

LARGEST COUNTY CIRCULATION Near Pre-Historic Malpais and Gran Quivira

Carrizozo Outlook

THE HOME PAPER Oldest Paper in Lincoln County 8 PAGES

VOL. XXI - NO. 46 CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, MARCH 5, 1937 PRICE \$2.00 THE YEAR

A. L. B. Memory's Lane

In yesterday's mail, this office received a welcome letter from Tom Green, city editor of the Hawk-Eye Gazette of Burlington, Iowa. The writer knew Tom many years ago in the "horse and buggy days" of old Burlington. Those were the days before the advent of the electric...

Lyric Theatre

R. A. Walker, Owner Show starts at 7:30 p. m. Friday and Saturday "The Big Game" With Phillip Huston, James Gleason, June Travis, Bruce Cabot, Andy Devine. You'll see eight All-American Stars on One Football Team. A tremendous drama of the gridiron...

Sunday-Monday-Tuesday "Libeled Lady"

With Jean Harlow, Wm. Powell, Myrna Loy and Spencer Tracy. Four Stars in love, laughter and legal complications. Also "St. Helena and its Man of Destiny" and "Two Little Pups." Sunday matinee at 2:30. Night show at 8:00.

John Jacob Hoffman

On Monday, Mar. 1, John Jacob Hoffman, pioneer, 89 and one of our foremost citizens, passed away at his ranch home about three miles east of here. Mr. Hoffman had been ill but a short while, but as usual, he never complained, preferring to keep his ailments to himself rather than to cause others to worry about his condition.

ATTENTION, MASONS

All Master Masons are invited to the regular communication at Masonic Temple, tomorrow night Saturday, Mar. 6. Harry Gallacher, W. M. R. E. Lemon, Sec'y.

Card of Thanks

We wish to thank our dear friends for their many kind acts and deeds rendered during the sad hours of illness and death of our beloved husband and father, Mrs. J. J. Hoffman Henry Hoffman and family Arthur Hoffman and family

Milton Lesnett has been employed by Billy Norman at his place of business.

Joe and Frank Vega are now working on Carl Degner's mining properties in the White mountains.

Lell St. John has installed a big music box in his place of business, the U & I Cafe.

Mr. and Mrs. Jack Davidson and Frank Sultemeier, Jr., were business visitors from Corona yesterday, leaving for home late in the afternoon. They report a good snowfall in the Corona country.

Bingham News

Bingham's new school building which has been under construction for several months, is nearing completion, and we sometimes wonder if the youngsters of today, after all the fine improvements in educational facilities, are any better qualified to go out into the real battles of life than were the boys and girls of the old log house school days. Will they make any better mark in life? Will they make the world a better place in which to live? Will they make any better citizens than the old log school house youngsters did? We have had some mighty good pieces of humanity housed and educated in little log cabins with their split-log benches. That is a fact we should remember!

Mrs. M. Sullivan was the week-end guest of Mrs. Chester Ratts.

Tom and Delbert Hefner are ill with the flu.

The Agans and Pearsons were guests in the Wilson home last Thursday night. "42" was the diversion of the evening.

The Fishers and Tuckers were recent guests of Mr. and Mrs. Wayne Withers.

Mr. and Mrs. L. O. Moon were Sunday guests of the R. L. Houstons.

Mr. and Mrs. Gaines entertained their many friends with a dance Saturday night. Mrs. Harold Dean was pianist for the evening and everyone reported a fine time.

Sunday luncheon guests of Mr. and Mrs. D. F. Sawyer were the Agans, B. P. Kilgore and Wiley Edwards.

Mrs. D. F. Sawyer was a Carrizozo visitor last Friday. Saturday Carrizozo visitors were Messrs. Frank Wilson, D. F. Sawyer, Leroy Agan, A. J. Cate and Wiley Edwards.

BUSINESS MEN'S CLUB

With the usual good attendance, the Club met Wednesday at its regular business session and 6 o'clock dinner at the Southern Pacific Hotel. President F. A. English presided over the meeting.

After the business session in which Secretary R. E. Blaney read numerous letters from senators and representatives on road matters of importance to Carrizozo, the new manager of the hotel, Mr. W. H. Peterson, was introduced by station agent C. P. Huppertz. Mr. Peterson responded to the introduction and made a short talk in which he stated that he had come to make Carrizozo his permanent residence and assured the club that he would do all in his power to assist in every community effort for the betterment of the town in general. Mr. Peterson is here from Sacramento, Calif., with his wife and daughter Deloris, aged six. They are favorably impressed with our town and the Outlook extends to our new residents, the warm hand of welcome. Mr. Peterson has been sent to us by H. A. Butler, Supt. of dining cars, hotels, restaurants, and news services for the Southern Pacific and in selecting Mr. Peterson for this place, he made a wise appointment.

Attention, Ranchman

The Range Committee on the 1937 Agricultural Conservation Program will be in session in Carrizozo March 15, 16, 17, for the purpose of signing up ranchers who are interested in participating in the Range Program for this year.

The following schedule will be used in the sign-up: Monday, March 15, ranchers from Corona, Ramon, Joneta, Asperus, Lon Tuesday, March 16, ranchers from Lincoln, San Patricio, Ruidoso, Picocho, Encinoos, Bluewater, Hondo, Bethel, Baca Canyon, Escondida, Arabela, Tinnie, Glencoe. Wednesday, March 17, ranchers from Carrizozo, White Oaks, Nogal, Alto, Angus, Rabenton, Mon Jeau, Oscura, Ancho, Capitan, Macho, Jicarilla.

All cooperators, both new and old should bring the following information when they come to sign up for the 1937 Program.

1.-An accurate map drawn on township plots showing all land owned or controlled with the exception of Public Domain or government land.

2.-A list of all range building practices the rancher plans to use in 1937, and their location on the map.

All practices used in 1937 must have written approval of the range committee before the rancher can start to work.

This sign-up is for the Range Program only, and will be opened at 8 a. m. each day.

Be sure to bring the above information when you come to sign up.

Donald Gordon, Co. Extension Agt.

See the new Easter Dresses for Ladies, Girls and Kiddies at Burke's Art & Gift Shop.

W. J. Sandfer, ranchman of Tinnie, was here this week attending to some business matters.

Bob Brady of Hondo is here this week attending to business matters in District Court.

Personals

Mrs. F. L. Boughner, daughter Rhea and son Leslie spent Monday visiting Mr. and Mrs. Ben S. Burns, returning Tuesday to their home in El Paso.

Mr. and Mrs. John W. Harkey and daughter Zane spent the week-end with Mr. Harkey's sister, Mrs. A. D. Hooper, at Plainview, Texas.

Mrs. Cora Casino of El Paso was the week-end guest of Mrs. Gunther Kroggel.

Attorneys Gilbert of Roswell, Hanny of Carlsbad and H. B. Hamilton of El Paso are here this week attending to legal matters in District Court.

Billy Norman is firing for the Southern Pacific out of Tucumcari.

Cres Mares of Corona was a Carrizozo business visitor on Wednesday of this week.

Bill Balow, cafe owner of Ancho, was a business visitor here this Wednesday.

Mr. and Mrs. B. L. Moore and baby daughter of Adobe were business visitors here Tuesday.

The Music-Drama Study Club will meet Thursday, Mar. 18, at the home of Mrs. R. R. Sale and Miss Grace Jones, at 7:30 p. m.

Boxing at Joe Romero's Pool Hall building tomorrow night, Mar. 6. Bill Compton of Carrizozo and Barr Fifer of Alamogordo. Two main features between Carrizozo and Alamogordo boys. Admission, 25-40c.

Last Saturday morning at her home on the east side, Mrs. Bonifacio Padilla passed away after a lingering illness of several months. Funeral services were held at the Santa Rita Church Sunday afternoon, with Father Salvatore conducting the same and interment made in the local cemetery. The sympathy of the community is extended to the bereaved husband and other relatives.

BORN-To Mr. and Mrs. P. H. Marquez, Friday, Feb. 26, a girl. Mother and daughter are doing nicely.

Mr. and Mrs. Maurice Sandoval were here for the week-end from the O-O ranch in the Venado Gap.

Florencio Vega was a business visitor from his ranch last Saturday.

Marshall Atkinson, stockman of Corona, was a business visitor in Carrizozo last Saturday and while in town, made this office a friendly call.

Andy Wilson and Claude Olgun were visitors from Tularosa last Sunday.

Miss Dorothy Nickels is the stenographer for Donald Gordon, County Extension Agent.

Chris Trevino, who has not been here since 1928, arrived in town yesterday from Wyoming to visit with his mother, sister, brother and the Andy-Lucas family. He was accompanied by Paul Lucero of Trinidad, Colo.

BORN-To Mr. and Mrs. John Lamy, Mar. 8, a girl. Mother and daughter are doing nicely.

Kelvinator

Much popular interest is being created by the radio program of "Professor Quiz" which is being sponsored together with the large prize winning contest by Kelvinator Corporation, on a nation-wide hook-up of 55 stations each Saturday from 6 to 6:30 p. m. Mountain time, according to a report from G. C. Kroggel of the N. M. Mech. Equipt. Co., local Kelvinator dealer.

Prize winning announcement is made on each program of the Kelvin Home contest. The N. M. Mech. Equip. Co. is local headquarters for the Contest, where entry blanks and the Kelvin Home Book, which gives ideas for answers to the "missing word" contest, may be obtained by contestants. Be sure a nd tune in.

Meadames Albert Scharf, Nellie Reilly and Mr. and Mrs. D. G. Robinson made a trip to Alamogordo yesterday to visit Mrs. A. T. Jackson, formerly Miss Herndon Reilly, who is recovering nicely from a recent operation at the Masonic Hospital in El Paso. They returned yesterday evening except Mrs. Reilly, who will remain with her daughter until she recovers.

Mr. and Mrs. Will Ed Harris of their ranch in the Gallinas mountains spent several days in town this week on business, also calling on relatives and friends.

Mr. and Mrs. Nick Vega and the children and mother, Mrs. Josefa S. Vega were Tularosa visitors last Sunday, returning home late in the afternoon.

Mr. and Mrs. A. J. Rolland, accompanied by Mr. and Mrs. Chas. Rolland of Ponton, Michigan, who have been visiting the Rolland families of Carrizozo and Alamogordo, spent Monday in Alamogordo as guests of Mr. and Mrs. Frank Rolland. The visitors will leave for Ponton about next Sunday or Monday.

This morning's mail contained a nice present for the editor of this paper, coming from his old friend, A. M. (Morgan) Reilly, who is sales manager for the Ponca Tobacco Company of Dallas, Texas. The present was a "Snap Kleen" Briar pipe, the latest departure in the smoker's line. Thanks a million, old scout-and the editor will think of you every time he fills his pipe-out of the other fellow's tobacco.

Mrs. Ola Jones, ex-Co. School Supt. and Mrs. Irene Hart, present incumbent, arrived here first of the week from New Orleans, La., where they attended a meeting of the National Educational Association for school superintendents. They report a very successful meeting of that wing of the association.

Mrs. H. M. Bullard and son H. M., Jr., arrived here last week from Springfield, Mo., to join Mr. Bullard, who is employed on the S. P. water service in this locality.

Mr. and Mrs. Eddie Long of Capitan visited friends in town the first of the week.

We had a snow last night to the depth of 2 1/2 inches here, while at other places over the county, recordings showed from three to four inches.

Ballyhoo Sending Bomber Same Way Maxie Baer Went

JOE LOUIS' purses have totaled more than \$700,000 since he became a professional prize fighter...

Even in this land of surprises there scarcely is any precedent for the amazing triumph of this giant.

Both Max and Joe arrived quickly. They were fortunate in their early connections and did not have to come up the hard way as did Jack Dempsey.

Each of them was well possessed of the purely physical virtues which make for a great fighter.

Max Baer.

The lightweight class which in the past has been dominated by Irish, Jews, negroes and other racial strains now is strongest in Italians.

Baer, who should have been a champion for ten years, went first and quickest. He read the papers and otherwise amused himself.

Newspapers and radios built up a myth about him that could have endured almost as long as the twin eggs about George Washington's cherry tree and Calvin Coolidge's silent wisdom.

All the while Joe read the sports pages and the comic sheets and otherwise amused himself. When preparing for a fight he slept, ate and puffed over as usual a set of sparring partners as ever appeared for the ancient and elegant purpose of getting pepped over.

Even the shellacking received from Schmeling, a second-rater as great heavyweights go, taught no lesson. Nor could repeated warnings convince Joe's camp followers of the altered temper of disillusioned cash customers.

Johnny Moir, whose brilliant work at forward has helped Noire Dame to defeat the No. 1 and No. 2 Big Ten basketball teams in succession, holds every scoring record in his school's history except one.

Joe Cronin is getting a share of the \$300,000 purchase price his father-in-law, Clark Griffin, got for him from Boston at the rate of ten cents a hole on a Florida golf course.

NOT IN THE BOX SCORE:

A NOTRE attempt will be made to straighten the tangled affairs of the Brooklyn baseball club before the Dodgers start spring training.

When former Boxing Commissioner Jim Farley quits being Postmaster General the best bet is that he will hook up with a famous-insurance company.

Several of the best fights of recent weeks have been pick-up affairs at the very social Hialeah racetrack.

Italians Now Boss Lightweight Class

The light weight class which in the past has been dominated by Irish, Jews, negroes and other racial strains now is strongest in Italians.

Baer, who should have been a champion for ten years, went first and quickest. He read the papers and otherwise amused himself.

Johnny Moir, whose brilliant work at forward has helped Noire Dame to defeat the No. 1 and No. 2 Big Ten basketball teams in succession, holds every scoring record in his school's history except one.

Joe Cronin is getting a share of the \$300,000 purchase price his father-in-law, Clark Griffin, got for him from Boston at the rate of ten cents a hole on a Florida golf course.

Plans for the new quarters are being drawn up and President J. Louis Comiskey promises it will be the best in the major leagues.

Floyd Gibbons Adventurers' Club Hello Everybody! with portrait of a man

"The Saw That Clicked" By FLOYD GIBBONS Famous Headline Hunter

AND here's Russell Nelson of Dorchester, with a tale of an adventure to tell. It was right in the middle of the depression, and Russ had been out of work a while.

But one day in December he met an old boss of his on the street. The boss said he had a job for Russ, and if he'd show up at the plant the next day he could start right in working.

It felt great to be back at work again, but maybe Russ wouldn't have felt so swell about it if he'd known that plenty of industrial insurance men could have told him—namely, that an unusual number of accidents happen to men on their first day at work after a long lay-off.

Somehow or other men forget little things during a lay-off that they'd ordinarily remember.

They slip up on something, and then, first thing you know, they're in a jam.

Russ' job was in the mill room, or wood-working shop of the plant. That's where they turn out such finished parts of houses as the window sashes, the doors, and the newel posts they put in stair railings.

He Was Operating a Band Saw.

All during that day Russ was busy, running one machine after another. He and the boss were alone in that room, but along toward the end of the afternoon, the boss went out to do a special job and Russ was left alone.

At that time Russ was operating a band saw. "A band saw," he says, "is a large machine about six feet tall. It has two wheels about three feet in diameter, placed one above the other. Around these wheels runs a flexible saw blade, narrow, but about 18 feet long, the ends welded together to make it in the form of a belt.

This machine is used for cutting scrolls and for making fancy-work of various patterns."

That's the sort of contraption Russ was working with. The saw was humming away, driven by another wheel from which a leather belt ran to the main power shaft.

As Russ worked, the machine began to give out rapid clicks. of a sort that he had never noticed before.

And ordinarily, Russ would have stopped to find out what those clicks meant.

BUT REMEMBER WHAT I SAID A WHILE AGO ABOUT A MAN'S FIRST DAY AT WORK AFTER A LONG LAY-OFF!

Wrapped Up in a Saw-Blade.

Russ hadn't worked in a long time. And his mind wasn't working so well for that very reason.

THEN, ALL OF A SUDDEN THINGS HAPPENED, AND RUSS WAS RIGHT IN THE THICK OF IT!

That long, flexible saw-blade SNAPPED—snapped at the crack that had caused all those clicks.

IT LEAPED FROM THE MACHINE, TWISTING AND SQUIRMING LIKE AN ANGRY SNAKE.

Eighteen feet of sharp, saw-toothed steel shot out and whapped itself around Russ—around his body—and his arms—and around his neck.

And the ends of that blade were wrapped up in a lot of whirling machinery.

Russ just stood there holding his breath, while his heart stopped and his legs seemed to freeze.

Still, Russ didn't dare to move.

Russ Didn't Dare to Move.

One end of that blade was rattling against the spokes of the lower wheel.

If the wheel ever picked it up he was a gone chicken.

And the slightest move on his part might send that blade into the wheel and start it SAWING AWAY AT HIS BODY AND NECK.

Russ didn't dare move—and at the same time he didn't dare stand still and do nothing.

"I couldn't stand there and wait for the boss to come back," he says, "for the end of the saw looked as if it might catch in the wheel at any moment."

"I looked at the switch that shut off the motor. It was way over on the other side of the room."

"I looked all-around-me, thinking that there MUST be something I could do to help myself."

And there was.

Saved by Lucky Accident.

On the bench in front of him were some large pieces of wood. If he could only reach one of them. Russ found he could move one arm without moving the saw blade. He stretched that arm toward the nearest piece of board.

His arm was just half an inch too short. He'd have to take a chance and move his body a little.

Holding his breath he bent ever so slightly and picked up the wooden stick. The wheel spun around, perilously close to the saw blade—but the blade didn't catch.

Russ was bringing his arm back with the stick in it when he dropped it. It fell to the ground with a clatter, and again he held his breath.

BUT DROPPING THAT STICK WAS THE LUCKIEST THING HE EVER DID IN HIS LIFE. For the stick fell on the leather belt that ran on the machine. It jammed in between the belt and the pulley it ran on—AND THREW THE BELT OFF THAT PULLEY.

The machine, with no power to drive it, slowed down and came to a stop.

"Boy," says Russ, "I got out from under that blade in a hurry, and it was a few hours before I was able to work again. I hope you think this is an adventure, but whether you do or not—I still do!"

"Commodity Dollar" Was Invented Many Years Ago

The "commodity-dollar" was actually in use in Hingham a century ago, states a writer in the Boston Globe.

Manuscripts uncovered in the Watertown Public Library by the Federal Historical Sources Survey show that Hingham paid its minister on a commodity dollar basis in 1803.

The minister was Rev. Henry Ware, afterward the first Hollis professor of divinity at Harvard.

Rev. Henry Ware went to Hingham in 1787 and the inference is that his salary was \$500 a year, enough and plenty in a period of low prices.

But during the late seventeenth-century there had been a "very great demand and high prices for all the necessaries of life" and the minister was at his wits' end to make both ends meet, for his salary remained stationary.

The remedy adopted by the parish was to adjust his pay on the basis of the average prices of the great staples between 1787 and 1803, and this settlement of the problem was accepted by the minister.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

By REV. HAROLD L. LUNDQUIST, Dean of the Moody Bible Institute of Chicago, Western Newspaper Union.

Lesson for February 28

THE NEW COMMANDMENT

LESSON TEXT—John 12: 20-33: 13: 34-35. GOLDEN TEXT—A new commandment, I give unto you, that ye love one another; even as I have loved you, that ye also love one another. John 13: 34.

JUNIOR TOPIC—A Great Man's Way. INTERMEDIATE AND SENIOR TOPIC—What the New Commandment Means. YOUNG PEOPLE AND ADULT TOPIC—The Measure of Christian Love.

In the last week of our Lord's ministry on earth many important events took place, but we pass most of them in our present series of studies. The incident related in our lesson of today is of interest in and of itself, but it is of peculiar significance because it introduces a marvelously instructive discourse of our Lord.

Whatever had prompted their inquiry, we are delighted to note that the Greeks came with an earnest desire to see Jesus.

I. Seeking Jesus (12: 20-22). A man has progressed far on the road to blessing when he makes known his desire to see Jesus. Coming to him means coming to the One who has the words of eternal life.

Note that the disciples were wise enough to bring the men to Jesus. The true function of every Christian worker is to bring men to him. On the back of the pulpit in one of America's greatest churches, directly where the preacher can see them as he arises to preach, are the words of our lesson, "Sir, we would see Jesus." Little wonder that a strong and true gospel is preached in that church.

II. Finding the Cross (vv: 23-33).

The reply of our Lord to the Greeks and to the disciples who brought them to him, seems a bit singular at first glance. Did he not wish to receive them? They had probably come to see the great religious leader, the King of the Jews—why does he talk about death—why is his soul troubled?

The words of our Lord are clear. Men do not need an example, a leader, a teacher, they need a Saviour. It is as a sacrifice for sin that Christ will draw all men unto himself (v. 32).

We need to relearn that lesson. Leaders of the church are earnestly seeking the explanation of the rapid decline in the influence of the Christian church. It is a good sign that some are beginning to realize that the difficulty is in the realm of the spiritual.

The barrenness of so-called modern theology has become apparent to its leaders and they have begun to talk about a "spiritual revival." But unfortunately we soon find that they use the expression to stand for something entirely different from a real scriptural revival. "The voice is Jacob's voice but the hands are the hands of Esau" (Gen. 27: 22).

Let us make no mistake about it, a real revival will center in the cross and will manifest itself in denial of self for the glory of God. One cannot forego mention of the fact that the last part of verse 28, "If any man serve me, he will my Father honor," was the motto of the late Dr. James M. Gray, whose life gloriously exemplified the truth of the passage. God is willing and ready to do as much for you and for me.

III. Loving One Another (John 13: 34, 35).

When these words were uttered our Lord was two days further in the last week before he was crucified. He was alone with his disciples in the upper room. What message does he have for them in that solemn hour? That they should love one another. That is a message that needs renewed emphasis in our day. The strife which fills the world has almost engulfed the church, and there is bitterness and strife where love should reign.

Let us observe carefully that it is as his disciples that we are able to love one another. There are two erroneous extremes to be avoided. First, we have the out and out conservative, who proclaims his belief in the Bible as God's Word, who is anxious that he be absolutely correct in doctrine, a really saved man, and who then becomes the kind of "fighting" fundamentalist who dimly falls God in the testimony referred to in these verses. On the other hand we have the liberal who has abandoned the scriptural basis of discipleship, and who then boasts of his great love for his brethren. Love is no substitute for regeneration, and regeneration is no excuse for lack of love.

Courtesy of the Heart. There is a courtesy of the heart, it is allied to love. From it springs the purest courtesy in the outward behavior.—Goethe.

Duty of Gratitude. Gratitude is a duty none can be excused from, because it is always at our own disposal.—Charron.

The Fountain. Look within—within is the fountain of good; and it will ever bubble up, if thou wilt ever dig.

Ask Me Another A General Quiz

© Bob Syndicate—WNU Service.

- 1. Who was Alaric? 2. Members of what race are sometimes called "Huskies"? 3. Which is the larger unit, a brigade or a regiment? 4. Who was father of Queen Anne of England? 5. Who wrote "The Vision of Sir Launfal"? 6. What is the significance of a "hall-mark"? 7. How many "Fates" were there in classical mythology? 8. What is a brogan? 9. Was the lute a stringed instrument? 10. What is a coulomb? 11. What is gross? 12. What English slang word corresponds to the French "Chauvinist"?

Answers

- 1. A Visigoth leader who sacked Rome. 2. Eskimo. 3. A brigade. 4. James II. 5. James Russell Lowell. 6. It is a mark of genuineness. 7. Three. 8. A heavy shoe. 9. Yes. 10. An electrical unit (the amount conveyed by one ampere in one second). 11. Refuse of melted metal. 12. Jingoist.

U. S. Railroad Mileage

The railroad mileage of the United States as compared with that of other countries is by far the greatest, with 249,433 miles. The Soviet Union is second, with 48,467; India is third, with 41,724; Canada is fourth, with 41,409, and France is fifth, with 39,467.

Life's Blessings

NOTHING raises the price of a blessing like its removal; whereas it was its continuance which should have taught us its value. There are three requisitions to the proper enjoyment of earthly blessings—a thankful reflection on the goodness of the Giver, a deep sense of our unworthiness, a recollection of the uncertainty of long possessing them. The first would make us grateful, the second, humble, and the third, moderate.— Hannah, More.

A critic is seldom constructive.

Constipated 30 Years

"For thirty years I had stubborn constipation. Sometimes I did not go for two or three days. I was in pain in the back, abdomen and pain in the legs. After a while I gave up. New! I was advised to use 'Soleo' and I was cured. I am now able to enjoy life. Mrs. Elsie Jones."

WOMEN WHO HOLD THEIR MEN NEVER LET THEM KNOW

NO matter how much your back aches and your nerves scream, your husband, because he is only a man, can never understand why you are so hard to live with one week in every month. Too often the honeymoon experience is wrecked by the nagging tongue of a three-quarter wife. The wife whom he never let her husband know by outward signs that she is a victim of periodic pain.

For three generations your woman has told another how to go "aching through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature ease up the system, thus lessening the discomforts from the functional disorders which women must endure in the three critical days of her monthly period. Lydia E. Pinkham's Vegetable Compound "Go" Healing Through.

THE CHEERFUL CITRUS

Through life's mad rush there comes to me At times a little peaceful stop Like standing in a crowded street Right by a nice big traffic cop. LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Murder Masquerade

**EDITORIAL COLUMN**

**Democrats to the Defense**

Already it is plain that the greatest danger from President Roosevelt's plan for remaking the Supreme Court is past. In a totalitarian state such a proposal might have been jammed through without public, press or legislators daring to say a word in opposition. Americans have amply proved that is not their way. Determination to judge the measure on its merits was promptly made manifest by members of Mr. Roosevelt's own party. And nowhere more vigorously than in the newspapers which supported the Administration in the last election.

The results of the survey of such papers conducted by The Christian Science Monitor and published yesterday leave no doubt that the Roosevelt press of November is by no means the Roosevelt press in February. Two thirds of the newspapers replying have changed from support to opposition on the question of shaping the Supreme Court to fit the New Deal.

Notably the majority of these newspapers, among them some of the most influential in the nation, are located in the South. In many cases it is not necessary to read between the lines of their replies to see how much of a wrench to traditional democracy and to party loyalty was sustained—and how much courage was required—when they decided to break with the President on this question. Not since Cleveland lost the silver Democrats has an issue cut so deep between a President and a large section of his own party.

What was it that caused these papers to take this stand? Was it mere conservatism? Was it opposition to economic and social reforms which are the ultimate objective of the President in remaking the court? Was it the states' rights tradition? Only in small measure, we believe. For many of these newspapers have supported the general program of the New Deal, particularly the AAA and Guffey Coal Act.

We believe the major opposition comes from a perception that the Supreme Court is the guardian, not only of states' rights and of the federal system but of individual liberties, of free speech and a free press. If any President and Congress after one election could remake the court to fit their purposes, they could alter the Constitution not only by extending federal powers but by depriving Americans of essential liberties. That is, they could unless the people rose in revolt as they are now doing and as much of the Democratic press has led them in doing.

**NOW OFTEN CAN YOU  
KISS AND MAKE UP?**

NEW husbands can understand  
why a wife should turn from a  
pleasant companion into a shrew  
for one whole week in every month.

You can say "I'm sorry" and  
kiss and make up easier before  
marriage than after. Beware. If you  
want to hold your husband, you  
won't be a three-quarter wife.

For three generations one woman  
has told another how to go "smil-  
ing through" with Lydia E. Pink-  
ham's Vegetable Compound. It  
helps Nature tone up the system,  
thus lessening the discomforts from  
the functional disorders which  
women must endure in the three  
crucial years: 1. Transition from  
girlhood to womanhood. 2. Pre-  
paring for motherhood. 3. Ap-  
proaching "middle age."

Don't be a three-quarter wife,  
take LYDIA E. PINKHAM'S  
VEGETABLE COMPOUND and  
Go "Smiling Through."

**BANK CHARTERING  
POLICY REVIEWED**

State Official Declares Correct  
Principles in Licensing Banks  
Are Essential for Sound  
Banking Conditions

PHILADELPHIA. — Sound public  
policy in chartering banks was dis-  
cussed by Carl K. Withers, Commis-  
sioner of Banking and Insurance of the  
State of New Jersey, before the Eastern  
Conference on Banking Service, held  
here recently under the auspices of the  
American Bankers Association. He de-  
clared that "few questions bearing on  
the future stability and security of our  
banking systems loom as more impor-  
tant than that of a sound policy to be  
pursued in the chartering of banks."

Alluding to competitive policies of  
both state and national banking au-  
thorities to charter the most banks in  
the past, he said that "this country was  
ever-banked, and that aside from any  
other consideration, economic or other-  
wise, this condition was brought about  
largely through an unwise, unsafe and  
unthinking charter policy, alternating  
between the state and national sys-  
tems, which has marked and ham-  
pered banking progress in this country  
since its very inception."

**Political Influence**

He declared political considerations  
in connection with the chartering of  
banks, saying: "Political influence has  
no more place in banking than it has  
in the deliberations of our highest  
tribunal—the Supreme Court of the  
United States. Until this is recognized  
and brought into being within both our  
state and national systems, we may  
never feel safe against the shifting  
sands of political expedience."

As to the "element of sometimes  
ridiculous competition heretofore ex-  
isting between the state and national  
systems," he said that much may be  
said in favor of the progress made in  
recent years. In many states there ex-  
ists a practical working agreement be-  
tween local supervising authorities  
and the federal authorities, whereby  
all charter applications are mutually  
considered on a basis of community  
need rather than competitive advan-  
tage as between systems. In some  
states this arrangement goes even fur-  
ther in the refusal of the one authority  
to even consider a charter while pend-  
ing with the other, he declared.

Aside from the competitive and po-  
litical aspects of our future charter  
policy, he continued, there are several  
others more individual and local which  
merit consideration. Among these he  
mentioned honesty of purpose, com-  
munity need, the character of manage-  
ment and adequacy of capital.

Most state laws make reference to  
the "character, responsibility and fit-  
ness" of the incorporators of a new  
bank, he said, continuing:  
"So important do I conceive this fac-  
tor to be, that I place it first among  
those for consideration, for unless the  
motives are sound, honest and sincere,  
there is little likelihood that the result-  
ant institution in its service to the  
community will reflect other than the  
spirit of its founders."

**The Lessons of the Past**

"Too often in the past have charters  
been granted to promoters pure and  
simple—not always pure, and by no  
means simple. The country was dotted  
with such. The experience has been  
costly and, it is to be hoped, the lesson  
well learned, not only by charter-grant-  
ing authorities, but the public."

Other factors to be considered as  
among the most important in granting  
new bank charters, he said, are the  
number of institutions already serving  
the area, the record of earnings of ex-  
isting institutions, the number of fail-  
ures since 1920, and the reasons there-  
for, public convenience and advantage,  
the reasonable prospects for growth  
of the community, expectation of prof-  
itable operation and whether a branch  
bank could serve as well.

"Sound public policy demands that  
no new banks be chartered unless  
there is a definite, necessary and  
permanent need," he declared. "Sound  
mergers, consolidations and the sea-  
sible extension of branch banking are  
much to be preferred to any general  
movement toward a flood of new char-  
ters. But here again we must guard  
carefully against monopoly or un-  
bridled branch competition, either of  
which might become as dangerous as  
the organization of new banks."

Juan Pacheco, former Carri-  
zozo resident, but now of La  
Luz, was here Sunday visiting  
his daughter, Mrs. Lewis Galle-  
go and family.

## Germ-Free Animals Will Be Big Aid to the Scientist

### How They Are Reared by Notre-Dame Biologist

Notre Dame, Ind.—Animals that never have a germ in their bodies, from birth to death, are being produced at Notre Dame university, in the laboratories of Prof. J. A. Reyniers of the biology department. This is something really new under the sun; for every animal body that walks, from that of man himself down to the lowliest amoeba, is the unwitting, often unwilling host to swarms of bacteria and other micro-organisms.

Production of really germ-free animals is a matter of very great practical importance.

### Animals Kept Germ-Free.

The problem is two-fold: the animals must be brought into the world germ-free, and they must be kept in a germ-free world once they have been born.

The first step is partly taken care of by the nature of pre-birth existence itself. The unborn young of any mammal, wrapped in their fetal membranes, are normally germ-free. During and after the process of birth they receive their first inoculations.

Professor Reyniers therefore takes the prospective mothers of his experimental animals (usually guinea pigs), shaves them, bathes them in antiseptic fluid, covers them with a sterilized envelope. Then he puts the animals into a closed horizontal cylinder that looks like a small steam boiler, known as the operating cage. Its interior has been rendered absolutely sterile, and only germ-free air is admitted.

### Rubber Gloves Used

A pair of long rubber gloves are soaked into two openings in the side of the cylinder. A third, glassed, opening serves as an observing window.

In this operating cylinder he opens the body of the mother animal by standard cesarean surgery, and removes the young through a connecting tube into a second cylinder, the rearing cage, which is also rigidly sterilized.

To test for possible contaminations, an animal from each group is instantaneously killed and its whole body ground to hamburger in a meat-grinder operating under sterile conditions in a third cylinder. Paris of the ground-up guinea pig are transferred to tubes containing a large number of different culture fluids for the encouragement of bacterial growth of any kind that may be present. If no growth occurs, and if microscopic tests are negative, it is considered reasonably well assured that the young animals are really germ-free.

## Lots of Hemoglobin Is Necessary for Mountain Climbing

Washington.—It takes red-blooded men—and some animals—to stand high altitudes without getting mountainsick or experiencing other unpleasant symptoms when they first reach the heights, it appears from studies carried out as part of the program of the International High Altitude expedition.

Lack of oxygen in the atmosphere on a mountain top is responsible for most of the unpleasant symptoms. Persons who can enjoy their meals and be in a cheerful frame of mind when first climbing to oxygen-rare high altitudes owe this ability to their blood, hemoglobin.

### Hemoglobin Carries Oxygen.

Hemoglobin besides coloring blood red plays the vital role of oxygen carrier between lungs and the rest of the body. Everyone has hemoglobin in his blood, but apparently some kinds of hemoglobin are more efficient at grasping oxygen from the air as it is breathed into the lungs.

Evidence for this was obtained in studies of mountain animals, such as the vicuña, the llama and the vicuña of the Andean highlands, and reported by Drs. F. G. Hall of Duke University, D. B. Dill of Harvard University, and E. S. Gurnan of the University of Chicago in the Journal of Cellular and Comparative Physiology. These animals all had hemoglobin which was more avid for oxygen, and also had more hemoglobin in each red blood cell, than did animals that live at sea level.

## Woman Auto Driver Good as the Man in the Essentials

### Results of Tests Made in Towns of Iowa

SCIENCE has come to the defense of the woman driver. If she is not so efficient as are the men, it is not because of her sex or innate abilities but merely because she lacks the driving experience necessary for greatest skill.

This is shown by tests of more than 2,000 persons on vision, reaction time and other essential abilities for the automobile driver, made by Dr. A. R. Lauer, associate professor of psychology at Iowa State college.

Only in strength of grip was there any difference between the sexes. Among the younger persons tested, the men were somewhat better than the women in judging distance. Women were somewhat inferior in tests of performance of skills resembling auto driving, due to lack of experience of those tested.

### Best Drivers at 22.

Best drivers are those twenty-two years old. Dr. Lauer reported to the American Association for the Advancement of Science. This is true of both men and women. In complex mechanical skills, boys and girls are about equal up to the age of fifteen. After that boys are superior, but this difference disappears again in later age.

Keeness of vision drops off rather sharply for both sexes after the age of forty to forty-five, and after fifty-five the loss is still greater.

Ability to stand glare begins to lessen at the age of twenty, and the drop is much sharper after forty.

In making these tests, Dr. Lauer transported his driving clinic about like a circus making two-day stands in each town and inviting the public to come and be measured.

## Women Are Warned of Health Hazard in Eye Shading

London.—The woman who turns to exotic shades for her eyelids in the quest for additional beauty and glamor may wake up some morning to find herself with a distinctly undesirable and non-glamorous reddening and swelling of her lids.

The danger of inflammation of the eyelids, with reports of actual cases, is pointed out by Dr. Henry C. Semon, physician to the dermatological departments of the Royal Northern, Hampstead and King George General hospitals, London.

In the old days, eye shading was confined to actors and actresses and the only cosmetics used were black or varying degrees of it, made from lampblack, vegetable and animal charcoal and other sources of carbon. In these there was probably no harm, Dr. Semon says in his report to The Lancet.

### Risk in Aniline Dyes.

Modern vogue for green, blue, silver and other shades of eye shadow cosmetics to match costumes and for various occasions brings a new hazard—that of the aniline dyes which must be used to achieve these desired shades for the eyelids.

Nothing the chemist can do in the way of treating these dyes for use in eye-shades will entirely obviate the risk of their producing inflammation, Dr. Semon says. Changes in the perspiration and skin secretions and the effects of sunlight, temperature changes and the sulphur in city air cannot be taken into account in the chemist's calculations, and these may alter even the most carefully prepared compound.

The skin of the eyelid is perhaps the most delicate of all the skin on the body, Dr. Semon points out, which increases the chance of its being irritated.

## Diatomite Deposit Is Found in Nevada

Carson City, Nev.—Diatomite, a useful earthy mineral, has been found in a large deposit in Nevada. The bed is nearly 100 acres in extent and in some places more than 50 feet thick. Hundreds of thousands, perhaps millions, of tons are in sight.

Formerly much used as a "carrier" for nitroglycerine in making dynamite, this mineral has yielded place to other materials in the explosives industry, and has itself found a number of other employments.

# Washington Digest

National Topics Interpreted By WILLIAM BRUCKART

## The People Lose

Washington.—It is undoubtedly one of the fundamental foundation stones of democratic government that where a civic right or privilege is accorded, the persons who are granted those rights necessarily have some duty to perform under those rights. It is well established, for example, that workers may organize into unions; that those unions have the right to bargain collectively which means that a committee representing the members of that union may speak for it in dealing with the employers, and it is a right undoubtedly of unions to call its members away from work on strike. I think there can be no debate concerning these three premises. But since these rights have been granted to workers and accepted by them on the same inalienable basis as the right to vote, the obligations that go with these rights necessarily have been accepted by the workers.

We have just seen a settlement of one of the great strikes of this decade and the return of more than one hundred thousand workers to the plants of the General Motors corporation. Immediately after Governor Murphy of Michigan, had announced that General Motors and John L. Lewis and his Committee for Industrial Organization had reached an agreement, efforts surged and swelled in a movement on the part of each side to claim victory in the settlement. From all sources I have been able to tap, from every trustworthy observer of national affairs, I have obtained virtually the same story about the General Motors—C. I. O. strike settlement. As far as I can see after digesting all of the opinions within my reach, it seems to me that neither General Motors nor John L. Lewis won. What is much more important is that the American people lost by that strike and they are in a fair way to lose much more.

The General Motors strike was one of the costliest in history. I am told that the workers alone lost something like one hundred million dollars in wages, and, of course, the stockholders of General Motors likewise lost because during all those days, forty-four of them, that the plants were closed, no new cars moved into trade. That means that all the thousands of dealers and salesmen of General Motors automobiles earned no income.

The truth about the settlement seems to be that each side was willing near the end to accept Governor Murphy's proposition for settlement as a face-saving proposal. It is undoubtedly true that John L. Lewis would have been sunk without a trace and his movement to break up the American Federation of Labor and take control of labor for himself would have been utterly ruined had there not been some concessions by the General Motors officials. He apparently attempted to break up the A. F. of L. before he had sufficient union men weaned away from the parent organization and that is the reason why his position in the General Motors strike was so precarious from his personal standpoint.

On the other hand, it is quite evident as well that General Motors was forced into a position where it had to make concessions or be charged by the federal government with responsibility for bloodshed and destruction of property in riots. Governor Murphy acted throughout the strike negotiations under the flag of President Roosevelt, saying his movements were at the wish of the President. General Motors did not dare attempt to run counter to the President's commands because it could not withstand public sentiment that could and probably would be built up against it should it be publicly criticized by the President.

And to support my statement that the settlement is a face saving agreement and that neither side won in it, it is necessary only to consider that this agreement will run just six months. It contains no elements of permanency nor does it show any signs of a basic understanding which will allow public sentiment to the Lewis faction.

Thus, there are many observers who feel that another crisis will arise along about the first of July and that in the meantime William Green, President of the American Federation of Labor, will have built up a considerable amount of strength on his side of the factional fight. What the future holds, therefore, is difficult to guess. It can be said only that in the recent strike and in the controversy that seems certain to lie ahead, General Motors again will be the goat and the public will pay.

I have been wondering whether many people recognize how they are going to pay for the cost of this strike. I have mentioned ways in which they have lost by it and it seems equally clear that when the Lewis unions get through with the use of force, it is likely to bring about an increase in the cost of the automobiles they produce. It is likely to go further than just automobiles. There is a move on now to attempt something of the same sort of labor attack on the steel manufacturers. If that materializes, it is easy to see how widespread the increased costs will be and how consumers will pay in the end.

## Federal Charters

Political leaders have been quick at all times in recent years to sit astride the neck of business, especially big business. Corporations were held up as something to be despised, especially if they were large corporations. Lately there has been quite a definite movement for legislation in congress that would force corporations to have federal charters; that is, charters issued by the government at Washington which, therefore, could control such corporations with whatever regulations were deemed necessary. This legislation, it is true, has not approached the stage where a prediction of its passage can be made. The point is, however, that it represents the thoughts of a certain percentage of the people. The question of legality of such a statute obviously remains to be determined but it is to be noted that this proposition is simply another step in the movement to cast a stigma upon business, a move to make business appear immoral or criminal or generally infamous.

Business has found it advantageous to incorporate. It removes certain responsibilities from the individuals joining in a corporation and adds certain commitments at the same time. Here again are the rights and counter obligations arising with those rights and I think no one can dispute the fact that our nation has moved forward more rapidly because of the use of the corporation as a business entity.

But I have been unable to find an answer to the question why the federal government should take control by law of business corporations without at the same time taking control of labor organizations. Now, it is to be noted that labor unions have steadily avoided taking the step of incorporation. It is not true abroad where many labor organizations hold corporate charters just as would a business enterprise.

The fact that labor unions have not incorporated leads one to the presumption that the unions have felt such a step would hamper their activities. And, indeed, it might. For example, there have been scores of instances where labor unions, through their authorized officials or bargaining committees, have signed wage contracts with their employers—only to ditch that contract subsequently without regard for its binding force.

As labor unions are now organized, they are very loosely knit associations and there is nothing by which the individual members are bound except their own will to perform. In the case of a business corporation, for example, the stockholders have invested money and obviously when the corporation is sued in court or accumulates any kind of liability the stockholders' money in the corporation is available to pay whatever obligations develop. Hence, the lack of a corporate organization on the part of a union removes all responsibility insofar as law is concerned from the unit into which the workers have organized themselves.

The point is, after all, that the General Motors strike has demonstrated beyond the peradventure of a doubt that the national labor policies are utterly ineffectual and contain no consideration for the consuming public. Labor, as represented by the John L. Lewis faction, has shown its willingness to back its demands with force in disregard of law and it has failed to answer the responsibilities which it seems to me accomplish the rights and privileges the nation accords it.

When M-G-M cast Robert Taylor in "Camille," it was with the hope that the incomparable Garbo would make him forget all others, but when the last scene was shot, young Taylor was still calling her "Miss Garbo." Next he was cast opposite Jean Harlow, and studio folks slyly intimated that the huge boxes of flowers she received on the set every morning probably came from him. M-G-M even sent Taylor to Washington, D. C., to attend the President's birthday ball with Jean. And all to be availed. He still thinks Barbara Stanwyck is the grandest girl in the world.

# STAR DUST

Movie • Radio  
By VIRGINIA VALE

## RESULTS of the annual election of radio favorites, with two hundred and fifty-two radio-column editors casting the votes, brought joy to the hearts of Hollywood studios, for film favorites proved to be the outstanding radio favorites too.

Paramount is leading the cheering for their Jack Benny, for the fourth consecutive year, won the vote for best comedian and best program on the air. Bing Crosby was elected best singer of popular songs. Bob Burns ran third among comedians, and that was no small achievement. Benny and Fred Allen had the first two places, and there were no less than ten or twelve famous stage comedians competing for third. M-G-M's Nelson Eddy was ranked first among classical singers, and Universal's Deanna Durbin best of all the newcomers to radio. Twentieth Century's Tony Martin made a good showing, getting third place among singers of popular songs. And RKO's Lily Pons took second place among singers of classical music.

Interview etiquette is next in importance to romance manners in Hollywood. Whenever asked their opinion on the greatest actor on the screen, players are supposed to mention someone under contract to their own studio. Pat O'Brien just won't play according to that rule. He thinks Spencer Tracy is by all odds the best actor on the screen and insists on saying so. That delights M-G-M, but it is not so pleasant for Warner Brothers to whom Pat is under contract.

When M-G-M cast Robert Taylor in "Camille," it was with the hope that the incomparable Garbo would make him forget all others, but when the last scene was shot, young Taylor was still calling her "Miss Garbo." Next he was cast opposite Jean Harlow, and studio folks slyly intimated that the huge boxes of flowers she received on the set every morning probably came from him. M-G-M even sent Taylor to Washington, D. C., to attend the President's birthday ball with Jean. And all to be availed. He still thinks Barbara Stanwyck is the grandest girl in the world.

Hal Roach isn't content with keeping audiences giggling at his two-reel comedies. He has sent for Constance Bennett, dragging her back from her long vacation in New York, and started production on a big feature picture. It is to be a drawing-room comedy, very smart, swift, and swanky. It must be that he heard Constance in that broadcast of "Private Lives" that convinced everyone she had a real flair for high comedy.

When you see Eddie Robinson and Betty Davis in "Kid Galahad" take a good look at the handsome giant who plays the heavyweight champion. That is Bill Haast, one of the most extraordinary characters the studios have ever found. Not so long ago he was a steel worker in New York, and very proud of his job. A theatrical producer came along and got him to play on the stage in a short-lived play called "Iron Men." When that closed Warner Brothers sent for him.

Margot Grahame is proudly displaying a new ring to her friends these days. It is made up of linked hearts of sapphires and diamonds and was once the property of Sarah Bernhardt. Bernhardt gave it to Ellen Terry as a tribute to that great lady's artistry on the stage. Ellen Terry left it to her daughter-in-law, Julia Neilson, who gave it to an English actress, Mary Glynn. Mary Glynn passed it on to her protegee—who is Margot Grahame.

ODDS AND ENDS... Charles Beyer is the most envied man in Hollywood, for in rapid succession in his next few pictures he will play opposite Garbo, then Sylvia Sydney, Ginger Rogers, and Claudette Colbert... Between "Show Boat" Broadway, Lanny Ross is giving concerts of classical songs. Eddie Robinson is asking for more pleasant roles on the screen, because his three-year-old son is already a moviegoer and he doesn't want to antagonize him... Helen Jepson did not sign that contract with Grand National after all; she signed to make pictures with Sam Goldwyn instead... Latest word from London is that the British people like Zora Petrov but of all the American stars who have gone there to make pictures.

## Charming Way to Use Cross Stitch

Even amateurs will have no difficulty in turning out this finished looking chair or buffet set—with this easy-to-do pattern. And what compliments they'll get on this

cross-stitched peacock done in all the glory of its natural coloring or in two shades of a color for a more subdued effect. The crosses are 10 to the inch—the colors are clearly given in a color chart. With two patterns a handsome scarf could be made. In pattern 5740 you will find a transfer pattern of a large motif 13 by 16 inches, and two smaller ones 4 1/2 by 6 inches; material requirements; color chart and key; illustrations of all stitches used. To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle Household Arts Dept., 252 W. Fourteenth St., New York, N. Y. Write plainly your name, address and pattern number.

## My Favorite Recipe

Madame Louise Homer  
**Cheese Toast**  
Butter nicely browned. Slice over it hard-boiled eggs, boiled at least ten minutes. Pour over this cheese sauce and serve very hot. Make the cheese sauce by putting 1 tablespoonful of butter in a pan; add 1 tablespoonful of flour, then 1 cupful of milk, pepper and salt. Beat well and add 1 cupful grated American cheese.

## Owl Dumb, But Useful.

The owl's reputation for great wisdom is quite unmerited. Scientists have known for a long time that the owl is one of the "dumbest" of all things in feather; though a recent announcement of that commonplace fact got considerable press notice. But though he isn't wise, Old Hooty is nevertheless very useful. He feeds mostly on mice and other small rodents, and helps to keep their numbers below the proportions of an absolute pest.—Science Service.

Dr. Pierce's Pleasant Pellets made of May Apple are effective in removing accumulated body waste.—Adv.

Bellifling Is Useless  
The foolishest thing is to bellifling genius. Genius 13.

## CONSTIPATION

"Unrelenting Enemy of Health"  
How are your bowels? The doctor asks this important question because a primary need of good health is for the bowels to regularly pass off the waste of metabolism. Every doctor knows you cannot be well, feel well or look well if you allow constipation to hinder daily evacuation and thus prevent body cleanliness. You should know it! Then why let a bad condition continue? Try Doan's Regulets. They are mild and effective; act as a digestive and hepatic stimulant; increase the flow of bile and relieve temporary congestion of the intestines. Be regular with Regulets. For sale at all drug stores.

## DOAN'S REGULETS

## AFTER YOU EAT?

After you finish a meal can you be sure of regular, successful elimination? Get rid of waste material that causes gas, acidity, headaches. Take Milsenta Wafers for quick, pleasant elimination. Each wafer equals a teaspoonful of milk of magnesia. 20c, 35c & 60c at drug stores.

**JOHN LARDNER**  
On Working With Apes

He landed a right hook to my face on the way home, necessitating the removal of two teeth.

By JOHN LARDNER

WE STUDENTS of anthropoid culture—we scientists who dabble with the ape and his relation to man and his whole-whimsical slant on life—dwell in a little world of our own. At least, nobody else seems to hear the things we hear, or read the things we read in the newspapers, or follow the developments in our racket.

For instance, the other day I ran into Dr. Pete Bohnessack, the weasel-skinner, and said to him, full of enthusiasm:

"Bohnessack, old man, what do you think about the statement that Dr. Yerkes made in the paper? Ain't that sump'n?"

To my surprise, the great scientist (there is not a bigger man in the entire field of weasel-skinning) gave me a blank look.

"What Yerkes are you talking about?" he said. "What does he do? Does he dissect stoats? Is he a ferret-tanner? What Yerkes do you mean? I never heard of him."

So I sped home to the laboratory and gave a piano lesson to O'Gung III, my chimpanzee.

Apes Are Getting Lower.

Now, what I was getting at in my conversation with the great weasel-skinner was simply this. Dr. Robert M. Yerkes, the comparative psycho-biologist who runs the Yale scientific ape plant, had made a squawk in a magazine story and also in the newspapers. He said that the study of apes in this country was going to the dogs. He said it in a more scientific way, but that was the gist.

According to the doctor, not one captive ape in twenty is put to the proper use. The wastage is terrific. A scientist gets hold of an ape and experiments to see how long the animal can stay alive under water. When the experiment is over, and the ape is dead, he has to get a new ape for his next experiment. You can see how that would play hob with the ape supply.

Well, I agree with Dr. Yerkes that an ape should be made to last a long time, for his own sake and for the benefit of science. I believe that this theory applies equally to gorillas and chimpanzees.

Now, in the case of my chimpanzee, O'Gung III, I think I have acted absolutely for the best.

O'Gung III, as his name indicates, is the third O'Gung. His father, son of the original O'Gung, was born in Africa in affluent circumstances, the old man being one of the biggest shots of the neighborhood. But the younger O'Gung married below his station, and was cut off without a shilling, as they say in England. This preyed on his mind so much that he and his wife were easy victims for the first trapper that came along.

Superiority of Man.

They were brought to this country and assigned to a research worker in New Jersey, where O'Gung III first saw the light of day. I bought him at the age of three months. It was love at first sight. He landed a right hook to my face on the way home, necessitating the removal of two teeth.

"Ape, that was a dirty trick," I said. In an instant he had repeated, after me "Aseguajhik," which is the closest a chimpanzee has come to expressing himself in English since 1907. And O'Gung III was only three months old—well, three and a half months. I'll give you a week.

I had a son of the same age at that time, a bright and healthy tot, but precocious. This gave me a beautiful opportunity for research into the comparative development of man and ape. I let the two little fellows grow up together, dressing them in the same clothes, feeding

them play the same games. But after about five months the study was interrupted by an unfortunate incident. I quote from my notes of that date:

"June 7—Johnny is outdrinking O'Gung at rate of two bourbons to one. Found O'Gung under table last night, Johnny still conscious and singing loudly. Have to get rid of Johnny."

So I farmed Johnny out to some people who were interested in children, and I concentrated on O'Gung III. A couple of bicarbonate of sodas and he was ready for fresh work.

It is the dream of every scientist—barring weasel-skinners—to find out whether a chimpanzee is capable of distinguishing and recognizing different colors, such as red, blue, yellow, fuchsia, and maroon. With this in mind I gave O'Gung III several strips of colored cloth and told him to show me some action.

Greened for Yale.

The result far exceeded my expectations. In fact, it wrote a new chapter in anthropoid history. Without a second's hesitation the manly little fellow snatched up the blue cloth, waved it over his head, whistled a few bars of "Boola, Boola," and asked for the score of the Yale-Georgia game. He asked in sign language, but there was no mistaking his meaning.

I had planned to send O'Gung III to Harvard when he grew up. Naturally, the color experiment changed my mind. I promptly entered him for Yale and made a tentative note that chimpanzees have a leaning in that direction.

O'Gung III showed marked interest in sports from his second birthday on. He hated to participate in any game more strenuous than dime-limit stud, but he loved to watch football or baseball provided his seat was on the fifty-yard line or back of third base.

At the age of five the astute chimpanzee had sharpened his powers of mimicry to a razor's edge. For example, I marked out a stretch of level ground 125 yards in length and proceeded to traverse it with a hop, a step, and a jump. O'Gung III, after watching my every move with utmost human attention, and understanding, fell asleep where he sat—a perfect imitation of something I had done a couple of nights previous.

He's Learning "Frisper's Song."

It would be too great a task to describe all the experiments I have tried with O'Gung III in the last few years. I have tested his reaction to fire, smoke, beer, Greek literature, skiing, threats, kindness, capital punishment, light wines, union labor and parachute-jumping.

A few weeks ago, I was playing a medley of old tunes on my banjo. O'Gung III suddenly jumped up on the piano stool, gave me a look of almost subhuman intelligence, and struck the first note of "Keep the Home Fires Burning." There was no mistake about it.

So now I am giving him piano lessons.

This is my one hundred and twelfth experiment on O'Gung III, with no repeating and with never a dull moment. I don't think I can be accused of wasting this chimpanzee. He has been with me eight years, and he will remain with me for another eight if I can just break him of his new (but scientifically valuable) habit of setting fire to my house.

But, as I started out to remark, all this is probably news to you scientists who have given your lives to skinning weasels and measuring snail-tracks. I have written it for the benefit of fellow ape experts all over the world, and if any of them happens to have the price of a chimpanzee's ball I wish he would get in touch with me. O'Gung III is too delicate for life in prison, where he now awaits trial on an arson rap.

**HOT SAUCES ARE EASY TO MIX UP**

Use Proper Recipes and Follow Them Strictly.

By EDITH M. BARBER.

ONE of the most popular of the fine hot sauces with almost every one is the well-known Hollandaise. It is one of the easiest sauces to make if the proper recipe is followed. Too often, however, it is made unsuccessfully, although more pains than are necessary are taken in its production. Many recipes for Hollandaise call for washing the butter. Contrary to general opinion, this has no effect on the texture of the sauce. These directions originally were put into American recipes for this French sauce in the interest of flavor. Unsalted butter is commonly used in Europe and produces a sauce with a delicate bland flavor. In this country, however, a little salt in the sauce is generally liked. Why take salt out and then put it back?

The egg yolks, lemon juice and half the butter should be put into a small saucepan, which should be held over hot water while the butter is melting and the sauce thickening and while you stir vigorously. The rest of the butter should then be stirred in and the sauce beaten until it again thickens. Warning! Do not use a double boiler for this sauce unless you are very careful not to allow the water to boil in the lower part. Warning number two! When the sauce has thickened, set it aside if you are not ready to use it at once, and reheat it, stirring constantly, just before serving.

There are many variations of this type of sauce. You will find them under various names in different cook books. Most authorities agree that tarragon vinegar, in which herbs have been cooked, is used instead of lemon juice for Bearnaise. For a Mousseline sauce, heavy cream is beaten into Hollandaise. For a Trionon, sherry, instead of all or part of the lemon juice, is used.

A very delicate sauce, not unlike a Hollandaise, is made by combining egg yolks, sour cream and tarragon vinegar. This sauce may be cooked in a small double boiler until it thickens after a vigorous beating. For the lack of a better name I call this special sauce. It may be used with fish or vegetables.

The boiled salad dressings which may be served hot or cold do not belong exactly in any classification. They are thickened with a little flour but also demand egg yolks. The recipe for Bavarian sauce which I obtained in Germany is suitable to be used as a sauce for fish or veal or as a dressing for greens, over which it should be poured while it is hot.

Hollandaise Sauce.

- ½ cup butter
- 2 egg yolks
- 1 tablespoon lemon juice
- ¼ teaspoon salt
- Few grains cayenne

Divide the butter into two pieces, put one piece in a saucepan with the yolks of eggs and lemon juice, place the saucepan in a larger one containing hot water, stir constantly until the butter is melted, then add the second piece of butter and stir until it thickens. Remove from the fire, season with salt and cayenne and serve at once. If the mixture curdles from overcooking add two tablespoons of heavy cream and beat well.

Bearnaise Sauce.

Make foundation recipe for Hollandaise sauce, but substitute tarragon vinegar for lemon juice and add two teaspoons chopped parsley just before serving.

Mousseline Sauce.

Make foundation recipe for Hollandaise sauce and beat in gradually one-half cup heavy cream.

Special Sauce.

- 2 egg yolks
  - ¾ cup sour cream
  - 1 tablespoon tarragon vinegar
  - Salt
  - Paprika
- Beat egg yolks slightly; add other ingredients and stir over hot water until sauce begins to thicken. This sauce is delicious with cauliflower, asparagus, broccoli or with fish.

Mint Sauce.

- ½ cup vinegar
  - 1 tablespoon sugar
  - ½ cup chopped mint leaves
- Heat vinegar, remove from the fire, add the sugar and stir until dissolved. Add the mint leaves and stand in a warm place for one hour. More sugar may be used.

Maitre d'Hotel Butter.

- ¼ cup butter
  - 1 tablespoon minced parsley
  - 1 tablespoon lemon juice
- Cream butter and add parsley and lemon juice and beat well. Serve with broiled meats or fish.

German Dressing.

- 2 strips bacon
  - 1 tablespoon flour
  - 2 egg yolks
  - ¾ cup water
  - ¼ cup vinegar
  - Pepper, salt, paprika
- Cut bacon in small pieces, fry lightly and remove from fire. Add flour and blend well with bacon fat. Stir in beaten egg yolks, add water and vinegar and stir over a low fire a few minutes until smooth. Season to taste with pepper, salt, and paprika.

**Worthy of Your Pride!**

MOTHER, between you and me Sis is getting to be a little show-off. Last night when Dick called, there she sat, big as life, right in the middle of things, chirping about the new dress you made her: how you used a remnant left over from one of your dresses, and got it finished in one afternoon—she even had Dick feel the material.

Well, Elsie, you can't blame the child's appreciating herself in a new dress. How about ourselves? Didn't you say your jumper was the talk of the Tennis Club meeting yesterday? And haven't I been spending more time before the mirror since I made my new "Syllah Stout" model? I actually feel like a new person in it—imagine me being vain at my age!

Oh, Mother, you're not vain and you're as young as any of us. You just were lucky to find a particularly flattering style for your figure. That soft jabot makes you look lovely and the whole thing is so slenderizing. But only an expert like you could make such a dress.

It isn't being expert, Elsie, it is choosing a pattern that is deftly designed and giving full step-by-step instructions on how to proceed.

I'm going to make another blouse for my jumper soon, Mother. I always admired that white

plique shirt of Dick's, so I think I'll try it for my blouse, since the pattern is a lot like a man's shirt in design.

The Patterns.

Pattern 1229 comes in sizes 14 to 20; 32 to 42 bust. Size 16 requires 3½ yards of 39-inch material for the jumper and 1½ yards for the blouse. Pattern 1847 is available in sizes 36 to 52. Size 38 requires 4¾ yards of 39-inch material.

Pattern 1882 is designed for sizes 2- to 10 years. Size 4 years requires 1¼ yards of 39-inch material.

New Pattern Book.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents (in coins) today for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Patterns 15 cents (in coins) each. © Bell Syndicate—WNU Service.

**Household Questions**

Winter Salad—Mix one cup of celery with one cup of tart apples and half cup of walnuts. Cut the celery and apples into very small dice and combine with mayonnaise or cream dressing. Add walnuts just before serving. Garnish with celery tips.

Potatoes that are to be French fried should stand in cold water at least an hour before cooking.

Sometimes ink stains can be removed from the hands by rubbing them with the inside of a banana peel.

Carrots can be made crisp before cooking by scraping and leaving in cold water for half an hour.

You can produce your own sour milk for use in sour-milk recipes by simply adding a teaspoon of vinegar to each cup of fresh sweet milk.

Cane-bottomed chairs should be brushed to remove all dust and then washed with salt and water and placed in the open air to dry. This treatment tightens up the cane.

If you want to make bread crumbs in a hurry and have not a sieve or a large grater, put the bread in the oven or under the grill a few minutes to dry, but not to get brown. Then rub the two pieces together, and you will have quite good crumbs for eggs and bread crumbing or for stuffing.

Kidney Rolls—Mix one-half cup stale bread crumbs, one-half small onion, finely chopped, and one-half tablespoon finely chopped parsley. Season with salt and pepper and moisten with beaten egg. Spread mixture on thin slices of bacon, fasten around pieces of lamb's kidney, using skewers. Bake in hot oven 20 minutes.

A good cleaner for glassware having a deposit of lime from hard water, consists of a mixture of one cup vinegar in one quart of warm water into which six or eight slices of raw Irish potatoes have been cut.

If the roof should leak and stain your ceiling, cover the stain with block magnesia. Rub the block over the spot until the stain is covered, then smooth over with the tips of your fingers. It works like magic.

**WATCH YOUR BALANCE**

COMMENTS

L. B.

How do you do, Folks; how DO you do. Cheerio (and all that stuff.)

MILLION DOLLAR RAIN AND SNOWFALL

It was cloudy on Monday of this week — believe it or not. Late that evening, it commenced to drizzle, and about 12 o'clock on that night, it started to rain. It was a steady downpour; you know, 'just what the doctor ordered' Then to top it off, it began snowing.

Raymond Buckner, the energetic agent for the Roswell Excelsior Dry Cleaners, says he encountered the first snowfall at Tinnie on this Tuesday; he also reports five-inches of snow at Capitan on the morning of that day.

In the words of 'Bill O'Fare,' who so aptly says—  
"First it Rained  
And then it Snowed:  
Then it Rained  
And Frizz and Blaw."

STRIKE UP THE BAND!

While this is the topic of discussion, we note the Alamo-gordo hi-school has a 100 - piece band in the making. Mark Sloan, son of Mr. and Mrs. Brack Sloan, formerly of this place, plays Sousaphone Bass in the Alamo band.

Why can't this town do likewise? As we have said before, and it will bear repeating, every energetic hi - school student is anxious to get in 'the band.'

HI-SCHOOL BAND, OR NOT?

Mr. R. A. Chase, who has a lifelong experience in teaching voice and piano, is hereby designated to conduct the Carrizozo hi-school band. Mr. Chase has been directing the local high school bunch in a small way for some time. Note — It always pays to aim high, thus the old saying goes. Why not strive to emulate the example set by our sister town of Alamogordo?

Now, we don't want to hear the hi-school band attempt to play Rossini's "William Tell" and Herold's "Zampa" overtures — play numbers that you CAN give—WELL. Si, Senor.

Funds for financing this organization could be easily secured giving a series of dances, home-talent playlettes, etc. All that the hi-school band needs is someone with 'Pep, Wigor and Vitality.' — We've spoken our piece; now the matter is left up to YOU.

Heard on the radio Monday night — The Honorable Dennis Chavay from New Mexico.—P.S. It's just plain Dennis Chaves to us, with a hard 's.' How does he get that way?

BOY SCOUTS TO MANAGE CITY AFFAIRS, A DAY? and why not? It will give them some idea of responsibility and business.

WHAT DID THE G. M. WORKERS GAIN?

The General Motors strike is settled. What did the workers gain, we ask? A strike in which they lost over 40 days to get an increase of a paltry 5c an hour. A contemporary columnist

NEW 1937 FORD V-8 TRUCKS

New 1937 Ford V-8 Stake Truck

FORD brings you trucks with a choice of two great V-8 engines—each designed by Ford engineers specifically for the work you want it to do. The V-8 which established entirely new standards of performance with economy in the low-price truck field has been increased to 85 H.P. and gives even greater gasoline economy than last year's thrifty engine. And there is a new 60 H.P. V-8 engine built to handle lighter jobs with outstanding gasoline economy!

You will also find many other improvements which insure increased economy of operation and upkeep. Every part is ruggedly built to deliver the maximum number of ton-miles at minimum expense.

Let us lead you a 1937 Ford V-8 hauling unit for an "On-the-job" demonstration. Prove to yourself what Ford has done to cut your trucking costs this year!
