SLEEPING SICKNESS PRECAUTION URGED

Two Doses Immunize Horses For 8 Months.

Horses treated with two doses of chick embryo vaccine to prevent sleeping sickness are immune to the disease for a period of at least eight months, it is indicated by immunity tests being conducted by the division of animal pathology and hygiene, college of agriculture, University of Illinois.

Further tests on immunity will be conducted at the agricultural college to keep veterinarians and live stock owners informed with reference to the period of immunity established by the vaccine.

In the meantime, it is suggested that all good horses be immunized immediately with two doses of chick embryo vaccine to avoid losses which were reported in 85 different counties last year.

Horses that had the disease and recovered last year and horses that were vaccinated should be revaccinated, it is recommended by staff members of the division of animal pathology and hygiene.

It is hoped that tests under way at the college of agriculture will determine if horses are immune longer than eight months.

Suspicious clinical cases of sleeping sickness in horses have been reported from different sections of the state. However, tests of materials submitted to the laboratory of animal pathology and hygiene have as yet failed to yield the virus of the disease.

Mulching Commendable For Soil Conservation

In order to preserve its strength, soil must be protected with some kind of covering to prevent rains from washing away the finer particles. In the opinion of Russell E. Underwood, extension soil conservationist at the New Jersey college of agriculture, Rutgers university, the use of mulch is valuable in this respect, especially where specialized crops prohibit the use of soil-conserving rotations.

"When specialized crops are grown on sloping land and clear cultivation is practiced to control weeds and check evaporation of soil moisture, the soil is exposed and very vulnerable to dashing rains," Mr. Underwood explains.

"Mulch should be applied in strips across the slope so as to cover from one-half to two-thirds of the land area. This applies to mulch grown on available adjacent land. Frequently, however, the mulch crop could be grown and not harvested but allowed to remain on the land for protection against erosion. Oats, barley and sudan grass planted in late summer will make fairly good growth before being killed by winter freezes. Such material offers good protection against winter erosion and has the advantage of being anchored to the soil so that it is not washed or blown away."

Nature Ties the Mark In Control Laboratory

Night or day, sunlight or darkness, temperature control within a fraction of a degree, and plant-life that can be "put to work or put to bed at will," all are under the control of scientists in a specially-designed chamber at the New York state college of agriculture.

The exactness of control is probably the greatest yet achieved in any laboratory, and the aim is to unravel the mystery of plant "vigour," the quality that makes any one stock superior to others, either in yield, disease-resistance, or in other ways.

In plant breeding, it is known that when two inbred or purebred strains are crossed, the result (a hybrid) may be astonishingly better than the parent stock. This is referred to as "hybrid vigor." Why and how this happens are subjects of study by plant physiologists.

Farm Topics

One of the best ways to cut the cost of growing heifers is to provide improved pastures.

Records kept by dairy herd improvement associations increase the sales value of good grade and purebred animals.

Horses of good draft type, fine quality and energetic, kindly dispositions do the most work, endure heat well, and sell for highest prices.

Shifts to high analysis fertilizers are creating a need for more exact labeling, including the content of the secondary elements in the mixtures, say U. S. department of agriculture chemists.

The practice of fertilizing land with phosphorus bearing material is older than written records. The first acid phosphate fertilizer was made in 1842 by John Lawes, an Englishman who treated bones with sulfuric acid to make the phosphorus more readily available to plants.

Hitler Entertains First Royal Visitors

Reichsfuehrer Adolf Hitler plays the gracious host to Prince Paul and Princess Olga of Yugoslavia during their recent trip to Germany, bidding them a temporary farewell as they left Berlin to visit the estate of Field Marshal Hermann Goering. They were the first royal couple at the head of a state to pay a state visit to Greater Germany.

Magnesium Now in Great Demand

Available Supply Short of Present Requirements Of Industry.

WASHINGTON.—Increasing demand for magnesium, competitor of aluminum, is now reported to be in excess of the available supply, and plant extensions are predicted. The present capacity in the United States is about 3,000 short tons.

"A cubic foot of aluminum is one-third the weight of a cubic foot of structural steel, but a cubic foot of magnesium weighs only two-thirds as much as aluminum," says the National Geographic society. "Magnesium costs 40 per cent more per pound than aluminum, but because of its lighter weight, the cubic foot of magnesium would cost slightly less than the cubic foot of aluminum."

"One-twelfth of the earth's crust is aluminum, but magnesium can be obtained from sea water which covers twice the land areas. All domestic magnesium today comes from Michigan brine wells, but magnesium compounds are being produced in the United States today from sea water."

"Magnesium possesses many of the qualities which have made aluminum valuable to industry; it can be machined as are other metals; it can be hammered into shape, drawn into wire, or extruded into various forms.

Used in Airplanes. "Because of its lightness, magnesium has been entering more and more into airplane construction, this industry consuming about 70 per cent of the magnesium castings produced. These are mostly alloys of magnesium and aluminum, the alloys being stronger than either metal separately. Extended use of magnesium can reduce the weight of an airplane almost 200 pounds.

"To armament and self-sufficiency programs are ascribed the increased world production of 18,000 tons, of which Germany produced 10,000 tons, according to estimates of the U. S. bureau of mines. It is today the lightest structural metal commercially available.

"Government scientists predict the greater use of magnesium in the manufacture of motor cars, buses, trucks and trailers, in line with the present trend toward the reduction of the weight of these products. Domestic resources, in their opinion, can supply an expanding demand without increase in price.

"Nowhere is magnesium found as a metal; it occurs only in its several compounds. The sulphate, epsom salts, was discovered in 1695, but the metal itself was not isolated from the known compounds until 1808, thus antedating aluminum by about 16 years. Commercial production did not begin in the United States until 1915.

"Because of its unusual qualities, magnesium is already being used in widely varied products; it is used in vacuum-sweepers and also in bread-slicing and bread-wrapping machinery; in reel magazines for motion picture cameras, pneumatic tools, and needle bars in the textile industries; in binoculars and in optical lens-grinding forms, in light-weight radio equipment—and in fire-works.

Compounds Important. "Far more important from a tonnage standpoint than the metal itself are the compounds. These are used in making cement and stucco, in plaster-board and partition tiles, in insulating materials; also in fertilizers and in large quantities for furnace linings in the metals industries.

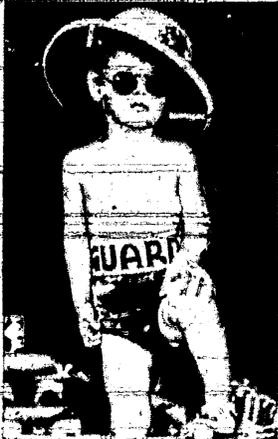

"The most common form is the carbonate, 'magnesite,' which is mined in many places. The only commercial sources in the United States are in California and Washington, which together yield 200,000 short tons a year, valued at \$1,500,000.

"Russia is the largest producer of magnesite, but exports little. The principal exports have come from the Austrian region of Germany, and from China and Greece. The largest exports have gone to Japan. During the World war the price of

magnesite jumped from \$20 a ton to \$50.

"In 1935, in the stratosphere flight of the National Geographic society-army air corps balloon, Explorer II, the observer and pilot, with a ton of scientific apparatus, were enclosed in a nine-foot spherical gondola. It was made of an alloy of more than 95 per cent pure magnesium, 4 per cent aluminum, and a small amount of manganese. The shell was only three-sixteenths of an inch thick. Every pound saved in weight, it was estimated, enabled the balloon to ascend an additional 15 feet."

POTENTIAL HERO

Ready for all eventualities, whether it be a safe dancin' stricken with hero-worship or in distress from ocean waves, two-year-old Teddy Ramsay stands ready for action on the Miami, Fla., beach.

Blind Typist Obtains Civil Service Position

SYRACUSE, N. Y.—Miss Thomasina Donofrio, 24, is the first blind person in the history of Syracuse to win a provisional appointment as a dictaphone typist. She was appointed by the state civil service commission to fill the position at the offices of the Onondaga county public welfare department.

Miss Donofrio said she hoped that the appointment would convince Syracuse employers that blind persons "are as competent at some types of work as people with normal vision."

Miss Donofrio, who has been blind 10 years, learned typing at the New York State School for the Blind at Batavia, N. Y.

One Day They Will Be Hunting Game

While a Labrador retriever is not really a rare dog, few hunters have adopted this species for an all-around game dog. The qualities of the Labrador are adapted to sportsmen all over the country because they are a combination of upland bird dog and water fowl retriever. This litter of pups, from a 17-month-old mother, comprises five males and four females.

English Jury Rejects Fingerprint Evidence

LONDON.—A perfect thumbprint on a trinket box in a burgled house was the only evidence offered against George Albert Stone, accused of housebreaking—and the jury rejected it and found him not guilty.

A Scotland Yard fingerprint expert said that 46 characteristics in the thumbprint corresponded with the impression of Stone's right thumb.

Home Founding Fulfills Desire After 21 Years

SWARTHMORE, PA.—A 35-acre estate here is being turned into a home for 11 aged women—just as Miss Sally P. Gibbons, a Quaker spinster, provided in her will prior to her death 21 years ago.

The home never was established because trustees of Miss Gibbons' estate held it did not have sufficient income. A special master appraised the \$500,000 estate and determined that the project could be carried out.

Qualifications for the 11 permanent guests are:

- They must be past 40.
- They must be dependent.
- They must be Protestants.
- To make them feel at home, the guests must tend their own rooms, although there will be a staff of three to operate the home.

TO WED DUKE

Princess Irene of Greece, 35-year-old sister of King George of Greece and a cousin of the duchess of Kent, whose betrothal to the duke of Spoleto, cousin of King Victor Emmanuel of Italy has been announced.

Research Reveals Cats And Dogs Mental Equals

CINCINNATI, OHIO.—The only difference in the intelligence of a dog and a cat is that a dog is "something of a socialist while a cat is an individualist," according to Dr. Charles M. Diserens, assistant professor of psychology at the University of Cincinnati here.

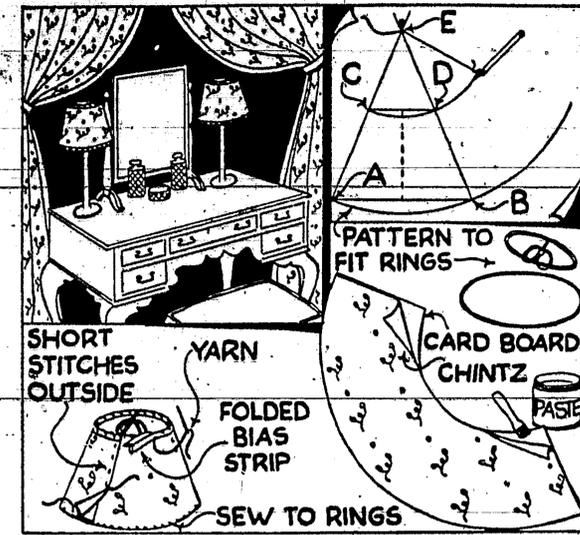

Dr. Diserens, who has made a life-long study of cats, says that persons who favor dogs over cats or who believe dogs have a higher degree of intelligence just don't know their cats. He believes one animal is about as intelligent as the other and that there is little difference in their nerve centers.

Although classifying cats as rugged individuals, Dr. Diserens wants it understood that felines have a genuine capacity for gratitude. He says this fact may often be noted during and after medical treatment, when they become deeply grateful and very often more affectionate.

Some cats are aggressive, some are lazy; some like to fight, some avoid scraps; some appear to think philosophically and some think quickly and practically, Dr. Diserens says, but all display individual personalities as distinct as those of human beings, he adds.

HOW TO SEW

by Ruth Wyeth Spears

Make a pattern for chintz-covered lamp shades.

"DEAR MRS. SPEARS: I have a pair of lamps for my dressing table, and I would like to use some of my curtain material to cover plain shades. Can you tell me how this is done? C. H."

Here is a method that is shown for a living room lamp in Book 1. It may be used for a shade of any size. You will need the top and bottom rings from an old lamp shade. A cardboard foundation is cut to fit these, and the chintz or other fabric is pasted to the edge of this.

The AB line in the pattern diagram is as long as the diameter of the bottom ring. The dotted vertical line is approximately as long as the depth of the shade. The CD line is as long as the diameter of the top ring. Draw the diagonal lines to touch the ends of the AB and CD lines. Place a tack where they meet at E. Place a pencil through a loop in a string, as shown, and draw

the bottom line of the shade making it as long as the measurement around the bottom ring plus a half inch. Shorten the string and draw the top to fit the top ring allowing for a half inch lap.

NOTE: Book 1—SEWING, for the Home Decorator, and No. 2, Gifts, Novelties and Embroideries, are now 15 cents each, or both books for 25 cents. Readers who have not secured their copies of these two books should send in their orders at once, as no more copies will be available, when the present stock is sold. Your choice of the QUILT LEAFLET showing 30 authentic patchwork stitches; or the RAGRUG LEAFLET, will be included with orders for both books for the present, but the offer may be withdrawn at any time. Leaflets are 6 cents each when ordered without the books.

Everyone should have copies of these two books containing 98 How to Sew articles by Mrs. Spears. Send your order at once to Mrs. Spears, 210 S. Desplaines St., Chicago, Ill.

HOUSEHOLD QUESTIONS

Removing Finger Marks.—Sweet oil will remove finger marks from varnished furniture.

Handy Duster.—The duster with a long handle is a convenience for the housewife who has a bad back.

Getting Ready to Can.—Zinc covers for fruit jars should be washed, then dipped in a solution of soda, dried, and allowed to sun for several hours.

Aid to Golfers.—If the strap on your golf bag makes your shoulder sore, take a piece of old sheepskin and mount it on the strap with the wool inside.

Pink Mayonnaise.—Mayonnaise can be given a decorative pink by the addition of tomato catsup or cooked tomatoes.

Dependable Citizens

The prosperity of a country depends, not on the abundance of its revenues, the strength of its fortifications, or the beauty of its public buildings; but it consists in the number of its cultivated citizens. In its men of education, enlightenment and character.—Luther.

Speak for Literature When men of learning are acted by a knowledge of the world they give a reputation to literature and convince the world of its usefulness.—Addison.

Handwriting Experts Clever

A handwriting expert's first test of a suspected signature is to compare it with several genuine samples. If it duplicates any of them, it is a forgery. No man signs his name twice exactly the same way. Easiest job for an expert is to detect a forgery written in public, says the Washington Post. Even the best forgers need hours to turn out a clever duplicate. For centuries law courts have assumed no two persons have the same handwriting. Yet an Englishman has proven that about 5 per cent of identical twins have identical handwriting.

Kessler

WILLIAM L. DILL, COMMISSIONER OF MOTOR VEHICLES IN NEW JERSEY, AT THE AGE OF EIGHT, HAD TO WALK FIVE MILES TO GET THE HARRISBURG TELEGRAM AND WILLIAMSPORT GREET TO DELIVER TO THE SUBSCRIBERS IN FREEBURG, PA.

In The Third Judicial District Court of the State of New Mexico

Within and for Lincoln County
Earl McNurlen, Plaintiff
vs.
J. S. Van Geem, Defendant
No. 4676

Notice of Pendency of Suit

The State of New Mexico To: J. S. Van Geem, Defendant, Greeting: You are hereby notified that Earl McNurlen has filed his suit against you in the District Court of Lincoln County, State of New Mexico, the general objects of which are to forever quiet and set at rest plaintiff's title to the real estate hereinafter described, and forever bar and estop you as defendant, from having or claiming any interest, right or title in or to the premises described, adverse to plaintiff, Earl McNurlen.

The real property which is the subject of the action and which is described in the Complaint is described as follows:

South half of Southeast quarter of Sec. 18; East half of Sec. 19; Southwest quarter of Northwest quarter and west half of southwest quarter of Sec. 20; Northwest quarter of Northwest quarter of Sec. 29; N½ of NE¼; SW¼ of NE¼; SE¼ of NW¼; Lots 2, 3 and 4; E½ of SW¼; SE¼ of Sec. 30. Lot 1—NE¼ of NW¼, N½ of NE¼ of Sec. 31, all in Twp. 6 South, Range 19 East, N. M. P. M.

The name of Plaintiff's attorney is James M. H. Cullender, and his business address is Roswell, New Mexico.

You are further notified that unless you enter your appearance or pleading herein on or before the 28th day of August, 1939, Plaintiff's Complaint will be taken as confessed and Judgment will be rendered against you by default.

Witness the Honorable Numa C. Fronger, District Judge of the Third Judicial District of the

State of New Mexico, and the seal of the District Court of Lincoln County, this the 3rd day of July, A. D. 1939.

(D. C. Seal) Edward Penfield, J7-28 Clerk.

In the Probate Court

Of Lincoln County, State of New Mexico
In the Matter of the Last Will and Testament of William J. Humphrey, Deceased, No. 490

NOTICE

To Whom It May Concern:

Notice is hereby given that an instrument purporting to be the Last Will and Testament of Wm. J. Humphrey, Deceased, has been filed for probate in the Probate Court of Lincoln County, New Mexico, and by order, the 4th day of Sept., 1939, at the hour of 10 a. m., at the court room of said court in the Village of Carrizozo, New Mexico, is the day, time and place for hearing proof of said Last Will and Testament.

Therefore any person or persons wishing to enter objections to the probating of said Last Will and Testament are hereby notified to file their objections in the office of the County Clerk of Lincoln County, on or before the time set for hearing.

Dated at Carrizozo, N. M., this 7th day of July, 1939.

(Seal) Edward Penfield, J7-28 Probate Clerk.

Courage? Tony Showed Plenty In Louis Brawl

By ROBERT McSHANE

PONDEROUS Tony Galento, "the bear barrel who walks like a man," had his big day recently—and made the most of it. Though Heavyweight Champion Joe Louis carried too many guns for Tony, the Orange, N. J., tavern keeper gave everything he had, earning the respect of all who witnessed the fight. Gone was the buffoonery and clowning which characterized him during training camp days and in his place was a grim ferocity and singleness of purpose. He wanted a knockout and wanted it in a hurry.

His ambition wasn't realized, but Tony can go back to his tap room and tell his customers, for years to come, of the time he had to the devastating Brown Bomber on the canvas, looking up at him. Not many men who have fought Louis can tell that interesting a story.

The dusky heavyweight champ likes to earn his wages in a hurry. And has been very successful in doing just that. Though his record is a familiar one, a recapitulation may soothe the injured feelings of Galento's supporters.

JOE LOUIS—World Champion

Louis has been boxing since 1931. In four and one-half years he has engaged in 43 fights, winning 42 and losing one. Thirty-six of those fights have been won by knockouts and six by decisions. His one defeat was suffered at the hands of Max Schmeling, who, in one of ringdom's most surprising upsets, knocked Louis out in the twelfth round.

This surprising record is further enhanced by nine one-round knockouts. His one round victims included Jack Kracken, Stanley Poreida, Bill Bennett, King Levinsky, Charlie Ritzlaff, Eddie Summa, Max Schmeling, Jack Roper and John Henry Lewis.

Since August 30, 1937, when Tommy Farr went the route with Louis, only one other challenger remained in a vertical position as long as did Galento. That lone individual was Harry Thomas, who lasted for five rounds.

Galento didn't "die in the dressing room." In other words, his courage didn't desert him before he climbed into the ring. His bravery cannot be questioned. When Referee Arthur Donovan stopped the fight in the fourth round, roly-poly Tony was staggering on his stumpy legs, half-blinded by his own blood. To continue would have been suicide.

Soon the war drums of publicity will start all over again. Some other white hope will be built up high enough to be considered a championship "threat." But high-powered publicity won't be of much help to the "threat" when he's roped in the name small enclosure with the invincible Brown Bomber from down Alabama way.

Two New Records

THE hard-hitting New York Yankee cast a still blacker cloak of despair over the seven other teams of the American league recently when they established two new records in a double-header played with the Philadelphia Athletics.

The Yanks pounded out eight home runs as they won the first game 23 to 2. The battling spree continued in the second game, with five homers being chalked up for the world champions, who won the game 10 to 0.

Eight Yankee homers in the first game broke the mark of seven which was established in 1886, and which has stood since that time, having been tied five times. The five circuit cleats in the second game broke the major league record for the most home runs in two consecutive games, which the Yankees of 1936 had set at 11.

Fifty-three total bases on their 27 hits in the first game broke the Yankees' own record of 50, set in 1932. This fell two short of the National league high, set by Cincinnati in 1933.

The previous record of seven home runs in a game had been set by the Detroit team in the old National league in 1886, and of the five ties, the most recent was recorded by the New York Giants, who accumulated a total of seven in beating Cincinnati June 6, 1939. Other holders of the mark included the A's of '21 and the Yanks of '32.

Yankee Problem

WHETHER or not Lou Gehrig's career in the major leagues draws to an end this year depends largely on officials of the New York Yankees.

Lou's playing career is behind him for all time. The most durable ball player who ever lived is suffering from chronic infantile paralysis, a foe before which even the Iron Man's spirit was forced to bend.

It is typical of Gehrig that he refuses to be a part of the wave of sympathy which is engulfing fans all over the nation. He wants no sympathy. Rather, he wants a chance to make use of the courage and determination which carried him through 2,130 consecutive games in 15 seasons.

In brief, he would like to stay in the game, and would be perfectly happy if he could remain with the Yankees in some capacity or other. He helped make the Yankees the world's greatest ball club, and would naturally like to remain with that organization.

Of grave importance to him was the Mayo clinic report, which ended: "He could, however, continue in some executive capacity."

He cannot take part in batting practice, or chase balls in the outfield. He must conserve his muscular energy and is limited to the ordinary types of exercise. At present he is serving as field captain of the Yankees, where his duties are of an extremely light nature. He merely puts on his uniform daily and presents the Yank batting order to the umpire just before the game starts.

What the Yankees will figure out for him to do next year is an unanswered question.

It has been suggested that he be named manager of a Yank farm club. However, it would be almost impossible to appoint a sick man to that position. And likely he wouldn't want the job.

The extent of his recovery will quite possibly determine the Yankee's future courses of action.

Lou looks as healthy as ever, outwardly showing no signs of the disease. His spirits are high, and his grin as handsome as ever. But once in a while he sits down beside Manager Joe McCarthy. They don't say much—maybe because words don't always convey the fullest meaning.

Sport Shorts

ALL-TIME high for errors by a major league catcher is the record of Oscar Stanage, who made 41 mistakes for the Tigers in 1911.

Augie Galan has been playing heads-up ball for a temporary cripple. He began the season with a bad knee, and since that time has injured his right elbow. But not a squawk from Little Augie. Four Cincinnati pitchers, Paul Derringer, Bucky Walters, Lee Grissom and Johnny Vander Meer, have played in the All-Star game. Two spectators, mounted on horses which had thrown their jockeys, gained second and third places recently in a Wellington, New Zealand, steeplechase. Stewards ratified the result and allowed owners to collect the stakes.

Cuba has arranged a baseball hall of fame similar to the one in Cooperstown, N. Y. Candidates for honors include Mike Gonzalez and Joe Mendez, the latter a pitching contemporary of Christy Mathewson. St. Andrews golf course in Scotland has 22 holes. One seems able to explain why golf courses ordinarily have 18.

Catcher Joe Glenn collected three full size World Series checks while with the Yankees without getting into a game. Said to be the longest game played under lights in organized baseball was a recent 21 inning skirmish in which Clintonville, Wis., defeated Two Rivers in a Northern State league game.

Rule Changes

THREE very important changes have been made in the rules of six-man football, according to Stephen Epler, originator of the game, who has worked tirelessly to encourage its development and improve its rules.

The three alterations were devised with a view toward increasing safety of the sport.

One of the regulations calls for a termination of one-sided games. If, at the end of the first half, there is a margin of 45 points between two squads, the game will be stopped much the same as a technical knockout is recorded in boxing. Should a margin of 45 points develop any time in the second half the contest also will be halted.

A second change is concerned with football equipment. The new rule calls for padding on the outside of any hard material which may be used for protective covering. Present equipment is designed for the benefit of the wearer. Now pads must also protect the opponent.

The remaining change is optional. Schools where youngsters are engaged in the game will be permitted to use a smaller ball.

Six-man football has been steadily growing in popularity. It is especially popular in smaller high schools throughout the nation, and has been adopted widely as a college intramural sport.

Science Finds

Possible Cure For Catarrh

By DR. JAMES W. BARTON

ONE of the meanest ailments with which mankind is afflicted is ozaena, or the dry form of catarrh. In addition to the catarrhal symptoms, there is a most offensive odor which makes it almost impossible for these patients to mix with other people.

In 1937 Drs. Hector Mortimer, R. Percy Wright and J. B. Collip in an investigation of this ailment reported their findings in the Canadian Medical Association Journal. They were able to show that this ailment was due to an inherited constitution just as in the case of sufferers with hay fever and some other ailments. That there is a relation between the genital or sex organs and the nose has been known for years and by the use of hormones (estrogen) these research physicians were able to help a number of these ozaena patients by putting this substance up the nose.

As catarrh of the nose and throat is believed to be the commonest cause of deafness, the above named research physicians and Dr. D. L. Thomson now report in the Canadian Medical Association Journal the successful treatment of a number of cases of constitutional deafness by the application of these sex hormone substances up the nose.

Find Constitutional Cause. "The series investigated consists of 153 patients, of whom 94 are females and 59 males. The average age of the females is 37 years, the youngest 11 years of age and the oldest 74; in the males, average age is 38, youngest 9 and the oldest 76." It was found that not only may the two conditions—ozaena and deafness—be present in the same individual, but in one generation of the family ozaena may be found in certain members, whilst others have defective hearing.

The two points we get from this research work is (a) that there seems to be a constitutional condition present that makes these individuals likely to have ozaena or deafness or both, and (b) this very fact makes it possible for the same method of treatment—estrogen—applied to the lining of the nose to greatly help both conditions.

Notwithstanding these findings, these research workers state that they do not suggest that constitutional deafness is due to any lack of gland substance in the individual.

Waste Poisons Cause Biliousness

A physician called to visit a patient who had a "bilious" attack left this parting warning: "Remember, now, no food for 48 hours." The patient promptly replied, "Don't worry about food, I don't want to ever see food any more."

This distaste for food is just one more of nature's little ways of guarding us when we are sick. While food—liquid, soft, or cold—is now given regularly in many ailments, in the treatment of biliousness it is still considered wise to withhold food for 36 to 48 hours.

"The symptoms of a so-called bilious attack may come on more or less acutely. There is a feeling of mental depression, giddiness, headache, nausea or vomiting, loss of appetite or actual repulsion of food, spots floating before the eyes or other disturbance of vision, and a feeling of tiredness and no desire for mental or physical work."

While some of these bilious attacks are due to nervousness or emotional upsets, most of them are due to poisons in the blood from wastes that should have been filtered out by the liver or thrown out by the bowel. Chronic infection of the teeth, tonsils, gall bladder, sinus, or other organs may gradually pile up enough poisonous material or wastes to bring on an attack. After this "explosive" attack which may rid the system of some of the waste or poison products, the patient may feel considerably better.

Food Not Digested. "Imperfectly digested food which has undergone putrefaction in the bowel or poisonous material allowed to remain too long in the bowel (constipation) may be the cause."

Thus the condition may readily follow a badly digested meal.

The first thought in the treatment of an attack is to avoid solid food for 24 to 48 hours, using sweetened water or fruit juices to maintain fluids in the system.

The old-fashioned remedy of a grain of calomel followed by a dose of salts is still good treatment.

The constant thought should be to try to avoid these attacks by eating less rich food, or eating four small meals instead of three large meals, and not eating at all or very lightly when under nervous strain or an emotional upset.

Two Great National Policies Line Up Queer Combinations

President's Control of Money and Neutrality Legislation Bring About Political Mix-Up; Roosevelt Assumes Personal Command and Takes It on the Chin.

By WILLIAM BRUCKART
WNU-Service, National Press-Bldg., Washington, D. C.

WASHINGTON.—It has been often said that politics makes strange bedfellows. It does that many times. Seldom, if ever, however, has there been more unfamiliar faces extending beyond the same bed linen as occurred recently in congress. The political bed served as a temporary resting place for most of the Republicans, a flock of anti-administration Democrats and a sizable collection of "yes" men from the New Deal camp. It was such a ludicrous combination that my memory harkened back to the legend of the Kansas wheat fields where it has been said that owls, prairie dogs and rattle snakes nest together below ground.

Two great national policies, breast fed and clothed by the New Deal, were the issues that brought about the strange alignment of politicians. One question was whether President Roosevelt should be allowed to keep his "emergency" power to tinker with the currency and to buy silver, both domestic and foreign, at prices that provided a subsidy for silver producers. The other question involved this nation's position in its relations with other powers—commonly referred to as "neutrality" legislation.

It ought to be noted, in passing, that the queer and somewhat humorous combination of conservative and radical political warriors delivered a series of uppercuts to the point of Mr. Roosevelt's political chin. They did it several times. Mr. Roosevelt did not like it. He squawked about the obstructionist tactics, which was what they were. But his shrill cry about the tactics was predicated upon argument quite as silly as the political alignment which brought about the temporary defeat.

Trade Brings About Some Strange Combinations

While Mr. Roosevelt's argument was as full of holes as a sieve, it strikes me that it probably was less to be condemned than the action of some of the members of the senate in the same series of controversies.

The strangest of combinations among the politicians evolved from a trade between the Republicans and the portion of the majority in the senate to which I have referred. Senators from silver producing states, some Democrats, some New Dealers, and the Republicans made a deal—a very polite description of the transaction. It worked out so that the silverite senators gave their votes to the Republicans who were seeking to take away Mr. Roosevelt's "emergency" power to change the value of the dollar. The Republicans also wanted to put an end to the administration's purchase of silver produced outside of the United States.

In return for the silverite votes on these issues, the Republicans gave the silverites their votes to increase the price paid for silver mined in this country. The Republicans gave the silver producers an additional subsidy of about 13 cents an ounce, or agreed to stand for that much.

It was a rotten combination, a trade that smells. I have long argued that silver purchase at prices above the market was typical of a great deal of the theory that dominates current administration policies, but that senate combination on the basis which we know cannot justify, nor be justified by, the desire to correct-unsound policies.

There was an old demagogue in the senate some years ago who said, in a flight of oratory, that "it is sometimes necessary to rise above principle for the party's sake." His soul ought to rest in peace, forever, because his goal was more than achieved by the rare political trade among the senators and by the type of argument Mr. Roosevelt made in demanding retention of his "emergency" powers over money.

No Attack Made by Anyone Upon Stabilization Fund

While Mr. Roosevelt was only temporarily defeated in his program for control of the money of the country, it might be well to review the shallow argument he put up as the reasons why the "emergency" powers should be continued. He said, for example, that taking away his control of the dollar and the right to subsidize silver was like laying up half of the navy's ships in the navy yards. I do not follow that analogy, so I will forget about that one. The other argument was that withdrawal of the power to devalue the dollar would place the nation's currency again in the hands of the Wall Street gamblers. Mr. Roosevelt said they would speculate in currencies and that there would be trade wars again. It was the same old story: When you have no other goat, jump on Wall Street.

But it is well just here to point out one phase of the situation that resulted largely from the stubbornness of the President. Throughout the battle with the senate over the so-called monetary bill, there never was an attack by anybody upon the stabilization fund, also an emergency proposition. There is \$2,000,000,000 in that fund and it is managed by the treasury which seeks, by purchase or sale of foreign currencies, to maintain some even relationship between American and foreign money. It has worked well. It will be continued, without a doubt, and it certainly should be. As a piece of constructive money machinery, it shines like the millions of dollars of unneeded and useless silver that has been purchased by subsidy payments. The stabilization fund is the thing that prevents Wall Street speculation in currencies, not the President's power to devalue the dollar. But because Mr. Roosevelt insisted on all of the powers being continued beyond June 30, of this year, the whole thing went smash. Thus was necessitated new legislation to get even the good parts of the program.

stabilization fund, also an emergency proposition. There is \$2,000,000,000 in that fund and it is managed by the treasury which seeks, by purchase or sale of foreign currencies, to maintain some even relationship between American and foreign money. It has worked well. It will be continued, without a doubt, and it certainly should be. As a piece of constructive money machinery, it shines like the millions of dollars of unneeded and useless silver that has been purchased by subsidy payments. The stabilization fund is the thing that prevents Wall Street speculation in currencies, not the President's power to devalue the dollar. But because Mr. Roosevelt insisted on all of the powers being continued beyond June 30, of this year, the whole thing went smash. Thus was necessitated new legislation to get even the good parts of the program.

Roosevelt Takes Command Of Situation; Program Flaps

Mention ought to be made of how the whole program crashed, or was tossed out. When the Republicans and the Democrats and New Dealers from silver states made their deal, it appeared that Mr. Roosevelt would be satisfied to continue to buy silver from American producers and to operate the stabilization fund. But he wasn't. He rushed to Washington from his Hyde Park, N. Y., estate and took command. The bill which the senate had subjected to emasculation under the strange-bedfellow combination originated in the house. It has to be sent back to the house, therefore, to have the amendments considered. That meant a conference between special delegations from the house and the senate, and here was where Mr. Roosevelt got busy. He directed the house delegation to refuse the senate amendments, and the senate conference delegation, being headed up by Majority Leader Barkley, another equally fervent New Dealer, Senator Wagner of New York, and a sometimes New Dealer, Byrnes of South Carolina, yielded to the demands of the administration.

That circumstance is not unusual in legislative affairs. But it was thought the senate coalition of Republicans and silverite senators would be able to force some sort of a compromise. That did not happen. All of the senators who had sold their votes for a higher price for silver turned tail and ran. They left the Republicans holding the bag. Which would have been very bad for the Republicans, except that all of this happened during the day of June 30, and the powers involved were to expire at midnight, that night, by limitation in the law itself.

The Republicans were pretty sore about the situation. They had the element of time on their side, however, and so they engaged in "legitimate discussion" of the amendments, of the perfidy of the silverite senators, of Mr. Roosevelt's reasons and other things, until after the witching hour of midnight. The whole thing ended on a sour note.

Voting Usually Reflects Sentiment of the People

So the circumstances as we have seen fail to do credit either to the President, or the senate Republicans or the senate New Dealers. It was a pretty low grade of politics, but it disclosed one thing: there is rather large representation in the house and the senate which has lagging confidence in Mr. Roosevelt. Now, pursuing that further, I have noted the usual voting of house and senate rather reflects the sentiment throughout the country.

I think this lack of confidence in Mr. Roosevelt is further shown by the long drawn-out battle over what powers the President should have in dealing with international problems. Mr. Roosevelt has asked for rights that would let him designate "war zones," and would permit him to order Americans away from them. He has sought to obtain legislative authority to sell arms and munitions if they are sold for cash and carried away from our shores by boats of the purchasing nation.

Some of the things he has sought seem to me to be reasonable, but the house has not thought so, and I expect the senate will have many words to say about them also. There is so much stalling and maneuvering and efforts to save political faces that certain conclusions are inescapable. I referred to the lack of confidence in Mr. Roosevelt displayed in several ways. It is perhaps more manifest with respect to the neutrality question than in any other way. Indeed, it has been gossiped around Capitol hallways for a couple of months that congress will not adjourn as long as international crises are popping around like firecrackers. That, of course, is an exaggeration; but it is not exaggeration to say that a considerable number of senators and representatives do not want to leave Mr. Roosevelt an entirely free hand in international dealing.

Crocheted Edgings For Every Purpose

Pattern No. 2002.

You'll want to crochet these edgings—they're all different widths—since they lend themselves to so many uses. Some are suitable for round dollies. Pattern 2002 contains directions for making edgings; illustrations of them and stitches; materials required.

Send 15 cents in coins for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Please write your name, address and pattern number plainly.

Strange Facts

Regional Moods Ears to Hear With Who Is Perfect?

Motion-picture producers, wishing to adapt movies to different regional tastes, have been known to make pictures with two types of endings—a tragic one for the East and West coasts and a happy one for the Middle West.

Among the remarkable physical features that have been produced in animals through selective breeding are the enormous ears of the "lop-eared" rabbits. Some on record are six inches wide by twenty-eight inches long.

In at least 90 per cent of the American people, the left eye is nearer to the nose than the right eye.

The tropical American vine called the ceriman, *Monstera deliciosa*, bears a peculiar fruit that resembles a pine cone and is about a foot in length. This fruit deteriorates inch by inch as it ripens, and must be eaten as it matures, a period that extends over several days.—Collier's.

There's a Good Reason You're Constipated!

When there's something wrong with you, the first rule is: get at the cause. If you are constipated, don't endure it first and cure it afterward. Find out what's giving you the trouble.

Chances are it's simple if you eat the super-refined foods most people do: meat, white bread, potatoes. It's likely you don't get enough "bulk." And "bulk" doesn't mean a lot of food. It's a kind of food that isn't consumed in the body, but leaves a soft "bulky" mass in the intestines and helps a bowel movement.

If this is your trouble, you should eat a natural "bulk-producing" food—such as one as the crunchy, toasted, ready-to-eat cereal—Kellogg's All-Bran. All-Bran is the source of prevention that's worth a pound of emergency relief. Eat it every day, drink plenty of water, and soon the "Regular" All-Bran is made by Kellogg's in Battle Creek.

To Spend Wisely A fool may make money, but it takes a wiser man to spend it.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 35 to 50), who fears she'll lose her appeal to men, who worries about hot flashes, loss of pep, daisy spells, upset nerves and moodiness.

Get more fresh air, 8 hrs. sleep and if you need a good general system tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vivacity to enjoy life and assist calming jittery nerves and disturbing symptoms that often accompany change of life. WELL WORTH TRYING!

BEACONS OF SAFETY

Like a beacon light on the height—the advertisements in newspapers direct you to newer, better and easier ways of providing the things needed or desired. It shines, this beacon of newspaper advertising—and it will be to your advantage to follow it whenever you make a purchase.

THREE SHUTTERED HOUSES

By BEN AMES WILLIAMS

Copyright—WNU SERVICE

THE STORY SO FAR

Driving home through a torrential rain, young, well-to-do Clint Jervies picks up a girl, faintly clad, running in terror-stricken flight down the road. She rides a short way, leaves the car and runs into the woods. He decides to talk to his dear friends, Inspector Tope and Miss Moss, about his adventure. Clint still thinks of her as Miss settled down, now manages the Jervies estate himself. In three shuttered houses, all lived three families. In one house lived old Benman Hurder, his wife, who had been second-house was Aunt Evie Taine, Uncle Justus and brothers Rab and Asa. The third to June as "Uncle Jim." Following their usual custom the three families gathered in. She was given warm milk, and insisted on taking two sleeping tablets, one more than usual. Strangely upset, June slept fitfully, and in the middle of the night went to see her mother. She found her dead. "Panic stricken, June ran from the room, out the unlocked door, and into the storm to get Doctor Cabler. It was here that Clint Jervies with the police, who are told by the family doctor that Kitty Leaford died of an overdose of sleeping powder, and the Inspector are not satisfied and feel further investigation is necessary. When Clint and Tope drive back to Keneasaw Hill they find Inspector Heale and the medical examiner, who also reports that queer circumstances surround the death. After returning home June ran to see Uncle Jim and told him of her mother's death. There Clint and the Inspector visit them. Clint returns to the house with June, and tells her that he will call her soon. Before they leave Tope questions the girl concerning the powders. Tope finds that the theory of the overdose is not logical. It would take more powders than Kitty Leaford knowingly took to kill her in such a short time.

CHAPTER VII—Continued

Heale had no more than finished giving instructions when Doctor Cabler arrived. The physician was a small man, grizzled, a little bent, his shoulders surprisingly heavy, with a steady, severe eye. After the introductions, Inspector Heale put the case to him.

Tope, watching the Doctor, thought his lips stiffened and grew pale as he listened; and after Inspector Heale had finished, the physician was silent for a while.

"Her heart was not strong," he said at last reflectively. No one commented on this; and in the end he nodded, surrendering.

"I had overlooked that point," he confessed. "Yes, gentlemen; it must be true!"

"You mean she must have had more than four tablets?" Heale asked.

"Unquestionably," Doctor Cabler agreed. "To die so quickly."

Inspector Heale said seriously: "You understand, Doctor Cabler, this gives her death the look of murder."

Doctor Cabler nodded slowly. "It seems incredible," he declared. "But yet there is something terrible in those houses up there. Mrs. Bowdon rules them all. She has something massive in her, something like a crushing weight."

"How about Mr. Bowdon?" Inspector Tope asked; and Doctor Cabler said guardedly:

"He surrendered years ago. He is not at all well. His heart plays ugly tricks, and his blood-pressure is very high. He has not long to live." And he added: "I have sometimes thought it was his imminent death which oppressed them all."

The Inspector nodded. "I don't want to come right out and say 'murder,' Doctor Cabler," he explained. "But we want to look around inside the house. Mrs. Tope here suggested that they would all go to the funeral. If they do, the house would be empty then."

Suddenly, then, Tope asked: "Doctor, can this drug be bought by anyone, without prescription?"

"From a friendly pharmacist, perhaps. By some subterfuge."

"Mrs. Leaford had used it long?"

"Four or five years. I supplied it to her myself. She did not even know the name. I gave it to her in plain bottles, without a label, so that she would not know what it was. This was for her own protection. She could not secure it except through me."

"If someone wished to poison her," Tope suggested steadily, "that person might have stolen tablets out of her bottle, one at a time, over a period of weeks, without the theft being noticed. So he would have them when the time came."

"Readily," the Doctor agreed. "I urged Mrs. Leaford to keep a count of the tablets she took; but she was careless and impetuous. She took an overdose once before. Three tablets. It made her very ill."

"I'm trying to understand," Tope explained, "how she was persuaded or compelled to take the extra dose. Were there any bruises on her lips, Doctor?"

Doctor Cabler shook his head. "No, none."

"Was there any other medicine she was accustomed to take? In capsules, for instance? So that someone could have crushed some pills into powder and filled a capsule and put it with the others she had?"

The Doctor said again: "No, I know of nothing of the kind." He rose, and he repeated: "No, nothing. I can't help you there." And he asked in a hushed voice: "Inspector, what will you do?"

Inspector Heale hesitated. "I don't yet know," he confessed.

Inspector Heale went with him to the door. A few moments afterward Asa Taine was announced.

Tope watched Asa with a deep attention, from the young man's first appearance. This Asa Taine—he may have been no more than thirty, but he looked older, and there was the shadow of dissipation on his countenance—acknowledged the in-

roductions quietly, but with a quick, appraising glance for Tope and for Miss Moss. He spoke in a slow, sardonic tone, facing them fairly.

"I'm told you want to see me," he said. "Why?"

And before Inspector Heale could speak, he added in a grim drawl: "To save my life, I might say that I can guess you think Kitty Leaford's death was murder, so you can begin your explanations there."

"Well, there are certain circumstances—" Heale began. "Someone was in Mrs. Leaford's room after she went to sleep."

"How do you know?"

"Because Miss Leaford put a certain bottle in the medicine cabinet."

net in her mother's bathroom, and it is gone."

Asa Taine smiled without mirth, and drew from his pocket a small square bottle. "Here it is!" he said. There was a moment's incredulous hush; then Inspector Heale asked sharply: "How do you know this is it?"

"I've seen it often enough," Asa declared.

"Where? When?"

"Kitty liked to play 'grande dame,'" Asa explained. "She used to hold receptions in bed. She'd stay in bed half the day, sometimes. Rab and I liked her; and we used to go up and visit with her there. June and Grandma Bowdon did too."

"Where did you find it?" Heale demanded. "This bottle."

"In the cellar," said Asa. "Under the laundry-chute."

"How'd you happen to look down there?"

"Second sight, maybe," Asa suggested. "Viewing the scene of the crime!"

"What made you think it was a crime?" Inspector Heale snapped.

They were all watching him acutely; but Asa Taine said simply: "Kitty wouldn't kill herself. And an ordinary overdose wouldn't kill her so quickly. I've handled criminal law, you know."

"See any strangers around?"

"Why?" Asa countered warily; and Tope said:

"I heard there was a man in the woods back of the house this morning."

"Oh, that was I," Asa assured him casually. "I saw you. I was afraid you'd spotted me, at the time."

Tope for once in his life was pink with embarrassment; and Miss Moss smiled faintly. But Tope asked:

"What were you doing? Why did you hide?"

"Private business," said Asa gently.

Miss Moss asked: "Mr. Taine, did Mrs. Leaford leave a will?"

"No, madam," he said. "I answer you explicitly: She died intestate, and insolvent too, for the matter of that."

They were for a moment silent, and he turned toward the door; but Inspector Heale said abruptly:

"Wait a minute."

"Taine," Inspector Tope examined, "Inspector Heale doesn't

want to make too much trouble; but he must look into this. Can you arrange to give him access to the house during the funeral tomorrow afternoon?"

The young man hesitated. He said at last: "Yes, I should say so. You can prowl all you want, but it's too late now. There's nothing left to find." And he exclaimed in a sudden deep passion: "If she was killed, it was someone outside! They might torture her, but they'd never kill her. None of them up there."

Then the door shut resoundingly behind him, and he was gone. Inspector Tope wiped his brow, and Inspector Heale muttered angrily: "That fellow knows something. Maybe I ought to hold on to him, make him talk."

But Tope shook his head. "If you set out to arrest anyone right now," he pointed out, "you'd have to start with Miss Leaford."

And Miss Moss suggested softly: "There might be another possibility. I wonder if Mrs. Leaford's husband is still alive? And how he felt toward her?"

The two men stared at her with wide astonished eyes.

CHAPTER VIII

The fortnight after Kitty Leaford's death was for Inspector Tope a long and tormenting time; for a search of the Hurder-house while it stood empty revealed exactly nothing at all. And his utmost urgencies failed to drive Inspector Heale to any vigorous action. And Dr. Derrle abetted him by sticking to the accident theory.

The day after the funeral Tope and Clint talked with Heale in his office, and Tope said sternly:

"Here's my notion, Inspector. Mrs. Leaford was about the most harmless person on Keneasaw Hill. She hadn't hurt anyone; she didn't want her own way about anything; she didn't have any money; she didn't have a thing that would make anyone want to kill her. But someone did kill her, and whoever did it had a deep, hidden reason for doing it. And we don't know what that reason was."

"All right. Now if we—if you, Inspector—pretend you don't suspect anything, whoever did it will get bold. He or she will do something else. That's what you're waiting for, isn't it?" Inspector Heale nodded an emphatic agreement, and Tope said flatly: "You know what that something will be? Someone else will be killed, up there!"

Inspector Heale stared at him. "Why?" he demanded. "What makes you figure that?"

"Because there wasn't any reason for killing Mrs. Leaford alone," Tope insisted. "Killing her is bound to have been a part of a bigger scheme. If you let things slide, you'll have another murder on your hands."

Clint, listening to the old man whose wisdom he knew, felt himself cold with fear for June, who dwelt in that shuttered house where death had been a visitor. But Inspector Heale said with a slow, freighted violence: "Well, Inspector, I'm glad to have your advice, any time, of course. But I have to make the decisions. You'll have to let me work this out my own way."

And they could not move him. On the way back to town, Clint saw Inspector Tope irritated for the first time in his experience. "I hate a fool," the old man said fretfully. "And Heale's a fool. I tell you, Clint, there's death loose in those old houses."

For the rest of the drive the old man sat silent, absorbed in his own reflections, till they came home to the little house in Longwood, where Miss Moss had dinner waiting. They sat long at table, going over and

over the things they knew, seeking to read their implications. And Miss Moss was a guess ahead of the Inspector tonight. Tope had reported that Heale was trying to locate Jim Glover.

"He's gone," the Inspector pointed out. "So Heale thinks he's run away. Heale's like one of these whippets. He'll chase anything that runs."

Miss Moss smiled faintly. "I may be responsible for that," she confessed. "You remember I suggested to Heale that he try to find Kitty Leaford's husband."

And the two men stared at her; and Clint, whose thoughts now turned always in one direction, cried: "You think this man is June's father?"

Miss Moss nodded. "What makes you think that?"

"Why else did he live so near, except to see June?" Miss Moss suggested. "And why did they let him live there, unless he had some such hold on them?"

Clint asked: "Do you think June knows who he is?"

Miss Moss shook her head; and Tope said reflectively: "If it's true, if that's who Glover is, and Heale finds it out, he'll figure that Leaford wanted to marry someone else, and poisoned Mrs. Leaford to be free."

"I haven't seen the man," Miss Moss confessed. "Do you think he might have done it? Remember, the front door of the house was open. Someone went in from outside."

Tope sat very still. "No, Glover, or Leaford, or whatever his name is, didn't do it," he decided. "But Mrs. Tope, if Mrs. Leaford's glass of milk that night was poisoned, why would anyone have to go into the house from outside? She'd drunk the milk and gone to sleep before the door downstairs was ever locked."

"Someone might have stayed in the house, left the door unbolting when he went out."

"But why?" Tope insisted. "Kitty Leaford was already as good as dead, why?" He said half to himself: "Maybe they forgot to lock the door, that night. I'm going to see Mr. Hurder myself. See what he has to say."

And he added: "I want to figure some way to meet Justus Taine too, and his cons. See what they're like. I've met Asa, but not the other one."

Miss Moss suggested an expedient to this end: so during the next few days Clint, in his capacity as head of the Jervies Trust, pretended to revive that old project of buying some of the woodlands belonging to the Keneasaw farm and cutting them up into house lots. The office of Bowdon and Taine controlled the land; and Clint made an appointment to see Rab, and took Tope with him.

Rab met them in friendly fashion, discussed the project and made shrewd comments; at Tope's suggestion he led them into his father's office, and he and Clint shouted the details of Clint's proposal into the ears of Justus Taine, and that man sat stolid and silent, his eyes blank, watching Tope while he heard, or did not hear, what they had to say. Himself spoke at last half a dozen words of dissent, and so dismissed them.

After Kitty Leaford's death, Grandpa and Grandma Hurder moved dumbly about the house, crushed and broken with grief. June tried to comfort and to reassure them; but once when she sought to beguile Grandpa Hurder into some peace of mind he said in slow tones: "Your mother was crucified, June. For twenty years! And I was to blame."

Star Dust

★ New Irish Contingent

★ Olivier Reaches Top

★ Pseudo-Scraps on Air

By Virginia Vale

THERE seems to be a new cycle starting in the movies, one involving young actresses who hail from Ireland. If they have red hair and green eyes so much the better.

Let me refer you to Greer Garson as a starter. She was launched in this country in "Goodbye Mr. Chips," you know, and is a red haired, green eyed beauty. Geraldine Fitzgerald is another product of the Irish theaters. Maureen O'Hara, who arrived in this country with her mother recently, also with Charles Laughton, is the latest example. He felt that she should play "Esmeralda" when he does "The Hunchback of Notre Dame" for RKO.

She was born and brought up in Dublin, studied at the Abbey theater's school, and did a few bits in British pictures before she appeared in his "Jamaica Inn."

As she was just 18 everyone was prepared to give her all the encouragement they could, since she'd be in the company of experi-

enced players. But after the first few days they discovered that she didn't need it. In fact, they had to be on their toes to keep her from walking air with the picture.

Perhaps ambitious youngsters who want to land in pictures would do well to rush to Ireland, achieve red hair, and start in with the Abbey Players, if this cycle is to continue. The only difficulty would seem to be acquiring green eyes, and exceptional ability to act.

If you read that delightful novel, "Rebecca," which until recently led so many best-seller lists, you'll be interested to know that Laurence Olivier has been signed to play the role of the hero.

Although he is young, Olivier has had years of experience on the stage and in the movies, but until this year he never reached the heights. Now it seems as if everyone wants him for a new production. He is appearing on the New York stage in "No Time for Comedy," with Katherine Cornell, and you can see him giving an even better performance in "Wuthering Heights," opposite Merle Oberon, than he gives in the play. He'll be perfect for the part of "Max de Winter" in "Rebecca."

If a brand new squabble breaks out between two radio stars, don't be surprised, and don't take it seriously. There isn't a really good feud raging on the air now, and radio stars discovered long ago that feeds whip up interest in their programs.

The best one of all took place years ago, between Rudy Vallee and Will Osborne, but that one was rather serious. Walter Winchell and Ben Bernie started theirs on purpose, and kept it going for years. A certain press agent has been trying to start one of those serialized battles between Sammy Kaye and Kay Kyser, with the question of which one originated the idea of singing song titles as the bone of contention, but he it said to the everlasting credit of Kyser and Kaye that they're too proud to fight.

Pat Friday, the 17-year-old coed from the University of California, who is singing on Bing Crosby's program this summer, will probably be a top-notch in movies and radio in a few years. Crosby heard her sing at an amateur night at a Beverly Hills restaurant, and recently she made her coast-to-coast debut on the air, under his direction. The telephone switchboard at the Hollywood NBC studios was promptly jammed with inquiries about her, and the following morning two movie companies offered her contracts. She turned them down; wants to work only in radio until she finishes her college course, two years from now.

ODDS AND ENDS—One Man's Family, has again been named the best serial dramatic program on the air in the annual Radio Guide poll. . . . But in the same poll the Charlie McCarthy program won six awards. . . . Errol Flynn has passed his U. S. Department of Commerce tests and has a private pilot's license. . . . Bette Davis has had to shave her eyebrows and forehead to play "Queen Elizabeth"—the studio will have to give her a vacation after she finishes, to let them grow in again. (Released by Western Newspaper Union.)

Doctors Discover Cause of Lip Lesions; Ariboflavinosis, Name Coined for It

In the future when baby refuses to eat her spinach, Mother may be heard warning her against the dangers of ariboflavinosis—that is, if she can pronounce.

Two doctors of the National Institute of Health, Drs. W. H. Sebrell and R. E. Butler, adopted the word which they admit is "unfortunate" but the best one they could think of to describe the disease, says the Washington Star.

Ariboflavinosis, they reported, is the cause of lip lesions, which had been marked in various parts of the world—but the cause of which had never been determined.

The disease is due to the absence of riboflavin in the diet, according to their experiments. One of the vitamin B group, riboflavin is widely distributed in nature in such foods as milk and other dairy products, meat, eggs and green leafy vegetables. Liver and dried brewer's yeast also are good sources of the vitamin.

The effect of the lack of the vitamin on human beings was determined from an experiment in which

18 women were given a daily ration of cornmeal, cowpeas, lard, casein, flour, white bread, calcium carbonate, tomato juice, cod liver oil, syrup and syrup of iodide or iron. Later, the diet was supplemented by crystals containing sources of vitamin C and B1 to make sure the patients weren't suffering from any vitamin deficiency except riboflavin.

Ten of the 18 women developed lesions in the lips in 94 to 130 days after the beginning of the experiment. In most of these cases, the symptoms disappeared five to six days after the inclusion of the riboflavin vitamin in their diet.

The doctors said that meeting the daily human requirement of riboflavin isn't difficult. A milligram of the vitamin is all that's needed daily to forestall ariboflavinosis.

Sponge Cultivation Sponges are planted artificially by attaching fertile clippings from mature sponges to small concrete discs that are placed on the floor of the sea and left to grow. Time and nature do the rest.

Coyote News

(W. J. Ferguson)

Josie and Dorothy Ferguson returned home from a visit with their Aunt Edna and Uncle Joe Thomas in Oklahoma.

Mr. and Mrs. Vernon Hefker have moved back to Coyote from Luna where Mr. Hefker relieved John Brickley nearly two months, while Mr. Brickley attended the New York World's Fair.

Miss Garrison of Mountainair is visiting the Raymond Hobbs family.

R. H. Woodard, Pumper at Coyote and his family left Wednesday for Boston, Mass., and to the New York World's Fair. Mr. Hefker will relieve Mr. Woodard.

W. R. Pfingsten relieved Mr. Porter at Luna several days last week, but is now back on the job as Helper.

T. J. Shields and W. J. Ferguson attended the afternoon session of the Lincoln County Singing Convention at Tinnie last Sunday.

M. L. Norris and daughters Dorris and Anina attended the ball game at Lincoln Sunday.

Miss Marian Pruett of Carrizozo visited the Norris girls and went with them to the ball game at Lincoln Sunday.

Robt. Stewart was home over the week-end from the west end of the Rio Grande Division where he is with the bridge gang.

Mrs. J. F. Boyd visited at the home of her parents Mr. and Mrs. T. J. Shields this week.

Walter Leonard and family visited Robt. Stewart and family Sunday. Walter is with the water service gang and resides in El Paso.

Ray and George Hobbs were home with their families over the week-end.

Several from this place are planning to attend the all-day session of the Lincoln County Singing Convention at Ruidoso Sunday, July 23.

L. V. Hefker transacted business in El Paso over the week-end, returning home Tuesday.

FREE DANCE at the Yucca Saturday night, July 15. Lou Fink and His Boys will furnish the music for the occasion.

Reid Dudley of the Paden Drug Store is on his vacation.

Our friend Harry Straley of his ranch near Ancho was a Carrizozo business visitor last Saturday. Harry never fails to drop in and say "hello," for which we thank him.

COMMENTS

Lewis Burke

—And R U Listenin'?
Little old town, good afternoon!

**HARRY MILLER'S NEW
ROLLER SKATING RINK**
Opened with a B-a-n-g Saturday afternoon, following handbills announcing that it would open at 1 p. m that day.

The building is commodious; has an excellent floor of bird's-eye maple; everything is set for your pleasure. Harry has one of the largest Radiophones (with amplifiers) we have ever seen. This machine will furnish music for the skaters; and Lou Fink and his Boys, the jazz band supreme, will also play on different occasions. So Harry invites you to come out and skate; if you don't, refreshing beverages are to be had while watching others "go 'round and 'round"

—In response to many inquiries, there will be dances held at the Miller Hall frequently.

HOLLYWOOD SLACKS
See the new line of Ladies' & Misses' SLACKS at the Burke Gift Shop.

There was a cloudburst on the Doyle Rentfrow ranch this week. Mr. Rentfrow says that the arroyo was half a mile wide in some places. — Some birds have all the luck!

Former Representative John J. O'Connor, conservative New York Democrat, who was a victim of President Roosevelt's 1938 political "purge," retallated today with a call to all Democrats to unite and in 1940 elect "a sensible Democrat for President."

A new line of Ladies' and Misses' Sandals in White also in delicate pastel shades. All sizes. Lowest prices. At the Burke Gift Shop.

Pres. Roosevelt has appointed Paul McNutt to the post as chief of the new Federal Security Administration.

Quoting a Corona man: "We have one 'nut' in the White House at present. Now all we need is a 'Mc-Nutt' to finish things off. If Roosevelt runs for a third term, I would suggest McNutt as a nominee for Vice-President, and we would be imperiled."

NEW THINGS
Arriving daily at the Burke Gift Shop.

LOU FINK & HIS BOYS
Will furnish music for a Free Dance at the Yucca Cocktail Parlor tomorrow, Saturday nite, July 15. You are invited—and we do mean YOU.

OUT-AND-SHOOT, TEXAS
They say, is one of the most peaceful towns of the state.

Pres. Roosevelt is quoted as saying, many moons ago, "There won't be any strikes during MY term in the White House."

CAN'T STRIKE AGAINST GOVERNMENT?
—Boy, page the CIO, A F of L, and last but not least, the W P A if you want to get the low-down on the strike situation —As the bird says, "We haven't had nothin' else but Strikes."

So, Hasta la Vista.
