precedent.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

(By REV. P. R. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago.)

Lesson for August 19

AMOS DENOUNCES SELF-INDULGENCE

(Temperance Lesson).

LESSON TEXT—Amos 6:1-14. GOLDEN TEXT—Seek good, and not evil, that ye may live; and so the Lord, the God of hosts, shall be with you, as ye have spoken, Amos 5:14. PRIMARY TOPIC—When People Are Selfish.

JUNIOR TOPIC—Amos' Famous Sermon.

INTERMEDIATE AND SENIOR TOPIC—Dangers of Self-Indulgence.

YOUNG PEOPLE AND ADULT TOPIC—Destruction Through Indulgence.

Our lesson is a temperance lesson and applies to other things than indulgence in intoxicating liquors. Our age is intoxicated with the love of pleasure, pursuit of gain, and various kinds of self-ambition.

I. Israel's Reckless Security (vv. 1-3).

They were blind to the perils that surrounded them. They trusted in the mountains of Samaria for their protection. They regarded their city as impregnable. They seemed to have regarded the utterances of Amos as the dreams of a fanatic. The same blunders are being made in America by those who are depending upon money and armaments instead of righteousness as the national defense.

II. Israel's Extreme Luxury (vv. 4-6).

Periods of prosperity are always characterized by luxury. The luxury of Israel expressed itself in:

1. Extravagant furniture (v. 4). They had beds of ivory—perhaps wood inlaid with ivory. 2. Indolence (v. 4). Many lazily stretched themselves on their couches—lived lives of indolence. Such is the way of many in America today.

3. Feasted on delicacies (v. 4). The implication here is that they had their dainties out of season. They bought what they desired, regardless of what it cost.

4. Adorned their feasts with music (v. 5). They sang idle songs—even invented musical instruments for this purpose. How like the times in which we live! By means of the radio, vulgar and even licentious sentiments are carried to our ears through the noble art of music.

5. They drank wine (v. 6). They were not satisfied with ordinary drinking vessels—they drank from bowls, indicating excessive drinking. They were so mastered by the intoxicating cup that their feasts which were adorned with the refinement of music ended in drunken debauchery.

III. Israel's Failure to Grieve for Joseph (v. 6).

Joseph here stands for Ephraim and Manasseh, his two sons. Ephraim became the principal tribe of the northern kingdom, so Joseph is used as a synonym for the nation.

IV. The Inevitable Consequence (vv. 7-11).

1. They shall go into captivity (v. 7). The northern kingdom was the first in sin and therefore first to go into captivity.

2. The calamitous circumstances of the siege of Samaria (vv. 8-11). The city with all its inhabitants was to be delivered up to its enemies.

a. Israel, the first in rank as well as first in numbers and power, went first into captivity.

b. Their revelry to cease (v. 7). There was to be a rude awakening from their drunken carousals.

c. God's judgment upon the city in strange contrast to his love for Jacob (v. 8). Men, women, and children went into captivity at the hands of the Assyrians.

d. The surety of God's commandment (v. 11). The destruction was to be universal. The rich and the poor, the large and the small were included. God has sworn that his judgments shall fall. He is a God of justice. He is also the God of hosts, the controller of the whole universe, therefore none can escape. Though God sometimes waits long, he does not forget.

V. Israel's Ridiculous Conduct Exposed (vv. 12-14).

1. It was as absurd as plowing upon a rock with oxen. Their hard hearts were as unresponsive to the call of God as rocks are to the plow of the farmer (v. 12).

2. Their boasted power as a nation (v. 13). Outwardly the nation was characterized by great wealth and splendor. This all was to pass away with the stroke of divine judgment.

3. A nation raised up against them (v. 14). God raised up the Assyrian nation to punish Israel. The very fortified cities which they boasted of, Amos tells, would be taken away and used against them.

Nearness

Nearness of life to the Saviour will necessarily involve greatness of love to him. As nearness to the sun increases the temperature of the various planets, so near and intimate communion with Jesus raises the heat of the soul's affections toward him—Spurgeon.

Heavenlies

The man who thinks in terms of the heavenlies, and lives as he thinks, will never be found walking "in the counsel of the ungodly."

Washington Digest

National Topics Interpreted
by William Bruckart

Washington.—While Europe stews and wonders what eventually is coming out of the Austria-Czechoslovakian trouble, there is many a furrowed brow in U.S. Worry

Washington these days concerning our own nation's status in case the need for a sturdy national defense arises. The worries of our own government are not lessened by the weaknesses which Newton D. Baker, former secretary of war, and his committee of experts reported they had observed in our military air service. But from what I can learn, there is some satisfaction among those charged with responsibility of government because the vulnerable spots were pointed out before we are called upon to resort to that branch of our national defense. Having knowledge of the exact situation surely should be of some help.

The Baker board, as it has come to be known, was the fifteenth in sixteen years that has given study to our air force. It apparently went straight to the core of the trouble and said the chief problem, in effect, was a bit or miss policy with respect to air development. Since congress is the policy-making body of our nation, it must accept the responsibility, but my own research and acquaintance with matters relating to the appropriation of funds for the government leads me to believe that the budget bureau has been none too wise in determining expenditures for recommendation to congress.

Recommendations by the Baker board call first for establishment of a military air force of more than 2,200 planes, a force second to none in the world. An air force of young men is advised, a corps of highly trained men who know how to handle their planes that, in event of attacks, the air service will not find itself sacrificing good blood such as occurred in the comparatively safe business of transporting the mails. The board said the government should encourage an air industry in the United States to provide an adequate resource for the nation. If that is done, the report pointed out, there is a reserve strength developed that provides for revenue in peace and strength in war.

I have little confidence that congress is going to pay much attention to the Baker board's conclusions. It seldom has paid any attention to such expert advice. President Roosevelt asked the board to go to the bottom of the problem, however, and it has done so. At least the country is informed, and if its representatives in the house or the senate do not perform in a way that will correct the condition, then we all will know where to place the blame.

For example, the report proposes that there be adequate and continuing appropriations for expansion of the air service of the army. In that recommendation the board struck a key note. It said "continuing" appropriations were necessary, and anyone can see such a view is correct because otherwise a big sum is appropriated one year and wasted work results when the brothers who hold the purse strings say in the next year that they are not going to allow any more such expenditures. It is exactly as though one started to build a house and after the walls were up, the money ran out and no roof could be put on. The structure remains incomplete, no good to anyone.

This question of appropriations has been the base of contention all along. I do not mean to say that the "brains" of the War department always have been capable of guiding the program effectively, but if congress had pursued a sound policy, a policy that at least was consistent, I am assured by many competent authorities the army air service would not be where it is today.

The Baker board, like most of its predecessors, declined to support the much agitated proposal for an air service detached from the army and navy. Only one member of the board, James Doolittle, the well known flyer, held that view. The board as a whole thought the air service ought to be an integral part of the military or naval branches of the service, and there is every evidence that this is one section of the recommendation that will be accepted by congress without argument. The board saw many difficulties possible under a separate air service, the chief of which is the lack of co-ordination in defense, as well as in attack, in event of war.

But while the Baker report offers numerous technical improvements for consideration and advocates changes here and there in methods of developing the air service, those folks in Washington who have witnessed the fate of the earlier surveys hold little hope for good to come from this one.

Mother nature has her own way of working things out and in her functions apparently **Mother Nature** she does not need **Needs No Help** or wish the aid of professional theorists. The current proof of this is the drought and the effect it is having on the agricultural adjustment program. There is very serious consideration being given to suspension of the scheme for curtailing production. Secretary Wallace and Chester Davis, the agri-

cultural administrator, are worried over the prospects although they naturally are saying little. It is known, however, that one of the things they are thinking about is abandonment of the contracts for curtailment of crops because the extreme drought has made the reduction plans unworkable and even dangerous to the country's food stocks.

So it begins to appear that there will have to be revision of the agricultural program upon which the administration has worked so desperately and upon which it has expended so much money.

The Agricultural department is authority for the statement that the drought already has removed any probability of a wheat surplus. To this shortage has been added unfavorable conditions abroad that have resulted in a general world total of wheat probably as much as 400,000,000 bushels below what is held to be an average yield. This is happening just when many of the wheat-growing nations of the world were approaching the point of a binding agreement that would hold down the quantity of wheat entering into export trade and thereby force crop reduction. But the authorities tell me the movement for an international agreement naturally is going to die. There being no dire necessity for it, the interest behind it will lag. I suppose there will be few, if any, further moves made on it until years of bumper crops again are upon us and a gigantic surplus of world wheat stares farmers in the face. That is usually the case.

It likely will be some weeks before the Agricultural department can formulate a definite course of action as to revision of the crop reduction plans.

President Roosevelt's return is eagerly awaited among some of the "brain trust" who

Brain Trust's are variously reported in Washington as desiring the Chief Executive to intervene in their own little war. There are a number of minor disputes taking shape among the professors and the so-called young liberals, and I am informed in what I believe to be authentic quarters that anti-administration agents are fomenting more trouble among the group that has served as such important advisers to the President during his term. Obviously, none will admit it, but there is every reason to believe that some keen individuals who are not in sympathy with the New Deal are spreading poison among the brain trusters about each other. The natural result of this, of course, is to cause the young liberals to be suspicious of each other and that kind of suspicion nearly always is followed by an open break.

The stories in current circulation in Washington are that some of the brain trusters are at odds with Raymond Moley, for a time the No. 1 brain trust man with the President but now the editor of a magazine, and that several of those still in the administration are saying unkind things about others who still are serving here. It is a situation not without its humorous side, and from having seen such factions develop before in the government, I imagine this one will turn out to be a real comedy.

The economic events of the last few weeks indicate to some Washington observers that a new **See New Crisis** is approaching in the depression. August is always a dull month. September is little better from a business standpoint. After that things usually pick up. To get through the next six weeks with drought devastating millions of acres and strikes and riots and military rule and uncertainties among business interests as to what the New Deal of the future holds, there necessarily must be a steady hand and calm judgment. On top of this, of course, is the disturbed international situation, and it is not helping the weary old world to settle down.

Since the kind of government management of business that we have had has not taken us out of the depression, the course immediately becomes problematical. Shall we have more of the same, or expand it beyond its present scope, or shall we retrace our steps and go back to the old days?

In the midst of this turbulent condition, the silly head of inflation of the currency again is arising. Strangely enough, there are many men now talking about inflation seriously when all of their knowledge and all of their training ordinarily would make of them the bitterest of antagonists to such a course on the part of the federal government. Some of them have been in Washington in recent weeks and I gathered from the arguments they advanced that they sincerely believed inflation would do good for the country as a whole, and for themselves in particular. That is the sad part of it: they seem to think that they can pay off their debts and that the average person can pay off his debts easier with an inflated currency, and, therefore, they want to turn the printing process loose.

Washington Newspaper Union.

Up-to-Date Ideas for Decorating Rough Wall

In the summertime persons who delight in having living quarters totally different from those occupied during the winter, often prefer to have their cottages unplastered. And there are other families who find the cost of the plain board walls so much less than plastered, that for economical reasons the walls are left in this unfinished state. But in neither instance does it mean that the walls are left bare. It simply signifies that the treatment is in accord with the scheme of the interior finish.

The spaces between beams offer excellent opportunities for wall hangings of a crude type. There are fascinating Mexican fiber and grass pieces of charming crudeness, yet with genuine artistic feeling which are well suited to some homes of the kind described. Also there are hangings of homespun linen, heavy, and coarse, on which designs are done in coarse cotton, and braid and tape are also introduced for latticed flower pots, baskets, etc., from which the broadly worked stalks, foliage, and flowers are growing or standing out gaily. Burlap in natural color could be used for the foundation, should the home decorator decide to make such a wall hanging.

Play bills, and travel posters are often sufficiently artistic to be attractive decoration for unplastered beamed walls. These travel posters may be from a collection made during trips abroad or across the country, or they may be from some tourists' agency. For seashore cottages, posters of huge ocean liners plowing their way through the waves are appropriate and, with the bright colors in which they are portrayed, they make brilliant spots of color on dull wood walls.

Persons who have a fondness for the theater can sometimes get hold of theatrical posters, or play bills, as they are termed. Some of these are

artistic, some are merely striking, but all give a flavor of the stage to the simple shack.

Shelves fitted in between the upright beams of an unfinished wall supply places for books and ornaments. If these latter are well chosen to suit the cottage idea they give a cozy look, while books always are inviting and welcoming. Old china and pottery have a peculiar charm for these interiors, which should be kept simple but which should also be livened up by the wall schemes.

By Bell Syndicate.—WNU Service.

As Always, Dan Cupid Laughs at Locksmiths

Cupid did a better business in June than in the bride's month of a year ago, reports the Associated Press, which supports its statement with statistics gathered over a wide area. Will all the newly married couples "live happily ever after"? The question is pertinent because there seems to be a difference of opinion among persons supposed to know what sort of mate, the man or woman should choose.

"Marriage of an educated man to an ignorant woman will succeed, whereas the marital ties between an educated woman and a man inferior to her mentally ultimately will be severed by divorce," says Dr. D. P. Wilson, consulting psychologist of the Los Angeles bureau of family relations. Dr. Elsa B. Grove, lecturer at Teachers college, Columbia university, suggested that the cleanliness of a man's bathtub and the neatness of his wardrobe were good indices of character.

Neither time nor reason ever have had much to do with love and marriage—as little, perhaps, as they have had to do with divorce. The march to the altar will proceed without much looking at the road.—Literary Digest.

ALWAYS A STRANGENESS

SAGE ADVICE
Whatever you do let it represent your best.

MRS. WILLIAMS GAINS RELIEF FROM "RHEUMATIC" PAINS

Dr. W. E. Fitch Explains why Natural Mineral Water Often Helpful in Chronic Ailments

Mrs. H. Williams, 16 Princeton Street, Clifton, New Jersey, writes: "I suffered very badly with rheumatism but after taking Crazy Water Crystals I am a different person. They are wonderful. I would not be without them, they did me so much good."

Why is it that a fine natural mineral water, made at home from Crazy Water Crystals has benefited so many thousands suffering from "rheumatic" pains and other chronic ailments?

Dr. W. E. Fitch, noted medical authority on mineral water, in a recent radio talk over the National Broadcasting System stated: "For many years, it has been a mystery even to the medical world just how natural mineral waters produced the amazing results that have made them so popular. Scientific and medical discoveries and research in the last few years, however, are penetrating these secrets of Nature, so that now medical men have a new understanding of the reasons for the power of natural mineral water to relieve suffering. One of these reasons is what is known as secondary mineralization, by which is meant that not only the predominating chemical constituents of a mineral water are of aid but also what are known as the secondary minerals—those present in infinitesimal quantities. The very fact of their being present in this way causes them to have a much more powerful systemic effect than if they were there in larger quantities. Let me recommend wholeheartedly to sufferers from chronic diseases the use of a suitable natural mineral water as a powerful adjuvant."

If you are suffering from "rheumatic" pains, we suggest you investigate Crazy Water Crystals immediately. Ask any of the millions who have used them.

William Edward Fitch, M.D.

Crazy Water Crystals are just minerals crystallized from a great natural mineral water flowing at Mineral Wells, Texas, and Thorsdale, Texas, a type of mineral water that has built one of the world's greatest health resorts. Nothing is added to the minerals, and by dissolving them in plain water you make a fine mineral water at home at a cost of only a few cents a gallon.

A standard sized package, sufficient for three weeks mineral water treatment in your own home costs only \$1.50. Get one today, Crazy Water Co., Mineral Wells, Texas.

are for sale in many drug stores. In the larger cities there are exclusive Crazy Water Crystal stores. See your telephone book.

Millions NOW WANT THE NEW Firestone CENTURY PROGRESS TIRE

THAT TEN MILLION PEOPLE HELPED TO BUILD

MASSIVE, FLAT TREAD
DEEP CUT NON-SKID
GUM-DIPPED CORDS
BROAD HUSKY SHOULDERS

EQUAL OR SUPERIOR TO ANY FIRST QUALITY TIRE BUILT REGARDLESS OF NAME, BRAND, BY WHOM MANUFACTURED OR AT WHAT PRICE OFFERED FOR SALE

THE immediate and enthusiastic acceptance of the new Firestone Century Progress Tire started a tremendous wave of buying that is keeping the Firestone factories running twenty-four hours a day to meet this huge demand.

We know that car owners would replace their thin-worn, dangerous tires if they could get what they wanted in a tire at the price they wanted to pay. We found the answer through ten million visitors to the Firestone Factory at the World's Fair last year. We asked them—"What do you value most in a tire?"—and their answer was—"Give us Blowout Protection, Non-Skid Safety, and Long Wear, at a moderate price."

Drive in to the Firestone Service Dealer or Service Store today! Equip your car with these new Firestone Century Progress Tires, with the massive flat tread, deep-cut non-skid, broad husky shoulders, and Gum-Dipped cords. Tire prices probably never again will be as low as they are today. At these unusually low prices for first grade tires, we make it easy for you to buy not only one tire, but a complete set.

And Remember — with every tire you are protected by the new Firestone Triple Guarantee

- for Unskipped Performance Records
 - for Life Against All Defects
 - for 12 Months Against All Road Hazards*
- (*Six Months in Commercial Service)

In The Probate Court

State of New Mexico) ss. County of Lincoln)
In the Matter of the Estate of Thomas Jefferson Grafton, Deceased. No. 381.

Notice of Administratrix
Notice is hereby given that at the regular July, 1934, Term of the Probate Court of Lincoln County, the undersigned was appointed Administratrix of the above estate, and has qualified as such, and all persons having claims against said estate are hereby required to file same with the administratrix within the time required by law.

Lizzie A. Grafton, Administratrix, Capitan, N.M. A17-37

We notice by several daily papers that Deputy Hubert Reynolds is working out of Texas with Tullia, Texas officers, in the pursuit of Ed "Perchmouth" Stanton, who has been reported committing robberies in Mora county, since his escape from the Lubbock jail.

Theodore Hobbie and John Rowland are in the White Mountains this week, visiting Tom Bingham. Theodore's cousin, who is Forest Fire Guard in that district.

Lottie A. Rice

Yesterday morning at an early hour, Lottie A. Rice, aged 88 and one of the old settlers of this county, passed a way at her home in Lincoln. The Rice family came here about 30 years ago, Mr. Rice being one of the leading mining promoters of that time. He died about 11 years ago.

The sad news coming so close to publication, it was impossible to obtain full particulars of the life and career of that wonderful mother and all we can say at this writing is that short services will be held at the home Saturday at 2 p. m. and at 3:30 the Order of Eastern Star of which deceased was a member will have charge of the remains and will perform the last ritualistic rites at the cemetery at Angus. Full particulars next week.

Baptist Church

The Bible School meets at 10 a. m. We have a place and an interesting study for you. Come.—Lynn Smith, Supt. At 11 a. m. the pastor will bring a message on "The Simplicity of Christianity." At 7:45 p. m., the evening service will begin with a song service. These Sunday evening song services are highly enjoyed by all who are present. Come and join in the singing. After the song service, the pastor will bring the second of a series of sermons on "Songs in the Night."

A. W. Drake, daughter Lavonne Miller and Mr. and Mrs. Ed Miller were here from the Ancho country Wednesday.

E. M. Brickley of the First National Bank, daughter Ruth and sister Ella Brickley will leave tomorrow morning for the Grand Canyon and Yellowstone Park to view the beauties of those wonderful regions. They will be absent several weeks.

FOR SALE—Apples at my orchard in Nogal Canyon, at 2 cents per pound. Come and get 'em. L. E. Host.

Methodist Church

God's Church stands for the highest ideals: truth, honesty, justice, mercy, love, brotherly-kindness, loyalty, meekness and human-helpfulness, all of which constitute true character or Christian personality.

Help to make each life an "asset" rather than leave it to become a "liability." Therefore, by your loyalty to the church, help it to give to the individual and the community that one eternal thing, "Character." Come!
Sunday School at 10 a. m.
Preaching Service at 8 p. m.

Interpreting the Washington News—

You are vitally interested today in what is happening at the national capital. A new act of Congress or an order issued by one of the multitude of government departments may have a far-reaching effect that is not apparent in the routine news reports.

It is an interpretation of these government activities that is needed to enable you to know just what it is all about and how it all may affect you. It is such an interpretation of the capital news that this paper is providing for you in William Bruckart's WASHINGTON DIGEST which is being published each week. You will find it full of just the kind of information you want.

Let's see: Whose Outlook did you see it in? Remember, thou shalt not act the kleptomaniac with thy neighbor's wife, his ox, his burro nor his newspaper.
