CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, JUNE 28, 1935

PRICE \$2.00 THE YEAR

Lyric Theatre

R. A. Walker, Owner

—Friday and Saturday—

ZANE GREY'S

"Wagon Wheels"

Featuring Rudolph Scott, Gail Patrick and Monte Blue. An epic of the Oregon Trail! On the trackless prairies—over mountain peaks—savages stalk their trail. A rousing drama of fighting men and the women they love. Freight wagons used in freighting ore into California—in pioneer days. Giant Redwood trees and an old hotel which was built in 1856. Also Sport Reel and Popeye & Bluto.

—Sunday-Monday-Tuesday—

"What Every Woman Knows"

With Helen Hays, Madge Evans and Brian Aherne. Don't tell your husband what every woman knows... He wouldn't believe it anyway unless he saw Helen Hays' new picture. Also "Music in Your Hair" and "Heritage." Matinee Sunday at 2:30 p. m.

Little Teresa Vidaurri entertained a number of her little friends at her home yesterday afternoon, the occasion being her birthday.

To Mrs. Nellie Branum—Many thanks for the beautiful water lilies. They will make a valuable addition to the lily pool at the Burke Gift Shop. Again let us express our appreciation.

Henry Lutz is officiating as night watchman during the absence of Ira Greer, who is again firing for the S. P.

To Fred Greer—Thanks a lot for those beautiful "Ocatillas" for the Burke Outlook Art & Gift Shop. These are of the cactus family, and we hope they will grow. We think they'll make a pretty sight, planted along the Malpais rock fence beside the Gift Shop.

Mesdames Gunther Kröggel and Rita Wharton left Wednesday for Las Cruces to visit friends.

Mrs. C. W. Northrup and daughter Ruth are here this week as guests at the home of Mr. and Mrs. Thos. Cook. They will remain until the latter part of the week, after which they will leave for Colorado, accompanied by Mrs. Cook for a visit to the mountain regions. They will sojourn there until Tommy's vacation period takes place when he will join the party and return with them after he has had his satisfaction of trout fishing.

Dr. M. G. Padon was a business visitor in Santa Fe several days this week. During his absence, D. L. Byron acted as pharmacist.

Miss Helen Rice of the Lincoln-Fort Stanton vicinity, was in town this Thursday. Miss Helen reports that her sister Charlotte, who has been seriously ill of late, is improving nicely.

Mr. and Mrs. J. K. Petty of the Economy Grocery & Meat Market arrived home last evening from California, where they journeyed about two weeks ago to visit Mr. Petty's mother, who has been ill of late, but is recovering nicely. On the return trip, they visited the San Diego Exposition.

Corona News

Mr. and Mrs. Norton Rhodes and son of Hatch are visiting friends here and at Cedarvale.

Mr. and Mrs. George Simpson and Mrs. J. A. Simpson made a business trip to El Paso Tuesday.

Mr. and Mrs. Abell of Albuquerque were attending to business in Corona Saturday. R. A. Perkins accompanied them.

Miss A. L. E. Willingham returned Friday from El Paso where she spent a couple of weeks with relatives.

Miss Della Roberts and Ben Roberts have as guests, their brother-in-law, Mr. Hillemeier, a niece, Miss Alice Roberts and Miss Edna Pfeiffer of Havana, Ill., who arrived Sunday for a stay of three weeks. Several interesting trips are being planned for the visitors.

Leonard McKibben has returned home after an extended vacation in California and Oregon. Mrs. Margaret Rountree of Capitan was a business visitor in Corona last week.

Charles Hutto has returned from Carlbad where he spent the past month.

W. B. Moseley is working at the Corona Service Station.

Miss Jessie Fuller left Wednesday with friends for a vacation in Missouri.

Friday evening at 6:30, Miss Ruby Greenwood became the bride of Mr. Raymond Perkins at a ceremony read by Rev. Goff of the Hot Springs Baptist Church in the presence of a small group of friends and relatives at the home of the groom's sister, Mrs. Herman Hilger. The attendants were Miss Addie Perkins and Mr. Wayne Robinson. A wedding supper was served to the guests. Mr. and Mrs. Perkins remained in Hot Springs for the annual regatta at Elephant Butte Lake and returned Monday to Corona where they will make their home. Mr. Perkins is employed by the Corona Service Station. The best wishes of the community are extended this popular young couple.

Masons' Picnic

Carrizozo Lodge No. 41 A. F. & A. M., will hold a basket picnic on Sunday, June 30, on the Nogal Canyon just above Stearns place. All Masons and their families are cordially invited. Come, bring your baskets and have a wonderful outing.

—Committee.

Yesterday afternoon while attempting to light a gasoline torch on the Warden ranch north of town, Brooks Lewis was badly burned when the torch exploded. His face and arms are painfully burned. He was brot to Johnson's hospital where after receiving medical aid, he was taken to the home of his mother, where he is resting as easy as could be expected under such a trying ordeal.

Conductor Pat Dolan, Mrs. Dolan and children left last night for San Diego, where they will attend the big Exposition and have a grand time.

Gran Quivira will have a Rodeo on July 2 and 3. People from the surrounding country are invited and a great time is assured.

Jack Young of Capitan was a business visitor in town this Tuesday.

July the Fourth

LINCOLN HEARSAY

Mr. and Mrs. W. C. Hilliard, sons Bobby and Billy left Tuesday for their home in Illinois, after a visit with the Phil Laramie family here. They will visit Albuquerque, Santa Fe and Taos on their way home. They were much pleased with our climate and expressed hopes of coming again to Lincoln.

San Juan's Day was celebrated very nicely Monday with mass at the Catholic Church at 9 a. m. and procession, with Father Salvators officiating. In the afternoon, Carrizozo and Lincoln played baseball. Although we lost 13 to 9, we can say that the Carrizozo boys are a nice bunch of sports and we hope to play with them again soon. Among the several who came from Carrizozo to witness the game were our friends, Joe Chavez, Marcial St. John, Mr. Sabino Vidaurri and Abe Sanchez. "Old Abe" and Sarapio Montes umpired. The Picacho Cabbage Growers beat Lincoln Sunday, 9 to 5.

Jim Luna and Jay Sanchez were Carrizozo visitors Tuesday. Esmal Salas, Pedro Zamora, Cuco Romero and Pedro Martinez were week-end visitors from the CCC camp at High Rolls.

Barber B. F. Harelson, who has been at the El Paso avenue barber shop for the past several weeks, will leave today for Vaughn, where he has another shop, which he will conduct in the future. His son, J. A. Harelson came over this morning to accompany his father back to Vaughn.

Mr. and Mrs. Eddie Johnson and baby came in this week and will visit for a short time with relatives and friends here.

The progressive firm of Ziegler Bros. has a new Ford Truck, purchased from the Carrizozo Auto Co. The truck is being 'piloted' by Frank Lesnett.

Manager G. T. McQuillen of the local station of the Mountain States Tel. & Tel. Co., will leave July 4, for Long Beach, Calif., where he will meet his daughters, Mmes. Turner and Emery. After a short visit there, he will go to the San Diego Exposition, accompanied by the Turners and Emerys. Mr. McQuillen plans to be absent about 18 days.

Mr. and Mrs. T. J. Stokes moved back this week from Midland, Texas, to the Stokes ranch east of here, where they will make their future home. We welcome the folks back to Carrizozo.

DIAMOND DUST

STANDING OF THE CLUBS

	Won	Lost
White Oaks	9	1
Cobras	7	3

The Carrizozo Cobras went to Hondo last Sunday and romped on the Apple Pickers with a score of 19 to 5. Sally Ortiz had perfect control and the lower valleyites were never able to solve his wide-breaking curve. Lueras and Perea were absent from the line-up.

On Monday, St. John's Day, the boys beat the Lincoln Desperados at Lincoln by the score of 12 to 9. The Cobras lambasted the ball all over Rio Bonito, collecting 26 hits to Lincoln's 11. Andy Lueras pitched six innings for Carrizozo and Alfredo Lopez pitched the last three innings. Sally and Manuel Ortiz were unable to make the trip and were substituted by Frank Vega and Florentino Lopez. Abe Sanchez umpired the game.

The Cobras play Fort Stanton at Stanton next Sunday.

White Oaks played a return game at Cedarvale, Sunday and came home with the long end of a 15 to 3 score. Young Shaw held the Cedarvale batters in check throughout the game and was never in much danger or in a tight spot. His teammates played a good brand of baseball behind his masterful pitching.

Charles Spence and daughter Virginia came over from Santa Fe and will visit with Mr. and Mrs. F. J. Sager for a week or so. On the trip, Virginia did the driving and Daddy says she's exceptionally good at the wheel. Amigo Charley has almost recovered from the injuries sustained in an auto accident last January. He's feeling fine now, we're glad to say.

Sheriff Howard Beacham of Otero County came up Wednesday night in search of two men who had stripped a truck at Tularosa. The men loaded the accessories on another truck and came in this direction, supposedly to the Jicarilla mountains. Sheriff McCamant and his deputy, Jack Davidson made a search in and around those regions, recovered the stolen goods. They arrested a man who gave his name as Hiles and a companion who claimed to be from Oklahoma. Both men are now in jail to await the action of the District Court.

Ralph Petty, Lowell Burton, Vaden Elliott and Marvin Peckham of the Petty Grocery, spent last Sunday at Alamogordo,

Personals

Mrs. Margaret Lalone Domachke, who visited relatives and friends here last week, left Sunday morning for El Paso, where after a brief stop over, she proceeded on her way to her home in Pasadena, California.

Mr. and Mrs. George Moore of El Paso, Mrs. W. H. Clark and son, Mr. and Mrs. Kirk and Miss McDonald of Oklahoma City, who were guests of Mr. and Mrs. Vernon Cruse for the past week, left for their homes Sunday. Mmes. Moore, Kirk and Miss McDonald are daughters of Mr. and Mrs. Cruse and Mrs. Clark is Mrs. Cruse's sister.

Attorney and Mrs. John E. Hall and Miss Lela Joyce returned last Friday from their eastern pleasure trip, which took them to Washington, D. C., and other points of interest.

Col. Jones and son from across the Malpais, Mr. and Mrs. W. J. Ferguson and Mrs. Dea English attended the Torrance County singing convention last Sunday at the Gran Quivira. There were over 500 people at the convention.

Mr. and Mrs. B. L. "Shorty" Moore were here Tuesday from Adobe in the interest of the big rodeo—they are planning on for the 4th. They returned in the afternoon accompanied by Mrs. Sherwood Corn, who had been here since last Saturday visiting with her daughter, Mrs. Ada Grey.

Miss Frances Aguayo spent the week-end with Miss Erma Poage at the Stearns ranch in Nogal Canyon.

Mr. and Mrs. Loren Counts of Tinnie visited relatives and friends in Carrizozo last Sunday.

Little Miss Almeda Bowlin returned Monday from Willard, where she visited for ten days with her friend, Claudia Custer. On her return, she was accompanied by Claudia, who will remain to spend the 4th.

The people of Adobe, 31 miles west of here are putting on a rodeo and general entertainment of baseball, barbecue and other means of enjoyment on the 4th and Carrizozo people are invited. The affair is being promoted by Shorty Moore, who is as good an entertainer as ever Dinty Moore dared to be. Horse-racing and roping will also have a part in the doings and dancing will be had during the afternoon and evening. See the ad on page 8.

Mrs. Josefa S. Vega left this morning on No. 3 for Sierra Madre, Calif., where she will visit the Fred Lalone family for several days. While there, she will visit the San Diego Exposition.

T. C. Romero, enterprising and courteous merchant of Lincoln, extends a cordial invitation to visitors and tourists, to visit his place of business and examine some relics of Old Historic Lincoln, chief among which are a pair of handcuffs and a pair of leg-irons found buried in the ruins of the old Lincoln jail, and probably worn by the notorious Billy the Kid and other bad men of that bloody epoch. See his ad on page 8 and pay him a visit. Across the street from the old courthouse, in Lincoln.

Fort Stanton 4th July Notes

We have secured some mighty salty horses for the Bronco Riding Contest and hope that the boys will have to ride plenty to win the money. Roping stock looks fast and smart after feeding on the good green grass that we are blessed with this year. One of our friends down the valley has some evenly matched goats that will try the skill of the county's best ropers. Now we want all the local boys (and local covers lots of territory) to be with us the 4th and try to get some of the money that is offered. We have the entrance fee for each event listed at \$2.00 and are offering the following prize money: Bronco Riding—1st, \$25; 2nd, \$10; 3rd, \$5. Steer Riding—1st, \$20; 2nd, \$10; 3rd, \$5. Calf Roping—1st, \$20; 2nd, \$10; 3rd, \$5. Wild Cow Milking—1st, \$20; 2nd, \$10; 3rd, \$5. Goat Roping—1st, \$20; 2nd, \$10; 3rd, \$5.

We believe that the above money is well worth competing for and every effort has been made to have the rodeo grounds, pens and equipment put in first class condition to insure the events going off in good order form both from the standpoint of the contestant and spectator. There will be a 50 yard cowboy foot race on the picnic grounds at 10:45 in the morning as well as a cigar race.

The Barbecue Dinner will be the same plentiful affair of past years, with such improvements added as past experience indicated necessary in the interests of our guests and friends. The Committee again extends a cordial invitation to join with Fort Stanton, July 4, in celebrating a glorious day with wholesome entertainment for all.

Anyone interested in receiving a prize list and rules may obtain same upon application to W. C. Hendren, Fort Stanton, N. M.

Check Your Tires

Automobiles, and especially tires, should be checked over before the car owner starts on an extended 4th of July trip, in the opinion of Roy Shafer, local dealer for Goodyear Tire & Rubber Co. of California, Inc. "If the car and tires haven't been checked over since the start of the summer driving season, the wise motorist will see that this important matter is attended to before starting on a holiday tour," Mr. Shafer declared. "Smooth worn tires are likely to give the motorist trouble at a time when he is all set to enjoy himself.

"Goodyear G-3 tires, that are in the public eye a great deal just now as a result of the investigations on tire mileage conducted by Joseph A. Faurot, noted detective, have proved especially popular by reason of their long-wearing qualities," Mr. Shafer concluded.

Mrs. R. W. Bowlin was a week-end visitor with her brother, Paul Willoughby, at Willard.

The Ben C. Sanchez, Saturnino and Manuel Chavez families were Hondo visitors last Sunday.

Mrs. L. P. McClinton has received word from her husband, who is in the S. P. Hospital at San Francisco, to the effect that according to attending physicians he will be ready to come home in a few days.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By REV. F. E. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago, C. Western Newspaper Union.

Lesson for June 23 CHRISTIAN MISSIONS

LESSON TEXT—Acts 1:6-8; 12:1-12. GOLDEN TEXT—Go ye into all the world, and preach the gospel to every creature.—Mark 16:15.

God is, in his essential being, merciful and compassionate. All his promises to and actions toward man have been with redemptive ends.

1. Israel a Missionary Nation. Following the apostasy of the whole race, God called Abraham to become the head of a race through whom all the nations of the earth were to be blessed (Gen. 12:1-3).

2. Christ given as a light to the nations (Is. 49:6). Christ is the way, the truth, and the life (John 14:6). Christ is the light of the world (John 8:12).

3. Jonah, a Jew, goes as a missionary to a Gentile city (Jonah 3:1-10). Jonah is prophetic of the nation and God's purpose for the Jews.

4. The Church a Missionary Organization. The very genius of the Church is propagation through devout missionary effort.

1. The apostolic commission (Matt. 28:18, 20). a. The authority of Jesus (v. 19). God gave him all authority in heaven and earth. b. The commission of the apostles (v. 19, 20).

(1) It was to teach, that is, make disciples of all nations (v. 19). They were to make known to the world that Christ died to save sinners.

(2) Baptize those who believed. This baptism was to be in the name of the Father, Son and Holy Ghost, indicating that the believer has been brought into definite relationship to each member of the Holy Trinity.

(3) To teach the disciples obedience (v. 20). Profession is not enough. Obedience must issue.

c. The all-sufficient promise (v. 20). There would constantly be the blessing and fellowship of the all-powerful Savior and Lord.

2. The missionary program (Acts 1:6-8). The Church is under solemn obligation to witness to all the world of the gracious salvation which has been provided in Christ.

3. The first foreign missionaries (Acts 13:1-2). The occasion for this enterprise was a meeting of certain prophets and teachers at Antioch. While these ministers were engaged in praying, the Lord laid heavily upon their hearts the evangelization of the world.

4. Preaching the gospel in Europe (Acts 16:1-10). Paul's inclination was to tarry in Asia Minor preaching the Word, but he was carried along by the Spirit. The Holy Spirit is just as active in closing doors as in opening them.

5. Preaching Christ before Agrippa (Acts 26:1-20). Paul, having been brought before the king, took advantage of the opportunity to witness to him of the Savior. Observe, a. His manner of life (v. 12). He showed that he had been in strictest accord with the most rigid sect of the Jews.

b. His supernatural conversion (vv. 13-15). Christ had appeared to him on the way to Damascus and revealed himself to him. c. Jesus Christ commissioned him for a work (v. 16-18). He was sent to the Gentiles to open their blind eyes, to turn them from darkness to light and from the power of Satan to God. d. His consecration (v. 19, 20). He rendered immediate obedience to his commission. He showed that the opposition which he now experienced was due to his vigorous prosecution of his work.

The Foot of the Rainbow. The foot of the rainbow is never where you think it is. Perhaps there is a pot of gold there, but there are many more pots of gold that you will pass on your way to realize your dreams. Some men have the vision to see them.

The True End of Life. Happiness is the true end and aim of life. It is the task of intelligence to ascertain the conditions of happiness, and when found the truly wise will live in accordance with them.

Expert Warns of Worm Damage

Severest Outbreak Foreseen by Leading Entomologist in Illinois.

By W. F. Flint, Chief Entomologist, Illinois State Natural History Survey—WNU Service. One of the most severe outbreaks of army worms that Illinois has had in recent years is threatened, and farmers should be on guard to protect their crops.

Although the outbreak will be spotted and will not occur in all sections of the state, severe damage will be done in many areas. It will be well to keep careful watch on all heavy stands of grain or heavy bluegrass pastures and get the worms before they cause serious damage.

While army worms may destroy entire areas of bluegrass pasture or fields of small grain or young corn in a short time, they can be completely and cheaply controlled by the use of poisoned bran baits. The bait that has been most generally used has a base of one pound of paris green mixed dry with 25 pounds of bran. When this is thoroughly mixed, there is added three gallons of water in which two quarts of cheap molasses, preferably black strap, has been thoroughly dissolved.

A new bait, with which J. H. Bigger, field entomologist of the Illinois state natural history survey, has been working during the past year for cutworm control, uses oil instead of water and molasses. This bait is made by thoroughly mixing 25 pounds of bran and one pound of paris green or white arsenic. Then two quarts of a light grade oil of an S. A. E. 20 viscosity is added. No water or molasses is used. The bait should be thoroughly mixed so that the oil gets on every particle of the bran.

Early Fighting of Moth Important to Fruit Men

The codling moth can almost certainly be counted on as the number one apple insect pest this year, asserts a bulletin from the United States Department of Agriculture. Growers spend enormous sums to combat it, but this pest has become increasingly destructive, according to Lee A. Strong, chief of the bureau of entomology and plant quarantine. Strong attributes this increase to the greater age of apple trees, to the abandonment of some orchards and to weather favorable to moth development.

A great many codling moths have been wintering in cocoons in crevices beneath the loose bark of trees, in coarse trash on the ground, in containers used to handle wormy fruit and in packing sheds. Cleaning up all these places while the moths are inactive is the ounce of prevention that is worth many times over, the pound of cure in the form of insecticides. Measures other than spraying, therefore, are very important. One of the best, Strong says, is a thorough housecleaning of orchards and packing houses early in the season.

Examine the Clover

Red clover cut for hay in 1934 and left over for 1935 may prove to be a serious disappointment, warn agronomists at Purdue university. They say that very often root borers are present when clover is left for the third year, which will destroy the crop. Farmers are advised to watch their clover carefully in the early part of the growing season. If plants begin to wither and the stand starts to thin out, it will be advisable to plow up the clover and seed to soy beans or some other crop. If the clover keeps right on growing, with no sign of injury, the crop should be saved.

Large Udders

Cows of high production almost invariably have large udders and, as a rule, the udders of such cows remain large throughout most of the lactation period. This also decreases somewhat, following each milking. Extending forward from the udder on the under side of the body are the milk veins which carry blood from the udder toward the heart and in high-producing cows usually are large. They ordinarily increase in size from first calving up to maturity. A well-developed, large udder and large milk veins are good indications of dairy capacity, although they are not infallible guides.

Care of Berries

To produce at their best, berry bushes must be properly pruned and trained. In general, the aim in pruning should be to accomplish two things: First, to remove old canes, which have produced their crop and are, therefore, of no more value to the plant, and to cut off the tips of new canes of certain varieties which have borne fruit; second, to provide a supply of new shoots for berry production the following season. The system will vary with varieties and according to the wire trellis support used.

Grazing Lespedeza

Land in winter grains on which lespedeza has been spring sown may be pastured after the grain is cut, without much damage to the lespedeza if animals are kept off when the field is too wet. This has been the result of experiments by the United States Department of Agriculture and the experience of farmers. It may be necessary to help the lespedeza get started by stopping pasturing for a short time after the grain crop has been grazed down or harvested.

Golden Phantoms FASCINATING TALES OF LOST MINES G.M.M. By Edith L. Watson

THE LOST CABIN MINE

SOMEWHERE in the Big Horn mountains is a mine richer than the Comstock Lode. It was found in 1863, and lost in 1864, but some day a lucky prospector will find it again, open up his neglected tunnels and build a new cabin where the old one stood.

Three men, Allen Hulbert, Cox, and Jones, were the first to discover this bonanza. They had gone out on a prospecting trip from Walla Walla, and sometime in the spring of 1863 they found themselves in the wildest part of the United States. They had been going through terrible hardships, floating on a raft down the Big Horn, and traveling at night to avoid hostile Indians. Men in their senses would have recoiled from the bare idea of such adventures, but these men were bewitched by a golden phantom; they kept on, prospecting as they went.

At last, there in the Big Horns they found a wonderful pay streak, which panned "all the way from five cents to one dollar each trial." This was their rainbow's end, and here they planned to stay through the next winter. By the time water froze overnight, each had something like half a bushel of gold.

Winter passed all too slowly. As soon as the first spring warmth came to the little valley, they were out on the job again, working at their sluice boxes, and every night adding to their store of gold.

What their plans were, no one can tell. Perhaps they expected to go back to Walla Walla that summer, laden with treasure; or they may have decided to stay on until either they or the nuggets were exhausted. But these plans were destined never to be completed, for Indians suddenly fell on Cox and Jones, killed and scalped them, and rifled the cabin. Hulbert, who had gone some distance off, saw the horrible sight but was powerless to help his partners.

As soon as the marauders left, Hulbert hurried down to the cabin. The gold was still there, and he packed a knapsack full, buried the rest, and struck out in the opposite direction from that taken by the Indians. After 18 days through wild, unknown country, he reached the North Platte river, and found the old trail to California.

Here he met up with a large party of gold seekers heading toward the northwest. On hearing his story, part of the enormous crowd decided to return with him to the mine, and more than 500 people, with 140 wagons, accepted him as their leader.

How was a man to retrace a trail like his? How could he remember every landmark, every direction, of those terrible 18 days of flight? Hulbert thought he could, but all summer long he tried in vain to reach that abandoned cabin where the bodies of his friends guarded the golden treasure. At last he was forced to admit defeat, and the angry crowd, after even gathering to lynch their bewildered leader, started westward.

Since then, many a good prospector has spent years in the effort to locate the Lost Cabin mine. "Old Pancake" Comstock, grubstaked by Nevada men, searched for it in vain. A Colorado miner named Beckley, following directions given by a dying friend, thought he had found it, but his discovery proved to be copper. Later another prospector, Sweeney by name, found an enormous outcropping which he thought must be the mother lode, and Associated Press items told that the Lost Cabin lead had at last been found. But this ore also proved to be copper.

Then, during the Sioux uprising, when the Big Horn country was alive with Indians, three men made their way up to the head of the Little Big Horn, and here they found what must have been the real mother lode of the Lost Cabin gold. It was the largest known body of rich quartz in the world!

The newcomers built a boat, loaded it with gold, and planned to float down the river until they reached a settlement. Here they would outfit and return to where fortune had smiled her golden grin at them. But death lurked downstream in the Sioux camp, stretched along the river, was more than three miles long, and 4,000 warriors waited and longed for a chance to spill white man's blood.

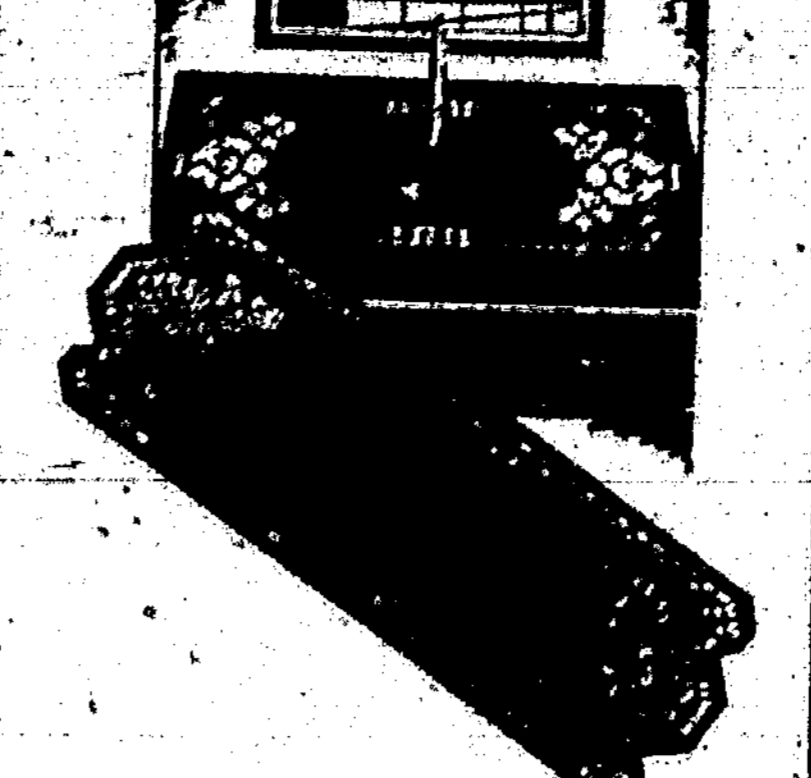

It was midnight when the awkward boat started past this gigantic camp. A dog, sniffing the air, barked excitedly. A sentinel peered and listened. The rapids of the Little Big Horn reached for the boat. In haste, the miners grew panicky—a moment more, and the boat overturned—another, and they were captives of the hostile Sioux.

In the scuffle that ensued, one man managed to get away. He had no food; no weapons, and his clothing had been torn until only a few rags covered him. But he had clenched his hand over a couple of nuggets, and these he kept during the days when he wandered in search of a settlement. At last he stumbled into a little town.

What happened to Sitting Bull, Custer, and the rest, is history. The country became safe from Indians again. But the one man who could have trailed the golden phantom back to the Lost Cabin led out in the sunshine and babbled of immense wealth, of hunger, of Indians, of his beautiful yellow nuggets—a garrulous, senseless tale.

Crocheted Scarf Is Easy for Beginner

By GRANDMOTHER CLARK

There is nothing the needleworker can make that is more practical and useful than a scarf. Here is a scarf that is to be crocheted in the large filet stitch and when a number 5 steel crochet hook and number 15 cotton is used the scarf will measure about 12x34 inches when finished. Even the beginner will find the filet stitch easy and interesting to work, especially in the popular "Rose" design shown here. This scarf matches the Rose chair set shown a few weeks ago.

This package, No. 807, contains

sufficient cream color Mountain Craft crochet cotton to complete this scarf, also instructions, black and white diagram for easy counting of meshes, and crochet hook. Write our Crochet Department, enclosing 10 cents for complete package No. 807 or 10 cents for instructions and diagram sheet only. Address—HOME CRAFT COMPANY, DEPARTMENT B, Nineteenth and St. Louis Avenue, St. Louis, Mo. Enclose self-addressed stamped envelope when writing for any information.

"Eggs" From Trees When George Grant, of Somerset Parish, Bermuda, is short of eggs to accompany his morning bacon, he goes into his garden and plucks one from a tree, says the San Francisco Chronicle.

The tree bears a fruit, the size and color of a pomegranate. The fruit bursts open when ripe and "lays" a nut about the size of a hen's egg yolk. Grant cooks this for five minutes, when it turns a beautiful golden yellow. Garnished with white sauce, it looks exactly like a hard-boiled egg. Grant is the only man in the colony with such a tree. It was brought there years ago by his father. It is a native of Africa, where it is called the Akee.

Men Consider Baby Talk

Heads All "Pet Pevers"

It's the little things in life that are most apt to get in one's hair and under one's skin, if results of an experiment conducted recently by a psychology student at Los Angeles Junior college prove anything, for in a list of "annoyances" details such as earthquakes and tornadoes were completely ignored, according to an Associated College Press dispatch to the Boston Daily Herald.

In carrying out the experiment, lists of ten annoyances were made and these "pet pevers" were in turn compiled into complete lists. Men agree that back-seat driving is extremely annoying, but listening to baby talk is considered the worst possible annoyance. Loud girls, excess use of make-up and bitten finger nails also bother men. Uncleanliness annoys women most of all, and quarrelsome people are next in line.

Napoleon's Golden Bees The tomb of Childeric at Tournai, in France, was discovered in 1855. Among the relics were 300 small golden models of bees. These were removed to Paris and when Napoleon was crowned emperor, a century and a half later, he chose these bees for the decoration of his coronation mantle.

WHEN LIVES ARE AT STAKE

You need the same protection that race drivers demand

KELLY PETILLO ON MAY 30, WON the 500-Mile Indianapolis Race on Firestone Tires, breaking the track record and driving the entire distance at a rate of 106.24 miles per hour.

blowout protection built into Firestone Gum-Dipped Tires. He drove his 5000 pound car over the hot salt beds at Lake Bonneville, Utah, 3000 miles in 23 1/2 hours. This was an average speed of 127.2 miles per hour, and although temperatures were as high as 120°, he had no blowouts or tire trouble of any kind.

This record is an outstanding demonstration of tire efficiency. To go 500 miles in less than five hours on this rough and bumpy 26-year-old brick track, without tire trouble of any kind, demonstrates the strength and blowout protection that Firestone builds into their Gum-Dipped Tires.

These records are made possible by special construction features built into Firestone Tires. Take no chances—protect your life and the lives of others by letting us equip your car with Firestone Tires and give you the Safety and Blowout Protection that race drivers demand.

AS JENKINS ALSO RECENTLY demonstrated the stamina, efficiency, and

Before you buy new tires ask yourself these three questions

- 1—"Will the tread give me the greatest traction and protection against skidding?"
2—"Are they built to give me the greatest blowout protection?"
3—"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

ANSWER No. 1—Leading university tests show Firestone High Speed Tires stop your car 15% quicker than the best of all popular makes of tires.
ANSWER No. 2—Unequal performance records for sixteen consecutive years prove that Gum-Dipping gives you the greatest blowout protection ever known.
ANSWER No. 3—Thousands of car owners report unequal mileage records—evidence of the longer wear and greater economy of Firestone High Speed Tires.

Volume—Direct Purchasing—Straight Line Manufacturing and Efficient and Economical System of Distributing to our 500 Stores and to 30,000 Dealers, enables Firestone to give you greater values at lowest prices

Table with 4 columns: CENTURY FLOUNDER TYPE, BLUEFIELD TYPE, SENTINEL TYPE, COURIER TYPE. Each column lists tire sizes and prices.

HIGH SPEED TYPE. We select from our enormous stocks of raw materials the best and highest grade rubber and cotton for the High Speed Tires. In our factory we select the most experienced and skilled tire makers to build this tire. It is accurately balanced and rigidly inspected and we know it is as perfect as human ingenuity can make it.

Sealtight LEAKPROOF TUBES. Sealed against air leakage to give greater mileage.

BATTERIES SPARK PLUGS. Quick spark—withstand heat—longer life. \$5.55. 58¢ Each in Sets.

Washington Digest

National Topics Interpreted
by William Bruckart
National Press Building Washington, D. C.

Washington.—What of the future? Where are we going now that one of the keystones of the **What to Be Done Now?** National Recovery Administration—has been largely outlawed?

The national capital never has witnessed such confusion, even in the midst of the World war, as has prevailed here since the Supreme court of the United States had its final say as to the constitutionality of the NRA and Frazier-Lemke farm mortgage moratorium law. The lack of constitutional authority for the Frazier-Lemke law was recognized by many but until the highest court in the land had spoken concerning NRA, views were divided and the Blue Eagle continued to fly, albeit in a lower circle.

New Dealers generally were confident to the last. They appeared to expect some unseen force to guide the Supreme court in upholding the fantastic program which they had devised and which the President made a part of his New Deal plans for economic recovery. The adverse ruling made them sick at the stomach. Most of them have not yet recovered. Hence, confusion continues to reign.

You have heard much discussion in the past two weeks as to how the breath of life may again be breathed into the Blue Eagle. As far as I have been able to gather from authoritative quarters in Washington, there is nothing left to do but perform the funeral ceremonies for the ill-fated bird and the so-called national plan which it represented. The reports of Presidential conferences, of meetings of statesmen and executives of the Administration, of this plan and that plan and statements and expressions of opinion respecting the future course, mean absolutely nothing. When the Supreme court said that the congress had unlawfully delegated to the President power to draft codes of fair practice and enforce them upon private business, it took away the heart and nerve centers of the NRA structure.

On top of this body blow, the NRA principle is looked upon in many quarters, and by men who know and understand the problems of government, as being thoroughly discredited in the public mind. It is not too much to say that when a national law does not hold the confidence of the bulk of the people its usefulness has ceased. So it was with the prohibition amendment. Equally, I believe it can be stated, if opinion of statesmen of long training can be trusted, no attempts to revise the NRA will get to first base. Even the Brain Trust movement to obtain amendment of the Federal Constitution making such laws as NRA proper can win country-wide support.

Enough indications already have become visible to warrant a statement that the summer months will see chiseling, price cutting and other nefarious and improper business practices going on and that these will be disastrous to countless business interests. The congress will strive in a half-hearted fashion to effect the loss of strength and prestige suffered by the New Deal at the hands of the Supreme court. But the effort plainly will be only half-hearted. So it is made to appear that the country must submit for several months at least to a bad condition. After that, if the opinions of experienced men are worth while, there ought to be a substantial change for the better. Careful surveys, close examinations of the problems at hand add candid thinking has brought to unbiased observers the conclusion that there is more hope for the future now as regards the economic situation than there was while the Blue Eagle continued to soar and ballyhoo artists continued to preach about its powers to restore prosperity. I believe this statement which is the consensus ought to be tempered with one suggestion. There is likely to be a restoration of confidence generally if the Administration turns aside from Brain Trust theories and employs the practical instead of the theoretical method of government.

To the agricultural community the decision invalidating the Frazier-Lemke mortgage moratorium law probably has greater interest. It should not be so. The Frazier-Lemke law from the first was an idle dream and was predicated upon shortsighted understandings of basic economic laws. Everywhere I have inquired concerning the probable and or result of the workings of that statute, informed persons declared it meant eventual destruction of credit for agriculture.

Supporters of the Frazier-Lemke idea cannot lean, as do supporters of the NRA principle, upon an accusation that the law was badly administered. It was administered, according to the Frazier Credit Administration, in the spirit and letter of its intent. Yet because it was fundamentally unsound it never could succeed. My own guess is that the Supreme court by its ruling in this case has rendered a great service to American agriculture. Slammered down, the law which was proposed by Senator Frazier and Rep-

resentative Lemke, both of North Dakota, was designed to give purely temporary aid to distressed owners of mortgage farm lands. The things which apparently neither of the co-authors foresaw was the effect the temporary arrangement would have as to the future. By this I mean that, for example, if a farmer wants to buy a home and had only a small amount of cash, he must borrow money from someone else. If the holder of that money were made to feel that at any time during the life of that mortgage congress could pass a law telling the lender he could not force payment of the debt few there would be who would be willing to lend their money. It is not human nature to lend money unless there is a reasonable assurance that it will be repaid.

Thus, it seems to me the Frazier-Lemke law contained elements of danger that were overlooked in the stress of depressed conditions. As laws now stand, lenders of capital will have some assurance that the security they take will continue to be security and that the individual who borrows, whether he be the owner of a farm or the owner of a business in town, either will make payments on the principal or surrender the property.

Perhaps the worst blow dealt President Roosevelt personally was the Supreme court decision which held that the Presidential power did not extend to removal of a Federal Trade Commission member except for the reasons prescribed in the law itself. It will be remembered that Mr. Roosevelt forcibly ousted the late William E. Humphrey from commission membership because, it was openly stated at the time, Mr. Humphrey was a conservative republican and he, therefore, did not see eye to eye with the President and his New Deal plans. Mr. Humphrey sued the government for the salary for his term. After his death his executors carried on the litigation which has just now been decided in their favor.

It is the principle involved here that is important. The Federal Trade Commission was set up as a quasi-judicial body, one endowed with powers to regulate against improper business practices and to determine the propriety of general business dealings where those dealings affected country-wide business or the interests of the public. It takes no stretch of the imagination to see how Presidential interference with the commission personnel would result in changes of commission policy. One business practice might be held proper by a commission whose majority was conservative while that same practice would be considered illegal by a commission dominated by a liberal or radical membership. It becomes obvious then that if the President were permitted to disturb the personnel of the commission, especially judges, there could be no continuity of policy and business itself would hardly know from day to day when it was abiding by the law or when it was not.

Several months ago, I recall, I reported to you in these columns something—in the nature of a prediction that the Supreme court would become better known to the general public before the current Administration had ended than it had been known since it rendered the famous Dred-Scott decision in civil war days. It was a perfectly obvious circumstance. Sooner or later the questions of a constitutional nature involved in the New Deal procedure obviously were going to be tested in court.

Now, I feel warranted in reporting that the highest court again will be in the public eye. The next momentous decision likely to come from the bench of the nine austere justices will be a ruling affecting the Agricultural Adjustment Administration and therefore of vital import to the American farmer. There will be other cases involving New Deal plans, of course, but their importance cannot possibly be as great as any decision affecting the AAA, because it is an integral part of the New Deal program for recovery.

There is no possibility of a ruling on any AAA questions before next October. No test cases have yet reached the Supreme court for argument but there are half a dozen wending their slow way through minor courts. Consideration by the Supreme court eventually is, of course, certain because they involve constitutional questions. Notwithstanding the fact that a Supreme court decision on the AAA is considerably distant, it is to be noted that after the NRA was outlawed, there was considerable scurrying around among AAA officials. Fresh consideration was given to many points of law over which there is doubt. Amendments which the AAA have asked congress to enact to strengthen the original Adjustment Act were suddenly withdrawn from the senate floor by those who sponsored them. The reason given was that there were imperfections which should be corrected. The real reason for the action was fear of sudden development of litigation over the controversial points.

NEW USES FOR FARM PRODUCTS

Growing Crops for Industrial Purposes Is Possibility.

A conference between representatives of agriculture, industry and science held at Dearborn, Mich., was devoted to the possibility of producing crops for industrial purposes. The importance of chemistry in converting raw products into useful commodities was stressed.

Growing motor fuel on the farm was pictured as a \$5,000,000,000-a-year income builder for future farmers. The land requirement for the production of 25,000,000 gallons of alcohol a year was estimated at 80,000,000 to 100,000,000 acres. There seems to be no unsolved technical problem standing in the way of utilizing alcohol as a fuel, though there doubtless will be improvements and refinements developed.

Motor fuel is a competitive product. Users of automobiles will continue to utilize the type which furnishes power at lowest cost and greatest convenience. Present supplies of gasoline and those immediately in prospect, together with the efficiency developed in distribution, give it a decided advantage over other fuels. If production should decline and prices increase materially, substitutes will be given greater consideration. With corn selling at \$1 a bushel, discussion of its diversion into uses other than for feeding have largely subsided. Those who advocate its conversion into alcohol to be mixed with gasoline for fuel presuppose a decided reduction in prices.

Ethyl alcohol can be made from any farm crop. It is derived largely from carbohydrates. In Europe unmarketable potatoes are utilized largely for that purpose. Much of the molasses, a by-product of the sugar industry, is now converted into alcohol. There is, however, no indication that any crop is grown primarily for that purpose, but mate-

rials of low value, or in some instances waste products, are utilized. It probably will be many years before corn will be grown primarily as a fuel crop.

Soy bean oil is extensively used in paints and varnishes. Linseed oil has many industrial uses. Tung oil trees are grown in the South in a limited way with prospects of greater expansion. Levulose, a form of sugar, can be made from artichokes or sunflowers. Cornstalks have been successfully converted into wall board, slash pine into paper pulp.

New uses for other farm products will be discovered, but the problems of getting production costs low enough, of factories located close to the source of supply to save labor and transportation costs, will have to be solved before commercial activity may be developed.

American agriculture has been conducted upon an export basis. As yet no workable plan of self-sufficiency has been developed. It is a wholesome thing for agriculture, industry and science to co-operate in an effort to develop the market for farm products as any success along this line will add to the standard of living in rural communities and make a wider market for industrial goods.

Meanwhile the farms need foreign markets.—Kansas City Times.

Training for Mothers Essential, Says Atlee

This may not be the best of all possible worlds, but unquestionably it is a man's world. Man made institutions, laws, economies—man continues to dominate it. "Manly" and "virile" are heroic adjectives, and to designate one "an old woman" is a major reproach. And what about children? It is

Delicious Koolaid Refrigerator ICE CREAM
MAKES 6 TO 8 SERVINGS
175¢

my considered and honest opinion that the average woman is totally unfit to bring up children. Why should she be fit? She was educated in school and college to be a man, she went out into the world and worked like a man—where was there time or opportunity to learn to bring up her young?

Do you hire anybody off the street to make and tend your automobile? Or train your race horse? Yet we permit any woman with a marriage license to mother and tend children?

If women are to do anything satisfying with their home and children, they must turn to those of their own free will, recognizing here a full outlet for their intelligences, their ambitions.—From "Should Women Be Men?" by B. Atlee, in McLean's.

The Easy Way to Iron
Coleman Self Heating Iron
INSTANT LIGHTING
Iron the easy way—in one-third less time with the Coleman. Iron in comfort any place. It's entirely self-heating. No cords or wires. No weary, endless trips between a hot stove and ironing board. Makes its own gas. Burns 95% air. Lights instantly—no pre-heating. Operating cost only 1/16¢ an hour. See your local dealer or write for FREE Folder. THE COLEMAN LAMP & STOVE CO. Dept. 7000, Kansas City, Mo.

HELP KIDNEYS

WHEN kidneys function badly and you suffer backache, dizziness, burning, scanty or too frequent urination, getting up at night, swollen feet and ankles, feel upset and miserable... use Doan's Pills. Doan's are especially for poorly working kidneys. Millions of boxes are used every year. They are recommended by users the country over. Ask your neighbor!

DOAN'S PILLS

"50% of all motor wear occurs during the starting period"

... say automotive engineers

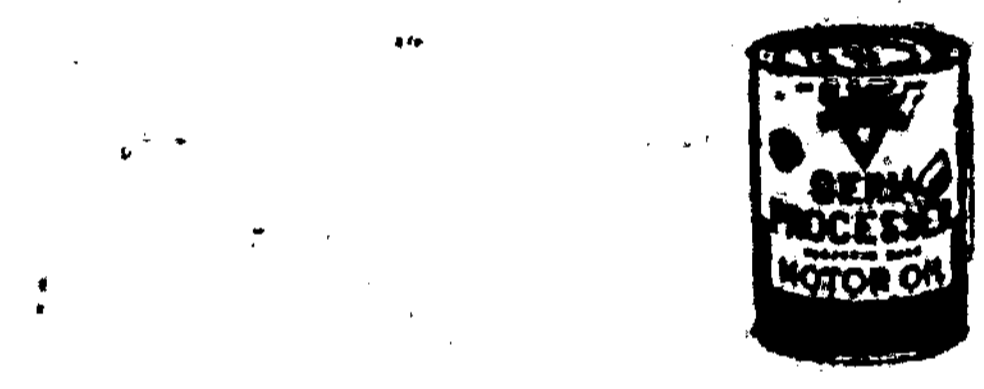

Measuring cylinder wear with a precision gauge—accurate to a hundred-thousandth of an inch!

Motorists who know these facts will save money:

Motor oils refined by the usual methods have some oiliness and film strength, but they may form carbon and sludge, which lead to expensive motor repairs.

Other oils may form almost no carbon and sludge, but are so over-refined that they are robbed of oiliness and film strength they need to prevent motor wear.

Germ Processed Oil is refined to eliminate carbon and sludge troubles and then the Germ Process adds extra oiliness and 2 to 4 times more film strength than any straight mineral oil, as tests on the Timken machine have proved.

Only the oil with the "Hidden Quart" will stay up in your motor and cut down this starting wear!

Here are the facts: Oils not Germ Processed drain back into the crankcase when your motor is idle. Bearings, pistons and cylinders are dry when you start. Even in warm weather your motor makes at least a thousand revolutions before the quickest flowing oil can reach all parts. Barium metal grinds against bare metal—destructive wear occurs.

lubricating value. Cars using Germ Processed Oil were driven 15 to 75 miles with the crankcase empty but without motor damage!

Germ Processed Oil protects your motor another way. All cars built since 1931 have greatly increased pressures and must have oil of extra high film strength for safe lubrication. Straight mineral oils have no more film strength than they had 10 years ago—some have less! Conoco Germ Processed Oil, with 2 to 4 times the film strength of mineral oils, gives modern motors the lubrication they need.

Only Conoco Germ Processed Oil gives full motor protection—when you start, while you drive. You will cut motor wear if you use it!

"We stopped at Conoco stations along our way for many helpful, free services. You can apply at any Conoco station for such a plan for your motor trip."

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

Lesson for June 23 CHRISTIAN MISSIONS

LESSON TEXT—Acts 1:6-8; 13:1-12. GOLDEN TEXT—Go ye into all the world, and preach the gospel to every creature.—Mark 16:15.

1. Israel a Missionary Nation. Following the apostasy of the whole race, God called Abraham to become the head of a race through whom all the nations of the earth were to be blessed.

2. Christ given as a light to the nations. Christ is the light of the world, the light of the world (John 8:12).

3. Jonah, a Jew, goes as a missionary to a Gentile city (Jonah 3:1-10). Jonah is prophetic of the nation and God's purpose for the Jews.

4. The Church a Missionary Organization. The very genius of the Church is propagation through devout missionary effort.

5. The apostolic commission (Matt. 28:19, 20). The authority of Jesus (v. 18). God gave him all authority in heaven and earth.

6. The baptism of the Holy Trinity. It was to teach, that is, make disciples of all nations (v. 10). They were to make known to the world that Christ died to save sinners.

7. The all-sufficient promise (v. 20). There would constantly be the blessing and fellowship of the all-powerful Savior and Lord.

8. The missionary program (Acts 1:8). The Church is under solemn obligation to witness to all the world of the gracious salvation which has been provided in Christ.

9. The first foreign missionaries (Acts 13:1-12). The occasion for this enterprise was a meeting of certain prophets and teachers at Antioch.

10. Preaching Christ before Agrippa (Acts 26:1-20). Paul, having been brought before the king, took advantage of the opportunity to witness to him of the Savior, observe.

11. His manner of life (v. 22). He showed that he had been in strictest accord with the most rigid sect of the Jews.

12. His supernatural conversion (v. 10-18). He was sent to the Gentiles to open their blind eyes, to turn them from darkness to light and from the power of Satan to God.

13. His consecration (v. 19, 20). He rendered immediate obedience to his commission. He showed that the opposition which he now experienced was due to his vigorous prosecution of his work.

14. The Feet of the Rainbow. The foot of the rainbow is never where you think it is. Perhaps there is a pot of gold there, but there are many more pots of gold that you will come on your way to realize your dreams.

15. The True End of Life. Happiness is the true end and aim of life. It is the task of intelligence to ascertain the conditions of happiness, and when found the truly wise will live in accordance with them.

Expert Warns of Worm Damage

Severest Outbreak Foreseen by Leading Entomologist in Illinois.

By W. F. Flint, Chief Entomologist, Illinois State Natural History Survey.—WNU Service. One of the most severe outbreaks of army worms that Illinois has had in recent years is threatened, and farmers should be on guard to protect their crops.

Although the outbreak will be spotted and will not occur in all sections of the state, severe damage will be done in many areas. It will be well to keep careful watch on all heavy stands of grain or heavy bluegrass pastures and get the worms before they cause serious damage.

While army worms may destroy entire areas of bluegrass pasture or fields of small grain or young corn in a short time, they can be completely and cheaply controlled by the use of poisoned bran bait. The bait that has been most generally used has a base of one pound of paris green mixed dry with 25 pounds of bran.

A new bait, with which J. H. Bigger, field entomologist of the Illinois state natural history survey, has been working during the past year for cutworm control, uses oil instead of water and molasses. This bait is made by thoroughly mixing 25 pounds of bran and one pound of paris green or white arsenic. Then two quarts of a light grade oil of an S. A. E. 20 viscosity is added. No water or molasses is used. The bait should be thoroughly mixed so that the oil gets on every particle of the bran.

Early Fighting of Moth Important to Fruit Men

The codling moth can almost certainly be counted on as the number one apple insect pest this year, asserts a bulletin from the United States Department of Agriculture. Growers spend enormous sums to combat it, but this pest has become increasingly destructive, according to Lee A. Strong, chief of the bureau of entomology and plant quarantine. Strong attributes this increase to the greater age of apple trees, to the abandonment of some orchards and to weather favorable to moth development.

A great many codling moths have been wintering in cocoons in crevices beneath the loose bark of trees, in coarse trash on the ground, in containers used to handle wormy fruit and in packing sheds. Cleaning up all these places while the moths are inactive is the ounce of prevention that is worth many times over, the pound of cure in the form of insecticides. Measures other than spraying, therefore, are very important. One of the best, Strong says, is a thorough housecleaning of orchards and packing houses early in the season.

Examine the Clover

Red clover cut for hay in 1934 and left over for 1935 may prove to be a serious disappointment, warn agronomists at Purdue university. They say that very often root borers are present when clover is left for the third year, which will destroy the crop. Farmers are advised to watch their clover carefully in the early part of the growing season. If plants begin to wither and the stand starts to thin out, it will be advisable to plow up the clover and seed to soy beans or some other crop. If the clover keeps right on growing, with no sign of injury, the crop should be saved.

Large Udders

Cows of high production almost invariably have large udders and, as a rule, the udders of such cows remain large throughout most of the lactation period. The size decreases somewhat, following each milking. Extending forward from the udder on the under side of the body are the milk veins which carry blood from the udder toward the heart and in high-producing cows usually are large. They ordinarily increase in size from first calving up to maturity. A well-developed, large udder and large milk veins are good indications of dairy capacity, although they are not infallible guides.

Care of Berries

To produce at their best, berry bushes must be properly pruned and trained. In general, the aim in pruning should be to accomplish two things: First, to remove old canes which have produced their crop and are, therefore, of no more value to the plant, and to cut off the tips of new canes of certain varieties which have borne fruit; second, to provide a supply of new shoots for berry production the following season. The system will vary with varieties and according to the wire trellis support used.

Grazing Lespedeza

Land in winter grains on which lespedeza has been spring sown may be pastured after the grain is cut, without much damage to the lespedeza if animals are kept off when the field is too wet. This has been the result of experiments by the United States Department of Agriculture and the experience of farmers. It may be necessary to help the lespedeza get started by stopping pasturing for a short time after the grain crop has been grazed down or harvested.

Golden Phantoms FASCINATING TALES OF LOST MINES

THE LOST CABIN MINE

SOMEWHERE in the Big Horn mountains is a mine richer than the Comstock Lode. It was found in 1863, and lost in 1864, but some day a lucky prospector will find it again, open up its neglected tunnels and build a new cabin where the old one stood. Three men, Allen Hulbert, Cox, and Jones, were the first to discover this bonanza. They had gone out on a prospecting trip from Walla Walla, and sometime in the spring of 1863 they found themselves in the wildest part of the United States. They had been going through terrible hardships, floating on a raft down the Big Horn, and traveling at night to avoid hostile Indians. Men in their senses would have recoiled from the bare idea of such adventures, but these men were bewitched by a golden phantom; they kept on, prospecting as they went.

At last, there in the Big Horn they found a wonderful pay streak, which panned "all the way from five cents to one dollar each trial." This was their rainbow's end, and here they planned to stay through the next winter. By the time water froze overnight, each had something like half a bushel of gold.

Winter passed all too slowly. As soon as the first spring warmth came to the little valley, they were out on the job again, working at their sluice boxes, and every night adding to their store of gold.

What their plans were, no one can tell. Perhaps they expected to go back to Walla Walla that summer, laden with treasure; or they may have decided to stay on until either they or the nuggets were exhausted. But these plans were destined never to be completed, for Indians suddenly fell on Cox and Jones, killed and scalped them, and rifled the cabin. Hulbert, who had gone some distance off, saw the horrible sight but was powerless to help his partners.

As soon as the marauders left, Hulbert hurried down to the cabin. The gold was still there, and he packed a knapsack full, buried the rest, and struck out in the opposite direction from that taken by the Indians. After 18 days through wild, unknown country, he reached the North Platte river, and found the old trail to California.

Here he met up with a large party of gold seekers heading toward the northwest. On hearing his story, part of the enormous crowd decided to return with him to the mine, and more than 500 people, with 150 wagons, accepted him as their leader.

How was a man to retrace a trail like his? How could he remember every landmark, every direction, of those terrible 18 days of flight? Hulbert thought he could, but all summer long he tried in vain to reach that abandoned cabin where the bodies of his friends guarded the golden treasure. At last he was forced to admit defeat, and the angry crowd, after even once gathering to lynch their howlered leader, started westward.

Since then, many a good prospector has spent years in the effort to locate the Lost Cabin mine. "Old Pancake" Comstock, grubstaked by Nevada men, searched for it in vain. A Colorado miner named Beckley, following directions given by a dying friend, thought he had found it, but his discovery proved to be copper. Later another prospector, Sweeney by name, found an enormous outcropping which he thought must be the mother lode, and Associated Press items told that the Lost Cabin lead had at last been found. But this ore also proved to be copper.

Then, during the Sioux uprising, when the Big Horn country was alive with Indians, three men made their way up to the head of the Little Big Horn, and here they found what must have been the real mother lode of the Lost Cabin gold. It was the largest known body of rich quartz in the world!

The newcomers built a boat, loaded it with gold, and planned to float down the river until they reached a settlement. Here they would outfit and return to where fortune had smiled her golden grin at them. But death lurked downstream; the Sioux camp, stretched along the river, was more than three miles long, and 5,000 warriors waited and longed for a chance to spill white man's blood.

It was midnight when the awkward boat started past this gigantic camp. A dog, sniffing the air, barked excitedly. A sentinel peered and listened. The rapids of the Little Big Horn reached for the boat. In haste, the miners grew panicky—a moment more, and the boat overturned—another, and they were captives of the hostile Sioux.

In the scuffle that ensued, one man managed to get away. He had no food, no weapons, and his clothing had been torn until only a few rags covered him. But he had clutched his hand over a couple of nuggets, and these he kept during the days when he wandered in search of a settlement. At last he stumbled into a little town.

What happened to Sitting Bull, Custer, and the rest, is history. The country became safe from Indians again. But the one man who could have trailed the golden phantom back to the Lost Cabin lode sat in the sunshine and babbled of immense wealth, of hunger, of Indians, of his beautiful yellow nuggets—a garrulous, senseless idiot.

Crocheted Scarf Is Easy for Beginner

There is nothing the needleworker can make that is more practical and useful than a scarf. Here is a scarf that is to be crocheted in the large flat stitch and when a number 5 steel crochet hook and number 15 cotton is used the scarf will measure about 12x34 inches when finished. Even the beginner will find the flat stitch easy and interesting to work, especially in the popular "Rose" design shown here. This scarf matches the Rose chair set shown a few weeks ago. This package, No. 807, contains

sufficient cream color Mountain Craft crocheted cotton to complete this scarf, also instructions, black and white diagram for easy counting of meshes, and crochet hook.

Write our Crochet Department, enclosing 40 cents for complete package No. 807 or 10 cents for instructions and diagram sheet only.

Address—HOME CRAFT COMPANY, DEPARTMENT B, Nineteenth and St. Louis Avenue, St. Louis, Mo.

Inclose self-addressed stamped envelope when writing for any information.

"Eggs" From Trees

When George Grant, of Somerset Parish, Bermuda, is short of eggs to accompany his morning bacon, he goes into his garden and plucks one from a tree, says the San Francisco Chronicle.

The tree bears a fruit, the size and color of a pomegranate. The fruit bursts open when ripe and "lays" a nut about the size of a hen's egg yolk. Grant cooks this for five minutes, when it turns a beautiful golden yellow. Garnished with white sauce, it looks exactly like a hard-boiled egg. Grant is the only man in the colony with such a tree. It was brought there years ago by his father. It is a native of Africa, where it is called the Akee.

Men Consider Baby Talk Heads All "Pet Peeves"

It's the little things in life that are most apt to get in one's hair and under one's skin, if results of an experiment conducted recently by a psychology student at Los Angeles Junior college prove anything, for in a list of "annoyances" details such as earthquakes and tornadoes were completely ignored, according to an Associated College Press dispatch to the Boston Daily Herald.

In carrying out the experiment, lists of ten annoyances were made and these "pet-peeves" were in turn compiled into complete lists.

Men agree that back-seat driving is extremely annoying, but listening to baby talk is considered the worst possible annoyance. Loud girls, excess use of make-up and bitten finger nails also bother men. Uncleanliness annoys women most of all, and quarrelsomeness people are next in line.

Napoleon's Golden Bees The tomb of Childeric at Tournai, in France, was discovered in 1655. Among the relics were 300 small golden models of bees. These were removed to Paris and when Napoleon was crowned emperor, a century and a half later, he chose these bees for the decoration of his coronation mantle.

WHEN LIVES ARE AT STAKE

You need the same protection that race drivers demand

KELLY PETILLO ON MAY 30, WON THE 500-Mile Indianapolis Race on Firestone Tires, breaking the track record and driving the entire distance at a rate of 106.24 miles per hour.

blowout protection built into Firestone Gum-Dipped Tires. He drove his 5000 pound car over the hot salt beds at Lake Bonneville, Utah, 3000 miles in 23 1/2 hours. This was an average speed of 127.2 miles per hour, and although temperatures were as high as 120°, he had no blowouts or tire trouble of any kind.

This record is an outstanding demonstration of tire efficiency. To go 500 miles in less than five hours on this rough and bumpy 26-year-old brick track, without tire trouble of any kind, demonstrates the strength and blowout protection that Firestone builds into their Gum-Dipped Tires.

These records are made possible by special construction features built into Firestone Tires.

AB JENKINS ALSO RECENTLY demonstrated the stamina, efficiency, and

Take no chances—protect your life and the lives of others by letting us equip your car with Firestone Tires and give you the Safety and Blowout Protection that race drivers demand.

Before you buy new tires ask yourself these three questions

- 1—"Will the tread give me the greatest traction and protection against skidding?"
2—"Are they built to give me the greatest blowout protection?"
3—"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

ANSWER No. 1—Leading university tests show Firestone High Speed Tires stop your car 15% quicker than the best of all popular makes of tires.
ANSWER No. 2—Unequaled performance records for sixteen consecutive years prove that Gum-Dipping gives you the greatest blowout protection ever known.
ANSWER No. 3—Thousands of car owners report unequalled mileage records—evidence of the longer wear and greater economy of Firestone High Speed Tires.

Washington Digest

National Topics Interpreted
by William Bruckart
National Press Building Washington, D. C.

Washington.—What of the future? Where are we going now that one of the keystones of the **What to Be Done Now?** National Recovery Administration—has been largely outlawed?

The national capital never has witnessed such confusion, even in the midst of the World war, as has prevailed here since the Supreme court of the United States had its final say as to the constitutionality of the NRA and Frazier-Lemke farm mortgage moratorium law. The lack of constitutional authority for the Frazier-Lemke law was recognized by many but until the highest court in the land had spoken concerning NRA, views were divided and the Blue Eagle continued to fly, albeit in a lower circle.

New Dealers generally were confident to the last. They appeared to expect some unseen force to guide the Supreme court in upholding the fantastic program which they had devised and which the President made a part of his New Deal plans for economic recovery. The adverse ruling made them sick at the stomach. Most of them have not yet recovered. Hence, confusion continues to reign.

You have heard much discussion in the past two weeks as to how the breath of life may again be breathed into the Blue Eagle. As far as I have been able to gather from authoritative quarters in Washington, there is nothing left to do but perform the funeral ceremonies for the ill-fated bird and the so-called national plan which it represented. The reports of Presidential conferences, of meetings of statesmen and executives of the Administration, of this plan and that plan and statements and expressions of opinion respecting the future course, mean absolutely nothing. When the Supreme court said that the congress had unlawfully delegated to the President power to draft codes of fair practice and enforce them upon private business, it took away the heart and nerve centers of the NRA structure.

On top of this body blow, the NRA principle is looked upon in many quarters, and by men who know and understand the problems of government, as being thoroughly discredited in the public mind. It is not too much to say that when a national law does not hold the confidence of the bulk of the people its usefulness has ceased. So it was with the prohibition amendment. Equally, I believe it can be stated, if opinion of statesmen of long training can be trusted, no attempts to revise the NRA will get to first base. Even the Brain Trust movement to obtain amendment of the Federal Constitution making such laws as NRA proper can win country-wide support.

Enough indications already have become visible to warrant a statement that the summer months will see chafing, price cutting and other nefarious and improper business practices going on and that these will be disastrous to countless business interests. The congress will strive in a half-hearted fashion to offset the loss of strength and prestige suffered by the New Deal at the hands of the Supreme court. But the effort plainly will be only half-hearted. So it is made to appear that the country must submit for several months at least to a bad condition. After that, if the opinions of experienced men are worth while, there ought to be a substantial change for the better. Careful surveys, close examinations of the problems at hand and candid thinking has brought to unbiased observers the conclusion that there is more hope for the future now as regards the economic situation than there was while the Blue Eagle continued to soar and ballyhoo artists continued to preach about its powers to restore prosperity. I believe this statement which is the consensus ought to be tempered with one suggestion. There is likely to be a restoration of confidence generally if the Administration turns aside from Brain Trust theories and employs the practical instead of the theoretical method of government.

To the agricultural community the decision invalidating the Frazier-Lemke mortgage moratorium law probably has greater interest. It should not be so. The Frazier-Lemke law from the first was an idle dream and was predicated upon shortsighted understandings of basic economic laws. Everywhere I have inquired concerning the probable end or result of the workings of that statute, informed persons declared it meant eventual destruction of credit for agriculture.

Supporters of the Frazier-Lemke idea cannot lean, as do supporters of the NRA principle, upon an accusation that the law was badly administered. It was administered, according to the Farm Credit Administration, in the spirit and letter of its intent. Yet because it was fundamentally unsound it never could succeed. My own guess is that the Supreme court by its ruling in this case has rendered a great service to American agriculture.

Slammed down, the law which was proposed by Senator Frazier and Rep-

resentative Lemke, both of North Dakota, was designed to give purely temporary aid to distressed owners of mortgage farm lands. The things which apparently neither of the co-authors foresaw was the effect the temporary arrangement would have as to the future. By this I mean that, for example, if a farmer wants to buy a home and had only a small amount of cash, he must borrow money from someone else. If the holder of that money were made to feel that at any time during the life of that mortgage congress could pass a law telling the lender he could not force payment of the debt few there would be who would be willing to lend their money. It is not human nature to lend money unless there is a reasonable assurance that it will be repaid.

Thus, it seems to me the Frazier-Lemke law contained elements of danger that were overlooked in the stress of depressed conditions. As laws now stand, lenders of capital will have some assurance that the security they take will continue to be security and that the individual who borrows, whether he be the owner of a farm or the owner of a business in town, either will make payments on the principal or surrender the property.

Perhaps the worst blow dealt President Roosevelt personally was the Supreme court decision which held that the Presidential power did not extend to removal of a Federal Trade Commission member except for the reasons prescribed in the law itself. It will be remembered that Mr. Roosevelt forcibly ousted the late William E. Humphrey from commission membership because, it was openly stated at the time, Mr. Humphrey was a conservative republican and he, therefore, did not see eye to eye with the President and his New Deal plans. Mr. Humphrey sued the government for the salary for his term. After his death his executors carried on the litigation which has just now been decided in their favor.

It is the principle involved here that is important. The Federal Trade Commission was set up as a quasi-judicial body, one endowed with powers to regulate against improper business practices and to determine the propriety of general business dealings where those dealings affected country-wide business or the interests of the public. It takes no stretch of the imagination to see how Presidential interference with the commission personnel would result in changes of commission policy. One business practice might be held proper by a commission whose majority was conservative while that same practice would be considered illegal by a commission dominated by a liberal or radical membership. It becomes obvious then that if the President were permitted to disturb the personnel of the commission, especially judges, there could be no continuity of policy and business itself would hardly know from day to day when it was abiding by the law or when it was not.

Several months ago, I recall, I reported to you in these columns something in the nature of a prediction that the Supreme court would become better known to the general public before the current Administration had ended than it had been known since it rendered the famous *Dred Scott* decision in civil war days. It was a perfectly obvious circumstance. Sooner or later the questions of a constitutional nature involved in the New Deal procedure obviously were going to be tested in court.

Now, I feel warranted in reporting that the highest court again will be in the public eye. The next momentous decision likely to come from the bench of the nine august justices will be a ruling affecting the Agricultural Adjustment Administration and therefore of vital import to the American farmer. There will be other cases involving New Deal plans, of course, but their importance cannot possibly be as great as any decision affecting the AAA, because it is an integral part of the New Deal program for recovery.

There is no possibility of a ruling on any AAA questions before next October. No test cases have yet reached the Supreme court for argument but there are half a dozen wending their slow way through minor courts. Consideration by the Supreme court eventually is, of course, certain because they involve constitutional questions.

Notwithstanding the fact that a Supreme court decision on the AAA is considerably distant, it is to be noted that after the NRA was outlawed, there was considerable scurrying around among AAA officials. Fresh consideration was given to many points of law over which there is doubt. Amendments which the AAA have asked congress to enact to strengthen the original Adjustment Act were suddenly withdrawn from the senate floor by those who sponsored them. The reason given was that there were imperfections which should be corrected. The real reason for the action was fear of sudden development of litigation over the controversial points.

Western Newspaper Union

NEW USES FOR FARM PRODUCTS

Growing Crops for Industrial Purposes Is Possibility.

A conference between representatives of agriculture, industry and science held at Dearborn, Mich., was devoted to the possibility of producing crops for industrial purposes. The importance of chemistry in converting raw products into useful commodities was stressed.

Growing motor fuel on the farm was pictured as a \$5,000,000,000-a-year income builder for future farmers. The land requirement for the production of 25,000,000 gallons of alcohol a year was estimated at 90,000,000 to 100,000,000 acres. There seems to be no unsolved technical problem standing in the way of utilizing alcohol as a fuel, though there doubtless will be improvements and refinements developed.

Motor fuel is a competitive product. Users of automobiles will continue to utilize the type which furnishes power at lowest cost and greatest convenience. Present supplies of gasoline and those immediately in prospect, together with the efficiency developed in distribution, give it a decided advantage over other fuels. If production should decline and prices increase materially, substitutes will be given greater consideration. With corn selling at \$1 a bushel, discussion of its diversion into uses other than for feeding have largely subsided. Those who advocate its conversion into alcohol to be mixed with gasoline for fuel presuppose a decided reduction in prices.

Ethyl alcohol can be made from any farm crop. It is derived largely from carbohydrates. In Europe unmarketable potatoes are utilized largely for that purpose. Much of the molasses, a by-product of the sugar industry, is now converted into alcohol. There is, however, no indication that any crop is grown primarily for that purpose, but mate-

rials of low value, or in some instances waste products, are utilized. It probably will be many years before corn will be grown primarily as a fuel crop.

Soy bean oil is extensively used in paints and varnishes. Linseed oil has many industrial users. Tung oil trees are grown in the South in a limited way with prospects of greater expansion. Levulose, a form of sugar, can be made from artichokes or sunflowers. Cornstalks have been successfully converted into wall board, slash pine into paper pulp.

New uses for other farm products will be discovered, but the problems of getting production costs low enough, of factories located close to the source of supply to save labor and transportation costs, will have to be solved before commercial activity may be developed.

American agriculture has been conducted upon an export basis. As yet no workable plan of self-sufficiency has been developed. It is a whole-some thing for agriculture, industry and science to co-operate in an effort to develop the market for farm products as they success along this line will add to the standard of living in rural communities and make a wider market for industrial goods.

Meanwhile the farms need foreign markets.—Kansas City Times.

Training for Mothers Essential, Says Atlee

This may not be the best of all possible worlds, but unquestionably it is a man's world. Man made it—institutions, laws, economics—man continues to dominate it. "Manly" and "virile" are heroic adjectives, and to designate one "an old woman" is a major reproach. And what about children? It is

Delicious Kool-Aid Refrigerator ICE CREAM
MAKES 6 TO 8 SERVINGS OF CRACKERS

my considered and honest opinion that the average woman is totally unfit to bring up children. Why should she be fit? She was educated in school and college to be a man, she went out into the world and worked like a man—where was there time or opportunity to learn to bring up her young?

Do you hire anybody off the street to make and tend your automobile? Or train your race horse? Yet we permit any woman with a marriage license to mother and tend children?

If women are to do anything soul-satisfying with their home and children, they must turn to those of their own free will, recognizing here a full outlet for their intelligences, their ambitions. — From "Should Women Be Men?" by B. Atlee, in McLean's.

DOAN'S PILLS

"50% of all motor wear occurs during the starting period"

... say automotive engineers

Motorists who know these facts will save money:

Motor oils refined by the usual methods have some oiliness and film strength, but they may form carbon and sludge, which lead to expensive motor repairs.

Other oils may form almost no carbon and sludge, but are so over-refined that they are robbed of oiliness and film strength they need to prevent motor wear.

Germ Processed Oil is refined to eliminate carbon and sludge troubles and then the Germ Process adds extra oiliness and 2 to 4 times more film strength than any straight mineral oil, as tests on the Timken machine have proved.

Only the oil with the "Hidden Quart" will stay up in your motor and cut down this starting wear!

Here are the facts: Oils not Germ Processed drain back into the crankcase when your motor is idle. Bearings, pistons and cylinders are dry when you start. Even in warm weather your motor makes at least a thousand revolutions before the quickest flowing oil can reach all parts. Bare metal grinds against bare metal—destructive wear occurs.

Conoco Germ Processed Oil cuts down this costly starting wear! The patented Germ Process—adding concentrated oily essence to highly refined oil—makes it penetrate and combine with metal surfaces. That penetrative film, forming the "Hidden Quart", becomes part of the metal itself and never drains away.

Hundreds of dry-crankcase runs have proved the "Hidden Quart"

lubricating value. Cars using Germ Processed Oil were driven 15 to 75 miles with the crankcase empty but without motor damage!

Germ Processed Oil protects your motor another way. All cars built since 1931 have greatly increased pressures and must have oil of extra high film strength for safe lubrication. Straight mineral oils have no more film strength than they had 10 years ago—some have less!

Conoco Germ Processed Oil, with 2 to 4 times the film strength of mineral oils, gives modern motors the lubrication they need.

Only Conoco Germ Processed Oil gives full motor protection—when you start, while you drive. You will cut motor wear if you use it!

EDITORIAL COLUMN

THE PASSING WEEK

The New Mexico Press Association, after much argument, fussings and cussings has finally decided to have the convention at Hot Springs, as it was so ordered at the last session. In that controversy, we have taken no part, but it seems from a man up a tree, that the mistake, or in other words, the "bull" we might say to be better understood by the profession, will leave scars which it will take a long time to heal. The unfortunate circumstance has caused us to decide to have nothing whatever to do with it and we won't, nevertheless, Hot Springs has had our good will in the matter and we hope the good townspeople of that place will suffer no inconvenience over this unfortunate affair.

The mysterious disappearance of the four Illinois people seems to deepen at this writing. Hundreds of people from all over the state have hunted in every conceivable nook and corner for the bodies, but to no avail. Wednesday morning, Sheriff McCamant, T. E. Kelley and several others left for the old coal mines at Carthage, but little hope is expressed for success in that venture. There are holes, caves and caverns between here and Socorro so deep and dark that a body or bodies could be hidden away and not discovered for centuries.

Former President Hoover took another slap at what he termed "hot-house methods" by his administration to restore prosperity — the concentration of economic power and the concentration of economic power are equally destructive, he said.

In an effort to regain all old milk bottles from the cellars of private residences in Utica, N. Y., a certain lady found a diamond in one of the bottles that had been lost 5 months.

Birthday

Remember them with a
Birthday Card—The Burke
Outlook Art & Gift Shop

Comments
(By Lewis A. Burke)

The Sierra County Advocate, published at Hot Springs, N. M., is certainly a newsworthy sheet. One of which the thriving town may be justly proud. We remember Hot Springs when they had "squatter's rights" a long time back. Since that time, this progressive town has grown by leaps and bounds. The natural health-giving qualities of the baths are becoming nationally known, excelling in medicinal qualities to Hot Springs, Ark.

To those interested in Baseball—Do you know that the first curve ball was pitched by accident many years ago. A torn cover on the ball was the cause of the first curve. Then the pitchers got the idea and began to practise throwing the twisters.

Speaking of the Braddock-Baer fight as announced over the radio "hugging match," a certain subscriber remarked—"Why the old-time battlers, such as Fitzsimmons, Jeffries, Tom Sharkey and Dempsey could have disposed of both of them in one night. Exhibition bouts—that is what such meager fights would be to them."

The weather is always a suitable topic for discussion, isn't it so? We were at El Paso recently, spending the week-end going places and seeing things afforded by the bright lights. Returning home, when we arrived at Alamogordo we started breathing easier, foliage looked greener, etc. When we arrived in Carrizozo we took a breath of the crisp mountain air, coming from White Mountain, Nogal Peak and Old Carrizozo. Then all agreed that being home wasn't so bad, after all.

Have you been taking advantage of the bargains offered by Hollomon Bros. in Alamogordo? This progressive firm advertises 600 new bright pattern, enamel-surfaced Rugs (no seconds) 9 by 12, for only \$4.95. They are also featuring 6-foot yard goods of the same material for 49c.

We made mention of the rocks on the sidewalk of the City Park opposite the Carrizozo Auto Company last week. And now it is all rocks. Aint it awful, Mabel? But remember the old adage "Rome wasn't built in a day." But what we said last week about being hard on one's feet still goes.

Our pet peeve—To hear a person say "EYE-ther" for "Either." The dictionary says either way is correct—but doesn't it sound affected to say "EYE-ther?"

Want an argument? On politics, religion, horse-racing—or what have you. You can get it at the Carrizozo Eating House. The regular H.R. railroad men who are off duty are anxious to start one. The best part of it is that most of them are well informed. This popular hotel is the scene of many heated discussions of evenings.

We are to hear the Goldman Band over the N. B. C. network by radio this Thursday evening. This famous organization last season featured Del Staigers, Trumpet soloist par excellence. Del has only one rival and that is Walter Smith of Boston. To S. H. Nickels—Remember of Smith hitting an octave above high C at the finish of the "Maude Concert Waltz?" Show us a man that can hit such a tone, and we'll set 'em up. He made a note out of it, too.

—Many thanks.

FARM
Anywhere

NO MATTER how many hundreds of miles you live from the big town, you can enjoy all the advantages of modern city refrigeration if you have Superfex, the Oil Burning Refrigerator, in your kitchen. Superfex works anywhere. It works without outside connections, without gas or electricity, without a motor to get out of order, without drains or pipes.

Just by burning a few cents worth of kerosene every day, Superfex protects your food from spoiling... it safeguards your health... it saves you trips to the market... it makes your kitchen hours shorter... it gives you more variety in your meals... it gives you ice cubes for cooling drinks... it helps you to serve more delicious meals, all kinds of puddings, salads, frozen desserts, ice cream. Like everything else down on the farm, Superfex is self-sufficient and will prove itself the best friend in your kitchen.

Let us show you Superfex soon.

YU'AN HEE SEE LAUGHS

By SAX ROHMER

Copyright by Sax Rohmer, WNU Beyliss.

SYNOPSIS

Matt Kearney, young American living in London, says good-bye to his sister Eileen, on board the Wallaroo bound for Colombo.

CHAPTER II

A heavy wooden gate, set in a high, old brick wall, did not look very promising. Partially defaced by time and weather, the name "Jo Lung" might still with difficulty be read thereupon.

"Don't forget the American accent, sir," he whispered. "I can't," Kearney replied. "So they tell me here."

This cul-de-sac was curiously quiet, although its blind end terminated very near to the river bank. Here, the fog was thick again. Kearney conjured up a picture of the Wallaroo, lying far downstream, and of a cozy stateroom.

"What you want, please?" asked a soft, monotonous voice. Peering hard, Matt Kearney made out that the speaker wore a dark blue turban. The doorkeeper was not, as one might have anticipated, a Chinaman, but an Arab bowwab.

"Mr. Jo Lung," Norwich replied distinctly. "I have brought him a customer from the United States."

The bowwab turned light upon the speaker's face, and: "I don't see you here, before," he commented.

"Maybe not," Norwich returned. "But I come from Mr. Bernardson. Look at this."

He held out a card. Honey brown fingers grasped it and placed it close before the light of the lantern; then: "All right," said the guardian of the gateway. "Please come in."

The two stepped into a little courtyard. The Arab proved to be a gaunt man with a lined and pock-marked face, sunken eyes and an ominous expression.

They crossed to a corner of the yard, mounted four stone steps, and entered a dimly lighted passage, having a window with an iron grating overlooking the courtyard.

"Please, wait," said the bowwab, leaving them together in the dimly lighted room. Shuffling footsteps died away in some dark place beyond, and Kearney was about to speak when Norwich shook his head urgently.

Standing there in an oppressive hush, a long way off in the building, Kearney heard a sound.

Although at first he failed to identify it, immediately he knew that it was horrible. It was a very high sound, between a piping and a squeal; higher than the note of a rat. It was, paradoxically, so shrill as to be nearly inaudible.

He exchanged a rapid glance with Norwich, and Norwich stood like a man petrified. "For God's sake! What was it?" Kearney whispered.

The emporium of Jo Lung occupied all the rooms on two floors of a rambling old building, eight or nine rooms in all, and each one literally crammed with treasures.

Here were lacquer cabinets, chests, and caskets, antique and modern; each one a choice piece. Damascened swords, Venetian goblets, whole services of Ming porcelain, prayer carpets of a quality seldom seen outside a museum; a collection of books in exquisite bindings; a great quantity of antique silver.

A highly civilized and well-dressed Greek did the honors. "Mr. Jo Lung is unfortunately away," he explained to Norwich.

He endeavored to recall Dawson Haig's instructions. Jo Lung was the biggest "fence"—or dealer in stolen goods—in all London! Surprise visits had never yet caught him napping. This was a new move. Detective Sergeant Norwich had memorized a long list of stolen jewelry—principally foreign; and their job was to try to identify even one item in Jo's emporium.

"My friend, Mr. Bronson, has several commissions," said Norwich. "But mostly colored gems."

"Yes," Kearney broke in. "I'm commissioned by a New York client to complete a collection of sapphires."

"Sapphires!" The Greek raised heavy eyebrows. "I fear I am unfortunate. If Mr. Jo Lung were here he might be able to help you. But to the best of my knowledge we have few sapphires in stock at present. They are not," he smiled slightly, "very profitable just now. However, you shall see."

"They passed along a corridor, went down three naked wooden steps and picked a way through what seemed to be a collection of lamps—lamps of perforated brass, of silver, and of gold; lamps from Arabia, from China, and from Japan."

They entered a room resembling a small shop, and the Greek, stepping behind a narrow counter, pulled out a tray from beneath and opened it for the visitors' inspection.

It was as he did so that the almost insupportable silence began to bear down upon Kearney. The treasure house of Jo Lung was the most silent place he had ever known in the heart of a city. Its silence was uncanny.

"Unless Mr. Lung has others in the safe," the Greek said, "these are the only colored gems in stock at present."

Kearney, resting his eyes upon the jewels, suppressed an exclamation in the nick of time.

The tray was arranged with some artistic care, and in its center, under the harsh, unshaded lamp which the Greek had switched on, blazed a group of amazingly matched fine opals. Kearney clenched his teeth and bent lower, peering down.

Here lay evidence to justify a search of Jo Lung's premises! Beyond any possibility of mistake, this was the "Dakenham necklace"—the famous rope of opals which his Aunt Hilda, Lady Dakenham, had taken with her upon the ill-fated voyage of the American yacht, Miss Minnesota, lost with all hands in the Persian gulf, less than a year before!

Kearney was slightly ahead when the Greek paused and looked back as Kearney observed a little memo-book, bound in green leather, lying upon the first step.

Without attracting attention, he stooped quickly, picked it up, and slipped it in his pocket. Here, perhaps, was evidence!

In the act of turning to rejoin Norwich, who was examining a massive salver—something—a slight sound—prompted Kearney to glance across the shadow-haunted expanse of the big room below.

It opened directly out of the lobby of the bowwab and contained miscellaneous bulky exhibits; a vast place in which but one light was burning. Its dim reflection touched a distant lamp.

And on this landing a woman stood! She was encased, mummy-like, in a long, clinging coat of what Kearney took to be brown ermine.

Her blue-black hair gleamed like a raven's wing. Her long dark eyes were ever so slightly oblique, and she had a petulant red mouth, small and delicately chiseled features, and held her head disdainfully high.

He stared—stared again... and the apparition had gone!

In a soundproof room, well but simply furnished as an office, a man sat before a large desk. The room was in darkness except for a shaded lamp upon this desk.

There came a creaking sound of footsteps and the slam of a door. The visitors had gone.

The man at the table disconnected the apparatus and swung about in his revolving chair. A soft black hat lay upon the carpet, with a fur-lined overcoat having a deep astrakhan collar.

Slowly, the slit-like eyes in the yellow face of the one who watched him opened and the red lips smiled.

"Fully opened, those eyes were terrifying. Some might have found it hard to define wherein their terror lay. Except that they seemed to be super-normally bright, they were, in an animal fashion, fine eyes. Their dreadful quality consisted in one simple difference: their whites were really white—whereas that part of the normal human eye is invariably tinted. The result, being phenomenal, was horrifying."

The man in the revolving chair spoke slowly, and his voice, like his eyes, was super-normal. He was a big man for a Chinaman, and fleshy... but he spoke in a key in which Darwin sang!

"What did I tell you, my friend? Your mean soul said, 'It is business.' I said, 'It is a plot.'"

"I believed..." "I never accept excuses, Ah!" A muffled bell rang.

On the door, here is Polodon. The Chinaman opened a balise-covered door, admitting the immaculate Greek. As he entered: "You were wrong, Jo Lung," he said to the one who had opened for him. He turned to the man at the desk.

"Tonight, it is more than regrettable," the reed voice declared. "This is the second mistake of a disastrous day. The first was the shipment of valuable goods in the Wallaroo. My plans, my careful plans—to be destroyed by fools!"

"Notice of change came so late..." The dim bell rang again. Polodoss opened the pedded door, and a woman came in.

Her blue-black hair gleamed like a raven's wing. Her long dark eyes were ever so slightly oblique, and she had a petulant red mouth, small and delicately chiseled features, and held her head disdainfully high.

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

He stared—stared again... and the apparition had gone!

Jo Lung moved silently towards the door. "Two men," Yu-an added. "All shall go—"

As Jo Lung disappeared, Yu'an turned his apparently closed eyes in the direction of Polodoss. At mention of that name—the Adder—the Greek's face had grown clammy with perspiration.

And Yu'an began to laugh. He did not show his teeth in laughter. His red lips merely seemed to thicken—and his eyes closed as he laughed—high hideous squeals, like the amplified note of a bat.

Kearney felt a tremendous sense of relief when he found himself out again in the narrow lane. Even his ears came a sound of voices which seemed to proceed from the little courtyard they had left behind.

It was good to be free of that strange building, with its silence out of which the breathing of hidden watchers seemed to come; its ghastly emptiness, as of a place unoccupied, deserted, yet which he knew by virtue of some extra sense to be illusive.

"Those opals!" Kearney began. "I know you had spotted something there!"

"I had. You've got your case clearly enough if they don't dispose of them before tomorrow. Those opals belonged to Lady Dakenham, who was lost at sea ten months ago! How in the name of all that's wonderful did Jo Lung get hold of them?"

"In the Red sea or the Persian gulf!" Detective Sergeant Norwich laughed. "Outside our beat!" he said.

"Then you mean there's nothing you can act upon?" "I'm afraid there isn't," Norwich confessed.

"Do you think so?" "No, I don't think so." "Do you—suspect them?" Polodoss solicitously passed her a card.

"This is the introduction they brought, my lady, and Mr. Bernardson had advised us that they were coming."

The woman took the card, glanced at it, and tossed it onto a side table. "Are you ready to leave, Yu'an?"

"I have a telephone call to make to the Wallaroo," he replied. "There has been much bungling. I must speak to the doctor."

"I removed my coat as I entered the warehouse," he said, "and carried it here. I have dropped my notebook!"

Something in those words broke through the high disdain of the woman watching him. Where the eyes of Yu'an had gleamed whitely, here, in opening, grew black, as though the iris distended.

"Your notebook?" Yu'an, clutching the arms of the chair, continued to watch her, his drooping lids slowly, slowly coveting those ominous eyes.

Smart Wardrobe in One Pattern

2197

You can make yourself a mighty smart summer wardrobe right from this one pattern. Simplicity's the thing—shirtdress frocks are "the top"—and here's a beautifully fitting model that may take many variations.

Smiles

SAYING LITTLE First Student—It's awfully late what'll we say to the teacher? Second Student—Oh, we won't say much, just "Good morning"—she'll say the rest.

Lowering the Standard Howell—I see that they are cutting down the quality of food at banquets. Powell—Pretty soon the dinner will be down to the level of the after-dinner speeches.

Before and After "What is premature baldness, pe?" "Losing your hair before you are married, my son."—Detroit News.

Daily Brain Exercise "Any news in the paper tonight?" "I dunno. I haven't solved the bridge problem, yet."

WNU—M 24-35

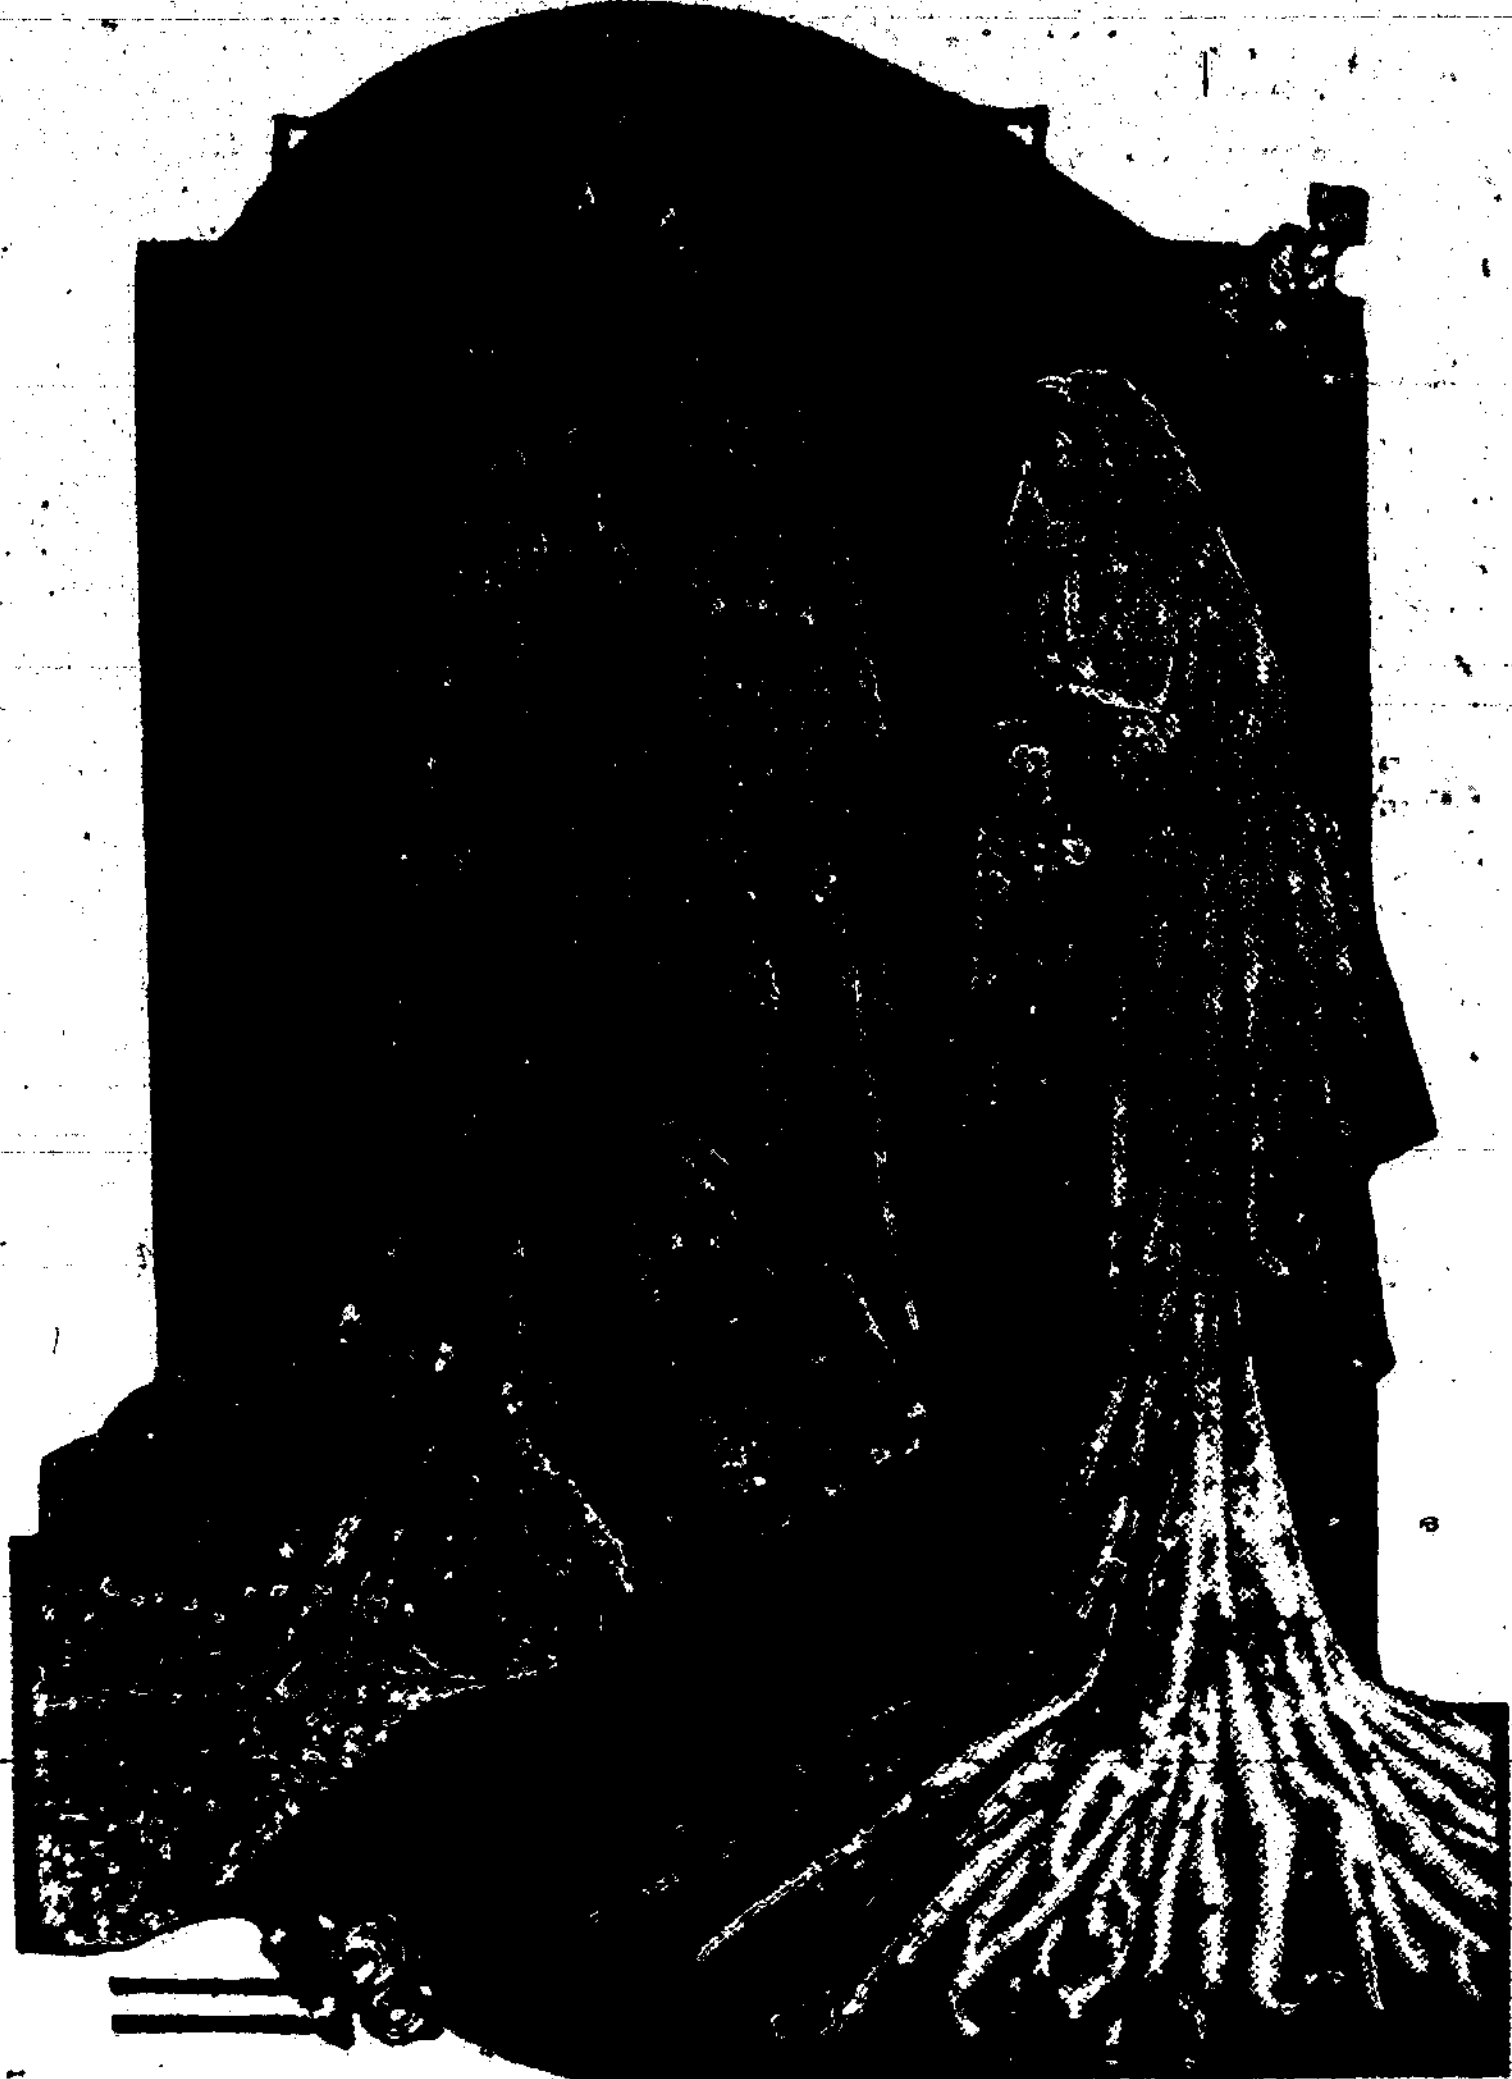

ENJOY WRIGLEYS' SPEARMINT QUALITY GUM. The perfect gum.

"Don't Forget the American Accent, Sir," He Whispered.

And Yu'an Began to Laugh.

Summer Bride Is in Lace or Chiffon

By **CHERIE NICHOLAS**

LACE, most exquisite lace, or chiffon, lovely vaporous chiffon, classic in its simplicity—choose either for your wedding gown. Miss Summer Bride-to-be and you win fashion's smile of approval. The endearing charms of each are breathtaking so we warn you it's going to be a difficult matter to decide.

There is no doubt about lace being definitely in the limelight for bridal gowns, in fact for the entire bridal party. For that matter, enthusiasm for lace whether as a medium for bridal array or for all occasion ranging from simplest sports and daytime clothes to high formals, knows no bounds this season.

With the importance of lace as their cue and inspiration, designers are doing wedding ensembles for this year's midsummer brides that simply baffle description. The gown to the left in the illustration, than which imagination can picture no lovelier, is entirely of imported Chantilly lace with wondrous lace-bordered train. It is cut on princess lines with a high ruffled neck and a tunic effect. The voluminous veil is draped over a coronet of orange blossoms.

Not all brides are so favored by fortune as to be married in such gorgeous lace raiment. However that need not at all discourage the bride-to-be who is lace-minded, for instead of being entirely of lace many of the most attractive wedding gowns designed this season have lace worked in for yokes, and sleeves and perhaps insets and numerous other intriguing ways.

As to lace for the bridesmaids, it is a story too long, too dramatic and romantic to be briefly told. Picture a

bevy of lovely ladies clad in laces of delicate mesh whose colors take on the hues of the rainbow or a summertime garden of flowers. Lace hats they wear, and lace gloves and as like as not shoes of lace.

Chiffon for the wedding gown? That's another of fashion's most fascinating stories which should be told to brides who would wed in June or later in midsummertime. The fair for chiffon evening and party frocks started in Paris and the vogue has become so pronounced that the call of midsummer night fashions for chiffon resounds throughout the length and breadth of all fashionland. Which is, merely the prologue to what we are about to say in regard to the chic, the charm and the importance of chiffon, especially quality-kind all silk chiffon, for not only the bride's gown but for outfitting her attendants even to the littlest flower girl.

In the exquisitely lovely wedding gown to the right in the picture, the poet finds inspiration for a sonnet, the painter for a picture and the bride the realization of dreams come true. The theme of this winsome bridal dress which so obviously plays up simplicity (a sophisticated simplicity, if you please) is white silk chiffon. Draped, it is, in classic Grecian lines, for the latest gesture in realms of formal fashion is the draping of diaphanous materials after the art of ancient Greek sculpturing. Now comes the touch-exquisite which climaxes the beauty and sweet simplicity of this chiffon rhapsody and will cause all who behold to say of her "the bride was a perfect picture"—she carries white violets for her bouquet.

© Western Newspaper Union.

BRIDESMAID IN LACE

By **CHERIE NICHOLAS**

Delicate white silk lace makes a frock which is perfect for the bridesmaid at a formal summer wedding, or for the bride who is being married informally. The ruffled bertha cape covers a complete evening gown. The little ruffled, peasant cap is in line with the trend toward head coverings for formal wear, such as the Indian sari or Hindu thram scarf. The mitts of the silk lace have flaring elbow sleeves.

Fullness Is Fashionable

Fullness in the yoke or the collar line at back, above the waistline, and fullness at center front below the waistline, are much reflected in the late costume collections for the little dresses—in the simpler modes.

SHIRTWAIST FROCK SLICK AND DASHING

There's a new and youthful shirtwaist frock that is arousing loud cheers from the bleachers.

It is a slick, slim affair in dotted foulard, with small boy collar, short sleeves, a belt and buttons all the way down the front, and it is about the most dashing—and practical—garment thus far evolved.

It comes in navy, black or brown, with red, yellow or white dots, and is a city version of the dotted linen frock that was the toast of the Palm Beach season.

Its only trimming is the stitched youthful collar and the stitched cuffs on its brief sleeves, and that perhaps is part of its charm. With it you may wear a bandana cap of the same material, very new and springlike, with a Cossack look.

Stockings Are Bursting Into Color in France

Here is news of another brand new model. Stockings have burst into color in France. This is not nearly so startling as it sounds. The colors are soft, deep shades and will provide fascinating shoe-stockings combinations. In addition, many of them are held just under the knee by luster band. They are ribbed, English fashion, like men's socks, in liles and meshes, made sturdy for hard wear, and inexpensive.

After you get used to the idea, can't you picture them with tweeds and sports things? In the country, blue, green and maroon stockings will stride across the fields and over the links. In town, smart legs will show, and tea in navy blue.

White Capes

Long capes of soft white wool, tweeds, angoras and the like will be shown along with white coats for the summer season.

Dots Are Seen

Dots of one material are seen on backgrounds of different fabrics.

BUSYBODIES!

The bachelor called at his laundry, determined to give them a piece of his mind.

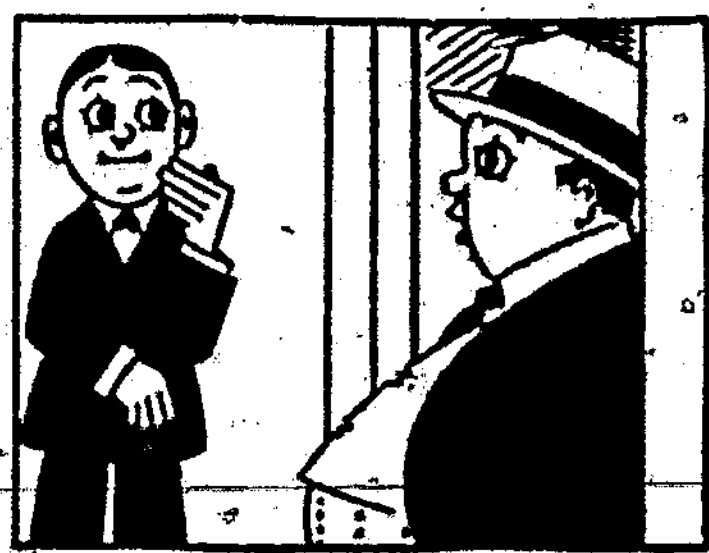

"Look here," he said sternly, "what's the idea of charging me ten cents extra for each shirt-cuff?"

"Because you make pencil notes on them," said the manager.

"And why should that make all the difference?" he asked, puzzled.

"The girls waste so much time trying to read them," came the reply.

CONSOLATION

Collector—I've had enough of mounting these stairs every week to collect my bill.

Cool Debtor—Well, I have a bit of good news for you. Tomorrow I move down two floors.

Kindness Appreciated

They were late for the theater. The box-office clerk was as polite as only a box-office clerk can be, but he couldn't find them a seat. However, they were knowing ones, and slipped round the side and managed to find an attendant who let them in.

At the first interval they felt for their hats to go home.

"I want to see that man at the box office before we go," said one, "and tip him."

"Why?" asked the other.

"Well, he did his best to keep us out."—Stray Stories Magazine.

Spotting Business

Mrs. Smith—Doctor, I think you overcharged for your services while Muriel had the measles.

Doctor—But, Mrs. Smith, I made nine calls!

Mrs. Smith—Yes, but didn't Muriel expose the whole school?—Washington Post.

Wife Again

Friend—It's all right for you to talk about Fascism, but do you know what it would be like to live under a dictator?

Man—I should think so. I've been married for 12 years.

Stung!

"How do you pronounce 's-t-i-n-g-y'?" asked the teacher.

"It all depends on whether it refers to a person or a bee?" answered a pupil wisely.—Washington Post.

No Indeed

Registrar of Marriages (to youthful bridegroom)—The young lady is not a minor, is she?

Bridegroom—Oh, no; she works in a fish shop!

THE JUDGE

"I suppose you'll soon be planting your vegetable garden."

"Not me, I can get all the fresh vegetables I want simply by letting my neighbors brag to me about their success."

Applied Reason

Chairman—Comrades, the resolution is that we oppose the deportation of any citizen, whatever his opinions. Are we all agreed?

A Voice—No!

Chorus—Chuck 'em out!

No Sales Resistance

Gumboll—What was it induced you to buy a house in such a godforsaken region?

Flatfoot—One of the best real estate men in the business.—Pathfinder Magazine.

Don't Believe in Signs

Conductor—Can't you see the sign, "No Smoking?"

Sailor—Sure, mate, that's plain enough. But there are so many dippy signs here. Looks there, one says, "Wear Noms Corsets." So I ain't paying no attention to any of them.

Predictions Fair, but Cooler

Mrs. Smith (showing portrait of herself in her mother's arms)—This is how I looked 20 years ago.

Guest—Wonderful! And who is the baby on your arm?

Women Form Majority of Turkey's Population

Women form the majority of Turkey's population; they exceed men by not less than 7.9 per cent, according to official statistics.

In rural districts the percentage of women is even much higher, as in most of the larger cities the male element prevails.

The population of Istanbul with 709,000 inhabitants, against 1,100,000 under Ottoman empire, includes 138,000 married couples, while 833,000 persons are unmarried. There are 19,000 widowers, against 72,000 widows. The number of marriages has increased steadily from 1027, when 2,805 were registered, to 1032 with 4,813 marriages. The majority of the brides were between nineteen and twenty-four years old, while men mostly married between thirty and thirty-four.

More than 13,000,000 Turkish citizens profess the Mahometan faith; 100,900 are Greek Orthodox, 81,872 "arealites"; 77,433 Armenian-Gregori-

ans; 59,511 Roman Catholics, and 24,307 Protestants. The rest of the population of 17,500,000 belong either to no religious community or their religion could not be established.

Ring Brings Misfortune; Is Returned to Egypt

A registered packet arrived for the premier of Egypt from Vancouver, and was found to contain a beautiful scarab ring accompanied by a letter, writes the Cairo correspondent of the London Sunday Observer.

The writer informed his excellency that the ring had been given by the khedive to his grandfather, who had been visiting Cairo and Alexandria with a theatrical company. His grandfather had died about sixty years ago, leaving the ring to his father, from whom the writer had inherited it some seven years later. Ever since the ring had come into his possession unaccountable misfortunes had befallen him every sev-

Morning... Headaches

FOR YEARS I've suffered sick headaches in the morning. I didn't realize until the doctor told me how many women are bothered with too much acid, and he recommended Milnesia Wafers. Since I've been using Milnesia I've felt like a new person. Haven't had a cold either, because when you get rid of the acids you don't get colds.

MILNESIA Wafers neutralize the excess acids that cause indigestion, heartburn and sick headaches. Each wafer is a full adult dose, children—one-quarter to one-half. Pleasant to take. Recommended by thousands of physicians. Buy a package today—at all good druggists.

BARGAINS

YES! You find them announced in the columns of this paper by merchants of our community who do not feel they must keep the quality of their merchandise or their prices under cover. It is safe to buy of the merchant who ADVERTISES.

MOTORISTS WISE SIMONIZ

MAKES THE FINISH LAST LONGER

Keeps Cars Beautiful for Years

Always insist on Simoniz and Simoniz Kleener—and enjoy the pleasure of driving a new looking car for years.

If you want your car to sparkle like new again—and stay beautiful... Simoniz it and do it right away. Simonizing is easy. The new, improved Simoniz Kleener quickly restores the lustre to the finish. Simoniz, although easy to apply, is hard for weather to wear off. It protects the finish, makes it last longer and keeps the colors from fading.

DIZZY DEAN is benched

SAY, DIZZY, COULD YOU PITCH A GAME EVERY DAY?

SURE! WHY WHEN I WAS IN THE ARMY I DID EVEN BETTER THAN THAT! ONE DAY...

HEY, DIZZY, WHERE YOU GOING WITH YOUR GLOVE AND BALL-SHOES?

INTO TOWN TO PICK UP TEN BUCKS PITCHING A DOUBLE-HEADER FOR A SEMI-PRO TEAM

OH NO, YOU'RE NOT! YOU'RE GOING INTO THE GUARDHOUSE, AND YOU'LL STAY THERE TILL IT'S TIME FOR YOU TO PITCH FOR US TO-MORROW!

START MOVIN', DIZZY, AN DON'T DRAG YOUR FEET

I JUST DROPPED AROUND TO TELL YOU YOU'RE EVEN DIZZIER THAN I THOUGHT YOU WAS WHEN I NAMED YOU DIZZY. TRYIN' TO PITCH THREE GAMES IN TWO DAYS!

BUT SARG, I COULD HAVE DONE IT—EASY. I'VE BEEN DOING IT EVERY WEEK, ONLY YOU DON'T KNOW IT

GEE, DIZZY, PITCHING THREE GAMES IN TWO DAYS MUST HAVE TAKEN A LOT OUT OF YOU!

NOT OUT OF OLD DIZ. 'CAUSE I HAD THE STRENGTH AND ENERGY TO BACK IT UP

HOW CAN I GET LOTS OF ENERGY, DIZZY?

ONE SWELL WAY IS TO EAT GRAPE-NUTS LIKE I DO. IT'S PACKED WITH THE STUFF THAT MAKES ENERGY—PLENTY OF IT!

Boys! Girls!... Get Valuable Prizes Free!

Join Dizzy Dean Winners—carry Dizzy's Lucky Piece!

Send the top from one full-size Grape-Nuts package, with your name and address, to Grape-Nuts, Battle Creek, Mich., for membership pin and copy of club manual, containing list of 37 nifty free prizes. And to have loads of energy, start eating Grape-Nuts right away. It has a winning flavor all its own—crisp, nut-like, delicious. Economical to serve, too, for two tablespoons, with whole milk or cream, provide more varied nourishment than many a hearty meal. (Offer expires Dec. 31, 1935.)

TOWN HAPPENINGS
WHO? WHEN? WHY?

BORN—To Mr. and Mrs. Fred Silva, Monday night, June 10, a 7½ pound girl. Mother and daughter are doing nicely.

W. H. Broadus, Optometrist will be in Carrizozo, Wednesday afternoon, June 19, at the office of Dr. Shaver. Specialized Eye Service.

Rev. L. D. Jordan of the Baptist Church was an Albuquerque and Belen visitor several days last week.

Mr. and Mrs. Andres Luera of El Paso spent the week end here, visiting with the Ben C. Sanchez, Lupe and Andres Luera, Jr., families.

Lawrence Hobbie and Harold Pershouse of Jersey City, N. J., arrived here Sunday evening and will visit for several weeks with the J. V. Hobbie family. While here the Hobbies will take them to our scenic resorts in the nearby mountains, where they can try their New Jersey luck on the mountain trout.

Red Burnett was a business visitor from Alto last Saturday.

Mr. and Mrs. Albert Kimbrell of Picacho were here the first part of the week for a short visit with the Wm. Kimbrell and Ben D. Holguin families.

Marshall C. St. John and Joe Chavez were White Oaks visitors on Monday of this week.

Mrs. Sofia Torres and daughter, Miss Aurora Anaya of Capitan were week-end guests at the home of Miss Rosa Padilla.

O. I. Norton and Ware Brazel of Three Rivers were here Tuesday, being interested in the White Sands District meeting under the Taylor act.

Estanislaw Bello came over from Polvadera Tuesday to attend the stockmen's meeting.

A Correction — R. S. Fagan of Fort Stanton was mentioned as being one of the attendants at the Boxing match held at the Lyric Theatre last Wednesday nite. Mr. Fagan was home at Fort Stanton.

Billy S. Norman was a Carrizozo business visitor from San Patricio on Monday of this week.

Wm. M. Kelt is now in White Oaks, operating the "Smuggler" mine for A. H. Hudspeth.

Sam Berger of Capitan was a Carrizozo business visitor the first part of the week.

The Radio News is broadcast over WOAI in San Antonio at 9 in the evening. WOAI is a strong radio station of 50,000 watts power.

George Elmgen, scenic painter and cartoonist, who has been contributing sketches to the Caduceus, the Fort Stanton paper and also has had many sketches in the New Mexico Magazine, left yesterday for Concrete, Wash., where he will make his home for the summer, at least. He was accompanied by Wallace Lindsay, who will go to his home in Seattle. The boys had been here at the Fort for the past several years and we regret to see them depart.

A woman in Topeka, Kans., called at the County Relief headquarters to complain about the amount of money and supplies given her family.

"We just can't get along on what we're getting," she told them. "My husband and I have talked it over and he said if we didn't get more groceries and supplies, he was going out and take the job offered him a few days ago."

LINCOLN HEARSAY

The Bonito Inn and filling station changed management on June 11. Mrs. Ella Davidson went to her home in Roswell and Mr. Parsons left for Ruidoso, where he will operate a filling station. Roy Catron of Roswell is the new manager at the Inn and filling station.

Cristobal Zamora found a One Dollar Gold Piece, dated 1855. He discovered the coin while working on his ranch about two miles west of here. Several persons have offered to purchase the relic, but his answer has always been in the negative.

Ramon Luna, Martin Garcia and Ernesto Maes were Carrizozo visitors on Monday.

T. C. Romero was in El Paso the first part of the week receiving medical aid for an ailment. He was accompanied by his mother, Mrs. Roberta Romero, sister O'elia and Juan Chavez. They reported a nice trip.

The Hondo Apple Sorters won a double-header at Hondo last Sunday by trouncing the Lincoln Desperados by a 13 to 9 score, and the Picacho Cabbage Growers by a score of 25 to 8.

Mr. and Mrs. B. L. Moore and Sherwood Corn were here from the Adobe country Tuesday, attending the stockmen's meeting.

From the Sierra County Advocate — Mr. and Mrs. A. A. Highfill entertained their daughter and family, Mr. and Mrs. Clyde Pittman, granddaughter Helen and her twins, and granddaughter Dorothy Jones from El Paso the last week-end. Dorothy Jones and Clarice Pittman remained for a summer vacation with their grandparents. Note—Dorothy Jones is the small daughter of Mr. and Mrs. Carl Jones of Carrizozo. The Pittman family resided at this place a few years back. Mr. Pittman being in the employ of the S. P.

Refrigeration
for
Your HOME

PERFECT meals for you and your family are always within your reach, with no trouble, if you have a Superfex Oil Burning Refrigerator in your kitchen. No matter how hot the summer, your meats, fruits, salads and vegetables are kept constantly cool, fresh and appetizing within easy reach.

In its sanitary porcelain enamel lined interior, Superfex never allows milk or cream to sour or develop bacteria... with a Superfex, the butter is always firm and sweet, the vegetables crisp and fresh and it is easy to make cooling drinks for the family and friends.

Superfex can be used anywhere... it is not dependent on outside connections. For an hour or two every night the burners operate, then your refrigeration goes on for 24 hours. Users say the cost is around \$10.00 a year—less than a dollar a month.

Let us demonstrate Superfex to you soon.
