PRICE \$2.00 THE YEAR

Out-of-the-Ordinary

STRANGER THAN FICTION

Seventy one year old George Carpenter had a quarrel with his wife 16 years ago. What of it? George went to a refuse dump in Writthland, England, and dug himself a cave. He sold the refuse that he picked from the coal dump to purchase food. He died last week, after having lived in that coal dump for the 16 years following the quarrel. His wife frequently begged the city trustees to do something that would cause him to leave the queer living quarters, but he paid no heed to them. When asked why he lived in that manner, he said: "In this place I only have to fight with myself."

Battle lines are sharply drawn between Sally Rand, fan dancer, and the nudists who are fighting for the laurels which they are afraid Sally will take from them during the Fair at San Diego. Last week, the nudists headed by the beautiful Mary Pomroy, appeared in tears and big leaves, vowing that they would give Sally a "battle for her life." So there now! The nudists say they are going to put on something that will put Sally's bubble dance in the shade. Quite out-of-the-ordinary for women—there will be no talking. The nudists are quoting the saying of King Solomon, when he paid a visit to the Queen of Sheba: "I didn't come here to talk." Instead of a bubble dance, the nudists will stage a bear (bare) dance which they claim will increase the attendance, especially the male visitors. This battle may decrease the business on airplanes, as everybody will want to remain on the ground to witness the conflict.

The firemen at Minneapolis, Minn., have a pet cat they call "Mickey." He sleeps in the loft with the boys and responds to all alarms as readily as any of the firemen. When the alarm rings, Mickey dashes to the brass pole and slides down the second floor to the equipment room below. He jumps on the fire truck; goes to the fires and seems as much interested as do the firemen. When the truck comes in, Mickey is always perched on top and follows the firemen to the rest rooms.

George Haven, Chatfield Minn., has a wall at his home which to him, is a "rock of ages." It contains a portion of the Plymouth Rock, on which the pilgrims landed; two large pebbles from the Tower of London; several rocks from the famed Look-out Mountain battle site; rocks from the old Roman wall at Chester, England; portions from the forum of Pompeii and Vesuvius; souvenirs from the caves of New Zealand and Nova Scotia.

Call meeting of Townsend Club Monday at 7:30 p. m., at court rooms.—J. A. Bell, Chairman.

Personals

Scoutmaster Phil Bright and his troop of Boy Scouts arrived home last Sunday afternoon from their Jamboree at Camp O Ral near Dexter. There were over 500 boys at the Jamboree which lasted three days. The boys had a nice outing and returned much pleased with the trip and the experience of camp life. T. E. Kelley and Roy E. Shafer, committeemen, assisted in the transportation of the boys to and from the camp.

Little Felipa Chavez, daughter of Mrs. Manuel Chavez, had the fingers of one hand badly mashed at the ball game last Sunday, when the door of a car was accidentally shut on her little hand.

Little Clarice Page had an operation performed Tuesday morning, having a growth removed from her left cheek bone, which had been giving her trouble for several years. Dr. Stevens performed the operation.

Mrs. Maud Mulkey, Grand Matron of the Order of Eastern Star, made her official visit to Carrizozo Chapter last Thursday. A delightful banquet in her honor was held by the Missionary Ladies at the Hall.

It is reported that Elmer Hale of Jicarella, who has been critically ill recently, is doing nicely since his chest was drained Thursday.

Rev. L. D. Jordan left Wednesday for Belen, having resigned his pastorate at the Baptist Church last week. This community regrets the loss of Rev. Jordan; we trust that he will favor us with his presence when he visits us again.

Gene Dow, clerk at Kolland's Drug Store, who has been ill of late, has improved. His place being filled by Bud Peckham of evenings.

Mrs. Elbert Brown of Caballo was in town several days this week, as a guest of her parents, Dr. and Mrs. P. M. Shaver and sisters, Misses Nellie and Thelma.

We understand that Andrew McBrayer has purchased the Emerson - John Rowland place, located about three miles from town on the Malpais highway.

Gunther Kroggel of the N. M. Mech. Equipment Co., and his efficient mechanic, Loy Mitchell, were Albuquerque business visitors for two days this week.

The P. T. A. will meet for the last time on Friday evening, May 8 at which time, reports will be made and officers installed for the coming year.

Dr. Lucinda De Templin of the El Paso Radford School for Girls was the Carrizozo Woman's Club guest speaker at the Hi School Commencement Exercises.

M. E. Church Services All who are interested in the Commencement music are urged to attend choir rehearsal Saturday evening at 7 o'clock. The choir will sing the anthem, 'Stand up, Stand up for Jesus,' at the Sunday evening service and the subject for the pastor's sermon will be, "Correspondence of the Deeps."

The May Pole

Lincoln (Hearsay)

Mrs. Ruth Penfield is visiting her daughter Julia, who teaches in the Alamogordo schools.

Mrs. Ola Jones, County School Supt., conducted the 8th grade examinations on Tuesday for the Lincoln, Picacho, Tinnie and San Patricio pupils.

Ysabel Aldaz purchased a '86 Pickup Chevrolet Truck from the City Garage at Capitan last Saturday.

Miss Thelma White from the Social Service office at Carrizozo was in Lincoln Monday.

Mr. and Mrs. E. M. Vigil were Roswell business visitors Monday.

T. C. Romero and family witnessed the Cobras - Mescalero baseball game at Carrizozo last Sunday.

Lieut Edward Penfield made a business trip to El Paso and Juarez last week.

The public is cordially invited to the P. T. A. dance here Saturday night, May 2. Music by the "Happy Four."

Mr. and Mrs. Dawey Stokes and children of Carrizozo were sight seers in Lincoln Tuesday.

Women's Missionary Society

A very delightful time was had at the banquet served by the Methodist Missionary Society to a large crowd of Eastern Stars and their families on Friday evening, April 24, the occasion being in honor of the official visit of the Worthy Grand Matron, Maud Edna Mulkey, to Comet Chapter No 29.

Mrs. Ina J. Mayer, Worthy Matron, was toastmistress and welcomed the Grand Matron in her usual pleasing manner, the Grand Matron graciously responding. Others speaking were Mrs. Nora Phipps, Dr. Blaney and Mrs. Van Coeverden.

Guests of honor for the evening were: Mrs. Edna Mulkey of Albuquerque; Worthy Grand Matron; Mrs. Merle-Koch Davis, Tucuman, who has the distinction of being a native of 'Heart's Desire' (White Oaks); Mrs. Evelyn Van Coeverden, Associate Grand Matron, East Vaughn and Mrs. Lottie Howell, Grand Electa, Encino.

Other visitors from out-of-town were: Mmes. Dunlap and Miller, Vaughn; Mrs. Lucas, Encino, and Mrs. J. R. Green, Alamogordo. After this most delightful meal, served in a faultless manner, the members of the Eastern Star repaired to the Chapter room for their meeting. —Contributed.

LYRIC THEATRE

R. A. Walker, Owner

Show starts at 7:45 p. m. Thursday-Friday Saturday

'The Silk Hat Kid'

Featuring Lew Ayers, Paul Kelly, Mae Clarke, Warren Hymer. A good fast action picture which will hold your attention from start to finish. Also 'Red Rider' No. 15, "Chums" and "Moans and Groans."

Sunday Monday Tuesday

'The Melody Lingers On'

With Josephine Hutchinson, Geo. Houston, Helen Westley, David Burton. A beautiful story of mother-love. Also Mickey Mouse and Silly Symphony in Technicolor.

Matinee Sunday at 2:30. Night show at 8:00.

F. R. Birney Passes Away

Mrs. J. V. Hobbie received word the first of the week from Houston, Texas, of the death of F. R. Birney, supervisor of the journalistic department of the Houston high school. Mr. Birney taught school here several years ago. He had returned from Austin, where the family attended a celebration, after which he was taken ill with pneumonia and died after being ill four days. Mrs. Birney, nee Ivy Bingham, is a niece to Mrs. Hobbie and a sister to Mrs. Elvin Harkey of Ancho. Funeral services were held at Houston, under the auspices of the Masonic order in which he held a membership. Relatives of the deceased have the sympathy of this community.

The Boughners Entertained

Last Saturday evening at the Boughner home, Mrs. Fred L. Boughner, daughter Rhea and son Leslie entertained the pupils of Mrs. Ben S. Burns' piano class. After the piano numbers, refreshments were served.

Mrs. Ben S. Burns Presents

her pupils in Recital at the Methodist Church Monday, May 4, at 7:30 p. m. There will be no admission charge; the public is cordially invited.

County Clerk and Mrs. Ernest Key and the children spent Sunday in Capitan, visiting Mr. Key's parents, Mr. and Mrs. T. C. Key and other friends.

Shirley Phipps is putting a galvanized metal roof on his home cottage; he is being assisted by Wm. J. Langston.

Corona News

Messrs. George Simpson and Brack Sloan came up Wednesday night from Roswell where Mr. Simpson had been receiving medical treatment.

Mr. and Mrs. Dan Simpson and children are in Roswell on business this week.

Mr. and Mrs. A. L. Ford left Friday for their home in California after a week's visit with Mrs. Ford's parents, Mr. and Mrs. Frank Dishman.

Mrs. Clarice Mariner, Mr. and Mrs. P. H. Mariner, and Mrs. Frank Montgomery returned Friday from a two-weeks' stay at Hot Springs.

Messrs. Noble Snodgrass and H. R. Dean made business trips to Albuquerque and to Carrizozo Wednesday.

Walter Pfeiffer and Tom Grimmer have been subpoenaed on the Grand Jury which will convene Monday in Roswell.

Among those from Corona attending the U. S. Highway 54 Meet in Santa Rosa were: A. J. Atkinson, Frank A. DuBois, E. L. Jarnagin, A. L. Windham, G. C. Brown, Cress Mares, C. W. Wade, Dr. L. H. Barry, W. E. Abel and George Simpson.

Congratulations—Mr. and Mrs. C. C. Ashcraft, a daughter, Catherine Darline, born April 21; Mr. and Mrs. V. C. Waldon, a son, Miller Edward, born Apr. 24; Mr. and Mrs. J. W. McCauley, a son, Edward Lee, born April 22, 1936.

Mr. and Mrs. M. M. Penix were business visitors in Carrizozo and in El Paso the last week-end.

Mmes. Kilpatrick and Florence Stroppe and their daughters made a business trip to Albuquerque Thursday, returning home Sunday afternoon.

Thirteen of the Corona Boy Scouts, accompanied by Scoutmaster Aubrey Thomson and Herman McKibben attended the Scout 'Camporal' held at Dexter from Thursday until Sunday of last week.

Mrs. W. G. Chancy is spending a few weeks with her daughter, Mrs. P. A. Thomson before returning to her home in Alamogordo.

Miss Verdine Clehon attended the Ag dance at State College Saturday.

Miss Ruby Sheffield came down Saturday to spend a few days with her parents. She returned to Vaughn Wednesday night.

W. G. Chancy

Wyatt Gamelle Chancy was born April 6, 1851, at Millageville, Ga., and died April 25, '36, at Alamogordo. He married Miss Leacy Catherine Thompson, Jan. 21, 1888, at Crockett, Texas, and came to New Mexico in 1912 and has lived here ever since.

Funeral services were conducted by Rev. Roll at Corona Sunday and interment made in the Corona cemetery. He is survived by his widow and five children, to all of whom the sympathy of their many friends is extended.

Mr. and Mrs. R. E. Kent of Oacura received word Monday to the effect that Mr. Kent's father died at his old home in southern Illinois, near Cairo last Sunday. They left on No. 4 Monday night and will return the latter part of the week or the first of next week.

Diamond Dust

By Joe Chavez

The day of reckoning finally came around and the lid flew open on the 1936 baseball season at the local park last Sunday afternoon.

It's a very sad story, fans and all concerned—but we must be good sports, take the rap on the chin and instead of getting discouraged, concentrate more in what the future will bring in the way of ball games.

The Red warriors with Chief Geronimo on the hilltop, were really on the warpath and all but made mince meat of the Carrizozo Cobras. Up to the fourth chapter, the locals held their own with the war horses of the four winds. But lo and behold! When the Indians touched off their sticks of dynamite, the Cobras fared against them as badly as the Ethiopians are faring against the Italians. Their hits were many and varied, such as two, three and 4-base plys and it would have been necessary to have an expert accountant with an adding machine to keep tab on the whole proceedings.

We offer a little suggestion to the men at the helm of both Carrizozo teams and we hope you don't feel "hoit."

Two minds click better than one—so why not combine your forces and give Carrizozo one good ball team?

Whatever you do, let's not get down-hearted over the defeat of last Sunday, but get down to brass tacks and win ball games.

Captain Huffmyer of the Carrizozo Team has been combing the business district of the town this week in order to raise sufficient funds to purchase uniforms for the team, and all have responded generously. The Cobras will give a dance at Baca's tomorrow night for the benefit of their team. Sat Chavez, Jr., and his Conquistadores will take care of the music and H O W!

Sylvester and Juan Baca have been grading the east side diamond this week.

Oddfellows in Mothers' Day Observance

On Wednesday evening, April 13, Carrizozo Lodge No. 30, Independent Order of Oddfellows will entertain the people of Carrizozo and vicinity with a Mothers' Day program at the Lyric Theatre, beginning at 8:15. The program will consist of short addresses by speakers selected from the membership of the order and in addition, there will be vocal and instrumental music, all of which will be of a nature consecrated to the sacred event.

In deference to the above mentioned program, the Senior Class exercises which are to be held on the same night, will begin at 7:30, to allow the Seniors and attendants to hear the Mothers' Day program. Admission free.

Mrs. Georgia Davis has returned from El Paso, where she spent the winter.

RHINELAND CITIES

KoIn's Cathedral-Dominates the Rhine.

Prepared by the National Geographic Society, Washington, D. C.—WNU Service.

ANY of the cities that will be affected economically by the recent movement of Nazi troops are well-known to Americans who have enjoyed happy vacation days in the Rhineland. Among them are KoIn (Cologne), Dulsburg, and Koblenz (Coblentz); cities that have beckoned to, and charmed travelers from this side of the Atlantic.

KoIn is one of the most popular stopping places along the Rhine. The city, with its bustling trade and with one of the world's most famous cathedrals in, perhaps, the valley's greatest drawing card.

Whether the traveler approaches KoIn by the black-and-white funneled passenger boats, by train, or by motor over the numerous highways that radiate from the city, the massive cathedral, blackened by age, first comes into view. The huge structure dwarfs the close-built, gabled, medieval houses and modern flat-roofed structures.

The KoIn edifice is a fine example of Gothic architecture ranking fifth in size among the world's cathedrals. It is richly adorned with a profusion of towers, spires, flying buttresses, elaborately carved cornices, fluted columns, and stained glass windows framed in beautifully executed tracery work. From its heights numerous gargoyles gaze at passersby in the streets beneath.

The twin spires flanking the western facade, each nearly as tall as the Washington monument, tower over the city and the swift flowing Rhine "like fingers pointing the city to heaven."

KoIn is Ancient But Busy. Although KoIn is two thousand years old, it reflects its prosperity and modern development in wide, tree-lined boulevards, broken here and there by flowering gardens and parks ornamented with monuments, and equestrian statues of celebrated German countrymen. Fine shops and imposing mansions border these thoroughfares but now and then one wanders into a section where medieval KoIn reveals itself in tortuous, narrow, cobbled streets, walled by ancient gabled house fronts and dimly lighted by antiquated gas posts.

The Roman wall that once surrounded old KoIn has long since been destroyed and its foundation now forms one of the city's most beautiful boulevards and parkways—the Ring. Only the gate towers of the walls remain, marking the limits of the old city. Beyond them KoIn has spread out, absorbing numerous suburbs until its population now is nearly 700,000.

As Germany's great river port and one of its major railroad centers KoIn is the St. Louis of the republic. Under the graceful arched bridge that connects KoIn with the east bank of the Rhine, pass long strings of barges, lumber rafts, large steamers and palatial passenger boats.

KoIn has a large trade in corn, wine, mineral ore, coal, leather, timber, and porcelain. Some of the products of the city's industries are known by their names such as KoIn brown, a brown coal; KoIn ware, used as a pigment in paints; KoIn ware, a plain hard stoneware, mottled gray and brown which is made into ornamental jugs; KoIn spirits, a rectified liquid containing 60 per cent alcohol; KoIn thread and KoIn blades.

Dulsburg, Germany's largest river port, is more than 1,500 years old. There was a village on its site in 430 A. D., and it was well-known to the Romans when they occupied the Rhine country many centuries ago. When the city charter was handed to the Dulsburgers in 1129, the port's commercial importance had been established.

Viewed from a Rhine river boat, there is nothing in Dulsburg to suggest its age. The traveler looks out upon a maze of shipping, Dulsburg and Ruhrort were merged in 1905 and the quays of the two cities, if spread out in a single line along the Rhine, would span 25 miles of river bank.

Dulsburg a Crowded Port. A constant stream of boats is coming and going from the Rhine channel. Iron products, steel, coal, tobacco and textiles move from this port to many parts of the world, while some of the incoming boats bring iron from KoIn and Sweden to keep the wheels of Dulsburg mills in operation. Meanwhile the Ruhr river, which flows into the Rhine at Dulsburg, is filled with vessels and barges, many of which dock at the busy port where their cargoes are transferred to sea-going craft, or conveyed to Dulsburg mills.

how some of the factories make use of their smoke by extracting gases which help turn the wheels in the mills from which it comes.

Quaint, gabled houses with doorsteps protruding upon the cobbles of narrow streets, and the venerable St. Saviour's church, a fine Gothic edifice, whose spire rises 312 feet above the city, take the traveler back a few centuries, but most of Dulsburg is as new as any of America's colonial towns.

In the middle of the Nineteenth century Dulsburg had only 15,000 inhabitants and Ruhrort, 7,000. Today both cities have a population of nearly 500,000, drawn from nearly all parts of Germany, and many parts of Europe. As the rich Ruhr district is further developed, Dulsburg, as the water gateway of the Ruhr district, bids fair to continue to grow.

A large portion of the working population of Dulsburg work in the great steel mills of the Dulsburg area. Frequently they crowd the city stadium which accommodates 40,000 spectators.

The opera, and some of Germany's finest orchestras and enthusiastic audiences here. Many churches and government buildings, as well as the museum, are adorned with paintings, sculptures or industrial art works.

The newer portion of Dulsburg is laid out with modern thoroughfares. In the business districts of which are fine shops. Frequently the streets open into the broad squares where Dulsburg has placed statues in honor of local and national patriots. Dulsburg was the home of Gerhard Mercator, and in the Burg-Platz is a fountain commemorating the mapmaker.

Attractions of Koblenz.

The traveler finds that there is little wonder that American soldiers liked their assignment to Koblenz after the World war.

Few cities and towns, even in the Rhine valley, enjoy the picturesque setting of Koblenz. For many miles above and below the city, the Rhine shore is studded with villages, like gems strung on a gracefully curving string. Behind them, well-kept vineyards, sources of the famous Rhine wine, clothe the steep river banks from the village backyards to the foot of massive walls of castles that a few centuries ago were the gay gathering places of some of the great and near-great of Germany.

From the opposite shore, or from the rail of a Rhine river boat, Koblenz displays no evidence that there was a town on its site 2,700 years ago. A colossal equestrian statue of Kaiser Wilhelm I overlooks the Rhine from the junction point of the Moselle and Rhine rivers. From this point to the opposite end of the city, the Rhine shore is lined with a wide, open space with shaded promenades and numerous grassy parks.

No sooty smoke stacks and warehouses are visible to mar the skyline of modern buildings and lofty church steeples. There is a landing place on the riverside but it is spotlessly clean and free from unsightly piles of cargo. Koblenz is a great wine market, but after viewing the fine buildings, and palatial residences set amid wide lawns, travelers search for other evidence of the city's livelihood. On the Moselle banks they find it. Barges constantly come and go from the quays and a visit to the nearby streets reveal busy piano, paper, and dye factories, and chemical laboratories. On the riverside are small yards from which slip some of the boats and barges that ply the Rhine.

Along the Moselle banks also are a few narrow, crooked streets, lined with venerable houses, business buildings and churches—all that remains of old Koblenz, formerly Confluentia, so named because of its situation at the confluence of the Rhine and Moselle.

The church of St. Castor, founded eleven centuries ago; the Liebfrauen church, a Thirteenth century structure, and the municipal picture gallery, formerly an old castle, are a few of the interesting historic gems found within the site of the once walled town.

A pontoon or boat bridge crosses the Rhine leading to Ehrenbreitstein fortress on the east bank of the Rhine. The Stars and Stripes flew over Ehrenbreitstein from December, 1918, to January, 1923. Beautiful panoramas of the Rhine and Moselle valleys and a splendid bird's-eye view of Koblenz is ample reward for a climb to the fortress whose walls rise 360 feet above the Rhine.

Day for Dancing

In Helston, England, the whole population joins in celebrating the "Furry Dance." All day long dancers surge through the streets and under banners, dancing and capering. Far from being upset by this intrusion, however, consider it a sign of good luck, and pity those whom dancers do not visit.

CANNED FRUITS GOOD FOR DIET

Contribute Minerals and Important Vitamins.

By EDITH M. BARBER.

STEWED and canned fruits are valuable assets to the diet. It is possible to get an adequate quantity of vitamins for which fruits are so highly valued from the stewed and canned products. Although not all of them have been compared specifically, nutrition experiments with fresh and canned pineapple for instance show that one gives the same results as the other. In fact canned fruits which are prepared by the vacuum process retain more vitamins than fruits cooked at home.

While we group fruits together, they do not all contribute the same amount of minerals and vitamins for which, however, they are all generally valuable. Pineapple can be counted on for some phosphorus, good amounts of the vitamins A, B, G and C. Peaches are higher in phosphorus, contribute about the same amount of vitamin C and a little less of the other vitamins.

Anyone using a liberal amount of canned and stewed fruits daily need not worry about the minerals and vitamins, although, everything else being equal, a combination of fresh, canned and cooked fruits is usually the most practical plan of the daily diet.

Fruit Suet Pudding.

2 1/2 cups fine dried bread crumbs
2 cup milk
2 eggs
2 cups sugar
1/2 teaspoon salt
1 cup suet chopped fine
2 cups sliced fruit
Soak bread in milk. Add beaten eggs, sugar and salt. Rub-chopped suet until crumbed. Add the fruit and combine with the other mixture. Put in a greased bowl, cover tightly and steam three hours. Sliced apples or dates, or soaked prunes or apricots may be used with the batter.

English Fruit Pudding.

1 quart canned pineapple
Sugar
6 or 7 slices buttered bread.
Whipped cream
Drain pineapple. Crush fruit with sugar to taste and let stand for an hour or more. Butter the bread on the loaf

slice one-half inch thick, remove the crusts and line a quart bowl with this. Pour in the fruit, cover with buttered bread, cover with plate which fits into bowl, and on this place a weight. Put in the icebox for 24 hours, turn out of bowl, and serve with whipped cream.

Pineapple Cream Filling.

1 1/2 cups (1 can) sweetened condensed milk
1/2 cup lemon juice
1/2 cup crushed pineapple, drained
Blend sweetened condensed milk and lemon juice and stir until mixture thickens. Force pineapple through coarse sieve; fold into mixture. Use as a filling for plain cake or Washington pie, dusting top of cake with confectioners' sugar.

Cherry and Apricot Compote.

1 No. 1 can whole cherries
1 No. 2 can whole apricots
1/2 cup sherry
Open cans of fruit. Mix together, add sherry and let chill in refrigerator, until ready to serve.

Blackberry Pie.

Pastry
Salt
2 1/2 cups berries
Flour
1/2 cup sugar
Line a deep pie plate with pastry, dredge with a tablespoon of sugar mixed with flour, fill with berries slightly dredged with flour, sprinkle with sugar and salt and bake 10 minutes in hot oven, 450 degrees F., and reduce heat to 350 degrees and bake 40 to 45 minutes.

Orange and Onion Salad.

3 oranges
2 Spanish or Bermuda onions
French dressing
Slice the oranges after peeling and arrange with slices of onion on a bed of lettuce or endive. Dress with French dressing and let stand at least one hour before serving.

Baked Alaska.

1 sponge cake
1 pint ice cream
3 egg whites
3 tablespoons sugar
1 teaspoon vanilla
Salt
Remove center from top of cake, leaving a shell at least 1/2 inch in thickness. Fill with ice cream and cover with meringue made by beating eggs and adding sugar and vanilla. Bake in a hot oven, 450 degrees F., until light brown, and serve at once.

HOW ARE YOU TODAY
DR. JAMES W. BARTON
Talks About

Danger of Underweight

WHILE there is no question but that it is easier to take weight off the overweight individual than to put it on one who is underweight, nevertheless there are many thin individuals who could increase their weight by eating more food and different food than they are eating at present.

These are of course a number who come from "thin" families, others whose body processes work faster than normal due to overactivity of the thyroid gland in the neck, others of the very nervous type, who just cannot seem to put on weight.

What is underweight? or undernutrition? How is one to know if he is undernourished?

According to an editorial in the Journal of the American Medical Association, undernutrition is where the body weight is not less than 10 to 15 per cent below the ideal weight for a given age, sex and height.

Among the unfavorable effects of undernutrition are general weakness and tiredness, lessening of the physical and mental ability, and a greater likelihood to be attacked by disease. There is often thin blood and a dropping of the abdominal organs.

The cause of undernutrition is not completely known because a number of factors may enter into it. Among the suspected causes are (a) overactivity of certain ductless glands (thyroid in the neck for example); (b) peculiarity of the nervous system; (c) getting an insufficient amount of the right kinds of food.

Sometimes cases thought to be due to gland disturbance or to the fact that the individual was of the "nervous" type, have been found to be really due to a lack of good body building food.

Research Shows Results

I have mentioned before the research work of Drs. J. M. Strang and F. A. Evans, as recorded in Annals of Internal Medicine, with a group of 21 undernourished office patients. These patients were given a diet containing sufficient body building and energy giving foods with very gratifying results in weight increase. During an average period of 11 weeks the average increase in weight was 17 per cent, or about 1 1/2 pounds per week. Similar results were obtained in a group of 18 hospital patients; their average body weight increase was 13 per cent in a period of five weeks.

In addition to gaining weight many different symptoms disappeared, "the patients expressing a feeling of well being, and they became more resistant to fatigue and to infection."

That the rate at which the body processes work (metabolic rate) had nothing to do with causing their underweight was shown by the fact that this rate was about normal or slightly below normal.

Further, careful measurements showing the relation of the total weight of the food eaten to the total wastes from the intestine showed that 92 per cent of the food was digested and absorbed into the blood during the period of treatment. This shows that the stomach and intestine, in fact the whole digestive system, was just as efficient as those of normal individuals.

These experiments show that when diets are scientifically arranged, and followed faithfully, definite gains in weight can be made by the majority of underweights.

Must Supply Energy.

Now the foods eaten to increase weight must not only supply energy and repair worn out body cells but must contain an extra amount of the foods that can be stored in the body as fat. Foods that will leave something to be stored as fat are bread, sugar, butter, cream, salad dressings, cream soups, peas, beans, nuts and dried fruit.

Fat meat and pastry are rich in fats but cannot always be eaten by underweights.

Milk, eggs, and meats must be eaten for body building. Fruits and vegetables, though bulky and apt to give a "full" feeling too soon, nevertheless are necessary in a building up diet because of their minerals—sodium, calcium, iron, phosphorus and others; their vitamins; and for their roughage.

The thought then in trying to build up weight is to increase the food intake by about one-fourth, adding to the diet an extra amount of butter, bacon, cream, salad dressing at meal times, and egg nog between meals. This egg nog can be made with siphon soda instead of the milk if necessary.

Peptic Ulcer Common

When you read about peptic ulcer—ulcer of the stomach and also of part of the small intestine (duodenum) into which the stomach empties—you may naturally think of it as a very dangerous condition and that death finally results. As a matter of fact from examination after death of sixty thousand people, about one in every twenty showed healed or unhealed ulcers.

INCOME TAX LAWS

Connecticut, Florida, Pennsylvania, Rhode Island, Utah and Virginia have never ratified the 16th or income tax—amendment to the Constitution, which went into effect in 1913. It was rejected by Connecticut, Rhode Island and Utah.

Are some SEEDS more Intelligent than others?

Maybe you think it impossible to breed vegetables and flower seeds that know how to grow. Well, it isn't! For that's exactly what The Ferry-Morse Seed Breeding Institute is doing at its stations in Rochester, Mich., and Salinas, Cal.

Cucumbers eight inches long—no more, no less; solid red beets; carrots that are practically coreless; rust-resistant snapdragons. Just a few of our achievements! Year-in, year-out, new strains, adapted to varying soil and climate conditions, are being developed... existing quality is being improved and protected. After thorough tests for germination and purity, progeny of the foundation stocks is offered for planting in your garden. You'll find them listed in your free copy of our Home Garden Catalog. Look for the Ferry display in your local stores. Ferry-Morse Seed Co., Detroit and San Francisco.

THE FERRY-MORSE SEED BREEDING INSTITUTE
Devoted to improving and maintaining the quality of America's garden seeds.

GLOVER'S

The Household
By LYDIA LE BARON WALKER

THE limits of a room are essential to remember in a homemaker's consideration of decorative schemes. This was impressed upon me recently when going over some pictorial plans for interiors. It was not that the rooms were badly arranged. They were good. But where would there be sufficient space in the average living room, for instance, for two large davenport, a large knee hole writing desk, great over-stuffed chairs, capacious tables, a piano and seven lamps, three of them floor lamps, to say nothing of the various footstools, small tables, side chairs, etc.? It certainly would require a mansion.

In my work of interior decoration, I have become accustomed to calculating floor spaces and gauging room areas. The measurements of this room would have to be at least 20 feet wide by 30 feet long, and 25 by 35 or 40 feet, would be more accurate to give the spaciousness pictured. However attractive the arrangement, it could not be practical for ordinary size living rooms.

Visualizing Areas. The home decorator must learn to visualize rooms. To some persons this is an easy matter, while others have difficulty in doing it. If you belong to the latter group, begin by seeing in your mind's eye, how some article you want would fit first into one space and then in another in the room. Know the measurements of your rooms so that when you see pictures of rooms, and would like to have something similar in arrangement, you can, yourself, gauge whether it would be feasible, or not.

It is important to give an impression of space in rooms of small dimensions. For this furniture and furnishings must either be chosen carefully to conform to sizes of rooms, or furniture must be shelved when pieces are over-large or there are too many as is often the case in "dress days," when moving into smaller homes is practiced for economy's sake. By careful arrangements of furniture certain articles can seem to diminish, when they are too large, or the number of pieces seem less than they really are.

On the other hand the limits of large rooms can be made to seem less by good arrangements of furniture when there is scarcity of pieces.

Lure of Names.

Furniture and furnishings have an amazing number of names apart from those of classification, such as beds, chairs, tables, etc. Some of these other names are due to the fact that a person originated the design, and was also, perhaps, the craftsman who actually made the pieces, as instanced in Chippendale, Shoraton, Hickok, Morris, etc.

The fame of Chippendale has come down through the centuries largely through his chairs, but by no means for them alone for his list of kinds is a long one. Some of his pieces bear the further descriptive name of Chinese, expressive of the influence of the art of that great country from which returning merchant vessels were bringing to England treasures in many arts

The Dimensions of a Floor Plan Seem More Spacious Than in Reality.

Hugh Bradley Says:

Guest Columnists
Reveal Inside Facts
About Various Sports

Hugh Bradley is still vacationing. This week's guest columnists write about soccer, basketball and the relative merits of hockey and polo. The guests are: James Armstrong, secretary United States Football Association; Claire F. Bee, director of athletics and basketball coach at Long Island University; and Stewart Iglehart, famous hockey and polo player.

Soccer, or association football, is the most nearly universal and the greatest of all international sports. In the United Kingdom, continental Europe and South America it is the predominant game. Its strong appeal lies in the fact that persons of any weight or size may play it.

Physical fitness is essential to succeed in all branches of athletics, but soccer demands more stamina than almost any other. The season is unusually long, extending over a period of nine months, from September to May.

In the course of this grind the player acquires the endurance necessary to carry him through a bruising, hard-fought contest calling for ninety minutes of continued action, except for a ten-minute interval between halves.

Soccer is football in its most ancient form and is the one type of football that does not belie the generic term, since it is played with the feet. Its origin is so obscure that Adam may have kicked an apple around the Garden of Eden for Eve's amusement.

Historians tell us the early Greeks played a game roughly resembling football. The Romans also had a pastime in which an inflated ball was used.

Centuries ago football played a part in the celebration of Shrove Tuesday at Chester, England, and contemporary chronicles state that the head of a Dane was used for a ball. In the fourteenth century the game attracted the attention and approval of the authorities. On April 13, 1314, Edward II issued a proclamation outlawing it as a breach of the peace. But it continued to grow in spite of royal edicts.

Oliver Cromwell speaks of playing football in his letters. At that time it was lawful to kick an opponent in the shin, trip him or take the ball away from him by any means.

Soccer was introduced into the United States gradually, and its development has been slow compared with its progress in other nations, chiefly because it has been regarded as a foreign sport and thought, erroneously, to be lacking in the combative elements favored by the American public.

More than sixteen nations now play the game. In England and Scotland attendances of 100,000 are not uncommon. The largest stadium in South America was built especially for soccer and accommodates 125,000. America's biggest turn-out was 45,000 for the debut of the famous Hakoah team of Vienna at the Polo Grounds in 1917.

With the growth of the sport in this country came the need of a national organization. The United States Football Association was founded in 1913 and was affiliated with the Federation Internationale de Football Association the following year.

1,300 Soccer Teams Now in Organization

Approximately 1,300 teams, comprising 22,000 amateur players and 700 professionals, are engaged in competition under the auspices of the U. S. F. A. Although no definite figures are available concerning those taking part in colleges, schools and public playgrounds, it is safe to assume the number is equal to, or greater than, the total of association competitors.

A great deal of impetus has been given to the advancement of soccer in America by frequent visits of well-known teams from abroad. The first foreign invasion was made by the Hakoah, a clever aggregation of boozing stars, and has been repeated on a bigger scale every year.

The advent of a representative combination from the Scottish Football Association last summer was a red-letter occasion in the history of American soccer. The technique displayed by the Scots won many new adherents.

The U. S. F. A. is going to send a team to the Olympics if the necessary funds can be raised. Although the response to appeals for money has not been very promising to date, the committee in charge still expects to collect the sum required.

If it is successful the United States will be represented by the most powerful group of soccer players ever assembled under the Stars and Stripes.

Let's Forget Changes in Basketball Rules

By Claire Bee
JUDGED by the number of persons playing basketball (between 3,000,000 and 4,000,000), it is truly the national sport. Its continued development will be limited only by the accommodations provided for spectators.

Mr. Ned Irish, through his use of Madison Square Garden the last two years, has created a national impetus which no other factor has equaled. There is no doubt that schools and colleges henceforth will provide seating facilities for crowds of 10,000 to 20,000 when planning gymnasium construction. The game is definitely "big time" and never will return to an intramural status. Further assurance of its big time caliber is its recognition as an Olympic sport.

The greatest weakness of basketball in the East of the country is the lack of a coaches' association. Virtually every other section has an organization of that nature to serve as a forum for discussion of rules, interpretations and changes.

I am absolutely opposed to elimination of the center jump, the out-of-bounds play after a successful free throw, the three-second rule as applied to the free-throw circle, elevation of the baskets and any change involving a sacrifice of individual technique for a mad, "fire department" foot race, or additional advantage to the zone-defense type of play.

At the basketball coaches' convention held in Chicago last year, Dr. James Nalambh, inventor of the game, made a strong appeal for retention of the center jump. Its abolition, he pointed out—and I heartily agree with him—would discriminate against the tall, gangling boy. He is in the minority, anyway, and should not be legislated out of—virtually the only team sport for which his "extra" height qualifies him.

Cutting out the center jump would, furthermore, put too much strain on the players by depriving them of the short rest between the scoring of a goal and the return of the ball to the center circle. Basketball is one of the most strenuous of all mass games. To force schoolboys to travel at top speed for 40 minutes without a breathing spell would make it too exhausting.

The three-second rule was introduced to prevent the tugging and pushing that accompanies the "back-up" type of pivot play. As applied, however, it not only has eliminated one of the most colorful features of the game but has barred about 20 per cent of the front court from offensive use.

Coach "Proz" Allen of the University of Kansas wants the baskets raised to a height of 12 feet. I can see no reason whatever for this change.

Without doubt, the blocking question caused more inter-sectional controversy than all other disputed points. No two persons seem to be entirely in agreement concerning the interpretation that should be placed on the rules.

Basketball has proved its merit. Let's forget rules changes.

Hockey's Lure Matter of Game's Uncertainty

By Stewart Iglehart
The tip-off on my personal preference in the sports that have amused and amused me since my early years is, I think, best shown by the pictures on the walls of my office. The room is fairly compact, the walls large enough for a dozen photos. There is one polo picture, a group shot of the Templeton side that won the Open and Monte Waterbury cups in 1934.

All of the others are hockey pictures, mementos of my biggest sports thrills—the Boston Olympics' world championship victory at Prague in 1933.

When a polo match is over rarely is there any lasting fatigue. This hockey player, who, after his two-minute stretch, comes off the ice with any breath left just isn't doing his job.

The skill elements in both games are somewhat similar in that practice—and constant practice is the main item. For most hockey players that means scrimmaging, skating through the defense for a shot at a guarded net. There's exhilaration in that. Only occasionally does a player, like Eddie O'Keefe of the Rangers, work consistently at the penalty shot or any other single specialty. The point, from no-goals to ten-goals, spends hours hitting from the wooden dummy-horse, or rides alone, making each shot deliberately and schooling a pony, to his style of play—if he wishes to improve.

Then when he's all set, the point takes the field to find that speed rules. The horse is boss. Various estimates have been placed on the mount's importance in the game. Some scientific followers of the sport have even graphed every pony's step, every man's stroke in an international match to determine it.

Polo Is Faithful in Following Form

However, such a method is neither possible nor necessary. Polo follows form nearly as faithfully as its seasons follow the sun. Hockey doesn't though and because of its many ups and downs gains another virtue to lure the player and the people who pack the Garden.

Even though it has the element of speed, polo can never achieve nationwide appeal. It's too definitely a rich man's game, although I believe in the future it will increase with such impetus as Pete Kostwick has injected into it.

Floyd Gibbons ADVENTURERS' CLUB Hello, Everybody!

"Twelve Stories Up"
By FLOYD GIBBONS
Famous Headline Hunter.

GOING up! Take the next car, please! It's an indoor aviator who's come to tell us his tale of woe today—Distinguished Adventurer Edward T. McCrann, one of the best doggone elevator pilots that ever answered a buzzer.

Ed jumps around almost as fast as that elevator he used to drive. When I first heard from him he was living in New Haven, Conn. Two weeks later, when I had occasion to communicate with him he had moved to Washington, D. C.

It's five years since Ed has run an elevator, and he still remembers it as one of the most monotonous jobs he ever had. It was just the same old trip, from morning to night. The same old buzzer ringing and the same people getting on and off in the same old building in Hartford. Only once did anything out of the ordinary occur—but Ed admits that that occurrence relieved the job of all of its monotony for a few minutes.

It happened about 7 o'clock on a June evening in 1929. Nearly all the tenants were out of the building. The superintendent came up from the basement and started looking over the elevator. He said there might be something wrong with it because he had heard a rasping sound in the shaft that shouldn't have been there.

Elevator Man Goes Up on Top of His Car.

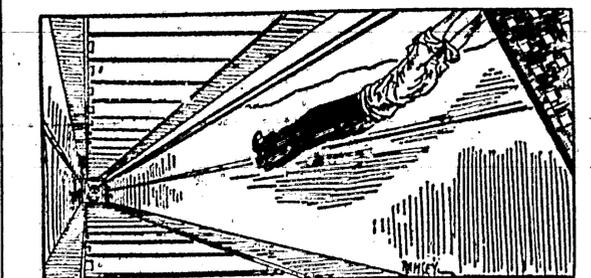

One look at the top told the story. Some workmen had been doing a job on the inside of the shaft. They had strung a wire to furnish them with light, and had left it behind when they finished. That wire tangled with the main cable, way up at the top, just where the cable came out of the heavy grate that supported the motor. The super asked Ed if he'd ride up on the top of the elevator to the top of the shaft and unfasten that maverick wire.

Ed was just a high school kid then. He was lean and active, and the job didn't look any great shakes to him. He consented readily. After all, it was something to break the monotony of that everlasting up and down trip. The super got into the car and dropped it down below the door level. Ed climbed on top, and up they went to the top of the shaft, just above the twelfth story.

The super ran the car slowly as they neared the top. When it got close enough so that Ed could reach the dangling wire he yelled, and the super stopped the car. The car halted just even with the twelfth floor. Ed reached up and began untangling the wire.

The superintendent opened the car door and stepped out onto the twelfth floor. "Hey, Ed," he called, "I'm going down the hall for a screw driver. I'll be right back."

Ed yelled, "All right," and went on with his work. The wire was fastened a little higher than he'd thought. He grabbed the grating under the motor and lifted himself up. His toes were barely touching the top of the car and he was straining his free arm to reach the end of the wire when he heard someone enter the elevator

He Clung Perilously by His Fingers to the Grating.

below him. Thinking it was the superintendent he paid no attention. He made another lunge toward the wire—caught it.

Elevator Descends; Ed Is Left Dangling at Top of Shaft.

And then, to his consternation, the motor began to whine and the car dropped away from under him, leaving Ed in a panic, clinging to the iron grating with both hands.

By the time Ed's presence of mind came back to him the elevator was halfway down the shaft. He started to yell, but he was so close to the motor that he couldn't be heard above its noise. The elevator went clear to the bottom and stopped. The door clanged open and someone walked out. Then everything was quiet except for Ed's cries. What had happened? Could it be possible that the superintendent had forgotten all about him? Ed yelled again. The sound echoed hollowly in the long shaft. Then silence—the dead, eerie silence of an empty building. And Ed hanging by his fingers 12 stories above the ground. "The seconds," he says, "seemed like years. Try as I might I couldn't get my mind to working. It was racing like mad trying to figure a way out, but it never found one. There just wasn't any."

"The grating was greasy and I could feel my fingers slipping—slipping. Suddenly I heard steps in the hall and yelled again. It was the superintendent coming back with the tools. He must have guessed what had happened when he heard me and saw the elevator door was closed. He yelled something to me but I was so scared I couldn't make out what he was saying. My fingers slipped a little more. Then I heard him racing down the stairs."

Superintendent and Elevator to the Rescue!

Again Ed's fingers slipped. He tried to hang on with one hand while he got a fresh hold with the other—and almost lost his grip altogether. It seemed like years—seemed as though he was holding on by nothing but his fingers, when finally he heard the elevator start upward and knew that if he could hang on just a moment longer he'd be safe.

"There were tears in my eyes," he says, "as that car came shooting up toward me. My body was covered with sweat, and I can't say if it was cold sweat or hot. My hands slipped again as the car came on. 'I didn't have the courage to look down—didn't know how close the elevator was—when at last, my clawing fingers lost their hold on the grate. I shut my eyes as I started falling. A prayer ran through my mind and—'

And then Ed came to a stop with a thud—safe on the top of the car, about six feet from where he had started.

When Ed got off the top of that elevator cab he was limp as a rag. It wasn't until next day that he found a solution to the mystery of the moving elevator. A doctor on the twelfth floor came out in a hurry and, seeing the cab without an operator, ran it down himself.

He had heard Ed yell, he said, but paid no attention to it. "And if you could feel one-hundredth of the horror I felt as I hung in that slick shaft," says Ed, "you'd realize why I shiver just a little bit, even now, when somebody mentions that doctor's name."

—WNU Service.

<p>Success It is said that a man can successfully lie with his eyes, but not with his mouth. The face is such an index of character that the very growth of the latter can be traced upon the former, and most of the successive lines that carve the furrowed face of age out of the smooth outlines of childhood are engraved directly or indirectly by mind. There is no beautifier of the face like a beautiful spirit. The want of mind lowers all the powers of the body, but so does an evil and debased mind which is still more wonderful.</p> <p>—Blair Brown.</p>	<p>Find Castaway A Robinson Crusoe was discovered by the crew of the French windjammer "Tolosa," on Itina Island, 400 miles north of the Strait of Magellan, South America. He was clothed in goat skins and uttered guttural cries, though he led them to a natural spring when they indicated they wanted water. The man appeared to be of Nordic stock, either Scandinavian or German, or possibly British. He is considered to be a shipwrecked sailor who has lost the power of speech, probably through never having spoken to a soul for many years.</p>

Early Morning in the White Mountains

Those who are fortunate enough to spend even a small amount of time in the nearby mountains, relate some pleasant stories of the beauties which the early-riser beholds and what those who linger in their beds until the sun has risen deprive themselves of.

Those who are contemplating a vacation in the White Mountains, who wish to absorb all of the beauty which those regions have in store for the vacationist, we are offering the advice to make a practice of early rising. The reward of getting up early in the chill of the mountain atmosphere consists of viewing the pallid dawn grow lovely at the rising of Old Sol. They may behold queer sights and hear queer sounds that herald the approach of another day.

At this particular time of the year in the early morning hours you may inhale sweet draughts from cedars, pines and other trees, as the clear, crisp air brings them to the nostrils.

The air is burdened with natural perfume from the foliage which is just dressing itself for the summer season. As the sun shoots its golden rays into the mountain forest, they become blended with tints of amethyst, violet and scarlet scenes, ever shifting in colors until finally giving back to the sun his same look of red fire.

Remember that you will be losing a view of Dame Nature's mountain loveliness, if you miss the sublime sight of that scenery turning the blue to gold.

Sixty-five WPA workers on the new highway two miles north of here went on strike Monday morning on account of an alleged tyrannical foreman with the Hayden Burns construction company of Las Cruces. They claimed that he worked them all day Saturday not allowing them time to eat their lunches. They came into town and made a big demonstration at the courthouse. Sheriff McCament quieted the men and assured them that he would get the contractor here from Tularosa and settle the matter. Before noon, he arrived, placed a new foreman on the job and peace again reigned.

White Sands Play Day

has been announced for Saturday, May 2, by the Alamogordo Chamber of Commerce. Last year there were 3,400 people attended; this year a record crowd is expected. This year's program will include entertainment for older people as well as the children. It will start at 2 p. m. and be a play day with a fat man's race, and a greased pole and such events. Basket lunch will be held at 6

CHEVROLET

DRIVE IT!

and drive home to yourself this truth:
It's **FIRST** in its field because it's
the only complete low-priced car

NEW PERFECTED HYDRAULIC BRAKES
(Double-Acting, Self-Articulating)
the safest and smoothest ever developed

GENUINE FISHER NO DRAFT VENTILATION
IN NEW TURRET TOP BODIES
the most beautiful and comfortable bodies ever created for a low-priced car

HIGH-COMPRESSION VALVE-IN-HEAD ENGINE
giving even better performance with even less gas and oil

GENERAL MOTORS INSTALLMENT PLAN—MONTHLY PAYMENTS TO SUIT YOUR PURSE

Scores of thousands of people in all parts of the country have found that seeing is believing and driving is knowing that the new 1936 Chevrolet is the only complete low-priced car!

To take the wheel of this beautiful car—to test its many exclusive quality features—is to obtain conclusive proof of the following facts:

Its New Perfected Hydraulic Brakes and Solid Steel Turret Top Body make it the safest car in its price range, and, in fact, the safest car that money can buy.

Its Improved Gliding Knee-Action Ride*, Genuine Fisher No Draft Ventilation and Shockproof Steering* give unmatched comfort.

And its High-Compression Valve-in-Head Engine—the same type of engine that is employed in world-champion power boats, airplanes and racing cars—provides combined power and economy without equal.

Drive the new Chevrolet for 1936 and drive home to yourself these truths. We'll be glad to have you do this, without the slightest obligation, any time you wish. Make it today!

Who Pays The Job-Holders?
By **RAYMOND PITCAIRN**
National Chairman
Sentinels of the Republic

If a business man or a farmer hires a worker he likes to feel that the new hand is capable of the job. He realizes that no worth-while enterprise can be well conducted unless it is competently manned.

But in the important business of manning his government, the average citizen shows less concern. That, at any rate, is indicated by recently published figures which reveal that of the many thousand persons added to the Federal payroll since 1933, fewer than one out of 100 were appointed under the Civil Service or "merit" system. It wasn't always that way. Here's how figures present the picture of the past twenty years:

During the Wilson Administration 67.3 per cent of employees in the Executive Department of the Federal Government were under the merit system. By the Coolidge Administration the proportion had risen to 74.3 per cent and four years later to 80.5 per cent. Then came the swift inflation of the public payroll during the past three years, and with it a retreat from Civil Service rules.

Today less than 58 per cent of job-holders in the Executive Department of our Federal government remain under the merit system, and in some instances new appointees replace experienced workers who won their places under Civil Service methods.

Probably these figures explain why so many groups and individuals, who realize what inflated payrolls cost the workers and earners of America, are protesting against the spoils system in the appointment of Federal job-holders.

They explain why those taxpayers demand a return to the merit system, under which a man is appointed because he demonstrates that he can do the work rather than because he can show that he knows the right politicians.

Public Office still remains a Public Trust. The citizens who pay his salary have a right to assume that their trustee, no matter what his office, demonstrates his ability to do the job. Under the merit system they have that assurance. Under the spoils system they lack it.

Which method would the successful merchant or farmer follow if he wanted his affairs efficiently conducted? The answer is obvious. Taxpayers should demand the same evidence of competence in the men and women appointed to government jobs.

Remember, no matter who benefits by putting them on the public payroll, we, the people, foot the bill.

THE PRESIDENT'S WEEK—the victors he saw, and why—what he said and did.

STATE OF THE UNION—a 5-minute swing around the country with the national news.

THE POLITICAL WEEK—up-to-the-minute reports of all that the political leaders are doing and planning.

WHAT THE PRESS OF THE NATION THINKS—offers a quick, interesting survey of public opinion, including percentage of press for and against on leading issues.

THE TREND OF AMERICAN BUSINESS—a remarkably complete statement of business in one page.

VOICE OF THE NEW DEAL—signed articles by administration spokesmen.

DAVID LAWRENCE criticizes government.

WASHINGTON WHISPERS and **TONGUE TALK**—A LOOK AHEAD tells you what is going on back of the scenes to influence what will happen in the future.

To Help You Keep Abreast of the Times

So much is happening every day in the world of government that affects your living, income and buying power.

What is Congress doing? For what is money to be spent? How will they raise it? Who is to administer the spending? What does this business improvement mean? Will it continue? Why is there another side to so many questions?

All this makes you ask yourself—"How can I keep abreast of the times, understand what events mean, discuss national affairs intelligently?"

The United States News

Every week you find in The United States News a complete, accurate report of national affairs from Washington. No is grouped-together-in-departments-for-convenience. Simplified for quick reading. Connected for clearness and perspective. Authoritative, concise, useable.

Here you find why it happened, what it means and what is likely to happen next. The United States News is truly the news magazine of national affairs.

Subscribe today! Congress is in session. A presidential campaign is warming up. Party platforms are to be written. More vital questions of national policy will be discussed this year than ever before. Be posted. Know the facts. Make your own decisions. Back them up with a clear understanding of what is going on.

All Around the House

When serving lettuce be sure that no water is on the leaves when french dressing is added.

Don't keep gas stove burners turned on full after foods begin to boil.

Soap improves with keeping, so when the stores offer sales of soap, it is economy to buy a quantity of it if you are able to store it in a cool, dry place.

Cold roast beef toughens if cooked for any length of time in hot gravy. It is better to heat gravy and pour over the meat when ready to serve.

When papering a room cut off the left-hand selvage on rolls before you begin to paste. Leave right-hand selvage uncut. The overlapping method of papering is far easier than trying to place two edges together.

Do not add dressing to a salad until just before salad is to be served. If salad greens are allowed to stand in dressing for any length of time, they will wilt.

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.

Family Yardsticks

A man compares his possessions with what he used to have; his wife compares them with what the neighbors have.

Stop PAINFUL PRESSURE!

Apply New De Luxe Dr. Scholl's Zino-pads on any sensitive spots on your toes and feet, on corns, calluses or bunions.

ASHAMED OF PIMPLY SKIN

Burned and Itched Until Cuticura Relieved!

Victims of external skin outbreaks use Cuticura for blessed, quick relief. Read this sincere tribute:

"I was ashamed to show myself anywhere with the ugly pimples I had. They were caused by some skin face condition and were very large and red, and also hard. The itching and burning made me scratch so that they bled."

"I sent for a free sample of Cuticura Soap and Ointment. A few pimples disappeared and I bought some of the Soap and Ointment. It only took Cuticura a month to relieve me fully." Miss H. Zebrowski, 18 Alder St., Bristol, Conn.

Buy Cuticura today—and keep it always near you. Use for washes, ringworms, itching and burning of eczema and other externally caused skin irritations. Soap 25c. Ointment 20c. Samples FREE. Write to "Cuticura," Dept. 17, Malden, Mass.—Adv.

No Need to Suffer "Morning Sickness"

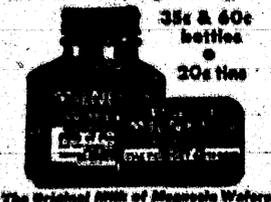

"Morning sickness"—is caused by an acid condition. To avoid it, acid must be offset by alkalis—such as Milnesia.

Why Physicians Recommend Milnesia Wafers

These mint-flavored, candy-like wafers are pure milk of magnesia in solid form—the most pleasant way to take it. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia.

Milnesia Wafers come in bottles of 20 and 45, at 35c and 60c respectively, and in convenient tin for your handbag containing 12 at 20c. Each wafer is approximately one adult dose of milk of magnesia. All good drug stores sell and recommend them.

Start using these delicious, effective anti-acid, gently laxative wafers today. Professional samples sent free to registered physicians on demand. Write for more information to: Milnesia Sales Products, Inc., 4428 23rd St., Long Island City, N. Y.

The Original Milk of Magnesia Wafers

CAUGHT in the WILD

By ROBERT AMES BENNET

SYNOPSIS

As Alan Garth, prospector, is preparing to leave for his mining claim in the Far North, a plane lands at the airways emergency station. In it are Burton Ramill, millionaire mining magnate; his daughter, Lillith, and Vivian Huxby, pilot and mining engineer. Believing him to be only an ignorant prospector, the man offers to make an air trip to Garth's claim, although they refer to his samples of platinum-bearing ore as nearly worthless.

CHAPTER VI—Continued

"You'll have two more days for it," Garth told him. "Only don't forget that an alloy of platinum and gold weighs more than lead. You'll be taking my 60 per cent, along with the 40 for yourself and Mr. Ramill. If you hide the loot in your pockets, you'll go down like a shot, first time you slip into a muskeg pool or quagmire. Think of the all-around calamity that would mean. You'd lose your life, Mr. Ramill would lose his. Miss Lillith her fiancé, and I—I'd lose my 60 per cent."

Mr. Ramill interposed: "It's no joke, Vivian. I've seen a strong swimmer sunk by the gold in his money-belt. A bag can be thrown off the shoulders. Another thing, Garth is to receive his three-fifths of whatever you have panned out. That is understood."

"It was his bargain," Huxby replied. "He went to gorge on the leg of caribou that Garth had roasted over the fire on a twist-thong of rawhide. When he could eat no more, he hastened back to the placer trough to resume his panning."

The others had already feasted upon the tender venison, that was self-heated in its delicious fat. Lillith and her father had helped Garth pack it, with more meat and the skins, down the long slope from the glacier.

Before sundown, Garth set several rawhide snares, each attached to a pair of downy saplings. For bait, he used raw pieces of caribou flesh. The beasts of the valley had never been trapped. When, at sunrise, he went the rounds of his snares, he collected a lynx, two red foxes, a weaver, and a wolf.

Garth did not reset the snares. He had more skins than he needed. From the wolf-hide he made a knapsack for Huxby. The fox skins furnished smaller bags for Mr. Ramill and Lillith.

At the second sunrise, Garth bundled the lynx and weaver skins and a quantity of caribou with the caribou skins.

Huxby eyed the bundle ironically. "Mr. Ramill told me about your caribou parka talk. I take it, you aim to go back and live among the Eskimos."

"I might do worse," Garth replied. "Here's your wolf parka. Load our metal, and stow up from the placer. We'll meet you at the glacier."

At Mr. Ramill's nod, the engineer took the knapsack and started off. Garth put the small aluminum pot and the tin cup in the millionaire's bag. He drew his blanket from the leanto to strap it on his pack-board with the bundle of skins.

Lillith Ramill crept into the leanto for the last time. She came out with the pouches of salt and tea. Neither had been opened since Garth put them in her care, after the wasteful setting up of all the gear.

Her worn boots lay at the foot of the leanto. She had on her moose-hide moccasins and lynx-skin leggings. As she backed from under the low roof she picked up the boots and eyed them with amused contempt. They had been at only for show, not for use. But when she swung them down, Garth added them to his pack, along with the last small pieces of the moose hide.

"We might sew on rawhide soles," he said. "Now—all set. How about you, mate? Ready to hit the trail?"

The girl showed the whisky flask that he had left in her father's care. It was full of a deep-spruce pitch mixed with caribou tallow. She put the flask into her tuck-in bag, along with the pouches of tea and salt. Mr. Ramill was already walking off.

Garth had made a tump-line for his pack. As he fitted the band across his forehead and stood up, rifle in hand, he glanced over his shoulder at the girl.

She turned and met his glance. Her lips curled in their old scornful smile. "What are you waiting for? Aren't we ever to get out of this beastly valley?"

He started off without any reply but with a glow of exultance under his outward show of indifference. Lillith Ramill thought she was about to escape from the Wild.

He had promised to guide them all to the Mackenzie. The probabilities were now in favor of even her father making it. The girl would go back to what she called civilization—to luxury and self-indulgence, to jazz and night-clubs—the rapid pursuit of sensation.

Yet a part of her would linger behind in this lost valley of the desolate subarctic Rockies. She had eaten of wild meat; she had smelled the tang of smoke from man's first friend, the camp fire. She had come face to face with the Primitive—and had lived it.

The real woman of her had awakened—had thrust aside the superficial self whose world was made up of artificiality and dissipation. She had been compelled to face the raw realities of life. And there were weeks more of it to come.

Fortunately, she had already been hard. Now she was fit. Under the smear of mosquito dope, the lines had smoothed from her face. The drawn look had disappeared. Instead of the scarlet of rouge, her lips were cherry red with healthy natural color. She had gained weight. Her body now looked lean rather than emaciated.

As Garth overtook the girl's father, he eyed him with a smaller yet no less genuine satisfaction. For every pound gained by the daughter, the father had been rid of three or more. Though still far from hard, the millionaire had worked and sweat into vastly better condition than at the start of his training.

Huxby did not come into sight, out of the placer trough, until the others were well up the tundra slope. Halfway to the glacier. That gave Garth an excuse to tell Lillith to ease her father along while Huxby was closing up with them.

Garth himself swung briskly ahead. So far, nothing had been said to Huxby about the cache cave in the ice tunnel of the glacier stream. He knew only that the caribou carcasses had been put on ice.

The one thing of which Garth felt most certain regarding the engineer was that he would never give over trying to get the platinum placer until every possible scheme had been bailed. Mr. Ramill might quit. He already possessed a fortune.

But Huxby was still a relatively poor man, and he had now made certain that the placer was worth at least a million dollars. Behind his polished front, he was no less scrupulous than his millionaire partner, and he was absolutely cold-blooded.

Among the cards that the future was to deal in the game, the ice cave might prove to be anything from a two-spot to an ace. If the play should shift back to the valley, a cache full of meat would most benefit the player who knew about it. No less so, the caribou skins. In any event, it would do no harm and might prove of advantage to leave Huxby in doubt regarding the location of the cache.

Lillith made the last climb to Garth without effort. But Huxby plodded up almost as winded as Mr. Ramill. He lowered from his shoulders the small but heavy load in his wolfskin knapsack. The chunks of frozen caribou meat beside the bulky blanket-wrapped bundle on Garth's packboard drew his displeased attention.

"You can't expect me to carry any of that venison. I'm no pack jack of the woods. Forty pounds is quite enough to suit me."

Garth hefted the wolfskin sack. "My guess is forty-five. Figuring roughly, that makes forty-one troy pounds, or four, ninety-two troy ounces. Call it five hundred even. Platinum is around sixty dollars an ounce troy. The value of the alloy will average at least thirty. That gives us a total of say, fifteen thousand dollars. Not so bad for a few days' panning."

Huxby's face showed that this was no news to him. For all his cool self-control, his fingers clutched tight hold of the wolfskin as he drew it out of Garth's careless grasp.

Ever since coming into the valley he had spent the greater part of every long day scratching spots all over the great placer claim and panning samples of the gravel. Fifteen thousand dollars was no fortune. But if a few score panfuls of green-ore dirt could yield that amount, there could be no doubt of the vast treasure beneath. Even if bedrock lay at a shallow depth, the platinum placer was worth at least a million dollars.

Though Garth smiled at the engineer's betrayal of cupidity, he took note of it as an additional warning. He had said that Huxby was a commonplace wolf. But any wolf is apt to be deadly when ravenous.

Garth's sideward glance caught an amused twinkle in Mr. Ramill's shrewd eyes. The hard training had put the millionaire in better health than he probably had enjoyed for many years. Also, his mind was bigger and better poised than that of his prospective son-in-law. He could smile with Garth over Huxby's obsession—smile and put aside all thought of the placer until in a position to take it from its discoverer.

Lillith saw the situation from a still different angle. She opened the wolfskin sack to peer inside. At sight of the nodules, she dropped the flap, with a look of disgust. Mere value meant nothing to her. The alloy looked dull and uninteresting.

"Worth only fifteen thousand dollars," she bantered her fiancé. "You've dug dirt all this time for a trifle like that, and lugged it all the way up here. Don't tell me you're so dumb that you plan to pack it for the weeks Alan says we'll need to get back to the Mackenzie. Forty-five pounds of that stuff—how silly! From what Alan told us, we may have all we can do to carry ourselves on this cross-country hike."

"With my blanket and the meat that's in it, I'm starting off with something like two hundred pounds," Garth said. "Game was scarce on the other side of the pass when I went out the other time. The weight of our metal in meat may be worth more than the fifteen thousand dollars. Let Huxby choose which he prefers to pack."

The engineer compromised by shoving one of the twenty-pound chunks of caribou meat into the sack, on top of the metal. This left a second chunk of equal weight. Lillith bent over to put it in her own sack.

"Lay off," said Garth. "It is his choice. Besides, frozen meat soon spoils when it thaws. Fall into Indian file. Here goes."

He backed up to his boulder-perched pack, slipped the tump-line over his forehead, and started up the great cleft as if his 200-pound pack weighed no more than Huxby's 60 pounds of meat and metal.

He halted only when the other men were compelled to stop for breath. Huxby, though carrying a load only a third the weight of Garth's, had soon begun to strain and puff as hard as Mr. Ramill. He was larger than Garth and seemingly stronger-muscled. But he lacked Garth's wind and endurance and the knack of back-packing. At every halt he sank down on the ice or a moraine stone, panting.

Garth merely eased his back-breaking pack upon a boulder, slipped the tump-line from his forehead, and waited for the other men to recover. Lillith Ramill's pack was too light to hamper her. She climbed with the agility of a goat.

In places the pitch of the glacier became too steep for ordinary climbing. Garth had to draw his belt-ax and chop foot holds. The last of these steep rises was far up towards the head of the pass.

The remaining distance to the summit was not so steep, and there were no dangerous crevasses. Garth made the climb at a swinging pace. He was halfway down before he met Huxby plodding slowly upwards with Mr. Ramill. The engineer looked at him with cold-eyed rancor.

Mr. Ramill panted a wistful question: "Wh-wh—do we eat?" "At the top. Take your time."

Lillith had chosen to wait for Garth down where he had left them all. His pack lay on the snow below the boulder upon which he had set it. She pointed her slender finger at the fallen bundle.

"I tried to find out if you were lying about the weight. I couldn't area lift one end. But you see how the top of the stone slopes. The beastly tump-line slid off."

"That's all right, Miss Ramill. Easy enough to up-end it again."

"Easy!" Her blue eyes glowed with an odd light. "You carried Dad back to camp that day. But it was downhill. Now—to pack this frightful load all the way up here! Alan Garth, you're a man!"

"Well, it's a bit of a stiff pull-up," he admitted. "But we'll soon make the down-slope. I left the knife on the knapsack. Go up and slice that caribou meat."

The girl whom her own father could not command met the order with a cheerful nod. She started briskly off up the gap. Garth's steady climbing brought him to the top of the pass a few paces behind Huxby and Mr. Ramill. Lillith was sprinkling salt on slices of the raw meat.

The pass was barren even of caribou moss. The meat had to be eaten cold or uncooked, or not at all. Six hours had passed since the party left the camp in the valley bottom. After the long, hard climb, even the girl was hungry enough to have eaten rawhide. The caribou meat was tender, and the first taste of salt since the party had come to the valley turned the meal into a feast.

Less than half of the 20-pound chunk of caribou remained by the time even Mr. Ramill found he could eat no more.

"All were so refreshed by the food and rest that no one objected when Garth gave the word to start on. There would be no more slogging up-hill, with lungs bellowing for air. One would only have to hold back."

But that was the rub—the holding back. The south side of the pass was far steeper than the north, and there was no glacier to offer stretches of smooth footing. The bed of the shallowly tilted cleft frequently dropped over small cliffs. Between these high ledges were slides of frost-shattered rocks. Patches of ice here and there made the footing doubly treacherous.

In places Garth had to drop his pack down before him. Not infrequently, even Lillith had to be given a hand down slippery chutes, or caught in Garth's upraised arms when Huxby lowered her off the edge of a sharp drop. Still oftener, her father had to be helped by both Garth and Huxby.

(TO BE CONTINUED)

Shovel-Tusked Elephants Used Big Jaws as Dredge

Nature never made any real mechanical steamshovels except indirectly through her agent, man, but 20,000,000 years ago, before the Gobi desert had reached its present barrenness and before man had put in his appearance on earth, she had a creation far more remarkable. It was an animated dredge—a great elephant whose tusks had taken the form of shovels extending from a scoop-like lower jaw. These mastodons dredged the muddy bottoms of prehistoric swamps for water lilies and other swamp growths which formed their food. It has been several years since their fossils were first discovered in the Gobi desert, but interest has reverted to them through the discovery and identification of plant fossils which prove that swamps existed in the Gobi during their time—a fact previously doubted and which doubt raised a question as to these animals' food and the purpose of their shovel tusks. This doubt, however, is now cleared. Other discoveries have shown that these long-extinct elephants also lived in America, Nebraska, and Kansas.—Pathfinder Magazine.

Spiders and Stars

Spiders' webs have many uses. Without them astronomers would find it harder to make accurate observations. The eye pieces of their telescopes are marked into sections by very fine lines, which are really pieces of web held in place by spots of varnish. Webs are used because it is impossible to have finer as well as equally distinct lines by any other method. There are other uses, too, for webs. An instrument maker in York employs a man specially to collect spiders and webs. Only a special kind of spider is caught, the "peperia drademata," which is usually found on goose bushes and has a cross on its back. The spiders are made to wind their webs on special forks, each insect winding about 40 feet before the supply gives out. These webs are used in the manufacture of the most delicate types of scientific instruments.—Tit-Bits Magazine.

Animal Prophecy

A pit-horse at Markham colliery proved wiser than the man who drove it says Tit-Bits Magazine. Suddenly, for no apparent reason, the horse, which had worked underground for seven years, bolted and refused to return. When its driver returned alone, the roof fell on him almost immediately. Animals often sense danger and the authorities in England know, for instance, that pit-horses are aware of danger long before the miners. Not long ago, a New Forest dog pulled its master from under the radius of an old oak, which crashed a few seconds after he reached safety. In Burma, where elephants carry logs, one of these beasts refused to cross a certain bridge with its load. Eventually the logs were loaded on carts and dragged by bullocks, but the bridge collapsed when they were halfway across.

"Pride of the Garden," Lovely Applique Quilt

Pattern 1118

'Twill be the "Pride of the Garden," and also the pride of whatever bedroom it adorns—this lovely applique quilt. Quilt-makers, young and old, will find it fun to do, making the tulip flowers as varied as the scraps on hand, but keeping leaves and stems uniform. A very inexpensive quilt to make, it's one you can afford to give a bride-to-be. The tulips can also be used on scarfs and pillows to make your bedroom linens match.

Pattern 1118 comes to you with complete, simple instructions for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

Send 15 cents in coins or stamps (coins preferred) to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Prehistoric Bones Found

in Southern California Bits of bone have furnished scientists with evidence that man may have roamed southern California in the glacial epoch—nearly 25,000 years ago. Prehistoric remains of an imperial elephant, largest of all land mammals, and what appeared to be a human being were unearthed by WPA workers, digging 12 feet below the surface of the Slaugon avenue drain, Los Angeles. In a closely assembled group were fragments of tusks, two teeth, and parts of a large vertebra. Near by were smaller bones, including a skull.

Rid Yourself of Kidney Poisons

Do you suffer burning, stinging or too frequent urination; backache, headache, dizziness, loss of energy, leg pains, swelling and puffiness under the eyes? Are you tired, nervous, feel oil burning and don't know what is wrong?

Then give some thought to your kidneys. Be sure they function properly for functional kidney disease particles excess waste to stay in the blood, and to poison and upset the whole system.

Use Doan's Pills. Doan's acts for the kidneys only. They are recommended the world over. You can get the genuine, time-tested Doan's at any drug store.

DOAN'S PILLS

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

By REV. P. J. WITZGATER, D. D., Member of Faculty, Moody Bible Institute of Chicago, Western Newspaper Union.

Lesson for April 26

JESUS LOOKS AT WEALTH AND POVERTY

LESSON TEXT—Luke 14:15-31. GOLDEN TEXT—The rich and poor meet together: the Lord is the maker of them all.—Proverbs 22:2.

PRIMARY TOPIC—Jesus' Story of a Beggar Man. JUNIOR TOPIC—Which Was the Rich Man? INTERMEDIATE AND SENIOR TOPIC—What Money Cannot Buy. YOUNG PEOPLE AND ADULT TOPIC—How Can We Make Our Social Order Christian?

The topic as given by the Lesson committee is hardly a fair statement. The supreme message is the presentation of contrasted lives and destinies as expressed through the accidents of wealth and poverty.

I. The Contrasted Lives (vv. 15-21). 1. The rich man (v. 19). He seems to have lived in a mansion secluded from the common people.

2. The beggar (vv. 20, 21). He was laid at the rich man's gate with the hope of getting at least the crumbs from his table.

II. Their Contrasted Deaths and Burials (v. 22). 1. The beggar. He was found dead and his body was hurried off to a pauper's grave.

2. The rich man. He also died. His gold could not bribe the messenger of death.

III. Their Contrasted Destinies (v. 23). 1. The beggar. He was at once carried by the angels into Abraham's bosom.

2. The rich man. Though he had an elaborate burial, he lifted up his eyes in hell being in torment.

IV. The Reality and Fixeness of Life Beyond the Grave (vv. 24-31). 1. The cry for mercy (v. 24). Dives, which is the Latin name for "rich man," was now willing to claim relationship to Abraham.

2. God's Word is the all-sufficient light (vv. 27-31). Dives now requested that Lazarus go on an errand of mercy to his brethren.

3. Their fixedness. Human destinies are fixed during this life. When one passes out of this life he enters into a condition unchangeable.

4. Our Fate Values. We stamp our own value upon ourselves, and cannot expect to pass for more.—Marden.

Washington Digest

National Topics Interpreted by William Bruckart

Washington, D. C. National Press Building

Washington.—It has been several months since the administration farm relief program, the agricultural adjustment act, was declared dead, but like the words of the song, "the memory lingers on."

Memory Lingers On. The words of the song, "the memory lingers on." And it is quite apparent that mistakes—as well as memories of the AAA, will continue through the heat of the coming Presidential campaign.

One of the main reasons why the memories linger on, where those memories involve AAA, is Michigan's Republican Senator Arthur H. Vandenberg. Senator Vandenberg never did get enthusiastic about the merits of AAA as they were expounded by Secretary Wallace.

Secretary Wallace stalled off Senator Vandenberg's demand in the senate for a complete list of beneficiaries who received checks from AAA in excess of one thousand dollars for quite a while but there were too many senators who believed as Senator Vandenberg did, that the truth ought to be known.

Development of the vulnerable spots in the AAA crop curtailment program probably will prove beneficial to the country as a whole eventually.

Vulnerable Spots. Development of the vulnerable spots in the AAA crop curtailment program probably will prove beneficial to the country as a whole eventually.

Fletcher's Brain Trust. Henry P. Fletcher and his Republican national committee. Mr. Fletcher has hired ten university professors to head up what he calls the committee's research staff.

While we are talking about mistakes and about the results obtained by brilliant theorists, I hear more and more discussion of the latest move by Chairman Fletcher's Brain Trust.

Henry P. Fletcher and his Republican national committee. Mr. Fletcher has hired ten university professors to head up what he calls the committee's research staff.

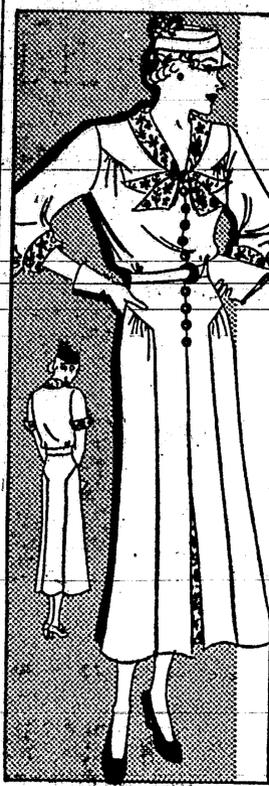

I have observed political battles for a good many years and I have observed the management of governmental responsibilities through a parallel period.

The list of huge benefit payments is much too large to include in this letter but the fact remains that it showed how even the best laid plans of mice and men oft go astray.

Hope. Every blade of grass, each leaf, each separate flower and petal, is an inscription speaking of Hope.

Our Fate Values. We stamp our own value upon ourselves, and cannot expect to pass for more.—Marden.

Printed Trimmings of Silk Used on Elegant Daytime Frocks of One Color

Pattern No. 1881-B

The smartest of the new dresses are those in a single color with flashes of printed silk to trim them. This design is one of the best, made of blue clove silk and trimmed with a print in red and blue on a white ground.

20, 40 and 42. Corresponding bust measurements 32, 34, 36, 38, 40 and 42. Size 16 (34) requires 4 1/2 yards of 59-inch fabric with 1/4 length sleeves.

The Barbara Bell Pattern Book featuring Spring designs is ready. Send fifteen cents today for your copy.

Send your order to The Sewing Circle Pattern Dept., 367 W. Adams St., Chicago, Ill.

Pittsburgh Students Test Intensity of Soiled Air

Two Pittsburgh students of soiled air set up an ingenious device that records the intensity of ultraviolet, or short wave, solar radiation, says New York Sun.

The confidence mother has always had in S.S.S. Tonic... which is still her stand-by when she feels run-down... convinced me I ought to try this Treatment.

NOT long ago I was like some friends I have... low in spirits... run-down... out of sorts... tired easily and looked terrible.

Disobedient Boy of 13 Hanged Self After Being Sent to Bed

Glenn Halberg, thirteen-year-old farm boy, of South Bend 194, believed to have become despondent over being sent to bed for his refusal to wash dishes, hanged himself.

What SHE TOLD WORN-OUT HUSBAND

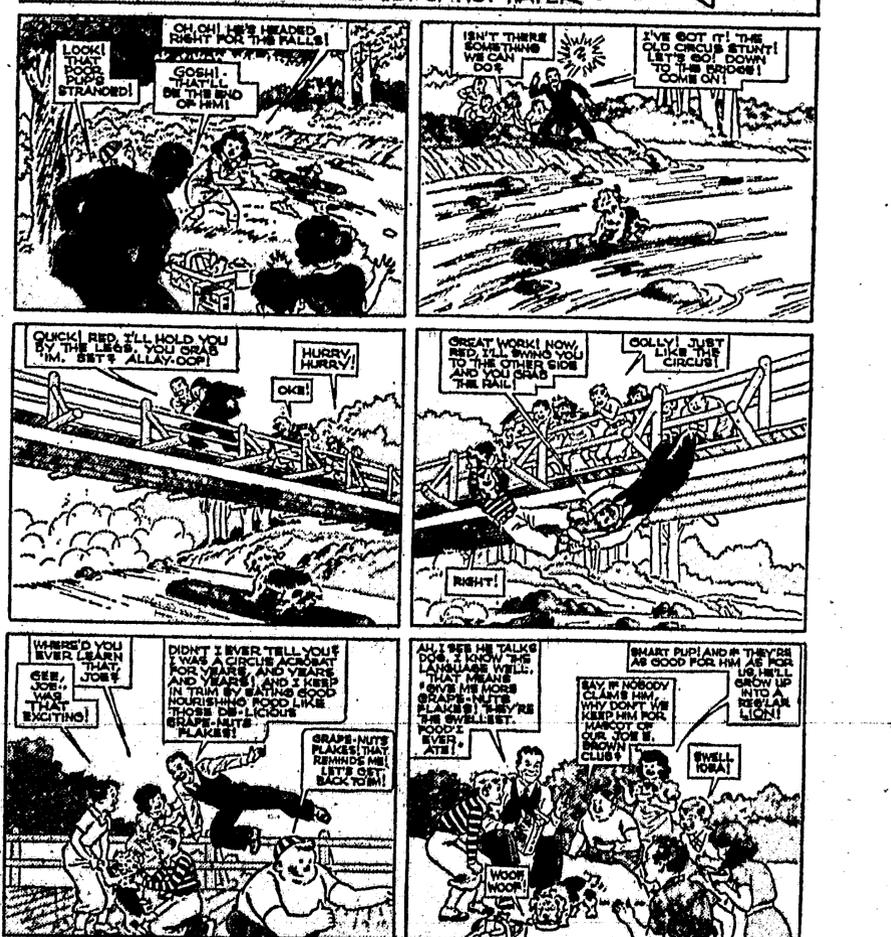

She could have reproached him for his softness... But wisely she saw in his frequent cough, his "ragged" out-on-edge condition the very trouble she herself had whipped.

Don't be Tormented by ITCHY, BURNING, SKIN relief follows the use of Resinol

This story will interest many Men and Women

NOT long ago I was like some friends I have... low in spirits... run-down... out of sorts... tired easily and looked terrible.

TOWN HAPPENINGS

WHO? WHEN? WHY?

Hijino Warner was here from Albuquerque last week, visiting relatives and friends.

Mr. and Mrs. Louis Nalda were visitors from their ranch across the Malpais last Sunday.

Mases Carmen Pino of Escondido and Rosa Padilla of Capitan attended the Easter Dance at the Community Hall Saturday night.

Emillio Duran of Tularosa was a Carrizozo business visitor last Saturday.

Lupe Gabaldon was here Monday from Claunch on some business matters.

A. B. Zumwalt made a trip to El Paso Saturday to see his brother Tommy, who is convalescing from a recent truck smash-up. Tommy is doing as well as could be expected.

The Zumwalt, Peters and Peebles families picnicked on the Bonito Sunday.

Dink Myers of White Oaks, who was brought to Carrizozo suffering from a severe attack of lumbago recently, is now able to be up and around.

The East Side Baseball Team has been limbering up this week and will play the opener game of the season here next Sunday, with the Mesquero Indians. The team will be composed of all of last year's Cobras and augmented by Marquez of Alamogordo and "Skooter" Peres, we understand.

The Carrizozo Team had a stiff workout Sunday and will soon be ready to manipulate the horsehide against all comers. Garrison will play first for the East-Siders Sunday.—Diamond Dust.

Mr. and Mrs. Montie Gardenhire have moved from Tularosa to Ruidoso.

Mrs. Tennis Smoot, who is teaching at Lincoln, filling out the unexpired term of Mr. Black, comes home every Friday evening and remains over until Sunday evening or Monday morning.

Lisha Leslie, Lord Mayor of White Oaks, is writing a book which as we understand it, will be replete with happenings of the olden times. We're for you, Lord Mayor, and will be anxiously awaiting the advent of the book.

This office is in receipt of a letter from Reuben Chavez, who is employed in a camp near Gallup. Reuben sends his regards to friends and asks us to send him the Outlook. Here goes, Reuben, kid; and lookout for temptations while away from home ties.

Mr. and Mrs. J. F. Petty were visitors at Alamogordo yesterday and on the return trip, they encountered a heavy rain in the basin between Temporal and Three Rivers.

The Boy Scouts netted the sum of \$15.00 from the picture, "Wings Over Ethiopia," at the Lyric Theatre Tuesday and Wednesday nights.

Among our new subscribers we are glad to welcome Prof. F. Eric Ming, superintendent of the Porter Public Schools at San Jon, N. M. Mr. Ming, as we understand, is to be the new superintendent of our schools for the fall and winter term and we extend to him, the hand of welcome in advance of his coming.

Several weeks ago, J. H. Kimmons of Oscura advertised a certain portion of land in this paper for sale. No sooner had the paper got into circulation, than Mr. Kimmons received several replies; he took the best prospective buyer and sold him the land. Warning is hereby issued to the public that it is extremely dangerous to advertise anything in The Outlook if you want to sell it. So be careful.

**Government by Law—
or by Edict?**

By RAYMOND PITCAIRN
National Chairman
Sentinels of the Republic

Dominant among the demands of men who fought the Revolution was the right to a voice in the making of laws under which they were governed.

By their victory our fathers won that right. Jealously they guarded it—in both Federal and State consultations. Under the system thus established, the enactment of law was reserved to men chosen by the people and responsive to their will. It is the traditional American system.

But there is another type of legislation—known as Administrative Law. It is a system of edicts and decrees, handed down by rulers to subject populations. In its enactment the people have no voice.

That's one reason why so many thoughtful citizens are protesting against the flood of edicts pouring out of the offices of various boards and bureaus at Washington today.

They realize that a whole new body of Administrative Law is being forced on the people, not by their elected representatives, but by appointed chiefs of bureaus and commissions, in whose selection the voters had no choice and over whose actions they exercise no control.

In recent years those citizens have observed a constantly increasing number of examples of extrajudicial arrests and seizures with individual grace and leniency with individual regard on the part of bureaucrats who assumed, or to whom Congress delegated, powers vested only in the people—their elected representatives.
