

Diamond Dust

By Joe Chavez

Won:	Lost:
Carrizozo 7	2

The Carrizozo Legionnaires, accompanied by Skipper Bamberger and a good collection of loyal fans, which included Probate Judge St. John, Jerry, the Barber, John (the Baptist) Dearing and Little Joe (the Wrangler and writer of this column), set sail for Alamogordo last Sunday to engage the White Sands Elephants in a second encounter of the current season.

Having barely nosed out the mastodons here by one score the previous Sunday, the Legionnaires and fans alike, were somewhat leery as to what they would run into on the Elephants' own stomping grounds.

Their star pitcher, Lanky Candelero, was their bright hope to stop our murderers' row dead on their tracks and he was sent to the mound a strong favorite to turn the trick. He attained his purpose for about two innings, but our boys were full of confidence and kept plugging along until they finally began to solve his fast-breaking curve. They hit him very scattered, but the blows came in opportune times and the same were turned into runs. Tony, as usual, started the fusillade, which later spelled defeat for Alamogordo.

Andy Luera was in excellent pitching form and had good control on his screw ball. He allowed only four hits to those hard-hitting sluggers throughout the melee, and was only in a tough spot, but once, when one of the Elephants unfurled his trunk and almost sent the sphere to the foot of the Sacramentos, scoring a man ahead of him. Out of the four scores they collected, those two were the only ones earned, the other pair being manufactured through errors. Andy whiffed eleven batters and was given good support by his cronies, especially Simpson in centerfield and Marquez on second base. Sally, Tony, Jerry, Meyer, Red, Gutierrez and Lopez, all deserve due credit for the victory. In the absence of Van Schoyck, Manuel Chavez was assigned to the backstopping position and he worked with Andy like a charm. Manuel sustained a painful injury in the 8th inning when he twisted his ankle on first base, and what was at first thought to be a badly sprained ankle, turned out to be a broken bone in his foot and he is now getting around with the aid of crutches. He was game, though, and finished the task. The Alamo catcher, too, suffered a badly split hand when a ball hit him between the index finger and thumb. He couldn't continue.

Meyer duplicated his feat of a few Sundays back, when he hit a homerun and got to third base. Andy was responsible for two of the ten runs which Carrizozo made. Pruett umpired in his usual fair and impartial manner.

Another near casualty was in the offing when Jerry, the Barber and Joe, the Wrangler disappeared until a few minutes before game time. If you ask us, we payed our respects at the sheriff's office (no, not jail), visited a garage, Rolland's Drug Store, attended a handball game and surveyed Harlem and the re-

Local Mention

Miss Bobbie Church, who is attending summer school at Silver City, will be here next week on her way to her home in Ilmo, Mo. After a short stay at Ilmo, she will return here to teach in our schools this coming term.

Mr. and Mrs. A. J. Rolland were in Roswell Wednesday, being one-day guests of Mr. and Mrs. Poe Corn and children.

Mrs. Nellie Branum and Mrs. Margie Clouse were El Paso visitors this week. Mrs. Clouse is on her vacation, during which time, Wm. Sultemeier of Vaughn is filling her position at the Citizens' Bank.

Mrs. D. L. Byron leaves this evening for Bartisville, Okla., for a visit with her sisters and an indefinite stay with other relatives with the idea of establishing her future home. She has resided here since 1909 when Mr. Byron took up a homestead near Polly.

Mrs. Esther Spence and daughter Miss Virginia of Santa Fe were visitors last week at the home of Mrs. Spence's parents, Mr. and Mrs. F. J. Sager. Mrs. Spence has a responsible position in the Treasury Department at that place.

Mrs. Alvin Carl is student operator at the local telephone office.

Mr. and Mrs. T. G. James of the Kudner O Bar O ranch near here, were business visitors in town this Monday.

Mrs. Laura Sullivan of Roswell visited Carrizozo relatives and friends Wednesday of this week.

Mrs. A. F. Roselle, County Librarian, left this Thursday for a two weeks' vacation in Lawrence, Kansas, to visit her mother and two sisters, Kathleen and Zoe and nephew Haven Glassmire. She will attend a relation reunion at Topeka and also visit in Kansas City.

Much needed repairs are being made in Alfredo Lopez' Barber Shop. A hardwood floor was put in this week, preparatory to the laying of new linoleum, we understand.

Frank Maxwell, stockman of the Claunch - Gran Quivira country, was a business visitor in town this Wednesday. It looks like you were having your share of rainfall, Frank.

Mr. and Mrs. Verl Groce visited Mrs. Groce's parents, Mr. and Mrs. F. L. Boughner, in El Paso this week. They stopped here for a few hours' visit with old friends. Mrs. Boughner and daughter Rhea came up with them, returning to El Paso yesterday morning.

Benigno Gallegos and guest, Louis Lalone of Pasadena, Calif., returned yesterday from the Manzano country, where they visited relatives for two days.

Benigno Gallegos and guest, Louis Lalone of Pasadena, Calif., returned yesterday from the Manzano country, where they visited relatives for two days.

The Mescalero Apaches come here next Sunday.

Highway 54 Association

Delegates from every town and city from Nara Visa to El Paso will meet at Santa Fe Thursday evening, July 28th, for a conference before meeting the Governor at 10 a.m., Friday, the 29th. The object of the meeting is to endeavor to have Highway 54 paved from Santa Rosa to Tularosa.

Mr. and Mrs. Austin Wooten and children are here from Roswell and while Austin is on his vacation, they are occupying their home on the Nogal-Mesa which Austin purchased some time ago. As undertaker T. E. Kelley will be absent from the profession for a short time in order to entertain his visiting relatives, Austin, who is a licensed embalmer, will relieve Mr. Kelley during the stay of the visitors.

Walter Riggs has a force of cowboys branding calves at the I-X Ranch this week.

Dance with the American Legion and Legion Auxillary at the Community Hall on Wednesday night, July 27. Music by Saturnino Chavez, Jr., and his orchestra.

Mr. and Mrs. A. E. Huntsinger came over from Vaughn yesterday and will stay over for the week-end. They said the rainfall at Vaughn was not so great as in Carrizozo, but more is expected before the week is over in that locality.

The WPA force built a nice rock walk around the Santa Rita Church this week, for which Father Salvatore and his parishioners extend their heartfelt appreciation.

George Joyce arrived home Sunday from an extended pleasure trip in the east and south. He first visited his old home in Atchison, Kansas, afterwards going to Missouri, Indiana, and Tennessee.

Miss Helen Rice is here this morning from Tularosa, and will return this afternoon. Mr. and Mrs. W. L. Weber, formerly of Fort Stanton, are at Tularosa visiting the Misses Helen and Charlotte, Mrs. Weber being one of the Rice sisters.

To Raise Standard of Milk

Santa Fe—Dr. E. B. Godfrey, state health director, announced that concerted campaign to raise the standard of milk sold in the state had been inaugurated with the employment of a trained chemist to head a supervisory division of the department.

Curtis Williams, for six years connected with the Texas State Health department, will direct the new division's work, Dr. Godfrey said.

Williams will supervise the enforcement of the U. S. Public Health Service-sponsored ordinances which have been adopted in a number of municipalities in the state, and will work with the district health officers in general inspection of dairies and their products.

Dr. Godfrey stated that Williams was now at work installing a system of inspections designed to materially raise the standard of milk sold throughout the state.

Carrizozo vs. Mescalero Local Grounds, 2:30 P.M. Sunday, July 24

Weekly Weather Report

Total precipitation for month up to Wednesday, 20th, 3.74 inches.

Julia Romero, Weather Observer.

Democratic Central Committee Meeting

Last Saturday afternoon at the county courtroom, the Democratic County Central Committee met following an official call by Chairman Wayne Richard. The chairman, after having the call read by Secretary Miss Thelma Shaver, made a short but effective talk on matters of interest to the county organization. The matter of time and place for holding the next convention which will name delegates to the state convention, came up and there being two places mentioned, Lincoln and Carrizozo, the chairman put it to vote, Carrizozo being the place designated, the date being July 30, at 1 o'clock in the afternoon.

Talks were made by different members of the Committee, and although not a member, Justice of the Peace Elerdo Chavez asked permission to speak which was granted. He said that he wished to make a statement to the effect that he was now a Democrat and would support the Organization.

An erroneous rumor came from the meeting to the effect that the chairman had said that Captain would not be considered as a place for holding the next convention, on account of the recent bond issue election. The rumor was false, as the Associated Press reporter, who took the minutes of the meeting, is authority for the fact that no mention was made of the above named town, as but two places were nominated.

Ted Brusuelas of Tularosa was a Carrizozo business visitor on Wednesday of this week.

Ben C. Sanchez is building a garage and wood shed at his home on the east side.

Lon Merchant of Capitan was a business visitor in town one day this week.

Bob Crenshaw was a business visitor from his ranch near Rabenton yesterday and reported abundant rains in that vicinity.

Mrs. J. H. Fulmer of White Oaks was a visitor in town, this Wednesday.

Mrs. Forrest Cathey is here from Tucumcari to visit with her mother, Mrs. G. C. Bigelow. She will leave shortly to take up the study of beauty culture either at Roswell or Albuquerque.

Manager Peterson of the S. P. Hotel, Mrs. Peterson and daughter Deloris arrived home last night from a pleasure trip to Mr. Peterson's old home in Michigan where they viewed the old landmarks, visited relatives and old friends.

Mr. and Mrs. H. M. Kennedy of Jicarilla were Carrizozo visitors yesterday.

Out-of-the-Ordinary

A. L. B.

The state of Iowa does not raise jumping beans, but it certainly has a jumping boy. Last week, a gang of youngsters put in most of a day in jumping from a platform into a large bin of oats Junior Schilling was very tired that night and when he went to bed he did not wake up until he had jumped from the second story of his home to the sidewalk, 20 feet below. Aroused by the noise, his mother rushed to the front door, only to meet Junior coming in, smiling and uninjured.

A short time ago, in Oklahoma City, the rear tire of a truck blew out on a downtown street. The explosion hurled the two remaining rims 50 feet in the air, crashed through a display window, tearing everything in the way to the back wall of a store. Nobody was injured because the accident happened at midnight.

A few nights ago in Irvington, N. J. Joe Accocella was sitting up a little late, pouring over some new invention, when he heard something go "kerplunk" in the street in front of his home. He opened the door, looked out and saw some dark object which smelled like fish. Going out, he saw a shark in the street, weighing 400 pounds. The entire street cleaning department had to be called out to take the carcass away. A passing truck had thrown the shark out as it came from the wharf.

They say that the Irish are lucky and this proves it. Last week near Cheyenne, Wyoming, Martin Kelly was standing on the bank of a canyon, when he noticed a four-leaf clover on the brink of the canyon. He picked it up and in three minutes, lightning struck a tree twenty feet from him, splitting it to pieces. Martin was unharmed. Just then the ground under him caved in and he was thrown headlong down toward the bottom, but his luck was with him. He lit on the soft branches of a fir tree about halfway down the slide, after which he made his way easily to the other side and climbed out, slinging "I r i s h Eyes."

A needle nearly two inches long was extracted from the back of Mrs. Veda Tope of Artesia and the lady is of the opinion that it was accidentally inserted in her body when she was a baby. All through her life, she has had pains in her back, which she attributes to the wandering needle. This calls to mind, an instance in London when a surgical needle was taken from a man's head, after an operation on his foot 20 years before the last operation.

Sam Danforth of Butte City, Montana, couldn't eat fat and his wife dearly loved it, so she sued him for divorce. The judge said, "phooey!"

Personals

G. G. Thompson of Laredo, Texas, Larita, Abe and Frank Thompson, all of Fort Worth, are visiting with the T. E. Kelley family of Carrizozo and the W. C. Hendrens of Fort Stanton.

Mr. and Mrs. Clyde Willingham and mother of Monahans, Texas, visited the Dewey Stokes family last week-end.

Louis Lalone and son Louis, Jr. are here from East Pasadena, Calif., visiting relatives and old friends. Louis makes a trip every year to the land of his childhood days, good old Lincoln County.

Mr. and Mrs. Albert Wood and small son of Oscura were Carrizozo visitors last Saturday and made this office a friendly call.

Judge M. C. St. John, Mrs. St. John and children are in Albuquerque this week, visiting the Lell St. John, Sam Martinez and Joe Garcia families.

Mr. and Mrs. J. R. McCracken were visitors in town from their ranch near Coyote Monday.

Mr. and Mrs. M. U. Finley and their granddaughters who are sojourning with the Finleys at their summer cottage on Eagle Creek, were down from that beauty spot Tuesday.

Walter Fulmer, who is in the military training camp at Fort Bliss, has received a double honor since his enrollment. He has been appointed a corporal and after receiving his stripes, he was appointed gunner on No. 1 field gun. Gunning, as we all know, is strenuous work and while Walter is of the opinion that he may never die for his country, he says he is certainly sweating for it. The Carrizozo boys, Walter, Bradley Smith, Albert Sanchez and Aubrey Hiney, will finish their course July 30.

John McDaniel, merchant of Nogal, was a business visitor in Carrizozo on Tuesday.

BORN—Tuesday, July 19, to Mr. and Mrs. Ray Harkey, a boy. Mother and son are doing nicely. His name is Geo. Wesley.

Eddie Long of Capitan made a trip to El Paso the latter part of last week and returned with Mrs. Long and the new baby girl.

Rev. Vandiver and daughter Jane are in Alabama, the home of Rev. Vandiver and while there, he will hold a series of meetings among the people of his boyhood days. They will be absent several weeks.

Mack Shaver, son of Dr. and Mrs. P. M. Shaver, has received a promotion to chief inspector of Caballo Dam near Hot Springs. Mack has been assistant to the chief for some time and his recent promotion came as a reward of merit. We congratulate him on his advancement.

Gus Grossmiller met with a painful accident last week while at his work at the Coyote pumping station. In adjusting a piece of machinery, Gus got his hand caught between two parts and pinched so badly that the physician ordered him to stay away from work for a week or so. Gus took advantage of the idle spell and is now visiting his children at Superior, Arizona.

ADVENTURERS' CLUB

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

"He Wanted to Live"

By FLOYD GIBBONS
Famous Headline Hunter

HELLO EVERYBODY:

Today, I've got a swell yarn for you. It's the story of one of the greatest disasters in the history of the Virgin Islands—yes, and it's a lot more than that, too. It's the story of a heroic deed and a darned swell illustration of what the will to live will do for a man—or a boy. Fellow Adventurers, let me introduce to you Harry Zieman of Brooklyn, the man who wanted to stay alive. And now let's get on with his story.

It starts in St. Thomas on the Virgin Islands in the year 1907, 10 years before the United States acquired that territory from Denmark. Harry's father was a judge under the Danish government. He lived in St. John, but Harry and his brother Ed had gone with the local cricket team to play a match with the team of the St. Thomas high school and were returning on the sloop Sea Gull. There were 21 people on the Sea Gull including the entire St. John cricket team and a woman with four young children. They set out from St. Thomas about six-thirty in the evening on July 13—sailed out of the harbor close-hauled in a freshening breeze.

Their Sloop Capsized in the Gale.

In three-quarters of an hour that breeze had become a gale. A few moments later a "spinner" struck the sloop broadside and knocked it completely over.

In less than a minute to tell it the sloop capsized and sank. Harry was sitting at the stern, and he dove into the water as she went over. He called to his brother who had gone below a few minutes before the spinner struck but he got no answer. For a while he treaded water. As he did he felt a small body rub against his and raised it to the surface. It was a little boy—the four-year-old son of the woman who had been aboard the Sea Gull with him. He was dead, and Harry let his body go again. It was four miles to shore, and it would be a miracle if Harry got there himself.

Three Began the Long Swim.

Four miles to shore in a raging gale. Yes, it would be a miracle if thirteen-year-old Harry Zieman made it. But Harry wanted to live. He turned toward land and began to swim.

He had barely started when he saw his brother Ed and his pal, Jimmy, passing him. He called to them and told them not to swim so fast—to save their energy if they ever expected to get ashore alive. Guided by the light-house at the entrance to the harbor of St. Thomas, they swam on.

"For a while," he says, "we could hear yells and cries from people who were still afloat, but after an hour all was still except for the break of the waves as the wind continued to lash the sea to fury. We swam for another hour, then Jimmy began to tire. Soon he was in a bad way.

Harry dove as the sloop went over.

I swam to the windward side of him, the better to protect him from the waves and put my right hand under his left armpit. When I got tired, Ed would believe me. This went on for quite a while but eventually Jimmy became so tired he couldn't raise his hand. He sank for the first time, and grabbed my shirt as he came back to the surface. I went under and would undoubtedly have drowned if Ed had not come to my assistance.

Ed kept Harry's head above water, but poor Jimmy went down. He clung to Harry a few seconds and then sank. There was nothing Harry and Ed could do about it. They were lucky to get out alive themselves.

Both boys were tired now, dog tired. BUT THEY WANTED TO LIVE. They kept on swimming. "We had been swimming for at least three hours," Harry says, "and the shore seemed no nearer than before. Suddenly we heard a voice calling and for a time we did not answer for fear it might be a drowning man who would pull us down with him as Jimmy had almost done. But at length we swam in that direction and found Louis, Jimmy's brother, captain of the Sea Gull."

How the Two Lads Saved Louis.

By this time all three of them were all in—so far gone that they agreed to swim apart so that if one went down he wouldn't try to drag the others with him. They swam for another hour. Then, suddenly they heard Louis calling. "I'm going down," he shouted. "I've got a cramp in my leg!"

Ed and Harry swam to him. One on each side, they held him up until the cramp had passed. Louis kept his head. If he had lost it and fought them, all three would have gone down together. After that they swam on again. They were swimming in a daze, almost dead with fatigue. BUT THEY WANTED TO LIVE!

More hours passed. They kept on swimming. At last they felt bottom under their feet and half-stumbled, half-crawled up on a sandy beach. It was then between two and three o'clock in the morning and they had been swimming for seven or eight hours. Exhausted, they dropped on the beach with the waves lapping their feet, and fell into a dead sleep.

It was morning and the sun was shining brightly when Louis awakened the other two. They walked up the beach in search of other survivors, but there were none. Then they walked to the cabin of a native woman who fed them and got a boat to take them home.

There's a sequel to that story. A month later the H. M. S. Ingolf of the Danish navy steamed into the harbor, and shortly after that the officers of the ship wore drawn up before Harry's home while Governor C. M. T. Cold presented Harry and Ed with life saving medals awarded them by the king of Denmark for their rescue of Louis. They wanted to live, those two kids—but they weren't too busy at it to help the other fellow.

Prairie Chicken Hard to Shoot
The prairie chicken, owing to its wariness and choice of open range as habitat, is one of the most difficult of game birds for hunters to bag. It usually rises far ahead of the hunter and out of the range of shot.

Young Spiders Take Flight
In autumn each year young spiders take flight like the birds. They spin a thread and allow it to fly in the wind. The insect cuts this loose and clings to the end, and if conditions are favorable it goes on a long voyage.

Name Murray Means "Seaman"
The name Murray is of Celtic origin and means "seaman." We consider it a different name from Murphy, Murtagh or Murtough, but it is only a little different, says an authority, as these last three all mean "sea warrior."

Earliest Battle of Armageddon
The earliest battle at Armageddon so far known, was fought in May, 1479 B. C., when Thutmose the Third of Egypt defeated the Asiatic allies. This feat was duplicated in September, 1918, A. D., when General Allenby led a British division against Turks near the site.

World's Robust Health
The world's robust health shows itself in the way it gets through times of transition, flourishing always with each new ledge it reaches, but climbing ever upward.

Identification of Handwriting
Identification of handwriting is a matter of great importance in law cases which involve questioned documents.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART

WASHINGTON.—President Roosevelt addressed a letter to Chairman Stuart Rice of the central statistical board the other day, in which he asked in effect why there is need for so many "official reports" from individuals and corporations engaged in business. The President's letter indicated a feeling that, if there are so many reports as complaints have disclosed, something ought to be done about it.

Too Many Reports

It is now Mr. Rice's job to find out when, and where, and why concerning these floods of reports which government demands. But how about me finding out, too, I thought! I started on the job like a bird dog through the bush. It did not take long for me to realize that I had set myself to a task that is likely to occupy Mr. Rice and his staff of several hundred perhaps a year to assemble an answer. I learned a lot of things, however, and that is the reason I am writing about "official reports" at this time.

Speaking generally, at first, I can say that never in all history has there existed a condition such as business men and women now face, and, of course, within the last few years farmers have had to make out reports, too. The reason for the statement that the condition is worse now is that the situation represents a growth. Year after year, generation after generation, succeeding Presidents and succeeding congresses have added to the functions of the national government. Government has gone into new fields, taken on new obligations, new commitments, increased its scope of regulation of this and that and the other. As these functions have increased, more and more reports have been ordered and required; more facts have been needed, and, in addition, bureaucrats have relegated to themselves additional and unanticipated powers. Now, what we have is a tangled mess, a slimy octopus whose tentacles reach into every corner and nook and cranny of the nation.

Before considering some of the horrible details (which are horrible only because they are so general in application), it seems to me we can well consider who is responsible. I mentioned above how succeeding Presidents and congresses have expanded the functions of government. Those Presidents and members of the congresses were elected by the voters. The campaigns, in nearly every instance, included a harangue for establishment of some new agency, passage of some law to drive money changers out of the temple, to prevent grinding the little fellow, the poor, into the earth; to regulate monopolistic business; to care for the aged after their lives of useful work had been spent; to collect new taxes here and there; to assure the agricultural community a parity price for its products—a thousand and one things were campaigned for or against. So the people voted and elected a President or a senator or a representative. They also elected a governor and the various officials of their state wherein a legislature operated as does congress for the country.

It has not mattered, therefore, whether there has been a Democrat or a Republican in the White House, except in the matter of degree to which the new laws have been enacted. The growth has gone on just the same. Every time a politician conceived an idea to get votes, he campaigned on it—and a new law resulted. With the new law came another deluge of "official reports." In a general way, therefore, the voters must accept some responsibility. But the chief responsibility must rest with members of the house and senate and the various Presidents who have served in their turn. Why? Because no one can be expected to understand fully this gigantic machine called government unless that person has had an opportunity to study the machine. The layman has not had that chance. Presidents and congresses have had the chance.

To get down to the details; that is, to relate some of the incidents which had become known to the President and which resulted in his letter to Mr. Rice, we might begin with taxes. The head of a dairy company which operates in three states reported to his stockholders lately that in one year his firm had been compelled to make and file a total of 1,115 separate tax reports. That company maintained a staff for the sole purpose of handling the various reports that had to go to the federal government, the governments of the states in which the company operated and the cities where milk and dairy products were sold. Having such a staff, the company knew exactly what it cost—\$265,000 a year. It should be added that the cost of these reports necessarily became a part of the company's overhead and the overhead ex-

pense enters directly into the cost of the dairy products for which the consumer pays. It could easily result in an increase of one cent per bottle for the milk served to its customers.

It takes no stretch of the imagination to conceive what the cost is for a large corporation to handle its official reports to various agencies of the national, state and local governments if that corporation operates, say, over half of the United States. The expense runs into millions upon millions of dollars annually. Who pays? You and I, the consumers.

I have not had access to all of the records required by the department of agriculture because many of them are confidential, but I believe it is safe to say that some fifty-odd reports have to be made respecting every farmer who has signed up in compliance with the crop control laws and the land conservation program. I think the farmer directly involved has from eight to ten of these reports and official documents; the county committee which inspects and reports on him has others; the county agent has still more reports to make—all still involving this one farmer but including others as well—and these are followed by regional and national reports until all totals are entered here in Washington.

Or, at the risk of being too personal in dealing with a national problem, I might cite my own experiences. Mine is what is called a one-man office. That is to say, with the aid of a secretary, I must run my own little business. But even as inconsequential as that office is, consider this situation: I must file an income tax return annually. That return must include an extra statement which covers a general outline of my meager income and the expenses of my office. I must pay ten dollars a year for a "license" which gives me the privilege of writing to earn my living, but I must file a report before I get that license in the District of Columbia. Twice a year, I must file a report of my gross return from my work in the District of Columbia—and pay a tax on that income. Each month, I have to file a report to the District of Columbia employment board, showing how much I pay my secretary, how many hours a week she works and pay a tax which theoretically is saved up and paid to her in case she is unemployed. Each month, also, I am required to file a report with the United States social security board, giving the same information—and pay another unemployment tax. And each three months, I am required to file another report with the social security board which seems to be a report showing that the monthly reports are correct.

It has been my good fortune to have gained a legal education by virtue of four long years of night school, so I have not had to hire a

lawyer to help me with my reports. They have been comparatively simple, generally. But that is not the case with a larger business.

Lawyers, however, would be no help in the circumstance that I am now about to relate. A young lady who had served as my secretary several years left my service. When I filed the last monthly report for her name and paid the tax, I attached a letter explaining that she was leaving and that there would be no further reports in her name as far as I was concerned. The letter was written in the hope that the file would be complete.

This incident happened last October. In March, 1933, I received a notice from the board, advising me that I had not paid the tax on the salary of the lady in question for the month of February, 1933. Not a word about the other months from October to February. And if I didn't pay, said the notice, there were penalties, court proceedings, etc. Yes, you guessed it! I threw that notice into the waste basket. Two months later, I had the honor to be visited by an inspector. He was courteous and gentlemanly, but firm. I must pay the tax—not for February, but for December. You can let your own imagination run high, wide and handsome about the results of that visit.

Well, I merely bring out those facts because they show the need for the voters of the country to take some action on their own and quit following blindly the demagoguery of the politicians.

Previously in this column I have written about several corporations which, after filing several thousand reports, have had inspectors visit them to see whether they were complying with the law. Since that time, one of the business men about whom I wrote originally has told me that other inspectors have come to see whether the first crew had complied with the law in making its investigations.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

By HAROLD L. LUNDQUIST, D. D., Dean of The Moody Bible Institute of Chicago.

Lesson for July 24

GIDEON: FOLLOWING GOD'S PLAN

LESSON TEXT—Judges 7:4-7, 15-23. GOLDEN TEXT—Have not I commanded thee? Be strong and of a good courage. Joshua 1:9.

PRIMARY TOPIC—Why Gideon Won. JUNIOR TOPIC—Gideon's Band. INTERMEDIATE AND SENIOR TOPIC—The Lord's Three Hundred. YOUNG PEOPLE AND ADULT TOPIC—A Wise General.

Who is he? What are his connections? How large an organization does he represent? These are the measures of the greatness of a man which are common in the world. Even in religious circles there is a seeking for the men with "big names" when something is to be done. Our lesson for today reiterates the principle which we all know but which we practice so little; namely, that whatever is accomplished that is really worth while is done by God and that He uses only humble instruments—the "foolish things," the "weak things," the "base things," and "things which are despised" (I Cor. 1:26-29). No flesh is to have any opportunity to glory in His presence. If men who are accounted great by this world are useful to God it is only because they are themselves humble in spirit and service.

Gideon came from an obscure family in a small tribe in Israel—and was astonished when God called him (Judges 6:15). He asked God for several signs to assure him that he was the chosen instrument of the Lord (read Judges 6), but once he was certain he went forward, nothing doubting.

I. An Insignificant Army (vv. 4-7). At first thought it seems almost foolish to comment on this story of repeated reductions in the size of Gideon's army in these hectic days when the nations of the earth are living for but one objective—to create a fighting machine bigger and more fully manned than that of any other nation.

But on second thought it is just the time for such comment, because what the nations are doing is a perfect example of the hopeless philosophy of men, while what Gideon did is a presentation of God's way. These notes are being prepared in a city distant from the writer's home, where he is attending a conference of national leaders in a field of great and international importance. A long session just concluded was addressed by a number of brilliant and capable men and women—and the conclusion they reached was that America was a badly befuddled nation, lost without a sense of direction in a wilderness of incoherent and inherently contradictory theories and about to lose its dearly bought freedom, unless someone points the way out. The only solutions offered were bigger and better human programs, and when a suggestion was made that our need might be spiritual the discussion was promptly directed in another direction.

We need the lesson today that it is by the seemingly insignificant Gideon's band that victory is to be obtained. Take courage, ye 300, rid yourselves of the 22,000 fearful ones, let God sift out the 9,700 who are not alert to the danger of the enemy, and then, under some Gideon who is obedient to the command of God, go forward to victory. You are the hope, and the only hope of our nation. Do not fail God in this crucial hour.

II. Obedience to God's Command (vv. 15-23). After the Lord had encouraged the heart of Gideon by the account of the dream of the Midianite (vv. 8-14), he and his band are sent forward with strange weapons and even, stranger instructions.

It is not ours to question "Why?" when God tells us to move forward. When will we learn that He knows more than we do, and that obedience is all we need to render unto Him? "Behold, to obey is better than to sacrifice, and to hearken than the fat of rams" (I Sam. 15:22).

III. The Sword of the Lord and of Gideon (vv. 18, 20). While some folk err in counting the Lord out and making everything depend on man, there are a few who make the opposite error and become fatalistic in spirit and relatively useless to both God and man—because they hold an improper view of the manner in which the Lord works through human agencies.

A man who objected to soul-winning efforts, and especially personal work, said that he believed "God could save a man if he were alone on the top of the Alps." Of course He could, but God does not ordinarily work that way. It is the "sword of the Lord"—yes, but do not forget that it is "the sword of the Lord and of Gideon." God has graciously condescended to do His work on earth through human agencies. Let us be ready and subservient instruments for His use, but let us at the same time be alert and active in His service. The two are not at all inconsistent, in fact the one whom God chooses to use is usually the one who is already busy about His work.

For Warm Weather Comfort

REDUCE

By This Easy, Comfortable Method

Send for the Free Bulletin Offered by C. Houston Gowdies

When the temperature mounts, fat hides the loss of the body's heat. The state of the overweight individual is more likely to rise than that of the thin person, and he therefore is more liable to heat prostration. For greater comfort, better appearance and for improved health, the man or woman who is overweight should resort to the reducing method offered free by C. Houston Gowdies, and reduce by the scientific method of counting calories.

The bulletin is complete with a chart showing the caloric value of all the commonly used foods and it contains simple means for determining the caloric value of scientific weight reduction.

Just send a postcard to C. Houston Gowdies at 6 East 93rd Street, New York City, asking for his reducing bulletin.

World of Difference Many a man has mistaken "gall" for grit.

HELP KIDNEYS

To Get Rid of Acid and Poisonous Waste Your kidneys help to keep you well by constantly filtering waste matter from the blood. If your kidneys get functionally disordered and fail to remove excess impurities, there may be poisoning of the whole system and body-weakness.

DOANS PILLS

Keeping Up With Science

By Science Service

Collecting Insects Is Inexpensive Hobby And Quite Amusing

WASHINGTON. — You don't need to spend a lot of money to have a lot of fun cultivating a scientific hobby, at least in its beginning stages. If the collecting fever, really takes hold, you'll probably empty your pocketbook on your hobby, anyway, but you can take a trial spin at it for next to nothing.

If the notion of making a collection of insects appeals to you, for example, you don't even need to buy a butterfly net. If you are handy with tools you can make one for yourself; but in some ways the beginner at "bug-hunting" may even be better off without a net.

Butterflies, for all their attractiveness, are not the best insects to begin on. They are fragile and hard to handle, and they take up a lot of room. The same may be said for dragonflies, craneflies and many other insects that require a net for their capture.

Beetles are almost an ideal group for starting-out purposes. They can be caught in the fingers as they lumber along the ground or cling to trees and bushes. They can be found by turning over sticks and stones in the woods, or by digging the bark off rotten logs with a stout knife or the point of a trowel. They don't get messy in handling, and they don't take up much room in your trays or boxes.

Several other groups of insects offer somewhat the same advantages. You might prefer to try scooping up waterbugs, or nabbing grasshoppers, katydids and crickets, or even capturing the wild cockroaches of the woods, which are quite different animals from the pests that haunt our houses.

Killing Bottle Necessary. One piece of equipment is necessary for any kind of insect collecting. This is a killing bottle. It is crucial to carry captive insects around alive, and to stick pins through them without first humanely killing them is not to be thought of. So every collector carries a wide-mouthed bottle with a tight stopper, into which he puts his insects, along with some chemical whose fumes are quickly lethal to insect life.

Common pins aren't the best things for pinning out insects but they'll do all right, especially if you try to get thin ones. Don't pin your beetle exactly in the middle, between his two wing-covers, but thrust the pin through one of these hard, shell-like halves; it will hold better there.

You don't need expensive special boxes or trays for your collection. Cigar boxes will do well enough, for a start.

Small City Families Likely to Economize by Not Consulting Doctor

WASHINGTON.—Families living in small midwestern cities "are more likely to economize by not seeing the dentist, the oculist—or even the doctor—than by not buying supplies for the family medicine chest, when funds run low."

This is the conclusion of a survey of medical expenditures made under the direction of Dr. Louise Stanley, chief of the bureau of home economics of the department of agriculture.

The survey was made of 3,118 native white non-relief families living in the following representative cities: Lincoln, Ill.; Boone, Iowa; Columbia and Moberly, Mo.; Mount Vernon and New Philadelphia, Ohio; and Beaver Dam, Wis.

Families with low incomes consult doctors more often than dentists and almost never see oculists. Most of them, however, reported spending some money for medicines and drugs during a 12-month period of 1935-1936. The amounts spent for medicine ranged from \$8 to \$21 per family per year at the different income levels.

Not until the family income reached the \$500 per year level did the reports show as many as half the families consulting a physician.

Diet for Long Life
PHILADELPHIA.—The echidna, or Australian spiny anteater, in the Philadelphia zoo, has established a record for longevity among animals of its kind. Keepers ascribe its survival for 35 years to two things: a dark box in which to sleep during the daytime, and a steady daily diet of one raw egg, one pint of milk, and one teaspoonful of lime water.

Pasteurize Goat's Milk
MALTA.—Island authorities at this British Mediterranean naval base have turned to systematic pasteurization of goat's milk in an effort to wipe out Malta fever.

'Sun Power' Problem To Be Studied by Scientists of M. I. T.

CAMBRIDGE, MASS.—Methods of creating "sun power" by converting the tremendous amount of solar energy into some form in which man can use it as a source of power will be the goal of a comprehensive program of chemical, electrical and mechanical research to be undertaken at the Massachusetts Institute of Technology.

Enabled by a \$647,700 gift from Dr. Godfrey L. Cabot of Boston, the research will be devoted specifically to a search for direct means of converting the sun's radiant energy into useful power or storing such energy for future use. Under the terms of the gift the income from the fund must be used in these studies for at least 50 years, after which it may be diverted to other purposes at the discretion of the Institute's corporation.

While scientists at Technology will concentrate on direct physical and chemical methods of using solar energy, research workers at Harvard university, which received a similar grant from Dr. Cabot last year, are making a pioneering study of the possibilities of speeding up the growth of trees, and thus "streamlining" the conversion of sunlight into forms suitable for human use.

Great Potential Power. In announcing the gift, Dr. Karl T. Compton, M. I. T. president, commented on the enormous potential power of solar energy, pointing out that heat from the sun reaches the earth in the temperate zones at an average rate of approximately 4,000,000 calories per square yard daily. In the three months of greatest sunshine an acre of land, he estimated, receives directly from the sun an amount of heat equivalent to that which would be produced by the burning of about 250 tons of first-class coal.

"The store of energy in our familiar fuels, while great, is not inexhaustible," he continued, in pointing out the importance of such research.

A primary object of the project will be to determine whether use of solar energy is economically feasible and practical. Solar energy devices already proposed and studied elsewhere will be evaluated with this point of view in mind. The second aspect will consider chiefly the feasibility of developing new conversion equipment using phenomena now under study which hold promise of ultimately being useful in the solution of this problem.

Corn's Vitamin Content May Be Increased by Scientific Breeding

ITHACA, N. Y.—Breeding for increased content is indicated as a definite possibility by experiments on corn reported by Drs. L. F. Randolph and David B. Hand of Cornell university.

The vitamin A content of corn and other vegetables depends on the amount present of certain yellow pigments, the carotinoids. Amount of the carotinoids in turn depends on the hereditary makeup of the plant; it is a Mendelian trait.

Doctors Randolph and Hand bred strains of yellow corn to increase the number of chromosomes in each cell, bearing the hereditary units or genes. When they doubled the chromosome numbers (and thereby doubled the gene numbers) they obtained marked increases in the vitamin A activity.

Giant Race Lived in Swamps of the Coal Age

COLOGNE, GERMANY.—A race of giants that lived in the Coal age swamps is described by Dr. P. Guthorl of the Saarbrücken School of Mines. They were creatures with jointed bodies like the lobsters and insects of today, and apparently were evolutionarily midway between the lobster tribe and "thousand-leggeds" or myriapods.

But they were very much bigger than any modern lobster or thousand-legged. None of the fossils thus far found is entire, but from the fragmentary remains Dr. Guthorl estimates a three-foot length as not uncommon; and one specimen from a coal bed in the Netherlands appears to have been five or six feet long in life.

This particular type of fossil has never been found in coal beds outside of Europe. It bears the scientific name Arthropleura, and it lived about 250,000,000 years ago.

Air-Conditioned Mine
JOHANNESBURG, SOUTH AFRICA.—Air-conditioning of the Hercules shaft of the East Rand Proprietary mine, one of the world's greatest sources of gold, has enabled operators to take 50 per cent more gold ore from this shaft at no increase in operating cost.

Glass Cracks Grow
BERLIN.—High speed motion pictures, taken at the rate of 200,000 exposures a second, have shown that cracks in glass from the instant of impact grow in all directions from the point of impact at the rate of more than 1,500 meters per second.

Causes of Rheumatism

By DR. JAMES W. BARTON

YOU miss seeing a friend or acquaintance for some time and when you next see him he tells you that he has had "another attack of rheumatism." The question then naturally arises as to whether the attack is just the "old" attack that has returned or whether it is an entirely "new" attack.

While there is much that remains unknown about the cause or causes of rheumatism, the medical profession is coming back more to the idea that some special or specific organism is to blame. The special organism causing rheumatism may be always in the system of certain individuals and at times when the individual's resistance is lowered these organisms get the upper hand and an attack of rheumatism occurs.

Dr. Barton

Now if the attack was just a slight inflammation of the lining of a joint, or the fibrous part of the muscles, it would be bad enough, but unfortunately with each attack of rheumatism there may be also an inflammation of the lining of the heart and blood vessels.

Dr. E. I. Tsukershteyn, in Clinical Medicine, Moscow, states that of 300 cases admitted to his clinic, 82 per cent gave a history of recurrent or repeated attacks.

To Prevent Attacks. How can attacks of rheumatism be prevented or made less serious? As the cause in most cases is some special organism—in infected teeth, tonsils, gall bladder, or intestine—the first thought is an immediate visit, and a visit every six months or a year afterwards, to the dentist and physician. The second thought is to keep the body strong and disease-resisting by not eating too much food and taking more exercise.

Even under the care of physician and dentist, and care in eating and the taking of exercise, there may be attacks because you may be "sensitive" to certain organisms, but the above care should lessen the chances of permanent disability to heart, blood vessels, joints, or other organs.

Overweight an Allment. As our insurance companies give their reports to the public it is now an established fact that overweight is a serious liability to health and to life. When we remember that carrying 25 to 50 pounds of excess fat upon the body is just the same as if that weight were iron or lead, some idea of the extra work done by the body every day can be realized. This extra work is not too much for the body to handle when we are in our twenties or thirties, but when exercise which holds and builds strength becomes less, then more fat accumulates and the burden becomes greater with less strength with which to carry this excess fat.

Generally speaking, all that is necessary to remove a good part of this excess fat is to cut down on all starches, fats, and liquids, and practically all overweights can do this up to a certain point. In fact, even those whose overweight is due to a gland disturbance—thyroid, pituitary, or others—are able to remove some of this excess fat by cutting down on these three classes of foods.

However, the important point about weight reduction is that every case should be considered by itself. Thus living habits should be studied. There is the housewife who works hard in the home all day, bakes, cooks, sweeps, looks after the children, and there is the other housewife with plenty of help, who does no physical work whatever. Naturally the one doing all the work should not have her food reduced at as fast a rate as the one who does no work.

Similarly with men. Some overweights are on their feet much of the day whilst others sit at a desk. Rest, more rest than should be taken, is as big a factor in putting on fat as is food.

In addition to considering the work or exercise done daily, there is also the fact that some cases have just a little less gland juice than normal, whilst others lack a considerable amount of the necessary thyroid or pituitary juice. The overweight who lacks a large amount of gland juice will, in addition to cutting down on food, require also some of this gland juice or extract in order to get down to normal weight. The overweight who lacks but a small amount of the necessary gland juice may be able to attain normal weight by simply cutting down on the amount of food eaten.

In other words, the fact that insurance companies treat overweight as an ailment and will refuse insurance to overweights just as they refuse applicants with heart, kidney, blood vessel and other ailments shows that each case of overweight requires individual attention.

WHAT to EAT and WHY

C. Houston Goudiss Offers Practical Advice on How to Keep Cool With Food

By C. HOUSTON-GOUDISS
6 East 39th Street, New York City.

FROM the standpoint of health, the summer months constitute the most important period of the entire year. They should be used to build stamina and vitality that will fortify your body against disease. But to many people, the warm weather means merely a succession of exhausting days and restless nights. And hardly a week passes without reports of heat prostrations.

Meeting the Challenge of Hot Weather

While abnormal heat or humidity may be a secondary cause, the real reason behind much warm-weather suffering is a failure to meet the challenge of summer with a judicious diet.

Automobile owners know that no car is better than its engine, and in warm weather, careful drivers watch the gauge on the dashboard, to be sure the engine does not become overheated. But most people give little thought to that most remarkable of all engines—the human digestive machinery.

Compared to the engine in your body, the one in your car is a crude, rough affair that can stand no end of punishment. Moreover, the automobile is driven for a certain length of time and then permitted to rest. But the marvelous mechanism which transforms your food into blood, bone, muscle, and your capacity for thought and action is never wholly at rest.

Importance of the Right Food
If the automobile engine requires special attention, how much more important to stoke your body engine with food suited to the weather!

No one would think of going about in midsummer wearing the same garments that were worn all winter. Yet many women continue to serve the same type of meals which were required to keep the body warm in winter. Such a practice is sure to make you miserable. But more than that, it lowers resistance and may, therefore, lead to illness.

Beating the Heat

There are several factors to bear in mind when planning the hot-weather diet. The first secret of keeping cool is to supply the body machinery with food fuel that can be utilized with the least expenditure of energy.

Warm weather is responsible for muscular relaxation in the digestive tract, as well as other parts of the body. And you run the risk of digestive upsets, with their discomfort and health hazards, unless you make every effort to lessen the work of your digestive system.

Eat lightly of rich fatty meats, pastries, rich cakes, sauces and gravies. At all times, choose easily digestible foods.

Overeating Saps Vitality

Don't overeat. The task of handling excess food is a burden to the body at any season. In hot weather, it will cause the body temperature to mount along with the thermometer, and may result in a serious upset. It is also advisable to cut down somewhat on the quantity of heat and energy producing foods consumed—that is the carbohydrates and fats.

Need for Body-Building Foods

The protein requirement remains the same summer and winter. Some people think that meat should not be eaten in summer, or should be reduced to a minimum. But there is no closed season for growth in children, and moreover, they play so constantly and indulge in such strenuous exercise that they break down body tissue very rapidly. Adults also have a constant need for protein to rebuild the millions of cells that are worn out daily.

It is desirable, however, to avoid rich, fatty meats and to select protein foods that are more easily digestible, as chicken, lamb, lean beef and lean fish. Special emphasis should be placed on milk, cheese and eggs. These splendid foods not only supply Grade A protein, in an easily digested form, but also fortify the diet with minerals and vitamins.

Liquids Essential
To help you keep cool, the summer diet must include an abundance of liquids. These are necessary to make up for the large amounts of moisture lost from the body through increased perspiration.

Liquids may be taken in the form of milk, fruit juices and cooling drinks made from pure water and packaged beverage crystals containing dextrose, fruit acid, flavoring and coloring.

Hot Weather and Vitamin C
Two European investigators recently found that exposure to high temperatures causes a 50 per cent loss in vitamin C from the body tissues. And lowered vitamin C reserves are partially responsible for that tired feeling so often experienced in warm weather. Their research indicates that drinking orange or lemon juice, which are rich in vitamin C, actually helps to mitigate the effect of the heat.

Choose Cold Drinks Carefully
A cold drink is comforting on a hot day. And in addition, sweetened beverages help to relieve fatigue, for their carbohydrate content supplies available energy. Sugar is the least heating of the energy producing foods, for less

than one-sixteenth of the energy it supplies to the body is converted into heat. The rest goes into brain and muscle power. Therefore, one good way to prevent needless fatigue in summer is to take a cool, moderately sweetened drink whenever you feel tired during the day. This will satisfy thirst and ward off exhaustion like a rest by the road after a long hard tramp.

Too highly sweetened beverages, however, may be heating to the body, though they are cooling to the palate. For this reason, it is advisable for homemakers to mix their own cool drinks so that they can control the amount of sweetening used. It is possible to buy inexpensive packaged beverage crystals in a variety of flavors, which make delicious, refreshing and cooling drinks for general family use. One of these contains added vitamin D, and as the sugar is added by the home-maker, you can be the judge of how much to use. This is an excellent idea, especially in households where there are children, for the home-made drink satisfies thirst, provides needed energy and discourages them from buying bottled beverages of doubtful purity.

Cooling Foods
I offer free to readers of this column a new bulletin containing a list of cooling foods, plus practical, specific advice in planning the warm weather diet. There are also menus showing how easily you can KEEP COOL WITH FOOD.

Simple, Keep-Cool Cottons

IF YOU wear 14 to 20 sizes and expect to be outdoors and in sports clothes most of the summer, then you'll want the smart frock with tucked skirt and tailored collar. If you're in the 36 to 52 range and want something cool and good-looking for home wear, the dress with straight skirt and draped collar is the style for you! Both are just as smart and easy to make as they can be! Patterns each include a detailed sew chart for the guidance of beginners.

The Sports Frock.
This is such a good-looking, classic style that you can wear it all day long during your vacation travels, and always feel well dressed! The radiating tucks give a graceful flare to the skirt; the tailored collar is deeply notched in the smartest fashion. Shark-skin, spongy linen, pique and flat-crepe are good fabric choices for this frock.

The Home Frock.
This is a diagram design, that you can finish in a few hours, and oh my, how you'll enjoy it! The sleeves, cut in one with the shoulders, are so easy to work in, the soft collar, with the little tab, is so becoming. Best of all, this design is cleverly darted at the waistline in a way that makes you look much, much slimmer than you are. Make this of gingham, percale, handkerchief lawn or calico. In tub silk it will be appropriate for home afternoons, too.

The Patterns.
1537 is designed for sizes 12, 14, 16, 18 and 20. Size 14 requires 3 3/4 yards of 35 inch material with short sleeves.
1395 is designed for sizes 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 3 3/4 yards of 35 inch material; contrasting collar (if desired) takes 1/2 yard cut bias.

Send your order to The Sewing Circle Pattern Dept., Room 1029, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

Surface-Stains on Teeth Yield to Pepsodent with IRIUM

BOTH Pepsodent Tooth-Paste and Powder contain MARVELOUS Irium

There's a reason why Pepsodent can make your teeth glisten and gleam as they naturally should! The answer? Irium, that remarkable new cleaning agent found in Pepsodent alone of ALL dentifrices! Once you've used this new-day dentifrice you'll see for yourself how much more effective it actually is! You'll see how Pepsodent—thanks to wonderful Irium—gently brushes away cloudy surface-stains... how it polishes teeth to a dazzling natural-brilliance!... And Pepsodent works SAFELY! It contains NO BLEACH, NO GRIT, NO PUMICE! Try it!

NOTICE OF SALE

Notice is hereby given that in pursuance of the Final Judgment and Decree of Foreclosure, appointment of Special Master and Order of Sale made and entered in the above entitled cause and court on the 26th day of April 1938, the undersigned, appointed as special master therein, will offer for sale and sell to the highest bidder for cash, at the front entrance of the courthouse in Carrizozo, Lincoln County, New Mexico, at 2 o'clock P. M. on the 6th day of August, 1938, the following described lands and real estate, or such thereof as may be necessary to satisfy the sums of money hereinafter mentioned, which have been awarded to the plaintiff and the defendant, J. C. Gilbert in said cause, said lands and real estate being situate in Lincoln County, New Mexico and described as follows, to-wit:

ES&E1 of Section 31, SW1SW1 of Section 32, Township 8 South, Range 16 East, N. M. P. M. together with the water rights appurtenant thereto.

All sums to be realized from the sale of said property are as follows:
Amount of judgments.....\$1265.19
Court costs.....12.00
Interest to date of sale.....35.27
Special Master's fee.....15.00

Total 1412.46

There shall be added to the above the cost of this publication.

At the same place and immediately following the sale of said lands, as aforesaid, I will offer for sale and sell to the highest bidder for cash the following described lands and real estate situate in Lincoln County, New Mexico, to satisfy any balance remaining due on the amounts hereinafore shown, and, further, to satisfy the sums of money hereinafter mentioned which have been awarded to the defendant, J. C. Gilbert, to-wit:

SE1SW1, SW1SE1 of Section 30, W1NE1 of Section 33, all in Township 8 South, Range 16 East, N.M., P. M., together with all water rights appurtenant thereto.

The additional sums to be realized from the sale of said property are as follows:

Amount of judgment.....\$2000.00
Interest to date of sale.....1422.00

Total 3422.00

BANKING LOOKS AHEAD

If The Power Plants Failed

Without electricity millions of people would suffer hardships. In like manner the long arms of banking, business and government reach into every home, affecting individual security, comfort and happiness. Smooth operation of our economic system requires teamwork. With all of us cooperating nothing can prevent our attainment of better times and better living. This bank does its part by providing helpful banking services to its community.

**Beware Kidney
Germs If Tired,
Nervous, Aching**

Are you Run Down, Nervous, aching or swollen joints? Do you Get Up Night, or suffer from Burning Passages, Headaches, Leg Pains, Backache, Dizziness, Sour Urine, or Loss of Appetite and Energy? If so, the true cause often may be germs developed in the body during colds, or by bad diet or toxins that need removing. These germs may attack the delicate membranes of your kidneys or bladder and often cause such trouble. Ordinary medicines can't help much because they don't kill the germs. The doctor's formula, **Cystin**, new medicine for all druggists, starts fighting kidney germs in 3 hours and must prove entirely satisfactory in 3 weeks and by exactly the medicine you need or money back is guaranteed. Telephone your druggist for **Cystin** (blue box) today. The guarantee protects you. Copy, 1937 The King Co.

Speaking of Sports

Football Ace Chapman Is Diamond Star

By GEORGE A. BARCLAY

SAM CHAPMAN used to boot footballs over Pacific coast goals last fall and help Stab Allison's University of California Golden Bears smear their opponents.

Now Sam belts baseballs around American league parks and helps Connie Mack's Athletics stay in the pennant race. The metamorphosis of this All-American football player into a star outfielder has baseball wisecracks shaking their heads.

Chapman was rated the best back on the Pacific coast last year. He was the spark plug in the attack which gave the California machine a 13 to 0 victory over Alabama in the Rose Bowl game on New Year's day.

When the grid season was over, Sam turned to baseball. He developed something of a reputation as a slugger and had big league scouts trailing him around the college circuit.

The big league training season came and went while Sam had his ears cocked for offers, he decided to wait until a real bid turned up.

Ty Cobb, the retired immortal of baseball, had been watching him and growing more enthusiastic all the time. Finally he got hold of

SAM CHAPMAN

Connie Mack and told him to grab Sammy as a sure-fire "natural." "I told you once I'd never recommend a ball player," Ty said, "but I've got to this time. This kid Chapman has a future."

\$8,500 Bonus

Mack, who has always had a weakness for college men, offered Sam an \$8,500 bonus for signing with him.

Chapman thought it was a good idea, accepted, and joined the team early in May. He got into the lineup almost right away and began banging the ball all over the lot. In his first five weeks in the league, he got 44 hits in 123 times at bat, including nine home runs.

He isn't a finished selder yet, but he's learning rapidly and under Connie Mack's tutelage does a satisfactory job of playing batters properly. Not many college men have stepped off the campus and into the big leagues to stay.

There have, of course, been some great college players, like Eddie Collins, Frankie Frisch and Ted Lyons, but their specialty in college was not football. One exception was Riggs Stephenson, who paced the Chicago Cubs outfield a few years ago.

Besides Sammy Baugh, three classic examples of All-Americans who failed in big league tryouts were: Jim Thorpe, who couldn't make the grade with the New York Giants many years ago, Ernie Nevers, who was a flop when the St. Louis Browns tried to turn him into a diamond performer and Earl Caldwell, famous Yale back who faded rapidly when the Cleveland Indians put a uniform on him.

Sam Chapman looks like the glittering exception to this somber list. At present writing he appears to have licked the kink that follows star football players from the gridiron to the baseball diamond.

Night Baseball

THE success of night baseball, pioneered by the Cincinnati Reds a couple of years ago and introduced with satisfying financial returns by the Brooklyn Dodgers recently, indicates that before very long floodlights will be part of the equipment of every big league ball park.

The results at Cincinnati thus far have been equally favorable. So there is little reason to doubt that night baseball would draw well in other big league cities.

Few teams do very much business on week days. The average fan does not find it possible to at-

Joe Di Maggio Leo Hartnett

tend such games regularly. The chance of actually seeing a game after dinner instead of reading about it in the box scores should prove attractive. All things being equal, the average man would just as soon see Joe Di Maggio or Gabby Hartnett in action on a ball field as he would watch Clark Gable or William Powell on the screen.

Night baseball, however, would not be a serious competitor to the movies, because only a dozen games at most would be scheduled during a 154-game season by any team. A number of big league magnates and managers look with rather sour eyes on night baseball.

Here and There

ONLY three of the eighteen players who made up the National league All-Star team of 1933 were included in the 1938 roster. They were Gabby Hartnett of the Cubs, Carl Hubbell of the New York Giants and Tony Cuccinello of the Bees.

A Rhodes scholarship at Oxford, or \$22,500 a year with the Pittsburgh Pirates in professional football were the offers which Whizzer White, Colorado university's great halfback, had to consider recently.

Comeback Trail

DOWN in the Texas league, fans, managers and scouts are watching the performance of two young men who until last year were pitching sensations in the big leagues—Schoolboy Rowe, formerly of the Detroit Tigers, and Paul Dean of the St. Louis Cardinals.

SCHOOLBOY ROWE

their respective clubs, these fellows are trying a comeback trail that will land them in the big show again.

Should the pitching magic that once made them great return to the arms of these athletes, they will lead a hearty welcome back to the majors, for the Tigers could use Rowe and the St. Louis Cards might easily remember if they had a pitcher of the caliber Paul Dean used to be.

Men of the Mounted

by Captain G. Elliott-Nightingale Copyright, WNU

A GORILLA VS. A HALF-PINT MOUNTIE

A MORE contemptible black-guard never lived than "Bully" R. He was everything despicable and stood suspected of just about every crime in the Dominion calendar from murdering Indians on hinterland trails, to kicking a child out of his path.

Of all his tremendous stock of mean tricks and criminal pastimes, however, there were two that caused even the most hardened and capable wilderness men to gasp and keep out of "Bully" R's clutches. One of his pastimes was that of honing his two-pound hand-axe until it had an edge like a razor.

Another of his most despicable tricks was to pick a quarrel with some fire ranger, surveyor, timber-cruiser or lumberjack, or prospector who might stand about five foot eight or ten and weigh about one hundred and fifty or sixty pounds.

At any rate, having raised his man above his head, he would let out a bellow and begin moving rapidly toward the nearest big tree, probably a hemlock with a diameter of about three feet.

A dozen other harvesters alighted at this point, too, and they pitched camp alongside the railroad track, planning to camp until they hired out, which might be next day.

At length preliminary plans of much wider scope than the sketches shown in the Wythe House in 1927 were viewed by John D. Rockefeller Jr., and a few of his confidential associates in a private room of a New York hotel on November 21, 1927.

From the outset it was recognized that the value of the restoration would be its authenticity. So that the plans and material structure, the outward architectural form and the artistry of interior decoration, as well as the furnishings in the restored buildings, might be truthful portrayals, a research organization was constituted.

Every possible source of documentary evidence in America, in England, in France and elsewhere, that offered any hope, was searched by trained investigators. American national and state historical societies, museums, and libraries were visited.

Reconstructed tavern in Williamsburg, Va.

Colonial Center in Virginia Has Been Reclaimed With All Its Beauty

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

WITH the tourist season of 1938 under way, Williamsburg, Va., again welcomes thousands who would enjoy the atmosphere of colonial days in the Old Dominion state.

This city, so rich in historic association and time-encrusted beauty, offered the one feasible opportunity to reclaim and restore a colonial center.

Of four cities pre-eminently important in America's early history, and especially potent in shaping Revolutionary thought which led to the establishment of our Republic, Williamsburg alone seemed to lend itself to such a project.

Obviously, an area a mile long and approximately a half mile wide could not have been secured for restoration of colonial Boston with Faneuil hall as its center; nor in colonial New York with old Trinity church as its center; nor in colonial Philadelphia around Independence hall.

In Williamsburg there still stood about 95 colonial buildings of various kinds within a relatively small area, largely surrounded by an unspoiled countryside.

At the outset complete secrecy was essential to the success of the restoration endeavor. The preliminary plans were made from measurements of the streets and properties of Williamsburg taken in the quiet darkness between midnight and dawn.

No one became aware of their strange procedure save one Negro who, wandering through the blackness of the night, came unawares upon a steel tapline being dragged across an intersecting street along which, in a somewhat befuddled condition, he was seeking to find his way home.

Photographs were taken from the air and placed together, and early maps, including the Frenchman's map of 1782, were consulted. Preliminary historical investigations were made to evaluate the properties.

Authentically Was Requisite. At length preliminary plans of much wider scope than the sketches shown in the Wythe House in 1927 were viewed by John D. Rockefeller Jr., and a few of his confidential associates in a private room of a New York hotel on November 21, 1927.

From the outset it was recognized that the value of the restoration would be its authenticity. So that the plans and material structure, the outward architectural form and the artistry of interior decoration, as well as the furnishings in the restored buildings, might be truthful portrayals, a research organization was constituted.

Every possible source of documentary evidence in America, in England, in France and elsewhere, that offered any hope, was searched by trained investigators. American national and state historical societies, museums, and libraries were visited.

Warrington Dawson, of the American embassy in Paris, combed the archives of France for evidence that might have found its way there from the officers and soldiers quartered in Williamsburg for several months after the battle of Yorktown.

In the library of the college hung the famous map of the unknown Frenchman. It has become known as the "Bible of the Restoration." This map designates to scale every public and private building in colonial Williamsburg as of 1782, when the legend on the map, written in French, shows it to have been drawn.

FARM TOPICS

CAN NOW MAKE HAY IN RAINY WEATHER

Modern Methods Are Used In Making Green Silage.

By Clarence H. Parsons, Superintendent Massachusetts State College Farm, WNU Service.

How to make hay in rainy weather is a trick that has been solved on many dairy farms during the past few years. Modern methods of making green grass silage have done away with the need for long curing in the field, and the resulting product is high in valuable food elements and appetizing to the cows.

Dairymen have been experimenting with this new method of making grass and clover allage for several years and the state college has also given it extensive trials. Up to the present time, corn has been the standard silage crop of the Northeast, but on many farms grass and clover are easier to grow, the yields are as high as those of silage corn, and protein content of the resulting silage is higher than that of corn silage.

Grasses and clover are low in sugar content and for this reason it was difficult to bring about desirable fermentation in the silo until investigators found that the addition of cheap molasses brought about this result. The molasses is added to the grass and clover as it is fed into the cutter. On the college farm 40 to 60 pounds of molasses are added to each ton of grass. Where alfalfa is put up about 75 pounds of molasses to the ton is used.

Grass silage is best when the crop is cut in a young and tender stage. If it becomes mature and woody, it makes poor silage.

Feed Hoppers Are Urged For the Young Pullets

Healthy growing pullets require large quantities of feed, and the best growth can be made only when the birds have free and continued access to the feed. For this reason, advises a writer in the Montreal Herald, we recommend at least three 5-foot mesh hoppers 4 to 5 inches deep, feeding from both sides, for each 100 birds, during the early part of the summer.

To prevent soiling the feed, a revolving pole or reel of laths is fastened just above the level of the feed and secured to the raised ends of the hopper. For outdoor feeding, much labor can be saved by using large weatherproof, self-feeding hoppers. These are built with a solid roof or lid covered with tarpaper, which extends out beyond the feed trough on each side of the reservoir, and thus protects it from rain.

Gasoline, Kerosene Dangers

Gasoline and kerosene fires cause a loss of approximately \$5,000,000 a year on the farms of the United States, according to the bureau of chemistry and soils of the United States Department of Agriculture. They are sixth among the causes of farm fires and are responsible for 5 to 7 per cent of the total loss each year.

Farm and Feed Lot

Matured sugar cane contains 13 per cent sugar.

In hot weather the hens need plenty of water, often renewed.

Soils become acid because the lime is used by crops and carried away in drainage water.

Legume hay and legume pasture are fine for growing colts. These nutritious roughages make it unnecessary to feed grain to colts.

Legume hay as part of the roughage helps to keep horses in good health and flesh, says E. T. Robbins, live stock extension specialist, College of Agriculture, University of Illinois.

THE RIVER of SKULLS

by George Marsh

FENN PUBLISHING CO.

WNU SERVICE

SYNOPSIS

Alan Cameron, young trapper, Noel, his Indian partner, and Rough, husky Ungava sled dog, look in vain for the Montana trappers' camp in the desolate Big River country of Northern Canada. Their supplies destroyed by wolves, they are forced to subsist on wolf meat until they come, amazed, to a substantial log house in the wilderness of Talking River, where they are greeted by a big blond man with a gun. Introducing himself as John McCord, hunter, the big man asks Alan if he dares go with him next year to the River of Skulls beyond the Sinking Lakes, where no man is said to have been before. Heather-McCord, the daughter, who had come with him to the wilderness, wins the immediate devotion of Alan. On the eve of Alan's departure for Fort George, McCord suddenly tells him to bring him back some dogs, and to keep his mouth shut to questions. He gives the boy money, warning him not to show it at Fort George, and promises to explain all to Alan. Returned to Fort George, Alan meets McCord and Slade, Provincial police, with Arsene Rivard, clerk, and Alan's rival for Berthe Dessane, with whom he is in love. The two police are looking for a guide to the Big River wilderness. Accidentally Alan drops one of McCord's bills and when questioned, insists he had got it from Neil Campbell, whose life he had saved at Whale River two years before. He realizes he must make good his lie by going north and seeing Campbell before anyone else has had a chance to talk to him. Berthe's father tells Alan the police are after a man wanted for murdering a young man who had checked Alan's story at Whale River.

CHAPTER IV—Continued

"Sneak away?" asked Berthe. "Why you will have plenty of chances to say good-by before you go north."

"I'm going tonight," Alan said, "when the moon is up. I've got to. I can't wait for the ice. You won't tell anyone?"

Her black brows met in a puzzled frown as she faced him. "Tell? Of course not, but I don't understand why you take such risks, Alan, and why you wish to hide your going."

He smiled down at her as her doubtful eyes searched his face.

"I'm afraid that the police will hold me up—order me to wait and go with them to Whale River." Then a wave of emotion drove him on as he bent over her dark face, at times half-masked by the wind-whipped strands of her unruly hair. "I can't wait—I've got to have a dog team. Berthe! I'm saving, trying to get ahead. Don't let your mother and Rivard turn you against me, Berthe!" he cried, and was away before the startled girl could voice her protest.

Deep in the night a 10-foot Peterboro canoe slipped from the shadow-packed shore below the darkened buildings of the Hudson's Bay post, rode the ebb tide down to the river mouth, and turned north up the coast.

As the northwest wind drove the ice-pack toward the bald buttresses of the Cape of the Four Winds and the canoe raged the broken floe-ice past its granite feet, the pursuing York boat appeared in the distance.

It was a three days' race. But the frail canoe, driven by its desperate crew, reached Whale River, while, high and dry, on a mud flat the York boat waited for the next tide to float it free.

Neil Campbell, the trader, was puzzled and worried by Alan's strange request which, Alan assured him could not be explained until later. Yet he staunchly agreed to corroborate Alan's story.

On up the coast, past the Little Whale and Richmond Gulf, went the canoe on its quest for dogs. At the Nastapokas, where the ice-pack had brought in the walrus, seal and polar bear from the north, Alan met the first of the Kogaluk Eskimos. There he traded his canoe load of goods and groceries for three yearling Ungava puppies, bred from a pair of superb huskies which had crossed from Hope's Advance on Ungava Bay with their owners.

With his two slate-gray and white puppies, Powder and Shot, and their seal-brown and white brother, called Rogue, Alan started back down the treacherous coast for Fort George.

The spring trade was in full swing when the Peterboro turned into the river mouth at Fort George and rode the flood tide up to the Hudson's Bay settlement.

Soon Alan and Noel stood on the high shore, holding their nervous dogs by rawhide leashes to prevent a general fight with the post huskies. Noel suddenly pointed upstream to the settlement of the Northern Trading Company, beyond the Revillon Freres, where a number of York boats and a small schooner lay at anchor far in the distance.

"Wat ees dat on de water, up dere? Dat's no boat," he said, his hand shading his squinting eyes.

"You're right!" cried Alan. "That's a sea-plane—one of the Canadian Airways, I'll bet! The Northern Trading Company, you know, found a lot of iron and copper on the Nastapokas. Gabriel says what they're after is gold, though."

At the Hudson's Bay Company, when Alan had locked Rough and his priceless puppies in the small dog stockade behind his house, he was greeted by the sober faces of Duncan McNab and Andrew Christie, the factors.

"Well, young man," snapped Christie, a look of disgust on his face, "you've made a fine mess of things! Your starting north the night after I told you the police had hired a York boat proves you wanted to see Neil before the police reached him."

Alan's face went stone hard. "Well, he told them where I got that money, didn't he?"

"Yes, but the police don't believe him!"

"Do you?" demanded Cameron, a glitter in his gray eyes.

"I've got to believe Neil Campbell, I suppose, but he didn't help you at all with McCord. The Sergeant's sure, now, you met this McCord and he's going back with you to the headwaters."

"You're a fool, Alan, to put yourself under suspicion of protecting a murderer!" added Duncan McNab. "The police can make it hot for you—take you down to the railroad and put you on trial."

Alan's good nature had returned. He smiled indulgently, displaying his strong white teeth. "It's 400 miles to the headwaters. Noel and I'll be glad to show the police the way, if that's all they want. Won't you—take you down to the railroad and put you on trial?"

"Well, I wouldn't be in your shoes for a good deal!" snapped Christie.

"I may be. I never had much mind," he answered, drily.

"You're playing a dangerous game," she became suddenly dramatic, "when you start to work against the Provincial Police."

He had once read of a woman detective in a book in the post library. Could this woman be a government detective?

"How have I worked against the police," he asked, disarmingly, "by telling the truth?"

She burst into a paroxysm of laughter that did not fail to display the whiteness and regularity of her teeth. Drying her eyes with a handkerchief that filled the air with a subtle perfume, she said, standing very close to the uncomfortable Alan: "Why, you poor boy, do you suppose they don't know you're lying?"

"Excuse me, Mrs. Hanbury, I don't know who you are," he said, the blood darkening his bronzed face. "What right have you to ask me questions?"

She opened her large eyes with their long-lashed lids in amazement. "They didn't tell you—at the Hudson's Bay?"

"Not a word—except that you were here and wanted to see me."

"That's strange! I'm connected with the government, you know—special agent. I flew to Moose on another matter and wanted to have a look at the East Coast. Knowing

had aroused, Alan went over to the factor's house. Received coldly by Madame Dessane, he found Berthe waiting.

"You have found her very agreeable, to talk so long in the trade-room?" she asked, giving him a lifeless hand.

"Arsene told you then? So you think that woman—"

"I don't know what to think. Good-night, Alan!" And she left the room.

CHAPTER V

Sick at heart with Berthe's coldness, Alan sought his old friend Pierre to learn what had been the comment at the Revillon Freres on his sudden departure for the north coast.

"You mak' queek start, eh, dat night you leave for de nor?"

laughed the big Frenchman when he and Julie had welcomed the wanderer. "Dose poleece, dey were ver' cross w'en you beat dem to Whale Riviere."

"What did they say when they got back?"

"Wal, I hear dem talk wid de boss. Dey say you race dem to Whale so you can tell Neil Campbell about de monee."

"What did Gabriel say?"

"He say, no, you went for dog."

Good old Gabriel, thought Alan, he's still my friend. Then he asked: "What has Rivard been saying? I know that he's done all he could to turn the Madame and Berthe against me. Berthe wouldn't talk to me tonight."

Pierre scowled and shook his head. "Ah, dat ees bad—ver' bad. Madame Dessane she lak' Arsene, yes, she lak' dat young feller. But Ma'm'selle Berthe she weel be all right. Eet ees dat woman, Hanbury, dat mak' all de troub'. She turn Fort George on hees head, so w'en Arsene tell Berthe you talk to her tonight, poof! She get mad lak de colder woman."

"What do you make of Mrs. Hanbury?"

"I tink she ees huntin' lak a fox, ver' hard for somet'ing. Wat dat ees, I don' know, but she ees try hard to find eet all de tam."

"She stops with the Northern Trading people?"

"Ah-hah! And she make troub' dere quick wid Madame Martin. De woman are all cross wid her. She weel not tell dem w'y she come to Fort George."

The moon was up when Alan took the river trail to the Hudson's Bay settlement. His thoughts brooded over the mood in which he had found Berthe. There remained but a short space, now, before he would have to start for the headwaters—probably with the police; only too brief an interval to win back Berthe. And then there would be months of absence, possibly a year or more in the interior with John McCord, while Rivard and Madame Dessane poisoned her mind. But McCord had promised him money and money he needed.

The following morning when Alan and Noel returned from their fish nets and were playing with the huge puppies inside the dog stockade, they had a caller.

"Good morning, Cameron!" Alan looked up to recognize the thick-set figure of Sergeant McQueen behind the slabs of the gate. "You got your dogs, I see. Beauties, too! Nothing like them at Whale River."

"I got the pups in the Nastapokas, from a Husky," he answered, as the slate-gray Powder, pursued by Shot and the brown-patched Rogue circled him in a mad race, while Rough lay near at hand, watching their childish antics through condescending, oblique eyes.

(TO BE CONTINUED)

"I got the pups in the Nastapokas, from a Husky."

"By the by," he continued, after a period of silence, "a Canadian Airways plane came in a few days ago bringing the mail from Moose, and there's a passenger who is waiting to see you." He winked at Duncan McNab whose red face was widening in a grin.

"A passenger—to see me?" Alan stared at the speaker.

"Aye, and she's kicked up more rumpus in old Fort George than I've seen since the messies killed half our people."

"She?" what could a woman from the "outside" want with Alan Cameron? he wondered.

"Yes, a woman. She's thick as peas with the police."

On his way to Gabriel Dessane's house, Alan stopped to see his friend Pierre and learn if the Dessanes were still at supper. Opening the door of the trade-room, to his surprise he saw Arsene Rivard in conversation with a woman whose Norfolk jacket, short skirt and high laced boots marked her as a stranger at Fort George. As he entered he caught her remark:

"He must have met—"

"Hello, Rivard!" said Alan, enjoying the embarrassment of the two. "Pierre's over at his house, I suppose?"

"Why, 'allo, Cameron!" The tone of the clerk was very cordial as he left the woman, who leaned gracefully against the trade counter, calmly inspecting the handsome young voyageur, from his moccasins to the deep-set twinkling gray eyes.

"Mrs. Hanbury, I would make you acquainted with Alan Cameron," said the clerk turning to the woman.

So this is the woman who has upset Fort George, he thought. She seemed hardly more than thirty-five, with a tall, graceful figure set off by the whipcord suit. Her face, framed by wavy bronze hair, was the face of a girl, except for the hazel eyes, long-lashed and large. The eyes were unmistakably those of a woman who had seen much.

"May I speak to Mr. Cameron alone?" she asked of Rivard.

"Certainly, Madame," replied the clerk with an insinuating smile as he left the trade-room.

Mrs. Hanbury lost no time in coming to the point.

"Mr. Cameron, are you out of your mind?"

Alan laughed. Folding his muscular arms across his chest he calmly met the handsome eyes that searched his.

Sergeant McQueen and Corporal Slade, of course I was interested in their search for this McCord whom you met in the interior last winter."

"I did not meet McCord last winter!"

The cold glitter in the gray eyes had a decided effect on Mrs. Hanbury's manner. She suddenly dropped her air of easy confidence. "When they get John McCord," she went on, dramatically, ignoring his flat denial, "do you realize that you will be tried for aiding an escaped murderer? Now, I promise you that if you'll tell me where you met this man and the girl—what you know about them, I'll square this whole thing with the police."

Again she approached too closely for Alan's comfort as her black-lashed hazel eyes narrowed. "It's going to go hard for you if you don't, for McCord will take you down to the Deputy Commissioner at the railroad for questioning."

The conversation was interrupted by the return of Gabriel Dessane from his supper. Harassed by the certainty of being compelled to accompany the police to the headwaters, by doubt and misgivings which the mysterious Mrs. Hanbury

Famous Ferris Wheel, 1893 World's Fair Attraction, Invention of Illinois Man

Illinois gave the Ferris wheel to the world. According to information obtained by the federal writers' project, WPA, a native son of Galesburg invented the wheel and directed its construction.

It is still remembered by thousands of persons as a main attraction at the World's Columbian exposition at Chicago in 1893. George Washington Gale Ferris was a member of two pioneer families of Galesburg, descendants of which now reside in that city.

Notwithstanding the opinion of engineers who believed the wheel could not be operated even if it were built, Ferris found backers for his enterprise. The encouragement given by officials of steel companies who believed in the feasibility of the wheel was an important factor in carrying out the plan. It is said that officials of the fair were amazed both when the wheel did operate and when it returned a profit.

According to accounts the total cost of the wheel was \$300,000 of which \$25,000 was spent on planning and \$12,000 on the wooden false

work. The foundation, 40 feet deep, was laid in the winter months under serious handicaps.

Because of the size of the job and the necessary haste, several steel plants divided the iron work. The pieces were so carefully checked for uniformity that they seemed to be the products of but one company. The giant axle weighed 70 tons.

The wheel, 270 feet in diameter, consisted of two huge rims with supporting spokes. Between these were suspended 36 cars, with seats for 40 persons in each one. As the wheel revolved the cars reached a height of 258 feet, giving the passengers a fine view of the exposition grounds and a thrill to talk about when they returned to their homes.

Quality Goods Advertised
No manufacturer or merchant can afford to advertise an inferior quality of merchandise. Advertising creates and holds a demand for quality merchandise and by doing that reduces sales cost; increases production, increases employment, reduces manufacturing costs and makes cheaper prices possible.

Frosting a Cake for Judges to Sample

A professional cake baker, frosting one of the hundreds of cakes which were made up in the Experimental Kitchen Laboratory, maintained by C. Houston Goddiss in New York City, in the course of selecting the winners in his recent Cake Recipe Contest.

By C. HOUSTON GODDISS

NATURALLY, I am accustomed to seeing exhibits of delicious and interesting foods in the Experimental Kitchen Laboratory that I maintain in New York City. But in all the years of its existence, it

has never been a busier nor a more inviting place than during the last few weeks when the home economists on my staff have been busily testing and judging the many fine cake recipes submitted by readers of this paper in our recent Cake Recipe Contest.

Imagine, if you can, a big cheerful and colorful kitchen filled with long tables upon which row after row of handsome cakes were arranged—proudly testifying to the skill of the homemakers who cherish the recipes from which they were made.

Every Type of Cake Entered.

A whole tableful of white cakes, with and without icing. Chocolate and cocoa cakes of every possible type. All manner of cakes, fragrant and delicious—spice, ice cream, honey, caramel, maple syrup, nut, date, pineapple, orange, lemon, butterscotch, jam, banana, raisin, oatmeal, coconut and marble cakes. Cakes baked in long sheets, square cakes, round cakes, layer cakes. Old-fashioned cakes from grandmothers' recipe books, Very modern and up-to-date cakes. And even one that was said to have been a favorite with General Robert E. Lee. I've never seen anything to compare with the collection, even at the biggest State Fair!

Do you wonder that the home economists on my staff required several weeks to pick the winners? For with such a wealth of exceptional cakes from which to choose, selecting those for top honors, was indeed difficult.

The cake bakers were trained for their work. They followed the recipes precisely. They measured accurately. They checked oven temperatures.

The scoring system was highly scientific. And we can say with conviction that no matter how close the race, the winners definitely outpointed even their closest rivals.

First Prize Winner.

The first prize of \$25.00 went to Mrs. D. F. Kelly, 1004 Charles St., Whitewater, Wis.

Second Prize Winners.

The five second prizes were awarded to Mrs. H. Harshbarger of 2427 Fifth Ave., Altoona, Pa.; R. A. Williams, 12075 Rosemary Ave., Detroit, Mich.; Mrs. C. A. Burns, Box 788, Oakland, Miss.; Miss Sadie Cunningham, Avonmore, Pa.; and Mrs. Laura Meyer, 107 Pleasant St., Plymouth, Wis.

Third Prize Winners.

Mrs. T. H. Fjenc, Flaxville, Mont.; Mrs. Lester Ralston, 127 South Judd St., Sioux City, Iowa; Mrs. Harry A. Krauer, 10 Marin Road, Manor, Calif.; Mrs. F. D. McDonald, Route 1, Amherst, Texas; Vera Tygar, Commodore, Pa.; Mrs. George Ahlborn, R. D. No. 1, Mt. Pleasant, Pa.; Mrs. B. A. Robinson, Box 878, Emmett, Idaho; Jean Guthrie, 4712 Campbell St., Kansas City, Mo.; Mrs. Walter Richter, Bonduet, Wis.; Mrs. P. C. Blakely, Alden, Mich.

Honorable Mention.

Emogene Williams, Damon, Texas; Mrs. Simon Moss, Norma, N. D.; Mrs. Dick Collins, Masonville, Iowa; Mrs. B. F. Herman, Box 1118, Crosby, Miss.; Mrs. Paul Lorenz, P. O. Box 223, Strathmore, Calif.; Mrs. S. S. Arntz, Simpson, Nev.; Mrs. Vida Hilger, Box 257, Rockland, Mich.; Mrs. Grace H. Peterson, Box 335, Amherst, Wis.; Mrs. Cecil Skinner, Bedford, Wyo.; Mrs. Joe Furnace, 317 West Twentieth St., South Sioux City, Neb.

My thanks and my compliments to every homemaker who submitted a recipe. I only regret that everyone who submitted a recipe could not win a prize.

HOW to SEW

GREAT-GRANDMOTHER made her own designs for quilts and hooked rugs and many of her most interesting patterns were developed by drawing around pieces of china. The antique rug shown here may be copied either in rags or rug yarn.

The foundation of the rug is burlap. The design is drawn on

dressing tables. 48 pages of fascinating directions. Book 2 illustrates 90 embroidery stitches with numerous applications; doll clothes and gift items. Order by number, enclosing 25 cents for each book desired. Address Mrs. Spears, 210 S. Desplains St., Chicago, Ill.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 35 to 40), who fears she'll lose her appeal to men, who worries about hot flashes, loss of pep, dizziness, upset nerves and moody spells. Get more fresh air, 8 hrs. sleep and if you need a good general system tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vitality to enjoy life and assist calming jittery nerves and disturbing symptoms that often accompany change of life. **WORTH TRYING!**

VICTIMS
Who suffer with high blood pressure, indigestion, nervousness, stomach trouble? Try **DR. MERRILL'S BLOOD PURIFIER**. 21 Day Treatment, \$1.00. Money refunded if treatment is not satisfactory. Order Now. Mrs. Lorenz, Bonduet, Wisconsin, Pa.

NOTE: If you wish to use these weekly articles for reference paste them in a scrapbook, as they are not included in either Sewing Book No. 1 or 2. Book 1, "Sewing for the Home Decora-tor," covers curtains, slipcovers,

COMMENTS

Lewis Burke

— And R U Listenin'?

"Why are you always in such a hurry?" your Columnist was asked. "I would take it easier, for you get too much done," drawled the fellow.

HIGHWAY 54 BADLY IN NEED OF IMPROVEMENT

The washouts this week south of Carrizozo on highway 54, lead one to believe that some action should be taken to surface (black top) the thoroughfare RIGHT NOW!

CORRIGAN ACROSS OCEAN FLIGHT ECHOES—

"You can't beat the Irish," says Mr. R. P. Hickey.

— Right you are, R. P.

Mr. Henry Lutz—"Coming as an aftermath of the Hughes around the world flight, I think Corrigan's "bootleg" trip across the Atlantic alone in his dilapidated plane is the greatest achievement of all, and I'm not an Irishman, either."

Mr. Walter Burnett—"I'll say the old song about 'Harrigan' should be changed to go as follows: 'C-o-double r I, g-a-n spells Corrigan.'"

Mr. Stewart of the Western Lumber Company—"Hate off to the Irish. Corrigan made the flight across to Ireland in a plane that was wired up with baling wire, and the door was fastened with an ordinary spike."

Mr. Roy Shafer—"Leave it to the Irish to do the unusual thing. He claims the flight was a 'mistake,' yet he knew exactly where he was bound for. You notice he didn't go to London or Paris. He was pulling a fast one on the public, I'll say."

Grocer Jeff Herron—"I think my next advertisement will be something concerning that Irish Mick by the name of Corrigan."

"U. S. Postoffice, Carrizozo, N. M."—A new sign on the building that contains the same.—It is all due to the efforts of Herman Kelt, "Everybody's" Postmaster that the sign was painted.

Talk of fusion between the Republican party and malcontents among the Democrats has caused a lot of political conjecture in New Mexico.

The E. M. Brickley Company have some nice homes, lots, mining claims, etc., for sale at bargain prices. See their ad on an inside page.—Advertisement.

1st Candidate—"You're a liar."
2nd Candidate—"You're a Crook."
3rd Candidate—"You're a thief."
4th Candidate—"You're a robber."
5th Candidate—"You're a clown and an ass."
6th Candidate—"You're a fool."
7th Candidate—"You're a —"

Elects Officers

At a special meeting of the American Legion, July 14, the following officers were elected:

Commander, Joe West; First Vice Commander, Pete Johnson; Second Vice Commander, David Stewart; P. O.'s Historian and Chaplain, Clyde Luckey; Sergeant-at-Arms, Julio Hernandez. Henry Hoffman and A. J. Scharf were elected on the Executive Committee. Floyd Rowland was re-appointed Post Adjutant. Joe West was elected delegate to the state convention at Raton, Aug. 4-5-6, and Floyd Rowland as alternate.

Fred Baldonado returned recently from San Francisco, where he received treatment at the S. P. Hospital.

A. S. McCamant of Corona was a business visitor here yesterday.

Arthur Moore, Jr., of El Paso is spending his vacation with his grandparents, Mr. and Mrs. Chas. Thornton of Oscura.

Frank Todd and Steve Boston spent several days of the week at Socorro, Mountainair, Estancia and Moriarity, attending to the music business in which Mr. Todd is interested.

Be sure to arrange other matters so that you can attend the dance to be given by the American Legion and Legion Auxillary on Wednesday night, July 27, at Community Hall.

DR. CONNOR of Roswell will be in Capitan the 29th and 30th of each month. Will do all form of dental work. Special attention given correction of children's teeth. J22-A12

The Contractors at the Vera Cruz mine invited a number of Carrizozo people last Sunday to come out and view the progress being done at the mine and enjoy a picnic. After those courteous gentlemen took their guests over the workings, they treated them to sandwiches and beer.

Fred Sweet and daughter Mona Jean were down from the Bonito Wednesday, Fred transacting some business.

Marvin Burton has erected a Dawson Coal office across from the Western Lumber Company, where he will have a coal and wood yard. Heretofore, Marvin has had to sell Dawson coal directly from the cars, but the new convenience will be better for all parties concerned.

Mr. and Mrs. Otho Lowe came over from Capitan Tuesday, where they had been visiting Mrs. Lowe's parents, Mr. Lowe, who at one time was connected with the local bank, is now with one of the Texas banks.
