CARRIZOZO, LINCOLN COUNTY, NEW MEXICO, FRIDAY, NOVEMBER 4, 1938

PRICE \$2.00 THE YEAR

BUSINESS MEN'S CLUB

Mr. M. U. Finley, Dear Sir: At a regular meeting of the Carrizozo Business Men's Club, the secretary was instructed to write to you a letter of commendation on the unique and beautiful building you have erected on Alamogordo avenue. We feel that this venture demonstrates your confidence in Carrizozo and we are sure that the building would be a credit to any town of our size.

Mrs. Ward, Alamogordo, Dear Mrs. Ward: At a meeting of the club, the secretary was instructed to write you a letter of welcome to your business in our city and to compliment you on the beautiful and artistic Standard Station you have erected on Main street. We feel that it is an asset to our town and we wish you success in your business venture.

Mr. R. A. Walker, Dear Sir: At a recent meeting of the club, a resolution was adopted commending you on the very fine improvements you have made in remodeling your building, installing equipment and seating arrangements. The exterior is very beautiful, up-to-date and artistic, and you are to be congratulated on your enterprise and the confidence you have shown in your community by giving it this added improvement. We feel that Carrizozo now has a movie theatre second to none in a town of this size, and we want you to know that the Club and the people of Carrizozo generally, appreciate your efforts to give them the best in the entertainment line.

It is a pleasure to convey this resolution to you in this manner. Messrs. John E. Wright and J. H. Fulmer, Jr., Gentlemen:

At a regular meeting of the Business Men's Club, a resolution was adopted, commending and congratulating you on the very beautiful and artistic light plant building which you have provided to serve the town of Carrizozo. We feel that the investment you have made in the building and equipment, demonstrates your confidence in our community, and is a distinct asset to our city, and we wish for you every success in your business and in your efforts to provide Carrizozo with facilities that would do credit to any town of this size in this state.

Dr. R. E. Blaney, Secretary of Carrizozo Business Men's Club.

An Appreciation We appreciate the patronage given us which enabled us to remodel, improve and bring the Lyric theatre up-to-date.

We feel that it is your theatre as well as ours, and we assure you that with your assistance we will be able to continue to go forward and improve and make conditions better in our town as well as the theatre.

As you know, the movies offer you the best entertainment everywhere, and we have contracts with the leading exchanges, and can assure you that you can see just as good pictures here as you can see in any of the big theatres anywhere.

Again we thank you, one and all for your support in bringing this about.

Very Sincerely, R. A. and Mrs. Walker.

LYRIC THEATRE

(Air conditioned) R. A. Walker, Owner

(Cut out and save for reference.)

Friday & Saturday John Boles, Jack Oakie, Lina Lupino and Margot Graham in "FIGHT FOR YOUR LADY". - A gag comedy of one laugh every four minutes.

-Also- "Carnival Show" and "Donald's Nephews."

Sunday, Monday & Tuesday Ruby Keeler, Ann Sheridan, Ralph Morgan, James Ellison, Frances Bainter and Walter Brennan in-

"MOTHER CAREY'S CHICKENS"

Taken from Kate Douglas Wiggin's novel. The picture is a worthy successor to "Little Women." A simple story simply told and acted by a competent cast-it concerns events and incidents in the lives of a widow and her children.

-Also- "Trees and Men," "Parade," and "Wynken, Blynken & Nod."

Wednesday & Thursday Jane Withers, Gloria Stuart, Henry Wilcoxon, Jad-Frouty and Helen Westly in

"KEEP SMILING"

-Jane runs away from boarding school to visit her uncle whom she has not seen - arrives to find him drunk and out of a job, but all turns out well, and Jane lands a job as an actress-and what an actress!

-Also- "Frontiers of the Future" and "Money or Your Life."

(We are giving away another turkey gobbler for Thanksgiving, so save your Coupon tickets.

Mrs. Emma Traylor

Was born in Llano County, Texas, Aug. 8, 1888; was married to R. H. Traylor, Sept. 3, 1906. They came to Alto in 1918, where she died Oct. 28, 1938. She is survived by four sons, Herbert, R. V., Elmo and Earl, all of Alto, her mother, four sisters and three brothers. Mrs. Traylor was baptized to the Baptist faith in 1917.

Funeral services were conducted at Angus last Friday by Rev. Crawford of the Capitan Methodist Church. Pallbearers were: Messrs. Halladay, Schryer, Burnett, Smith, Brooke and Brett.

The esteem in which Mrs. Traylor was held was well attested to by the immense crowd which gathered at Angus, to pay their last tribute, and by the many lovely floral offerings. The beloved ones have the deepest sympathy of friends. - Contributed.

Music-Drama Study Club

Will meet at the home of Mrs. Albert Ziegler on Thursday afternoon, Nov. 10.

Mike Doering returned last Saturday from Indiana, where he visited relatives for several weeks.

Mr. and Mrs. A. J. Rolland, Mr. and Mrs. Thomas James were El Paso visitors last Friday, returning home in the evening.

Fred Sweet and daughter Mona Jean were here last Saturday from the Bonito country.

Republican Candidates

The Following Republican County Candidates Announce Their Candidacy and Respectfully Solicit the Support of the Voters of Lincoln County:

- Sheriff: S. E. (Ben) Greisen
Treasurer: Ernest Key
Clerk: Mrs. Stella Willingham
Assessor: Herbert Smith
Co. School Supt.: Mrs. Nelle W. Day
Commissioners: 1st Dist. Geo. Kimbrell, 2nd " Corbin Hester, 3rd " Wm. W. Gallacher
Representative: Herrick (Heck) Johnson
Probate Judge: John Mackey
Surveyor: A. H. Harvey

(Political Advertisement)

OUR BIG CANDY PREMIUM IS ON AGAIN. FIRST COME, FIRST SERVED. HURRY!

BEGINNING WITH NOV. 1, 1938, the Outlook will again treat its subscribers, both renewals and new subscribers by giving away a two pound box of fine candy with every paid subscription.

The candy this year will consist of Delicious Varieties of Fruit Creams, Chewy Caramels, French Nougats and Honey Chips. All of the Finest Qualities and covered with Milk Chocolate Coating. You know what we served you with last year, and the quality this year will be better than ever.

This Offer Expires Dec. 24, 1938. Come and get it, or if mailed, send 10c for that purpose in the state. Outside of the state, 20c.

Woman's Republican Club

There was a luncheon given for the Republican women of Carrizozo at the S. P. Hotel, Wednesday, Nov. 2, at 12:30. There were 36 women present; also J. E. Long, Republican County Chairman. The lunch was excellent and enjoyed by all. Mrs. Moulton of Albuquerque made a very interesting and beneficial talk in regard to the State and County tickets. Short talks were also made by Meses. R. E. Blaney, Nelle W. Day, F. H. Johnson, R. E. Lemmon, Consuelo Richardson, Stella Willingham and Mr. Long.

Mrs. L. J. Adams read a letter from Mr. Wheeling, a Democrat, stating several reasons why he would not support John E. Miles for Governor and why he wished to support Albert K. Mitchell.

The following were elected as officers of the Club: Mesdames F. H. Johnson, Pres.; L. J. Adams, Vice-Pres.; Consuelo Richardson, Secretary; Selma Degitz, Treas.; R. E. Blaney, Chairman of Program Committee; Roy Shafer and Florentino Lopez, Co-Chairmen of Membership Committee; Lucille C. Patterson, Press Correspondent.

There were 27 women joined as members of the Club. The regular meeting to be held the third Monday in each month.

Mr. and Mrs. Albert Wood and children of Oscura have returned from a pleasant visit with relatives at Lovington and other places. They were absent about two weeks.

Birthday Dinner

Fred Lalone, who left this week for his home in Sierra Madre, Calif., after visiting relatives and friends here for the past two weeks, had a birthday last Saturday and to honor him on his 60th milestone, a big fried chicken dinner with all the trimmings was served at the home of Mrs. Josefa S. Vega on the east side. Fred was the recipient of many useful gifts and was showered with many nice compliments and good wishes. We were sorry to see Fred depart so soon, but we hope he will make his coming here an annual custom.

Miss Ruth Petty, who is teaching school at Maric, N. M., attended the Teachers' Meeting in Roswell last week, and was the guest of her parents here, Mr. and Mrs. J. F. Petty of the Economy Grocery Saturday.

Supt. J. M. Carpenter, daughter Ellnor and George Joyce returned home last Sunday from Garnett, Kansas, to which place they journeyed about one week ago for the last sad rites and interment of the remains of Mrs. Carpenter.

The Lovelace brothers, Willis, Jr. and Nolan made a trip to El Paso last Saturday, and returned with Mrs. Willis Lovelace and children, who had been visiting relatives and friends at that place.

Henry Lutz is relieving City Marshal Rolla Ward, while the latter is out on a deer hunt.

School Notes

Friday at 2 p. m. we will have a football game with Vaughn. Charles Snow proved himself to be a real hunter. At 8 a. m. on the first day of the deer season he bagged a buck deer.

The Junior Hi School is working diligently on an Operetta to be given Dec. 1 st the Hi School Auditorium.

The Senior Class is to be congratulated on their decision to give the traditional Carnival over to the whole school. The All-School Carnival will take place during December. Loyal students are beginning to formulate plans.

The Girls' Glee Club is growing more popular daily. The music department was reorganized this year so that all students have an opportunity to take music.

Two alumni of the Hi School are attending the Military Institute at Roswell, namely, Fred English and A. N. Spencer, who are making excellent progress even though the work is exacting.

The tennis court constructed under the direction of Prof. Phil Bright is one of the most popular spots of the school premises. Several other improvements are anticipated.

Game Plentiful

The deer hunting season opened Tuesday morning, with many local hunters being in the mountains in the early hours of the morning. Several cars bearing other states' licenses have been seen in town this week, indicating that game is plentiful in Lincoln County, not even for the native "politicos," but also for our dear neighbors from surrounding states, to quote Charlie (Indian) Madrid of Las Cruces, who extends a warm invitation to people fearing starvation, to "mosey" over to his ranch and fill up on "maiz azul, atole, frijoles, chile and mescal."

Remembered Past Favors

During the period when the wash-outs caused the S.P. trains to route passengers over the Santa Fe, the passengers would have lay-overs of several hours here - and R. A. Walker of the Lyric Theatre, being quick to see the situation, took his car and drove them out to the Malpais (pre-historic lava beds) where they were delighted with that scenic wonder.

Since their departure, nothing had been heard of our visitors until last week, Mr. Walker received a letter from Mr. and Mrs. Howell and daughter Muriel of Silver Grove, Ky., who thanked him for his kindness, and hoping to come to this vicinity at some future date.

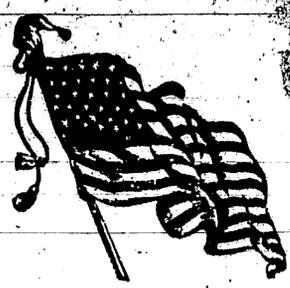

ATTENTION, MASONS

All Master Masons are invited to the regular communication at Masonic Temple, tomorrow night Saturday, Nov. 5.

Vance P. Smith, W. M., R. E. Lemon, Sec'y.

Fire at C.C.C. Camp

A fire broke out at the CCC Camp Wednesday about noon. The Carrizozo Fire Department, led by Chief J. M. Beck, used their new equipment and had the fire soon extinguished.

Republican State Ticket

- Governor-Albert Mitchell
Lieut. Governor-Joseph F. Tondre
Congressman-Pearce Rodey
Supreme Court-James Hervey, Albert T. Rogers
Auditor-Joe Luna
Attorney General-James McCall
Supt. of Public Instruction-Mrs. Corona McWhirter
Secretary of State-Mrs. Fern Vellacott
Treasurer-Mrs. Philip N. Sanchez
Land Commissioner-Burton C. Mossman
Corporation Commission-Chas. A. Cooper

Mitchell at Community Hall, Sat. Nov. 5, 10:30 A.M.

Mrs. C. N. Lemmon

Beloved wife of Conductor Chas. N. Lemmon of the S. P. between here and Tucuman, passed away at Wheeling, West Va., a few days ago. Mrs. Lemmon had been visiting in Ohio and West Virginia, and was taken ill at the last named place, where she died.

Mrs. Lemmon resided here for several years, during which time she was a member of the Carrizozo Municipal School Board, and was also prominent in social and fraternal affairs at this place. Her many friends in Carrizozo will be sorely grieved to learn of her demise.

The funeral will be held tomorrow at the deceased's girlhood home in Decatur, Ill., conducted by the Eastern Star and White Shrine, of which orders the deceased was an honored member.

Mrs. Lemmon leaves a son Don and husband C. N. Lemmon to mourn her loss, to both of whom the sympathy of our entire community is extended.

The infant son of Mr. and Mrs. Manuel Farmer died last Saturday and was buried in the local cemetery.

Attention of readers is called to the full page ad on page 6 of this paper. If you can't find time to read it before Sunday, allow it to take a portion of your idle time on that day so that it may be read carefully and intelligently. It is worth your while to read and absorb its contents.

Mr. and Mrs. Will Ed Harris of their ranch were visitors in town this Thursday.

J. L. Merchant of Capitan was a Carrizozo business visitor the first part of the week.

Mr. the Mrs. Stebbins of Belton, Kansas, are here visiting her sister, Mrs. F. H. Johnson.

The Republican Women's Club will meet at the home of Mrs. Guafie Johnson at 8 p. m. Monday.

How the United States Has Kept the Peace for 20 Years

An Article for Armistice Day
By NICHOLAS MURRAY BUTLER

WHEN the last gun sounded on the morning of Armistice Day, November 11, 1918, the civilized world drew a long breath, satisfied that "the war to end wars" had come to a close and that war was ended for all time. Thoughtful men realized, however, that the idea of using war to settle disputes between nations was buried deep in the consciousness of men, and that it was doubtful if the lessons of the World War would be sufficiently clear to turn the thoughts of men to a newer and more intelligent course of action.

What were the lessons of the World War?

First—that 10,000,000 lives were sacrificed in the war that was fought to end all wars.

Second—the loss in money was equally staggering. In 1920, the Carnegie Endowment published Ernest L. Bogart's book "The Direct and Indirect Cost of the Great War." He stated that the direct money cost was \$186,233,637,097, and the indirect cost \$151,812,352,560, a total of \$338,045,989,657. These figures do not include the cost of human lives and vitality.

Third—that wars engender gigantic economic problems which affect the conquerors as adversely as the vanquished.

The history of the past 20 years of attempt to keep the peace among the nations of the world is

tions are brushed aside with a light heart and a contemptuous gesture. Respect for law and observance of the pledged word have sunk to an inconceivably low level. The outworn slogans of the glorification of war are again resounding in many portions of the globe. Armed force, naked and unashamed, is again being used as an instrument of policy and a means of attaining national ends through aggression and aggrandizement. It is being employed with brutality and savagery that outrage and shock every humane instinct.

"There is desperate need in our country, and in every country, of a strong and united public opinion in support of such a renewal and demonstration of faith in the possibility of a world order based on law and international co-operative effort."

Thus spoke the statesman looking facts in the face, turning his back upon empty and meaningless formulas and facing the future with insight and with courage. But there is no time to be lost. The familiar public policy of "Wait and See" will not do. The time has come for quick, courageous and constructive leadership, and it is possible now for the American people, in the spirit of that declaration, to offer it, both for their own advantage and for the rebuilding of the broken foundations of world prosperity and world peace.

Isolation Not an American Policy.

The superstition that our traditional policy is one of isolation is contradicted by every fact in American history from the time of Benjamin Franklin to the present day. We have not only never been isolated but we have sought every opportunity to explain our life, our institutions, our ideals to peoples in other parts of the world, and particularly to the peoples of France and of Great Britain. What was Benjamin Franklin doing while spending 22 years of his life in Paris and in London? What was Thomas Jefferson, author of the Declaration of Independence, doing when sitting in the gallery of Versailles yonder and listening to the debate on the Declaration of the Rights of Man? What was John Adams doing, living in London and explaining the new Federal Constitution to the British people? What was being done by our great constructive secretaries of state from that time almost to this—John Quincy Adams, Daniel Webster, William H. Seward, Hamilton Fish, Elihu Root, every one of them a powerful force in the affairs of the whole world, every one of them offering helpful cooperation, constructive criticism and guidance on behalf of the American people?

If by a policy of isolation is meant that our people intend at every possible cost to refrain from war, well and good; but that is not isolation: it is something quite different. We are now dealing with the real underlying forces, forces of thought, forces of opinion—the forces which move men in their social, economic and political life.

It is habitual with certain of our public men who hail isolation as a policy to quote a sentence from President Washington's farewell address and another sentence from Thomas Jefferson's first inaugural. Indeed, what they usually do is to quote the sentence from Jefferson's first inaugural and ascribe it to Washington's farewell address.

Both men were effective exponents of the policy of international collaboration and co-operation, and what those two sentences meant was a warning not to become involved in the Napoleonic wars, which some years later we managed to do in the form of the War of 1812. We do not realize how powerful has been the movement among our people not only to co-operate in maintaining prosperity and peace, but in offering leadership and guidance and counsel to that end.

Run your eye back over the history of the last 40 years.

The Czar's Appeal.

It is a little more than 40 years since there was issued in the name of the Czar of All the Russias the most extraordinary appeal to other governments that the world has ever heard. It is a classic document entitled to rank with the very highest, inviting those governments to come forth and counsel together as to ways and means of collaborating to preserve the peace of the world. The result was the First Hague conference of 1899. President McKinley rejoiced at the possibility of accepting this invitation and sent to that conference a delegation of outstanding Americans, at whose head was Andrew D. White, statesman and educator. It was the American delegation which saved that conference from hopeless failure, because, when the governments could not agree upon some of the largest phases of the questions submitted to them, it was the American delegation which pro-

Few men are better equipped to write of world affairs than Nicholas Murray Butler, the president of Columbia

university, who is also the president of the Carnegie Endowment for International Peace. Dr. Butler has been awarded the Nobel Peace prize, has been given degrees by universities the world over. He has had an inside view of all of the steps in foreign affairs taken by the United States and other nations since the Armistice of November 11, 1918. His library at 60 Morningside Drive, New York, contains a valuable collection of books by the leading statesmen of all nations, many of whom are his personal friends. The adviser of Presidents and Prime Ministers, Dr. Butler is as optimistic today as when he counseled with Andrew Carnegie on the problems of educating public opinion for world peace more than a quarter of a century ago.

NICHOLAS MURRAY BUTLER

posed that they should agree upon bringing into existence a Permanent Court of Arbitration. That was done. The court was set up and in a year or two it began to function. Next came the invitation of 1908.

There is hardly an American who knows how far our public opinion went at that fortunate time, almost exactly 40 years ago. It was on June 4, 1910, that this joint resolution was on the calendar of the house of representatives at Washington.

A Real Program for Peace.

The resolution was to authorize the appointment of a commission in relation to universal peace:

"Resolved—that a commission of five members be appointed by the President of the United States to consider the expedience of utilizing existing international agencies for the purpose of limiting the armaments of the nations of the world by international agreement, and of constituting the combined navies of the world an international force for the preservation of universal peace, and to consider and report upon any other means to diminish the expenditures of government for military purposes and to lessen the probabilities of war."

What happened to that remarkable resolution? It passed the house of representatives by unanimous consent. It went to the senate on June 20, and four days following, it passed the senate also by unanimous consent, and was signed by the President of the United States. So the government of the United States was then proposing to lead the way to

Andrew D. White

the establishment of an international police force for the protection of international law and international morality. Was that isolation?

It is vitally important, not only for America but for the whole civilized world to realize what our people and our government were unanimously prepared to do then, and to bring them back to be prepared to do it now.

Strides Toward Peace.

Great progress was made, although by different methods and in various directions, between 1919 and 1929. Steps were taken now here, now there, to improve international relations and international conditions. I shall always believe the untimely death, first of Dr. Stresemann and then of M. Briand to be largely responsible for checking the constructive movement which was then going forward. Immediately thereafter came the world economic and monetary crisis in which we still live and which holds every nation in its grasp. It is a complete illusion to think that there is a French crisis and a German crisis and an English crisis and an American crisis and an Argentine crisis. There is a world crisis, which expresses itself under different conditions and limitations in each country, but at bottom the causes and their effects are absolutely one and the same.

Understanding those facts and looking them in the face, why have we not been able to make

progress in solving these questions? Why is it that the world is going on using up the savings of a thousand years and borrowing as against the possible savings of generations to come? Why is it that we have been unable thus far in any considerable degree to co-operate to check the growth of these destructive forces, economic and social, every one of which makes for the undermining of prosperity and for temptation to destroy peace? Why is it?

There met in London, at Chatham house, in March, 1935, 61 of the leading personalities of the world, statesmen, economists, bankers, industrialists, diplomats, coming from a dozen countries. They spent days in intimate consultation as to how to answer the question which I am now asking. To the great surprise of themselves as well as of everyone else, those 61 men, with different backgrounds and different points of view, agreed unanimously upon a program of economic and monetary reform. That program, simple and easily understood, has been enthusiastically accepted by the International Chamber of Commerce and by the Carnegie Endowment for International Peace, and those two bodies are now working day and night in their quiet way to press it upon the attention of the public and of the governments in order to stop the policy of "Wait and See" and to get something done.

Any observer of human nature and of government must know that the longer we "Wait and See," the more ammunition we present to dictatorship in whatever form it may show itself.

An Age-Old Problem.

We permit these forces to repeat themselves generation after generation, century after century. We look at them as if they were utterly new, as if the world had never heard of them before; and yet in one way or another, from the time of ancient Egypt, man has had to deal with this problem in some one of its forms.

We are face to face with that and it can only be solved in one or two ways. If I may contradict myself, the first way will not solve it. It may be solved by force, which means a temporary solution only, or it may be solved by reason. The minorities problem is not new. Fortunately, France has been very little troubled with it. But look at Great Britain: Angles, Saxons, Danes, Normans, Scots, Celts. War after war for 600 years and then finally they found a solution. They can all live in peace and quiet and order together.

We in America have had a very grave minorities problem with our colored people. It led to a vast civil war which almost disrupted the nation, and it took 70 years before it came to a climax. So, when you see these minorities problems elsewhere, in Asia, in Africa, in Eastern Europe, do not forget that we have had no end of experience with that problem and that there are only the two ways of dealing with it: by force, which does not settle it, and by reason, which will settle it. Time, good order, kindly feeling, highmindedness, moral standards and faith in human nature are necessary.

As one goes about the world today, he must be impressed with the discouragement which is felt everywhere. That is not the way to solve anything. Pessimism is the last resource of the coward. Optimism, faith in mankind, belief in ideas, courage and willingness to call upon your fellow-men to come up out of their little narrow personal environments and to show themselves citizens of their nations and of the world, to constitute a constructive force that, instead of making the Twentieth century of ours the end of an era, will show that we have been able to make it the beginning of a new order in a peaceful and a prosperous world.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

Lesson for November 6

HONORING OUR PARENTS

LESSON TEXT—Exodus 20:12; Luke 2:49; John 19:26, 27; Ephesians 6:1-4. GOLDEN TEXT—Honor thy father and thy mother: that thy days may be long upon the land which the Lord thy God giveth thee.—Exodus 20:12.

The splendid obedience of parents to their children has been pointed out as one of the remarkable developments of modern life. No, we have not made a mistake in writing or in typesetting. We mean just what we say—the obedience of parents to their children. In all too many homes God's order has been reversed and instead of honoring and obeying their parents, children (both young and old) have taken the place of "boss," and mother and father must obey if they want peace and rest.

The need for our lesson of today is both great and acute. The future happiness of hundreds of thousands of children (Eph. 6:3) and the present welfare of thousands of neglected and boss-ridden parents will depend on the intelligence and faithfulness with which this lesson is taught in our churches, and the honesty of heart with which men and women study and receive its truth.

I. The Command of God (Exod. 20:12).

The first and most important consideration to come before us is—what is the mind and will of the Maker of us all regarding this matter of the relation between parents and children? His words are plain—we are to "honor" our fathers and our mothers.

The word "honor" carries with it a great many things, but perhaps the three outstanding elements are respect, obedience, and affection. We should look up to them with high regard, obey them as long as they have the authority over us, and show true affection for them.

II. The Example of Jesus (Luke 2:46-52).

The fact that Jesus was God manifest in the flesh only enhances the glory of His conduct. He who is divine presents an example of obedience and consideration both as boy and man which we do well to emulate.

1. As a boy (Luke 2:46-52). The boy Jesus, increasing "in wisdom and stature and in favor with God and man," (v. 52) had come to His twelfth year and with His parents had gone up to Jerusalem to celebrate the Passover. There moved in His heart the conviction that He must now be about His Father's business—an altogether proper and commendable purpose but one which resulted for the moment in separation from His parents. This was far more serious than a physical separation, for we read that He did not understand Him (v. 50). Tragic indeed are the consequences of our failure to understand our children. Notice, however, that Jesus did not withdraw Himself from their watch care, nor refuse to obey them even though they failed to understand Him. Equally tragic are the results of hasty and bitter separations brought about by the disobedience of children.

2. As a man (John 19:26, 27). The value of our lesson will be greatly reduced if we see only the responsibility of children while they are young. We are the children of our parents as long as we and they live. Being grown up and having a family of one's own does not relieve one of the precious responsibility of care for one's parents. Jesus was dying on the cross. His brethren apparently still regarded Him in unbelief, and His mother now needed a son to care for her. Even in His dying agony Jesus remembers to commit her to the care of His beloved disciple, John. One marvels at the carelessness and hardness of heart that will permit men and women who have time and money for everything else and yet will neglect their aged parents and even shunt them off into a public institution for care. Notice the promise that accompanies the command of God (Exod. 20:12; Eph. 6:3). If that is the reward of those who do right, what do you think will be the punishment of those who disobey God?

III. The Admonition of Paul (Eph. 6:1-4).

This matter of honoring and obeying parents "is right," says Paul. It is the Lord's way. Only if parents command their children to do wickedness would there be ground for disobedience to parents. Apart from such circumstances every parent has the right to expect the child's obedience.

There is tremendously important truth on the other side of the picture. Parents are not to provoke or disobey their children. How much we need God's grace at that point. It is so easy to say and do things that needlessly irritate our children. It is so convenient to nag at a careless child. Often we expect more of them than their age will justify. We are apt to punish them in a spirit of anger or revenge and thus to destroy the value of discipline. May God help us, who are parents, that we may take to heart this part of our lesson. Our children are our most valuable possession.

Pillow and Chair Set Of Crocheted Lace

Pattern 6168

Spend spare moments profitably with your crochet hook and some string and add charm to your home with crocheted accessories that match! Interesting to make and inexpensive, too, you could make either chair set or pillow alone or make a pillow with matching scarf ends. Can't you see what attention they'd attract at a bazaar? Pattern 6168 contains charts and instructions for making the set; illustrations of it and stitches used; materials needed. To obtain this pattern, send 15 cents in stamps or coins (coins preferred) to The Sewing Circle, Household Arts Dept., 259 W. 14th St., New York, N. Y.

That Everyone Who Takes Aspirin Should Study

Drop a Bayer Tablet in water—It starts to disintegrate in 2 seconds—hence is ready to "go to work" rapidly

This Quick Dissolving Property of Genuine Bayer Aspirin Explains Fast Relief

If you suffer with headaches or the pains of rheumatism or neuritis, keep the above picture about genuine Bayer Aspirin in your mind. Especially if quick relief is what you want.

For the way a Bayer Tablet works in the glass is the way it works when you take it. It starts to dissolve almost at once—hence is ready to "take hold" of the rheumatic pain or headache with astonishing speed. Relief often comes in a few minutes.

Always ask for "Bayer Aspirin"—never ask for "aspirin" alone.

GUIDE BOOK TO GOOD VALUES

When you plan a trip abroad, you need a guide book, and there is no one better qualified to write it than the author of this book. It is a book that will save you money and give you a better understanding of the world. It is a book that will help you to see the world as it is, and not as you imagine it to be. It is a book that will help you to make the most of your trip, and to avoid the common pitfalls of travel. It is a book that is worth every penny you spend on it.

Floyd Gibbons'

ADVENTURERS' CLUB

HEADLINES FROM THE LIVES OF PEOPLE LIKE YOURSELF!

"Dogged by Danger"

HELLO EVERYBODY:

All John Gerlen wants is a job that's safe. He tried out two jobs, but they were too hazardous. Old Lady Adventure stepped in and spoiled both of them for him. Now he's working at the safest job there is. That's what John thinks. Well, after seeing what happened to him on his other jobs, maybe he's right in his own case. Anyway, let's get on with the story and see how he made out with his first two.

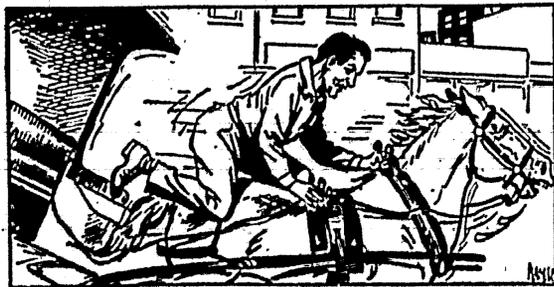

In the beginning John wasn't worried about safety. He hadn't even started thinking about it when he signed up in the year 1917 to learn the trade of ironworker. He worked at that until the summer of 1822, and that year found him roaming around on the gaunt, iron framework of a skyscraper in Newark, N. J.

Plunged From Fourteenth Floor.

John was on the fourteenth floor of that building. From where he stood he could look down clear to the cellar and see nothing but the large board that stuck out from each floor—boards that were there to get kegs of rivets on. He was looking at those boards just a few minutes before lunch time. Then the whistle blew and all hands ran for the lift to get down to the earth and eat.

John ran just a bit too fast this time. He missed his step and plunged over the side. Down he went. At the thirteenth floor he passed one of those protruding boards. A large nail sticking out from the end of it caught him on the jaw and ripped his face open clear to the temple. And then on he went again.

He passed the twelfth floor without even hesitating, but eleven was his lucky number. At the eleventh floor another protruding plank caught

He was headed for the path of a moving train.

the straps of his overalls, and there he hung, with nothing but a couple of thin cloth bands saving him from a death plunge to the basement. Men came running from all over the framework, but there was "little" they could do for John. The plank would just about hold his weight—that was all. If anyone tried to walk out to get him, the board would break and then two men would hurtle to their deaths instead of one.

Somebody turned in a fire alarm, and the firemen worked out the problem. They rushed to the tenth floor and spread a fire net under the spot where John hung. An ironworker, armed with a long knife, crept out as far as he dared on the rickety board and cut John's overalls straps. Down John plumped into the net. "And that," he says, "finished me with ironworking."

Decided to Look for "Safe" Job.

John went to the hospital with a badly torn face. When he got out he began to think of another job—and this time it was going to be a safe one. The safest one he could find was driving a milk wagon. What danger could there be in that. A bottle of milk never bit anybody. If it could, they wouldn't feed so much of it to babies. It was as simple as falling off a log—and a darned sight safer than falling off skyscrapers.

For two weeks it was fine. John didn't mind jumping out of the wagon every 10 or 15 feet to run in with a bottle of milk because it gave him a chance to get his feet on the ground, and that was a swell, comforting feeling. He was having the time of his life until one day, when he was just finishing up, he pulled into the railroad yard to load his empty bottles on a freight car. Then, half way to the yards, one of the hitching straps broke. The horse bolted.

Says John: "Nothing was holding the wagon away from the horse. When I pulled on the reins to try to stop him, the wagon would run into him and that would make him run all the faster. We shot through traffic and into the freight yard, and as we came to the yard I could see that the crossing gates were down. If I let him go, he would crash through those gates and right into the path of a moving train."

For a minute, John thought of jumping. Then he ruled that out. In the first place, jumping wasn't such a safe trick with the horse streaking along at what must have been a 30-mile an hour speed. And in the second place, he couldn't quite see the justice of leaving that poor fear-crazed horse to dash to his death without trying his best to save him.

They were half way to the crossing gate then, but John took a chance. He climbed out on the front of the wagon and started talking to the horse. He had seen fear-crazed horses calmed down before by a few reassuring words, but this horse wasn't to be talked out of anything. He ran on, faster than ever.

Played His Last Trump Card.

John climbed back to the seat. That in itself was a feat. If you think it's any joke to move around in a wagon drawn by a runaway horse, just try it some time. John got back all right, but by the time he did, the horse was within 10 feet of the crossing. Then John played his last trump card. He dropped one rein, seized the other in both hands, and pulled with all his might.

The bit dug into the horse's mouth and turned her sharply to the right. The wagon swerved, skidded along on two wheels, and then over it went, dumping bottles all over the place, and dumping John out on top of the bottles.

John lay on the ground, out cold. He woke up in the hospital with two broken ribs and a broken arm. Milk wagon driving a safe job? Bolony!

Then John stopped fooling around and got himself a job that really was safe. And if you ever walk around a corner and run into a cop spending a quiet evening shooting it out with a bank robber or a stick-up artist—well—maybe it's John. He's on the police force now.

Lincoln of Central America
Father Jose Simeon Canas (1787-1838) was noted for his efforts to free Central America from Spain and to abolish slavery. His contribution to the liberalization of education and the diffusion of learning has also memorialized his name.

Statue Gift to U. S.
The statue of Rochambeau was the gift of the French republic to the United States. It stands in Lafayette square in Washington, D. C., and was unveiled with ceremony by President Theodore Roosevelt in 1902.

Most Mistaken Person
"The man that never makes mistakes," said El Ho, the sage of Chinatown, "does not exist except in his own imagination, and he is generally a most mistaken person."

Makers of Solar System
The solar system is the assemblage of asteroids, comets, meteoric material and planets, with their attendant satellites, which form a family of objects intimately connected with the sun and practically isolated from the other stars.

Were Potato Blossoms in Hair
Although the potato, a member of the nightshade family, has never been grown for its flowers, it is recorded that Marie Antoinette, to help popularize the potato in France, wore potato blossoms in her hair.

The Tax Collector's Share
A family living on \$2,800 a year, says the National Consumers Tax commission, averages about \$327.19 for food. The Tax collector eats up \$37.27 of that food bill.

HEALTH

● Rheumatism and arthritis often traced to infected teeth. Proper care important.

By Dr. James W. Barton

THE evidence that infected teeth or tonsils cause some cases of rheumatism or arthritis is not now disputed because nearly every family, in their own home or in the homes of relatives, has observed one or more of such cases.

Pyorrhea—infected gums—is also known to be a cause of arthritis.

For some time research workers have suspected the sinuses as also being a cause of arthritis. These little caverns or cavities are situated in the bones

about the nose and form the sounding box for the voice. We are all familiar with the flat or nasal tone of the voice when these caverns are filled with mucus or pus. However, unless the patient had an active inflammation of a sinus—sinusitis—the fact that a sinus without active inflammation could cause arthritis was not suspected.

Dr. Lee M. Hurd, New York Poly-clinic Hospital and Medical school, in Medical Clinics of North America, says that he believes that acute or chronic sinus infection aggravates or is the cause of many cases of chronic arthritis because he has observed many cases of arthritis in his own practice that were benefited by the removal of sinus infection.

Sinus Treatment Successful.

Thus in a group of 400 consecutive cases of arthritis seen in office practice, there was some X-ray evidence of sinus infection in 68 per cent, the majority of which gave no history of symptoms of sinus trouble at the time of examination. Of those who were then given sinus treatment—medical or surgical—80 per cent showed various degrees of improvement. In their arthritic symptoms, which seems to prove that sinus infection is a definite cause of arthritis. Dr. Hurd personally observed and treated the majority of these cases and can substantiate the statement that when the sinus infection was relieved either by medicine or surgery the patient was greatly benefited; some becoming entirely free of arthritic symptoms.

The point then is that in searching for the cause of rheumatism or arthritis more than the mouth—teeth, tonsils, and gums—should be examined.

"The majority of these patients had no symptoms of sinus disease and were not aware that they had it. About one-third had a discharge or pus-like dropping from nose and back of throat. Sinus headaches were rare."

Low Back Pain

Treatment Explained

In cases of low back pain due to injury—swinging at a golf, tennis, or baseball and missing it, lifting a weight, stepping downward when the ground was thought to be level, applying the foot brake to a motor car, or other conditions—it has been found that the joint between the last spine bone or sacrum and the hip bone or ilium has been pulled slightly apart. This is called sacroiliac sprain. The usual treatment by orthopedic and osteopathic physicians is to bend knee into abdomen, then have the patient (assisted by the physician) straighten his leg out forcibly.

A method that may prove of great help to these sufferers with sacroiliac sprain is described by Dr. A. H. Warner, Woodside, Long Island, N. Y., in Journal of Bone and Joint Surgery, Boston.

Instructions Given.

"The inner tube of a tire is placed around the footboard of the bedstead at the level of the upper surface of the mattress. Two loops, about eight inches in diameter and made of canvas tape or a trouser belt, encircle the inner tube perpendicular to its length (at right angles). The feet of the patient are placed in the loops, so that the tape hooks above the ankles and across the upper part of the toes. The two loops are about 18 inches apart. The foot of the bed is raised and the patient pulls himself toward the head of the bed (now lower than the foot) sufficiently to apply tension on the rubber inner tube. In this way the patient's body weight opposes the pull of the inner tube. This position can be maintained for hours at a time without discomfort to the patient. It will usually be found necessary for the patient to pull himself 'down' to the head of the bed every once in a while, as the inner tube pulls him up the other way."

For one who has found it impossible to stand on his feet or walk without severe low back and sciatic pain, this home method of getting the surfaces of these two bones back into their right positions should be tried.

WHAT to EAT and WHY

C. Houston Goudiss Describes Food Value and Versatility of Gelatin; Outlines Its Many Uses in the Diet.

By C. HOUSTON GOUDISS

WHEN we try to appraise the nutritional values of any one food in comparison with others, as a rule we have a difficult task. Most foodstuffs are composed of so many different substances that what is lacking in one will be supplied by another, and making comparisons may therefore be misleading as well as futile. But there is one food which is outstanding, not only because it is far less complex than

most others, but because it is no exaggeration to say that without it, some of us might not be alive, and those of us who are alive would obtain far less enjoyment from our daily existence.

That food is gelatin!

What is Gelatin?

Gelatin is a protein food which has no equal as a carrier, binder and "extender" of a wide variety of other nutritive materials. Chemically, it is classified as a colloid, which means that in solution, it can be removed from its solvent by filtration.

It is because of this that it is so useful in producing smooth, delicious ices, cream and other dainties, free from ice crystals.

Gelatin is an almost pure protein—a kind of protein known as an albuminoid. It is not a complete protein, because it is deficient in three of the amino acids that are necessary both to support growth and repair body tissues in this it differs from meat, cheese, fish, eggs and milk, which are known as complete proteins.

It cannot be used as the sole source of protein in the diet, because those three missing amino acids are necessary for the formation of new body tissue. But it is especially rich in lysine, one of the protein building stones that is particularly important in the diet of children. Experiments indicate that no other amino acid can take the place of lysine and that it must be furnished by the food if adequate nutrition is to be maintained.

That coupled with the fact that it is non-irritating and easily digestible accounts for the large

Building, Maintaining Healthy Teeth

By C. HOUSTON GOUDISS

It is an alarming fact that almost every adult in this great land of ours is affected by some form of oral disease, and that more than 90 per cent of our school children have decayed teeth. A prominent medical authority made the statement that if dental decay became rare, instead of almost universal, more than half of all sickness would be eliminated.

Remarkable and widely heralded advances have been made in our knowledge of how to control and prevent many dangerous and debilitating diseases. A decayed tooth is a poison factory, distributing its noxious product to every part of the body. In the body, that poison attacks and centers in the weakest spot. It may lead to neuritis, rheumatic ailments, dyspepsia, or duodenal ulcers. It may even be a contributing cause of heart disease.

Only a small percentage of our population is yet aware of the far-reaching effects of teeth upon health. There is a close relationship between healthy teeth and healthy bodies, and between decayed teeth and sickly bodies.

By learning something of the importance of caring properly for the teeth, some men and women of middle age look and feel younger than their parents did at the same age.

I have endeavored in many of the WHAT TO EAT AND WHY articles, which have appeared in this newspaper over my signature, to point out the close relationship between diet and dental disease; between frequent and thorough brushing of the teeth with an efficient dentifrice so as to remove all food particles, and strong, beautiful teeth.

I have received many letters from readers of these articles, showing that homemakers are eager for sound, authoritative advice on the proper care of the teeth. To help these and other readers to know how to properly care for their teeth, I have prepared a booklet on BUILDING AND MAINTAINING HEALTHY TEETH which I am offering FREE, because I feel so strongly that this information should be in every home, knowing as I do, that the salvation of the human race may lie in saving their teeth. Address, C. Houston Goudiss, 218 S. Desplaines St., Chicago, Ill.

commend the addition of 1 per cent of gelatin dissolved in the milk. This usually causes it to be assimilated easily and satisfactorily. When it comes time to change a baby's food from liquids to solids, gelatin also proves useful, for its soft, semi-solid texture makes an excellent transitional food.

With toddlers and school children, gelatin—the carrier and "extender"—provides a splendid method for offering foods that are disliked. Vegetables that draw forth protests when presented in the usual fashion are eaten with relish when molded into a sparkling lime- or lemon-flavored salad. The coarse texture of certain raw vegetables, such as carrots and cabbage, or the tart flavor of some fruits, may likewise be modified by serving them in a gelatin base.

And it doesn't require statistics from nursery schools to tell mothers how readily children eat gelatin desserts when they are brilliant with color and flavored with orange, raspberry, cherry, strawberry or other well liked flavors. Every mother knows this from her own experience—and I rather suspect that many mothers describe these attractive molded desserts as the prize to be won in return for cleaning the plate of the main course!

In the Reducing Diet

Both men and women who are counting their calories, in an effort to avoid overweight, or to reduce, can profit by taking gelatin salads and desserts, which satisfy hunger without providing unwanted fuel value.

In cases of digestive disturbance, gelatin is frequently recommended because of its bland taste, and because it leaves no residue in the lower intestinal tract.

This same splendid food is also advised by doctors when a high protein diet is desired to speed growth, or during convalescence from an illness. Gelatin may be added to broths, milk, fruit and vegetables, and these, in turn, may be incorporated in solidified gelatin.

Indeed, this many-sided food-stuff has come to play such a wide and varied role in nutrition, not only by itself but by enhancing the value of other foods; that it must be numbered among the products that help to increase national health and vigor.

The Fords Tell Their Plans for 1939

IF WE KNEW anything better we could do for the country than make good motor cars, we would do it.

By every one doing his best in the job he thinks most useful, this country is going to regain its momentum. We have tried to do our best in our job.

When business was suddenly halted in its recovery more than a year ago, we determined that we should keep going anyway, if not at full-volume motor car production, then at getting ready for greater motor car values that would help future production.

EXPANDING FOR THE FUTURE

We began to build 34 million dollars' worth of new plants and equipment. We felt that if we could not employ all our men building motor cars, we would employ as many as we could building better production facilities.

We were told, of course, that this was no time for expansion, that a wiser business policy would be to "hold everything"—which means, stop everything. But no one ever got anywhere standing still.

Besides, we are not defeatists. We do not believe this country has seen its best days. We believe this country is yet in the infancy of its growth. We believe that every atom of faith invested in our Country and our People will be amply justified by the future. We believe America is just beginning. Never yet have our People seen real Prosperity. Never yet have we seen adequate Production. But we shall see it! That is the assurance in which we have built.

Business is not just coming back. It will have to be brought back. That is now becoming well understood in this country; for that reason 1939 will be a co-operative year. Manufacturers, sellers and buyers will co-operate to bring back the business that is waiting to be brought back.

This construction program is almost completed. It has increased activity and payrolls in a number of related industries. It has given us better facilities for building better cars and trucks, and eventually our new tractor which is being perfected.

THIS MEANS MORE VALUE

The current program has provided a new tire plant, which will turn out a part of our tire requirements . . . a new tool and die plant that will help us cut the cost of dies . . . and a steel-press plant that will enable us to make more of our own automobile bodies. These are in addition to the plants we already had for producing glass, iron, steel, plastics, and many other things.

We don't supply all our own needs, of course, and never expect to. The Ford engine is one thing

Henry and Edsel Ford, on the occasion of the 35th anniversary of the founding of the Ford Motor Company, June 16, 1938

that no one's hand touches but ours. Of nearly everything else we use we build some quantity ourselves, to find, if possible, better and more economical ways of doing it. The experience and knowledge we gain are freely shared with our suppliers, and with other industries.

We take no profit on anything we make for ourselves and sell to ourselves. Every operation from the Ford ships which first bring iron ore to the Rouge, is figured at accurate cost. The only profit is on the finished result—the car or truck as it comes off the line. Some years, there is no profit for us. But we see to it that our customers always profit. A basic article of our business creed is that no sale is economically constructive unless it profits the buyer as much as or more than the seller.

Our new plants have helped us build more value into all our cars for 1939. That means more profit on the purchase to the purchaser.

We have not cut quality to reduce costs. We simply will not build anything inferior.

NEW TESTING EQUIPMENT

While we were putting up new plants to produce cars, we constructed new equipment to test them. The first weather tunnel of its kind ever built for automobile research went into operation at our laboratories this year.

It makes any kind of weather to order. The weather it delivers every day would take months to find in Nature. Our cars are weather-tested to give you good service in any climate anywhere.

In other tests, every part of the car is punished unmercifully. Then our engineers tear it down to see if they can find abnormal wear or any sign of weakness.

The money we spend on tests saves you money on repairs. And your family car is safer and more dependable when we put it in your hands.

THE NEW CARS

We have two new Ford cars for 1939—better cars and better-looking—but we also have an entirely new car.

It's called the Mercury 8. It fits into our line between the De Luxe Ford and the Lincoln-Zephyr. It is larger than the Ford, with 116-inch wheelbase, hydraulic brakes, and a new 95-horsepower V-type 8-cylinder engine.

We know that our 1939 cars are cars of good quality. We think they're fine values in their price classes.

With new cars, new plants, new equipment, the whole Ford organization is geared to go forward.

The American Red Cross

has had a busy year. During the past twelve months, 108,000 persons, victims of 129 disasters have been rescued, fed, clothed, housed and given medical and nursing care by the Red Cross. This work is made possible by annual membership Roll Call, taking place this year from Nov. 11 through Thanksgiving Day.

**In The Third Judicial
District Court**

Of the State of New Mexico Within and for Lincoln County.
W. J. Price, Plaintiff, vs.
Joe Hensley impugned with the following named defendants against whom substituted service is hereby sought to be obtained, to-wit: George G. Henderson, R. C. Sheehan, Jack Robert Strong, Clyde Coon, L. L. Miller, Frank Winters, Thomas Jefferson Mining Co., a corporation, Edd Weisler, if living, if deceased, the unknown heirs of Edd Weisler, deceased; John H. W. Luskowsky, if living, if deceased, the unknown heirs of John H. W. Luskowsky, deceased; Mrs. John H. W. Luskowsky, if living, if deceased, the unknown heirs of Mrs. John H. W. Luskowsky, deceased; and all unknown claimants of interests in the hereinafter described premises, adverse to the plaintiff, Defendants.
No. 428 Civil

Notice of Pendency of Suit
The State of New Mexico to the above named defendants, GREETING:
Notice is hereby given that W. J. Price as plaintiff has filed his complaint in the above named court and in the above numbered and styled cause of action against you and each of you, that the general objects of said action are to quiet the said plaintiff's title in and to the property described in the complaint in said cause, said property being the Thomas Jefferson Group of eight unpatented claim and the Tom Pain Lode Mining Claim situate in the Jicarilla Mining District, Lincoln County, New Mexico, embracing a part of sections 20 and 25, and 26, Township 30 South, Range 12 East, N.M.P.M., and to establish plaintiff's estate in said title against any adverse claims of the defendants and each of them and to stop and bar the defendants and each of them from having or claiming any right or title to or interest in or lien upon said property.
You are further notified that unless you enter your appearance in said cause on or before the 21st day of November, 1933, judgment will be rendered in said cause against you by default.
The name of plaintiff's attorney is John E. Hall, and his postoffice address is Carrizozo, New Mexico.
Witness my hand and seal of said court this 15th day of October, 1933.
(D. O. Seal) Edward Penfield,
District Court Clerk,
By Thelma Shaver,
Deputy.

Going to El Paso?

If you are going to El Paso at any time and staying over night, if you will call at this office, we will explain to you how you can save yourself one-half of your hotel bill at three of the leading hotels. In other words, our plan will save you 50 cents on every dollar you spend. This is important, and virtually concerns your pocketbook.--Act now under our absolute GUARANTEE PLAN.

10 REASONS

Why You Should Vote For The Republican State And County Tickets

1. Only the election of a Republican congress will give industry the "go-ahead signal it needs to create millions of private jobs.
2. Republican congressmen are pledged to oppose all further increases in the national debt which has jumped \$17,000,000,000 in the last 5 years. Further increases mean that all of us, no matter how poor, may be paying income taxes soon.
3. Republican congressional candidates favor administration of relief by the states where it can be most intelligently and economically handled. They do not propose the abandonment of relief until Business has gotten on its feet.
4. The persistent attacks on the New Deal on the independence of our Supreme Court and of Congress can be warded off only by a Republican congress.
5. A Republican congressional delegation will fight to amend the National Labor Relations Act to assure fair play between labor and management as American Labor desires it.
6. Republicans want the Social Security Law amended to safeguard the tremendous sums that all of us are paying into the national treasury and to prevent it from being spent as general revenue.
7. The New Deal began with 12,000,000 unemployed. Today, five years later, there are still 12,000,000 men and women out of work. National income is dropping to new low levels.
8. The New Deal program has crippled business instead of aiding it to recover. The Republican party says, "Give Business a Chance!"
9. New Deal economists think that a WPA job is the answer to unemployment. The Republican party desires to stimulate private work at an American standard of wages.
10. Under five years of New Deal policies, labor has lost millions of hours of work, billions of dollars. The Republican party aims at the restoration of labor.

Dried yolk	Pounds	1,188,000	5,426,358
Green yolk	"	422,060	1,482,862
Egg albumen	"	1,275,790	2,844,073
Wool and mohair	"	58,037,621	326,034,700
Dried milk	"	59,620	2,924,167
Butter	"	188,013,286	312,085,407
Insoluble molasses, Galv.	"	156,888,307	301,449,509

Just stop and consider for a minute how many acres of land it would take to have produced these imported farm products, and how much more the income would have been if we had raised these additional amounts at home, instead of importing them from the foreign markets. This New Deal administration has sold the farmstead down the river.

(Political Advertising)

It Must Not Happen Here!

EFFORTS by the national administration to defeat Democratic candidates who were presumptuous enough to defy the White House on the Supreme Court Packing Bill and the Executive Re-organization measure have been beaten in every decisive primary election. The utter failure of the "Purge" in South Carolina, Maryland and Georgia, the defeat of Senator McAdoo in California, and the whipping administered to Senator Pope in Idaho point to a rapidly increasing resentment against New Deal coercion.

Throughout the nation, the trend back to "Normalcy" has made itself apparent. In Maryland, the attack upon Democratic Senator M. E. Tydings brought out the angry charge of "Federal Invasion." Supporters of Senator Tydings declared that the "Biggest issue" in the primary campaign was the interference of official Washington in the determination of a state's selections of candidates. "Once the executive branch of the government has succeeded in naming the Representatives whom it desires in Congress the division of powers created by the Constitution is gone, and with it vanishes one of the major safeguards of democracy," argued Tydings' followers.

The swing toward a Rational point of view in public affairs has blocked the New Deal's hope of removing Senator George of Georgia, Senator Tydings of Maryland and Senator Smith of South Carolina, from Congress. The reaction to federal interference in these states has convinced observers that the Democratic Party will be hopelessly split by 1940; that Republican Senators will control the activities of the next Congress and that the House of Representatives will seat over a hundred additional Republicans when it convenes in January.

American voters in every community, Republican and Democratic alike, have been roused to angry protest over the brazen attempt to coerce the decision of our citizens. For the first time in the history of the nation, it has been announced as a matter of public policy that the Executive Branch of the national government will decide who shall be our Congressmen. For the first time, the test of fitness to serve the people has been completely eliminated from consideration. Mental ability, courage, integrity—none of these is important. The decisive test is willingness to follow the dictates of the New Deal leadership.

How can Americans justify this procedure? Are we willing to say to our citizens, "To go to Congress, you must take an oath not to protect the constitution, nor to represent your constituents, but to do what you are told." In the last Congress, a measure was introduced into the House of Representatives and passed by that body although there were available only three printed copies for the inspection of 435 Representatives. Hundreds of those who voted "Yea" had never even seen the bill. This is the breakdown of American government. This means the complete collapse of the principle of Representation. Legislation cannot be properly framed under such circumstances.

The "Purge" aimed to perpetuate this kind of shocking performance. If it had been successful in any large measure, we should have been confronted in the next few years with a Congress of McCarthies, chattering in unison the tune of their masters. From every newspaper devoted to the preservation of American traditions of government, the opinions of the nation have been expressed. The wholesale defeat of the "Purge" has been hailed with applause by Democratic journals and Republican alike. We have proved that the Russian National Assembly which jumps at Stalin's voice, the Reichstag which lives and dies for the leader, the Chamber which cries and laughs with Italy's dictator are not for us.

It Must Not Happen Here!

Platinum, Once Worthless, Now Joins Metallic Nobility

Heat and acid-resistant, capable of withstanding intense heat, this ore now competes with gold on jewelry counters and commands high prices on the world's metal markets.

Prepared by National Geographic Society, Washington, D. C. — WNU Service.

WITHOUT quantity manufacture of heat and acid-resisting equipment such as platinum and its alloys afford the laboratory, the tremendous progress of chemistry in the last hundred years would not have been possible.

Platinum utensils, able to withstand white heat necessary for analysis, have helped geologists determine the composition of rocks, and chemists to make many alloys.

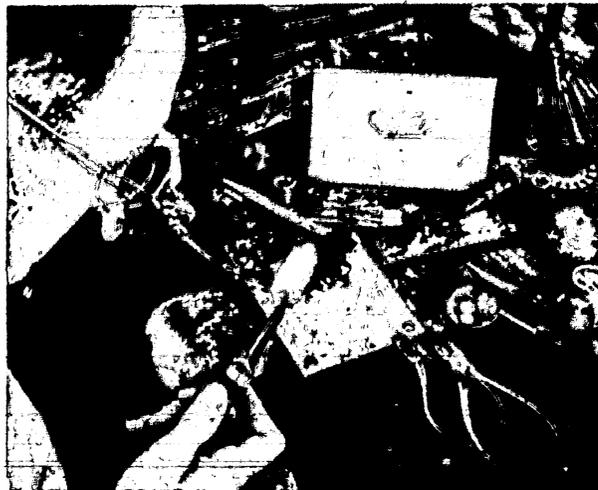

For absolute accuracy, the national bureau of standards in Washington, D. C., as well as similar institutions abroad, uses weights of 90 per cent platinum and 10 per cent iridium—their untarnishable nature insuring constancy. Again, in electric-furnace apparatus, and in measuring extremely high temperatures, platinum serves the scientist. With it operations may reach a temperature up to 3,000 degrees Fahrenheit.

A continuous circle here; but not one to cause economic pain!

Fantastic now the thought of that South Seas merchant who cursed his luck on receiving payment in platinum "debased" bars that he could "neither dispose of, nor find any means of refining." Incredible, too, that a metal prominent now in jewelry cases the world over should have been used in remote Siberia for hunting-bullets, just as gold bullets were used in old North Carolina.

Cents to Dollars

But platinum was not always in the luxury brackets. The crude metal sold for as little as 34 to 41 cents an ounce in the early 1800s. In contrast with that all-time high, after the World War, of more than \$150 an ounce. It was then apparently because of its scarcity and high price, that a fickle public reached for platinum jewelry. Wedding bands, cuff links, pencils, knives, cigarette cases, settings for jewels—all turned pale to meet the demand.

Welding platinum to fashion a setting for star sapphires. It is hard to realize that this metal, which brought more than \$150 an ounce shortly after the World War, sold for 34 cents an ounce in the early 1800's and was used for bullets in far-away Siberia.

Like silver and gold, platinum has had its rushes and speculative booms—and its depressions. Small finds, scattered over the globe, add their bit to ever-changing problems of adjustment between scarcity and surplus. A few years back, when platinum fields were discovered in northern Alberta, Canada, nearly every available man in the region made for the "digging." A de luxe rush, writers called this short but enthusiastic stampede, because parlor cars and comfortable river steamers made the trip easy for sourdough and greenhorn.

In South Africa, on the Johannesburg stock exchange in 1923, platinum madness took its place beside diamond frenzies and gold fevers. Everybody was buying or wanted to buy shares in the unexpected platinum rock deposits.

"Lode deposits in the Bushveld Complex alone," wrote one commentator, "probably contain in the aggregate more platinum than all the rest of the earth's crust."

Yet later this industry came practically to a standstill because of the low prices then prevailing for platinum.

the world's market, until the World War and the Russian revolution for a time halted activities. Accumulated stocks could not hold up. Once more platinum users worried; but needlessly.

New Diggings

Two important new sources came suddenly to light, a wealth of platinum metals mixed with copper-nickel ores of Canada, and in large rock deposits of South Africa. Or, as one British platinum house naively put it, these opportune finds came "with the good luck which so consistently favors this country."

Individually, however, prospectors make few lucky hauls. Big platinum nuggets, such as excite gold hunters, are rare. The 21-pound nugget discovered in Russia in 1843 is the largest the world has known; today it is worth about \$12,800. But few others compare.

A shining heap of all platinum yet recovered, it is estimated, would weigh little more than 580 tons, or less than half the weight of the gold produced in 1936. Canada, Russia, Colombia, and the Union of South Africa furnish the bulk of our platinum needs and for a time controlled the industry through an international company.

Other countries, including Spain, Panama, Brazil, Australia, and Japan, as well as Alaska and some of our own states, also yield the metal.

From many placers only a few grains of crude platinum are recovered from each cubic yard of material treated. To supply a metal-hungry world, however, even such tiny amounts are worth the effort. Worth too, hardship in primitive country and struggle against hostile nature.

Dredgers and Divers

Riding small steamers up the San Juan, passengers meet strange contrasts. First a dredge, insatiably scooping up mammoth mouthfuls of sand, gravel, and water, to pass through screens and over riddle boards. Then, just around the next bend, brown diving girls tie heavy cones to their bodies before sinking to river bottom in search of platinum-bearing sands. Some dive without stones, working fast at depths from 6 to 12 feet. Emerging with

as much gravel as they can carry, they give it to men waiting along the banks to wash in shallow basins.

Along meandering rivers of the vast Union of Soviet Socialist Republics, quantities of platinum are annually extracted by modern electrically equipped dredges, to which peasants working by hand add a considerable amount.

Five such monster robots were made in the United States and shipped to Leningrad in 1925-30. In pieces they went over the Transiberian railroad to the foothills of the Ural and thence through the mountains on specially constructed rails.

It was even necessary to build dams on two of the smaller rivers to get enough water to start several of the dredges.

Since it happened that the November day in 1927 when the first of the dredges went into operation at Vaino-Shaitanski Zavod was also the tenth anniversary of the celebration of the revolution, the Soviets made an official occasion of it.

To the strains of the local band, the district Soviet manager carefully cut the red banner tied about the bucket line and digging ladder. Representatives of the supreme council from Moscow gave official blessing. Heads of various workers' organizations spoke, and finally in accord with the formal invitations issued for this "triumphant start of electric dredge No. 11"—all forgathered "for a glass of tea at the school of industry."

"These dredges must have been successful," reasoned the San Francisco company which sold them, "because we have heard so little of them since."

New Grid Offense

GRANDSTAND coaches agree that the 1938 season has brought something new to football. During attack is again ruling the game. So far, the season has developed a brilliant offense not seen for many a year.

As a result, scores have been climbing. There are fewer scoreless ties and dull games. Whether you've been taking your football from the 50-yard line or over the radio, you've been treated to more thrilling dashes-for-touchdowns in the current crop of major games.

The coaches themselves are at a loss to account for this new spirit in the game. Jim Crowley says:

"Teams that aren't supposed to be so hot on offense are running wild. Every one's got a passer and at least one fair runner. I thought my team at Fordham had a good attack. It's just average, I guess."

Crowley did not exaggerate when he said that every team has a good passer. Among the boys who are throwing the ball with exceptional talent are Bill Patterson of Baylor, Dave O'Brien of Texas Christian, Harold Van Every of Minnesota, Everett Kischer of Iowa State, Lanny Hollins of Vanderbilt, George Stirrweiss of North Carolina, Bill Paulman of Stanford, Wilmeth Sidat-Sing of Syracuse, Sid Luckman of Columbia and Gill Humphrey of Yale.

Increased backfield versatility has accompanied the rise of good passing. The hurlers mentioned above can run as well as pass. Teams no longer rely upon the specialty back.

The development of the air-raid has brought new problems to the defense strategists. The five-man line has not figured importantly in their calculations. The 6-3-2 and 7-1-2 defensive alignments, being more adaptable, are getting greater use. There is a trend toward less blocking the line by the offensive team.

Lateral passes seem to be in the discard. But the loss of this spectacular play should not trouble the fans who, at mid-season, have already seen the best brand of football in a decade.

Here and There

GOLFERS in Bendigo, Australia, are on the verge of jitters because of the large number of balls carried off by crows during matches.

No changes in size or weight have been made in the cricket ball since the first one was manufactured 370 years ago.

Ab Jenkins, holder of most of the automobile records for racing against time, plans to install a new motor and then go after Capt. George Eyston's mark on Bonneville salt flats.

Every West Point football player hurt in a game is carried from the field on a stretcher, regardless of the nature of his injury.

The 349 percentage with which Jimmy Foxx won the 1939 American league batting championship is the lowest since 1903 when Ty Cobb batted .324.

Willie Turnesa and Johnny Fischer are among the few topflight golfers who still use wooden shafted clubs.

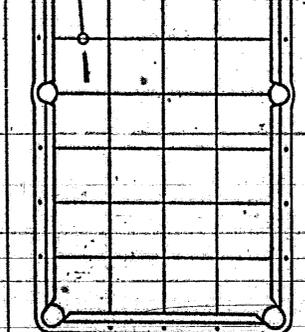

Fielding Yost says that fumbles recovered by the opposition cost the fumbling team an average of 30 yards.

Unless the Yankees make some changes this winter their 1939 infield will average 30 years of age, even with youthful Joe Gordon at second base.

Pocket Billiards

By CHARLES G. PETERSON
President, National Billiard Association of America and World's Trick Shot Champion.

Lesson No. 3

A combination pocket and billiard shot. Place balls as per diagram. In this shot take special care against striking your cue ball on one side, top or bottom. Stroke absolute center with a level cue. I have watched good players fail to get a break because by striking the cue ball above center, the cue ball will go to the right of center, and when striking low ball, the cue ball will go to the left of center; and the same applies when you english right or left. Use six inch bridge; stroke medium hard.

Bruckart's Washington Digest

Dies Committee Bares Activities Of Radical, Communist Groups

Unseen and Malignant Growths Are Being Bred Into Our National Life by Agitators Who Seek to Destroy Our Government; Spread Poison in Ranks of Labor.

By WILLIAM BRUCKART
WNU Service, National Press Bldg., Washington, D. C.

WASHINGTON. — "Unless something is done to curb radicalism in my section, there is going to be an awful clash and a lot of people are going to get hurt."

So spoke Fred W. Frahm, superintendent of police of the city of Detroit, Mich. And his statement was under oath, for he was giving testimony before a committee of the house of representatives, a committee charged with exposing to view the un-American activities of certain groups in this country. It was the statement of a man who is serving a city in an official capacity and who has gone through 248 sit-down strikes which he asserted were the direct result of agitation by the radicals to which he referred. He looks for more in the near future and added, by way of emphasis, that "these communists and radicals do not want to seek adjustment of differences between labor and management; they want to make trouble all of the time."

Through a number of weeks, the house committee before which Mr. Frahm testified, has been taking testimony, gathering evidence, digging here and there in its effort to uncover the activities of subversive groups and expose them to public view.

It has been the contention of the chairman, Representative Dies of Texas and some other members of the committee, that most of us are not aware of the unseen and malignant growths that are being bred into our national life. They are out to destroy our government, to bring to us the type of thing that has made Russia famous.

Mr. Dies is a sincere and honest legislator, and he is trying to do the job assigned him, even when several of his committee members have sought to balk his efforts. But there is much more to be done in the direction of exposing radicalism and the chiseling, cheating, cowardly efforts the agitators put forth.

Charge Communists Active In Government Offices

What I am wondering is why Mr. Dies has not sent his investigators into the very offices of the federal government, itself. Or, if he has done that, as it is gossiped about, then why shield anybody? Why not turn the spotlight of publicity on the individuals who want to destroy the American system, the American form of government, American tradition, the American profit system of doing business? There has been much talk in the last several years about the operations of communists within the very walls of the government, men and women who are boring from within as termites destroy lumber, and we ought to know the truth. If they are within the government, they ought to be exposed and chased out of the western hemisphere; if they are not operating as is gossiped around, then their names ought to be cleared. In any event, I hope the Dies committee goes on and shows the cancerous nature of groups that do not believe in our system, whether they be Russians, or Germans, or Italians, or British or what have you.

It has been the favorite device of the radicals and their henchmen to characterize any official who attacks them as being a subject for the insane hospitals. Their game has been to laugh people out of court whenever an effort was made to tell of some of the things the agitators were doing. Many will recall an investigation by a house committee several years ago where the witnesses were laughed down and a courageous superintendent of schools from Gary, Ind., was made to look foolish because of the charges he made. Well, if my opinion be worth anything, the folks who were the suckers in that play were the supposedly intelligent members of congress who made up the committee. It was they who fell for a trick of propaganda. Either that was the case, or the members of that committee were just plain dumb.

Lewis Cannot Break Grip Of Communists on C. I. O.

Concerning the sit-down strikes about which Mr. Frahm testified, I want to boast that I wrote of communist participation in those sit-down strikes when they were happening. I had several letters thereafter, calling me crazy and describing me as a red-baiter. Mr. Frahm now has put into official records the facts that must be obvious to any real American, and he further has expressed the opinion that John L. Lewis, head of the C. I. O., cannot break the grip that the communists have on his organization. That may be the reason why Mr. Lewis has been so silent the last several months. Maybe he sees that the labor group of which he was so proud has become a gargantuan monster

that is slowly swallowing him, physically large as he is.

There is, of course, the danger that a lot of people will make foolish and unsupported statements about red activities, thus throwing doubt on the really serious phases. That always seems to happen. Unwittingly, that type of person which shouts and shouts and has no proof creates the impression that all cries of "wolf, wolf," are meaningless. But when a congressional committee has the courage—rather, when its chairman over objections of some of its members—has the courage to bring the stuff out for public examination, there must, indeed, be a basis for it.

The tragedy of the thing is that the labor movement as a whole will suffer a severe setback. The fact that the radicals have grabbed control of the automobile workers' union means that they have "cells" in other groups also, and that these cells slowly but surely will be spreading poison and trouble. The agitators seize upon the unthinking, the foreign-born who are not steeped in our customs or love of country, or upon elements that have been badly treated, and they will use these innocent victims to carry out their destructive plans.

C. I. O. Being Used as Tool For Destructive Purposes

There will be much more labor trouble. You can count on that. The Communist party representatives will never allow the slightest chance for creating trouble to escape them. They are determined to convince labor that it cannot trust the managements; they are encouraging the breaking of agreements between labor and management to the end that employers will have no faith in the leaders of labor, and they are using the national labor relations board wherever that can be done to give official voice to labor troubles. That fact is chiefly responsible for the position which the C. I. O. group has taken in opposition to proposals for revision of the labor relations act. William Green and the American Federation of Labor are urging revision of the law, but C. I. O., having its tentacles in the labor board, obviously does not want its grip broken.

It has been known for a long time that the C. I. O. was being used as a tool for destructive purposes, but the agitators and emissaries were sly and careful. They covered their tracks. Such information as leaked out was promptly discredited by the very Reds who had done the job—and they discredited any individual who repeated the story by laughing at his gullibility.

However, there is one instance which cannot be denied. The clerks in the rural electrification administration organized a union and affiliated with C. I. O. It was to have social as well as fraternal aspects. There was a dance scheduled. Negro workers attended and insisted on inter-racial participation in everything that was done. They said they were told to do so by representatives of C. I. O. After the dance was concluded, so participants have reported, a photograph record was procured and the following notes of "The Internationale," communistic anthem, blared forth.

Dies Committee Exposes Methods Used by Radicals

The Dies committee record is full of testimony about methods employed by the communists in their devious borings and destructive tactics. The record tells, too, of how many innocent appearing organizations, created for an allegedly useful purpose, are captured by communists and used by them to obtain money contributions—for which no accounting ever is made. And tragic, also, are the stories of how the real leaders laughed at the suckers who gave hard-earned money, laughed in the secret recesses of their hideouts about the soft and easy minds of Americans.

But another session of congress is coming. The Dies committee will make a report and probably will ask an appropriation to enable it to go on. We will see who opposes that appropriation. There probably will be opposition from two or three members of the committee itself, and we will see who they are. If they are outspoken in their opposition, I suspect most people will know why.

I think this condition has reached the point where attention should be paid to it by the federal government. It is now hot on the trail of some alleged German spies who were seeking American military secrets. So why not make a thorough job of it and lift up the lid that hides various other kinds of spies whose work, to my mind, is much more dangerous to American national life?

© Western Newspaper Union.

Ask Me Another

A General Quiz

The Questions

1. Where is there a pillar of wrought iron that has weathered 15 centuries without rusting?
2. What portion of the people of the United States are city dwellers?
3. How high have birds been known to fly?
4. How did the name of Lloyd's of London originate?
5. What are the oldest living things on earth?
6. From where is the name "Fascist" derived?
7. How many weddings have there been in the White House?
8. Was the Leaning Tower of Pisa intended to stand upright?
9. What caused Bach's blindness?
10. What is an animal called that is half lion and half tiger?

The Answers

1. In the courtyard surrounding the Kutub Minar, near Delhi, India.
2. For the United States as a whole 56 per cent of the people live in towns and cities; in the South only 33 per cent are city dwellers.
3. Storks and cranes, 20,000 feet above sea level; a vulture has been seen 25,000 feet above sea level around Mt. Everest.
4. Originally the London underwriters met at Edward Lloyd's coffee house, the institution dating as far back as 1688.
5. The age of the macrozamia trees recently found in the Tambourine mountains of Australia is estimated at 12,000 years, the oldest living things on earth.
6. Mussolini's name for his party, "Fascist," was derived from the Latin word "fascis," the bundle of rods from which the head of an ax projected, the emblem of official authority.
7. There have been 14. The first was in 1811 during the administration of President Madison, and the last was in 1914, when the daughter of President Wilson married William Gibbs McAdoo, then secretary of the treasury.
8. Yes, but the coil beneath gradually gave way on one side until the marble structure now is 16 feet out of the perpendicular.
9. His elder brother was jealous of his talent and forbade him access to a manuscript volume of works by Froberger, Buxtehude and other great organists. Every night for six months Bach got up late, and stealing the volume from the bookcase, copied by moonlight to the permanent damage of his eyesight and his subsequent blindness.
10. A hybrid of lion and tiger is known as a Uglon and is very rare. There is one in the Central park zoo in New York city.

Wait, Mother—Ask Your Doctor First

Never give your children unknown "Bargain" remedies to take unless you ask your doctor.

A mother may save a few pennies giving her children unknown preparations. But a child's life is precious beyond pennies. So—ask your doctor before you give any remedy you don't know all about.

And when giving the common children's remedy, milk of magnesia, always ask for "Phillips' Milk of Magnesia."

Because for three generations "Phillips" has been favored by many physicians as a standard, reliable and proved preparation—marvelously gentle for youngsters.

Many children like "Phillips" in the newer form—tiny peppermint-flavored tablets that chew like candy. Each tablet contains the equivalent of one teaspoonful of the liquid "Phillips' 25¢ for a big box.

A bottle of "Phillips" liquid Milk of Magnesia costs but 25¢. So—anyone can afford the genuine. Careful mothers ask for it by its full name "Phillips' Milk of Magnesia."

Hanging Shelves You Can Make of Spools

By RUTH WYETH SPEARS
A letter received from a reader says, "I have found so many helpful things in your Book 1—SEWING for the Home Decorator, I wonder if you have any ideas on fixing up spools? I have in mind the spool book shelves and corner shelves they used long ago." It's probably the general revival of

Victorian Ideas in decoration that has started everyone thinking of spool shelves.

We seemed to remember that the shelves we had seen years ago in old parlors were put together with colored cords. We tried this but the shelves were not rigid as the cords stretched. So we used wire and the result has been a substantial set of shelves strong enough to hold reasonably heavy articles.

A little less than 12 1/2 feet of wire was used for the shelves shown here. Two sizes of spools were used. Shelves, spools, wires and all were finally painted to match the brightest tone in the room color scheme—in our case it was peacock blue. There are picture directions like these on every page of Book No. 1—SEWING, for the Home Decorator. If your house is your hobby, it will be full of thrills for you. Don't go through the holidays with shabby curtains or slipcovers. This book illustrates every step in making new ones. Book 2: Novelties and Embroidery, shows how to make dozens of Christmas gifts from odds and ends of material. Books are 25 cents each. If you order both books an interesting quilt leaflet included free. Address: Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

Smiles
Fears Realized
"Do you remember the night I kissed you?" asked the wealthy young man.
"Oh, yes," replied the chorus girl.
"And you remember me saying that you would be mine for ever and a day?"
"Yes, yes!"
"I was afraid you would."

Asked to define "unfold wealth," the student replied: "That which is not revealed to the income tax collector."

A Wrap-Around
Mistress—There, now, I've cut my finger.
Maid—You ought to have something to twist round it, ma'am. I'll fetch your husband.

Give-Away
Betty—Why don't you mend that tear in your coat?
Topsy—Because a hole looks like the result of an accident, but a patch is the sign of poverty.

Beware Coughs from common colds That Hang On

No matter how many medicines you have tried for your common cough, chest cold, or bronchial irritation, you may get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with any remedy less potent than Creomulsion, which goes right to the seat of the trouble and aids nature to soothe and heal the inflamed mucous membranes and to loosen and expel germs.

Small Part
Who knows only his own side of the case knows little of that.

THE RIVER of SKULLS

WNU SERVICE

CHAPTER XIV—Continued

"How dey come up dis riviere?" demanded Noel, dazed with the grim evidence of the presence of McQueen somewhere above them on the River of Skulls.

"They must have crossed from the Koksoak and struck the migration!" Alan sadly surveyed the broken body of the Indian boy who had been their friend. "Poor Napayo! He's with his people now. No more fear of starvation for him. They shot him in cold blood; Noel! Shot him in the back! And they'll pay for it!"

"He was good fr'en of me," lamented Noel, his dark face distorted with grief. Suddenly he stood up in the canoe and, drawing his knife, raised it above the frozen body in the water. "For dis t'ing, Napayo, McQueen weel pay to me!" he said, and, for a space, held the knife handle against his forehead in consummation of the Montagnais oath.

They carried Napayo's battered body up among the spruces, and there they buried it under a pile of small boulders to protect it from the wolves and the foxes. Kneeling, Heather said a prayer for the soul of the untutored boy who had given them his trust and devotion.

"The next few days," Alan announced when the four gathered for a council of war, "we spend in caching, somewhere back in the spruce, the gold and all our food and outfit for the trip home. We're being watched. Some night they may try to surprise us, but we'll keep the dogs on light leashes they can break in, in a circle around the camp. They can't get by the dogs."

John McCord ran his fingers through his thick yellow hair as his face pictured the perplexity and amazement under which he labored. "I can't realize it! McQueen getting past the Naskapi—and following us clear through to this gorge. How did he know we turned up this riviere?"

"You're wasting your time, John," said Alan. "The fact is, he got by the Indians. He knows where we are and he's out to wipe us out and take our gold."

"Well, let's do a little hunting, ourselves. When the snow packs for sledding we'll go looking for Mr. McQueen."

"And leave Heather?"

"No, take her with us. She'd be safer that way."

Alan looked at the girl's courageous eyes, sad from brooding over Napayo's tragic fate. She met his glance and, as he argued, her face shone triumphantly.

"Above all things, John," Alan said, still holding her gaze, "Heather must be protected. Above all things, I'd throw this gold into the river now—to save her all this fear and anxiety. I'm telling you this now, I'd throw the gold at McQueen to have Heather safe at Fort George."

She buried her face in her hands, elbows on knees, as her father replied: "You don't mean to say that you, Alan Cameron, are losing heart when we've got a fortune in our hands. Don't suppose I don't know what Heather's gone through—that I'm not thinking of her. But we've won, boy! We've got our gold and we're going back with it!"

Without a reply Alan rose, stretched and announced, "Noel takes the first watch tonight. I'll see it through to daylight."

For three weeks while the ice thickened on the rivers, those at the camp never relaxed their vigilance. The extra supplies were hidden, separated from the gold, deep in the spruce and the new snow had long since covered the trail to the caches. A fish cache for the team and the temporary supplies were also hidden near the camp. If McQueen should come, in the absence of the party, he would find little to steal or destroy. Daily the three men and the girl went out with the dogs and the long sled, loaded heavily, to harden the huskies for the long trail back.

Twice they traveled far up the river over the tundra, where an ambush was impossible, to search for tracks in the snow or signs of their enemies. They found none.

November came and the cold grew more intense while the snow became deeper, except where the wind scoured river ice and barren. Then, gradually, McCord and Alan became convinced that Napayo had met his death at the hands of Naskapi who had ambushed the McQueen party and taken their rifles.

There was still a cache of dried caribou meat that Noel and Napayo had left far up the river and, one day, Alan and Noel decided to take the dogs and bring back the meat while they made a wide swing into the barrens toward the Koksoak to look for tracks in the snow. Because of the heavy load and the fact that the men intended to travel fast, staying out but one night, Heather and her father were to remain at the camp.

The afternoon before the start, John and Noel were back in the

scrub with the team, drawing firewood. It was two o'clock but the dusk was fast gathering in the valley. Before Heather's double tent, wind-broken with a brush barrier filled in with snow, and heated with the portable folding stove, Alan and the girl stood talking. Framed in the wolf-hair rim of the hood of her caribou parka, her cheeks flushed by the exercise in the stinging air and her violet eyes brilliant with health, she drew Alan Cameron as a magnet draws steel. Never since that walk on the barren, when he had told her what she had come to mean to him, had Heather allowed Alan to talk to her alone, until this day when they had gone back on the frozen tundra for ptarmigan. And through the two hours that their shoes etched their webbed trail on the snow, she had refused to listen when he started to talk of what lay deep in his heart. So he had given it up and now stood looking down into her anxious eyes.

"I haven't told you, Alan, that I've had another terrible dream," she said. "I can't throw it off. It haunts me!"

"There's nothing in dreams, Heather."

"But this one was so vivid. Poor Napayo came to warn me. He talked in his native tongue and I couldn't understand him. But he pointed to

"Nothing is going to happen to us, Heather! Nothing!"

his wounds, and his face—oh, I can't forget his poor battered face, just as you found him, Alan. There was such agony in it! He tried so hard to make me understand."

Deeply moved, the girl stood, her eyes starry with tears, as she talked there in the bitter air to the man who loved her. With a rush of tenderness that swept him off his feet, he took her, unresisting, into his arms.

"You must not think of it—the dream!" he murmured, trembling. "Nothing is going to happen to us, Heather! Nothing! I love you! I love you!"

He kissed her cheek, her mouth. Sobbing she clung to him, madly returning his kisses. Then, as if waking from a dream, she broke from his arms.

"Oh, what am I doing? What am I doing?" she cried. "You're only trying to forget her! You're lonely and trying to forget her!"

"I've long since forgotten her. I've loved you, Heather, for months! Won't you believe me? Won't you?"

They heard the voices of the men returning with the dogs. "I love you," he said, huskily. "Some day you'll believe me! Some day you'll know!"

Two days later, when the early November dusk hung in the spruce forest of the terraces below the Moaning Gorge, the dog team pulling the sled load of frozen meat angled down off the tundra, and followed the ice-hard trail through the scrub to the camp. The absence of two days had seemed long to Alan, accompanied by the memory of Heather's kisses and her circling arms.

As they approached the tents from the rear, the dogs broke into a trot and Alan called, "Hello there!"

There was no response. No flicker of light from the supper fire in front of the men's tent stabbed the murk of the circling spruce.

"They must have been hunting back on the barren and are late reaching camp," suggested Alan.

As the team neared the tents, Noel's black brows knotted. His apprehensive eyes wandered back and forth, striving to pierce the gloom. Suddenly the dogs became disturbed, sniffing the air and whining.

"By gar, something happen here!" whispered the Indian. "Eet look ver strange!"

Tortured by fear of what ghastly discovery the dusk-filled camp concealed, Alan approached the tents.

Again he called, "John! Heather! Are you there?"

The sound of stertorous breathing and a muffled moan answered from the dusk-shrouded tents.

They reached the camp and stood staring around them in the gloom.

"Heather!" cried the agonized Cameron, groping in her tent to find her personal belongings strewn upon the spruce boughs of the floor. He rushed outside to join Noel kneeling beside the body of John McCord in the men's tent.

"John! John! What have they done to you?" cried the shocked Cameron, throwing off the skin robe that covered the still shape breathing heavily on the bough floor. "Light a candle, Noel, quick!" he ordered as he searched with trembling fingers for wounds, while his tortured heart was calling: "Heather! What have they done to you?"

Noel held the candle while Cameron pushed back McCord's hood. Across the giant's mop of yellow hair ran the blood-ched slear of a grazing bullet, but a large caliber slug had entered his back.

"Shot in the lungs with a 45! That's McQueen, Noel, not the Naskapi. They would have looted the camp—taken the tents! McQueen's got Heather, Noel! They've got Heather!" Alan sobbed.

"Dey got her!" sighed the Indian.

"But we get her soon, nevaire fear!"

"He crawled in here to die when they left," said Alan. "How long ago did this happen?"

"Eet might be las' sleep, but eet look lak dis morning to me."

They cleaned and dressed the wounds in McCord's head and back, and carried him into Heather's tent where they started a fire in the folding stove. But they knew that John McCord would never again see his daughter. While the life ebbed slowly from the man who had tolled so long only to find a grave on the shore of the River of Skulls, they made their plans for pursuit.

Shortly there was a moon and Noel went out and found the trail of a toboggan sled leading to the river, with the prints of snowshoes. They were not the bear-paw prints of the Naskapi—but the longer webs of the Cree shoe worn on the East Coast.

There was no doubt. At last McQueen had struck!

Gradually the wound sapped the enormous strength and vitality of the man who lay unconscious. Toward dawn he opened his eyes and seemed to recognize Alan who knelt beside him.

"Heather, John! Was she hurt?" Alan asked.

The dying man's lips framed the word "No!"

"It was McQueen, John?"

After a period of labored breathing came the gasped words: "McQueen—got—Heather!"

Then a grimace of pain knotted the bearded white face. Shortly McCord again opened his lips and essayed to speak. Alan bent closer as he held the limp hand of his friend.

"Shot me—but—I got—two!" Alan heard faintly. "Heather—she loves—you—Alan! Poor—Heather!"

"I love Heather, John! Do you hear me? I love her!"

For an instant McCord's strength returned. Again in his eyes flashed the blue of the washed bergs as his fingers closed on Alan's.

"Hunt them! Hunt them!" he gasped hoarsely. "They've got my girl—my girl! Hunt them—gold—Heather—yours!"

"We'll hunt them, John! We'll get her! I promise you we'll get her!"

The bitter dawn streaked the lead-hewed east when, numb with shock, Alan left his friend, groped out of the tent and, like a man in a dream, prepared to take McQueen's trail.

When it grew light it became evident, from the newly broken trail in the spruce and the empty gold cache that for some reason McCord had brought the eight bags of gold from

the secret cache and McQueen had found them at the camp. But to the food caches the snow lay unmarked. There the boys took the team and loaded the sled. McQueen had got all Alan held dear, but he had not found the food that would keep the great Ungavas strong as, day after day, they followed his sled-trail up the Koksoak. The gold that McQueen carried would be a dead weight on his dogs and Alan smiled grimly—smiled as he realized that that 160 pounds of gold would only the sooner bring Heather back to him—nearer, day by day, as the Ungavas traveled like wolves, eating up the white miles on McQueen's trail.

In the scrub they found the dogs howling dismally beside the body of a half-breed, Boyette, shot with the ambushed McCord's automatic. Everywhere the snow was trampled down where the mortally wounded giant had fought for Heather and his gold. Then, back in the spruce, the dogs found a Montagnais shot through the body with a 45.

"Dat ees wan we see on de Talking Riviere! John do good job on heem."

"Shot in the back and weak as he must have been," said Alan, proudly, "he fought it out to the last! They must have left him for dead."

"Now we've got three, maybe four men ahead of us, with Heather, Noel. They won't dare to try for Chimo with the gold. They'll head up the Koksoak."

Before they covered the body of John McCord with a cairn of boulders heavy enough to cheat the wolverines, standing beside the dead man in his hooded parka, Alan said: "Your hand, Noel!"

Noel reached across the body of their friend and took Alan's hand.

With their left hands they held the hfts of their knives against their foreheads in consummation of the ancient oath of the Montagnais as, followed by Noel, Alan solemnly recited:

"We, Alan Cameron and Noel Leoup, blood brothers, swear that we will follow McQueen until we meet him face to face and make him pay. Sleep well, John McCord and Napayo! Your friends will not forget!"

They placed the body of John McCord beside that of Napayo and covered it with the stones, for the ground was frozen too hard to admit of digging. The personal belongings that Heather had been forced to leave behind, together with her tent, they added to the sled already loaded with food and outfit, lashed down the skin wrapper, and started the impatient Ungavas on their 400-mile race up the frozen Koksoak. As they reached the river ice, Alan stopped and faced the graves on the terrace above them. Raising his mittened hand in farewell, he called:

"Good-by, John! We'll get her! Rough and Noel and I'll get her, John! Good-by, partner!"

It was 400 up-hill miles to the cache at the headwaters, and, tempted as Alan was to risk starvation and follow McQueen night and day with a light sled until he overtook him, it would have been sheer madness in a gameless country. For Heather's sake as well as their own, it was necessary to carry sufficient food for men and dogs to reach the high plateau. Gradually, the powerful Ungavas, well fed, would wear down the fleeing team ahead with its light load. For it was evident from McQueen's trail that, together with the gold, he was not carrying enough food to reach the head of the river where he probably had a cache.

(TO BE CONTINUED)

Temperament and Magnetism Keynote to Success on Stage, According to Expert

To succeed on the stage, one must have temperament. There is a distinction between this and intelligence, says Daniel Frohman in Encore.

To illustrate: The great Rachel in her youth had to have the subtleties of some of her leading roles explained to her by her stage manager. But when they were made apparent she illustrated every nook and cranny of the part she was impersonating with her tremendous, luminous dramatic nature.

Temperament is like electricity. Perhaps it is the same. We can tell what it is like, what its manifestations are, yet we cannot clearly define it. Perhaps it is nearer akin to the subtle quality called genius than is intelligence. It seems to be the faculty of knowing things without learning them.

Crudely speaking, it is the power to grasp, to sympathize, to respond, the quality that enables one to incarnate the outline or sketch of the author's fancy, to reach out into ether, as it were, and draw therefrom a definite human being of flesh and blood, of emotions and pas-

sions. It manifests itself in what is called personal magnetism, a charm that makes the audience feel.

An ignorant woman may possess it in a marked degree, while to a well-bred, highly educated girl it may be wholly foreign. In every social set or village may be found at least one man or woman distinctly gifted with magnetism. It may be the quality of being lovable. At any rate, it will be found frequently that such a one is a leader.

Dolls of the Ancients
"All the world loves a doll"—though what passes for a doll in some places wouldn't be recognized as such elsewhere. In parts of South America it's a bone, wrapped in a blanket if a boy, and in a petticoat if a girl. Boys and girls in Asia Minor play with pillows as "dolls." Ancient Greek dolls were sometimes made of wax. Those of old Egypt had clay beads for hair. Cortes, on his first conquest trip into Mexico, says the Washington Post, found Montezuma and his Aztec court playing with elaborate dolls.

HOUSEHOLD QUESTIONS

Table Linen.—To keep white table linen from turning yellow, wrap it in a fast-color blue paper.

Care of Gas Stove.—To prevent a gas stove from rusting rub the entire inside with a flannel cloth which has been saturated with sweet oil.

The Meaning of "Pint."—A pint of butter equals one pound. A pint of currants equals 10 ounces. A pint of cornmeal equals 10 ounces. A pint of wheat flour equals eight ounces. A pint of brown sugar equals 13 ounces. A pint of seeded raisins equals nine ounces.

Bright Silverware.—When your silverware becomes tarnished, place it in potato water and let it stand one hour. Take out and wash and it will look like new.

Cleaning Oven Dishes.—Marks on fireproof oven dishes can be removed by rubbing with common salt while the dish is still hot.

Try Vinegar.—Wipe the pantry shelves with a cloth dipped in vinegar. It gives a fresh and pleasant atmosphere to the larder and repels flies.

The Singing Kettle.—When a coal stove is used it is foolish to allow the teakettle to be empty at any time. One always can find a use for boiling or very hot water.

Keeping Mustard Moist.—Dry mustard mixed with milk instead of water will not dry out but will keep moist until it has all been used.

Save Dahlias Bulblets.—Make a point of saving the little bulblets which are found attached to the old bulbs when digging dahlias. It is a good plan to take them off now, so that they will not be broken off and lost. If they are put in paper bags and these bags suspended from the ceiling in the cellar, they will winter safely. Plant them out next season and in a year or two they will grow to flowering size.

NERVOUS?

Do you feel so nervous you want to scream? Are you cross and irritable? Do you need these things to you? If your nerves are on edge and you feel you need a good general system tonic, try Lydia E. Pinkham's Vegetable Compound, made especially for women. For over 60 years one woman has told another how to get relief from all kinds of ailments. Pinkham's Compound. It helps nature build up more physical resistance and thus helps calm quivering nerves and lessen discomfort from anxiety, depression, loss of sleep, company trouble, functional disorders. Why not give it a chance to help YOU? Over one million women have written in reporting wonderful benefits from Pinkham's Compound.

As the Foo Sees You Observe thyself as the greatest enemy would do. So shalt thou be thy greatest friend.—Jeremy Taylor.

CONSTIPATED! Gas Crowds Heart.

"For thirty years constipation caused me headaches and pains in the back. A trial of Bowel Evacuator cured my heart. Adelia helped right away. Now I eat mangoes, bananas, peaches, apples and berries. I feel better." Mrs. Mabel Scott. Two things happen when you are constipated. FIRST! Accumulated wastes swell up bowels and press on nerves in the digestive tract. SECOND! Early digested food starts to decay forming GAS, bringing on sour stomach, indigestion, and heartburn, bloating you up until you sometimes fear for breath. Adelia's Fruit Double Relief with DIBB'S A-C-I-O-N, Adelia's relief FROM GAS HAS almost at once. It often clears bowels in less than two hours. No griping, no after effects, just quick results. Recommended by many doctors for 50 years. Sold at all drug stores.

THE CHEERFUL CHERUB

Let it rain and snow and sleet; It can't hurt me anyhow. When it pours it makes me glad—live a new umbrella. Now! KITCHEN

In the Third Judicial District Court of the State of New Mex.

Within and for Lincoln County, Roy G. Dutton, Plaintiff, vs. Bessie Taylor, Impleaded with the following named defendants against whom substituted service is hereby sought to be obtained, to-wit: Bessie Taylor, Maude Osborn, Unknown heirs at law of Henry E. Dutton, Deceased, Unknown heirs at law of Eva Gilmora Finch Dutton, Deceased, and all Unknown Claimants of interests in the hereinafter described premises, adverse to the Plaintiff, Defendants, No. 4606 Civil.

Notice of Pendency of Suit The State of New Mexico, To each of the above named defendants against whom substituted service is hereby sought to be obtained, Greeting:

You and each of you are hereby notified that a certain cause, wherein you and each of you are defendants, and Roy G. Dutton, is plaintiff, being civil cause No. 4606, on the civil docket of the District Court of Lincoln County, State of New Mexico, is now pending against you. That the general object and purpose of said suit is to establish plaintiff's title in and to the real estate hereinafter described, against the adverse claims of you and each of you and all of you, and anyone claiming by, under, or through you or any of you, and to bar and forever estop you as defendants from having or claiming any lien upon or any right or title to or interest in the premises hereinafter described, adverse to the plaintiff, and to quiet plaintiff's title in and to the premises hereinafter described.

That the premises and real estate described in said bill of complaint are situated in Lincoln County, New Mexico, and more particularly described as follows, to-wit:

Lot 4, SE 1/4 SW 1/4, S 4 NE 1/4 of Section 18, Lots 1, 2, 3 and 4, E 1/2 W 1/4, N 1/2 NE 1/4, NW 1/4 NE 1/4, Section 19, Township 2 South, Range 16 East, N. M. P. M., containing 633.72 of an acre according to the Official Plat of the Survey of the said land on file in the General Land Office. You are further notified that unless you enter your appearance in said cause on or before the 16th day of December, 1938, judgment will be rendered in said cause against you and each of you by default.

That the name of plaintiff's attorney and his postoffice address is John E. Hall, Carrizozo, New Mexico.

Given under my hand and the seal of the District Court of Lincoln County, New Mexico, this 1st day of November, 1938.

(D. O. Seal) Edward Penfield, District Court Clerk.

Notice of Hearing of Final Report and Account

In the Probate Court of Lincoln County, State of New Mexico

In the Matter of the Last Will and Testament of Edward Hepprecht, sometimes known as and called Erdman Hepprecht, Deceased, No. 371

To Ricardo Flores, Daniel Gomez, Marshall A. Pierce, Bernardo Salazar, Robert Shipman, Bert A. Tarbert, Bryant Cashion, Isaac T. Coleman, Oathar Goodson and Walter E. Norton, Fort Stanton, New Mexico, and Mary Lee Stamba, U. S. Marine Hospital, Memphis, Tenn., and to all unknown heirs of the said decedent, and all unknown persons claiming any lien upon, or right, title, or interest, in or to, the assets of the said decedent, and to whom it may concern:

You and each of you are hereby notified and notice is hereby given that R. W. Fagan, Executor of the Last Will and Testament of Edward Hepprecht, deceased, has filed in the above entitled Court his final report and account as such Executor and the Court has appointed Monday, the 19th day of December, 1938, at 10 o'clock a. m., as the hour and day for hearing of objections, if any there be, to the approval and settlement of said final report and account, and the discharge of the said R. W. Fagan as such Executor and at the hour on the day named, the Probate Court will proceed to determine the heirship of said decedent, the ownership of his said estate and the interest of each respective claimant therein and therein and the persons entitled to the distribution thereof.

The name and postoffice address of the attorney for the Executor is John E. Hall, Carrizozo, New Mexico.

Witness the Hon. Marcel C. St. John, Judge of the said Court, and the seal thereof, this 1st day of Oct., 1938.

(Seal) Edward Penfield, Clerk. By Thelma Shaver, Deputy.

Mrs. A. B. Zumwalt, Mrs. Murray Zumwalt, son Glynn, daughter Dona Sue and Mrs. Gilbert Peters were here from Nogal Monday.

Local Mention

Mr. and Mrs. Vernon Mosier and son Marvin of Capitan were visitors in town the first of the week.

Leandro and Nick Vega, mother, Mrs. Josefa Vega and Nick, II, were El Paso business visitors Monday of this week.

Mr. and Mrs. Jack Cleghorn of the Cleghorn-Dance Hall in White Oaks were visitors here Monday.

Mr. and Mrs. Louis Garcia and children are here from Hachita this week for a short visit with the Joe Garcia family.

Harry Straley was a business visitor from his ranch near Ancho on Monday.

Mr. and Mrs. J. R. McCracken and son of their ranch near Coyote were visitors in town Monday.

Mrs. T. J. Grafton and son Hugh of Angus were business visitors Monday.

Gus Grossmiller of Coyote was a visitor in town Monday.

Pat Murphy of the White & Murphy ranch near White Oaks was a visitor here this Monday.

Miss Haldane Stover of Belen spent the week-end here visiting friends and while in town, made this office a pleasant call.

Monday morning at the Monte Vista Service Station, the car driven by E. L. Moore, collided with Vidaurri's delivery truck. The driver of the truck was cut about the arm, a gas pump was knocked over and both cars badly damaged.

Fred Lalons, who had been here for nearly two weeks from his home in Sierra Madre, Calif., left Wednesday morning for El Paso, where after visiting relatives and friends at that place, he will return home so as to be on hand on election day. In his vacation, Fred furnished an ideal example for others to follow. He took his time in visiting his relatives, old friends and familiar scenes — and if he overlooked anyone, it was a wonder to us. Fred enjoyed his visit, and we enjoyed having him with us.

Mr. and Mrs. Cres Mares and grandson, Eloy Nunez were visitors from Corona this week.

National Forest Timber For Sale

Sealed bids will be received by the Forest Supervisor, Alamogordo, New Mexico, up to and including November 2, 1938, for all the merchantable dead timber standing or down, and all the live timber marked or designated for cutting on an area embracing about 9080 acres within Sections 2, 4, 5, 7, 9, 10, 15, 16, 17 and 18, Township 1 S., Range 12 E., and Sections 21, 22, 26, 27, 28, 33 and 34, Township 1 N., Range 12 E., N. M. P. M., Coconino Mountain Area, Lincoln National Forest, New Mexico, estimated to be 5,000 cords, more or less, of juniper. No bid of less than 65c per cord will be considered. Deposit with bid \$250.00 to be applied on the purchase price, refunded or retained in part as liquidated damages, according to conditions of sale. The right to reject any and all bids reserved. Before bids are submitted full information concerning the timber, the conditions of sale, and the submission of bids, should be obtained from the Forest Supervisor, Alamogordo, New Mexico. 2t

Methodist Church Notes

J. M. Glazier, Minister Sunday School, 9:45 a. m. Sunday School themes, Nov. 6: 11 a. m., "Religion as Refuge Challenge?" 7:30 p. m., "Of What Use is Religion?" Good music by the choir. There will be special selections. This is Your church in Your city. It Can and Will make a contribution to your community, with Your co-operation. Let's get in and pitch. The public is invited and welcome.
