PRICE \$2.00 THE YEAR

Diamond Dust

By Joe Chavez

	Won	Lost
Carrizozo	2	3
Cobras	6	2

The Mescalero Apaches went wild on the Ruidoso last Sunday and literally massacred the Carrizozo Cardinals. It was murder, pure and simple and those who witnessed the slaughter, are of the opinion that the blood-thirsty Red brethren are still on the run. Tony Perez, local boy, who has turned Apache, also turned against civilization at Ruidoso and contributed to the downfall of the Anglos by pitching ball like nobody's business. 'Awright,' Skeeter, you better stay away from Carrizozo if you aspire to raise a crop of gray whiskers and be called grandpop. The boys have sworn revenge against you and if they can't skin you themselves, they will turn out the dew of Cobras on you and on the other Indians.

The Carrizozo Cobras, accompanied by a large group of supporters and 108% rooters, invaded Fort Stanton last Sunday and carried out their threat of giving the Conservationists a free coast in Landon's handwagon. Gonzales started on the ant hill for Carrizozo and for 7 innings held the Stanton-ites to a few scattered bingles and three runs. Up to that time, the score stood 9 to 3 in Carrizozo's favor, when all of a sudden, Gonzales blew up and hit three batters in succession. He was hit pretty freely in this outburst and finally had to be jerked from the box and Peralta sent in to try and halt the rally. He fared no better and when the inning was over, Fort Stanton had tied the score at 9-all. In their trip to the plate in the 8th the Cobras delivered with a bombardment of base hits and managed to put two more tallies in the score book. Andy Luera, who had been doing catcher's duty, was shifted to the pitcher's box and held Stanton at bay for the two remaining innings. The final score being 11 to 9 in favor of Carrizozo.

Manuel Gutierrez and Keeno Ortiz were given a try-out on second and third, respectively, and I am here to tell you that those youngsters handled themselves a shade better than the old heads. Tino Lopez and Beltran pulled off some difficult catches in the outfield, robbing the Soil boys of many hits. Captain Marquez, star player of the team, was absent from the line-up, Ortiz alternating for him on second base. St. John and A. Lopez took care of the initial bag. Ben Sanchez, aside from dishing out groceries at Ziegler Bros. Store, proved to be a fair and efficient umpire.

The Cobras play the Black Sox at Alamogordo next Sunday and the Cardinals cross bats with Corona here.

Personals

Mr. and Mrs. Louis Adams have gone to Bernie, Mo., to attend the funeral of Mrs. Adams' mother, who passed away recently.

Mrs. Bert Pfingsten of Hondo has returned from a week's visit with her mother, Mrs. S. E. Manning at Hobbs.

Kitty Rowland, daughter of our genial friend and bookkeeper, Floyd Rowland at the City Garage, is here and will spend the vacation period with her father.

Mrs. Rosa W. Chavez, who has been quite ill of late, is much improved at this time.

Mrs. Helen Castle, once a resident of the ranch near Oscura, but now of Winfred, Calif., is visiting Mr. and Mrs. Chas. H. Thornton of that place for a few days.

BORN—Sunday night at the Johnson Hospital to Mr. and Mrs. Wallace Ferguson of Capitan, a bouncing baby boy. Mother and son are doing nicely.

Mrs. Byron Crandall, District Supervisor of the Rural Rehabilitation Department with headquarters at Las Cruces, was a Carrizozo visitor Monday checking up on field work in this locality. Mrs. Crandall is a graduate of Kansas University, and was a college chum and roommate of Mrs. Phil Bright. While here, she was a visitor at the Bright home — and together the ladies went over reminiscences of by-gone college days.

The Mirelez, Ben Sanchez, St. John, Ortiz, Vidaurri and Vega families were among those who attended the ball game at Fort Stanton last Sunday.

Mrs. Forest Cathey and small daughter Peggy Jean of Hobbs, who had been visiting at the home of Mrs. Cathey's mother Mrs. G.C. Bigelow, left for home last week after a pleasant stay.

Mr. and Mrs. Alvin Hightower, sons Alvin, Jr., and Glen Edward came in Wednesday morning from Oakland, Calif., and will spend the remainder of the month with relatives. Alvin left here 15 years ago and located at Oakland, where he is conducting a large barber shop. His brother Bill is also at Oakland and engaged in the same line of business.

Mrs. W. O. Garrison entertained with two tables of bridge last week in honor of Miss Hazel Melias, our former and popular teacher. Miss Melias had only one high prize, but at the refreshment table, she kept her friends in a merry mood in her old time ways and scintillating wit.

While in the act of cranking a car, Buster Anderson's left foot slipped, badly spraining his foot and ankle. Buster hobbled around on crutches for two days, but is now able to go with the aid of a cane.

Frank Lennett underwent an operation Wednesday in El Paso for neuritis and is getting along nicely.

L. E. Cummins, teacher in the school at Capitan, was a Carrizozo visitor on Monday.

ALF M. LANDON

FRANK KNOX

Frances Aguayo Campbell

After a lingering illness of several weeks in an El Paso hospital, Mrs. Frances Campbell died Monday afternoon at about two o'clock. Funeral services were held Wednesday afternoon at the Methodist church with Rev. Bell conducting the first portion of the ceremony, after which Comet Chapter No. 29, O. E. S., of which order the deceased was a beloved member, performed the beautiful ritualistic rites for the dead, under the direction of Mrs. Ina Mayer, Worthy Matron of the Chapter. She had held various offices in that organization.

Frances Ruth Aguayo was born in San Patricio, N. M., on Sept. 22, 1910. She was a daughter of Mr. and Mrs. Harry Aguayo and had lived in Carrizozo since 1913. She graduated from the Carrizozo High School in '29. In August, 1929, she accepted a position as Deputy County Clerk and held that position until her death. She was very efficient in her work and the most popular employee in the Courthouse. Her pleasant smile and cheerful words will be greatly missed by her many friends over the entire county. On Nov. 9, 1935, she married Angus D. Campbell, a foster son of Dr. and Mrs. Paul of El Paso, who with the sorrowing husband mourn her passing.

Active pallbearers were: Ed Abeyta of Capitan; Ben Jarvis, El Paso; Floy Skinner, Nogal; Ernest Key, Gunter Kroggel, Carrizozo. Honorary pallbearers: Dr. Paul Ralph Treat, El Paso; L. H. Dow, Carrizozo; Ben Greisen, Capitan. The flower girls were members of her graduating class, friends and co-workers at the courthouse.

Her casket was covered with a beautiful blanket of flowers sent by the bereaved husband, who is ill and unable to attend the services. The numerous beautiful floral tributes and the large assembly at the funeral attest to her popularity.

Besides her husband and parents, she leaves to mourn her passing, her brothers and sisters: Mr. and Mrs. Paul Aguayo and daughter, Mr. and Mrs. Ernest Aguayo and daughter, Mr. and Mrs. Elmo Aguayo and daughter, Mrs. Joe Aguayo, her sister-in-law of Arizona, Messrs. Jack and Herbert Aguayo, Miss Lorraine Aguayo, Doris and Donis Aguayo, twin brother and sister, Mrs. Alice Jarvis and daughters Zelma and Lois Ann. The sympathy of this community is tendered to the bereaved relatives.

Mr. and Mrs. T. C. Romero were here from Lincoln yesterday.

Shelton—Stone

At a quiet home wedding, Miss Louise Shelton, charming daughter of Mr. and Mrs. J. M. Shelton of Carrizozo was married to Mr. Porter Stone, prominent young business man of Carlsbad, Sunday, June 14, at 8 a.m. Miss Leslye Cooper, maid of honor, sang "I Love You Truly," accompanied by Mrs. Oscar Clouse. As Miss Cooper played Mendelssohn's Wedding March, the bride and groom, attended by the bride's parents, entered the living room which was banked with tall baskets of white flowers. Rev. Bell read the short marriage ceremony and everyone kissed the bride and congratulated the groom.

The bride wore a white mouseline de soie dress over flowered crepe and carried a shower bouquet of lilies of the valley and white carnations, a Rainbow Bible, a gift from her brother and her grandmother's wedding handkerchief. The bride and groom cut the lovely bride's white and yellow cake, made and decorated by Mrs. Degitz, and served the guests with coffee.

Guests who attended the wedding were: Mr. J. A. Shelton of Walnut Springs, Texas, grandfather of the bride; Misses Dell Roberts, Tennis Brown, Mr. and Mrs. Walter Pfeiffer, daughter Sallie Mae, Dr. L. H. Barry, Ben Roberts, all of Corona; Mmes. Nellie Branum, F. A. English, Oscar Clouse, Miss Leslye Cooper, Frank and Fred English.

The couple left immediately for the Painted Desert and Grand Canyon, where they will spend their honeymoon. They will be at home to their many friends after June 24, at Carlsbad.

—Contributed.

Rathmann Hospital

The Lin Apartments, recently purchased from Mrs. Nellie Branum by Albert Scharf, has been remodeled into a convenient hospital. Dr. Rathmann has leased it and has cared for numerous patients since opening. Mrs. Laura Sullivan, who is well known in this County, is Head Nurse.

Sarah Trujillo of Capitan and Johnny May of Nogal are improving nicely at the Johnson Hospital.

Mr. and Mrs. Verl Groce came in last Sunday from Missouri and will visit with the Boughner family of Carrizozo and the Groce family of Mountainair.

Mesdames T. J. Burleson of Fort Stanton and T. Laramie of Lincoln were here Monday and while in town, made this office a pleasant visit.

Lyric Theatre

R. A. Walker, Owner

Show starts at 8:00 p. m. Friday-Saturday — "SANDERS of the RIVER" Featuring Paul Robeson, Leslie Banks, Nina Mae McKinney and a cast of thousands. A jungle picture of savages, wild beasts and primitive adventures. Also Mickey Mouse and Silly Symphony in Technicolors.

Sunday-Monday-Tuesday — Dick Powell in "THANKS A MILLION," with Ann Dvorak, Fred Allen, Patsy Kelly, Paul Whiteman and his band, Yacht Club Boys, Ramona Rubinoff and Raymond Walburn. The merriest comedy with music that you can ever hope to see. Also "Gangsters of the Deep" and a "June Bride."

Matinee Sunday at 2:30. Night show at 8:00.

—Wednesday, June 24—CCC Dramatic Club presents a 3-Act Play entitled "As the Clock Strikes Three."

Lincoln (Hearsay)

About 20 children enjoyed a party at the home of Mr. and Mrs. H. M. Maes in Lincoln, on June 16, honoring the twelfth birthday of their daughter Juanita. Refreshments of lemonade and cake were served after the games. Tircio Romero, Jr. and "Harmonica" Enrique Miranda furnished music for the occasion.

Several of our local boys attended a special invitation dance at the Educational camp for girls in the Baca Canyon last Friday night.

Susie Maes, cadet teacher at the Girls' Camp and brother Ernesto were in Alamogordo Wednesday, returning home on the same day.

Juan Luna has been ill at his home for the past week.

Mr. and Mrs. J. M. Penfield and their two daughters Julia and Joan returned from a trip to the northern part of the state Sunday. Julia remained in the town of Taos to study painting. They report a successful trip, making the trip via Las Vegas and Santa Rosa.

Dr. Rathmann attended the Crippled Children's Clinic at Alamogordo Wednesday — he reports that 35 children were examined in anticipation of future treatment.

Julian R. Taylor, Jr., of Las Cruces was here last week and was a guest at the C. E. Freeman home. While here, accompanied by Miss Rhoda Freeman, made a trip to the White Sands. Julian resided here for years with his parents before going to Las Cruces. He will go to Washington, D. C., to accept an important position with the WPA.

Mr. and Mrs. Juan Beltran, Mr. and Mrs. Jerry Beltran, Juan Jiron, Pablo Navarro, Manuel Ramirez and others left yesterday for the Wyoming beef fields.

Gene Dow, who is being treated at the Rathmann Hospital, is reported as improving nicely.

American Legion Auxiliary Entertainment, Saturday, June 20 at the Capitan Gymnasium

Out-of-the-Ordinary

STRANGER THAN FICTION

We once heard of a band of Indians being shocked when they were offered whiskey, but to hear of people who refused to be wealthy, is the most out-of-the-ordinary. When rich oil was discovered on their lands in Kansas, the Amish Mennonites fled from this prosperity, sold their farms at a cheap price and moved to Iowa. They absolutely refused to accept the good fortune, saying that the devil was in the oil, coming up to devour the inhabitants. As soon as they could make arrangements, they pulled out of what they considered a temptation to serve the devil.

At Omaha, Nebraska, Mary Jane McCullough, widow, with but one son for her support, owed a certain sum of money for furniture, for which the son, John, was paying for in weekly payments. The son took ill in the fall and payments, of course, became delinquent. The widow went to the furniture house, explained the situation, promising that as soon as her son's condition enabled him to return to work, he would make up for the delinquency. This failed to satisfy the firm and one cold morning in the early winter, two large trucks drove up, accompanied by four men. They rapped on the door of the humble home and requested admittance. When the lady asked what their business was, she was informed that they had come for the furniture. Mrs. McCullough recited to them the promise she had made to the firm, but they insisted on taking the goods. She told them to wait a moment. After closing the door she made for the wood shed and returned with an ax. Opening the door, she defended her home and her sick son, saying: "The first man who makes an attempt to enter this house, will be carried out." She won. The men departed. In the springtime, John recovered, went to work and paid up all back payments. Bully for Mrs. McCullough!

The most miraculous escape from death, was the experience of Eugene Tarrant, goat rancher in Surveyor's Canyon a few days ago. He was riding horseback in a thunderstorm, when a bolt of lightning struck him on top of the head. It tore his hat to shreds, killed his horse, tore most of his clothing off and tore his saddle to pieces. He was found unconscious, but that was caused by his head coming in contact with a boulder as he fell. After finding out the damage done, he said: "That was a hell of a note, wasn't it?"

Mrs. Myrtle Weigand of Knoxville, Tenn., obtained a divorce from her husband, John, on the grounds that he had not taken a bath since the last national election.

Floyd Gibbons

Adventurers' Club

Hello Everybody!

"Riding Lesson"

By FLOYD GIBBONS
Famous Headline Hunter.

YOU'VE heard stories about how people have learned to swim by getting thrown into the water and having to swim. Well, here's the story of how Duke Edwards learned to ride a horse.

Duke lives in New York city. Maybe you've heard of him. Maybe you've seen him ride horses. He does it pretty regularly now. But I'll bet you've never seen anything half as good as that first bronco-back excursion Duke ever took, out in Kalispell, Mont., in July, 1912.

It was this way. Duke was twenty years old and fed up with the big city. The old adventurer's blood was pumping in his veins and his feet were itching to go places. So he invested most of his money in a railroad ticket and headed west. He didn't know what he was going to do when he got there. But that was soon settled for him. On the train, Duke met up with a bird in a big, 10-gallon hat. He got to talking with him, and told him he was going west to see if he could get a job on a ranch.

"Can you ride a horse?" the big fellow wanted to know.

Riding a Horse Wasn't One of Duke's Accomplishments.

Well, Duke couldn't ride a horse any more than he could walk a tight rope, but he wasn't going to let that stand in his way of getting a job. "Sure I can," he said. And right there, his troubles started.

The big fellow told Duke he was a rodeo rider. He'd just finished up working for a wild west show and was on his way to join another one in California. He told Duke he'd fix him up with a cowboy outfit and see if he couldn't work him into a job somewhere. That was more than Duke had figured on.

I mean, he might have bluffed his way through the business of riding a tame horse, but getting aboard one of those bucking bronchos they ride in the circus was another thing altogether. The more he heard about that job, the less he liked it. But before he'd finally made up his mind, the big fellow had staked him to a lot of cowboy clothes, and Duke owed him so much money that he just had to have a job to pay it back.

The Reward for Bluffing Is Usually a Show-Down.

Duke began hoping they'd turn him down when he applied for a job—but they didn't. The big fellow saw to that. He went to work at seventy-five bucks

Rearing and Snorting—the Horse—Plunged-Up-and-Down.

a month and his keep, and since it was the off season and the show was in winter quarters, he managed to bluff his way through the first couple of weeks on the job. Duke's method was simple, but it had its drawback. He just bragged so much about what a good broncho buster he was that everybody took it for granted that he knew his horses. But all that talk was just going to make things worse for him when the big showdown came.

Duke fooled the rest of the show, but he couldn't kid the big fellow. When he found out Duke couldn't ride a horse, he started teaching him as much as he could. But you can't teach a man to bust bronchos in two weeks, and that's about all the time they had before the show went on the road again.

Duke had a streak of luck the first week or two the show was on the road. They forgot about him or something. Anyway, nobody asked him to ride a horse. Then, in Kalispell, Mont., the blow fell. And a tough blow it was, too.

"Dynamite" Was a Tough Specimen of Horse Flesh.

Kalispell was a great ranching town. A cowman in the neighborhood brought in a bad horse that went by the pretty name of Dynamite, and Dynamite's reputation was so bad around that neck of the woods that the show offered a prize of a hundred bucks to the first cowboy that stayed on his back. And the first name drawn to ride Dynamite was—you guessed it—Duke Edwards.

"I didn't say anything," says Duke, "but I felt myself going into a faint. By this time I knew how to mount a horse and ride it around the lot, but I'd never been on a bucking horse. It took six cowboys to saddle that brute and hold him so I could mount, but I had to act as if I wasn't afraid. I climbed into the saddle, and then, with a yell, we were off. "The horse, rearing and snorting, went down almost to his knees and bounced up again. I thought my head would snap off my neck. I felt myself fainting, but I stuck to the horse until we reached the bandstand."

Duke Played a Solo on the Big Bass Drum.

It took Duke and Dynamite just about forty seconds to reach that bandstand, but remember, that's quite a while to be on a bucking horse. It was at the bandstand that it happened. There, Dynamite put on an extra pound or two of reserve steam. He gave a last leap, kicked up his heels, and Duke went flying over his head.

Straight into the bandstand Duke flew. He could see the big bass drum coming up at him—felt his nose flatten out as it hit the drumhead. Then everything went black until he awoke in the hospital with a busted head and a big cut in his forehead.

And did they fire Duke after that? Well—that's the funny part of it. Everybody said he'd given that Dynamite horse one heck of a good ride. Duke stayed with that outfit for three years and rode plenty more tough horses. Then he went into the movies and rode in western pictures, so you've probably seen Duke at one time or another, on the screen. And that one experience, he says, has given him the only rule of success he knows. "First throw your blurt," says Duke, "and then make it good."

Famous Maps of Path to Young Woman's Heart

As one journeys along the Rhone in France from Avignon, it becomes an easy matter to explain the famous maps of the "Path to a Young Woman's Heart" which the Court of Love held here in the Seventeenth century, delighted in making.

Tarazon, down the river from Avignon takes in good part the fly fun-poked at the character of the city's inhabitants in the late "Tartarin of Tarazon." The people of the town now go so far as to sell pictures of Tartarin on his expedition to the Alps, and some will even point out to gullible travelers the place where he lived.

Arles, also in this vicinity, is famed for its Roman antiquities. Its amphitheater is about 500 yards in circumference, has 45 tiers of seats and holds about 20,000 spectators. In the summer months it is the scene of many bull-fights. The old theater of Arles

was also built by the Romans, although it was designed by a Greek architect.

Where the Rhone divides before entering the Mediterranean, it forms a salt delta, the Camargue, which is one of the most romantic regions of Provence. Flammeos with pink feathers inhabit its marshes, herds of cattle roam its fields, and steer-roping and branding are a part of everyday life. The cowboys of the region are expert, and their small white horses are very intelligent, taking as lively an interest in the games of their riders as the men do.

Tradition says that here the three Maries, Mary of Bethany, Mary, the mother of James, and Mary Magdalen, with their servant, Sarah, landed when they sailed away from the Holy Land after the Crucifixion. Sarah, an Egyptian, has become the saint of the grapes, and in May they congregate here in colorful throngs to worship in the Church of the Salates Maries de la Mer.

The Household

By LYDIA LE BARON WALKER

A CHILD is reputed to be the most defenseless of all animals. Its one and only weapon is its cry. It begins to use this weapon almost from its entry into the world. It cries to let the nurse know it is awake. It cries to let its mother know it is hungry. These are expected cries.

The cry becomes a weapon when it rings out with terror. This may be for

fear of perfectly harmless things, and can be assuaged. I remember once, when my children were very small, that two little friends were playing with them on the veranda. A gentle summer shower came up. With the first few drops of rain, the older playmate took the hand of her small sister, and said:

"Come along, Doris, you know you always cry when it rains," and away went the two little folk, hand in hand, across the adjoining lawns to their home.

It was such a strange thing for a child to fear. But I discovered that they were afraid of other elements, and of cats, dogs, and other animals, and it was because the mother, herself was afraid. She seemed never to attempt to down her apprehensions, nor to ward off the fears of her little children although, of course, she tried to shelter them. Tears flowed frequently and easily with them, but we, and the other neighbors, realizing there was nothing really for them to fear, ceased to worry over their distress.

Rescue. In districts of congestion, chiefly in slums and crowded dwellings, the terrified cries of children have frequently been the direct cause of their relief. When these shrieks are heard repeatedly coming from the same quarters, there is reason to look into the cause.

A certain amount of crying of infants is their rightful privilege. But it is important to teach that tears cannot change decisions, nor make mother do what the little one wants. As the little folk grow, they develop other methods of protection than crying.

The normal child does not want to be stamped a cry baby and soon learns tears are unwarranted except under great stress.

Moderation. Moderation is a word that seems to be entirely lacking in some persons' vocabularies. Hurry, rush, and similar words, crowd out the first idea. These people dash into enterprises, club work, friendships and all undertakings with such fervid zeal that they use up their energy, until it is devitalized, and burn up their interest until it vanishes like smoke. They are continually starting new ventures, following new friendship trails and seeking new ways of being entertained.

Such avid pursuit of the special form of work or pleasure that is on the horizon at the moment, cannot fail to become exhausting, not alone of one's powers of labor in its behalf, but of one's interest in the special subject. A worn-out interest like a worn-out garment is discarded. Frequently it is with regret that one looks back on the fine things that have been dashed through because of too-forced pressure of attention for too short a period.

Lasting Enjoyment. The person who goes into either work or pleasure with zest, but not too eager haste to get everything out of it immediately, will find a more enduring interest in the occupation or a more lasting enjoyment in friendships, club activities, etc.

Everyone who has ridden a horse, played tennis, exercised in a gymnasium, or done callisthenics at home, knows that moderation must be used, or one will get lame, sore, and disqualified for a while. The moderate continuance of the sport or activity is necessary to get in good form.

So it is with the main things of life. Steady effort brings marked gain. It is built up by sustained pursuit of whatever one wants to accomplish. Success is made by successive steps up the rungs of its ladder. Friendships increase by added links in the chain. Moderation is the keystone, the magic idea back of the word.

Vines for Bathroom

An attractive bathroom seen recently has white-painted walls and a floor of black and gray design. The bathtub, set in an alcove, has several glass shelves on the wall at each end. The alcove is lighted indirectly, from above, and luxuriant ivy vines trail down the two tiers of shelves. Faint blue-gray Venetian blinds curtain the windows.

Porch Protection

Porch floors are subjected to excessive wear and all kinds of weather. Special exterior floor paints are manufactured to give the greatest amount of service possible. Cement porch floors, if they haven't been painted before, should first be primed with a special cement primer and then finished with four-hour cement floor paints.

Gay Cotton Print Dress Easy to Make and Sure to Please Sprightly Maiden

Pattern No. 1882-B

The time for gay little cotton prints both for older sister and the younger set is at hand, and nothing could be simpler than this darling dress—so easy to make—so comfortable for nimble dears—and so smart to wear.

The French bodice effect and buttoned panel are cunning details which all little maidens love, especially the flared skirt, because it provides ample freedom for playtime. Decorative features are hidden in the contrasting collar trimmed with ruffled edging, and brief puff sleeves. The material may be a printed percale, lawn linen or gingham. If it is made in a plaid or checked gingham,

you can omit the ruffled edging from the collar and make the collar of plain white pique.

Barbara Bell Pattern No. 1882-B is available in sizes 2, 4, 6, 8, and 10. Size 4 requires 1 1/2 yards of 35 inch material plus 1/2 yard for contrast. Send 15 cents for the pattern.

Send your order to The Sewing Circle Pattern Dept., 387 W. Adams St., Chicago, Ill.

JUNGLE HUNTING EASY, BUT ZOO GETS HIM DOWN

Hans Nagel, curator of the Houston (Texas) zoo, says stalking wild animals in jungles is a tame job compared with that of keeping them in captivity.

From 1904 to 1912 Nagel roamed Africa in search of reptiles, beasts and rare fowls for zoos. And in those eight years he met with an accident only once—a lonesome lacerated his leg.

But in wild life in cages—that's a different story, one that has meant hospitals and suffering to Nagel. He bears scars from head to foot. A boa constrictor once almost squeezed his life out. Caesar, the zoo lion, bit him through the shoulder. A stork dived from the top of the bird cage and knocked him unconscious. A kangaroo has kicked him to the ground and bitten his arm. Civet cats, lobo wolves, kinkajous and monkeys have gashed his hands and arms. Bobcats and hyenas have attacked him. Elephants have trod on his feet. "Big Jim," largest of the zoo's alligators, sent Nagel to the hospital for 105 days when he sought to halt its escape.

Stock of Federal Reserve Banks Owned by Members

Stock of the 12 federal reserve banks is owned entirely by the member banks of the system. It is acquired through purchase at the time of joining the system. The federal government has a considerable measure of authority in the regulation and supervision of the system by virtue of the President's power to appoint the board of governors. The board of governors in turn must approve the high officers of the individual federal reserve banks.

Household Questions

For the picnic lunch basket, roll out baking powder biscuit dough about one-quarter-inch thick, cut with biscuit cutter, spread thickly with deviled ham, roll up and bake.

Umbrella plants should be liberally watered during the summer months. When shoots begin to grow out at base of plant, cut off to give plant shape, and water freely.

To make radish roses, trim down to an inch of the stem. Cut off root, then cut down from the tip so that the red part of radish stands out like petals. Put in ice water for an hour or two and petals will curl up.

Powdered borax added to the water when washing fine white flannel, helps to keep them soft.

A teaspoonful of baking powder added to potatoes while they are being mashed, will make them light and fluffy.

If table silver is placed in hot soapsuds immediately after being used, and dried, with a soft, clean cloth, much of the work of polishing will be saved.

Heat a lemon thoroughly before squeezing and you will obtain nearly double the quantity of juice.

Strong soap suds and hot water will remove stains from pewter that has become discolored and dark.

Half a cupful of milk added to most soups just before serving, makes them creamy and delicious.

To prevent lilac suckers growing up around your lilac bush, cut a circular piece of linoleum about two feet wide, cut hole in middle for bush, slit linoleum from edge to center hole and place around bush.

Purchase seldom used spices in small packages, as it is more economical since spices lose some of their flavor when exposed to the air.

Point of Wisdom
The first point of wisdom is to discern that which is false; the second to know that which is true.—Lactantius.

DIZZY DEAN makes a close one!

BOYS! GIRLS! Join Dizzy Dean Winners! Get Valuable Prizes FREE!

Send top from one full-size Grape-Nuts package, with your name and address, to Grape-Nuts, Battle Creek, Mich., for new membership pin and certificate and illustrated catalog of 49 fifty free prizes. You'll like crisp, delicious Grape-Nuts—it has a winning flavor all its own. Economical to serve, too, for two tablespoons, with whole milk or cream and fruit, provide more varied nourishment than many a hearty meal. (Offer expires Dec. 31, 1935. Good only in the U.S.A.)

Form for requesting prizes, including fields for Name, Street, and City.

Keeping Up With Science By Science Service

Married People Are Healthier and Live Longer, Study Shows

Death Rate Is Highest Among Single Persons

NEW YORK.—If you want to live long and be healthy, get married.

Figures showing that the married state, whether blissful or not, is at least a healthy one are reported in the current issue of the Metropolitan Life Insurance company's Statistical Bulletin.

"Marriage, apparently, is conducive to long life and good health," the report states. "At any rate, married men and women live longer than do single persons, and married people register lower death rates from nearly all the important causes of death than do bachelors or spinsters.

Results of Study. "We would expect these findings to emerge from any statistical study of mortality according to conjugal condition, for married persons constitute a selected group. The lame, the halt, and the blind do not marry, as a rule. Nevertheless, the differences between the respective death rates of wedded and single persons are so large that this factor of selection can be only a partial explanation of them.

"It would seem that the relatively mild and regular course of married life is more conducive to health than are the comparatively free and easy ways of the unmarried.

Bachelors' Death Rate. "Among males over fifteen years of age, the standardized death rate for bachelors is 1,218.2 per 100,000 as compared with 855.0 for married men.

"Among females the standardized death rate of spinsters is 1,039.1, as against 856.6 for the married of all ages."

The death rates for influenza, pneumonia, tuberculosis, chronic heart disease, kidney disease, apoplexy, ulcer of the stomach, alcoholism and suicide are appreciably higher among the single than the married, showing that ways of life among the single are not so healthy.

Windshield Filter May Be "Crutch" for Color-Blind Drivers

SEATTLE.—A simple and "infallible" help for the color-blind automobile driver who gets into difficulties because he cannot distinguish between green and red traffic lights is suggested by Thomas Ross of the University of Washington here. In a report to the current issue of Science, Mr. Ross describes a contrivance that can be fitted to the windshield of the color-blind driver's car.

The device consists of small pieces of special glass which can filter out either red or green light. With the red filter placed above the green one, the driver will know that when he sees a light through the top piece of glass he is seeing a red light.

When he sees the light through the bottom piece in this arrangement it is a green light. The device is improved by placing a prism over each filter in such a way that the traffic signal will be visible through both filters at the same time.

Device is Practical. This idea has worked in actual trials, Mr. Ross reports. It could be adapted to persons suffering from other types of color-blindness besides the red-green kind.

A variation of the red and green filters is also suggested. One of the color filters, says Mr. Ross, might be perforated and parts of the other set in it like polka dots.

"Thus, if the red filter were perforated and the openings were filled with the green material, a red traffic light or other red object viewed through the resulting filter would appear bright with dark spots. A green object, on the other hand, would appear dark with bright spots."

Hairpin Goes Traveling; Reaches Woman's Appendix

FLINT, MICH.—A hairpin here has really carved out a career for itself.

It wandered so far that it probably will be mentioned in the pages of a medical journal one of these days. Strange to the doctors is how the hairpin happened to end its travels in a woman's appendix.

"That is an amazing thing," said Dr. J. C. MacGregor, who removed the appendix after it had ruptured. He has never seen a report of such a large object getting into an appendix. It is not unusual to find hair objects of foreign matter in amputated appendices. The woman recovered.

Nordic Type Least Numerous in U. S. Scientist Reveals

Nine Different Kinds of Americans Studied

WHAT is an American? Not a "pure Nordic," typically, said Prof. E. A. Hooton, of Harvard university, answering his own question before the New Haven meeting of the American Association of Physical Anthropologists.

Of three good-sized samples of the American population, taken from diverse social and geographic backgrounds, the pure Nordic type averages out by long odds the least numerous—only 2.25 per cent of the total.

The largest groups, in the nine physical types into which Professor Hooton analyzed the American population, are Nordic mixed with something else—Nordic-Mediterranean and Nordic-Alpine. The first of these two types have long heads and darkish coloration; the second have round heads and medium coloration—never either pure blonds or pure brunettes.

Types Classified. Other physical types added by the Harvard anthropologist to the Nordic-Alpine-Mediterranean racial triad of popular conversation and writing are the Dinaric, a round-headed, medium-colored, narrow-nosed people, mostly Teutonic in modern distribution, and the East Baltic, also round-headed, but blond and wide-nosed. He also recognized as a definite physical racial type the long-headed, red-haired, blue or gray-eyed Kelts.

Professor Hooton took his population samples in three different ways: from a considerable number of prisons, from "ordinary citizen" groups in Boston and Nashville, and from a group of rather highly educated persons who visited the Century of Progress in Chicago.

No Racial Superiority. Especially interesting, in his estimation, is the fact that the racial percentage in each group, whether jail-bird, man-in-the-street or highbrow, was just about the same as the percentage in the whole population. That is, a really scientific analysis cannot discern any such thing as racial criminality or racial superiority.

This does not mean that there is no correlation between racial type and tendencies in activities, whether criminal or lawful. Thus, criminal Kelts tend to sex offenses and to crimes involving violence, while criminal Nordics are "experts" specializing in forgery and fraud, but not going in very much for murder.

Device Measures Amount of Glare Eyes Can Endure

WASHINGTON.—How much glare can a person's eyes stand? This is the question that a device described in a patent granted here to two Chicago inventors intends to answer accurately and quickly. The inventors are W. A. Mendelsohn and C. F. Shepard.

Called a glarometer (glare measurer), the device creates glares of various intensities, and on a scale tells just what intensity of glare blinds a person's eyes. The readings obtained, state the inventors, "furnish a means whereby colored glasses of proper color and tint may be readily prescribed to protect the eyes of the patient from injurious effects from sun or other too strong or glaring light."

How it Works. The glarometer, with its bulb and lens, looks like a lantern for projecting picture slides. In front of the lens slide translucent glass screens of frosted or ground glass. They may be colored or tinted. In the center of each screen is a mark.

By turning a knob the light emanating from the bulb can be made as bright as desired or dimmed. As the knob is turned it moves a pointer across a scale which indirectly indicates the glare of the bulb at any moment.

The person whose eyes are being tested looks at the mark on the screen with one or both eyes. The knob is turned to increase the light until the glare from the bulb is so strong that it temporarily blinds the person and causes him to lose sight of the central mark.

Dog, Research Hero, Honored by Monument

LENINGRAD.—In honor of the dog, so often the hero and invaluable aid of medical research, a bronze monument will be erected on the territory of the All-Union Institute of Experimental Medicine here.

The monument to the Dog, as it is to be called, will be erected at the suggestion of Academician I. Pavlov, whose famous discoveries in physiology were made by means of studies with dogs.

The monument is to be a bronze image of a sitting dog on a pedestal. Bar-reliefs on all four sides of the pedestal will depict separate moments from the life of the dog at Pavlov's laboratory.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

By REV. P. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago, Western Newspaper Union.

Lesson for June 14 JESUS CRUCIFIED

LESSON TEXT—Luke 23:33-44. GOLDEN TEXT—But God commendeth his love toward us, in that, while we were yet sinners, Christ died for us.—Romans 5:8.

PRIMARY TOPIC—When Jesus Died for Us. JUNIOR TOPIC—The Savior—Christ the Lord. INTERMEDIATE AND SENIOR TOPIC—Jesus Died for Me. YOUNG PEOPLE AND ADULT TOPIC—The Meaning of the Cross.

It is highly important that every teacher have the personal experience of Christ's death for himself and then get his pupils to see that Christ's death was instead of their own death. We escape judgment because judgment fell upon Christ. He was made to die sin for us that we might be made the righteousness of God in him (II Cor. 5:21). No one lacking this experience can truly teach this lesson.

I. The Place of Crucifixion (v. 33). They led him away to Calvary, a hill north of Jerusalem resembling a skull, Calvary is the Latin word, and Gethsemane is the Hebrew. This is a most significant name for the place where man's redemption was accomplished. The skull is an apt symbol of man's condition as a result of sin. Life and intelligence are gone, leaving only the dark empty cavern which once contained them.

II. His Companions on the Cross (v. 33). Two malefactors were crucified with him. This is in fulfillment of the Scriptures: "He was numbered with the transgressors" (Isa. 53:12). Personally, he was sinless, but he became sin for us.

III. His Forgiving Love (v. 34). He cried, "Father forgive them." He doubtless had in mind not only the soldiers who acted for the government, but the Jews who in their blindness were ignorant of the enormity of their crime. He was absolutely destitute of hatred, even for his betrayer and murderers.

IV. The Revelation of the World (vv. 34-43). Take a cross section of the world at any time since Christ was crucified, and representatives of the various classes therein were found around Jesus on the cross. The cross is the judgment of this world (John 12:31).

1. The covetous (v. 34). They gambled for his seamless robe where he was dying. This represents those whose primary interest in Christ is a means to get gain. If they had had eyes to see they could have beheld a robe of righteousness being provided in his death.

2. The indifferent (v. 35). "The people stood beholding." They gazed upon him with indifference. The great mass of the world today gazes upon the crucified Christ with stolid indifference.

3. The scoffers (vv. 35-39). a. The rulers reviled him for his claim to be the Savior. They wanted a Savior but not a crucified one. Many today are religious but have only contempt for a salvation which centers in an atonement made by blood. They uttered a great truth when they said: "He saved others." But he could not save himself and others because God's plan was to save others by giving himself.

b. The soldiers reviled him for claiming to be a king. The title "King of the Jews" had been placed over him in irony. But it was pre-eminently true, for by right of the Davidic covenant, he shall one day be King over Israel (II Sam. 7:8-10). Through his death, he came into the place of Lordship over all who acknowledge him.

c. The impatient malefactor (v. 39). This brutal man joined in reviling the Savior, even though he himself was under condemnation.

4. The penitent malefactor (vv. 40-43). The conscious sinner who discerned the heart of the Savior prayed for mercy. The salvation of this penitent man is a remarkable picture of the saving power of Christ. The man confessed his sin as against God and cried to Jesus for salvation. He saw that the dying man was the forgiving God. His salvation was immediate. Christ said: "Today shalt thou be with me in paradise."

V. The Death of Christ (vv. 44-46). So shocking was this crime that nature herself threw around the Son of God a shroud to hide him from the goddess crowd. Darkness was upon the land at noonday. When the price of sin was paid he cried with a loud voice, showing that he still had vitality, that his death was not through exhaustion but by his sovereign will. He died like no other one in all history. He gave up the ghost, that is, dismissed his spirit.

The Soul. I am fully convinced that the soul is indestructible, and that its activity will continue through eternity. It is like the sun, which, to our eyes, seems to set in night; but it has in reality only gone to diffuse its light elsewhere.—Goethe.

Active in Good Works. Beautiful is the activity that works for good; and the stillness that waits for good; blessed the self-sacrifice of the one, and the self-forgetfulness of the other.

Uncommon Sense By JOHN BLAKE

Make up your mind that you will have more or less trouble as you journey through this world. You on Yourself will meet with many disappointments. People whom you trusted may turn out to be "bad actors."

If they are, drop them from your acquaintanceship. But don't under any circumstances begin to believe that you are misused, that there are conspiracies against you, or that you are not getting a "square deal."

Sometimes you won't get a "square deal." That may be no fault of yours. But don't worry about it. Drop the acquaintanceship of people who have proved themselves to be mean and tricky, and choose friends that you can trust.

There are plenty of these. Don't think for a moment that everybody is trying to get the best of you, that your boss is "exploiting" you, or that you haven't any chance to get ahead.

Your chances of getting ahead will be just about what you deserve. Today you, like everybody else, have plenty of opportunity to educate yourself.

But to do that it will be necessary to work, and to work hard. You will find people who will seek to crowd you out and get ahead of you.

You will come into contact with unscrupulous "office politicians." But that kind of people always work themselves out of jobs before long, for they are so busy with their little venomous plans that they will have no time to win any sort of success.

Don't work on the principle that this is an ideal world, and that everybody gets an even break. It is not that kind of a world. But its sourliness and selfishness are overrated.

Work out your own plans, and stick to them. Pay no more attention to a rascally office mate who is trying to "tunnel" you out of a job than you would to a tree root that tripped you up

Foreign Words and Phrases

Ad valorem. (L.) According to the value, as certain customs duties. Ab origine. (L.) From the origin. Bon gre, mal gre. (F.) With good grace or with ill grace; willy-nilly. Ars longa, vita brevis. (L.) Art is long, life is short.

C'est une autre chose. (F.) That is a different affair. Del gratia. (L.) By the grace of God. En passant. (F.) In passing; by the way.

Suaviter in modo, fortiter in re. (L.) Gently in the manner, firmly in the act. Fete champetre. (F.) An open-air or rural festival.

In flagrante delicto. (L.) In the very act of committing the crime. Profanum vulgus. (L.) The profane herd. Exeunt omnes. (L.) All go out.

Siamese Fish Able to Walk, U. S. Scientist Confirms

Most people still refuse to believe that fish in Siam can travel over dry land, though for years scientists have been discussing these freaks of nature. Recently, Dr. H. M. Smith, former assistant commissioner of the United States fisheries, confirmed their observations by his own.

Once, while in Siam, he watched an anabas "walk" over dry land. The fish covered 300 feet in 30 minutes. On other occasions, usually at night, he saw these fish climb steep banks of canals and make their way overland to nearby ponds. They possess an organ above their gills which enables them to breathe air.

High-Lights of Sen. Steiwar's Key Note Speech

The keynote speech of Sen. Steiwar of Oregon made and broadcasted from Cleveland Tuesday night was one of the most able efforts made in recent years. It was a masterpiece, framed in unmistakable language and which could be understood by all who heard him.

We are giving a few of the many hi-lights of the Senator's speech, uttered without fear or favor—

"The nation knows by this time that the administration is equipped with a monstrous, reckless propaganda machine operating with the taxpayers' money to advance its own ends."

"There are no party lines when human liberty is at stake. In this crisis, the issues are always above all party differences."

"When this Convention shall have finished its labors, we shall offer this country a candidate with a sense of duty, and a platform that binds his conscience to guarantee to America that the nation shall not be again deceived by political adventurers who have perverted the most sacred fundamentals of our government."

"Noah, in anticipation of the flood, had installed an irrigation system instead of building the Ark, his mistake would have been no worse than have been the New Deal economic blunders."

"We shall not falter, but in new found strength will hold high, in the full splendor of a bright dawn, the banner of a nation's liberties."

"The Republican party will not turn its back on those in distress, but it will make sure that public funds voted to feed hungry mouths will be used for that purpose and will not be employed for the enrichment of political straphangers."

NO MATTER how you classify your expenditures for car up-keep — it's your total expenditure that counts. How much "dollar mileage" is your car giving you?

Dollars do go farther in the Ford V-8. Modern improved carburetion gives you unusual gasoline mileage with brilliant V-8 performance. Most owners of today's Ford change oil only every 2000 miles and add none between changes.

And after the first few thousand miles you begin to understand what Ford V-8 "dollar mileage" really means.

It gives you more miles per dollar because it gives you all-round economy — low first cost, low up-keep cost, low depreciation and long life — as well as low gasoline and oil consumption. All these are big items if you aim to buy the most economical car.

CAUGHT IN THE WILD

By ROBERT AMES BENNET

WNU Service

Copyright by Robert Ames Bennett

CHAPTER IX—Continued

He made the plane in short order and got the dead policeman to the cabin by way of the wing. Leaping off, he rushed back at top speed to meet Lilith. He had to go all the way to where he had left her.

She had along the showboots on her back, floundered through the first drift, and collapsed. When he came up, she was rubbing snow on her bared ankle. She looked up at him, white-faced with pain and despair.

"I tried, Alan. I can't even walk," she said. "Go back. It's all my fault. Hurry and save yourself. Maybe I can—delay him."

For reply, Garth swung her up across his shoulders and headed again for the plane. There still might be time. He put all his strength into another burst of speed.

He laid his belt-ax on a hind-quarter of caribou, and scolded at her in the growing light of the wick.

"Chop off a slank or two. We'll need bone spits," he said. "But first warm some of the other skins and wrap them around you. Also put more fat in the lamp. It'll be gone two or three hours."

Over near the far end of the glacier front, he found a drift with a few-inch crust packed by the drive of the wind during the previous snowstorm. He went at it like an Eskimo, slanking out big domino-shaped blocks with his knife.

After he had gathered a high pile of the blocks on a fairly level spot just beyond the drift, he started to cut others and lay them edgewise in a circular wall around the pile. Two feet up he began to lean the blocks inward. By the end of three hours, he stood in the blackness of a snow beehive.

For the First Time Since Leaving the Plane, He Speaks to Lilith.

half a foot higher than his head and over seven feet across at the floor level.

Low down in the wall he cut a hole. There was little more than space enough between the igloo and the glacier front for him to crawl out. He circled around the snow dome and the big drift, through the thick swirl of snow, and recrossed the stream.

In the cave he found Lilith fur-buddled and hovering over the lamp, as she broiled thawed caribou steaks on a shank-bone spit. He picked the girl up in her skin wrappings, and carried her out and around to the igloo. A second trip fetched the rest of the skins, the lamp, and enough meat for a starter.

While she went on with her cooking, over the re-lighted lamp, he cut more blocks and built a low entrance tunnel from the door to part way around the curve of the igloo wall. When he backed in, he blocked the mouth of the tunnel with a snow slab.

The inside of the igloo was already so warm from the lamp heat that the inside of the dome roof was beginning to soften. But Garth knew there was no slightest danger of it falling in. As fast as the snow melted, the moisture was sucked outward. It was the cold of the outside air and frost hard.

In a little while the igloo would be a dome of solid ice strong enough to hold the weight of a bear. The interior was both warmer and drier than any tent, or any hut of wood or stone. The caribou skins made even the snow floor comfortable.

The girl had a stack of caribou steaks broiled for him. He sat down, without a word, and began to eat. In the midst of the meal the smoke and heat became so stifling that he had to cut a two-inch ventilation hole in the roof.

All the time he gave no sign that he perceived the look of misery in Lilith's eyes. But when he had eaten his fill, he spoke a sudden order: "Bare your foot."

She obeyed, tensely silent. He looked close at the swollen ankle in the lamp-light and felt it with his finger tips. Okay as was his touch, Lilith gasped with pain. But he smiled his relief.

"No broken bone or dislocation; only a sprain. You'll soon be all right. Start packing it with softened snow. Keep it as cold as you can without freezing."

At that, all her pent-up emotion burst out: "Oh, how you must despise me! Get you into this frightful desert—then get lame! A helpless, useless drag on you! That beastly coward—he'll hunt you out . . . murder you like the poor policeman. And all my fault!"

Garth shook his head. "You talk too much of the credit, Miss Rasmill. So far as regards Constable Dillon, the result would have been the same if you had stayed at Fort Simpson."

"What—what you can't get away!"

Garth's smile hardened. "Neither can they. Now tend to your ankle. I'm going for meat."

He dropped and scurried out into the

storm. When at last he came back in, he had brought nearly half of the caribou meat from the ice cave and stacked it around the igloo. He had also set up blocks of snow-crust to shape a drift of new snow in a certain way.

He unrolled the thawed wolverine pelt and showed a big bank of catgut. With his knife he started to shape caribou skins for parkas and trousers. Lilith's eyes brightened. She softened a length of catgut in the melted lamp-fat, and asked for a needle.

All the remainder of that day of death and storm, both of them piled awl and buckskin needle and catgut thread. Neither was an Eskimo seamstress. But their stitches, though coarse, were strong. By nightfall they finished the first caribou-skin suit—wauling sock-leggings, and parka with hood-front fringed with wolverine fur.

After another meal of broiled meat, Garth went out and climbed the lateral moraine to gather a quantity of caribou moss from between the snow-drifts on the wind-swept tundra.

When he returned, Lilith lay asleep on one of the wauling skins. She had sunk down, completely tired out. Garth covered her over, blocked the roof hole with a chunk of soft snow, and spread his own skin mat on the other side of the lamp from the girl. He lay down on it and snuffed out the light.

CHAPTER X

The Bedeviling.

Lilith opened her eyes as Garth finished his hasty meal of lamp-seared meat and fat. He explained about the plane. Her hands clutched together till they whitened.

"You—you'll be careful?"

"Never fear. I'll come back to look out for you. The storm has blown out. Clear sky, and about 10 below zero. Keep treating your ankle, and work on your suit."

"But—how long?"

He handed her the knife, but took the belt-ax. "If I'm not back soon, it will not be till late afternoon or after dark. They may turn out early, like myself, to have a look at their plane. In that case, I'll have to hide-out all day."

"You'll freeze!"

"That won't smile from him. This is an Eskimo rig. I've sat in one for hours beside a seal hole, at 40 below zero. Finish your own suit, and crawl out to enjoy the frost. Only, be careful of that ankle. When outside, keep close to the igloo, and duck inside if you see anyone else than myself."

She flung out her hands. "Oh, if only I could go along to help! I'm so afraid he'll find you. All those guns—he and his men—you, empty-handed!"

Garth met the almost frantic outburst with a look of cool irony. "Do you take me for a cheechako? Mark this—that scoundrel Huxby is the man who's in danger."

With the assurance, Garth crept out through the tunnel, shoving his snowshoes ahead of him. Snow had continued to fall after the wind had died down. That meant easy tracking. In the dim starlight, he had to guess at the covering of his trail to the stream channel.

During the night, the last dwindling snow had choked the channel with anchor ice, had flooded over the snow, and frozen solid. Garth took off his snowshoes and crept across the glare ice without leaving any marks.

On the other bank, he plowed a heavy trail up into the ice tunnel, and brought from the storage cave one of the remaining legs of caribou. He left the meat atop the moraine, and started down the tundra as fast as he could travel by starlight.

Dawn was grayling over the east mountain-wall of the valley when he neared the lake. He crossed over the frozen ford and went to peer at the three-seater plane in the growing twilight. It stood much higher than he had last left.

A close view showed that the engineer and his men had managed to raise the craft above water by cribbing logs under the shattered pontoons. The top logs of the crib brought the bottom of the floats level with the thickening skin ice. Long poles had been set to brace the wings against the wind gusts.

Garth swung aboard. As he expected, all the food had been taken away. So also had been the breaker points from the magnet. Huxby no doubt had figured that the canoe bulldozer might repair the floats with rawhides, and run away with the three-seater. To balk the engineer, in turn, Garth helped himself to the breaker cam.

He jumped back on the bank, and dashed eastward along the shore in the dim grayness. At first, thickets of alders and willows cut off all view of the lake. He did not trouble to seek an opening until he had covered a half mile. There he came to a remembered stretch of parry open bank.

Though the gray dawn had grown a little less faint, he peered for several moments without sighting the cabin plane. It seemed as if its presence must have been saved through by the

sharp-edged sheet of ice, so that the aircraft had foundered in deep water. But then he made out vaguely a white shape against the white of the snow-covered ice. A short dash brought him close to the grounded plane. It lay in shallow water, surrounded by freezing slush. The blizzard had hit the lake hard enough to break up the sheet ice and crack it into pieces too small to grind through the sides of the pontoons.

The plane had been driven across into the corner of the lake, along with the sludge. The shoreward-swing tail was only a biscuit toss out from the solid bank. Garth hastened to fetch small trunks and pieces of rotted logs from the down timber under the nearest trees. By tossing out chunks of log on the snow-covered sludge and bog, he was able to make a slender footbridge with pairs of trunks.

The last extension propped touch and go. Cross pieces and springers drove down under his weight into the sludge-filled water and the mud beneath. But he had made a dash of it. His hands clutched hold of the rudder before he could sink.

He climbed upon the tail, ran forward to the cabin, and swung inboard. The frozen body of Constable Dillon lay on the floor where he had placed it. He buckled the cartridge belt with its holster-pistol about his own waist, took the keys and handcuffs from Dillon's pocket, and climbed out to scramble forward into the cockpit.

The side of the cockpit had been pierced by several bullets. But when Huxby fired at the drifting plane, in his attempt to kill the pilot, he had aimed with great care to avoid damage to the instruments and controls and the motor.

After removing the breaker points from the magnet, Garth ran back to the tail of the plane. Here came the greatest of his risks. The bridge poles had risen to the surface again, but the outermost cross logs remained embedded in the mud under the water.

He let himself douse sideways. As his moccasins touched the slender trunks, he let go of the rudder and leaped. Though the ends of the poles shot downwards, his swift dash carried him up their sharp slant to the next pair of trunks.

The rest of the improvised bridge was fairly firm. A single misstep wherever along it would have landed him in deep bog; but he had done far too much canyoning and rough-ground running to lack balance or sure-footedness.

Kate back on solid ground, he at once stepped into his snowshoes and headed straight away from the shore into a dense growth of spruce. There he climbed to the right towards the glacier gulch, keeping well back from the lake.

(TO BE CONTINUED)

"Mountain of Hellfire"

Emits Anomalous Gases

Over a great area on the frontier between Baluchistan and Persia everything is dead. Not a bird, beast, or reptile, not even an insect, survives. They have been gassed by the "Mountain of Hellfire"—as the Persians call the volcano of Koh-i-Zafatan. The crater pours out dense clouds of anomalous gas which destroy every living thing and even burn up all plant life, says T. H. Morgan.

This is the only mountain which produces this particular gas, but not the only one which erodes poison gas. In 1912 the volcano of Katmai in Alaska exploded, producing the biggest crater in the world, which is now known as the Valley of Ten Thousand Smokes. Here sulphurous gas streams out from rifts, and it is death to approach one of these deadly vents.

The Sakura Shima volcano in Japan blew up in 1914 and overwhelmed the city of Kagoshima. The loss of life was over 70,000, and a great number of these people were suffocated by pestilence gases which rushed up from earthquake fissures a long way from the mountain itself.

Before the great Chilean earthquake of 1857 poison gas rose in the floor of the Bay of Payta and killed enormous quantities of fish and crabs. They floated on the surface and were washed up on the beach, forming a wall-like line three to four feet high and twelve miles long.

The most ghastly disaster of recent times was the destruction of the beautiful city of St. Pierre by a cloud of gas and dust hurled out by Mount Pelee. Within a matter of moments 40,000 people were blotted out.

Deckside Slangage

"Luters," "scutes," and "toskers" are among the quaint nicknames given to the workers in London's dockland. A "luter" is a man who clears mud from the beds of barges, a "scutter" is one who scrapes away the rust from the insides of ships' boilers, and a "tosker" is a waterman who searches for stray bits of floating timber or dredges for a wet haul of coal. A coal boat that ducks her funnel when she passes beneath the bridges is known as a "fat-truss," a vessel belonging to the West-India Navigation Company is called a "Navy," and the river police are humorously dubbed "Lord Treacher's Navy."—The Times Magazine.

Washington Digest

National Topics Interpreted By WILLIAM BRUCKART

Washington.—A great many persons were mystified a few weeks ago by the treasury announcement that it had entered into an agreement to buy Chinese silver. On the surface, it appeared to be an action by the American government that was wholly a part of its domestic silver policy—a policy that thus far has resulted in no economic benefits at all but has cost American taxpayers rather dearly. Beneath the surface, however, the Chinese silver purchase agreement is one of the most significant moves yet to be made in our foreign policies. I believe it has potential consequences as great or greater than any foreign relations pronouncement to come from the Washington government since World War controversies were liquidated.

To understand the importance of the silver purchase agreement with China, one must examine international relationships over a wide scope. They involve, first and most important of all, the steady inroad made by the Japanese into the Chinese political and economic structure. They embrace, as well, relations of Soviet Russia with China and Japan, and the whole Far Eastern situation for that matter, and the continued efforts of the British to obtain for their nationals additional or restored spheres of influence in China.

Lastly, these international relationships involve, indeed, directly affect the open door policy respecting Chinese trade. The United States has consistently maintained that China must be open to world trade and in this attitude our nation has had support of the British and some other white nations. On the other hand, the Japanese, while adhering to the open door policy on the surface, have consistently attempted to undermine it directly or by use of the military.

Before the World War it used to be said in China that the international competition there took the form of diplomacy operated through banks and railways. Now, we see the additions of currencies and tariffs to the methods used by the diplomats. The United States is using the currency method—a method attempted by the British without success two years ago—and through this influence, this nation is seeking to expand its trade with China.

The Japanese are employing the tariffs to protect their own interests in China and to keep the British and the Americans on the outside.

So, for the first time since 1906, the battle among the nations for the rich lure of China trade is on an economic basis of competition and, it must be said, Japan is in the lead. The Japanese are ahead in this economic warfare chiefly because of their proximity to the territory which is so rich in potential trade.

A year or more ago, the British sent Sir Frederick Leith-Ross of the British treasury to Shanghai to aid the Chinese ministry of finance in the establishment of a currency system. It was not announced, of course, but the real purpose of Sir Frederick's visit was to stabilize Chinese money and link it to the British pound sterling. Diplomats watched the maneuver with great interest because it was expected that Japan's control in the North China provinces would be loosened through British currency influence. But it failed to work that way. The North China provinces simply were separated further from China proper and the Japanese tightened their grip.

Now, the Americans have tried something of the same scheme. They worked it out on the basis of silver purchase from China but they prescribed that as the American treasury buys Chinese silver, the dollars paid therefor will be deposited in a branch of the Bank of China which will be established in New York. It will result in easy transfers of money where American exporters ship to China.

No one can tell what the consequences will be. In the first instance, Japan can be expected to exert every power her nationals have to thwart the effect of the program. In the next instance, the British are not going to be enthusiastic about the arrangements because the competition between British and American traders has been increasingly sharper since the World War.

There is still the further circumstance of Japan's smuggling into China. Having had control of the Chinese tariff, the wily Japanese proceeded to enforce tariff duties rigidly against anyone except themselves. Stories coming out of North China through diplomatic channels as well as from commercial interests fall of vast smuggling operations by the Japanese. In other words, the Japanese have proceeded to pad across of landing places on Chinese soil where they neglected to place customs houses. The net result is, of course, that the Chinese are being supplied with Japanese goods without the payment of a tariff whereas all other imports from foreign shores must carry the tariff load.

It seems, then, that while we cannot

know at this time whether the Japanese will attempt further military movements in North China, it certainly can be said unequivocally that the open door for China foreign trade is at stake in this conflict. Most authorities on foreign affairs with whom I have talked tell me that there is little hope to prevent Japanese political supremacy in China. They cannot move northward because in that direction they butt their heads against the Soviet Russian frontier. The Soviet is armed to the teeth on the border of Manchukuo, but to the south and in the area known as North China, no present method appears for curtailing Japanese power.

Thus, history appears to be repeating itself. The battle for concession that took place in 1906 seems about to be revived and undoubtedly the climax to this conflict has been hastened by the American agreement to acquire Chinese silver.

Few authorities are willing to venture a prediction as to where this new policy, promulgated by President Roosevelt, will lead us. Some insist that it is in accordance with the attitude the United States has held for nearly forty years insofar as Chinese relations are concerned. Others claim that since Japan has grown to such importance as a world power, the silver agreement may eventually lead us further into the Far Eastern controversy, so far, indeed, that the questions later to arise may involve national honor—and national honor oftentimes is a prelude to war.

While we are looking over Japanese activities in the Far East, we ought not to forget that

Japs Invade Philippines

only a year ago, our congress, under a political lash and the pressure of selfish interests, voted the Philippine Islands are still under our protection and will be so for several years, but it is most interesting to know that already the Japanese have set about the colonization of portions of the Philippine Islands.

Through the last 20 years, American officials stationed in Manila have kept a watchful eye open to detect any signs of Japanese encroachments. It was not military movements by the Japanese that were feared. It was their well-known capacity for creeping under the edge of the tent and suddenly developing into an economic power.

Official reports now are reaching Washington which indicate amazingly rapid encroachment by the Japanese upon affairs of the islands. One official document shows that Japanese colonists have virtually swallowed up one large Philippine valley. By devious ways, legal and illegal, Japanese farmers have filtered through and have obtained all of the land that is tillable in the Dava valley.

Philippine laws, sponsored by Americans before independence was voted, have been designed to check Japanese colonization and the battle against this has gone on unrelentingly since the days of the World War when the Tokyo government first exhibited definite ability to expand its spheres of influence through colonization methods. It should be said, however, that the American officials have been somewhat lax in enforcement of the anti-Japanese laws and the result has been that small colonies of Japanese were planted in various parts of the islands.

Now, it is shown that these colonies have developed into great numerical and economic strength. They seem to have unlimited credit from somewhere for their operations and in the Dava valley, for example, they actually control the price of hemp which is the main agricultural product of that section.

The Japanese are operating in another fashion in the Philippines. It is a well established fact that when legislation is being considered by the Philippine legislative body, it is confronted with a powerful lobby if it is inimical to Japanese interests. Existence of this lobby is known and recognized and many of the Japanese representatives are fearful of consequences to their political careers if they go contrary to the lobby's position.

Such penetration as this into the Philippine economic structure may not be as serious from a world standpoint as the Japanese penetration of North China. Yet, it seems to me that the American government cannot ignore the activity. It may be that Japan has no thought of eventual military and political supremacy over the Philippines but the surface indications at this time are those that have always preceded political and military subjugation of territories and possessions.

It will be recalled, as well, that just such a condition or circumstance as we now see was among the fears expressed by those representatives and senators in our congress who opposed Philippine independence. The opponents of the independence bill in congress dared not openly assert that Japan would be a menace to the island independence. To have done so would have meant international complications.

Flag Race Future Shows Few Shifts in Second Guesses

SECOND guessing the season. DETROIT—The Tigers have been socked hard by injuries. They have lost at least four games which probably could have been won with Hank Greenberg in the lineup.

CHICAGO—Opponents do not esteem the Cubs as highly now as before the start of the season. Although they admit the Philly deal improved the National League titleholders, they whisper that the arms of Lou Warneke and Curt Davis have not been improved by age.

YANKEES—One of the most interesting teams of the year. In rival dugouts players say this is the club the "Tigers must beat." Also that Joe DiMaggio is by far the best rookie of the year.

BOSTON—Maybe Grove and Ferrell can carry the Red Sox pitching burden all the way to the wire. American league athletes do not think so, and neither do they believe that the club has enough consistent power to make up for occasional slippy defensive days.

GIANTS—Another team which might do well to prepare for dire visitations from fate. Players believe that Terry is overworking his pitchers and that only a new starting hurler or a top-notch relief man will save him in August.

ST. LOUIS—The probable National League winners even though they could use another pitcher and better reserves. The American League entry is by no means as bad as the standings indicate. Hornsby believes that one good pitcher might even now lift the Browns to fifth place.

Dodgers Are Hard Luck Club of Major Leagues

DODGERS—Definitely lacking in punching power but still the hardest luck club in the majors. With an average amount of breaks might at least be even with the .500 mark instead of far below it. Since the breaks even up fairly well throughout the course of a season, the fans are advised to stick with Casey Stengel a while longer. He has more than enough pitching talent and should be able to make at least one decent deal before June 15.

PITTSBURGH—Needed-pitchers before Waite Hoyt went to the hospital and now needs them worse than ever. The Pirates have power and a more aggressive spirit than usual.

CLEVELAND—The Indians seem to have too much moxie for their own good. Because of their careless use of words and spikes, rivals always are aiming at them. Home folks also have weakened on them; but the team continues to haunt the dreams of Joe McCarthy and M. Cochrane.

WASHINGTON—Well managed by Bucky Harris and always dangerous. One pitcher might put them in the first division but there is little chance of getting him.

CINCINNATI—Young and ambitious and may eventually stick in fifth place. In spite of their showing so far few players take the Reds seriously, though.

PHILADELPHIA—The Phillies did well by themselves in the Cubs deal. Although somewhat damaged, Klein possibly is as good an outfielder as Ethan Allen. Kowalik can take his starting turn as well as Davis and may become a valuable sales item within a season or two. Besides—but why speak of gold? Or, indeed, why mention that other baseball auction house which probably still is doing business in the Quaker City for all anybody knows?

NOT IN THE BOX SCORE:

Alex Kampouris is best by the same trouble that afflicts Frenchy Bordagaray. The Red's second baseman is a good little ballplayer but he doesn't remember well and runs against order on the bases. Charley Green is so skilled at catching signs that most of the rival managers have taken to hiding in dark corners of their dugouts while wiggling orders to their athletes. Steve Owen of the pro football Giants keeps busy working far his best, Rookie Tim Mara, at local tracks during the off season.

LINES from an overcrowded notebook. (Which merely is another way of saying that the Not in the Box Score Dept. is working overtime this week.)

Gents who should know say that the U. S. will be knocked off in the Olympics this year. Not enough money to pay for those who do want to go. Joe Medwick uses the largest glove of any major league outfielder. It's almost a mate for the first baseman's mitt Hank Greenberg had to discard. After losing \$1,600 betting on Jimmy McLarnin, Jimmy Kelly spent two more C's on a dinner celebrating Tony Canzoneri's victory. Three of Princeton's best backs may be ineligible for football next fall. Study trouble.

Some of the nation's leading amateur tennis players are reported to have been "sold at a slave market" during the Houston (Texas) invitation event this spring. The story is that they were put on the block and auctioned off to spectators in a gambling pool. The late Laverne Fator was the best judge of pace among modern riders. He is ranked with Tod Sloan and Isaac Murphy among the all-time great jockeys in the art of rating a horse along. Gene Moore of the Bees is a guess blither. He stands up there and takes the same cut no matter what is thrown. That means smart pitchers soon will fill his life with sorrow. Keep an eye on Peter (no kin) Bradley, the Princeton soph half-miler. There's more than a chance that he'll become another Bill Bonthron.

Stribling Was Toughest Foe for Max Schmeling

Max Schmeling says that Young Stribling gave him his toughest fight. Which means that he has something to look forward to on June 18.

Arnie Latham, who won fame as a St. Louis Browns third baseman and as a Giant coach under McGraw, played his first game of ball at his home in Lynn, Mass. It was a game of bean bag with the daughter of Lydia Pinkham.

Fred De Groof, who still rates as one of the best after 25 years of soccer refereeing, was a Belgium schoolboy international.

The best infield (playing field) in the majors is in Cleveland, ballplayers say. They rate the improved Cincinnati park as the best in the National League. Although he is president of one of the country's largest construction companies, Johnny Hillar still finds time to be first V. P. of the Metropolitan Soccer League and to render valuable assistance to the Welfare Island loop. His friends say that Johnny Gorman, Princeton football coach, turned down a \$12,000-a-year offer to be head gridiron man at North Carolina. Other Tigers gossip that Bill Lynch, 200-pound sophomore fullback, is a clinch to be a star at Nassau next fall.

In spite of Irish opinion to the contrary, Mickey Cochrane is Scotch. Eddie Mayo, newest of the Giants, bought \$5 worth of ice cream sodas with the first money he ever received for playing baseball. The looks speaks louder than words department may be interested in knowing that Umpire Bill Stewart declares that Bill Terry never has hurled a curse word at him since he has been calling them in the National League. Joanna Vischer, daughter of the polo magazine editor, was a winner at the Cedarhurst Hunt meet the other day, betting only on horses that caught her five-year-old eye in the paddock.

Dizz Smiles at Davis but Has Other Catcher

Dizzy Dean may smile at Virgil Davis but Brusie Ogradowski still catches him. Mrs. Fred Frankhouse wears "lucky" dresses to ball games but the luck doesn't always hold out—the Dodgers being what they are. Unless Pirate Pitcher Swift gets into the habit of throwing over to first base occasionally runners will steal him right out of the majors. According to Morty Mahoney, the parliament expert, 25 per cent of the horse-players in Florida each winter come from New England. The one point on which Barney Ross and those Australian promoters have not agreed is the referee. If George Blake is picked, Ross will meet Jack Carroll.

Young Al Vanderbilt, who started out in the turf business by betting ten coconuts at a time on his Sagamore farms gas goes, now shows in C notes. Coley Madden, who is back in the Belmont clubhouse after a four-year absence, is noted as one of the best figures of percentages among the horse-players and jayers. He learned his mathematics at Harvard. Manuel Rodriguez, famous inside right in the days when the Gibraltar A. C. was knocking off all comers, now is secretary of the Brooklyn (soccer) Hispanos. In those far-off days when Dan Brothurs was the Babe Ruth of baseball they used to put up small flags to mark the spot where each home run left the park.

Jack Oslow, Bees' coach, says that Berres and Lopez are the best catchers in the National League. Promoter Mike Jacobs proved that there is no getting when he visited Schmeling's fight camp the other day. A minimum investment enabled him to hit all the slot-machines for all they had.

HOW ARE YOU TODAY

DR. JAMES W. BARTON Talks About

Reassuring Heart Sufferers

THERE was one lesson learned during the war that has been of help to patients, their families, and to all physicians. That lesson is that because a heart has a leaking valve, is perhaps a little rapid or even irregular, there is no reason why the individual should not go about his work or life in the usual way and live as long as those whose hearts show none of these symptoms.

Men with hearts of these various types get along just as well as those whose hearts showed none of these conditions.

Sir Maurice Cassidy, in the British Medical Journal, in speaking of those who worry about their heart, sums up the treatment in the single word "reassurance." Formerly if a patient had a murmur, a little irregularity or the heart was beating rapidly the physician would mention the fact to him with the words, "Don't overdo yourself" or "You'll have to be a little careful." Now the average individual does not worry much about

Dr. Barton

his liver, kidneys or stomach but one word about the heart and he becomes greatly alarmed.

Doctor Cassidy says that there is no use telling the patient that the heart is a little shaky or that there is a slight murmur of no great importance, for to the average patient anything amiss with the heart brings to his mind the most serious possibilities.

Tell Patient Condition

He must tell the patient that he has or he has not a serious heart condition. If it is not serious he should be told so in order that he can go about his work or play with a free mind.

And even when there is actual heart disease but the patient is able to carry on with the ordinary routine of his life without much breathlessness, if he sleeps well, and if there is no evidence of heart failure—swelling of the feet—he can be assured that his heart disease is not a serious malady and that he should live a goodly number of years with it.

And even when the heart condition is serious, if the patient is willing to "live within the limits of his strength" he may live many years. The whole thought is to take away from the patient any worry or unsettlement of mind, so that he knows exactly where he stands.

Epilepsy Often Misnamed

"The word epilepsy has been carrying a message of desolation and despair into the ears and minds of countless numbers of patients over many centuries. The average individual believes that epilepsy is an incurable disease, that there will be an ever increasing number of attacks, each one more dreadful and devastating than the previous one, that it cannot be controlled by medicine or treatment, condemning the sufferer to mental decay (insanity), and sure to descend upon the individual at the wrong time—in the street car, office, shop, theater, movie, or in any sort of social gathering."

I am quoting Dr. Henry Alsop Riley of the Neurological Institute in an address before the Medical Social Service section of the Welfare Council of New York City.

Doctor Riley stated that the word epilepsy should not be used because the patient with ordinary "convulsive" attacks or symptoms immediately felt that he had the severest type of epilepsy and became paralyzed in will, ambition and work with deplorable results to himself, his family, and his future, often withdrawing himself completely from all artistic, cultural and social life.

Merely "Convulsive" State Also the idea that patients suffering with so-called epilepsy will have children who will suffer with these attacks is not true, unless it is well established in the family, or in the families of both parents.

Doctor Riley would call the majority of cases now called epilepsy simply "convulsive" states.

These convulsive states can be controlled by diet and medicine and the individual can go about his usual work, mental or physical, and engage in all the various pursuits of life without fear, if the simplest suggestions now known everywhere throughout the world are followed.

These suggestions are:

- 1. Cut down on all liquids—tea, coffee, water, soft and hard drinks.
2. Cut down on all starch foods—bread, potatoes, sugar, pastry.
3. Increase the fat foods—butter, cream, fat meat, egg yolks.
4. Take the dose of phenobarbital daily as prescribed by your physician.
Statistics show that individuals suffering with this convulsive state, epilepsy so-called, are as bright mentally as non-sufferers. The only danger mentally that might occur would be due to the fact that they worry about the condition and withdraw themselves. Such action tends to make the individual introspective, may cause a serious lack of self-confidence and make the individual unwilling to assume responsibility.

An Exclusive Crocheted Frock in Simple All-Over Pattern for the Winsome Tot

Even the butterfly's enamoured of his little charmer's newly crocheted frock—a style that's winsome and dainty for tots of four to eight. So easy to crochet, too, in a simple all-over pattern, topped by yoke-of-plain mesh which serves as sleeves and collar. Use white or colored string. In pattern 5633 you will find directions for making the dress shown in sizes 4, 6 and 8; illustrations of it and of all stitches used; material requirements.

Send 15 cents in coins or stamps

(coins preferred) to The Sewing Circle, Household Arts Dept., 250 W. Fourteenth St., New York, N. Y. Write plainly pattern number, your name and address.

Sympathy and Intimacy

We refuse sympathy and intimacy with people, as if we waited for some better sympathy and intimacy to come. But whence and where? Tomorrow will be like today. Life wastes itself whilst we are preparing to live.—Emerson.

DOG'S "BLACK LEAF 40" Keeps Dogs Away from Evergreens, Shrubs, etc. Get from your dealer.

Miserable with backache? WHEN kidneys function badly and you suffer a nagging backache, with dizziness, burning, scanty or too frequent urination and getting up at night when you feel tired, nervous, all upset... use Doan's Pills. Doan's are especially for poorly working kidneys. Millions of boxes are used every year. They are recommended the country over. Ask your neighbor.

KILLS ANTS

Spinkle Peterman's Ant Food along window sills, doors, any place where ants travel and Peterman's kills them—red ants, black ants, others. Quick. Safe. Guaranteed effective 24 hours a day. Get Peterman's Ant Food now. 25c, 35c and 60c at your druggist's.

No Need to Suffer "Morning Sickness"

"Morning sickness" is caused by an acid condition. To avoid it, acid must be offset by alkalis—such as magnesia.

Why Physicians Recommend Milnesia Wafers

These mint-flavored, candy-like wafers are pure milk of magnesia in solid form—the most pleasant way to take it. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia. Chewed thoroughly, then swallowed, they correct acidity in the mouth and throughout the digestive system and insure quick, complete elimination of the waste matters that cause gas, headaches, bloated feelings and a dozen other discomforts.

Milnesia Wafers come in bottles of 20 and 48, at 35c and 60c respectively, and in convenient tins for your handbag containing 12 at 20c. Each wafer is approximately one adult dose of milk of magnesia. All good drug stores sell and recommend them. Start using these delicious, effective anti-acid, gently laxative wafers today. Professional samples sent free to registered physicians or dentists if request is made on professional letterhead. Select Freshets, Inc., 4402 23rd St., Long Island City, N. Y.

Stop PAINFUL PINCHING Apply New De Luxe Dr. Scholl's Zino-pads on any sensitive spots caused by shoe pressure or friction and you'll have instant relief. They stop pain of corns, calluses and bunions; prevent sore toes, blisters; ease tight shoes. Fresh color, waterproof; don't come off in the bath; economical. Sold everywhere.

BUY ON PROOF OF PERFORMANCE for their Safety THE New Firestone HIGH SPEED TIRE for 1936 AVOID accidents — take no chances — buy your tires on Proof of Performance. Make sure that you and your family will be safe! Skidding, blowouts and punctures caused more than 37,000 accidents last year. Many of these accidents could have been avoided with safe tires. The new Firestone High Speed Tire for 1936 is the safest driving equipment you can buy. Here is your proof: PROOF OF GREATEST NON-SKID SAFETY A leading university made 2,350 tire tests and found that the new scientifically designed Firestone High Speed tread stops a car up to 25% quicker than other tires. PROOF OF GREATEST BLOWOUT PROTECTION Every year, since Firestone developed the Gun-Dipped Balloon tire, Firestone Tires have been on the winning cars in the gruelling blowout test of the Indianapolis 500-Mile Race. PROOF OF GREATEST ECONOMY The new Firestone High Speed Tire for 1936 gives up to 50% longer non-skid mileage. This is proved by the fact that the world's largest transportation companies, such as Greyhound, to whom safety and tire economy means business efficiency, use Firestone Tires. This is further proof that they are the safest tires ever built. Why risk an accident when it costs so little to protect lives worth so much? Equip your car with new Firestone High Speed Tires — Now

Josephine Torres

Josephine Torres, daughter of Mr. and Mrs. James Torres of Capitan, aged 19 years, died in Homan's Sanatorium in El Paso, May 29. The body was brought to Capitan and was buried Sunday at 3 p. m. Rev. R. C. Lewis, pastor of the Church of the Nazarene officiated at the funeral. Miss Torres had been ill for about ten months and had been under physicians' care in El Paso for the past five months.

She was a senior of the 1936 class and would have graduated with the rest of the class. She was a brilliant student and loved by all her classmates and teachers. Twelve girls classmates and schoolmates acted as pall bearers. The funeral services were held at the cemetery, the crowd being too large to have it at the home. Prof. and Mrs. Karl Cunningham and Mr. and Mrs. Lewis Cummins sang "What a Friend we have in Jesus," Mesdames E. V. A. Hayta and Sterling Fisher sang "Go bury thy Sorrow," in Spanish.

The esteem in which the family is held was evidenced by the large crowd that attended the funeral and the beautiful flower offerings. Josephine leaves to mourn her loss, her parents, her grandparents, Mr. and Mrs. Julian Serna, other relatives and many friends who extend to the bereaved parents and grandparents their sincere sympathy.

TOWN HAPPENINGS

WHO? WHEN? WHY?

C. H. Boyd, Thos. N. Hobbs and H. A. O'Reilly were here from Fort Stanton last Friday afternoon in the interest of the big Fourth of July celebration to be held at Fort Stanton.

CHERRIES — Montmorency variety. Large, medium sour, conceded best for pie and canning. No. One quality guaranteed. 10c per pound f. o. b. Alamogordo. Write M. E. MORGAN, Alamogordo.

Marshall and Lell St. John motored to Las Cruces last Friday and returned Saturday, accompanied by Mrs. Marshall St. John, who had been visiting relatives at that place for the past two weeks.

Mrs. Gordon Wells is visiting at the home of her parents in Atlanta, Georgia.

Alfredo Martinez and L. C. Vidaurri, who have been attending the Business College at Albuquerque, are home for the vacation period.

Prof. Eric C. Ming and family came through here Tuesday on their way to Albuquerque, where Mr. Ming has an engagement at the University for a portion of the vacation period.

Mrs. E. W. Myers and daughter May Margaret have returned from Tularosa, where they visited with her mother. Miss Evelyne Coe came with them for a week's stay.

Mr. and Mrs. R. S. Poage, daughter Jan and Mr. J. A. Ward of Albuquerque are visiting at the home of Mrs. O. S. Stearne at Nogal Canyon. Mr. and Mrs. J. E. Hall, Aucho, and Attorney and Mrs. J. E. Hall, Jr., Carrizozo. Mrs. Stearne and daughter, Erma Poage were visitors in town yesterday.

The Cardinals go to Fort Stanton Sunday and the Cobras will travel to Bingham — D. Dust.

Capitan, N. M.

The Carrizozo-Capitan Sunday Schools will have their picnic at Philadelphia Canyon Sunday. You are invited regardless of your denomination. Come and bring a picnic dinner. Free lemonade will be served. There will be Sunday School at 10, and Rev. Scoggins of Clovis will preach at 11. We are to hold our 3rd quarterly conference out in the hills, so officials of both churches are expected to come.
—J. A. Bell.

COMMENTS

Lewis Burke

Buenas Tardes, Senores y Senoritas! Is everybody happy? You dern tootin'!

A 100% Democratic friend of the writer remarked to us the other day (quote) "Every time I pick up a copy of the paper, I see that the President is on a vacation or has just returned. Sufferin' cats, who runs the Government anyway, the janitor?"

"Living in a dream we are, While our span goes gliding by."

In other words, after one reaches the age of 30, the years gallop by with incredible swiftness.

The desert country surrounding Carrizozo now is a glamorous scene to behold. Wild flowers are now up in brilliant array; a sight of splendor on the road to White Oaks, the birthplace of the novel "Heart's Desire," by Emerson Hough. At that place, you'll find, among other things, a natural rock garden with blooms of every variety, so beautiful, that it beggars a description.

This COULD happen: "Found—Lady's purse left in my car while parked. Contains \$5.00 in change, etc. Owner can have same by describing property and paying for this ad. If owner can explain satisfactorily to my wife how the purse got into my car I will pay for the ad myself."

"Quite an intellectual topic of conversation!" — A Friend remarked, "Wearing new, hurting false teeth has its advantages—your mouth feels so good when you take 'em out."

This ain't ary a bit nice — A Democratic exchange says in large 24-point headline, "Representative Zioncheck is Thought to Have a Few Bats in His Belfry." Note — A Democratic friend of Y this office replies, "Not a bit nuttier than the present administration, if you ask me."

Senor Billy Shakespeare said something about "All the world's a Stage; and the men and women merely players." — To what could he have reference, not the present order of things.

The Bermuda grass on the City Park grounds is beginning to come up, despite advices from people who've never had a blade of grass in their lives before. Tiz odd, some folks like to give advice on how to do one thing or other—even as You & I.

News Heading — Revolution in Progress in Nicaragua. —What, again? Like down in Old Mexico, half the army are Generals. "If I can't be a Captain or General I won't play in your war."

P. S. Let's not forget our Dads this coming Father's Day. A good scout (that's our Dads.)

An Observer remarked, "It seems to me that the Townsendites and the Share-the-Wealth advocates are going to create quite a stir in the coming presidential campaign. Listen in on the news commentators on the radio and you'll see." — St. Senor.

So, Adios, from the Land of Romance, Turquoise Sky, Conquistadores, Broad Open Spaces — and Milk Beans.
